press release

3 June, 2013

**BP COMPLETES SALE OF CARSON REFINERY AND
SOUTHWEST U.S. RETAIL ASSETS TO TESORO**

BP has completed the previously announced sale of its Carson, California refinery and related logistics and marketing assets in the region to Tesoro Corporation for approximately \$2.4 billion as part of a plan to reshape BP's U.S. fuels business. Cash proceeds from the sale include approximately \$1.075 billion for assets and an estimated \$1.35 billion primarily for inventory at market value and other working capital.

"With the completion of this divestment the strategic refocusing of our U.S. fuels portfolio is essentially complete," said Iain Conn, chief executive of BP's global refining and marketing business. "BP's U.S. fuels business is now anchored around three, highly sophisticated northern refineries, which are crude feedstock-advantaged, and tied to strong marketing businesses."

BP will continue to maintain a number of business interests in California, including a large ARCO retail and logistics presence that includes approximately 270 retail sites in the northern part of the state. BP will also continue the distribution and marketing of lubricants through its Castrol brand and remain active in the California natural gas and power sector.

"California remains an important state for us and we remain committed to supplying our customers in Northern California and the rest of the Pacific Northwest with the quality fuels they depend on," said Jeff Pitzer, BP's Northwest Fuels Value Chain president. "We've recently upgraded our Cherry Point, Washington refinery to produce cleaner-burning diesel fuel and are building a new rail terminal at the plant to take advantage of growing supplies of domestically-produced crude oil."

In addition to marketing conventional fuels and lubricants in the state, BP will also continue to support the development of renewable energy sources in California through its Global Biofuels Technology Center in San Diego, and the Energy Biosciences Institute at UC Berkeley.

With the transaction's closing on 1 June, Tesoro took ownership of the 266,000 barrel per day (bpd) refinery near Los Angeles as well as the associated logistics network of pipelines and storage terminals and the ARCO-branded retail marketing network in Southern California, Arizona and Nevada.

While the sale included BP's ARCO retail brand rights, BP has exclusively licensed those rights from Tesoro for Northern California, Oregon and Washington.

BP retains ownership of the ampm convenience store brand and has franchised it to Tesoro for use in the Southwest.

About BP in the U.S.:

Over the past five years, BP has invested more than \$55 billion in the U.S. - more than any other energy company. BP is the nation's second-largest producer of oil and gas and provides enough energy annually to light nearly the entire country for a year. Directly employing more than 20,000 people in all 50 states, BP supports nearly a quarter of a million jobs through all of its business activities. For more information, visit www.bp.com/us.

Notes to editors:

Edgar Filing: BP PLC - Form 6-K

- The Carson Refinery is one of the largest on the U.S. West Coast, with a crude distillation capacity of 266,000 bpd. It became part of BP through the 2000 acquisition of ARCO. It employs over 1,100 staff and in total the divested business employs approximately 1,750 staff.
- The transaction includes the refinery and integrated terminals and pipelines, as well as marketing agreements with about 800 retail sites in Southern California, Arizona and Nevada.
- The refinery is located on 650 acres in Los Angeles County, near the Long Beach and Los Angeles Harbors. The refinery began operations in 1938. It processes crude oil from Alaska's North Slope, the Middle East and West Africa. Processing equipment includes the largest fluid catalytic cracker in California, two cokers and distillate hydrocracking.
- BP's 51 per cent interest in a nominal 400 megawatt cogeneration facility located at the refinery is included in the sale.
- BP's Wilmington Coke Calciner located about five miles from the refinery is also part of the sale. The plant occupies about 17 acres. The plant employs approximately 40 people and produces 350,000 metric tons of calcinated coke per year.
- Logistics assets included in the sale include ownership of Berth 121 facility improvements and equipment, Marine Terminals 2 and 3 and the LA basin pipelines system that moves crude, products and intermediates to and from the refinery.
- Terminals included in the sale are Carson Crude, East Hynes, West Hynes, Hathaway, Carson Products, Colton, Vinvale and San Diego.
- BP announced plans to divest its Carson, California and Texas City, Texas refineries in February 2011 as part of a strategic refocusing of the company's global refining portfolio. BP completed the sale of Texas City to Marathon Petroleum Corporation on 1 February.
- BP is completing a number of major investments in its other US refineries, including a large investment program to transform its 413,000 bpd capacity Whiting, Ind., refinery to process heavy, sour crudes, expected to come on stream in the second half of this year; a recently-completed clean diesel upgrading project at its 234,000 bpd Cherry Point, Wash., refinery; and the recent start-up of a continuous catalytic reformer to the 160,000 bpd capacity Toledo, Ohio, refinery (a 50:50 joint venture with partner Husky Energy Inc.).
