Notes to Consolidated Financial Statements (Unaudited) **America's Car-Mart, Inc.**

A – Organization and Business

America's Car-Mart, Inc., a Texas corporation (the "Company"), is one of the largest publicly held automotive retailers in the United States focused exclusively on the "Integrated Auto Sales and Finance" segment of the used car market. References to the Company typically include the Company's consolidated subsidiaries. The Company's operations are principally conducted through its two operating subsidiaries, America's Car Mart, Inc., an Arkansas corporation ("Car-Mart of Arkansas"), and Colonial Auto Finance, Inc., an Arkansas corporation ("Colonial"). The Company primarily sells older model used vehicles and provides financing for substantially all of its customers. Many of the Company's customers have limited financial resources and would not qualify for conventional financing as a result of limited credit histories or past credit problems. As of October 31, 2016, the Company operated 143 dealerships located primarily in small cities throughout the South-Central United States.

B – Summary of Significant Accounting Policies

General

The accompanying condensed consolidated balance sheet as of April 30, 2016, which has been derived from audited financial statements, and the unaudited interim condensed financial statements as of October 31, 2016 and 2015, have been prepared in accordance with generally accepted accounting principles for interim financial information and in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the six months ended October 31, 2016 are not necessarily indicative of the results that may be expected for the year ending April 30, 2017. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's annual report on Form 10-K for the year ended April 30, 2016.

Principles of Consolidation

The consolidated financial statements include the accounts of America's Car-Mart, Inc. and its subsidiaries. All intercompany accounts and transactions have been eliminated.

Segment Information

Each dealership is an operating segment with its results regularly reviewed by the Company's chief operating decision maker in an effort to make decisions about resources to be allocated to the segment and to assess its performance. Individual dealerships meet the aggregation criteria for reporting purposes under the current accounting guidance. The Company operates in the Integrated Auto Sales and Finance segment of the used car market, also referred to as the Integrated Auto Sales and Finance industry. In this industry, the nature of the sale and the financing of the transaction, financing processes, the type of customer and the methods used to distribute the Company's products and services, including the actual servicing of the contracts as well as the regulatory environment in which the Company operates, all have similar characteristics. Each of our individual dealerships is similar in nature and only engages in the selling and financing of used vehicles. All individual dealerships have similar operating characteristics. As such, individual dealerships have been aggregated into one reportable segment.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the period. Actual results could differ from those estimates. Significant estimates include, but are not limited to, the Company's allowance for credit losses.

Concentration of Risk

The Company provides financing in connection with the sale of substantially all of its vehicles. These sales are made primarily to customers residing in Alabama, Arkansas, Georgia, Kentucky, Mississippi, Missouri, Oklahoma, Tennessee, and Texas, with approximately 30% of current period revenues resulting from sales to Arkansas customers.

Periodically, the Company maintains cash in financial institutions in excess of the amounts insured by the federal government. The Company's revolving credit facilities mature in October 2017. Subsequent to October 31, 2016, the Company entered into an agreement which amended and restated the credit facilities; see further explanation in Note F.

Restrictions on Distributions/Dividends

The Company's revolving credit facilities generally restrict distributions by the Company to its shareholders. The distribution limitations under the Credit Facilities allow the Company to repurchase the Company's stock so long as: either (a) the aggregate amount of such repurchases does not exceed $40 million beginning October 8, 2014 and the sum of borrowing bases combined minus the principal balances of all revolver loans after giving effect to such repurchases is equal to or greater than 30% of the sum of the borrowing bases, or (b) the aggregate amount of such repurchases does not exceed 75% of the consolidated net income of the Company measured on a trailing twelve month basis; provided that immediately before and after giving effect to the stock repurchases, at least 12.5% of the aggregate funds committed under the credit facilities remain available. Thus, the Company is limited in its ability to pay dividends or make other distributions to its shareholders without the consent of the Company's lenders.

Cash Equivalents

The Company considers all highly liquid debt instruments purchased with original maturities of three months or less to be cash equivalents.

Finance Receivables, Repossessions and Charge-offs and Allowance for Credit Losses

The Company originates installment sale contracts from the sale of used vehicles at its dealerships. These installment sale contracts carry an average interest rate of approximately 15.5% using the simple effective interest method including any deferred fees. In May 2016, the Company increased its retail installment sales contract interest rate from 15.0% to 16.5% in response to continued high levels of credit losses. Contract origination costs are not significant. The installment sale contracts are not pre-computed contracts whereby borrowers are obligated to pay back principal plus the full amount of interest that will accrue over the entire term of the contract. Finance receivables are collateralized by vehicles sold and consist of contractually scheduled payments from installment contracts net of unearned finance charges and an allowance for credit losses. Unearned finance charges represent the balance of interest receivable to be earned over the entire term of the related installment contract, less the earned amount ($2.3 million at October 31, 2016 and $1.7 million April 30, 2016 on the Condensed Consolidated Balance Sheets), and as such, have been reflected as a reduction to the gross contract amount in arriving at the principal balance in finance receivables.

An account is considered delinquent when the customer is one day or more behind on their contractual payments. While the Company does not formally place contracts on nonaccrual status, the immaterial amount of interest that may accrue after an account becomes delinquent up until the point of resolution via repossession or write-off, is reserved for against the accrued interest on the Condensed Consolidated Balance Sheets. Delinquent contracts are

addressed and either made current by the customer, which is the case in most situations, or the vehicle is repossessed or written off if the collateral cannot be recovered quickly. Customer payments are set to match their payday with approximately 73% of payments due on either a weekly or bi-weekly basis. The frequency of the payment due dates combined with the declining value of collateral lead to prompt resolutions on problem accounts. At October 31, 2016, 4.8% of the Company's finance receivable balances were 30 days or more past due compared to 3.5% at October 31, 2015.

Substantially all of the Company's automobile contracts involve contracts made to individuals with impaired or limited credit histories or higher debt-to-income ratios than permitted by traditional lenders. Contracts made with buyers who are restricted in their ability to obtain financing from traditional lenders generally entail a higher risk of delinquency, default and repossession, and higher losses than contracts made with buyers with better credit.

The Company strives to keep its delinquency percentages low, and not to repossess vehicles. Accounts two days late are sent a notice in the mail. Accounts three days late are contacted by telephone. Notes from each telephone contact are electronically maintained in the Company's computer system. The Company attempts to resolve payment delinquencies amicably prior to repossessing a vehicle. If a customer becomes severely delinquent in his or her payments, and management determines that timely collection of future payments is not probable, the Company will take steps to repossess the vehicle.

Periodically, the Company enters into contract modifications with its customers to extend or modify the payment terms. The Company only enters into a contract modification or extension if it believes such action will increase the amount of monies the Company will ultimately realize on the customer's account and will increase the likelihood of the customer being able to pay off the vehicle contract. At the time of modification, the Company expects to collect amounts due including accrued interest at the contractual interest rate for the period of delay. No other concessions are granted to customers, beyond the extension of additional time, at the time of modifications. Modifications are minor and are made for payday changes, minor vehicle repairs and other reasons. For those vehicles that are repossessed, the majority are returned or surrendered by the customer on a voluntary basis. Other repossessions are performed by Company personnel or third party repossession agents. Depending on the condition of a repossessed vehicle, it is either resold on a retail basis through a Company dealership, or sold for cash on a wholesale basis primarily through physical or online auctions.

Accounts are charged-off after the expiration of a statutory notice period for repossessed accounts, or when management determines that the timely collection of future payments is not probable for accounts where the Company has been unable to repossess the vehicle. For accounts with respect to which the vehicle was repossessed, the fair value of the repossessed vehicle is charged as a reduction of the gross finance receivables balance charged-off. For the quarter ended October 31, 2016, on average, accounts were approximately 60 days past due at the time of charge-off. For previously charged-off accounts that are subsequently recovered, the amount of such recovery is credited to the allowance for credit losses.

The Company maintains an allowance for credit losses on an aggregate basis at a level it considers sufficient to cover estimated losses inherent in the portfolio at the balance sheet date in the collection of its finance receivables currently outstanding. At October 31, 2016, the weighted average total contract term was 31.7 months with 23.2 months remaining. The reserve amount in the allowance for credit losses at October 31, 2016, $111.3 million, was 25% of the principal balance in finance receivables of $474.3 million, less unearned payment protection plan revenue of $18.5 million and unearned service contract revenue of $10.5 million.

The estimated reserve amount is the Company's anticipated future net charge-offs for losses incurred through the balance sheet date. The allowance takes into account historical credit loss experience (both timing and severity of losses), with consideration given to recent credit loss trends and changes in contract characteristics (i.e., average amount financed, months outstanding at loss date, term and age of portfolio), delinquency levels, collateral values, economic conditions and underwriting and collection practices. The allowance for credit losses is reviewed at least quarterly by management with any changes reflected in current operations. The calculation of the allowance for credit losses uses the following primary factors:

- The number of units repossessed or charged-off as a percentage of total units financed over specific historical periods of time from one year to five years.

- The average net repossession and charge-off loss per unit during the last eighteen months segregated by the number of months since the contract origination date and adjusted for the expected future average net charge-off loss per unit. About 50% of the charge-offs that will ultimately occur in the portfolio are expected to occur within 10-11 months following the balance sheet date. The average age of an account at charge-off date for the eighteen-month period ended October 31, 2016 was 11.9 months.

- The timing of repossession and charge-off losses relative to the date of sale (i.e., how long it takes for a repossession or charge-off to occur) for repossessions and charge-offs occurring during the last eighteen months.

