INTRODUCTION

Ultrapar is one of Brazil's largest corporate groups, its second largest fuel distributor, a leading Brazilian chemicals manufacturer and one of Brazil's leading providers of integrated logistics services. Our wholly owned subsidiary, Ultragas, is the largest LPG (liquefied petroleum gas) distributor in Brazil, with a national market share of approximately 24%. Our wholly owned subsidiary, Ipiranga, is the second largest oil-derivatives distributor in the country. In the chemicals business, our wholly owned subsidiary, Oxiteno, is the largest producer of ethylene oxide and its principal derivatives in Latin America and a major producer of specialty chemicals. Through our wholly owned subsidiary, Ultracargo, we believe we are a leading provider of integrated road transport, storage, handling and logistics planning services for special bulk cargo. In 2007, Ultrapar acquired the fuel distribution operations of the Ipiranga Group in the South and Southeast regions of Brazil. These operations became Ultrapar's fuel distribution subsidiary, Ipiranga. Through the acquisition, Ultrapar, already Brazil's largest distributor of LPG, also became the second largest distributor of fuels, with a 14% market share.

References in this annual report to Ultrapar, we, our, us and the company are to Ultrapar Participações S.A. and its consolidated subsidiaries (unless the context otherwise requires). In addition, all references in this annual report to:

PRESENTATION OF FINANCIAL INFORMATION

The audited consolidated balance sheets as of December 31, 2007 and 2006 and the related consolidated statements of income, cash flows, changes in financial position and changes in shareholders' equity, including the notes thereto, for the years ended December 31, 2007, 2006 and 2005, included herein, are our consolidated financial statements. The audited consolidated balance sheets as of December 31, 2005, 2004 and 2003 and the related consolidated statements of income, cash flows, changes in financial position and changes in shareholders' equity, including the notes thereto for the years ended December 31, 2004 and 2003 are not included in this annual report. The financial information presented in this annual report should be read in conjunction with our consolidated financial statements.

In April 2007, Ultrapar acquired control of various companies in the Ipiranga Group, whereby Ultrapar acquired the Southern Distribution Business, EMCA and a one-third stake in the Oil-Refining Operations. Ultrapar also acted as a commission agent, pursuant to the Transaction Agreements, for the purpose of the acquisition of the Petrochemical Business on behalf of Petrobras and Braskem and for the acquisition of the Northern Distribution Business on behalf of Petrobras. See Item 4.A. Information on the Company History and Development of the Company Description of the Acquisition of the Ipiranga Group. The financial statements of Ultrapar consolidate all the businesses acquired on its own behalf from April 1, 2007. On June 26, 2008 the exchange rate for *reais* into U.S. dollars was R\$1.595 to US\$1.00, based on the commercial selling rate as reported by the Central Bank. The commercial selling rate was R\$1.771 to US\$1.00 at December 31, 2007 and R\$2.138 to US\$1.00 at December 31, 2006. The real/dollar exchange rate fluctuates widely, and the current commercial selling rate may not be indicative of future exchange rates. See Item 3.A. Key Information Selected Consolidated Financial Data Exchange Rates for information regarding exchange rates for the Brazilian currency.

Solely for the convenience of the reader, we have translated some amounts included in Item 3.A. Key Information Selected Consolidated Financial Information and elsewhere in this annual report from *reais* into U.S. dollars using the commercial selling rate as reported by the Central Bank at December 31, 2007 of R\$1.771 to US\$1.00. These translations should not be considered representations that any such amounts have been, could have been or could be converted into U.S. dollars at that or at any other exchange rate. Such translations should not be construed as representations that the real amounts represent or have been or could be converted into U.S. dollars as of that or any other date.

Segment information for our businesses are presented on an unconsolidated basis. Consequently, intercompany transactions have not been eliminated in segment information and therefore this information will not sum to consolidated financial information provided. See Item 7.B. Major Shareholders and Related Party Transactions Related Party Transactions for more information on intercompany transactions.

Certain figures included in this annual report have been subject to rounding adjustments. Accordingly, figures shown as totals in certain tables may not be an arithmetic aggregation of the figures that precede them.

Brazilian GAAP and U.S. GAAP

Our consolidated financial statements are prepared in accordance with accounting practices adopted in Brazil (Brazilian GAAP), which include accounting principles emanating from the Brazilian corporate law and accounting standards and supplementary procedures established by the CVM and the Brazilian Institute of Independent Auditors (*Instituto dos Auditores Independentes do Brasil*), or IBRACON. Such accounting practices differ in certain material respects from accounting principles generally accepted in the United States of America, or U.S. GAAP. See Note 25 to our consolidated financial statements for a summary of the differences between Brazilian GAAP and U.S. GAAP, and a reconciliation of shareholders' equity as of December 31, 2007 and 2006 and net income for the years ended December 31, 2007, 2006 and 2005 from Brazilian GAAP to U.S. GAAP.

Table of Contents

Market share and economic information

All market share information for the LPG and fuel distribution businesses in Brazil were obtained from Sindigás, SINDICOM and ANP. Unless otherwise specified, all macroeconomic data is obtained from the Instituto Brasileiro de *Geografia e Estatística* IBGE, *Fundação Getúlio Vargas* FGV and the Central Bank.

Table of Contents

FORWARD-LOOKING STATEMENTS

The statements contained in this annual report regarding our plans, forecasts and expectations regarding future events, strategies and projections are forward-looking statements which involve risks and uncertainties and which are therefore not guarantees of future results. Forward-looking statements speak only as of the date they were made, and we undertake no obligation to update publicly or revise any forward-looking statements after we distribute this annual report because of new information, future events and other factors. Words such as believe, expect, may, will, plan, strategy, prospect, foresee, estimate, project, anticipate, can, intend and similar words are intended to identify forward-looking statements. We have made forward-looking statements which cover, among other things, our:

strategy for marketing and operational expansion;

capital expenditures forecasts; and

development of additional sources of revenue.

These forward-looking statements are subject to risks and uncertainties, which could mean that our actual results and performance could differ significantly from those anticipated and that anticipated events or circumstances might not occur. The risks and uncertainties include, but are not limited to:

general economic and business conditions, including the price of crude oil and other commodities, refining margins and prevailing foreign exchange rates;

competition;

ability to produce and deliver products on a timely basis;

ability to anticipate trends in the LPG, fuels, chemicals and logistics industries, including changes in capacity and industry price movements;

changes in official regulations;

receipt of official authorizations and licenses;

political, economic and social events in Brazil;

access to sources of financing and our level of debt;

ability to integrate acquisitions;

regulatory issues relating to acquisitions;

availability of tax benefits; and

other factors contained in this 20-F under Item 3.D. Key Information Risk Factors.

Table of Contents**PART I****ITEM 1. IDENTITY OF DIRECTORS, SENIOR MANAGEMENT AND ADVISORS**

Not applicable.

ITEM 2. OFFER STATISTICS AND EXPECTED TIME TABLE

Not applicable.

ITEM 3. KEY INFORMATION**A. Selected Consolidated Financial Data**

We have selected the following consolidated financial data from our audited consolidated annual financial statements, for the periods indicated. You should read our selected financial data in conjunction with Item 5. Operating and Financial Review and Prospects and our consolidated financial statements and notes to the consolidated financial statements included in this annual report.

Our consolidated financial statements are prepared in Brazilian *reais* in accordance with Brazilian GAAP, which differ in certain material respects from accounting principles generally accepted in the United States of America, or U.S. GAAP. See Note 25 to our consolidated financial statements for a summary of the differences between the accounting practices adopted in Brazil and U.S. GAAP.

The following table presents our selected financial information at the dates and for each of the periods indicated in Brazilian GAAP, and U.S. GAAP where indicated. The consolidated balance sheet information as of December 31, 2007 and 2006 and the consolidated statements of income, cash flows, changes in financial position and changes in shareholders' equity for the years ended December 31, 2007, 2006 and 2005 are derived from our audited consolidated financial statements included in this annual report. The consolidated balance sheet information as of December 31, 2005, 2004 and 2003 and the related consolidated statements of income, cash flows, changes in financial position and changes in shareholders' equity for the years ended December 31, 2004 and 2003 are derived from our audited consolidated financial statements that are not included in this annual report.

In April 2007, Ultrapar acquired control of various companies in the Ipiranga Group, whereby Ultrapar acquired the Southern Distribution Business, EMCA and a one-third stake in the Oil-Refining Operations. Ultrapar acted as a commission agent, pursuant to the Transaction Agreements, for the purpose of the acquisition of the Petrochemical Business on behalf of Petrobras and Braskem and for the acquisition of the Northern Distribution Business on behalf of Petrobras. See Item 4.A. Information on the Company History and Development of the Company Description of the Acquisition of the Ipiranga Group. The financial statements of Ultrapar consolidate all the businesses acquired on its own behalf from April 1, 2007.

- (1) The *real* amounts for December 31, 2007 have been converted into dollars using the exchange rate of US\$1.00 = R\$1.771, which is the commercial rate reported by the Central Bank on this date. This information is presented solely for the convenience of the reader. You should not interpret the currency conversions in this annual report as a statement that the amounts in *Reais* currently represent such values in U.S. dollars. Additionally, you should not interpret such conversions as statements that the amounts in *Reais* have been, could have been or could be converted into U.S. dollars at this or any other foreign exchange rates. See Item 3.A. Key Information Selected Consolidated Financial Data Exchange Rates.
- (2) Net earnings per share are calculated on the weighted average shares outstanding during each of the periods presented. Under Brazilian GAAP, net earnings per share are not retroactively adjusted for the stock dividend but are retroactively adjusted for the reverse stock split described under Item 4.B. Information on the Company Business Overview.
- (3) See Item 8.A. Financial Information Consolidated Statements and Other Financial Information Dividend and Distribution Policy for information regarding declaration and payment of dividends. Dividends per share do not reflect any adjustments related to the stock dividend described under Item 4.B. Information on the Company Business Overview.

Table of Contents

- (4) Cash flow information has been derived from our consolidated financial statements prepared in accordance with Brazilian GAAP.
- (5) See Note 25(V)(g) to our consolidated financial statements.
- (6) Represents depreciation and amortization expenses included in cost of sales and services and in selling, general and administrative expenses.
- (7) The purpose of including adjusted EBITDA information is to provide a measure for assessing our ability to generate cash from our operations. Adjusted EBITDA is equal to operating income before financial items plus depreciation and amortization. In managing our business we rely on adjusted EBITDA as a means for assessing our operating performance and a portion of our management's compensation and employee profit sharing plan is linked to adjusted EBITDA performance. Because adjusted EBITDA excludes non-operating expenses (income), interest, income taxes, depreciation and amortization, it provides an indicator of general economic performance that is not affected by debt restructurings, fluctuations in interest rates or effective tax rates, or levels of non-operating expenses (income), depreciation and amortization. Accordingly, we believe that this type of measurement is useful for comparing general operating performance from period to period and making certain related management decisions. We also calculate adjusted EBITDA in connection with covenants related to some of our financings. We believe that adjusted EBITDA enhances the understanding of our financial performance and our ability to satisfy principal and interest obligations with respect to our indebtedness as well as to fund capital expenditures and working capital requirements. Adjusted EBITDA is not a measure of financial performance under U.S. GAAP or Brazilian GAAP. Adjusted EBITDA should not be considered in isolation, or as a substitute for net income, as a measure of operating performance, as a substitute for cash flows from operations or as a measure of liquidity. Adjusted EBITDA has material limitations that impair its value as a measure of a company's overall profitability since it does not address certain ongoing costs of our business that could significantly affect profitability such as financial expenses and income taxes, depreciation or capital expenditures and associated charges.
- (8) Minority interest on Ultrapar results amounted to R\$ 101 million in 2007, reflecting the stake held by minority shareholders at Ipiranga prior to the Share Exchange. As of September 30, 2007 Ultrapar held 11.52% of CBPI total shareholders capital and 32.45% of DPPI total shareholders capital. After the Share Exchange in 4Q07, the correspondent portion of the minority interest in that companies was reduced and since October 2007 Ultrapar consolidates 100% of the earnings of that companies in its figures.

The tables below provide a reconciliation of net income to adjusted EBITDA and of operating income before financial items to adjusted EBITDA for the years ended December 31, 2007, 2006, 2005, 2004 and 2003:

- (9) Net cash (debt) is included in this document in order to provide the reader with information relating to our overall indebtedness and financial position. Net cash (debt) is not a measure of financial performance or liquidity under U.S. GAAP or Brazilian GAAP. In managing our businesses we rely on net cash (debt) as a means of assessing our financial condition. We believe that this type of measurement is useful for comparing our financial condition from period to period and making related management decisions. Net cash (debt) is also used in connection with covenants related to some of our financings. The table below provides a reconciliation of our consolidated balance sheet data to the net cash (debt) positions shown in the table, for the years ended December 2007, 2006, 2005, 2004 and 2003.

- (1) The *real* amounts for December 31, 2007 have been converted into dollars using the exchange rate of US\$1.00 = R\$1.771, which is the commercial rate reported by the Central Bank on this date. This information is presented solely for the convenience of the reader. You should not interpret the currency conversions in this annual report as a statement that the amounts in *reais* currently represent such values in U.S. dollars. Additionally, you should not interpret such conversions as statements that the amounts in *Reais* have been, could have been or could be converted into U.S. dollars at this or any other foreign exchange rates. See Item 3.A. Key Information Selected Consolidated Financial Data Exchange Rates.
- (2) Shareholders' equity as of December 31, 2005, 2004 and 2003 was retroactively adjusted to reflect changes in accounting policies as from January 2006. See Item 5.B. Operating and Financial Review and Prospects Liquidity and Capital Resources U.S. GAAP Reconciliation and Note 25 I(r) for a better understanding of these changes.

Exchange Rates

Before March 14, 2005, there were two principal foreign exchange markets in Brazil, in which notes were freely negotiated but could be strongly influenced by Central Bank intervention:

the commercial rate exchange market dedicated principally to trade and financial foreign exchange transactions such as the buying and selling of registered investments by foreign entities, the purchase or sale of shares, or the payment of dividends or interest with respect to shares; and

the floating rate exchange market that was generally used for transactions not conducted through the commercial foreign exchange market.

On March 4, 2005, the National Monetary Council enacted Resolution No. 3265, pursuant to which the commercial rate exchange market and the floating rate exchange market were unified in a sole exchange market, effective as of March 14, 2005. The new resolution allows, subject to certain procedures and specific regulatory provisions, the purchase and sale of foreign currency and the international transfer of *reais* by a person or legal entity, without limitation of the amount involved; provided, however, the legality of the transaction. Foreign currencies may only be purchased through financial institutions domiciled in Brazil authorized to operate in the exchange market.

From 2004 to 2007 Brazilian Real appreciated 33% against U.S. dollar from January 1, 2008 to June 26, 2008 Brazilian Real appreciation was 10% against the U.S. dollar. Accordingly it is not possible to predict whether the *real* will remain at its present level and what impact the Brazilian government's exchange rate policies may have on us.

On June 26, 2008, the exchange rate for *reais* into U.S. dollars was 1.595 to US\$1.00, based on the commercial selling rate as reported by the Central Bank. The following table sets forth information on prevailing commercial foreign exchange selling rates for the periods indicated, as published by the Central Bank on its electronic information system, SISBACEN, using PTAX 800, Option 5.

Table of Contents

Year Ended	Exchange rates of nominal <i>reais</i> per US\$1.00

B. Capitalization and Indebtedness

Not applicable.

C. Reasons for the Offer and Use of Proceeds

Not applicable.

D. Risk Factors

You should carefully consider the risks described below, as well as the other information contained in this annual report in evaluating an investment in our preferred shares or ADSs. Our business, results of operations or financial condition could be harmed if any of these risks materializes and, as a result, the trading price of the preferred shares or the ADSs could decline and you could lose a substantial part or even all of your investment.

We have included information in these risk factors concerning Brazil based on information that is publicly available.

Risks Relating to Ultrapar and Its Industry

Petrobras is the only supplier of LPG and oil-based fuels in Brazil. Fuel distributors in Brazil, including Ipiranga, have formal contracts with Petrobras for the supply of oil-based fuels. Ultragas has a formal contract with Petrobras for the supply of LPG. Any interruption in the supply of LPG or oil-based fuels from Petrobras would immediately affect Ultragas or Ipiranga's ability to provide LPG and oil-based fuels to their customers.

Prior to 1995, Petrobras held a constitutional monopoly for the production and importation of petroleum products in Brazil. Although the Brazilian government terminated Petrobras' monopoly in November 1995, Petrobras effectively remains the sole provider of LPG and oil-based fuels in Brazil. Currently, Ultragas and all other LPG distributors in Brazil purchase all or nearly all LPG from Petrobras. Ultragas' net sales and services represented 16% of our consolidated net sales and services for the year ended December 31, 2007. All Brazilian LPG distributors, including Ultragas, currently purchase almost all their LPG requirements from Petrobras. The procedures for ordering and purchasing LPG from Petrobras are generally common to all LPG distributors including Ultragas. For more details, see Item 4.B. Information on the Company Business Overview Distribution of Liquefied Petroleum Gas Ultragas Supply of LPG.

Table of Contents

With respect to fuel distribution, Petrobras also supplied nearly all of Ipiranga and other distributors' oil-based fuel requirements in 2007. Petrobras' supplies to Ipiranga is governed by an annual contract, under which the supply volume is established based on the volume purchased in the previous year. Ipiranga's net sales and services represented 75% of our consolidated net sales and services for the year ended December 31, 2007.

The last significant interruption in the supply of oil derivatives by Petrobras to LPG and fuels distributors occurred during the 1995 strike by Petrobras employees. See Item 4.B. Information on the Company Business Overview Distribution of Liquefied Petroleum Gas Industry and Regulatory Overview and Item 4.B. Information on the Company Business Overview Fuels Distribution Industry and Regulatory Overview.

Significant interruptions of LPG and oil-based fuel supply from Petrobras may occur in the future. Any interruption in the supply of LPG or oil-based fuels from Petrobras would immediately affect Ultragas or Ipiranga's respective ability to provide LPG or oil-based fuels to its customers. If we are not able to obtain an adequate supply of LPG or oil-based fuels from Petrobras under acceptable terms, we may seek to meet our demands through LPG or oil-based fuels purchased on the international market. The cost of LPG or oil-based fuels on the international market is currently more expensive than the price we obtain through Petrobras.

Intense competition in the LPG and in the Brazilian fuels distribution market may affect our operating margins.

The Brazilian LPG market is very competitive in all segments—residential, commercial and industrial. Petrobras, our supplier of LPG, and other major companies with greater resources than we possess participate in the Brazilian LPG distribution market. Intense competition in the LPG distribution market could lead to lower sales volumes and increased marketing expenses which may have a material adverse effect on our operating margins. See Item 4.B. Information on the Company Business Overview Distribution of Liquefied Petroleum Gas Industry and Regulatory Overview The role of Petrobras and Item 4.B. Information on the Company Business Overview Distribution of Liquefied Petroleum Gas Ultragas Competition.

The Brazilian fuels distribution market is highly competitive in both the retail and wholesale segments. Petrobras, our supplier of oil-derivative products, and other major companies with greater resources than we possess participate in the Brazilian fuels distribution market. Intense competition in the fuels distribution market could lead to lower sales volumes and increased marketing expenses which may have a material adverse effect on our operating margins. See Item 4.B. Information on the Company Business Overview Fuels Distribution Industry and Regulatory Overview The role of Petrobras and Item 4.B. Information on the Company Business Overview Fuels Distribution Ipiranga Competition. In addition a number of small local and regional distributors entered the Brazilian fuel distribution market in the late 90's, after the market was de-regulated.

Anticompetitive practices by our competitors may distort market prices.

In the last few years, anticompetitive practices have been one of the main problems affecting fuel distributors in Brazil, including Ipiranga. Generally these practices have involved a combination of tax evasion and fuel adulteration, such as the dilution of gasoline by mixing solvents or adding anhydrous ethanol in an amount greater than the 25% permitted by applicable law (the overall taxation of anhydrous ethanol is lower than hydrated ethanol and gasoline).

Taxes constitute a significant portion of the cost of fuels sold in Brazil. For this reason, tax evasion on the part of some fuel distributors has been prevalent, allowing them to lower the prices they charge. As the final prices for the products sold by these distributors, including Ipiranga, are calculated based on, among other factors, the amount of taxes levied on the purchase and sale of these fuels, such anticompetitive practices as tax evasion may affect Ipiranga's sales volume and increase marketing expenses, which could have a material adverse effect on our operating margins. Should there be any increase in the taxes levied on fuel, tax evasion may increase, resulting in a greater distortion of the price of fuel sold.

These practices have enabled certain distributors to supply large quantities of fuel products at prices lower than those offered by the major distributors, including Ipiranga, which has resulted in a considerable increase in the sales volumes of the distributors who have adopted these practices.

Table of Contents

Although the Brazilian government has taken measures to inhibit these practices, if such practices become more prevalent Ipiranga could suffer from a reduction in sales volume and increased marketing expenses, which could have a material adverse effect on our operating margins.

LPG competes with alternative sources of energy. Competition with and the development of alternative sources of energy in the future may adversely affect the LPG market.

LPG competes with natural gas, wood, diesel, fuel oil and electricity. Natural gas is currently the principal source of energy against which we compete. Natural gas is currently less expensive than LPG for industrial consumers who purchase large volumes, but more expensive for residential consumers. In addition, supply of natural gas requires significant investments in pipelines. The development of alternative sources of energy in the future may adversely affect the LPG market and consequently our business, financial results and results of operations. See Item 4.B. Information on the Company Business Overview Distribution of Liquefied Petroleum Gas Ultragas Competition.

Ethylene, the principal raw material used in our petrochemical operations, comes from limited supply sources. Any reduction in the supply of ethylene would have an immediate impact on Oxiteno's production and results of operation.

All second generation petrochemical producers in Brazil that use ethylene as their key raw material, including Oxiteno, our subsidiary involved in the production and sale of chemical and petrochemical products, purchase ethylene from Brazilian suppliers. Approximately 7% of our net sales are derived from the sale of chemical products that require ethylene. Oxiteno purchases ethylene from two of Brazil's three naphtha crackers, which are the sole sources of ethylene in Brazil. Braskem supplies all of our ethylene requirements at our plant located at Camaçari pursuant to a long-term contract, and Petroquímica União S.A., or PQU, supplies all of our ethylene requirements at our plant located at Mauá. Oxiteno, like other purchasers from PQU, does not have a long-term contract for the purchase of ethylene from PQU. Because of its characteristics, ethylene is difficult and expensive to store and transport, and cannot be easily imported into Brazil. Therefore, Oxiteno is almost totally dependent on ethylene produced at Braskem and PQU for its supply of ethylene. For the year ended December 31, 2007, Brazilian ethylene imports totaled approximately 4.7 tons, representing less than 0.01% of Brazil's installed capacity.

Due to ethylene's chemical characteristics, Oxiteno does not store significant quantities of ethylene, and reductions in supply from Braskem and PQU would have an immediate impact on our production and results of operations. We are currently investing in the ethylene oxide production capacity expansion and we have agreed with Braskem and PQU the additional ethylene supply for this expansion. See Item 4.A. Information on the Company History and Development of the Company Investments. If we further expand our production capacity, there is no assurance that we will be able to obtain additional ethylene from Braskem and PQU. In addition, Petrobras is the principal supplier of naphtha to crackers in Brazil, and any interruption in the supply of naphtha from Petrobras to the crackers could adversely impact their ability to supply ethylene to Oxiteno.

The Brazilian petrochemical industry is influenced by the performance of the international petrochemical industry and its cyclical behavior.

The international petrochemical market is cyclical in nature, with alternating periods of tight supply, increased prices and high margins, and overcapacity, declining prices and low margins. The decrease in Brazilian tariff rates on petrochemical products, the increase in demand for such products in Brazil, and the ongoing integration of regional and world markets for commodities, among other factors, have contributed to the increasing integration of the Brazilian petrochemical industry into the international petrochemical marketplace. As a consequence, events affecting the petrochemical industry worldwide could have a material adverse effect on our business, financial condition and results of operations.

Table of Contents***The price of ethylene is subject to fluctuations in international oil prices.***

The price of ethylene, which is the principal component of Oxiteno's cost of sales and services, is directly linked to the price of naphtha, which, in turn, is largely linked to the price of crude oil. Consequently, ethylene prices are subject to fluctuations in international oil prices. A significant increase in the price of crude oil and, consequently, naphtha and ethylene, could increase our costs, which could have a material adverse effect on our results of operations.

The reduction in import tariffs on petrochemical products can reduce our competitiveness in relation to imported products.

Final prices paid by importers of petrochemical products include import tariffs. Consequently, import tariffs imposed by the Brazilian government affect the prices we can charge for our products. The Brazilian government's negotiation of commercial and free trade agreements, principally with NAFTA, the European Union and the Cooperation Council for the Arab States of the Gulf, may result in reductions in Brazilian import duties on petrochemical products, which generally range between 12% and 14%, and may reduce the competitiveness of our products vis-à-vis imported petrochemical products.

We may be adversely affected by the imposition and enforcement of more stringent environmental laws and regulations.

We are subject to extensive federal and state legislation and regulation by Brazilian governmental agencies responsible for the implementation of environmental and health laws and policies in Brazil, Mexico and Venezuela. Petrochemical companies like ours are required to obtain licenses for their manufacturing facilities from environmental authorities which may also regulate their operations by prescribing specific environmental standards in their operating licenses. Environmental regulations apply particularly to the discharge, handling and disposal of gaseous, liquid and solid products and by-products from manufacturing activities.

Changes in these laws and regulations, or changes in the enforcement of these laws and regulation, could adversely affect us by increasing our cost of compliance or operating. In addition, new laws or additional regulations, or more stringent interpretations of existing laws and regulations, could require us to spend additional funds on related matters in order to stay in compliance, thus increasing our costs and having an adverse effect on our results. See [Item 4.B. Information on the Company Business Overview Distribution of Liquefied Petroleum Gas Industry and Regulatory Overview Environmental, health and safety standards](#), [Item 4.B. Information on the Company Business Overview Fuels Distribution Industry and Regulatory Overview Environmental, health and safety standards](#), [Item 4.B. Information on the Company Business Overview Petrochemicals and Chemicals Industry and Regulatory Overview Environmental, health and safety standards](#) and [Item 4.B. Information on the Company Business Overview Logistics for Special Bulk Cargo Ultracargo Transportation Regulation](#).

The production, storage and transportation of LPG, fuel products and petrochemicals are inherently hazardous.

The complex manufacturing operations we perform at our plants involve a variety of safety and other operating risks, including the handling, production, storage and transportation of highly inflammable, explosive and toxic materials. These risks could result in personal injury and death, severe damage to or destruction of property and equipment and environmental damage. A sufficiently large accident at one of our plants, service stations or storage facilities could force us to suspend our operations temporarily and result in significant remediation costs and lost revenue. In addition, insurance proceeds may not be available on a timely basis and may be insufficient to cover all losses. Equipment breakdowns, natural disasters, and delays in obtaining imports or required replacement parts or equipment can also affect our manufacturing operations and consequently our results from operations.

Our insurance coverage may be insufficient to cover losses that we might incur.

The operation of any chemical manufacturing plant and the distribution of petrochemicals, as well as the operations of logistics of oil, chemical products, LPG and fuels distribution involve substantial risks of property contamination and personal injury and may result in material costs and liabilities. Although we believe that current insurance levels are adequate, the occurrence of losses or other liabilities that are not covered by insurance or that exceed the limits of our insurance coverage could result in significant unexpected additional costs.

Table of Contents

The suspension, cancellation or non-renewal of certain federal tax benefits may adversely affect our results of operations.

We are entitled to federal tax benefits providing for income tax exemption or reduction for our activities in the northeast region of Brazil. These benefits may be cancelled or suspended if we do not comply with our commitment, not to distribute to our shareholders the amounts under the benefits or if the relevant tax authorities decide to suspend or cancel our benefits. As a result, we may become liable for the payment of related taxes at the full tax rates. If we are not able to renew the tax benefits, or if we are only able to renew them under terms that are substantially less favorable than expected, our results of operations may be adversely affected. Tax exemptions amounted to R\$35.2 million, R\$50.3 million and R\$63.8 million, respectively, for the years ended December 31, 2007, 2006 and 2005. See [Item 4.B. Information on the Company Business Overview Distribution of Liquefied Petroleum Gas Ultragas Tax exemption status](#), [Item 4.B. Information on the Company Business Overview Petrochemicals and Chemicals Oxiteno Tax exemption status](#) and [Item 4.B. Information on the Company Business Overview Logistics for Special Bulk Cargo Ultracargo Tax exemption status](#).

The federal tax authorities may decline to renew these benefits or may modify the terms upon which such renewals will be granted. The failure to renew such benefits on favorable terms could adversely affect our results of operations.

We are currently controlled by members of our founding family and our senior management, which substantially limits the ability of other shareholders to control the direction of our business.

Our senior management and the members of our founding family indirectly control approximately 66% of our voting share capital through their control of Ultra S.A. This level of control enables Ultra to elect the majority of our directors and to determine the outcome of substantially all actions requiring shareholder approval. See [Item 7.A. Major Shareholders and Related Party Transactions Major Shareholders Shareholders Agreements](#).

Our status as a holding company may limit our ability to pay dividends on the preferred shares and consequently, on the ADSs.

As a holding company, we have no significant operating assets other than our ownership of shares of our subsidiaries. Substantially all of our operating income comes from our subsidiaries. Consequently, our ability to pay dividends depends solely upon our receipt of dividends and other cash flows from our subsidiaries.

As a result of the Ipiranga Acquisition, Ultrapar has assumed certain liabilities of the business acquired in the Ipiranga Acquisition and assumed all the risks relating to those liabilities.

Ultrapar has assumed certain liabilities of the business acquired in the Ipiranga Acquisition; therefore certain existing known or unknown financial obligations, legal liabilities or other contingent liabilities or risks of the business acquired in the Ipiranga Acquisition have become the responsibility of Ultrapar. See [Item 5B. Operating and Financial Review and Prospects Liquidity and Capital Resources Indebtedness](#) for more information regarding the financial obligations assumed by Ultrapar in connection with the Ipiranga Acquisition. These liabilities could cause Ultrapar to be required to make payments, incur charges or take other actions that could adversely affect Ultrapar's financial position and results of operations and the price of Ultrapar's preferred shares.

We may fail to realize all of the anticipated benefits of the Ipiranga Acquisition.

Although we have integrated Ipiranga with our operations, it may not be possible to realize the full extent of benefits we anticipated. Nor is it guaranteed that we will realize these benefits within the timeframe that is currently expected. In addition, the benefits of the Ipiranga Acquisition may be offset by operating losses due to various factors such as changes in commodity prices, unanticipated variations in industry conditions, an increase in operating or other costs, competitive shortcomings and other risk factors relating to the industry at large.

Table of Contents

Risks Relating to Brazil

The Brazilian government has exercised, and continues to exercise, significant influence over the Brazilian economy. Brazilian political and economic conditions could adversely affect our business and the market price of our preferred shares and the ADSs.

The Brazilian government frequently intervenes in the Brazilian economy and occasionally makes drastic changes in policy and regulations. The Brazilian government's actions to control inflation and effect other policies and regulations have often involved wage and price controls, currency devaluations, capital controls, and limits on imports, among other measures. Our business, financial condition and results of operations may be adversely affected by changes in policy or regulations involving or affecting tariffs, exchange controls and other matters, as well as factors such as:

currency fluctuations;

inflation;

interest rates;

price instability;

energy shortages;

liquidity of domestic capital and lending markets;

fiscal policy; and

other trade, political, diplomatic, social and economic developments in or affecting Brazil.

Uncertainty over whether the Brazilian government may implement changes in policy or regulation affecting these or other factors in the future may contribute to economic uncertainty in Brazil and to heightened volatility in the Brazilian securities markets and securities issued abroad by Brazilian issuers. These and other future developments in the Brazilian economy and governmental policies may adversely affect us and our business and results of operations and may adversely affect the trading price of the ADSs and our preferred shares.

Inflation and certain governmental measures to curb inflation may contribute significantly to economic uncertainty in Brazil and could harm our business and the market value of the ADSs and our preferred shares.

Brazil has in the past experienced extremely high rates of inflation. Inflation and some of the Brazilian government's measures taken in an attempt to curb inflation have had significant negative effects on the Brazilian economy. Since the introduction of the *real* in 1994, Brazil's inflation rate has been substantially lower than in previous periods. However, inflationary pressures persist, and actions taken in an effort to curb inflation, coupled with speculation about possible future governmental actions, have contributed to economic uncertainty in Brazil and heightened volatility in the Brazilian securities market. According to the Índice Geral de Preços-Mercado, or IGP-M, a general price inflation index, the Brazilian general price inflation rates were 7.8% in 2007, 3.9% in 2006, 1.2% in 2005 and 12.4% in 2004, respectively.

Brazil may experience high levels of inflation in the future. Our cash operating expenses are substantially in *reais* and tend to increase with Brazilian inflation. Inflationary pressures may also hinder our ability to access foreign financial markets or may lead to further government intervention in the economy, including the introduction of government policies that could harm our business or adversely affect the market value of our preferred shares and, as a result, our ADSs.

Table of Contents

Exchange rate instability may adversely affect our financial condition and results of operations and the market price of the ADSs and our preferred shares.

As a result of inflationary pressures, the Brazilian currency has been devalued periodically during the last four decades. Throughout this period, the Brazilian government has implemented various economic plans and utilized a number of exchange rate policies, including sudden devaluations, periodic mini-devaluations during which the frequency of adjustments has ranged from daily to monthly, floating exchange rate systems, exchange controls and dual exchange rate markets. Although over long periods depreciation of the Brazilian currency generally has correlated with the rate of inflation in Brazil, devaluation over shorter periods has resulted in significant fluctuations in the exchange rate between the Brazilian currency and the U.S. dollar and other currencies.

The *real* depreciated against the U.S. dollar by 18.7% in 2001. In 2002, the *real* depreciated 52.3% against the U.S. dollar, due in part to political uncertainty surrounding the Brazilian presidential elections and the global economic slowdown. Although the *real* has appreciated since then (8.1% in 2004, 11.8% in 2005, 8.7% in 2006, 17.2% in 2007 and an additional 9.9% from January 1, 2008 to June 26, 2008), no assurance can be given that the *real* will not depreciate or be devalued against the U.S. dollar again. See Item 3.A. Key Information Selected Consolidated Financial Data Exchange Rates.

There are no guarantees that the exchange rate between the *real* and the U.S. dollar will stabilize at current levels. Although we have managed our existing U.S. dollar debt obligations in order to protect against fluctuations in the dollar/*real* exchange rate, we could in the future experience monetary losses relating to these fluctuations. See Item 11. Quantitative and Qualitative Disclosures about Market Risk Foreign Exchange Risk for information about our foreign exchange risk hedging policy.

Depreciations of the *real* relative to the U.S. dollar can create additional inflationary pressures in Brazil that may negatively affect us. Depreciations generally curtail access to foreign financial markets and may prompt government intervention, including recessionary governmental policies. Depreciations also reduce the U.S. dollar value of distributions and dividends on the ADSs and the U.S. dollar equivalent of the market price of our preferred shares and, as a result, the ADSs. On the other hand, appreciation of the *real* against the U.S. dollar may lead to a deterioration of the country's current account and the balance of payments, as well as to a dampening of export-driven growth.

Although a large part of our sales is denominated in *reais*, prices and certain costs, (particularly ethylene, purchased by our subsidiary Oxiteno) in the chemical business are benchmarked to prices prevailing in the international markets. Hence, we are exposed to foreign exchange rate risks that could materially adversely affect our business, financial condition and results of operations as well as our capacity to service our debt.

Developments and the perception of risk in other countries, especially emerging market countries may adversely affect the results of our operations and the market price of the preferred shares and ADSs.

The market value of securities of Brazilian companies is affected to varying degrees by economic and market conditions in other countries, including other Latin American and emerging market countries. Although economic conditions in such countries may differ significantly from economic conditions in Brazil, investors' reactions to developments in these other countries may have an adverse effect on the market value of securities of Brazilian issuers. Crises in other emerging market countries may diminish investor interest in securities of Brazilian issuers, including ours. This could also make it more difficult for us to access the capital markets and finance our operations in the future on acceptable terms or at all.

United States investors may not be able to obtain jurisdiction over or enforce judgments against us.

We are a company incorporated under the laws of the Federative Republic of Brazil. All members of our Board of Directors, executive officers and experts named in this annual report are residents of Brazil. All or a substantial part of the assets pertaining to these individuals and to Ultrapar are located outside the United States. As a result, it is possible that investors may not be able to obtain jurisdiction over these individuals or Ultrapar in the United States, or enforce judgments handed down by United States courts of law based on provisions for civil liability under federal law in relation to securities of the United States or otherwise.

Table of Contents

Risks Relating to the Preferred Shares and the American Depositary Shares

The preferred shares and the ADSs generally do not give you voting rights.

Generally under Brazilian corporate law and in the case of our bylaws, holders of preferred shares do not have the right to vote at shareholders meetings except in limited circumstances. This means, among other things, that holders of our preferred shares and our ADSs, which represent preferred shares, are not entitled to vote on important corporate transactions including mergers or consolidations with other companies. See Item 10.B. Additional Information – Memorandum and Bylaws.

The preferred shares and the ADSs do not entitle you to a fixed or minimum dividend.

Under our bylaws, unless otherwise proposed by the Board of Directors and approved by the voting shareholders in the Annual General Meeting, we must pay our shareholders a mandatory distribution equal to at least 50% of our adjusted net income. The net income may be capitalized, used to set off losses and/or retained in accordance with the Brazilian corporate law and may not be available for the payment of dividends. Therefore, whether or not you receive a dividend depends on the amount of the mandatory distribution, if any, and whether the Board of Directors and the voting shareholders exercise their discretion to suspend these payments. See Item 8.A. Financial Information – Consolidated Statements and Other Financial Information – Dividend and Distribution Policy – Dividend Policy for a more detailed discussion of mandatory distributions.

You might be unable to exercise preemptive rights with respect to the preferred shares.

In the event of a rights offering or a capital increase which would maintain or increase the proportion of capital represented by preferred shares, preferred shareholders would have preemptive rights to subscribe to newly issued preferred shares. In the event of a capital increase which would reduce the proportion of capital represented by preferred shares, preferred shareholders would have preemptive rights to subscribe for preferred shares in proportion to their shareholdings and for common shares only to the extent necessary to prevent dilution of their interest in the company.

Our bylaws establish that the Board of Directors may exclude preemptive rights to the current shareholders, holding either common or preferred shares, in the case of an offering of new shares to be sold on a registered stock exchange or through public subscription.

The holders of preferred shares or ADSs may be unable to exercise their preemptive rights in relation to the preferred shares represented by the ADSs, unless we file a registration statement pursuant to the United States Securities Act of 1933 or an exemption from the registration requirements applies. We are not obliged to file registration statements with respect to the preemptive rights and therefore do not assure holders that such a registration will be obtained. If the rights are not registered as required, the depositary will try to sell the preemptive rights held by holder of the ADSs and you will have the right to the net sale value, if any. However, the preemptive rights will expire without compensation to you should the depositary not succeed in selling them.

If you exchange the ADSs for preferred shares, you risk losing certain foreign currency remittance and Brazilian tax advantages.

The ADSs benefit from the depositary’s certificate of foreign capital registration permits the depositary to convert dividends and other distributions with respect to the preferred shares into foreign currency and remit the proceeds abroad. If you exchange your ADSs for preferred shares, you will be entitled to rely on the depositary’s certificate of foreign capital registration for five business days from the date of exchange. Thereafter, you will not be able to remit abroad non-Brazilian currency unless you obtain your own certificate of foreign capital registration or you qualify under National Monetary Council Resolution 2,689, dated January 26, 2000, known as Resolution 2,689, which entitles certain investors to buy and sell shares on Brazilian stock exchanges without obtaining separate certificates of registration. If you do not qualify under Resolution 2,689, you will generally be subject to less favorable tax treatment on distributions with respect to the preferred shares. The depositary’s certificate of registration or any certificate of foreign capital registration obtained by you may be affected by future legislative or regulatory changes, and additional Brazilian law restrictions applicable to your investment in the ADSs may be imposed in the future. For a more complete description of Brazilian tax regulations, see Item 10.E. Additional Information – Taxation – Brazilian Tax Consequences.

Table of Contents

The relative volatility and illiquidity of the Brazilian securities markets may adversely affect you.

Investing in securities, such as the preferred shares or ADSs, of issuers from emerging market countries, including Brazil, involves a higher degree of risk than investing in securities of issuers from more developed countries. For the reasons above, investments involving risks relating to Brazil, such as investments in ADSs, are generally considered speculative in nature and are subject to certain economic and political risks, including but not limited to:

changes to the regulatory, tax, economic and political environment that may affect the ability of investors to receive payments, in whole or in part, in respect of their investments; and

restrictions on foreign investment and on repatriation of capital invested.

The Brazilian securities market is substantially smaller, less liquid, more concentrated and more volatile than major securities markets in the United States. This may limit your ability to sell the preferred shares underlying your ADSs at the price and time at which you wish to do so. The São Paulo Stock Exchange, known as Bovespa, the only Brazilian stock exchange, had a market capitalization of approximately US\$1,399 billion as of December 31, 2007 and an average monthly trading volume of approximately US\$52 billion for 2007. In comparison, the New York Stock Exchange had a market capitalization of US\$ 30.5 trillion as of December 31, 2007 and an average monthly trading volume of approximately US\$141 billion for 2007.

There is also a large concentration in the Brazilian securities market. The ten largest companies in terms of market capitalization represented approximately 55% of the aggregate market capitalization of Bovespa as of December 31, 2007. The top ten stocks in terms of trading volume accounted for approximately 51% of all shares traded on Bovespa in 2007. Ultrapar's average daily trading volume on both stock exchanges in 2007, 2006 and 2005 was R\$11.8 million, R\$4.6 million and R\$5.5 million, respectively.

Controls and restrictions on the remittance of foreign currency could negatively affect your ability to convert and remit dividends, distributions or the proceeds from the sale of our preferred shares, Ultrapar's capacity to make dividend payments to non-Brazilian investors and the market price of our preferred shares and ADSs.

Brazilian law provides that whenever there is a serious imbalance in the Brazilian balance of payments, or reasons for believing that there will be a serious imbalance in the future, the Brazilian government can impose temporary restrictions on remittances of income on investments by non-Brazilian investors in Brazil. The probability that the Brazilian government might impose such restrictions is related to the level of the country's foreign currency reserves, the availability of currency in the foreign exchange markets on the maturity date of a payment, the amount of the Brazilian debt servicing requirement in relation to the economy as a whole, and the Brazilian policy towards the International Monetary Fund, among other factors. We are unable to give assurances that the Central Bank will not modify its policies or that the Brazilian government will not introduce restrictions or cause delays in payments by Brazilian entities of dividends relating to securities issued in the overseas capital markets up to the present. Such restrictions or delays could negatively affect your ability to convert and remit dividends, distributions or the proceeds from the sale of our preferred shares, Ultrapar's capacity to make dividend payments to non-Brazilian investors and the market price of our preferred shares and the ADSs.

Changes in Brazilian tax laws may have an adverse impact on the taxes applicable to a disposition of our ADSs.

According to Law No. 10,833, enacted on December 29, 2003, the disposition of assets located in Brazil by a non-resident to either a Brazilian resident or a non-resident is subject to taxation in Brazil, regardless of whether the disposal occurs outside or within Brazil. In the event that the disposal of assets is interpreted to include a disposal of our ADSs, this tax law could result in the imposition of the withholding income tax on a disposal of our ADSs by a non-resident of Brazil to another non-resident of Brazil. Due to the fact that Law No. 10,833 has been enacted and no judicial guidance as to its application yet exists, we are unable to predict whether an interpretation applying such tax law to disposal of the ADSs between non-residents could ultimately prevail in the courts of Brazil. See Item 10.E. Additional Information Taxation Brazilian Tax Consequences.

Table of Contents

Substantial sales of our shares or our ADSs could cause the price of our preferred shares or our ADSs to decrease.

Shareholders of Ultra S.A. Participações have the right to withdraw and convert common shares owned through Ultra S.A. Participações into our preferred shares as more fully described under Item 7.A. Major Shareholders and Related Party Transactions Major Shareholders Shareholders Agreements. Two other shareholders, who may freely sell their respective shares, hold a substantial portion of our remaining common shares. A sale of a significant number of shares could negatively affect the market value of the preferred shares and ADSs. The market price of our preferred shares and the ADSs could drop significantly if the holders of shares or the ADSs sell them or the market perceives that they intend to sell them.

If we were treated as a passive foreign investment company, U.S. Holders of our preferred shares or our ADSs would be subject to disadvantageous rules under the U.S. tax laws.

If we were characterized as a passive foreign investment company, or PFIC, in any year, U.S. holders of our preferred shares or our ADSs could be subject to unfavorable U.S. federal income tax treatment. Although we do not believe that we were a PFIC in 2007 and we do not expect to be a PFIC in the foreseeable future, there can be no assurance that our business and activities will not lead to PFIC status for us in the future. PFIC classification is a factual determination made annually and thus is subject to change. See Item 10.E. Additional Information Taxation U.S. Federal Income Tax Consequences for a description of the PFIC rules.

ITEM 4. INFORMATION ON THE COMPANY

A. History and Development of the Company

Ultrapar Participações S.A., or Ultrapar, is a *sociedade anônima* incorporated under the laws of the Federative Republic of Brazil. We have a significant market presence in the business areas in which we operate. We are the leader in LPG distribution in Brazil through Ultragas with a 24% market share and one of the largest independent distributors in the world in terms of volume sold. We deliver LPG to an estimated 10 million households using our own vehicle fleet and also approximately more than 4,000 independent retailers. As a result of the acquisition of the Southern Distribution Business, we became the second largest Brazilian fuel distributor with an approximate 14% market share in Brazil in 2007, delivering our products through 3,292 service stations. We are the largest producer of ethylene oxide and its principal derivatives in Latin America, with an extensive business in the domestic and international markets. Through Ultracargo, we are a leading provider of integrated logistics for special bulk cargo in Brazil. We offer integrated multimodal transportation, loading and unloading services and the management of third-party fleets. Our high-storage capacity, together with the strategic location of our assets, facilitates product movement along an integrated multimodal logistics system.

We were incorporated on December 20, 1953, with our origins going back to 1937, when Ernesto Igel founded Companhia Ultragas S.A and brought LPG to be used as cooking gas in Brazil using cylinders acquired from Companhia Zeppelin. The gas stove began to replace the traditional wood stove and, to a lesser degree, kerosene and coal, which dominated Brazilian kitchens at the time.

In 1966, Transultra Armazenamento e Transporte Especializado Ltda, or Transultra, was formed to satisfy the demand for high-quality transportation services and focused in the transportation of chemicals, petrochemicals and LPG. In 1978, Terminal Químico de Aratu S.A. Tequimar, or Tequimar, was founded for the specific purpose of operating the storage business. Transultra and Tequimar are operating subsidiaries of Ultracargo.

We were also one of the pioneers in developing the Brazilian petrochemicals industry with the creation of Oxiteno in 1970, located in the Mauá petrochemical complex in São Paulo. In 1974, Oxiteno inaugurated its second industrial unit, in the Camaçari petrochemical complex in Bahia. In 1986, Oxiteno established its own research and development center in order to respond to specific customer needs.

Table of Contents

In 1997, through Ultragas, we introduced UltraSystem a small bulk distribution system to commercial and industrial segments, and we started the process of geographical expansion through the construction of new LPG filling plants. We also concluded the expansion of capacity of Oxiteno's industrial unit in Camaçari Petrochemical Complex, in the state of Bahia.

On October 6, 1999, we concluded our Initial Public Offering of preferred shares, listing our shares on the São Paulo Stock Exchange (Bovespa) and on the New York Stock Exchange (NYSE).

In 2000, Ultragas started the construction of four new filling plants, therefore covering the entire Brazilian territory. In August 2000, the first of the four new plants, located in Goiânia, in the state of Goiás, started operations. In 2001, Ultragas started two new plants: in Fortaleza, in the state of Ceará, and in Duque de Caxias, in the state of Rio de Janeiro. In 2002, the company started operations at the new plant in Betim, Minas Gerais.

On March 23, 2000, the controlling shareholders of Ultrapar signed an agreement, assuring equal treatment of all shareholders (holders of both common and/or preferred shares) in the event of any change in control tag along rights. The agreement stipulated that any transfer of control of Ultrapar, either direct or indirect, would only be executed in conjunction with a public offer by the acquiring entity to purchase the shares of all shareholders in the same proportion and under the same price and payment terms as those offered to the controlling shareholders.

On May 23, 2001, we acquired the 35% voting interest of Transultra that we did not yet own, from Petrobras Distribuidora S.A. We made this acquisition through our wholly owned subsidiary, Ultracargo, in an auction held at Bovespa.

In March 2002, Oxiteno made a tender offer for the acquisition of the shares of its subsidiary Oxiteno Nordeste S.A. Indústria e Comércio, known as Oxiteno Nordeste. The tender offer was completed on April 16, 2002, through the acquisition of 93,871 shares of Oxiteno Nordeste by Oxiteno, representing approximately 73.3% of the shares held by minority shareholders. Oxiteno increased its share ownership from 97% to 98.9% for approximately R\$4.4 million.

On December 20, 2002, we completed a corporate restructuring process which we began on October 15, 2002. The effects of the corporate restructuring were:

the merger of Gipóia Ltda, a company which held a 23% direct stake in Ultragas and was owned by Ultra S.A., into Ultrapar, increasing Ultrapar's ownership in Ultragas to 100% from 77% of total share capital. Ultrapar issued approximately 7.8 billion common shares in connection with this merger; and

the exchange of shares issued by Oxiteno for shares issued by Ultrapar, increasing Ultrapar's ownership in Oxiteno to 100% from 48% of total share capital. The holders of approximately 12 million of Oxiteno's shares elected to exchange their shares for shares in Ultrapar, triggering the issue of approximately 5.4 billion common shares and 3.4 billion preferred shares by Ultrapar. We paid R\$208.1 million representing approximately 13 million shares to Oxiteno's minority shareholders who exercised their statutory withdrawal rights.

The table below shows the effects of the corporate restructuring in our share capital:

	Total capital (in millions of reais)	Common shares	Preferred shares	Total shares
As of December 31, 2001	433.9	37,984,012,500	15,015,987,500	53,000,000,000
Shares issued for:				
Merger of Gipóia	38.5	7,850,603,880		7,850,603,880
Incorporation of Oxiteno's shares	191.6	5,430,005,398	3,410,659,550	8,840,664,948
As of December 31, 2002	664.0	51,264,621,778	18,426,647,050	69,691,268,828

Table of Contents

In August 2003, Ultragas acquired Shell Gás, Royal Dutch/Shell N.V.'s LPG operations in Brazil, for a total consideration of R\$170.6 million. With the acquisition, Ultragas has become the Brazilian market leader in LPG, with a 24% share of the Brazilian market.

On December 4, 2003, we concluded the acquisition of the chemical business of the Berci Group, or CANAMEX, a Mexican specialty chemicals company. CANAMEX had two plants in Mexico (Guadalajara and Coatzacoalcos). The acquisition amount was US\$10.25 million, without assuming any residual debt. In June 30, 2004, we acquired the operational assets of Rhodia Especialidades S.A. de C.V. in Mexico for US\$2.7 million. Both acquisitions had the target of establishing a stronger presence in the Mexican petrochemical market and to create a production and distribution platform to the United States. Since July 2, 2007 CANAMEX has operated under a new name, Oxiteno Mexico, S.A. de C.V., or Oxiteno Mexico.

On May 18, 2004, at an Extraordinary General Meeting, the shareholders of Ultrapar approved the addition of tag-along rights to the company's bylaws, for all shareholders, at 100% of the offer price, which has improved a right that was already conceived through a shareholders agreement dated March 22, 2000.

On September 22, 2004, the shareholders of Ultra S.A., a holding company that controls Ultrapar, signed a new shareholders agreement aimed at maintaining a stable controlling shareholder block in Ultrapar.

Igel Participações S.A. and Avaré Participações S.A., former controlling shareholders of Ultra S.A., were dissolved on December 16, 2004, and their shareholders received shares in Ultra S.A. as reimbursement for their shares in the respective paid-up capital, in the same proportion and of the same share class as previously held by Igel and Avaré.

In December 2004, we invested R\$10.0 million to acquire a 7.3% interest in Companhia Ultragas from Nacional Investimentos S.A.

At our Board of Directors meeting held on February 2, 2005, our directors approved a stock dividend of 10,453,690,324 preferred shares of Ultrapar, or 15 shares for each 100 outstanding common or preferred shares as of February 16, 2005. As a result of the stock dividend, we have issued 10,453,690,324 new preferred shares to our shareholders through a capitalization of reserves. At an extraordinary shareholders meeting held on February 22, 2005, our shareholders approved the issuance of additional preferred shares of Ultrapar to permit certain shareholders, including Ultra, to exchange common shares of Ultrapar held by them into preferred shares at a ratio of one common share for one preferred share. Common shares tendered for exchange into preferred shares were cancelled.

On April 8, 2005, we completed our first offering of unsecured debentures in the aggregate principal amount of R\$300 million with a term of three years, at a rate of 102.5% of CDI. Standard & Poor's assigned the company and its debentures its brAA+ corporate credit rating from its Brazil National Scale.

On April 28, 2005, we concluded a primary and secondary offering of our preferred shares. The offering was constituted of 7,869,671,318 preferred shares owned by Monteiro Aranha S.A. and certain shareholders of Ultra S.A., and 1,180,450,697 newly issued preferred shares pursuant to an overallotment option. Shares were distributed at a price of R\$40.00 per thousand preferred shares, totaling approximately R\$362 million. At the end of the distribution, Ultrapar's total capital increased by R\$47 million, to a total of approximately R\$946 million, and there were 81,325,409,849 total shares outstanding, with 49,429,897,261 common shares and 31,895,512,588 preferred shares.

At a special meeting of our shareholders held on July 20, 2005, our shareholders approved a reverse stock split of all our issued common and preferred shares. As a result, each 1,000 shares of any class would be converted into one share of each such class. In connection with this reverse stock split, we authorized a change to the ADS ratio of our ADR program from one ADS representing 1,000 preferred shares to one ADS representing one preferred share. This reverse stock split and ratio change became effective on August 23, 2005. As a result of the reverse stock split, we have amended our bylaws. As of April 30, 2006, we had 81,325,409 shares outstanding, with 49,429,897 common shares and 31,895,512 preferred shares.

Table of Contents

In July 2005, Ultracargo inaugurated a new terminal in Santos, its second port installation that integrates road, rail and maritime transportation systems. The new terminal has a storage capacity of 33,500 m³ for chemical products, 40,000 m³ for ethanol and 38,000 m³ for vegetable oil.

On December 20, 2005, Ultrapar, through its subsidiary LPG International Inc., issued US\$250 million in notes in the international market, with the aim of lengthening the company's debt profile, financing possible acquisitions and other corporate purposes. The notes mature in December 2015, have a coupon of 7.25% per annum and were priced at 98.75% of par value, resulting in a yield of 7.429% per annum. Standard & Poor's assigned its BB+ credit rating on a global scale for the company and the securities issued. In August 2006, Ultrapar announced the signing of a Memorandum of Understanding (MOU) between its subsidiary Oxiteno Nordeste and Braskem, for a 265 thousand tons/year supply of ethylene, with a 15-year term. The 265 thousand tons/year volume of ethylene represents an addition of 68 thousand tons/year to the previous contractual amount, and will be fully available beginning in 2009. Since January 2007, Oxiteno's ethylene purchase limit with Braskem increased by 13,000 tons/year out of the total additional 68,000 tons/year of ethylene, as contemplated by the MOU. The newly agreed upon supply price will be indexed to ethylene prices in the international market and to the volume effectively purchased by Oxiteno. Ultrapar also announced its plans to expand its ethylene oxide and specialty chemicals production capacity at Oxiteno's plants located in Mauá, São Paulo and in Camaçari, Bahia.

