- (a) For all periods presented, excludes volumes and amounts from the Argentine operations sold in February 2011 and classified as discontinued operations.
- (b) Includes production volumes per day of 5 mbbl and 6 mbbl for the years ended December 31, 2010 and 2009, respectively, related to the noncontrolling interest in a Colombian subsidiary. Includes sales volumes per day of 4 mbbl and 6 mbbl for the years ended December 31, 2010 and 2009, respectively, related to the noncontrolling interest in a Colombian subsidiary.
- (c) Natural gas volumes have been converted to BOE based on energy content of six Mcf of gas to one barrel of oil.
- (d) Includes dry hole write-offs and lease impairments of \$160 million in 2011, \$139 million in 2010 and \$200 million in 2009. The 2011 amount includes a \$35 million Libya exploration write-off.

Oil and gas segment earnings in 2011 were \$10.2 billion compared to \$7.2 billion in 2010. The increase reflected higher oil and NGL prices and volumes, partially offset by higher depreciation, depletion and amortization (DD&A) rates and higher operating costs, including higher field support, workover and well maintenance expenses driven by Occidental's program to increase production at current high oil prices.

Daily oil and gas production volumes were 733,000 BOE for 2011, compared with 711,000 BOE for 2010. The increase was mainly due to acquisitions in South Texas, California and the Williston Basin, including the effect of post-acquisition capital investment, and higher production in Oman's Mukhaizna Field and Iraq, which were partially offset by lower production in Libya. Production was negatively impacted in the Middle East/North Africa, Colombia and Long Beach by higher year-over-year average oil prices affecting PSCs by 18,000 BOE per day. Daily sales volumes were 731,000 BOE in the twelve months of 2011, compared with 705,000 BOE for 2010.

Oil and gas segment earnings in 2010 were \$7.2 billion compared to \$5.1 billion in 2009. The increase reflected higher average worldwide oil, NGL and domestic natural gas prices and higher volumes, partially offset by higher operating expenses partly resulting from fully expensing CO2, higher field support and workover expenses and higher DD&A rates.

Daily oil and gas production volumes were 711,000 BOE for 2010, compared with 677,000 BOE for 2009. The increase was mainly due to the new production in Bahrain, higher production in the Mukhaizna Field in Oman, and gas production from domestic assets, which were partially offset by a decline in Colombia. Production was negatively impacted in the Middle East/North Africa, Long Beach and Colombia by higher year-over-year average oil prices affecting PSCs by 16,000 BOE per day. Daily sales volumes were 705,000 BOE in the twelve months of 2010, compared with 678,000 BOE for 2009.

Oil and gas segment earnings in 2011 include pre-tax charges of \$35 million related to exploration write-offs in Libya and \$29 million related to Colombia net worth tax, as well as a pre-tax gain for sale of an interest in a Colombian pipeline of \$22 million.

Oil and gas segment earnings in 2010 included a pre-tax charge of \$275 million for asset impairments, predominately of gas properties in the Rocky Mountain region. Oil and gas segment earnings in 2009 included an \$8 million pre-tax charge for the termination of rig contracts. Average production costs for 2011, excluding taxes other than on income, were \$12.84 per BOE, compared to \$10.19 for 2010. The increase resulted from higher workover and well maintenance activity driven by Occidental's program to increase production at current increased oil prices. We expect further increases in the activity level in 2012.

### Chemical

| In millions          | 2011 |       | 2010        | 2009        |
|----------------------|------|-------|-------------|-------------|
| Segment Sales        | \$   | 4,815 | \$<br>4,016 | \$<br>3,225 |
| Segment Earnings     | \$   | 861   | \$<br>438   | \$<br>389   |
| Capital Expenditures | \$   | 234   | \$<br>237   | \$<br>205   |

Chemical segment earnings were \$861 million in 2011, compared to \$438 million in 2010. The 2011 results reflected strong export sales and higher margins resulting from higher demand across most products.

Chemical segment earnings were \$438 million in 2010, compared to \$389 million in 2009. The increase in 2010 reflected improved market conditions, particularly for exports, driven by favorable feedstock costs in North America compared to Europe and Asia. Vinyls exports in 2010 were 125 percent higher compared to 2009.

### Midstream, Marketing and Other

| In millions          | 2011        | 2010        | 2009        |
|----------------------|-------------|-------------|-------------|
| Segment Sales        | \$<br>1,447 | \$<br>1,471 | \$<br>1,016 |
| Segment Earnings     | \$<br>448   | \$<br>472   | \$<br>235   |
| Capital Expenditures | \$<br>1,089 | \$<br>501   | \$<br>554   |

Midstream and marketing segment earnings in 2011 were \$448 million, compared to \$472 million in 2010. The 2011 results reflected lower marketing and trading income, partially offset by higher pipeline income.

Midstream and marketing segment earnings in 2010 were \$472 million, compared to \$235 million in 2009. The 2010 results reflected higher margins in the marketing and trading and gas processing businesses and increased earnings in the pipeline business.

### Significant Items Affecting Earnings

The following table sets forth, for the years ended December 31, 2011, 2010 and 2009, significant transactions and events affecting Occidental's earnings that vary widely and unpredictably in nature, timing and amount:

### Significant Items Affecting Earnings

| Benefit (Charge) (in millions)    |    | 2011 |     | 2010 |     | 2009 |   |
|-----------------------------------|----|------|-----|------|-----|------|---|
| oil and gas                       |    |      |     |      |     |      |   |
| Libya exploration write-off       | \$ | (35  | )\$ |      | \$  |      |   |
| Gains on sale of Colombian        |    |      |     |      |     |      |   |
| pipeline interest                 |    | 22   |     |      |     |      |   |

| Other                             | \$ |      | \$  |      | \$  |      |   |
| corporate                         | Ψ  |      | Ψ   |      | Ψ   |      |   |
| Premium on debt extinguishments   | \$ | (163 | )\$ |      | \$  |      |   |
| State income tax charge           | Ψ  | (33  | )   |      | Ψ   |      |   |
| Severance charge                  |    | (55  | ,   |      |     | (40  | ) |
| Railcar leases                    |    |      |     |      |     | (15  | ) |
| Foreign tax credit carry-forwards |    |      |     | 80   |     | (15  | , |
| Tax effect of pre-tax adjustments |    | 50   |     | 100  |     | 22   |   |
| Discontinued operations, net of   |    | 30   |     | 100  |     | 22   |   |
| tax (a)                           |    | 131  |     | (39  | )   | (236 | ) |
| tun (u)                           |    | 131  |     | (3)  | ,   | (230 | ) |
| Total Corporate                   | \$ | (15  | )\$ | 141  | \$  | (269 | ) |

(a) The 2011 amount includes a \$144 million after-tax gain from the sale of the Argentine operations. The 2009 amount includes an after-tax charge of \$111 million for asset impairments of certain Argentine producing properties.

#### Taxes

Deferred tax liabilities, net of deferred tax assets of \$1.9 billion, were \$4.7 billion at December 31, 2011. The current portion of the deferred tax assets of \$200 million is included in prepaid expenses and other. The deferred tax assets, net of allowances, are expected to be realized through future operating income and reversal of temporary differences.

### Worldwide Effective Tax Rate

The following table sets forth the calculation of the worldwide effective tax rate for income from continuing operations:

| In millions                  | 2011         |    | 2010  |    | 2009  |
|------------------------------|--------------|----|-------|----|-------|
| EARNINGS                     |              |    |       |    |       |
| Oil and Gas                  | \$<br>10,241 | \$ | 7,151 | \$ | 5,097 |
| Chemical                     | 861          |    | 438   |    | 389   |
| Midstream, Marketing and     |              |    |       |    |       |
| Other                        | 448          |    | 472   |    | 235   |
| Unallocated Corporate Items  | (709)        | )  | (497  | )  | (507  |
| Pre-tax income               | 10,841       |    | 7,564 |    | 5,214 |
|                              |              |    |       |    |       |
| Income tax expense           |              |    |       |    |       |
| Federal and State            | 1,795        |    | 1,087 |    | 686   |
| Foreign                      | 2,406        |    | 1,908 |    | 1,377 |
| Total                        | 4,201        |    | 2,995 |    | 2,063 |
|                              |              |    |       |    |       |
| Income from continuing       |              |    |       |    |       |
| operations                   | \$<br>6,640  | \$ | 4,569 | \$ | 3,151 |
| •                            |              |    |       |    |       |
| Worldwide effective tax rate | 39%          |    | 40%   |    | 40%   |

Occidental's 2011 worldwide tax rate was 39 percent, slightly lower than 2010 and 2009 due to higher proportionate domestic pre-tax income in 2011. The 2011 income tax expense included a net \$21 million charge for out-of-period state income taxes. The 2010 income tax expense included an \$80 million benefit related to foreign tax credit carryforwards. The 2009 income tax expense included a tax benefit of \$87 million resulting from relinquishments of exploration properties.

### Consolidated Results of Operations

Changes in components of Occidental's results of operations are discussed below:

### Selected Revenue and Other Income Items

| In millions                   | 2011            | 2010   | 2009         |
|-------------------------------|-----------------|--------|--------------|
| Net sales                     | \$<br>23,939 \$ | 19,045 | \$<br>14,814 |
| Interest, dividends and other |                 |        |              |
| income                        | \$<br>165 \$    | 111    | \$<br>118    |

The increase in net sales in 2011, compared to 2010, was due to higher oil and NGL prices, higher oil and gas segment volumes and higher sales, including higher export sales, across most chemical products. Price and volume increases in the oil and gas segment represented approximately 84 percent of the overall increase while chemical segment price and volume increases represented 16 percent of the increase.

The increase in net sales in 2010, compared to 2009, was primarily due to higher oil, NGLs, gas and chemical product prices and volumes. Price and volume increases in the oil and gas segment represented approximately 71 percent of the overall increase, chemical volume and price increases represented 19 percent and midstream and marketing represented the remaining increase.

### Selected Expense Items

| In millions                    | 2011        | 2010        | 2009        |
|--------------------------------|-------------|-------------|-------------|
| Cost of sales (a)              | \$<br>7,385 | \$<br>6,112 | \$<br>5,105 |
| Selling, general and           |             |             |             |
| administrative and other       |             |             |             |
| operating expenses             | \$<br>1,523 | \$<br>1,396 | \$<br>1,300 |
| Depreciation, depletion and    |             |             |             |
| amortization                   | \$<br>3,591 | \$<br>3,153 | \$<br>2,687 |
| Taxes other than on income     | \$<br>605   | \$<br>484   | \$<br>425   |
| Exploration expense            | \$<br>258   | \$<br>262   | \$<br>254   |
| Charges for impairments        | \$          | \$<br>275   | \$          |
| Interest and debt expense, net | \$<br>298   | \$<br>116   | \$<br>133   |

(a) Excludes DD&A of \$3,584 million in 2011, \$3,145 million in 2010 and \$2,643 million in 2009.

Cost of sales increased in 2011, compared to 2010, due to higher oil and gas volumes, higher oil and gas operating costs, mostly resulting from higher workover and well maintenance activity and higher feedstock costs in the chemical segment.

Cost of sales increased in 2010, compared to 2009, due to higher oil and gas production costs, partly resulting from the effects of fully expensing CO2 costs in 2010, as well as higher field operating, workover and well maintenance costs, and higher volumes; and higher chemical volumes, energy and feedstock costs.

Selling, general and administrative and other operating expenses increased in 2011 due to higher headcount and environmental remediation expense and the Colombia net worth tax.

Selling, general and administrative and other operating expenses increased in 2010, compared to 2009, due to higher compensation costs, in particular, equity compensation expense due to higher stock prices in 2010.

DD&A increased in 2011, compared to 2010, due to higher DD&A rates and volumes in the oil and gas segment. The DD&A rate is expected to further increase in 2012.

DD&A increased in 2010, compared to 2009, due to higher DD&A rates and volumes, including a full year of operations in Bahrain.

Taxes other than on income increased in 2011, compared to 2010, due to higher realized domestic oil prices and volumes and higher domestic ad valorem taxes resulting from increased property values.

Taxes other than on income increased in 2010, compared to 2009, due to higher production taxes for Permian and Midcontinent resulting from higher realized domestic oil and natural gas prices and higher ad valorem taxes in Permian resulting from increased property values. Exploration expense was comparable for 2011, 2010 and 2009.

Charges for impairments in 2010 predominately related to gas properties in the Rocky Mountain region.

Interest and debt expense, net, increased in 2011, compared to 2010, mainly due to the \$163 million early debt extinguishment charge recorded in the first quarter of 2011.

Interest and debt expense, net, decreased in 2010, compared to 2009, due to lower average interest rates during 2010.

# Selected Other Items

| (Income)/expense (in         |             |      |       |      |       |   |
|------------------------------|-------------|------|-------|------|-------|---|
| millions)                    | 2011        |      | 2010  |      | 2009  |   |
| Provision for income taxes   | \$<br>4,201 | \$   | 2,995 | \$   | 2,063 |   |
| Income from equity           |             |      |       |      |       |   |
| investments                  | \$<br>(382  | ) \$ | (277  | ) \$ | (227  | ) |
| Discontinued operations, net | \$<br>(131  | ) \$ | 39    | \$   | 236   |   |
| Net income attributable to   |             |      |       |      |       |   |
| noncontrolling interest      | \$          | \$   | 72    | \$   | 51    |   |

Provision for domestic and foreign income taxes increased in 2011, compared to 2010, due to higher pre-tax income, partially offset by a slightly lower effective tax rate. The lower tax rate is due to higher proportionate domestic pre-tax income in 2011, compared to 2010.

Provision for domestic and foreign income taxes increased in 2010, compared to 2009, due to higher income before taxes in 2010. The worldwide effective tax rate in 2010 was comparable to 2009. The 2010 income tax expense included an \$80 million benefit related to foreign tax credit carryforwards.

Income from equity investments increased in 2011, compared to 2010, due to an additional investment in the Plains Pipeline in late 2010 and its higher earnings.

Discontinued operations, net, in 2011 primarily reflected the \$144 million after-tax gain recorded from the sale of the Argentine operations.

Discontinued operations, net, in 2010 primarily reflected the after-tax losses in the Argentine operations held for sale. The 2009 amount included after-tax impairment charges of \$111 million for producing properties in Argentina.

There was no noncontrolling interest in 2011 due to the restructuring of Occidental's Colombian operations to take a direct working interest in the related assets as of December 31, 2010.

### Consolidated Analysis of Financial Position

The changes in the following components of Occidental's balance sheet are discussed below:

### Selected Balance Sheet Components

#### Assets

See "Liquidity and Capital Resources — Cash Flow Analysis" for discussion about the change in cash and cash equivalents.

The increase in trade receivables, net, was due to higher oil and NGL prices and volumes in the fourth quarter of 2011, compared to the fourth quarter of 2010. The decrease in assets of discontinued operations was due to the sale of Occidental's Argentine operations, which closed in February 2011. The decrease in prepaid expenses and other reflected the closing of the South Texas acquisition in January 2011, for which a deposit was made in 2010.

The increase in PP&E, net, was due to capital expenditures and the acquisitions of oil and gas properties, partially offset by DD&A.

### Liabilities and Stockholders' Equity

The increase in the accounts payable and accrued liabilities balances reflected higher capital expenditures during the fourth quarter of 2011 compared to the fourth quarter of 2010. The decrease in liabilities of discontinued operations was due to the sale of Occidental's Argentine operations.

The increase in long-term debt, net, was due to the issuance of \$2.15 billion of senior unsecured notes in August 2011, partially offset by the redemption of \$1.4 billion of senior notes in March 2011.

The increase in deferred credits and other liabilities – income taxes was due to higher capital expenditures in 2011. The increase in deferred credits and other liabilities – other reflected the long-term portion of liabilities related to the higher asset retirement obligations. The increase in stockholders' equity reflected net income for 2011, partially offset by dividend payments and treasury stock purchases.

### Liquidity and Capital Resources

At December 31, 2011, Occidental had approximately \$3.8 billion in cash on hand, a substantial majority of which is held domestically. Income and cash flows are largely dependent on oil and gas prices and sales volumes. Occidental believes that cash on hand and cash generated from operations will be sufficient to fund its operating needs and planned capital expenditures, dividends and any debt payments.

Occidental's available but unused committed bank credit was \$2.0 billion at December 31, 2011. In October 2011, Occidental entered into a new five-year \$2.0 billion bank credit facility (2011 Credit Facility), which replaced its previous \$1.4 billion bank credit facility (2006 Credit Facility), which was scheduled to expire in September 2012. The 2011 Credit Facility provides for the termination of loan commitments and requires immediate repayment of any outstanding amounts if certain events of default occur or if Occidental files for bankruptcy. Up to \$1.0 billion of the 2011 Credit Facility is available in the form of letters of credit. Occidental did not draw down any amounts under the 2011 Credit Facility or the 2006 Credit Facility during 2011.

The 2011 Credit Facility and other debt agreements do not contain material adverse change clauses or debt ratings triggers that could restrict Occidental's ability to borrow or permit the lenders to terminate their commitments or accelerate debt. Borrowings under the 2011 Credit Facility bear interest at various benchmark rates, including LIBOR, plus a margin based on Occidental's senior debt ratings. Additionally, Occidental paid prorated annual facility fees of 0.10 percent and 0.05 percent, respectively, in 2011 on the total commitment amounts of the 2011 Credit Facility and the 2006 Credit Facility based on Occidental's senior debt ratings.

Occidental has a shelf registration statement that facilitates issuing senior debt securities. In August 2011, Occidental issued \$2.15 billion of debt under this shelf, which comprised \$1.25 billion of 1.75-percent senior unsecured notes due 2017 and \$900 million of 3.125-percent senior unsecured notes due 2022. Occidental received net proceeds of approximately \$2.1 billion. Interest on the notes will be payable semiannually in arrears in February and August of each year for both series of notes.

In March 2011, Occidental redeemed all \$1.0 billion of its outstanding 7-percent senior notes due 2013 and all \$368 million of its outstanding 6.75-percent senior notes due 2012. Occidental recorded a \$163 million pre-tax charge related to this redemption in the first quarter of 2011.

Occidental, from time to time, may access and has accessed debt markets for long-term and short-term funding for general corporate purposes, including acquisitions. At this time, Occidental does not anticipate any needs for such funding.

As of December 31, 2011, under the most restrictive covenants of its financing agreements, Occidental had substantial capacity for additional unsecured borrowings, the payment of cash dividends and other distributions on, or acquisitions of, Occidental stock.

### Cash Flow Analysis

| In millions          | 2011         | 2010        | 2009        |
|----------------------|--------------|-------------|-------------|
| Net cash provided by |              |             |             |
| operating activities | \$<br>12,281 | \$<br>9,566 | \$<br>5,946 |

The most important sources of the increase in operating cash flow in 2011, compared to 2010, were higher worldwide oil and NGLs prices and volumes.

In 2011, compared to 2010, Occidental's global realized oil and NGL prices increased 30 percent and 23 percent, respectively. In 2011, Occidental's oil and NGL production accounted for 71 percent of its total net sales. In 2011, oil volumes increased, compared to 2010, mainly due to acquisitions in California and the Williston Basin, including the effect of post-acquisition capital investment, and higher production in Oman's Mukhaizna Field and Iraq, which were partially offset by lower production in Libya. Increases in field support, workover and well maintenance costs in 2011, compared to 2010, partially offset the increases in prices and volumes.

Other cost elements, such as labor costs and overhead, are not significant drivers of changes in cash flow because they are relatively stable within a narrow range over the short to intermediate term. Changes in these costs had a much smaller effect on cash flow than oil and NGL prices and volumes.

The increase in operating cash flows in 2011, compared to 2010, also reflected high chemical product prices and margins for most products.

The most important sources of the increase in operating cash flow in 2010, compared to 2009, were higher worldwide oil and domestic natural gas prices and

volumes. In 2010, compared to 2009, Occidental's global realized oil and United States natural gas prices for continuing operations each increased by 31 percent. In 2010, Occidental's United States gas production represented approximately 59 percent of its worldwide natural gas production. Occidental's 2010 oil and gas sales volumes increased, compared to 2009, mainly due to the new production from Bahrain and higher production in the Mukhaizna Field in Oman and higher domestic gas production, partially offset by a decline in Colombia. Increases in field support, workover and well maintenance costs in 2010, compared to 2009, partially offset the increases in prices and volumes.

The increase in operating cash flows in 2010, compared to 2009, also reflected higher chemical product prices for PVC, VCM, ethylene dichloride (EDC) and chlorine, which resulted in higher margins. In addition, all chemical product volumes increased in 2010, compared to 2009, due to improved market conditions, particularly for exports. The 2010 operating cash flows also reflected higher margins in the marketing and trading and gas processing businesses and increased earnings in the pipeline business.

In general, the overall impact of the chemical and midstream and marketing segments' margins was less significant than the changes in oil and gas segment prices because the chemical and midstream and marketing segments' earnings and cash flows are significantly smaller than those for the oil and gas segment.

Other non-cash charges to income in 2011, 2010 and 2009 included charges for stock-based compensation plans and asset retirement obligation accruals. The 2010 amount included a \$275 million charge for asset impairments, predominately of gas properties in the Rocky Mountain region.