A point estimate is produced by this analysis which is then supplemented by any positive or negative subjective factors to arrive at an overall reserve amount that management considers to be a reasonable estimate of losses inherent in the portfolio at the balance sheet date that will be realized via actual charge-offs in the future. Although it is at least reasonably possible that events or circumstances could occur in the future that are not presently foreseen which could cause actual credit losses to be materially different from the recorded allowance for credit losses, the Company believes that it has given appropriate consideration to all relevant factors and has made reasonable assumptions in determining the allowance for credit losses. While challenging economic conditions can negatively impact credit losses, effective execution of internal policies and procedures within the collections area and the competitive environment on the funding side have historically had a more significant effect on collection results than macro-economic issues.

In most states, the Company offers retail customers who finance their vehicle the option of purchasing a payment protection plan product as an add-on to the installment sale contract. This product contractually obligates the Company to cancel the remaining principal outstanding for any contract where the retail customer has totaled the

vehicle, as defined by the contract, or the vehicle has been stolen. The Company periodically evaluates anticipated losses to ensure that if anticipated losses exceed deferred payment protection plan revenues, an additional liability is recorded for such difference. No such liability was required at October 31, 2016 or April 30, 2016.

Inventory

Inventory consists of used vehicles and is valued at the lower of cost or market on a specific identification basis. Vehicle reconditioning costs are capitalized as a component of inventory. Repossessed vehicles and trade-in vehicles are recorded at fair value, which approximates wholesale value. The cost of used vehicles sold is determined using the specific identification method.

Goodwill

Goodwill reflects the excess of purchase price over the fair value of specifically identified net assets purchased. Goodwill and intangible assets deemed to have indefinite lives are not amortized but are subject to annual impairment tests at the Company’s year-end. The impairment tests are based on the comparison of the fair value of the reporting unit to the carrying value of such unit. If the fair value of the reporting unit falls below its carrying value, the Company performs the second step of the two-step goodwill impairment process to determine the amount, if any, that the goodwill is impaired. The second step involves determining the fair value of the identifiable assets and liabilities and the implied goodwill. The implied goodwill is compared to the carrying value of the goodwill to determine the impairment, if any. There was no impairment of goodwill during fiscal 2016, and to date, there has been no impairment during fiscal 2017.

Property and Equipment

Property and equipment are stated at cost. Expenditures for additions, remodels and improvements are capitalized. Costs of repairs and maintenance are expensed as incurred. Leasehold improvements are amortized over the shorter of the estimated life of the improvement or the lease period. The lease period includes the primary lease term plus any extensions that are reasonably assured. Depreciation is computed principally using the straight-line method, generally over the following estimated useful lives:

Furniture, fixtures and equipment	3 to 7 years
Leasehold improvements	5 to 15 years
Buildings and improvements	18 to 39 years

Property and equipment are reviewed for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future undiscounted net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying values of the impaired assets exceed the fair value of such assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell.

Cash Overdraft

As checks are presented for payment from the Company’s primary disbursement bank account, monies are automatically drawn against cash collections for the day and, if necessary, are drawn against one of the revolving credit facilities. Any cash overdraft balance principally represents outstanding checks that as of the balance sheet date had not yet been presented for payment, net of any deposits in transit. Any cash overdraft balance is reflected in accrued liabilities on the Company’s Condensed Consolidated Balance Sheets.

Deferred Sales Tax

Deferred sales tax represents a sales tax liability of the Company for vehicles sold on an installment basis in the states of Alabama and Texas. Under Alabama and Texas law, for vehicles sold on an installment basis the related sales tax is due as the payments are collected from the customer, rather than at the time of sale. Deferred sales tax liabilities are reflected in accrued liabilities on the Company’s Condensed Consolidated Balance Sheets.

Income Taxes

Income taxes are accounted for under the liability method. Under this method, deferred income tax assets and liabilities are determined based on differences between financial reporting and tax bases of assets and liabilities, and are measured using the enacted tax rates expected to apply in the years in which these differences are expected to be recovered or settled. The quarterly provision for income taxes is determined using an estimated annual effective tax rate, which is based on expected annual taxable income, statutory tax rates and the Company's best estimate of nontaxable and nondeductible items of income and expense.

Occasionally, the Company is audited by taxing authorities. These audits could result in proposed assessments of additional taxes. The Company believes that its tax positions comply in all material respects with applicable tax law. However, tax law is subject to interpretation, and interpretations by taxing authorities could be different from those of the Company, which could result in the imposition of additional taxes.

The Company recognizes the financial statement benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the more-likely-than-not threshold, the amount recognized in the financial statements is the largest benefit that has a greater than 50 percent likelihood of being realized upon ultimate settlement with the relevant tax authority. The Company applies this methodology to all tax positions for which the statute of limitations remains open.

The Company is subject to income taxes in the U.S. federal jurisdiction and various state jurisdictions. Tax regulations within each jurisdiction are subject to the interpretation of the related tax laws and regulations and require significant judgment to apply. With few exceptions, the Company is no longer subject to U.S. federal, state and local income tax examinations by tax authorities for the years before fiscal 2013.

The Company's policy is to recognize accrued interest related to unrecognized tax benefits in interest expense and penalties in operating expenses. The Company had no accrued penalties or interest as of October 31, 2016 or April 30, 2016.

Revenue Recognition

Revenues are generated principally from the sale of used vehicles, which in most cases includes a service contract and a payment protection plan product, interest income and late fees earned on finance receivables. Revenues are net of taxes collected from customers and remitted to government agencies. Cost of vehicle sales include costs incurred by the Company to prepare the vehicle for sale including license and title costs, gasoline, transport services and repairs.

8

Revenues from the sale of used vehicles are recognized when financing, if applicable, has been approved, the sales contract is signed, and the customer has taken possession of the vehicle. Revenues from the sale of vehicles sold at wholesale are recognized at the time the proceeds are received. Revenues from the sale of service contracts are initially deferred and then recognized ratably over the expected duration of the product. Service contract revenues are included in sales and the related expenses are included in cost of sales. Payment protection plan revenues are initially deferred and then recognized to income using the “Rule of 78’s” interest method over the life of the contract so that revenues are recognized in proportion to the amount of cancellation protection provided. Payment protection plan revenues recognized are included in sales and related losses are included in cost of sales as incurred. Interest income is recognized on all active finance receivable accounts using the simple effective interest method. Active accounts include all accounts except those that have been paid-off or charged-off.

Sales consist of the following:

	Three Months Ended October 31,		Six Months Ended October 31,	
(In thousands)	2016	2015	2016	2015
Sales – used autos	$115,392	$100,187	$228,127	$210,834
Wholesales – third party	5,529	6,223	10,946	11,842
Service contract sales	7,217	6,731	13,978	13,543
Payment protection plan revenue	5,032	4,529	9,803	9,046
Total	$133,170	$117,670	$262,854	$245,265

At October 31, 2016 and 2015, finance receivables more than 90 days past due were approximately $1.8 million and $1.7 million, respectively. Late fee revenues totaled approximately $954,000 and $996,000 for the six months ended October 31, 2016 and 2015, respectively. Late fees are recognized when collected and are reflected in interest and other income on the Condensed Consolidated Statements of Operations.

Earnings per Share

Basic earnings per share are computed by dividing net income attributable to common stockholders by the average number of common shares outstanding during the period. Diluted earnings per share are computed by dividing net income attributable to common stockholders by the average number of common shares outstanding during the period plus dilutive common stock equivalents. The calculation of diluted earnings per share takes into consideration the potentially dilutive effect of common stock equivalents, such as outstanding stock options and non-vested restricted stock, which if exercised or converted into common stock would then share in the earnings of the Company. In computing diluted earnings per share, the Company utilizes the treasury stock method and anti-dilutive securities are

excluded.

Stock-Based Compensation

The Company recognizes the cost of employee services received in exchange for awards of equity instruments, such as stock options and restricted stock, based on the fair value of those awards at the date of grant over the requisite service period. The Company uses the Black-Scholes option pricing model to determine the fair value of stock option awards. The Company may issue either new shares or treasury shares upon exercise of these awards. Stock-based compensation plans, related expenses and assumptions used in the Black-Scholes option pricing model are more fully described in Note I. If an award contains a performance condition, expense is recognized only for those shares for which it is considered reasonably probable as of the current period end that the performance condition will be met.

Treasury Stock

The Company purchased 297,693 shares of its common stock to be held as treasury stock for a total cost of $8.1 million during the first six months of fiscal 2017 and 89,658 shares for a total cost of $4.0 million during the first six months of fiscal 2016. Treasury stock may be used for issuances under the Company’s stock-based compensation plans or for other general corporate purposes. During fiscal 2016, the Company established a reserve account of 10,000 shares of treasury stock to secure outstanding service contracts issued in Iowa in accordance with the regulatory requirements of that state.

Recent Accounting Pronouncements

Occasionally, new accounting pronouncements are issued by the Financial Accounting Standards Board (“FASB”) or other standard setting bodies which the Company will adopt as of the specified effective date. Unless otherwise discussed, the Company believes the implementation of recently issued standards which are not yet effective will not have a material impact on its consolidated financial statements upon adoption.

Revenue Recognition. In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers* (Topic 606), which supersedes existing revenue recognition guidance. The new guidance in ASU 2014-09 is based on the principle that revenue is recognized to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. ASU 2014-09 also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to obtain or fulfill a contract. In August 2015, the FASB issued ASU 2015-14, *Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date*, to provide entities with an additional year to implement ASU 2014-09. As a result, the guidance in ASU 2014-09 is effective for annual reporting periods beginning after December 15, 2017 and interim reporting periods within those years, using one of two retrospective application methods. The Company is currently evaluating the potential effects of the adoption of this update on the consolidated financial statements.