In August 2006, Oxiteno's first commercial office in Buenos Aires, Argentina (Oxiteno Argentina S.R.L.) was opened.

In April 2007, Ultrapar acquired a controlling stake in certain subsidiaries of the Ipiranga Group and thereby acquired the Southern Distribution Business, EMCA and a one-third stake in the Oil Refining Operations. See Item 4.A. Information on the Company History and Development of the Company Description of the Acquisition of the Ipiranga Group.

In April 2007, we acquired the operational sulfate and sulfonate assets of Unión Química S.A. de C.V., in San Juan del Río, Mexico through our subsidiary Oxiteno Mexico. These assets include a plant with a production capacity for sulfates/sulfonates of 8,600 tons/year that serves mainly the cosmetics and detergents industries. The investment for this acquisition totaled US\$4.0 million, did not entail the assumption of any debt and was financed entirely by Oxiteno Mexico in the local market.

In May 2007, Ultracargo completed the acquisition of Petrolog Serviços e Armazéns Gerais Ltda. for approximately R\$10.0 million. Petrolog is a provider of in-house logistics operations for services of packaging, inventory control, storage and dispatch to domestic and international markets.

In September 2007, Oxiteno acquired Arch Química Andina, C.A., or Arch, a Venezuelan subsidiary of the U.S. company Arch Chemicals, Inc. Arch is the sole producer of ethoxylates in Venezuela, which had been the only ethylene oxide producing country in Latin America where Oxiteno did not have operations. This acquisition is consistent with the company's growth and global expansion strategy and was intended to help Oxiteno (i) to strengthen its presence in Latin America, (ii) to have access to sources of raw materials at competitive prices given Venezuela's position as one of the main oil and natural gas producer in the world and (iii) to expand ethoxylate production capacity by an additional 70,000 tons/year. The amount of the acquisition was US\$7.6 million. The company was renamed Oxiteno Andina. Also in September 2007, Oxiteno announced the opening of its first sales office in the United States. The Company intends to leverage a local U.S. presence to grow in that market, particularly with respect to specialty chemicals.

Description of the Acquisition of the Ipiranga Group

On March 19, 2007, Ultrapar, Petrobras and Braskem announced their intent to acquire the Ipiranga Group and that on March 18, 2007, Ultrapar had entered into, and Petrobras and Braskem had acknowledged, an SPA with the Key Shareholders of the principal companies constituting of the Ipiranga Group, RIPI, DPPI and CBPI. As discussed further below, in connection with the Acquisition, Ultrapar acted on its own behalf and on behalf of Petrobras and Braskem pursuant to the Transaction Agreements.

Table of Contents

Ultrapar acted as a commission agent, under Articles 693 through 709 of the Brazilian Civil Code, for Petrobras and Braskem in the acquisition of the Petrochemical Business, and for Petrobras for the acquisition of Northern Distribution Business.

The Ipiranga Group operated in the same segments as Petrobras, Ultrapar and Braskem. In 2006, the Ipiranga Group was Brazil's second-largest fuel distributor, with a network of 4,240 service stations. It also had a significant share of the petrochemical market, with the production of 650,000 tons of petrochemical resins through IPQ. The Ipiranga Group shared joint control with Braskem of Copesul, a petrochemical company that produces basic petrochemicals from naphtha, such as ethylene, and is located in the southern petrochemical complex, in the state of Rio Grande do Sul. The consolidated net revenues of the Ipiranga Group in 2006 amounted to R\$31 billion and net income amounted to R\$534 million.

Following the Acquisition, Ultrapar, already the largest LPG distributor in Brazil, became the second largest fuel distributor in Brazil, with approximately 14% market share. Ultrapar believes that fuel distribution is a natural extension of LPG distribution because it has similar profitability drivers: logistics efficiency, management of a dealer network and leveraging a renowned brand. In addition, Ultrapar believes that the fuel distribution business presents attractive growth prospects in light of increased fuel consumption in Brazil in the recent past, principally due to increased national income, greater availability of credit and curbing unfair competitive practices, which cause the grey market to decline in relation to the formal market.

The Ipiranga Group also operated a small refinery in the state of Rio Grande do Sul, in the Southern region of Brazil. Ipiranga's refinery's nominal capacity is 17,000 barrels per day, which corresponds to less than 1% of the Brazilian refinery capacity.

To finance part of the Ipiranga Group Acquisition, on April 11, 2007, we completed our second offering of unsecured debentures in the aggregate principal amount of R\$889 million, in two series. The first series, in the aggregate amount of R\$675 million, was issued on April 11, 2007. The second series, in the aggregate amount of R\$214 million, was issued on October 22, 2007 on the financial settlement of the Mandatory Tender Offers for the shares of RIPI, DPPI and CBPI.

After the completion of the Acquisition, the businesses of the Ipiranga Group were divided among Petrobras, Ultrapar and Braskem. Ultrapar retained the fuel and lubricant distribution businesses located in the South and Southeast regions of Brazil; Petrobras received the fuel and lubricant distribution businesses located in the North, Northeast and Central West regions of Brazil; and Petrobras and Braskem received the petrochemical business, in the proportion of 60% for Braskem and 40% for Petrobras. (See Item 4.A. Information on the Company History and Development of the Company Recent Developments).

Phases of the Acquisition. The Acquisition was divided into five phases: (1) acquisition of the shares held by the Key Shareholders by Ultrapar; (2) mandatory tender offers (pursuant to tag along rights held by minority shareholders under Brazilian Corporate Law and CVM rules) for the acquisition of the remaining common shares of RIPI, DPPI, CBPI and IPQ (Mandatory Tender Offers); (3) tender offer by Braskem for the delisting of Copesul's common shares from the BOVESPA (Public Tender Offer); (4) exchange of the remaining common and preferred shares of RIPI, DPPI and CBPI for preferred shares of Ultrapar (Share Exchange); and (5) separation of the Target Companies' assets (Separation of Assets).

Phase 1 Acquisition of the shares of the Key Shareholders. On April 18, 2007, pursuant to the SPA, Ultrapar acquired, from the Key Shareholders, shares issued by RIPI, DPPI and CBPI. The total cost of this acquisition was R\$2.1 billion, of which R\$0.7 billion was paid by Ultrapar.

Phase 2 Mandatory Tender Offers for the common shares of RIPI, DPPI, CBPI and IPQ. As a result of the change of control of RIPI, DPPI and CBPI, under Art. 254-A of Law 6,404/76 and CVM Rule N° 361,2002 Ultrapar filed a request to register the Mandatory Tender Offers with the CVM on May 2, 2007. Under Brazilian law, the price offered in Mandatory Tender Offers must be equal to at least 80% of the price paid to the Key Shareholders.

Table of Contents

The notices for the Mandatory Tender Offers for RIPI and DPPI were published on September 20, 2007, and the auctions for the purchases of the shares took place on October 22, 2007. Ultrapar acquired 2,771,761 common shares of RIPI, or 82% of the shares under the offer, and 1,274,718 common shares of DPPI, or 77% of the shares under the offer, in the respective auctions. Ultrapar extended the period for acquiring RIPI and DIPI common shares through November 8, 2007, and maintained the same terms as originally offered, for those shareholders who were not able to register their shares for the auctions prior to the original deadline. Ultrapar acquired 207,534 common shares of RIPI and 90,474 common shares of DPPI during this extended period, which, together with the shares acquired during the original auction periods amounted to 2,979,295 shares of RIPI, or 88% of the shares under the offer, and 1,365,192 shares of DPPI, or 82% of the shares under the offer. The notice for the Mandatory Tender Offer for CBPI was published on October 9, 2007, and the auction for the purchase of the shares took place on November 8, 2007. Ultrapar acquired 1,574,486 common shares of CBPI, or 52% of the shares under the offer. The total consideration paid under the Mandatory Tender Offers for RIPI, DPPI and CBPI common shares was R\$575 million, of which R\$160 million was effectively paid by Ultrapar, with the remaining R\$ 415 million paid by Petrobras and Braskem. The table below shows the amounts per share and the total amounts paid in the Mandatory Tender Offers, as well as the per share amounts adjusted pursuant to the Brazilian law requirement that the per share prices be restated by the variation in the Taxa Referencial, or the Reference Rate or TR, (365 days basis) calculated on a pro-rata basis from the announcement of the auction dates to the relevant auction's financial settlement date.

<i>Company</i>	Price per share	Price per share (TR adjusted)	Total (R\$ millions)
RIPI	106.28	107.05	318.9
DPPI	112.07	112.88	154.1
CBPI	64.43	64.91	102.2

Phase 3 Public Tender Offer for the delisting of Copesul's common shares from the BOVESPA. The delisting of Copesul's common shares occurred on October 17, 2007 (Incorporated by reference to Form F-4 of Ultrapar Participações S.A. filed on December 17, 2007).

Phase 4 Share Exchange. After the conclusion of the Mandatory Tender Offers, Ultrapar carried out share exchange transactions, under Art. 252 of Law 6,404/76, in which it exchanged preferred shares for the remaining outstanding common and preferred shares of RIPI, DPPI and CBPI. The table below presents the exchange ratios applicable to the Share Exchange, expressed in terms of Ultrapar preferred shares per one RIPI, DPPI and CBPI share.

Companies Exchange Ratio	
RIPI	0.79850
DPPI	0.64048
CBPI	0.41846

On December 18, 2007 the Share Exchange was approved at extraordinary general meetings of the respective companies, which resulted in the issuance of 55 million preferred shares of Ultrapar to the former shareholders of RIPI, DPPI and CBPI.

On January 21, 2008 expired the period for the dissident shareholders at the extraordinary general meetings to exercise their appraisal rights, with no shareholder opting to exercise it.

Table of Contents

Phase 5 Separation of Assets. After the completion of the Share Exchange, Ultrapar carried out the Separation of Assets, a series of corporate restructurings in order to divide the Ipiranga Group assets among itself, Petrobras and Braskem. The Petrochemical Business was transferred to Petrobras and Braskem on February 27, 2008 and the Northern Distribution Business was transferred to Petrobras on May 14, 2008 and the total amount received due to the transfer of the assets was R\$ 1.7 billion. The completion of the Acquisition is subject to the hand over for Petrobras and Braskem of one third of the Oil Refining Operations for each of these companies in accordance to the Investment Agreement.

For a detailed discussion of the Acquisition, see our Form F-4 filed with the Commission on December 17, 2007.

Recent Developments

Right of Withdrawal from the Share Exchanges. On January 21, 2008, the period for dissenting shareholders to withdraw from the Share Exchanges expired, with no shareholders opting to exercise their rights to withdraw. See our Form F-4 filed with the Commission on December 17, 2007. Following the expiration of this period, RIPI, DPPI and CBPI became wholly owned subsidiaries of Ultrapar.

Changes in the Brazilian Corporate Law. On December 28, 2007, Law No. 11,638/07 was issued, modifying certain aspects of the Brazilian Corporate Law (Law No. 6,404 from December 15, 1976) so as to harmonize accounting practices adopted in Brazil with International Financial Reporting Standards (IFRS) as promulgated by the International Accounting Standard Board (IASB). Ultrapar is analyzing the impact of the new law. Ultrapar's Management believes that the main impacts of the new law would consist of the creation of new subgroup of account entitled equity valuation adjustments, the application of new criteria for the valuation and classification of financial instruments and fair value adjustments for long term and certain short term assets and liabilities. This law came into force on 2007 and its impacts will be recognized on Ultrapar's financial statements for the year ended December 31, 2008.

Joining Level 2 of Bovespa's Special Corporate Governance Levels. On February 20, 2008, Ultrapar's Board of Directors approved the commitment of changing from Level 1 to Level 2 of Bovespa's Special Corporate Governance Levels as another step in our continuing efforts to improve our corporate governance practices. Joining Level 2 reinforces our commitment to the capital markets, recognizing the material increase in our shareholder basis after receiving the new shareholders from Ipiranga. Adhesion to Level 2 will be formalized with Bovespa after the conclusion of the last phase of the Acquisition.

Promissory Note. On March 3, 2008 Ultrapar issued a R\$ 1.2 billion Promissory Note maturing on February 28, 2009 at a rate of 103.15% of CDI.

Debentures. In the first quarter of 2008 Ultrapar redeemed the debentures issued on April and October to finance the Acquisition in the amount of R\$ 889 million. In this same period CBPI also redeemed its R\$ 350 million debenture, which resulted from the Acquisition.

Separation of Assets. After the completion of the Share Exchange Transactions, Ultrapar carried out the Separation of Assets, a series of corporate restructurings in order to divide the Ipiranga Group assets among itself, Petrobras and Braskem. The Petrochemical Business was transferred to Petrobras and Braskem on February 27, 2008 and the Northern Distribution Business was transferred to Petrobras on May 14, 2008 and the total amount received due to the transfer of the assets was R\$ 1.7 billion.

Investment Grade. On May 21, 2008 the credit rating agency Moody's Investors Service (Moody's) assigned its Baa3 rating to Ultrapar equivalent to investment grade. Additionally, the credit rating agency Standard and Poor's (S&P) changed its outlook for Ultrapar's rating from stable to positive.

Table of Contents

Acquisition of União Terminais. In June 2008, Ultrapar, through Ultracargo announced the sale and purchase agreement for the acquisition of 100% of the shares of União Terminais e Armazéns Gerais Ltda. (União Terminais) held by União das Indústrias Petroquímicas S.A. (Unipar). União Terminais has 2 port terminals for storage and handling of bulk liquids, with total capacity of 119 thousand cubic meters. The main facility, located in Santos (in the state of São Paulo), has storage capacity of 102 thousand cubic meters and is currently in the final stage of expansion, which will add 20% (21 thousand cubic meters) to its capacity. The main products handled in this terminal are fuels, ethanol and chemicals. The terminal located in Rio de Janeiro (RJ) has a 17 thousand cubic meters storage capacity and the main products handled in this terminal are chemicals and lubricants. União Terminais also holds 50% of the total capital of União Vopak Ltda., which owns a port terminal in Paranaguá (in the state of Paraná) with storage capacity of 60 thousand cubic meters for the handling of vegetable oil and chemical products. The amount to be paid for 100% of the shares of União Terminais is R\$ 483 million, subject to adjustments resulting from variations in net debt and working capital. On December 31, 2007, União Terminais net debt amounted to R\$ 27 million.

Investments

We have made substantial investments in our operations over the last five years. At Ultragaz, we have invested in a small bulk LPG distribution (UltraSystem), the purchase and renewal of LPG bottles and the restructuring of our distribution logistics. We have also invested in the consolidation of our national coverage over the past years. Since March 2007, investments at Ipiranga included the expansion of the service station network, renewal of contracts and improvement in fuel service stations and distribution facilities, as well as investments related to information technology. Oxiteno has invested in increasing installed production capacity, mainly for specialty chemicals production, in the modernization of its industrial plants and in the development of new products. Ultracargo has invested in the expansion and maintenance of storage facilities in response to strong demand for a better logistics infrastructure in Brazil, deregulation of the oil and oil products industry and the strong growth in the international trade of vegetable oils and alcohol. We have invested in information technology at all our businesses for integrating processes, improving the quality of information, increasing the response time in decision-making and improving our services.

We have also made several acquisitions to maintain our growth and to consolidate our position in the markets where we operate or in complementary markets. In 2002, we acquired minority shareholders interests in Oxiteno for R\$212.6 million. In 2003, we acquired the Brazilian LPG distribution operations of Royal Dutch/Shell N.V. The operations of Shell Gás have been fully integrated into our LPG distribution business. In addition, we entered the petrochemical production market in Mexico through the acquisition of CANAMEX, a specialty chemicals company, in December 2003, for \$10.3 million, and the acquisition of the operating assets of Rhodia Especialidades Mexico for US\$2.7 million in June 2004. In March 2007, we led one of the largest acquisitions in Brazilian history, with the Ipiranga Acquisition. See Item 4.A. Information on the Company History and Development of the Company Description of the Acquisition of the Ipiranga Group . In April 2007, we acquired the sulfates and sulfonates operating assets of Unión Química S.A. de C.V., in San Juan del Río, Mexico. In May, 2007, Ultracargo acquired Petrolog Serviços e Armazéns Gerais Ltda for approximately US\$5 million. In September 2007, Oxiteno acquired the shares of Arch Química Andina in Venezuela for US\$7.6 million.

The acquisitions made by Oxiteno were motivated by our desire to establish a presence in the Mexican and Venezuelan petrochemical markets as a platform for production and distribution to supply the U.S. and the countries located in the Pacific coast of South America and to geographically diversify Oxiteno s production facilities. Ultracargo s acquisitions are part of our strategy to become Brazil s leading provider of integrated logistics services for special bulk cargo. The Ipiranga Acquisition is part of Ultrapar s growth strategy for the fuel distribution industry, in which it already operated through Ultragaz, distributing LPG. See our Form F-4 filed with the Commission on December 17, 2007.

In addition to the discussion below, see Item 4.A. Information on the Company History and Development of the Company Recent Developments for additional discussion of our investments.

Table of Contents**Investments in Permanent Assets and Deferred Charges**

The following table shows our capital expenditures net of disposals in permanent assets and deferred charges in the years indicated below:

	Year ended December 31,		
	2007	2006	2005
	(in millions of Reais)		
Ultragaz	128.9	104.8	83.0
Ipiranga(1)	143.6		
Oxitenó	453.0	178.4	93.7
Ultracargo	44.2	34.5	41.4
Others(2)	3.4	1.2	0.6
Total capital expenditures, net of disposals	773.2	318.9	218.7

- (1) Includes financing and bonuses to our resellers, net of repayments, and assets acquired through leasing operations. Bonuses are lump sum payments made by distributors to resellers. Resellers typically use these payments to improve its facilities or to invest in working capital. Financing and bonuses for clients are included under working capital in the cash flow statement.
- (2) Includes expenditures related to maintenance of our headquarters, which is performed by our wholly owned subsidiary Imaven Imóveis e Agropecuária Ltda.

At Ultragaz, our investment strategy has been to expand small bulk delivery distribution, to consolidate our geographic coverage and to invest in the modernization of our assets. During the years ended December 31, 2007, 2006 and 2005, investments focused on expanding the small bulk market segment (UltraSystem), on fleet renewal and on the replacement of cylinders.

At Ipiranga, R\$144 million was allocated mainly to the renovation and operational improvement of service stations and distribution facilities and for the expansion of service stations offering natural gas for vehicles (NGV). Of the total amount invested, R\$65 million corresponded to the addition of property, plants and equipment and deferred charges, net of disposals, R\$49 million corresponded to financing operations for the company's customers, net of repayments, and R\$30 million corresponded to assets acquired through leasing operations.

At Oxitenó, during the years ended December 31, 2007, 2006 and 2005, capital expenditures were largely focused on increasing installed production capacity of specialty chemicals, the modernization of industrial plants and the development of new products.

At Ultracargo, during previous years we have invested in expanding and maintaining our storage facilities. For the years ended December 31, 2007, 2006 and 2005, Ultracargo's capital expenditures focused on the construction of Santos Intermodal Terminal, the expansion of the Suape and Aratu Terminals and the construction of the Liquid Fuels Terminal in Montes Claros.

Our investment plan for 2008 calls for a total budget of R\$839 million, R\$479 million to be invested in Oxitenó, R\$171 million in Ipiranga, R\$140 million in Ultragaz and R\$48 million in Ultracargo. Investments at Oxitenó are meant to include (i) the completion of the fatty alcohols plant in the second quarter of 2008, (ii) the conclusion of the expansion of ethylene oxide production capacity at Mauá and expansion of the Camaçari plant and (iii) the expansion of production capacity for specialty chemicals. At Ipiranga, the main investments will be made in expanding the company's service station network. At Ultragaz, investments will include the expansion of the bulk LPG distribution (UltraSystem), strengthening the company's operations in the North and Northeast of Brazil and implementing the DME project. At Ultracargo, investments will be allocated to the expansion of its terminals and in-house logistics operations.

Investment in fatty alcohols plant. We are investing in the construction of a fatty alcohols plant, through our subsidiary Oxitenó, with co-production of fatty acids and glycerin. The total investment is estimated at approximately US\$200 million. This plant will be a pioneer unit in Latin America for the production of fatty alcohols. Fatty alcohols are raw materials used in the production of specialty chemicals derived from ethylene oxide, widely used in personal care products and for various applications in domestic cleaning products, agrichemicals and textiles, among others. Fatty alcohols and its derivatives are currently imported and already widely used in Oxitenó's surfactant line. We are the largest consumer of fatty alcohols in Brazil and we estimate that 40% of the total volume produced by the new plant will be used by us. Total production capacity should amount to approximately 100,000 tons per year, considering the entire product line. Besides adding value to the existing surfactants product line, this new plant is expected to generate additional net sales of US\$150 million per year when running at full

capacity. Oxiteno's fatty alcohols plant will use vegetable oils as feedstock, especially palm kernel oil.

Table of Contents

Other projects under study. We have signed a protocol with Petróleo Brasileiro S.A., or Petrobras, to study the feasibility of a project to produce basic petrochemicals, including ethylene, from heavy oil. Currently, we purchase ethylene from Brazilian suppliers whose production is based on naphtha. We have hired Technip Italy Spa, an engineering company, to help us in the assessment of available technologies, optimization of the conceptual project and pilot tests. Together with our partner Petrobras, we have chosen to locate the project in the municipalities of Itaboraí and São Gonçalo, in Rio de Janeiro state. We have not made any commitments to invest in this project should it prove to be feasible and we can give no assurance that the project will prove feasible or, if so, that we will participate or make an investment in such project.

Equity Investments

The table below shows our investments in shareholding stakes for the years ended December 31, 2007, 2006 and 2005:

	Year ended December 31,		
	2007	2006	2005
	(in millions of reais)		
Ultragaz	0.1	0.1	
Ipiranga			
Oxiteno	22.7	0.1	
Ultracargo	8.1		
Others(1)(2)	1,883.1	1.1	
Total	1,914.0	1.3	

(1) Amounts correspond to acquisitions, primarily the Ipiranga Acquisition, which also included the assumption of the existing net debt of Ipiranga of approximately R\$0.5 billion at the time of the acquisition.

(2) Share repurchase program, included in our consolidated statement of cash flows under Cash flows from financing activities Other. Our principal executive office is located at Avenida Brigadeiro Luis Antônio, 1343, 9º Andar, 01317-910, São Paulo, SP, Brazil. Our telephone number is 55-11-3177-7014. Our Internet website address is <http://www.ultra.com.br>. Our agent for service of process in the United States is C.T. Corporation System, located at 1633 Broadway, New York, New York 10019.

B. Business Overview

Ultrapar is one of Brazil's largest corporate groups, with operations in Brazil, Mexico, Argentina, the United States and Venezuela, in the following three sectors: fuel distribution, which is conducted by Ultragaz and Ipiranga, production of chemicals, which is conducted by Oxiteno, and integrated logistics solutions for special bulk cargo, which is conducted by Ultracargo. In 2007, Ultrapar acquired the Ipiranga Group's Southern Distribution Business in order to expand the Company's activities in the distribution sector. Following the Ipiranga Acquisition, Ultrapar, already Brazil's largest distributor of LPG, also became the second largest distributor of fuels in Brazil, with a 14% market share.

The following chart simplifies our organizational structure as of December 31, 2007, showing our principal business units. For a more detailed information about our current organizational structure, see Item 4.C. Information on the Company Organizational Structure.

Table of Contents

Our Strengths

Leading market positions across businesses

Ultragaz is the largest LPG distributor in Brazil. It has a national market share of 24% serving approximately 10 million homes and over 30,000 customers. For the year ended December 31, 2007, Ultragaz total volume sold reached 1.6 million tons of LPG.

Ipiranga is the second largest fuel distributor in Brazil with a 14% market share. Our business operates in the South and Southeast regions of Brasil, which represented 67% of the total fuel consumed in Brasil in 2007. We operate through a network of 3,292 service stations in Brazil. In addition to the service stations, Ipiranga's network also consists of 1,025 franchises of am/pm and Jet Oil stores and 169 service stations equipped to offer NGV. The volume of fuels sold by Ipiranga from April to December 2007 was approximately 8,595 thousand cubic meters.

Oxiteno is the sole producer of ethylene oxide and its principal derivatives in Latin America and is also a major producer of specialty chemicals. Our chemical operations supply a broad range of market segments, particularly agricultural chemicals, food, cosmetics, leather, detergents, packaging for beverages, thread and polyester filaments, brake fluids, petroleum, paints and varnishes. For the year ended December 31, 2007, Oxiteno sold approximately 621 thousand tons of chemical products. In the Brazilian market for these products we compete principally with imports. Imports of ethylene glycol and methyl-ethyl-ketone, two of our most important products, represented approximately 44% and 2%, respectively, of the volumes sold in Brazil during the year ended December 31, 2007.

Ultracargo is one of the leading providers of integrated logistics for special bulk cargo, with 25% of Brazil's tank storage capacity for chemical products in 2007. Ultracargo accounts for approximately 71% of all tank capacity for liquids at the Aratu terminal in the State of Bahia, which serves South America's largest petrochemical complex.

Robust business portfolio

Our operations encompass LPG and fuels distribution, the production of ethylene oxide and its derivatives and integrated logistics services for special bulk cargo. We believe our businesses provide us with increased financial capability and flexibility across the businesses in which we operate. Our business mix makes us less vulnerable to economic fluctuations and allows us to pursue growth opportunities as they arise in any of our business segments.

Highly efficient LPG distribution network

In addition to making direct sales of bottled LPG, Ultragaz is the only LPG distributor in Brazil with an exclusive network of independent dealers. This network constitutes more than 4,000 dealers who represent Ultragaz. This has enabled Ultragaz to control the quality and productivity of its dealers leading to a strong brand name recognition associated with quality, safety and efficiency, and also allows frequent contact with its customers. In addition, Ultragaz was the first to introduce LPG small bulk delivery in Brazil, with lower distribution costs than bottled distribution, and over the years has built a strong client base.

Table of Contents

Highly efficient fuel distribution network

In 2007, 64% of the fuels Ipiranga sold was distributed through its service stations, with the remainder being sold directly to large clients and specialized resellers, or TRR. The average volume of fuels sold per station by Ipiranga in 2007 was 180 cubic meters per month, while the average volume across the entire market was 146 cubic meters per month per service station, making Ipiranga almost 20% more efficient than the average market participant. Moreover, our significant market position in the fuel distribution market and our long-term presence in the sector has allowed us to maintain relationships with service stations located in attractive locations, especially in major urban centers.

Efficiencies in retail network logistics in addition to resale management know-how

We believe that the expertise in logistics and resale management that we have gained at Ultragas will be complemented by Ipiranga's know-how in the same areas, thus maximizing efficiency and profitability at both companies.

Flexibility across the petrochemical cycle

Oxiteno is the largest producer of ethylene oxide and its principal derivatives in Latin America. Approximately 97% of its ethylene oxide production is used internally in the production of ethylene oxide derivatives, which can be classified in two groups: specialty and commodity chemicals. Oxiteno is a major producer of specialty chemicals, which are traditionally products with better margins and less exposure to petrochemical cycles than commodity chemicals. Oxiteno has also been investing heavily in the development of products derived from renewable raw materials, such as a new fatty alcohols plant, reducing its dependence on oil-based feedstocks and expanding its product portfolio.

Cost-efficient operations

Oxiteno's operations have a high degree of production efficiency derived from a scale similar to that of the largest producers in the world. Ultragas has significant market presence in densely populated areas, which allows it to operate its filling plants and distribution system with a high level of capacity utilization and efficiency. Ipiranga also has a significant market presence in the South and Southeast regions of Brazil, which allows it to operate its extensive network of primary and secondary storage terminals and its distribution system in a cost-efficient manner.

Strong operational track record

Our business has exhibited a solid operational track record. Our accumulated adjusted EBITDA for the last five years reached R\$3.1 billion, in spite of the overall macroeconomic volatility in Brazil during this same period. Our adjusted EBITDA is used to provide a measure of assessing the company's ability to generate cash from its operations. See Item 3.A. Key Information Selected Consolidated Financial Data for more information about adjusted EBITDA. Our accumulated net earnings for the last five years reached R\$1.4 billion.

Experienced management team

We are led by a strong and experienced management team with a proven track record in the LPG and fuels distribution, petrochemical and specialized logistics industries. Our senior management team possesses an average of 20 years of experience in the company and its subsidiaries, is a significant shareholder of Ultrapar and has a performance-linked remuneration based on an economic value-added model (EVA®).

Alignment of shareholders' interests

Our bylaws provide important rights that align the interests of all our shareholders, including our controlling shareholders, management shareholders and minority shareholders. If our controlling shareholders sell their controlling stake in our Company, our bylaws provide that holders of our preferred and common shares are entitled to sell their shares in a public tender offer at the same price and with the same payment terms as our controlling shareholders.

Table of Contents

Our Strategy

Build on the strength of our LPG and fuel distribution brands

Our LPG and fuel distribution businesses have a high brand recognition associated with quality, safety and efficiency. We intend to reinforce this market perception by continuing to supply high-quality products and services and introducing new services and distribution channels.

Maintain exclusivity in LPG distribution

We intend to preserve our strong relationship with dealers by keeping their distribution exclusivity and avoiding geographic overlap. We plan to continue to invest in training our dealers, in order to maximize efficiency, further strengthen our relationships with them and promote the high standards of our distribution network. In parallel, we plan to increase our operational efficiency and productivity at Ultragas.

Continuously improve cost and capital efficiency in LPG and fuels distribution

We plan to continue to invest in the cost and capital efficiency of our distribution systems. Current initiatives include greater discipline with respect to our capital allocations, a program to revise Ultragas' distribution structure, both prompted by changing market conditions such as market stability, implementation of EVA® at Ipiranga and new sales channels.

Increase market share in fuel distribution

We intend to benefit from a generally favorable outlook in the fuels distribution market as a result of record vehicle sales in Brazil, which we believe has been caused by higher consumer income and greater availability of credit. Our sales strategy is to increase Ipiranga's market share by converting unbranded stations to Ipiranga's brand and expanding into the regions of Brazil where we do not currently operate in order to establish a national presence.

Promote and benefit from the formalization of the fuel distribution market

We plan to continue to collaborate with the competent authorities to promote improvements to legislation and to enhance fiscalization enforcements in the fuels distribution sector as means of creating a level playing field in the market, increasing sales volume in the formal market and improving our gross margin, reducing the competitiveness of players which benefited from cost advantages derived from irregular practices.

Invest in niche segments for LPG distribution

Ultragas will strengthen its presence in the North and North East of Brazil by selling LPG in the states of Pará and Maranhão, where it does not currently have significant operations and where LPG consumption is growing faster than Brazil's national average. Ultragas also intends to expand its portfolio by selling DME, which is currently served by imports in Brazil, in final products, which use DME as raw material.

Enhance retail network

We intend to continue expanding Ipiranga's sources of non-fuel income, such as convenience store sales, car care, maintenance services at our retail sites and credit cards, by creating new products and expanding our services.

Table of Contents***Strengthening for future expansion***

Ultrapar intends to leverage on its efficient decision-making processes and solid financial position to accelerate Ipiranga's expansion through both organic growth and acquisitions. Our objectives are to grow Ipiranga's market share in the regions in which it operates and to expand its operations further into the remainder of Brazil.

Expand capacity at Oxiteno

We intend to continue to expand Oxiteno's production capacity ahead of demand in Brazil. As we expand, we plan to continue our efforts to apply the best global practices to Oxiteno's plants and production processes with a view to remain technologically competitive.

Continue to enhance product mix at Oxiteno

We plan to increase Oxiteno's capacity to produce a variety of value-added ethylene oxide derivatives in order to optimize its sales mix across petrochemical cycles. Oxiteno's investments in research and development have resulted in the introduction of 79 new applications for its products during the last three years. Oxiteno will continue to invest in research and development focused on developing new product applications to meet clients' needs. In addition, we intend to focus Oxiteno's sales in the Brazilian market, which allows us to have higher margins.

Maintain financial strength

We seek to maintain a sound financial position to allow us to pursue investment opportunities and enhance our shareholders' return on their investment in our Company. Our net debt position for the year ended December 31, 2007 was R\$1,434 million originated from the Acquisition. As part of the Acquisition, in 2008 we received R\$1.7 billion from Petrobras and Braskem. Additionally, all foreign currency denominated debt is hedged until maturity. On May 21, 2008 the credit rating agency Moody's assigned Ultrapar its Baa3 credit rating, which is equivalent to investment grade. We have been consistently distributing dividends to our shareholders. During the last five years we have declared yearly dividends representing an average of approximately 55% of our net income.

Continue to grow our businesses

Our principal corporate objective is to enhance shareholder value and strengthen our market presence by growing our business. Historically, we have grown our business organically and through acquisitions, such as the Ipiranga Acquisition completed in 2007, and we intend to continue this strategy.

We have also announced several investments in the expansion of our existing operations which will result in an increase of approximately 40% and 50% in our ethylene oxide and specialty chemicals production capacities, respectively. We constantly analyze acquisition opportunities in the segments in which we operate and in complementary segments that could add value to our company.

Key Financial Information

The table below sets forth certain financial information for us and our principal businesses:

	2007	Year ended December 31,			2003
		2006	2005	2004	
		(in millions of Reais)

Distribution of Liquefied Petroleum Gas**Industry and Regulatory Overview**

LPG is a fuel derived from the oil and natural gas refining process. In Brazil, approximately 85% of local demand in 2007 was produced in local refineries and the remaining 15% was imported. LPG has the following primary uses in Brazil:

Bottled LPG used primarily by residential consumers for cooking; and

Bulk LPG used primarily for cooking and water heating in shopping malls, hotels, residential buildings, restaurants, laundries and hospitals.

Table of Contents

The following chart shows the process of LPG distribution:

Historically, bottled LPG has represented more than 70% of the LPG distributed in Brazil, and is primarily used for cooking. The use of LPG for domestic heating in Brazil is immaterial compared with its use in other developed and emerging countries, primarily because of Brazil's generally warm climate. Consequently, consumer seasonality throughout the year is significantly smaller. In addition, because LPG is not used to a significant extent for domestic heating in Brazil, overall consumption of LPG per capita is lower in Brazil compared to countries where domestic heating is a major element of LPG demand, making low distribution costs a major competitive differential in the market for Brazilian LPG.

Prior to 1990, extensive governmental regulation of the LPG industry essentially limited the use of LPG to domestic cooking. Since 1990, regulations have permitted the use of LPG for certain commercial and industrial uses, and the use of LPG has increased accordingly.

Table of Contents

The primary international suppliers of LPG are major oil companies and independent producers of both natural gas liquids and oil. However, due to Petrobras' monopoly over the production and import of petroleum and petroleum products until the end of 2001, Petrobras is currently the sole de facto supplier of LPG in Brazil.

Currently, the LPG distribution industry in Brazil consists of 16 LPG distribution companies or groups of companies, and is regulated by the National Oil Agency, or ANP, which reports to the Ministry of Mines and Energy. The LPG distribution industry includes purchasing LPG from Petrobras, filling LPG cylinders and bulk delivery trucks at filling stations, selling LPG to dealers and end users, controlling product quality and providing technical assistance to LPG consumers. See Item 4.B. Information on the Company Business Overview Distribution of Liquefied Petroleum Gas Industry and Regulatory Overview The role of the ANP. LPG produced by Petrobras, which represented approximately 85% of total LPG sold in Brazil in 2007, is transported in pipelines and by trucks from Petrobras' production and storage facilities to filling stations maintained by LPG distributors. The balance is imported by Petrobras into Brazil and stored in large storage facilities maintained by Petrobras. The imported LPG is then transported from the storage facilities by pipeline and truck to the LPG distributors' filling stations.

LPG can be delivered to end users either in cylinders or in bulk. The cylinders are filled in the LPG distributors' filling stations. Distribution of bottled LPG is conducted through the use of cylinders via two principal channels:

home delivery of LPG cylinders; and

the sale of LPG cylinders in retail stores and at filling stations.

In both cases, the cylinders are either delivered by the LPG distributors themselves or by independent dealers.

Bulk delivery is the principal delivery method to large volume consumers, such as residential buildings, hospitals, small- and medium-sized businesses and industries. In the case of bulk delivery, LPG is pumped directly into tanker trucks at filling stations, transported to customers and pumped into a bulk storage tank located at the customer's premises.

The role of the Brazilian government. The Brazilian government historically regulated the sale and distribution of LPG in Brazil. The period from 1960 to 1990 was characterized by heavy governmental regulation, including price controls, regulation of the geographical areas in which each LPG distributor could operate, regulation of the services offered by distributors and governmental quotas for the LPG sold by distributors, thus restricting the growth of larger LPG distributors. In 1990, the government started a deregulation process with the purpose of establishing a largely unregulated LPG market. This process included easing the requirements for the entry into the market of new distribution companies, reducing certain administrative burdens and removing restrictions on the areas in which distributors could conduct their business and on sales quotas. There are currently no restrictions on foreign ownership of LPG companies in Brazil.

Since May 2001, distributors have been allowed to freely establish retail prices, which were previously set by the government. Until the end of 2001, the LPG refinery price, which is charged by Petrobras to all LPG distributors, was determined by the government and was the same for all LPG distributors in all regions of Brazil. Historically, refinery prices have been subsidized by the government. In January 2002, the government abolished subsidies to refinery prices and from January 2002, Petrobras started to freely price LPG in the domestic market, adopting the international price plus surcharges as its benchmark. However, the Petrobras refinery price of LPG is still subject to government intervention when the government deems appropriate, such as occurred between August and October of 2002. Prices of LPG in *reais* remained unchanged from May 2003 to December 2007. In 2007, Petrobras' average refinery price was approximately US\$487 per ton compared with the average international price of US\$621 per ton. In January 2008 Petrobras increased LPG refinery price for commercial and industrial usage by 15% and an additional 10% in April, 2008.

The role of Petrobras. Petrobras, Brazil's national oil and oil products company, had a legal monopoly in the exploration, production, refining, importing and transporting of crude oil and oil products in Brazil and Brazil's continental waters since its establishment in 1953. This monopoly was confirmed in Brazil's federal constitution enacted in 1988. As a result, Petrobras was historically the sole supplier in Brazil of oil and oil-related products, including naphtha and LPG.

Table of Contents

In November 1995, Petrobras' monopoly was removed from the federal constitution by a constitutional amendment approved by the Brazilian Congress. According to this amendment, other state and private companies would be able to compete with Petrobras in virtually all fields in which Petrobras operated. This amendment was implemented through Law No. 9,478, dated August 6, 1997, which effectively allowed Petrobras' monopoly to continue for a maximum period of three years. Law No. 9,478 prescribed that the termination of Petrobras' monopoly would be accompanied by the deregulation of prices for oil, gas and oil products, and created a new regulatory agency, the ANP, to oversee oil-related activities. However, in practice, Petrobras still remains the sole LPG supplier in Brazil, even though there are no legal restrictions to the operation of other suppliers.

On June 25, 2004, Petrobras entered the LPG distribution market in Brazil through the acquisition of Agip do Brasil S.A., which had a market share of 21.8% for the year 2004.

The role of the ANP. The ANP is responsible for the control, supervision and implementation of the government's oil and gas policies. The ANP regulates all aspects of the production, distribution and sale of oil and oil products in Brazil, including product quality standards, and minimum storage capacities required to be maintained by distributors.

In order to operate in Brazil, an LPG distributor must be licensed with the ANP and must comply with certain minimum operating requirements, including:

maintenance of sufficient LPG storage capacity;

maintenance of an adequate quantity of LPG cylinders;

use of cylinders stamped with the distributor's own brand name;

possession of its own filling plant;

appropriate maintenance of LPG filling units;

distribution of LPG exclusively in areas where it can provide technical assistance to the consumer either directly or indirectly through an authorized dealer; and

full compliance with the Unified Suppliers Registration System – Sistema Único de Cadastramento Unificado de Fornecedores SICAF.

LPG distributors are required to provide the ANP with monthly reports showing their previous month's sales and the volume of LPG ordered from Petrobras for the next four months. The ANP limits the volume of LPG that may be ordered by each distributor based on the number of cylinders and infrastructure owned by the distributor. Based on the information provided by the distributors, Petrobras supplies the volume of LPG ordered, provided its production and imports of LPG are sufficient to meet the demand.

LPG distribution to the end consumer may be carried out directly by the LPG distribution companies or by independent dealers. Each LPG distributor must provide the ANP with information regarding its contracted independent dealers on a monthly basis. The construction of LPG filling plants and storage facilities is subject to the prior approval of the ANP, and filling plants and storage facilities may only begin operations after ANP inspection.

The self-regulatory code. In August 1996, most of the Brazilian LPG distributors, representing more than 90% of the market, cylinder manufacturers, LPG transportation companies and certain LPG retail stores, under the supervision of the Brazilian government, entered into a statement of intent regarding the establishment of a program for requalifying LPG cylinders (a process under which they undergo safety and

Edgar Filing: ULTRAPAR HOLDINGS INC - Form 20-F

quality checks) and other safety procedures, known as the Self-Regulatory Code or Código de Auto-Regulamentação. See Item 4.B. Information on the Company Business Overview Distribution of Liquefied Petroleum Gas Ultragas Cylinder swapping centers and Item 4.B. Information on the Company Business Overview Distribution of Liquefied Petroleum Gas Ultragas Requalification of cylinders. Before the Self-Regulatory Code came into effect, certain LPG distributors, not including Ultragas, would fill cylinders stamped with another distributor's brand. This practice resulted in a low level of investment in new cylinders, giving rise to concerns regarding the safety of older cylinders. The Self-Regulatory Code provides, among other things, that:

each LPG distributor may only fill and sell cylinders that are stamped with its own trademark;

Table of Contents

each LPG distributor is responsible for the quality and safety control of its cylinders; and

each LPG distributor must maintain a sufficient number of cylinders to service its sales volume.

Under the Ministry of Mines and Energy Normative Ruling No. 334 of November 1, 1996, or Ruling 334, any party that defaults on its obligations under the Self-Regulatory Code will be subject to the legal penalties, ranging from payment of a fine and suspension of supply of LPG to such party to suspension of such party's LPG distribution operations.

Ruling 334 sets forth the following timetable for the implementation of the measures adopted under the Self-Regulatory Code:

the construction of at least 15 cylinder swapping centers, starting in November 1996 (See Item 4.B. Information on the Company Business Overview Distribution of Liquefied Petroleum Gas Ultragas Cylinder swapping centers and Item 4.B. Information on the Company Business Overview Distribution of Liquefied Petroleum Gas Ultragas Requalification of cylinders);

the filling of third-party cylinders to have ceased by October 1997;

by November 1, 2006, the requalification of 68.8 million cylinders manufactured up to 1991; and

by November 1, 2011, the requalification of 12.8 million cylinders manufactured between 1992 and 1996.

Ultragas itself was required to requalify 13.8 million cylinders until November 2006 and an additional 1.3 million cylinders by November 2011. In 2007, Ultragas requalified 1.5 million cylinders and for 2008 it is required to requalify another 2.2 million cylinders.

Environmental, health and safety standards. LPG distributors are subject to Brazilian federal, state and local laws and regulations relating to the protection of the environment, public health and safety. The National Council of the Environment, or Conselho Nacional do Meio Ambiente CONAMA and the Ministry of Labor, or Ministério do Trabalho, are the primary environmental regulators of Ultragas at the federal level.

Brazilian federal and state environmental laws and regulations require LPG distributors to obtain operating permits from the state environmental agencies and from the fire department. In order to obtain such permits, distributors must satisfy regulatory authorities that the operation, maintenance and reclaiming of facilities are in compliance with regulations and are not prejudicial to the environment. In addition, regulations establish standard procedures for transporting, delivering and storing LPG and for testing and requalification of LPG cylinders. Civil, administrative and criminal sanctions, including fines and the revocation of licenses, may apply to violations of environmental regulations. Under applicable law, distributors are strictly liable for environmental damages.

Distributors are also subject to federal, state and local laws and regulations that prescribe occupational health and safety standards. In accordance with such laws and regulations, it is mandatory for distributors to prepare reports on their occupational health and safety records on an annual basis to the local office of the Ministry of Labor in each of the states in which they operate. In addition, they are also subject to all federal, state and local governmental regulation and supervision generally applicable to companies doing business in Brazil, including labor laws, social security laws, and public health and consumer protection laws.

Ultragas

We distribute LPG through Ultragas. Founded in 1937, we were the first LPG distributor in Brazil. At that time, Brazilians used wood stoves and, to a lesser extent, alcohol, kerosene and coal stoves. Ultragas was the leading company by sales volume in the Brazilian LPG market as of December 31, 2007.

Table of Contents

Ultragaz operates nationwide in the distribution of both bottled and bulk LPG, including the most highly populated states in Brazil, such as São Paulo, Rio de Janeiro and Bahia, and sells bottled LPG through its own retail stores and through independent dealers as well as its own truck fleet, which operates on a door-to-door basis. Bulk LPG is serviced through its own truck fleet.

In August 2003, Ultragaz acquired Shell Gás, Royal Dutch/Shell N.V.'s LPG operations in Brazil, for a total price of R\$170.6 million. Shell Gás had about a 4.5% market share in Brazilian LPG distribution, selling approximately 287,400 tons of LPG in 2002. With this acquisition, Ultragaz has become the national market leader in LPG with a 24% share of the Brazilian market at the date of the acquisition and has also improved its economies of scale for distribution and logistics.

Ultragaz has three operating subsidiaries:

Companhia Ultragaz S.A., or Cia. Ultragaz, the company that pioneered our LPG operations;

Bahiana Distribuidora de Gas Ltda., or Bahiana, which is a wholly owned subsidiary of Ultragaz;

Utingás Armazenadora S.A., or Utingás, which was incorporated in 1967 when Ultragaz and other LPG distributors joined to construct LPG storage facilities based in the states of São Paulo and Paraná. Ultragaz currently controls 56% of the storage operations. See Storage of LPG.

Markets and marketing. When Ultragaz began its operations, it served only the southeast region of Brazil. Currently, Ultragaz is present in almost all of Brazil's significant population centers. In 2007, Ultragaz announced that it would strengthen its presence in the North and North East of Brazil, selling LPG in the states of Pará and Maranhão, where it does not have significant operations and where LPG consumption has been growing faster than Brazil's national average. Distribution of bottled LPG includes direct home delivery and retail stores, both carried out by Ultragaz or its dealership network using 13 kg ANP (National Oil Agency) approved cylinders. In the case of Ultragaz, the cylinders are painted blue, which we believe is an important element in recognizing the Ultragaz brand. Ultragaz's operating margins for bottled LPG vary from region to region and reflect market share and the distribution channel in the region.

Before Shell Gas acquisition, Ultragaz's sales strategy for bottled LPG delivery was to increase market share through geographical expansion as well as protecting and incrementing market participation in regions where it already operated. With the acquisition of Shell Gás, Ultragaz became the Brazilian market leader in LPG, and the focus of its strategy evolved to investing in the brand and protecting market share. The LPG bottled market in Brazil is a mature one and Ultragaz believes that growth in demand will be a function of an increasing number of households consuming the product as well as an increasing level of household income.

Distribution of bulk LPG is largely carried out through 190 kg storage tanks installed on its clients' premises. Since 1994, Ultragaz has been investing in small- and medium-sized bulk delivery facilities and in bob-tail trucks, known together as UltraSystem, which deliver LPG in bulk to commercial clients. Ultragaz's clients in the commercial sector include shopping centers, hotels, residential buildings, restaurants, laundries and hospitals. Ultragaz's trucks supply clients' stationary tanks using a system that is quick, safe and cost effective.

Ultragaz's industrial clients consist mostly of companies in the food, metallurgical and, steel that have large fixed tanks at their plants and consume monthly volumes in excess of 5 tons of LPG. These clients represent a very small portion of Ultragaz's sales volume since, in the case of large volume consumers, Ultragaz is competing with other highly competitive energy sources such as natural gas.

Ultragaz supplies its bulk delivery clients on the basis of supply contracts with terms ranging from two to five years. This type of contract limits fluctuations in sales given that the installation of the tanks is carried out by Ultragaz, and any change in supplier would imply the client's reimbursing Ultragaz's investments. The contract also requires that any tank supplied by Ultragaz may only be filled with LPG delivered by the company. When the bulk delivery contract expires, it can be renegotiated or the tank is removed. Since the installation of the tank represents a significant investment for Ultragaz, it seeks to achieve a return on its investment within the term of the contract.

Table of Contents

Ultragaz strategy for bulk LPG distribution is to continue its process of product and service innovation and to increase the profile of its trademark. Ultragaz also has a team to identify the needs of each bulk LPG client and develop practical solutions for using LPG as an energy source.

The table below shows Ultragaz sales of LPG to clients of bottled and bulk LPG:

Client category	Year ended December 31,		
	2007	2006	2005
	(in thousands of tons)		
Bottled LPG cylinder			
Residential delivery by Ultragaz	74.5	101.2	137.6
Ultragaz owned retail stores	2.2	3.5	3.6
Independent dealers(1)	978.5	949.6	904.7
Total bottled LPG	1,055.1	1,054.3	1,045.8
Total bulk LPG	517.1	489.6	484.9
Total tons delivered	1,572.2	1,543.9	1,530.7

(1) Includes residential deliveries and distribution through retailers stores.

Distribution infrastructure. Ultragaz distribution strategy includes having its own distribution infrastructure, since it believes proximity to customers is a significant factor in successful distribution and sales strategies. The services associated with Ultragaz home deliveries strongly influence the ranking of the Ultragaz brand name in the bottled market. Ultragaz seeks to expand its home delivery services by having its delivery personnel provide safety recommendations to household customers and by scheduling deliveries on the same weekday in each covered area. For both bottled and bulk LPG, deliveries are made by employees wearing Ultragaz uniforms and driving vehicles with Ultragaz logo.

Ultragaz delivers bottled LPG using a distribution network, which in 2007 included 75 company-owned retail stores, and more than 4,000 independent dealers. In 2007, Ultragaz had a fleet of 535 vehicles for delivering gas cylinders to homes and 251 to commercial establishments.

Bottled sales capacity derives from the number of cylinders owned by Ultragaz and the number of cylinders owned by its independent dealers. Ultragaz estimates that as of December 31, 2007, there were some 20 million 13kg Ultragaz cylinders in the market.

Independent dealers. Ultragaz independent distribution network ranges from large dealers, which carry out extensive home delivery, to single retail stores, which sell small quantities of LPG cylinders. Until the enactment of ANP Rule 297 on November 18, 2003, independent dealers needed only to be registered with ANP for the sale of LPG cylinders. No licenses were required except for those required by the fire department and the municipal authorities. Rule 297 established that the independent dealers must be registered with ANP and comply with a list of prerequisites contained in such rule, as well as those required by law for the storage of cylinders up to 90 kg. Also, each municipality sets forth its own safety regulations applicable to stores that sell LPG, including a minimum distance from certain locations, such as schools. For the year ended December 31, 2007, approximately 90% of Ultragaz bottled LPG sales were made through independent dealers. The agreements entered into between Ultragaz and independent dealers require the use of the Ultragaz brand and the display of the Ultragaz logo in the delivery vehicles and on the uniforms worn by delivery personnel. Proprietary rights in the trademark and logo are retained by Ultragaz and are duly registered with the National Institute of Industrial Property (INPI Instituto Nacional de Propriedade Industrial). All contracted dealers are Ultragaz exclusive representatives. Under the terms of the respective contracts, each dealer agrees not to deliver non-Ultragaz LPG cylinders.

In order to strengthen the relationship with its network of independent dealers, Ultragaz has created Project SOMAR (Marketing Solutions Applied to Independent Dealers), as part of which it recommends changes to dealers operating procedures, helps to improve the efficiency of their operations and encourages their adoption of best practices. Ultragaz believes that improving the efficiency of independent dealers is a key factor in improving the profitability of the distribution chain of LPG.

Table of Contents

Distribution channels to bulk consumers. Large bulk distribution, classified by Ultragas as consumption of more than five tons per month and constituted almost exclusively of industrial users, is made by tanker trucks that deliver the LPG directly to the storage tanks located at the customers' premises. Small bulk distribution, classified by Ultragas as consumption of between 0.5 and five tons per month and constituted of commercial users and smaller industrial users, is made primarily by bob-tail trucks, to enable delivery to be made to commercial users whose tanks are not readily accessible by traditional bulk delivery equipment. Ultragas uses the UltraSystem trade name in connection with its small bulk distribution through bob-tail trucks. Ultragas makes bulk sales directly to customers using its own fleet and transportation provided by Ultracargo and by third-party transportation companies.

Payment terms. Ultragas' sales through its retail stores and through home delivery are made on a cash basis. Ultragas' sales to independent dealers and to industrial and commercial users have payment terms of 24 days on average.

Cylinder swapping centers. Pursuant to the Self-Regulatory Code, the LPG distributors have established sixteen operating swapping centers to facilitate the return of third-party cylinders to the appropriate distributor. Under the Self-Regulatory Code, while LPG distributors may pick up any empty LPG cylinders tendered by customers in exchange for full LPG cylinders, whether or not such empty cylinders were put in circulation by that distributor, after October 1997, LPG distributors were not permitted to refill third-party cylinders. Accordingly, LPG distributors may deliver third-party cylinders to a swapping center where such cylinders may be exchanged for cylinders placed in circulation by such LPG distributor. The swapping centers currently charge a fee of R\$0.22 per exchanged LPG cylinder. In areas where only one LPG distributor has a sizable market share, it is customary to use the facilities of that distributor as an unofficial swapping center for which that distributor may charge an additional fee.

Prior to the establishment of the swapping centers, Ultragas incurred significant costs associated with the return of its cylinders, as it did not follow the widespread industry practice of filling third-party cylinders. As the swapping centers' costs are shared amongst LPG distributors, Ultragas' costs from the return of cylinders were significantly reduced when the swapping centers were created, but have since then increased due to Ultragas' geographic expansion.

Requalification of cylinders. The useful life of a cylinder varies depending on a number of factors, the two most important of which are the extent to which the cylinder has been exposed to corrosion from the atmosphere and whether the cylinder has been damaged. The Self-Regulatory Code provides that all cylinders must be requalified after their first 15 years' use, and every ten years thereafter. Each cylinder is visually inspected for damage and corrosion to determine if it can be requalified or if it should be discarded as scrap metal. In the case of cylinders which pass the quality and safety checks, several procedures are followed before the cylinders are stamped with the year of requalification and the next year in which they are due for requalification.

Supply of LPG. Currently, Ultragas and all other LPG distributors in Brazil purchase all or nearly all LPG from Petrobras. Ultragas has a formal contract with Petrobras for the supply of LPG. The procedures for ordering and purchasing LPG from Petrobras are generally common to all LPG distributors, including Ultragas, which basically consists of sending an estimate of our needs to Petrobras four months in advance and a more precise estimate of our needs one month in advance. There have been no significant interruptions in the supply of LPG by Petrobras to the distributors with the exception of an interruption in 1995 due to a 15-day strike by Petrobras employees.

Storage of LPG. In 2007, Ultragas' storage capacity was approximately 17,200 tons, including Utingás' storage capacity. Based on its 2007 average LPG sales, Ultragas could store approximately two days' supply of LPG. Petrobras maintains approximately two days' supply of LPG at its refineries and other facilities. Accordingly, any interruption in the production of LPG can result in shortages, such as the one that occurred during the Petrobras strike in 1995.

