PROSPECTUS SUPPLEMENT

(To prospectus dated May 13, 2005)

\$5,070,800

Wachovia Corporation

Principal Protected Notes due December 1, 2010

Linked to an Equity Asset Class Basket

Issuer:	Wachovia Corporation
Principal Amount:	Each note will have a principal amount of \$10. Each note will be offered at an initial public offering price of \$10.
Maturity Date:	December 1, 2010.
Interest:	Wachovia will not pay you interest during the term of the notes.
Market Measure:	The return on the notes is linked to the performance of a basket of indices initially weighted as follows: the S&P 500 [®] Composite Stock Price Index (35%), the S&P MidCap 400 [®] Index (20%), the Russell 2000 [®] Index (20%) and the MSCI EAFE [®] Index (25%). Immediately following the valuation of the basket on each basket determination date, the component indices in the basket will be rebalanced to their initial percentage weights in the basket. The initial basket value is \$10.00.
Maturity Payment Amount:	At maturity, for each note you own, you will receive a cash payment equal to the principal amount of the note or, if the final average basket value is greater than the principal amount per note, the final average basket value plus 10% of the difference of the final average basket value minus the principal amount per note. The final average basket value will equal the arithmetic average of the closing levels of the basket on each basket determination date, as defined below. If the final average basket value is less than or equal to the initial basket value, the maturity payment amount will be \$10 per note.
Listing:	The notes will not be listed on the American Stock Exchange because the principal amount of the notes sold in this offering is below the threshold that the American Stock Exchange requires for listing on that exchange. Additionally, the notes will not be listed or displayed on any other securities exchange, the Nasdaq National Market or any electronic communications network.
Pricing Date:	December 9, 2005
Expected Settlement Date:	December 14, 2005
CUSIP number:	929903870

For a detailed description of the terms of the notes, see [Summary Information](#) beginning on page S-1 and [Specific Terms of the Notes](#) beginning on page S-14.

Investing in the notes involves risks. See [Risk Factors](#) beginning on page S-8.

	<u>Per Note</u>	<u>Total</u>
Public Offering Price	\$ 10.00	\$ 5,070,800.00
Underwriting Discount and Commission	\$ 0.30	\$ 152,124.00
Proceeds to Wachovia Corporation.	\$ 9.70	\$ 4,918,676.00

The notes solely represent a senior unsecured debt obligation of Wachovia and are not the obligation of, or guaranteed by, any other entity. The notes are not deposits or accounts and are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency.

Neither the Securities and Exchange Commission nor any state securities commission has approved nor disapproved of these securities or passed upon the adequacy or accuracy of this prospectus supplement or the accompanying prospectus. Any representation to the contrary is a criminal offense.

Wachovia may use this prospectus supplement in the initial sale of the notes. In addition, Wachovia Capital Markets, LLC or any other broker-dealer affiliate of Wachovia may use this prospectus supplement in a market-making or other transaction in any note after its initial sale. *Unless Wachovia or its agent informs the purchaser otherwise in the confirmation of sale, this prospectus supplement is being used in a market-making transaction.*

Wachovia Securities

The date of this prospectus supplement is December 9, 2005.

Unless otherwise indicated, you may rely on the information contained in this prospectus supplement and the accompanying prospectus. Neither we nor the underwriter has authorized anyone to provide information different from that contained in this prospectus supplement and the accompanying prospectus. When you make a decision about whether to invest in the notes, you should not rely upon any information other than the information in this prospectus supplement and the accompanying prospectus. Neither the delivery of this prospectus supplement nor sale of the notes means that information contained in this prospectus supplement or the accompanying prospectus is correct after their respective dates. This prospectus supplement and the accompanying prospectus are not an offer to sell or solicitation of an offer to buy the notes in any circumstances under which the offer of solicitation is unlawful.

Table of Contents**SUMMARY INFORMATION**

This summary includes questions and answers that highlight selected information from this prospectus supplement and the accompanying prospectus to help you understand the Principal Protected Notes due December 1, 2010 Linked to an Equity Asset Class Basket, referred to as the notes. You should carefully read this prospectus supplement and the accompanying prospectus to fully understand the terms of the notes, the indices to which the performance of the notes is linked, and the tax and other considerations that are important to you in making a decision about whether to invest in the notes. You should carefully review the section Risk Factors in this prospectus supplement and the accompanying prospectus, which highlights certain risks associated with an investment in the notes, to determine whether an investment in the notes is appropriate for you.

Unless otherwise mentioned or unless the context requires otherwise, all references in this prospectus supplement to Wachovia, we, us and our or similar references mean Wachovia Corporation and its subsidiaries. Wachovia Capital Markets, LLC is an indirect, wholly owned subsidiary of Wachovia Corporation. Wachovia Corporation conducts its investment banking, capital markets and retail brokerage activities through its various broker-dealer, bank and non-bank subsidiaries, including Wachovia Capital Markets, LLC, under the trade name Wachovia Securities. Any reference to Wachovia Securities in this prospectus supplement does not, however, refer to Wachovia Securities, LLC, member of the New York Stock Exchange and the Securities Investor Protection Corporation or Wachovia Securities Financial Network, LLC, member of the National Association of Securities Dealers, Inc. and the Securities Investor Protection Corporation, broker-dealer affiliates of Wachovia Corporation and Wachovia Capital Markets, LLC. Unless otherwise mentioned or unless the context requires otherwise, all references in this prospectus supplement to WBNA mean Wachovia Bank, National Association. All references to this prospectus supplement mean the prospectus supplement contemplated in the accompanying prospectus.

What are the notes?

The notes offered by this prospectus supplement will be issued by Wachovia and will mature on December 1, 2010. The maturity payment amount will be linked to the performance of a basket of four indices. We refer to each of the indices as a component index and we refer to the component indices collectively as the basket. The notes will bear no interest and no other payments will be made until maturity.

Each component index represents a particular, generic equity asset class. The table below provides the following information for each component index in the basket: the name of the component index, the equity class represented by the component index, the Bloomberg symbol used to identify the component index, and the component index's initial percentage and dollar weights in the basket.

Component Index	Equity Asset Class	Bloomberg Symbol	Initial Percentage Weight	Initial U.S. Dollar Weight
S&P 500® Composite Stock Price Index	U.S. Large Capitalization	SPX	35%	\$ 3.50
S&P MidCap 400® Index	U.S. Mid Capitalization	MID	20%	\$ 2.00
Russell 2000® Index	U.S. Small Capitalization	RTY	20%	\$ 2.00
MSCI EAFE® Index	International	EAFE	25%	\$ 2.50
<i>Total</i>			<i>100%</i>	<i>\$ 10.00</i>

As discussed in the accompanying prospectus, the notes are debt securities and are part of a series of debt securities entitled Medium-Term Notes, Series G that Wachovia may issue from time to time. The notes will rank equally with all other unsecured and unsubordinated debt of Wachovia. For more details, see Specific Terms of the Notes beginning on page S-14.

S-1

Table of Contents

Each note will have a principal amount of \$10. Each note will be offered at an initial public offering price equal to \$10. You may transfer only whole notes. Wachovia will issue the notes in the form of a global certificate, which will be held by The Depository Trust Company, also known as DTC, or its nominee. Direct and indirect participants in DTC will record your ownership of the notes.

What will I receive upon maturity of the notes?

At maturity, for each note you own, you will receive a cash payment equal to the principal amount of the note or, if the final average basket value is greater than the principal amount per note, the final average basket value, described below, plus 10% of the difference of the final average basket value minus the principal amount per note. The initial basket value is \$10.00. *If the final average basket value is less than or equal to the initial basket value, the maturity payment amount will be \$10.*

Determination of the final average basket value

The initial basket value is \$10.00.

The final average basket value will be determined by the calculation agent on the final basket determination date and will equal the arithmetic average of closing levels of the basket on each basket determination date. The closing level of the basket on each basket determination date will be calculated based on the weighted levels of the component indices on that basket determination date, and will equal the sum of the products of (i) the weighting factor of each component index (as shown below) in effect on that basket determination date and (ii) the closing level of the respective component index on that basket determination date. If the final basket determination date is not a scheduled trading day or if there is a market disruption event with respect to any component index on such day, the final basket determination date for such component index will be the immediately succeeding scheduled trading day that is not a disrupted day. *If the final basket determination date is postponed, then the maturity date of the notes will be postponed by an equal number of scheduled trading days.*

Component Index	Initial Weighting Factor	Closing Level on Pricing Date	Initial Percentage Weight	Initial U.S. Dollar Weight
S&P 500® Composite Stock Price Index	.002779167	\$3.50	35.00%	\$ 3.50
S&P MidCap 400® Index	.002686222	\$2.00	20.00%	\$ 2.00
Russell 2000® Index	.002903727	\$2.00	20.00%	\$ 2.00
MSCI EAFE® Index	.001522673	\$2.50	25.00%	\$ 2.50
<i>Total</i>			<i>100.00%</i>	<i>\$ 10.00</i>

Determination and Rebalancing of the Weighting Factor

The weighting factor is the number used to convert the closing level of a component index into its value in the basket based on its initial percentage weight.

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

The initial weighting factor for each component index equals (i) the initial basket value of \$10.00 multiplied by the initial percentage weight for that component index, divided by (ii) closing level of that component index on December 9, 2005.

Immediately following the valuation of the basket on each basket determination date, the basket will be rebalanced such that each component index will represent its initial weight in the basket. To rebalance the basket, the calculation agent will adjust the weighting factor for each component index on each basket determination date in the manner described below, and the new weighting factor will remain in effect through, and will be used for determining the value of the component index in the basket on, the next basket determination date. The new weighting factor for each component index determined on each basket

S-2

Table of Contents

determination date will equal (i) the closing level of the basket on such basket determination date multiplied by the initial percentage weight of that component index, divided by (ii) the closing level of that component index on such basket determination date.

The basket determination date means the first calendar day of each December beginning in December 1, 2006, through December 1, 2009, and the fifth scheduled trading day prior to maturity date, expected to be November 29, 2010, which we refer to as the final basket determination date. If any of the first four scheduled determination dates is not a scheduled trading day or if a market disruption event occurs on any such date with respect to a component index, the basket determination date with respect to that component index only will be postponed to the immediately succeeding scheduled trading day on which no market disruption event has occurred or is continuing, provided that, with respect to any component index, if a market disruption event has occurred or is continuing on each of the five scheduled trading days immediately succeeding any of the first four scheduled basket determination dates, the calculation agent will determine the applicable closing level for the disrupted component index on such fifth succeeding trading day in accordance with the formula for calculating the value of the applicable component index last in effect prior to the commencement of the market disruption event, without rebalancing or substitution, using the closing level (or, if trading in the relevant securities has been materially suspended or materially limited, its good faith estimate of the closing price that would have prevailed but for such suspension or limitation) on such fifth succeeding scheduled trading day of each security most recently comprising the applicable component index.

If the final basket determination date is not a scheduled trading day or if there is a market disruption event with respect to any component index on such day, the final basket determination date for such component index will be the immediately succeeding scheduled trading day that is not a disrupted day. *If the final basket determination date is postponed, then the maturity date of the notes will be postponed by an equal number of scheduled trading days.*

If the final average basket value is less than or equal to the initial basket value, the maturity payment amount will be \$10 per note.

Hypothetical Examples

How the Weighting Factor is Determined and Rebalanced

Set forth below is a hypothetical example of how the weighting factor is determined and rebalanced, based on the hypothetical performance of one component index.

Determining the initial weighting factor on the pricing date:

Hypothetical component index initial closing level: 1,000

Hypothetical component index initial percentage weight: 20%

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

$$\begin{aligned} \text{Initial weighting factor} &= \left(\frac{\text{initial basket value x percentage weight}}{\text{component index initial closing level}} \right) \\ \text{for component index} &= \left(\frac{\$10.00 \times 20\%}{1,000} \right) \\ &= 0.002 \end{aligned}$$

S-3

Table of Contents

The initial weighting factor of 0.002 converts the closing level of the hypothetical component index (i.e., 1,000) into its value in the basket (\$2.00) based on its initial percentage weight (20%). The initial weighting factor for each of the component indices will be determined on the pricing date in the manner described above.

Rebalancing the weighting factor on the first basket determination date:

Assume that the hypothetical component index has increased by 50% and all of the other component indices have remained unchanged.

Hypothetical component index closing level: 1,500

Hypothetical component index value in the basket = weighting factor x hypothetical component index closing level

$$= 0.002 \times 1,500$$

$$= \$3.00$$

Hypothetical basket value = \$11.00 (representing the increase in value of the hypothetical component index from \$2.00 to \$3.00, and the value of all other component indices unchanged at \$8.00)

$$\text{New weighting factor for the hypothetical component index} = \left(\frac{\text{closing level of the basket} \times \text{initial percentage weight of component index}}{\text{closing level of component index}} \right)$$

$$= \left(\frac{\$11.00 \times 20\%}{1,500} \right)$$

$$= 0.00146667$$

In the above hypothetical example, the change in the weighting factor for the component index from 0.002 initially to the new weighting factor of 0.00146667 effectively rebalances the component index to equal \$2.20, which is 20% of the then current basket value of \$11.00. The new weighting factors for each of the component indices will be determined on each basket determination date in the manner described above.

How the Maturity Payment Amount is Determined

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

The following four hypothetical examples illustrate the maturity payment amount on the notes based on a range of hypothetical basket closing values on each of the five basket determination dates. The following examples demonstrate how fluctuations in the value of the basket on different basket determination dates impacts the final average basket value and consequently the maturity payment amount on the notes.

S-4

Table of Contents

These examples are based on the initial basket value of \$10.00 and the initial offering price for each note of \$10.

Determination Date	Example 1	Example 2	Example 3	Example 4
	Basket Closing	Basket Closing	Basket Closing	Basket Closing
	Value	Value	Value	Value
First	\$ 11.00	\$ 9.00	\$ 11.00	\$ 9.00
Second	12.00	8.00	12.00	10.00
Third	13.00	7.00	13.00	8.00
Fourth	14.00	6.00	11.00	9.00
Final	15.00	7.00	9.00	11.00
Final average basket value:	13.00	7.40	11.20	9.40
Maturity payment amount:	\$ 13.30	\$ 10.00	\$ 11.32	\$ 10.00

In Example 1, the closing value of the basket increases on each basket determination date. Consequently, the final average basket value of \$13.00 is lower than the closing value of the basket of \$15.00 on the final basket determination date. At maturity, since the final average basket value is greater than the principal amount of each note, investors receive \$13.30 for each note at maturity, which is equal to the final average basket value plus 10% of the difference of the final average basket value minus the principal amount per note. The return on the notes at maturity represents a 33% increase above the initial public offering price, which is less than the simple basket return of 50% over the term of the notes.

In Example 2, the closing value of the basket decreases on each basket determination date. Even though the final average basket value of \$7.40 is higher than the closing value of the basket of \$7.00 on the final basket determination date, since the final average basket value is less than the principal amount of each note, investors receive the principal amount of \$10 for each note at maturity.

In Example 3, the closing value of the basket reaches a high of \$13.00 on the third basket determination date and declines on subsequent basket determination dates. At maturity, the final average basket value of \$11.20 is higher than the basket closing value of \$9.00 on the final basket determination date. At maturity, since the final average basket value is greater than the principal amount of each note, investors receive \$11.32 for each note, which is equal to the final average basket value plus 10% of the difference of the final average basket value minus the principal amount per note. The return on the notes at maturity represents a 13.2% increase above the initial public offering price, even though the simple basket return has declined 10% over the term of the notes.

In Example 4, the closing value of the basket declines to a low of \$8.00 on the third basket determination date and subsequently increases on the final basket determination date. At maturity, the final average basket value of \$9.40 is less than the basket closing value of \$11.00 on the final basket determination date. Because the final average basket value is less than the principal amount of each note, investors receive the principal amount of \$10 for each note at maturity. The return of only the principal amount of the notes at maturity is less than the simple basket return of 10% over the term of the notes.

Because the final average basket value is based on the closing value of the basket on the five basket determination dates during the term of the notes, it is possible for the final average basket value to be lower than the principal amount of the notes even if the value of the basket at maturity is higher than the principal amount of the notes. A decrease in the basket value on any one basket determination date could more than offset the increases in the value of the basket on other basket determination dates.

Who should or should not consider an investment in the notes?

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

We have designed the notes for investors who are willing to hold the notes to maturity, who seek to protect their investment by receiving at least 100% of the principal amount of their investment at maturity, and who also want to participate in the possible increase in the level of the basket measured over the term of the notes.

S-5

Table of Contents

The notes are not designed for, and may not be a suitable investment for, investors who are unable or unwilling to hold the notes to maturity, who require an investment that yields a regular return and who are willing to make an investment that is exposed to the full downside performance risk of the basket. The notes are not designed for, and may not be a suitable investment for investors who are unwilling to invest in an instrument that is linked, in part, to the performance of the non-U.S. Securities markets.

What will I receive if I sell the notes prior to maturity?

The market value of the notes may fluctuate between the date you purchase them and the maturity date. Several factors and their interrelationship will influence the market value of the notes, including the levels of the component indices, dividend yields of the component stocks underlying the component indices, the time remaining to the maturity date, interest rates and the volatility of the component indices. The notes are 100% principal protected only if held to maturity. If you sell your notes prior to maturity, you may have to sell them at a discount and you will not have principal protection. Depending on the impact of these factors, you may receive less than the principal amount in any sale of your notes before the maturity date and less than what you would have received had you held the notes until maturity. For more details, see Risk Factors Many factors affect the market level of the notes .

Who publishes the component indices and what do the component indices measure?

The S&P 500[®] Composite Stock Price Index (the S&P 500[®] Index) includes a representative sample of 500 leading companies in leading industries of the U.S. economy and it is published by Standard & Poor's, a division of The McGraw-Hill Companies, Inc. (Standard & Poor's or S&P). The S&P 500[®] Index is intended to provide an indication of the pattern of common stock price movement. Standard & Poor's has recently begun calculating the level of the S&P 500[®] Index using a full float-adjusted formula. By using the full float-adjusted formula, the S&P 500[®] Index reflects only those shares that are available to investors, not all of a company's outstanding shares.

The S&P MidCap 400[®] Index is a stock index calculated, published and disseminated daily by Standard & Poor's and tracks the movement of 400 companies with mid-sized market capitalizations, and is intended to thereby measure the performance of the medium capitalization segment of the U.S. equity markets. The calculation of the S&P MidCap 400[®] Index is based on the relative market value of the common stock of 400 companies as of a particular time compared to the market value of the common stock of similar companies during a base period of June 28, 1991.

The Russell 2000[®] Index is published by the Frank Russell Company and it measures the composite price performance of stocks of 2,000 companies domiciled in the United States and its territories. All 2,000 stocks are traded on the New York Stock Exchange or the American Stock Exchange, or are listed on the Nasdaq National Market, and form a part of the Russell 3000[®] Index. As a capitalization-weighted index, the Russell 2000[®] Index reflects changes in the capitalization, or market value, of its component stocks relative to the capitalization on a base date.

The MSCI EAFE[®] Index is published by Morgan Stanley Capital International Inc. (MSCI) and is a free float-adjusted market capitalization index that is designed to measure developed market equity performance in Europe, Asia, Australia and the Far East. The MSCI EAFE[®] Index currently consists of 21 developed country indexes.

The S&P 500[®] Index and the S&P MidCap 400[®] Index are determined, calculated and maintained by Standard & Poor's, and the Russell 2000[®] Index and the MSCI EAFE[®] Index are determined, calculated and maintained by Frank Russell Company and MSCI, respectively (each, a

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

component index sponsor and collectively, the component index sponsors), without regard to the notes. The component index sponsors are not involved in the offer of the notes and have no obligation to consider your interests as a holder of the notes.

S-6

Table of Contents

You should be aware that an investment in the notes does not entitle you to any ownership interest in the stocks of the companies included in the component indices. For a detailed discussion of the Index, see **The Basket** beginning on page S-18.

How have the component indices performed historically?

You can find a table with the high, low and closing levels of each component index during each calendar quarter from calendar year 2002 to the present in the section entitled **The Basket** in this prospectus supplement. We have provided this historical information to help you evaluate the behavior of the component indices in the recent past; however, past performance of the component indices is not indicative of how each component index will perform in the future.

What about taxes?

If you are a U.S. individual or taxable entity, you generally will be required to pay taxes on ordinary income from the notes over their term based on the comparable yield for the notes, even though you will not receive any payments from us until maturity. This comparable yield is determined solely to calculate the amount on which you will be taxed prior to maturity and is neither a prediction nor a guarantee of what the actual yield will be. In addition, any gain you may recognize on the sale or maturity of the notes will be taxed as ordinary interest income. If you purchase the notes at a time other than the initial issue date, the tax consequences to you may be different.

For further discussion, see **Supplemental Tax Considerations** beginning on page S-39.

Will the notes be listed on a stock exchange?

The notes will not be listed on the American Stock Exchange because the aggregate principal amount of the notes sold in this offering is below the threshold that the American Stock Exchange requires for listing on that exchange. Additionally, the notes will not be listed or displayed on any other securities exchange, the Nasdaq National Market or any electronic communications network. There can be no assurance that a liquid trading market will develop for the notes. Accordingly, if you sell your notes prior to the maturity date, you may have to sell them at a substantial loss. You should review the section entitled **Risk Factors** **There may not be an active trading market for the notes** in this prospectus supplement.

The American Stock Exchange LLC will publish the indicative basket level in relation to the notes under the symbol **EBL**. The American Stock Exchange LLC in no way sponsors, endorses or is otherwise involved in the notes and disclaims any liability to any party for any inaccuracy in the data on which the indicative basket level is based, for any mistakes, errors or omissions in the calculation and/or dissemination of the indicative basket level, or for the manner in which it is applied in relation to the notes.

Are there any risks associated with my investment?

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

Yes, an investment in the notes is subject to significant risks. We urge you to read the detailed explanation of risks in **Risk Factors** beginning on page S-8.

How to reach us

You may reach us and by calling 1-888-215-4145 or 1-212-909-0038 and asking for the Investment Solutions Group.

S-7

Table of Contents

RISK FACTORS

An investment in the notes is subject to the risks described below, as well as the risks described under Risk Factors Risks Related to Indexed Notes in the accompanying prospectus. Your notes are a riskier investment than ordinary debt securities. Also, your notes are not equivalent to investing directly in the component stocks, i.e., the common stocks underlying the component indices which comprise the basket to which your notes are linked. You should carefully consider whether the notes are suited to your particular circumstances.

The notes are intended to be held to maturity and your principal is only protected if you hold your notes to maturity

You will receive at least 100% of the principal amount of your notes if you hold your notes to maturity. If you sell your notes in the secondary market prior to maturity, you will not receive principal protection on the notes you sell, and the price at which you sell your notes may be at a substantial discount to the principal amount of the notes. You should be willing to hold your notes to maturity.

You will not receive interest payments on the notes

You will not receive any periodic interest payments on the notes and at maturity you may not receive any return in excess of the principal amount of your notes.