Leases. In February 2016, the FASB issued ASU 2016-02, *Leases*. The new guidance requires that lessees recognize all leases, including operating leases, with a term greater than 12 months on-balance sheet and also requires disclosure of key information about leasing transactions. The guidance in ASU 2016-02 is effective for annual reporting periods beginning after December 15, 2018, and interim reporting periods within those years. The Company is currently evaluating the potential effects of the adoption of this guidance on the consolidated financial statements.

Stock Compensation. In March 2016, the FASB issued ASU 2016-09, *Improvements to Employee Share-Based Payment Accounting*, which aims to simplify aspects of accounting for share-based payment transactions, including: presenting the excess tax benefit or deficit from the exercise or vesting of share-based payments in the income statement, a revision to the criteria for classifying an award as equity or liability, an option to recognize gross stock compensation expense with actual forfeitures recognized as they occur, and certain classifications on the statement of cash flows. In addition, the new guidance eliminates the excess tax benefit from the assumed proceeds calculation under the treasury stock method for purposes of calculating diluted shares. ASU 2016-09 is effective for annual reporting periods beginning after December 15, 2016 and interim reporting periods within those years. Certain provisions of ASU 2016-09 are required to be adopted prospectively, notably the requirement to recognize the excess tax benefit or deficit in the income statement, while other provisions require modified retrospective application or in some cases full retrospective application. The Company is currently evaluating the potential effects of the adoption of this guidance on the consolidated financial statements.

Credit Losses. In June 2016, the FASB issued ASU 2016-13, *Financial Instruments — Credit Losses* (Topic 326). ASU 2016-13 requires financial assets such as loans to be presented net of an allowance for credit losses that reduces the cost basis to the amount expected to be collected over the estimated life. Expected credit losses will be measured based on historical experience and current conditions, as well as forecasts of future conditions that affect the collectability of the reported amount. ASU 2016-13 is effective for annual reporting periods beginning after December 15, 2019 and interim reporting periods within those years, using a modified retrospective approach. The Company is currently evaluating the potential effects of the adoption of this guidance on the consolidated financial statements.

Reclassifications

The Company has made reclassifications to certain amounts in the accompanying Condensed Consolidated Balance Sheet as of April 30, 2016. The reclassifications did not have an impact on net income or earnings per share.

C – Finance Receivables, Net

The Company originates installment sale contracts from the sale of used vehicles at its dealerships. These installment sale contracts, which carry an interest rate of 15% or 16.5% per annum (based on the Company's contract interest rate as of the contract origination date), are collateralized by the vehicle sold and typically provide for payments over periods ranging from 18 to 42 months. The weighted average interest rate for the portfolio was approximately 15.5% at October 31, 2016. The Company's finance receivables are defined as one segment and one class of loans in sub-prime consumer automobile contracts. The level of risks inherent in the Company's financing receivables is managed as one homogeneous pool.

The components of finance receivables are as follows:

(In thousands)	October 31, 2016	April 30, 2016
Gross contract amount	$ 548,966	$ 504,149
Less unearned finance charges	(74,671)	(66,871)
Principal balance	474,295	437,278
Less allowance for credit losses	(111,340)	(102,485)
Finance receivables, net	$ 362,955	$ 334,793

Changes in the finance receivables, net are as follows:

(In thousands)	Six Months Ended October 31, 2016	2015
Balance at beginning of period	$334,793	$324,144
Finance receivable originations	244,680	223,266
Finance receivable collections	(117,126)	(117,593)
Provision for credit losses	(72,822)	(73,439)
Losses on claims for payment protection plan	(6,919)	(6,095)
Inventory acquired in repossession and payment protection plan claims	(19,651)	(23,054)
Balance at end of period	$362,955	$327,229

Changes in the finance receivables allowance for credit losses are as follows:

(In thousands)	Six Months Ended October 31, 2016	2015
Balance at beginning of period	$102,485	$93,224
Provision for credit losses	72,822	73,439
Charge-offs, net of recovered collateral	(63,967)	(66,229)
Balance at end of period	$111,340	$100,434

The factors which influenced management’s judgment in determining the amount of the current period provision for credit losses are described below.

The level of charge-offs, net of recovered collateral, is the most important factor in determining the provision for credit losses. This is due to the fact that once a contract becomes delinquent the account is either made current by the customer, the vehicle is repossessed or the account is written off if the collateral cannot be recovered. Net charge-offs as a percentage of average finance receivables decreased to 14.0% for the six months ended October 31, 2016 compared to 15.6% for the same period in the prior year. This improvement in net charge-offs is primarily due to a decrease in the frequency of losses as a result of the low delinquencies greater than 30 days at April 30, 2016 of 3.0%, significantly lower than 5.8% at April 30, 2015.

Collections and delinquency levels can have a significant effect on additions to the allowance and are reviewed frequently. Collections as a percentage of average finance receivables were 25.6% for the six months ended October 31, 2016 compared to 27.7% for the prior year period. The decrease in collections as a percentage of average finance receivables resulted primarily from the longer average term, higher levels of contract modifications, higher delinquencies and, to a lesser extent, the increase in the contract interest rate. Delinquencies greater than 30 days were 4.8% for October 31, 2016 and 3.5% at October 31, 2015.

Macro-economic factors, the competitive environment on the funding side, and more importantly, proper execution of operational policies and procedures have a significant effect on additions to the allowance charged to the provision. Higher unemployment levels, higher gasoline prices and higher prices for staple items can potentially have a significant effect. The Company continues to focus on operational improvements within the collections area such as further implementation and integration of GPS technology on vehicles sold.

Credit quality information for finance receivables is as follows:

(Dollars in thousands)	October 31, 2016		April 30, 2016		October 31, 2015	
	Principal Balance	Percent of Portfolio	Principal Balance	Percent of Portfolio	Principal Balance	Percent of Portfolio
Current	$386,962	81.58 %	$378,631	86.59 %	$365,346	85.44 %
3 - 29 days past due	64,749	13.65 %	45,631	10.43 %	47,406	11.08 %
30 - 60 days past due	16,581	3.50 %	8,429	1.93 %	10,320	2.41 %
61 - 90 days past due	4,161	0.88 %	3,498	0.80 %	2,914	0.68 %
> 90 days past due	1,842	0.39 %	1,089	0.25 %	1,677	0.39 %
Total	$474,295	100.00 %	$437,278	100.00 %	$427,663	100.00 %

Accounts one and two days past due are considered current for this analysis, due to the varying payment dates and variation in the day of the week at each period end. Delinquencies may vary from period to period based on the average age of the portfolio, seasonality within the calendar year, the day of the week and overall economic factors. The above categories are consistent with internal operational measures used by the Company to monitor credit results. The Company believes that improvement in the past due percentages is driven in part by the proper execution of best collections efforts at all dealerships.

Substantially all of the Company's automobile contracts involve contracts made to individuals with impaired or limited credit histories, or higher debt-to-income ratios than permitted by traditional lenders; such contracts generally entail a higher risk of delinquency, default, repossession, and losses than contracts made with buyers with better credit. The Company monitors contract term length, down payment percentages, and collections as credit quality indicators.

	Six Months Ended October 31,	
	2016	2015
Principal collected as a percent of average finance receivables	25.6 %	27.7 %
Average down-payment percentage	5.8 %	6.5 %
Average originating contract term *(in months)*	29.2	28.4

	October 31, 2016	October 31, 2015
Portfolio weighted average contract term, including modifications *(in months)*	31.7	30.6

The decrease in collections as a percentage of average finance receivables resulted primarily from the longer average term, higher levels of contract modifications, higher delinquencies and, to a lesser extent, the increase in the contract interest rate. The increases in contract term are primarily related to efforts to keep payments affordable, for competitive reasons and to continue to work with our customers when they experience financial difficulties. In order to remain competitive, term lengths may continue to increase.

D – Property and Equipment

A summary of property and equipment is as follows:

(In thousands)	October 31, 2016	April 30, 2016
Land	$ 6,738	$ 6,711
Buildings and improvements	11,972	11,928
Furniture, fixtures and equipment	15,063	14,941
Leasehold improvements	23,746	23,308
Construction in progress	521	250
Less accumulated depreciation and amortization	(24,589)	(22,383)
Total	$ 33,451	$ 34,755

E – Accrued Liabilities

A summary of accrued liabilities is as follows:

(In thousands)	October 31, 2016	April 30, 2016
Employee compensation	$ 4,450	$ 3,684
Cash overdrafts (see Note B)	589	-
Deferred sales tax (see Note B)	3,047	2,736
Other	4,806	4,825
Total	$ 12,892	$ 11,245

F – Debt Facilities

A summary of revolving credit facilities is as follows:

(In thousands)

	Aggregate Amount	Interest Rate	Maturity	Balance at October 31, 2016	April 30, 2016
Revolving credit facilities	$172,500	LIBOR + 2.375% (2.91% at October 31, 2016 and 2.81% at April 30, 2016)	October 8, 2017	$124,488	$ 107,386

On March 9, 2012, the Company entered into an Amended and Restated Loan and Security Agreement with a group of lenders providing revolving credit facilities totaling $125 million (“Credit Facilities”). The Credit Facilities were amended on September 30, 2012, February 4, 2013, June 24, 2013, February 13, 2014 and October 8, 2014, respectively. The first amendment to the Credit Facilities increased the total revolving commitment to $145 million. The second amendment amended the definition of eligible vehicle contracts to include contracts with 36-42 month terms. The third amendment extended the term to June 24, 2016, provided the option to request revolver commitment increases for up to an additional $55 million and provided for a 0.25% decrease in each of the three pricing tiers for determining the applicable interest rate. The fourth amendment amended the structure of the debt covenants as related to the application of the fixed charge coverage ratio calculation. As amended, the fixed charge coverage ratio calculation will be required only if availability, as defined, under the revolving credit facilities is less than certain specified thresholds. The fourth amendment also increased the allowable capital expenditures to $10 million in the aggregate during any fiscal year and allows for the sale of certain vehicle contracts to third parties.