Operating cash flows for discontinued operations include the Argentine operations through the date they were sold in February 2011. The 2009 amounts included after-tax charges of \$111 million for asset impairments of certain Argentine producing properties.

| In millions  | 2011            | 2010      | 2009    |
|--|-----------------|-----------|---------|
| Capital expenditures                               |                 |           |         |
| Oil and Gas  | \$<br>(6,145)\$ | (3,166)\$ | (2,448) |
| Chemical   | (234)           | (237)     | (205)   |
| Midstream and Marketing                            | (1,089)         | (501)     | (554)   |
| Corporate  | (50)            | (36)      | (38)    |
| Total  | (7,518)         | (3,940)   | (3,245) |
| Other investing activities,                        |                 |           |         |
| net  | (4,955)         | (4,940)   | (1,885) |
| Net cash used by investing activities – continuing |                 |           |         |
| operations   | (12,473)        | (8,880)   | (5,130) |
| Investing cash flow from                           |                 |           |         |
| discontinued operations                            | 2,570           | (415)     | (336)   |
| Net cash used by investing                         |                 |           |         |
| activities   | \$<br>(9,903)\$ | (9,295)\$ | (5,466) |

The increase in capital expenditures of \$3.6 billion from 2010 to 2011 was mainly due to the \$3.0 billion increase in oil and gas expenditures, which reflected Occidental's share of development costs in Oman and Bahrain, and higher spending in domestic properties in California, the Permian Basin, South Texas and the Williston Basin. Occidental's United States operated rig activity increased 89 percent from 38 rigs at year-end 2010 to 72 rigs at year-end 2011.

Occidental's capital spending for 2012 is expected to be approximately \$8.3 billion and will be focused on increasing oil and gas production and ensuring Occidental's returns remain well above its cost of capital given current oil and gas prices and the cost environment.

The increase in capital expenditures in 2012 from \$7.5 billion in 2011 will be allocated to the oil and gas segment. Of the \$8.3 billion 2012 capital spending, the oil and gas, midstream and marketing, and chemical segments will receive 84 percent, 11 percent and 5 percent, respectively.

The 2011 other investing activities, net amount included \$4.9 billion in cash payments for the acquisitions of businesses and assets, including various interests in domestic oil and gas properties, in operated, producing and non-producing properties in California and the Permian and Williston Basins for approximately \$2.4 billion, properties in South Texas for \$1.8 billion and \$0.5 billion for Occidental's share of pre-acquisition development expenditures incurred by the Al Hosn Gas Project.

The 2010 other investing activities, net amount included \$4.9 billion in cash payments for the acquisitions of businesses and assets, including acquisitions of various interests in domestic oil and gas properties, in operated, producing and non-producing properties in the Permian Basin, midcontinent region and California, for approximately \$2.5 billion, properties in North Dakota for approximately \$1.4 billion, additional interests in Plains Pipeline for approximately \$430 million and the remaining 50-percent interest in EHP for approximately \$175 million, as well as foreign contract payments of approximately \$225 million.

The 2009 other investing activities, net amount included \$1.7 billion in cash payments for the acquisitions of businesses and assets, including acquisitions of various oil and gas properties in California and the Permian Basin for approximately \$610 million, interests in Phibro for approximately \$370 million, additional interests in Plains Pipeline for approximately \$330 million and various other acquisitions totaling approximately \$320 million. The 2009 amount also included foreign signing bonuses of approximately \$190 million, the bulk of which was scheduled under the 2008 Libya agreements.

Investing cash flow from discontinued operations included \$2.6 billion of cash received from the sale of the Argentine operations in 2011, and capital expenditures of \$310 million and \$336 million in 2010 and 2009, respectively.

Commitments at December 31, 2011, for major fixed and determinable capital expenditures during 2012 and thereafter were approximately \$2.0 billion. Occidental expects to fund these commitments and capital expenditures with cash from operations.

| In millions                 | 2011            | 2010  | 2009 |         |
|-----------------------------|-----------------|-------|------|---------|
| Net cash (used) provided by |                 |       |      |         |
| financing activities        | \$<br>(1,175)\$ | 1,083 | \$   | (1,033) |

The 2011 amount included net proceeds of approximately \$2.1 billion from the August 2011 issuance of senior unsecured notes. The 2011 amount also included financing cash flow use of \$1.5 billion to retire other long-term debt, purchases of treasury stock of \$274 million and \$121 million of distributions to a noncontrolling interest partner.

The 2010 amount included net proceeds of approximately \$2.6 billion from the December 2010 issuance of senior unsecured notes. The 2010 amount also included financing cash flow use of \$311 million to retire other long-term debt.

The 2009 amount included net proceeds of \$740 million from the issuance of 4.125-percent senior unsecured notes due 2016 and Occidental's payment of \$600 million of debt associated with Dolphin Energy.

Occidental also paid common stock dividends of \$1.4 billion in 2011, \$1.2 billion in 2010 and \$1.1 billion in 2009.

### Off-Balance-Sheet Arrangements

In the course of its business activities, Occidental pursues a number of projects and transactions to meet its core business objectives. Occidental also makes commitments on behalf of unconsolidated entities. Some of these projects, transactions and commitments (off-balance-sheet arrangements) are not reflected on Occidental's balance sheets, as a result of the application of generally accepted accounting principles (GAAP) to their specific terms. The following is a description of the business purpose and nature of these off-balance-sheet arrangements.

### Guarantees

Occidental has guaranteed certain equity investees' debt and has entered into various other guarantees including performance bonds, letters of credit, indemnities and commitments provided by Occidental to third parties, mainly to provide assurance that OPC or its subsidiaries and affiliates will meet their various obligations (guarantees). As of December 31, 2011, Occidental's guarantees were not material and a substantial majority consisted of limited recourse guarantees on \$300 million of Dolphin's debt, for which the fair value was immaterial.

See "Oil and Gas Segment — Business Review — Qatar" and "Segment Results of Operations" for further information about Dolphin.

#### Leases

Occidental has entered into various operating lease agreements, mainly for transportation equipment, power plants, machinery, terminals, storage facilities, land and office space. Occidental leases assets when leasing offers greater operating flexibility. Lease payments are generally expensed as part of cost of sales. For more information, see "Contractual Obligations."

### **Contractual Obligations**

The table below summarizes and cross-references Occidental's contractual obligations. This summary indicates those obligations that are reflected in the Consolidated Balance Sheets as of December 31, 2011, as well as those that are not.

|                     |              | Pa | yments | Dι | ie by Y | ear |       |    |          |

| Purchase            |              |    |        |    |         |     |       |    |          |
| obligations (d,e,f) | 7,868        |    | 2,657  |    | 2,027   |     | 759   |    | 2,425    |
| Total               | \$<br>16,855 | \$ | 3,025  | \$ | 3,273   | \$  | 2,600 | \$ | 7,957    |

- (a) Excludes unamortized debt discount and interest on the debt. As of December 31, 2011, interest on long-term debt totaling \$1.5 billion is payable in the following years (in millions): 2012 \$189, 2013 and 2014 \$369, 2015 and 2016 \$326, 2017 and thereafter \$597.
- (b)Includes obligations under postretirement benefit and deferred compensation plans, as well as certain accrued liabilities.
- (c) Amounts have not been reduced for sublease rental income.

- (d) Amounts represent payments which will become due under long-term agreements to purchase goods and services used in the normal course of business. Some of these arrangements involve take-or-pay commitments but they do not represent debt obligations. Long-term purchase contracts are discounted at a 3.2-percent discount rate.
- (e) Amounts exclude certain oil purchase obligations related to marketing and trading activities for which there are no minimum amounts
- (f) Amounts represent agreements Occidental has entered into providing for future payments to secure terminal and pipeline capacity, drilling rigs and services, electrical power, steam and certain chemical raw materials.

# Lawsuits, Claims and Other Contingencies

OPC or certain of its subsidiaries are named, in the normal course of business, in lawsuits, claims and other legal proceedings that seek, among other things, compensation for alleged personal injury, breach of contract, property damage, punitive damages, civil penalties or other losses, or injunctive or declaratory relief. OPC or certain of its subsidiaries also have been named in proceedings under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and similar federal, state, local and foreign environmental laws. These environmental proceedings seek funding or performance of remediation and, in some cases, compensation for alleged property damage, punitive damages, civil penalties and injunctive relief; however, Occidental or such subsidiaries are usually among many companies in these proceedings and have to date been successful in sharing response costs with other financially sound companies. Occidental accrues reserves for currently outstanding lawsuits, claims and proceedings when it is probable that a liability has been incurred and the liability can be reasonably estimated. Occidental has disclosed its

reserve balances for environmental matters. Reserve balances for other matters as of December 31, 2011 and 2010, were not material to Occidental's consolidated balance sheets. Occidental also evaluates the amount of reasonably possible additional losses that it could incur as a result of the matters mentioned above. Occidental has disclosed its range of reasonably possible losses for sites where it is a participant in environmental remediation. Occidental believes that other reasonably possible losses that it could incur in excess of reserves accrued on the balance sheet would not be material to its consolidated financial position or results of operations. Environmental matters are further discussed under the caption "Environmental Liabilities and Expenditures" below.

During the course of its operations, Occidental is subject to audit by tax authorities for varying periods in various federal, state, local and foreign tax jurisdictions. While the audits of corporate tax returns for taxable years through 2009 have concluded for United States federal income tax purposes, the 2010 and 2011 taxable years are currently under review by the United States Internal Revenue Service pursuant to its Compliance Assurance Program. Taxable years from 2000 through the current year remain subject to examination by foreign and state government tax authorities in certain jurisdictions. In certain of these jurisdictions, tax authorities are in various stages of auditing Occidental's income taxes. During the course of tax audits, disputes have arisen and other disputes may arise as to facts and matters of law. Occidental believes that the resolution of outstanding tax matters would not have a material adverse effect on its consolidated financial position or results of operations. OPC, its subsidiaries or both have indemnified various parties against specified liabilities those parties might incur in the future in connection with purchases and other transactions that they have entered into with Occidental. These indemnities usually are contingent upon the other party incurring liabilities that reach specified thresholds. As of December 31, 2011, Occidental is not aware of circumstances that it believes would reasonably be expected to lead to future indemnity claims against it in connection with these transactions that would result in payments materially in excess of reserves.

### **Environmental Liabilities and Expenditures**

Occidental's operations are subject to stringent federal, state, local and foreign laws and regulations relating to improving or maintaining environmental quality. Occidental's environmental compliance costs have generally increased over time and are expected to rise in the future. Occidental factors environmental expenditures for its operations into its business planning process as an integral part of producing quality products responsive to market demand.

### **Environmental Remediation**

The laws that require or address environmental remediation, including CERCLA and similar federal, state, local and foreign laws, may apply retroactively and regardless of fault, the legality of the original activities or the current ownership or control of sites. OPC or certain of its subsidiaries participate in or actively monitor a range of remedial activities and government or private proceedings under these laws with respect to alleged past practices at operating, closed and third-party sites. Remedial activities may include one or more of the following: investigation involving sampling, modeling, risk assessment or monitoring; cleanup measures including removal, treatment or disposal; or operation and maintenance of remedial systems. The environmental proceedings seek funding or performance of remediation and, in some cases, compensation for alleged property damage, punitive damages, civil penalties, injunctive relief and government oversight costs.

As of December 31, 2011, Occidental participated in or monitored remedial activities or proceedings at 160 sites. The following table presents Occidental's environmental remediation reserves as of December 31, 2011, 2010 and 2009, grouped as environmental remediation sites listed or proposed for listing by the U.S. Environmental Protection Agency on the CERCLA National Priorities List (NPL sites) and three categories of non-NPL sites — third-party sites, Occidental-operated sites and closed or non-operated Occidental sites, as follows:

| \$ amounts in       |       |         |       |       |         |     |       |         |       |  |  |
|---------------------|-------|---------|-------|-------|---------|-----|-------|---------|-------|--|--|
| millions            | 2011  |         |       | 20    | 010     |     | 2     | 2009    |       |  |  |
|                     | # of  | Reserve |       | # of  | Reserve |     | # of  | Re      | serve |  |  |
|                     | Sites | Ba      | lance | Sites | Balance |     | Sites | Balance |       |  |  |
| NPL sites           | 36    | \$      | 63    | 38    | \$      | 56  | 39    | \$      | 57    |  |  |
| Third-party sites   | 73    |         | 88    | 83    |         | 91  | 81    |         | 104   |  |  |
| Occidental-operated |       |         |       |       |         |     |       |         |       |  |  |
| sites               | 22    |         | 120   | 20    |         | 122 | 19    |         | 126   |  |  |
| Closed or           |       |         |       |       |         |     |       |         |       |  |  |
| non-operated        |       |         |       |       |         |     |       |         |       |  |  |
| Occidental sites    | 29    |         | 89    | 29    |         | 97  | 29    |         | 116   |  |  |
| Total               | 160   | \$      | 360   | 170   | \$      | 366 | 168   | \$      | 403   |  |  |

As of December 31, 2011, Occidental's environmental reserves exceeded \$10 million each at 10 of the 160 sites described above, and 107 of the sites had reserves from zero to \$1 million each.

As of December 31, 2011, two landfills in western New York owned by Occidental accounted for 64 percent of its reserves associated with NPL sites. Maxus Energy Corporation has retained the liability and indemnified Occidental for 13 of the remaining NPL sites.

As of December 31, 2011, Maxus has also retained the liability and indemnified Occidental for 9 of the 73 third-party sites. Two of the remaining 64 third-party sites — a former copper mining and smelting operation in Tennessee and a containment and removal project in Tennessee — accounted for 44 percent of Occidental's reserves associated with these sites.

Four sites — chemical plants in Kansas, Louisiana and New York and a group of oil and gas properties in the southwestern United States — accounted for 61 percent of the reserves associated with the Occidental-operated sites. Two other sites — a former chemical plant in Tennessee and a closed coal mine in Pennsylvania — accounted for 42 percent of the reserves associated with closed or non-operated Occidental sites.

The following table presents environmental reserve activity for the past three years:

| In millions               | 2011      |   | 2010      |   | 2009      |   |
|---------------------------|-----------|---|-----------|---|-----------|---|
| Balance - Beginning of    |           |   |           |   |           |   |
| Year                      | \$<br>366 |   | \$<br>403 |   | \$<br>439 |   |
| Remediation expenses      |           |   |           |   |           |   |
| and interest accretion    | 53        |   | 26        |   | 26        |   |
| Changes from              |           |   |           |   |           |   |
| acquisitions/dispositions | 14        |   | 3         |   | 4         |   |
| Payments                  | (73       | ) | (66       | ) | (66       | ) |
| Balance - End of Year     | \$<br>360 |   | \$<br>366 |   | \$<br>403 |   |

Occidental expects to expend funds corresponding to approximately half of the current environmental reserves over the next four years and the balance over the subsequent 10 or more years. Occidental believes its range of reasonably possible additional loss beyond those liabilities recorded for environmental remediation at the sites described above could be up to \$375 million. See "Critical Accounting Policies and Estimates — Environmental Liabilities and Expenditures" for additional information.

Occidental's environmental costs, some of which include estimates, are presented below for each segment for the years ended December 31:

| In millions             | 2011      | 2010      | 2009      |
|-------------------------|-----------|-----------|-----------|
| Operating Expenses      |           |           |           |
| Oil and Gas             | \$<br>158 | \$<br>108 | \$<br>110 |
| Chemical                | 68        | 72        | 67        |
| Midstream and Marketing | 21        | 13        | 14        |
|                         | \$<br>247 | \$<br>193 | \$<br>191 |
| Capital Expenditures    |           |           |           |
| Oil and Gas             | \$<br>110 | \$<br>72  | \$<br>78  |
| Chemical                | 15        | 19        | 15        |
| Midstream and Marketing | 15        | 13        | 4         |
|                         | \$<br>140 | \$<br>104 | \$<br>97  |
| Remediation Expenses    |           |           |           |
| Corporate               | \$<br>52  | \$<br>25  | \$<br>25  |

Operating expenses are incurred on a continual basis. Capital expenditures relate to longer-lived improvements in currently operating properties. Remediation expenses relate to existing conditions from past operations.

Occidental presently estimates capital expenditures for environmental compliance of approximately \$160 million for 2012.

### Foreign Investments

Many of Occidental's assets are located outside North America. At December 31, 2011, the carrying value of Occidental's assets in countries outside North America aggregated approximately \$11 billion, or approximately 18 percent of Occidental's total assets at that date. Of such assets, approximately \$9 billion are located in the Middle East/North Africa and approximately \$1.4 billion are located in Latin America. For the year ended December 31, 2011, net sales outside North America totaled \$8.7 billion, or approximately 36 percent of total net sales.

### Critical Accounting Policies and Estimates

The process of preparing financial statements in accordance with GAAP requires the management of Occidental to make informed estimates and judgments regarding certain items and transactions. Changes in facts and circumstances or discovery of new information may result in revised estimates and judgments, and actual results may differ from these estimates. Occidental considers the following to be its most critical accounting policies and estimates that involve management's judgment. There has been no material change to these policies over the past three years. The selection and development of these critical accounting policies and estimates have been discussed with the Audit Committee of the Board of Directors.

### Oil and Gas Properties

The carrying value of Occidental's property, plant and equipment (PP&E) represents the cost incurred to acquire or develop the asset, including any capitalized interest, net of accumulated depreciation, depletion and amortization (DD&A) and net of any impairment charges. For business acquisitions, PP&E cost is based on fair values at the acquisition date. Interest costs incurred in connection with qualifying capital expenditures are capitalized and amortized over the lives of the related assets.

Occidental uses the successful efforts method to account for its oil and gas properties. Under this method, costs of acquiring properties, costs of drilling successful exploration wells and development costs are capitalized. The costs of exploratory wells are initially capitalized pending a determination of whether proved reserves have been found. If proved reserves have been found, the costs of exploratory wells remain capitalized. Otherwise, the costs of the related exploratory wells are charged to expense. In some cases, a determination of proved reserves cannot be made at the completion of drilling, requiring additional testing and evaluation of the wells. Occidental's practice is generally to expense the costs of such exploratory wells if a determination of proved reserves has not been made within a 12-month period after drilling is complete.

Annual lease rentals and geological, geophysical and seismic costs are expensed as incurred.

Occidental's policy is to expense the costs of injectants for secondary and tertiary recovery.

Depreciation and depletion of oil and gas producing properties are determined by the unit-of-production method. Leasehold acquisition costs are amortized over total proved reserves, while capitalized development and successful exploration costs are amortized over proved developed reserves.

Proved oil and gas reserves (as defined in the Securities and Exchange Commission's Regulation S-X, Rule 4-10(a)) are those quantities of oil and gas, which, by analysis of geoscience and engineering data, can be estimated with reasonable certainty to be economically producible—from a given date forward, from known reservoirs, and under existing economic conditions, operating methods, and government regulations—prior to the time at which contracts providing the right to operate expire, unless evidence indicates that renewal is reasonably certain, regardless of whether deterministic or probabilistic methods are used for the estimation. Occidental has no proved oil and gas reserves for which the determination of commercial viability is subject to the completion of major additional capital expenditures.

Several factors could change Occidental's proved oil and gas reserves. For example, Occidental receives a

share of production from PSCs to recover its costs and generally an additional share for profit. Occidental's share of production and reserves from these contracts decreases when oil prices rise and increases when oil prices decline. Overall, Occidental's net economic benefit from these contracts is greater at higher oil prices. In other cases, particularly with long-lived properties, lower product prices may lead to a situation where production of a portion of proved reserves becomes uneconomical. For such properties, higher product prices typically result in additional reserves becoming economical. Estimation of future production and development costs is also subject to change partially due to factors beyond Occidental's control, such as energy costs and inflation or deflation of oil field service costs. These factors, in turn, could lead to changes in the quantity of proved reserves. Additional factors that could result in a change of proved reserves include production decline rates and operating performance differing from those estimated when the proved reserves were initially recorded. In 2011, revisions of previous estimates provided a net 214 million BOE reduction to proved reserves, which amounted to less than 7 percent of Occidental's total reserves as of December 31, 2011.

The most significant financial statement effect from a change in Occidental's oil and gas reserves would be to the DD&A rate. For example, a 5-percent increase or decrease in the amount of oil and gas reserves would change the DD&A rate by approximately \$0.75 per barrel, which would increase or decrease pre-tax income by \$200 million annually at current production rates. The change in the DD&A rate over the past three years due to revisions of previous proved reserve estimates has been immaterial.

A portion of the carrying value of Occidental's oil and gas properties is attributable to unproved properties. At December 31, 2011, the net capitalized costs attributable to unproved properties were \$4.9 billion. The unproved amounts are not subject to DD&A or impairment until they are classified as proved properties. As exploration and development work progresses, if reserves on these properties are proved, capitalized costs attributable to the properties will become subject to DD&A. If the exploration and development work were to be unsuccessful, or management's plans changed with respect to these properties, as a result of economic, operating or contractual conditions, the capitalized costs of the related properties would be expensed. The timing of any writedowns of these unproved properties, if warranted, depends upon management's plans, the nature, timing and extent of future exploration and development activities and their results. Occidental believes its current plans and exploration and development efforts will allow it to realize its unproved property balance.

Additionally, Occidental performs impairment tests with respect to its proved properties generally when prices decline other than temporarily, reserve estimates change significantly or other significant events occur that may impact its ability to realize the recorded asset amounts. Impairment tests incorporate a number of assumptions involving expectations of future cash flows, which can change significantly over time. These assumptions include estimates of future product prices, which Occidental bases on forward price curves and, where applicable, contractual prices, estimates of oil and gas reserves and estimates of future expected operating and development costs. Fluctuations in commodity prices and production and development costs could cause management's plans to change with respect to unproved properties and could cause the carrying values of proved properties to be unrealizable. Such circumstances could result in impairments in the carrying values of proved or unproved properties or both. For example, if natural gas prices in the United States remain depressed for an extended period, management's plans for certain domestic gas assets may change and some of its investments may become impaired. Any impairment loss would be calculated as the excess of the asset's net book value over its estimated fair value.