Your yield may be lower than the yield on a standard debt security of comparable maturity

The yield that you will receive on your notes, which could be \$0, may be less than the return you could earn on other investments. Even if your yield is positive, your yield may be less than the yield you would earn if you bought a standard senior non-callable debt security of Wachovia with the same maturity date. Your investment may not reflect the full opportunity cost to you when you take into account factors that affect the time value of money.

If the final average basket value is less than or equal to the initial basket value on the final basket determination date, the maturity payment amount with respect to your notes will be limited to the principal amount. This will be true even if the closing basket value as of some basket determination dates or as of some date or dates prior to the basket determination dates may have been positive, because the maturity payment amount will be calculated based on the arithmetic average of the closing levels of the basket based on the weighted levels of the component indices (or otherwise determined by the calculation agent, in the case of a market disruption event) on each basket determination date. You should therefore be prepared to realize no return over the principal amount of your notes at maturity.

Owning the notes is not the same as owning the common stocks underlying the component indices

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

The return on your notes will not reflect the return you would realize if you actually owned and held the common stocks underlying the component indices for a similar period because the maturity payment amount will be determined without taking into consideration the value of any dividends that may be paid on the common stocks underlying the component indices. In addition, you will not receive any dividend payments or other distributions on the common stocks underlying the component indices, and as a holder of the notes, you will not have voting rights or any other rights that holders of the common stocks underlying the component indices may have. Even if the level of the basket increases above the initial basket value during the term of the notes, the market value of the notes may not increase by the same amount. It is also possible for the level of the basket to increase while the market value of the notes declines.

There may not be an active trading market for the notes

The notes will not be listed on the American Stock Exchange because the aggregate principal amount of the notes sold in this offering is below the threshold that the American Stock Exchange requires for listing on

S-8

Table of Contents

that exchange. Additionally, the notes will not be listed or displayed on any other securities exchange, the Nasdaq National Market or any electronic communications network. There can be no assurance that a liquid trading market will develop for the notes. The development of a trading market for the notes will depend on our financial performance and other factors such as the increase, if any, in the level of the basket. Even if a secondary market for the notes develops, it may not provide significant liquidity and we expect that transaction costs in any secondary market would be high. As a result, the difference between bid and asked prices for your note in any secondary market could be substantial. If you sell your notes before maturity, you may have to do so at a discount from the initial public offering price, and, as a result, you may suffer substantial losses.

Wachovia Capital Markets, LLC and other broker-dealer affiliates of Wachovia currently intend to make a market for the notes, although they are not required to do so and may stop any market-making activities at any time. As market makers, trading of the notes may cause Wachovia Capital Markets, LLC or any other broker-dealer affiliates of Wachovia to have long or short positions of the notes in their inventory. The supply and demand for the notes, including inventory positions of market makers, may affect the secondary market for the notes.

Many factors affect the market value of the notes

The market value of the notes will be affected by factors that interrelate in complex ways. It is important for you to understand that the effect of one factor may offset the increase in the market value of the notes caused by another factor and that the effect of one factor may exacerbate the decrease in the market value of the notes caused by another factor. For example, a change in the volatility of the component indices may offset some or all of any increase in the market value of the notes attributable to another factor, such as an increase in the level of the component indices. In addition, a change in interest rates may offset other factors that would otherwise change the level of the component indices and, therefore, may change the market value of the notes. The following paragraphs describe the expected impact on the market value of the notes given a change in a specific factor, assuming all other conditions remain constant.

The level of the basket is expected to affect the market value of the notes

We expect that the market value of the notes will depend substantially on the amount, if any, by which the final average basket value exceeds or does not exceed the initial basket value. If you choose to sell your notes when the level of the basket based on then current level of the component indices, exceeds the initial basket value, you may receive substantially less than the amount that would be payable at maturity based on this level because of the expectation that the level of the basket will continue to fluctuate until the final average basket value is determined.

Changes in the volatility of the component indices are expected to affect the market value of the notes

Volatility is the term used to describe the size and frequency of price and/or market fluctuations. If the volatility of any component index increases or decreases, the market value of the notes may be adversely affected.

Changes in the levels of interest rates are expected to affect the market value of the notes

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

We expect that changes in interest rates, even if they do not affect the levels of the component indices as described above, may affect the market value of the notes and, depending upon other factors (such as the then current levels of the component indices, the magnitude of the changes in interest rates and the time remaining to the maturity of the notes), such changes may be adverse to holders of the notes.

S-9

Table of Contents

Changes in the volatility of exchange rates, and the correlation between those rates and the level of the basket are likely to affect the market value of the notes

Because the notes are payable in U.S. dollars, the volatility of the exchange rate between the U.S. dollar and each of the currencies upon which the component stocks of the MSCI EAFE® Index are denominated could affect the market value of the notes. The correlation between the level of the MSCI EAFE® Index and the U.S. dollar exchange rates for each of the currencies upon which the component stocks of the MSCI EAFE® Index are denominated refers to the relationship between the percentage changes in the level of the MSCI EAFE® Index and those exchange rates. The direction of such correlation (whether positive or negative) and the extent of such correlation could affect the value of the notes.

Changes in dividend yields of the stocks included in the component indices are expected to affect the market value of the notes

In general, if dividend yields on the stocks included in the component indices increase, we expect that the market value of the notes will decrease and, conversely, if dividend yields on these stocks decrease, we expect that the market value of the notes will increase. The return on the notes will not reflect any dividends paid on the stocks included in the component indices.

Changes in our credit ratings may affect the market value of the notes

Our credit ratings are an assessment of our ability to pay our obligations. Consequently, real or anticipated changes in our credit ratings may affect the market value of the notes. However, because the return on your notes is dependent upon factors in addition to our ability to pay our obligations under the notes, such as the percentage change in the levels of the component indices shortly prior to maturity relative to the pricing date, an improvement in our credit ratings will not reduce the other investment risks related to the notes. Further, certain factors and events may affect some component indices favorably and may affect other component indices less favorably, negatively or not at all.

In general, assuming all relevant factors are held constant, we expect that the effect on the market value of the notes of a given change in some of the factors listed above will be less if it occurs later in the term of the notes than if it occurs earlier in the term of the notes.

Changes that affect the component indices will affect the market value of the notes and the amount you will receive at maturity

Each component index sponsor is responsible for calculating and maintaining its component index. Any changes, such as additions, deletions or substitutions, to the component indices and the manner in which these changes affect the component indices or the issuers of the common stocks underlying the component indices, could affect the level of the basket and, therefore, could affect the maturity payment amount, and the market value of the notes prior to maturity.

The time remaining to maturity may affect the value of the notes

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

The value of the notes may be affected by the time remaining to maturity. As a result of a time premium, the notes may have a value above that which would be expected based on the level of interest rates and the levels or prices of the basket Components and the basket level at such time the longer the time remaining to maturity. A time premium results from expectations concerning the value of the basket during the period prior to maturity of the notes. As the time remaining to the maturity of the notes decreases, this time premium will likely decrease, adversely affecting the value of the notes.

Changes in geopolitical, economic, financial and other conditions may affect the notes underlying the component indices

In general, geopolitical conditions and economic, financial, political, regulatory or judicial events that affect the securities underlying the component indices or stock markets generally may affect the final average basket value and, therefore, the maturity payment amount.

S-10

Table of Contents

The maturity payment amount for the notes will not be adjusted for changes in exchange rates that might affect the MSCI EAFE® Index

Although many of the component stocks included in the MSCI EAFE® Index are traded in currencies other than U.S. dollars and the notes are denominated in U.S. dollars, the maturity payment amount will not be adjusted for changes in the exchange rate between the U.S. dollar and each of the currencies upon which component stocks included in the MSCI EAFE® Index are denominated. Changes in exchange rates, however, may reflect changes in various non-U.S. economies that in turn may affect the performance of the MSCI EAFE® Index and, therefore, the final average basket value and the maturity payment amount of the notes. The amount we pay in excess of the principal amount in respect of the notes on the maturity date will be based solely upon the final average basket value. See Specific Terms of the Notes Maturity Payment Amount on page S-14.

An investment in the notes is subject to risks associated with non-U.S. securities markets

The component stocks included in the MSCI Indices comprising MSCI EAFE® Index have been issued by foreign companies in 21 developed countries in Europe, Asia, Australia and the Far East. An investment in notes linked to the value of foreign equity securities involves particular risks. Foreign securities markets may be more volatile than U.S. securities markets and market developments may affect foreign markets differently from U.S. securities markets. Direct or indirect government intervention to stabilize these foreign securities markets, as well as cross shareholdings in foreign companies, may affect trading prices and volumes in those markets. Also, there is generally less publicly available information about foreign companies than there is about those U.S. companies that are subject to the reporting requirements of the U.S. Securities and Exchange Commission, and foreign companies may be subject to accounting, auditing and financial reporting standards and requirements that differ from those applicable to U.S. reporting companies. Securities prices in foreign countries are subject to political, economic, financial and social factors that may be unique to the particular country. These factors, which could negatively affect the foreign securities markets, include the possibility of recent or future changes in the foreign government's economic and fiscal policies, the possible imposition of, or changes in, currency exchange laws or other foreign laws or restrictions applicable to foreign companies or investments in foreign equity securities and the possibility of fluctuations in the rate of exchange between currencies. Moreover, certain aspects of a particular foreign economy may differ favorably or unfavorably from the U.S. economy in important respects such as growth of gross national product, rate of inflation, capital reinvestment, resources and self-sufficiency.

Wachovia and its affiliates have no affiliation with the component index sponsors and are not responsible for their public disclosure of information

Wachovia and its affiliates are not affiliated with any of the component index sponsors in any way (except for licensing arrangements discussed below under The Basket) and have no ability to control or predict any of their actions, including any errors in or discontinuation of disclosure regarding any of their methods or policies relating to the calculation of the levels of the component indices. If any component index sponsor discontinues or suspends the calculation of its component index, it may become difficult to determine the market value of the notes or the maturity payment amount. The calculation agent may designate a successor component index selected in its sole discretion. If the calculation agent determines in its sole discretion that no successor component index comparable to the affected component index exists, the amount you receive at maturity will be determined by the calculation agent in its sole discretion. See Specific Terms of the Notes Market Disruption Event on page S-17 and Specific Terms of the Notes Discontinuation of the Component Indices; Adjustments to the Component Indices on page S-16. The component index sponsors are not involved in the offer of the notes in any way and have no obligation to consider your interest as an owner of notes in taking any actions that might affect the value of your notes.

We have derived the information about the component index sponsors and the component indices in this prospectus supplement from publicly available information, without independent verification. Neither we nor any of our affiliates assumes any responsibility for the adequacy or accuracy of the information about the

Table of Contents

component index sponsors and the component indices contained in this prospectus supplement. You, as an investor in the notes, should make your own investigation into the component index sponsors and the component indices.

Historical levels of the component indices should not be taken as an indication of the future levels of the component indices during the term of the notes

The trading prices of the stocks underlying the component indices will determine the levels of the component indices at any given time. The stocks underlying the component indices have performed differently in the past and are expected to perform differently in the future. As a result, it is impossible to predict whether the levels of the component indices will rise or fall. Trading prices of the stocks underlying the component indices will be influenced by complex and interrelated political, economic, financial and other factors that can affect the issuers of the stocks underlying the component indices.

The basket is not a recognized market index and may not accurately reflect global market performance

The basket is not a recognized market index. The basket was created solely for purposes of the offering of the notes and will be calculated solely during the term of the notes. The basket does not reflect the performance of all major securities markets, and may not reflect actual global market performance.

Purchases and sales by us and our affiliates may affect the return on the notes

As described below under "Use of Proceeds and Hedging" on page S-42, we or one or more of our affiliates may hedge our obligations under the notes by purchasing stocks underlying the component indices, futures or options on the component indices or stocks underlying the component indices, or exchange-traded funds or other derivative instruments with returns linked or related to changes in the trading prices of stocks underlying the component indices or the levels of the component indices, and we may adjust these hedges by, among other things, purchasing or selling stocks underlying the component indices, futures, options, or exchange-traded funds or other derivative instruments with returns linked to the component indices or the stocks underlying the component indices at any time.

Although they are not expected to, any of these hedging activities may adversely affect the trading prices of stocks underlying the component indices and/or the levels of the component indices and, therefore, the market value of the notes. It is possible that we or one or more of our affiliates could receive substantial returns from these hedging activities while the market value of the notes declines.

The inclusion of commissions and projected profits from hedging in the original issue price is likely to adversely affect secondary market prices.

Assuming no change in market conditions or any other relevant factors, the price, if any, at which Wachovia is willing to purchase the notes in secondary market transactions will likely be lower than the initial public offering price, since the initial public offering price included, and secondary market prices are likely to exclude, commissions paid with respect to the notes, as well as the projected profit included in the cost of

hedging our obligations under the notes. In addition, any such prices may differ from values determined by pricing models used by Wachovia, as a result of dealer discounts, mark-ups or other transactions.

The calculation agent may postpone the determination of the final average basket value and the maturity date if a market disruption event occurs on any of the basket determination dates

The determination of the final average basket value may be postponed if the calculation agent determines that a market disruption event has occurred or is continuing on any basket determination date with respect to one or more of the component indices. If a postponement occurs, the calculation agent will use the closing level of the basket on the next succeeding scheduled trading day on which no market disruption event occurs or is continuing as the final average basket value and for calculation of the final average basket value. As a result, the maturity date for the notes would be postponed. You will not be entitled to

Table of Contents

compensation from us or the calculation agent for any loss suffered as a result of the occurrence of a market disruption event, any resulting delay in payment or any change in the level of the basket after each basket determination date. See **Specific Terms of the Notes** **Market Disruption Event** beginning on page S-17.

Potential conflicts of interest could arise

Our subsidiary, WBNA, is our agent for the purposes of calculating the final average basket value and the maturity payment amount. Under certain circumstances, WBNA's role as our subsidiary and its responsibilities as calculation agent for the notes could give rise to conflicts of interest. These conflicts could occur, for instance, in connection with its determination as to whether the level of the basket can be calculated on a particular scheduled trading day, or in connection with judgments that it would be required to make in the event of a discontinuance of any component index. See the sections entitled **Specific Terms of the Notes** **Discontinuance of the Component Indices**; **Adjustments to the Component Indices** on page S-16 and **Specific Terms of the Notes** **Market Disruption Event** on page S-17. WBNA is required to carry out its duties as calculation agent in good faith and using its reasonable judgment.

Wachovia or its affiliates may presently or from time to time engage in business with one or more of the issuers of component stocks included in the component indices. This business may include extending loans to, or making equity investments in, such companies or providing advisory services to such companies, including merger and acquisition advisory services. In the course of business, Wachovia or its affiliates may acquire non-public information relating to these companies and, in addition, one or more affiliates of Wachovia may publish research reports about these companies. Wachovia does not make any representation to any purchasers of the notes regarding any matters whatsoever relating to the issuers of component stocks included in the component indices. Any prospective purchaser of the notes should undertake an independent investigation of these companies as in its judgment is appropriate to make an informed decision regarding an investment in the notes. The composition of the issuers of component stock included in the component indices does not reflect any investment or sell recommendations of Wachovia or its affiliates.

U.S. taxpayers will be required to pay taxes on the notes each year

If you are a U.S. person, you generally will be required to pay taxes on ordinary income from the notes over their term based upon the comparable yield for the notes, even though you will not receive any payments from us until maturity. The comparable yield is determined solely to calculate the amounts you will be taxed on prior to maturity and is neither a prediction nor a guarantee of what the actual yield will be. In addition, any gain you may recognize upon the sale or maturity of the notes will be taxed as ordinary income. Any loss you may recognize upon the sale of the notes will be ordinary loss to the extent of interest you included as income in the current or previous taxable years in respect of the notes, and thereafter, capital loss. If you hold your notes until maturity and the maturity payment is less than the projected payment at maturity, the difference will first reduce interest that would otherwise accrue in respect of the notes in such taxable year, and any remainder thereafter will be ordinary loss to the extent you previously accrued interest income in respect of the notes. If you purchase the notes at a time other than the initial issue date, the tax consequences may be different. You should consult your tax advisor about your own tax situation.

For further information, see **Supplemental Tax Considerations** on page S-39.

Certain considerations for insurance companies and employee benefit plans

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

A fiduciary of a pension plan or other employee benefit plan that is subject to the prohibited transaction rules of the Employee Retirement Income Security Act of 1974, as amended, which we call "ERISA", or the Internal Revenue Code of 1986, as amended, and that is considering purchasing the notes with the assets of such a plan, should consult with its counsel regarding whether the purchase or holding of the notes could become a prohibited transaction under ERISA, the Internal Revenue Code or any substantially similar prohibition. These prohibitions are discussed in further detail under "Employee Retirement Income Security Act" on page S-40.

S-13

Table of Contents

SPECIFIC TERMS OF THE NOTES

*Please note that in this section entitled **Specific Terms of the Notes**, references to **holders** mean those who own notes registered in their own names, on the books that we or the trustee maintain for this purpose, and not indirect holders who own beneficial interests in notes registered in street name or in notes issued in book-entry form through The Depository Trust Company. Please review the special considerations that apply to indirect holders in the accompanying prospectus, under **Legal Ownership**.*

The notes are part of a series of debt securities, entitled **Medium-Term Notes, Series G**, that we may issue under the indenture from time to time as described in the accompanying prospectus. The notes are also **Indexed Notes** and **Senior Notes**, each as described in the accompanying prospectus.

This prospectus supplement summarizes specific financial and other terms that apply to the notes. Terms that apply generally to all **Medium-Term Notes, Series G**, are described in **Description of the Notes We May Offer** in the accompanying prospectus. The terms described here supplement those described in the accompanying prospectus and, if the terms described there are inconsistent with those described here, the terms described here are controlling.

We describe the terms of the notes in more detail below.

No Interest

While at maturity a beneficial owner of a note will receive a cash payment equal to the maturity payment amount, there will be no other payment of interest, periodic or otherwise.

Denominations

Wachovia will issue the notes in principal amount of \$10 per note and integral multiples thereof.

Maturity Payment Amount

At maturity, for each note you own, you will receive a cash payment equal to the principal amount of the note or, if the final average basket value is greater than the principal amount per note, the final average basket value, described below, plus 10% of the difference of the final average basket value minus the principal amount per note. The **initial basket value** is \$10.00. *If the final average basket value is less than or equal to the initial basket value, the maturity payment amount will be \$10.*

Determination of the final average basket value

The initial basket value is \$10.00.

The final average basket value will be determined by the calculation agent on the final basket determination date and will equal the arithmetic average of closing levels of the basket on each basket determination date. The closing level of the basket on each basket determination date will be calculated based on the weighted levels of the component indices on that basket determination date, and will equal the sum of the products of (i) the weighting factor of each component index (as shown below) in effect on that basket determination date and (ii) the closing level of the respective component index on that basket determination date. If the final basket determination date is not a scheduled trading day or if there is a market disruption event with respect to any component index on such day, the final basket determination date for such component index will be the immediately succeeding scheduled trading day that is not a disrupted day. *If the final basket determination date is postponed, then the maturity date of the notes will be postponed by an equal number of scheduled trading days.*

Component Index	Initial Weighting Factor	Closing Level on Pricing Date	Initial Percentage Weight	Initial U.S. Dollar Weight
S&P 500 [®] Composite Stock Price Index	.002779167	\$3.50	35.00%	\$ 3.50
S&P MidCap 400 [®] Index	.002686222	\$2.00	20.00%	\$ 2.00
Russell 2000 [®] Index	.002903727	\$2.00	20.00%	\$ 2.00
MSCI EAFE [®] Index	.001522673	\$2.50	25.00%	\$ 2.50
<i>Total</i>			<i>100.00%</i>	<i>\$ 10.00</i>

S-14

Table of Contents

Determination and Rebalancing of the Weighting Factor

The weighting factor is the number used to convert the closing level of a component index into its value in the basket based on its initial percentage weight.

The initial weighting factor for each component index equals (i) the initial basket value of \$10.00 multiplied by the initial percentage weight for that component index, divided by (ii) closing level of that component index on December 9, 2005.

Immediately following the valuation of the basket on each basket determination date, the basket will be rebalanced such that each component index will represent its initial weight in the basket. To rebalance the basket, the calculation agent will adjust the weighting factor for each component index on each basket determination date in the manner described below, and the new weighting factor will remain in effect through, and will be used for determining the value of the component index in the basket on, the next basket determination date. The new weighting factor for each component index determined on each basket determination date will equal (i) the closing level of the basket on such basket determination date multiplied by the initial percentage weight of that component index, divided by (ii) the closing level of that component index on such basket determination date.

The basket determination date means the first calendar day of each December beginning in December 1, 2006, through December 1, 2009, and the fifth scheduled trading day prior to maturity date, expected to be November 29, 2010, which we refer to as the final basket determination date. If any of the first four scheduled determination dates is not a scheduled trading day or if a market disruption event occurs on any such date with respect to a component index, the basket determination date with respect to that component index only will be postponed to the immediately succeeding scheduled trading day on which no market disruption event has occurred or is continuing, provided that, with respect to any component index, if a market disruption event has occurred or is continuing on each of the five scheduled trading days immediately succeeding any of the first four scheduled basket determination dates, the calculation agent will determine the applicable closing level for the disrupted component index on such fifth succeeding trading day in accordance with the formula for calculating the value of the applicable component index last in effect prior to the commencement of the market disruption event, without rebalancing or substitution, using the closing price (or, if trading in the relevant securities has been materially suspended or materially limited, its good faith estimate of the closing price that would have prevailed but for such suspension or limitation) on such fifth succeeding scheduled trading day of each security most recently comprising the applicable component index.

If the final basket determination date is not a scheduled trading day or if there is a market disruption event with respect to any component index on such day, the final basket determination date for such component index will be the immediately succeeding scheduled trading day that is not a disrupted day. *If the final basket determination date is postponed, then the maturity date of the notes will be postponed by an equal number of scheduled trading days.*

A scheduled trading day means any day on which each exchange and related exchange is scheduled to be open for its respective regular trading sessions.

A disrupted day means any scheduled trading day on which a relevant exchange or related exchange fails to open for trading during its regular trading session or on which a market disruption event has occurred.

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

If any payment is due on the notes on a day which is not a day on which commercial banks settle payments in The City of New York, then such payment may then be made on the next succeeding day that is a day on which commercial banks settle payments in The City of New York, in the same amount and with the same effect as if paid on the initial due date.

WBNA, our subsidiary, will serve as the calculation agent. All determinations made by the calculation agent shall be at the sole discretion of the calculation agent and, absent a determination of a manifest error,

S-15

Table of Contents

shall be conclusive for all purposes and binding on Wachovia and the holders and beneficial owners of the notes. Wachovia may at any time change the calculation agent without notice to holders of notes.

Discontinuation of the Component Indices; Adjustments to the Component Indices

If any component index sponsor discontinues publication of its component index and that component index sponsor or another entity publishes a successor or substitute component index that the calculation agent determines, in its sole discretion, to be comparable to the affected component index (a successor component index), then, upon the calculation agent's notification of any determination to the trustee and Wachovia, the calculation agent will substitute the successor component index as calculated by that component index sponsor or any other entity for the affected component index and calculate the maturity payment amount as described above under Maturity Payment Amount. Upon any selection by the calculation agent of a successor component index, Wachovia shall cause notice to be given to holders of the notes.