On October 8, 2014, the Company entered into a fifth amendment to the Credit Facilities, which extended the term of the Credit Facilities to October 8, 2017, added a new pricing tier for determining the applicable interest rate, and provided for a 0.125% increase in each of the three existing pricing tiers. The fifth amendment also amended one of two alternative distribution limitations related to repurchases of the Company’s stock. With respect to such limitation, the amendment (i) reset the $40 million aggregate limit on repurchases beginning October 8, 2014, (ii) redefined the aggregate amount of repurchases to be net of proceeds received from the exercise of stock options, and (iii) changed the requirement that the sum of borrowing bases combined minus the principal balances of all revolver loans after giving effect to such repurchases be equal to or greater than 30% of the sum of the borrowing bases.

On February 18, 2016, the Company exercised an option under its existing credit agreement to increase the total revolving credit facilities by $27.5 million from $145 million to $172.5 million. The increase in the total revolving credit commitments was made pursuant to the aforementioned accordion feature of the Credit Facilities, which allows the Company to increase the total revolver commitments by up to an additional $55 million (up to $200 million in total commitments), subject to lender approval and/or successful syndication.

The revolving credit facilities are collateralized primarily by finance receivables and inventory, are cross collateralized and contain a guarantee by the Company. Interest is payable monthly under the revolving credit facilities. The Credit Facilities provide for four pricing tiers for determining the applicable interest rate, based on the Company's consolidated leverage ratio for the preceding fiscal quarter. The current applicable interest rate under the Credit Facilities is generally LIBOR plus 2.375%. The Credit Facilities contain various reporting and performance covenants including (i) maintenance of certain financial ratios and tests, (ii) limitations on borrowings from other sources, (iii) restrictions on certain operating activities and (iv) restrictions on the payment of dividends or distributions.

The distribution limitations under the Credit Facilities allow the Company to repurchase the Company's stock so long as: either (a) the aggregate amount of such repurchases does not exceed $40 million beginning October 8, 2014 and the sum of borrowing bases combined minus the principal balances of all revolver loans after giving effect to such repurchases is equal to or greater than 30% of the sum of the borrowing bases, or (b) the aggregate amount of such repurchases does not exceed 75% of the consolidated net income of the Company measured on a trailing twelve month basis; provided that immediately before and after giving effect to the stock repurchases at least 12.5% of the aggregate funds committed under the credit facilities remain available.

The Company was in compliance with the covenants at October 31, 2016. The amount available to be drawn under the credit facilities is a function of eligible finance receivables and inventory; based upon eligible finance receivables and inventory at October 31, 2016, the Company had additional availability of approximately $45 million under the revolving credit facilities.

On December 12, 2016, the Company entered into a Second Amended and Restated Loan and Security Agreement which amended and restated the Company's Credit Facilities. The new agreement extended the terms of the Credit Facilities to December 12, 2019, reduced the pricing tiers for determining the applicable interest rate from four to three, and reset the aggregate limit on the repurchase of Company stock to $40 million beginning December 12, 2016. The agreement also increased the total revolving credit facilities from $172.5 million to $200 million, provided the option to request revolver commitment increases for up to an additional $50 million and increased the advance rate on accounts receivable with 37-42 month terms from 50% to 55%, and the advance rate on accounts receivable with 43-60 month terms from 45% to 50%.

The Company recognized approximately $140,000 and $96,000 of amortization for the six months ended October 31, 2016 and 2015, respectively, related to debt issuance costs. The amortization is reflected as interest expense in the Company's Condensed Consolidated Statements of Operations.

During fiscal 2016, the Company implemented the guidance in ASU 2015-03, *Simplifying the Presentation of Debt Issuance Costs*, which amended the presentation of debt issuance costs in the financial statements. ASU 2015-03 requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts, instead of as an asset. As a result, debt issuance costs of approximately $256,000 and $396,000 as of October 31, 2016 and April 30, 2016, respectively, are shown as a deduction from the revolving credit facilities in the Condensed Consolidated Balance Sheet.

On December 15, 2015, the Company entered into an agreement to purchase the property on which one of its dealerships is located for a purchase price of $550,000. Under the agreement, the purchase price is being paid in monthly principal and interest installments of $10,005. The debt matures in December 2020, bears interest at a rate of 3.50% and is secured by the property. The balance on this note payable was approximately $465,000 and $516,000 as of October 31, 2016 and April 30, 2016, respectively.

G – Fair Value Measurements

The table below summarizes information about the fair value of financial instruments included in the Company's financial statements at October 31, 2016 and April 30, 2016:

(In thousands)	October 31, 2016		April 30, 2016	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Cash	$170	$170	$602	$602
Finance receivables, net	362,955	291,691	334,793	268,926
Accounts payable	12,917	12,917	12,313	12,313
Revolving credit facilities and notes payable	124,696	124,696	107,902	107,902

Because no market exists for certain of the Company's financial instruments, fair value estimates are based on judgments and estimates regarding yield expectations of investors, credit risk and other risk characteristics, including interest rate and prepayment risk. These estimates are subjective in nature and involve uncertainties and matters of judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect these estimates. The methodology and assumptions utilized to estimate the fair value of the Company's financial instruments are as follows:

Financial Instrument	Valuation Methodology
Cash	The carrying amount is considered to be a reasonable estimate of fair value due to the short-term nature of the financial instrument.
Finance receivables, net	The Company estimates the fair value of its receivables at what a third party purchaser might be willing to pay. The Company has had discussions with third parties and has bought and sold portfolios, and had a third party appraisal in November 2012 that indicated a range of 35% to 40% discount to face would be a reasonable fair value in a negotiated third party transaction. The sale of finance receivables from Car-Mart of Arkansas to Colonial is made at a 38.5% discount. For financial reporting purposes these sale transactions are eliminated. Since the Company does not intend to offer the receivables for sale to an outside third party, the expectation is that the net book value at October 31, 2016, will ultimately be collected. By collecting the accounts internally the Company expects to realize more than a third party purchaser would expect to collect with a servicing requirement and a profit margin included.
Accounts payable	The carrying amount is considered to be a reasonable estimate of fair value due to the short-term nature of the financial instrument.
Revolving credit facilities and notes payable	The fair value approximates carrying value due to the variable interest rates charged on the revolving credit facilities, which reprice frequently.

H – Weighted Average Shares Outstanding

Weighted average shares of common stock outstanding used in the calculation of basic and diluted earnings per share were as follows:

	Three Months Ended October 31,		Six Months Ended October 31,	
	2016	2015	2016	2015
Weighted average shares outstanding-basic	7,833,061	8,471,918	7,890,993	8,492,679
Dilutive options and restricted stock	303,900	0	270,026	360,942
Weighted average shares outstanding-diluted	8,136,961	8,471,918	8,161,019	8,853,621
Antidilutive securities not included:				
Options	343,250	251,000	376,875	254,500
Restricted stock	10,000	9,500	9,500	4,750

I – Stock-Based Compensation

The Company has stock-based compensation plans available to grant non-qualified stock options, incentive stock options and restricted stock to employees, directors and certain advisors of the Company. The stock-based compensation plans being utilized at October 31, 2016 are the Amended and Restated Stock Option Plan and the Amended and Restated Stock Incentive Plan. The Company recorded total stock-based compensation expense for all plans of approximately $783,000 ($491,000 after tax effects) and $949,000 ($595,000 after tax effects) for the six months ended October 31, 2016 and 2015, respectively. Tax benefits were recognized for these costs at the Company's overall effective tax rate.

Stock Options

The Company has options outstanding under two stock option plans approved by the shareholders, the 1997 Stock Option Plan ("1997 Plan") and the Amended and Restated Stock Option Plan. While previously granted options remain outstanding, no additional option grants may be made under the 1997 Plan. The shareholders of the Company approved the Amended and Restated Stock Option Plan (the "Restated Option Plan") on August 5, 2015, which

extended the term of the Restated Option Plan to June 10, 2025 and increased the number of shares of common stock reserved for issuance under the plan to 1,800,000 shares. The Restated Option Plan provides for the grant of options to purchase shares of the Company's common stock to employees, directors and certain advisors of the Company at a price not less than the fair market value of the stock on the date of grant and for periods not to exceed ten years. Options granted under the Company's stock option plans expire in the calendar years 2017 through 2026.

	1997 Plan	Restated Option Plan
Minimum exercise price as a percentage of fair market value at date of grant	100 %	100 %
Last expiration date for outstanding options	July 2, 2017	August 10, 2026
Shares available for grant at October 31, 2016	-	276,500

The fair value of options granted is estimated on the date of grant using the Black-Scholes option pricing model based on the assumptions in the table below.

	Six Months Ended October 31,	
	2016	2015
Expected term (years)	5.5	5.5
Risk-free interest rate	1.28 %	1.58 %
Volatility	36 %	34 %
Dividend yield	-	-

The expected term of the options is based on evaluations of historical actual and future expected employee exercise behavior. The risk-free interest rate is based on the U.S. Treasury rates at the date of grant with maturity dates approximately equal to the expected life at the grant date. Volatility is based on historical volatility of the Company's common stock. The Company has not historically issued any dividends and does not expect to do so in the foreseeable future.

There were 35,000 options granted during the six months ended October 31, 2016 and 298,750 options granted during the six months ended October 31, 2015. The grant-date fair value of options granted during the six months ended October 31, 2016 and 2015 was $338,000 and $5.2 million, respectively. The options were granted at fair market value on the date of grant.