### Chemical Assets

Occidental's chemical assets are depreciated using either the unit-of-production or straight-line method, based upon the estimated useful lives of the facilities. The estimated useful lives of Occidental's chemical assets, which range from three years to 50 years, are also used for impairment tests. The estimated useful lives for the chemical facilities are based on the assumption that Occidental will provide an appropriate level of annual expenditures to ensure productive capacity is sustained. Such expenditures consist of ongoing routine repairs and maintenance, as well as planned major maintenance activities (PMMA). Ongoing routine repairs and maintenance expenditures are expensed as incurred. PMMA costs are capitalized and amortized over the period until the next planned overhaul. Additionally, Occidental incurs capital expenditures that extend the remaining useful lives of existing assets, increase their capacity or operating efficiency beyond the original specification or add value through modification for a different use. These capital expenditures are not considered in the initial determination of the useful lives of these assets at the time they are placed into service. The resulting revision, if any, of the asset's estimated useful life is measured and accounted for prospectively.

Without these continued expenditures, the useful lives of these assets could decrease significantly. Other factors that could change the estimated useful lives of Occidental's chemical assets include sustained higher or lower product prices, which are particularly affected by both domestic and foreign competition, demand, feedstock costs, energy prices, environmental regulations and technological changes.

Occidental performs impairment tests on its chemical assets whenever events or changes in circumstances lead to a reduction in the estimated useful lives or estimated future cash flows that would indicate that the carrying amount may not be recoverable, or when management's plans change with respect to those assets. Any impairment loss would be calculated as the excess of the asset's net book value over its estimated fair value

Occidental's net PP&E for the chemical segment is approximately \$2.5 billion and its depreciation expense for 2012 is expected to be approximately \$300 million. The most significant financial statement impact of a decrease in the estimated useful lives of Occidental's chemical plants would be on depreciation expense. For example, a reduction in the remaining useful lives of one

year would increase depreciation and reduce pre-tax earnings by approximately \$40 million per year.

### Midstream, Marketing and Other Assets

Derivatives are carried at fair value and on a net basis when a legal right of offset exists with the same counterparty. Occidental applies hedge accounting when transactions meet specified criteria for such treatment and management elects to do so. If a derivative does not qualify or is not designated and documented as a cash-flow hedge, any fair value gains or losses are recognized in earnings in the current period. For cash-flow hedges, the gain or loss on the effective portion of the derivative is reported as a component of other comprehensive income (OCI) with an offsetting adjustment to the basis of the item being hedged. Realized gains or losses from cash-flow hedges, and any ineffective portion, are recorded as a component of net sales in the consolidated statements of income. Ineffectiveness is primarily created by a basis difference between the hedged item and the hedging instrument due to location, quality or grade of the physical commodity transactions. Gains and losses from derivative instruments are reported net in the consolidated statements of income. There were no fair value hedges as of and during the year ended December 31, 2011.

A hedge is regarded as highly effective such that it qualifies for hedge accounting if, at inception and throughout its life, it is expected that changes in the fair value or cash flows of the hedged item will be offset by 80 to 125 percent of the changes in the fair value or cash flows, respectively, of the hedging instrument. In the case of hedging a forecast transaction, the transaction must be probable and must present an exposure to variations in cash flows that could ultimately affect reported net income or loss. Occidental discontinues hedge accounting when it determines that a derivative has ceased to be highly effective as a hedge; when the hedged item matures or is sold or repaid; or when a forecast transaction is no longer deemed probable.

Occidental's midstream and marketing PP&E is depreciated over the estimated useful lives of the assets, using either the unit-of-production or straight-line method. Occidental performs impairment tests on its midstream and marketing assets whenever events or changes in circumstances lead to a reduction in the estimated useful lives or estimated future cash flows that would indicate that the carrying amount may not be recoverable, or when management's plans change with respect to those assets. Any impairment loss would be calculated as the excess of the asset's net book value over its estimated fair value.

### Fair Value Measurements

Occidental has categorized its assets and liabilities that are measured at fair value, based on the priority of the inputs to the valuation techniques, in a three-level fair value hierarchy: Level 1 – using quoted prices in active markets for identical assets or liabilities; Level 2 – using observable inputs other than quoted prices for identical assets or liabilities; and Level 3 – using unobservable inputs. Transfers between levels, if any, are reported at the end of each reporting period.

### Fair Values - Recurring

Occidental primarily applies the market approach for recurring fair value measurements, maximizes its use of observable inputs and minimizes its use of unobservable inputs. Occidental utilizes the mid-point price between bid and ask prices for valuing the majority of its assets and liabilities measured and reported at fair value. In addition to using market data, Occidental makes assumptions in valuing its assets and liabilities, including assumptions about the risks inherent in the inputs to the valuation technique. For assets and liabilities carried at fair value, Occidental measures fair value using the following methods:

- Ø Trading securities Quoted prices in active markets exist and are used to provide fair values for these instruments. These securities are classified as Level 1.
- Ø Commodity derivatives Occidental values exchange-cleared commodity derivatives using closing prices provided by the exchange as of the balance sheet date. These derivatives are classified as Level 1. Over-the-Counter (OTC) financial commodity contracts, options and physical commodity forward purchase and sale contracts are generally valued using quotations provided by brokers or industry-standard models that consider various inputs, including quoted forward prices for commodities, time value, volatility factors, credit risk and current market and contractual prices for the underlying instruments, as well as other relevant economic measures. Substantially all of these inputs are observable in the marketplace throughout the full term of the instrument, can be derived from observable data or are supported by observable prices at which transactions are executed in the marketplace. Occidental classifies these measurements as Level 2.

Occidental generally uses an income approach to measure fair value when there is not a market observable price for an identical or similar asset or liability. This approach utilizes management's best assumptions regarding expectations of projected cash flows, and discounts the expected cash flows using a risk-adjusted risk-free discount rate.

### **Environmental Liabilities and Expenditures**

Environmental expenditures that relate to current operations are expensed or capitalized as appropriate. Occidental records environmental reserves for estimated remediation costs that relate to existing conditions from past operations when environmental remediation efforts are probable and the costs can be reasonably estimated. In determining the reserves and the range of reasonably possible additional loss, Occidental refers to currently available information, including relevant past experience, remedial objectives, available technologies, applicable laws and regulations and cost-sharing arrangements. Occidental bases environmental reserves on management's estimate of the most likely cost to be incurred, using the most cost-effective technology reasonably expected to achieve the remedial objective. Occidental periodically reviews

reserves and adjusts them as new information becomes available. Occidental records environmental reserves on a discounted basis when it deems the aggregate amount and timing of cash

payments to be reliably determinable at the time the reserves are established. The reserve methodology with respect to discounting for a specific site is not modified once it is established. The amount of discounted environmental reserves is insignificant. Occidental generally records reimbursements or recoveries of environmental remediation costs in income when received, or when receipt of recovery is highly probable. As of December 31, 2011, 2010 and 2009, Occidental did not have any accruals for reimbursements or recoveries.

Many factors could affect Occidental's future remediation costs and result in adjustments to its environmental reserves and range of reasonably possible additional loss. The most significant are: (1) cost estimates for remedial activities may be inaccurate; (2) the length of time, type or amount of remediation necessary to achieve the remedial objective may change due to factors such as site conditions, the ability to identify and control contaminant sources or the discovery of additional contamination; (3) the regulatory agency may ultimately reject or modify Occidental's proposed remedial plan; (4) improved or alternative remediation technologies may change remediation costs; and (5) laws and regulations may impose more or less stringent remediation requirements or affect cost sharing or allocation of liability.

Certain sites involve multiple parties with various cost-sharing arrangements, which fall into the following three categories: (1) environmental proceedings that result in a negotiated or prescribed allocation of remediation costs among Occidental and other alleged potentially responsible parties; (2) oil and gas ventures in which each participant pays its proportionate share of remediation costs reflecting its working interest; or (3) contractual arrangements, typically relating to purchases and sales of properties, in which the parties to the transaction agree to methods of allocating remediation costs. In these circumstances, Occidental evaluates the financial viability of other parties with whom it is alleged to be jointly liable, the degree of their commitment to participate and the consequences to Occidental of their failure to participate when estimating Occidental's ultimate share of liability. Occidental records reserves at its expected net cost of remedial activities and, based on these factors, believes that it will not be required to assume a share of liability of such other potentially responsible parties in an amount materially above amounts reserved.

In addition to the costs of investigations and cleanup measures, which often take in excess of 10 years at NPL sites, Occidental's reserves include management's estimates of the costs to operate and maintain remedial systems. If remedial systems are modified over time in response to significant changes in site-specific data, laws, regulations, technologies or engineering estimates, Occidental reviews and adjusts its reserves accordingly.

If Occidental adjusts the environmental reserve balance based on the factors described above, the amount of the increase or decrease would be recognized in earnings. For example, if the reserve balance were reduced by 10 percent, Occidental would record a pre-tax gain of \$36 million. If the reserve balance were increased by 10 percent, Occidental would record an additional remediation expense of \$36 million.

### Other Loss Contingencies

Occidental is involved with numerous lawsuits, claims, proceedings and audits in the normal course of its operations. Occidental records a loss contingency for these matters when it is probable that an asset has been impaired or a liability has been incurred and the amount of the loss can be reasonably estimated. In addition, Occidental discloses, in aggregate, its exposure to loss in excess of the amount recorded on the balance sheet for these matters if it is reasonably possible that an additional material loss may be incurred. Occidental reviews its loss contingencies on an ongoing basis.

Loss contingencies are based on judgments made by management with respect to the likely outcome of these matters and are adjusted as appropriate. Management's judgments could change based on new information, changes in laws or regulations, changes in management's plans or intentions and the outcome of legal proceedings, settlements or other factors. See "Lawsuits, Claims and Other Contingencies" for additional information.

### Significant Accouting and Disclosure Changes

Pursuant to a new rule issued by the Financial Accounting Standards Board, Occidental moved the Consolidated Statements of Comprehensive Income to consecutively follow the Consolidated Statements of Income. Occidental early-adopted the rule, as permitted, in the fourth quarter of 2011.

Derivative Activities and Market Risk

Commodity Price Risk

General

Occidental's results are sensitive to fluctuations in oil, NGL and natural gas prices. Price changes at current global prices and levels of production affect Occidental's pre-tax income by approximately \$150 million for a \$1 per barrel change in oil prices and \$30 million for a \$1 per barrel change in NGL prices. If domestic natural gas prices vary by \$0.50 per Mcf, it would have an estimated annual effect on Occidental's pre-tax income of approximately \$125 million. As production levels change in the future, the sensitivity of Occidental's results to oil and gas prices also will change. The trading and marketing results are also sensitive to price changes of oil, gas and, to a lesser degree, other commodities. These sensitivities are additionally dependent on trading and marketing volumes and cannot be predicted reliably.

Occidental's results are also sensitive to fluctuations in chemical prices. A variation in chlorine and caustic soda prices of \$10 per ton would have a pre-tax annual effect on income of approximately \$10 million and \$30 million, respectively. A variation in PVC prices of \$0.01 per lb. would have a pre-tax annual effect on income of approximately \$25 million. A variation in ethylene dichloride (EDC) prices of \$10 per ton would have a pre-tax annual effect on income of approximately \$5 million. Historically, over time, product price changes have tracked raw material and feedstock product price changes, somewhat mitigating the margin effect of price changes. According to Chemical Market Associates, Inc., December 2011 average contract prices were: chlorine—\$288 per ton, caustic soda—\$615 per ton, PVC—\$0.75 per lb. and EDC—\$180 per ton.

### Marketing and Trading Operations

Through its marketing and trading activities and within its established policy controls and procedures, Occidental uses derivative instruments, including a combination of short-term futures, forwards, options and swaps, to improve realized prices for its oil and gas. Additionally, Occidental's Phibro trading unit engages in trading activities using derivatives for the purpose of generating profits mainly from market price changes of commodities. In the past, Occidental has also used derivatives to reduce its exposure to price volatility on a small portion of its oil and gas production.

### Risk Management

Occidental conducts its risk management activities for marketing and trading activities under the controls and governance of its risk control policy. The controls under this policy are implemented and enforced by certain members of management embedded in the marketing and trading operations in order to manage risk by providing an independent and separate evaluation and check. These members of management report to the Corporate Vice President and Treasurer. The President and Chief Executive Officer and risk committees comprising members of Occidental's senior corporate management also oversee these controls. Controls for these activities include limits on value at risk, limits on credit, limits on total notional trade value, segregation of duties, delegation of authority, daily price verifications, daily reporting to senior management of positions together with various risk measures and a number of other policy and procedural controls. Additionally, these operations maintain highly liquid positions, as a result of which the market risk typically can be neutralized on short notice.

### Fair Value of Marketing and Trading Derivative Contracts

As part of its third-party marketing and trading activities, Occidental enters into purchase and sale contracts for oil and gas. Occidental manages these contracts so that the aggregate terms and volumes of the purchases and sales generally approximate each other. The following table shows the changes in the net fair value of Occidental's marketing and trading derivative contracts during 2011 and 2010:

| Assets/(liabilities) (in millions)         | 2011       |      | 2010 |   |
|--|------------|------|------|---|
| Fair value of contracts outstanding at     |            |      |      |   |
| beginning of year                          | \$<br>(142 | ) \$ | (345 | ) |
| Contracts realized or settled during the   |            |      |      |   |
| year                                       | 182        |      | (17  | ) |
| Gains (losses) or other changes in fair    |            |      |      |   |
| value                                      | (53        | )    | 220  |   |
| Fair value of contracts outstanding at end |            |      |      |   |
| of year                                    | \$<br>(13  | ) \$ | (142 | ) |

The following table shows the fair value of derivatives, segregated by maturity periods and by methodology of fair value estimation:

|                      | Matur | ity P | eriods | 5    |      |      |            |       |   |

### Cash-Flow Hedges

Throughout 2011, Occidental held a series of collar agreements that qualified as cash-flow hedges for the sale of approximately 3 percent of its oil production. These agreements were for existing domestic production and terminated as of December 31, 2011. The collar agreements hedged the sale of 12,000 barrels per day at a weighted-average strike price that ranged from \$32.92 to \$46.27.

In 2009, Occidental entered into financial swap agreements for the sale of a portion of its existing natural gas production from the Rocky Mountain region of the United States that qualify as cash-flow hedges. The following table presents the daily quantities and weighted-average prices that will be received by Occidental as of December 31, 2011:

Natural Gas - Swaps Daily Volume Average Price

(cubic feet)

January 2012

March 2012 50 million \$6.07

Occidental's marketing and trading operations store natural gas purchased from third parties at Occidental's North American leased storage facilities. Derivative instruments are used to fix margins on the future sales of the stored volumes. These derivative agreements continue through January 2013. As of December 31, 2011, Occidental had approximately 25 billion cubic feet of natural gas held in storage. As of December 31, 2011, Occidental had cash-flow hedges for the forecast sale, to be settled by physical delivery, of approximately 35 billion cubic feet of natural gas held in storage.

As of December 31, 2011, the total fair value of cash-flow hedges, which was a net asset of \$39 million, was included in the total fair value (a net liability of \$13 million) in the tables in "Fair Value of Marketing and Trading Derivative Contracts" above.

### **Quantitative Information**

Occidental uses value at risk to estimate the potential effects of changes in fair values of commodity-based and foreign currency derivatives and commodity contracts used in marketing and trading activities. This method determines the maximum potential negative short-term change in fair value with at least a 95-percent level of confidence. The marketing and trading value at risk determined with this method was immaterial during 2011.

On December 31, 2009, Occidental acquired Phibro, which trades oil, gas and other commodities. Occidental determined that operations of Phibro are not reasonably likely to have a material adverse effect on the Company. This conclusion is based primarily on the trading limits Occidental placed on the unit, including, among others, limits on total notional trade value, value at risk and credit, as well as the highly liquid positions the operation maintains, as a result of which the market risk typically can be neutralized on short notice.

### **Delivery Commitments**

Occidental sells a portion of its oil, NGLs and natural gas from its operations, as well as volumes from third parties, under a variety of contractual obligations that specify the delivery of a fixed and determinable quantity. The total amount contracted to be delivered from 2012 through 2019, a substantial majority of which are in the

United States, is approximately 107 million barrels of oil, 358 billion cubic feet of gas and immaterial amounts of NGLs. As of December 31, 2011, Occidental had purchase contracts to fulfill a substantial portion of these obligations and believes that it has sufficient production and existing volumes in storage, as well as the ability to fulfill the remaining obligations with contractual purchases, and that, to the extent it has any shortfall in sourcing the required quantities, it believes it has the ability to secure such volumes in the spot market.

#### Interest Rate Risk

General

Occidental's exposure to changes in interest rates relates primarily to its variable-rate, long-term debt obligations, and is not expected to be material. As of December 31, 2011, variable-rate debt constituted approximately one percent of Occidental's total debt.

### Tabular Presentation of Interest Rate Risk

The table below provides information about Occidental's debt obligations. Debt amounts represent principal payments by maturity date.

| Year of Maturity |    |           |    |             |                    |       |  |

(a) Excludes unamortized net discounts of \$33 million.

### Credit Risk

Occidental's contracts are spread among a large number of counterparties. Creditworthiness is reviewed before doing business with a new counterparty and on an ongoing basis, and master netting agreements are used when appropriate. Occidental monitors aggregated counterparty exposure relative to credit limits. Credit exposure for each customer is monitored for outstanding balances, current activity, and forward mark-to-market exposure.

A substantial portion of Occidental's derivative transaction volume is executed through exchange-traded contracts, which are subject to nominal credit risk as a significant portion of these transactions are executed on a daily margin basis. Occidental executes the rest of its derivative transactions in the OTC market. Occidental is subject to counterparty credit risk to the extent the counterparty to the derivatives is unable to meet its settlement commitments. Occidental manages this credit risk by selecting counterparties that it believes to be financially strong, by spreading the credit risk among many such counterparties, by entering into master netting arrangements with the counterparties and by requiring collateral, as appropriate. Occidental actively monitors the creditworthiness of each counterparty and records valuation adjustments to reflect counterparty risk, if necessary.

Certain of Occidental's OTC derivative instruments contain credit-risk-contingent features, primarily tied to credit ratings for Occidental or its counterparties, which may affect the amount of collateral that each would need to post. As of December 31, 2011 and 2010, Occidental had a net liability of \$58 million and \$234 million, respectively, for which the amount of collateral posted was \$27 million and \$10 million, respectively. Occidental believes that if it had received a one-notch reduction in its credit ratings, it would not have resulted in a material change in its collateral-posting requirements as of December 31, 2011 and 2010.

As of December 31, 2011, the substantial majority of the credit exposures was with investment grade counterparties. Occidental believes its exposure to credit-related losses at December 31, 2011 was not material. Losses associated with credit risk have been immaterial for all years presented.

### Foreign Currency Risk

Occidental's foreign operations have currency risk. Occidental manages its exposure primarily by balancing monetary assets and liabilities and maintaining cash positions in foreign currencies only at levels necessary for operating purposes. Most international oil sales are denominated in United States dollars. Additionally, all of Occidental's consolidated foreign oil and gas subsidiaries have the United States dollar as the functional currency. As of December 31, 2011, the fair value of foreign currency derivatives used in the trading operations was immaterial. The effect of exchange rates on transactions in foreign currencies is included in periodic income.

Safe Harbor Discussion Regarding Outlook and Other Forward-Looking Data

Portions of this report, including Items 1 and 2 (including the information appearing under the captions "Business and Properties — Competition and Sales and Marketing") and Items 7 and 7A (including "Management's Discussion and Analysis of Financial Condition and Results of Operations," including the information under the sub captions "Strategy," "Oil and Gas Segment — Proved Reserves" and " — Industry Outlook," "Chemical Segment — Industry Outlook," "Midstream, Marketing and Other Segment — Industry Outlook," "Liquidity and Capital Resources," "Lawsuits, Claims and Other Contingencies," "Environmental Liabilities and Expenditures," "Critical Accounting Policies and Estimates," and "Derivative Activities and Market Risk"), contain forward-looking statements and involve risks and uncertainties that could materially affect expected results of operations, liquidity, cash flows and business prospects. Words such as "estimate," "project," "predict," "will," "would," "should," "could," "may," "might," "anticipate," "plan," "intend," "believe," "expect," "aim," "goal," "target," "objective," "likely" or similar expressions that convey the uncertainty of future events or outcomes generally indicate forward-looking statements. You should not place undue reliance on these forward-looking statements, which speak only as of the date of this report. Unless legally required, Occidental does not undertake any obligation to update any forward-looking statements as a result of new information, future events or otherwise. Factors that may cause Occidental's results of operations and financial position to differ from expectations include items noted in Item 1A "Risk Factors," and elsewhere.