If any component index sponsor discontinues publication of its component index and:

the calculation agent does not select a successor component index, or

the successor component index is no longer published on any of the relevant scheduled trading days,

the calculation agent will compute a substitute level for the affected component index in accordance with the procedures last used to calculate the level of the affected component index before any discontinuation but using only those securities that comprised the affected component index prior to such discontinuation. If a successor component index is selected or the calculation agent calculates a level as a substitute for the affected component index as described below, the successor component index will be used as a substitute for the affected component index for all purposes going forward, including for purposes of determining whether a market disruption event exists, even if the component index sponsor elects to begin republishing the component index, unless the calculation agent in its sole discretion decides to use the republished component index.

If any component index sponsor discontinues publication of its component index and the calculation agent determines that no successor component index is available at that time, then on each scheduled trading day until the earlier to occur of:

the determination of the maturity payment amount, or

a determination by the calculation agent that a successor component index is available,

the calculation agent will determine the level that would be used in computing the maturity payment amount as described in the preceding paragraph as if that day were a scheduled trading day. The calculation agent will cause notice of each level to be published not less often than once each month in *The Wall Street Journal* or another newspaper of general circulation, and arrange for information with respect to these levels to be made available by telephone.

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

Notwithstanding these alternative arrangements, discontinuation of the publication of a component index would be expected to adversely affect the market value of, liquidity of and trading in the notes.

If at any time the method of calculating the level of any component index or the level of any successor component index changes in any material respect, or if the component index or successor component index is in any other way modified so that the component index or successor component index does not, in the opinion of the calculation agent, fairly represent the level of the component index had those changes or modifications not been made, then, from and after that time, the calculation agent shall, at the close of business in The City of New York, New York, on each date that the closing level of the component index is to

S-16

Table of Contents

be calculated, make any adjustments as, in the good faith judgment of the calculation agent, may be necessary in order to arrive at a calculation of a level of a stock index comparable to the component index or such successor component index, as the case may be, as if those changes or modifications had not been made, and calculate the closing level with reference to the component index or such successor component index, as so adjusted. Accordingly, if the method of calculating the component index or a successor component index is modified and has a diluting or concentrative effect on the level of the component index or successor component index, e.g., due to a split, then the calculation agent shall adjust the component index or successor component index in order to arrive at a level of the component index or successor component index as if it had not been modified, e.g., as if a split had not occurred.

Neither the calculation agent nor Wachovia will have any responsibility for good faith errors or omissions in calculating or disseminating information regarding any component index or any successor component index or as to modifications, adjustments or calculations by any component index sponsor or any successor component index sponsor in order to arrive at the level of the component index or any successor component index.

Market Disruption Event

A market disruption event with respect to any component index, as determined by the calculation agent in its sole discretion, means a relevant exchange or any related exchange fails to open for trading during its regular trading session or the occurrence or existence of any of the following events:

a trading disruption, if the calculation agent determines it is material, at any time during the one-hour period that ends at the close of trading for a relevant exchange or related exchange; or

an exchange disruption, if the calculation agent determines it is material, at any time during the one-hour period that ends at the close of trading for a relevant exchange or related exchange; or

an early closure.

For the purposes of determining whether a market disruption event with respect to any component index exists at any time, if a market disruption event occurs in respect of a security included in a component index at any time, then the relevant percentage contribution of that security to the level of that component index shall be based on a comparison of (i) the portion of the level of that component index attributable to that security and (ii) the overall level of that component index, in each case immediately before the occurrence of the market disruption event.

The following events will not be market disruption events:

a limitation on the hours or number of days of trading, but only if the limitation results from an announced change in the regular business hours of the relevant market; or

a decision to permanently discontinue trading in the option or futures contracts relating to a component index or any of the component stocks included in a component index.

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

A trading disruption means any suspension of or limitation imposed on trading by the relevant exchange or related exchange or otherwise, whether by reason of movements in price exceeding limits permitted by the relevant exchange or related exchange or otherwise, (i) relating to securities that comprise 20 percent or more of the level of any component index or (ii) in options contracts or futures contracts relating to any component index on any relevant related exchange.

An exchange disruption means any event (other than a scheduled early closure) that disrupts or impairs (as determined by the calculation agent in its sole discretion) the ability of market participants in general to (i) effect transactions in or obtain market values on any relevant exchange or related exchange in securities that comprise 20 percent or more of the level of any component index or (ii) effect transactions in options contracts or futures contracts relating to any component index on any relevant related exchange.

S-17

Table of Contents

An **early closure** means the closure on any exchange business day of any relevant exchange relating to securities that comprise 20 percent or more of the level of any component index or any related exchange prior to its normally scheduled closing time unless such earlier closing time is announced by such exchange or related exchange at least one-hour prior to the earlier of (i) the actual closing time for the regular trading session on such exchange or related exchange on such exchange business day and (ii) the submission deadline for orders to be entered into the relevant exchange system for execution at the close of trading on such exchange business day.

An **exchange** means the primary organized exchange or quotation system for trading any securities included in any component index and any successor to any such exchange or quotation system or any substitute exchange or quotation system to which trading in any securities underlying any component index has temporarily relocated (provided that the calculation agent has determined that there is comparable liquidity relative to the securities underlying any component index on such substitute exchange or quotation system as on the initial exchange).

An **exchange business day** means any scheduled trading day on which each exchange and related exchange is open for business during its regular trading session, notwithstanding any such exchange or related exchange closing prior to its scheduled weekday closing time, without regard to after hours or other trading outside its regular trading session hours.

A **related exchange** means each exchange or quotation system on which futures or options contracts relating to any component index are traded, any successor to such exchange or quotation system or any substitute exchange or quotation system to which trading in the futures or options contracts relating to that component index has temporarily relocated (provided that the calculation agent has determined that there is comparable liquidity relative to the futures or options contracts relating to that component index on such temporary substitute exchange or quotation system as on the initial related exchange).

Events of Default and Acceleration

In case an event of default with respect to any notes has occurred and is continuing, the amount payable to a beneficial owner of a note upon any acceleration permitted by the notes, with respect to the principal amount of each note will be equal to the maturity payment amount, calculated as though the date of early repayment were the maturity date of the notes. If a bankruptcy proceeding is commenced in respect of Wachovia, the claim of the beneficial owner of a note may be limited, under Section 502(b)(2) of Title 11 of the United States Code, to the principal amount of the note plus an additional amount of contingent interest calculated as though the date of the commencement of the proceeding were the maturity date of the notes.

In case of default in payment of the notes, whether at their maturity or upon acceleration, the notes will not bear a default interest rate.

THE BASKET

The basket is an unequally weighted basket of indices consisting of the S&P 500[®] Index (Bloomberg symbol **SPX**), the S&P MidCap 400 Index (Bloomberg symbol **MID**), the Russell 2000 Index (Bloomberg symbol **RTY**) and the MSCI EAFE Index (Bloomberg symbol **EAFE**).

The S&P 500® Index

We have obtained all information regarding the S&P 500® Index contained in this prospectus supplement, including its make-up, method of calculation and changes in its components, from publicly available information. That information reflects the policies of, and is subject to change by, Standard & Poor's. Standard & Poor's has no obligation to continue to publish, and may discontinue publication of, the S&P 500 Index. We do not assume any responsibility for the accuracy or completeness of such information.

S-18

Table of Contents

The S&P 500[®] Index is determined, comprised and calculated by Standard & Poor's without regard to the notes. The S&P 500[®] Index is intended to provide an indication of the pattern of common stock price movement. Beginning on March 18, 2005, Standard & Poor's shifted from a market capitalization-weighted formula to a half float-adjusted formula, and as of September 16, 2005, Standard & Poor's shifted to a full float-adjusted formula, as described in further detail below. With a float-adjusted index, the share counts used in calculating the S&P 500[®] Index reflect only those shares of a company that are available to investors, not all of a company's outstanding shares. Float adjustment excludes shares that are closely held by other publicly traded companies, control groups or government agencies. Moreover, treasury stock, stock options, restricted shares, equity participation units, warrants, preferred stock, convertible stock, and rights are not part of the float.

As of September 30, 2005, 427 companies or 85.9% of the S&P 500[®] Index traded on the New York Stock Exchange; 72 companies or 14.0% of the S&P 500[®] Index traded on The Nasdaq Stock Market; and 1 company or 0.1% of the S&P 500[®] Index traded on the American Stock Exchange. As of September 30, 2005, the aggregate market value of the 500 companies included in the S&P 500[®] Index represented approximately 73% of the aggregate market value of stocks included in the Standard & Poor's Stock Guide Database of domestic common stocks traded in the United States, excluding American depository receipts and shares of real estate investment trusts, limited partnerships and mutual funds. Standard & Poor's chooses companies for inclusion in the S&P 500[®] Index with the aim of achieving a distribution by broad industry groupings that approximates the distribution of these groupings in the common stock population of the New York Stock Exchange, which Standard & Poor's uses as an assumed model for the composition of the total market. Relevant criteria employed by Standard & Poor's include the viability of the particular company, the extent to which that company represents the industry group to which it is assigned, the extent to which the market price of that company's common stock is generally responsive to changes in the affairs of the respective industry and the market value and trading activity of the common stock of that company. Ten main groups of companies comprise the S&P 500[®] Index with the number of companies as of September 30, 2005 included in each group indicated in parentheses: consumer discretionary (88), consumer staples (37), energy (29), financials (84), health care (56), industrials (53), information technology (78), materials (32), telecommunication services (9) and utilities (33). Standard & Poor's may from time to time, in its sole discretion, add companies to, or delete companies from, the S&P 500[®] Index to achieve the objectives stated above.

The level of the S&P 500[®] Index at any time does not reflect the payment of dividends on the component stocks included in the S&P 500[®] Index. Because of this factor, the return on the notes will not be the same as the return you would receive if you were to purchase these component stocks and hold them for a period equal to the term of the offered notes.

Selection of Component Stocks Included in the S&P 500[®] Index

The S&P 500[®] Index is maintained by the S&P Index Committee, whose members include Standard and Poor's economists and index analysts. The Committee establishes Index Committee Policy used to maintain the indices in an independent and objective manner.

The S&P Index Committee follows a set of published guidelines for maintaining the index:

(i) Criteria for inclusion

U.S. Companies. To determine what is a U.S. Company, the Index Committee looks at a number of factors, including location of the company's operations, its corporate structure, accounting standards and exchange listings.

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

Adequate liquidity and reasonable per-share price. The ratio of annual dollar value traded to the market capitalization should be 0.3 or greater. Very low stock prices can affect a stock's liquidity.

S-19

Table of Contents

Market capitalization of \$4 billion or more which amount is reviewed from time to time to assure consistency with market conditions.

Financial viability, usually measured as four consecutive quarters of positive as-reported earnings. As-reported earnings are GAAP Net Income excluding discontinued operations and extraordinary items.

Public float of at least 50% of the stock.

Maintaining sector representation. The Index Committee strives to maintain a balance for the S&P 500[®] Index in line with the sector balance of the universe of eligible companies between the market cap range.

Initial Public Offerings (IPO s) should be seasoned for 6 to 12 months before being considered for addition to indices.

Operating Company and not a closed-end fund, holding company, partnership, investment vehicle or royalty trust. Real Investment Trusts are eligible for inclusion.

(ii) Criteria for exclusion

Companies involved in mergers, being acquired or significantly restructured such that they no longer meet the inclusion criteria.

Companies which substantially violate one or more of the addition criteria. Standard & Poor s believes turnover in index membership should be avoided when possible. The addition criteria are for addition to an index, not for continued membership. As a result, a company in an index that appears to violate the criteria for addition to that index will not be deleted unless ongoing conditions warrant an index change. When a company is removed from an index, Standard & Poor s will explain the basis for the removal.

Computation of the S&P 500[®] Index

Standard & Poor s currently uses a full float-adjusted formula to compute the S&P 500[®] Index as of a particular time. Specifically, the float-adjusted S&P 500[®] Index is equal to the quotient of (i) the sum of the products of (x) the price of each component stock, (y) the total shares outstanding of each component stock and (z) the investable weight factor and (ii) the index divisor. The investable weight factor equals the quotient of the available float shares of a component stock and the total shares outstanding of that component stock. In turn, the available float shares equals the total shares outstanding less shares that are closely held by other publicly traded companies, control groups or government agencies, where the shares held by the individuals in those aforementioned groups exceeds 10% of the outstanding shares. No assurance can be given that Standard & Poor s will not modify or change this methodology in a manner that may affect the payment amount for the notes upon maturity or otherwise.

To prevent the level of the S&P 500[®] Index from changing due to corporate actions, all corporate actions which affect the total market value of the S&P 500[®] Index, which is defined as the sum of the products of the market price for each component stock and the number of outstanding shares of that component stock, require an adjustment to the index divisor. All index divisor adjustments are made after the closing of trading and after the calculation of the closing level of S&P 500[®] Index. Some corporate actions, like stock splits and stock dividends, require simple changes in the common shares outstanding and the stock prices of the companies in the S&P 500[®] Index and do not require adjustments to the index divisor.

Table of Contents

The table below summarizes the types of corporate actions that require maintenance adjustments and indicates whether an adjustment to the index divisor is necessary.

Type of Corporate Action	Adjustment Factor	Divisor Adjustment Required
Stock Split (e.g., 2-for-1)	shares outstanding multiplied by 2; stock price divided by 2	No
Share Issuance (i.e., change = 5%)	shares outstanding plus newly issued shares	Yes
Share Repurchase (i.e., change = 5%)	shares outstanding minus repurchased shares	Yes
Special Cash Dividends	share price minus special dividend	Yes
Company Change	add new company market value minus old company market value	Yes
Rights Offering	price of parent company minus price of rights $\left(\frac{\quad}{\text{right ratio}} \right)$	Yes
Spinoffs	price of parent company minus price of spinoff Co. $\left(\frac{\quad}{\text{share exchange ratio}} \right)$	Yes

The S&P MidCap 400® Index

We have obtained all information regarding the S&P MidCap 400® Index contained in this prospectus supplement, including its make-up, method of calculation, and changes in its component stocks, from publicly available information. That information reflects the policies of, and is subject to change by, Standard & Poor's. Standard & Poor's has no obligation to continue to publish, and may discontinue publication of, the S&P MidCap 400® Index. We do not assume any responsibility for the accuracy or completeness of any such information.

The S&P MidCap 400® Index is intended to provide a benchmark for performance measurement of the medium capitalization segment of the United States equity markets. It tracks the stock price movement of 400 companies with mid-sized market capitalizations, primarily ranging from \$1 billion to \$4 billion. The calculation of the value of the S&P MidCap 400® Index is based on the relative market value of the common stocks of 400 companies (the component stocks) as of a particular time as compared to the market value of the common stocks of 400 similar companies during the base period of June 28, 1991. Standard & Poor's chooses companies for inclusion in the S&P MidCap 400® Index with an aim of achieving a distribution by broad industry groupings that approximates the distribution of these groupings in the common stock population of the medium capitalization segment of the United States equity market. Standard & Poor's may from time to time, in its sole discretion, add companies to, or delete companies from, the S&P MidCap 400® Index to achieve the objectives stated above. Relevant criteria employed by Standard & Poor's include U.S. company status, a market cap range between \$1 billion and \$4 billion, financial viability, adequate liability and reasonable price, a public float of at least 40%, sector representation, and status as an operating company.

As of September 30, 2005, the component stocks had an aggregate market capitalization of approximately \$1,077 billion. As of September 30, 2005, 281 companies or 73.4% of the S&P MidCap 400® Index companies traded on the New York Stock Exchange, 117 companies or 25.7% of the S&P MidCap 400® Index companies traded on The Nasdaq Stock Market, and 2 companies or 0.9% of the S&P MidCap 400® Index

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

companies traded on the American Stock Exchange. As of August 31, 2005, ten main groups of companies comprise the S&P MidCap 400® Index with the number of companies currently included in each

S-21

Table of Contents

group indicated in parentheses: consumer discretionary (76), consumer staples (13), energy (21), financials (62), health care (40), industrials (57), information technology (76), materials (24), telecommunications services (2), and utilities (29).

Selection of Component Stocks Included in the S&P MidCap 400® Index

The S&P MidCap 400® Index is maintained by the S&P Index Committee, whose members include Standard and Poor's economists and index analysts. The Committee establishes Index Committee Policy used to maintain the indices in an independent and objective manner.

The S&P Index Committee follows a set of published guidelines for maintaining the index:

(i) Criteria for inclusion

U.S. Companies. To determine what is a U.S. Company, the Index Committee looks at a number of factors, including location of the company's operations, its corporate structure, accounting standards and exchange listings.

Adequate liquidity and reasonable per-share price. The ratio of annual dollar value traded to the market capitalization should be 0.3 or greater. Very low stock prices can affect a stock's liquidity.

Market capitalization range between \$1 billion and \$4 billion, which amount is reviewed from time to time to assure consistency with market conditions.

Financial viability, usually measured as four consecutive quarters of positive as-reported earnings. As-reported earnings are GAAP Net Income excluding discontinued operations and extraordinary items.

Public float of at least 50% of the stock.

Maintaining sector representation. The Index Committee strives to maintain a balance for the S&P MidCap 400® Index in line with the sector balance of the universe of eligible companies between the market cap ranges, \$1 billion and \$4 billion.

Initial Public Offerings (IPOs) should be seasoned for 6 to 12 months before being considered for addition to indices.

Operating Company and not a closed-end fund, holding company, partnership, investment vehicle or royalty trust. Real Investment Trusts are eligible for inclusion.

(ii) Criteria for exclusion

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

Companies involved in mergers, being acquired or significantly restructured such that they no longer meet the inclusion criteria.

Companies which substantially violate one or more of the addition criteria. Standard & Poor's believes turnover in index membership should be avoided when possible. The addition criteria are for addition to an index, not for continued membership. As a result, a company in an index that appears to violate the criteria for addition to that index will not be deleted unless ongoing conditions warrant an index change. When a company is removed from an index, Standard & Poor's will explain the basis for the removal.

Computation of the S&P MidCap 400® Index

The S&P MidCap 400® Index is calculated using a base-weighted aggregate methodology; that is, the level of the S&P MidCap 400® Index reflects the total market value of all 400 component stocks relative to the base period of June 28, 1991. An indexed number is used to represent the results of this calculation in order to make the value easier to work with and track over time.

S-22

Table of Contents

The actual total market value of the component stocks during the base period has been set to equal an indexed value of 100. This is often indicated by the notation June 28, 1991=100. In practice, the daily calculation of the S&P MidCap 400[®] Index is computed by dividing the total market value of the component stocks by the index divisor. By itself, the index divisor is an arbitrary number. However, in the context of the calculation of the S&P MidCap 400[®] Index, it serves as a link to the initial base period value of the S&P MidCap 400[®] Index. The index divisor keeps the S&P MidCap 400[®] Index comparable over time and is the manipulation point for all adjustments to the S&P MidCap 400[®] Index, which is index maintenance. Maintenance of the S&P MidCap 400[®] Index includes monitoring and completing the adjustments for company additions and deletions, share changes, stock splits, stock dividends, and stock price adjustments due to company restructurings or spinoffs.

In March 2005, Standard & Poor's shifted the S&P MidCap 400[®] Index from a market capitalization weighted formula to a half float-adjusted formula, before moving the S&P MidCap 400[®] Index to a full float-adjusted formula on September 16, 2005. Standard & Poor's criteria for selecting stocks for the S&P MidCap 400[®] Index did not change by the shift to float adjustment. However, the adjustment affects each company's weight in the S&P MidCap 400[®] Index.

For a further discussion on float adjustment see above [Computation of the S&P 500 Index](#).

The level of the S&P MidCap 400[®] Index at any time does not reflect the payment of dividends on the component stocks included in the S&P MidCap 400[®] Index. Because of this factor, the return on the notes will not be the same as the return you would receive if you were to purchase these component stocks and hold them for a period equal to the term of the offered notes.

The Russell 2000[®] Index

We have obtained all information regarding the Russell 2000[®] Index contained in this prospectus supplement, including its make-up, method of calculation and changes in its components, from publicly available information. That information reflects the policies of, and is subject to change by, Frank Russell Company. Frank Russell Company has no obligation to continue to publish, and may discontinue publication of the Russell 2000[®] Index at any time. We make no representation or warranty as to the accuracy or completeness of such information.

The Russell 2000[®] Index is calculated, published and disseminated by Frank Russell Company, and measures the composite price performance of stocks of 2,000 companies domiciled in the United States and its territories. All of the component stocks of the Russell 2000[®] Index are traded on either the New York Stock Exchange or the American Stock Exchange or in the over-the-counter (OTC) market and are the 2,000 smallest securities that form the Russell 3000[®] Index, representing approximately 8.0% of the total market capitalization of the Russell 3000[®] Index. The Russell 3000[®] Index is composed of the 3,000 largest U.S. companies as determined by market capitalization and represents approximately 98% of the U.S. equity market.

The Russell 2000[®] Index is designed to track the performance of the small capitalization segment of the U.S. equity market.

Selection of Component Stocks Included in the Russell 2000[®] Index

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

As described above, the Russell 2000® Index is a sub-group of the Russell 3000® Index. To be eligible for inclusion in the Russell 3000® Index, and, consequently, the Russell 2000® Index, a company's stock must be listed on May 31 of a given year and Frank Russell Company must have access to documentation verifying the company's eligibility for inclusion. Only common stocks belonging to corporations domiciled in the United States and its territories are eligible for inclusion in the Russell 3000® Index and, consequently, the

S-23

Table of Contents

Russell 2000[®] Index. The following securities are specifically excluded from the Russell 2000[®] Index: (i) stocks traded on U.S. exchanges of companies that are domiciled in other countries; (ii) preferred and convertible preferred stock, redeemable shares, participating preferred stock, warrants and rights; and (iii) trust receipts, royalty trusts, limited liability companies, OTC Bulletin Board companies, pink sheets, closed-end mutual funds and limited partnerships that are traded on U.S. exchanges. In addition, stock of Berkshire Hathaway is excluded as a special exception.

The primary criteria used to determine the initial list of securities eligible for the Russell 3000[®] Index is total market capitalization, which is defined as the price of the shares times the total number of available shares. All common stock share classes are combined in determining market capitalization. If multiple share classes have been combined, the price of the primary vehicle (usually the most liquid) is used in the calculations. In cases where the common stock share classes act independently of each other (e.g., tracking stocks), each class is considered for inclusion separately. Stocks must trade at or above \$1.00 on May 31 of each year to be eligible for inclusion in the Russell 2000[®] Index. However, if a stock falls below \$1.00 intra-year, it will not be removed until the next reconstitution of the Index if it is still trading below \$1.00.

The Russell 2000[®] Index is reconstituted annually to reflect changes in the marketplace. The list of companies is ranked based on May 31 total market capitalization, with the actual reconstitution effective on the first trading day following the final Friday of June each year. Changes in the constituents are preannounced and subject to change if any corporate activity occurs or if any new information is received prior to release.