Stock option compensation expense was $723,000 ($453,000 after tax effects) and $887,000 ($556,000 after tax effects) for the six months ended October 31, 2016 and 2015, respectively. As of October 31, 2016, the Company had approximately $3.2 million of total unrecognized compensation cost related to unvested options that are expected to vest. These unvested outstanding options have a weighted-average remaining vesting period of 3.3 years.

In May 2015, key employees of the Company were granted 95,125 performance based stock options with a five-year performance period ending April 30, 2020. An additional 40,000 such options were granted to key employees of the Company in August 2015. Tiered vesting of these units is based solely on comparing the Company's net income over the specified performance period to net income at April 30, 2015. As of October 31, 2016, the Company had $1.1 million in unrecognized compensation expense related to 64,750 of these options that are not currently expected to vest.

The aggregate intrinsic value of outstanding options at October 31, 2016 and 2015 was $15.9 million and $11.2 million, respectively.

The Company had the following options exercised for the periods indicated. The impact of these cash receipts is included in financing activities in the accompanying Condensed Consolidated Statements of Cash Flows.

	Six Months Ended October 31,	
(Dollars in thousands)	2016	2015
Options exercised	57,500	17,750
Cash received from option exercises	$860	$245
Intrinsic value of options exercised	$1,335	$690

As of October 31, 2016, there were 876,500 vested and exercisable stock options outstanding with an aggregate intrinsic value of $15.3 million, a weighted average remaining contractual life of 3.25 years, and a weighted average exercise price of $23.98.

Stock Incentive Plan

On October 14, 2009, the shareholders of the Company approved an amendment to the Company's Stock Incentive Plan that increased the number of shares of common stock that may be issued under the Stock Incentive Plan to 350,000. On August 5, 2015, the shareholders of the Company approved the Amended and Restated Stock Incentive Plan, which extended the term of the Stock Incentive Plan to June 10, 2025. For shares issued under the Stock Incentive Plan, the associated compensation expense is generally recognized equally over the vesting periods established at the award date and is subject to the employee's continued employment by the Company.

There were 10,000 restricted shares granted during the six months ended October 31, 2016 and no restricted shares granted during the six months ended October 31, 2015. A total of 168,527 shares remained available for award at October 31, 2016. There were 18,500 unvested restricted shares outstanding as of October 31, 2016 with a weighted average grant date fair value of $45.09.

The Company recorded compensation cost of approximately $47,000 ($29,000 after tax effects) and $50,000 ($31,000 after tax effects) related to the Stock Incentive Plan during the six months ended October 31, 2016 and 2015, respectively. As of October 31, 2016, the Company had approximately $688,000 of total unrecognized compensation cost related to unvested awards granted under the Stock Incentive Plan, which the Company expects to recognize over a weighted-average remaining period of 4.2 years.

There were no modifications to any of the Company's outstanding share-based payment awards during fiscal 2016 or during the first six months of fiscal 2017.

J – Commitments and Contingencies

The Company has a standby letter of credit relating to an insurance policy totaling $1 million at October 31, 2016.

K - Supplemental Cash Flow Information

Supplemental cash flow disclosures are as follows:

	Six Months Ended October 31,	
(in thousands)	2016	2015
Supplemental disclosures:		
Interest paid	$1,980	$1,782
Income taxes paid, net	3,793	2,990
Non-cash transactions:		
Inventory acquired in repossession and payment protection plan claims	19,651	23,054
Loss accrued on disposal of property and equipment	400	-

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with the Company's Condensed Consolidated Financial Statements and notes thereto appearing elsewhere in this report.

Forward-Looking Information

This Quarterly Report on Form 10-Q contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements address the Company’s future objectives, plans and goals, as well as the Company’s intent, beliefs and current expectations regarding future operating performance, and can generally be identified by words such as “may”, “will”, “should”, “could”, “believe”, “expect”, “anticipate”, “intend”, “pla and other similar words or phrases. Specific events addressed by these forward-looking statements include, but are not limited to:

- new dealership openings;
- performance of new dealerships;
- same dealership revenue growth;

- future revenue growth;
- receivables growth as related to revenue growth;
- gross margin percentages;
- interest rates;
- future credit losses;
- the Company's collection results, including, but not limited to, collections during income tax refund periods;
- seasonality;
- security breaches, cyber-attacks, or fraudulent activity;
- compliance with tax regulations;
- the Company's business and growth strategies;
- financing the majority of growth from profits; and
- having adequate liquidity to satisfy its capital needs.

These forward-looking statements are based on the Company's current estimates and assumptions and involve various risks and uncertainties. As a result, you are cautioned that these forward-looking statements are not guarantees of future performance, and that actual results could differ materially from those projected in these forward-looking statements. Factors that may cause actual results to differ materially from the Company's projections include those risks described elsewhere in this report, as well as:

- the availability of credit facilities to support the Company's business;
- the Company's ability to underwrite and collect its contracts effectively;
- competition;
- dependence on existing management;
- availability of quality vehicles at prices that will be affordable to customers;
- changes in consumer finance laws or regulations, including, but not limited to, rules and regulations that have recently been enacted or could be enacted by federal and state governments; and
- general economic conditions in the markets in which the Company operates, including, but not limited to, fluctuations in gas prices, grocery prices and employment levels.

The Company undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the dates on which they are made.

Overview

America's Car-Mart, Inc., a Texas corporation initially formed in 1981 (the "Company"), is one of the largest publicly held automotive retailers in the United States focused exclusively on the "Integrated Auto Sales and Finance" segment of the used car market. The Company's operations are principally conducted through its two operating subsidiaries, America's Car Mart, Inc., an Arkansas corporation ("Car-Mart of Arkansas"), and Colonial Auto Finance, Inc., an Arkansas corporation ("Colonial"). References to the Company include the Company's consolidated subsidiaries. The Company primarily sells older model used vehicles and provides financing for substantially all of its customers. Many of the Company's customers have limited financial resources and would not qualify for conventional financing as a result of limited credit histories or past credit problems. As of October 31, 2016, the Company operated 143 dealerships located primarily in small cities throughout the South-Central United States.

The Company has grown its revenues between 3% and 14% per year over the last ten fiscal years (9% on average). Growth results from same dealership revenue growth and the addition of new dealerships. Revenue increased 7.4% for the first six months of fiscal 2017 compared to the same period of fiscal 2016 due primarily to a 4.3% increase in units sold, a 3.4% increase in the average selling price to $10,442, and a 9.1% increase in interest income.

The Company's primary focus is on collections. Each dealership is responsible for its own collections with supervisory involvement of the corporate office. Over the last five fiscal years, the Company's annual credit losses as a percentage of sales have ranged from approximately 21.1% in fiscal 2012 to 28.5% in fiscal 2016 (27.6% excluding the effect of the increase in the allowance for credit losses in the second quarter of fiscal 2016) (average of 25.1%). The higher credit losses as a percentage of sales for fiscal 2016 of 28.5% were primarily a result of competitive pressures remaining elevated and the increased number of newer dealerships weighing on credit loss results. For the first six months of fiscal 2017, credit losses as a percentage of sales decreased to 27.7%, resulting from a decrease in the frequency of losses as a result of the low delinquencies greater than 30 days at April 30, 2016 of 3.0%, significantly lower than at April 30, 2015 at 5.8%.

Historically, credit losses, on a percentage basis, tend to be higher at new and developing dealerships than at mature dealerships. Generally, this is the case because the management at new and developing dealerships tends to be less experienced in making credit decisions and collecting customer accounts and the customer base is less seasoned. Normally more mature dealerships have more repeat customers and, on average, repeat customers are a better credit risk than non-repeat customers. Negative macro-economic issues do not always lead to higher credit loss results for the Company because the Company provides basic affordable transportation which in many cases is not a discretionary expenditure for customers. The Company does believe, however, that general inflation, particularly within staple items such as groceries and gasoline, as well as overall unemployment levels and potentially lower or stagnant personal income levels affecting customers can have, and have had in recent years, a negative impact on collections. Additionally, increased competition for used vehicle financing has recently had a negative effect on collections and charge-offs.

In an effort to offset the elevated credit losses and lower collection levels and to operate more efficiently, the Company continues to look for improvements to its business practices, including better underwriting and better collection procedures. The Company has a proprietary credit scoring system which enables the Company to monitor the quality of contracts. Corporate office personnel monitor proprietary credit scores and work with dealerships when the distribution of scores falls outside of prescribed thresholds. The Company has implemented credit reporting and the use of global positioning system ("GPS") units on vehicles. Additionally, the Company has placed significant focus on the collection area; the Company's training department continues to spend significant time and effort on collections improvements. The Support Operations Officer oversees the collections department and provides timely oversight and additional accountability on a consistent basis. In addition, the Company has a Director of Collection Services who assists with managing the Company's servicing and collections practices and provides additional monitoring and training. Also, turnover at the dealership level for collections positions is down compared to historical levels, which management believes can have a positive effect on collection results. The Company believes that the proper execution of its business practices is the single most important determinant of its long term credit loss experience.

Historically, the Company's gross margins as a percentage of sales have been fairly consistent from year to year. Over the period from fiscal 2011 through fiscal 2016, the Company's gross margins as a percentage of sales ranged between approximately 40% and 43%. Gross margin as a percentage of sales for fiscal 2016 was 39.8%. The Company's gross margins are based upon the cost of the vehicle purchased, with lower-priced vehicles typically having higher gross margin percentages. Gross margins in recent years have been negatively affected by the increase in the average retail sales price (a function of a higher purchase price) and higher operating costs, mostly related to increased vehicle repair costs and higher fuel costs. Additionally, the percentage of wholesale sales to retail sales, which relate for the most part to repossessed vehicles sold at or near cost, can have a significant effect on overall gross margins. For the first six months of fiscal 2017, gross margin increased to 41.6% of sales primarily due to a decrease in the level of wholesales due to lower repossession activity, as well as a Company-wide effort to reduce vehicle repair expenses which had also negatively impacted gross margins in fiscal 2016. The Company expects that its gross margin percentage will continue to remain under pressure over the near term.