### Item 8 Financial Statements and Supplementary Data

Management's Annual Assessment of and Report on Internal Control Over Financial Reporting

The management of Occidental Petroleum Corporation and subsidiaries (Occidental) is responsible for establishing and maintaining adequate internal control over financial reporting. Occidental's system of internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with generally accepted accounting principles. Occidental's internal control over financial reporting includes those policies and procedures that: (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of Occidental's assets; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that Occidental's receipts and expenditures are being made only in accordance with authorizations of Occidental's management and directors; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of Occidental's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management has assessed the effectiveness of Occidental's internal control system as of December 31, 2011 based on the criteria for effective internal control over financial reporting described in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this assessment, management believes that, as of December 31, 2011, Occidental's system of internal control over financial reporting is effective.

Occidental's independent auditors, KPMG LLP, have issued an audit report on Occidental's internal control over financial reporting.

Report of Independent Registered Public Accounting Firm on Consolidated Financial Statements

To the Board of Directors and Stockholders Occidental Petroleum Corporation:

We have audited the accompanying consolidated balance sheets of Occidental Petroleum Corporation and subsidiaries as of December 31, 2011 and 2010, and the related consolidated statements of income, stockholders' equity, comprehensive income and cash flows for each of the years in the three-year period ended December 31, 2011. In connection with our audits of the consolidated financial statements, we also have audited the accompanying financial statement schedule. These consolidated financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Occidental Petroleum Corporation and subsidiaries as of December 31, 2011 and 2010, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2011, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Occidental Petroleum Corporation and subsidiaries' internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 23, 2012 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

/s/ KPMG LLP

Los Angeles, California

Report of Independent Registered Public Accounting Firm on Internal Control Over Financial Reporting

To the Board of Directors and Stockholders Occidental Petroleum Corporation:

We have audited Occidental Petroleum Corporation and subsidiaries' internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Assessment of and Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that: (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Occidental Petroleum Corporation and its subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Occidental Petroleum Corporation and subsidiaries as of December 31, 2011 and 2010, and the related consolidated statements of income, stockholders' equity, comprehensive income and cash flows for each of the years in the three-year period ended December 31, 2011, and our report dated February 23, 2012 expressed an unqualified opinion on those consolidated financial statements.

#### Notes to Consolidated Financial Statements

Occidental Petroleum Corporation and Subsidiaries

# Note 1 Summary of Significant Accounting Policies

#### Nature of Operations

In this report, "Occidental" or "the Company" refers to Occidental Petroleum Corporation, a Delaware corporation (OPC), or OPC and one or more entities in which it owns a controlling interest (subsidiaries). Occidental is a multinational organization whose subsidiaries and affiliates operate in the oil and gas, chemical and midstream, marketing and other segments. The oil and gas segment explores for, develops and produces oil and condensate, natural gas liquids (NGLs) and natural gas. The chemical segment (OxyChem) mainly manufactures and markets basic chemicals and vinyls. The midstream, marketing and other segment (midstream and marketing) gathers, treats, processes, transports, stores, purchases and markets oil, condensate, NGLs, natural gas, carbon dioxide (CO2) and power. It also trades around its assets, including pipelines and storage capacity, and trades oil, NGLs, gas and other commodities.

#### Principles of Consolidation

The consolidated financial statements have been prepared in conformity with United States generally accepted accounting principles (GAAP) and include the accounts of OPC, its subsidiaries and its undivided interests in oil and gas exploration and production ventures. Occidental accounts for its share of oil and gas exploration and production ventures, in which it has a direct working interest, by reporting its proportionate share of assets, liabilities, revenues, costs and cash flows within the relevant lines on the balance sheets, income statements and cash flow statements.

Certain financial statements, notes and supplementary data for prior years have been reclassified to conform to the 2011 presentation.

#### Investments in Unconsolidated Entities

Occidental's percentage interest in the underlying net assets of affiliates as to which it exercises significant influence without having a majority voting interest (excluding oil and gas ventures in which Occidental holds an undivided interest) are accounted for under the equity method. Occidental reviews equity-method investments for impairment whenever events or changes in circumstances indicate that an other-than-temporary decline in value may have occurred. The amount of impairment, if any, is based on quoted market prices, where available, or other valuation techniques, including discounted cash flows.

### Revenue Recognition

Revenue is recognized from oil and gas production when title has passed to the customer, which occurs when the product is shipped. In international locations where oil is shipped by tanker, title passes when the tanker is loaded or product is received by the customer, depending on the shipping terms. This process occasionally causes a difference between actual production in a reporting period and sales volumes that have been recognized as revenue.

Revenue from chemical product sales is recognized when the product is shipped and title has passed to the customer. Certain incentive programs may provide for payments or credits to be made to customers based on the volume of product purchased over a defined period. Total customer incentive payments over a given period are estimated and recorded as a reduction to revenue ratably over the contract period. Such estimates are evaluated and revised as warranted.

Revenue from marketing and trading activities is recognized on net settled transactions upon completion of contract terms, and for physical deliveries upon title transfer. For unsettled transactions, contracts are recorded at fair value and changes in fair value are reflected in net sales. Revenue from all marketing and trading activities is reported on a net basis.

Occidental records revenue net of any taxes, such as sales taxes, that are assessed by governmental authorities on Occidental's customers.

### Risks and Uncertainties

The process of preparing consolidated financial statements in conformity with GAAP requires Occidental's management to make informed estimates and judgments regarding certain types of financial statement balances. Such estimates primarily relate to unsettled transactions and events as of the date of the consolidated financial statements. Changes in facts and circumstances or discovery of new information relating to such transactions and events may result in revised estimates and judgments and actual results may differ from estimates upon settlement but generally not by material amounts. Management believes that these estimates and assumptions provide a reasonable basis for the fair presentation of Occidental's financial position and results of operations.

Occidental establishes a valuation allowance against net operating losses and other deferred tax assets to the extent it believes the future benefit from these assets will not be realized in the statutory carryforward periods. Realization of deferred tax assets, including any net operating loss carryforwards, is dependent upon Occidental generating sufficient future taxable income in jurisdictions where such assets originate and reversal of temporary differences.

The accompanying consolidated financial statements include assets of approximately \$11 billion as of December 31, 2011, and net sales of approximately \$8.7 billion for the year ended December 31, 2011, relating to Occidental's operations in countries outside North America. Occidental operates some of its oil and gas business in countries that occasionally have experienced political instability, armed conflict, terrorism, insurgency, civil unrest, security problems, labor unrest, OPEC production restrictions, equipment import restrictions and sanctions, all of which increase Occidental's risk of loss or delayed or restricted production or may result in other adverse consequences. Occidental attempts to conduct its financial affairs so as to mitigate its exposure to such risks and would seek compensation in the event of nationalization.

Since Occidental's major products are commodities, significant changes in the prices of oil and gas and chemical products may have a significant impact on Occidental's results of operations.

Also, see "Property, Plant and Equipment" below.

# Cash and Cash Equivalents

Cash equivalents are short-term, highly liquid investments that are readily convertible to cash. Cash equivalents were approximately \$3.5 billion and \$2.5 billion at December 31, 2011 and 2010, respectively.

#### Investments

Available-for-sale securities are recorded at fair value with any unrealized gains or losses included in accumulated other comprehensive income/loss (AOCI). Trading securities are recorded at fair value with unrealized and realized gains or losses included in net sales.

#### Inventories

Materials and supplies are valued at the lower of weighted-average cost or market and are reviewed periodically for obsolescence. Oil, NGLs and natural gas inventories are valued at the lower of cost or market.

For the chemical segment, Occidental's inventories are valued at the lower of cost or market. For most of its domestic inventories, other than materials and supplies, the chemical segment uses the last-in, first-out (LIFO) method as it better matches current costs and current revenue. For other countries, Occidental uses the first-in, first-out method (if the costs of goods are specifically identifiable) or the average-cost method (if the costs of goods are not specifically identifiable).

# Property, Plant and Equipment

# Oil and Gas

The carrying value of Occidental's property, plant and equipment (PP&E) represents the cost incurred to acquire or develop the asset, including any capitalized interest, net of accumulated depreciation, depletion and amortization (DD&A) and net of any impairment charges. For business acquisitions, PP&E cost is based on fair values at the acquisition date. Interest costs incurred in connection with qualifying capital expenditures are capitalized and amortized over the lives of the related assets.

Occidental uses the successful efforts method to account for its oil and gas properties. Under this method, costs of acquiring properties, costs of drilling successful exploration wells and development costs are capitalized. The costs of exploratory wells are initially capitalized pending a determination of whether proved reserves have been found. If proved reserves have been found, the costs of exploratory wells remain capitalized. Otherwise, the costs of the related exploratory wells are charged to expense. In some cases, a determination of proved reserves cannot be made at the completion of drilling, requiring additional testing and evaluation of the wells. Occidental's practice is generally to expense the costs of such exploratory wells if a determination of proved reserves has not been made within a 12-month period after drilling is complete.

The following table summarizes the activity of capitalized exploratory well costs for continuing operations for the years ended December 31:

| In millions   | 2  | .011 | 2  | 010  | 2  | 009  |
|---|----|------|----|------|----|------|
| Balance — Beginning of Year                                     | \$ | 73   | \$ | 51   | \$ | 63   |
| Additions to capitalized exploratory well costs pending the     |    |      |    |      |    |      |
| determination of proved reserves                                |    | 155  |    | 73   |    | 51   |
| Reclassifications to property, plant and equipment based on the |    |      |    |      |    |      |
| determination of proved reserves                                |    | (28) |    | (29) |    | (8)  |
| Capitalized exploratory well costs charged to expense           |    | (18) |    | (22) |    | (55) |
| Balance — End of Year   | \$ | 182  | \$ | 73   | \$ | 51   |

Annual lease rentals and geological, geophysical and seismic costs are expensed as incurred.

Occidental's policy is to expense the costs of injectants for secondary and tertiary recovery.

Depreciation and depletion of oil and gas producing properties are determined by the unit-of-production method. Leasehold acquisition costs are amortized over total proved reserves, while capitalized development and successful exploration costs are amortized over proved developed reserves.

Proved oil and gas reserves (as defined in the Securities and Exchange Commission's Regulation S-X, Rule 4-10(a)) are those quantities of oil and gas, which, by analysis of geoscience and engineering data, can be estimated with reasonable certainty to be economically producible—from a given date forward, from known reservoirs, and under existing economic conditions, operating methods, and government regulations—prior to the time at which contracts providing the right to operate expire, unless evidence indicates that renewal is reasonably certain, regardless of whether deterministic or probabilistic methods are used for the estimation. Occidental has no proved oil and gas reserves for which the determination of commercial viability is subject to the completion of major additional capital expenditures.

A portion of the carrying value of Occidental's oil and gas properties is attributable to unproved properties. At December 31, 2011, the net capitalized costs attributable to unproved properties were \$4.9 billion. The unproved amounts are not subject to DD&A or impairment until they are classified as proved properties. As exploration and development work progresses, if reserves on these properties are proved, capitalized costs attributable to the properties will become subject to DD&A. If the exploration and development work were to be unsuccessful, or management's plans changed with respect to these properties, as a result of economic, operating or contractual conditions, the capitalized costs of the related properties would be expensed. The timing of any writedowns of these unproved properties, if warranted, depends upon management's plans, the nature, timing and extent of future exploration and development activities and their results. Occidental believes its current plans and exploration and development efforts will allow it to realize its unproved property balance.

Additionally, Occidental performs impairment tests with respect to its proved properties generally when prices decline other than temporarily, reserve estimates change significantly or other significant events occur that may impact its ability to realize the recorded asset amounts. Impairment tests incorporate a number of assumptions involving expectations of future cash flows, which can change significantly over time. These assumptions include estimates of future product prices, which Occidental bases on forward price curves and, where applicable, contractual prices, estimates of oil and gas reserves and estimates of future expected operating and development costs. Fluctuations in commodity prices and production and development costs could cause management's plans to change with respect to unproved properties and could cause the carrying values of proved properties to be unrealizable. Such circumstances could result in impairments in the carrying values of proved or unproved properties or both. Any impairment loss would be calculated as the excess of the asset's net book value over its estimated fair value.

#### Chemical

Occidental's chemical assets are depreciated using either the unit-of-production or straight-line method, based upon the estimated useful lives of the facilities. The estimated useful lives of Occidental's chemical assets, which range from three years to 50 years, are also used for impairment tests. The estimated useful lives for the chemical facilities are based on the assumption that Occidental will provide an appropriate level of annual expenditures to ensure productive capacity is sustained. Such expenditures consist of ongoing routine repairs and maintenance, as well as planned major maintenance activities (PMMA). Ongoing routine repairs and maintenance expenditures are expensed as incurred. PMMA costs are capitalized and amortized over the period until the next planned overhaul. Additionally, Occidental incurs capital expenditures that extend the remaining useful lives of existing assets, increase their capacity or operating efficiency beyond the original specification or add value through modification for a different use. These capital expenditures are not considered in the initial determination of the useful lives of these assets at the time they are placed into service. The resulting revision, if any, of the asset's estimated useful life is measured and accounted for prospectively.

Without these continued expenditures, the useful lives of these assets could decrease significantly. Other factors that could change the estimated useful lives of Occidental's chemical assets include sustained higher or lower product prices, which are particularly affected by both domestic and foreign competition, demand, feedstock costs, energy prices, environmental regulations and technological changes.

Occidental performs impairment tests on its chemical assets whenever events or changes in circumstances lead to a reduction in the estimated useful lives or estimated future cash flows that would indicate that the carrying amount may not be recoverable, or when management's plans change with respect to those assets. Any impairment loss would be calculated as the excess of the asset's net book value over its estimated fair value.

# Midstream and Marketing

Occidental's midstream and marketing PP&E is depreciated over the estimated useful lives of the assets, using either the unit-of-production or straight-line method.

Occidental performs impairment tests on its midstream and marketing assets whenever events or changes in circumstances lead to a reduction in the estimated useful lives or estimated future cash flows that would indicate that the carrying amount may not be recoverable, or when management's plans change with respect to those assets. Any impairment loss would be calculated as the excess of the asset's net book value over its estimated fair value.

#### Fair Value Measurements

Occidental has categorized its assets and liabilities that are measured at fair value, based on the priority of the inputs to the valuation techniques, in a three-level fair value hierarchy: Level 1 – using quoted prices in active markets for identical assets or liabilities; Level 2 – using observable inputs other than quoted prices for identical assets or liabilities; and Level 3 – using unobservable inputs. Transfers between levels, if any, are reported at the end of each reporting period.

#### Fair Values - Recurring

Occidental primarily applies the market approach for recurring fair value measurements, maximizes its use of observable inputs and minimizes its use of unobservable inputs. Occidental utilizes the mid-point price between bid and ask prices for valuing the majority of its assets and liabilities measured and reported at fair value. In addition to using market data, Occidental makes assumptions in valuing its assets and liabilities, including assumptions about the risks inherent in the inputs to the valuation technique. For assets and liabilities carried at fair value, Occidental measures fair value using the following methods:

- Ø Trading securities Quoted prices in active markets exist and are used to provide fair values for these instruments. These securities are classified as Level 1.
- Ø Commodity derivatives Occidental values exchange-cleared commodity derivatives using closing prices provided by the exchange as of the balance sheet date. These derivatives are classified as Level
  - 1. Over-the-Counter (OTC) financial commodity contracts, options and physical commodity forward purchase and sale contracts are generally valued using quotations provided by brokers or industry-standard models that consider various inputs, including quoted forward prices for commodities, time value, volatility factors, credit risk and current market and contractual prices for the underlying instruments, as well as other relevant economic measures. Substantially all of these inputs are observable in the marketplace throughout the full term of the instrument, can be derived from observable data or are supported by observable prices at which transactions are executed in the marketplace. Occidental classifies these measurements as Level 2.

Occidental generally uses an income approach to measure fair value when there is not a market-observable price for an identical or similar asset or liability. This approach utilizes management's best assumptions regarding expectations of projected cash flows, and discounts the expected cash flows using a risk-adjusted risk-free discount rate.

#### Accrued Liabilities-Current

Accrued liabilities include accrued payroll, commissions and related expenses of \$462 million and \$470 million at December 31, 2011 and 2010, respectively.

# Environmental Liabilities and Expenditures

Environmental expenditures that relate to current operations are expensed or capitalized as appropriate. Occidental records environmental reserves for estimated remediation costs that relate to existing conditions from past operations when environmental remediation efforts are probable and the costs can be reasonably estimated. In determining the reserves and the range of reasonably possible additional loss, Occidental refers to currently available information, including relevant past experience, remedial objectives, available technologies, applicable laws and regulations and cost-sharing arrangements. Occidental bases environmental reserves on management's estimate of the most likely cost to be incurred, using the most cost-effective technology reasonably expected to achieve the remedial objective. Occidental periodically reviews reserves and adjusts them as new information becomes available. Occidental records environmental reserves on a discounted basis when it deems the aggregate amount and timing of cash payments to be reliably determinable at the time the reserves are established. The reserve methodology with respect to discounting for a specific site is not modified once it is established. The amount of discounted environmental reserves is insignificant. Occidental generally records reimbursements or recoveries of environmental remediation costs in income when received, or when receipt of recovery is highly probable. As of December 31, 2011, 2010 and 2009, Occidental did not have any accruals for reimbursements or recoveries.

Many factors could affect Occidental's future remediation costs and result in adjustments to its environmental reserves and range of reasonably possible additional loss. The most significant are: (1) cost estimates for remedial activities may be inaccurate; (2) the length of time, type or amount of remediation necessary to achieve the remedial objective may change due to factors such as site conditions, the ability to identify and control contaminant sources or the discovery of additional contamination; (3) the regulatory agency may ultimately reject or modify Occidental's proposed remedial plan; (4) improved or alternative remediation technologies may change remediation costs; and (5) laws and regulations may impose more or less stringent remediation requirements or affect cost sharing or allocation of liability.

Certain sites involve multiple parties with various cost-sharing arrangements, which fall into the following three categories: (1) environmental proceedings that result in a negotiated or prescribed allocation of remediation costs among Occidental and other alleged potentially responsible parties; (2) oil and gas ventures in which each participant pays its proportionate share of remediation costs reflecting its working interest; or (3) contractual arrangements,

typically relating to purchases and sales of properties, in which the parties to the transaction agree to methods of allocating remediation costs. In these circumstances, Occidental evaluates the financial viability of the other parties with whom it is alleged to be jointly liable, the degree of their commitment to participate and the consequences to Occidental of their failure to participate when estimating Occidental's ultimate share of liability. Occidental records reserves at its expected net cost of remedial activities and, based on these factors, believes that it will not be required to assume a share of liability of such other potentially responsible parties in an amount materially above amounts reserved.

In addition to the costs of investigations and cleanup measures, which often take in excess of 10 years at Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) National Priorities List (NPL) sites, Occidental's reserves include management's estimates of the costs to operate and maintain remedial systems. If remedial systems are modified over time in response to significant changes in site-specific data, laws, regulations, technologies or engineering estimates, Occidental reviews and adjusts its reserves accordingly.

#### Asset Retirement Obligations

Occidental recognizes the fair value of asset retirement obligations in the period in which a determination is made that a legal obligation exists to dismantle an asset and reclaim or remediate the property at the end of its useful life and the cost of the obligation can be reasonably estimated. The liability amounts are based on future retirement cost estimates and incorporate many assumptions such as time to abandonment, technological changes, future inflation rates and the risk-adjusted risk-free rate of interest. When the liability is initially recorded, Occidental capitalizes the cost by increasing the related PP&E balances. If the estimated future cost of the asset retirement obligation changes, Occidental records an adjustment to both the asset retirement obligation and PP&E. Over time, the liability is increased and expense is recognized for accretion, and the initial capitalized cost is depreciated over the useful life of the asset. Occidental has recorded no market risk premium in its liability since no reliable estimate can be made at this time.

At a certain number of its facilities, Occidental has identified conditional asset retirement obligations that are related mainly to plant decommissioning. Occidental believes that there is an indeterminate settlement date for these asset retirement obligations because the range of time over which Occidental may settle these obligations is unknown or cannot be estimated. Therefore, Occidental cannot reasonably estimate the fair value of these liabilities. Occidental will recognize these conditional asset retirement obligations in the periods in which sufficient information becomes available to reasonably estimate their fair values.

The following table summarizes the activity of the asset retirement obligation, of which \$1,030 million and \$762 million is included in deferred credits and other liabilities - other, with the remaining current portion in accrued liabilities at December 31, 2011 and 2010, respectively.

| For the years ended December 31, (in millions)          | 2011        | 2010      |
|---|-------------|-----------|
| Beginning balance                                       | \$<br>800   | \$<br>657 |
| Liabilities incurred - capitalized to PP&E              | 74          | 47        |
| Liabilities settled and paid                            | (53)        | (32)      |
| Accretion expense                                       | 48          | 37        |
| Acquisitions and other - capitalized to PP&E            | 177         | 66        |
| Revisions to estimated cash flows - capitalized to PP&E | 43          | 25        |
| Ending balance  | \$<br>1,089 | \$<br>800 |

### **Derivative Instruments**

Derivatives are carried at fair value and on a net basis when a legal right of offset exists with the same counterparty. Occidental applies hedge accounting when transactions meet specified criteria for such treatment and management elects to do so. If a derivative does not qualify or is not designated and documented as a cash-flow hedge, any fair value gains or losses are recognized in earnings in the current period. For cash-flow hedges, the gain or loss on the effective portion of the derivative is reported as a component of other comprehensive income (OCI) with an offsetting adjustment to the basis of the item being hedged. Realized gains or losses from cash-flow hedges, and any ineffective portion, are recorded as a component of net sales in the consolidated statements of income. Ineffectiveness is primarily created by a basis difference between the hedged item and the hedging instrument due to location, quality or grade of the physical commodity transactions. Gains and losses from derivative instruments are reported net in the consolidated statements of income. There were no fair value hedges as of and during the years ended December 31, 2011, 2010 and 2009.