Ultragas stores its LPG in large tanks at each of its filling plants located throughout the regions in which it operates. Primary filling plants receive LPG directly from Petrobras by pipeline; secondary filling plants are supplied by truck; and satellite plants primarily hold LPG which is used to fill bob-tail trucks for small bulk distribution to customers that are not located near a primary or secondary filling plant in order to optimize the LPG distribution process. See Item 4.D. Information on the Company Property, Plants and Equipment.

Table of Contents

Competition. Ultragaz main competitors are:

SHV Gas, formed by the merger of Minasgás S.A. and Supergasbrás S.A. and controlled by SHV Energy, a major multinational LPG distributor, which operates through its two separate brands, Minasgás and Supergasbrás ;

Liquigás, formerly controlled by ENI Group and acquired by Petrobras in June 2004, which has been operating in the Brazilian LPG distribution sector for more than 40 years; and

Butano, a domestic Brazilian LPG distributor which has been present in the market for more than 45 years.

The following table sets forth the market share of Ultragaz and its competitors:

LPG Distributor	Year ended December 31,		
	2007	2006	2005
Ultragaz	23.7%	23.9%	24.0%
SHV Gas(1)	23.1%	23.3%	23.4%
Liquigás	21.8%	21.7%	21.8%
Butano	18.4%	18.5%	18.3%
Others	13.0%	12.6%	12.5%
Total tons delivered	100.0%	100.0%	100.0%

(1) Proportional to SHV equity stakes in the operating companies. As of July 2004, SHV Gas owned 100% of its operating subsidiaries in Brazil.

Prior to 1990, the government specified the areas in which LPG distributors were permitted to operate and each LPG distributor was allocated a limit in its LPG sales for each Brazilian geographic region in which it operated. These limits impacted the growth of larger LPG distributors and limited competition among LPG distributors. These restrictions were removed as part of the deregulation process, resulting in a substantial increase in competition among domestic LPG distributors.

The bottled market for LPG is a mature market with relatively low consumption growth and thus competition is largely based upon attempts by LPG distributors to increase market share at the expense of their competitors. LPG distributors in the bottled market compete primarily on brand awareness and reliability of delivery and the service provided to customers. Ultragaz believes that it is competitive in these aspects. Since per capita consumption is small, low distribution costs is the critical factor in dictating profitability. Therefore, LPG distributors largely compete on the basis of efficiencies in distribution and delivery as all LPG distributors currently purchase all of their LPG requirements from Petrobras, and as Petrobras refinery price charged to the distributors is the same to all LPG distributors. Ultragaz principal markets, including the cities of São Paulo, Salvador and Curitiba, contain heavy concentrations of residential consumers and therefore distribution to this market can be carried out with great economies of scale resulting in lower distribution costs to Ultragaz. Additionally, Ultragaz enjoys low bulk LPG distribution costs through UltraSystem.

In addition to competing with other LPG distributors, Ultragaz competes with companies that offer alternative energy sources to LPG, mainly natural gas, and other sources such as wood, diesel, fuel oil and electricity. Natural gas is currently the principal source of energy against which we compete. Natural gas is currently less expensive than LPG for industrial consumers who purchase large volumes, but more expensive for residential and commercial consumers. In addition, supply of natural gas requires significant investments in pipelines. While fuel oil is less expensive than LPG, LPG has performance and environmental advantages over fuel oil in industrial use.

In 2006, the Brazilian LPG market grew by 1%, substantially as a result of the intensification by the Brazilian Government of social programs, which contributed to an increase in Brazilian income. Additionally, the nationalization of the natural gas reserves in Bolivia generated uncertainties related to the natural gas supply from Bolivia to Brazil. The same factors that were present in the market in 2006, combined with a

5.4% growth in GDP, led to a 2.6% growth in the Brazilian LPG market in 2007.

The following graph shows LPG sales volume for the Brazilian market and Ultragas for the periods indicated:

Source: Sindigás

Tax exemption status. Pursuant to legislation which provides tax relief for industries located in the northeast region of Brazil, Ultragas benefits from an income tax exemption on operating income with respect to the filling plant at Suape, a 75% tax reduction at the Mataripe and Caucáia filling plants, expiring in 2013 and 2012, respectively, and a 25% reduction at the filling plants in Ilhéus and Aracaju, valid through 2008. In December 2007, the Suape plant's tax exemption expired and a request will be filed with ADENE (Northeast Development Agency), which manages the incentive program, seeking a 75% income tax reduction until 2017. In case the request is not approved, Ultragas is entitled to a 25% income tax reduction at Suape's plant. Tax exemptions amounted to R\$9.8 million, R\$8.8 million and R\$4.7 million for the years ended December 31, 2007, 2006 and 2005 respectively. We cannot guarantee that there will be no amendments to the current tax legislation. For further information see Note 22(d) to our consolidated financial statements.

Quality. We were the first Brazilian LPG distributor to receive ISO (International Standards Organization) certification for excellence in quality management.

Fuels Distribution***Industry and Regulatory Overview***

The Brazilian fuels market consists of the distribution and marketing of gasoline, ethanol, diesel, fuel oil, kerosene and natural gas for vehicles (NGV). In 2007, diesel represented 49.9% of the fuels distributed in Brazil, followed by gasoline, ethanol, fuel oils, NGV and kerosene, each of which represented 29.2%, 11.2%, 6.6%, 3.0% and 0.1%, respectively.

Growth in the fuels distribution sector is directly influenced by GDP growth rates and size of car fleet. GDP growth is the main driver for diesel volume, given that diesel in Brazil is highly used for buses, trucks and agricultural engines. The size of the car fleet influences the growth in the combined volumes of gasoline, ethanol and NGV, which are basically used for passenger cars. The growth in the size of car fleet, on its turn, is highly linked to credit availability and disposable income. Since 2005 the Brazilian economy has been passing through a structural change with the creation of a well-established credit market for consumer goods. Credit in Brazil in December 2007 reached 35% of GDP compared to a 31% ratio in December 2006 and 28% in December 2005, which combined with an increase in disposable income in Brazil, has had a positive effect in the sales of vehicles.

According to ANFAVEA Associação Nacional dos Fabricantes de Veículos Automotores (Brazilian Association of Vehicle Producers), the number of new vehicles registered in Brazil increased by 28% in 2007 compared to 2006, with buses and trucks increasing by 29% and passenger vehicles increasing by 28%. Among the total vehicles sold in 2007, including trucks and buses, 82% were flex-fuel vehicles, which have engines adapted to function using either gasoline or ethanol, or by a combination of the two, 10% were only gasoline fueled vehicles and the remaining 8% were powered by diesel. In 2007, there were approximately 1,500 thousand vehicles using NGV, a 14% increase compared to 2006.

Table of Contents

Moreover, recent changes to legislation and inspection in the fuels distribution sector has curbed unfair competition, creating a level playing field. These improvements should benefit the formal market by capturing the volume from the grey market.

According to ANP information for 2006, last available data, the distribution of fuels is made mainly through three channels as follows:

Service stations (71% of the market), which serve final retail consumers;

Large consumers (23% of the market), mainly industries, fleets, etc.; and

Retail wholesale resellers - TRR (6% of the market), specialized resellers that distribute diesel to medium and small volume end-users.

The following chart shows the oil-derivative fuels distribution process in Brazil:

Table of Contents

The following chart shows the ethanol distribution process in Brazil:

Distribution of oil-derivative products is carried out through an extensive network of primary and secondary storage terminals. Primary storage terminals are generally located near refineries and are used as storage terminals for products to be transported either to secondary storage terminals or to large consumers and TRRs.

Oil-derivative products are transported from refineries to primary storage terminals via pipelines and coastal or river shipment. Transportation of oil-derivative products between primary and secondary storage terminals is provided by pipeline, railroad, trucks and coastal or river barges. Ethanol is transported from the many distilleries to primary and secondary storage bases by trucks. Delivery to service stations, large consumers and TRRs is made exclusively by trucks.

All gasoline sold in Brazil must contain a certain proportion of anhydrous ethanol that can vary from 20% to 25% anhydrous ethanol. Currently the Brazilian Minister of Agriculture sets this level at 25%. Gasoline A, as it is known in its unmixed form, is mixed with anhydrous ethanol at primary storage terminals or at secondary storage terminals. Gasoline A, mixed with anhydrous ethanol, forms gasoline C, which is delivered directly to service stations and large consumers by truck. Since January 2008 under the Biodiesel Program, distributors have been required to include 2% of biodiesel in the volume of diesel sold, in order to reduce greenhouse gas emissions. In addition this program has also a social purpose of encouraging and developing small agriculture producers of biodiesel raw materials. Beginning, July 1, 2008, the biodiesel requirement will increase to 3% and by 2013 the percentage will be 5%.

As of December 31, 2007, there were approximately 250 oil-derivative products distributors authorized by ANP to operate in Brazil.

Table of Contents

Supply. Petrobras is currently the only relevant supplier of oil derivatives in Brazil. There are currently 13 oil refineries in Brazil, of which Petrobras owns 11. Brazil's total refining capacity is 321 cubic meters per day, of which Petrobras accounts for 98%. Brazilian refineries are located predominantly in the South and Southeast regions of Brazil. The overall product yield for these refineries in 2007 was 38% diesel, 20% gasoline, 14% fuel oil, 8% liquified petroleum gas and 20% other products, including naphtha.

Ethanol is purchased from various producers. In 2007 there were more than 400 distilleries in Brazil, which produced more than 17 million cubic meters of ethanol, 47% of which was anhydrous ethanol and the rest of which was hydrated ethanol. Brazil's supply of anhydrous and hydrated ethanol is seasonal and depends on the sugarcane harvest, 90% of which comes from Central and Southern Brazil, between May and December, and the remainder of which comes from Northern Brazil, between September and March.

Biodiesel is purchased from the many producers of biofuels in Brazil, and can come from soy, castor oil, palm oil or tallow, among other sources. During 2008, which is the first year of the Biodiesel Program, Petrobras will be required to purchase biofuels in auctions promoted by ANP and supply distributors with amounts of biodiesel corresponding to the volume of diesel purchased. This policy aims to prevent distributors from selling diesel without including the required 2% of biodiesel. After 2008, other distributors will be allowed to purchase biodiesel directly in the auctions.

The role of the Brazilian government. The Brazilian government has historically regulated the pricing of petroleum and petroleum products, ethanol, natural gas and electric energy. Until the adoption of the Oil Law (*Lei do Petróleo*) in 1997, the government maintained strict control over the prices that could be charged by (i) refineries to distributors, (ii) distributors to service stations and through other channels and (iii) service stations to end-users. After 1990, the Brazilian oil and gas sector was significantly deregulated and the Brazilian government changed its price regulation policies.

Currently there is no legislation or regulation in force giving the Brazilian government power to set oil-derivative and ethanol fuels prices. However, given that Petrobras is a state-owned company, prices of oil-derivative fuels are still subject to indirect government influence, resulting in potential inconsistencies between international prices and internal oil-derivative prices. Until 2005, the prices of certain oil-derivative products, especially gasoline and diesel, were periodically updated by Petrobras to minimize the differences between Brazilian and international prices. From September 2005 to May 2008 gasoline and diesel prices remained unchanged. In December 2007, Petrobras' gasoline and diesel prices were approximately US\$ 768 and US\$ 764 per cubic meter, respectively, compared with the international price of approximately US\$ 820 and US\$ 788 per cubic meter. In May 2008 Petrobras increased diesel and gasoline prices by 15% and 10%, respectively, in order to adjust internal prices for the successive increases in international oil prices. In order to minimize the effects of the increase in oil-derivative fuels on the inflation rate, the Brazilian government simultaneously announced a reduction in CIDE tax from R\$ 0.28 per litre to R\$ 0.18 per litre for gasoline and from R\$ 0.07 per litre to R\$ 0.03 per liter for diesel. As a result of CIDE's reductions, the increase in the prices charged to the distributors was 9% for diesel and the price remained unchanged for gasoline, as CIDE's reduction compensated such increase.

Ethanol prices are freely charged by the ethanol producers. In another step towards curbing unfair competitive practices, the Government recently announced the Provisional Measure 425 (*Medida Provisória 425*), under which two initiatives are foreseen to prevent tax evasion: (i) increasing the collection of Social Integration Program Taxes (*Programa de Integração Social - PIS*) and Contribution for the Financing of Social Security Taxes (*Contribuição para o Financiamento da Seguridade Social - Cofins*) at distilleries from 25% to 40% and (ii) the Brazilian government now requires the distilleries to install flow meters (*medidores de vazão*) to control the output of ethanol.

The role of Petrobras. Since its establishment in 1953, Petrobras, Brazil's national oil and oil products company, maintained a legal monopoly in the exploration, production, refining, importing and transporting of crude oil and oil products in Brazil and Brazil's continental waters. This monopoly was confirmed in Brazil's federal constitution enacted in 1988. As a result, Petrobras has

Table of Contents

historically been the sole supplier of oil-derivatives in Brazil. In November 1995, Petrobras' monopoly was removed from the federal constitution by a constitutional amendment approved by the Brazilian Congress. According to this amendment, other state and private companies are permitted to compete with Petrobras in virtually all fields in which Petrobras operates. This amendment was also reflected in Law No. 9,478, dated August 6, 1997, which limited Petrobras' monopoly to a maximum period of three years. Law No. 9,478 prescribed that the termination of Petrobras' monopoly would be accompanied by the deregulation of oil, gas and oil-derivative product prices, and created a new regulatory agency, the ANP, to oversee all oil-related activities. However, in practice, Petrobras still remains the sole oil-derivative supplier of oil and oil-related products, including naphtha, LPG and oil-derivative fuels in Brazil, even though there are no legal restrictions on the operations of other suppliers.

Since 1971, Petrobras acts in the Brazilian fuel distribution market through its subsidiary BR Petrobras Distribuidora. BR is the leader in the fuel distribution market and in 2007 its market-share reached 32%, according to ANP data.

The role of the ANP. The ANP is responsible for the control, supervision and implementation of the government's oil and gas policies. The ANP regulates all aspects of the production, from the distribution and sale, product quality standards and to the minimum storage capacities required to be maintained by distributors with respect to oil and oil products in Brazil. Prior to 1999, there were no formal requirements imposed by the Brazilian Government on the fuel distribution segment. Distributors were only required to register with the national department of fuels or the national Petroleum Agent or the National Agency prior to commencing operations. On December 30, 1999, the ANP established through Portaria No. 202, a number of requirements with which all distributors must comply. In order to operate in Brazil, a fuel distributor must be licensed with the ANP and must meet certain minimum operating requirements, including:

minimum paid-in capital of R\$1,000,000;

proof of financial capacity equivalent to expected volume to be sold (proof of such capacity may include proof of ownership of assets, insurance or a bank guarantee).

ANP is also responsible for establishing the limits of oil-based fuels volume purchased by distributors based on their storage capacity. Fuels distributors are required to provide the ANP with monthly reports showing their previous month's sales and the volume of oil derivative fuels ordered from Petrobras for the following four months.

Fuels distribution for service stations and large consumers must be carried out by a registered distributor or TRR, the latter being allowed to trade only diesel, lubricant and grease. Each distributor must provide the ANP with information regarding its contracted independent dealers on a monthly basis. The construction of storage facilities and approval for new retail sellers to operate is subject to the prior approval of the ANP. Service stations and storage facilities may only begin operations after ANP inspections.

Regulation. Distributors are prohibited from operating service stations, other than for training purposes, and for the development and testing of new products and services. Three types of arrangements between distributors and service station operators are generally used in the fuels industry: (i) the distributor owns land, equipment and buildings for a service station that it leases to an operator, (ii) a third party owns land, leases it to a distributor who constructs a service station facility or makes improvements to an existing facility and leases the station to an operator and (iii) the operator or a third party owns the land and constructs a service station facility or makes improvements to an existing facility, which is typically financed by the distributor (the most common practice in Brazil). Agreements between distributors and operators of service stations are generally exclusive for a given period. In exchange for being an exclusive supplier, the operator is granted the right to operate under the distributor's brand name. The agreement might also include provisions related to the leasing of pumps, layout standards, tanks, training, quality control, technical and financial support, marketing and advertising support and franchises for complementary services, such as convenience stores (am/pm) and oil servicing franchises (Jet Oil).

Sindicom represents the interests of major Brazilian fuel distributors, which control approximately 80% of the Brazilian fuels market as of December 31, 2007. Sindicom was formed in 1941 and its primary purpose is to promote uniform standards for industry

Table of Contents

regulation and to provide a forum in which members can discuss matters affecting the industry. Sindicom represents its members in discussions before federal and state governmental bodies and presents its members' perspectives on relevant laws and regulations, including those relating to taxation, operations, industrial and occupational safety and environmental protection.

During the 90s, when the process of deregulation began in the fuels distribution sector in Brazil, a number of parties entered the market with a business model based on cost advantages derived from anticompetitive practices through fuel adulteration and tax evasion, including (i) diluting gasoline by mixing solvents or adding anhydrous ethanol in an amount greater than the 25% permitted by applicable law (anhydrous ethanol is not taxed as much as hydrated ethanol), (ii) non-payment of federal taxes on fuels, taxes on gross revenues and state value-added taxes and (iii) selling anhydrous ethanol mixed with water as hydrated ethanol. Such practices have enabled these players, all of them non-Sindicom distributors, to increase their market share by practicing artificially lower prices based on artificially lower costs. Sindicom distributors, including Ipiranga, have taken, individually and collectively, a number of actions targeted at reducing or eliminating the effects of these anticompetitive and illegal practices. Among the actions taken were: (i) significant interaction with the Brazilian judiciary, including holding seminars for judges and prosecutors concerning the problems facing the industry and directly participating in tax litigation involving distributors that are not Sindicom members, (ii) sponsorship of the development of a chemical coloring solvent that according to ANP Resolution N° 36 must be added to anhydrous ethanol in order to prevent the addition of water (and later sale as hydrated ethanol), (iii) support of ANP resolution No. 5 that restricts the sale of hydrated ethanol by producers to distributors and disallows sales by producers to resellers or end-consumers, (iv) supporting ANP resolution N° 7 that forbids distributors to sell fuels to resellers operating under another brand, except for white-flags dealers, who operate without a brand, (v) contribution to the development of CODIF, a system that electronically controls the collection of value-added taxes on fuel sales, (vi) support of the implementation of electronic invoices at the federal level and (vii) the suggestion of several other measures, including focusing the collection of Social Integration Program Taxes (*Programa de Integração Social*) and Contribution for the Financing of Social Security Taxes (*Contribuição para o Financiamento da Seguridade Social*) taxes at distilleries and the installation of flow meters (*medidores de vazão*), which were included in the proposed Provisional Measure 425. As a result of these efforts, the more regulated market is leading to the weakening of the business model of lower prices based on artificially lower costs and unfair competition, creating a level playing field and increasing sales volumes of the formal market.

Environmental, health and safety standards. Fuel distributors are subject to Brazilian federal, state and local laws and regulations relating to environmental protection, occupational health and safety licensing by the fire department and transportation. The National Environment Council CONAMA is the principal regulator responsible for ruling, consulting and accepting matters with respect to the environment. State agencies are also responsible for establishing and supervising complementary laws and regulations.

Fuel distributors must obtain licenses from federal and regional environmental agencies and the fire departments to implement and operate their facilities. They are required to develop programs to control air and water pollution and hazardous waste. Oil spill response and facilities emergency plans involving communities, public companies and other private companies must also be implemented. Fuel distributors must also comply with federal laws from the Ministry of Labor, which prescribes occupational health and safety standards. To maintain a safe and healthy workplace, companies must carry out comprehensive industrial hygiene and safety programs.

Fuels may be transported only under special conditions. In Brazil, transportation of dangerous products is regulated by federal transportation agencies and the regulations cover all modes of transport. These agencies establish several requirements for fuel transport based on United Nations recommendations.

Ipiranga

Ipiranga was founded in 1937 and is currently the largest private participant in the Brazilian fuels distribution market, with approximately 14% market share as of December 31, 2007.

Ipiranga distributes diesel, gasoline, ethanol, NGV, fuel oil, kerosene and lubricants in the South and Southeast of Brazil. In addition to a traditional fuel distribution business, Ipiranga has a significant and growing convenience store business, branded am/pm, as well as a lubricant servicing business, branded Jet Oil.

Table of Contents

Markets and marketing. The South and Southeast regions in which Ipiranga operates represented 67% of total consumption in Brazil in 2007 and includes the most highly populated states in Brazil, including São Paulo, Rio de Janeiro and Minas Gerais. However, the Ipiranga brand is also well known throughout the remainder of Brazil since Ipiranga operated nationally prior to the Ipiranga Acquisition. Under the terms of the Transaction Agreements, Petrobras has the right to use Ipiranga's brand in the operating regions of the Northern Distribution Business for five years from the date of the Acquisition.

Growth in the fuel distribution sector is directly influenced by GDP growth rates and size of car fleet. Vehicle sales in Brazil have been increasing at a fast pace due to higher disposable income and increased availability of credit in Brazil. See Item 4.B. Information on the Company Business Overview Fuels Distribution Industry and Regulatory Overview. Furthermore, recent legislative changes and inspection in the fuels distribution sector have curbed unfair competition, creating a level playing field in the Brazilian distribution market. These improvements should benefit the formal market by capturing the volume from the grey market.

In 2007, approximately 2.5 million new vehicles were registered according to ANFAVEA - *Associação Nacional dos Fabricantes Veículos Automotores* (Brazilian Association of Vehicle Producers), an increase of 28% from 2006, with flex fuel cars increasing by 40%. Also during 2007, 23 announcements regarding investments in manufacturing capacity expansion were made by car manufacturers in Brazil in order to address the growing demand for vehicles in the country.

In 2007, the volume sold by Ipiranga grew by 6% compared to 2006, with (i) the combined volume of gasoline, ethanol and NGV increasing by 12% (460,000 cubic meters) driven by the growth in vehicle fleet and improvements to legislation implemented in the fuels distribution sector, with a 79% increase in ethanol sales as a result of the expansion in the number of flex-fuel vehicles and (ii) diesel volume increasing by 3% in the period (193,000 cubic meters), as a result of increased economic activity.

Ipiranga's sales through its service stations accounted for 64% of total sales in 2007. As of December 31, 2007, there were 3,292 service stations operating under the Ipiranga brand, of which 509 either owned or were under a long term lease to us and 2,783 by third parties. In 2007, 86% of these service stations were located in urban, high population density areas, with the remaining 14% highway fuel stations.

Distribution to large consumers represents 28% of Ipiranga's sales. Ipiranga directly sells to approximately 2,800 customers, including state and municipal governments and transportation fleet owners.

Ipiranga also sells diesel, lubricants, fuel oil and kerosene to approximately 200 independent TRR, that redistribute petroleum products to small and medium-sized companies throughout Brazil. Ipiranga's TRR clients consist mostly of companies that have large fixed tanks at their facilities. These clients represented 8% of Ipiranga's sales volume in 2007.

The relationship between Ipiranga and its clients is generally governed by exclusive supply contracts with terms ranging from 1 to 10 years. The types of contracts change according to the distribution channel. For service stations, contracts usually have longer terms (5 to 10 years) and may provide for the installation of pumps and tanks on the client's premises and the offering of financing and pre-payment discounts. Supply to large consumers and TRRs is rarely made under contracts and is mostly provided on a spot basis. When contracts are entered into with these clients, the terms range from 1 to 3 years.

Table of Contents

The table below shows Ipiranga's sales by product:

Client category	Year ended December 31, (in thousand cubic meters)	
	2007(1)	2006(1)
Diesel		
Service station	2,890.9	2,741.8
Large consumers	2,903.0	2,779.6
TRR	796.1	876.7
Gasoline		
Ethanol	3,039.4	3,034.9
Others		
	578.1	549.6
Total volume sold	11,168.5	10,521.1

Figures drawn up with the purpose of providing a comparison basis for the analysis of the evolution in the performance of Ipiranga (Ipiranga Pro-forma figures). Figures for operations and financial statements acquired are consolidated on Ultrapar since the second quarter of 2007.

Distribution infrastructure. Ipiranga has 37 storage terminals in the regions where it operates and which are strategically located to facilitate fast and economic delivery of its products. There are two types of facilities: primary storage terminals, generally located near coasts and major cities, which are supplied by refineries through pipelines, and secondary storage terminals, which are mainly located inland and are supplied by primary terminals by railroad or through road transportation for locations not accessible by railroad. Ethanol is supplied to the terminals by road. Ipiranga has its own fleet of trucks, which is responsible for transportation of approximately 60% of the volume of fuels sold by Ipiranga, with the remaining portion provided by third parties.

Resellers. Ipiranga generally enters into three types of arrangements with resellers: (i) we own land, equipment and buildings for a service station that we lease to an operator, (ii) a third party owns land, and leases it to us and we construct a service station facility or make improvements to an existing facility and lease the station to an operator and (iii) the operator or a third party owns the land and constructs a service station facility or makes improvements to an existing facility that is typically financed by us. For all of these arrangements Ipiranga not only owns, but is also responsible for installing, the storage tanks and service pumps at the service stations. Under the terms of the contracts and in accordance with applicable law, each reseller operating under Ipiranga's brand must purchase fuels exclusively from us. For the year ended December 31, 2007, approximately 64% of Ipiranga's volume sold was through resellers.

In order to strengthen its relationship with the reseller network and differentiate itself from its competitors, Ipiranga has created incentive programs aiming at strengthening the loyalty to Ipiranga's brand. As part of these incentives programs Ipiranga provides yearly rewards to its service station owners with free trips abroad through the relationship program *Clube do Milhão* (Million Club) upon the accomplishment of pre-established targets. Ipiranga also establishes relationship programs with service stations' employees, such as *Clube Vip* (VIP Club), in order to encourage the sale of added-value products and services, including credit cards, such as *Cartão Ipiranga* (Ipiranga private label credit card) and *Cartão Ipiranga Carbono Zero* (Ipiranga Zero Carbon Card). Training programs are given to these employees focusing on developing their knowledge about the business and their capacity of selling products and services.

In addition, we analyze our service stations and franchises' results monthly and compare them to established marketing plans in order to recognize and implement needed improvements for our resellers network, as well as to identify resellers who surpassed their individual targets and should be awarded under the incentive programs.

Supply of fuels. Currently, Ipiranga and its competitors purchase all or nearly all oil-derivative fuels from Petrobras under a formal supply contract that establishes the volume and the terms for supply. The contract is renewed annually and the volume contracted for is based on the volume purchased in the previous year. The procedures for ordering and purchasing fuels from Petrobras are generally common to all distributors, including Ipiranga. There have been no significant interruptions in the supply of fuels by Petrobras to the distributors, with the exception of an interruption in 1995 due to a 15-day strike by Petrobras employees.

Table of Contents

The ethanol fuel market in Brazil consists of more than 400 independent distilleries, producing sugar and ethanol from sugarcane. Ethanol production occurs approximately seven months per year. A portion of the production is stored in the distilleries to meet demand during the inter-harvest season. Distilleries produce two types of ethanol: (i) anhydrous ethanol, which must be blended with gasoline and (ii) hydrated ethanol, which basically is used to flex fuel vehicles.

Prices of ethanol are determined by the market in Brazil with no governmental intervention. Producers and distributors mostly transact on a spot basis and rarely enter into long-term supply contracts (with set volume and price terms).

Ethanol in Brazil is substantially based on sugarcane, which can either be used to produce ethanol or sugar. From an ethanol producer's perspective the ratio of production between ethanol and sugar is determined based on the respective prices of ethanol in the Brazilian market and of sugar in the international markets, being such choice fundamental for leveraging the profitability of their plant. Although ethanol production is subject to favorable climate conditions, the risk of interruptions in supply is primarily confined to the end of the harvest.

Storage of fuels. Ipiranga stores its fuels in large tanks at each of its facilities located throughout the regions in which it operates. Primary facilities receive fuels directly from Petrobras by pipeline and from distilleries by road transportation and secondary facilities are supplied by truck. See Item 4.D. Information on the Company Property, Plant and Equipment. In 2007, Ipiranga's storage capacity was approximately 268,000 cubic meters. Based on its 2007 average sales, Ipiranga can store an approximate six-day supply of fuel, in line with the average of the fuel distribution industry. Accordingly, an interruption in the production of oil-based fuels for longer than that time period could result in shortages, such as the one that occurred during the Petrobras strike in 1995.

Competition. Ipiranga's main competitors are:

BR, a subsidiary of Petrobras, which has been operating in the Brazilian fuels distribution sector since 1971. BR is the Brazilian market leader and operates throughout the entire country.

Shell, a subsidiary of Royal Dutch Shell, Gas and Petrochemical Group, which has a worldwide presence in more than 110 countries. In Brazil, Shell is the third largest fuels distributor and has been operating in the market since 1913.

Texaco, a subsidiary of the Chevron Texaco Corporation, the fourth largest fuels distributor in Brazil with more than 1,900 service stations across the country and which has been present in the market since 1915.

Esso has been operating in Brazil since 1912 and was a subsidiary of Exxon Mobil Corporation group until 2008, when Cosan S.A. Indústria e Comércio (Cosan) acquired Esso's fuels distribution business in Brazil. Cosan is the largest producer of sugar and ethanol in Brazil, but until the acquisition it did not act in the fuel distribution market. The ethanol market is supplied by more than 400 distilleries, including Cosan.

Alesat, a domestic Brazilian fuels distributor created in 2006, as a consequence of the merger of Ale and Satellite and is present in 21 Brazilian states.

The following table sets forth the market share of Ipiranga and its competitors based on ANP data:

Distributor (1)	Year ended December 31,	
	2007	2006
Petrobras	34.6	31.1
Ipiranga(2)	14.2	13.8
Shell	11.4	11.2
Texaco	8.8	8.7

Esso	5.7	6.1
------	-----	-----

Table of Contents

Distributor (1)	Year ended December 31,	
	2007	2006
Alesat	4.1	3.8
Others	21.2	25.3
Total cubic meters	100.0	100.0

(1) Includes the volume sold of gasoline, ethanol and diesel.

(2) Includes only the Southern Distribution Business.

The retail market for gasoline, diesel and ethanol in Brazil is highly competitive. Prices to retailers tend to be similar among competing distributors, particularly due to low margins in the sector. Therefore, our strategy is to differentiate ourselves in the market by offering value-added services to complement our main products, with the goal of becoming the preferred customer choice. In 2007 Ipiranga invested in the marketing campaign *Gasolina Original* (Ipiranga Original Gasoline) aiming at reinforcing the quality and reliability of Ipiranga's gasoline. In 2007 Ipiranga also launched *Gasolina Original Aditivada*, a premium gasoline, with a higher added value. Media campaigns were made for the launch of this product and the sales of this premium gasoline were included as targets of our incentive programs, such as Clube Vip and Clube do Milhão. In order to add value to the diesel sold, Ipiranga offers complementary programs to facilitate control of the product sold to large consumers and reduce costs, such as the Freight Monitor (*Controle Teleprocessado de Frotas*) and Digital Freight (*Frete Digital*). The following graph shows sales volume for the Brazilian market and Ipiranga for the periods indicated:

(1) Includes diesel, gasoline, ethanol, natural gas vehicular, fuel oils and kerosene and lubricants and greases (Source: ANP and Sindicom).

(2) Figures drawn up with the purpose of providing a comparison basis for the analysis of the evolution in the performance of Ipiranga (Ipiranga Pro-forma figures). Figures for operations and financial statements are consolidated with Ultrapar since second quarter of 2007.

Quality. In 1998, Ipiranga Londrina Terminal received the first ISO 14001 (Environmental Management System) certificate for a fuel distribution terminal in Latin America. In addition, our Rio de Janeiro lubricants factory obtained an ISO 9001 (Quality Management System) certificate in 1998. In 1999, Ipiranga's Betim Terminal obtained ISO 9001 and ISO 14001 certifications.

Petrochemicals and Chemicals**Industry and Regulatory Overview**

The petrochemical industry transforms crude oil or natural gas into widely used consumer and industrial goods. The Brazilian petrochemical industry is generally divided in three sectors, depending on the stage of transformation of the petrochemical raw material. The companies that operate in these different stages are known as first, second and third generation companies.

Table of Contents

First generation companies. Brazil's first generation companies, which are referred to as crackers, break down or crack naphtha (a by-product of the oil refining process), their principal feedstock, into basic petrochemicals. In Brazil, the crackers supply their naphtha requirements from Petrobras and through imports. Currently, Petrobras is the major Brazilian producer of naphtha. The basic petrochemicals produced by the crackers include olefins, primarily ethylene, propylene and butadiene, and aromatics, such as benzene, toluene and xylenes. Braskem S.A., Companhia Petroquímica do Sul, known as Copesul, and Petroquímica União, known as PQU Brazil's three crackers sell these basic petrochemicals to second generation companies. The basic petrochemicals, which are in the form of either gases or liquids, are transported to the second generation companies through pipelines for further processing.

Second generation companies. Second generation companies process the basic petrochemicals produced by the crackers to obtain intermediate petrochemicals, such as:

polyethylene, ethylene oxide, polystyrene and polyvinyl chloride, or PVC, each produced from ethylene;

polypropylene, oxo-alcohols and acrylonitrile, each produced from propylene;

styrene butadiene rubber, or SBR, and polybutadiene, each produced from butadiene;

caprolactam, produced from benzene; and

purified terephthalic acid, or PTA, produced from p-xylene.

In 2007, there were approximately 45 second generation companies operating in Brazil, including Oxiteno. The intermediate petrochemicals are produced in solid form (as plastic pellets or powders) and in liquid form and are transported through roads, railroads or by ship to third generation companies.

Third generation companies. Third generation companies, known as transformers, purchase the intermediate petrochemicals from the second generation companies and transform them into final products, including:

polyester produced from PTA and ethylene glycol (ethylene glycols produced from ethylene oxide);

plastics produced from polyethylene, polypropylene and PVC;

elastomers produced from butadiene;

acrylic fibers produced from acrylonitrile; and

nylon produced from caprolactam.

Third generation companies produce a variety of consumer and industrial goods, including containers and packaging materials, such as bags, film and bottles, textiles, detergents and paints as well as automobile parts, toys and consumer electronic goods. There are over 6,000 third generation companies operating in Brazil.

Petrochemical complexes. The production of first and second generation petrochemicals in Brazil centers around three complexes: the northeast complex, the São Paulo petrochemical complex and the southern petrochemical complex. Each complex has a single first generation producer or cracker and several second generation companies.

The northeast complex, located in the municipality of Camaçari in the state of Bahia, began operations in 1978. It consists of approximately 15 second generation companies, including Oxiteno, situated around Braskem. Braskem currently has an ethylene production capacity of 1.3 million tons per annum.

The São Paulo complex, at Capuava in the state of São Paulo, was created in 1972 and is the oldest petrochemical complex in Brazil. Its cracker, PQU, supplies first generation petrochemicals to 23 second generation companies including Oxiteno. PQU has an ethylene production capacity of 500,000 tons per annum.

Table of Contents

The southern complex, located in the municipality of Triunfo in the state of Rio Grande do Sul, is based around the raw materials cracker, Copesul, and includes seven second generation companies. Copesul has an ethylene production capacity of 1.1 million tons per annum. Oxiteno does not purchase ethylene from Copesul. Oxiteno purchases C4 from Copesul, a raw material used in the production of Methyl-ethyl-ketone, or MEK.

In December 2005, RioPol, located in the state of Rio de Janeiro, started operations of its ethylene production plant based on natural gas. RioPol has an ethylene production capacity of 520,000 tons per year. All of RioPol's ethylene production is used in its own polyethylene production.

Role of Petrobras. Naphtha is the raw material used in Brazil for the production of basic petrochemicals such as ethylene and propylene. Petrobras is still the only producer and the most important naphtha supplier in Brazil, even though its legal monopoly ended in August 2000. See 4.B. Business Overview – Distribution of Liquefied Petroleum Gas – Industry and Regulatory Overview for a discussion of the termination of the Petrobras monopoly.

Naphtha prices have been freely negotiated since August 9, 2000.

Environmental, health and safety standards. Petrochemical companies are subject to Brazilian federal, state and local laws and regulations governing the protection of the environment. At the federal level the main regulators are CONAMA and the Ministry of Labor.

In accordance with environmental laws and regulations, petrochemical companies are required to obtain licenses for their manufacturing facilities from competent environmental authorities, which may also regulate its operations by prescribing specific environmental standards in its operating licenses. Petrochemical companies must satisfy regulatory authorities that the operation, maintenance, and reclaiming of facilities comply with regulations and do not cause damage to the environment.

Environmental regulations apply particularly to the discharge, handling and disposal of gaseous, liquid and solid products and by-products from manufacturing activities. Rules issued by CONAMA and by state authorities also prescribe preventive measures relating to environmental pollution and waste treatment requirements. In addition, the transportation, storage and supply of products are subject to specific standards designed to prevent spills, leakages and other accidents.

Historically, environmental regulations have imposed increasingly stricter standards, higher fines, and greater exposure to liability and increased operating costs and capital expenditures. In addition, civil, administrative and criminal sanctions, including fines and the revocation of licenses may apply to violations of environmental regulations. Under applicable law, Oxiteno is strictly liable for environmental damages.

Petrochemical companies are also subject to federal, state and local laws and regulations that establish occupational health and safety standards. In accordance with such laws and regulations, these companies are also required to report on their occupational, health and safety records on a yearly basis to the local office of the Ministry of Labor in each of the states in which they operate. They are also subject to all federal, state and local government regulation and supervision generally applicable to companies doing business in Brazil, including labor laws, social security laws, public health, consumer protection, securities laws and antitrust laws.

Oxiteno

We operate in the chemical sector through the second generation company, Oxiteno, a wholly owned subsidiary of Ultrapar. Oxiteno is the only Brazilian producer of ethylene oxide, ethylene glycols, ethanolamines, glycol ethers and methyl-ethyl-ketone. Oxiteno is also a major producer of specialty chemicals. In addition to a plant in Venezuela, Oxiteno is the only ethylene oxide producer in South America. Its products are used in a broad range of industrial sectors, such as polyester, packaging, paints, varnishes and cosmetics. During the year ended December 31, 2007, Oxiteno sold approximately 621 thousand tons of chemical and petrochemical products.

Oxiteno's strategic focus is to provide a broad coverage of the ethylene oxide and derivatives, maintaining a leading position in these markets that strengthens barriers to entry. Oxiteno's strategy is to increase its specialty chemical production capacity and its geographic reach.

Table of Contents

Products and markets. Although a portion of Oxiteno's products could be classified as either a commodity or a specialty chemical depending on the use of each product by our customer, for ease of understanding, Oxiteno's products are here divided into two principal groups: (i) commodity chemicals, which are generally higher-volume products, with standard specifications, and (ii) specialty chemicals, which tend to be lower-volume products sold on the basis of chemical features and suitability to meet a particular end-use requirement. Oxiteno's principal commodity chemicals are ethylene oxide, ethylene glycol and methyl-ethyl-ketone, or MEK. Oxiteno's principal specialty chemicals include a wide variety of products that are used as surfactants, softeners, dispersants, emulsifiers and hydraulic fluids.

The following chart outlines the principal raw materials used by Oxiteno and their intermediate and final products.

Commodity products. The following are Oxiteno's principal commodity products and their principal uses and markets:

Ethylene oxide. Ethylene oxide is a colorless and highly flammable gas at room temperature and atmospheric pressure. Ethylene oxide is produced in a continuous production process by gaseous phase catalytic partial oxidation of ethylene by oxygen at high temperature and pressure. In 2007, Oxiteno used approximately 97% of its ethylene oxide production in the production of derivatives and sold the remaining 3% to other petrochemical companies.

Table of Contents

Ethylene glycols. The principal ethylene glycol produced by Oxiteno is mono-ethylene glycol, known as MEG. Oxiteno also produces di- and tri-ethylene glycol. Mono-ethylene glycol is a clear, non-flammable, non-volatile liquid at room temperature and atmospheric pressure. Ethylene glycols are produced in a continuous process from an ethylene oxide solution and principally sold to chemical companies for the manufacture of polyester fibers and polyethylene terephthalate, known as PET, with the remainder sold for use in the production of antifreeze, brake fluids, solvent and other chemicals.

Methyl-ethyl-ketone. Methyl-ethyl-ketone, or MEK, a clear, volatile, flammable liquid at room temperature and atmospheric pressure, is Oxiteno's principal commodity chemical not produced from ethylene oxide. MEK is used as a fast evaporation solvent for thinners, paints, lacquers and adhesives and also as an active solvent for several resins such as cellulosics, acrylics, polyesters, polyuretanics, PVC, neoprene and maleic.

Specialty chemicals. The following table sets forth Oxiteno's principal specialty chemical products and their principal uses and markets.

	Major Markets	Specialty Chemicals	Examples of uses and effects
Detergents		Alkylbenzene sulfonic acids, alkylsulfates, alkyl ether sulfates, ethoxylated alkylphenols, ethoxylated fatty alcohols, polyethyleneglycols, alkanolamides, betaines, sulphosuccinates, block copolymers EO/PO	Used in detergents, the specialty chemicals are added mainly to improve cleaning power and foaming and to reduce skin irritability.
Agricultural chemicals		Ethoxylated fatty amines, ethoxylated alkylphenols, alkyl ether sulfates, blends, naphthalene sulfonate, ethoxylated vegetable oil, copolymers EO/PO	Used as part of the composition of agricultural chemical defensives, such as herbicides. Increases their efficiency, by improving soil penetration and adherence of the products to plant surfaces.
Cosmetics		Alkylsulfates, alkyl ether sulfates, betaines, ethoxylated fatty alcohols, polyethyleneglycols, alkanolamides, ethoxylated sorbitan esters, sorbitan fatty esters	Used in cosmetics as moisturizers, detergents for foaming and residue removal, and reduction of eye irritation in shampoos.

Table of Contents

	Major Markets	Specialty Chemicals	Examples of uses and effects
Foods		Sorbitan fatty esters, ethoxylated sorbitan esters, emulsifiers, stabilizers, dispersants	Principally used as additives for breads and cakes, improving their texture and consistency, and as an emulsifier responsible for ice cream creaminess.
Textiles		Ethoxylated alkylphenols, ethoxylated fatty alcohols, ethoxylated vegetable oils, ethoxylated fatty amines, antistatic agents, lubricants, softeners, emulsifiers, antifoamers, mercerizing additives, humectants, low foam detergents	Used in the processing of textiles, improving spinning and weaving performance. Permits greater evenness in the mixing of fibers, dyeing, bleaching and improving the softness of the final cloth.
Leather		Ethoxylated alkylphenols, polyethyleneglycols, naphthalenes, sulfonates	Applied from the beginning of the leather processing stage up to the finishing stage as an emulsifier, detergent, degreaser, dispersant, moistener, color penetrating agent and vulcanization additive (manufacture of soles).
Oil field chemicals		Block copolymers EO/PO, condensed naphthalenes, sulphonates, sorbitan fatty esters	Used directly as hydraulic fluids in vehicles. Brake fluids guarantee brake system performance and safe braking. Cooling liquids help to cool the motor and maintain the correct operating temperature.

Domestic sales. The Brazilian petrochemicals industry seeks to prioritize demand from the domestic market, where there is greater value added, although sales are also made to the overseas market. While Oxiteno sells the larger part of its commodities and specialty chemicals in Brazil, production capacity exceeds domestic market demand, with Oxiteno exporting surplus production to more than 40 countries in Asia, Latin America, Europe and North America. Oxiteno maintains production capacity above local demand for strategic reasons. For the years ended December 31, 2007, 2006 and 2005, 30%, 28% and 29% of Oxiteno's net sales, respectively, were from exports. For the years ended December 31, 2007, 2006 and 2005, 30%, 29% and 30% of Oxiteno's volume, respectively, were from exports. In the Brazilian market, mono-ethylene glycol, or MEG, produced by Oxiteno, is sold mainly to chemical companies that manufacture polyester fiber, which is used to produce a variety of fabrics, and is also sold to producers of polyethylene terephthalate, or PET, which is a polymer used to make packaging, such as soft drink bottles.

Table of Contents

The following table shows Oxiteno's domestic market sales volume by market segment for the period indicated:

Market sector	Year Ended December 31,		
	2007	2006	2005(1)
	(in thousand metric tons)		
Polyester (fabrics and PET)	75.3	81.9	94.8
Paints and varnishes	32.6	24.7	21.6
Chemical industries	56.6	50.7	43.1
Detergents	55.0	36.7	30.3
Hydraulic fluids	30.1	27.7	28.4
Agricultural chemical	54.6	47.2	43.0
Resins	22.9	21.2	16.6
Cosmetics	16.5	15.7	16.3
Leather	8.1	11.0	10.5
Textiles	5.8	6.0	5.9
Food	3.1	3.3	3.2
Distributors	57.0	43.7	38.4
Others(2)	17.4	16.5	13.2
Total Brazilian market	435.0	386.3	365.3

(1) Figures in 2005 were reclassified among the Distributor segment and other segments because some clients who were previously served by the Distributor segment increased their annual purchases and were thus reclassified into their own respective segments.

(2) Includes catalysts, civil construction, pharmaceutical and veterinary product manufacturers.

Many of Oxiteno's commodity product prices in the Brazilian market are set by reference to international contract prices in U.S. dollars, although the prices are denominated in *reais*. For specialty products, sales are individually negotiated and often made pursuant to contracts. Specialty chemicals are designed to meet specific customer needs and are less exposed to replacement by imported products. Accordingly, specialty chemicals have a higher value added and Oxiteno has more flexibility in pricing for these products.

Sales outside Brazil. Oxiteno's export sales are made principally to customers in Europe, in the Far East and in the Mercosur region. In Europe, Oxiteno exports principally to Belgium, Italy and Netherlands. In the Far East, Oxiteno exports principally to South Korea, China and Taiwan.

The following table sets forth Oxiteno's sales by volume for each geographic market served by Oxiteno in the periods indicated:

Breakdown of sales volume outside Brazil	Year Ended December 31,					
	2007		2006		2005	
	(in thousand metric tons and percentage of the total)					
From Oxiteno Brazil						
Mercosur (not including Brazil)	50.6	27%	59.4	38%	62.7	39%
Europe	37.3	20%	24.6	16%	23.2	15%
Far East	25.5	14%	18.8	12%	34.5	22%
NAFTA	20.7	11%	13.7	9%	7.4	5%
Other	12.3	7%	12.4	8%	12.4	8%
Sub-Total	146.4	79%	128.9	82%	140.3	88%
From Oxiteno Mexico						
Mexico	20.2	11%	18.0	11%	12.9	8%
USA	8.7	5%	6.7	4%	4.2	3%
Other	5.9	3%	3.8	2%	2.0	1%
Sub-Total	34.8	19%	28.5	18%	19.1	12%

Table of Contents

Sub-Total	5.0	3%				
Total	186.2	100%	157.4	100%	159.4	100%

Oxiteno exports a wide variety of chemical products including glycols, MEK, ethoxylated alkylphenols, glycol ether acetates, glycol ethers, ethanolamines, ethoxylated fatty amines and other ethoxylated products.

With the acquisition in December 2003 of Oxiteno Mexico (formerly CANAMEX), a Mexican specialty chemicals company, Oxiteno has been focusing on establishing a growing presence in the Mexican market for specialty chemicals and create a distribution platform for its product sales to the United States. Oxiteno Mexico had two production units, manufacturing principally ethoxylates, which were operating at 25% production capacity, on the acquisition date due to serious financial difficulties being faced by Oxiteno Mexico. Currently, most of Oxiteno Mexico's sales are destined to the domestic Mexican market, largely for the food, agrichemical, oil and textile segments. The remaining sales volume is exported, mainly to the United States. In April 2007, Oxiteno acquired the operating assets of Unión Química SA de CV, in San Juan Del Rio, Mexico, adding 8,600 tons/year to Oxiteno Mexico's production capacity of sulfonates and sulfates. See Item 4.A. Information on the Company History and Development of the Company.

For the year ended December 31, 2007, Oxiteno Mexico's sales volume totaled 34,760 tons (including the sales volume from Unión Química). Oxiteno Mexico experienced strong growth in 2007, with 22% year-over-year growth in volume sold. We believe Oxiteno Mexico's success represents a positive step in our expansion outside Brazil, and also strengthen the Oxiteno's brand.

In September 2007, Oxiteno acquired 100% of the shares of Arch Química Andina in Santa Rita, Venezuela. With this acquisition, Oxiteno increased its ethoxylates production capacity by 70,000 tons/year.

For the year ended December 31, 2007, Oxiteno Andina's sales volume totaled 4,999 tons (considering the sales volume as from the acquisition of Arch Andina in September 2007).

As part of our strategy to grow outside of Brazil, we opened commercial offices, in Buenos Aires, Argentina in 2006 and New Jersey, United States in 2007.

In most cases, Oxiteno's sales prices for its commodity chemicals in the export markets are based on international prices. International spot prices are established by reference to published data regarding the price at which industry participants have sold the relevant product. In general, Oxiteno's operating margins on products sold in the international market are lower than operating margins for similar products sold in the domestic market. Nevertheless, Oxiteno deems it important to maintain a presence in international markets and is focused on expanding its presence in other specialty chemicals markets by opening international commercial offices. Oxiteno intends to shift sales to the domestic market as local demand for its products increases, but will continue to export and will maintain its presence in the international market.

Customers. Oxiteno's most important customers for its commodity chemicals are chemical companies, surface coating producers and polyester producers. In turn, the customers for specialty chemicals constitute a variety of industrial and commercial enterprises including brake fluid distributors, agrochemical producers, manufacturers of food additives and manufacturers of detergents and cosmetics. Oxiteno believes that by distributing its products to a variety of markets it is able to protect itself, to a certain extent, from the effects of a decrease in economic activity in any particular market.

Table of Contents

Oxiteno's principal customers in the domestic market include, Monsanto, which mainly purchases ethanolamines, Clariant S.A., which mainly purchases ethylene oxide and ethoxylated products, Indústrias Gessy Lever Ltda (Unilever), which mainly purchases surfactants. In the international market, Oxiteno sells both to industrial customers, including Manufacturas de Fibras Sintéticas S.A. (Mafissa), DAK Americas Argentina S.A. (formerly Voridian Argentina S.R.L.), and Cognis S.A., as well as trading companies and other third-party distributors. Oxiteno's largest customer in the international market is Oxyde Chemicals, Inc., a major European trading company for glycol, which accounted for approximately 4% of Oxiteno's total revenues in 2007. In 2007, Oxiteno's ten largest customers accounted for 35% of its net sales. No single customer accounted for more than 10% of Oxiteno's net sales in such year.

Competition. Oxiteno competes in the domestic market largely with imported products. Since 1990, it has had to operate in an increasingly competitive environment due to imports from international and transnational petrochemical industries. As imported products are mostly commodity chemicals, competition is based principally on price. Importers incur additional costs when selling their products in the Brazilian market, due to import tariffs which generally range between 12% and 14%, and additional freight charges. However, factors such as product quality, timely delivery, reliability of supply and technical service and support are also important competitive factors. Because it is a local producer, Oxiteno believes it has a particular competitive advantage over imports with regard to timely delivery and reliability of supply.

In the case of specialty chemicals, Oxiteno competes primarily with other Brazilian producers (which buy ethylene oxide from Oxiteno) and pricing is a less decisive competitive factor than with true commodity chemicals, while conformity with specifications, product performance and reliability of service are comparatively more important. Access to technology, technical assistance and research and development are important factors with regard to conformity to specifications and product performance, especially in the development of new products to meet customers needs. Oxiteno's strategy involves ensuring access to technology through its own research and development activity, licensing and joint ventures, if appropriate opportunities become available.

Oxiteno's principal competitors are Shell Brasil Ltda., Exxon Mobil Química Ltda., Dow Brasil S.A., Lyondell Química do Brasil Ltda., Cognis Brasil Ltda., Clariant S.A. and BASF S.A.

Research and development. Oxiteno carries on a wide range of research and development activities, principally related to the application of specialty chemicals and improvements in production processes. As of December 31, 2007, 113 employees of Oxiteno were engaged in research and development and engineering activities. Oxiteno's research and development expenditures in 2007, 2006 and 2005 were R\$19.4 million, R\$18.4 million and R\$17.4 million, respectively. In 2004, Oxiteno founded its own Science and Technology Council, with six of the world's major specialists in surfactants being members. The Council, which first met from December 7 to 10, 2004 and again in September 2005, October 2006 and September 2007, analyzes critically the company's research and development projects portfolio, as well as the methodology used. These recommendations enable the company to increase its efficiency in research and development, as well as enlarge its partnerships with international entities.

Raw materials. Oxiteno's principal raw material is ethylene. For the year ended December 31, 2007, ethylene was responsible for 46% of Oxiteno's variable costs of production and approximately 41% of its total cost of sales and services. Among Oxiteno's other raw materials, the principal include butenes, ethyl, butyl and lauryl alcohols, oxygen and acetic acid. Supply of ethylene constitutes an entry barrier for new ethylene oxide producers in the country since the current production capacity of ethylene by Brazilian crackers is committed to existing second generation companies, including Oxiteno, and significant investments are needed for the construction of a new cracker. Ethylene is difficult and expensive to transport and store because it must be kept at a temperature below -200 degrees Fahrenheit (-100 degrees Celsius) during transportation and storage, therefore importing and exporting of ethylene is generally uneconomical. Accordingly, the naphtha crackers, including Braskem and PQU, are largely dependent for their sales upon the second generation petrochemical companies, such as Oxiteno, located in the respective petrochemical complexes. However, ethylene oxide derivatives are regularly imported by the major international petrochemical companies and by international and domestic trading companies.

Ethylene supply. Ethylene is used for the production of ethylene oxide at the Camaçari plant and the Mauá plant. Braskem and PQU supply all of Oxiteno's ethylene requirements for the Camaçari plant and Mauá plant, respectively, through pipelines, thus minimizing the costs of delivery of ethylene and helping to ensure the reliability of supply. See Item 4.B. Information on the Company Business Overview Petrochemicals and Chemicals Industry and Regulatory Overview.

Table of Contents

In August 2006, Oxiteno signed a Memorandum of Understanding with Braskem amending the existing ethylene supply contract. According to this Memorandum of Understanding, Oxiteno is required to purchase at least 190,000 tons of ethylene per year, and Braskem is required to supply Oxiteno with up to 210,000 during 2007 and 2008. From 2009 to 2021, Braskem is required to supply Oxiteno with up to 265,000 tons of ethylene per year. Prior to the signing of this Memorandum of Understanding, Braskem was required to supply Oxiteno with up to 197,000 tons of ethylene per year. The newly agreed upon supply price is indexed to ethylene prices on international markets and on the volume purchased by Oxiteno.

In the case of ethylene supply from PQU, Oxiteno, like other purchasers from PQU, does not have a formal long-term contract relating to the volume or price of ethylene. However, PQU has made a formal commitment for the ethylene supply volume for Oxiteno.

Oxiteno does not maintain any significant storage of ethylene and any unexpected interruptions in supply from the crackers would have an immediate impact on Oxiteno's production. The last unexpected interruption in the ethylene supply was in 1993, due to a pipeline fire that affected the naphtha delivery from Petrobras to Braskem, which caused a shutdown in the naphtha cracking operations, resulting in a 14-day shutdown in the Camaçari plant's operations.

First generation petrochemical companies undergo scheduled maintenance stoppages. Oxiteno anticipates these stoppages by building up inventory. Oxiteno also uses these planned stoppages for regular maintenance work on its own plants or eventual substitution of catalysts or for expansion of installed capacity. Braskem's last scheduled downtime was in January 2004 and there were no problems in the re-start. For 2008, Braskem has scheduled a maintenance stoppage from May 27 to June 13, 2008, and PQU for August 2008, which are estimated to last 30 and 45 days, respectively.