Hiring, training and retaining qualified associates is critical to the Company's success. The rate at which the Company adds new dealerships and is able to implement operating initiatives is limited by the number of trained managers and support personnel the Company has at its disposal. Excessive turnover, particularly at the dealership manager level, could impact the Company's ability to add new dealerships and to meet operational initiatives. The Company has added resources to recruit, train, and develop personnel, especially personnel targeted for dealership manager positions. The Company expects to continue to invest in the development of its workforce.

Stores open	143	145			
Accounts over 30 days past due	4.8 %	3.5 %			

Three Months Ended October 31, 2016 vs. Three Months Ended October 31, 2015

Revenues increased by approximately $17.2 million, or 12.9%, for the three months ended October 31, 2016 as compared to the same period in the prior fiscal year. This increase resulted from revenue growth at dealerships opened after October 31, 2015 ($1.5 million), dealerships that operated a full three months in both current and prior year

second quarter ($15.2 million), and dealerships opened during or closed after the three months ended October 31, 2015 ($504,000). Interest income increased approximately $1.7 million for the three months ended October 31, 2016, as compared to the same period in the prior fiscal year primarily due to the $41.2 million increase in average finance receivables, and to a lesser extent to the increase in the contract interest rate from 15.0% to 16.5% at the end of May 2016.

Cost of sales, as a percentage of sales, decreased to 58.6% for the three months ended October 31, 2016 compared to 60.8% for the same period of the prior fiscal year, resulting in a gross margin as a percentage of sales of 41.4% for the current year period compared to 39.2% for the prior year period. The higher gross margin percentage relates to lower wholesale volumes and losses and lower repair expenses, partially offset by the effect of a higher average selling price. The average retail sales price for the second quarter of fiscal 2017 was $10,491, a $244 increase over the prior year quarter. Increases in the volume of wholesales sales, resulting from higher credit losses, negatively affected our gross margin percentages in the second quarter of fiscal 2016.

The increase in average retail sales price during the second quarter of fiscal 2017 largely relates to an increase in the Company’s purchase costs. As purchase costs increase, the margin between the purchase cost and the sales price of the vehicles we sell narrows as a percentage because the Company must offer affordable prices to our customers. The increased purchase costs are the result of a combination of consumer demand for the types of vehicles the Company purchases for resale, which remains high relative to supply, and a strategic management decision to purchase higher quality vehicles for our customers. The high demand and tight supply of the vehicles we purchase for resale are largely related to excess funding to the used vehicle financing market and the depressed levels of new car sales during and after the recession, although more robust new car sales in recent years have begun to bolster the supply of used vehicles. We continue to focus efforts on minimizing the average retail sales price of our vehicles in order to help keep contract terms shorter, which helps customers to maintain appropriate equity in their vehicles and reduces credit losses and resulting wholesale volumes.

Selling, general and administrative expenses, as a percentage of sales, were 17.0% for the three months ended October 31, 2016, a decrease of 1.9% from the same period of the prior fiscal year. Selling, general and administrative expenses are, for the most part, more fixed in nature. In dollar terms, overall selling, general and administrative expenses increased approximately $415,000 in the second quarter of fiscal 2017 compared to the same period of the prior fiscal year, related primarily to higher payroll costs.

Provision for credit losses as a percentage of sales was 29.6% for the three months ended October 31, 2016 compared to 32.4% (28.3% excluding a $3 million non-cash after tax charge resulting from an increase to the allowance for credit losses) for the three months ended October 31, 2015. Net charge-offs as a percentage of average finance receivables were 7.7% for the three months ended October 31, 2016 compared to 7.8% for the prior year quarter. Frequency and severity of losses were basically flat for the quarter. The Company has implemented several operational initiatives (including credit reporting and installing GPS technology on vehicles) for the collections area and continues to push for improvements and better execution of its collection practices. However, the extended challenging macro-economic, competitive conditions and wholesale values are expected to continue to put pressure on our customers and the resulting collections of our finance receivables. The Company believes that the proper execution of its business practices remains the single most important determinant of its long-term credit loss experience.

Interest expense as a percentage of sales increased to 0.8% for the three months ended October 31, 2016 compared to 0.7% for the same period of the prior fiscal year. Average borrowings during the three months ended October 31, 2016 were $123.7 million, compared to $106.1 million for the prior year quarter.

Stores open	143	145			
Accounts over 30 days past due	4.8 %	3.5 %			

Six Months Ended October 31, 2016 vs. Six Months Ended October 31, 2015

Revenues increased by approximately $20.4 million, or 7.4%, for the six months ended October 31, 2016 as compared to the same period in the prior fiscal year. This increase resulted from revenue growth at dealerships opened after

October 31, 2015 ($3.0 million), dealerships that operated a full six months in both current and prior year period ($15.7 million), and dealerships opened during or closed after the six months ended October 31, 2015 ($1.7 million). Interest income increased approximately $2.8 million for the six months ended October 31, 2016, as compared to the same period in the prior fiscal year primarily due to the $33.7 million increase in average finance receivables, and to a lesser extent to the increase in the contract interest rate from 15.0% to 16.5% at the end of May 2016.

Cost of sales, as a percentage of sales, decreased to 58.4% for the six months ended October 31, 2016 compared to 59.8% for the same period of the prior fiscal year, resulting in a gross margin as a percentage of sales of 41.6% for the current year period compared to 40.2% for the prior year period. The higher gross margin percentage relates to lower wholesale volumes and losses and lower repair expenses, partially offset by the effect of a higher average selling price. The average retail sales price for the period ended October 31, 2016 was $10,442, a $344 increase over the prior year period. Increases in the volume of wholesales sales, resulting from higher credit losses, negatively affected our gross margin percentages in the first six months of fiscal 2016.

Selling, general and administrative expenses, as a percentage of sales, were 17.4% for the six months ended October 31, 2016, a decrease of 1.1% from the same period of the prior fiscal year. Selling, general and administrative expenses are, for the most part, more fixed in nature. In dollar terms, overall selling, general and administrative expenses increased approximately $459,000 in the first six months of fiscal 2017 compared to the same period of the prior fiscal year, related primarily to higher payroll costs.

Provision for credit losses as a percentage of sales was 27.7% for the period ended October 31, 2016 compared to 29.9% (28% excluding a $3 million non-cash after-tax charge resulting from an increase to the allowance for credit losses) for the period ended October 31, 2015. Net charge-offs as a percentage of average finance receivables were 14.0% for the six months ended October 31, 2016 compared to 15.6% for the prior year period. The decrease in the provision and net charge-offs primarily related to a decrease in the frequency of losses. The Company believes that the proper execution of its business practices remains the single most important determinant of its long-term credit loss experience.

Interest expense as a percentage of sales increased to 0.8% for the six months ended October 31, 2016 compared to 0.6% for the same period of the prior fiscal year. The overall dollar increase in interest expense was attributable to higher average borrowings during the six months ended October 31, 2016 as compared to the same period in the prior fiscal year ($118.8 million compared to $105.2 million).

Financial Condition

The following table sets forth the major balance sheet accounts of the Company as of the dates specified (in thousands):

	October 31, 2016	April 30, 2016
Assets:		
Finance receivables, net	$ 362,955	$ 334,793
Inventory	32,446	29,879
Property and equipment, net	33,451	34,755
Liabilities:		
Accounts payable and accrued liabilities	25,809	23,558
Deferred revenue	28,945	27,339
Income taxes payable (receivable), net	664	(894)
Deferred tax liabilities, net	19,859	18,280
Debt facilities and notes payable	124,696	107,902

Historically, finance receivables tended to grow slightly faster than revenue; for fiscal year 2016, however, revenue growth exceeded growth in net finance receivables. During the first six months of fiscal 2017, finance receivables grew slightly faster than revenue, consistent with the historical trends. The Company currently anticipates going forward that the growth in finance receivables will generally be slightly higher than overall revenue growth on an annual basis due to overall term length increases partially offset by improvements in underwriting and collection

procedures in an effort to reduce credit losses.

During the first six months of fiscal 2017, inventory increased by $2.6 million compared to inventory at April 30, 2016. This increase in inventory was attributable to an increase in purchasing levels to meet demand and provide an adequate supply of affordable vehicles. The Company strives to offer a broad mix and sufficient quantities of vehicles to adequately serve its expanding customer base. The Company will continue to manage inventory levels in the future to ensure adequate supply, in volume and mix, and to meet anticipated sales demand.

Property and equipment, net, decreased by $1.3 million at October 31, 2016 as compared to property and equipment, net, at April 30, 2016. The Company incurred $875,000 in expenditures to refurbish and expand existing locations, offset by depreciation expense.

Accounts payable and accrued liabilities increased by $2.3 million during the first six months of fiscal 2017 as compared to accounts payable and accrued liabilities at April 30, 2016 related primarily to increases in inventory, cash overdrafts and accrued employee compensation.

Deferred revenue increased $1.6 million at October 31, 2016 as compared to April 30, 2016 primarily resulting from increased sales of the payment protection plan product and service contracts.

Income taxes payable (receivable), net, increased by $1.6 million at October 31, 2016 as compared to April 30, 2016 primarily due to the timing of quarterly tax payments and refunds.