A hedge is regarded as highly effective such that it qualifies for hedge accounting if, at inception and throughout its life, it is expected that changes in the fair value or cash flows of the hedged item will be offset by 80 to 125 percent of the changes in the fair value or cash flows, respectively, of the hedging instrument. In the case of hedging a forecast transaction, the transaction must be probable and must present an exposure to variations in cash flows that could ultimately affect reported net income or loss. Occidental discontinues hedge accounting when it determines that a derivative has ceased to be highly effective as a hedge; when the hedged item matures or is sold or repaid; or when a forecast transaction is no longer deemed probable.

#### Stock-Based Incentive Plans

Occidental has established several stockholder-approved stock-based incentive plans for certain employees (Plans) that are more fully described in Note 12. A summary of Occidental's accounting policy under each type of award issued under the Plans follows below.

For cash- and stock-settled restricted stock units or incentive award shares (RSUs), compensation value is initially measured on the grant date using the quoted market price of Occidental's common stock. For stock options (Options), stock-settled stock appreciation rights (SARs), performance stock awards (PSAs) and total shareholder return incentives (TSRIs), compensation value is initially measured on the grant date using potential exercise values or estimated payout levels using Monte Carlo or other valuation models. Compensation expense for all awards is recognized on a straight-line basis over the requisite service periods, which is generally over the awards' respective vesting or performance periods. Compensation expense for PSAs and TSRIs is adjusted quarterly for any changes in the number of shares expected to be issued based on the performance criteria using valuation models. In addition, every quarter, compensation expense for the cash-settled portion of RSUs, SARs, PSAs and TSRIs is adjusted for changes in the value of the underlying stock. The stock-settled portion of all these awards is expensed using the initially measured compensation value. All such performance or stock-price-related changes are recognized in periodic compensation expense.

# Earnings per Share

Occidental's instruments containing rights to nonforfeitable dividends granted in stock-based payment transactions are considered participating securities prior to vesting, and, therefore, have been included in the earnings allocations in computing basic and diluted EPS under the two-class method.

Basic EPS was computed by dividing net income attributable to common stock, net of participating securities, by the weighted-average number of common shares outstanding during each period, net of treasury shares and including vested but unissued shares and share units. The computation of diluted EPS reflects the additional dilutive effect of stock options and unvested stock awards.

# Retirement Plans and Postretirement Benefits

Occidental recognizes the overfunded or underfunded amounts of its defined benefit pension and postretirement plans in its financial statements using a December 31 measurement date.

Occidental determines its defined benefit pension and postretirement benefit plan obligations based on various assumptions and discount rates. The discount rate assumptions used are meant to reflect the interest rate at which the obligations could effectively be settled on the measurement date. Occidental uses the fair value of assets to determine expected return on plan assets in calculating pension expense. Occidental funds and expenses negotiated pension increases for domestic union employees over the terms of the applicable collective bargaining agreements.

Pension and postretirement plan assets are measured at fair value. Common stock, preferred stock, publicly registered mutual funds, U.S. government securities and corporate bonds are valued using quoted market prices in active markets when available. When quoted market prices are not available, these investments are valued using pricing models with observable inputs from both active and non-active markets. Common and collective trusts are valued at the fund units' net asset value (NAV) provided by the issuer, which represents the quoted price in a non-active market. Some of the collateral Occidental receives for securities loaned includes investments in short-term investment funds. The short-term investment funds are valued at the fund units' NAV provided by the issuer.

## Supplemental Cash Flow Information

Occidental paid United States federal, state and foreign income taxes for continuing operations of approximately \$2.9 billion, \$2.4 billion and \$1.4 billion during the years ended December 31, 2011, 2010 and 2009, respectively. Occidental also paid production, property and other taxes of approximately \$635 million, \$510 million and \$484 million during the years ended December 31, 2011, 2010 and 2009, respectively, substantially all of which was in the United States. Additionally, net payments for income taxes related to discontinued operations were zero, \$42 million and \$4 million for the years 2011, 2010 and 2009, respectively. Production, property and other taxes paid related to discontinued operations were zero, \$197 million and \$100 million for the years 2011, 2010 and 2009, respectively. Interest paid totaled approximately \$315 million, \$161 million and \$164 million for the years 2011, 2010 and 2009, respectively. The 2011 interest paid included \$154 million of debt extinguishment premiums.

### Foreign Currency Transactions

The functional currency applicable to all of Occidental's foreign oil and gas operations is the United States dollar since cash flows are denominated principally in United States dollars. In Occidental's other operations, Occidental's use of non-United States dollar functional currencies was not material for all years presented. The effect of exchange rates on transactions in foreign currencies is included in periodic income. Exchange-rate gains and losses for continuing operations were not material for all years presented.

# Note 2 Acquisitions, Dispositions and Other Transactions

#### 2011

During the year ended December 31, 2011, Occidental acquired producing properties in South Texas for approximately \$1.8 billion. Occidental also acquired approximately \$2.6 billion of other domestic oil and gas assets, which included properties in California, as well as the Permian and Williston Basins

In the first quarter of 2011, Occidental completed the sale of its Argentine oil and gas operations, initiated in 2010.

Internationally, Occidental acquired a 40-percent participating interest in the Shah Gas Field development project in Abu Dhabi, which is operated by Abu Dhabi Gas Development Company Limited (Al Hosn Gas Project), in the first quarter of 2011. Occidental partnered with the Abu Dhabi National Oil Company in a 30-year joint venture agreement for the \$10 billion project, of which Occidental's portion is approximately \$4 billion. In May 2011, Occidental paid approximately \$500 million for its share of pre-acquisition development expenditures. In early 2011, Occidental ceased exploration activity and its participation in production operations in Libya due to civil unrest in the country and United States sanctions. As a result, Occidental wrote off the entire amount of the capitalized and suspended exploration costs incurred to date, including lease acquisition costs, of approximately \$35 million in the first quarter of 2011. The United States government lifted its sanctions in September 2011 and Occidental resumed its participation in the producing operations at that time.

### 2010

In December 2010, Occidental acquired oil producing and prospective properties in North Dakota for approximately \$1.4 billion in cash. In 2010, Occidental also acquired various domestic oil and gas interests, in operated, producing and non-producing properties in the Permian Basin, mid-continent region and California, for approximately \$2.8 billion.

In December 2010, Occidental executed an agreement with a subsidiary of China Petrochemical Corporation (Sinopec) to sell its Argentine oil and gas operations for after-tax proceeds of approximately \$2.6 billion. Occidental recorded a pre-tax gain of \$225 million when the sale closed in February 2011. Net revenues and pre-tax income for discontinued operations related to Argentina were \$97 million and \$2 million for the year ended December 31, 2011. Net revenues and pre-tax losses for such discontinued operations were, respectively, \$700 million and \$(39) million in 2010, and \$589 million and \$(369) million in 2009. As of December 31, 2011 and 2010, the assets of discontinued operations related to Argentina were zero and \$2.9 billion, respectively, which mainly comprised PP&E as of December 31, 2010. As of December 31, 2011 and 2010, the liabilities of discontinued operations were zero and \$513 million, which mainly comprised deferred tax liabilities and accrued liabilities as of December 31, 2010.

In December 2010, Occidental purchased additional noncontrolling interests in the General Partner of Plains All-American Pipeline, L.P. (Plains Pipeline) for approximately \$430 million, and now owns approximately 35 percent of the General Partner. In December 2010, Occidental also completed its acquisition of the remaining 50-percent joint venture interest in Elk Hills Power, LLC (EHP), a limited liability company that operates a gas-fired power-generation plant in California, for approximately \$175 million, bringing Occidental's total ownership to 100 percent. EHP is now consolidated in Occidental's balance sheet.

In January 2010, Occidental and its partners signed a 20-year contract with the South Oil Company of Iraq to develop the Zubair Field in Iraq.

# 2009

On December 31, 2009, Occidental completed the acquisition of Phibro LLC (Phibro) for approximately \$370 million in cash and maintains a controlling interest. Phibro, primarily an investor in commodities, is included as a part of Occidental's midstream and marketing segment. The assets acquired and liabilities assumed were recorded at their estimated fair values at the acquisition date. No goodwill was recorded on this transaction.

In December 2009, Occidental purchased additional noncontrolling interests in Plains Pipeline for approximately \$330 million in cash.

Occidental and its partners signed a Development and Production Sharing Agreement (DPSA) in April 2009 with the National Oil and Gas Authority of Bahrain for further development of the Bahrain Field, which became effective in December 2009. Under this agreement, a joint operating company formed by Occidental and its partners serves as operator for the project.

In 2009, Occidental acquired various additional oil and gas properties in California and the Permian Basin for approximately \$610 million in cash.

# Note 3 Accounting and Disclosure Changes

Recently Adopted Accounting and Disclosure Changes

Pursuant to a new rule issued by the Financial Accounting Standards Board, Occidental moved the Consolidated Statements of Comprehensive Income to consecutively follow the Consolidated Statements of Income. Occidental early adopted the rule, as permitted, in the fourth quarter of 2011.

# Note 4 Inventories

Net carrying values of inventories valued under the LIFO method were approximately \$176 million and \$177 million at December 31, 2011 and 2010, respectively. Inventories in continuing operations consisted of the following:

| Balance at December 31, (in millions) | 2011        | 2010        |
|---------------------------------------|-------------|-------------|

# Note 5 Long-term Debt

Long-term debt consisted of the following:

| Balance at December 31, (in millions)   | 2011        | 2010        |
|---|-------------|-------------|
| 4.10% senior notes due 2021   | \$<br>1,300 | \$<br>1,300 |
| 1.75% senior notes due 2017   | 1,250       |             |
| 7.0% senior notes due 2013  |             | 1,000       |
| 3.125% senior notes due 2022  | 900         |             |
| 4.125% senior notes due 2016  | 750         | 750         |
| 2.5% senior notes due 2016  | 700         | 700         |
| 1.45% senior notes due 2013   | 600         | 600         |
| 6.75% senior notes due 2012   |             | 368         |
| 8.45% senior notes due 2029   | 116         | 116         |
| 9.25% senior debentures due 2019  | 116         | 116         |
| 7.2% senior debentures due 2028   | 82          | 82          |
| Variable rate bonds due 2030 (0.11% and 0.32% as of December 31, 2011 and 2010, |             |             |
| respectively)   | 68          | 68          |
| 8.75% medium-term notes due 2023  | 22          | 22          |
|   | 5,904       | 5,122       |
| Less:   |             |             |
| Unamortized discount, net   | (33)        | (11)        |
| Total   | \$<br>5,871 | \$<br>5,111 |

Occidental's available but unused committed bank credit was \$2.0 billion at December 31, 2011. In October 2011, Occidental entered into a new five-year, \$2.0 billion bank credit facility (2011 Credit Facility) which replaced its previous \$1.4 billion bank credit facility (2006 Credit Facility), which was scheduled to expire in September 2012. The 2011 Credit Facility provides for the termination of the loan commitments and requires immediate repayment of any outstanding amounts if certain events of default occur or if Occidental files for bankruptcy. Up to \$1.0 billion of the 2011 Credit Facility is available in the form of letters of credit. Occidental did not draw down any amounts under the 2011 Credit Facility or the 2006 Credit Facility during 2011.

The 2011 Credit Facility and other debt agreements do not contain material adverse change clauses or debt ratings triggers that could restrict Occidental's ability to borrow or permit the lenders to terminate their commitments or accelerate debt. Borrowings under the 2011 Credit Facility bear interest at various benchmark rates, including LIBOR, plus a margin based on Occidental's senior debt ratings. Additionally, Occidental paid prorated annual facility fees of 0.10 percent and 0.05 percent, respectively, in 2011 on the total commitment amounts of the 2011 Credit Facility and the 2006 Credit Facility based on Occidental's senior debt ratings.

In August 2011, Occidental issued \$2.15 billion of debt, which comprised \$1.25 billion of 1.75-percent senior unsecured notes due 2017 and \$900 million of 3.125-percent senior unsecured notes due 2022. Occidental received net proceeds of approximately \$2.1 billion. Interest on the notes will be payable semi-annually in arrears in February and August of each year for both series of notes.

In March 2011, Occidental redeemed all \$1.0 billion of its outstanding 7-percent senior notes due 2013 and all \$368 million of its outstanding 6.75-percent senior notes due 2012. Occidental recorded a \$163 million pre-tax charge related to this redemption in the first quarter of 2011. In December 2010, Occidental issued \$2.6 billion of debt, which comprised \$600 million of 1.45-percent senior unsecured notes due 2013, \$700 million of 2.50-percent senior unsecured notes due 2016 and \$1.3 billion of 4.10-percent senior unsecured notes due 2021. Occidental received net proceeds of approximately \$2.6 billion. Interest on the notes will be payable semi-annually in arrears in June and December of each year for the 1.45-percent notes and February and August of each year for the other notes.

In July 2009, Occidental repaid its \$600 million debt associated with Dolphin Energy's debt. Also, in July 2009, Dolphin Energy refinanced its debt on a limited-recourse basis. Occidental provided guarantees limited to certain political and other events. At December 31, 2011 and 2010, Occidental's guarantees were not material and a substantial majority of the amounts consisted of limited recourse guarantees on \$300 million of Dolphin's debt, of which the fair value was immaterial.

At December 31, 2011, minimum principal payments on long-term debt subsequent to December 31, 2011 aggregated \$5.9 billion, of which zero is due in 2012, \$0.6 billion in 2013, zero in 2014, zero in 2015, \$1.5 billion in 2016 and \$3.8 billion in 2017 and thereafter.

As of December 31, 2011, under the most restrictive covenants of its financing agreements, Occidental had substantial capacity for additional unsecured borrowings, the payment of cash dividends and other distributions on, or acquisitions of, Occidental stock.

Occidental estimates the fair value of fixed-rate debt based on the quoted market prices for those instruments or on quoted market yields for similarly rated debt instruments, taking into account such instruments' maturities. The estimated fair values of Occidental's debt at December 31, 2011 and 2010 were approximately \$6.4 billion and \$5.5 billion, respectively, compared to carrying values of approximately \$5.9 billion and \$5.1 billion, respectively. Occidental's exposure to changes in interest rates relates primarily to its variable-rate, long-term debt obligations, and is not material. As of December 31, 2011 and 2010, variable-rate debt constituted approximately one percent of Occidental's total debt.

### Note 6 Lease Commitments

Operating lease agreements include leases for transportation equipment, power plants, machinery, terminals, storage facilities, land and office space. Occidental's operating lease agreements frequently include renewal or purchase options and require it to pay for utilities, taxes, insurance and maintenance expense. At December 31, 2011, future net minimum lease payments for noncancelable operating leases (excluding oil and gas and other mineral leases, utilities, taxes, insurance and maintenance expense) were the following:

| In millions                  | A  | mount (a) |
|------------------------------|----|-----------|
| 2012                         | \$ | 140       |
| 2013                         |    | 102       |
| 2014                         |    | 85        |
| 2015                         |    | 91        |
| 2016                         |    | 78        |
| Thereafter                   |    | 517       |
| Total minimum lease payments | \$ | 1,013     |

(a) These amounts are net of sublease rentals of \$11 million, which are to be received as follows (in millions): 2012—\$4, 2013—\$4, 2014—\$3, 2015—zero and 2016—zero.

Rental expense for operating leases, net of sublease rental income for continuing operations, was \$179 million in 2011, \$170 million in 2010 and \$170 million in 2009. Rental expense was net of sublease income of \$4 million, \$4 million and \$4 million in 2011, 2010 and 2009, respectively.

# Note 7 Derivatives

#### Objective & Strategy

Through its marketing and trading activities and within its established policy controls and procedures, Occidental uses derivative instruments, including a combination of short-term futures, forwards, options and swaps, to improve realized prices for its oil and gas. Additionally, Occidental's Phibro trading unit engages in trading activities using derivatives for the purpose of generating profits mainly from market price changes of commodities. In the past, Occidental has also used derivatives to reduce its exposure to price volatility on a small portion of its oil and gas production.

Refer to Note 1 for Occidental's accounting policy on derivatives.

#### Cash-Flow Hedges

Throughout 2011 and 2010, Occidental held a series of collar agreements that qualified as cash-flow hedges for the sale of approximately 3 percent and 2 percent, respectively, of its oil production. These agreements were for existing domestic production and terminated as of December 31, 2011. The collar agreements hedged the sale of 12,000 barrels per day at a weighted-average strike price that ranged from \$32.92 to \$46.35

In 2009, Occidental entered into financial swap agreements for the sale of a portion of its existing natural gas production from the Rocky Mountain region of the United States that qualify as cash-flow hedges. The following table presents the daily quantities and weighted-average prices that will be received by Occidental as of December 31, 2011 and 2010:

Natural Gas Swaps Daily Volume (cubic feet) Average Price
January 2012 - March 2012

(a) 50 million \$6.07

(a) At December 31, 2010, these contracts were outstanding with the same daily volumes and terms indicated and also covered the period from January 1, 2011 to December 31, 2011.

Occidental's marketing and trading operations store natural gas purchased from third parties at Occidental's North American leased storage facilities. Derivative instruments are used to fix margins on the future sales of the stored volumes. These derivative agreements continue through January 2013. As of December 31, 2011 and 2010, Occidental had approximately 25 billion cubic feet and 28 billion cubic feet of natural gas held in storage, respectively. As of December 31, 2011 and 2010, Occidental had cash-flow hedges for the forecast sale, to be settled by physical delivery, of approximately 35 billion cubic feet and 24 billion cubic feet of natural gas held in storage, respectively.

The following table presents the pre-tax gains and losses recognized in, and reclassified from, AOCI and recognized in income (net sales), including any hedge ineffectiveness, for derivative instruments classified as cash-flow hedges for the years ended December 31, 2011 and 2010 (in millions):

|  | 2011      | 2010      |
|--|-----------|-----------|
| Commodity Contracts – cash-flow hedges           |           |           |
| Unrealized gains recognized in AOCI              | \$<br>20  | \$<br>55  |
| Losses reclassified into income                  | \$<br>154 | \$<br>123 |
| Gains recognized in income - ineffective portion | \$<br>1   | \$<br>2   |

The following table summarizes net after-tax derivative activity recorded in AOCI for the years ended December 31, 2011 and 2010 (in millions):

|                                     | 2011           | 2010  |
|-------------------------------------|----------------|-------|
| Beginning Balance - AOCI            | \$<br>(111) \$ | (227) |
| Unrealized gains recognized in AOCI | 14             | 37    |
| Losses reclassified into income     | 98             | 79    |
| Ending Balance - AOCI               | \$<br>1 \$     | (111) |

During the next twelve months, Occidental expects that approximately \$14 million of net after-tax derivative gains included in AOCI will be reclassified into income based on their valuation as of December 31, 2011.

#### Derivatives Not Designated as Hedging Instruments

Occidental's third-party marketing and trading activities focus on purchasing oil, NGLs and gas for resale from partners, producers and third parties whose oil and gas supply is located near its midstream and marketing assets, such as pipelines, processing plants and storage facilities. These purchases allow Occidental to aggregate volumes to maximize prices received for Occidental's production. The third-party marketing and trading purchase and sales contracts generally approximate each other with respect to aggregate volumes and terms. In addition, Occidental's Phibro trading unit's strategy is to profit from market price changes using derivatives not designated as hedging instruments.

The following table presents gross volumes of Occidental's outstanding commodity derivatives contracts not designated as hedging instruments as of December 31, 2011 and 2010:

| Commodity  | V    | olumes |
|--|------|--------|
|  | 2011 | 2010   |
| Sales contracts related to Occidental's production |      |        |
| Oil (million barrels)                              | 9    | 8      |
| Third-party marketing and trading activities       |      |        |
| Purchase contracts                                 |      |        |
| Oil (million barrels)                              | 109  | 136    |
| Natural gas (billion cubic feet)                   | 481  | 833    |
| Precious metals (million troy ounces)              | 4    | 13     |
| Sales contracts                                    |      |        |
| Oil (million barrels)                              | 109  | 144    |
| Natural gas (billion cubic feet)                   | 723  | 1,156  |
| Precious metals (million troy ounces)              | 1    | 1      |

In addition, Occidental's Phibro trading unit has certain other commodity trading contracts, including agricultural products, metals and electricity, as well as foreign exchange contracts, but these were not material to Occidental as of December 31, 2011 and 2010.

Occidental has oil sales contracts representing a small portion of Occidental's domestic oil production. Additionally, for third-party marketing and trading activities, a substantial portion of the sales contracts that exist at the end of a reporting period are typically fulfilled by offsetting purchase contracts that have substantially identical terms entered into within a short time. For a substantial portion of the sales commitments not satisfied by such contracts as of December 31, 2011, Occidental entered into offsetting contracts after December 31, 2011. Occidental believes it has the ability to fulfill any remaining portion through its equity production or through additional third-party purchases.

Approximately \$1 million and \$293 million of gains from derivatives not designated as hedging instruments were recognized in net sales for the years ended December 31, 2011 and 2010, respectively.