Price of ethylene. The price of ethylene supplied by Braskem to Oxiteno for the production of goods to be sold in Brazil is indexed to ethylene prices on international markets as from August 2006. Until July 2006, the price of ethylene supplied by Braskem was determined by a margin sharing mechanism established in March 1997. Prior to March 1997, the price of ethylene was negotiated between Braskem and its ethylene customers on a monthly basis.

The following table shows the listed prices provided by Braskem and PQU for ethylene per metric ton for the periods indicated (period averages, except for maximum and minimum prices):

	Braskem	PQU
	(R\$/ton)	
2007		
First Quarter	2,628.90	2,793.33
Second Quarter	2,621.28	2,873.33
Third Quarter	2,603.29	2,865.63
Fourth Quarter	2,651.25	2,996.67
Maximum Price in Year	2,777.41	3,070.00
Minimum Price in Year	2,517.65	2,760.00
Year Average	2,626.18	2,882.24
2006		
First Quarter	2,502.33	2,614.00
Second Quarter	2,479.67	2,666.67
Third Quarter	2,703.05	2,820.00
Fourth Quarter	2,688.65	2,823.33
Maximum Price in Year	2,730.49	2,840.00
Minimum Price in Year	2,335.00	2,552.00
Year Average	2,593.42	2,731.00

Table of Contents

	Braskem (R\$/ton)	PQU
2005		
First Quarter	2,566.00	2,766.33
Second Quarter	2,623.67	2,703.33
Third Quarter	2,286.33	2,409.33
Fourth Quarter	2,561.67	2,600.33
Maximum Price in Year	2,750.00	2,850.00
Minimum Price in Year	2,281.00	2,350.00
Year Average	2,509.42	2,619.92

As naphtha is the main raw material for the production of ethylene in Brazil, fluctuations in the price of naphtha strongly influence fluctuations in the price of ethylene. Because the main determinant of the price of naphtha is the price of crude oil, the price of naphtha, and thus ethylene, is subject to fluctuations based on changes in the international oil price. The increases in the price of ethylene could affect Oxiteno's competitiveness in the petrochemical market. See Item 3.D. Key Information Risk Factors Risks Relating to Ultrapar and Its Industry.

Other raw materials. For the year ended December 31, 2007, other raw materials, principally oxygen, lauryl alcohol, ethanol, C4, butyl alcohol, acetic acid, nonene, phenol, primary fatty amine, fuel oil and LAB accounted for approximately 22% of Oxiteno's variable costs and 19% of its total costs of sales and services.

Oxiteno generally obtains these other raw materials from a variety of sources, except for phenol, which Oxiteno purchases principally from a single supplier, Rhodia Poliamida Especialidades Ltda., and for C4, which is supplied by Copesul.

Utilities. Steam, electric power and natural gas are the main utilities required for Oxiteno's production. Part of the electricity and steam used by Oxiteno is generated internally and part is purchased from electricity companies and third-party suppliers of steam in the regions where Oxiteno's plants are located. Natural gas is purchased from local companies.

Tax exemption status. Pursuant to legislation that provides tax relief for industries located in the northeast region of Brazil, Oxiteno benefited from an income tax exemption on operating profits from sales of its products at the Camaçari plant through 2007. In December 2007, the Camaçari plant's tax exemption expired and a request was filed with ADENE (Northeast Development Agency), the agency in charge of managing this incentive program, seeking a 75% income tax reduction until 2016. The income tax reduction was approved by ADENE in May 2007. Tax exemptions amounted to R\$24.1 million, R\$40.5 million and R\$56.0 million for the years ended December 31, 2007, 2006 and 2005, respectively. We cannot guarantee that there will be no amendments to the current tax legislation. For further information see Note 22(d) to our consolidated financial statements.

Maintenance and quality control. Oxiteno carries out a program of preventive maintenance at each of its plants and uses statistical analysis to help predict production problems. The stoppages due to the maintenance program take place at the same time as the stoppages for the change of the ethylene oxide catalyst. In the case of the ethylene oxide and ethylene glycol units at the Mauá and Camaçari plants, which have continuous production processes, maintenance is preferably scheduled for periods when the relevant cracker, which supplies ethylene to the plant, is scheduled to be shut down for maintenance. Each cracker is typically shut down for maintenance for a period of approximately 20 days every 36 to 48 months. The same happens to the Triunfo plant, which receives butane from Copesul. In the case of the other production units at such plants and the Tremembé plants, maintenance is performed during scheduled breaks in production. Oxiteno uses its own employees for specialized maintenance and uses third-party contractors for routine maintenance. In addition, Oxiteno has a team of employees responsible for quality control that operates continuously.

Health, safety and environmental matters. Oxiteno continuously monitors its compliance with federal, state and municipal legislation applicable to its various places of operation. In accordance with applicable law, Oxiteno is strictly liable for losses and damages of an environmental nature. See Item 4.B. Information on the Company Business Overview Petrochemicals and Chemicals Industry and Regulatory Overview.

Table of Contents

Each of Oxiteno's plants is licensed by the competent environmental authorities. Licenses granted are valid for a fixed period of time and then must be renewed. The other terms of the licenses vary according to the applicable legislation and to the periodic inspections performed by environmental authorities.

Waste products from Oxiteno's industrial plants are discharged in accordance with legal requirements. Effluents are discharged and treated in Oxiteno's own treatment centers or by petrochemical complexes where it has activities. Oxiteno seeks to reprocess solid waste products in cement furnaces. Where reprocessing is not possible, these products are incinerated or deposited in landfills owned by Oxiteno. Oxiteno periodically monitors these discharge areas and to date there are no significant liabilities.

Oxiteno's health and safety indicators are comparable to relevant international standards and are a priority in Oxiteno's activities and in the action plans for the upcoming years.

In March 2002, Oxiteno obtained an SA 8000 certification, which establishes the parameters for a Quality Management System Focused on Social Responsibility. This certification covers various matters, including health, safety, labor relations and compliance with the current legislation.

In addition to the legal requirements, Oxiteno voluntarily complies with other requirements, such as those related to the Responsible Care Program, issued by ABIQUIM, the Brazilian Chemical Industries Association, which sets forth international standards for environmental protection and occupational health as well as safety measures to be followed by chemical product producers.

Logistics for Special Bulk Cargo

Ultracargo

Ultracargo is a leading provider of integrated logistics for special bulk cargo in Brazil. Ultracargo's main differentiating characteristic is its integration of different transport modes – its storage facilities are located at port terminals and rail junctions for the handling of products that require special handling. Transportation services include integrated multimodal transportation as well as the receiving and dispatching of customer's goods. Ultracargo also offers ship loading and unloading services, the operation of pipelines, logistics programming and installation engineering. In 2007, after the acquisition of Petrolog, Ultracargo increased the internal logistics services it is able to offer at its customers facilities. Ultracargo is one of the few companies in the Brazilian market to offer integrated transport, storage services for special bulk cargo and internal logistics services. Ultracargo's ten largest clients accounted for 66% of its revenues in 2007, with its three largest clients, Braskem, Votorantim and Oxiteno accounting for 23%, 8% and 7%, respectively, of Ultracargo's revenues. Ultracargo's strategic location of its operations, close to the main Brazilian port terminals, railroad junctions and roads, is one of the company's main strengths and a key driver of integrated services profitability. The latest available data shows that Ultracargo accounted for approximately 71% of all tank capacity for liquids at the Aratu Terminal in the State of Bahia, which serves South America's largest petrochemicals complex. The company is also present in the port of Santos, in the state of São Paulo, which was responsible for approximately 27% of the Brazilian foreign trade in 2006 (US\$229 billion in 2006), according to last available data. The Santos Intermodal Terminal (TIS) is the second largest storage facility operated by Ultracargo and was inaugurated in mid-2005.

As of December 31, 2007, Ultracargo operated a fleet of approximately 600 trucks and storage facilities with a capacity of 346,137 cubic meters and 20,500 square meters. Ultracargo's history is one of pioneering logistics solutions in the Brazilian market. Ultracargo implemented a radar-operated tank measurement system in 1996, increasing the safety of product loading and unloading.

Transportation. Ultracargo's principal market for transportation is the chemical industry, for which transportation is provided by trucks between and among port terminals and first, second and third generation petrochemical companies operating at the various petrochemical complexes. Ultracargo has been establishing long-term relationships with key companies in the chemical industry, and provides its services on a negotiated basis with each individual customer.

Table of Contents

Ultracargo, through a fleet of tanker trucks, offers transportation services for chemical products, fuels and other special bulk cargo in several major industrial regions in Brazil, as well as transportation services to Chile and Argentina. In 2007, Ultracargo operated a fleet of approximately 600 trucks and, in the years ended December 31, 2007, 2006 and 2005, transported approximately 2.1 million, 2.1 million and 2.7 million tons, respectively.

In the LPG distribution industry, Ultracargo provides bulk transportation from Petrobras facilities to filling stations of the distributors and between the distributors and their final industrial clients.

In 1997, Ultracargo began operating in the market for bulk transportation of solid chemical products, an important sector of the transport business in the domestic market in which products are transported utilizing special silos and semi-trailers. Ultracargo believes that there are good opportunities for growth in this market. For the year ended December 31, 2007, Ultracargo transported approximately 455,017 tons of solid chemical products, which accounted for approximately 20% of Ultracargo's revenues in this period.

Transportation regulation. Ultracargo's principal market for transportation is the chemical industry. Therefore, besides the general Brazilian transports regulation (National Code of Traffic Law 9,503/1997), Ultracargo is subject to specific legislation that rules the transportation of hazardous products, mainly Decree 96,044/88 and Portaria 204 of the Ministry of Transportation. According to these regulations, a vehicle transporting hazardous materials must have clear indication of what kind of products they are transporting as well as carry symbols identifying that the material is inflammable. The vehicle is also subject to INMETRO Instituto Nacional de Metrologia, Normalização e Qualidade Industrial inspection every three years in order to attest that it complies with the current legislation. The regulation also provides specific rules regarding parking, travel itinerary, documentation and emergency procedures. Violations of the legislation are subject to monetary fines and cancellation of the registry for products transportation.

Storage. Ultracargo provides storage facilities to Braskem and most of the second-generation petrochemical companies in the Northeastern Petrochemical Complex, including Oxiteno. Transactions between Ultracargo and Oxiteno are carried out strictly on an arm's-length basis. At the end of 2003, Ultracargo maintained five storage terminals in Aratu and Camaçari in the state of Bahia, in Paulínia and Santos in the state of São Paulo, and in Suape in the state of Pernambuco. In early 2004, Ultracargo completed construction of an intermodal terminal in Tatuf in the state of São Paulo and later in the year inaugurated another in Montes Claros, in the state of Minas Gerais.

Ultracargo completed the construction of a new intermodal terminal in Santos (TIS) in mid-2005. This project is Ultracargo's second port installation to integrate road, rail and maritime transportation systems, the first being Aratu. Ultracargo's investment in this terminal was approximately R\$80 million. The terminal occupies an area of approximately 64,000 square meters that hosts 33,500 cubic meters of tankage space for chemical products, 40,000 cubic meters for alcohol and 38,000 cubic meters for vegetable oils. The terminal was built in partnership with Crystalsev and Cargill/ Coinbra.

In December 2006, Ultracargo completed the expansion of its terminal in Suape, adding 11,260 cubic meters to the previous capacity.

In 2007, Ultracargo added 9,300 square meters to its solid products storage capacity through: (i) Suape's Logistics Terminal (TLS), in Suape, Pernambuco, with a 3,300 square meter capacity; (ii) Mauá's Logistic Terminal (TLM) in Mauá, São Paulo, with a 4,800 square meter capacity; and (iii) the expansion of Camaçari Terminals adding 1,200 square meters. Ultracargo also expanded its liquid storage capacity with the addition of 10,000 cubic meters to Aratu.

Tax exemption status. Pursuant to legislation which offers tax relief to industries located in the northeast region of Brazil, Ultracargo enjoys a 75% reduction in income tax on the total operating profits from its Aratu terminal, valid through 2012, and a 75% reduction in income tax on operating profits from acetic acids and butadiene product storage activities at the Suape Terminal, valid through 2015. For the years ended December 31, 2007, 2006 and 2005, tax breaks totaled R\$0.8 million, R\$1.0 million and R\$3.1 million, respectively. We cannot assure that there will be no amendments to the current legislation. For further information see Note 22(d) to our consolidated financial statements.

Table of Contents

Quality. In 2006, Ultracargo completed its ISO 9001:2000 recertification process. The evaluation process occurred under a unified Quality Management System for the entire country. In 2005, Ultracargo was the first Brazilian company to go through the recertification process by SASSMAQ (Safety, Health, Environment and Quality Evaluation System), a program from ABIQUIM, the Brazilian Chemical Industries Association. The purpose of the system is to ensure that service providers in this industry comply with the technical standards required by the chemical industry, reducing, therefore, the risks in transportation and distribution. Paulínia Intermodal Terminal (TIP) obtained the ISO 14000 certification in 2004. In 2007, Ultracargo's main terminal in Aratu obtained an ISO 14,000 certification.

Insurance

We maintain insurance policies covering all the facilities of our wholly owned subsidiaries, and which we consider appropriate to cover the risks to which we believe we are exposed, including loss and damage from fire, lightning, explosion of any nature, windstorm, plane crash and electrical damage. Our insurance policies provide coverage of up to a maximum of US\$578 million as of May 1, 2008.

Oxiteno S.A. Indústria e Comércio and its subsidiaries, Oxiteno Nordeste S.A. Indústria e Comércio, Oxiteno México S.A. de C.V. and Oxiteno Andina, C.A., also maintain business interruption insurance against losses from potential accidents affecting their assets, with coverage of up to a maximum of US\$258 million as of May 1, 2008.

We have additional insurance that covers all our wholly owned subsidiaries with coverage of up to a maximum of US\$200 million, for losses and damage incurred by third parties as a result of any accidents that occur in connection with our commercial/industrial operations and/or the distribution and sale of our products and services.

Finally, we also have group life insurance, personal accident insurance, health insurance and domestic and international transportation insurance.

We believe that our insurance covers, in all material respects, the risks to which we are exposed and is in line with industry standards in Brazil. However, the occurrence of losses or other liabilities that are not covered by insurance or that exceed the limits of our insurance coverage could result in significant unexpected additional costs to us.

Oil Refinery Business

RIPI consists of a refinery in the state of Rio Grande do Sul, in the Southern region of Brazil. The refinery's nominal capacity is 17,000 barrels per day, and its principal products include gasoline, diesel, naphtha, fuel oil, LPG, kerosene, maritime bunker and asphalt. During 2006, the Ipiranga Group faced difficulties in keeping its refinery operating at full capacity, due to an increase in international oil prices, to which the refinery's costs are linked, without a corresponding increase in oil derivatives prices in Brazil. This led the Ipiranga Group to suspend its operations for five months during that year. In 2007, the average production of the refinery was 13,090 barrels per day, which represented 77% of the refinery's nominal capacity, and 1% of the total Brazilian oil refining capacity, according to ANP data. RIPI oil refining operation is consolidated on Ultrapar's financial statements since 2007. Results generated by the oil refining operations are immaterial to Ultrapar.

Since the last quarter of 2007 the refinery faces again a challenging operating scenario, which was aggravated in the beginning of 2008, and no assurance can be given that the company will continue to operate throughout this year.

Table of Contents

C. Organizational Structure

The following chart shows our organizational structure for our principal subsidiaries as of May 31, 2008:

- (1) Percentages represent approximate ownership of voting share capital and total capital (voting capital/total capital).
- (2) Minority participations in Utingás are mainly held by Liquigás Distribuidora S.A. and SHV Gas (31% and 8% of voting capital, respectively).
- (3) Refinaria de Petróleo Ipiranga is a wholly owned subsidiary of Ultrapar Participações S.A., and according to the Transaction Agreements, the Oil Refining Operations are jointly managed by Petrobras, Ultrapar and Braskem since the Acquisition. This is described in the Transaction Agreements.

Table of Contents

We conduct LPG distribution through our wholly owned subsidiary, Ultragaz. Ultragaz operates through its three primary subsidiaries, Companhia Ultragaz S.A., Bahiana, and Utingás. The first three companies operate in the filling and distribution of LPG cylinders. Bahiana operates primarily in the Northeast regions of Brazil and Companhia Ultragaz serves South, Southeast and Center-West regions of Brazil. Utingás is an LPG storage company, with facilities in the states of São Paulo and Paraná.

We conduct our fuel distribution business through our wholly owned subsidiaries, DPPI and CBPI. DPPI covers the distribution and marketing of petroleum products, fuel ethanol and NGV in the state of Rio Grande do Sul and the western portion of the state of Santa Catarina. CBPI covers the remaining states of the Southeast and South regions of Brazil, which includes São Paulo, Rio de Janeiro, Minas Gerais, Espírito Santo and Paraná. CBPI also controls am/pm, the master franchisor of the am/pm brand in Brazil and Tropical Transportes, which provides transportation services for Ipiranga and other fuel distributors; and EMCA, a producer of white mineral oils and special fluids.

We conduct petrochemical and chemical activities through our wholly owned subsidiary, Oxiteno. Oxiteno operates in the petrochemical and chemical sector directly and through its subsidiaries, Oxiteno Nordeste S.A., Oxiteno Mexico and Oxiteno Andina. Oxiteno operates three plants located in the state of São Paulo, and Oxiteno Nordeste operates one plant in Camaçari, in the state of Bahia, and a second plant in Triunfo, in the state of Rio Grande do Sul. Oxiteno Mexico operates three plants in Mexico, including the recently acquired plant of Unión Química. Oxiteno Andina operates one plant located in Venezuela. Oleoquímica is the subsidiary through which we built a fatty alcohol plant in Camaçari.

We conduct special bulk cargo logistics through our wholly owned subsidiary, Ultracargo, which operates through its subsidiaries Transultra, Tequimar and Petrolog. Transultra provides transportation services throughout Brazil, as well as in Argentina and Chile. Tequimar maintains storage facilities at four port terminals located near two of the main petrochemical complexes in Brazil, Camaçari and São Paulo and Petrolog provides in-house logistics services.

D. Property, Plants and Equipment

Ultragaz

Plants. Ultragaz LPG distribution network includes 15 filling plants. LPG is carried to the filling plants either via gas pipelines from Petrobras installations, or by tanker truck. When LPG transportation is via gas pipeline the bases are known as primary and when transportation is via tanker truck, the bases are known as secondary. Ultragaz also operates LPG storage bases, known as satellite bases for supplying our trucks. Ultragaz maintains storage facilities for LPG cylinders and satellite bulk distribution plants at strategic locations in order to maintain supplies closer to its customer bases and thus to reduce transportation costs. Most of the LPG transported by truck from Petrobras to Ultragaz secondary plants is transported by Ultracargo's fleet of tanker trucks on an arm's-length basis. LPG is stored in the filling plants in large LPG storage tanks with a capacity of 60 tons per tank. In the case of LPG to be delivered in bulk, the LPG is pumped directly from the storage tanks into the bulk tankers. In the case of LPG to be delivered in cylinders, the LPG is pumped from the storage tanks into a number of filling heads, which deliver the LPG cylinders.

The following table sets forth the total storage capacity, total filling capacity (assuming one 8-hour shift per day) during 2007 and the 2007 average filling utilization for each of Ultragaz primary and secondary filling stations and satellite stations.

Table of Contents

Base	Type	Total storage capacity (in tons)	Filling capacity (in tons per month)	2007 average filling utilization rate
Capuava	Primary	720	13,136	94%
Santos	Primary	960	3,727	76%
São José dos Campos	Primary	960	4,725	77%

Total		12,764	99,446	93%

(1) These bases operated above capacity with more than one 8-hour shift per day.

In addition, Ultragas maintains headquarters in the city of São Paulo and regional offices in the areas in which it operates. Ultragas also maintains 75 retail stores.

Ipiranga

Distribution of oil products is carried out through an extensive network of primary and secondary storage terminals. Primary storage terminals are generally located near refineries and are used as storage terminals for products to be transported either to secondary storage terminals or to large customers and TRRs. Distributors own their own storage terminals (Owned), lease space in third parties' storage terminals (Third Party Agreement TPA) or participate in pools (Joint-Operated terminals JO) that serve two or more distributors. The following table sets forth the total storage capacity and ownership structure for each of Ipiranga's primary and secondary facilities in 2007.

Table of Contents

Base	Ownership structure of		
	Type	Storage Terminal	Storage Capacity(m ³)
Barueri	Primary	TPA (1)	3,540
Bagé	Secondary	Owned	5,176
Canoas	Primary	Owned	41,040

Table of Contents**Oxitenó**

Oxitenó has five plants in Brazil: Camaçari, in the northeast complex, the Mauá plant in the São Paulo complex, the Triunfo plant in the southern complex and the Tremembé and Suzano plants in the state of São Paulo.

The following table sets forth the current ethylene oxide production capacity of Oxitenó's plants in Brazil.

Units	Capacity (in tons per year)
Camaçari	260,000
Mauá	52,000
Tremembé	
Triunfo	
Suzano	
Total	312,000

Ethylene oxide is primarily an intermediate material used in the production of ethylene oxide derivatives – only approximately 3% of Oxitenó's sales volume in the year ended December 31, 2007 were ethylene oxide. Therefore, Oxitenó's total production output may not be determined by adding the capacities of ethylene oxide and its derivatives.

As Oxitenó's capacity for ethylene oxide derivatives exceeds its ethylene oxide production capacity, Oxitenó cannot produce the maximum amount of each derivative product in any year and, accordingly, actual production of ethylene oxide derivatives is less than its capacity shown in the tables below.

However, the excess production capacity of ethylene oxide derivatives provides a degree of operating flexibility that enables the company to switch production partially to other products and re-manage its ethylene oxide output for derivative products depending on relative demand, thus mitigating the effects of reductions in demand for certain products resulting from downturns in the petrochemical business cycle.

Camaçari plant. The Camaçari plant, located in the Northeast Complex, was built by Oxitenó and commenced production in 1978. The Camaçari plant produces ethylene oxide and ethylene oxide derivatives, such as ethylene glycols, ethanolamines, glycol ethers and ethoxylated derivatives. In July 1997, a major modernization of this plant was completed adding 105 thousand tons of ethylene oxide production capacity.

The following table sets forth the production capacity of the Camaçari plant for each of its principal products.

Units	Capacity (in metric tons per year)
Ethylene oxide	260,000
Ethylene glycols	285,000
Ethanolamines	60,000
Glycol ethers	25,000
Ethoxylated derivatives	130,000

In 2007, the Camaçari plant operated at approximately 88% of its production capacity.

Table of Contents

Mauá plant. The Mauá plant, located in the São Paulo Complex, was the first plant built by Oxiteno and it commenced production in 1974. The Mauá plant has process units for ethylene oxide, ethylene glycols, glycol ethers, glycol ether acetates, natural alcohols and ethoxylated derivatives. In addition to the production units, the plant has drumming, storage, warehouse and maintenance facilities and also houses Oxiteno's principal research and development laboratory. The following table sets forth the current production capacity of the Mauá plant for each of its principal products.

Units	Capacity (in metric tons per year)
Ethylene Oxide	52,000
Ethylene Glycols	40,000
Glycol Ethers	40,000
Acetates	32,000
C4+C5 Alcohols	10,000
Ethoxylated Derivatives	106,000
Alkylation	17,000
Esterification	4,000
Emulsification	3,000
Hydraulic fluids	30,000

In 2007, the Mauá plant operated at approximately 77% of its production capacity.

Tremembé plant. The Tremembé plant, located at Bairro dos Guedes, Tremembé, in the state of São Paulo, has three principal production units, a sulfonation/sulfation unit and two multipurpose units. The Tremembé plant commenced production in 1970 and was subsequently acquired by us in 1985.

The following table shows the current capacity of the principal units at the Tremembé plant.

Units	Capacity (in metric tons per year)
Esterification	10,000
Specialties	15,000
Sulfonation/Sulfation	30,000
Betaines	10,000
Hydraulic fluids	3,200
Naphthalenes Sulfonates	9,000
Agricultural Blends	11,000

In 2007, the Tremembé plant operated at approximately 75% of its production capacity.

Suzano plant. In 2007, Oxiteno began operating a sulfonation and sulfation plant in Suzano, with a production capacity of 13,300 tons per year. This plant is managed by the Tremembé plant staff. In 2007, the Suzano plant operated at approximately 83% of its production capacity.

Triunfo plant. The Triunfo plant is located in the Southern Complex. The Triunfo plant was built by Oxiteno and started production in October 1989. The Triunfo plant has two process units, one for the production of secondary butyl alcohol, which is used in the production of MEK, and one for the production of MEK.

The following table shows the current capacity of the principal units at the Triunfo plant.

Units	Capacity (in metric tons per year)
Oxygenated solvents	42,000

In 2007, the Triunfo plant operated at approximately 92% of its production capacity.

Table of Contents

With the acquisition of Oxiteno Mexico (formerly CANAMEX) in December 2003 and Unión Química in 2007, Oxiteno acquired three specialty chemical plants in Mexico. As of December 31, 2007, the Coatzacoalcos plant had a production capacity of 47,000 tons per year of ethoxylates and 8,000 tons per year of alkyphenols; the Guadalajara plant has a production capacity of 31,000 tons per year of specialty chemicals and San Juan del Rio has a production capacity of 8,000 tons per year of specialty chemicals. In December 2007, the Guadalajara, the Coatzacoalcos and San Juan del Rio plants operated at an average rate of approximately 61%, 67% and 89% of their production capacity, respectively. With the acquisition of Oxiteno Andina in September 2007, Oxiteno acquired a specialty chemical plant in Venezuela. As of December 31, 2007, the Santa Rita plant had a production capacity of 70,000 tons per year of ethoxylates.

The following table sets forth Oxiteno's production plants located outside of Brazil:

Units	Capacity (in metric tons per year)
Ethoxylated derivatives Coatzacoalcos plant	47,000
Alkylation Coatzacoalcos plant	8,000
Ethoxylated derivatives Guadalajara plant	18,000
Esterification Guadalajara plant	13,000
Sulfonation/Sulfation San Juan del Rio	8,000
Alkoxyated derivatives Santa Rita	70,000

Ultracargo

The following tables set forth the principal products stored at, and the storage capacity operated by, Ultracargo's facilities at December 31, 2007, and the average utilization of Ultracargo's facilities during 2007.

Facility	Capacity (in cubic meters)	Average utilization %	Product Lines
Aratu (Bahia)	166,450	97%	Glycols, aromatics, acrylates, acrylonitrile, EDC, TDI, normal paraffins, linear alkyl benzene (LAB), linear alkyl sulphonate (LAS), methanol, ethers, alcohols, caustic soda, vegetable oil, fuels, PKO and Estearin.
Montes Claros (Minas Gerais)	4,400	103%	Fuels
Suaape (Pernambuco)	48,610	99%	Fuels, VAM, acetic acid, styrene, butadiene, glycols
Santos (São Paulo)	4,696	100%	Vinyl Chloride Monomer
Santos TIS (São Paulo) (including third-party facilities operated by Ultracargo)	111,500	54%	Styren monomer, mineral oil, EDC, linear alkyl benzene (LAB), alcohols (including ethanol), vegetable oil.
Paulínia Solid Bulk (São Paulo)	1,881	64%	PET
Paulínia Liquid (São Paulo)	8,600	57%	Phenol, LAB, LAS, Ethanol
Total	346,137	82%	

Facility	Capacity (in square meters)	Average utilization %	Product Lines
Paulínia (São Paulo)	6,000	49%	Chemical and special bulk cargo
Tatuí (São Paulo)	2,400	41%	Chemical and special bulk cargo
Camaçari (Bahia)	4,000	71%	Chemical and special bulk cargo
Mauá (São Paulo)	4,800	38%	Chemical and special bulk cargo
Suaape (Pernambuco)	3,300	60%	Chemical and special bulk cargo
Total	20,500	52%	Chemical and special bulk cargo

Table of Contents

As of December 31, 2007, R\$63.0 million of our consolidated debt was secured by property, plant and equipment.

ITEM 4A. UNRESOLVED STAFF COMMENTS

None.

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

A. Operating Results

You should read this discussion together with our consolidated financial statements, including the notes thereto, and other financial information included elsewhere in this annual report and in conjunction with the financial information included under Item 3.A. Key Information - Selected Consolidated Financial Information. Our consolidated financial statements have been prepared in accordance with Brazilian GAAP and the accompanying notes contain a description of the principal differences between such practices and U.S. GAAP, and a reconciliation to U.S. GAAP of net income for each of the three years in the period ended December 31, 2007 and shareholders' equity for the periods ended December 31, 2007 and 2006. Our consolidated financial statements for the years ended December 31, 2007 were audited by the independent registered public accounting firm, KPMG Auditores Independentes, and our consolidated statements for the years ended 2006 and 2005 were audited by the independent registered public accounting firm, Deloitte Touche Tohmatsu Auditores Independentes.

Overview

Our four principal businesses are:

the LPG distribution business, conducted by our wholly-owned subsidiary Ultragaz;

the fuel distribution business, conducted through our wholly-owned subsidiaries DPPI and CBPI;

the chemical and petrochemical business, conducted by our wholly-owned subsidiary Oxitenio; and

logistics services for special bulk cargo, conducted by our wholly-owned subsidiary Ultracargo.

Ultragaz sells LPG to the residential, commercial and industrial market segments. Ipiranga distributes gasoline, ethanol, diesel, NGV, fuel oil, kerosene and lubricants through a network of 3,292 service stations and directly to large customers. Oxitenio produces ethylene oxide and its principal derivatives, and is also a significant producer of specialty chemicals. It manufactures approximately 700 products used in various industrial sectors such as polyethylene terephthalate, or PET, packaging, polyester, textiles, paints, cosmetics and detergents. Ultracargo operates a fleet of trucks specialized in the transport of products that require special handling and maintains storage facilities at railroad junctions and port terminals.

In April 2007 Ultrapar acquired a controlling stake in certain companies of the Ipiranga Group, becoming the owner of the Southern Distribution Business, EMCA and a stake in the Oil Refining Operations. Under the terms of the Investment Agreement, Ultrapar acted as commission agent for the acquisition of the Northern Distribution Business on behalf of Petrobras and the Petrochemical Business on behalf of Braskem and Petrobras. The Acquisition is composed of four stages. The first one was concluded on April 18, 2007, with the transfer of control. In November 2007 the second stage of the process was concluded, with the completion of the Mandatory Tender Offers of RIPI, DPPI and CBPI. In December 2007 the third stage of the process was concluded with the approval of the Share Exchange at the relevant extraordinary shareholders' meetings of the respective companies, which resulted in the issuance of 55 million preferred shares of Ultrapar to the former shareholders of RIPI, DPPI and CBPI. The fourth stage includes the segregation and handover (i) of the Petrochemical Business and Northern Distribution Business to Braskem and Petrobras, which were carried out on February 27 and May 14, 2008, respectively, upon the receipt by Ultrapar of a total amount of R\$ 1.7 billion, and (ii) of the Oil Refining Operations. The Oil Refining Operations will be shared equally among Petrobras, Ultrapar and

Edgar Filing: ULTRAPAR HOLDINGS INC - Form 20-F

Braskem. See Presentation of Financial Information, Item 4.A. Information on the Company History and Development of the Company Description of the Acquisition of the Ipiranga Group . The businesses acquired by Ultrapar in the Ipiranga Acquisition have been consolidated with Ultrapar s results of operations since April 1, 2007.

Table of Contents**Brazilian economic background**

Since most of our operating businesses are located in Brazil, we are significantly affected by Brazil's economic and social conditions, including, but not limited to, gross domestic product, or GDP, growth rates, the domestic rate of inflation and exchange rate fluctuations.

Gross domestic product. In 2002, Brazil's GDP grew by 2.7%, as a result of the political instability surrounding the presidential elections of October 2002, which caused foreign exchange rate devaluation, and an increase in interest rates, and undermined consumer confidence. In 2003, the GDP grew 1.1%, largely a reflection of the economic policy of holding the basic interest rate at high levels throughout the year as a means of controlling inflation. As government became more confident regarding inflation trends, interest rates were lowered, and Brazilian GDP grew by 5.7% in 2004. However, in order to meet inflation targets, the Central Bank increased interest rates again in 2005, and GDP growth decreased to 2.9% in the year ended December 31, 2005. During 2006, the Brazilian economy presented the same trend shown in the previous year and GDP grew by 3.8%. In 2007 Brazilian GDP increased by 5.4%, after several years of lower growth. Increased consumer income in Brazil, combined with a reduction in Brazil's basic interest rates, stable inflation and greater credit availability, has resulted in growth of the services, industrial and agricultural sectors of the economy, particularly in the construction and automotive industries. Our operations are significantly impacted by Brazilian GDP growth, specifically, sales of LPG to the commercial and industrial customers, sales of diesel, Oxiteno's sales to the domestic market and Ultracargo's logistics operations. In addition, sales of LPG to residential customers and sales of gasoline and ethanol are affected by the level of household income, which often bears a relation to GDP performance.

Inflation and currency fluctuations. Our cash operating expenses are substantially in *reais* and tend to increase with inflation. However, a significant portion of our costs of sales and services rendered are linked to the U.S. dollar and are not substantially affected by the Brazilian inflation rate. In addition, some of our *real*-denominated debt is indexed to take into account the effects of inflation. In 2002, the inflation rate as measured by the Índice Geral de Preços Mercado, or the IGP-M, increased to 25.3%, reflecting the foreign exchange rate devaluation of 52.3%, largely due to uncertainties and risks inherent in the Brazilian presidential succession campaign. In 2003, the *real* appreciated 18.2% against the U.S. dollar, consequently diminishing inflationary pressures and resulting in an IGP-M of 8.7%. In 2004, the *real* appreciated further against the U.S. dollar and IGP-M for the year was 12.4%. In 2005 and 2006, the *real* continued to appreciate against the U.S. dollar, which, together with the increased average interest rates, resulted in an inflation rate of 1.2% and 3.9%, respectively, as measured by the IGP-M. In 2007, the IGP-M was 7.8%, double the inflation rate in 2006, mainly due to an increase in food prices, despite the 17% appreciation of the *real* against the U.S. dollar in 2007.

The principal foreign exchange risk we face arises from certain U.S. dollar denominated costs and expenses. Although a substantial part of our debt is dollar-denominated, it is currently hedged against currency devaluation through the use of various derivative instruments or matching investments in the same currency. Additionally, a significant part of our raw materials is also denominated or indexed to the U.S. dollar. A large part of our sales is denominated in *reais*, although prices in the chemical business are benchmarked to prices prevailing in the international markets and denominated in U.S. dollars. Hence, we are exposed to foreign exchange rate risks which could negatively impact our businesses, financial situation and operating results as well as our capacity to service our debt.

The table below shows the inflation rate for the periods indicated, as measured by the IGP-M as well as the devaluation of the *real* against the U.S. dollar.

Index	Year ended December 31,		
	2007	2006	2005
General Price Index IGP-M	7.8%	3.9%	1.2%
Devaluation (appreciation) of the <i>real</i> against the U.S. dollar	(17.2)%	(8.7)%	(11.8)%

Table of Contents

We manage the foreign exchange risk associated with the scheduled payments under the terms of our U.S. dollar indebtedness by investing in U.S. dollar-denominated securities and foreign currency/interest swap contracts, under which we pay variable interest in *reais* based on the interbank certificate of deposit rate, or CDI, and receive fixed interest in U.S. currency. As of December 31, 2007 our total obligations denominated in foreign currency were R\$1,002.9 million, including pre-export finance contracts and import payables. At the same date our total asset position in foreign currency was R\$961.3 million, composed of investments indexed to U.S. dollars and swap instruments used to manage fluctuations of exchange rates and foreign currency receivables exposures. See Item 11. Quantitative and Qualitative Disclosures About Market Risk Foreign Exchange Risk for information about our foreign exchange risk hedging policy and Notes 14 and 19 to our consolidated financial statements.

Critical accounting policies and estimates

The presentation of our financial condition and results of operations requires our management to make judgments regarding the effects of matters that are inherently uncertain on the carrying value of our assets and liabilities and may affect the reported amount of them as well as our revenues and expenses. Actual results may differ from those estimated under different variables, assumptions or conditions, even though our management believes that its accounting estimates are reasonable. The following paragraphs review the critical accounting estimates that management considers most important for understanding our financial condition, results of operations and cash flows. An accounting estimate is considered a critical accounting estimate if it meets the following criteria:

The accounting estimate requires management to make assumptions about matters that were highly uncertain at the time the accounting estimate was made; and

Different estimates that management reasonably could have used for the accounting estimate in the current period, or changes in the accounting estimate that are reasonably likely to occur from period to period, would have a material impact on our financial condition, results of operations or cash flows.

We have identified the following five of our accounting policies as critical.

Allowance for doubtful accounts. We maintain allowances for doubtful accounts for estimated losses resulting from the subsequent inability of our customers to make required payments. The allowance for doubtful accounts is recorded in an amount we consider sufficient to cover any probable losses on realization of our accounts receivable from our customers, as well as other receivables, and is included as selling expenses; no adjustment is made to net sales and services revenue. In order to establish the allowance for doubtful accounts, our management constantly evaluates the amount and characteristics of our accounts receivable. When significant delays occur and the likelihood of receiving these payments decreases, a provision is made. In case receivables in arrears are guaranteed or there are reasonable grounds to believe they will be paid, no provision is made. If the financial conditions of our customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances would be required in future periods. However, because we cannot predict with certainty the future financial stability of our customers, we cannot guarantee that our reserves will continue to be adequate. Actual credit losses may be greater than the allowance we have established, which could have a significant impact on our selling expenses. See Note 6 to our consolidated financial statements for additional information about our allowance for doubtful accounts.

Deferred Taxes. We recognize deferred tax assets and liabilities which do not expire, arising from tax loss carry forwards, temporary add-backs, revaluation of property, plants and equipment and other procedures. We periodically review the deferred tax assets for recoverability and establish a valuation allowance, as required, based on historical taxable income, projected future taxable income, and the expected timing of the reversals of existing temporary differences. In the event we or one of our subsidiaries operate at a loss or are unable to generate sufficient future taxable income, or if there is a material change in the actual effective tax rates or time period within which the underlying temporary differences become taxable or deductible, we evaluate the need to establish a valuation allowance against all or a significant portion of our deferred tax assets, resulting in an increase in our effective tax rate, thereby decreasing net income. If we determine that we can realize a deferred tax in excess of our net recorded amount, we decrease the valuation allowance, thereby increasing net income. Significant management judgment is required in determining any valuation allowance. The principal uncertainty relates to the likelihood of future taxable income from the subsidiary that generated the deferred tax asset. A change in our projections of profitability could result in the need to record a valuation allowance against deferred tax assets, resulting in a negative impact of future results. See Note 22 to our consolidated financial statements for additional information on taxes.

Table of Contents

Contingent liabilities. We are currently involved in certain legal and administrative proceedings that arise from our normal course of business as described in Note 20 to our consolidated financial statements and Item 8.A. Financial Information Consolidated Statements and Other Financial Information Legal Proceedings. We believe that the extent to which these contingencies are recognized in our consolidated financial statements is adequate. It is our policy to record accrued liabilities in regard to contingencies that can be reasonably estimated and could have a material adverse impact on the result of our operations or our financial condition, to the extent not covered by insurance, and that are likely to occur in the opinion of our management, based on information available to us including information obtained from our legal advisors. Future results of operations for any particular quarterly or annual period could be materially affected by changes in our assumptions, by the effectiveness of our strategies relating to these proceedings, by future developments in each matter being discussed or by changes in approach, such as a change in settlement strategy in dealing with these matters.

Fair value of financial instruments. We enter into foreign currency swap agreements in order to hedge our foreign exchange exposure. Under Brazilian GAAP, these swap agreements are recorded at their net settlement prices as determined on each balance sheet date in accordance with their contractual terms. In applying U.S. GAAP to our swap agreements we adopted SFAS 133, Accounting for Derivative Instruments and Hedging Activities. The accounting required under SFAS 133 is broader than under Brazilian GAAP, especially with respect to the overall treatment and definition of a derivative, when to record a derivative, the classification of derivatives, and when to designate a derivative as a hedge. Under this method of accounting we adjusted our foreign currency swaps to their fair values, with changes in fair values being recognized in earnings. Note 25I (i) to our consolidated financial statements provides additional information regarding the accounting of our swap agreements.

In order to estimate fair values, we consider several variables, such as interest rates, discount rates, foreign exchange rates and future cash flows. Our most important sources of information concerning these variables are the market projections of future exchange and interest rates provided by the Brazilian Mercantile & Future Exchange (BMF). We believe BMF to be the most adequate and reliable source of information available for our calculations. However, given the volatility inherent in financial markets, estimates concerning the variables used to calculate fair values are subject to constant change. As a consequence, our judgment related to, among other issues, the behavior of these variables, the selection of sources of information and the timing of calculation, directly affects the fair values of our swaps and the amount of gains or losses recorded in the income statement under U.S. GAAP.

Pension and other post-retirement benefits. Ipiranga sponsors the pension fund Fundação Martins Bastos through which it offers its employees a defined benefit plan. The determination of expenses and liabilities relating to DPPI and CBPI's pension plans and certain insurance benefits for DPPI and CBPI's employees and their dependents involve the use of actuarial assumptions. These include estimates of future mortality, changes in compensation and the discount rate used to reflect the time value of money, as well as the rate of return on plan assets. These assumptions are reviewed at least annually and may differ materially from actual results due to changing market and economic conditions, regulatory events, judicial rulings, higher or lower withdrawal rates or longer or shorter life spans of participants. In case actual results differ from the assumptions adopted, there may be a significant impact on the amount of pension liability and post-retirement healthcare and expenses DPPI and CBPI record. See Note 24(b) to our consolidated financial statements.

Results of operations

The following discussion of our results of operations is based on the financial information derived from our consolidated financial statements prepared in accordance with Brazilian GAAP.

Table of Contents**Year ended December 31, 2007 compared to the year ended December 31, 2006.**

The following table shows a summary of our results of operations for the years ended December 31, 2007 and 2006:

	Year ended December 31, 2007	Percentage of net sales and services	Year ended December 31, 2006	Percentage of net sales and services	Percent change
	(in millions of reais, except percentages)				
Net sales and services	19,921.3	100%	4,794.1	100%	316%
Cost of sales and services	(18,224.2)	91%	(3,859.9)	81%	372%
Gross profit	1,697.1	9%	934.2	19%	82%
Selling, general and administrative expenses	(1,223.3)	6%	(605.1)	13%	102%
Other operating income (expense), net	12.3	0%	1.3	0%	846%
Operating income before financial items	486.1	2%	330.4	7%	47%
Financial income (expense), net	(119.4)	1%	30.6	1%	-490%
Non-operating income (expense), net	8.8	0%	(18.5)	0%	-148%
Income and social contribution taxes	(85.9)	0%	(56.1)	1%	53%
Minority interest/equity in earnings of affiliates	(100.4)	1%	(4.3)	0%	
Employees Statutory Interest	(7.3)	0%		0%	2,235%
Net income	181.9	1%	282.1	6%	-36%
Adjusted EBITDA(1)	779.4	4%	516.2	11%	51%

(1) See footnote 7 under Item 3.A. Key Information Selected Consolidated Financial Data for additional discussion of adjusted EBITDA and its reconciliation to other information in our financial statements.

Net sales and services. Net sales and services for the year ended December 31, 2007 increased by 316% to R\$19,921.3 million from R\$4,794.1 million for the year ended December 31, 2006, primarily as a result of the inclusion of Ipiranga's net sales from the second quarter of 2007 following the Ipiranga Acquisition. The following table shows the change in sales for each of our segments:

	Year ended December 31, Percent 2007 2006 change (in millions of reais)		
Ultragaz	3,112.9	3,066.9	2%
Ipiranga	14,927.0	n.a.	n.a.
Oxiteno	1,685.7	1,549.5	9%
Ultracargo	229.1	226.1	1%

Ultragaz's net sales and services increased by 2% to R\$3,112.9 million for the year ended December 31, 2007 compared to R\$3,066.9 million for the year ended December 31, 2006. The increase was driven by a 2% growth in sales volume, which was partially offset by a decrease in prices caused by increased competition in the Brazilian LPG market in the second half of the year.

Ipiranga's net sales increased by 2% in 2007. The increase was driven by a 6% growth in sales volume and the effects of favorable regulatory changes, including increased enforcement, with respect to the Brazilian fuels sector and was partially offset by a decrease in ethanol prices due to a record high sugarcane harvest in 2007 and a reduction in ICMS taxes in Rio Grande do Sul State.

Oxiteno's net sales and services increased 9% to R\$1,685.7 million for the year ended December 31, 2007 compared to R\$1,549.5 million for the year ended December 31, 2006. The increase in Oxiteno's net sales and services was mainly due to a 14% increase in sales volume and a recovery in prices of international, partially offset by a 10% appreciation of the Brazilian real during the period.

Edgar Filing: ULTRAPAR HOLDINGS INC - Form 20-F

Ultracargo's net sales and services increased 1% to R\$229.1 million for the year ended December 31, 2007, compared to R\$226.1 million for the year ended December 31, 2006. The volume of products stored by Ultracargo levels terminals was 17% higher than in 2006, mainly at Santos, Suape and Aratu terminals and total kilometers traveled recorded by Ultracargo decreased by 21% from 2006, as a result of the company's having concentrated its operations on providing higher value-added services.

Table of Contents

Cost of sales and services. Cost of sales and services increased by 372% to R\$18,224.2 million for the year ended December 31, 2007 compared to R\$3,859.9 million for the year ended December 31, 2006, mainly as a result of the inclusion of Ipiranga's costs as from the second quarter of 2007 following the Ipiranga Acquisition.

Ultragaz's cost of sales and services increased by 3% to R\$2,643.7 million for the year ended December 31, 2007 compared to R\$2,572.6 million for the year ended December 31, 2006, mainly as a result of a 2% increase in sales volume.

Ipiranga's cost of sales and services increased by 2% to R\$18,411.9 million for the year ended December 31, 2007 compared to R\$18,085.8 million for the year ended December 31, 2006, as a result of a 6% increase in volume, partially offset by a decrease in the cost of ethanol due to a record level sugarcane harvest in 2007 and a reduction in ICMS taxes in the state of Rio Grande do Sul.

Oxitenó's cost of sales and services increased by 14% to R\$1,358.6 million for the year ended December 31, 2007 compared to R\$1,192.4 million for the year ended December 31, 2006. This increase was primarily due to a 14% increase in sales volume at higher unit costs due to successive oil price increases and was partially offset by a 10% appreciation of the Brazilian real.

Ultracargo's 2007 cost of sales and services increased slightly from R\$143.6 million in 2006 to 144.8 million in 2007, a reduction of 0.8%.

Gross profit. Gross profit increased by 82% to R\$1,697.1 million for the year ended December 31, 2007, compared to R\$934.2 million for the year ended December 31, 2006. Ultragaz's gross profit was R\$469.2 million for the year ended December 31, 2007, a 5% decrease compared to R\$494.3 million for the year ended December 31, 2006. Ipiranga's gross profit was R\$1,061.1 for the year ended December 31, 2007, a 13% increase compared to R\$941.2 million for the year ended December 31, 2006. Oxitenó's gross profit was R\$327.2 million for the year ended December 31, 2007, an 8% decrease compared to R\$357.1 million for the year ended December 31, 2006. Ultracargo's gross profit was R\$84.2 million for the year ended December 31, 2007, a 2% increase compared with R\$82.5 million for the year ended December 31, 2006. Ipiranga added R\$813 million to Ultrapar's gross profit in 2007 after the Ipiranga Acquisition.

Selling, general and administrative expenses. Our selling, general and administrative expenses increased by 102% to R\$1,223.3 million for the year ended December 31, 2007 from R\$605.1 million for the year ended December 31, 2006. The increase was primarily due to the addition of Ipiranga's selling, general and administrative expenses as from the second quarter of 2007 following the Ipiranga Acquisition.

Ultragaz's selling, general and administrative expenses increased by 3% to R\$337.6 million for the year ended December 31, 2007 compared to R\$327.0 million for the year ended December 31, 2006, primarily due to higher sales volume and increased expenses for advertising and marketing in connection with the company marketing campaign for its seventieth anniversary.

Ipiranga's selling, general and administrative expenses increased by 8% to R\$738.0 million for the year ended December 31, 2007 compared to R\$681.5 million for the year ended December 31, 2006, primarily due to: (i) an increase in sales volume primarily increasing freight expenses and (ii) higher expenses for advertising and marketing, as a result of projects such as *Cartão Ipiranga Carbono Zero* (Ipiranga Zero Carbon Card), *Promoção 3,000 tanques* (3,000 Full Tanks campaign), *Clube VIP* (VIP Club) and *Clube do Milhão* (Million Club). Oxitenó's selling, general and administrative expenses increased by 5% to R\$222.3 million for the year ended December 31, 2007 compared to R\$212.2 million for the year ended December 31, 2006, due to benefits from increased scale, the effect of an appreciation of the Brazilian real on international freight and lower expenses from sales commissions due to the opening of sales offices in Argentina and the United States.

Ultracargo's selling, general and administrative expenses decreased slightly to R\$70.3 million for the year ended December 31, 2007 from R\$71.0 million for the year ended December 31, 2006.

Operating income before financial items. Operating income before financial items increased by 47% to R\$486.1 million for the year ended December 31, 2007 compared to R\$330.4 million for the year ended December 31,

Table of Contents

2006. Ultragas' operating income before financial items for the year ended December 31, 2007 was R\$132.3 million, a 21% decrease compared to R\$167.3 million compared to the year ended December 31, 2006. Ipiranga's operating income before financial items was R\$335.7 million for the year ended December 31, 2007, a 23% increase compared to R\$272.5 million for the year ended December 31, 2006. Oxiteno's operating income before financial items was R\$106.6 million for the year ended December 31, 2007, a 27% decrease compared to R\$146.3 million for the year ended December 31, 2006. Ultracargo's operating income before financial items was R\$14.6 million for the year ended December 31, 2007, a 28% increase compared to the R\$11.4 million for the year ended December 31, 2006. The increase at Ultrapar was due to the inclusion of Ipiranga's operating income before financial items following the Ipiranga Acquisition.

Financial income (expense), net. We reported net financial expense of R\$119.4 million for the year ended December 31, 2007, compared to a net financial income of R\$30.6 million for the year ended December 31, 2006. The decrease primarily reflects a temporary increase in Ultrapar's net debt as a result of the Ipiranga Acquisition. On December 31, 2007, Ultrapar's total receivables from Petrobras and Braskem as a result of the Ipiranga Acquisition were R\$1.7 billion, corresponding to the stake of the petrochemical and fuel distribution assets Ultrapar acquired from the former shareholders of the Ipiranga Group on behalf of Petrobras and Braskem. The R\$1 billion related to the separation of the petrochemical assets was paid to Ultrapar on February 27, 2008 and the remaining R\$0.7 billion corresponds to the Northern Distribution Business, paid on May 14, 2008. See Item 4.A. Information on the Company History and Development of the Company Description of the Acquisition of the Ipiranga Group.

As of December 31, 2007, we had a net debt position of R\$1,434.1 million and a net foreign exchange rate exposure of R\$(41.6) million. As of December 31, 2007, our total debt denominated in foreign currency was R\$1,002.9 million, including pre-export finance contracts and import payables. At the same date our total asset position in foreign currency was R\$961.3 million, consisting of investments indexed to the U.S. dollar and swap arrangements used to manage exchange rate fluctuations and exposure to foreign currency receivables. See, footnote 8 under Item 3.A. Key Information Selected Consolidated Financial Data for a more complete discussion of net cash (debt) and its reconciliation to information in our financial statements, as well as Notes 4, 14 and 19 to our consolidated financial statements included in this annual report.

Non-operating income (expense), net. We reported a net non-operating income of R\$8.8 million for the year ended December 31, 2007 compared to a net non-operating expense of R\$18.5 million for the year ended December 31, 2006. This net non-operating income is primarily attributable to profit from the sale of property, plant and equipment, particularly Ipiranga's railroad cars in the amount of R\$11.1 million, which was partially offset by expenses related to expansion projects. In 2006, the expense corresponded primarily to a write-off of deferred assets related to project studies.

Income and social contribution taxes. Income and social contribution tax expenses, net of benefits from tax holidays, totaled R\$85.9 million for the year ended December 31, 2007, a 53% increase from R\$56.1 million for the year ended December 31, 2006, primarily due to an increase in pre-tax income, as a result of the Ipiranga Acquisition, and to a decrease in tax benefits to Oxiteno's plant in Camaçari from a 100% tax exemption as of December 31, 2006 to a 75% tax discount as of January 1, 2007. See Item 4.B. Information on the Company Business Overview Petrochemicals and Chemicals Oxiteno Tax exemption status.

Minority interest/equity in earnings of affiliates. Minority interest and equity in earnings of affiliates was R\$100.4 million for the year ended December 31, 2007, compared to R\$4.3 million for the year ended December 31, 2006. This increase reflects the addition of Ipiranga's minority interest prior to the Share Exchanges in December 2007, when RIPI, DPPI and CBPI became Ultrapar's wholly owned subsidiaries. Since October 2007, minority interest has returned to its 2006 level.

Net income. As a result of the foregoing, net income for the year ended December 31, 2007 was R\$181.9 million, a decrease of 36% compared to R\$282.1 million for the year ended December 31, 2006, primarily due to increased indebtedness and minority interests related to the Ipiranga Acquisition.

Adjusted EBITDA. Adjusted EBITDA increased by 51% to R\$779.4 million for the year ended December 31, 2007 from R\$516.2 million for the year ended December 31, 2006, due to the inclusion of Ipiranga's adjusted EBITDA as of April 2007.

Table of Contents

Ultragaz reported adjusted EBITDA of R\$251.7 million for the year ended December 31, 2007, a 10% decrease compared to 2006, primarily due to increased competition in the Brazilian LPG market in the second half of 2007. Ipiranga's adjusted EBITDA totaled R\$419.7 million for the year ended December 31, 2007, a 20% increase compared to 2006, due to (i) increased sales volume, (ii) favorable regulatory changes and (iii) the effects of a record high sugar-cane harvest in 2007. Oxiteno's adjusted EBITDA totaled R\$154.8 million for the year ended December 31, 2007, a 19% decrease compared to 2006, as a result of a 10% appreciation of the Brazilian real and an increase in the cost of raw materials, particularly ethylene. Ultracargo reported adjusted EBITDA of R\$43.0 million for the year ended December 31, 2007, a 13% increase compared to R\$38.0 million in 2006, as result of increased storage operations.

Year ended December 31, 2006 compared to the year ended December 31, 2005.

The following table shows a summary of our results of operations for the years ended December 31, 2006 and 2005:

	Year ended December 31, 2006	Percentage of net sales and services (in millions of reais, except percentages)	Year ended December 31, 2005	Percentage of net sales and services	Percent change
Net sales and services	4,794.1	100%	4,693.8	100%	2%
Cost of sales and services	(3,859.9)	81%	(3,783.4)	81%	2%
Gross profit	934.2	19%	910.4	19%	3%
Selling, general and administrative expenses	(605.1)	13%	(551.7)	12%	10%
Other operating income (expense), net	1.3	0%	(0.4)	0%	425%
Operating income before financial items	330.4	7%	358.3	8%	(8)%
Financial income (expense), net	30.6	1%	(27.3)	1%	212%
Non-operating income (expense), net	(18.5)	0%	(1.8)	0%	928%
Income and social contribution taxes	(56.1)	1%	(28.8)	1%	95%
Minority interest/equity in earnings of affiliates	(4.3)	0%	(1.2)	0%	258%
Net income	282.1	6%	299.2	6%	(6)%
Adjusted EBITDA(1)	516.2	11%	546.0	12%	(5)%

(1) See footnote 7 under Item 3.A. Key Information Selected Consolidated Financial Data for additional discussion of adjusted EBITDA and its reconciliation to other information in our financial statements.