Deferred income tax liabilities, net, increased approximately $1.6 million at October 31, 2016 as compared to April 30, 2016 due primarily to the change in finance receivables.

Borrowings on the Company’s revolving credit facilities fluctuate primarily based upon a number of factors including (i) net income, (ii) finance receivables changes, (iii) income taxes, (iv) capital expenditures and (v) common stock repurchases. Historically, income from continuing operations, as well as borrowings on the revolving credit facilities, have funded the Company’s finance receivables growth, capital asset purchases and common stock repurchases. In the first six months of fiscal 2017, the Company funded finance receivables growth of $37 million, inventory growth of $2.6 million, capital expenditures of $875,000 and common stock repurchases of $8.1 million with income from operations and a $16.8 million increase in total debt.

Liquidity and Capital Resources

The following table sets forth certain summarized historical information with respect to the Company's Statements of Cash Flows (in thousands):

	Six Months Ended October 31,	
	2016	2015
Operating activities:		
Net income	$12,127	$4,132
Provision for credit losses	72,822	73,439

Purchase of common stock	(8,059)	(3,989)
Dividend payments	(20)	(20)
Exercise of stock options, including tax benefits and issuance of common stock	1,217	505
Total	10,381	(2,125)
Increase (decrease) in cash	$(432)	$596

The primary drivers of operating profits and cash flows include (i) top line sales (ii) interest rates on finance receivables, (iii) gross margin percentages on vehicle sales, and (iv) credit losses, a significant portion of which relates to the collection of principal on finance receivables. The Company generates cash flow from operations. Historically, most or all of this cash is used to fund finance receivables growth, capital expenditures and common stock repurchases. To the extent finance receivables growth, capital expenditures and common stock repurchases exceed income from operations, generally the Company increases its borrowings under its revolving credit facilities. The majority of the Company's growth has been self-funded.

Cash flows used in operations for the six months ended October 31, 2016 compared to the same period in the prior fiscal year were positively impacted by (i) higher net income and (ii) higher accounts payable and accrued liabilities, offset by (iii) an increase in finance receivables originations, (iv) an increase in inventory, and (v) a lower non-cash charge for credit losses. Finance receivables, net, increased by $28.2 million from April 30, 2016 to October 31, 2016.

The purchase price the Company pays for a vehicle has a significant effect on liquidity and capital resources. Because the Company bases its selling price on the purchase cost for the vehicle, increases in purchase costs result in increased selling prices. As the selling price increases, it becomes more difficult to keep the gross margin percentage and contract term in line with historical results because the Company's customers have limited incomes and their car payments must remain affordable within their individual budgets. Several external factors can negatively affect the purchase cost of vehicles. Decreases in the overall volume of new car sales, particularly domestic brands, lead to decreased supply in the used car market. Also, constrictions in consumer credit, as well as general economic conditions, can increase overall demand for the types of vehicles the Company purchases for resale as used vehicles become more attractive than new vehicles in times of economic instability. A negative shift in used vehicle supply, combined with strong demand, results in increased used vehicle prices and thus higher purchase costs for the Company. Management expects the recent tight supply of vehicles and resulting increases in vehicle purchase costs to continue, although some relief is expected as a result of steady increases in new car sales levels in recent periods.

The Company believes that the amount of credit available for the sub-prime auto industry has increased in recent years and management expects the availability of consumer credit within the automotive industry to be higher over the near term when compared to historical levels. This is expected to contribute to continued strong overall demand for most, if not all, of the vehicles the Company purchases for resale. Increased competition resulting from availability of funding to the sub-prime auto industry has also contributed to lower down payments and longer terms, which have had a negative effect on collection percentages, liquidity and credit losses when compared to prior periods.

Macro-economic factors can have an effect on credit losses and resulting liquidity. General inflation, particularly within staple items such as groceries, as well as overall unemployment levels can have a significant effect on collection results and ultimately credit losses. The Company anticipates that credit losses in the near term will be higher than historical ranges due to significant continued macro-economic challenges for the Company's customer base as well as increased competitive pressures. Management continues to focus on improved execution at the dealership level, specifically as related to working individually with customers concerning collection issues.

The Company has generally leased the majority of the properties where its dealerships are located. As of October 31, 2016, the Company leased approximately 85% of its dealership properties. The Company expects to continue to lease the majority of the properties where its dealerships are located.

The Company's revolving credit facilities generally restrict distributions by the Company to its shareholders. The distribution limitations under the Credit Facilities allow the Company to repurchase the Company's stock so long as: either (a) the aggregate amount of such repurchases does not exceed $40 million beginning October 8, 2014 and the sum of borrowing bases combined minus the principal balances of all revolver loans after giving effect to such repurchases is equal to or greater than 30% of the sum of the borrowing bases, or (b) the aggregate amount of such repurchases does not exceed 75% of the consolidated net income of the Company measured on a trailing twelve month basis; provided that immediately before and after giving effect to the stock repurchases, at least 12.5% of the aggregate funds committed under the credit facilities remain available. Thus, although the Company currently does routinely repurchase stock, the Company is limited in its ability to pay dividends or make other distributions to its

shareholders without the consent of the Company's lenders.

At October 31, 2016, the Company had approximately $170,000 of cash on hand and an additional $45 million of availability under its revolving credit facilities (see Note F to the Condensed Consolidated Financial Statements). On a short-term basis, the Company's principal sources of liquidity include income from operations and borrowings under its revolving credit facilities. On a longer-term basis, the Company expects its principal sources of liquidity to consist of income from operations and borrowings under revolving credit facilities or fixed interest term loans. The Company's revolving credit facilities mature in October 2017. Subsequent to October 31, 2016, the Company entered into an agreement which amended and restated the credit facilities; see further explanation in Note F. Furthermore, while the Company has no specific plans to issue debt or equity securities, the Company believes, if necessary, it could raise additional capital through the issuance of such securities.

The Company expects to use cash from operations and borrowings to (i) grow its finance receivables portfolio, (ii) purchase property and equipment of approximately $3.2 million in the next 12 months in connection with refurbishing existing dealerships and adding new dealerships, (iii) repurchase shares of common stock when favorable conditions exist and (iv) reduce debt to the extent excess cash is available.

The Company believes it will have adequate liquidity to continue to grow its revenues and to satisfy its capital needs for the foreseeable future.

Contractual Payment Obligations

There have been no material changes outside of the ordinary course of business in the Company's contractual payment obligations from those reported at April 30, 2016 in the Company's Annual Report on Form 10-K.

Off-Balance Sheet Arrangements

The Company has entered into operating leases for approximately 85% of its dealerships and office facilities. Generally, these leases are for periods of three to five years and usually contain multiple renewal options. The Company uses leasing arrangements to maintain flexibility in its dealership locations and to preserve capital. The Company expects to continue to lease the majority of its dealerships and office facilities under arrangements substantially consistent with the past.

The Company has a standby letter of credit relating to an insurance policy totaling $1 million at October 31, 2016.

Other than its operating leases and the letter of credit, the Company is not a party to any off-balance sheet arrangement that management believes is reasonably likely to have a current or future effect on the Company's financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors.

Related Finance Company Contingency

Car-Mart of Arkansas and Colonial do not meet the affiliation standard for filing consolidated income tax returns, and as such they file separate federal and state income tax returns. Car-Mart of Arkansas routinely sells its finance receivables to Colonial at what the Company believes to be fair market value and is able to take a tax deduction at the time of sale for the difference between the tax basis of the receivables sold and the sales price. These types of transactions, based upon facts and circumstances, have been permissible under the provisions of the Internal Revenue Code as described in the Treasury Regulations. For financial accounting purposes, these transactions are eliminated in consolidation and a deferred income tax liability has been recorded for this timing difference. The sale of finance receivables from Car-Mart of Arkansas to Colonial provides certain legal protection for the Company's finance receivables and, principally because of certain state apportionment characteristics of Colonial, also has the effect of reducing the Company's overall effective state income tax rate by approximately 300 basis points. The actual interpretation of the Regulations is in part a facts and circumstances matter. The Company believes it satisfies the material provisions of the Regulations. Failure to satisfy those provisions could result in the loss of a tax deduction at the time the receivables are sold and have the effect of increasing the Company's overall effective income tax rate as well as the timing of required tax payments.

The Company's policy is to recognize accrued interest related to unrecognized tax benefits in interest expense and penalties in operating expenses. The Company had no accrued penalties or interest as of October 31, 2016.

Critical Accounting Policies

The preparation of financial statements in conformity with generally accepted accounting principles in the United States of America requires the Company to make estimates and assumptions in determining the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from the Company's estimates. The Company believes the most significant estimate made in the preparation of the accompanying Condensed Consolidated Financial Statements relates to the determination of its allowance for credit losses, which is discussed below. The Company's accounting policies are discussed in Note B to the Condensed Consolidated Financial Statements.

The Company maintains an allowance for credit losses on an aggregate basis at a level it considers sufficient to cover estimated losses inherent in the portfolio at the balance sheet date in the collection of its finance receivables currently outstanding. At October 31, 2016, the weighted average total contract term was 31.7 months with 23.2 months remaining. The reserve amount in the allowance for credit losses at October 31, 2016, $111.3 million, was 25% of the principal balance in finance receivables of $474.3 million, less unearned payment protection plan revenue of $18.5 million and unearned service contract revenue of $10.5 million.

The estimated reserve amount is the Company's anticipated future net charge-offs for losses incurred through the balance sheet date. The allowance takes into account historical credit loss experience (both timing and severity of losses), with consideration given to recent credit loss trends and changes in contract characteristics (i.e., average amount financed, months outstanding at loss date, term and age of portfolio), delinquency levels, collateral values, economic conditions and underwriting and collection practices. The allowance for credit losses is reviewed at least quarterly by management with any changes reflected in current operations. The calculation of the allowance for credit losses uses the following primary factors:

- The number of units repossessed or charged-off as a percentage of total units financed over specific historical periods of time from one year to five years.