The level of the Russell 2000[®] Index at any time does not reflect the payment of dividends on the component stocks included in the Russell 2000[®] Index. Because of this factor, the return on the notes will not be the same as the return you would receive if you were to purchase these component stocks and hold them for a period equal to the term of the offered notes.

Computation of the Russell 2000[®] Index

As a capitalization-weighted index, the Russell 2000[®] Index reflects changes in the capitalization, or market value, of its component stocks relative to their capitalization on a base date. The current Russell 2000[®] Index value is calculated by adding the market values of the Russell 2000[®] Index's component stocks, which are derived by multiplying the price of each stock by the number of available shares, to arrive at the total market capitalization of the 2,000 stocks. The total market capitalization is then divided by a divisor, which represents the adjusted capitalization of the Russell 2000[®] Index on the base date of December 31, 1986. To calculate the Russell 2000[®] Index, last sale prices will be used for exchange-traded and Nasdaq National Market stocks. If a component stock is not open for trading, the most recently traded price for that security will be used in calculating the Russell 2000[®] Index. In order to provide continuity for the Russell 2000[®] Index's value, the divisor is adjusted periodically to reflect events including changes in the number of common shares outstanding for component stocks, company additions or deletions, corporate restructurings and other capitalization changes.

Available shares are assumed to be shares available for trading. Exclusion of capitalization held by other listed companies and large holdings of private investors (10% or more) is based on information recorded in SEC corporate filings. Other sources are used in cases of missing or questionable data.

The following types of shares are considered unavailable for the purposes of capitalization determinations:

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

ESOP or LESOP shares corporations that have Employee Stock Ownership Plans that comprise 10% or more of the shares outstanding are adjusted;

S-24

Table of Contents

Corporate cross-owned shares when shares of a corporation included in the Russell 2000® Index are held by another corporation also included in the Index, this is considered corporate cross-ownership. Any percentage held in this class will be adjusted;

Large private and corporate shares large private and corporate holdings are defined as those shares held by an individual, a group of individuals acting together or a corporation not included the Russell 2000® Index that own 10% or more of the shares outstanding. However, institutional holdings, which are: investment companies, partnerships, insurance companies, mutual funds, banks or venture capitals are not included in this class;

Unlisted share classes classes of common stock that are not traded on a U.S. securities exchange; and

Initial public offering lock-ups shares locked-up during an initial public offering are not available to the public and will be excluded from the market value at the time the initial public offering enters the Russell 2000® Index.

Corporate Actions Affecting the Russell 2000® Index.

The following summarizes the types of Russell 2000® Index maintenance adjustments and indicates whether or not an adjustment to the Russell 2000® Index is required.

No Replacement Rule Securities that leave the Russell 2000® Index, between reconstitution dates, for any reason (e.g., mergers, acquisitions or other similar corporate activity) are not replaced. Thus, the number of securities in the Russell 2000® Index over the past year will fluctuate according to corporate activity.

Deleted Stocks Effective on January 1, 2002, when deleting stocks from the Russell 2000® Index as a result of exchange de-listing or reconstitution, the price used will be the market price on the day of deletion, including potentially the OTC Bulletin Board price. Previously, prices used to reflect de-listed stocks were the last traded price on the primary exchange.

Exceptions There may be corporate events, like mergers or acquisitions, that result in the lack of current market price for the deleted security and in such an instance the latest primary exchange closing price available will be used.

Rule for Additions The only additions between reconstitution dates are as a result of spin-offs. Spin-off companies are added to the parent company's index and capitalization tier of membership, if the spin-off is large enough. To be eligible, the spun-off company's total market capitalization must be greater than the market-adjusted total market capitalization of the smallest security in the Russell 2000® Index at the latest reconstitution. As of March 2003, the spin off company's style index is determined by the style index membership of the parent entity.

Rule for Corporate Action-Driven Changes Beginning April 1, 2003 changes resulting from corporate actions will generally be applied at the open of the ex-date using the previous day's closing prices. For reclassification of shares, mergers and acquisitions, spin-offs or reorganizations, adjustments will be made at the open of the ex-date using previous day closing prices. For re-incorporations and exchange de-listing, deleted entities will be removed at the open on the day following re-incorporation or delisting using previous day closing prices (including OTC prices for de-listed stocks).

Quarterly IPO Additions Beginning in September 2004, eligible companies that have recently completed an initial public offering (IPO) are added to the Russell 2000® Index at the end of each calendar quarter based on total market capitalization ranking within the market-adjusted capitalization breaks established during the most recent reconstitution. Market adjustments will be made using the

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

returns of the Russell 2000[®] Index. Eligible companies will be added to the Russell 2000[®] Index using their industry's average style probability established at the latest reconstitution.

S-25

Table of Contents

In order to be added in a quarter outside of reconstitution, the IPO company must meet all Russell 2000[®] Index eligibility requirements. Additionally, the IPO company must meet the following criteria on the final trading day of the month prior to the quarter-end: (1) price/trade; (2) rank larger in total market capitalization than the market-adjusted smallest company in the Russell 3000[®] Index as of the latest June reconstitution; and (3) meet criteria (1) and (2) during an initial offering period.

Each month, the Russell 2000[®] Index is updated for changes to shares outstanding as companies report changes in share capital to the Commission. Effective April 30, 2002 only cumulative changes to shares outstanding greater than 5% will be reflected in the Russell 2000[®] Index. This does not affect treatment of major corporate events, which are effective on the ex-date.

The MSCI EAFE[®] Index

We have derived all information regarding the MSCI EAFE[®] Index contained in this prospectus supplement, including, its make-up, method of calculation and changes in its components, from publicly available information. That information reflects the policies of, and is subject to change by MSCI. MSCI has no obligation to continue to publish the MSCI EAFE[®] Index, and may discontinue publication of the MSCI EAFE[®] Index at any time. We do not assume any responsibility for the accuracy or completeness of such information.

The MSCI EAFE[®] Index is a free float-adjusted market capitalization index that is designed to measure developed market equity performance in Europe, Asia, Australia and the Far East. As of May 2005 the MSCI EAFE[®] Index consisted of the following 21 developed country indexes: Australia, Austria, Belgium, Denmark, Finland, France, Germany, Greece, Hong Kong, Ireland, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland and the United Kingdom. The MSCI EAFE[®] Index is a part of a series of indexes sponsored by MSCI called the MSCI Standard Index series.

Constructing the MSCI Standard Index Series

MSCI undertakes an index construction process which involves:

Defining the equity universe.

Adjusting the total market capitalization of all securities in the universe for free floating available to foreign investors.

Classifying the universe of securities under the Global Industry Classification Standard (GICS).

Selecting securities for inclusion according to MSCI's index construction rules and guidelines.

Defining the Equity Universe

The index construction process starts at the country level, with the identification of the universe of investment opportunities.

MSCI classifies each company and its securities in one and only one country. This allows securities to be sorted distinctly by their respective countries. In general, companies and their respective securities are classified as belonging to the country in which they are incorporated. All listed equity securities, or listed securities that exhibit characteristics of equity securities, except investment trusts, mutual funds and equity derivatives, are eligible for inclusion in the universe. Generally, only equity or equity-like securities that are listed in the country of classification are included in the universe.

Adjusting the Total Market Capitalization of Securities for Free Float

After identifying the universe of securities, MSCI calculates the free float-adjusted market capitalization of each security in that universe. The process of free float-adjusting market capitalization involves:

Defining and estimating the free float available to foreign investors for each security, using MSCI's definition of free float.

Table of Contents

Assigning a free float-adjustment factor to each security.

Calculating the free float-adjustment market capitalization of each security.

MSCI defines the free float of a security as the proportion of shares outstanding that are deemed to be available for purchase in the public equity markets by international investors. In practice, limitations on free float available to international investors include:

Strategic and other shareholdings not considered part of available free float.

Limits on share ownership for foreign investors.

Other foreign investment restrictions.

MSCI's estimation of free float is based solely on publicly available shareholder information obtained from multiple information sources. For each security, all available shareholdings are considered where public data is available, regardless of the size of the shareholding. Construction may be conducted with analysts, other industry experts and official company contracts, particularly where disclosure standards or data quality make the estimation of free float difficult.

Classifying the universe of securities under the GICS

In addition to the free float-adjustment of market capitalization, all securities in the universe are assigned to the industry that best describes their business activities. To this end, MSCI has designed in conjunction with Standard & Poor's, the GICS. The comprehensive classification scheme provides a universal approach to industries worldwide and forms the basis for achieving MSCI's objective of reflecting broad and fair representation in its indexes.

GICS consists of 10 sectors, 24 industry groups, 64 industries and 139 sub-industries. Each company is assigned to one sub-industry. The GICS guidelines used to determine the appropriate industry classification are:

A security of a company is classified in a sub-industry according to the business activities that generate approximately 60% or more of the company's revenues.

A company engaged in two or more substantially different business activities, none of which contributes 60% or more of revenues, is classified in the sub-industry that provides the majority of both the company's revenues and earnings.

Where the above guidelines cannot be applied, or are considered inappropriate, further analysis is conducted, and other factors are analyzed to determine an appropriate classification.

Selecting Securities for Index Inclusion

In order to ensure a broad and fair representation in the indices of the diversity of business activities in the universe, MSCI follows a bottom-up approach to index construction, building indices from the industry group level up. The bottom-up approach to index construction requires a thorough analysis and understanding of the characteristics of the equity universe. This analysis drives the individual security selection decisions and aims to reflect the overall features of the equity universe in the country index.

MSCI targets an 85% free float-adjusted market representation level within each industry group within each country. The security selection process within each industry group is based on a careful analysis of:

Each company's business activities and the diversification that its securities would bring to the MSCI EAFE® Index.

S-27

Table of Contents

The size (based on free float-adjusted market capitalization) and liquidity of securities. All other things being equal, MSCI targets for inclusion the most sizable and liquid securities in an industry group. In addition, securities that do not meet the minimum size guidelines discussed below and/or securities with inadequate liquidity are not considered for inclusion.

The estimated free float for the company and its individual share classes. Only securities of companies with an estimated overall and/or security free float greater than 15% are, in general, considered for inclusion.

Maintaining the MSCI Standard Index Series

Overall, index maintenance can be described by three broad categories of implementation of changes.

Annual full country index reviews that systematically re-assess the various dimensions of the equity universe for all countries and are conducted on a fixed annual timetable.

Quarterly index reviews, aimed at promptly reflecting other significant market events.

Ongoing event-related changes, such as mergers and acquisitions, which are generally implemented in the indices rapidly as they occur.

Potential changes in the status of countries (stand-alone, emerging, developed) follow their own separate timetables. These changes are normally implemented in one or more phases at the regular annual full country index review and quarterly index review dates.

Annual Full Country Index Review

The objective of the annual full country review, which is carried out every May, is to systematically re-assess the various dimensions of the equity universe for all countries on a fixed annual timetable. This includes a re-appraisal of the free float-adjusted industry group representation within a country, a detailed review of the shareholder information used to estimate free float for constituent and nonconstituent securities, an update of minimum size guidelines for new and existing constituents, as well as changes typically considered for a quarterly index review as discussed below.

Quarterly Index Review

The quarterly index review process is designed to ensure that the indexes continue to be an accurate reflection of the evolving equity marketplace. This is achieved by rapidly reflecting significant market driven changes that were not captured in the index at the time of their actual occurrence and that should not wait until the annual full country index review due to their importance.

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

During a quarterly index review, securities may be added to or deleted from a country index for a variety of reasons including the following:

Additions or deletions of securities, due to one or more industry groups having become significantly over-or under-represented as a result of mergers, acquisitions, restructuring and other major market events affecting that industry group.

Additions or deletions resulting from changes in industry classification, significant increases or decreases in free float, and removal or decreases of foreign ownership limitations not implemented immediately.

Replacement of companies, which are no longer suitable industry representatives.

Deletion of securities whose company and/or security free float has fallen to less than 15%.

Deletion of securities that have become very small or illiquid.

S-28

Table of Contents

Replacement of securities (additions or deletions) resulting from the review of price sources for constituents with both domestic and foreign board quotations.

Additions or deletions of securities as a result of other market events.

Ongoing Event-Related Changes

Ongoing event-related changes to the indexes are the result of mergers, acquisitions, spin-offs, bankruptcies, reorganizations and other similar corporate events. Ongoing event-related changes can also result from capital reorganizations in the form of rights issues, bonus issues, public issuances and other similar corporate actions that take place on a continuing basis. These changes are reflected in the indexes at the time of the event.

Announcement Policy

The results of the annual full country index review are announced at least two weeks in advance of their effective implementation dates as of the close of the last business day of May. The results of the quarterly index reviews are announced at least two weeks in advance of their effective implementation dates as of the close of the last business day of February, August and November. All ongoing event-related changes resulting from corporate events are announced prior to their implementations.

The changes are typically announced at least ten business days prior to these changes becoming effective in the indices as an expected announcement, or as an undetermined announcement, when the effective dates are not known yet or when aspects of the event are uncertain. MSCI sends confirmed announcements at least two business days prior to events becoming effective in the indices, provided that all necessary public information concerning the event is available. The full list of all new and pending changes is delivered to clients on a daily basis, at 5:30 PM U.S. Eastern Standard Time (EST).

In exceptional cases, events are announced during market hours for same or next day implementation. Announcements made by MSCI during market hours are usually linked to late company disclosure of corporate events or unexpected changes to previously announced corporate events. In the case of large secondary offerings for existing constituents, where possible, these changes will be announced prior to the end of a relevant subscription period and a subsequent announcement confirming the details of the event (including the date of implementation) will be made as soon as the results are available. Both equity offerings and secondary offerings for U.S. securities will be confirmed through an announcement during market hours for same or next day implementation, as the completion of such events cannot be confirmed prior to the notification of the pricing. Early deletions of constituents due to bankruptcy or other significant cases are announced as soon as practicable.

Closing Levels of the Basket

The basket is not a recognized market index. The basket was created solely for purposes of the offering of the notes and will be calculated solely during the term of the notes. The basket does not reflect the performance of all major securities markets, and may not reflect actual global market performance. The historical closing levels of the basket, as calculated solely for the purposes of the offering of the notes, fluctuated in the past and may, in the future, experience significant fluctuations. Any historical upward or downward trend in the closing level of the basket during any period shown below is not an indication that the annual percentage change in the level of the basket is more likely to be positive or

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

negative during the term of the notes. The historical levels do not give an indication of future levels of the basket. We cannot make any assurance that the future levels of the basket, the future levels of the component indices or the trading prices of the component stocks underlying the component indices will result in holders of the notes receiving a maturity payment amount greater than the principal amount of their notes on the maturity date. We do not make any representation to you as to the performance of the basket or the component indices.

S-29

Table of Contents

We obtained the closing levels of the component indices used to calculate the historical levels of the basket from Bloomberg L.P., without independent verification. The actual level of the component indices and the basket at or near the basket determination dates may bear little relation to the historical levels shown below.

The following table sets forth our hypothetical calculation of the closing high and low levels of the basket as though it had been in existence since January 1, 2002 with a starting level of 10 and weighting factors for the component indices underlying the basket determined as of that date, as well as the level of the basket at the end of each quarter from January 1, 2002 through September 30, 2005 and the period from October 1, 2005 through December 9, 2005. On December 9, 2005, the closing level of the basket was \$. Past movements of the basket are not indicative of future levels.

Quarterly High, Low and Closing Level of the Basket

Table of Contents

Although the basket is not a recognized market index, the following graph depicts the hypothetical historical performance of the basket as it would have occurred from January 1, 2002 to December 9, 2005 as though the basket had been in existence since January 1, 2002 with a starting level of 10 and weighting factors for the component indices determined as of that date. Any historical upward or downward trend in the level of the basket during any period shown below is not an indication that the level of the basket is more or less likely to increase or decrease at any time during the term of the notes. The historical levels of the basket do not give any indication of the future performance of the basket and Wachovia cannot make any assurance regarding the future performance of the basket.

The following tables set forth the published closing high and low levels of the component indices as well as the level of the component indices at the end of each quarter from January 1, 2002 through September 30, 2005 and the period from October 1, 2005 through December 9, 2005. On December 9, 2005, the closing level of the S&P 500[®] Index was 1259.37, the closing level of the S&P MidCap 400[®] Index was 744.54, the closing level of the Russell 2000[®] Index was 688.77 and the closing level of the MSCI EAFE[®] Index was 1641.85. Past movements of the component indices are not indicative of future levels.

License Agreement for the MSCI EAFE® Index

MSCI and WBNA have agreed to enter into a non-exclusive license agreement providing for the license to WBNA, and certain of its affiliates, in exchange for a fee, of the right to use the MSCI EAFE® Index in connection with securities, including the notes.

The MSCI indexes are the exclusive property of MSCI. MSCI and the MSCI index names are service mark(s) of MSCI or its affiliates and have been licensed for use for certain purposes by WBNA. Wachovia or the holders of the notes referred to herein are not sponsored, endorsed, or promoted by MSCI, and MSCI bears no liability with respect to any such financial notes. No purchaser, seller or holder of this product, or any other person or entity, should use or refer to any MSCI trade name, trademark or service mark to sponsor, endorse, market or promote this product without first contacting MSCI to determine whether MSCI's permission is required. Under no circumstances may any person or entity claim any affiliation with MSCI without the prior written permission of MSCI.

The notes are not sponsored, endorsed, sold or promoted by any of its affiliates, any of its information providers or any other third party involved in, or related to, compiling, computing or creating any MSCI index (collectively, the MSCI parties). The MSCI indexes are the exclusive property of MSCI. MSCI and the MSCI index names are service mark(s) of MSCI or its affiliates and have been licensed for use for certain purposes by WBNA. The notes have not been passed on by any of the MSCI parties as to its legality or suitability with respect to any person or entity and none of the MSCI parties makes any warranties or bears any liability with respect to the notes. Without limiting the generality of the foregoing, none of the MSCI parties makes any representation or warranty, express or implied, to the Wachovia or the holders of the notes or any other person or entity regarding the advisability of investing in the notes generally or in this notes particularly or the ability of any MSCI index to track corresponding stock market performance. MSCI or its affiliates are the licensors of certain trademarks, service marks and trade names and of the MSCI indexes which are determined, composed and calculated by MSCI without regard to the notes or Wachovia or the holders of the notes or any other person or entity. None of the MSCI parties has any obligation to take the needs of Wachovia or the holders of the notes or any other person or entity into consideration in determining, composing or calculating the MSCI indexes. None of the MSCI parties is responsible for or has participated in the determination of the timing of, prices at, or quantities of the notes to be issued or in the determination or calculation of the equation by or the consideration into which the notes are redeemable. None of the MSCI parties has any obligation or liability to Wachovia or the holders of the notes or any other person or entity in connection with the administration, marketing or offering of the notes.

Although MSCI shall obtain information for inclusion in or for use in the calculation of the MSCI indexes from sources that MSCI considers reliable, none of the MSCI parties warrants or guarantees the originality, accuracy and/or completeness of any MSCI index or any data included therein or the results to be obtained by Wachovia, the holders of the notes, or any other person or entity, from the use of any MSCI

Table of Contents

index or any data included therein and none of the MSCI parties shall have any liability to any person or entity for any errors, omissions or interruptions of or in connection with any MSCI index or any data included therein. Further, none of the MSCI parties makes any express or implied warranties of any kind and the MSCI parties hereby expressly disclaim all warranties (including, without limitation and for purposes of example only, all warranties of title, sequence, availability, originality, accuracy, completeness, timeliness, non-infringement, merchantability and fitness for a particular purpose and all implied warranties arising from trade usage, course of dealing and course of performance) with respect to each MSCI index and all data included therein. Without limiting the generality of any of the foregoing, in no event shall any of the MSCI parties have any liability to any person or entity for any damages, whether direct, indirect, special, incidental, punitive, consequential (including, without limitation, loss of use, loss of profits or revenues or other economic loss), and whether in tort (including, without limitation, strict liability and negligence) contract or otherwise, even if it might have anticipated, or was advised of, the possibility of such damages.

No purchaser, seller or holder of the notes, or any other person or entity, should use or refer to MSCI's trade name, trade mark or service mark rights to the designations Morgan Stanley Capital International, MSCI, Morgan Stanley Capital International Perspective, to sponsor, endorse, market or promote the notes without first contacting MSCI to determine whether MSCI's permission is required. Under no circumstances may any person or entity claim affiliation with MSCI without the prior written permission of MSCI.

Table of Contents**HYPOTHETICAL RETURNS**

The following table illustrates, for the initial basket value and a range of hypothetical final average basket values:

the hypothetical adjusted final average basket value, which is the final average basket value plus 10% of the difference of the final average basket value minus the principal amount per note;

the hypothetical pre-tax price return of the underlying basket;

the hypothetical pre-tax annualized rate of total return of an investment in the stocks included in the component indices;

the hypothetical maturity payment amount per note;

the hypothetical total maturity return to beneficial owners of the notes; and

the hypothetical pre-tax annualized rate of return to beneficial owners of the notes as more fully described below.

The figures below are for purposes of illustration only. The actual maturity payment amount and the resulting total and pre-tax annualized rate of return will depend on the actual adjusted final average basket value determined by the calculation agent as described in this prospectus supplement.

Hypothetical final average basket value	Hypothetical adjusted final average basket value	Pre-tax price return of the basket(1)(2)	Pre-tax annualized rate of total return of the basket(1)(2)	Maturity payment per note	Maturity return on the notes	Pre-tax annualized rate of total return on the notes(1)

- (1) The annualized rates of return specified in the preceding table are calculated based on (a) annual compounding and (b) an actual/365 day count.

- (2) This rate of return is solely based on the following assumptions:
 - (a) a quarterly dividend paid based on a constant dividend yield of 1.5%;

 - (b) no transaction fees or expenses; and

 - (c) a 5-year investment term.

- (3) This is also the initial basket value.

Table of Contents

SUPPLEMENTAL TAX CONSIDERATIONS

The following is a general description of certain United States federal tax considerations relating to the notes. It does not purport to be a complete analysis of all tax considerations relating to the notes. Prospective purchasers of the notes should consult their tax advisers as to the consequences under the tax laws of the country of which they are resident for tax purposes and the tax laws of the United States of acquiring, holding and disposing of the notes and receiving payments of interest, principal and/or other amounts under the notes. This summary is based on the law as in effect on the date of this prospectus supplement and is subject to any change in law that may take effect after such date. This summary does not address all aspects of United States federal income taxation of the notes that may be relevant to you in light of your particular circumstances, nor does it address all of your tax consequences if you are a holder of notes who is subject to special treatment under the United States federal income tax laws.

Supplemental U.S. Tax Considerations

The discussion below supplements the discussion under **United States Taxation** in the accompanying prospectus and is subject to the limitations and exceptions set forth therein. Except as otherwise noted under **United States Alien Holders** below, this discussion is only applicable to you if you are a United States holder (as defined in the accompanying prospectus).