#### Fair Value of Derivatives

The following tables present the gross fair value of Occidental's outstanding derivatives as of December 31, 2011 and 2010 (in millions):

| December 31, 2011<br>Cash-flow hedges (a)                        | Asset Derivatives Balance Sheet Location   | air<br>alue | Liability Derivatives Balance Sheet Location               | Fair<br><sup>7</sup> alue |

| derivatives  |   | \$<br>295     |   | \$<br>381     |

- (a) Fair values are presented at gross amounts, including when the derivatives are subject to master netting arrangements and qualify for net presentation in the consolidated balance sheet.
- (b) As of December 31, 2011, collateral received of \$39 million has been netted against derivative assets and collateral paid of \$63 million has been netted against derivative liabilities.
- (c) As of December 31, 2010, collateral received of \$39 million has been netted against derivative assets and collateral paid of \$95 million has been netted against derivative liabilities.

See Note 15 for fair value measurement disclosures on derivatives.

#### Credit Risk

A substantial portion of Occidental's derivative transaction volume is executed through exchange-traded contracts, which are subject to nominal credit risk as a significant portion of these transactions are executed on a daily margin basis. Collateral of \$173 million and \$154 million deposited by Occidental for such contracts with clearing houses and brokers, which has not been reflected in the derivative fair value tables, is included in the marketing and trading assets and other balance as of December 31, 2011 and 2010, respectively.

Occidental executes the rest of its derivative transactions in the OTC market. Occidental is subject to counterparty credit risk to the extent the counterparty to the derivatives is unable to meet its settlement commitments. Occidental manages this credit risk by selecting counterparties that it believes to be financially strong, by spreading the credit risk among many such counterparties, by entering into master netting arrangements with the counterparties and by requiring collateral, as appropriate. Occidental actively monitors the creditworthiness of each counterparty and records valuation adjustments to reflect counterparty risk, if necessary.

Certain of Occidental's OTC derivative instruments contain credit-risk-contingent features, primarily tied to credit ratings for Occidental or its counterparties, which may affect the amount of collateral that each would need to post. As of December 31, 2011 and 2010, Occidental had a net liability of \$58 million and \$234 million, respectively, for which the amount of collateral posted was \$27 million and \$10 million, respectively. Occidental believes that if it had received a one-notch reduction in its credit ratings, it would not have resulted in a material change in its collateral-posting requirements as of December 31, 2011 and 2010.

# Foreign Currency Risk

Occidental's foreign operations have currency risk. Occidental manages its exposure primarily by balancing monetary assets and liabilities and maintaining cash positions in foreign currencies only at levels necessary for operating purposes. Most international oil sales are denominated in

United States dollars. Additionally, all of Occidental's consolidated foreign oil and gas subsidiaries have the United States dollar as the functional currency.

# Note 8 Environmental Liabilities and Expenditures

Occidental's operations are subject to stringent federal, state, local and foreign laws and regulations relating to improving or maintaining environmental quality. Occidental's environmental compliance costs have generally increased over time and are expected to rise in the future. Occidental factors environmental expenditures for its operations into its business planning process as an integral part of producing quality products responsive to market demand.

#### **Environmental Remediation**

The laws that require or address environmental remediation, including CERCLA and similar federal, state, local and foreign laws, may apply retroactively and regardless of fault, the legality of the original activities or the current ownership or control of sites. OPC or certain of its subsidiaries participate in or actively monitor a range of remedial activities and government or private proceedings under these laws with respect to alleged past practices at operating, closed and third-party sites. Remedial activities may include one or more of the following: investigation involving sampling, modeling, risk assessment or monitoring; cleanup measures including removal, treatment or disposal; or operation and maintenance of remedial systems. The environmental proceedings seek funding or performance of remediation and, in some cases, compensation for alleged property damage, punitive damages, civil penalties, injunctive relief and government oversight costs.

As of December 31, 2011, Occidental participated in or monitored remedial activities or proceedings at 160 sites. The following table presents Occidental's environmental remediation reserves as of December 31, 2011, 2010 and 2009, the current portion of which is included in accrued liabilities (\$79 million in 2011, \$79 million in 2010 and \$84 million in 2009) and the remainder in deferred credits and other liabilities — other (\$281 million in 2011, \$287 million in 2010 and \$319 million in 2009). The reserves are grouped as environmental remediation sites listed or proposed for listing by the U.S. Environmental Protection Agency on the CERCLA NPL (NPL sites) and three categories of non-NPL sites — third-party sites, Occidental-operated sites and closed or non-operated Occidental sites, as follows:

| \$ amounts in millions    | 201       | 1       | 201       | 0       | 2009      |         |  |  |

| Occidental-operated sites | 22        | 120     | 20        | 122     | 19        | 126     |  |  |
| Closed or non-operated    |           |         |           |         |           |         |  |  |
| Occidental sites          | 29        | 89      | 29        | 97      | 29        | 116     |  |  |
| Total                     | 160       | \$ 360  | 170       | \$ 366  | 168       | \$ 403  |  |  |

As of December 31, 2011, Occidental's environmental reserves exceeded \$10 million each at 10 of the 160 sites described above, and 107 of the sites had reserves from zero to \$1 million each.

As of December 31, 2011, two landfills in western New York owned by Occidental accounted for 64 percent of its reserves associated with NPL sites. Maxus Energy Corporation has retained the liability and indemnified Occidental for 13 of the remaining NPL sites.

As of December 31, 2011, Maxus has also retained the liability and indemnified Occidental for 9 of the 73 third-party sites. Two of the remaining 64 third-party sites — a former copper mining and smelting operation in Tennessee and a containment and removal project in Tennessee — accounted for 44 percent of Occidental's reserves associated with these sites.

Four sites — chemical plants in Kansas, Louisiana and New York and a group of oil and gas properties in the southwestern United States — accounted for 61 percent of the reserves associated with the Occidental-operated sites. Two other sites — a former chemical plant in Tennessee and a closed coal mine in Pennsylvania — accounted for 42 percent of the reserves associated with closed or non-operated Occidental sites. The following table presents environmental reserve activity for the past three years:

| In millions                                 | 2011      | 2010      | 2009      |
|---|-----------|-----------|-----------|
| Balance — Beginning of Year                 | \$<br>366 | \$<br>403 | \$<br>439 |
| Remediation expenses and interest accretion | 53        | 26        | 26        |
| Changes from acquisitions/dispositions      | 14        | 3         | 4         |
| Payments                                    | (73)      | (66)      | (66)      |
| Balance — End of Year                       | \$<br>360 | \$<br>366 | \$<br>403 |

Occidental expects to expend funds corresponding to approximately half of the current environmental reserves over the next four years and the balance over the subsequent 10 or more years. Occidental believes its range of reasonably possible additional loss beyond those liabilities recorded for environmental remediation at the sites described above could be up to \$375 million.

**Environmental Costs** 

Occidental's environmental costs, some of which include estimates, are presented below for each segment for the years ended December 31:

| In millions             | 2011      | 2010      | 2009      |
|-------------------------|-----------|-----------|-----------|
| Operating Expenses      |           |           |           |
| Oil and Gas             | \$<br>158 | \$<br>108 | \$<br>110 |
| Chemical                | 68        | 72        | 67        |
| Midstream and Marketing | 21        | 13        | 14        |
|                         | \$<br>247 | \$<br>193 | \$<br>191 |
| Capital Expenditures    |           |           |           |
| Oil and Gas             | \$<br>110 | \$<br>72  | \$<br>78  |
| Chemical                | 15        | 19        | 15        |
| Midstream and Marketing | 15        | 13        | 4         |
| Č                       | \$<br>140 | \$<br>104 | \$<br>97  |
| Remediation Expenses    |           |           |           |
| Corporate               | \$<br>52  | \$<br>25  | \$<br>25  |

Operating expenses are incurred on a continual basis. Capital expenditures relate to longer-lived improvements in currently operating properties. Remediation expenses relate to existing conditions from past operations.

# Note 9 Lawsuits, Claims, Commitments and Other Contingencies

OPC or certain of its subsidiaries are named, in the normal course of business, in lawsuits, claims and other legal proceedings that seek, among other things, compensation for alleged personal injury, breach of contract, property damage, punitive damages, civil penalties or other losses, or injunctive or declaratory relief. OPC or certain of its subsidiaries also have been named in proceedings under CERCLA and similar federal, state, local and foreign environmental laws. These environmental proceedings seek funding or performance of remediation and, in some cases, compensation for alleged property damage, punitive damages, civil penalties and injunctive relief; however, Occidental or such subsidiaries are usually among many companies in these proceedings and have to date been successful in sharing response costs with other financially sound companies. Occidental accrues reserves for currently outstanding lawsuits, claims and proceedings when it is probable that a liability has been incurred and the liability can be reasonably estimated. Occidental has disclosed its reserve balances for environmental matters. Reserve balances for other matters as of December 31, 2011 and 2010, were not material to Occidental's consolidated balance sheets. Occidental also evaluates the amount of reasonably possible losses that it could incur as a result of the matters mentioned above. Occidental has disclosed its range of reasonably possible additional losses for sites where it is a participant in environmental remediation. Occidental believes that other reasonably possible losses that it could incur in excess of reserves accrued on the balance sheet would not be material to its consolidated financial position or results of operations.

During the course of its operations, Occidental is subject to audit by tax authorities for varying periods in various federal, state, local and foreign tax jurisdictions. While the audits of corporate tax returns for taxable years through 2009 have concluded for United States federal income tax purposes, the 2010 and 2011 taxable years are currently under review by the United States Internal Revenue Service pursuant to its Compliance Assurance Program. Taxable years from 2000 through the current year remain subject to examination by foreign and state government tax authorities in certain jurisdictions. In certain of these jurisdictions, tax authorities are in various stages of auditing Occidental's income taxes. During the course of tax audits, disputes have arisen and other disputes may arise as to facts and matters of law. Occidental believes that the resolution of outstanding tax matters would not have a material adverse effect on its consolidated financial position or results of operations. OPC, its subsidiaries or both have entered into agreements providing for future payments to secure terminal and pipeline capacity, drilling rigs and services, electrical power, steam and certain chemical raw materials. Occidental has certain other commitments under contracts, guarantees and joint ventures, including purchase commitments for goods and services at market-related prices and certain other contingent liabilities. At December 31, 2011, total purchase obligations were \$7.9 billion, which included approximately \$2.7 billion, \$1.3 billion, \$700 million, \$450 million and \$300 million that will be paid in 2012, 2013, 2014, 2015 and 2016, respectively. Included in the purchase obligations are commitments for major fixed and determinable capital expenditures during 2012 and thereafter, which were approximately \$2.0 billion.

OPC, its subsidiaries or both have indemnified various parties against specified liabilities those parties might incur in the future in connection with purchases and other transactions that they have entered into with Occidental. These indemnities usually are contingent upon the other party incurring liabilities that reach specified thresholds. As of December 31, 2011, Occidental is not aware of circumstances that it believes would reasonably be expected to lead to future indemnity claims against it in connection with these transactions that would result in payments materially in excess of reserves.

# Note 10 Domestic and Foreign Income Taxes

The domestic and foreign components of income from continuing operations before domestic and foreign income taxes and net of noncontrolling interest amounts were as follows:

| For the years ended December 31, (in millions) | Do | Domestic |    | Foreign |    | Total  |
|--|----|----------|----|---------|----|--------|
| 2011   | \$ | 4,806    | \$ | 6,035   | \$ | 10,841 |
| 2010   | \$ | 3,295    | \$ | 4,269   | \$ | 7,564  |
| 2009   | \$ | 2,091    | \$ | 3,123   | \$ | 5,214  |

The provisions for domestic and foreign income taxes on continuing operations consisted of the following:

|  |    | U.S.   |    | State    |    |         |             |
|--|----|--------|----|----------|----|---------|-------------|
| For the years ended December 31, (in millions) | F  | ederal | ar | nd Local | ]  | Foreign | Total       |
| 2011   |    |        |    |          |    |         |             |
| Current  | \$ | 320    | \$ | 88       | \$ | 2,357   | \$<br>2,765 |
| Deferred                                       |    | 1,340  |    | 47       |    | 49      | 1,436       |
|  | \$ | 1,660  | \$ | 135      | \$ | 2,406   | \$<br>4,201 |
| 2010   |    |        |    |          |    |         |             |
| Current  | \$ | 614    | \$ | 79       | \$ | 1,896   | \$<br>2,589 |
| Deferred                                       |    | 390    |    | 4        |    | 12      | 406         |
|  | \$ | 1,004  | \$ | 83       | \$ | 1,908   | \$<br>2,995 |
| 2009   |    |        |    |          |    |         |             |
| Current  | \$ | 16     | \$ | 27       | \$ | 1,361   | \$<br>1,404 |
| Deferred                                       |    | 606    |    | 37       |    | 16      | 659         |
|  | \$ | 622    | \$ | 64       | \$ | 1,377   | \$<br>2,063 |

The following reconciliation of the United States statutory federal income tax rate to Occidental's effective tax rate on income from continuing operations is stated as a percentage of pre-tax income:

| For the years ended December 31,           | 2011 | 2010 | 2009 |
|--|------|------|------|
| United States federal statutory tax rate   | 35%  | 35%  | 35%  |
| Operations outside the United States       | 4    | 5    | 5    |
| State income taxes, net of federal benefit | 1    | 1    | 1    |
| Other                                      | (1)  | (1)  | (1)  |
| Tax rate provided by Occidental            | 39%  | 40%  | 40%  |

The tax effects of temporary differences resulting in deferred income taxes at December 31, 2011 and 2010 were as follows:

|  | 2011       |          |            |            | 2010  |             |
|--|------------|----------|------------|------------|-------|-------------|
|  | Deferred   | Deferred |            | Deferred   | De    | eferred     |
| Tax effects of temporary differences (in |            |          |            |            |       |             |
| millions)                                | Tax Assets | Tax L    | iabilities | Tax Assets | Tax I | Liabilities |
| Property, plant and equipment            |            |          |            |            |       |             |
| differences                              | \$         | \$       | 6,039      | \$         | \$    | 4,558       |
| Equity investments, partnerships and     |            |          |            |            |       |             |
| foreign subsidiaries                     |            |          | 351        |            |       | 208         |
| Environmental reserves                   | 131        |          |            | 135        |       |             |
| Postretirement benefit accruals          | 410        |          |            | 368        |       |             |
| Deferred compensation and benefits       | 286        |          |            | 275        |       |             |
| Asset retirement obligations             | 318        |          |            | 242        |       |             |
| Foreign tax credit carryforwards         | 1,240      |          |            | 718        |       |             |

| Federal benefit of state income taxes | 104         |             | 88          |             |
|---------------------------------------|-------------|-------------|-------------|-------------|
| All other                             | 374         | 116         | 442         | 131         |
| Subtotal                              | 2,863       | 6,506       | 2,268       | 4,897       |
| Valuation allowance                   | (1,003)     |             | (486)       |             |
| Total deferred taxes                  | \$<br>1,860 | \$<br>6,506 | \$<br>1,782 | \$<br>4,897 |

Included in total deferred tax assets was a current portion aggregating \$200 million and \$330 million as of December 31, 2011 and 2010, respectively, that was reported in prepaid expenses and other. Total deferred tax assets were \$1.9 billion and \$1.8 billion as of December 31, 2011 and 2010, respectively, the noncurrent portion of which is netted against deferred tax liabilities. Occidental expects to realize the recorded deferred tax assets, net of any allowances, through future operating income and reversal of temporary differences.

Occidental has, as of December 31, 2011, foreign tax credit carryforwards of \$1.2 billion, which expire in varying amounts through 2021, and various state operating loss carryforwards, which have varying carryforward periods through 2025. Substantially all of Occidental's valuation allowance is provided for foreign tax credit and state operating loss carryforwards.

A deferred tax liability has not been recognized for temporary differences related to unremitted earnings of certain consolidated foreign subsidiaries aggregating approximately \$5.5 billion at December 31, 2011, as it is Occidental's intention, generally, to reinvest such earnings permanently. If the earnings of these foreign subsidiaries were not indefinitely reinvested, an additional deferred tax liability of approximately \$88 million would be required, assuming utilization of available foreign tax credits.

Discontinued operations include income tax charges of \$86 million in 2011, and income tax benefits of \$26 million in 2010 and \$147 million in 2009

Additional paid-in capital was credited \$14 million in 2011, \$22 million in 2010 and \$24 million in 2009 for an excess tax benefit from the exercise of certain stock-based compensation awards.

As of December 31, 2011, Occidental had liabilities for unrecognized tax benefits of approximately \$67 million included in deferred credits and other liabilities – other, all of which, if subsequently recognized, would favorably affect Occidental's effective tax rate.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

| For the years ended December 31, (in millions)                           | 2011  | 2010  |
|--|-------|-------|
| Balance at January 1,  | \$ 38 | \$ 52 |
| Additions based on tax positions related to the current year             | 44    | 24    |
| Reductions based on tax positions related to prior years and settlements | (15)  | (38)  |
| Balance at December 31,  | \$ 67 | \$ 38 |

Occidental records estimated potential interest and penalties related to liabilities for unrecognized tax benefits in the provisions for domestic and foreign income taxes and these amounts were not material for the years ended December 31, 2011, 2010 and 2009.

Occidental is subject to audit by various tax authorities in varying periods. See Note 9 for a discussion of these matters.

Management believes it is unlikely that Occidental's liabilities for unrecognized tax benefits related to existing matters would increase or decrease within the next twelve months by a material amount. Occidental cannot reasonably estimate a range of potential changes in such benefits due to the unresolved nature of the various audits.

# Note 11 Stockholders' Equity

The following is a summary of common stock issuances:

|                                  | Common  |
|----------------------------------|---------|
| Shares in thousands              | Stock   |
| Balance, December 31, 2008       | 881,423 |
| Issued                           | 1,697   |
| Options exercised and other, net | 523     |
| Balance, December 31, 2009       | 883,643 |
| Issued                           | 967     |
| Options exercised and other, net | 665     |
| Balance, December 31, 2010       | 885,275 |
| Issued                           | 1,302   |
| Options exercised and other, net | 232     |
| Balance, December 31, 2011       | 886,809 |

#### Treasury Stock

Occidental has had a 95 million share repurchase program authorized since 2008; however, the program does not obligate Occidental to acquire any specific number of shares and may be discontinued at any time. In 2011, Occidental purchased 2.7 million shares under the program at an average cost of \$77.12 per share.

Additionally, Occidental purchased shares from the trustee of its defined contribution savings plan during the years ended December 31, 2011, 2010 and 2009.

As of December 31, 2011, 2010 and 2009, treasury stock shares numbered 75.8 million, 72.5 million and 71.7 million, respectively.

#### Nonredeemable Preferred Stock

Occidental has authorized 50,000,000 shares of preferred stock with a par value of \$1.00 per share. At December 31, 2011, 2010 and 2009, Occidental had no outstanding shares of preferred stock.

# Earnings Per Share

The following table presents the calculation of basic and diluted EPS for the years ended December 31:

| In millions, except per-share amounts Basic EPS                 |             | 2011            |    | 2010  |    | 2009  |

#### Note 12 Stock-Based Incentive Plans

Occidental has established several Plans that allow it to issue stock-based awards in the form of RSUs, Options, SARs, PSAs and TSRIs. An aggregate of 66 million shares of Occidental common stock were authorized for issuance and approximately 14 million shares have been issued through December 31, 2011. Of the remaining shares, depending on the type of award granted, approximately 8.8 to 26.3 million shares are

available for grants of future awards. During 2011, non-employee directors were granted awards for 64,800 shares of restricted stock that fully vested on the grant date. Compensation expense for these awards was measured using the quoted market price of Occidental's common stock on the grant date and was fully recognized at that time.

The following table summarizes certain stock-based incentive amounts for the past three years:

| For the years ended December 31, (in millions)                | 2  | 011 | 2  | 010 | 2009 |     |  |
|---|----|-----|----|-----|------|-----|--|
| Compensation expense  | \$ | 110 | \$ | 136 | \$   | 151 |  |
| Income tax benefit recognized in the income statement         | \$ | 40  | \$ | 50  | \$   | 55  |  |
| Intrinsic value of options and stock-settled SARs exercised   | \$ | 21  | \$ | 74  | \$   | 58  |  |
| Cash paid (a)   | \$ | 124 | \$ | 97  | \$   | 50  |  |
| Fair value of PSAs, RSUs and TSRIs vested during the year (b) | \$ | 53  | \$ | 19  | \$   | 142 |  |

- (a) Includes cash paid under the cash-settled SARs and the cash-settled portion of the PSAs, RSUs and TSRIs.
- (b) As measured on the vesting date for the stock-settled portion of the PSAs, RSUs and TSRIs.

As of December 31, 2011, there was \$193 million of pre-tax unrecognized compensation expense, based on year-end valuation, related to all unvested stock-based incentive award grants. This expense is expected to be recognized over a weighted-average period of 2.0 years.

#### RSUs

Certain employees are awarded the right to receive cash-settled RSUs, which are equivalent in value to actual shares of Occidental common stock but are paid in cash at the time of vesting. These awards vest either in total over two years or ratably over three years after the grant date and can be forfeited or accelerated under certain conditions. For those awards which vest in total over two years, dividend equivalents are accumulated during the vesting period and are paid when they vest. For those awards which vest ratably, dividend equivalents are paid during the vesting period. The weighted-average, grant-date fair values of these awards granted in 2011, 2010 and 2009 were \$104.74, \$77.14 and \$66.43 per share, respectively.