Net sales and services. Net sales and services for the year ended December 31, 2006 increased by 2% to R\$4,794.1 million from R\$4,693.8 million for the year ended December 31, 2005.

The following table illustrates the change in sales in each of our segments:

	Year ended December 31, 2006	Year ended December 31, 2005	Percent change (in millions of reais)
Ultragaz	3,066.9	2,902.4	6%
Oxiteno	1,549.5	1,610.1	(4)%
Ultracargo	226.1	234.2	(3)%

Ultragaz net sales and services increased by 6% to R\$3,066.9 million for the year ended December 31, 2006 compared to R\$2,902.4 million for the year ended December 31, 2005. The increase in net sales was driven by the 1% growth in sales volume, a more favorable market and the benefits derived from a distribution program review at Ultragaz. During 2006 Ultragaz implemented a

Table of Contents

series of initiatives aimed at improving its profitability, including the redesign of its distribution structure in order to optimize its logistics assets, the implementation of new tools for sales channels management and the closing of certain facilities, among others.

Oxitenó's net sales and services decreased 4% to R\$1,549.5 million for the year ended December 31, 2006 compared to R\$1,610.1 million for the year ended December 31, 2005. The decrease in Oxitenó's net sales and services was mainly due to the 8.7% appreciation of the Brazilian *real* against the U.S. dollar in 2006 compared to 2005, since prices at Oxitenó are benchmarked to prices prevailing in international markets. The appreciation of the *real* was partially offset by the 4% increase in volume sold and by an improvement in Oxitenó's sales mix, with increased proportion of sales volume (i) of specialty chemicals, which are higher added value products, and (ii) in the domestic market.

Ultracargo's net sales and services decreased 3% to R\$226.1 million for the year ended December 31, 2006, compared to R\$234.2 million for the year ended December 31, 2005. Although the effective storage levels in the liquid and gas segments were 8% higher than in 2005 as a result of the consolidation of the company's operations at the Santos Terminal TIS, the total kilometrage traveled was 19% lower than that in 2005 due to a restructuring of the company's customer portfolio in the transport segment, which focused on services with a higher aggregate value.

Cost of sales and services. Cost of sales and services increased by 2% to R\$3,859.9 million for the year ended December 31, 2006, compared to R\$3,783.4 million for the year ended December 31, 2005.

Ultragaz's cost of sales and services increased by 2% to R\$2,572.6 million for the year ended December 31, 2006 compared to R\$2,530.8 million for the year ended December 31, 2005, mainly due to higher sales volume.

Oxitenó's cost of sales and services increased by 4% to R\$1,192.4 million for the year ended December 31, 2006 compared to R\$1,150.7 million for the year ended December 31, 2005. This increase was mainly due to an 18% increase in the dollar cost of ethylene, its main raw material, and a 4% increase in sales volume, which were partly offset by the appreciation of the *real* against the U.S. dollar.

Ultracargo's cost of sales and services decreased by 7% to R\$143.6 million for the year ended December 31, 2006 from R\$154.9 million for the year ended December 31, 2005. This decrease was a result of the reduction in the company's transport operations.

Gross profit. Gross profit increased by 3% to R\$934.2 million for the year ended December 31, 2006 compared to R\$910.4 million for the year ended December 31, 2005. Ultragaz's gross profit was R\$494.3 million for the year ended December 31, 2006, a 33% increase compared to R\$371.6 million for the year ended December 31, 2005. Oxitenó's gross profit was R\$357.1 million for the year ended December 31, 2006, a 22% decrease compared to R\$459.4 million for the year ended December 31, 2005. Ultracargo's gross profit was R\$82.5 million for the year ended December 31, 2006, a 4% increase compared with R\$79.3 million for the year ended December 31, 2005.

Selling, general and administrative expenses. Our selling, general and administrative expenses increased by 10% to R\$605.1 million for the year ended December 31, 2006 from R\$551.7 million for the year ended December 31, 2005.

Ultragaz's selling, general and administrative expenses increased by 12% to R\$327.0 million for the year ended December 31, 2006 compared to R\$291.9 million for the year ended December 31, 2005. This increase reflects (i) salary increases as a result of the annual collective wage agreement and (ii) an increase in variable remuneration and profit sharing, reflecting the improvement in the company's results.

Oxitenó's selling, general and administrative expenses increased by 4% to R\$212.2 million for the year ended December 31, 2006 compared to R\$203.3 million for the year ended December 31, 2005, principally due to (i) an increase in volume sold, (ii) salary increases as a result of the annual collective wage agreement, and (iii) an increase in expenses at Oxitenó Mexico, which presented a 49% increase in volume sold in 2006.

Ultracargo's selling, general and administrative expenses increased by 15% to R\$71.0 million for the year ended December 31, 2006 compared to R\$61.9 million for the year ended December 31, 2005, principally due to salary increases as a result of the annual collective wage agreement, in addition to extraordinary expenses related to the downsizing of the workforce during the second half of 2006 due to the restructuring in operations in the transport segment.

Table of Contents

Operating income before financial items. Operating income before financial items decreased by 8% to R\$330.4 million for the year ended December 31, 2006 compared to R\$358.3 million for the year ended December 31, 2005. Ultragas' operating income before financial items for the year ended December 31, 2006 was R\$167.3 million, a 115% increase compared to R\$77.8 million compared to the year ended December 31, 2005. Oxiteno's operating income before financial items was R\$146.3 million for the year ended December 31, 2006, a 43% decrease compared to R\$257.9 million for the year ended December 31, 2005. Ultracargo's operating income before financial items was R\$11.4 million for the year ended December 31, 2006, a 34% decrease compared to the R\$17.2 million for the year ended December 31, 2005.

Financial income (expense), net. We reported net financial income of R\$30.6 million for the year ended December 31, 2006, compared to a net financial expense of R\$27.3 million for the year ended December 31, 2005. The R\$57.9 million improvement was principally due to the non-recurring revenues of R\$49.7 million as a result of favorable outcomes of lawsuits related to the payment of PIS and COFINS taxes by the company's subsidiaries Oxiteno Nordeste, Oxiteno S.A., Companhia Ultragas, Transultra and Ultracargo. Through its subsidiaries, Ultrapar had filed lawsuits questioning the levy of PIS and COFINS taxes on sources of income other than revenues. The Federal Supreme Court ruled in favor of Ultrapar, resulting in the addition of R\$49.7 million to the company's financial income in 2006. Ultrapar has other subsidiaries that are also appealing the levying of these taxes, which have yet to be ruled on. See Note 15 and 19(a) to our consolidated financial statements for more information.

As of December 31, 2006, we had a net cash position of R\$120.7 million and a net foreign exchange rate exposure of R\$(3.9) million. As of December 31, 2006 our total debt denominated in foreign currency was R\$901.0 million, including pre-export finance contracts and import payables. At the same date our total asset position in foreign currency was R\$897.1 million, composed of investments indexed to U.S. dollars and swap instruments used to manage fluctuations of exchange rates and foreign currency receivables exposures. See footnote 8 under Item 3.A. Key Information Selected Consolidated Financial Data for a more complete discussion of net cash (debt) and its reconciliation to information in our financial statements.

Non-operating income (expense), net. We reported a net non-operating expense of R\$18.5 million for the year ended December 31, 2006 compared to a net non-operating expense of R\$1.8 million for the year ended December 31, 2005. This net expense is primarily attributable to (i) the write-off of deferred assets related to studies and projects in the amount of R\$13.7 million, and (ii) the result on the sale of property, plant and equipment, mainly gas cylinders and vehicles, and allowance for losses of investments in the amount of R\$4.8 million.

Income and social contribution taxes. Income and social contribution tax expenses amounted to R\$56.1 million for the year ended December 31, 2006, an increase of 95% from R\$28.8 million for the year ended December 31, 2005. This increase is primarily due to higher pre-tax profit for Ultragas, which is subject to greater tax rates than Oxiteno and Ultracargo, and a decrease in non-taxable revenues.

Minority interest/equity in earnings of affiliates. Minority interest and equity in earnings of affiliates was R\$4.3 million for the year ended December 31, 2006, compared to R\$1.2 million for the year ended December 31, 2005. Minority interest reflects our remaining minority stakes in certain subsidiaries, such as Utingás Armazenadora S.A. and Cia. Ultragas S.A., which are not wholly owned by us.

Net income. As a result of the foregoing, net income for the year ended December 31, 2006 was R\$282.1 million, a decrease of 6% compared to R\$299.2 million for the year ended December 31, 2005.

Adjusted EBITDA. Adjusted EBITDA decreased by 5% to R\$516.2 million for the year ended December 31, 2006, from R\$546.0 million for the year ended December 31, 2005. Ultragas reported adjusted EBITDA of R\$280.5 million for the year ended December 31, 2006, a 44% increase compared to 2005, primarily due to benefits coming from the company's distribution structure review and the improvement in the Brazilian LPG market. Oxiteno's adjusted EBITDA amounted to R\$191.6 million for the year ended December 31, 2006, a 36% decrease compared to 2005. This decrease was principally attributable to (i) the appreciation of the real and (ii) the increase in the cost of raw materials, especially ethylene, driven by higher oil prices. Ultracargo reported adjusted EBITDA of R\$38.0 million for the year ended December 31, 2006, a 14% decrease compared to R\$44.3 million in 2005, principally as a result of extraordinary costs and expenses as a result of discontinuing certain transport operations with lower aggregate value. See footnote 7 under Item 3.A. Key Information Selected Consolidated Financial Data for a more complete discussion of adjusted EBITDA and its reconciliation to information in our consolidated financial statements.

Table of Contents

B. Liquidity and Capital Resources

Our principal sources of liquidity are cash generated from operations and financing. We believe that these sources will continue to be sufficient to satisfy our current funding requirements, which include, but are not limited to, working capital, capital expenditures, amortization of debt and payment of dividends.

From time to time, we examine the opportunities for acquisitions and investments. We consider different types of investments, either direct or through subsidiaries, joint ventures, or affiliated companies. We finance such investments using cash generated from our operations, through funding raised in the capital markets, through capital increases or through a combination of these methods.

Sources and uses of funds

Net cash flow from operations was R\$468.2 million, R\$384.3 million and R\$410.0 million for 2007, 2006 and 2005, respectively. Our cash flow from operations increased by R\$83.9 million in 2007 compared to 2006, mainly reflecting an increase in our cash flows from operations due to the Ipiranga Acquisition in 2007 and decreased by R\$25.7 million in 2006 compared to 2005, mainly reflecting a decrease in our net income from 2005 to 2006. Net cash flow from financing activities totaled R\$1,061.7 million, R\$(183.6) million and R\$762.0 million in the years ended December 31, 2007, 2006 and 2005, respectively, reflecting an increase in 2007 due to the issuance of R\$889 million in debentures to finance the acquisition of shares of RIPI, DPPI and CBPI from the Key Shareholders and remaining minority voting common shareholders as part of the Ipiranga Acquisition. See Item 4.A. Information on the Company History and Development of the Company Description of the Acquisition of the Ipiranga Group. The decrease in cash flow from financing activities in 2006 compared to 2005 reflects no major debt issuances in 2006.

Investing activities used cash of R\$999.4 million, R\$915.5 million and R\$676.3 million in the years ended December 31, 2007, 2006 and 2005, respectively. Acquisitions of property, plants and equipment and additions to intangible assets and deferred charges used R\$728.4 million, R\$339.6 million and R\$230.7 million in 2007, 2006 and 2005, respectively. For the year ended December 31, 2007, investing activities were mainly composed of fixed asset modernization, expansion of production capacity for specialty chemicals and investments made in Ipiranga's operations related primarily to the addition of property, plants and equipment, expansion and renewal of our service stations network and leased equipment.

In addition to investing in the organic growth of its operations, in 2007 Ultrapar invested R\$1,889 million in acquisitions, mostly for the Ipiranga Acquisition. Besides the Ipiranga Acquisition, we made smaller acquisitions during the period presented in this annual report, such as the acquisitions of Arch Química Andina, Unión Química and Petrolog, which are currently reflected in our results from operations and financial condition. None of these acquisitions, except for Ipiranga, is significant as defined in Rule 11-01(b) of Regulation S-X of the Securities Act of 1933, as amended. For more information on our investments and capital expenditures, see Item 5.B. Operating and Financial Review and Prospects Liquidity and Capital Resources Investments.

We believe we have sufficient working capital for our present requirements. We have R\$1,903.4 million in debt maturing from January 2008 through December 2008. Additionally we have an R\$839 million capital expenditures budget for 2008.

As of December 2007, we had R\$1,828.5 million in cash, cash equivalents, short-and long-term investments. Additionally, as of December 31, 2007 we had R\$1.7 billion in short-term receivables due to the Ipiranga Acquisition, which was paid in the beginning of 2008. See Item 4.A. Information on the Company History and Development of the Company Description of the Acquisition of the Ipiranga Group .

Table of Contents

We anticipate that we will spend approximately R\$5.4 billion in the next five years to meet long-term contractual obligations described in the Tabular Disclosure of Contractual Obligations below and budgeted capital expenditures. We expect to meet these cash requirements through a combination of cash generated from operating activities and cash generated by financing activities, including new debt financing and the refinancing of some of our indebtedness as it becomes due.

Indebtedness

As of December 31, 2007, our consolidated short-and long-term debt was as follows:

Indebtedness	Currency	Interest Rate(1)	Principal amount of outstanding and accrued interest through December 31, 2007 2006 2005		
			(in millions of reais)		
Foreign currency-denominated loans:					
Syndicated loan	US\$	5.05%	106.4	128.5	140.6
Notes due in 2008	US\$	9.88%	106.8		
Notes due in 2015	US\$	7.25%	443.7	535.6	586.5
Notes due in 2020	US\$	9.00%	106.6	128.7	
Export prepayment(2)	US\$	6.20%	3.1	11.1	44.9
Advances on Foreign Exchange Contracts	US\$	5.95% to 6.50%	132.1	1.3	9.8
BNDES National Bank for Economic and Social Development	UMBNDDES(3)	10.75%	6.0	12.9	22.3
BNDES National Bank for Economic and Social Development	US\$	7.76% to 10.91%	16.0	10.1	0.3
Financing of Inventories and Property Plant & Equipment (Oxiteno Mexico)	MX\$(4)	TIIE(4) + 1.10% to 2.0%	19.6	14.4	11.0
Financing of Inventories and Property Plant & Equipment (Oxiteno Mexico)	US\$	LIBOR + 1.0% to 3.5%	9.6		
Working capital loan	MX\$(4)	TIIE(4) + 1.0%	3.5	1.4	0.4
Foreign Financing	US\$	LIBOR + 2.0%	21.7	26.2	28.5
FINIMP (7)	US\$	6.54%	13.2		
Real-denominated loans:					
BNDES-National Bank for Economic and Social Development	R\$	TJLP(5) + 1.8% to 4.85%	256.0	199.9	173.0
BNDES-National Bank for Economic and Social Development	R\$	IGPM(6) + 6.5%	2.5	7.0	11.2

Total loans			3,177.8	1,497.4	1,432.4
Unrealized losses on swaps transactions			84.8	52.3	48.1
Total			3,262.6	1,549.7	1,480.5

(1) Interest rate only as of 2007.

(2) Net of linked operations.

(3) UMBNDES is based on the average currency basket of the BNDES. The currency basket is a composition of all BNDES foreign currency debts.

(4) MX\$ is the Mexican currency and TIIE is the Mexican interbank interest rate.

(5) TJLP (Long-Term Interest Rate) is a nominal rate of interest established quarterly. On December 31, 2007, TJLP was fixed at 6.25% p.a.

(6) IGPM is the General Market Price Index in Brazil.

(7)

Edgar Filing: ULTRAPAR HOLDINGS INC - Form 20-F

FINIMP is a short term loan used to finance the importation of general goods (whereby exporters receive payment immediately and importers pay the lender at the end of the loan term). The duration of these loans are generally one month.

(8) FNE is Financing of Northeast Fund

Table of Contents

Our consolidated debt as of December 31, 2007 had the following maturity schedule:

Maturity	Amount (in millions of reais)
January 1, 2008 to December 31, 2008	1,903.4
January 1, 2009 to December 31, 2009	282.4
January 1, 2010 to December 31, 2010	204.0
January 1, 2011 to December 31, 2011	182.1
January 1, 2012 to December 31, 2012	55.7
Thereafter	635.0
Total	3,262.6

As of December 31, 2007, R\$63.0 million of our consolidated debt was secured by property, plant and equipment, R\$2.5 million was secured by shares of affiliated companies and by guarantees provided by minority shareholders. As of December 31, 2007, we guaranteed a portion of our subsidiaries' indebtedness in the amount of R\$986.2 million.

Ultragaz notes. In June 1997, Ultragaz issued US\$60 million in notes (the "Original Notes") maturing in 2005. In June 2005, maturity was extended to June 2020, with put/call options in June 2008.

In June 2005, Oxiteno's subsidiary Oxiteno Overseas Corp., or Oxiteno Overseas, acquired the full amount of Original Notes issued by Ultragaz, with funds from a syndicated loan in the amount of US\$60 million with maturity in June 2008 and interest rate of 5.05% per year. The syndicated loan was guaranteed by the Company and the subsidiary Oxiteno.

In April 2006, Oxiteno Overseas sold the Original Notes to a financial institution. Concurrently, the subsidiary acquired from this financial institution a credit linked note backed by the Original Notes, as mentioned in Note 15 to our consolidated financial statements, thus obtaining an additional return on this investment. The transaction matures in 2020, and either Oxiteno or the financial institution may redeem it early, although the subsidiary has only an annual option of redemption (purchase) from June 2008 onward. In the event of insolvency of the financial institution, Ultragaz would be required to settle the Original Notes, although Oxiteno Overseas would continue to be creditor of the credit linked note. Thus, the Company is no longer eliminating the Original Notes from its financial statements.

LPG International Notes. In December 2005, Ultragaz's subsidiary, LPG International Inc., issued notes in the amount of US\$250 million, maturing in December 2015, with annual interest rate of 7.25% paid semiannually, with the first payment made in June 2006. The issue price was 98.75% of the notes' face value, which represented a total yield for investors of 7.429% per year upon issuance. The notes were guaranteed by the Company and Oxiteno. The proceeds from these notes will be used to refinance existing debt obligations, extend maturities, fund potential and for general corporate purposes.

As a result of the issuance these notes and the syndicated loan, the Company and its subsidiaries mentioned above are subject to covenants that, among other things:

limit transactions with shareholders that hold 5% or more of any class of Capital Stock of the Company, except upon fair and reasonable terms no less favorable to the Company than could be obtained in a comparable arm's-length transaction with a third-party;

require board approval for transactions with related parties totaling more than US\$15 million (except transactions with or between subsidiaries);

restrict the sale of all or substantially all assets of the Company and its subsidiaries;

Table of Contents

restrict encumbrances on assets in excess of US\$150 million or 15% of the value of consolidated tangible assets;

require us to maintain a ratio between consolidated net debt and consolidated EBITDA (Earnings Before Interest, Taxes, Depreciation and Amortization) of no more than 3.5; and

require us to maintain a ratio between consolidated EBITDA and consolidated net financial expenses of at least 1.5.

The restrictions imposed on the Company and its subsidiaries are customary for transactions of this nature and have not limited their abilities to conduct their businesses to date.

Debentures. To finance part of the Ipiranga Acquisition, in April 2007, we issued debentures in the aggregate principal amount of R\$889.0 million, in two series. The first series was issued on April 11, 2007, in the amount of R\$675.0 million. The second series was issued on October 22, 2007 in the amount of R\$214.0 million. The debentures have a term of one year from the issuance date and a coupon rate of 102.5% of CDI. In the first quarter of 2008 Ultrapar redeemed these debentures. See Item 4.A. Information on the Company History and Development of the Company Recent Developments.

CBPI Notes. On August 1, 2003, CBPI issued US\$135 million in notes in the international market. Part of these notes were redeemed in 2005 and 2006, in the amounts of US\$1.3 million (R\$3.1 million) and US\$79.6 million (R\$164.9 million), respectively. See Item 5.B. Operating and Financial Review and Prospects Operating and Financial Results Liquidity and Capital Reserves Indebtedness and Item 5.F. Operating and Financial Review and Prospects Tabular Disclosure of Contractual Obligations.

CBPI Debentures. On April 18, 2006, CBPI registered with the CVM a public offering of 35,000 subordinated debentures, single series and non-convertible into shares, in the total amount of R\$350 million, maturing on April 1, 2011 at a rate of 103.8% of CDI. In the first quarter of 2008 CBPI redeemed these debentures. See Item 4.A. Information on the Company History and Development of the Company Recent Developments.

Investments**Equity investments**

The table below shows our investments in shareholding stakes for the years ended December 31, 2007, 2006 and 2005. For more details on these acquisitions see Item 4.A. Key Information History and Development of the Company Investments.

Company	Year ended December 31,		
	2007	2006	2005
	(in millions of reais)		
Ultragas	0.1	0.1	
Ipiranga			
Oxiteno	22.7	0.1	
Ultracargo	8.1		
Others (1)(2)	1,883.1	1.1	
Total	1,914.0	1.3	

(1) Investments made in connection with the Ipiranga Acquisition. See Item 4.A. Information on the Company History and Development of the Company Description of the Acquisition of the Ipiranga Group.

(2) Share repurchase program included in our consolidated statement of cash flows under Cash flows from financing activities Other.

Table of Contents**Investments in permanent assets and deferred charges**

The following table sets forth our investments in permanent assets and deferred charges for the years ended December 31, 2007, 2006 and 2005.

	Year ended December 31		
	2007	2006	2005
	(in millions of reais)		
Ultragaz	128.9	104.8	83.0
Ipiranga(1)	143.6	n.a.	n.a.
Oxitenó	453.0	178.4	93.7
Ultracargo	44.2	34.5	41.4
Others(2)	3.4	1.2	0.6
Total capital expenditures, net of disposals	773.2	318.9	218.7

(1) Includes financing and bonuses to our resellers, net of repayments, and assets acquired through leasing operations. Bonuses are lump sum payments made by distributors to resellers. Resellers typically use these payments to improve their facilities or to invest in working capital. Financing and bonuses for clients are included under working capital in the cash flow statement.

(2) Includes expenditures related to maintenance of our headquarters which is performed by our wholly owned subsidiary Imaven Imóveis e Agropecuária Ltda.

At Ultragaz, our investment strategy has been to expand the small bulk delivery distribution, enhance our assets and to consolidate our geographic coverage. During the years ended December 31, 2007, 2006 and 2005, investments focused on expanding the small bulk market segment (UltraSystem), on fleet renewal and on the purchase and replacement of cylinders.

At Ipiranga investments were allocated to the expansion of the service station network, renewal of contracts and improvement in fuel service stations and distribution facilities, as well as to investments related to information technology.

At Oxitenó, during the years ended December 31, 2007, 2006 and 2005, capital expenditures were largely focused on increasing installed production capacity of specialty chemicals, in particular the construction of fatty alcohols plant in Camaçari, the expansion of production capacity of ethylene oxide at Mauá, the modernization of industrial plants, and the development of new products.

At Ultracargo, during 2007 we have invested in the expansion of the Aratu terminal (Bahia) and in the maintenance of other terminals. For the years ended December 31, 2006 and 2005, Ultracargo's capital expenditures focused on expanding the Suape terminal, the construction of the Santos terminal, the maintenance of our existing storage facilities and on fleet expansion.

The investment plan for 2008, excluding acquisitions, totalling R\$839 million, R\$140 million to be invested in Ultragaz, R\$171 million in Ipiranga, R\$479 million in Oxitenó and R\$48 million in Ultracargo. At Ultragaz, investments are expected to primarily involve the expansion of the bulk LPG distribution (UltraSystem) and the strengthening of the company's operations in the North and Northeast of Brazil. At Ipiranga the investments are expected to be made mainly in expanding the company's service station network and carrying out operational improvements. Planned investments at Oxitenó are expected to include: (i) the completion of the fatty alcohols plant, (ii) the conclusion of the expansion of ethylene oxide production capacity at Mauá and the expansion at Camaçari and (iii) the expansion of our specialty chemicals production capacity. At Ultracargo, investments will be made in the expansion of our terminals and in-house logistics operations.

Table of Contents

U.S. GAAP reconciliation

Our net income under Brazilian GAAP was R\$181.9, R\$282.1 million and R\$299.2 million for the years ended December 31, 2007, 2006 and 2005, respectively. Under U.S. GAAP, we had net income of R\$217.5, R\$280.5 million and R\$288.9 million, respectively, for the years ended December 31, 2007, 2006 and 2005.

Our shareholders' equity under Brazilian GAAP as of December 31, 2007 and 2006 was R\$4,600.9 million and R\$1,933.5 million, respectively. Under U.S. GAAP, we had shareholders' equity of R\$4,642.4 and R\$1,872.9 million, respectively, as of December 31, 2007 and 2006. Shareholders' equity and net income in 2004 and 2005 were retroactively adjusted to reflect changes in accounting policies as from January 2006. See Item 5.A. Operating and Financial Review and Prospects' Operating Results' Critical Accounting Policies and Estimates' and Note 25 I(r) to our consolidated financial statements for more information regarding these changes in accounting policies.

The principal differences between Brazilian GAAP and U.S. GAAP that affect our net income and shareholders' equity relate to the treatment of the following items:

assets retirement obligation;

pension plan;

lease contracts;

accounting for refunds;

capitalized interest;

fixed assets revaluation reversal;

reversal of deferred charges;

restatement of property, plants and equipment to adjust for the effects of inflation between January 1, 1996 and December 31, 1997, and its respective depreciation, not required by Brazilian GAAP;

differences in equity accounting;

differences in goodwill accounting;

securities available for sale;

purchase value adjustments relating to business combinations (including the 2002 corporate restructuring);

fair value adjustments of derivatives; and

deferred tax effects on the foregoing adjustments.

See Note 25 to our consolidated financial statements for a description of the differences above as they relate to us and a reconciliation to U.S. GAAP of net income and total shareholders' equity.

C. Research and Development, Patents and Licenses, etc.

Oxiteno carries on a wide range of research and development activities, principally related to the application of specialty chemicals and improvements in production processes. As of December 31, 2007, 113 employees of Oxiteno were engaged in research and development and engineering activities. Oxiteno's research and development expenditures in 2007, 2006 and 2005 were R\$19.4 million, R\$18.4 million and R\$17.4 million, respectively. In 2004, Oxiteno founded its own Science and Technology Council (the Council) with six of the world's major specialists in surfactants being members. The Council, which first met from December 7 to 10, 2004, analyzed the company's research and development projects portfolio, as well as the methodology used. Many of these recommendations will enable the company to increase its efficiency in research and development, as well as enlarge

Table of Contents

its partnerships with international entities. The Council met again in September 2005, October 2006 and September 2007. In December 2005, Oxiteno signed a contract with PMD – Project Management and Development Co., or PMD, a private Saudi-Arabian company with their head-office in the industrial city of Al Jubail, for the license of technologies for the production of ethanolamines and ethoxylates. The technologies licensed by Oxiteno will be used in the petrochemical complex located in Al Jubail, currently being built by PMD. The plants that will use the Oxiteno technologies will have a production capacity of 100,000 tons/year of ethanolamines and 40,000 tons/year of ethoxylates.

Ipiranga owns the trademark for the brands used in its distribution business, including Ipiranga, Rodo Rede, Jet Oil, Corrida Premiada, Posto 24 Horas, Atlantic, F1 Master, F1 Super, Ipiranga 4x4, Lub Fácil, Sintex, Moldax, Rede Nota Dez, Ipitrust, GP Super DPPISA, Ipicil, Ipiflex, Ipilube, Ipitur, Isa, Marina 2T Plus, among several others. The trademark for Gasolina Original Ipiranga (Original Ipiranga Gasoline) has been requested of the Brazilian government. The trademarks for these brands expire between 2008 and 2016. CBPI also owns a supplying pump fuel and other patents. One of Ipiranga's subsidiaries, am/pm Comestíveis Ltda., is the franchisor of the am/pm brand in Brazil.

D. Trend Information

LPG business

Between 2003 and the end of 2007, LPG prices charged to LPG distributors in Brazil have been stable, despite increases in oil and LPG prices in the international markets. However, appreciation of the *real* compared to the U.S. dollar has partially offset the increase in international LPG prices, decreasing the difference between LPG prices in Brazil and in the international markets. We cannot guarantee that this trend will continue. Any sharp increase in LPG prices charged to LPG distributors could have an impact on Ultragas's results if it is unable to pass on such cost increase to its customers.

In 2006, the Bolivian Federal Government announced the nationalization of its natural gas reserves, for which one of our products, LPG, is a suitable substitute in the bulk segment. This announcement created uncertainties related to the supply of natural gas in Brazil given that a significant portion of the natural gas consumed in Brazil is supplied by Bolivia. Uncertainties regarding natural gas supply in Brazil have positively influenced the Brazilian LPG market such that bulk clients are reconsidering switching from LPG to natural gas as an energy source. A shortage in natural gas supply in Brazil could have a positive influence on Brazilian LPG market demand, thus increasing the volume Ultragas sells in the future, even though there is no assurance this will actually happen.

Chemical and petrochemical business

Oxiteno's revenues in 2007 were negatively impacted by the appreciation of the *real* against the U.S. dollar that has persisted since 2003, as a large portion of Oxiteno's product prices are linked to the U.S. dollar. See Item 3.A. Key Information – Selected Consolidated Financial Data Exchange Rates. The continuation of a significant appreciation of the *real* compared to the U.S. dollar could have a negative impact on Oxiteno's revenues in the future. Oxiteno's main raw material is the ethylene, which is produced from naphtha in Brazil. Naphtha prices in Brazil fluctuate with oil prices, which recently sharply increased in the international markets and impacted Oxiteno's costs. We cannot predict whether oil and ethylene prices will continue to increase. An increase in ethylene prices could have a negative impact on Oxiteno's results of operations if Oxiteno is not able to pass on cost increases to its customers.

Brazilian fuel consumption

Recent economic indicators published by IBGE have shown a decrease in unemployment levels. IBGE indicators have also shown an improvement in the Brazilian economy, with GDP having increased by 5.4% in 2007 from 2006. This, together with greater availability of credit, has resulted in record levels of vehicle sales. Despite record car sales, however, Brazil's current fleet is small compared to other Latin American countries, with 8 inhabitants per

Table of Contents

vehicle, whereas Argentina and Mexico have 5 inhabitants per vehicle, according to ANFAVEA. Based on the current expansion in the economy and credit availability, together with the low ratio of inhabitants per vehicle, Ultrapar believes the outlook for increased Brazilian fuels consumption will be positive for the coming years. The increase in fuels consumption could have a positive effect on the future volume sold by the company, but we cannot guarantee that this trend will continue.

E. Off Balance Sheet Arrangements

Our subsidiaries have provided guarantees to financial institutions related to amounts owed to those institutions by certain of their customers (vendor financing). The guarantees have a term of up to 213 days and are equal to the terms of the related financing arrangements. There exists no recourse provision that would enable us or our subsidiaries to recover any amount paid to the financial institutions under these guarantees. In the event that the financial institutions exercise these guarantees, we are entitled to recover the amount paid directly from our customers under the vendor contracts. At December 31, 2007, the maximum potential payment under these guarantees totaled R\$21.6 million, which represented a R\$13.3 million decrease over December 31, 2006. At December 31, 2007, in accordance with Brazilian GAAP, we did not record any liability on our consolidated financial statements related to these guarantees.

Moreover, as of December 31, 2007, Ipiranga was party to leasing contracts, mainly related to the acquisition of equipment, such as tanks, pumps and compressors in the total amount of R\$17.7 million. The durations of the contracts range from 36 to 48 months. See Note 20 (d) to our consolidated financial statements for more details on leasing agreements.

Table of Contents**F. Tabular Disclosure of Contractual Obligations**

The following table summarizes our contractual obligations, as of December 31, 2007:

Contractual obligations	Total	Payment due by period			More than 5 years
		Up to 1 year	Between 1 and 3 years	Between 3 and 5 years	
			(in millions of reais)		
Financing	3,262.6	1,903.4	486.4	237.8	635.0
Estimated interest payments on financing(1)(2)	801.7	237.3	214.4	130.6	219.5
Estimated planned funding of pension and other postretirement benefit obligations Ultraprev(1)	189.0	5.7	12.3	13.6	157.4
Purchase obligations(3)	3,852.6	232.4	501.5	544.3	2,574.4
Operating leases(4)	85.8	5.6	11.2	11.2	57.8
Ipiranga's Estimated planned funding of pension and other postretirement benefit obligations(5) Fundação Martins Bastos	168.2	6.5	14.0	15.4	132.3
Financial leases(6)	17.7	7.7	10.0		
Royalties(7)	4.3	0.6	1.2	1.2	1.2
Total contractual obligations	8,381.9	2,399.2	1,251.0	954.1	3,777.6

- (1) The estimated interest payment amount was calculated based on macro-economic assumptions including, on average for the period, principally (i) a 11% CDI interest rate, (ii) a 2% variation in the *reais* to U.S. dollar exchange rate, (iii) a 2% inflation rate, and (iv) an 6% TJLP rate. See Item 5.B. Operating and Financial Review and Prospect Liquidity and Capital Resources Indebtedness and Note 14 to our consolidated financial statements for more information about the maturity of our debt and applicable interest rates. See Note 14 and Note 25 V (e) to our consolidated financial statements for more information on the maturity and the fair value of our swap agreements. See Note 24 to our consolidated financial statements for more information relating to our estimated planned funding of pensions and other post-retirement benefit obligations.
- (2) Includes estimated interest payments on our short- and long-term debt.
- (3) The purchase obligation relates to a long-term contract with Braskem under which we are committed to purchase a minimum quantity ethylene annually. In the event that this commitment is not met, we are obliged to pay a fine of a maximum of 40% of the annual ethylene volume, multiplied by the price of ethylene. This contract does not establish the price of ethylene and for this reason the amount in *reais* is based on the purchase price as at December 31, 2007. On August 16, 2006, Oxiteno signed a memorandum of understanding, altering the ethylene supply contract with Braskem S.A. described above. The memorandum of understanding regulates new conditions of ethylene supply through 2021, and in 2007 and 2008, Oxiteno is receiving an increased volume of ethylene, with the minimum quantity in tons increasing to 180 thousand and 190 thousand, respectively. The new condition provided for in the memorandum of understanding is reflected in the minimum purchase commitments discussed in the table above.
- (4) Our subsidiary company Terminal Químico de Aratu S.A. Indústria e Comércio has contracts with CODEBA Companhia Docas do Estado da Bahia, and Complexo Industrial Portuário Governador Eraldo Gueiros, in connection with its port facilities in Aratu and Suape, respectively. Such contracts establish a minimum cargo movement of products of 1,000,000 tons per year in Aratu, effective through 2022 and 250,000 tons per year in Suape, effective through 2027. If the annual movement is less than the minimum contractual movement, the subsidiary is liable to pay the difference between the effective movement and the minimum contractual movement based on the port tariff rates on the date established for payment. As of December 31, 2007, these rates were R\$4.59 for Aratu and R\$3.97 for Suape. The Company has been in compliance with the minimum movement of products since the inception of the contracts.
- (5) See Note 24 to our consolidated financial statements for more information regarding Ipiranga's estimated planned funding of pensions and other post-retirement benefit obligations.

Table of Contents

- (6) On December 31, 2007, CBPI and DPPI were party to lease agreements principally related to fuel distribution equipment, such as tanks, gas pumps and compressors. The terms of these agreements are between 36 and 48 months.
- (7) Corresponds to a franchise contract with am/pm under which Ipiranga is required to pay minimum royalty fees until 2015.

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES**A. Directors and Senior Management**

The following table lists the current members of our Board of Directors and senior management.

Lender	Position	Years with the Company	Age
Board of Directors			
Paulo Guilherme Aguiar Cunha	Chairman	41	68
Lucio de Castro Andrade Filho	Vice Chairman	31	63
Ana Maria Levy Villela Igel	Director	10	65
Renato Ochman	Director	7	48
Nildemar Secches	Director	6	59
Paulo Vieira Belotti	Director	10	76
Olavo Egydio Monteiro de Carvalho	Director	5	66
Luiz Carlos Teixeira	Director		61
Executive Officers			
Pedro Wongtschowski	Chief Executive Officer	30	62
André Covre	Chief Financial and Investor Relations Officer, Ultrapar	4	37
João Benjamin Parolin	Officer, Oxiteno	22	49
Pedro Jorge Filho	Officer, Ultragaz	30	54
Eduardo de Toledo	Officer, Ultracargo	20	43
Leocádio de Almeida Antunes Filho	Officer, Ipiranga	1	57

Summarized below is information regarding the business experience, areas of experience and principal outside business interest of the current members of our Board of Directors and our senior management.

Paulo Guilherme Aguiar Cunha. Mr. Cunha has been the chairman of our board of directors since 1998 and was our Chief Executive Officer until January 2007. Mr. Cunha was also the chief executive officer of Oxiteno from 1981 to 2006 and a member of the board of directors of Monteiro Aranha since 1997. Mr. Cunha joined Ultrapar in 1967 and was appointed vice president in 1973 and chief executive officer in 1981. Mr. Cunha has also been a member of the CMN – National Monetary Council, BNDESPAR, a subsidiary of BNDES, president of the Brazilian Association of Technical Standards – ABNT, and President of IBP, the Brazilian Petroleum Institute. Mr. Cunha is a member of the consulting board of ABIQUIM, the Brazilian Chemical Industry Association, a board member of the Superior Council of Economy and of the Consultative Council for Industry of FIESP, the state of São Paulo Industry Association and ex-President of IEDI – Research Institution for the Industrial Development. Mr. Cunha is also a member of the board of IBMEC Business School and of the board of IPT – Technological Research Institution. Mr. Cunha received a degree in industrial mechanical engineering from PUC – Catholic University in Rio de Janeiro in 1962. Mr. Cunha also was a Professor of Engineering at the Catholic University and at the Federal University of Rio de Janeiro from 1963 to 1966.

Lucio de Castro Andrade Filho. Mr. Andrade Filho is the vice chairman of our board of directors since 1998. He was also vice president of Ultrapar from 1982 to 2006. He joined Ultrapar in 1977. Mr. Andrade Filho has held a number of positions with Ultrapar’s subsidiaries in both the LPG as well as logistics, engineering and chemicals segments. Mr. Andrade Filho is also the chief executive officer of GLP – Qualidade Compartilhada, an LPG industry association and a member of the board of directors of the Brazilian Petroleum Institute (Instituto Brasileiro de Petróleo – IBP). Mr. Andrade Filho received degrees in civil engineering and in administration from Mackenzie University in São Paulo in 1968 and 1972, respectively.

Table of Contents

Ana Maria Levy Villela Igel. Ms. Villela Igel joined us as a member of the board of directors in October 1998. She is also a member of the board of directors of Ultra S.A. since 1988. She has served as a secretary in the finance department at the United Nations and as a counselor for CIEE – Centro de Integração Empresa Escola, an organization which assists students in transitioning to the professional environment, and as a counselor and member of the executive committee of Alumni Association – Bi-National Cultural Center. She is also involved in several organizations that promote social welfare activities for children and the elderly throughout Brazil.

Renato Ochman. Mr. Ochman joined us in April 2001 as a member of the board of directors. Mr. Ochman is a partner in the law firm Carvalho, Eizirik, Ochman and Real Amadeo Advogados Associados S/C and General Secretary of the Chamber of Commerce and Industry of Brazil-Israel. Mr. Ochman is a member of the Youth’s Committee of the United Nations – Brazil, a member of the Board of Grendene and is also a member of the audit committee of the Association for Assistance to Handicapped Infants. Previously, Mr. Ochman taught commercial law at the Fundação Getúlio Vargas and acted as legal counsel for the Brazilian Association of Supermarkets. Mr. Ochman has obtained a law degree from the Catholic University of Rio Grande do Sul and a commercial law masters degree and post-graduate degree from the Catholic University of São Paulo.

Nildemar Secches. Mr. Secches joined us in April 2002 as a member of the board of directors. Mr. Secches is the chief executive officer of Empresas Perdigão since 1995. Mr. Secches is also Chairman of the board of directors of WEG S.A. From 1972 to 1990, Mr. Secches worked for Banco Nacional de Desenvolvimento Econômico e Social – BNDES, serving as an executive officer from 1987 to 1990. From 1990 to 1994, Mr. Secches served as chief executive officer of Grupo Iochpe-Maxion. Mr. Secches was chief executive officer of ABEP – Brazilian Association of Chicken Producers and Exporters and vice-president of ABIPECS – Brazilian Association of Pork Producers and Exporters Industries. Mr. Secches received a degree in mechanical engineering from the University of São Paulo, a master’s degree in finance from Pontifícia Universidade Católica of Rio de Janeiro and a doctoral degree in economics from the University of Campinas (state of São Paulo).

Paulo Vieira Belotti. Mr. Belotti joined us in October 1998 as a member of our board of directors. Mr. Belotti has also served as chief executive officer of several companies including Petrobras Distribuidora S.A., Petrobras Mineração S.A., Petrobras Química S.A., Petrobras Comércio Internacional S.A., Petrobras Fertilizantes S.A. and Norcell S.A. He has also served as a member of the board of directors of Nordon Indústria Metalúrgica S.A. Mr. Belotti received a degree in civil engineering from the National School of Engineering at the University of Brazil, a bachelor’s degree in mathematics from the University of Guanabara and a degree in nuclear engineering from Oak Ridge School of Technology in Tennessee.

Olavo Egidio Monteiro de Carvalho. Mr. Monteiro de Carvalho joined our company in December 2002 as a member of the board of directors. He is chairman of the board of directors of Monteiro Aranha S.A. and a member on the board of Klabin S.A. He is also a member of the Brazil-United States Business Council, member of the Brazil-Japan Conceptual Group and President of Associação Comercial do Rio de Janeiro, a post for which he was reelected in 2007. He holds a mechanical engineering degree from Technische Hochschule in Munich.

Luiz Carlos Teixeira. Mr. Teixeira joined our company in April 2008 as a member of the board of directors. He is an officer of *União Geral de Trabalhadores* of the bank sector, member of the Board of Previ (Pension Fund of Banco do Brasil’s employees) and *Federação Latinoamericana dos Trabalhadores Bancários*. He is also member of the Fiscal Council of *Instituto de Promoção Social – IPROS*. He holds a marketing degree from Escola Superior de Propaganda e Marketing and a master degree in Political and Social Science from Universidade Moura Lacerda.

Pedro Wongtschowski. Mr. Wongtschowski has served as an officer since 1985 and took over the Chief Executive Officer position in January 2007. Mr. Wongtschowski was a member of the board of directors of Ultraprev from 1989 to 2006, and an officer of Oxiteno and Oxiteno Nordeste from 1992 to 2006. Mr. Wongtschowski was employed at our chemical fertilizer company from 1970 until 1972 and rejoined Ultrapar in 1977. Mr. Wongtschowski is a member of the Board of the Brazilian Association for Chemical Engineering, Vice-President of the board of directors of ABIQUIM, Brazilian Chemical Industries Association, and Vice-President of Latin American Petrochemical and Chemical Associations – APLA. Mr. Wongtschowski received a degree in chemical engineering, master’s degree in chemical engineering and a doctoral degree in chemical engineering from the Escola Politécnica da Universidade de São Paulo. Mr. Wongtschowski is the author of the book *Indústria Química – Riscos e Oportunidades (Chemical Industry – Risks and Opportunities)*, published in 2002 (2nd edition).

Table of Contents

André Covre. Mr. Covre joined Ultrapar in 2003 as Corporate Planning and Investor Relations Director. Mr. Covre has been the company's Chief Financial and Investor Relations Officer since March 2007. Mr. Covre has more than 15 years of experience in corporate finance, mergers & acquisitions and capital markets. Mr. Covre began his career with Unisys Corp. in the United States, and was formerly a director of ABN AMRO Capital in Amsterdam, a private equity and venture capital fund. Mr. Covre holds an MBA from INSEAD, in France, and a bachelor degree in government studies from Fundação Getúlio Vargas in São Paulo.

Eduardo de Toledo. Mr. Toledo is an officer of Ultrapar since April 2005. He joined the company in 1987 at Ultrapar controlling area. Mr. Toledo was responsible for the treasury department between 1990 and 1996. From 1996 to 2003, he has held the position of Administrative and Controlling Officer at Oxiteno. Mr. Toledo has been Ultracargo's Chief Operating Officer since 2003. He is also Chairman of the board of directors of Odontoprev S.A. and Member of the Board of Farmasa S.A. He holds Bachelor of Science degrees in Industrial Engineering (Escola Politécnica da Universidade de São Paulo) and Economics (Faculdade de Economia e Administração da Universidade de São Paulo). Mr. Toledo received a degree in the International Executive Program at INSEAD, in Fontainebleau, France in 1995. He taught, for 4 years, the subject of Introduction to Accounting and Expense at Fundação Carlos Alberto Vanzolini Universidade de São Paulo.

João Benjamin Parolin. Mr. Parolin joined the company in 1986, working in Oxiteno's commercial area prior to assuming the position of Oxiteno's Chief Operating Officer. Mr. Parolin formerly served as marketing manager from 1989 to 1992 and sales manager from 1992 to 2000. From 2000 to 2006 he held the Sales Director position at Oxiteno. Prior to joining Oxiteno, he worked in the commercial area at Dow Química S.A. Mr. Parolin received a bachelor degree in chemical engineering from Escola Politécnica da Universidade de São Paulo in 1980, a post-graduation degree in Marketing Administration at Fundação Getúlio Vargas and a master's degree in business administration from Fundação Instituto de Administração Universidade de São Paulo in 2003. As a complement to his academic background he attended the STC Skills, Tools and Competences from Fundação Dom Cabral/J.L Kellogg Graduate School of Management (Northwestern University) in 2000 and the Advanced Management Program at Wharton University in 2005.

Pedro Jorge Filho. Mr. Jorge is an officer of Ultrapar since April 2005. He has been with the company since 1977 and has held a number of positions with the company, including officer at Utingás and Director of Engineering and Marketing at Ultragaz. Mr. Jorge was also responsible for the southeastern and midwest regions. Mr. Jorge Filho became Ultragaz's Chief Operating Officer in 2002. He earned a degree in Industrial and Chemical Engineering from Universidade Mackenzie. He also earned a certificate from the Advanced Management Program at INSEAD, in Fontainebleau, France in 1998, and from the program HR's Contribution to Continuous Improvement at Instituto IESE of Universidade de Navarra, Barcelona, Spain in 1999.

Leocádio de Almeida Antunes Filho. Mr. Antunes is an officer of Ultrapar since May 2008. He has held a number of positions at Ipiranga since 1987 when he joined as Commercial Officer at Fertisul S.A. and Officer at Ipiranga Serrana Fertilizantes S.A. In 1993 he served as an executive officer at CBPI. Currently Mr. Antunes is Ipiranga's Chief Operating Officer and is also Vice-Presidente of SINDICOM. He earned a degree in Economics from Universidade Federal do Rio Grande do Sul and post graduation and a master degree in Agricultural Economics at University of Reading (UK) and University of London, respectively. Furthermore, he has completed the Advanced Executive Program, from J.L. Kellogg Graduate School of Management in Northwestern University, USA.

Table of Contents

B. Compensation

For the year ended December 31, 2007, the aggregate compensation of our directors and executive officers was approximately R\$15.2 million. A portion of such amount is represented by variable compensation, dependent on business performance as measured by metrics such as Economic Value Added (EVA) and adjusted EBITDA. Except for the expenses related to Ultraprev Associação de Previdência Complementar, known as Ultraprev, which manages our pension plan, we have not set aside or accrued any additional amounts for pension, retirement or similar benefits for our directors and executive officers. See Item 6.D. Directors, Senior Management and Employees Employees.

On April 27, 2001, the General Shareholders Meeting approved a plan for granting stock options (The Stock Option Plan) to members of management and employees in executive positions in the Company and its subsidiaries. On November 26, 2003, the Extraordinary General Shareholders Meeting approved certain amendments to the original plan of 2001 (the Deferred Stock Plan). In the Deferred Stock Plan, certain members of management have the voting and economic rights of preferred shares held as treasury stock and the ownership of these shares is retained by Ultrapar. The Deferred Stock Plan provides for the transfer of the ownership of the shares to those eligible members of management after five to ten years from the initial concession of the rights subject to uninterrupted employment of the Deferred Stock Plan participant by the Company during the period. The Board of Directors determines the number of shares to which each eligible participant shall have rights. The total number of shares to be used for the Deferred Stock Plan is subject to the availability in treasury of such shares. It is incumbent on Ultrapar s executive officers to select the members of management eligible for the plan and propose the number of shares in each case for approval by the Board of Directors. As of December 31, 2007, the amount granted to the Company s executives, including tax charges, totaled R\$16.3 million. This amount is amortized over the period of the Plan. The amortization for 2007 amounts to R\$1.3 million and is recorded as an operational expense for 2007.

Some of our executive officers are entitled to receive variable compensation dependent on the performance of our company stock over the course of 5 years, from 2006 to the end of 2011, payable as a cash bonus at the end of such period if the stock price appreciates at a pre-determined level. As of the date of this annual report, no compensation was paid to our executives based on such methodology.

C. Board Practices

We are managed by our board of directors (i.e., Conselho de Administração) and by our executive officers (i.e., Diretoria). Our Board of Directors consists of eight members, of whom four are independent, non-executive members, two were executive officers until December 2007 and one was appointed by a minority of preferred shareholders at the General Shareholders Meeting on April 28, 2008. Our Board of Directors generally meets every 45 days or whenever called by its chairman or by any two directors. During 2007, nine board meetings were held. Each meeting of the Board of Directors requires a quorum of a minimum of three members, including the chairman or the vice-chairman. The Board of Directors is responsible for our general policies, for electing our executive officers and supervising their management, and for deliberating on capital increases up to the authorized capital, distributions of dividends and interest on shareholders equity, investments in other companies, our dissolution or incorporation and the appointment of independent auditors. Pursuant to Brazilian law, each member of the Board of Directors must hold at least one of our common or preferred shares and be elected by the holders of our common or preferred shares at the General Shareholders Meeting.

Members of the Board of Directors are elected by the common or preferred shareholders for a period of one year and may be reelected. According to Law 10,303/2001, minority shareholders that together hold common shares representing at least 15% of the voting capital, are entitled to appoint one Board member. Holders of preferred shares representing 10% or more of our capital stocks have the right to elect one member of our Board of Directors. If minority holders of our voting and preferred shares do not reach the minimum percentage required for the right to elect a member of the Board of Directors in the manners described above, they may jointly elect a single member to the Board. In this case, such shareholders should jointly represent a minimum of 10% of the corporate capital. Until the general shareholders meeting of 2005, preferred shareholders had the right to elect a Board member from a short list of three names drawn up by the controlling shareholder. As from the general shareholders meeting of 2006, the election of this member will be unrestricted. In 2002, we granted our minority shareholders the right to elect a member of our Board of Directors, a corporate governance change that Brazilian companies were not required to make until 2006.

Table of Contents

Minority holders of voting shares and preferred shareholders must prove uninterrupted title to a shareholding interest in our shares for a period of at least three months immediately prior to the holding of the general shareholders meeting in order to exercise their rights related to the election of directors.

Law 10,303/2001 granted members of the Board of Directors elected by minority holders of voting shares and/or preferred shareholders, veto powers over the appointment and dismissal of our independent auditors, provided such veto is reasonably justified.

Executive Officers

Our executive officers include our chief executive officer and a minimum of three and a maximum of five other members. Each of our current executive officers has been appointed by the Board of Directors for a one-year term, which began on April 28, 2008, and they may remain in office until the Board of Directors meeting that will appoint the executive officers in 2009. Sitting members can be reelected for additional one-year terms.

Fiscal Council and Audit Committee Exemption

Brazilian Corporate Law requires us to establish a Fiscal Council (Conselho Fiscal), which may have permanent or non-permanent operations. A Fiscal Council with non-permanent operations is required to be formed when requested by 10% of our voting shareholders or 5% of our non-voting shareholders in a general shareholders meeting, but remains in place only until the following general shareholders meeting. At such general shareholders meeting the Fiscal Council with non-permanent operations may be reconstituted by our shareholders. In July 2005, our bylaws were revised to provide for a Fiscal Council with permanent operations. Our Fiscal Council acts as an audit committee pursuant to the requirements of the Sarbanes-Oxley Act. Under Rule 10A-3(c)(3) of the Exchange Act, non-U.S. issuers, such as Ultrapar, are exempt from the audit committee requirements of Section 303A of the New York Stock Exchange Listed Company Manual if they establish, according to their local law or regulations, another body that acts as an audit committee.

Our Fiscal Council consists of five members and their respective alternate members. The Fiscal Council is a separate corporate body independent of our management and our external independent registered public accounting firm. According to the Brazilian Corporate Law, the Fiscal Council must meet at least four times per year. Since its establishment, in July 2005, our Fiscal Council has been meeting on a monthly basis, and in 2007, they held twelve meetings. Our Fiscal Council is responsible for reviewing the accuracy and integrity of quarterly and annual financial statements in accordance with applicable accounting, internal control and auditing requirements and in compliance with the provisions of Brazilian corporate law; the forms of the CVM and requirements for listing on Bovespa; the rules of the SEC and the requirements for listing on the New York Stock Exchange. Our Fiscal Council also (1) makes recommendations to our board of directors regarding the appointment, retention and oversight of our independent auditors, (2) discusses matters related to interim and annual financial statements with the management of the company and the independent auditors, (3) reviews and evaluates the performance of internal auditing and (4) discusses matters related to effectiveness of the internal controls of the company with management and independent auditors. Our Fiscal Council is supporting the implementation by the company of improved procedures for receiving, retaining and addressing complaints regarding accounting, internal control and auditing matters, including the submission of confidential, anonymous complaints from employees regarding questionable accounting or auditing matters. Our Fiscal Council may hire outside advisors to assist it with matters related to the course of their duties, and such expenses are covered by the company. The members of our Fiscal Council are elected by our shareholders at the annual general shareholders meeting for one-year terms and are eligible for reelection. The terms of the members of our Fiscal Council expire at the next annual general shareholders meeting. Under the Brazilian Corporation Law, individuals who are members of our board of directors or our board of executive officers or are employees or spouses or relatives of any member of our management are not eligible to serve on the Fiscal Council. To be eligible to serve on our Fiscal Council, a person must be a resident of Brazil and either a university graduate or has been a company officer or Fiscal Council member of another Brazilian company for at least three years prior to election to our Fiscal Council.

Table of Contents

On April 28, 2008, the General Shareholders Meeting approved compensation for the members of the Fiscal Council of R\$7,400 per month for each effective (non-alternate) member, except for the President of the Fiscal Council, whose compensation was set at R\$8,000 per month.

The following table lists the members of our Fiscal Council and their alternates who served on the Fiscal Council during 2007:

Name	First Year of Appointment
Wolfgang Eberhard Rohrbach	2005
Tania Maria Camilo (alternate)	2006
John Michael Pimenta de Moraes Streithorst	2005
Ricardo José Arruda de Negreiros (alternate)	2005
Flavio César Maia Luz	2005
Márcio Augustus Ribeiro (alternate)	2007
Mário Probst	2005
Katuyoshi Utiyama (alternate)	2005
Raul Murgel Braga	2005
Pedro Ozires Predeus (alternate)	2005

An election of the Fiscal Council was held on April 28, 2008, at which all members were reelected, except for John Michael Pimenta de Moraes Streithorst and the respective alternate, Ricardo José Arruda de Negreiros, who were replaced by Edson Pena Júnior and by Waldenor Moreira Borges Filho as alternate. Summarized below is information regarding the business experience, areas of experience and principal outside business interests of the current members of our Fiscal Council.