In the opinion of Sullivan & Cromwell LLP, the notes will be treated as debt instruments subject to special rules governing contingent payment obligations for United States federal income tax purposes. Under those rules, the amount of interest you are required to take into account for each accrual period will be determined by constructing a projected payment schedule for the notes, and applying the rules similar to those for accruing original issue discount on a hypothetical noncontingent debt instrument with that projected payment schedule. This method is applied by first determining the yield at which we would issue a noncontingent fixed rate debt instrument with terms and conditions similar to the notes (the **comparable yield**) and then determining a payment schedule as of the issue date that would produce the comparable yield. These rules will generally have the effect of requiring you to include amounts in respect of the notes prior to your receipt of cash attributable to that income.

You may obtain the comparable yield and projected payment schedule from us by contacting the Investment Solutions Group at 1-888-215-4145 or 1-212-909-0038.

You are required to use the comparable yield and projected payment schedule that may be obtained from us at the above telephone number in determining your interest accruals in respect of the notes, unless you timely disclose and justify on your federal income tax return the use of a different comparable yield and projected payment schedule.

The comparable yield and projected payment schedule are not provided to you for any purpose other than the determination of your interest accruals in respect of the notes, and we make no representations regarding the amount of contingent payments with respect to the notes.

If you purchase the notes for an amount that differs from the notes' adjusted issue price at the time of the purchase, you must determine the extent to which the difference between the price you paid for your notes and their adjusted issue price is attributable to a change in expectations as to the projected payment schedule, a change in interest rates, or both, and allocate the difference accordingly. If as expected the notes are listed on the American Stock Exchange, you may (but are not required to) allocate the difference pro rata to interest accruals over the remaining term of

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

the notes to the extent that the yield on the notes, determined after taking into account amounts allocated to interest, is not less than the U.S. federal short-term rate. This rate is determined monthly by the U.S. Secretary of Treasury and is intended to approximate the average yield on short-term U.S. government obligations. The adjusted issue price of the notes will equal the notes' initial

S-39

Table of Contents

public offering price plus any interest deemed to be accrued on the notes (under the rules governing contingent payment obligations) as of the time you purchased the notes.

If you purchase the notes for an amount that is less than the adjusted issue price of the notes, you must (a) make positive adjustments increasing the amount of interest that you would otherwise accrue and include in income each year to the extent of amounts allocated to a change in interest rates under the preceding paragraph and (b) make positive adjustments increasing the amount of ordinary income (or decreasing the amount of ordinary loss) that you would otherwise recognize on the maturity of the notes to the extent of amounts allocated to a change in expectations as to the projected payment schedule under the preceding paragraph. If you purchase the notes for an amount that is greater than the adjusted issue price of the notes, you must (a) make negative adjustments decreasing the amount of interest that you would otherwise accrue and include in income each year to the extent of amounts allocated to a change in interest rates under the preceding paragraph and (b) make negative adjustments decreasing the amount of ordinary income (or increasing the amount of ordinary loss) that you would otherwise recognize on the maturity of the notes to the extent of amounts allocated to a change in expectations as to the projected payment schedule under the preceding paragraph. Adjustments allocated to the interest amount are not made until the date the daily portion of interest accrues.

Because any Form 1099-OID that you receive will not reflect the effects of positive or negative adjustments resulting from your purchase of the notes at a price other than the adjusted issue price determined for tax purposes, you are urged to consult with your tax adviser as to whether and how adjustments should be made to the amounts reported on any Form 1099-OID.

You will recognize gain or loss on the sale or maturity of the notes in an amount equal to the difference, if any, between the amount of cash you receive at such time and your adjusted basis in the notes. In general, your adjusted basis in the notes will equal the amount you paid for the notes, increased by the amount of interest you previously accrued with respect to the notes (in accordance with the comparable yield for the notes) and increased or decreased by the amount of any positive or negative adjustment that you are required to make with respect to your notes under the rules set forth above.

Any gain you recognize on the sale or maturity of the notes will be ordinary interest income. Any loss you may recognize upon the sale of the notes will be ordinary loss to the extent of interest you included as income in the current or previous taxable years in respect of the notes, and thereafter, capital loss. If you hold your notes until maturity and the maturity payment is less than the projected payment at maturity, the difference will first reduce interest that would otherwise accrue in respect of the notes in such taxable year, and any remainder thereafter will be ordinary loss to the extent you previously accrued interest income in respect of the notes. The deductibility of capital losses is limited.

United States Alien Holders. If you are a United States alien holder, you generally will not be subject to United States withholding tax or to generally applicable information reporting and backup withholding requirements with respect to payments on your notes as long as you comply with certain certification and identification requirements as to your foreign status. Please see the discussion under *United States Taxation* *United States Alien Holders* in the accompanying prospectus.

EMPLOYEE RETIREMENT INCOME SECURITY ACT

A fiduciary of a pension, profit-sharing or other employee benefit plan (a *plan*) subject to the Employee Retirement Income Security Act of 1974, as amended (*ERISA*), should consider the fiduciary standards of ERISA in the context of the plan's particular circumstances before authorizing an investment in the notes. Accordingly, among other factors, the fiduciary should consider whether the investment would satisfy the prudence and diversification requirements of ERISA and would be consistent with the documents and instruments governing the plan, and whether the investment would involve a prohibited transaction under Section 406 of ERISA or Section 4975 of the Internal Revenue Code (the

Code).

S-40

Table of Contents

Section 406 of ERISA and Section 4975 of the Code prohibit plans, as well as individual retirement accounts and Keogh plans subject to Section 4975 of the Internal Revenue Code (also plans), from engaging in certain transactions involving plan assets with persons who are parties in interest under ERISA or disqualified persons under the Code (parties in interest) with respect to the plan or account. A violation of these prohibited transaction rules may result in civil penalties or other liabilities under ERISA and/or an excise tax under Section 4975 of the Code for those persons, unless exemptive relief is available under an applicable statutory, regulatory or administrative exemption. Certain employee benefit plans and arrangements including those that are governmental plans (as defined in section 3(32) of ERISA), certain church plans (as defined in Section 3(33) of ERISA) and foreign plans (as described in Section 4(b)(4) of ERISA) (non-ERISA arrangements) are not subject to the requirements of ERISA or Section 4975 of the Code but may be subject to similar provisions under applicable federal, state, local, foreign or other regulations, rules or laws (similar laws).

The acquisition of the notes by a plan with respect to which Wachovia, Wachovia Securities or certain of our affiliates is or becomes a party in interest may constitute or result in a prohibited transaction under ERISA or Section 4975 of the Code, unless those notes are acquired pursuant to and in accordance with an applicable exemption. The U.S. Department of Labor has issued five prohibited transaction class exemptions, or PTCEs , that may provide exemptive relief if required for direct or indirect prohibited transactions that may arise from the purchase or holding of the notes. These exemptions are:

PTCE 84-14, an exemption for certain transactions determined or effected by independent qualified professional asset managers;

PTCE 90-1, an exemption for certain transactions involving insurance company pooled separate accounts;

PTCE 91-38, an exemption for certain transactions involving bank collective investment funds;

PTCE 95-60, an exemption for transactions involving certain insurance company general accounts; and

PTCE 96-23, an exemption for plan asset transactions managed by in-house asset managers.

The notes may not be purchased or held by (1) any plan, (2) any entity whose underlying assets include plan assets by reason of any plan's investment in the entity (a plan asset entity) or (3) any person investing in plan assets of any plan, unless in each case the purchaser or holder is eligible for the exemptive relief available under one or more of the PTCEs listed above or another applicable similar exemption. Any purchaser or holder of the notes or any interest in the notes will be deemed to have represented by its purchase and holding of the notes that it either (1) is not a plan or a plan asset entity and is not purchasing those notes on behalf of or with plan assets of any plan or plan asset entity or (2) with respect to the purchase or holding, is eligible for the exemptive relief available under any of the PTCEs listed above or another applicable exemption. In addition, any purchaser or holder of the notes or any interest in the notes which is a non-ERISA arrangement will be deemed to have represented by its purchase and holding of the notes that its purchase and holding will not violate the provisions of any similar law.

Due to the complexity of these rules and the penalties that may be imposed upon persons involved in non-exempt prohibited transactions, it is important that fiduciaries or other persons considering purchasing the notes on behalf of or with plan assets of any plan, plan asset entity or non-ERISA arrangement consult with their counsel regarding the availability of exemptive relief under any of the PTCEs listed above or any other applicable exemption, or the potential consequences of any purchase or holding under similar laws, as applicable.

If you are an insurance company or the fiduciary of a pension plan or an employee benefit plan, and propose to invest in the notes, you should consult your legal counsel.

Table of Contents

USE OF PROCEEDS AND HEDGING

The net proceeds from the sale of the notes will be used as described under **Use of Proceeds** in the accompanying prospectus and to hedge market risks of Wachovia associated with its obligation to pay the maturity payment amount of the notes.

The hedging activity discussed above may adversely affect the market value of the notes from time to time and the maturity payment amount you will receive on the notes at maturity. See **Risk Factors** **Purchases and sales by us or our affiliates may affect your return** and **Risk Factors** **Potential conflicts of interest could arise** for a discussion of these adverse effects.

SUPPLEMENTAL PLAN OF DISTRIBUTION

Wachovia Capital Markets, LLC has agreed, subject to the terms and conditions of the distribution agreement and a terms agreement, to purchase from Wachovia as principal \$4,833,000 aggregate principal amount of notes and will receive an underwriting discount and commission of \$0.30 per note. Wachovia Capital Markets, LLC has engaged the services of each of Wachovia Securities, LLC and Wachovia Securities Financial Network, LLC, as broker, to resell \$4,738,000 and \$95,000, respectively, aggregate principal amount of the notes purchased by Wachovia Capital Markets, LLC and has agreed to reallow Wachovia Securities, LLC and Wachovia Securities Financial Network, LLC \$0.275 of the principal amount of each note sold through Wachovia Securities, LLC or Wachovia Securities Financial Network, LLC, respectively, as broker.

The distribution agreement provides that the obligations of Wachovia Capital Markets, LLC are subject to certain conditions and that Wachovia Capital Markets, LLC is obligated to purchase the notes. Wachovia Capital Markets, LLC has advised Wachovia that it proposes initially to offer all or part of the notes directly to the public at the offering price set forth on the cover page of this prospectus supplement. In addition to the compensation paid at the time of the initial public offering of the notes, an additional administrative fee of \$0.025 per note will be paid to Wachovia Securities, LLC in connection with the administration of orders for the notes. After the initial public offering, the public offering price may be changed and a concession to dealers may be offered. Wachovia Capital Markets, LLC is offering the notes subject to receipt and acceptance and subject to its right to reject any order in whole or in part.

In addition, additional agents under the distribution agreement, subject to the terms and conditions of the distribution agreement, may act as Wachovia's agents in the sale of \$237,800 aggregate principal amount of the notes. The total commission payable on notes sold by the additional agents on an agency basis, pursuant to the distribution agreement, will be \$0.275 per note. We refer to the additional agents, together with Wachovia Capital Markets, LLC, as the **Agents**.

Proceeds to be received by Wachovia in this offering will be net of the underwriting discount, commission and expenses payable by Wachovia.

The Agents, Wachovia Securities, LLC, Wachovia Securities Financial Network, LLC or any broker-dealer affiliate of Wachovia may use this prospectus supplement and the accompanying prospectus for offers and sales related to market-making transactions in the notes. The Agents, Wachovia Securities, LLC, Wachovia Securities Financial Network, LLC or any broker-dealer affiliate of Wachovia may act as principal or agent in these transactions, and the sales will be made at prices related to prevailing market prices at the time of sale.

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

Wachovia Capital Markets, LLC, Wachovia Securities, LLC and Wachovia Securities Financial Network, LLC are affiliates of Wachovia. Rule 2720 of the Conduct Rules of the NASD imposes certain requirements when an NASD member such as Wachovia Capital Markets, LLC, Wachovia Securities, LLC or Wachovia

S-42

Table of Contents

Securities Financial Network, LLC distributes an affiliated company's debt securities. Wachovia Capital Markets, LLC, Wachovia Securities, LLC and Wachovia Securities Financial Network, LLC have advised Wachovia that this offering will comply with the applicable requirements of Rule 2720. No NASD member participating in this offering will confirm initial sales to accounts over which it exercises discretionary authority without the prior written approval of the customer.

No action has been or will be taken by Wachovia, the Agents, Wachovia Securities, LLC, Wachovia Securities Financial Network, LLC or any broker-dealer affiliate of Wachovia that would permit a public offering of the notes or possession or distribution of this prospectus supplement or the accompanying prospectus in any jurisdiction, other than the United States, where action for that purpose is required. No offers, sales or deliveries of the notes, or distribution of this prospectus supplement or the accompanying prospectus, may be made in or from any jurisdiction except in circumstances which will result in compliance with any applicable laws and regulations and will not impose any obligations on Wachovia, the Agents, Wachovia Securities, LLC, Wachovia Securities Financial Network, LLC or any broker-dealer affiliate of Wachovia. In respect of specific jurisdictions, please note the following:

The notes, and the offer to sell such notes, does not constitute a public offering in Argentina. Consequently, no public offering approval has been requested or granted by the Comisión Nacional de Valores, nor has any listing authorization of the notes been requested on any stock market in Argentina.

The notes will not be offered or sold to any persons who are residents of the Bahamas within the meaning of the Exchange Control Regulations of 1956 issued by the Central Bank of the Bahamas.

The notes may not be offered or sold to the public in Brazil. Accordingly, the notes have not been submitted to the Comissão de Valores Mobiliários for approval. Documents relating to this offering may not be supplied to the public as a public offering in Brazil or be used in connection with any offer for subscription or sale to the public in Brazil.

Neither the notes nor Wachovia Corporation is registered in the Securities Registry of the Superintendency of Securities and Insurance in Chile.

The notes have not been registered with the National Registry of Securities maintained by the Mexican National Banking and Securities Commission and may not be offered or sold publicly in Mexico. This prospectus supplement and the accompanying prospectus may not be publicly distributed in Mexico.

RECENT DEVELOPMENTS

For the quarter ended September 30, 2005, Wachovia reported net income available to common stockholders of \$1.66 billion, compared to \$1.26 billion for the same period in 2004. For additional information regarding Wachovia's results for the third quarter of 2005, see the consolidated balance sheets and the consolidated statement of income contained in Wachovia's Current Report on Form 8-K dated October 17, 2005, incorporated by reference herein.

WACHOVIA CORPORATION

Senior Global Medium-Term Notes, Series G

and

Subordinated Global Medium-Term Notes, Series H

Terms of Sale

Wachovia Corporation may from time to time offer and sell notes with various terms, including the following:

stated maturity of 9 months or longer	amount of principal or interest may be determined by reference to an index or formula
fixed or floating interest rate, zero-coupon or issued with original issue discount; a floating interest rate may be based on:	book-entry form through The Depository Trust Company, Euroclear, Clearstream or any other clearing system or financial institution named in the applicable pricing supplement
commercial paper rate	
prime rate	redemption at the option of Wachovia or repayment at the option of the holder
LIBOR	interest on notes paid monthly, quarterly, semi-annually or annually
EURIBOR	denominations of \$1,000 and multiples of \$1,000
treasury rate	denominated in U.S. dollars, a currency other than U.S dollars or in a composite currency
CMT rate	settlement in immediately available funds

CD rate

CPI rate

federal funds rate

ranked as senior or subordinated indebtedness
of Wachovia

The final terms of each note will be included in a pricing supplement. Wachovia will receive between \$9,090,000,000 and \$8,372,000,000 of the proceeds from the sale of the notes, after paying the agents' commissions of between \$10,000,000 and \$728,000,000, unless otherwise agreed with the agents.

Wachovia has filed an application to list notes issued under this prospectus on the Luxembourg Stock Exchange. The Luxembourg Stock Exchange has advised us that with respect to notes so listed, this prospectus is valid for one year from the date of this prospectus.

Investing in the notes involves risks. See Risk Factors beginning on page 5.

Neither the Securities and Exchange Commission, any state securities commission or the Commissioner of Insurance of the state of North Carolina has approved or disapproved of the securities or passed upon the adequacy or accuracy of this prospectus. Any representation to the contrary is a criminal offense.

These securities will be our unsecured obligations and will not be savings accounts, deposits or other obligations of any bank or non-bank subsidiary of ours and are not insured by the Federal Deposit Insurance Corporation, the Bank Insurance Fund or any other governmental agency.

Wachovia may sell the notes directly or through one or more agents or dealers, including the agents listed below. The agents are not required to sell any particular amount of the notes.

Wachovia may use this prospectus in the initial sale of any notes. In addition, Wachovia Capital Markets, LLC, or any other affiliate of Wachovia may use this prospectus in a market-making or other transaction in any note after its initial sale. ***Unless Wachovia or its agent informs the purchaser otherwise in the confirmation of sale or pricing supplement, this prospectus is being used in a market-making transaction.***

ABOUT THIS PROSPECTUS

General

This document is called a prospectus and is part of a registration statement that we filed with the SEC using a shelf registration or continuous offering process. Under this shelf registration, we may from time to time sell any combination of the securities described in this prospectus in one or more offerings up to a total aggregate initial offering price of \$9,100,000,000 or the equivalent amount in one or more other currencies or composite currencies.

This prospectus provides you with a general description of the securities we may offer. Each time we sell securities we will provide a pricing supplement containing specific information about the terms of the securities being offered. That pricing supplement may include a discussion of any risk factors or other special considerations that apply to those securities. The pricing supplement may also add, update or change the information in this prospectus. If there is any inconsistency between the information in this prospectus and any pricing supplement, you should rely on the information in that pricing supplement. You should read both this prospectus and any pricing supplement together with additional information described under the heading **Where You Can Find More Information**.

The registration statement containing this prospectus, including exhibits to the registration statement, provides additional information about us and the securities offered under this prospectus. The registration statement can be read at the SEC web site or at the SEC offices mentioned under the heading **Where You Can Find More Information**.

When acquiring any securities discussed in this prospectus, you should rely only on the information provided in this prospectus and in any pricing supplement, including the information incorporated by reference. Neither we nor any underwriters or agents have authorized anyone to provide you with different information. We are not offering the securities in any state where the offer is prohibited. You should not assume that the information in this prospectus, any pricing supplement or any document incorporated by reference is truthful or complete at any date other than the date mentioned on the cover page of these documents.

We may sell securities to underwriters who will sell the securities to the public on terms fixed at the time of sale. In addition, the securities may be sold by us directly or through dealers or agents designated from time to time, which agents may be our affiliates. If we, directly or through agents, solicit offers to purchase the securities, we reserve the sole right to accept and, together with our agents, to reject, in whole or in part, any of those offers.

The pricing supplement will contain the names of the underwriters, brokers, dealers or agents, if any, together with the terms of offering, the compensation of those persons and the net proceeds to us. Any underwriters, brokers, dealers or agents participating in the offering may be deemed underwriters within the meaning of the Securities Act of 1933 (the **Securities Act**).

One or more of our subsidiaries, including Wachovia Capital Markets, LLC may buy and sell any of the securities after the securities are issued as part of their business as a broker-dealer. Those subsidiaries may use this prospectus and the related pricing supplement in those transactions. Any sale by a subsidiary will be made at the prevailing market price at the time of sale. Wachovia Capital Markets, LLC and Wachovia Securities, LLC another of our subsidiaries, each conduct business under the name **Wachovia Securities**. Any reference in this prospectus to **Wachovia Securities** means Wachovia Capital Markets, LLC, unless otherwise mentioned or unless the context requires otherwise.

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

Unless otherwise mentioned or unless the context requires otherwise, all references in this prospectus to Wachovia , we , us , our or similar references mean Wachovia Corporation and its subsidiaries.

Selling Restrictions Outside the United States

Offers and sales of the notes are subject to restrictions in the United Kingdom. The distribution of this prospectus and the offering of the notes in certain other jurisdictions may also be restricted by law. This prospectus does not constitute an offer of, or an invitation on Wachovia's behalf or on behalf of the agents or any of them to subscribe to or purchase, any of the notes. This prospectus may not be used for or in connection with an offer or solicitation by anyone in any jurisdiction in which such an offer or solicitation is not authorized or to any person to whom it is unlawful to make such an offer or solicitation. Please refer to the section entitled "Plan of Distribution".

As long as the notes are listed on the Luxembourg Stock Exchange, a supplemental prospectus will be prepared and filed with the Luxembourg Stock Exchange in the event of a material change in the financial condition of Wachovia that is not reflected in this prospectus, for the use in connection with any subsequent issue of debt securities to be listed on the Luxembourg Stock Exchange. As long as the notes are listed on the Luxembourg Stock Exchange, if the terms and conditions of the notes are modified or amended in a manner which would make this prospectus materially inaccurate or misleading, a new prospectus or supplemental prospectus will be prepared.

Wachovia accepts responsibility for the information contained in this prospectus. The Luxembourg Stock Exchange takes no responsibility for the contents of this document, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss no matter how arising from or in reliance upon the whole or any part of the contents of this prospectus.

WHERE YOU CAN FIND MORE INFORMATION

We file annual, quarterly and current reports, proxy statements and other information with the SEC. You may read and copy any document we file at the SEC's public reference room in Washington, D.C. Please call the SEC at 1-800-SEC-0330 for further information on the public reference rooms. In addition, our SEC filings are available to the public at the SEC's web site at <http://www.sec.gov>. You can also inspect reports, proxy statements and other information about us at the offices of the New York Stock Exchange, 20 Broad Street, New York, New York.

The SEC allows us to incorporate by reference into this prospectus the information in documents we file with it. This means that we can disclose important information to you by referring you to those documents. The information incorporated by reference is considered to be a part of this prospectus and should be read with the same care. When we update the information contained in documents that have been incorporated by reference by making future filings with the SEC the information incorporated by reference in this prospectus is considered to be automatically updated and superseded. In other words, in the case of a conflict or inconsistency between information contained in this prospectus and information incorporated by reference into this prospectus, you should rely on the information contained in the document that was filed later. We incorporate by reference the documents listed below and any documents we file with the SEC in the future under Section 13(a), 13(c), 14, or 15(d) of the Securities Exchange Act of 1934 (the Exchange Act) until the offering of securities by means of this prospectus is completed:

Annual Report on Form 10-K for the year ended December 31, 2004;

Quarterly Report on Form 10-Q for the period ended March 31, 2005; and

Current Reports on Form 8-K dated January 5, 2005, January 14, 2005, January 19, 2005, April 15, 2005 and May 2, 2005.

You may request a copy of these filings, other than an exhibit to a filing unless that exhibit is specifically incorporated by reference into that filing, at no cost, by writing to or telephoning us at the following address:

Corporate Relations

Wachovia Corporation

One Wachovia Center

301 South College Street

Charlotte, North Carolina 28288-0206

FORWARD-LOOKING STATEMENTS

This prospectus and applicable pricing supplements contain or incorporate statements that are forward-looking statements. These statements can be identified by the use of forward-looking language such as will likely result, may, are expected to, is anticipated, estimate, projected, to, or other similar words. Our actual results, performance or achievements could be significantly different from the results expressed in or implied by these forward-looking statements. These statements are subject to certain risks and uncertainties, including but not limited to certain risks described in the pricing supplement or the documents incorporated by reference. When considering these forward-looking statements, you should keep in mind these risks, uncertainties and other cautionary statements made in this prospectus and the pricing supplements. You should not place undue reliance on any forward-looking statement, which speaks only as of the date made. You should refer to our periodic and current reports filed with the SEC for specific risks which could cause actual results to be significantly different from those expressed or implied by these forward-looking statements.