- The average net repossession and charge-off loss per unit during the last eighteen months segregated by the number of months since the contract origination date and adjusted for the expected future average net charge-off loss per unit. About 50% of the charge-offs that will ultimately occur in the portfolio are expected to occur within 10-11 months following the balance sheet date. The average age of an account at charge-off date for the eighteen-month period ended October 31, 2016 was 11.9 months.

- The timing of repossession and charge-off losses relative to the date of sale (i.e., how long it takes for a repossession or charge-off to occur) for repossessions and charge-offs occurring during the last eighteen months.

A point estimate is produced by this analysis which is then supplemented by any positive or negative subjective factors to arrive at an overall reserve amount that management considers to be a reasonable estimate of losses inherent in the portfolio at the balance sheet date that will be realized via actual charge-offs in the future. Although it is at least reasonably possible that events or circumstances could occur in the future that are not presently foreseen which could cause actual credit losses to be materially different from the recorded allowance for credit losses, the Company believes that it has given appropriate consideration to all relevant factors and has made reasonable assumptions in determining the allowance for credit losses. While challenging economic conditions can negatively impact credit losses, the effectiveness of the execution of internal policies and procedures within the collections area and the competitive environment on the funding side have historically had a more significant effect on collection results than macro-economic issues. A 1% change, as a percentage of finance receivables, in the allowance for credit losses would equate to an approximate pre-tax adjustment of $4.5 million.

Recent Accounting Pronouncements

Occasionally, new accounting pronouncements are issued by the Financial Accounting Standards Board (“FASB”) or other standard setting bodies, which the Company will adopt as of the specified effective date. Unless otherwise discussed, the Company believes the implementation of recently issued standards which are not yet effective will not have a material impact on its consolidated financial statements upon adoption.

Revenue Recognition. In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers* (Topic 606), which supersedes existing revenue recognition guidance. The new guidance in ASU 2014-09 is based on the principle that revenue is recognized to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. ASU 2014-09 also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to obtain or fulfill a contract. In August 2015, the FASB issued ASU 2015-14, *Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date*, to provide entities with an additional year to implement ASU 2014-09. As a result, the guidance in ASU 2014-09 is effective for annual reporting periods beginning after December 15, 2017 and interim reporting periods within those years, using one of two retrospective application methods. The Company is currently evaluating the potential effects of the adoption of this update on the consolidated financial statements.

Leases. In February 2016, the FASB issued ASU 2016-02, *Leases*. The new guidance requires that lessees recognize all leases, including operating leases, with a term greater than 12 months on-balance sheet and also requires disclosure of key information about leasing transactions. The guidance in ASU 2016-02 is effective for annual reporting periods beginning after December 15, 2018, and interim reporting periods within those years. The Company is currently

evaluating the potential effects of the adoption of this guidance on the consolidated financial statements.

Stock Compensation. In March 2016, the FASB issued ASU 2016-09, *Improvements to Employee Share-Based Payment Accounting*, which aims to simplify aspects of accounting for share-based payment transactions, including: presenting the excess tax benefit or deficit from the exercise or vesting of share-based payments in the income statement, a revision to the criteria for classifying an award as equity or liability, an option to recognize gross stock compensation expense with actual forfeitures recognized as they occur, and certain classifications on the statement of cash flows. In addition, the new guidance eliminates the excess tax benefit from the assumed proceeds calculation under the treasury stock method for purposes of calculating diluted shares. ASU 2016-09 is effective for annual reporting periods beginning after December 15, 2016 and interim reporting periods within those years. Certain provisions of ASU 2016-09 are required to be adopted prospectively, notably the requirement to recognize the excess tax benefit or deficit in the income statement, while other provisions require modified retrospective application or in some cases full retrospective application. The Company is currently evaluating the potential effects of the adoption of this guidance on the consolidated financial statements.

Credit Losses. In June 2016, the FASB issued ASU 2016-13, *Financial Instruments — Credit Losses* (Topic 326). ASU 2016-13 requires financial assets such as loans to be presented net of an allowance for credit losses that reduces the cost basis to the amount expected to be collected over the estimated life. Expected credit losses will be measured based on historical experience and current conditions, as well as forecasts of future conditions that affect the collectability of the reported amount. ASU 2016-13 is effective for annual reporting periods beginning after December 15, 2019 and interim reporting periods within those years, using a modified retrospective approach. The Company is currently evaluating the potential effects of the adoption of this guidance on the consolidated financial statements.

Seasonality

Historically, the Company’s third fiscal quarter (November through January) has been the slowest period for vehicle sales. Conversely, the Company’s first and fourth fiscal quarters (May through July and February through April) have historically been the busiest times for vehicle sales. Therefore, the Company generally realizes a higher proportion of its revenue and operating profit during the first and fourth fiscal quarters. Tax refund anticipation sales efforts during the Company’s third fiscal quarter have increased sales levels during the third fiscal quarter in some past years; however, due to the timing of actual tax refund dollars in the Company’s markets, these sales and collections have primarily occurred in the fourth quarter in each of the last four fiscal years. The Company expects this pattern to continue in future years.

If conditions arise that impair vehicle sales during the first, third or fourth fiscal quarters, the adverse effect on the Company's revenues and operating results for the year could be disproportionately large.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

The Company is exposed to market risk on its financial instruments from changes in interest rates. In particular, the Company has historically had exposure to changes in the federal primary credit rate, and the prime interest rate of its lender. The Company does not use financial instruments for trading purposes but has in the past entered into an interest rate swap agreement to manage interest rate risk.

Interest rate risk. The Company's exposure to changes in interest rates is primarily related to its debt obligations. The Company is exposed to changes in interest rates as a result of its revolving credit facilities. The interest rates charged to the Company under its credit facilities fluctuate based on its primary lender's base rate of interest. The Company had total indebtedness of $124.5 million outstanding under its revolving credit facilities at October 31, 2016. The impact of a 1% increase in interest rates on this amount of debt would result in increased annual interest expense of approximately $1.2 million and a corresponding decrease in net income before income tax.

The Company's earnings are impacted by its net interest income, which is the difference between the income earned on interest-bearing assets and the interest paid on interest-bearing notes payable. The Company's finance receivables carry a fixed interest rate of 15% or 16.5% per annum, while its revolving credit facilities contain variable interest rates that fluctuate with market interest rates.

Item 4. Controls and Procedures

a) Evaluation of Disclosure Controls and Procedures

Based on management's evaluation (with the participation of the Company's Chief Executive Officer and Chief Financial Officer), as of October 31, 2016, the Company's Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")), are effective to provide reasonable assurance that information required to be disclosed by the Company in the reports it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC rules and forms, and that such information is accumulated and communicated to management, including the Company's Chief Executive Officer (principal executive officer) and Chief Financial Officer (principal financial officer), to allow timely decisions regarding required disclosure.

b) Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the Company's last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II

Item 1. Legal Proceedings

In the ordinary course of business, the Company has become a defendant in various types of legal proceedings. While the outcome of these proceedings cannot be predicted with certainty, the Company does not expect the final outcome of any of these proceedings, individually or in the aggregate, to have a material adverse effect on the Company's financial position, results of operations or cash flows.

Item 1A. Risk Factors

There have been no material changes to the Company's risk factors as previously disclosed in Item 1A to Part 1 of the Company's Form 10-K for the fiscal year ended April 30, 2016.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The Company is authorized to repurchase shares of its common stock under its common stock repurchase program. The Board of Directors most recently approved, and the Company announced, on July 22, 2016 the authorization to repurchase up to an additional one million shares along with the balance remaining under its previous authorization approved in November 2014.

The following table sets forth information with respect to purchases made by or on behalf of the Company of shares of the Company's common stock during the periods indicated:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs[1]	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs[1]
August 1, 2016 through August 31, 2016	-	-	-	1,055,868
September 1, 2016 through September 30, 2016	7,100	$ 35.59	7,100	1,048,768
October 1, 2016 through October 31, 2016	17,501	$ 36.62	17,501	1,031,267
Total	24,601	$ 36.33	24,601	

(1) The above described stock repurchase program has no expiration date.

Item 3. Defaults Upon Senior Securities

Not applicable.

Item 4. Mine Safety Disclosure

Not applicable.

Item 5. Other Information

Not applicable.

Item 6. Exhibits

Exhibit Number	Description of Exhibit
3.1	Articles of Incorporation of the Company, as amended. (Incorporated by reference to Exhibits 4.1-4.8 to the Company's Registration Statement on Form S-8 filed with the SEC on November 16, 2005 (File No. 333-129727)).
3.2	Amended and Restated Bylaws of the Company dated December 4, 2007. (Incorporated by reference to Exhibit 3.2 to the Company's Quarterly Report on Form 10-Q for the quarter ended October 31, 2007 filed with the SEC on December 7, 2007).
3.3	Amendment No. 1 to the Amended and Restated Bylaws of the Company (Incorporated by reference to Exhibit 3.1 to the Company's Report on Form 8-K filed with the SEC on February 19, 2014)
31.1	Certification of Chief Executive Officer pursuant to Rule 13a-14(a) of the Securities Exchange Act of 1934, as amended (the "Exchange Act").
31.2	Certification of Chief Financial Officer pursuant to Rule 13a-14(a) of the Exchange Act.
32.1	Certification of the Chief Executive Officer and Chief Financial Officer pursuant to Rule 13a-14(b) of the Exchange Act and 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