Certain employees are awarded the right to receive stock-settled RSUs that vest at the end of, or ratably over, three years from the grant date (some vesting may extend to 7 years under certain circumstances) and can be forfeited or accelerated under certain conditions. Dividends or dividend equivalents are paid during the vesting period. The weighted-average, grant-date fair value of the stock-settled RSUs granted in 2011 and 2010 was \$102.97 and \$84.29, respectively. There were no such awards granted in 2009.

A summary of changes in Occidental's unvested cash- and stock-settled RSUs during the year ended December 31, 2011 is presented below:

|                         | Cash-Settled |                  | Stock-Settled |                  |
|-------------------------|--------------|------------------|---------------|------------------|
|                         |              | Weighted-Average |               | Weighted-Average |
|                         | RSUs         | Grant-Date       | RSUs          | Grant-Date       |
|                         | (000's)      | Fair Value       | (000's)       | Fair Value       |
| Unvested at January 1   | 1,137        | \$ 73.44         | 310           | \$ 84.18         |
| Granted                 | 717          | \$104.74         | 274           | \$102.97         |
| Vested                  | (518)        | \$ 73.68         | (4)           | \$ 74.88         |
| Forfeitures             | (64)         | \$ 82.83         | (12)          | \$ 92.04         |
| Unvested at December 31 | 1,272        | \$ 90.50         | 568           | \$ 93.14         |

# Stock Options and SARs

Certain employees have been granted Options that are settled in stock and SARs that are settled either only in stock or only in cash. No Options or SARs have been granted since 2006 and all outstanding awards are vested. Exercise prices of the Options and SARs were equal to the quoted market value of Occidental's stock on the grant date. Generally, the Options and SARs vest ratably over three years from the grant date with a maximum term of ten years. These Options and SARs may be forfeited or accelerated under certain circumstances.

The fair value of each Option, stock-settled SAR or cash-settled SAR is initially measured on the grant date using the Black Scholes option valuation model. The expected life is estimated based on the actual weighted-average life of historical exercise activity of the grantee population at the grant date. The volatility factors are based on the historical volatilities of Occidental common stock over the expected lives as estimated on the grant date. The risk-free interest rate is the implied yield available on zero coupon T-notes (US Treasury Strip) at the grant date with a remaining term equal to the expected life of the measured instrument. The dividend yield is the expected annual dividend yield over the expected life, expressed as a percentage of the stock price on the grant date. Estimates of fair value may not accurately predict the value ultimately realized by employees who receive stock-based incentive awards, and the ultimate value may not be indicative of the reasonableness of the original estimates of fair value made by Occidental due to subsequent events.

The following is a summary of Option and SAR transactions during the year ended December 31, 2011:

|                  | Cash-Set | tled      |             |           | Stock-Settled |           |             |           |  |  |  |  |  |
|------------------|----------|-----------|-------------|-----------|---------------|-----------|-------------|-----------|--|--|--|--|--|
|                  |          |           | Weighted-   |           |               |           | Weighted-   |           |  |  |  |  |  |
|                  |          | Weighted- | Average     | Aggregate |               | Weighted- | Average     | Aggregate |  |  |  |  |  |

| December 31      | 564      | \$24.66   | 2.5         | \$38,939  | 782           | \$26.34   | 2.3         | \$52,689  |  |  |  |  |  |

Performance-Based Awards

#### PSAs and TSRIs

Certain executives are awarded PSAs and TSRIs that vest at the end of the three- or four-year period following the grant date if performance targets are certified as being met. TSRIs granted in July 2011 and October 2010 have payouts that range from 0 to 100 percent of the maximum award that would settle, once certified, 50 percent in stock and 50 percent in cash. TSRIs granted in July 2009 have payouts that ranged from 0 to 200 percent of the target award that would settle, once certified, 60 percent in stock and 40 percent in cash. TSRIs granted in July 2008 have payouts that ranged from 0 to 150 percent of the target award that would settle, once certified, equally in stock and cash. TSRIs granted in January 2007 had payouts of 150 percent of the target award and were certified and settled equally in stock and cash in 2011. PSAs granted in January 2007 had payouts of approximately 193 percent of the target award and were certified after year-end 2010 for settlement equally in stock and cash. Dividend equivalents for PSA and TSRI target shares are paid during the performance period regardless of the payout range or settlement provision, except for the TSRIs issued in 2010 and 2011, for which cumulative dividends will be paid upon vesting for the number of vested shares.

The fair values of PSAs and TSRIs are initially determined on the grant date using a Monte Carlo simulation model based on Occidental's assumptions, noted in the following table, and the volatility from corresponding peer group companies. The expected life is based on the vesting period (Term). The risk-free interest rate is the implied yield available on zero coupon T-notes (US Treasury Strip) at the time of grant with a remaining term equal to the Term. The dividend yield is the expected annual dividend yield over the Term, expressed as a percentage of the stock price on the grant date. Estimates of fair value may not accurately predict the value ultimately realized by the employees who receive the awards, and the ultimate value may not be indicative of the reasonableness of the original estimates of fair value made by Occidental due to subsequent events.

The grant-date assumptions used in the Monte Carlo simulation models for the estimated payout level of TSRIs were as follows:

|   | TSRIs     |          |          |
|---|-----------|----------|----------|
| Year Granted  | 2011      | 2010     | 2009     |
| Assumptions used:                                     |           |          |          |
| Risk-free interest rate                               | 0.6%      | 0.6%     | 2.1%     |
| Dividend yield  | 1.8%      | 1.8%     | 2.0%     |
| Volatility factor                                     | 33%       | 32%      | 28%      |
| Expected life (years)                                 | 3         | 3        | 4        |
| Grant-date fair value of underlying Occidental common |           |          |          |
| stock   | \$ 102.97 | \$ 84.29 | \$ 66.74 |

A summary of Occidental's unvested PSAs and TSRIs as of December 31, 2011 and changes during the year ended December 31, 2011 is presented below:

|                             | PSAs    |                  |         |                  |  |  |  |  |  |
|-----------------------------|---------|------------------|---------|------------------|--|--|--|--|--|
|                             |         | Weighted-Average |         | Weighted-Average |  |  |  |  |  |
|                             |         | Grant-Date Fair  |         | Grant-Date Fair  |  |  |  |  |  |
|                             | Value   |                  |         |                  |  |  |  |  |  |
|                             | Awards  | of Occidental    | Awards  | of Occidental    |  |  |  |  |  |
|                             | (000's) | Stock            | (000's) | Stock            |  |  |  |  |  |
| Unvested at January 1 (a)   | 143     | \$ 48.83         | 2,041   | \$ 70.84         |  |  |  |  |  |
| Granted (a)                 |         | \$               | 325     | \$102.97         |  |  |  |  |  |
| Vested (b)                  | (143)   | \$ 48.83         | (485)   | \$ 61.93         |  |  |  |  |  |
| Forfeitures                 |         | \$               | (16)    | \$ 80.14         |  |  |  |  |  |
| Unvested at December 31 (a) |         | \$               | 1,865   | \$ 78.67         |  |  |  |  |  |

- (a) Unvested awards and award grants are presented at the target or mid-point payouts.
- (b) The payout at vesting was 193 percent and 150 percent of the target for PSAs and TSRIs, respectively.

# Note 13 Retirement Plans and Postretirement Benefits

Occidental has various benefit plans for its salaried, domestic union and nonunion hourly, and certain foreign national employees.

#### **Defined Contribution Plans**

All domestic employees and certain foreign national employees are eligible to participate in one or more of the defined contribution retirement or savings plans that provide for periodic contributions by Occidental based on plan-specific criteria, such as base pay, age level and employee contributions. Certain salaried employees participate in a supplemental retirement plan that restores benefits lost due to governmental limitations on qualified retirement benefits. The accrued liabilities for the supplemental retirement plan were \$126 million and \$109 million as of December 31, 2011 and 2010, respectively, and Occidental expensed \$110 million in 2011, \$101 million in 2010 and \$97 million in 2009 under the provisions of these defined contribution and supplemental retirement plans.

#### Defined Benefit Plans

Participation in defined benefit plans is limited and approximately 1,000 domestic and 1,600 foreign national employees, mainly union, nonunion hourly and certain employees that joined Occidental from acquired operations with grandfathered benefits, are currently accruing benefits under these plans.

Pension costs for Occidental's defined benefit pension plans, determined by independent actuarial valuations, are generally funded by payments to trust funds, which are administered by independent trustees.

# Other Postretirement Benefit Plans

Occidental provides medical and dental benefits and life insurance coverage for certain active, retired and disabled employees and their eligible dependents. Occidental generally funds the benefits as they are paid during the year. The total benefit costs, including the postretirement costs, were approximately \$194 million in 2011, \$180 million in 2010 and \$158 million in 2009.

# Obligations and Funded Status

The following table shows the funding status of Occidental's plans:

|   | Pension Benefits |       |      |       |    | ostretirem<br>nfunded P |      |       | Fu  | nded P | lans | ans  |  |

The projected benefit obligation, accumulated benefit obligation and fair value of plan assets for defined benefit pension plans with an accumulated benefit obligation in excess of plan assets were \$370 million, \$343 million and \$227 million, respectively, as of December 31, 2011, and \$259 million, \$234 million and \$82 million, respectively, as of December 31, 2010. The projected benefit obligation, accumulated benefit obligation and fair value of plan assets for defined benefit pension plans with plan assets in excess of the accumulated benefit obligation were \$231 million, \$226 million and \$250 million, respectively, as of December 31, 2011, and \$365 million, \$360 million and \$413 million, respectively, as of December 31, 2010.

Occidental has 401(h) accounts established within certain defined benefit pension plans. These plans allow Occidental to fund postretirement medical benefits for employees at two of its operations. Contributions to these 401(h) accounts are made at Occidental's discretion. All of Occidental's other postretirement benefit plans are unfunded.

Amounts recognized in the consolidated balance sheets consist of:

|  | Pension Benefits |       |    |       | Po | stretirem | ent  | Benefits |              |      |      |      |      |  |

| Net periodic benefit cost             | \$ | 21    | \$ | 40     | \$ | 47   | \$  | 94              | \$ | 87    | \$   | 76   | \$  | 5    | \$    | 4  | \$  | 4  |

The estimated net loss and prior service cost for the defined benefit pension plans that will be amortized from AOCI into net periodic benefit cost over the next fiscal year are \$19 million and \$1 million, respectively. The estimated net loss and prior service cost for the defined benefit postretirement plans that will be amortized from AOCI into net periodic benefit cost over the next fiscal year are \$34 million and \$1 million, respectively.

#### **Additional Information**

The following table sets forth the weighted-average assumptions used to determine Occidental's benefit obligation and net periodic benefit cost for domestic plans:

|  | Pension I | Benefits | Postretire | fits    |          |       |
|--|-----------|----------|------------|---------|----------|-------|
|  |           |          | Unfunded   | d Plans | Funded P | lans  |
| For the years ended December 31,           | 2011      | 2010     | 2011       | 2010    | 2011     | 2010  |
| Benefit Obligation Assumptions:            |           |          |            |         |          |       |
| Discount rate                              | 4.12%     | 4.74%    | 4.12%      | 4.74%   | 4.12%    | 4.74% |

| Net Periodic Benefit Cost Assumptions:     |           |          |            |         |          |       |
| Discount rate                              | 4.74%     | 5.12%    | 4.74%      | 5.12%   | 4.74%    | 5.12% |
| Assumed long term rate of return on assets | 6.50%     | 6.50%    |            |         | 6.50%    | 6.50% |
| Rate of compensation increase              | 4.00%     | 4.00%    |            |         |          |       |

For domestic pension plans and postretirement benefit plans, Occidental based the discount rate on the Aon/Hewitt AA-AAA Universe yield curve in 2011 and the Hewitt Bond Universe yield curve in 2010. The weighted-average rate of increase in future compensation levels is consistent with Occidental's past and anticipated future compensation increases for employees participating in retirement plans that determine benefits using compensation. The assumed long-term rate of return on assets is estimated with regard to current market factors but within the context of historical returns. Occidental considers historical returns and correlation of equities and fixed income securities and current market factors such as inflation and interest rates.

For pension plans outside the United States, Occidental based its discount rate on rates indicative of government or investment grade corporate debt in the applicable country, taking into account hyperinflationary environments when necessary. The discount rates used for the foreign pension plans ranged from 1.5 percent to 10.0 percent at both December 31, 2011 and 2010. The average rate of increase in future compensation levels ranged from a low of 1.5 percent to a high of 10.0 percent in 2011, depending on local economic conditions. The expected long-term rate of return on plan assets was 5.8 percent and 6.8 percent in excess of local inflation in 2011 and 2010, respectively.

The postretirement benefit obligation was determined by application of the terms of medical and dental benefits and life insurance coverage, including the effect of established maximums on covered costs, together with relevant actuarial assumptions and health care cost trend rates projected at an assumed Consumer Price Index (CPI) increase of 2.04 percent and 2.54 percent as of December 31, 2011 and 2010,

respectively. Beginning in 1993, participants other than certain union employees have paid for all medical cost increases in excess of increases in the CPI. For those union employees, the health care cost trend rates were projected at annual rates ranging ratably from 9.0 percent in 2011 to 6.0 percent through the year 2017 and thereafter. A 1-percent increase or a 1-percent decrease in these assumed health care cost trend rates would result in an increase of \$40 million or a reduction of \$36 million, respectively, in the postretirement benefit obligation as of December 31, 2011, and a corresponding increase of \$4 million or a reduction of \$3 million in interest cost in 2011. The annual service costs would not be materially affected by these changes.

62

The actuarial assumptions used could change in the near term as a result of changes in expected future trends and other factors that, depending on the nature of the changes, could cause increases or decreases in the plan liabilities.

#### Fair Value of Pension and Postretirement Plan Assets

Occidental employs a total return investment approach that uses a diversified blend of equity and fixed income investments to optimize the long-term return of plan assets at a prudent level of risk. The investments are monitored by Occidental's Investment Committee in its role as fiduciary. The Investment Committee, consisting of senior Occidental executives, selects and employs various external professional investment management firms to manage specific investments across the spectrum of asset classes. Equity investments are diversified across United States and non-United States stocks, as well as differing styles and market capitalizations. Other asset classes such as private equity and real estate may be used with the goals of enhancing long-term returns and improving portfolio diversification. The target allocation of plan assets is 60 percent equity securities and 40 percent debt securities. Investment performance is measured and monitored on an ongoing basis through quarterly investment portfolio and manager guideline compliance reviews, annual liability measurements, and periodic studies. The fair values of Occidental's pension plan assets by asset category are as follows (in millions):

|   | Fair Value Measurements at December 31, 2011 Usin |         |           |        |  |  |  |  |  |  |

- (a) This category represents investment grade bonds of U.S. and non-U.S. issuers from diverse industries.
- (b) This category includes investment funds that primarily invest in U.S. and non-U.S. common stocks and fixed income securities.
- (c) This category represents investment in U.S. and non-U.S. common and preferred stocks from diverse industries.
- (d) Amounts exclude net payables of approximately \$6 million and \$20 million as of December 31, 2011 and 2010, respectively.

The activity during the years ended December 31, 2011 and 2010 for the assets using Level 3 fair value measurements was not significant. Occidental expects to contribute \$6 million to its defined benefit pension plans during 2012. All of the contributions are expected to be in the form of cash.

63

Estimated future benefit payments, which reflect expected future service, as appropriate, are as follows:

|  |                  | Postretirement |
|--|------------------|----------------|
| For the years ended December 31, (in millions) | Pension Benefits | Benefits       |
| 2012   | \$ 46            | \$ 50          |
| 2013   | \$ 46            | \$ 50          |
| 2014   | \$ 47            | \$ 51          |
| 2015   | \$ 43            | \$ 52          |
| 2016   | \$ 48            | \$ 54          |
| 2017 - 2021                                    | \$ 231           | \$ 294         |

### Note 14 Investments and Related-Party Transactions

As of December 31, 2011 and 2010, investments in unconsolidated entities comprised \$2.1 billion and \$2 billion of equity-method investments, respectively.

### **Equity Investments**

As of December 31, 2011, Occidental's equity investments consisted mainly of a 24.5-percent interest in the stock of Dolphin Energy, an approximately 35-percent interest in the General Partner of Plains Pipeline and various other partnerships and joint ventures. Equity investments paid dividends of \$349 million, \$217 million and \$139 million to Occidental in 2011, 2010 and 2009, respectively. As of December 31, 2011, cumulative undistributed earnings of equity-method investees since their respective acquisitions were \$400 million. As of December 31, 2011, Occidental's investments in equity investees exceeded the underlying equity in net assets by \$1.1 billion, of which \$1 billion represents goodwill and \$134 million relates to assets, including intangibles, which are being amortized over their estimated useful lives.

The following table presents Occidental's ownership interest in the summarized financial information of its equity-method investments:

| For the years ended December 31, (in millions) | 2011        | 2010        | 2009        |
|--|-------------|-------------|-------------|
| Revenues                                       | \$<br>2,439 | \$<br>1,759 | \$<br>1,080 |
| Costs and expenses                             | 2,046       | 1,482       | 853         |
| Net income                                     | \$<br>393   | \$<br>277   | \$<br>227   |
|  |             |             |             |
| As of December 31, (in millions)               | 2011        | 2010        |             |
| Current assets                                 | \$<br>2,230 | \$<br>2,041 |             |
| Non-current assets                             | \$<br>4,381 | \$<br>3,965 |             |
| Current liabilities                            | \$<br>1,532 | \$<br>1,323 |             |
| Long-term debt                                 | \$<br>2,305 | \$<br>2,454 |             |
| Other non-current liabilities                  | \$<br>168   | \$<br>119   |             |
| Stockholders' equity                           | \$<br>2,606 | \$<br>2,110 |             |

Occidental's investment in Dolphin, which was acquired in 2002, consists of two separate economic interests through which Occidental owns (i) a 24.5-percent undivided interest in the operations under a DPSA which is proportionately consolidated in the financial statements; and (ii) a 24.5-percent interest in the stock of Dolphin Energy, which is accounted for as an equity investment.

In Ecuador, Occidental has a 14-percent interest in the Oleoducto de Crudos Pesados Ltd. (OCP) oil export pipeline, which Occidental records as an equity investment.

During 2010, Occidental had a 50-percent joint interest in EHP, which was accounted for as an equity method investment. On December 31, 2010, Occidental completed its acquisition of the remaining 50-percent interest, bringing its total ownership to 100 percent. EHP was consolidated in Occidental's balance sheet as of December 31, 2010.

64

### **Related-Party Transactions**

Occidental purchases power, steam and chemicals from and sells oil, NGLs, gas, chemicals and power to certain of its equity investees at market-related prices. During 2011, 2010 and 2009, Occidental entered into the following related-party transactions and had the following amounts due from or to its related parties:

| December 31, (in millions)    | 2011      | 2010      | 2009      |
|-------------------------------|-----------|-----------|-----------|
| Purchases (a)                 | \$<br>10  | \$<br>153 | \$<br>138 |
| Sales (b)                     | \$<br>392 | \$<br>440 | \$<br>291 |
| Services                      | \$<br>10  | \$<br>2   | \$<br>2   |
| Advances and amounts due from | \$<br>32  | \$<br>135 | \$<br>123 |
| Amounts due to                | \$<br>21  | \$<br>383 | \$<br>112 |

- (a) In 2010 and 2009, purchases from EHP accounted for 90 percent and 92 percent, respectively.
- (b) In 2011, sales to Dolphin Energy accounted for 16 percent. In 2010 and 2009, sales to EHP and Dolphin Energy accounted for 44 percent and 63 percent, respectively. In 2011, 2010 and 2009, sales of Occidental-produced oil and NGLs to Plains Pipeline accounted for 76 percent, 50 percent and 26 percent of these totals, respectively. Additionally, Occidental conducts marketing and trading activities with Plains Pipeline for oil and NGLs. These transactions are reported in Occidental's income statement on a net margin basis. The sales amounts above include the net margins on such transactions, which were negligible.

### Note 15 Fair Value Measurements

#### Fair Values - Recurring

The following tables provide fair value measurement information for assets and liabilities that are measured on a recurring basis as of December 31, 2011 and 2010 (in millions):

|                           | Fair V<br>Using |        | urements | at Decemb | ber 31, 2011 |            |           |     |      |       |

<sup>(</sup>a) Represents the impact of netting assets, liabilities and collateral when a legal right of offset exists.

65

#### Fair Values - Nonrecurring

In 2010, Occidental recorded an impairment charge of \$275 million predominantly to write off gas properties in the Rocky Mountain region.

#### Financial Instruments Fair Value

The carrying amounts of cash and cash equivalents and other on-balance-sheet financial instruments, other than fixed-rate debt, approximate fair value. The cost, if any, to terminate off-balance-sheet financial instruments is not significant.

### Note 16 Industry Segments and Geographic Areas

Occidental conducts its continuing operations through three segments: (1) oil and gas; (2) chemical; and (3) midstream, marketing and other (midstream and marketing). The oil and gas segment explores for, develops and produces oil and condensate, NGLs, and natural gas. The chemical segment mainly manufactures and markets basic chemicals and vinyls. The midstream and marketing segment gathers, treats, processes, transports, stores, purchases and markets oil, condensate, NGLs, natural gas, CO2 and power. It also trades around its assets, including pipelines and storage capacity, and trades oil, NGLs, gas and other commodities.

Earnings of industry segments and geographic areas exclude income taxes, interest income, interest expense, environmental remediation expenses, unallocated corporate expenses and discontinued operations, but include gains and losses from dispositions of segment and geographic area assets and income from the segments' equity investments. Intersegment sales eliminate upon consolidation and are generally made at prices approximately equal to those that the selling entity would be able to obtain in third-party transactions.