WACHOVIA CORPORATION

Wachovia was incorporated under the laws of North Carolina in 1967. We are registered as a financial holding company and a bank holding company under the Bank Holding Company Act of 1956, as amended, and are supervised and regulated by the Board of Governors of the Federal Reserve System. Our banking and securities subsidiaries are supervised and regulated by various federal and state banking and securities regulatory authorities. On September 1, 2001, the former Wachovia Corporation merged with and into First Union Corporation, and First Union Corporation changed its name to Wachovia Corporation.

In addition to North Carolina, Wachovia's full-service banking subsidiaries operate in Alabama, Connecticut, Delaware, Florida, Georgia, Maryland, Mississippi, New Jersey, New York, Pennsylvania, South Carolina, Tennessee, Texas, Virginia and Washington, D.C. These full-service banking subsidiaries provide a wide range of commercial and retail banking and trust services. Wachovia also provides various other financial services, including mortgage banking, home equity lending, leasing, investment banking, insurance and securities brokerage services through other subsidiaries.

In 1985, the Supreme Court upheld regional interstate banking legislation. Since then, Wachovia has concentrated its efforts on building a large regional banking organization in what it perceives to be some of the better banking markets in the eastern United States. Since November 1985, Wachovia has completed over 100 banking-related acquisitions.

Wachovia continually evaluates its business operations and organizational structures to ensure they are aligned closely with its goal of maximizing performance in its core business lines, Capital Management, Wealth Management, the General Bank and Corporate and Investment Banking. When consistent with our overall business strategy, we may consider the disposition of certain of our assets, branches, subsidiaries or lines of business. We continue to routinely explore acquisition opportunities, particularly in areas that would complement our core business lines, and frequently conduct due diligence activities in connection with possible acquisitions. As a result, acquisition discussions and, in some cases, negotiations frequently take place, and future acquisitions involving cash, debt or equity securities can be expected.

Wachovia is a separate and distinct legal entity from its banking and other subsidiaries. Dividends received from our subsidiaries are our principal source of funds to pay dividends on our common and preferred stock and debt service on our debt. Various federal and state statutes and regulations limit the amount of dividends that our banking and other subsidiaries may pay to us without regulatory approval.

Table of Contents

RISK FACTORS

Our Credit Ratings May Not Reflect All Risks of An Investment in the Notes

The credit ratings of our medium-term note program may not reflect the potential impact of all risks related to structure and other factors on any trading market for, or trading value of, your notes. In addition, real or anticipated changes in our credit ratings will generally effect any trading market for, or trading value of, your notes.

Risks Relating to Indexed Notes

We use the term *indexed notes* to mean notes whose value is linked to an underlying property or index. Indexed notes may present a high level of risk, and those who invest in indexed notes may lose their entire investment. In addition, the treatment of indexed notes for U.S. federal income tax purposes is often unclear due to the absence of any authority specifically addressing the issues presented by any particular indexed note. Thus, if you propose to invest in indexed notes, you should independently evaluate the federal income tax consequences of purchasing an indexed note that apply in your particular circumstances. You should also read *United States Taxation* for a discussion of U.S. tax matters.

Investors in Indexed Notes Could Lose Their Investment

The amount of principal and/or interest payable on an indexed note and the cash value or physical settlement value of a physically settled note will be determined by reference to the price, value or level of one or more securities, currencies, commodities or other properties, any other financial, economic or other measure or instrument, including the occurrence or non-occurrence of any event or circumstance, and/or one or more indices or baskets of any of these items. We refer to each of these as an *index*. The direction and magnitude of the change in the price, value or level of the relevant index will determine the amount of principal and/or interest payable on the indexed note, and the cash value or physical settlement value of a physically settled note. The terms of a particular indexed note may or may not include a guaranteed return of a percentage of the face amount at maturity or a minimum interest rate. Thus, if you purchase an indexed note, you may lose all or a portion of the principal or other amount you invest and may receive no interest on your investment.

The Issuer of a Security or Currency That Serves as an Index Could Take Actions That May Adversely Affect an Indexed Note

The issuer of a security that serves as an index or part of an index for an indexed note will have no involvement in the offer and sale of the indexed note and no obligations to the holder of the indexed note. The issuer may take actions, such as a merger or sale of assets, without regard to the interests of the holder. Any of these actions could adversely affect the value of a note indexed to that security or to an index of which that security is a component.

If the index for an indexed note includes a non-U.S. dollar currency or other asset denominated in a non-U.S. dollar currency, the government that issues that currency will also have no involvement in the offer and sale of the indexed note and no obligations to the holder of the indexed note. That government may take actions that could adversely affect the value of the note. See *Risks Relating to Notes Denominated or Payable*

in or Linked to a Non-U.S. Dollar Currency below for more information about these kinds of government actions.

An Indexed Note May Be Linked to a Volatile Index, Which Could Hurt Your Investment

Some indices are highly volatile, which means that their value may change significantly, up or down, over a short period of time. The amount of principal or interest that can be expected to become payable on an

Table of Contents

indexed note may vary substantially from time to time. Because the amounts payable with respect to an indexed note are generally calculated based on the value or level of the relevant index on a specified date or over a limited period of time, volatility in the index increases the risk that the return on the indexed note may be adversely affected by a fluctuation in the level of the relevant index.

The volatility of an index may be affected by political or economic events, including governmental actions, or by the activities of participants in the relevant markets. Any of these events or activities could adversely affect the value of an indexed note.

An Index to Which a Note Is Linked Could Be Changed or Become Unavailable

Some indices compiled by us or our affiliates or third parties may consist of or refer to several or many different securities, commodities or currencies or other instruments or measures. The compiler of such an index typically reserves the right to alter the composition of the index and the manner in which the value or level of the index is calculated. An alteration may result in a decrease in the value of or return on an indexed note that is linked to the index. The indices for our indexed notes may include published indices of this kind or customized indices developed by us or our affiliates in connection with particular issues of indexed notes.

A published index may become unavailable, or a customized index may become impossible to calculate in the normal manner, due to events such as war, natural disasters, cessation of publication of the index or a suspension or disruption of trading in one or more securities, commodities or currencies or other instruments or measures on which the index is based. If an index becomes unavailable or impossible to calculate in the normal manner, the terms of a particular indexed note may allow us to delay determining the amount payable as principal or interest on an indexed note, or we may use an alternative method to determine the value of the unavailable index. Alternative methods of valuation are generally intended to produce a value similar to the value resulting from reference to the relevant index. However, it is unlikely that any alternative method of valuation we use will produce a value identical to the value that the actual index would produce. If we use an alternative method of valuation for a note linked to an index of this kind, the value of the note, or the rate of return on it, may be lower than it otherwise would be.

Some indexed notes are linked to indices that are not commonly used or that have been developed only recently. The lack of a trading history may make it difficult to anticipate the volatility or other risks associated with an indexed note of this kind. In addition, trading in these indices or their underlying stocks, commodities or currencies or other instruments or measures, or options or futures contracts on these stocks, commodities or currencies or other instruments or measures, may be limited, which could increase their volatility and decrease the value of the related indexed notes or the rates of return on them.

We May Engage in Hedging Activities that Could Adversely Affect an Indexed Note

In order to hedge an exposure on a particular indexed note, we may, directly or through our affiliates, enter into transactions involving the securities, commodities or currencies or other instruments or measures that underlie the index for the note, or involving derivative instruments, such as swaps, options or futures, on the index or any of its component items. By engaging in transactions of this kind, we could adversely affect the value of an indexed note. It is possible that we could achieve substantial returns from our hedging transactions while the value of the indexed note may decline.

Information About Indices May Not Be Indicative of Future Performance

If we issue an indexed note, we may include historical information about the relevant index in the relevant pricing supplement. Any information about indices that we may provide will be furnished as a matter of information only, and you should not regard the information as indicative of the range of, or trends in, fluctuations in the relevant index that may occur in the future.

Table of Contents

We May Have Conflicts of Interest Regarding an Indexed Note

Wachovia Securities and our other affiliates may have conflicts of interest with respect to some indexed notes. Wachovia Securities and our other affiliates may engage in trading, including trading for hedging purposes, for their proprietary accounts or for other accounts under their management, in indexed notes and in the securities, commodities or currencies or other instruments or measures on which the index is based or in other derivative instruments related to the index or its component items. These trading activities could adversely affect the value of indexed notes. We and our affiliates may also issue or underwrite securities or derivative instruments that are linked to the same index as one or more indexed notes. By introducing competing products into the marketplace in this manner, we could adversely affect the value of an indexed note.

Wachovia Bank, National Association or another of our affiliates may serve as calculation agent for the indexed notes and may have considerable discretion in calculating the amounts payable in respect of the notes. To the extent that Wachovia Bank, National Association or another of our affiliates calculates or compiles a particular index, it may also have considerable discretion in performing the calculation or compilation of the index. Exercising discretion in this manner could adversely affect the value of an indexed note based on the index or the rate of return on the security.

Risks Relating to Notes Denominated or Payable in or Linked to a Non-U.S. Dollar Currency

If you intend to invest in a non-U.S. dollar note e.g., a note whose principal and/or interest is payable in a currency other than U.S. dollars or that may be settled by delivery of or reference to a non-U.S. dollar currency or property denominated in or otherwise linked to a non-U.S. dollar currency you should consult your own financial and legal advisors as to the currency risks entailed by your investment. Notes of this kind may not be an appropriate investment for investors who are unsophisticated with respect to non-U.S. dollar currency transactions.

An Investment in a Non-U.S. Dollar Note Involves Currency-Related Risks

An investment in a non-U.S. dollar note entails significant risks that are not associated with a similar investment in a note that is payable solely in U.S. dollars and where settlement value is not otherwise based on a non-U.S. dollar currency. These risks include the possibility of significant changes in rates of exchange between the U.S. dollar and the various non-U.S. dollar currencies or composite currencies and the possibility of the imposition or modification of foreign exchange controls or other conditions by either the United States or non-U.S. governments. These risks generally depend on factors over which we have no control, such as economic and political events and the supply of and demand for the relevant currencies in the global markets.

Changes in Currency Exchange Rates Can Be Volatile and Unpredictable

Rates of exchange between the U.S. dollar and many other currencies have been highly volatile, and this volatility may continue and perhaps spread to other currencies in the future. Fluctuations in currency exchange rates could adversely affect an investment in a note denominated in, or where value is otherwise linked to, a specified currency other than U.S. dollars. Depreciation of the specified currency against the U.S. dollar could result in a decrease in the U.S. dollar-equivalent value of payments on the note, including the principal payable at maturity. That in turn could cause the market value of the note to fall. Depreciation of the specified currency against the U.S. dollar could result in a loss to the investor on a U.S. dollar basis.

In courts outside of New York, investors may not be able to obtain judgment in a specified currency other than U.S. dollars. For example, a judgment for money in an action based on a non-U.S. dollar note in many other U.S. federal or state courts ordinarily would be enforced in the United States only in U.S. dollars.

Table of Contents

The date used to determine the rate of conversion of the currency in which any particular note is denominated into U.S. dollars will depend upon various factors, including which court renders the judgment.

Information About Exchange Rates May Not Be Indicative of Future Performance

If we issue a non-U.S. dollar note, we may include in the relevant pricing supplement a currency supplement that provides information about historical exchange rates for the relevant non-U.S. dollar currency or currencies. Any information about exchange rates that we may provide will be furnished as a matter of information only, and you should not regard the information as indicative of the range of, or trends in, fluctuations in currency exchange rates that may occur in the future. That rate will likely differ from the exchange rate used under the terms that apply to a particular note.

Table of Contents

USE OF PROCEEDS

Wachovia currently intends to use the net proceeds from the sale of any notes for general corporate purposes, which may include:

reducing debt;

investments at the holding company level;

investing in, or extending credit to, our operating subsidiaries;

acquisitions;

stock repurchases; and

other purposes as mentioned in any pricing supplement.

Pending such use, we may temporarily invest the net proceeds. The precise amounts and timing of the application of proceeds will depend upon our funding requirements and the availability of other funds. Except as mentioned in any pricing supplement, specific allocations of the proceeds to such purposes will not have been made at the date of that pricing supplement.

Based upon our historical and anticipated future growth and our financial needs, we may engage in additional financings of a character and amount that we determine as the need arises.

CONSOLIDATED EARNINGS RATIOS

The following table provides Wachovia's consolidated ratios of earnings to fixed charges and preferred stock dividends:

Three Months Ended	Years Ended December 31,				
March 31,					
2005	2004	2003	2002	2001	2000

Consolidated Ratios of Earnings to Fixed Charges and Preferred Stock

Dividends

Excluding interest on deposits	3.31x	3.83	3.63	2.91	1.61	1.13
Including interest on deposits	2.16x	2.37	2.30	1.79	1.27	1.06

For purposes of computing these ratios

earnings represent income from continuing operations before extraordinary items and cumulative effect of a change in accounting principles, plus income taxes and fixed charges (excluding capitalized interest);

fixed charges, excluding interest on deposits, represent interest (including capitalized interest), one-third of rents and all amortization of debt issuance costs; and

fixed charges, including interest on deposits, represent all interest (including capitalized interest), one-third of rents and all amortization of debt issuance costs.

One-third of rents is used because it is the proportion deemed representative of the interest factor.

Table of Contents**SELECTED CONSOLIDATED CONDENSED FINANCIAL DATA**

The following is selected unaudited consolidated condensed financial information for Wachovia for the three months ended March 31, 2005, and the year ended December 31, 2004. The summary below should be read in conjunction with the consolidated financial statements of Wachovia, and the related notes thereto, and the other detailed information contained in Wachovia's 2005 First Quarter Report on Form 10-Q and in Wachovia's 2004 Annual Report on Form 10-K.

Total stockholders equity	46,467
Total long-term debt and stockholders equity	\$ 94,399

As of the date of this prospectus, there has been no material change in the capitalization of Wachovia since March 31, 2005.

REGULATORY CONSIDERATIONS

As a financial holding company and a bank holding company under the Bank Holding Company Act, the Federal Reserve Board regulates, supervises and examines Wachovia. For a discussion of the material elements of the regulatory framework applicable to financial holding companies, bank holding companies and their subsidiaries and specific information relevant to Wachovia, please refer to Wachovia's annual report on Form 10-K for the fiscal year ended December 31, 2004, and any subsequent reports we file with the SEC, which are incorporated by reference in this prospectus. This regulatory framework is intended primarily for the protection of depositors and the federal deposit insurance funds and not for the protection of security holders. As a result of this regulatory framework, Wachovia's earnings are affected by actions of the Federal Reserve Board, the Office of Comptroller of the Currency, that regulates our banking subsidiaries, the Federal Deposit Insurance Corporation, that insures the deposits of our banking subsidiaries within certain limits, and the SEC, that regulates the activities of certain subsidiaries engaged in the securities business.

Wachovia's earnings are also affected by general economic conditions, our management policies and legislative action.

In addition, there are numerous governmental requirements and regulations that affect our business activities. A change in applicable statutes, regulations or regulatory policy may have a material effect on Wachovia's business.

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

Depository institutions, like Wachovia's bank subsidiaries, are also affected by various federal laws, including those relating to consumer protection and similar matters. Wachovia also has other financial services subsidiaries regulated, supervised and examined by the Federal Reserve Board, as well as other relevant state and federal regulatory agencies and self-regulatory organizations. Wachovia's non-bank subsidiaries may be subject to other laws and regulations of the federal government or the various states in which they are authorized to do business.

Table of Contents**DESCRIPTION OF THE NOTES WE MAY OFFER**

The following information outlines some of the provisions of the indentures and the notes. This information may not be complete in all respects, and is qualified entirely by reference to the indenture under which the notes are issued. These indentures are incorporated by reference as exhibits to the registration statement of which this prospectus is a part. This information relates to certain terms and conditions that generally apply to the notes. The specific terms of any series of notes will be described in the relevant pricing supplement. As you read this section, please remember that the specific terms of your note as described in your pricing supplement will supplement and, if applicable, may modify or replace the general terms described in this section. If your pricing supplement is inconsistent with this prospectus, your pricing supplement will control with regard to your note. Thus, the statements we make in this section may not apply to your note.

General

Senior notes will be issued under an indenture, dated as of April 1, 1983, as amended and supplemented, between Wachovia and JPMorgan Chase Bank, National Association, (formerly known as The Chase Manhattan Bank) as trustee. Subordinated notes will be issued under an indenture, dated as of March 15, 1986, as amended and supplemented, between Wachovia and J.P. Morgan Trust Company, National Association (formerly known as Bank One Trust Company, N.A.), as trustee. Each of the senior and the subordinated notes constitutes a single series of debt securities of Wachovia issued under the senior and the subordinated indenture, respectively. The provisions of each indenture allow us not only to issue debt securities with terms different from those of debt securities previously issued under that indenture, but also to reopen a previously issued series of debt securities and issue additional debt securities of that series. The term debt securities, as used in this prospectus, refers to all debt securities, including the notes, issued and issuable from time to time under the relevant indenture. The indentures are subject to, and governed by, the Trust Indenture Act of 1939, as amended. These indentures are more fully described below in this section. Whenever we refer to specific provisions or defined terms in one or both of the indentures, those provisions or defined terms are incorporated in this prospectus by reference. Section references used in this discussion are references to the relevant indenture. Capitalized terms which are not otherwise defined shall have the meaning given to them in the relevant indenture. As long as the notes are listed on the Luxembourg Stock Exchange, the indentures will be available for inspection at the offices of the Luxembourg Listing Agent and Luxembourg Paying Agent and Transfer Agent.

The notes will be limited to an aggregate initial offering price of \$9,100,000,000, or at Wachovia's option if so specified in the relevant pricing supplement, the equivalent of this amount in any other currency or currency unit, and will be Wachovia's direct, unsecured obligations. The notes will not be deposits or other bank obligations and will not be FDIC insured.

The notes are being offered on a continuous basis by Wachovia through one or more agents listed under Plan of Distribution. The indentures do not limit the aggregate principal amount of senior or subordinated notes that we may issue. We may, from time to time, without the consent of the holders of the notes, provide for the issuance of notes or other debt securities under the indentures in addition to the \$9,100,000,000 aggregate initial offering price of notes noted on the cover of this prospectus. Each note issued under this prospectus will mature nine months or more from its date of issue, as selected by the purchaser and agreed to by Wachovia and may be subject to redemption or repayment before its stated maturity. Notes may be issued at significant discounts from their principal amount due on the stated maturity (or on any prior date on which the principal or an installment of principal of a note becomes due and payable, whether by the declaration of acceleration, call for redemption at the option of Wachovia, repayment at the option of the holder or otherwise), and some notes may not bear interest. Wachovia may from time to time, without the consent of the existing holders of the relevant notes, create and issue further notes having the same terms and conditions as such notes in all respects, except for the issue date, issue price and, if applicable, the first payment of interest thereon. Additional notes issued in this manner will be consolidated with, and will form a single series with, the previously outstanding notes.

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

Unless we specify otherwise in the relevant pricing supplement, currency amounts in this prospectus are expressed in United States dollars.
Unless we specify otherwise in any note and pricing supplement, the notes

Table of Contents

will be denominated in U.S. dollars and payments of principal, premium, if any, and any interest on the notes will be made in U.S. dollars. If any note is to be denominated other than exclusively in U.S. dollars, or if the principal of, premium, if any, or any interest on the note is to be paid in one or more currencies (or currency units or in amounts determined by reference to an index or indices) other than that in which that note is denominated, additional information (including authorized denominations and related exchange rate information) will be provided in the relevant pricing supplement. Unless we specify otherwise in any pricing supplement, notes denominated in U.S. dollars will be issued in denominations of \$1,000 or any integral multiple of \$1,000.

Interest rates that we offer on the notes may differ depending upon, among other factors, the aggregate principal amount of notes purchased in any single transaction. Notes with different variable terms other than interest rates may also be offered concurrently to different investors. We may change interest rates or formulas and other terms of notes from time to time, but no change of terms will affect any note we have previously issued or as to which we have accepted an offer to purchase.

Each note will be issued as a book-entry note in fully registered form without coupons. Each note issued in book-entry form will be represented by a global note that we deposit with and register in the name of a financial institution or its nominee, that we select. The financial institution that we select for this purpose is called the depository. Unless we specify otherwise in the applicable pricing supplement, The Depository Trust Company, New York, New York, will be the depository for all notes in global form. Except as discussed below under "Global Notes", owners of beneficial interests in book-entry notes will not be entitled to physical delivery of notes in certificated form. We will make payments of principal of, and premium, if any and interest, if any, on the notes through the applicable trustee to the depository for the notes. See "Global Notes".

The indentures do not limit the aggregate principal amount of debt securities or of any particular series of debt securities which may be issued under the indentures and provide that these debt securities may be issued at various times in one or more series, in each case with the same or various maturities, at par or at a discount. (*Section 301*) The indentures provide that there may be more than one trustee under the indentures with respect to different series of debt securities. As of March 31, 2005, \$16.0 billion aggregate principal amount of senior debt securities was outstanding under the senior indenture. The senior trustee is trustee for such series. As of March 31, 2005, \$31.9 billion aggregate principal amount of subordinated debt securities was outstanding under the subordinated indenture. The subordinated trustee is trustee for such series.

The indentures do not limit the amount of other debt that Wachovia may issue and do not contain financial or similar restrictive covenants. As of March 31, 2005, Wachovia had an aggregate of \$27.4 billion of short-term senior indebtedness outstanding which consisted primarily of commercial paper and other borrowed money. Wachovia expects from time to time to incur additional senior indebtedness and Other Financial Obligations (as defined below). The indentures do not prohibit or limit additional senior indebtedness or Other Financial Obligations.

Because Wachovia is a holding company and a legal entity separate and distinct from its subsidiaries, Wachovia's rights to participate in any distribution of assets of any subsidiary upon its liquidation, reorganization or otherwise, and the holders of notes' ability to benefit indirectly from such distribution, would be subject to prior creditor's claims, except to the extent that Wachovia itself may be a creditor of that subsidiary with recognized claims. Claims on Wachovia's subsidiary banks by creditors other than Wachovia include long-term debt and substantial obligations with respect to deposit liabilities and federal funds purchased, securities sold under repurchase agreements, other short-term borrowings and various other financial obligations. The indentures do not contain any covenants designed to afford holders of notes protection in the event of a highly leveraged transaction involving Wachovia.

Legal Ownership

Street Name and Other Indirect Holders

Investors who hold their notes in accounts at banks or brokers will generally not be recognized by us as legal holders of notes. This is called holding in street name. Instead, we would recognize only the bank or

Table of Contents

broker, or the financial institution the bank or broker uses to hold its notes. These intermediary banks, brokers and other financial institutions pass along principal, interest and other payments on the notes, either because they agree to do so in their customer agreements or because they are legally required to do so. If you hold your notes in street name, you should check with your own institution to find out:

how it handles note payments and notices;

whether it imposes fees or charges;

how it would handle voting if it were ever required;

whether and how you can instruct it to send you notes registered in your own name so you can be a direct holder as described below; and

how it would pursue rights under the notes if there were a default or other event triggering the need for holders to act to protect their interests.