Flavio César Maia Luz. Mr. Luz is our Fiscal Council member since 2005. Mr. Luz is corporate and finance Vice-President of Cofra Latin America Ltda C&A Group since 2001. From 1999 to 2001, Mr. Luz served as executive director and Vice-President of the board of directors at Eletropaulo. From 1976 to 1998, Mr. Luz worked at Duratex, where he occupied the Executive Vice-President position from 1993 to 1998. Mr. Luz received a degree in civil engineering from Escola Politécnica da Universidade de São Paulo and a post-graduate degree in business administration from Escola de Administração de Empresas de São Paulo da Fundação Getúlio Vargas. He also holds certificates of continuing education programs in Finance, Marketing and Mergers & Acquisitions, from Harvard Business School, Stanford University and Wharton Business School, respectively.

Mario Probst. Mr. Probst served as partner at KPMG Auditores Independentes from 1991 to 2004, and is currently retired. Mr. Probst is a member of the board of directors of Fundação Visconde de Porto Seguro, a member of the board of directors at Hospital Alemão Oswaldo Cruz and a member of the Fiscal Council at Odontoprev S.A. Mr. Probst received a degree in business administration from Escola de Administração de Empresas de São Paulo da Fundação Getúlio Vargas and accountancy from Faculdade de Ciências Políticas e Econômicas do Rio de Janeiro.

Raul Murgel Braga. Mr. Braga served as legal consultant at Ultrapar until 1992 and at Getec Group until 1997. He also served as President of Ultraprev, President of the Fiscal Council at Copene-Petroquímica do Nordeste S.A. and Globex, until March, 2002 and April, 2005, respectively, and as a member of the Fiscal Council at Oxiten S.A. until December 2002. Mr. Braga received a law degree from Faculdade Nacional de Direito da Universidade do Brasil, in Rio de Janeiro.

Wolfgang Eberhard Rohrbach. Mr. Rohrbach is the investment controller at Monteiro Aranha Group, and a member of the Fiscal Council of its affiliates, including Klabin S.A. Mr. Rohrbach also served as member of the Fiscal Council at Ericsson, Volkswagen do Brasil, Matel Tecnologia de Teleinformática S.A. MATEC and Oxiten S.A. Indústria e Comércio. As member of the Fiscal Council of Ericsson do Brasil he introduced the Audit Committee in the company. Mr. Rohrbach received a degree in economics from Universidade de São Paulo.

Table of Contents

Edson Pena Júnior. Mr. Pena is retired from Banco do Brasil. Mr. Pena also acted as Member of the Consultant Board of *Cooperativa Vinícola Aurora*, Assistant of Officer Board of Banco do Brasil, Member of Fiscal Council of Banco do Brasil – BI Kepler Weber and Internal Audit Executive Manager of Banco do Brasil. Mr. Pena received a degree in accounting from UNICEUB – Brasília.

Corporate Governance

We are incorporated under the laws of Brazil and we are subject to Brazilian laws related to corporate governance. Under Brazilian law, there are no regulatory requirements with respect to corporate governance such as (i) the independence of our Board of Directors, (ii) meetings of non-management directors, (iii) the establishment and composition of certain board committees or (iv) the adoption and disclosure of corporate governance guidelines or codes of business conduct and ethics. As a non-U.S. issuer we are exempt from adopting certain New York Stock Exchange corporate governance requirements and other requirements will only apply to us in the future. However, we aim to ensure that best practices, recommendations and standards of corporate governance are employed in our functioning and operations. We have adopted corporate governance guidelines, such as the requirement that a majority of the members of the Board of Directors be independent, the implementation of a code of ethics for senior officers and the implementation of the audit committee, which we believe are in compliance with applicable U.S. corporate governance requirements.

In 2000, the São Paulo Stock Exchange, or Bovespa, introduced three special listing segments, known as Levels 1 and 2 of Differentiated Corporate Governance Practices and New Market (Novo Mercado), aiming at fostering a secondary market for securities issued by Brazilian companies with securities listed on Bovespa, by prompting such companies to follow good practices of corporate governance. The listing segments were designed for the trading of shares issued by companies voluntarily undertaking to abide by corporate governance practices and disclosure requirements in addition to those already imposed by Brazilian law. These rules generally increase shareholders' rights and enhance the disclosure of information provided to shareholders.

In October 2005, we entered into an agreement with Bovespa and have complied with the requirements to become a Level 1 company. In becoming a Level 1 company, we have:

ensured that shares representing at least 25% of our total share capital are available for trading;

adopted offering procedures that favor widespread ownership of our shares whenever making a public offering;

complied with minimum quarterly disclosure standards;

followed stricter disclosure policies with respect to transactions involving our securities made by our controlling shareholder and our directors and executive officers;

disclosed any existing shareholders agreements and stock option plans; and

made a schedule of corporate events available to our shareholders.

On February 20, 2008, Ultrapar Board of Directors decided to join to Level 2 of Bovespa's Special Corporate Governance Levels after the completion of the Ipiranga Acquisition. In becoming a Level 2 company we are required to comply with the following, in addition to the requirements of Level 1: (i) giving voting rights to preferred shareholders for such matters as changes in corporate type, mergers, spin-offs and consolidations, (ii) making a tender offer for the purchase of all outstanding shares, at their economic value, if the company goes private or in the event the company ceases to be a Level 2 company and (iii) adhering to the rules of an arbitration panel responsible for resolving any conflict and consisting of specialists in the relevant dispute areas. As was already the case for Level 1, Ultrapar corporate governance standards will continue to exceed the requirements of Level 2, the most prominent of which is the 100% tag along rights for all shareholder classes, while the requirement of Level 2 is 80% for all shareholder classes.

Table of Contents**D. Employees**

As of December 31, 2007, we had 9,653 employees. The following table sets forth our number of employees per line of business at the dates indicated.

	Number of employees		
	2007	2006	2005
Ultragaz	4,467	4,424	4,424
Ipiranga	2,317	n.a.	n.a.
Oxiteno	1,441	1,263	1,210
Ultracargo	1,193	981	1,151
Others(1)	235	217	207
Ultrapar	9,653	6,885	6,992

(1) Includes headquarters personnel from the maintenance, IT, finance and accountant departments.

Ultragaz employees are covered by collective agreements with the labor unions representing the employees in the LPG industry. Ipiranga employees are covered by collective bargaining agreements with the labor unions representing our fuel distribution employees. According to Brazilian legislation, Oxiteno employees are represented by labor unions, and are currently covered by collective agreements, which are renewed annually.

All Ultracargo employees are covered by a collective agreement, which incorporates clauses of a social, financial, labor union and labor relations nature signed by the companies, labor unions and employees.

In February 2001, our Board of Directors approved the adoption of a defined contribution pension plan to be sponsored by Ultrapar and each of its subsidiaries. Participating employees have been contributing to this plan, managed by Ultraprev Associação de Previdência Complementar, known as Ultraprev, since August 2001. Under the terms of the plan, every year each participating employee chooses his or her basic contribution to the plan. Each sponsoring company provides a matching contribution in an amount equivalent to each basic contribution, up to a limit of 11% of the employee's reference salary, according to the rules of the plan. As participating employees retire, they may choose to receive either (i) a monthly sum ranging between 0.5% and 1.0% of their respective contribution in Ultraprev or (ii) a fixed monthly amount which will exhaust their respective contribution over a period of 5 to 25 years. The sponsoring company does not guarantee the amounts or the duration of the benefits received by each employee that retires. The total number of participating employees as of December 31, 2007 was 5,522.

RIPI, DPPI and CBPI, together with the other companies that formerly formed the Ipiranga Group, are sponsors of *Fundação Francisco Martins Bastos*, or FFMB, which provides a defined benefit plan, in which the contribution is made according to the amount expected to be received in the future, for their employees. The cost of the plan is apportioned between the sponsors and participants. The total number of participating employees as of December 31, 2007 was 5,581.

E. Share Ownership

In accordance with our bylaws, there are two classes of capital stock authorized and outstanding, the common shares and the preferred shares, of which only the common shares have voting rights in any matter. See Item 6.B. Directors, Senior Management and Employees Board Practices Corporate Governance.

In connection with the Share Exchanges, Ultrapar issued 54,770,590 new preferred shares. Each RIPI, DPPI and CBPI preferred or common share outstanding was exchanged for an Ultrapar preferred share at the rate of 0.79850, 0.64048 and 0.41846 Ultrapar shares per target company share, respectively. After the Share Exchanges, our numbers of preferred shares and total shares increased to 86,666,102 and 136,095,999, respectively.

The table below sets forth the number of our total shares (common and preferred shares) beneficially owned by each of our directors and executive officers as of May 31, 2008, including through their participation in our controlling parent company Ultra S.A. Participações.

Table of Contents

	Common Shares	%	Preferred Shares	%	Total Shares	%
Board of directors						
Paulo Guilherme Aguiar Cunha(1)	4,414,893	10%	4,448	0%	4,419,341	3%

Total	49,429,897		86,666,102		136,095,999	

- (1) Individuals who beneficially own shares primarily through their participation in the holding company Ultra S.A. Participações. See Item 7.A. Major Shareholders and Related Party Transactions – Major Shareholders.
- (2) Executives who were granted shares through the Deferred Stock Plan.

ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS**A. Major Shareholders**

The table below shows the capital stock of Ultrapar as of May 31, 2008:

	Common Shares	%	Preferred Shares	%	Total Shares	%
Shareholders						
Ultra S.A. Participações	32,646,694	66%	12	0%	32,646,706	24%
Caixa de Previdência dos Funcionários do Banco do Brasil			11,934,824	14%	11,934,824	9%
Parth Investments Company(1)	9,311,730	19%	1,396,759	2%	10,708,489	8%
Monteiro Aranha S.A.	5,212,637	11%	1,011,729	1%	6,224,366	5%
Ultra-DI Participações S.A.(1)	490,095	1%	73,514	0%	563,609	0%
Others	1,768,741	4%	72,249,264	83%	74,018,005	54%
Total	49,429,897	100%	86,666,102	100%	136,095,999	100%

- (1) Parth Investments Company and Ultra-DI Participações S.A., which together hold 19.8% of our common shares, are controlled by Daisy Igel.

Ownership and Capital Structure of Ultra S.A. Participações

As of April 30, 2007, Ultra S.A. Participações, or Ultra S.A., owned approximately 24% of Ultrapar's voting shares. As of May 31, 2008, the capital stock of Ultra S.A. was owned as follows:

	Common		Preferred		Total	
	Shares	%	Shares	%	Shares	%
Shareholders						
Fabio Igel	7,518,770	12%	1,768,275	7%	9,287,045	10%
Rogério Igel	4,634,187	7%	1,130,519	4%	5,764,706	7%
Joyce Igel de Castro Andrade	6,188,622	10%	2,062,989	8%	8,251,611	9%

Table of Contents

	Common		Preferred		Total

Total	63,202,048	100%	25,342,886	100%	88,544,934	100%

All of the securities are held in Brazil and there are 20 record holders of these securities in Brazil.

Shareholders Agreements

On March 22, 2000, our controlling shareholders entered into a Shareholders Agreement designed to ensure the equal treatment of all shareholders in the event of any change in control. On May 18, 2004, the Extraordinary General Shareholders Meeting and the Special Meeting of Preferred Shareholders approved an amendment of our bylaws to register tag along rights for all Company shareholders, at 100% of the offer price. The registration of the tag along rights in our bylaws is intended to improve on the rights already conceded through the Shareholders Agreement.

On September 22, 2004, the shareholders of Ultra S.A. entered into a new Shareholders Agreement (the New Shareholders Agreement) replacing a prior Shareholders Agreement entered into on May 22, 1997, to ensure the continuation of the controlling shareholder block upon the contemplated dissolution and distribution of Ultra S.A. shares held by its shareholders, Igel Participações S.A. and Avaré Participações S.A.

The New Shareholders Agreement has a term of five years from December 16, 2004 and provides principally that:

all shares of Ultrapar that are held by Ultra will be voted as a block;

Ultra S.A. shares will be voted in accordance with the instructions of the absolute majority of its common shares except for certain significant matters (including changes to the bylaws of either company, changes to our capital structure, mergers, material acquisitions or sales of assets, and election of Board members) which require the vote of 66% of the common shares;

Chairman of our Board of Directors must convene a meeting of, and provide all requested information and available documents to, all parties to the New Shareholders Agreement before or after any meeting of our Board of Directors considering key issues such as our strategic plan and general policies, our organizational structure, the election of executive officers, our dividend policy, and any other material decisions as determined by the Board of Directors;

any party purchasing shares of Ultra S.A. must agree to be bound by the terms of the New Shareholders Agreement; and

any party to the New Shareholders Agreement may exchange his or her shares in Ultra S.A. into our preferred shares at an exchange ratio necessary to obtain the same percentage of our capital stock as was held in Ultra S.A., unless the exchange would result in (i) Ultra S.A. no longer having more than the majority of our voting shares or (ii) a violation of the number of preferred shares as a percentage of total capital stock legally permitted to be issued by us or by Ultra S.A.

Table of Contents

B. Related Party Transactions

None of the members of our board of directors or executives or their family members has any direct participation in any material transaction involving the Company or that is relevant to our businesses.

Utingás bylaws provide for each of its shareholders to use a proportion of Utingás total storage capacity equal to such shareholder's proportionate ownership of Utingás. Accordingly, Ultragas is entitled to use 4.2 thousand tons of LPG storage capacity at Utingás facilities, reflecting Ultragas 56% ownership in Utingás. The amount of payments made by Ultragas to Utingás in 2007 with respect to the use of storage capacity at Utingás facilities totaled R\$3.5 million.

See Note 21 to our consolidated financial statements for a detailed breakdown of related party transactions as of December 31, 2007.

C. Interests of Expert and Counsel

Not applicable.

ITEM 8. FINANCIAL INFORMATION

A. Consolidated Statements and Other Financial Information

For our consolidated financial statements and notes thereto see Item 18. Financial Statements.

Dividend and Distribution Policy

Dividend policy

The bylaws of a Brazilian company may establish a minimum percentage of the profit that must be paid to shareholders as mandatory dividends. The amounts due as dividends may be paid as interest on net equity. Our bylaws provide for a mandatory distribution equal to 50% of the Distributable Amount (as defined below). In addition, until May 18, 2004, under our bylaws, the amount we distributed in respect of each preferred share was equal to 110% of the amount we distributed in respect of each of our common shares. On May 18, 2004, we held an Extraordinary General Meeting which approved amendments of our bylaws. The amendments were (i) the inclusion in our bylaws of tag along rights for all of the Company's shareholders, at 100% of the offer price, which was a provision that was previously provided for in our 2000 shareholders' agreement; and (ii) to make the dividend right of preferred shareholders equal to those of common shareholders by abolishing the right of preferred shareholders to receive dividends at least 10% higher than those received by common shareholders.

Brazilian corporate law defines the net profit as the results of the relevant fiscal year, reduced by accumulated losses of prior fiscal years, provisions for income tax and social contribution on the net profit for such fiscal year, and amounts allocated to employees' and management's participation on the results in such fiscal year. The amount available for distribution of dividends, referred to as the Distributable Amount, is the net profit, as reduced or increased by the following:

amounts allocated to the legal reserve;

amounts allocated to the statutory reserve, if any;

amounts allocated to the contingency reserve, if required;

amounts allocated to the unrealized profit reserve;

amounts allocated to the retained profit reserve;

reversions of reserves registered in prior years, in accordance with Brazilian GAAP; and

reversions of the amounts allocated to the unrealized profit reserve, when realized and not absorbed by losses.

Table of Contents

Legal reserves. We are required to maintain a legal reserve to which we must allocate 5% of our net profit until the amount of our legal reserve equals 20% of paid-in capital. We are not required to make any allocations to the legal reserve for any fiscal year in which such reserve, when added to our capital reserves, exceeds 30% of our capital stock. Accumulated losses, if any, may be charged against the legal reserve. Other than that, the legal reserve can only be used to increase our capital.

Statutory reserves. Under Brazilian corporate law, any corporation may create statutory reserves, in which case it shall be provided in its respective bylaws. In this case, the bylaws must also indicate the reserve purpose, allocation criteria and maximum amount of reserve. Our bylaws do not provide for, and thus we do not maintain, a statutory reserve.

Contingency reserves. Under Brazilian corporate law, our shareholders may decide, upon a proposal of our Board of Directors, to allocate a discretionary amount of our net profit to a contingency reserve for estimated future losses which are deemed probable. The distributable amount may be further increased by the reversal of such reserve in the fiscal year when the reasons that justified the creation of such reserve cease to exist or in which the anticipated loss occurs. Accordingly, there is no specific percentage of net profit allocable to this type of reserve.

Unrealized profits reserves. Under Brazilian corporate law, when the mandatory dividend amount exceeds the realized net profits in a given fiscal year, our shareholders may elect, upon a proposal of our Board of Directors, to allocate some or all of the excess dividend amount to any unrealized profits reserve. Brazilian corporate law defines realized net profits as the amount by which the Company's net profits exceed the sum of (1) its net positive results, if any, from the equity method of accounting for earnings and losses of the Company's subsidiaries and certain of its affiliates and (2) the profits, gains or returns that will be received by the Company after the end of the next fiscal year. The distributable amount is increased by the profits that were allocated to such reserve when they are realized.

Retained profits reserve. Under Brazilian corporate law, our shareholders may decide to retain a discretionary amount of our net profits that is provided for in a budget approved in the general shareholders' meeting, upon the proposal of its board of directors, for the expansion of our installations and other investment projects. After the conclusion of the relevant investments, we may retain the reserve until the shareholders approve the transfer of the reserve, in full or in part, to its capital or to the accumulated profits reserve. In accordance with Brazilian corporate law, if a project to which part of the reserve has been allocated has a term exceeding one year, the budget for such project must be approved by the general shareholders' meeting each fiscal year through the conclusion of the project.

Brazilian corporate law provides that all statutory allocations of net profit, including the unrealized profits reserve and the reserve for investment projects, are subject to approval by the shareholders voting at a general shareholders' meeting and may be used for capital increases or for the payment of dividends in subsequent years. The legal reserve is also subject to approval by the general shareholders' meeting and may be transferred to capital or used to absorb losses, but are not available for the payment of dividends in subsequent years.

The balance for the profit reserve accounts, except for the contingency reserve and unrealized profits reserve, may not exceed the share capital. If this happens, our shareholders must determine whether the excess will be applied to pay in the subscribed and unpaid capital, to increase and pay in the subscribed stock capital or to distribute dividends.

The profits unallocated to the accounts mentioned above must be distributed as dividends.

A company is permitted to allocate to the unrealized profits reserves all income from equity gains in subsidiaries that are not distributed to the company in the form of cash dividends. When such gains are distributed to the company in the form of cash dividends, the company is required to reverse the reserve. See Item 3.D. Key Information Risk Factors Risks Relating to the Preferred Shares and the American Depositary Shares. In addition to the mandatory distribution, the Board of Directors may recommend to the shareholders the payment of interim distributions from other funds that are legally available for such purposes. Any payment of an interim dividend may be set off against the amount of the mandatory dividend distribution for that fiscal year.

Table of Contents

As an alternative form of payment of dividends, Brazilian companies may distribute interest attributed to shareholders' equity, which payments may be treated by a company as a deductible expense for income tax and social contribution purposes. Payments of interest attributed to shareholders' equity may be made at the discretion of our Board of Directors, subject to the approval of the holders of our common shares. Payments of interest attributed to shareholders' equity, net of withholding tax, may be used to satisfy a company's mandatory distribution obligation. This interest is calculated in accordance with the daily pro rata variation of the Brazilian government's long-term interest rate, (TJLP), as determined by the Central Bank from time to time, and cannot exceed the greater of:

50% of net income (after the deduction of the social contribution on profits and before the provision for corporate income tax and the amounts attributable to shareholders as net interest on equity) related to the period in respect of which the payment is made; or

50% of the sum of retained profits and profit reserves in the beginning of the period with respect to which the payment is made. Under Brazilian corporate law, a company may suspend the mandatory distribution either in the form of dividends or payments of interest on shareholders' equity if the shareholders at the general shareholders' meeting determine, based on the Board of Directors' proposal, which is reviewed by the Fiscal Council, that payment of the mandatory distribution for the preceding fiscal year would be inadvisable in light of the company's financial condition. Our managers must report to the CVM such suspension within five days of the relevant general shareholders meeting. Under Brazilian law, mandatory distributions that are suspended and not offset against losses in future years must be paid as soon as the financial condition of the company permits.

We declare and pay dividends and/or interest attributed to shareholders' equity, pursuant to Brazilian corporate law and our bylaws. Our Board of Directors may approve the distribution of dividends and/or interest attributed to shareholders' equity, calculated based on our annual or semi-annual financial statements or on financial statements relating to shorter periods. The amount of any distributions will depend on a series of factors, such as our financial condition, prospects, macroeconomic conditions, tariff adjustments, regulatory changes, growth strategies and other issues our Board of Directors and our shareholders may consider relevant.

For 2007 and 2006, we declared dividends to our shareholders in the amounts of R\$241 million and R\$144 million, corresponding to 132% and 51% of our net income for each period, respectively.

The following table sets forth the dividends per share distributed by us with respect to our capital stock in the past five years.

Dividend history

Year declared	Common shares	Preferred shares	Common shares	Preferred shares
	(in Reais per share)		(in US\$ per share)(1)	
2001(2)	4.20	4.63	1.61	1.77
2002(2)	1.00	1.09	0.30	0.33
2003(2)	1.01	1.11	0.34	0.38
2004(2)	2.36	2.36	0.84	0.84
2005	1.94	1.94	0.83	0.83
2006	1.78	1.78	0.83	0.83
2007	1.78	1.78	1.06	1.06

(1) The amounts in *Reais* have been converted into dollars using the exchange rates at each respective payment date.

(2) Dividends per share were not retroactively adjusted for the stock dividend described under Item 4.B. Information on the Company Business Overview.

Table of Contents

Holders of our preferred shares are entitled to receive dividends declared by us solely from the date of the subscription and/or acquisition of such shares.

Payment of dividends. Within the four months following the end of each fiscal year, our shareholders are required to hold an annual shareholders meeting to decide, among other things, on the allocation of our net profits with respect to the fiscal year ended immediately prior to the shareholders meeting and the payment of an annual dividend. Additionally, interim dividends may be declared by our Board of Directors. Under Brazilian corporate law, dividends are generally required to be paid within 60 days following the date the dividend was declared, unless a shareholders resolution sets forth another date of payment, which, in either case, must occur prior to the end of the fiscal year in which such dividend was declared. Unclaimed dividends revert to us three years after the date when we begin to pay such declared dividends.

Shareholders who are not residents of Brazil must register with the Central Bank to have dividends, sales proceeds or other amounts with respect to their shares eligible to be remitted in foreign currency outside of Brazil. The preferred shares underlying the ADSs will be held in Brazil by the Custodian, Banco Itaú S.A., as agent for the Depositary. For purposes of the registration requirement, the Depositary is deemed to be the stockholder of the preferred shares underlying the ADSs. The Depositary will register such preferred shares with the Central Bank.

Payments of cash dividends and distributions, if any, will be made in Brazilian currency to the Custodian on behalf of the Depositary. The Custodian will then convert such proceeds into U.S. dollars and will cause such U.S. dollars to be delivered to the Depositary for distribution to holders of ADSs. See Description of American Depositary Receipts in our Registration Statement filed on Form F-1, declared effective on April 12, 2005. In the event that the Custodian is unable to convert immediately the Brazilian currency received as dividends into U.S. dollars, the amount of U.S. dollars payable to holders of ADSs may be adversely affected by devaluations of the Brazilian currency that may occur before such dividends are converted and remitted. See Item 3.A. Key Information Selected Consolidated Financial Data Exchange Rates and Item 3.D. Key Information Risk factors Risks Relating to Brazil. Dividends in respect of the preferred shares paid to shareholders who are not Brazilian residents, including holders of ADSs, are exempt from Brazilian withholding tax except for dividends declared based on profits generated prior to December 31, 1995. Distributions of interest on net worth are currently subject to withholding tax at a rate of 15%, or 25% in the case of a shareholder domiciled in a tax haven. See Item 10.E. Additional Information Taxation Brazilian Tax Consequences.

Legal proceedings

We are party to administrative proceedings and lawsuits that are incidental to the normal course of our business. We believe that our provisions for legal proceedings are sufficient to meet probable and reasonably estimable losses in the event of unfavorable court decisions and that the ultimate outcome of these matters will not have a material effect on our financial condition or results of operations. The majority of our legal proceedings are pending in the courts of the States of São Paulo, Minas Gerais, Rio de Janeiro, Rio Grande do Sul and Bahia.

Labor matters

The Petrochemical Industry Labor Union, of which the employees of our indirect subsidiary Oxiteno Nordeste S.A. Indústria e Comércio are members, filed a lawsuit against Oxiteno Nordeste in 1990, demanding that Oxiteno Nordeste comply with salary adjustments set forth in applicable collective labor agreements, in lieu of the salary policies Oxiteno Nordeste effectively followed. The union also proposed a new collective bargaining agreement, which included an interpretation and clarification of the fourth clause of the previous collective bargaining agreement, which described the relevant salary policies that Oxiteno Nordeste was to follow. Based on the opinion of our legal counsel, who analyzed the last decision of the Federal Supreme Court (STF) on the collective bargaining agreement as well as the status of the individual lawsuit of our subsidiary regarding such agreement, our management believes that an accrual for a potential loss was not necessary as of December 31, 2007. See Note 19 (a) to our consolidated financial statements.

Table of Contents***Civil claims***

The civil claims against us relate mainly to accidents originated from fires or explosions of LPG cylinders and traffic accidents with Ultragaz and Ultracargo trucks.

There are also approximately 100 claims filed by former employees of Ultragaz, regarding bodily harm suits in which the plaintiffs are claiming damages for the loss of economic benefit and for pain and suffering arising from labor accidents. According to Ultragaz estimate, our exposure in any individual suit ranges from R\$50,000 to R\$300,000. Such amounts are generally covered by Ultragaz third-party insurance policies, subject to the terms of such policies. For those suits involving death or permanent disabilities, the value of the claim is established by the courts and is based on the average salary and age of the victim.

Ultragaz is a defendant in lawsuits relating to damages caused by an explosion in 1996 in a shopping mall in the city of Osasco, State of São Paulo. These lawsuits involve: (i) individual suits filed by victims of the explosion claiming damages from Ultragaz for the loss of economic benefit and for pain and suffering, (ii) indemnifications of management of the shopping mall and its insurance company, and (iii) a class action lawsuit seeking indemnification for material damages and pain and suffering for all the victims injured and deceased. Of the 58 lawsuits adjudicated through December 2007, 57 judgments were rendered in our favor, of which 21 have already been dismissed. The one unfavorable decision, which we may appeal, was for damages in the amount of R\$17,000. Ultragaz has insurance coverage for these lawsuits, and the uninsured contingent amount is R\$22.5 million. The Company has not recorded any provision for this amount, since it believes the probability of loss is remote. We believe that we have presented evidence that defective gas pipes in the shopping mall caused the accident and that Ultragaz on-site LPG storage facilities did not contribute to the explosion.

Additionally, there are two lawsuits filed in the States of São Paulo and Rio de Janeiro by certain former minority shareholders of RIPI, CBPI and DPPI (the Ipiranga minority shareholders) questioning the Share Exchange in connection with the Ipiranga Acquisition. By the time of the company's shareholders general meeting convened to approve the Share Exchange, the Ipiranga minority shareholders made use of certain legal instruments to impede the company's shareholders meeting taking place. Decisions by administrative and judicial courts understood at the time there were no legal grounds for the Ipiranga minority shareholders request. Based on said administrative and judicial decisions, the Share Exchange was approved by the shareholders meeting of the company on December 18, 2007. Ipiranga minority shareholders appealed against the administrative and legal decisions issued and to date there is no final outcome of such appeals. These two lawsuits are not accounted for in the financial statements of the company.

Tax matters

We filed suits challenging the constitutionality of several taxes applicable to us. Among the main tax matters are individual lawsuits filed by Ultragaz, Ipiranga, Oxiteno and some of our subsidiaries against the Brazilian tax authorities contesting the increase in certain taxes introduced by Law 9,718 of November 28, 1998. We obtained injunctions to pay contributions to PIS and COFINS without the changes introduced by Law 9,718 of November 28, 1998 in its original version. The ongoing questioning refers to the levy of these taxes on sources of income other than revenues. In 2007 final decisions were rendered for Ultrapar and its subsidiaries, resulting in the reversion of recorded accruals in the net amount of R\$12.8 million (for 2006 R\$23.5 million related to an accrual reversal and R\$26.2 million related to a recovery of amounts paid in previous periods), net of attorney's fees, as financial income in the statement of income for the period. The Company has other subsidiaries whose lawsuits have not yet been adjudicated in the amount of R\$30.4, net of attorney's fees. The Company's subsidiary Utingás Armazenadora S.A. has challenged ISS (Service Tax) assessments issued by the municipal government of Santo André. Our legal counsel classifies the risk as low, given that a significant portion of the administrative appeal was favorable to us. Our argument is supported by the opinion of a renowned tax specialist. The unprovisioned amount of the contingency as of December 31, 2007 is R\$42.9 million. On October 7, 2005, Ultragaz subsidiaries filed for and obtained an injunction to support the offset of PIS and COFINS credits against other federal taxes administered by the Federal Revenue Service (SRF), notably corporate income tax and social contribution taxes. According to the injunction, the subsidiaries had made escrow deposits for these debits in the amount of R\$81.2 million as of December 31, 2007 and recognized a corresponding liability for this purpose.

Our subsidiaries, Ultragaz Participações Ltda, Cia. Ultragaz S.A., Utingás Armazenadora S.A., Terminal Químico de Aratu S.A. Tequimar, Transultra Armazenamento e Transporte Especializado Ltda. and Ultracargo Operações Logísticas e Participações Ltda., filed a request for injunction for the full and immediate use of supplementary monetary adjustment based on the Consumer Price Index (IPC)/National Treasury Bonds (BTN) for 1990 (Law No. 8.200/91). Reserves for potential losses on these proceedings have been recorded in the amount of R\$13.6 million.

Table of Contents

On December 29, 2006, the subsidiaries Oxiteno S.A Indústria e Comércio, Oxiteno Nordeste S.A Indústria e Comércio, Companhia Ultragaz S.A. and Transultra Armazenamento e Transporte Especializado Ltda filed for an injunction seeking the deduction of ICMS from their PIS and COFINS tax bases. Oxiteno Nordeste S.A Indústria e Comércio received an injunction and is paying judicial deposits, as well as recording an accrual in the amount of R\$10.7 million as of December 31, 2007. The other subsidiaries did not receive a similar injunction and are awaiting the judgment of an appeal to the Regional Federal Court – TRF of the third region. The company and some of its subsidiaries filed a request for an injunction seeking not to be subject to the legislation that restricted the offset of corporate income tax (IRPJ) and social contribution (CSLL) tax loss carryforwards computed through December 31, 1994 to 30% of income for the year. As a result of the Supreme Court’s ruling and based on the opinion of our legal counsel, a provision was recorded in the amount of R\$6.6 million. In 2007, in light of recent jurisprudence, the assessment of our legal advisors and an increase of amounts paid as interest on capital, the company and its subsidiaries reserved PIS and COFINS on credits from interest on capital. The total amount reserved as of December 31, 2007 is R\$20.7 million.

Regarding Ipiranga/ Refinery, the main provisions for contingencies are for: (a) the potential reversal of ICMS credits on transportation services taken pursuant to the freight reimbursement system established by the ANP’s predecessor in the amount of R\$7.0 million; (b) the potential reversal of ICMS credits in the State of Minas Gerais for interstate outflows carried under Article 33 of ICMS Agreement 66/88, which allowed for the credits and which was suspended by an injunction from the Supreme Court, in the amount of R\$27.4; (c) the potential reversal of a deduction from our ICMS tax basis in the State of Minas Gerais in the amount of R\$15.7 million; (d) litigation based on contracts with customers; (e) claims made by former employees and outsourced personnel regarding salary related amounts. RIPI’s main tax contingencies of RIPI which present possible risk of loss, and for which, based in this evaluation, we have not made reserves involve ICMS, in the total amount of R\$114.0 million and relate mainly to (a) the potential reversal of credits on interstate outflows; (b) ICMS taxes on the purchases of basic oils; (c) the potential reversal of credits related to interstate transport service operations; (d) the potential reversal of credits derived from excess taxes on the purchase of products at the petroleum refinery under the tax substitution system; (e) reversal of credits from operations involving ethanol (anhydrous fuel ethanol) in the State of São Paulo; and (f) tax assessments resulting from operations of alcohol loan devolutions (anhydrous fuel alcohol). In addition, DPPI and its subsidiaries have tax assessments concerning non-homologation of IPI credits originating from acquisitions of products whose later sales were not taxed. The total provision as of December 31, 2007, was R\$39.6 million.

The table below summarizes our provisions related to legal proceedings as of December 31, 2007, 2006 and 2005:

	2007	2006	2005
	(in millions of Reais)		
Income and social contribution taxes	105.6	36.0	9.3
PIS and COFINS on other gains	33.6	14.4	37.0
ICMS	61.1	15.8	14.5
Other	22.7	2.5	
Total	223.0	68.7	60.8

Antitrust matters

Ultragaz in Minas Gerais. The subsidiaries Companhia Ultragaz S.A. and Ultragaz Participações Ltda. are parties to an administrative proceeding at the CADE (Conselho Administrativo de Defesa Econômica), the Brazilian antitrust authority, in which they have been accused of engaging in anti-competitive practices in the State of Minas Gerais in 2001. In September 2005, the SDE issued a technical notice recommending CADE to rule against the companies involved in this proceeding. We believe that there is no evidence to support the allegations of anti-competitive practices. Our defense includes, among others, that: (i) under the terms of the notice issued by the Company’s chief executive officer on July 4, 2000, the subsidiaries’ employees were forbidden to discuss with third parties matters related to prices and (ii) no consistent proof was attached to the proceeding’s records. In view of the

Table of Contents

arguments presented, the fact that the technical notice has no binding effect on CADE's decision, and our legal counsel's opinion, the subsidiaries did not record a provision for this issue. Should CADE's decision be unfavorable, the issue would be brought to judicial courts.

Acquisition of the Ipiranga Group. On April 17, 2007, the CADE (Administrative Council for Economic Defense) issued a writ of prevention to ensure the reversibility of the acquisitions by Braskem and Petrobras under the Acquisition. On April 25, 2007, CADE's plenary assembly approved a Transaction Reversibility Preservation Agreement (*Acordo de Preservação de Reversibilidade da Operação*), or APRO, with Braskem, that set forth that all the assets acquired by Braskem in the Acquisition will be preserved. With regard to the Ipiranga Group's fuel distribution business, Petrobras and Ultrapar were requested to present to CADE an alternative management model that would preserve the competition in the sector. On May 16, CADE approved an APRO with Petrobras regarding the fuel distribution business that replaced and revoked the writ of prevention issued on April 17, 2007. The APRO requests the nomination of an independent manager to administrate the distribution business that Petrobras acquired and establishes guidelines for operating the business. The APRO also imposes restrictions on Petrobras including limitations on asset sales, business reorganizations, changes in commercial policies and lay-offs. The exchange of commercial and strategic data between Ultrapar and Petrobras regarding the fuel distribution business is also restricted in order to protect free competition in the segment. On May 14, 2008 the Northern Distribution Business was segregated and delivered to Petrobras. Although the APRO remains in force until CADE's final decision, the delivery of the Northern Distribution Business to Petrobras reduces Ultrapar obligations foreseen in the APRO.

B. Significant Changes

None.

ITEM 9. THE OFFER AND LISTING**A. Offer and Listing Details**

The table below sets forth, for the indicated periods, the high and low closing prices of the ADSs on The New York Stock Exchange, in U.S. dollars, and the preferred shares on the São Paulo Stock Exchange, in *reais*:

	New York Stock Exchange			São Paulo Stock Exchange		
	High	Low	Volume(1)	High	Low	Volume(1)

B. Memorandum and Bylaws

We are registered with the commercial registry of the state of São Paulo under the registration number 35,300,109,724. Pursuant to chapter I, article 3 of our bylaws, our main corporate purpose is the investment of our capital in the trade, industry and agriculture sectors and in companies providing services, upon the subscription for or acquisition of shares or quotas in companies.

More detailed information with respect to our shares, shareholder rights, and limitations on share ownership is incorporated herein by reference to our Registration Statement on Form F-1, Registration Number 333-122496, declared effective by the Securities and Exchange Commission on April 12, 2005.

Table of Contents**C. Material Contracts*****US\$60 million 9% Eurobond***

In 1997, our indirect subsidiary Companhia Ultragas issued US\$60 million in a 9% US dollar-denominated Eurobond due in 2005 with a put/call option exercisable in 2002. We and our subsidiary Ultragas jointly, severally and unconditionally guaranteed this Eurobond and are thus subject to covenants which restrict, among other things, our ability to incur indebtedness, constitute liens, make dividend payments and other distributions and conduct sale-leaseback transactions, mergers and asset sales. None of these covenants have restricted our ability to conduct our ordinary course of business as of the date of this annual report. This Eurobond was purchased in June 2002 by our indirect subsidiary, LPG International Inc., with funds obtained from a syndicated loan, with maturity in August 2004. In January 2004, taking advantage of surplus international liquidity, this syndicated loan was refinanced through a new Eurobond issue by LPG with the same maturity of the original bond. On June 20, 2005, we entered in to a third supplemental indenture to this bond extending its maturity to 2020. Our indirect subsidiary Oxiteno Overseas Corporation is the new holder of the Eurobond, and financed the acquisition of this bond through a US\$60 million syndicated loan maturing in June 2008, at an annual interest rate of 5.05%.

In April 2006, the subsidiary Oxiteno Overseas Corp. sold the Original Notes to a financial institution. The subsidiary then acquired from this financial institution a credit linked note backed by the Original Notes, thus obtaining an additional return on this investment. For further information see Note 5 to our consolidated financial statements. This transaction matures in 2020, but either the subsidiary or the financial institution may redeem it earlier, although the subsidiary has only an annual option of redemption (purchase) in or after June 2008. In the event of insolvency of the financial institution, Companhia Ultragas S.A. would be required to settle the Original Notes, although Oxiteno Overseas Corp. would continue to be a creditor of the credit linked note. Thus, the Company is not eliminating the Original Notes in its financial statements.

March 22, 2000 shareholders agreement

On March 22, 2000, our controlling shareholders entered into a shareholders agreement designed to ensure the equal treatment of all shareholders in the event of any change in control. On May 18, 2004, the Extraordinary General Shareholders Meeting and the Special Meeting of Preferred Shareholders approved an amendment of our bylaws to register tag along rights for all Company shareholders, at 100% of the offer price. The registration of the tag along rights in our bylaws is intended to improve on the rights already conceded through the shareholders agreement.

September 22, 2004 shareholders agreement

On September 22, 2004, the shareholders of Ultra S.A. entered into a new shareholders agreement replacing a prior shareholders agreement entered into on May 22, 1997, to ensure the continuation of the controlling shareholder block upon the contemplated dissolution and distribution of Ultra S.A. shares held by its shareholders, Igel Participações S.A. and Avaré Participações S.A. For information regarding the shareholders agreements, see Item 7.A. Major Shareholders and Related Party Transactions Major Shareholders.

R\$300 million aggregate amount of 102.5% of CDI debentures due 2008

On April 8, 2005, we completed our first issue of debentures, not convertible into shares of Ultrapar, unsecured and without special privileges, amounting to R\$300 million with a term of 3 years, at a rate of 102.5% of CDI. In the first quarter of 2008 Ultrapar redeemed and paid these debentures.

US\$250 million aggregate amount of 7.25% notes due 2015

On December 20, 2005, Ultrapar, through its subsidiary LPG International Inc., issued US\$250 million in notes in the international market, with the aim of lengthening the company's debt profile, financing possible acquisitions and other corporate purposes. The notes mature in December 2015, have a coupon of 7.25% per annum and were priced at 98.75% of par value, resulting in a yield to maturity of 7.429% per annum. Standard & Poor's assigned its BB+ credit rating on a global scale for the company and the securities issued. The notes:

are unsecured unsubordinated obligations of LPG International Inc., ranking equally in right of payment with all existing and future unsecured unsubordinated obligations of LPG International Inc.;

Table of Contents

are issued in an original aggregate principal amount of US\$250,000,000 in minimum denominations of US\$100,000 of original principal amount and integral multiples of US\$1,000 above such amount;

bear interest commencing the date of issue at 7.25% per annum on the outstanding principal amount, payable semiannually on each June 20 and December 20 of each year, commencing June 20, 2006 to holders of record on June 5 or December 5 immediately preceding the interest payment date; and

bear interest on overdue principal, and pay interest on overdue interest, at 1% per annum higher than the per annum rate set forth on the cover of the offering memorandum for the notes.

The notes will be redeemable at the option of LPG International Inc. at any time or from time to time prior to their maturity, upon no more than 60 and not less than 30 days notice to the noteholders by mail. LPG International Inc. may redeem the notes either as a whole or in part at a redemption price equal to the greater of (i) 100% of the principal amount of the notes being redeemed and (ii) the sum of the present values of each remaining scheduled payment of principal and interest thereon (exclusive of any such interest accrued to the date of redemption) discounted (for purposes of determining present value) to the redemption date on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the treasury rate plus 50 basis points, plus accrued interest thereon to the date of redemption.

The guarantees for the notes are unsecured unsubordinated obligations of Ultrapar and Oxiteno, ranking equally in right of payment with all existing and future unsecured unsubordinated obligations of Ultrapar and Oxiteno.

The notes and the guarantees have the benefit of registration rights pursuant to a Registration Rights Agreement dated as of December 20, 2005, under which the notes and the guarantees will be required to be exchanged for notes and guarantees identical in terms to the original notes and guarantees except for restrictions on transfer, in a transaction registered with the Securities and Exchange Commission, prior to September 30, 2006.

The registration statement of the notes was filed on May 15, 2006 and was declared effective by the U.S. Securities and Exchange Commission on May 23, 2006. Ultrapar carried out an exchange offer for its outstanding US\$250,000,000 7.25% Notes due 2015, issued on December 20, 2005, which expired at 5:00 p.m. New York City time on June 22, 2006. At the close of the exchange offer, LPG International, Ultrapar and Oxiteno were advised by the exchange agent that an aggregate amount of US\$246,000,000 of the old notes had been tendered in exchange for an equivalent amount of new notes. All old notes tendered in exchange for new notes have been accepted and new notes have been issued to the tendering holders of such old notes. The remaining outstanding aggregate amount of old notes is US\$4,000,000.

Agreements Related to the Acquisition of the Ipiranga Group the Transaction Agreements

In March 2007, the Company entered into the Transaction Agreements that together effected its acquisition, along with Petrobras and Braskem, of the Ipiranga Group. Each Transaction Agreement is discussed briefly below and incorporated by reference to Exhibits 2.6, 2.7, 2.8, 4.4, 4.5, 4.6 and 4.7 to Form 20-F of Ultrapar Participações S.A. filed on June 7, 2007.

Investment Agreement. The Investment Agreement executed by Ultrapar, Petrobras and Braskem on March 18, 2007 and amended on April 18, 2007 (the Investment Agreement), which regulates the relationship among the companies, is the principal Transaction Agreement. See Item 4.A. Information on the Company History and Development of the Company Description of the Acquisition of the Ipiranga Group for more information on the Investment Agreement.

Share Purchase Agreement. On March 18, 2007, Ultrapar, with the consent of Petrobras and Braskem, and the Key Shareholders entered into the SPA, which sets forth the conditions of Acquiring Companies acquisition of a controlling stake of Ipiranga Group that closed on April 18, 2007.

Table of Contents

Target Companies Shareholders Agreement. On April 18, 2007, Ultrapar, Petrobras and Braskem entered into a Target Companies Shareholders Agreement (the Target Companies Shareholders Agreement), which sets forth the relationships among Ultrapar, Petrobras and Braskem regarding how the Target Companies' businesses will be managed.

RIFI Shareholders Agreement. On April 18, 2007, Ultrapar, Braskem and Petrobras entered into an RIFI Shareholders Agreement (the RIFI Shareholders Agreement), and which sets forth the relationships among Ultrapar, Petrobras and Braskem regarding how the Oil Refining Operations will be managed.

R\$889 million aggregate amount of 102.5% of CDI debentures due 2008

To finance part of the Ipiranga Acquisition, we issued debentures in the aggregate principal amount of R\$889.0 million, in two series. The first series was issued on April 11, 2007, in the amount of R\$675.0 million. The second series was issued on October 22, 2007 in the amount of R\$214.0 million. The debentures have a term of one year from the issuance date, and a coupon rate of 102.5% of CDI. In the first quarter of 2008 Ultrapar redeemed and paid these debentures. See Item 4.A. Information on the Company History and Development of the Company Recent Developments.

CBPI Notes

On August 1, 2003, CBPI issued US\$135 million in notes internationally. Part of these notes were redeemed in 2005 and 2006, in the amount of US\$1.3 million (R\$3.1 million) and US\$79.6 million (R\$164.9 million), respectively. See Item 5.B. Operating and Financial Review and Prospects Operating and Financial Results Liquidity and Capital Reserves Indebtedness and Item 5.F. Operating and Financial Review and Prospects Tabular Disclosure of Contractual Obligations.

CBPI Debentures

On April 18, 2006, CBPI registered with the CVM, a public offering of 35,000 subordinated debentures, single series and non-convertible in the total amount of R\$350 million maturing on April 1, 2011 and with a rate of 103.8% of CDI. In the first quarter of 2008 CBPI redeemed and paid these debentures. See Item 4.A. Information on the Company History and Development of the Company Recent Developments.

Other material contracts are described in other sections of this report

For information regarding the acquisition of Shell Gás, see Item 4.A. Information on the Company History and Development of the Company Investments Equity Investments. For information regarding our contract with Braskem relating to the supply of ethylene, see Item 4.B. Information on the Company Business Overview Petrochemicals and Chemicals Oxiteno Raw materials, Item 5.B. Operating and Financial Review and Prospects Operating and Financial Results Liquidity and Capital Reserves Indebtedness and Item 5.F. Operating and Financial Review and Prospects Tabular Disclosure of Contractual Obligations.

D. Exchange Controls

There are no restrictions on ownership of our preferred shares by individual or legal entities domiciled outside Brazil. However, the right to convert dividend payments and proceeds from the sale of our shares into foreign currency and to remit such amounts abroad is subject to restrictions under foreign investment legislation which generally require, among other things, that the relevant investment be registered with the Central Bank and the CVM.

Foreign investors may register their investment in our shares under Law 4,131 of September 3, 1962 or Resolution 2,689 of January 26, 2000, both as amended. Registration under Resolution 2,689 affords favorable tax treatment to non-Brazilian investors who are not residents in a tax haven jurisdiction (i.e. countries that do not impose income tax or where the maximum income tax rate is lower than 20%), as defined by Brazilian tax laws.

Under Resolution 2,689, non-Brazilian investors may invest in almost all financial assets and engage in almost all transactions available in the Brazilian financial and capital markets, provided that certain requirements are fulfilled. In accordance with Resolution 2,689, the definition of non-Brazilian investor includes individuals, legal entities, mutual funds and other collective investment entities, domiciled or headquartered abroad.

Table of Contents

Under Resolution 2,689, a non-Brazilian investor must:

appoint at least one representative in Brazil, with powers to perform actions relating to its investment;

appoint an authorized custodian in Brazil for its investment;

register as a non-Brazilian investor with the CVM; and

register its foreign investment with the Central Bank.

Securities and other financial assets held by non-Brazilian investors pursuant to Resolution 2,689 must be registered or maintained in deposit accounts or under the custody of an entity duly licensed by the Central Bank or the CVM. In addition, securities trading is restricted to transactions carried out in the stock exchanges or through organized over-the-counter markets licensed by the CVM, except for transfers resulting from a corporate reorganization, or occurring upon the death of an investor by operation of law or will. See Item 10.E. Additional Information – Taxation – Brazilian Tax Consequences for more information.

Foreign investors must be registered with the Brazilian internal revenue service (Receita Federal) pursuant to the Regulatory Instruction 748, dated as of June 28, 2007. This registration process is undertaken by the investor's legal representative in Brazil.

Resolution 1,927 of the National Monetary Council provides for the issuance of depositary receipts in foreign markets in respect of shares of Brazilian issuers. Accordingly, the proceeds from the sale of ADSs by holders of American Depositary Receipts outside Brazil are free of Brazilian foreign investment controls and holders of ADSs who are not resident in a tax haven jurisdiction will be entitled to favorable tax treatment.

The right to convert dividend payments and proceeds from the sale of our shares into foreign currency and to remit such amounts outside Brazil is subject to restrictions under foreign investment legislation which generally requires, among other things, that the relevant investment be registered with the Central Bank. Restrictions on the remittance of foreign capital abroad could hinder or prevent the custodian for the preferred shares represented by ADSs, or holders who have exchanged ADSs for preferred shares, from converting dividends, distributions or the proceeds from any sale of preferred shares, as the case may be, into U.S. dollars and remitting such U.S. dollars abroad. Delays in, or refusal to, granting the required government approval for conversions of Brazilian currency payments and remittances abroad could adversely affect holders of ADSs.

We have obtained a certificate of registration in the name of The Bank of New York, the depositary. Pursuant to this certificate, the custodian and the depositary are able to convert dividends and other distributions with respect to the preferred shares represented by ADSs into foreign currency and to remit the proceeds outside Brazil. If a holder exchanges ADSs for preferred shares, such holder may continue to rely on the depositary's certificate of capital registration for only five business days after such exchange. After that, such holder must seek to register its investment directly with the Central Bank. Thereafter, unless the holder has registered its investment with the Central Bank, such holder may not convert into foreign currency and remit outside Brazil the proceeds from the disposition of, or distributions with respect to, such preferred shares. Such holder generally will be subject to less favorable Brazilian tax treatment than a holder of ADSs.

Before March 14, 2005, there were two principal foreign exchange markets in Brazil, in which notes were freely negotiated but could be strongly influenced by Central Bank intervention:

the commercial rate exchange market dedicated principally to trade and financial foreign exchange transactions such as the buying and selling of registered investments by foreign entities, the purchase or sale of shares, or the payment of dividends or interest with respect to shares; and

the floating rate exchange market that was generally used for transactions not conducted through the commercial foreign exchange market.

Table of Contents

On March 4, 2005, the National Monetary Council enacted Resolution No. 3265, pursuant to which the commercial rate exchange market and the floating rate exchange market were unified in a sole exchange market, effective as of March 14, 2005. The new regulation allows, subject to certain procedures and specific regulatory provisions, the purchase and sale of foreign currency and the international transfer of *reais* by a person or legal entity, without limitation of the amount involved, provided that the transaction is legal.

Under Brazilian law, whenever there is a serious imbalance in Brazil's balance of payments or reasons to foresee a serious imbalance, the Brazilian government may impose temporary restriction on the remittance of foreign currency abroad and on the conversion of Brazilian currency into foreign currencies. Such restrictions may hinder or prevent the custodian or holders who have exchanged ADSs for underlying preferred shares from converting distributions or the proceeds from any sale of such shares, as the case may be, into U.S. dollars and remitting such U.S. dollars abroad.

E. Taxation

This description does not purport to be a comprehensive description of all of the tax considerations that may be relevant to any particular investor, including tax considerations that arise from rules of general application to all taxpayers or to certain classes of investors or that are generally assumed to be known by investors.

This summary is based upon tax laws of Brazil and the United States as of the date of this annual report, which are subject to change, possibly with retroactive effect, and to differing interpretations. You should consult your own tax advisors as to the Brazilian, United States or other tax consequences of the purchase, ownership and disposition of preferred shares or ADSs, including, in particular, the effect of any non U.S., state or local tax laws.

Although there is at present no income tax treaty between Brazil and the United States, the tax authorities of the two countries have had discussions that may culminate in such a treaty. No assurance can be given, however, as to whether or when a treaty will enter into force or how it will affect the U.S. holders of preferred shares or ADSs.

Brazilian Tax Consequences

General. The following discussion summarizes the main Brazilian tax consequences of the acquisition, ownership and disposal of our preferred shares or ADSs, as the case may be, by a holder that is not domiciled in Brazil for purposes of Brazilian taxation and, in the case of preferred shares, has registered its investment in such securities with the Central Bank as a direct investment (in each case, a Non-Brazilian Holder). The following discussion does not address all of the Brazilian tax considerations applicable to any particular Non-Brazilian Holder. Therefore, each Non-Brazilian Holder should consult his or her own tax adviser concerning the Brazilian tax consequences of an investment in our preferred shares or ADSs.

Taxation of dividends. Dividends paid by us, including stock dividends and other dividends paid in property, to the depositary in respect of the preferred shares, or to a Non-Brazilian Holder in respect of preferred shares, are currently exempted from withholding tax in Brazil to the extent that the dividends are paid out of profits as of January 1, 1996. Dividends relating to profits generated prior to January 1, 1996 may be subject to Brazilian withholding income tax at varying rates, depending on the year the profits were generated.

Payments of Interest on Capital. Law No. 9,249, dated as of December 26, 1995, as amended, permits Brazilian corporations to make distributions to shareholders of interest on net equity, or interest attributed to shareholders' equity. These distributions may be paid in cash. Such payments represent a deductible expense from the payor's corporate income tax and social contribution tax basis. This interest is limited to the daily pro rata variation of the Federal Government's long-term interest rate, as determined by the Central Bank from time to time, and cannot exceed the greater of:

50% of net income (after the social contribution on net profits and before the provision for corporate income tax, and the amounts attributable to shareholders as interest on net equity) for the period in respect of which the payment is made; or

50% of the sum of retained profits and profits reserves as of the date of the beginning of the period in respect of which the payment is made.

Table of Contents

Any payment of interest on capital to shareholders (including holders of ADSs in respect of preferred shares) is subject to a withholding income tax at a rate of 15%, or 25% if the Non-Brazilian Holder is domiciled in a jurisdiction that does not impose income tax or where the maximum income tax rate is lower than 20% or where the local legislation imposes restrictions on disclosing the shareholding composition or the ownership of the investment (Tax Haven Holder). These payments may be included, at their net value, as part of any mandatory dividend.

To the extent that payments of interest on capital are included as part of a mandatory dividend, we are required to distribute an additional amount to ensure that the net amount received by shareholders, after payment of the applicable withholding income tax is at least equal to the mandatory dividend.

Distributions of interest on net equity to foreign holders may be converted into U.S. dollars and remitted outside Brazil, subject to applicable exchange controls, to the extent that the investment is registered with the Central Bank.

We cannot assure you if our Board of Directors will determine that future distributions should be made by means of dividends or interest on capital.

Taxation of gains. According to Law no. 10,833/03, the gains recognized on a disposal of assets located in Brazil, such as our preferred shares, by a Non-Brazilian Holder, are subject to withholding income tax in Brazil. This rule is applicable regardless of whether the disposal is conducted in Brazil or abroad and/or if the disposal is made or not to an individual or entity resident or domiciled in Brazil.

As a general rule, capital gains realized as a result of a disposal transaction are the positive difference between the amount realized on the disposal of the preferred shares and the respective acquisition cost.