Identifiable assets are those assets used in the operations of the segments. Corporate assets consist of cash, certain corporate receivables and PP&E, and an investment in the Joslyn, Canada oil sands project.

| 31, 2010  | 52  | %          | 27 | %     | 21 | % |
| Year ended December                             |     |            |    |       |    |   |
| 31, 2009  | 56  | %          | 26 | %     | 18 | % |

- (d) The 2011 amount includes pre-tax charges of \$35 million related to exploration write-offs in Libya and \$29 million related to a Colombian net worth tax, and a pre-tax gain for sale of an interest in a Colombian pipeline of \$22 million. The 2010 amount includes a \$275 million pre-tax charge for asset impairments, predominantly of gas properties in the Rocky Mountain region. The 2009 amount includes an \$8 million pre-tax charge for the termination of rig contracts.
- (e) Includes amounts attributable to common stock after deducting noncontrolling interest amounts of \$72 million and \$51 million for 2010 and 2009, respectively.
- (f) Includes unallocated net interest expense, administration expense, environmental remediation and other pre-tax items noted in footnote (h) below.
- (g) Includes all foreign and domestic income taxes from continuing operations.
- (h) Includes the following significant items affecting earnings for the years ended December 31:

| Benefit (Charge) (In millions) corporate | 2011        | 2010      | 2009       |
|--|-------------|-----------|------------|

(a) Represent amounts attributable to common stock after deducting noncontrolling interest amounts.

(b) Includes a fourth quarter pre-tax charge of \$275 million for asset impairments, predominantly of gas properties in the Rocky Mountain region.

(c) Includes a fourth quarter benefit of \$80 million related to foreign tax credit carryforwards.

70

Supplemental Oil and Gas Information (Unaudited)

The following tables set forth Occidental's net interests in quantities of proved developed and undeveloped reserves of oil and condensate, NGLs and natural gas and changes in such quantities. Reserves are stated after applicable royalties. Estimated reserves include Occidental's economic interests under production sharing contracts (PSCs) and other similar economic arrangements.

Effective beginning the year ended December 31, 2009, the U.S. Securities and Exchange Commission (SEC) and the Financial Accounting Standards Board modified certain disclosure requirements for oil and gas properties. Occidental adopted these requirements as of December 31, 2009. As a result, proved oil, NGLs and gas reserves are now calculated using the unweighted arithmetic average of the first-day-of-the-month price for each month within the year instead of the year-end market price. For the 2011, 2010 and 2009 disclosures, the West Texas Intermediate oil prices used were \$96.19 per barrel, \$79.43 per barrel and \$61.18 per barrel, respectively. The Henry Hub gas prices used for the 2011, 2010 and 2009 disclosures were \$4.04 per MMBtu, \$4.39 per MMBtu and \$3.99 per MMBtu, respectively. Occidental does not have any reserves from non-traditional sources. The adoption of the new requirements did not have a material effect on Occidental's proved reserves. Prior to December 31, 2009, Occidental's production volumes and reserves had been reported as a mix of pre-tax and after-tax volumes while its revenues reflected pre-tax sales. This difference was caused by Occidental's PSCs in the Middle East/North Africa where production is immediately taken and sold to pay the local income tax. Occidental had historically reported these volumes as additional revenues and income taxes but not additional production and reserves. To simplify Occidental's reporting and to conform with industry practice, Occidental included these volumes in its reserves as of December 31, 2009. Beginning in 2010, Occidental's production computations are shown using pre-tax of comparison, prior year data for daily production volumes and for results per unit of production computations are shown using pre-tax

- (a) Proved reserves as of December 31, 2009 and 2008 include proved oil reserves related to the noncontrolling interest of a Colombian subsidiary. On December 31, 2010, Occidental restructured its Colombian operations to take a direct working interest in the related assets. As a result, the December 31, 2010 and 2011 proved reserves amounts exclude the noncontrolling interest.
- (b) Excludes proved oil reserves from the Argentine operations sold in February 2011 and classified as discontinued operations of 166 MMbbl, 108 MMbbl and 135 MMbbl as of December 31, 2010, 2009 and 2008, respectively. The Argentine proved developed and proved undeveloped reserves were 91 MMbbl and 75 MMbbl, 58 MMbbl and 50 MMbbl and 62 MMbbl and 73 MMbbl as of December 31, 2010, 2009 and 2008, respectively.
- (c) Proved reserve amounts relate to PSCs and other similar economic arrangements.

- (d) Represents the change to no longer include the Colombian noncontrolling interest.
- (e) Approximately 10 percent of the proved developed reserves at December 31, 2011 are nonproducing, the majority of which are located in the United States and Libya.
- (f) The amount of Occidental's proved undeveloped reserves that are not expected to be developed within five years from the date initially recorded was de minimis.

- (a) Natural gas volumes have been converted to barrels of oil equivalent (BOE) based on energy content of six thousand cubic feet (Mcf) of gas to one barrel of oil. Barrels of oil equivalence does not necessarily result in price equivalence. The price of natural gas on a barrel of oil equivalent basis is currently substantially lower than the corresponding price for oil and has been similarly lower over the recent past.
- (b) Proved reserves as of December 31, 2009 and 2008 include proved oil reserves related to the noncontrolling interest of a Colombian subsidiary.
- (c) Excludes proved reserves from the Argentine operations sold in February 2011 and classified as discontinued operations of 196 MMBOE, 130 MMBOE and 160 MMBOE as of December 31, 2010, 2009 and 2008, respectively. The Argentine proved developed and proved undeveloped reserves were 109 MMBOE and 87

MMBOE, 70 MMBOE and 60 MMBOE and 76 MMBOE and 84 MMBOE as of December 31, 2010, 2009 and 2008, respectively.

- (d) Proved reserve amounts relate to PSCs and other similar economic arrangements.
- (e) Represents the change to no longer include the Colombian noncontrolling interest.
- (f) Approximately 7 percent of the proved developed reserves at December 31, 2011 are nonproducing, the majority of which are located in the United States and Libya.
- (g) The amount of Occidental's proved undeveloped reserves that are not expected to be developed within five years from the date initially recorded was de minimis.

75

Capitalized costs relating to oil and gas producing activities and related accumulated DD&A were as follows:

- (a) Includes the noncontrolling interest in a Colombian subsidiary for 2010 and 2009.
- (b) Excludes amounts from the Argentine operations sold in February 2011 and classified as discontinued operations.
- (c) Results per unit of production is calculated using the volumes produced from continuing operations.
- (d) Natural gas volumes have been converted to BOE based on energy content of six thousand cubic feet (Mcf) of gas to one barrel of oil. Barrels of oil equivalence does not necessarily result in price equivalence. The price of natural gas on a barrel of oil equivalent basis is currently substantially lower than the corresponding price for oil and has been similarly lower over the recent past.
- (e) Revenues from net production exclude royalty payments and other adjustments.
- (f) United States federal income taxes reflect certain expenses related to oil and gas activities allocated for United States income tax purposes only, including allocated interest and corporate overhead.

Standardized Measure, Including Year-to-Year Changes Therein, of Discounted Future Net Cash Flows

For purposes of the following disclosures, future cash flows were computed by applying to Occidental's proved oil and gas reserves the unweighted arithmetic average of the first-day-of-the-month price for each month within the years ended December 31, 2011, 2010 and 2009, respectively (unless prices were defined by contractual arrangements) and exclude escalations based upon future conditions. The realized prices used to calculate future cash flows vary by producing area and market conditions. Future operating and capital costs were forecast using the current cost environment applied to expectations of future operating and development activities. Future income tax expenses were computed by applying, generally, year-end statutory tax rates (adjusted for permanent differences, tax credits, allowances and foreign income repatriation considerations) to the estimated net future pre-tax cash flows. The discount was computed by application of a 10-percent discount factor. The calculations assumed the continuation of existing economic, operating and contractual conditions at each of December 31, 2011, 2010 and 2009. Such assumptions, which are required by regulation, have not always proven accurate in the past. Other valid assumptions would give rise to substantially different results.

|      |   | Development | 93.3   |             | 4.6            | 97.9    |
| Dry  | _ | Exploratory | 17.3   | 0.8         | 2.8            | 20.9    |
|      |   | Development | 10.0   |             | 0.4            | 10.4    |
| 2009 |   |             |        |             |                |         |
| Oil  | _ | Exploratory | 5.5    |             | 0.7            | 6.2     |
|      |   | Development | 224.3  | 61.7        | 105.3          | 391.3   |
| Gas  | _ | Exploratory |        |             |                |         |
|      |   | Development | 14.5   |             | 2.0            | 16.5    |
| Dry  | _ | Exploratory | 13.7   |             | 2.9            | 16.6    |
|      |   | Development | 1.8    | 0.7         | 0.7            | 3.2     |

(a) Excludes for all years presented the exploratory and development wells completed by Argentine operations sold in February 2011 and classified as discontinued operations and for 2010 and 2009 includes the noncontrolling interest in a Colombian subsidiary.

80

#### Productive Oil and Gas Wells

The following table sets forth, as of December 31, 2011, Occidental's productive oil and gas wells (both producing and capable of production).

| Wells at |        |           | United         | Latin     | Middle East/ |                |
|----------|--------|-----------|----------------|-----------|--------------|----------------|
| December | 31, 20 | 011 (a)   | States         | America   | North Africa | Total          |
| Oil      | _      | Gross (b) | 31,538 (1,426) | 1,277 ( ) | 2,201 (570)  | 35,016 (1,996) |
|          |        | Net (c)   | 21,052 (1,101) | 633 ( )   | 1,196 (274)  | 22,881 (1,375) |
| Gas      | -      | Gross (b) | 6,933 (1,388)  | 29 ()     | 120 (1)      | 7,082 (1,389)  |
|          |        | Net (c)   | 5,470 (1,012)  | 27 ()     | 62 (1)       | 5,559 (1,013)  |

- (a) The numbers in parentheses indicate the number of wells with multiple completions.
- (b) The total number of wells in which interests are owned.
- (c) The sum of fractional interests.

### Participation in Exploratory and Development Wells Being Drilled

The following table sets forth, as of December 31, 2011, Occidental's participation in exploratory and development wells being drilled.

| Wells at               |              | United | Latin   | Middle East/ |       |
|------------------------|--------------|--------|---------|--------------|-------|
| December 31, 2011      |              | States | America | North Africa | Total |
| Exploratory and develo | opment wells |        |         |              |       |
| _                      | Gross        | 280    | 7       | 37           | 324   |
| _                      | Net          | 180    | 4       | 19           | 203   |

At December 31, 2011, Occidental was participating in 190 pressure-maintenance projects, mostly waterfloods, in the United States, 8 in Latin America and 26 in the Middle East/North Africa.

### Oil and Gas Acreage

The following table sets forth, as of December 31, 2011, Occidental's holdings of developed and undeveloped oil and gas acreage.

| Thousands of a |           | United | Latin       | Middle East/ |        |
|----------------|-----------|--------|-------------|--------------|--------|
| December 31,   | 2011      | States | (a) America | North Africa | Total  |
| Developed (b)  |           |        |             |              |        |
| _              | Gross (c) | 7,873  | 120         | 1,214        | 9,207  |
| _              | Net (d)   | 4,646  | 83          | 551          | 5,280  |
| Undeveloped (  | e)        |        |             |              |        |
| _              | Gross (c) | 5,817  | 485         | 18,418       | 24,720 |
| _              | Net (d)   | 2,748  | 364         | 16,453       | 19,565 |

- (a) Includes approximately 1.7 million acres in California, the vast majority of which are net fee mineral interests.
- (b) Acres spaced or assigned to productive wells.
- (c) Total acres in which interests are held.
- (d) Sum of the fractional interests owned based on working interests, or interests under PSCs and other economic arrangements.
- (e) Acres on which wells have not been drilled or completed to a point that would permit the production of commercial quantities of oil and gas, regardless of whether the acreage contains proved reserves.

Occidental's investment in developed and undeveloped acreage comprises numerous concessions, blocks and leases. The terms and conditions under which Occidental maintains exploration or production rights to the acreage are property-specific, contractually defined and vary significantly from property to property. Work programs are designed to ensure that the exploration potential of any property is fully evaluated before expiration. In some instances, Occidental may elect to relinquish acreage in advance of the contractual expiration date if the evaluation process is complete and there is not a business basis for extension. In cases where additional time may be required to fully evaluate acreage, Occidental has generally been successful in obtaining extensions. Scheduled lease and concession expirations for undeveloped acreage over the next three years are not expected to have a material adverse impact on Occidental.

81

### Oil, NGLs and Natural Gas Production and Sales Volumes Per Day

The following tables set forth the production and sales volumes of oil, NGLs and natural gas per day for each of the three years in the period ended December 31, 2011. The differences between the production and sales volumes per day are generally due to the timing of shipments at Occidental's international locations where product is loaded onto tankers.

| Production per Day  | 2011 | 2010 | 2009 |
|---|------|------|------|
| United States   |      |      |      |

| Yemen                            | 27   | 30   | 35   |
| TOTAL                            | 189  | 194  | 190  |
| NGLs (MBBL)                      |      |      |      |
| Dolphin                          | 10   | 12   | 11   |
| Libya                            |      | 1    |      |
| TOTAL                            | 10   | 13   | 11   |
| Natural gas (MMCF)               | 426  | 453  | 316  |
| Total Sales Volumes (MBOE) (a,c) | 731  | 705  | 678  |

- (a) For all periods presented, excludes volumes from the Argentine operations sold in February 2011 and classified as discontinued operations.
- (b) Includes production volumes per day of 5 mbbl and 6 mbbl for the years ended December 31, 2010 and 2009, respectively, related to the noncontrolling interest in a Colombian subsidiary. Includes sales volumes per day of 4 mbbl and 6 mbbl for the years ended December 31, 2010 and 2009, respectively, related to the noncontrolling interest in a Colombian subsidiary.
- (c) Natural gas volumes have been converted to BOE based on energy content of six Mcf of gas to one barrel of oil. Barrels of oil equivalence does not necessarily result in price equivalence. The price of natural gas on a barrel of oil equivalent basis is currently substantially lower than the corresponding price for oil and has been similarly lower over the recent past.

<sup>(</sup>b) Of these amounts, \$100 million, \$102 million and \$112 million in 2011, 2010 and 2009, respectively, are classified as current.

# Item 9 Changes in and Disagreements with Accountants on Accounting and Financial Disclosure None.

#### Item 9a Controls and Procedures

Disclosure Controls and Procedures

Occidental's President and Chief Executive Officer and its Executive Vice President and Chief Financial Officer supervised and participated in Occidental's evaluation of its disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (Exchange Act)) as of the end of the period covered by this report. Based upon that evaluation, Occidental's President and Chief Executive Officer and Executive Vice President and Chief Financial Officer concluded that Occidental's disclosure controls and procedures were effective as of December 31, 2011.

There has been no change in Occidental's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the fourth quarter of 2011 that has materially affected, or is reasonably likely to materially affect, Occidental's internal control over financial reporting. Management's Annual Assessment of and Report on Occidental's Internal Control over Financial Reporting and the Report of Independent Registered Public Accounting Firm on Internal Control over Financial Reporting are set forth in Item 8.

#### Part III

#### Item 10 Directors, Executive Officers and Corporate Governance

Occidental has adopted a Code of Business Conduct (Code). The Code applies to the President and Chief Executive Officer; Executive Vice President and Chief Financial Officer; Vice President, Controller and Principal Accounting Officer; and persons performing similar functions (Key Personnel). The Code also applies to Occidental's directors, its employees and the employees of entities it controls. The Code is posted at www.oxy.com. Occidental will satisfy any disclosure requirement under Item 5.05 of Form 8-K regarding an amendment to, or waiver from, any provision of the Code with respect to its Key Personnel or directors by disclosing the nature of that amendment or waiver on its website. This item incorporates by reference the information regarding Occidental's directors appearing under the caption "Election of Directors," "Security Ownership – Section 16(a) Beneficial Ownership Reporting Compliance," "Board of Directors and its Committees – Board Committees – Audit Committee," and "General Information – Nominations for Directors for Term Expiring in 2014" in Occidental's definitive proxy statement filed in connection with its May 4, 2012, Annual Meeting of Stockholders (2012 Proxy Statement). The list of Occidental's executive officers and related information under "Executive Officers" set forth in Part I of this report is incorporated by reference herein.

#### Item 11 Executive Compensation

This item incorporates by reference the information appearing under the captions "Compensation Discussion and Analysis," (except "Succession Planning"), "Executive Compensation Tables" and "Director Compensation" in the 2012 Proxy Statement.

#### Item 12 Security Ownership of Certain Beneficial Owners and Management

This item incorporates by reference the information with respect to security ownership appearing under the caption "Security Ownership – Certain Beneficial Owners and Management" in the 2012 Proxy Statement. See also the information under "Securities Authorized for Issuance Under Equity Compensation Plans" in Part II, Item 5 of this report.

#### Item 13 Certain Relationships and Related Transactions and Director Independence

This item incorporates by reference the information appearing under the caption "Board of Directors and its Committees – Independence", and " – Related Party Transactions" in the 2012 Proxy Statement.

### Item 14 Principal Accountant Fees and Services

This item incorporates by reference the information with respect to accountant fees and services appearing under the captions "Ratification of Independent Auditors – Audit and Other Fees" in the 2012 Proxy Statement.

#### Part IV

#### Item 15 Exhibits and Financial Statement Schedules

The agreements included as exhibits to this report are included to provide information about their terms and not to provide any other factual or disclosure information about Occidental or the other parties to the agreements. The agreements contain representations and warranties by each of the parties to the applicable agreement that were made solely for the benefit of the other agreement parties and:

- Ÿ should not be treated as categorical statements of fact, but rather as a way of allocating the risk among the parties if those statements prove to be inaccurate;
- Ÿ have been qualified by disclosures that were made to the other party in connection with the negotiation of the applicable agreement, which disclosures are not necessarily reflected in the agreement;
- Ÿ may apply standards of materiality in a way that is different from the way investors may view materiality; and
- Ÿ were made only as of the date of the applicable agreement or such other date or dates as may be specified in the agreement and are subject to more recent developments.

(a) (1) and (2). Financial Statements and Financial Statement Schedule Reference is made to Item 8 of the Table of Contents of this report, where these documents are listed.

| (a) (3). Exhibits      |  |
|------------------------|--|
| (a) (3). Exhibits 2.1* | Agreement and Plan of Merger among Occidental Petroleum Corporation, Occidental Transaction 1, LLC and Vintage Petroleum, Inc., dated as of October 13, 2005. (Disclosure schedules to this agreement have been omitted pursuant to Item 601(b)(2) of Regulation S-K) (filed as Exhibit 2.1 to the Current Report on Form 8-K of Occidental dated October 13, 2005 (filed October 17, 2005), File No. 1-9210). |
| 3.(i)*                 | Restated Certificate of Incorporation of Occidental, dated November 12, 1999 (filed as Exhibit 3.(i) to the Annual Report on Form 10-K of Occidental for the fiscal year ended December 31, 1999, File No. 1-9210).  |
| 3.(i)(a)*              | Certificate of Change of Location of Registered Office and of Registered Agent, dated July 6, 2001 (filed as Exhibit 3.1(i) to the Registration Statement on Form S-3 of Occidental, File No. 333-82246).  |
| 3.(i)(b)*              | Certificate of Amendment of Restated Certificate of Incorporation of Occidental Petroleum Corporation, dated May 5, 2006 (filed as Exhibit 3.(i)(b) to the Annual Report on Form 10-K of Occidental for the fiscal year ended December 31, 2006, File No.1-9210).  |
| 3.(i)(c)*              | Certificate of Amendment of Restated Certificate of Incorporation of Occidental Petroleum Corporation, dated May 1, 2009 (filed as Exhibit 3.(i)(c) to the Quarterly Report on Form 10-Q of Occidental for the fiscal quarter ended June 30, 2009, File No. 1-9210).   |
| 3.(ii)*                | Bylaws of Occidental, as amended through May 5, 2011 (filed as Exhibit 3.(ii) to the Current Report on Form 8-K of Occidental dated May 5, 2011 (date of earliest event reported), filed May 6, 2011, File No. 1-9210).  |
| 4.1*                   | Indenture, dated as of August 18, 2011, between Occidental Petroleum and The Bank of New York Mellon Trust Company, N.A. (filed as Exhibit 4.1 to the Current Report on Form 8-K of Occidental dated August 15, 2011 (date of earliest event reported), File No. 1-9210).  |
| 4.2*                   | Indenture (Senior Debt Securities), dated as of April 1, 1998, between   |

Instruments defining the rights of holders of other long-term debt of Occidental and its subsidiaries are not being filed since the total amount of securities authorized under each of such instruments does not exceed 10 percent of the total assets of Occidental and its subsidiaries on a consolidated basis. Occidental agrees to furnish a copy of any such instrument to the Commission upon request.

Occidental and The Bank of New York, as Trustee (filed as Exhibit 4 to the Registration Statement on Form S-3 of Occidental, File No. 333-52053).

All of the Exhibits numbered 10.1 to 10.68 are management contracts and compensatory plans required to be identified specifically as responsive to Item 601(b)(10)(iii)(A) of Regulation S-K pursuant to Item 15(b) of Form 10-K.

| Amended and Restated Employment Agreement, dated as of October 9,           |