Direct Holders

Our obligations, as well as the obligations of the trustee and those of any third parties employed by us or the trustee, under the notes run only to persons who are registered as holders of notes. As noted above, we do not have obligations to you if you hold in street name or other indirect means, either because you choose to hold your notes in that manner or because the notes are issued in the form of global securities as described below. For example, once we make payment to the registered holder we have no further responsibility for the payment even if that holder is legally required to pass the payment along to you as a street name customer but does not do so.

Global Notes

A global note is a special type of indirectly held security, as described above under [Street Name and Other Indirect Holders](#) . If we choose to issue notes in the form of global notes, the ultimate beneficial owners of global notes can only be indirect holders. We require that the global note be registered in the name of a financial institution we select.

We also require that the notes included in the global note not be transferred to the name of any other direct holder except in the special circumstances described in the section [Global Notes](#) . The financial institution that acts as the sole direct holder of the global note is called the depositary. Any person wishing to own a global note must do so indirectly by virtue of an account with a broker, bank or other financial institution that in turn has an account with the depositary. The pricing supplement indicates whether your series of notes will be issued only in the form of global notes.

Further details of legal ownership are discussed in the section [Global Notes](#) below.

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

In the remainder of this description you or holder means direct holders and not street name or other indirect holders of notes. Indirect holders should read the previous subsection titled Street Name and Other Indirect Holders .

Types of Notes

We may issue the following four types of notes:

Fixed Rate Notes. A note of this type will bear interest at a fixed rate described in the applicable pricing supplement. This type includes zero-coupon notes, which bear no interest and are instead issued at a price lower than the principal amount.

Table of Contents

Floating Rate Notes. A note of this type will bear interest at rates that are determined by reference to an interest rate formula. In some cases, the rates may also be adjusted by adding or subtracting a spread or multiplying by a spread multiplier and may be subject to a minimum rate or a maximum rate. The various interest rate formulas and these other features are described below in **Interest Rates Floating Rate Notes** . If your note is a floating rate note, the formula and any adjustments that apply to the interest rate will be specified in your pricing supplement.

Indexed Notes. A note of this type provides that the principal amount payable at its maturity, and/or the amount of interest payable on an interest payment date, will be determined by reference to:

one or more securities;

one or more currencies;

one or more commodities;

any other financial, economic or other measures or instruments, including the occurrence or non-occurrence of any event or circumstance; and/or

indices or baskets of any of these items.

If you are a holder of an indexed note, you may receive a principal amount at maturity that is greater than or less than the face amount of your note depending upon the value of the applicable index at maturity. That value may fluctuate over time. If you purchase an indexed note your pricing supplement will include information about the relevant index and about how amounts that are to become payable will be determined by reference to that index. Before you purchase any indexed note, you should read carefully the section entitled **Risk Factors Risks Relating to Indexed Notes** above.

Exchangeable Notes. We may issue notes, which we refer to as **exchangeable notes**, that are exchangeable, at our option or the option of the holder, into securities of an issuer other than Wachovia or into other property. The exchangeable notes may or may not bear interest or be issued with original issue discount or at a premium. The general terms of the exchangeable notes are described below.

Optionally Exchangeable Notes. The holder of an optionally exchangeable note may, during a period, or at specific times, exchange the note for the underlying property at a specified rate of exchange. If specified in your pricing supplement, we will have the option to redeem the optionally exchangeable note prior to maturity. If the holder of an optionally exchangeable note does not elect to exchange the note prior to maturity or any redemption date, the holder will receive the principal amount of the note plus any accrued interest at maturity or upon redemption.

Mandatorily Exchangeable Notes. At maturity, the holder of a mandatorily exchangeable note must exchange the note for the underlying property at a specified rate of exchange, and, therefore, depending upon the value of the underlying property at maturity, the holder of a mandatorily exchangeable note may receive less than the principal amount of the note at maturity. If so indicated in your pricing supplement, the specified rate at which a mandatorily exchangeable note may be exchanged may vary depending on the value of the underlying property so that, upon exchange, the holder participates in a percentage, which may be less than, equal to, or greater than 100% of the change in value of the underlying property. Mandatorily exchangeable notes may include notes where we have the right, but not the obligation, to require holders of notes to exchange their notes for the underlying property.

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

Payments upon Exchange. Your pricing supplement will specify if upon exchange, at maturity or otherwise, the holder of an exchangeable note may receive, at the specified exchange rate, either the underlying property or the cash value of the underlying property. The underlying property may be the securities of either U.S. or foreign entities or both. The exchangeable notes may or may not provide for

Table of Contents

protection against fluctuations in the exchange rate between the currency in which that note is denominated and the currency or currencies in which the market prices of the underlying security or securities are quoted. Exchangeable notes may have other terms, which will be specified in your pricing supplement.

Special Requirements for Exchange of Global Securities. If an optionally exchangeable note is represented by a global security, the depositary's nominee will be the holder of that note and therefore will be the only entity that can exercise a right to exchange. In order to ensure that the depositary's nominee will timely exercise a right to exchange a particular note or any portion of a particular note, the beneficial owner of the note must instruct the broker or other direct or indirect participant through which it holds an interest in that note to notify the depositary of its desire to exercise a right to exchange. Different firms have different deadlines for accepting instructions from their customers. Each beneficial owner should consult the broker or other participant through which it holds an interest in a note in order to ascertain the deadline for ensuring that timely notice will be delivered to the depositary.

Payments upon Acceleration of Maturity or upon Tax Redemption. If the principal amount payable at maturity of any exchangeable note is declared due and payable prior to maturity, the amount payable on:

an optionally exchangeable note will equal the face amount of the note plus accrued interest, if any, to but excluding the date of payment, except that if a holder has exchanged an optionally exchangeable note prior to the date of declaration or tax redemption without having received the amount due upon exchange, the amount payable will be an amount of cash equal to the amount due upon exchange and will not include any accrued but unpaid interest; and

a mandatorily exchangeable note will equal an amount determined as if the date of declaration or tax redemption were the maturity date plus accrued interest, if any, to but excluding the date of payment.

Original Issue Discount Notes

A fixed rate note, a floating rate note or an indexed note may be an original issue discount note. A note of this type is issued at a price lower than its principal amount and provides that, upon redemption or acceleration of its maturity, an amount less than its principal amount will be payable. An original issue discount note may be a zero coupon note. A note issued at a discount to its principal may, for U.S. federal income tax purposes, be considered an original issue discount note, regardless of the amount payable upon redemption or acceleration of maturity. See United States Taxation below for a brief description of the U.S. federal income tax consequences of owning an original issue discount note.

Information in the Pricing Supplement

Your pricing supplement will describe one or more of the following terms of your note:

the stated maturity;

the specified currency or currencies for principal and interest, if not U.S. dollars;

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

the price at which we originally issue your note, expressed as a percentage of the principal amount, and the original issue date;

whether your note is a fixed rate note, a floating rate note, an indexed note or an exchangeable note;

if your note is a fixed rate note, the yearly rate at which your note will bear interest, if any, and the interest payment dates;

if your note is a floating rate note, the interest rate basis, which may be one of the nine interest rate bases described in [Interest Rates Floating Rate Notes](#) below; any applicable index currency or maturity, spread or spread multiplier or initial, maximum or minimum rate; and the

Table of Contents

interest reset, determination, calculation and payment dates, all of which we describe under Interest Rates Floating Rate Notes below;

if your note is an indexed note, the principal amount, if any, we will pay you at maturity, the amount of interest, if any, we will pay you on an interest payment date or the formula we will use to calculate these amounts, if any, and whether your note will be exchangeable for or payable in cash, securities of an issuer other than Wachovia or other property;

if your note is an exchangeable note, the securities or property for which the notes may be exchanged, whether the notes are exchangeable at your option or at Wachovia's option, and the other items described in Exchangeable Notes above;

if your note is an original issue discount note, the yield to maturity;

if applicable, the circumstances under which your note may be redeemed at our option before the stated maturity, including any redemption commencement date, redemption price(s) and redemption period(s);

if applicable, the circumstances under which you may demand repayment of your note before the stated maturity, including any repayment commencement date, repayment price(s) and repayment period(s);

any special United States federal income tax consequences of the purchase, ownership or disposition of a particular issuance of notes;

the use of proceeds, if materially different than those discussed in this prospectus; and

any other terms of your note, which could be different from those described in this prospectus.

Market-Making Transactions. If you purchase your note in a market-making transaction, you will receive information about the price you pay and your trade and settlement dates in a separate confirmation of sale. A market-making transaction is one in which Wachovia Securities or another of our affiliates resells a note that it has previously acquired from another holder. A market-making transaction in a particular note occurs after the original sale of the note.

Redemption at the Option of Wachovia; No Sinking Fund

If an initial redemption date is specified in the applicable pricing supplement, we may redeem the particular notes prior to their stated maturity date at our option on any date on or after that initial redemption date in whole or from time to time in part in increments of \$1,000 or any other integral multiple of an authorized denomination specified in the applicable pricing supplement (provided that any remaining principal amount thereof shall be at least \$1,000 or other minimum authorized denomination applicable thereto), at the applicable redemption price (as defined below), together with unpaid interest accrued thereon to the date of redemption. We must give written notice to registered holders of the particular notes to be redeemed at our option not more than 60 nor less than 30 calendar days prior to the date of redemption. Redemption price, with respect to a note, means an amount equal to the initial redemption percentage specified in the applicable pricing supplement (as adjusted by the annual redemption percentage reduction, if applicable) multiplied by the unpaid principal amount thereof to be redeemed. The initial redemption percentage, if any, applicable to a note shall decline at each anniversary of the initial redemption date by an amount equal to the applicable annual redemption percentage reduction, if any, until the redemption price is equal to 100% of the unpaid principal amount thereof to be redeemed.

The notes will not be subject to, or entitled to the benefit of, any sinking fund.

Table of Contents

Repayment at the Option of the Holder

If one or more optional repayment dates are specified in the applicable pricing supplement, registered holders of the particular notes may require us to repay those notes prior to their stated maturity date on any optional repayment date in whole or from time to time in part in increments of \$1,000 or any other integral multiple of an authorized denomination specified in the applicable pricing supplement (provided that any remaining principal amount thereof shall be at least \$1,000 or other minimum authorized denomination applicable thereto), at a repayment price equal to 100% of the unpaid principal amount thereof to be repaid, together with unpaid interest accrued thereon to the date of repayment. A registered holder's exercise of the repayment option will be irrevocable.

For any note to be repaid, the applicable trustee must receive, at its corporate trust office in the Borough of Manhattan, The City of New York, not more than 60 nor less than 30 calendar days prior to the date of repayment, the particular notes to be repaid and, in the case of a book-entry note, repayment instructions from the applicable beneficial owner (as defined below) to the depository and forwarded by the depository.

Only the depository may exercise the repayment option in respect of global notes representing book-entry notes. Accordingly, beneficial owners of global notes that desire to have all or any portion of the book-entry notes represented thereby repaid must instruct the participant (as defined below) through which they own their interest to direct the depository to exercise the repayment option on their behalf by forwarding the repayment instructions to the applicable trustee as aforesaid. In order to ensure that these instructions are received by the applicable trustee on a particular day, the applicable beneficial owner must so instruct the participant through which it owns its interest before that participant's deadline for accepting instructions for that day. Different firms may have different deadlines for accepting instructions from their customers. Accordingly, beneficial owners should consult their participants for the respective deadlines. All instructions given to participants from beneficial owners of global notes relating to the option to elect repayment shall be irrevocable. In addition, at the time repayment instructions are given, each beneficial owner shall cause the participant through which it owns its interest to transfer the beneficial owner's interest in the global note representing the related book-entry notes, on the depository's records, to the applicable trustee. See Global Notes.

If applicable, we will comply with the requirements of Section 14(e) of the Securities Exchange Act of 1934, as amended (the Exchange Act), and the rules promulgated thereunder, and any other securities laws or regulations in connection with any repayment of notes at the option of the registered holders thereof.

We may at any time purchase notes at any price or prices in the open market or otherwise. Notes so purchased by us may, at our discretion, be held, resold or surrendered to the applicable trustee for cancellation.

Interest

Each interest-bearing note will bear interest from its date of issue at the rate per annum, in the case of a fixed rate note, or pursuant to the interest rate formula, in the case of a floating rate note, in each case as specified in the applicable pricing supplement, until the principal thereof is paid. We will make interest payments in respect of fixed rate notes and floating rate notes in an amount equal to the interest accrued from and including the immediately preceding interest payment date in respect of which interest has been paid or from and including the date of issue, if no interest has been paid, to but excluding the applicable interest payment date or the maturity date, as the case may be (each, an interest period).

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

Interest on fixed rate notes and floating rate notes will be payable in arrears on each interest payment date and on the maturity date. The first payment of interest on any note originally issued between a regular record date and the related interest payment date will be made on the interest payment date immediately following the next succeeding record date to the registered holder on the next succeeding record date. The

Table of Contents

regular record date shall be the fifteenth calendar day, whether or not a business day, immediately preceding the related interest payment date. Business Day is defined below under Interest Rates Special Rate Calculation Terms. For the purpose of determining the holder at the close of business on a regular record date when business is not being conducted, the close of business will mean 5:00 P.M., New York City time, on that day.

Interest Rates

This subsection describes the different kinds of interest rates that may apply to your note, if it bears interest.

Fixed Rate Notes

The relevant pricing supplement will specify the interest payment dates for a fixed rate note as well as the maturity date. Interest on fixed rate notes will be computed on the basis of a 360-day year of twelve 30-day months or such other day count fraction set forth in the pricing supplement.

If any interest payment date or the maturity date of a fixed rate note falls on a day that is not a business day, we will make the required payment of principal, premium, if any, and/or interest on the next succeeding business day, and no additional interest will accrue in respect of the payment made on that next succeeding business day.

Floating Rate Notes

*In this subsection, we use several specialized terms relating to the manner in which floating interest rates are calculated. These terms appear in **bold, italicized** type the first time they appear, and we define these terms in Special Rate Calculation Terms at the end of this subsection.*

The following will apply to floating rate notes.

Interest Rate Basis. We currently expect to issue floating rate notes that bear interest at rates based on one or more of the following interest rate bases:

commercial paper rate;

prime rate;

LIBOR;

EURIBOR;

treasury rate;

CMT rate;

CD rate;

consumer price index (CPI) rate; and/or

federal funds rate.

We describe each of the interest rate bases in further detail below in this subsection. If you purchase a floating rate note, your pricing supplement will specify the interest rate basis that applies to your note.

Calculation of Interest. Calculations relating to floating rate notes will be made by the calculation agent, an institution that we appoint as our agent for this purpose. That institution may include any affiliate of ours, such as Wachovia Securities or Wachovia Bank, National Association. If other than Wachovia

Table of Contents

Securities or Wachovia Bank, National Association, the pricing supplement for a particular floating rate note will name the institution that we have appointed to act as the calculation agent for that note as of its original issue date. We may appoint a different institution to serve as calculation agent from time to time after the original issue date of the note without your consent and without notifying you of the change.

For each floating rate note, the calculation agent will determine, on no later than the corresponding interest calculation date or on the interest determination date, as described below, the interest rate that takes effect on each interest reset date. In addition, the calculation agent will calculate the amount of interest that has accrued during each interest period i.e., the period from and including the original issue date, or the last date to which interest has been paid or made available for payment, to but excluding the payment date. For each interest period, the calculation agent will calculate the amount of accrued interest by multiplying the face or other specified amount of the floating rate note by an accrued interest factor for the interest period. This factor will equal the sum of the interest factors calculated for each day during the interest period. The interest factor for each day will be expressed as a decimal and will be calculated by dividing the interest rate, also expressed as a decimal, applicable to that day by 360 or by the actual number of days in the year, as specified in the relevant pricing supplement.

Upon the request of the holder of any floating rate note, the calculation agent will provide for that note the interest rate then in effect and, if determined, the interest rate that will become effective on the next interest reset date. The calculation agent's determination of any interest rate, and its calculation of the amount of interest for any interest period, will be final and binding in the absence of manifest error.

All percentages resulting from any calculation relating to a note will be rounded upward or downward, as appropriate, to the next higher or lower one hundred-thousandth of a percentage point, e.g., 9.876541% (or .09876541) being rounded down to 9.87654% (or .0987654) and 9.876545% (or .09876545) being rounded up to 9.87655% (or .0987655). All amounts used in or resulting from any calculation relating to a floating rate note will be rounded upward or downward, as appropriate, to the nearest cent, in the case of U.S. dollars, or to the nearest corresponding hundredth of a unit, in the case of a currency other than U.S. dollars, with one-half cent or one-half of a corresponding hundredth of a unit or more being rounded upward.

In determining the interest rate basis that applies to a floating rate note during a particular interest period, the calculation agent may obtain rate quotes from various banks or dealers active in the relevant market, as discussed below. Those reference banks and dealers may include the calculation agent itself and its affiliates, as well as any agent participating in the distribution of the relevant floating rate notes and its affiliates, and they may include affiliates of Wachovia.

Initial Interest Rate. For any floating rate note, the interest rate in effect from the original issue date to the first interest reset date will be the initial interest rate. We will specify the initial interest rate or the manner in which it is determined in the relevant pricing supplement.

Spread or Spread Multiplier. In some cases, the interest rate basis for a floating rate note may be adjusted:

by adding or subtracting a specified number of basis points, called the spread, with one basis point being 0.01%; or

by multiplying the interest rate basis by a specified percentage, called the spread multiplier.

If you purchase a floating rate note, your pricing supplement will indicate whether a spread or spread multiplier will apply to your note and, if so, the amount of the spread or spread multiplier.

Table of Contents

Maximum and Minimum Rates. The actual interest rate, after being adjusted by the spread or spread multiplier, may also be subject to either or both of the following limits:

a maximum rate i.e., a specified upper limit that the actual interest rate in effect at any time may not exceed; and/or

a minimum rate i.e., a specified lower limit that the actual interest rate in effect at any time may not fall below.

If you purchase a floating rate note, your pricing supplement will indicate whether a maximum rate and/or minimum rate will apply to your note and, if so, what those rates are.

Whether or not a maximum rate applies, the interest rate on a floating rate note will in no event be higher than the maximum rate permitted by New York law, as it may be modified by U.S. law of general application. Under current New York law, the maximum rate of interest, with some exceptions, for any loan in an amount less than \$250,000 is 16% and for any loan in the amount of \$250,000 or more but less than \$2,500,000 is 25% per year on a simple interest basis. These limits do not apply to loans of \$2,500,000 or more.

The rest of this subsection describes how the interest rate and the interest payment dates will be determined, and how interest will be calculated, on a floating rate note.

Interest Reset Dates. The rate of interest on a floating rate note will be reset, by the calculation agent described below, daily, weekly, monthly, quarterly, semi-annually or annually. The date on which the interest rate resets and the reset rate becomes effective is called the interest reset date. Except as otherwise specified in the applicable pricing supplement, the interest reset date will be as follows:

for floating rate notes that reset daily, each *business day*;

for floating rate notes that reset weekly and are not treasury rate notes, the Wednesday of each week;

for treasury rate notes that reset weekly, the Tuesday of each week;

for floating rate notes that reset monthly, the third Wednesday of each month;

for floating rate notes that reset quarterly, the third Wednesday of March, June, September and December of each year;

for floating rate notes that reset semi-annually, the third Wednesday of each of two months of each year as indicated in the relevant pricing supplement; and

for floating rate notes that reset annually, the third Wednesday of one month of each year as indicated in the relevant pricing supplement.

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

For a floating rate note, the interest rate in effect on any particular day will be the interest rate determined with respect to the latest interest reset date that occurs on or before that day. There are several exceptions, however, to the reset provisions described above.

The interest rate in effect from the original issue date to the first interest reset date will be the initial interest rate.

If any interest reset date for a floating rate note would otherwise be a day that is not a business day, the interest reset date will be postponed to the next day that is a business day. For a LIBOR or EURIBOR note, however, if that business day is in the next succeeding calendar month, the interest reset date will be the immediately preceding business day.

Table of Contents

Interest Determination Dates. The interest rate that takes effect on an interest reset date will be determined by the calculation agent by reference to a particular date called an interest determination date. Except as otherwise indicated in the relevant pricing supplement:

for commercial paper rate, federal funds rate and prime rate notes, the interest determination date relating to a particular interest reset date will be the business day preceding the interest reset date;

for CD rate, CPI rate, and CMT rate notes, the interest determination date relating to a particular interest reset date will be the second business day preceding the interest reset date;

for LIBOR notes, the interest determination date relating to a particular interest reset date will be the second ***London business day*** preceding the interest reset date, unless the ***index currency*** is pounds sterling, in which case the interest determination date will be the interest reset date. We refer to an interest determination date for a LIBOR note as a LIBOR interest determination date;

for EURIBOR notes, the interest determination date relating to a particular interest reset date will be the second ***euro business day*** preceding the interest reset date. We refer to an interest determination date for a EURIBOR note as a EURIBOR interest determination date; and

for treasury rate notes, the interest determination date relating to a particular interest reset date, which we refer to as a treasury interest determination date, will be the day of the week in which the interest reset date falls on which treasury bills i.e., direct obligations of the U.S. government would normally be auctioned. Treasury bills are usually sold at auction on the Monday of each week, unless that day is a legal holiday, in which case the auction is usually held on the following Tuesday, except that the auction may be held on the preceding Friday. If as the result of a legal holiday an auction is held on the preceding Friday, that Friday will be the treasury interest determination date relating to the interest reset date occurring in the next succeeding week.

The interest determination date pertaining to a floating rate note the interest rate of which is determined with reference to two or more interest rate bases will be the latest business day which is at least two business days before the related interest reset date for the applicable floating rate note on which each interest rate basis is determinable.

Interest Calculation Dates. As described above, the interest rate that takes effect on a particular interest reset date will be determined by reference to the corresponding interest determination date. Except for LIBOR notes and EURIBOR notes, however, the determination of the rate will actually be made on a day no later than the corresponding interest calculation date. The interest calculation date will be the earlier of the following:

the tenth calendar day after the interest determination date or, if that tenth calendar day is not a business day, the next succeeding business day; and

the business day immediately preceding the interest payment date or the maturity, whichever is the day on which the next payment of interest will be due.

The calculation agent need not wait until the relevant interest calculation date to determine the interest rate if the rate information it needs to make the determination is available from the relevant sources sooner.

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

Interest Payment Dates. The interest payment dates for a floating rate note will depend on when the interest rate is reset and, unless we specify otherwise in the relevant pricing supplement, will be as follows:

for floating rate notes that reset daily, weekly or monthly, the third Wednesday of each month or the third Wednesday of March, June, September and December of each year, as specified in the relevant pricing supplement;

for floating rate notes that reset quarterly, the third Wednesday of March, June, September and December of each year;

Table of Contents

for floating rate notes that reset semi-annually, the third Wednesday of the two months of each year specified in the relevant pricing supplement; or

for floating rate notes that reset annually, the third Wednesday of the month specified in the relevant pricing supplement.