Capital gains realized by Non-Brazilian Holders on the disposal of preferred shares sold on the Brazilian stock exchange (which includes the transactions carried out on the organized over-the-counter market):

are subject to the withholding income tax at a zero percent rate, when realized by a Non-Brazilian Holder that (i) has registered its investment in Brazil before the Central Bank under the rules of the Brazilian Monetary Counsel (Registered Holder) and (ii) is not a Tax Haven Holder; and

are subject to income tax at a rate of 15% with respect to gains realized by a Non-Brazilian Holder that is not a Registered Holder (including a Non-Brazilian Holder who qualifies under Law No. 4,131) and gains earned by Tax Haven Holders that are Registered Holders. In this case, a withholding income tax of 0.005% shall be applicable and can be offset against any income tax due on the capital gain.

Any other gains realized on the disposition of preferred shares that are sold on the Brazilian stock exchange:

are subject to income tax at a rate of 15% when realized by any Non-Brazilian Holder that is not a Tax Haven Holder, no matter if a Registered Holder or not; and

are subject to income tax at a rate of 25% when realized by a Tax Haven Holder, no matter if a Registered Holder or not.

In the cases above, if the gains are related to transactions conducted on the Brazilian non-organized over-the-counter market with intermediation, the withholding income tax of 0.005% shall also be applicable and can be offset against any income tax due on the capital gain.

Any exercise of preemptive rights relating to preferred shares will not be subject to Brazilian income tax. Gains realized by a Non-Brazilian Holder on the disposal of preemptive rights will be subject to Brazilian income tax according to the same rules applicable to disposal of preferred shares.

There can be no assurance that the current favorable tax treatment of Registered Holders will continue in the future.

Table of Contents*Sale of ADS and preferred shares by U.S. Holders to other non-residents in Brazil*

Pursuant to Section 26 of Law No. 10,833, published on December 29, 2003, the sale of property located in Brazil involving non-resident investors is subject to Brazilian income tax as of February 1, 2004. Our understanding is that ADSs do not qualify as property located in Brazil and, thus, should not be subject to the Brazilian withholding tax. Insofar as the regulatory norm referred to in Section 26 is recent and generic and has not been tested through the administrative or judicial courts, we are unable to assure the final outcome of such discussion.

Gains on the exchange of ADS for preferred shares

Although there is no clear regulatory guidance, the exchange of ADSs for preferred shares should not be subject to Brazilian tax. Non-Brazilian Holders may exchange their ADSs for the underlying preferred shares, sell the preferred shares on a Brazilian stock exchange and remit abroad the proceeds of the sale within five business days from the date of exchange (in reliance on the depositary's electronic registration). Our understanding is that the exchange of ADRs for the underlying preferred shares and sale of preferred shares within the period mentioned above by a Non-Brazilian Holder that (i) is a Registered Holder and (ii) is not a Tax Haven Holder should not be subject to the withholding income tax.

Upon receipt of the underlying preferred shares in exchange for ADSs, Non-Brazilian Holders may also elect to register with the Central Bank the U.S. dollar value of such preferred shares as a foreign portfolio investment under the rules of the Brazilian Monetary Council, which will entitle them to the tax treatment referred above in connection with Registered Holders.

Alternatively, the Non-Brazilian Holder is also entitled to register with the Central Bank the U.S. dollar value of such preferred shares as a foreign direct investment under Law 4,131/62, in which case the respective sale would be subject to the tax treatment of Non-Brazilian Holders that are not Registered Holders.

Gains on the exchange of preferred shares for ADS

The deposit of preferred shares in exchange for the ADSs may be subject to Brazilian income tax on capital gains if the amount previously registered with the Central Bank as a foreign investment in preferred shares (Direct investment registered under Law 4,131) or, in the case of Registered Holders, the acquisition cost of the preferred shares, as the case may be, is lower than:

the average price per preferred share on the Brazilian stock exchange on which the greatest number of such preferred shares were sold on the day of the deposit; or

if no preferred shares were sold on that day, the average price on the Brazilian stock exchange on which the greatest number of preferred shares were sold during the 15 preceding trading sessions.

The difference between the amount previously registered, or the acquisition cost, as the case may be, and the average price of the preferred shares, calculated as set forth above, is considered a capital gain subject to income tax at a rate of 15%, or 25% for Tax Haven Holders.

Taxation of Foreign Exchange Transactions (IOF/Exchange). IOF/Exchange is imposed on the conversion of *reais* into foreign currency and on the conversion of foreign currency into *reais*. Currently, the IOF/Exchange rate for almost all foreign currency exchange transactions is 0.38%. In the case of transactions on a stock exchange or under the regulations issued by the Monetary Council of Brazil, the applicable rate is zero. The Brazilian Federal Government is permitted to increase the rate at any time, up to 25%. However, any increase in rates only applies to future transactions.

Taxation of Bonds and Securities Transactions: (IOF/Bonds). Law No. 8,894, dated as of June 21, 1994, created the IOF/Bonds, which may be imposed on any transaction involving bonds and securities, even if the transaction includes Brazilian stock, futures or commodities exchanges. The rate of IOF/Bonds with respect to transactions of preferred shares and ADSs is currently zero, although the executive branch may increase the rate up to 1.5% per day during the terms of the securities, but only with respect to future transactions relating to preferred shares or ADSs.

Table of Contents

Other Brazilian Taxes. Some Brazilian states impose gift and inheritance tax on gifts or bequests made by individuals or entities not domiciled or residing in Brazil to individuals or entities domiciled or residing within such states. There are no Brazilian stamp, issue, registration, or similar taxes or duties payable by holders of preferred shares or ADSs.

U.S. Federal Income Tax Consequences

The following is a discussion of the material U.S. federal income tax consequences of the ownership and disposition of preferred shares or ADSs, but it does not purport to be a comprehensive description of all of the tax considerations that may be relevant to holders of preferred shares or ADSs, and does not address state, local, foreign or other tax laws. The discussion applies only to a U.S. Holder (as defined below) that holds preferred shares or ADSs as capital assets for tax purposes and does not address special classes of holders, such as dealers and traders in securities or foreign currencies, financial institutions, insurance companies, tax-exempt entities, persons owning, directly, indirectly or constructively, 10% or more of our voting shares, persons holding preferred shares or ADSs as part of a hedging or conversion transaction or straddle, persons entering into a constructive sale with respect to preferred shares or ADSs, persons whose functional currency for U.S. federal income tax purposes is not the U.S. dollar, persons liable for alternative minimum tax, partnerships or other entities classified as partnerships for U.S. federal income tax purposes, or persons who have ceased to be United States citizens or to be taxed as resident aliens, or persons who acquired our ADSs or preferred shares pursuant to the exercise of any employee stock option or otherwise as compensation.

You should consult your tax advisors concerning the overall tax consequences to you, including the consequences under foreign, state and local laws, of the acquisition, ownership and disposition of preferred shares or ADSs.

This discussion is based on the tax laws of the United States, including the Internal Revenue Code of 1986, as amended, administrative pronouncements, judicial decisions and final, temporary and proposed Treasury Regulations, all as of the date hereof and changes to any of which may affect the tax consequences described herein, possibly with retroactive effect. In addition, this discussion is based in part on representations of the depository and assumes that each obligation provided for in or otherwise contemplated by the Deposit Agreement and any other related document will be performed in accordance with its terms.

This discussion applies to you only if you are a U.S. Holder. For purposes of this discussion, a U.S. Holder is a beneficial owner of preferred shares or ADSs that is for U.S. federal income tax purposes (i) a citizen or resident of the United States of America, (ii) a corporation, or other entity taxable as a corporation, organized under the laws of the United States of America or any political subdivision thereof or (iii) an estate or trust the income of which is subject to United States federal income taxation regardless of its source. This discussion assumes that we were not a passive foreign investment company in 2007 (as discussed below).

In general, U.S. Holders of ADSs will be treated for U.S. federal income tax purposes as owners of the preferred shares underlying the ADSs. Accordingly, no gain or loss will be recognized if a U.S. Holder exchanges ADSs for the underlying shares represented by those ADSs.

The U.S. Treasury has expressed concerns that parties to whom ADSs are released prior to delivery of shares to the depository (a pre-release) may be taking actions that are inconsistent with the claiming of foreign tax credits by U.S. Holders of ADSs. Such actions would also be inconsistent with claiming the reduced rate applicable to dividends received by non-corporate holders. Accordingly, the analysis of the creditability of Brazilian taxes and the availability of the reduced rate for dividends received by certain non-corporate holders, each as described below, could be affected by actions that may be taken by the parties to whom ADSs are pre-released.

Table of Contents

Taxation of dividends. Distributions paid on ADSs or preferred shares will be includable in the income of a U.S. Holder as ordinary dividend income to the extent paid out of current or accumulated earnings and profits of Ultrapar, as determined for U.S. federal income tax purposes. Because the Company does not maintain calculations of its earnings and profits under U.S. federal income tax principles, it is expected that distributions generally will be reported to U.S. Holders as dividends. Subject to applicable limitations and the discussion above regarding concerns expressed by the U.S. Treasury, under current law, dividends paid to non-corporate U.S. Holders may be taxable at a maximum rate of 15% in taxable years beginning before January 1, 2011. U.S. Holders should consult their tax advisors regarding the availability of this lower tax rate in their particular circumstances. Bills have been introduced in both the U.S. House and the U.S. Senate that would, if enacted, deny the favorable tax rates described in the preceding paragraph for dividends paid in respect of certain securities where the issuer of the securities is allowed a deduction under the tax laws of a foreign country with respect to such dividend. It is unclear how the proposed legislation would apply to securities such as the preferred shares where distributions may be made in the form of interest on capital. The proposed legislation would apply to dividends received after the date of its enactment. It is not possible to predict whether the proposed legislation will be enacted, either in its present form or any other form. U.S. Holders should consult their tax advisers with respect to the potential enactment of currently proposed legislation and its application in their particular circumstances. For purposes of these rules, the amount of any distribution of property other than cash will be the fair market value of such property on the date of distribution. Dividends will be included in a U.S. Holder's income on the date of the U.S. Holder's or in the case of ADSs, the Depository's receipt of the dividend. In addition, the taxable amount of any distribution will include the amount of Brazilian tax withheld on the amount distributed, if any, and the amount of a distribution paid in reais will be calculated by reference to the exchange rate for converting reais into U.S. dollars in effect on the date the distribution is received by the depository, in the case of ADSs, or the U.S. Holder, in the case of preferred shares directly held by a U.S. Holder. If the dividend is converted into U.S. dollars on the date of receipt, a U.S. Holder generally should not be required to recognize foreign currency gain or loss in respect of the dividend income. The U.S. Holder may have foreign currency gain or loss if the amount of such dividend is not converted into U.S. dollars on the date of its receipt.

Dividends paid by us generally will be treated as foreign source dividend income to U.S. Holders and will not be eligible for the dividends received deduction generally allowed to U.S. corporations under the Code. Subject to applicable limitations that may vary depending upon the U.S. Holder's circumstances and the discussion above regarding concerns expressed by the U.S. Treasury, Brazilian withholding tax, if any, paid in connection with any distribution with respect to preferred shares may be claimed as a credit against the U.S. federal income tax liability of a U.S. Holder if such U.S. Holder elects for that year to credit all foreign income taxes; otherwise, such Brazilian withholding tax may be taken as a deduction. The limitation on foreign taxes eligible for credit is calculated separately with respect to passive income. U.S. Holders should consult their tax advisors concerning the availability of the foreign tax credit in their particular circumstances.

Taxation of capital gains. For U.S. income tax purposes, gain or loss realized by a U.S. Holder upon the sale, exchange or other disposition of a preferred share or ADS will be U.S. source capital gain or loss in an amount equal to the difference between the amount realized on the disposition of the preferred share or ADS and the U.S. Holder's tax basis in the preferred share or ADS disposed of, in each case as determined in U.S. dollars. The gain or loss will be long term capital gain or loss if the U.S. Holder's holding period in the preferred share or ADS exceeds one year. If a Brazilian tax is withheld on the sale or disposition of preferred shares or ADSs to the extent, a U.S. Holder's amount realized will include the gross amount of the proceeds of such sale or disposition before deduction of the Brazilian tax. See *Brazilian Tax Considerations Taxation of Gains* for a description of when a disposition may be subject to taxation by Brazil. Such gain or loss will generally be U.S.-source gain or loss for foreign tax credit purposes. Consequently, if Brazilian tax is imposed on the sale or disposition of preferred shares or ADSs, the U.S. Holder may not be able to credit the Brazilian tax against the U.S. income tax. U.S. Holders should consult their tax advisors as to whether the Brazilian tax on gains may be creditable against tax on foreign source income from other sources.

Passive foreign investment company. Special U.S. tax rules apply to U.S. Holders that own shares or ADSs in a passive foreign investment company (PFIC). In general, a foreign corporation is PFIC in a particular taxable year if either:

75% or more of its gross income consists of passive income, such as dividends, interest, rents and royalties; or

50% or more of its assets, by value, determined on the basis of a quarterly average, consists of assets that produce, or are held for the production of, passive income.

Based on a review of our income and assets, we believe that we are not a PFIC for U.S. federal income tax purposes for our 2007 taxable year. However, since PFIC status depends upon the composition of a company's income and assets and the market value of its assets (including, among others, less than 25 percent equity investments) from time to time there can be no assurance that we will not be considered a PFIC for any taxable year.

Table of Contents

If we were a PFIC for any taxable year during which a U.S. Holder held preferred shares or ADSs, gain recognized by such U.S. Holder on the sale or other disposition (including certain pledges) of the preferred shares or ADSs would be allocated ratably over the U.S. Holder's holding period for the preferred shares or ADSs. The amounts allocated to the taxable year of the sale or other disposition and to any year before we became a PFIC would be taxable as ordinary income. The amount allocated to each other taxable year would be subject to tax at the highest rate in effect for that year for individuals or corporations, as appropriate, and an interest charge would be imposed on the amount allocated to such taxable year. Similar rules would apply to any distributions in respect of the preferred shares or ADSs to the extent in excess of 125 percent of the average of the annual distributions on preferred shares or ADSs received by the U.S. Holder during the preceding three years or the U.S. Holder's holding period, whichever is shorter. Certain elections may be available to U.S. persons that would result in alternative treatments (such as mark-to-market treatment) of the preferred shares or ADSs.

In addition, if we are treated as a PFIC in a taxable year in which we pay a dividend or the prior taxable year, the 15% dividend rate discussed above with respect to dividends paid to non-corporate holders will not apply in that year.

United States backup withholding and information reporting. Payment of dividends and other proceeds in connection with the preferred shares or ADSs made within the United States or through certain U.S.-related financial intermediaries generally are subject to information reporting and to backup withholding unless the U.S. Holder (i) is a corporation or comes within certain other exempt categories and, when required, demonstrates this fact, or (ii) in the case of backup withholding, provides a correct taxpayer identification number on a properly completed Internal Revenue Service Form W-9 or a substitute form and certifies that it is not subject to backup withholding. The amount of any backup withholding from a payment to a U.S. Holder is creditable against the U.S. Holder's federal income tax liability and may entitle the U.S. Holder to a refund, provided that the required information is timely furnished to the Internal Revenue Service.

H. Documents on Display

Statements contained in this annual report as to the contents of any contract or other document referred to are not necessarily complete, and each of these statements is qualified in all respects by reference to the full text of such contract or other document filed as an exhibit hereto. A copy of the complete annual report including the exhibits and schedules filed herewith may be inspected without charge at the public reference facilities maintained by the SEC at Room 1024, 450 Fifth Street, N.W., Washington, D.C. 20549, and at the SEC's regional offices located at 233 Broadway, New York, N.Y. 10279 and North Western Atrium Center, 500 West Madison Street, Suite 1400, Chicago, Illinois 60661-2511. Copies of such materials may be obtained by mail from the Public Reference Section of the SEC, 450 Fifth Street, N.W., Washington, D.C. 20549, at prescribed rates. Such reports and other information may also be inspected at the offices of the New York Stock Exchange, 11 Wall Street, New York, New York 10005, on which ADSs are listed. In addition the SEC maintains a website that contains information filed electronically with the SEC, which can be accessed over the Internet at <http://www.sec.gov>.

We are subject to the information and periodic reporting requirements of the Securities Exchange Act of 1934 as amended, and, in accordance therewith, file periodic reports and other information with the SEC. However, as a foreign private issuer, we are exempt from the rules under the Exchange Act relating to the furnishing and content of proxy statements and relating to short-swing profits reporting and liability.

Table of Contents

We furnish to The Bank of New York, as depositary, copies of all reports we are required to file with the SEC under the Exchange Act, including our annual reports in English, containing a brief description of our operations and our audited annual consolidated financial statements which are prepared in accordance with accounting practices adopted in Brazil and include a reconciliation to U.S. GAAP. In addition, we are required under the Deposit Agreement to furnish the depositary with copies of English translations to the extent required under the rules of the SEC of all notices of meetings of holders of preferred shares and other reports and communications that are generally made available to holders of preferred shares. Under certain circumstances, the depositary will arrange for the mailing, at our expense, of these notices, other reports and communications to all ADS holders.

We also file financial statements and other periodic reports with the CVM located as Rua Sete de Setembro, 111, Rio de Janeiro, Brazil 20159-900.

I. Subsidiary Information

Not applicable.

ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to various market risks, primarily related to variable interest rates and foreign exchange rates. Market risk is the potential loss arising from adverse changes in market rates and prices, such as foreign currency exchange rates and interest rates. We do not enter into derivative financial instruments for speculative purposes. Our market risks are mitigated by our high level of financial investments.

See Notes 4, 19 and 25 I (i) to our consolidated financial statements for a discussion of the accounting policies for derivative instruments and information with respect to financial instruments.

Interest Rate Risk

Substantially all of our debt obligations in *reais* are subject to variable rates of interest based on either the TJLP, the CDI interest rate, the IGP-M inflation index and the FNE index. Our foreign currency borrowings, however, are substantially subject to fixed rates of interest. As of December 31, 2007, we did not have any derivative contracts outstanding which could limit exposure to variations in the TJLP or the IGP-M, primarily because such instruments are not available in the Brazilian market at reasonable prices. Nevertheless, our exposure to interest rate risk is partially limited by our Brazilian currency variable interest investments, which generally earn the overnight interest rates paid on CDI. In addition to the exposure with respect to existing borrowings, we would be exposed to interest rate volatility with respect to any future debt issuance.

Table of Contents

The table below provides information as of December 31, 2007 about our debt obligations in foreign currency and in *reais* that are subject to variable and fixed rates of interest. The table summarizes information on instruments and transactions that are sensitive to foreign currency exchange rates and interest rates:

Debt	Average interest rate	Fair value	Outstanding debt R\$ (in millions of reais)	Principal by year of maturity*				
				2008	2009	2010	2011	2012 and thereafter
U.S. dollar borrowings	7.2%	976.5	959.4	367.0	30.3	6.1	2.9	553.0
Borrowings indexed to the UMBNDES	9.7%	6.1	6.0	3.5	2.1	0.4		
Borrowings indexed to the THIE + MX\$	1.5%	23.0	23.0	8.1	5.2	3.6	3.2	2.9
Borrowings indexed to the TJLP	2.5%	384.0	380.6	105.7	100.7	65.8	48.0	60.5
Borrowings indexed to the CDI	102.8%							
	of							
	CDI	1,578.6	1,578.7	1,228.7	116.7	116.7	116.7	
Borrowings indexed to the IGP-M	6.5%	2.5	2.5	2.5				
Borrowings indexed to the FNE (1)	9.78%	103.6	103.6	0.7	5.7	11.4	11.4	74.3
Others		0.3	0.3	0.2	0.1			
Financial Institutions		123.9	123.9	102.3	21.6			
Subtotal		3,198.4	3,177.9	1,818.6	282.4	204.0	182.1	690.7
Unrealized losses on swaps transactions		85.1	84.8	84.8				
Total		3,283.5	3,262.6	1,903.4	282.4	204.0	182.1	690.7

* Figures in 2008 include interest accrued until December 31, 2007.

(1) Accounts for a 15% reduction in the interest rate as a premium for complying with established payment dates.

Foreign Exchange Risk

A substantial portion of our debt obligations is denominated in U.S. dollars. In addition, a significant portion of our raw materials, are denominated in, or indexed to, U.S. dollar. Most of our revenues are denominated in *reais*, although sales prices of products of the chemicals segment are linked to international market prices established in U.S. dollars. As a result, we are exposed to currency exchange risks that may adversely affect our business, financial condition and results of operations, as well as our ability to meet our debt service obligations.

We manage the foreign exchange risks associated with the scheduled payments related to our obligations by investing in U.S. dollar-denominated assets and in foreign currency swap contracts, under which we pay variable interest in *reais* based on the interbank certificate of deposit rate, or CDI, and receive fixed interest in U.S. currency.

The table below presents our U.S. dollar net swap position at December 31, 2007:

Swap	Maturity		
	2007	2008	2009 and thereafter
Notional amount of swaps (in millions of reais)(1)		223.2	
Average receiving rate		US\$ + 5.23%	
Average payment rate(2)		96.07% CDI	

Edgar Filing: ULTRAPAR HOLDINGS INC - Form 20-F

- (1) Notional amount converted according to the commercial selling rate reported by Banco Central do Brasil (PTAX) at December 31, 2007.
- (2) CDI Interbank Certificate of Deposit Rate.

Table of Contents

We also manage the foreign exchange risks related to our U.S. dollar denominated and Mexican currency denominated assets through foreign currency hedge contracts, as follows:

Swap	2007	Maturity	2009 and thereafter
		2008	
Notional amount of swaps (in millions of reais)(1)		24.8	
Average receiving rate		US\$	
Average payment rate(2)		MX\$ + 3.56%	

(1) Notional amount converted according to the commercial selling rate reported by Banco Central do Brasil (PTAX) at December 31, 2007.

(2) MX\$ is the Mexican currency.

Swap	Maturity
	2008
Notional amount of swaps (in millions of reais)(1)	73.1
Average receiving rate	37.15% CDI
Average payment rate	US\$

(1) Notional amount converted according to the commercial selling rate reported by Banco Central do Brasil (PTAX) at December 31, 2006.

ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES

Not applicable.

PART II**ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES**

None.

ITEM 14 MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS

At the Special Meeting of the Preferred Shareholders of Ultrapar held on May 18, 2004, our preferred shareholders approved a change in dividend rights to make the dividend right of preferred shareholders equal to those of common shareholders by abolishing the right of preferred shareholders to receive dividends that are at least 10% higher than those received by common shareholders.

On May 18, 2004, we held an Extraordinary General Meeting which approved amendments of our bylaws. The amendments were (i) the registration in our bylaws of tag along rights for all Company shareholders, at 100% of the offer price, a provision that was previously provided for in our 2000 shareholders agreement; and (ii) to make the dividend right of preferred shareholders equal to those of common shareholders as described above.

On September 22, 2004, the shareholders of Ultra S.A., a holding company that controls Ultrapar, signed a shareholders agreement that primarily aimed at maintaining the controlling shareholder block in Ultrapar. For more information, see Item 7.A. Major Shareholders and Related Party Transactions Major Shareholders.

ITEM 15. CONTROLS AND PROCEDURES

(a) Disclosure Controls and Procedures

As of December 31, 2007, under management's supervision and with its participation, including our chief executive officer and chief financial officer, we performed an evaluation of our disclosure controls and procedures

Table of Contents

for the period relating to the information contained in this 20F report. Based on this evaluation, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures are effective as of December 31, 2007 at the reasonable assurance level for the purpose of collecting, analyzing and disclosing the information that we are required to disclose in the reports we file under the Securities Exchange Act of 1934, within the time periods specified in the SEC's rules and forms. Our management necessarily applied its judgment in assessing the costs and benefits of such controls and procedures.

(b) Management's Annual Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act). Ultrapar's internal control system was designed to provide reasonable assurance as to the integrity and reliability of the published financial statements. All internal control systems, no matter how well designed, have inherent limitations and can provide only reasonable assurance that the objectives of the control system are met.

Management evaluated the internal control over financial reporting under the supervision of our Chief Executive Officer, or CEO and Chief Financial Officer, or CFO as of December 31, 2007. Management evaluated the effectiveness of our internal control over financial reporting based on the criteria set out in the Committee of Sponsoring Organizations of the Treadway Commission (COSO) framework. In accordance with the Securities and Exchange Commission's published guidance, the Company's assessment of the internal control over financial reporting excluded the 2007 acquisition of Ipiranga Group, which represents R\$ 2,875.5 million of total assets, as of December 31, 2007 and R\$ 14,915.6 million of revenues for the year then ended. Ultrapar's management concluded that as of December 31, 2007, our internal control over financial reporting were adequate and effective, based on those criteria.

Our independent registered public accounting firm, KPMG Auditores Independentes, has issued an attestation report on management's assessment of our internal controls over financial reporting as of December 31, 2007. The report on the audit of our internal control over financial reporting is included below.

(c) Report of the Registered Public Accounting Firm on Internal Control over Financial Reporting

The Report of independent registered public accounting firm on internal control over financial reporting issued by our independent registered public accounting firm, KPMG Auditores Independentes, is presented below.

ITEM 16. REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Ultrapar Participações S.A. and Subsidiaries

Independent auditors' report

The Board of Directors and Shareholders

Ultrapar Participações S.A.

We have audited Ultrapar Participações S.A. and subsidiaries (the Company) internal control over financial reporting as of December 31, 2007, based on the criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Edgar Filing: ULTRAPAR HOLDINGS INC - Form 20-F

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Ultrapar Participações S.A. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

As indicated in the accompanying Management's Report on Internal Control over Financial Reporting, management's assessment of and conclusion on the effectiveness of internal control over financial reporting, did not include the assessment of the internal controls of Ipiranga group, which is included in the 2007 consolidated financial statements of Ultrapar Participações S.A. which represents R\$ 2,875.5 million of total assets, as of December 31, 2007 and R\$ 14,915.6 million and R\$ 261.0 million of revenues and net income, respectively, for the year then ended.

The Company completed its acquisition of Ipiranga on December 18, 2007, and as permitted by the Securities and Exchange Commission's guidance related to the Management's Report on Internal Control Over Financial Reporting and Certification of Disclosure in Exchange Act Periodic Reports, management did not assess the effectiveness of internal control over financial reporting of Ipiranga group. Our audit of internal control over financial reporting of Ultrapar Participações S.A. also did not include an evaluation of the internal control over financial reporting of the Ipiranga group.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Ultrapar Participações S.A. and its subsidiaries as of December 31, 2007, and the related consolidated statements of operations, shareholders' equity and comprehensive income, changes in financial position and cash flows for the year then ended, and our report dated February 11, 2008 (except for the notes 3a, 25 and 26, as to which the date is June 25, 2008) expressed an unqualified opinion on those consolidated financial statements.

São Paulo, SP - Brazil

February 11, 2008, except for the controls over note 25, as to which the date is June 25, 2008.

KPMG Auditores Independentes

ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT

In July 2005, our bylaws were revised to provide for the establishment of a Fiscal Council with permanent operations constituted of no less than three and no more than five members and their respective alternate members. The Fiscal Council is a separate corporate body independent of our management and our external independent registered public accounting firm.

Our Fiscal Council acts as an audit committee pursuant to the requirements of the Sarbanes-Oxley Act. Under Rule 10A-3(c)(3) of the Exchange Act, non-U.S. issuers, such as Ultrapar, are exempt from the audit committee requirements of Section 303A of the New York Stock Exchange Listed Company Manual if they establish, according to their local law or regulations, another body that acts as an audit committee.

Ultrapar has determined that it will not appoint an audit committee financial expert. We believe that more than one of our Fiscal Council members have the skills, experience and education that qualify them to be an audit committee financial expert, as defined by current SEC rules.

ITEM 16B. CODE OF ETHICS

Edgar Filing: ULTRAPAR HOLDINGS INC - Form 20-F

In 2004 we established a code of ethics which covered (i) the Board of Directors; (ii) the Executive Board (including the chief executive officer and the chief financial officer); (iii) the Fiscal Council of Ultrapar; (iv) the Board of Directors and Executive Board of its subsidiaries; and (v) remaining bodies with technical or advisory functions that are directly subordinated to the Board of Directors, to the Executive Board or to the Fiscal Committee

Table of Contents

of Ultrapar. In 2006 our code of ethics was modified to cover all our employees. The objective of this code is (i) to reduce the subjectivity of personal interpretations of ethical principles; (ii) to be a formal and institutional benchmark for the professional conduct of the employees, including the ethical handling of actual or apparent conflicts of interests, becoming a standard for the internal and external relationship of the Company with its stakeholders, namely: shareholders, clients, employees, partners, suppliers, service providers, labor unions, competitors, society, government and the communities in which it operates; and (iii) to ensure that the daily concerns with efficiency, competitiveness and profitability do not override ethical behavior. The code of ethics also covers new employees from companies acquired by Ultrapar in 2007.

You can obtain a copy of our code of ethics, free of charge, at our website (www.ultra.com.br), or by requesting a copy from the Investor Relations Department (e-mail: invest@ultra.com.br).

ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The relationship with our independent auditors in respect to the contracting of services unrelated to the external audit is based on principles that preserve the independence of the auditor. Our board of directors approves our financial statements, the performance by our auditors of audit and permissible non-audit services, and associated fees, supported by our Fiscal Council, which acts as an audit committee pursuant to the requirements of the Sarbanes-Oxley Act. See Item 6.C. Directors, Senior Management and Employees Board Practices Fiscal Council and Audit Committee Exemption for more information about the responsibilities of the Fiscal Council. Our consolidated financial statements for the years ended December 31, 2007 were audited by the independent registered public accounting firm, KPMG Auditores Independentes, and our consolidated statements for the years ended 2006, 2005, 2004 and 2003 were audited by the independent registered public accounting firm, Deloitte Touche Tohmatsu Auditores Independentes.

The following table describes the total amount billed to us by KPMG for services performed in 2007 and by Deloitte for services performed in 2006 and the respective remuneration for these services.

	2007	2006
	(in thousands of Reais)	
Audit Fees	2,911.3	1,430.9
Audit Related Fees	513.2	120.7
Tax Fees		68.5
All Other Fees		
Total Consolidated Audit Fees	3,424.5	1,620.1

Audit Fees are the aggregate fees billed by independent registered public accounting firms for the audit of our consolidated and annual financial statements, reviews of interim financial statements and attestation services that are provided in connection with statutory and regulatory filings or engagements. Audit-Related Fees are fees charged by KPMG for assurance and related services. Tax Fees are fees for professional services rendered by Deloitte Touche Tohmatsu for tax advice services in 2006. For the year ended December 31, 2007 Ultrapar and its subsidiaries did not contract any service from their independent auditors that was not directly linked to the auditing of financial statements. The amount paid in 2007 is higher than 2006 given the audit services provided related to the valuation report as a result of the Acquisition.

ITEM 16D. EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES

In July 2005, our bylaws were revised to provide for the establishment of a Fiscal Council with permanent operations. Our Fiscal Council also meets the requirements for exemption from audit committee independence pursuant to the requirements of the Sarbanes-Oxley Act. Under Rule 10A-3(c)(3) of the Exchange Act, non-U.S. issuers, such as Ultrapar, are exempt from the audit committee independence requirements of Section 303A of the New York Stock Exchange Listed Company Manual if they establish, according to their local law or regulations, another body that meets certain requirements. See Item 6.C. Directors, Senior Management and Employees Board Practices Fiscal Council and Audit Committee Exemption.

The Fiscal Council meets the following requirements of the general exemption contained in Rule 10A-3(c)(3):

the Fiscal Council is established pursuant to Brazilian Corporate Law and our bylaws;

Table of Contents

under the requirements of Brazilian Corporate Law, our Fiscal Council is a separate body from our board of directors;

the Fiscal Council is not elected by Ultrapar's management and no executive officer of Ultrapar is a member of the Fiscal Council;

all of the members of the Fiscal Council meet the independence requirements from Ultrapar, the management and the auditors, as set forth by Brazilian Corporate Law and/or listing provisions in Brazil;

the Fiscal Council makes recommendations to our board of directors regarding the appointment, retention and oversight of the work of the independent auditors engaged for the purpose of preparing or issuing audit reports for Ultrapar;

the Fiscal Council adopted a complaints procedure in accordance with Rule 10A-3(b)(3) of the Exchange Act;

the Fiscal Council is authorized to engage independent counsel and other advisers, as it deems appropriate; and

Ultrapar has provided for appropriate funding, as determined by the Fiscal Council, for the payment of (i) compensation to Ultrapar's auditors engaged for the purpose of issuing audit reports, (ii) compensation to independent counsel and other advisers engaged by the Fiscal Council, and (iii) ordinary administrative expenses of the Fiscal Council in carrying out its duties.

Ultrapar's reliance on Rule 10A-3(c)(3) does not, in its opinion, materially adversely affect the ability of its Fiscal Council to act independently and to satisfy the other requirements of Rule 10A-3.

ITEM 16E. PURCHASES OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASERS

In August 2007, the Board of Directors approved a share repurchase program with a 12-month term under which we can acquire our own preferred shares at market price and hold them in treasury for subsequent sale or cancellation. The maximum number of shares that may be repurchased is 2,236,131 shares. The total shares repurchased through December 31, 2007 under this program, were 35,100 preferred shares, as follows:

Period	Total number of shares repurchased	Average price per share in reais	Total number of shares repurchased as part of publicly announced plans or programs	Maximum number of shares that may yet be repurchased under the plans or program
January 1, 2007 - January 31, 2007				2,362,131
February 1, 2007 - February 28, 2007				2,362,131
March 1, 2007 - March 31, 2007	45,000	53.12	45,000	2,317,131
April 1, 2007 - April 30, 2007	56,900	61.07	56,900	2,260,231
May 1, 2007 - May 31, 2007	160,600	59.80	160,600	2,099,631
June 1, 2007 - June 30, 2007	92,400	59.21	92,400	2,007,231
July 1, 2007 - July 31, 2007	34,500	62.95	34,500	1,972,731
August 9, 2007 - August 31, 2007*	29,100	59.52	29,100	1,943,631
September 1, 2007 - September 30, 2007				1,943,631
October, 2007 - October 31, 2007				1,943,631
November 1, 2007 - November 30, 2007				1,943,631
December 1, 2007 - December 31, 2007	6,000	59.75	6,000	1,937,631

Edgar Filing: ULTRAPAR HOLDINGS INC - Form 20-F

Total shares repurchased during 2007	418,500	59.36	418,500	1,937,631
--------------------------------------	---------	-------	---------	-----------

* Our current share repurchase program began on August 8, 2007.

PART III

ITEM 17. FINANCIAL STATEMENTS

We have responded to Item 18 in lieu of responding to this Item.

ITEM 18. FINANCIAL STATEMENTS

We file the following consolidated financial statements together with the reports of independent registered public accountants firms, as part of this annual report:

<u>Report of Independent Registered Public Accounting Firm</u>	F-2
<u>Consolidated balance sheets as of December 31, 2007 and 2006</u>	F-3
<u>Consolidated statements of income for the years ended December 31, 2007, 2006 and 2005</u>	F-4
<u>Consolidated statements of changes in stockholders' equity for the years ended December 31, 2007, 2006 and 2005</u>	F-5
<u>Consolidated statements of changes in financial position for the years ended December 31, 2007, 2006 and 2005</u>	F-6
<u>Notes to the consolidated financial statements for the years ended December 31, 2007, 2006 and 2005</u>	F-7

ITEM 19. EXHIBITS

We are filing the following documents as part of this Annual Report Form 20F:

- 1.1 Bylaws of Ultrapar, as amended on April 28, 2008.
- 2.1 Shareholders' Agreement dated March 22, 2000 (incorporated by reference to Exhibit 2.1 to Form 20-F of Ultrapar Participações S.A. filed on June 7, 2007).
- 2.2 Shareholders' Agreement dated September 22, 2004 (incorporated by reference to Exhibit 10.3 to Form F-1 of Ultrapar Participações S.A. filed on February 2, 2005, as amended).
- 2.3 Indenture in respect of the 1st issue of simple, non-convertible debentures, unsecured and without special privileges, in a single series, for public distribution, dated of February 16, 2005 (incorporated by reference our report on Form 6-K filed on March 1, 2005).
- 2.4 Indenture, dated as of December 20, 2005, among LPG International Inc., as Issuer, Ultrapar Participações S.A. and Oxiteno S.A. Indústria e Comércio, as Guarantors, JPMorgan Chase Bank, N.A., as Trustee, Transfer Agent and Registrar, J.P. Morgan Trust Bank LTD., as Principal Payment Agent and J.P. Morgan Bank Luxembourg S.A., as Luxembourg Paying Agent, Luxembourg Transfer Agent and Luxembourg Listing Agent (incorporated by reference to Exhibit 2.2 to Form 20-F of Ultrapar Participações S.A. filed on May 5, 2006).
- 2.5 Amendment dated as of March 31, 2006 to the Indenture dated as of December 20, 2005 (incorporated by reference to Exhibit 2.3 to Form 20-F of Ultrapar Participações S.A. filed on May 5, 2006).
- 2.6 Indenture regarding first tranche of the issuance of debentures in Brazil totaling R\$675 million in connection with the Ipiranga Acquisition - English Translation (incorporated by reference to Exhibit 2.6 to Form 20-F of Ultrapar Participações S.A. filed on June 7, 2007).
- 2.7 Target Companies' Shareholders Agreement entered into by and among Ultrapar, Petrobras and Braskem, dated April 18, 2007 - English Translation (incorporated by reference to Exhibit 2.7 to Form 20-F of Ultrapar Participações S.A. filed on June 7, 2007).
- 2.8

Edgar Filing: ULTRAPAR HOLDINGS INC - Form 20-F

RIFI Shareholders Agreement entered into by and among Ultrapar, Petrobras and Braskem, dated April 18, 2007 English Translation (incorporated by reference to Exhibit 2.8 to Form 20-F of Ultrapar Participações S.A. filed on June 7, 2007).

- 4.1 Share Sale and Purchase Agreement related to the sale and purchase of the entire share capital of Shell Gás (LPG) Brasil S.A. (incorporated by reference to Exhibit 10.2 to Form F-1 of Ultrapar Participações S.A. filed on February 2, 2005).

Table of Contents

- 4.2 Form of agreement between Ultragas and independent dealers (incorporated by reference to Exhibit 10.4 to Form F-1 of Ultrapar Participações S.A. filed on February 2, 2005, as amended).
- 4.3 Take or pay agreement between Tequimar and CODEBA (incorporated by reference to Exhibit 10.5 to Form F-1 of Ultrapar Participações S.A. filed on February 2, 2005, as amended).
- 4.4 The Investment Agreement entered into by and among Ultrapar, Petrobras and Braskem dated March 18, 2007 English translation, as amended by the Amendment to Investment Agreement entered into by and among Ultrapar, Petrobras and Braskem dated April 18, 2007 English Summary (incorporated by reference to Exhibit 4.4 to Form 20-F of Ultrapar Participações S.A. filed on June 7, 2007).
- 4.5 Share Purchase Agreement entered into by and among Ultrapar, Petrobras, Braskem and the Key Shareholders of RIPI, DPPI and CBPI, dated April 18, 2007 English Summary (incorporated by reference to Exhibit 4.5 to Form 20-F of Ultrapar Participações S.A. filed on June 7, 2007).
- 4.6 Braskem/Petrobras Asset Security Agreement entered into by and among Ultrapar, Petrobras and Braskem, dated April 18, 2007 English Summary (incorporated by reference to Exhibit 4.6 to Form 20-F of Ultrapar Participações S.A. filed on June 7, 2007).
- 4.7 Petrobras Asset Security Agreement entered into by and among Ultrapar, Petrobras and Braskem, dated April 18, 2007 English Summary (incorporated by reference to Exhibit 4.7 to Form 20-F of Ultrapar Participações S.A. filed on June 7, 2007).
- 6.1 Statement regarding computation of per share earnings (incorporated by reference to Note 25(V)(a) to our consolidated financial statements included in this annual report).
- 8.1 List of subsidiaries of Ultrapar (incorporated by reference to Note 3(a) to our consolidated financial statements included in this annual report).
- 12.1 Certification of Chief Executive Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 12.2 Certification of Chief Financial Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 13 Certification of Chief Executive Officer and Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
- 15.1 Documentation with respect to our corporate restructuring of 2002 (incorporated by reference in Forms 6-K, filed with the SEC on October 15, 2002, November 1, 2002 and December 6, 2002).

There are omitted from the exhibits filed with or incorporated by reference into this annual report certain promissory notes and other instruments and agreements with respect to long-term debt of our company, none of which authorizes securities in a total amount that exceeds 10% of the total assets of our company. We hereby agree to furnish to the Securities and Exchange Commission copies of any such omitted promissory notes or other instruments or agreements as the Commission requests.

Table of Contents**GLOSSARY OF PETROCHEMICAL INDUSTRY TERMS**

Acetates	Chemical substances derived from acetic acid, which are used as solvents in the production of paints and coatings.
Acetic Acid	One of the largest produced organic acids and is used in the production of acetates.
Acrylates	Derivatives from acrylic acid, that are used in the plastic industry.
Acrylonitrile	Derivative compounds from propylene having a nitrile group.
Alcohol	Flammable liquid obtained by fermentation of sugary substances, or by synthetics operations.
Alcohol Sulfates	Fatty alcohol-derived sulfates, with surfactant characteristics, mainly used in the production of detergents.
Alkanolamides	Substances produced by reaction of fatty acids with alkanolamines, mainly used as emulsifiers in cosmetic preparation.
Alkyl Benzene	Substance with an aromatic ring and an aliphatic chain.
Aromatics	A major group of organic chemical compounds with a ring shaped carbon chain. Aromatics are derived chiefly from petroleum and coal tar, and used to make a broad range of downstream chemical products.
Butadiene	By-product of the cracking process; used primarily as a feedstock for synthetic rubber, elastomers and fibers.
Butyl Alcohol	An alcohol used primarily in the production of solvents and plasticizers.
Commodity Chemicals	A term applied to chemical substances, which are sold on a generic basis and, unlike specialty chemicals, are not generally manufactured to meet specific end-use performance characteristics.
Condensed Naphthalene	Polymer mainly used as a super-fluidizer and curing agent for cement preparation.
Crackers	First generation companies that thermally breakdown or crack ethane, naphtha and gas oil into basic petrochemicals, such as ethylene and propylene.
Dispersants	Class of chemicals whose main property is to maintain the stability of a mixture by preventing particles from settling out of the mixture.
EDC	Ethylene Dichloride, raw material of VCM.
Elastomer	Broad category of rubber polymers which may be natural or synthetic, such as natural rubber, nitrile rubber and styrene-butadiene rubbers.
Emulsifiers	A class of chemical generally used to promote the dispersion of materials throughout a solution or mixture.
Ethanol	Flammable liquid obtained by fermentation of sugary substances, largely used as fuel for vehicles.
Ethanolamines	Ethanolamines, comprising mono-, di-, and tri-ethanolamines, are clear, non-flammable, liquids at atmospheric pressure and room temperature conditions, and are produced from ethylene oxide and ammonium.
Ethers	Organic compound with one oxygen atom interpolated between two carbon atoms.
Ethoxylated Alcohol	Produced by reaction of ethylene oxide with alcohols. Ethoxylated alcohols are used mainly as surfactants.
Ethoxylated Alkylphenols	Ethoxylated alkylphenols range from clear liquids to colored solids and is produced by the reaction of ethylene oxide with alkylphenol.
Ethoxylated Fatty Alcohols	Substances produced by reaction of ethylene oxide with fatty alcohols and are used mainly as a raw material for detergent production.
Ethoxylated Fatty Amines	Substances produced by reaction of ethylene oxide with fatty amines and are used mainly as emulsifiers for agrochemicals.
Ethoxylated Fatty Esters	

Edgar Filing: ULTRAPAR HOLDINGS INC - Form 20-F

Substances produced by reaction of ethylene oxide with hydroxylated fatty esters and are used mainly as emulsifiers in the cosmetic industry.

131

Table of Contents

Ethoxylated Sorbitan Esters	Substances produced by reaction of ethylene oxide with sorbitan esters and are mainly used as food emulsifiers, especially for bakery products.
Ethyl Alcohol	A flammable liquid known as ethanol. It is used as automotive fuel, alone or in mixture with gasoline, and as a solvent in personal care products, such as aftershave lotion and mouthwashes.
Ethylene	A chemical substance, mainly derived from thermal cracking of ethane, gas oil and naphtha, and used to make polyethylene and many organic chemical intermediates, such as ethylene oxide, vinyl chloride, styrene and acetaldehyde.
Ethylene Glycols	Includes mono-, di-, tri- and other ethylene glycols. Mono-ethylene glycol or MEG is a clear, non-flammable, non-volatile liquid at room temperature and atmospheric pressure. Ethylene glycols are produced from ethylene oxide.
Ethylene Oxide	Ethylene oxide is a colorless and highly flammable gas at room temperature and atmospheric pressure and is produced by catalytic partial oxidation of ethylene by oxygen, at high temperature and pressure.
Fatty Alcohols	Fatty alcohols are alcohols derived from fat or vegetable oil (natural fatty alcohol) or petrochemical sources (synthetic fatty alcohol), largely used in the cosmetics and detergents production.
First Generation Company	A petrochemical cracker.
Fuels	Any substance that involves energy in a chemical reaction.
Glycol Ether Acetate	Flammable liquids at room temperature and atmospheric pressure produced by reaction with acetic acid and glycol ether.
Glycols	Alcohols containing two hydroxyl groups.
Glycol Ethers	Substances produced by reaction of ethylene oxide and an alcohol, or methyl, ethyl and butyl alcohol.
Hydraulic Fluids	Mixture of high molecular weight glycols and glycol ethers used as cooling medium and mechanical action transmitters in automotive braking systems.
Lauryl Alcohol	Substance of twelve-carbon fatty alcohol raw material for ethoxylated fatty alcohol, alcohol sulfate and ethoxylated alcohol sulfate production, which are intermediates for detergent production.
Linear Alkyl Benzene (LAB)	Straight chain alkyl benzene used as surfactant intermediate.
Linear Alkyl Sulphonate (LAS)	Straight chain alkyl benzene sulfate used as surfactant intermediate.
Lubricants	Broad class of chemicals which are generally used to provide a film between the moving parts of machines and engines.
Methyl Ethyl Ketone (MEK)	A clear, volatile, flammables liquid at room temperature and atmospheric pressure and is mainly used as a solvent.
Metric Ton	Equal to 1,000 kilograms (2,204.62 pounds).
Naphtha	A by-product of crude oil refining which is used by crackers as feedstock.
Nitrile	Organic compound containing CN group.
Normal Paraffins	Class of aliphatic hydrocarbons with a single carbon chain.
Olefin	Hydrocarbons with double bonds with the general chemical formula C_nH_{2n} . Olefins, along with aromatics, are produced mainly in crackers and are regarded as the building blocks of the petrochemical industry.
Paraxylene	Organic compound with two methyl radicals in p-position.
PET	Polyethylene terephthalate, a polymer produced by polycondensation of ethylene glycol with either Dimethyl Terephthalate, or terephthalic acid. Used to produce fibers, resins and packaging such as carbonated soft drink bottles (PET bottle grade).

Table of Contents

Phosphate Esters	Phosphoric acid derived esters, used primarily as detergent builders in powder detergent production.
Polyethylene	Intermediate petrochemical produced by second generation companies from ethylene; used in many plastic applications.
Polyethylene Glycols	Ethylene oxide derived polymers used in many applications, including as fillers, lubricants and viscosity builders.
Polystyrene	Intermediate petrochemical produced by second generation companies from styrene.
Polyvinyl Chloride	Intermediate petrochemical produced by companies from basic petrochemicals.
Propylene	A chemical substance, mainly derived as a co-product with ethylene through the cracking process of gas oil or naphtha, often used to make polypropylene, which is a common plastic.
Raffinate II	A by-product of naphtha cracking mainly composed of butane and used in the production of MEK.
Sec-Butanol	A secondary four-carbon atom alcohol obtained by the hydration of butanes, contained in raffinate II. Sec-butanol is the raw material for methyl-ethyl-ketone production.
Second Generation Company	A producer of intermediate chemical products based largely on raw materials purchased from upstream, first generation companies, also known as crackers.
Softeners	A class of surfactant products mainly used as co-agents in the textile industry and domestic laundries.
Solvents	Chemical compounds, usually in liquid form, capable of dissolving another substance; often used as a medium in which other chemical reactions may take place.
Sorbitan Esters	Substances produced by the reaction of sorbitan with fatty acids used as a raw material for ethoxylated sorbitan esters.
Soybean Oil	Oil from soy beans.
Styrene	Aromatic compound with ethylene group. Monomer of polystyrene.
Specialty Chemicals	Chemicals which are usually produced in smaller quantities than commodity chemicals and which performances are more relevant than the specification.
Stabilizers	Chemicals which are used to prevent chemical degradation of a product or chemical compound.
Sulfonates/Sulfates	Class of sulfur trioxide modified surfactants, used as a raw material for detergent production.
Surfactants	Generally defines a group of chemicals which, when dissolved in a solvent, modify the liquid properties at a liquid/liquid or liquid/solid interface, including increased solubilization, foaming, frothing, emulsification, dispersing or wetting; a major end-use market for surfactants is the detergent market.
TDI	Toluene diisocyanate used as raw material of polyurethane.
Third Generation Company	A producer that transforms intermediate products into end products such as films, piping and containers.
Tons	Metric tons.
VAM	Vinyl acetate monomer. Monomer of PVA polyvinyl acetate.
VCM	Vinyl chloride monomer.

Ultrapar Participações S.A. and Subsidiaries

Independent auditors' report

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders

Ultrapar Participações S.A.

We have audited the accompanying consolidated balance sheet of Ultrapar Participações S.A. and subsidiaries (the Company) as of December 31, 2007, and the related consolidated statements of income, shareholders' equity and comprehensive income, changes in financial position and cash flows for the year ended then ended. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit. The accompanying consolidated balance sheet of Ultrapar Participações S.A. as of December 31, 2006 and the related consolidated statements of income, shareholders' equity and comprehensive income, changes in financial position and cash flows of the years ended December 31, 2006 and 2005, were audited by other auditors whose report thereon dated January 31, 2007 (except for notes 24 and 25, as to which the date is May 24, 2007), expressed an unqualified opinion on those statements.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States) (the PCAOB). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Ultrapar Participações S.A. and its subsidiaries as of December 31, 2007 and the results of their operations, changes in shareholders' equity, changes in financial position and cash flows, for the year then ended, in conformity with generally accepted accounting principles in Brazil.

Accounting principles generally accepted in Brazil vary in certain significant respects from accounting principles generally accepted in the United States. Information relating to the nature and effect of such differences is presented in Note 25 to the consolidated financial statements.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Ultrapar Participações S.A. and subsidiaries' internal control over financial reporting as of December 31, 2007, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 11, 2008 (except for the controls over note 25, as to which date is June 25, 2008) expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

São Paulo, SP - Brazil

February 11, 2008, except for notes 3a, 25 and 26, as to which the date is June 25, 2008

KPMG Auditores Independentes

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of

Ultrapar Participações S.A.

São Paulo - SP - Brazil

1. We have audited the accompanying consolidated balance sheet of Ultrapar Participações S.A. and subsidiaries (Ultrapar) as of December 31, 2006, and the related consolidated statements of operations, changes in stockholders' equity and changes in financial position for each of the two years in the period ended December 31, 2006, all expressed in Brazilian reais. These consolidated financial statements are the responsibility of Ultrapar's management. Our responsibility is to express an opinion on the consolidated financial statements based on our audits.
2. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States of America). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.
3. In our opinion, such consolidated financial statements present fairly, in all material respects, the consolidated financial position of Ultrapar as of December 31, 2006, and the consolidated results of its operations, changes in its stockholders' equity and its financial position for each of the two years in the period ended December 31, 2006, in conformity with accounting practices adopted in Brazil.
4. Accounting practices adopted in Brazil vary in certain significant respects from accounting principles generally accepted in the United States of America (U.S. GAAP). Ultrapar has presented the nature and effect of such differences in Note 25 to the consolidated financial statements.

January 31, 2007, except for the Note 25 as to which the date is May 24, 2007.

ULTRAPAR PARTICIPAÇÕES S.A. AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

YEARS ENDED DECEMBER 31, 2007, 2006 AND 2005

(Amounts in millions of Brazilian Reais - R\$, unless otherwise stated)

1. OPERATIONS

Ultrapar Participações S.A. (the Company or Ultrapar) is a holding company with headquarters in the city of São Paulo, organized under the laws of the Federative Republic of Brazil, which, through its operating subsidiaries, is engaged in the distribution of Liquefied Petroleum Gas (LPG) (Ultragaz), the production and sale of chemicals (Oxitenos), and logistic services of chemicals and fuels (Ultracargo). After the acquisition of certain operation of the Ipiranga Group, in April 2007, the Company became engaged in the distribution of fuels/lubricants and related products in the South and Southeast Regions of Brazil. The Company also became engaged in oil refining (Refinery) through its stake in Refinaria de Petróleo Ipiranga S.A.

2. PRESENTATION OF THE FINANCIAL STATEMENTS

These financial statements were prepared in accordance with accounting practices derived from Brazilian Corporation Law and Brazilian Securities Commission (CVM). They have been translated into English from the original financial statements issued in Portuguese. In addition, certain terminology changes have been made and the notes to the financial statements have been adjusted to conform more closely to reporting practices prevailing in the United States of America.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting practices adopted in Brazil to record transactions and prepare the financial statements comply with those prescribed by Brazilian Corporation Law and specific standards established by the Brazilian Securities Commission (CVM), which differ in certain respects from accounting principles generally accepted in the United States of America (U.S. GAAP). See Note 25 for further discussions of these differences and a reconciliation of shareholders' equity and net income under both sets of principles.

The following is a summary of significant accounting policies followed in the preparation of the financial statements:

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

a) Consolidation principles

The consolidated financial statements include the accounts of the Company and all of the subsidiaries in which the Company directly or indirectly controls more than 50% of the voting share capital, as listed below. Intercompany investments, asset and liability balances, income and expenses, as well as the effects arising from significant intercompany transactions, have been eliminated. Minority interest in subsidiaries is presented separately in the financial statements.

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

- (*) As informed in the Material Event of March 19, 2007 and the Material Event of April 18, 2007, distribution of fuels/lubricants and related products of these companies are divided between Ultrapar (South and Southeast Regions of Brazil) and Petrobras (North, Northeast and Center West Regions of Brazil).
- (**) Joint control among DPPI (16%), CBPI (34%) and União de Bancos Brasileiro S.A. UNIBANCO (50%).
- (***) As informed in the Material Event of March 19, 2007 and the Material Event of April 18, 2007, oil refinery operations of Refinaria de Petróleo Ipiranga S.A. are equally shared among Petrobras, Ultrapar and Braskem, and the subsidiary was proportionality consolidated in these financial statements in accordance with Article 32 of CVM Instruction No. 247/96.

On April 18, 2007, the Company, together with Petróleo Brasileiro S.A. (Petrobras) and Braskem S.A. (Braskem), acquired the controlling interest of Ipiranga Group, as informed in the Material Event published on that date. Under the terms of the Acquisition Agreement signed by the three buyers, the Company acted as commission agent of Braskem and Petrobras, and for itself for the acquisition of the fuels/lubricants distribution and related products businesses located in the South and Southeast Regions of Brazil and Empresa Carioca de Produtos Químicos S.A. (Ipiranga), maintaining the brand Ipiranga. Petrobras holds the control of fuel distribution and lubricant businesses located in the North, Northeast and Center West Regions of Brazil (North Distribution Assets), and Braskem holds control of the petrochemical assets, represented by Ipiranga Química S.A., Ipiranga Petroquímica S.A. (IPQ) and the ownership in Copesul Companhia Petroquímica do Sul (Copesul) (Petrochemical Assets).