Regardless of these rules, if a note is originally issued after the regular record date and before the date that would otherwise be the first interest payment date, the first interest payment date will be the date that would otherwise be the second interest payment date.

In addition, the following special provision will apply to a floating rate note with regard to any interest payment date other than one that falls on the maturity. If the interest payment date would otherwise fall on a day that is not a business day, then the interest payment date will be the next day that is a business day. However, if the floating rate note is a LIBOR note or a EURIBOR note and the next business day falls in the next calendar month, then the interest payment date will be advanced to the next preceding day that is a business day. If the maturity date of a floating rate note falls on a day that is not a business day, we will make the required payment of principal, premium, if any, and interest on the next succeeding business day, and no additional interest will accrue in respect of the payment made on that next succeeding business day.

Calculation Agent. We have initially appointed Wachovia Capital Markets, LLC as our calculation agent for the notes. See Calculation of Interest above for details regarding the role of the calculation agent.

Commercial Paper Rate Notes

If you purchase a commercial paper rate note, your note will bear interest at an interest rate equal to the commercial paper rate and adjusted by the spread or spread multiplier, if any, indicated in your pricing supplement.

The commercial paper rate will be the **money market yield** of the rate, for the relevant interest determination date, for commercial paper having the **index maturity** indicated in your pricing supplement, as published in **H.15(519)** under the heading Commercial Paper Nonfinancial . If the commercial paper rate cannot be determined as described above, the following procedures will apply.

If the rate described above does not appear in H.15(519) at 3:00 P.M., New York City time, on the relevant interest calculation date, unless the calculation is made earlier and the rate is available from that source at that time, then the commercial paper rate will be the rate, for the relevant interest determination date, for commercial paper having the index maturity specified in your pricing supplement, as published in **H.15 daily update** or any other recognized electronic source used for displaying that rate, under the heading Commercial Paper Nonfinancial .

If the rate described above does not appear in H.15(519), H.15 daily update or another recognized electronic source at 3:00 P.M., New York City time, on the relevant interest calculation date, unless the calculation is made earlier and the rate is available from one of those sources at that time, the commercial paper rate will be the money market yield of the arithmetic mean of the following offered rates for U.S. dollar commercial paper that has the relevant index maturity and is placed for an industrial issuer whose bond rating is AA , or the equivalent, from a nationally recognized rating agency: the rates offered as of 11:00 A.M., New York City time, on the relevant interest determination date, by three leading U.S. dollar commercial paper dealers in New York City selected by the calculation agent.

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

If fewer than three dealers selected by the calculation agent are quoting as described above, the commercial paper rate for the new interest period will be the commercial paper rate in effect for the prior interest period. If the initial interest rate has been in effect for the prior interest period, however, it will remain in effect for the new interest period.

Table of Contents

Prime Rate Notes

If you purchase a prime rate note, your note will bear interest at an interest rate equal to the prime rate and adjusted by the spread or spread multiplier, if any, indicated in your pricing supplement.

The prime rate will be the rate, for the relevant interest determination date, published in H.15(519) under the heading **Bank Prime Loan**. If the prime rate cannot be determined as described above, the following procedures will apply.

If the rate described above does not appear in H.15(519) at 3:00 P.M., New York City time, on the relevant interest calculation date, unless the calculation is made earlier and the rate is available from that source at that time, then the prime rate will be the rate, for the relevant interest determination date, as published in H.15 daily update or another recognized electronic source used for the purpose of displaying that rate, under the heading **Bank Prime Loan**.

If the rate described above does not appear in H.15(519), H.15 daily update or another recognized electronic source at 3:00 P.M., New York City time, on the relevant interest calculation date, unless the calculation is made earlier and the rate is available from one of those sources at that time, then the prime rate will be the arithmetic mean of the following rates as they appear on the **Reuters screen US PRIME 1 page**: the rate of interest publicly announced by each bank appearing on that page as that bank's prime rate or base lending rate, as of 11:00 A.M., New York City time, on the relevant interest determination date.

If fewer than four of these rates appear on the Reuters screen US PRIME 1 page, the prime rate will be the arithmetic mean of the prime rates or base lending rates, as of the close of business on the relevant interest determination date, of three major banks in New York City selected by the calculation agent. For this purpose, the calculation agent will use rates quoted on the basis of the actual number of days in the year divided by a 360-day year.

If fewer than three banks selected by the calculation agent are quoting as described above, the prime rate for the new interest period will be the prime rate in effect for the prior interest period. If the initial interest rate has been in effect for the prior interest period, however, it will remain in effect for the new interest period.

LIBOR Notes

If you purchase a LIBOR note, your note will bear interest at an interest rate equal to LIBOR, which will be the London interbank offered rate for deposits in U.S. dollars or any other index currency, as noted in your pricing supplement. In addition, when LIBOR is the interest rate basis the applicable LIBOR rate will be adjusted by the spread or spread multiplier, if any, indicated in your pricing supplement. LIBOR will be determined in the following manner:

LIBOR will be either:

the offered rate appearing on the **Telerate LIBOR page**; or

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

the arithmetic mean of the offered rates appearing on the *Reuters screen LIBOR page* unless that page by its terms cites only one rate, in which case that rate;

in either case, as of 11:00 A.M., London time, on the relevant LIBOR interest determination date, for deposits of the relevant index currency having the relevant index maturity beginning on the relevant interest reset date. Your pricing supplement will indicate the index currency, the index maturity and the reference page that apply to your LIBOR note. If no reference page is mentioned in your pricing supplement, Telerate LIBOR page will apply to your LIBOR note.

If Telerate LIBOR page applies and the rate described above does not appear on that page, or if Reuters screen LIBOR page applies and fewer than two of the rates described above appears on that page or no rate appears on any page on which only one rate normally appears, then LIBOR

Table of Contents

will be determined on the basis of the rates, at approximately 11:00 A.M., London time, on the relevant LIBOR interest determination date, at which deposits of the following kind are offered to prime banks in the London interbank market by four major banks in that market selected by the calculation agent: deposits of the index currency having the relevant index maturity, beginning on the relevant interest reset date, and in a *representative amount*. The calculation agent will request the principal London office of each of these banks to provide a quotation of its rate. If at least two quotations are provided, LIBOR for the relevant LIBOR interest determination date will be the arithmetic mean of the quotations.

If fewer than two quotations are provided as described above, LIBOR for the relevant LIBOR interest determination date will be the arithmetic mean of the rates for loans of the following kind to leading European banks quoted, at approximately 11:00 A.M., in the principal financial center for the country of the index currency, on that LIBOR interest determination date, by three major banks in that financial center selected by the calculation agent: loans of the index currency having the relevant index maturity, beginning on the relevant interest reset date, and in a representative amount.

If fewer than three banks selected by the calculation agent are quoting as described above, LIBOR for the new interest period will be LIBOR in effect for the prior interest period. If the initial interest rate has been in effect for the prior interest period, however, it will remain in effect for the new interest period.

EURIBOR Notes

If you purchase a EURIBOR note, your note will bear interest at an interest rate equal to the interest rate for deposits in euro, designated as EURIBOR and sponsored jointly by the European Banking Federation and ACI the Financial Market Association, or any company established by the joint sponsors for purposes of compiling and publishing that rate. In addition, when EURIBOR is the interest rate basis the EURIBOR base rate will be adjusted by the spread or spread multiplier, if any, specified in your pricing supplement. EURIBOR will be determined in the following manner:

EURIBOR will be the offered rate for deposits in euros having the index maturity specified in your pricing supplement, beginning on the second *euro business day* after the relevant EURIBOR interest determination date, as that rate appears on *Telerate page* 248 as of 11:00 A.M., Brussels time, on the relevant EURIBOR interest determination date.

If the rate described above does not appear on Telerate page 248, EURIBOR will be determined on the basis of the rates, at approximately 11:00 A.M., Brussels time, on the relevant EURIBOR interest determination date, at which deposits of the following kind are offered to prime banks in the *euro-zone* interbank market by the principal euro-zone office of each of four major banks in that market selected by the calculation agent: euro deposits having the relevant index maturity, beginning on the relevant interest reset date, and in a representative amount. The calculation agent will request the principal euro-zone office of each of these banks to provide a quotation of its rate. If at least two quotations are provided, EURIBOR for the relevant EURIBOR interest determination date will be the arithmetic mean of the quotations.

If fewer than two quotations are provided as described above, EURIBOR for the relevant EURIBOR interest determination date will be the arithmetic mean of the rates for loans of the following kind to leading euro-zone banks quoted, at approximately 11:00 A.M., Brussels time on that EURIBOR interest determination date, by three major banks in the euro-zone selected by the calculation agent: loans of euros having the relevant index maturity, beginning on the relevant interest reset date, and in a representative amount.

If fewer than three banks selected by the calculation agent are quoting as described above, EURIBOR for the new interest period will be EURIBOR in effect for the prior interest period. If the initial interest rate has been in effect for the prior interest period, however, it will remain in effect for the new interest period.

Table of Contents

Treasury Rate Notes

If you purchase a treasury rate note, your note will bear interest at an interest rate equal to the treasury rate and adjusted by the spread or spread multiplier, if any, indicated in your pricing supplement.

The treasury rate will be the rate for the auction, on the relevant treasury interest determination date, of treasury bills having the index maturity specified in your pricing supplement, as that rate appears on Telerate page 56 or 57 under the heading *Investment Rate*. If the treasury rate cannot be determined in this manner, the following procedures will apply.

If the rate described above does not appear on either page at 3:00 P.M., New York City time, on the relevant interest calculation date, unless the calculation is made earlier and the rate is available from that source at that time, the treasury rate will be the ***bond equivalent yield*** of the rate, for the relevant interest determination date, for the type of treasury bill described above, as published in H.15 daily update, or another recognized electronic source used for displaying that rate, under the heading *U.S. Government Securities/Treasury Bills/Auction High*.

If the rate described in the prior paragraph does not appear in H.15 daily update or another recognized electronic source at 3:00 P.M., New York City time, on the relevant interest calculation date, unless the calculation is made earlier and the rate is available from one of those sources at that time, the treasury rate will be the bond equivalent yield of the auction rate, for the relevant treasury interest determination date and for treasury bills of the kind described above, as announced by the U.S. Department of the Treasury.

If the auction rate described in the prior paragraph is not so announced by 3:00 P.M., New York City time, on the relevant interest calculation date, or if no such auction is held for the relevant week, then the treasury rate will be the bond equivalent yield of the rate, for the relevant treasury interest determination date and for treasury bills having a remaining maturity closest to the specified index maturity, as published in H.15(519) under the heading *U.S. Government Securities /Treasury Bills/Secondary Market*.

If the rate described in the prior paragraph does not appear in H.15(519) at 3:00 P.M., New York City time, on the relevant interest calculation date, unless the calculation is made earlier and the rate is available from one of those sources at that time, then the treasury rate will be the rate, for the relevant treasury interest determination date and for treasury bills having a remaining maturity closest to the specified index maturity, as published in H.15 daily update, or another recognized electronic source used for displaying that rate, under the heading *U.S. Government Securities/Treasury Bills/Secondary Market*.

If the rate described in the prior paragraph does not appear in H.15 daily update or another recognized electronic source at 3:00 P.M., New York City time, on the relevant interest calculation date, unless the calculation is made earlier and the rate is available from one of those sources at that time, the treasury rate will be the bond equivalent yield of the arithmetic mean of the following secondary market bid rates for the issue of treasury bills with a remaining maturity closest to the specified index maturity: the rates bid as of approximately 3:30 P.M., New York City time, on the relevant treasury interest determination date, by three primary U.S. government securities dealers in New York City selected by the calculation agent.

If fewer than three dealers selected by the calculation agent are quoting as described in the prior paragraph, the treasury rate in effect for the new interest period will be the treasury rate in effect for the prior interest period. If the initial interest rate has been in effect for the prior interest period, however, it will remain in effect for the new interest period.

CD Rate Notes

If you purchase a CD rate note, your note will bear interest at an interest rate equal to the CD rate and adjusted by the spread or spread multiplier, if any, indicated in your pricing supplement.

Table of Contents

The CD rate will be the rate, on the relevant interest determination date, for negotiable U.S. dollar certificates of deposit having the index maturity specified in your pricing supplement, as published in H.15(519) under the heading CDs (Secondary Market) . If the CD rate cannot be determined in this manner, the following procedures will apply.

If the rate described above does not appear in H.15(519) at 3:00 P.M., New York City time, on the relevant interest calculation date, unless the calculation is made earlier and the rate is available from that source at that time, then the CD rate will be the rate, for the relevant interest determination date, described above as published in H.15 daily update, or another recognized electronic source used for displaying that rate, under the heading CDs (Secondary Market).

If the rate described above does not appear in H.15(519), H.15 daily update or another recognized electronic source at 3:00 P.M., New York City time, on the relevant interest calculation date, unless the calculation is made earlier and the rate is available from one of those sources at that time, the CD rate will be the arithmetic mean of the following secondary market offered rates for negotiable U.S. dollar certificates of deposit of major U.S. money market banks with a remaining maturity closest to the specified index maturity, and in a representative amount: the rates offered as of 10:00 A.M., New York City time, on the relevant interest determination date, by three leading nonbank dealers in negotiable U.S. dollar certificates of deposit in New York City, as selected by the calculation agent.

If fewer than three dealers selected by the calculation agent are quoting as described above, the CD rate in effect for the new interest period will be the CD rate in effect for the prior interest period. If the initial interest rate has been in effect for the prior interest period, however, it will remain in effect for the new interest period.

CMT Rate Notes

If you purchase a CMT rate note, your note will bear interest at an interest rate equal to the CMT rate and adjusted by the spread or spread multiplier, if any, indicated in your pricing supplement.

The CMT rate will be the following rate displayed on the designated ***CMT Moneyline Telerate page*** under the heading . . . Treasury Constant Maturities . . . Federal Reserve Board Release H.15 Mondays Approximately 3:45 P.M., under the column for the ***designated CMT index maturity***:

if the designated CMT Moneyline Telerate page is Telerate page 7051, the rate for the relevant interest determination date; or

if the designated CMT Moneyline Telerate page is Telerate page 7052, the weekly or monthly average, as specified in your pricing supplement, for the week that ends immediately before the week in which the relevant interest determination date falls, or for the month that ends immediately before the month in which the relevant interest determination date falls, as applicable.

If the CMT rate cannot be determined in this manner, the following procedures will apply.

If the applicable rate described above is not displayed on the relevant designated CMT Moneyline Telerate page at 3:00 P.M., New York City time, on the relevant interest calculation date, unless the calculation is made earlier and the rate is available from

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

that source at that time, then the CMT rate will be the applicable treasury constant maturity rate described above i.e., for the designated CMT index maturity and for either the relevant interest determination date or the weekly or monthly average, as applicable as published in H.15(519).

If the applicable rate described above does not appear in H.15(519) at 3:00 P.M., New York City time, on the relevant interest calculation date, unless the calculation is made earlier and the rate is available from one of those sources at that time, then the CMT rate will be the treasury constant

Table of Contents

maturity rate, or other U.S. treasury rate, for the designated CMT index maturity and with reference to the relevant interest determination date, that:

is published by the Board of Governors of the Federal Reserve System, or the U.S. Department of the Treasury; *and*

is determined by the calculation agent to be comparable to the applicable rate formerly displayed on the designated CMT Moneyline Telerate page and published in H.15(519).

If the rate described in the prior paragraph does not appear at 3:00 P.M., New York City time, on the relevant interest calculation date, unless the calculation is made earlier and the rate is available from one of those sources at that time, then the CMT rate will be the yield to maturity of the arithmetic mean of the following secondary market bid rates for the most recently issued treasury notes having an original maturity of approximately the designated CMT index maturity and a remaining term to maturity of not less than the designated CMT index maturity *minus* one year, and in a representative amount: the bid rates, as of approximately 3:30 P.M., New York City time, on the relevant interest determination date, of three primary U.S. government securities dealers in New York City selected by the calculation agent. In selecting these bid rates, the calculation agent will request quotations from five of these primary dealers and will disregard the highest quotation or, if there is equality, one of the highest and the lowest quotation or, if there is equality, one of the lowest. Treasury notes are direct, non-callable, fixed rate obligations of the U.S. government.

If the calculation agent is unable to obtain three quotations of the kind described in the prior paragraph, the CMT rate will be the yield to maturity of the arithmetic mean of the following secondary market bid rates for treasury notes with an original maturity longer than the designated CMT index maturity, with a remaining term to maturity closest to the designated CMT index maturity and in a representative amount: the bid rates, as of approximately 3:30 P.M., New York City time, on the relevant interest determination date, of three primary U.S. government securities dealers in New York City selected by the calculation agent. In selecting these bid rates, the calculation agent will request quotations from five of these primary dealers and will disregard the highest quotation or, if there is equality, one of the highest and the lowest quotation or, if there is equality, one of the lowest. If two treasury notes with an original maturity longer than the designated CMT index maturity have remaining terms to maturity that are equally close to the designated CMT index maturity, the calculation agent will obtain quotations for the treasury note with the shorter remaining term to maturity.

If fewer than five but more than two of these primary dealers are quoting as described in the prior paragraph, then the CMT rate for the relevant interest determination date will be based on the arithmetic mean of the bid rates so obtained, and neither the highest nor the lowest of those quotations will be disregarded.

If two or fewer primary dealers selected by the calculation agent are quoting as described above, the CMT rate in effect for the new interest period will be the CMT rate in effect for the prior interest period. If the initial interest rate has been in effect for the prior interest period, however, it will remain in effect for the new interest period.

CPI Rate Notes

If you purchase a CPI rate note, your note will bear interest at an interest rate equal to the CPI rate and adjusted by the spread or spread multiplier, if any, indicated in your pricing supplement.

Table of Contents

Except as otherwise specified in the applicable pricing supplement, the CPI rate will be the rate, determined as of the relevant interest determination date, expressed as a percentage and calculated in accordance with the following formula:

$$\text{CPI rate} = \frac{(C - P)}{P} \times 100$$

where

C means the CPI (as defined below) applicable for the calendar month which is two months preceding the month of the relevant interest determination date;

P means the CPI applicable for the calendar month which is twelve months immediately preceding the calendar month for which C is determined; and

CPI means the non-seasonally adjusted U.S. City Average All Items Consumer Price Index for All Urban Consumers, published monthly by the Bureau of Labor Statistics of the U.S. Department of Labor. For reference purposes only, the CPI is available on Bloomberg page CPURNSA or any successor service. In the event of an inconsistency between the CPI published on Bloomberg page CPURNSA and the CPI published by the Bureau of Labor Statistics, the CPI shall be the CPI published by the Bureau of Labor Statistics.

Federal Funds Rate Notes

If you purchase a federal funds rate note, your note will bear interest at an interest rate equal to the federal funds rate and adjusted by the spread or spread multiplier, if any, indicated in your pricing supplement.

The federal funds rate will be the rate for U.S. dollar federal funds on the relevant interest determination date, as published in H.15 (519) under the heading **Federal Funds (Effective)**, as that rate is displayed on Telerate page 120. If the federal funds rate cannot be determined in this manner, the following procedures will apply.

If the rate described above is not displayed on Telerate page 120 at 3:00 P.M., New York City time, on the relevant interest calculation date, unless the calculation is made earlier and the rate is available from that source at that time, then the federal funds rate, for the relevant interest determination date, will be the rate described above as published in H.15 daily update, or another recognized electronic source used for displaying that rate, under the heading **Federal Funds (Effective)**.

If the rate described above is not displayed on Telerate page 120 and does not appear in H.15(519), H.15 daily update or another recognized electronic source at 3:00 P.M., New York City time, on the relevant interest calculation date, unless the calculation is made earlier and the rate is available from one of those sources at that time, the federal funds rate will be the arithmetic mean of the rates for the last transaction in overnight, U.S. dollar federal funds arranged, before 9:00 A.M., New York City time, on the relevant interest determination date, by three leading brokers of U.S. dollar federal funds transactions in New York City selected by the calculation agent.

If fewer than three brokers selected by the calculation agent are quoting as described above, the federal funds rate in effect for the new interest period will be the federal funds rate in effect for the prior interest period. If the initial interest rate has been in effect for the prior interest period, however, it will remain in effect for the new interest period.

If fewer than five but more than two of these primary dealers are quoting as described in the prior paragraph, then the CMT rate for the relevant interest determination date will be based on the arithmetic mean of the offered rates so obtained, and neither the highest nor the lowest of those quotations will be disregarded.

Table of Contents***Special Rate Calculation Terms***

In this subsection entitled **Interest Rates**, we use several terms that have special meanings relevant to calculating floating interest rates. We define these terms as follows:

The term ***bond equivalent yield*** means a yield expressed as a percentage and calculated in accordance with the following formula:

$$\text{bond equivalent yield} = \frac{D \times N}{360 - (D \times M)} \times 100$$

where

D means the annual rate for treasury bills quoted on a bank discount basis and expressed as a decimal;

N means 365 or 366, as the case may be; and

M means the actual number of days in the applicable interest reset period.

The term ***business day*** means, for any note, a day that meets all the following applicable requirements:

for all notes, is a Monday, Tuesday, Wednesday, Thursday or Friday that is not a day on which banking institutions in New York City generally are authorized or obligated by law, regulation or executive order to close;

if the note is a LIBOR note, is also a London business day;

if the note has a specified currency other than U.S. dollars or euros, is also a day on which banking institutions are not authorized or obligated by law, regulation or executive order to close in the principal financial center of the country issuing the specified currency; and

if the note is a EURIBOR note or has a specified currency of euros, or is a LIBOR note for which the index currency is euros, is also a TARGET business day.

The term ***designated CMT index maturity*** means the index maturity for a CMT rate note and will be the original period to maturity of a U.S. treasury security either 1, 2, 3, 5, 7, 10, 20 or 30 years specified in the applicable pricing supplement.

Edgar Filing: WACHOVIA CORP NEW - Form 424B5

The term **designated CMT Moneyline Telerate page** means the Telerate page mentioned in the relevant pricing supplement that displays treasury constant maturities as reported in H.15(519). If no Telerate page is so specified, then the applicable page will be Telerate page 7052. If Telerate page 7052 applies but the relevant pricing supplement does not specify whether the weekly or monthly average applies, the weekly average will apply.

The term **euro business day** means any day on which the Trans-European Automated Real-Time Gross Settlement Express Transfer (TARGET) System, or any successor system, is open for business.

The term **euro-zone** means, at any time, the region comprised of the member states of the European Economic and Monetary Union that, as of that time, have adopted a single currency in accordance with the Treaty on European Union of February 1992.

H.15(519) means the weekly statistical release entitled Statistical Release H.15 (519) , or any successor publication, published by the Board of Governors of the Federal Reserve System.

H.15 daily update means the daily update of H.15(519) available through the worldwide website of the Board of Governors of the Federal Reserve System, at <http://www.federalreserve.gov/releases/h15/update>, or any successor site or publication.