The transaction is structured in 4 stages:

- (i) acquisition of Ipiranga Group controlling interest (occurred on April 18, 2007);
- (ii) tag along offering for the purchase of common shares issued by Companhia Brasileira de Petróleo Ipiranga (CBPI), Refinaria de Petróleo Ipiranga S.A. (RPI) and Distribuidora de Produtos de Petróleo Ipiranga S.A. (DPPI) (occurred on October 22, 2007 for DPPI and RPI and on November 8, 2007 for CBPI);
- (iii) merger of the remaining shares of CBPI, RPI and DPPI into Ultrapar (occurred on December 18, 2007). For this merger of shares, the Company issued 54,770,590 preferred shares (see Note 15.a); and
- (iv) segregation of assets among Ultrapar, Petrobras and Braskem (occurred on February 27, 2008 and May 14, 2008).

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

The assets, liabilities and income of Ipiranga/Refinery have been reflected in the Company's financial statements since April 2007, with minority interest presented separately in the consolidated financial statements to September 2007. With the merger of shares, the interest of noncontrolling shareholders in Ipiranga/Refinery was eliminated, and the Company started to consolidate the total income of the companies from October 2007 on. As the Company acted as commission agent for Braskem and Petrobras, the assets acquired for them were recorded as reduction of the amounts received from them in the first and second stages of the transaction, not producing any effect in the Company's consolidated financial statements. The balancing accounting entry of the capital increase resulting from the merger of shares referring to the North Distribution Assets and Petrochemical Assets, that will not remain with the Company, was recorded as "Other accounts receivable" in the amount of R\$ 1,751.7, to be received from Braskem and Petrobras at the time when the respective assets will be delivered to them. The assets related to the operations of RPI's oil refinery (Refinery) were proportionally consolidated in the Company's financial statements, since their control is shared with Petrobras and Braskem.

The goodwill recorded by the Company in the three stages of acquisition totalled R\$ 484.0, amortized over 10 years from each stage date, based on the expectation of future profitability.

On October 15, 2007, the subsidiary SPGás Distribuidora de Gás Ltda. was upstream merged with Ultragaz Participações Ltda., with the aim of simplifying the corporate structure.

On September 13, 2007, the subsidiary Barrington S.L. acquired the company Arch Química Andina, C.A. in Venezuela for R\$ 15.0, and changed its name to Oxiteno Andina, C.A. Goodwill of R\$ 0.2 was recorded, amortized over 10 years, based on the expectation of future profitability.

On April 30, 2007 the subsidiary Transultra Armazenamento e Transporte Especializado Ltda. acquired the company Petrolog Serviços e Armazéns Gerais Ltda. for the amount of R\$ 8.1, recording goodwill in the amount of R\$ 6.5, amortized over 10 years, based on the expectation of future profitability.

b) Cash and cash equivalents

Cash and cash equivalents comprise highly-liquid temporary cash investments (with original maturities of three months or less and which are readily convertible to cash).

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

c) Short-term investments

Short-term investments are stated at cost plus accrued income earned (on a pro rata temporis basis), which approximate their market values.

d) Trade accounts receivable

Trade accounts receivable are stated at estimated net realizable values. The allowance for doubtful accounts is recorded based on estimated losses and is considered sufficient by management to cover probable losses on accounts receivable.

e) Inventories

Inventories are stated at the lower of average cost of acquisition or production, that does not exceed market value.

f) Long-term investments

Long-term investments are stated at cost plus accrued income earned (on a pro rata temporis basis), which approximate their market values.

g) Investments in affiliated companies

Investments in operating companies not controlled by the Company, but over which it has significant influence, are accounted for using the equity method (see Note 10).

h) Other investments

Other investments are stated at acquisition cost, net of allowances for losses, should the losses not be considered temporary.

i) Property, plant and equipment

Property, plant and equipment are stated at acquisition cost or constructions in progress cost and include revaluation write-ups based on appraisal reports issued by independent appraisers, in accordance with item 68, letter b), of CVM Resolution No. 183/95, as well as costs related to the maintenance of significant assets during scheduled factory replacement operations.

Depreciation is calculated on a straight-line basis at the annual rates described in Note 11, and is based on the estimated useful lives of the corresponding assets.

Leasehold improvements in gas stations are depreciated over the effective contract terms or the useful life of the assets, if shorter.

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

j) Intangible assets

Stated at acquisition cost, net of allowance for losses, should the losses not be considered temporary, as shown in Note 12.

k) Deferred charges

Deferred charges comprise costs incurred in the installation of Company and its subsidiaries equipment at customers facilities amortized over the terms of the LPG supply contracts with these customers, reorganizations and projects expenses and goodwill on acquisition of subsidiaries, as stated in Note 13.

l) Income and social contribution taxes on income

Income and social contribution taxes, current and deferred, are measured on the basis of effective rates and include the benefit of tax holidays, as mentioned in Note 22.

m) Provision for contingencies

The provision for contingencies is recorded for contingent risks with an estimated probable loss, based on the opinion of internal and external legal advisors and administrators. Amounts are recorded based on the estimated costs and results of proceedings (see Note 20.a).

n) Actuarial commitment with post-retirement benefits

Actuarial commitments with the post-retirement benefits plan granted and to be granted to employees, retired employees and pensioners (net of plan assets) are provided for based on the actuarial calculation prepared by an independent actuary in accordance with the projected credit unit method, as mentioned in Note 24.b).

o) Compensated absences

The liability for future compensation for employee vacations is fully accrued as earned.

p) Assets and liabilities denominated in foreign currency or subject to indexation

Assets and liabilities denominated in foreign currencies are translated into Brazilian Reais at the exchange rate reported by the Brazilian Central Bank (BACEN) at each balance sheet date. Transaction gains and losses are recognized in income.

Assets and liabilities denominated in Reais and contractually or legally subject to indexation are restated to the balance sheet date by applying the corresponding index, with related gains and losses recognized in income.

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

q) Revenues and expenses

Revenues from sales are recognized when products are delivered to the customer or services are performed, and the transfer of risks, rights and obligations associated with the ownership of products takes place. Expenses are recognized on the accrual basis. Advertising expenses, which are expensed as incurred, amounted to R\$ 42.0, R\$ 3.4 and R\$ 3.8 for the years ended December 31, 2007, 2006 and 2005, respectively. Shipping and handling costs, classified as selling expenses and expensed as incurred, amounted to R\$ 177.8, R\$ 66.6 and R\$ 69.0 for the years ended December 31, 2007, 2006 and 2005, respectively.

r) Cost of sales and services

Cost of sales and services provided includes raw materials (mainly fuels/lubricants, LPG and chemicals) and production, distribution, storage and filling costs.

s) Earnings per share

Earnings per share are calculated based on the annual weighted average of shares outstanding during each of the years presented, giving retroactive effect to stock splits. Stock dividends are not included in such retroactive earnings per share calculation. See Note 15.

t) Use of estimates

The preparation of financial statements in accordance with accounting practices derived from the Brazilian Corporation Law requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the balance sheet dates and the reported amounts of revenues, costs and expenses for the years presented. Although these estimates are based on management's best available knowledge of current and expected future events, actual results could differ from those estimates.

u) Basis for translation of the financial statements of foreign subsidiaries

The financial statements of foreign subsidiaries are translated into Brazilian Reais at the current exchange rate in effect at the balance sheet date. The criteria for preparation of the financial statements have been adapted to conform to accounting practices derived from the Brazilian Corporation Law.

4. CASH AND CASH EQUIVALENTS

Cash equivalents consist of investments, contracted with banks of good standing, mostly represented by certificates of deposit and funds linked to the Brazilian interbank certificates of deposit (CDI) rate, and are stated at cost plus accrued income on a pro rata temporis basis. The increase in foreign investments is due to Dual Currency Deposits in the amount of R\$ 210.1, held by the subsidiary Oxiteno Overseas Corp.

	2007	2006
Cash	203.1	32.0
Certificates of deposit and funds in Brazil	385.2	303.6
Foreign investments	274.1	49.5
Total	862.4	385.1

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

5. SHORT AND LONG-TERM INVESTMENTS

Short-term investments are mainly related to the amount invested by the subsidiary Oxiteno Overseas Corp. in debt securities of U.S. corporations and to notes issued by the Austrian Government. As of December 31, 2007, funds in the amount of R\$ 230.8 (R\$ 553.1 as of December 31, 2006), raised through notes issued by the subsidiary of LPG International Inc. were invested in certificates of deposit (Dual Currency Deposits) denominated in U.S. dollars issued by foreign banks of good standing. The decrease in the Dual Currency Deposits balance was due to their maturity in 2007. Dual Currency Deposits are investments whose yield can be in U.S. dollars or Brazilian Reais, depending on the U.S. dollar rate as of the maturity date. If the U.S. dollar rate is lower than the strike rate on the maturity date, the yield of this operation will be in U.S. dollars plus interest of 7.4% per year; otherwise, it will be in Brazilian Reais plus average interest of 12.6% per year. The subsidiary records the investment at the lower of the two alternative yields, which until December 31, 2007 was represented by the U.S. dollar. To December 31, 2007, the exchange rate has always remained below the strike rate.

Long-term investments are mainly represented by debt security of an European corporation denominated in U.S. dollars, bearing interest of six-month LIBOR plus interest of 3.25% per annum and maturing on September 27, 2009, and debentures of the subsidiary Maxfácil Participações S.A.

In April 2006, subsidiary Oxiteno Overseas Corp., owner of notes in the amount of US\$ 60 million issued by Companhia Ultragaz S.A. in the international market in 1997 (Original Notes), sold these Original Notes to a foreign financial institution. Concurrently, subsidiary Oxiteno Overseas Corp. acquired from this financial institution a credit linked note backed by the Original Notes. This transaction provides a financial gain for the Company corresponding to the difference between the interest rate paid for the credit linked note and the Original Notes, as mentioned in Note 14.b).

	2007	2006
Short-term investment	845.3	737.3
Long-term investment	120.8	548.0
	966.1	1,285.3

6. TRADE ACCOUNTS RECEIVABLE, NET

	2007	2006
Domestic customers Ipiranga/Refinery	855.1	
Other domestic customers	394.1	375.5
Financing to customers Ipiranga	298.9	
Foreign customers	125.2	76.4
(-) Advances on foreign exchange contracts	(89.9)	(50.9)
(-) Allowance for doubtful accounts	(62.1)	(21.8)
	1,521.3	379.2
Current portion	1,344.4	360.0
Noncurrent portion	176.9	19.2

Financing to customers are directed to the reimbursement of reforms and modernizations of gas stations, acquisition of products and market development of Ipiranga.

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

The changes in the allowance for doubtful accounts are shown below:

Balance as of December 31, 2005	26.9
Addition recorded as selling expenses	10.8
Utilization	(15.9)
Balance as of December 31, 2006	21.8
Initial balance of Ipiranga/Refinery	41.2
Addition recorded as selling expenses	19.4
Utilization	(20.3)
Balance as of December 31, 2007	62.1

Allowance for doubtful accounts in the amount of R\$ 39.9 and R\$ 12.0 are recorded in current trade accounts receivable as of December 31, 2007 and 2006, and R\$ 22.2 and R\$ 9.8 are recorded in long-term trade accounts receivable as of December 31, 2007 and 2006, respectively.

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

7. INVENTORIES

	2007			2006		
	Cost	Provision for losses	Net	Cost	Provision for losses	Net
Finished products	143.7	(4.3)	139.4	98.7	(1.5)	97.2
Work in process	1.3		1.3	0.6		0.6
Raw materials	104.7		104.7	65.6	(0.1)	65.5
Liquefied Petroleum Gas (LPG)	24.2		24.2	23.4		23.4
Fuel, lubricants and grease	265.0	(0.4)	264.6			
Supplies and cylinders for resale	33.7	(2.6)	31.1	20.9	(0.5)	20.4
Advances to suppliers	65.8		65.8	10.1		10.1
Total	638.4	(7.3)	631.1	219.3	(2.1)	217.2

The changes in the provision for losses on inventories are shown below:

Balance as of December 31, 2005	2.8
Additions	0.3
Write offs	(1.0)
Balance as of December 31, 2006	2.1
Additions	6.5
Write offs	(1.3)
Balance as of December 31, 2007	7.3

8. RECOVERABLE TAXES

Represented, substantially, by credit balances of ICMS (State Value Added Tax - VAT), PIS and COFINS (social contribution taxes on revenue), and income and social contribution taxes.

	2007	2006
Income and social contribution taxes	105.0	75.3
ICMS	167.7	101.0
Provision for losses - ICMS (*)	(46.9)	(31.4)
PIS and COFINS	31.3	28.4
VAT of subsidiaries Oxiteno México S.A. de C.V. and Oxiteno Andina, C.A.	4.0	8.5
Manufacturing Tax - IPI	8.7	0.6
Other	1.5	0.7
Total	271.3	183.1
Current portion	202.6	117.8
Noncurrent portion	68.7	65.3

(*) The provision refers to credit balances that the subsidiaries estimate they will not be able to offset in the future.

F-16

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

The changes in the provision for losses on ICMS are shown below:

Balance as of December 31, 2005	36.0
Addition	4.5
Write-off	(9.1)
Balance as of December 31, 2006	31.4
Initial balance of Ipiranga/Refinery	6.0
Addition	9.5
Balance as of December 31, 2007	46.9

The increase in the balance of income and social contribution tax credits and IPI is mainly due to the inclusion of Ipiranga.

The increase in the balance of ICMS is due to Ipiranga and the increase in ICMS credits of the Camaçari (Bahia State) plant of the subsidiary Oxiteno Nordeste S.A. Indústria e Comércio, due to measures taken by Bahia State, which made it difficult to utilize credits for import payment or to transfer them to third parties. The total balance of credits from this plant corresponds to R\$ 76.8 as of December 31, 2007 (R\$ 50.2 as of December 31, 2006) of which R\$ 29.8 have already been reviewed by the tax authorities and are awaiting release by the state finance department of Bahia for use/transfer. In addition to these credits, the subsidiary's management is working on a series of measures for the realization of the plant's ICMS balance. The allowance for loss of the plant's credits was recognized on the basis of the maximum discount expected on their commercialization. The PIS and COFINS credits are being utilized to offset other federal taxes, mainly income and social contribution taxes on income.

9. PREPAID EXPENSES

	2007	2006
Rents	31.3	2.9
Expenses with bond issuances	10.2	12.8
Insurance premium	1.5	2.7
Other prepaid expenses	7.1	3.4
	50.1	21.8
Current portion	13.2	8.6
Noncurrent portion	36.9	13.2

The increase in the balance of rents is due the inclusion of the Ipiranga operations.

Table of Contents

10. INVESTMENTS IN AFFILIATED COMPANIES

A summary of financial information for the Company's equity investments is as follows:

	December 31, 2007

11. PROPERTY, PLANT AND EQUIPMENT, NET

	Annual depreciation average rates - %	Cost, including revaluation	2007 Accumulated depreciation/ allowance for realization	Net amount	2006 Net amount
Land		179.8	(0.2)	179.6	46.7
Buildings	4	624.7	(292.3)	332.4	204.2
Leasehold improvements	4	192.4	(72.6)	119.8	68.5
Machinery and equipment	8	1,113.8	(579.4)	534.4	458.2
Equipment and fixtures for the distribution of fuels / lubricants	10	760.8	(459.4)	301.4	
Gas tanks and cylinders for LPG	10	289.2	(180.2)	109.0	114.5
Vehicles	20	221.5	(165.0)	56.5	35.6
Furniture and fixtures	10	61.5	(34.9)	26.6	15.0
Construction in progress		493.0		493.0	107.0
Advances to suppliers		78.6		78.6	49.2
Imports in transit		2.0		2.0	0.5
IT equipment	20	147.5	(114.0)	33.5	12.4
Other		2.5	(0.4)	2.1	
Total		4,167.3	(1,898.4)	2,268.9	1,111.8

Property, plant and equipment include net capitalized interest cost of R\$ 11.5 and R\$ 4.3 as of December 31, 2007 and 2006, respectively.

Construction in progress refers substantially to: (i) the construction of the fatty alcohols plant of subsidiary Oleoquímica Indústria e Comércio de Produtos Químicos Ltda.; (ii) the expansions and renovations of plants; and (iii) the construction and modernization of gas stations and terminals for distribution of fuel of subsidiaries CBPI and DPPI.

Advances to suppliers refer basically to purchases of equipment for the fatty alcohols plant of subsidiary Oleoquímica Indústria e Comércio de Produtos Químicos Ltda.

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

(Amounts in millions of Brazilian Reals - R\$, unless otherwise stated)

The subsidiaries recorded, in previous years, revaluation of property, plant and equipment items. The revaluation balances are shown below:

	Revaluation	2007 Accumulated depreciation	Net book value	2006 Net book value
Land	16.3		16.3	15.5
Buildings	43.9	(35.7)	8.2	9.8
Machinery and equipment	31.7	(30.8)	0.9	1.1
Gas tanks and cylinders	48.9	(48.9)		
Vehicles	0.7	(0.7)		
	141.5	(116.1)	25.4	26.4

The depreciation of these revaluations in the amount of R\$ 1.7 (R\$ 1.9 as of December 31, 2006) was recorded in the statement of income. The amount of deferred taxes on revaluation totals R\$ 6.8 (R\$ 7.5 as of December 31, 2006), of which R\$ 0.6 (R\$ 0.9 as of December 31, 2006) is recorded as non-current liabilities, as shown in Note 22.a), and R\$ 6.2 (R\$ 6.6 as of December 31, 2006) is accrued in the same period in which certain subsidiaries realize the revaluation reserve, since these revaluations occurred prior to the issuance of CVM Resolution No. 183/95.

Other	10	1.4	(0.9)	0.5	0.5
		166.5	(99.6)	66.9	61.0

Aggregate amortization expense for the above intangible assets amounted to R\$ 16.3, R\$ 12.9 and R\$ 12.2 for the years ended December 31, 2007, 2006 and 2005, respectively.

The estimated aggregate amortization expense for the next five years is as follows:

Until 1 year	16.2
From 1 to 2 years	11.6
From 2 to 3 years	10.3
From 3 to 4 years	8.0
From 4 to 5 years	5.6
Thereafter	15.2
Total	66.9

Commercial property rights, refer mainly to those described below:

On July 11, 2002, subsidiary Terminal Químico de Aratu S.A. - Tequimar signed a contract with CODEBA - Companhia Docas do Estado da Bahia for use of the site where the Aratu Terminal is located for 20 years, renewable for the same period. The price paid by Tequimar amounted R\$ 12.0 and is being amortized from August, 2002 to July 2042.

Further, subsidiary Terminal Químico de Aratu S.A. - Tequimar has a lease agreement for an area adjacent to the Port of Santos for 20 years, effective December 2002 and renewable for another 20 years, for building and operating a terminal for receiving, tanking, handling and distribution of bulk liquids. The price paid by Tequimar was R\$ 4.3 and is being amortized from August 2005 until December 2022.

b) Notes in the foreign market and syndicated loan

In June 1997, the subsidiary Companhia Ultragas S.A. issued US\$ 60 million in notes, (Original Notes) maturing in 2005. In June 2005, maturity was extended to June 2020 with put/call options in June 2008.

In June 2005, the subsidiary Oxiteno Overseas Corp. acquired the full amount of Original Notes issued by Companhia Ultragas S.A., with funds from a syndicated loan in the amount of US\$ 60 million with maturity in June 2008 and interest rate of 5.05% per year. The syndicated loan was guaranteed by the Company and the subsidiary Oxiteno S.A. Indústria e Comércio.

In April 2006, the subsidiary Oxiteno Overseas Corp. sold the Original Notes to a financial institution. Concurrently, the subsidiary acquired from this financial institution a credit linked note backed by the Original Notes, as mentioned in Note 5, thus obtaining an additional return on this investment. The transaction matures in 2020, and the subsidiary as well as the financial institution may redeem it early, although the subsidiary has only an annual option of redemption (purchase) in or after June 2008. In the event of insolvency of the financial institution, Companhia Ultragas S.A. would be required to settle the Original Notes, although Oxiteno Overseas Corp. would continue to be creditor of the credit linked note. Thus, the Company does not eliminate the Original Notes in its consolidated financial statements.

Table of Contents

(Amounts in millions of Brazilian Reals - R\$, unless otherwise stated)

c) Notes in the foreign market

In December 2005, the subsidiary LPG International Inc. issued notes in the amount of US\$ 250 million, maturing in December 2015, with annual interest rate of 7.25% paid semiannually, with the first payment scheduled for June 2006. The issuance price was 98.75% of the notes face value, which represented a total yield for investors of 7.429% per annum upon issuance. The notes were guaranteed by the Company and by Oxiteno S.A.- Indústria e Comércio.

As a result of the issuance of notes and the syndicated loan, the Company and its subsidiaries are subject to covenants that limit, among other things:

Limitation of transactions with shareholders that hold amounts of 5% or more of any class of Capital Stock of the Company, except upon fair and reasonable terms no less favorable to the Company than could be obtained in a comparable arm's-length transaction with a third party.

Obligation of having Board of Directors resolution for transactions with related parties higher than US\$ 15 million (excepting transactions by the Company with subsidiaries and between subsidiaries).

Restriction of disposal of the totality or near totality of the assets of Company and subsidiaries.

Restriction of encumbrances on assets in excess of US\$ 150 million or 15% of the value of consolidated tangible assets.

Maintenance of financial ratio, between consolidated net debt and consolidated EBITDA (Earning Before Interest, Taxes, Depreciation and Amortization), less than or equal to 3.5.

Maintenance of financial ratio, between consolidated EBITDA and consolidated net financial expenses higher than or equal to 1.5. The restrictions imposed on the Company and its subsidiaries are usual in transactions of this nature and have not limited their ability to conduct their business to date.

The Company is in compliance with all covenants at December 31, 2007.

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

d) Notes in the foreign market

On August 1, 2003, subsidiary Companhia Brasileira de Petróleo Ipiranga issued US\$ 135 million in notes in the international market. On August 1, 2005, when the interest levied increased from 7.875% per year to 9.875% per year, these securities were partly redeemed in the amount of US\$ 1.3 million or R\$ 3.1 million. In 2006, partial redemption was performed in the amount of US\$ 79.6 million or R\$ 164.9 million.

e) Debentures

e.1) On March 1, 2005, the Company issued single series of 30,000 nonconvertible debentures, whose main features are:

Nominal unit value:	R\$ 10,000 (ten thousands Reais).
Final maturity:	March 1, 2008.
Nominal value payment:	Lump sum at final maturity.
Yield:	102.5% of CDI.
Yield payment:	Semiannually, beginning March 1, 2005.
Repricing:	None.

The debentures are subject to commitments that restrict, among other things, certain operations of merger or spin-off, as well as the disposal of operating assets that would result in a reduction of more than 25% of consolidated net sales, and include the obligation to maintain a consolidated net debt to consolidated EBITDA ratio less than or equal to 3.5. As of December 31, 2007 the Company is in compliance with all covenants and none of these commitments have restricted the ability of Company and its subsidiaries to conduct business.

e.2) On April 18, 2006, subsidiary Companhia Brasileira de Petróleo Ipiranga registered at the Brazilian Securities and Exchange Commission - CVM, the public distribution of 35,000 debentures, single series, non-convertible and non-preferred, whose main features are:

Nominal unit value:	R\$ 10,000 (ten thousands Reais).
Final maturity:	April 1, 2011
Nominal value payment:	three quotas in 2009, 2010 and 2011
Yield:	103.8% of CDI
Yield payment:	Semiannually, beginning April 1, 2006

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

(Amounts in millions of Brazilian Reals - R\$, unless otherwise stated)

e.3) The Company issued debentures in the amount of R\$ 889 million, in two series, to face its share of disbursement in the first and second stages of the acquisition of Ipiranga Group.

	1st serie	2nd serie
Nominal unit value:	R\$ 675,000,000	R\$ 214,000,000
Final maturity:	April 11, 2008	October 22, 2008
Yield payment, semiannually beginning:	October 11, 2007	April 22, 2008
Nominal value payment:	Lump sum at final maturity	
Yield:	102.5% of CDI	
Repricing:	None

(Amounts in millions of Brazilian Reals - R\$, unless otherwise stated)

f) Collateral

A portion of the financing is collateralized by liens on property, plant and equipment, shares of investee and guarantees provided by the Company and its subsidiaries and by minority shareholders, as shown below:

	2007	2006
Amount of financing secured by:		
Property, plant and equipment	63.0	42.7
Shares of investee minority and shareholders' guarantees	2.5	7.0
 Total	 65.5	 49.7

Other loans are collateralized by guarantees issued by Company and by the future flow of exports. The Company is responsible for sureties and guarantees offered on behalf of its subsidiaries, amounting to R\$ 986.2 (R\$ 1,073.1 as of December 31, 2006).

Certain subsidiaries have issued guarantees to financial institutions related to amounts owed to those institutions by certain of their customers (vendor financing). There are no recourse provisions or collaterals that would enable the Company or its subsidiaries to recover any amounts paid to the financial institutions under these agreements. In the event such payments are made, the subsidiaries may recover such amounts paid directly from their customers. Maximum future payments related to these guarantees amount to R\$ 21.6 (R\$ 34.9 as of December 31, 2006), with terms of up to 213 days. As of December 31, 2007, the Company and its subsidiaries have not incurred any loss nor recorded any liability related to these guarantees.

The Company and its subsidiaries have in some loans, financing and debentures cross default clauses which oblige them to pay the contracted debt in case of default of any other debt in an amount equal or higher than US\$ 10 million. As of December 31, 2007 no default has occurred in relation to the Company and its subsidiaries' debt.

15. SHAREHOLDERS EQUITY

a) Capital

The Company is a listed corporation with shares traded on the São Paulo and New York Stock Exchanges. Subscribed and paid-up capital is represented by 136,095,999 shares without par value, comprised of 49,429,897 common shares and 86,666,102 preferred shares.

The table below represents the changes in shares and capital occurred in 2007:

Events	Capital	Common shares	Total shares Preferred shares	Total
Balance as of December 31, 2006	946.0	49,429,897	31,895,512	81,325,409
Preferred shares issued in Extraordinary Shareholders Meeting, occurred on December 18, 2007 (see Note 3.iii)	2,750.8		54,770,590	54,770,590
Balance as of December 31, 2007	3,696.8	49,429,897	86,666,102	136,095,999

As of December 31, 2007, 10,397,575 preferred shares were outstanding abroad, in the form of American Depositary Receipts - ADRs.

The Extraordinary Shareholders Meeting held on July 20, 2005 approved reverse stock split, attributing 1 (one) share in substitution for every 1,000 (thousand) existing shares. Likewise, each American Depositary Share - ADS, previously representative of a lot of 1,000 (thousand) preferred shares, became representative of 1 (one) preferred share.

Preferred shares are not convertible into common shares, do not entail voting rights, and have priority in capital redemption, without premium, in the event of liquidation of the Company.

At the beginning of 2000, the Company granted, through a shareholders agreement, tag along rights, which assure to noncontrolling shareholders identical conditions to those negotiated by the controlling shareholders in case of disposal of shareholding control of the Company. The tag-along rights guarantee 100% of the offer price for all types of shares issued by the Company. On May 18, 2004, the Company included the tag-along rights in its bylaws.

The Company is authorized to increase its capital, regardless of amendment to the bylaws, through a resolution of the Board of Directors, until it reaches R\$ 4,500,000, by means of issuance of common or preferred shares, without keeping the existing ratio, observing the limit of ²/₃ of preferred shares, to the total of the shares issued.

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

(Amounts in millions of Brazilian Reals - R\$, unless otherwise stated)

b) Treasury shares

The Company acquired its own shares at market prices, without capital reduction, for holding in treasury and subsequent disposal or cancellation, in accordance with the provisions of Brazilian Securities Commission (CVM) Instructions No. 10 of February 14, 1980 and No. 268 of November 13, 1997.

During 2007, 424,500 preferred shares were acquired at the average cost of R\$ 59.37 per share regarding to the share repurchase program approved in the Board of Director's Meeting of August 02, 2006 and extended through the Board of Director's Meeting of August 08, 2007.

As of December 31, 2007, the Company and its subsidiaries held 833,147 preferred shares (541,197 preferred shares, net of shares provided to certain executives of these subsidiaries as described in Note 23) and 6,617 common shares in treasury, which had been acquired at the average cost of R\$ 42.64 (whole Brazilian Reals) and R\$ 19.30 (whole Brazilian Reals) per share, respectively. The average acquisition cost was adjusted to reflect the stock dividends and reverse stock split.

The market price of preferred shares issued by the Company as of December 31, 2007 on the BOVESPA (São Paulo Stock Exchange) was R\$ 63.00.

c) Capital reserve

The capital reserve in the amount of R\$ 0.9 reflects the goodwill of the sale of shares at market price to be held in treasury in the Company's subsidiaries, at the average price of R\$ 40.42 (whole Brazilian Reals) per share. These shares were provided to certain executives of these subsidiaries as described in Note 23.

d) Revaluation reserve

This reserve reflects the revaluation write-up of assets of subsidiaries and is realized based upon depreciation, write-off or disposal of revalued assets, including the related tax effects.

In some cases, taxes on the revaluation reserve of certain subsidiaries are recognized only upon the realization of this reserve since the revaluations occurred prior to the publication of CVM Resolution No. 183/95, as mentioned in Note 11.

e) Profit reserves

Legal reserve

Under Brazilian corporate law, the Company is required to appropriate 5% of annual earnings to a legal reserve, until the balance reaches 20% of capital stock. This reserve may be used to increase capital or absorb losses, but may not be distributed as dividends.

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

(Amounts in millions of Brazilian Reals - R\$, unless otherwise stated)

Reserve for retention of profits

This reserve is supported by the investment program, in conformity with article 196 of Brazilian corporate law, and includes both a portion of net income and the realization of the revaluation reserve.

Unrealized profit reserve

This reserve is established in conformity with article 197 of Brazilian corporate law, based on the equity pick-up in subsidiaries and affiliated companies. The realization of this reserve usually occurs on receipt of dividends, sale and write-off of investments.

f) Dividends and appropriation of net income (Company)

According to the Company's bylaws, shareholders are entitled to a minimum annual dividend of 50% of adjusted net income, calculated under the terms of accounting practices adopted in Brazil.

Proposed dividends as stated in the Company's financial statements, subject to approval at the Annual Shareholders' Meeting, are as follows:

	2007
Net income	181.9
Legal reserve	(9.1)
Retention of profits reserve	(28.1)
Dividends balance	144.7
Realization of realized profits reserve	96.1
Proposed dividends (R\$ 1.777031 (whole Brazilian Reals) per share)	240.8

18. SEGMENT INFORMATION

The Company has four relevant segments: gas, chemical, logistics and distribution. The gas segment distributes LPG to residential, commercial and industrial consumers mainly in the South, Southeast and Northeast regions of Brazil. The chemical segment primarily produces ethylene oxide and byproducts, which are raw materials for the textiles, foods, cosmetics, detergents, agricultural chemicals, paints and varnishes industries, among other. Operations in the logistics segment include storage and transportation, mainly in the Southeast and Northeast regions of Brazil. The distribution segment operates in distribution of fuels, lubricants and related products in the South and Southeast regions of Brazil. Reportable segments are strategic business units that provide different products and services. Intersegment sales are transacted at prices that are freely negotiated and approximate those that could be obtained with third parties.

The relevant financial information about each of the Company's reportable segments are as follows:

	2007					2006	2005
	Ultragaz	Oxiteno	Ultracargo	Ipiranga	Other	Consolidated	Consolidated
Net sales, net of intercompany transactions	3,111.2	1,685.7	186.0	14,915.6	22.8	19,921.3	4,794.1
Operating income before financial items and equity in subsidiary and affiliated companies	132.3	106.7	14.6	261.0	(28.5)	486.1	330.4
Total assets, net of related parties	841.9	2,814.0	375.1	2,874.8	2,403.5	9,309.3	3,902.1

In the table above, the column "other" is composed mainly by parent company Ultrapar Participações S.A., that recorded the goodwill on the acquisition of Ipiranga, and by the participation in the oil refining business.

Disclosures of segments in accordance with U.S. GAAP are made in Note 25.V.h).

(Amounts in millions of Brazilian Reals - R\$, unless otherwise stated)

19. RISKS AND FINANCIAL INSTRUMENTS

The main risk factors to which the Company and its subsidiaries are exposed reflect strategic-operating and economic-financial aspects. Strategic-operating risks (such as behavior of demand, competition, technological innovation and significant structural changes in industry, among others) are addressed by the Company's management model. Economic-financial risks mainly reflect customer default and macroeconomic variables, such as exchange and interest rates, as well as the characteristics of the financial instruments used by the Company. These risks are managed through control policies, specific strategies and the determination of limits, as follows:

Customer default - These risks are managed by specific policies for accepting customers and analyzing credit and are mitigated by diversification of sales. As of December 31, 2007, Oxiteno S.A. Indústria e Comércio and its subsidiaries maintained R\$ 1.5 (as of December 31, 2006 - R\$ 1.6), the subsidiaries of Ultragaz Participações Ltda, maintained R\$ 16.7 (as of December 31, 2006 - R\$ 20.0) and Ipiranga/Refinery maintained R\$ 43.4 as an allowance for doubtful accounts.

Interest rates - The Company and its subsidiaries adopt conservative policies to obtain and invest funds and to minimize the cost of capital. The temporary cash investments of the Company and its subsidiaries are comprised substantially of transactions linked to the CDI, as described in Note 4. A portion of the financial assets is intended for foreign currency hedges, as mentioned below. Borrowings are mainly originated from the BNDES, debentures and foreign currency financing are disclosed in Note 14.

Exchange rate - The Company's subsidiaries use foreign currency swap instruments (mainly US\$ and CDI) available in the financial market to cover assets and liabilities in foreign currency, so as to reduce the exchange rate variation effects on their results. Such swap instruments have amounts, periods and indexes equivalent to the assets and liabilities in foreign currency to which they are linked. The following summary shows assets and liabilities in foreign currency, translated into Brazilian Reals at December 31, 2007 and 2006 at the corresponding year end exchange rates:

	2007	2006
Assets:		
Investments abroad and swap instruments	284.9	94.4
Foreign cash and cash equivalents abroad	282.1	50.4
Short and long-term investments in foreign currency	359.2	726.9
Receivables from foreign customers, net of advances on foreign exchange contracts and allowance for losses	35.1	25.4
Total	961.3	897.1
Liabilities:		
Foreign currency financing	988.3	870.1
Import transactions payables	14.6	30.9
Total	1,002.9	901.0
Net asset (liability) exposure in foreign currency	(41.6)	(3.9)

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

(Amounts in millions of Brazilian Reals - R\$, unless otherwise stated)

The exchange rate variation related to cash and cash equivalents, short and long-term investments in foreign currencies was recorded as financial expense in the consolidated statement of income for the year ended December 31, 2007, in the amount of R\$ 24.0 (financial expense in 2006 of R\$ 15.3 and financial expense in 2005 of R\$ 9.4).

Market value of financial instruments

Market value of financial instruments as of December 31, 2007 and 2006 are as follows:

	2007		2006	
	Book value	Market value	Book value	Market value
Financial assets:				
Cash and cash equivalents	862.4	862.8	385.1	385.1
Short-term investments	845.3	864.5	737.3	734.6
Long-term investments	120.8	121.1	548.0	564.4
	1,828.5	1,848.4	1,670.4	1,684.1
Financial liabilities:				
Current and long-term financing and swaps	1,683.9	1,704.9	1,236.9	1,265.3
Current and long-term debentures	1,578.7	1,578.6	312.8	312.7
	3,262.6	3,283.5	1,549.7	1,578.0
Investment:				
Other investments in affiliated companies	34.1	47.4	25.5	29.0

The market value of financial instruments was obtained through the commonly used marking to market methodology, which consists of carrying the balances of the instruments until the maturity at the respective contracted rates, discounting them to present value at market rates as of December 31, 2007 and 2006. The market value of investments in affiliated companies is based on the share price trading on the BOVESPA - São Paulo Stock Exchange.

20. CONTINGENCIES AND COMMITMENTS

a) Labor, civil and tax lawsuits

The Petrochemical Industry Labor Union, of which the employees of Oxiteno Nordeste S.A. Indústria e Comércio are members, filed a lawsuit against the subsidiary in 1990, demanding compliance with the adjustments established in collective labor agreement, in lieu of the salary policies effectively followed. At the same time, the employers' association proposed a collective bargaining for the interpretation and clarification of the fourth clause of the agreement. Based on the opinion of its legal counsel, who analyzed the last decision of the Federal Supreme Court (STF) on the collective bargaining, as well as the status of the individual lawsuit of the subsidiary, management believes that an accrual for a potential loss is not necessary as of December 31, 2007.

The subsidiaries Companhia Ultragaz S.A. and Ultragaz Participações Ltda. are parties to an administrative proceeding at the SDE (Economic Law Department), linked to CADE (Administrative Council for Economic Defense), under the allegation of anticompetitive practice in certain municipalities of the State of Minas Gerais in 2001. In September 2005, the SDE issued a technical notice recommending to CADE a ruling against the companies involved in this proceeding. In their defense, the subsidiaries' arguments, among others, are that: (i) under the terms of the notice issued by the Company's chief executive officer on July 4, 2000, the subsidiaries' employees were forbidden to discuss with third parties matters related to prices; and (ii) no consistent proof was attached to the proceeding's records. In view of the arguments presented, the fact that the technical notice has no binding effect on CADE's decision, and their legal counsel's opinion, the subsidiaries did not record a provision for this issue. Should CADE's decision be unfavorable, the subsidiaries could still discuss the issue at the judicial level.

The subsidiary Companhia Ultragaz S.A. is a defendant in lawsuits relating to damages caused by an explosion in 1996 in a shopping mall in the city of Osasco, State of São Paulo. Such lawsuits involve: (i) individual suits filed by victims of the explosion claiming damages from Ultragaz for the loss of economic benefit and for pain and suffering, (ii) reimbursement of expenses from management of the shopping mall and its insurance company, and (iii) a class action lawsuit seeking indemnification for material damages and pain and suffering for all the victims injured and deceased. The subsidiary believes that it has presented evidence that defective gas pipes in the shopping mall caused the accident and that Ultragaz's on-site LPG storage facilities did not contribute to the explosion. Of the 58 lawsuits judged so far, a favorable judgment was obtained for 57, and out of these 21 have already been dismissed; only 1 had an unfavorable decision, which is still subject to appeal, and whose amount, should the decision be upheld, is R\$ 0.017. Six lawsuits have not yet been judged. The subsidiary has insurance coverage for these lawsuits, and the uninsured contingent amount is R\$ 22.5 as of December 31, 2007. The Company has not recorded any provision for this amount, since it believes the probability of loss is remote.

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

(Amounts in millions of Brazilian Reals - R\$, unless otherwise stated)

The Company and its subsidiaries obtained injunctions to pay PIS and COFINS (taxes on revenues) without the changes introduced by Law No. 9718/98 in its original version. The ongoing questioning refers to the levy of these taxes on sources of income other than revenues. In 2005 the STF has decided the matter favorable to the taxpayer. Although it is a precedent, the effect of this decision does not automatically apply to all the companies, since they have to await judgment of their own lawsuit. In 2007 final decisions were rendered for the Company and its subsidiaries which reversed the accrual previously recorded, in the amount of R\$ 12.8 (in 2006 - R\$ 23.5 of accrual reversal and R\$ 26.2 of recovery of amounts paid in previous periods), net of attorney's fees. The Company has other subsidiaries whose lawsuits have not yet been judged. Should there be final favorable outcomes for the subsidiaries in all lawsuits still not judged, the Company estimates that the total positive effect in income before income and social contribution taxes should reach R\$ 30.4, net of attorney's fees.

The Company's subsidiary Utingás Armazenadora S.A. has challenged in court ISS (Service Tax) tax assessments issued by the municipal government of Santo André. Legal counsel of the subsidiary classifies the risk as low, since a significant portion of the judgement decisions at the administrative appeal level was favorable to the subsidiary. The argument defended by the subsidiary is supported by the opinion of a renowned tax specialist. The unprovisioned updated amount of the contingency as of December 31, 2007 is R\$ 42.9 (R\$ 33.4 as of December 31, 2006).

On October 07, 2005, the subsidiaries of Ultragaz Participações Ltda. filed for and obtained an injunction to support the offset of PIS and COFINS credits against other federal taxes administered by the Federal Revenue Service (SRF), notably corporate income tax and social contribution taxes. According to the injunction obtained, the subsidiaries have been making escrow deposits for these debits in the amount of R\$ 81.2 as of December 31, 2007 (R\$ 32.3 as of December 31, 2006) and recognizing the corresponding liability for this purpose.

Subsidiaries Ultragaz Participações Ltda, Cia. Ultragaz S.A., Utingás Armazenadora S.A., Terminal Químico de Aratu S.A. - Tequimar, Transultra - Armazenamento e Transporte Especializado Ltda. and Ultracargo Operações Logísticas e Participações Ltda., hold judicial measures petitioning the full and immediate utilization of supplementary monetary adjustment based on the Consumer Price Index (IPC) / National Treasury Bonds (BTN) for 1990 (Law No. 8.200/91), and hold accruals in the amount of R\$ 13.6 as a possible contingency, in case of unfavorable outcome of such lawsuits.

On December 29, 2006, the subsidiaries Oxiteno S.A Indústria e Comércio, Oxiteno Nordeste S.A Indústria e Comércio, Companhia Ultragaz S.A. and Transultra Armazenamento e Transporte Especializado Ltda filed for an injunction seeking the deduction of ICMS from PIS and COFINS tax basis. Oxiteno Nordeste S.A Indústria e Comércio received an injunction and is paying the amounts into judicial deposits, as well as recording the respective accrual in the amount of R\$ 10.7 as of December 31, 2007; the others subsidiaries did not receive similar injunction and are waiting the judgment of an appeal to Regional Federal Court - TRF of the 3rd Region.

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

(Amounts in millions of Brazilian Reals - R\$, unless otherwise stated)

The Company and some subsidiaries filed a request for an injunction seeking not to be subject to the legislation that restricted the offset of corporate income tax (IRPJ) and social contribution (CSLL) tax loss carryforwards computed through December 31, 1994 to 30% of income for the year. As a result of the position of Supreme Court - STF and based on opinion of the Company's legal advisors, a provision for contingency was recorded in amount of R\$ 6.6.

In 2007, considering the evolution of the recent jurisprudence, the opinion of the Company's legal advisors and the increase of amounts involved, the Company and its subsidiaries decided to accrue PIS and COFINS on credits of interest on capital. The total amount accrued as of December 31, 2007 is R\$ 20.7.

Regarding Ipiranga/Refinery, the main provisions for contingencies refer to: (a) requirements for the reversal of ICMS credits on transportation services taken during the freight reimbursement system established by DNC (currently National Agency for Petroleum - ANP), in the amount of R\$ 7.0; (b) requirements for the reversal of ICMS credits in the State of Minas Gerais, on interstate outflows carried under Article 33 of ICMS Agreement 66/88, which allowed the maintenance of credits and which was suspended by an injunction conceded by the Supreme Court - STF, in the amount of R\$ 27.4; (c) reversal of the deduction of unconditional discounts from the ICMS calculation basis, in the State of Minas Gerais, as a result of tax substitution, in the amount of R\$ 15.7; (d) litigation based on clauses of contracts with clients; (e) claims made by former employees and outsourced personnel regarding salary related amounts.

The main tax contingencies of Ipiranga/Refinery which present risks evaluated as possible, and which, based in this evaluation, have not been accrued for in the financial statements, refer to ICMS, in the total amount of R\$ 114.0 and relate, mainly to: (a) requirements for the reversal of credits on interstate outflows; (b) requirements of ICMS on the purchases of basic oils; (c) demands to reverse credits related with interstate transport services operations; (d) demands to reverse credits derived from excess taxation generated on the purchase of products in the petroleum refinery under the tax substitution system; (e) demands to reverse credits in operations with alcohol (anhydrous fuel alcohol) in the State of São Paulo; (f) tax assessment resulting from operations of alcohol loan returns (anhydrous fuel alcohol). In addition, subsidiary Distribuidora de Produtos de Petróleo Ipiranga S.A.- DPPI and its subsidiaries have tax assessments concerning non-homologation of IPI credits originated in acquisitions of products whose subsequent sales had no taxation. The non-accrued contingent amount as of December 31, 2007, is R\$ 39.6.

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

(Amounts in millions of Brazilian Reals - R\$, unless otherwise stated)

The Company and its subsidiaries have other ongoing administrative and judicial proceedings. Legal counsel classified the risks on these proceedings as possible and/or remote and, therefore, no reserves for potential losses on these proceedings have been recorded. The Company and its subsidiaries also have litigations that aim to recover taxes and contributions, that have not been registered in the financial statements due to their contingent nature.

Accruals and escrow deposits are summarized below:

Provisions	Balance in 2006	Initial balance of Ipiranga/ Refinery	Additions	Write-offs	Interest	Balance in 2007
Income and social contribution taxes	36.0	0.1	62.7		6.8	105.6
PIS and COFINS	14.7		30.9	(12.7)	0.7	33.6
ICMS	15.8	50.2		(7.0)	2.1	61.1
INSS	2.2			(0.1)	0.3	2.4
Other		0.8	0.9	(0.2)	0.5	2.0

b) Take or pay commitments

The Company's subsidiary Terminal Químico de Aratu S.A. - Tequimar has contracts with CODEBA - and Complexo Industrial Portuário Governador Eraldo Gueiros, in connection with their port facilities in Aratu and Suape, respectively. Such contracts establish minimum cargo movement of 1,000,000 tons per year for Aratu, effective through 2022, and 250,000 tons per year for Suape, effective through 2027. If annual movement is less than the established minimum, the subsidiary is required to pay the difference between the actual movement and the minimum contractual movement using the port rates in effect at the date of payment. As of December 31, 2007, such rates were R\$ 4.59 and R\$ 3.97 per ton for Aratu and Suape, respectively. The subsidiary has met the minimum cargo movement limits since inception of the contracts. At December 31, 2007, future minimum lease payments under these operating leases are: R\$ 5.6 in 2008, R\$ 5.6 in 2009, R\$ 5.6 in 2010, R\$ 5.6 in 2011, R\$ 5.6 in 2012 and thereafter R\$ 57.8. A substantial part of these leases are paid directly to the port authorities by Tequimar's customers. The part of such lease expenses paid by Tequimar amounted to R\$ 2.3 in 2007, R\$ 2.2 in 2006 and R\$ 2.0 in 2005.

The Company's subsidiary Oxiteno Nordeste S.A. Indústria e Comércio has a supply contract with Braskem S.A., that establishes a minimum annual consumption level of ethylene per year. The minimum purchase commitment and the actual demand for the years ended December 31, 2007 and 2006, expressed in tons of ethylene, are summarized below. Should the minimum purchase commitment not be met, the subsidiary would be liable for a fine of 40% of the current ethylene price for the quantity not purchased.

	Minimum purchase Commitment		Actual demand	
	2007	2006	2007	2006
In tons of ethylene	180,000	137,900	197,242	181,496

At December 31, 2007, future minimum purchase commitments under this contract, based on the price prevailing at that date, are: R\$ 232.4 in 2008, R\$ 244.6 in 2009, R\$ 256.9 in 2010, R\$ 269.1 in 2011, R\$ 275.2 in 2012 and R\$ 2,574.4 between 2013 and 2021. Total purchases made under this contract were R\$ 700.6 in 2007, R\$ 621.5 in 2006 and R\$ 624.9 in 2005.

On August 16, 2006, the subsidiary signed a memorandum of understanding, altering the ethylene supply contract with Braskem S.A. described above. The memorandum of understanding regulates new conditions of ethylene supply through 2021, and in 2007 and 2008 the subsidiary is having access to an additional volume of ethylene, with the minimum quantity in tons increasing to 180 thousand and 190 thousand, respectively. The new condition provided for in the memorandum of understanding are reflected in future minimum purchase commitments mentioned above.

(Amounts in millions of Brazilian Reais R\$, unless otherwise stated)

c) Insurance coverage for subsidiaries

The Company has insurance policies to cover various risks, including loss and damage from fire, lightning, explosion of any nature, windstorm, plane crash and electrical damage, among others, protecting the plants and other branches of all subsidiaries except Ipiranga/Refinery, with coverage amounting to US\$ 445 million.

For the plants of Oxiteno S.A. Indústria e Comércio, Oxiteno Nordeste S.A. Indústria e Comércio, Oxiteno México S.A. de C.V. and Oxiteno Andina, C.A., there is also a loss of income insurance against losses from potential accidents related to their assets, with coverage amounting to US\$ 258 million.

A civil liability insurance program covers the Company and its subsidiaries, with global coverage of US\$ 200 million, for losses and damages from accidents caused by third parties, related to the commercial and industrial operations and/or distribution and sale of products and services.

Group life insurance, personal accident insurance, health insurance, and domestic and international transportation insurance are also contracted.

Ipiranga/Refinery have an insurance and risk management program which provides coverage for all their insurable assets, as well as coverage against risks resulting from the interruption of production, by means of an operating risk policy negotiated with the national and international insurance market, through the Brazilian Reinsurance Institute.

The coverage and limits insured by the policies are based on a detailed study of risks and losses, prepared by local insurance consultants. Management considers the type of insurance contracted sufficient to cover possible claims, in view of the nature of the activities of the companies.

The main coverage are related to operating risks, loss of profits, multiple industrial perils, multiple office risks, named perils - pools and civil liability.

d) Lease agreements for distribution of fuels and IT equipment

On December 31, 2007, the subsidiaries CBPI and DPPI had lease agreements mainly related to fuel distribution equipments, such as tanks, gas pump and compressors. The terms of these agreements are between 36 and 48 months.

The property, plant and equipment amount, net of depreciation, and the liability corresponding to these equipments, if they were capitalized, are shown below:

	2007
Property, plant and equipment net of depreciation	19.2
Financing as of December 31, 2007	17.6
Current liabilities	7.7
Non-current liabilities	9.9

The future payments assumed in connection with these contracts, totalize approximately:

	2007
2008	7.7
2009	6.5
2010	3.5
	17.7

The payments above include the predetermined interest and will be updated by the CDI, until their respective dates.

(*) The balance of receivable, payable, purchase and sale transactions refers substantially to fuel supplies of RPI to DPPI. The amount in the table above refers to the transactions that were not eliminated on consolidation, given that RPI's consolidation is proportional and DPPI's is full.

Purchase and sale transactions refer, substantially, to purchases of raw materials, other materials and storage and transportation services, carried out at market prices and conditions, considering suppliers and customers with equal operating capacity.

22. INCOME AND SOCIAL CONTRIBUTION TAXES

a) Deferred income and social contribution taxes

The Company and its subsidiaries recognize tax assets and liabilities, which do not expire, arising from tax loss carryforwards, temporary add-backs, revaluation of property, plant and equipment and other procedures. Tax credits are based on the continuing profitability from operations. Deferred income and social contribution taxes are presented in the following principal categories:

	2007	2006
Assets:		
Deferred income and social contribution taxes on:		
Provision for losses in assets	26.5	20.4
Provision for contingencies	48.3	13.3
Provision for post-retirement benefits (see Note 24.b)	26.8	
Provision for interest on capital	45.1	
Provision for differences of cash basis versus accrual basis	29.4	16.5
Other provisions	17.8	9.3
Income and social contribution on tax loss carryforwards	34.7	26.0
Total	228.6	85.5

(Amounts in millions of Brazilian Reals - R\$, unless otherwise stated)

The estimated recovery of deferred income and social contribution tax assets is shown below:

Until 1 year	109.0
From 1 to 2 years	41.1
From 2 to 3 years	26.4
From 3 to 4 years	35.0
From 5 to 7 years	8.8
From 8 to 10 years	8.3
	228.6

The Company and its subsidiaries have stopped to accrue income and social contribution taxes on income earned abroad for the years prior to 2002, due to the lapsing of the contingency for these years.

b) Reconciliation of income and social contribution taxes to statutory tax rates substantially related to domestic operation

	2007	2006	2005
Income before taxes, equity in subsidiaries and affiliated companies and minority interest, after employees statutory interest	368.2	342.5	329.2
Official tax rates - %	34.0	34.0	34.0
Income and social contribution taxes at official rates	(125.2)	(116.4)	(111.9)
Adjustments to the effective tax rate:			
Operating provisions and nondeductible expenses/nontaxable income	(5.5)	7.7	17.8
Adjustments to estimated income	9.6	1.8	1.1
Employees Meal Program (PAT)	1.7	0.4	0.5
Other adjustments	(1.7)	0.1	(0.1)
Income and social contribution taxes before tax benefits	(121.1)	(106.4)	(92.6)
Benefits of tax holidays - ADENE	35.2	50.3	63.8
Income and social contribution taxes per statement of income	(85.9)	(56.1)	(28.8)
Current	(207.8)	(111.8)	(113.1)
Deferred	86.7	5.4	20.5
Benefits of tax holidays - ADENE	35.2	50.3	63.8

c) Tax loss carryforwards

The total amount of R\$102.3 related to tax loss carryforwards may be used to offset up to 30% of future taxable income and do not expire.

(Amounts in millions of Brazilian Reals - R\$, unless otherwise stated)

d) Tax exemption

The following indirect subsidiaries have partial or total exemption from income tax in connection with a government program for the development of the Northeast Region of Brazil:

Subsidiary	Unit	Incentive - %	Expiration date
Oxiteno Nordeste S.A. Indústria e Comércio	Camaçari plant	75	2016
Bahiana Distribuidora de Gás Ltda.	Mataripe plant	75	2013
	Suape plant (*)	100	2007
	Ilhéus plant	25	2008
	Aracaju plant	25	2008
	Caucaia plant	75	2012
Terminal Químico de Aratu S.A. - Tequimar	Aratu Terminal	75	2012
	Suape Terminal	75	2015

(*) In December 2007, Suape plant's exemption expired and in the first quarter of 2008 a request will be filed with ADENE (Northeast Development Agency), the agency in charge of managing this incentive program, seeking a 75% income tax reduction until 2017.

23. SHARE COMPENSATION PLAN

The Extraordinary Shareholders Meeting held on November 26, 2003 approved a compensation plan for management of the Company and its subsidiaries, which provides for: (i) the initial grant of usufruct of shares issued by the Company and held in treasury by the subsidiaries in which the beneficiaries are employed, and (ii) the transfer of the beneficial ownership of the shares between five and ten years of the initial concession provided that the professional relationship between the beneficiary and the Company and its subsidiaries is not interrupted. The total value granted to executives until December 31, 2007, including taxes, was R\$ 16.3 (R\$ 12.3 as of December 31, 2006). Such value is being amortized over a period of five to ten years and the amortization related to the year ended December 31, 2007, in the amount of R\$ 1.3 (R\$ 0.9 in 2006 and R\$ 0.8 in 2005), was recorded as an operating expense for the period.

24. EMPLOYEE BENEFITS AND PRIVATE PENSION PLAN

a) ULTRAPREV Associação de Previdência Complementar

In August 2001, the Company and its subsidiaries (except subsidiaries recently acquired from the Ipiranga Group) began to offer their employees a defined contribution pension plan, managed by Ultraprev - Associação de Previdência Complementar. Under the terms of the plan, the basic contribution of each participating employee is defined annually by the participant between 0% and 11%, of his/her salary. The sponsoring companies provide a matching contribution to the basic contribution. As participants retire, they may opt to receive monthly: (i) a percentage varying between 0.5% and 1.0% of the fund accumulated in his/her name at Ultraprev, or (ii) a fixed amount that will extinguish the fund accumulated in his/her name in a period between 5 and 25 years. As such, neither the Company nor its subsidiaries assume responsibility for guaranteeing amounts or periods of receipt for the participants that retire. In 2007, the Company and its subsidiaries contributed R\$ 3.5 (R\$ 3.3 in 2006 and R\$ 3.0 in 2005) to Ultraprev, which was charged to income for the year. The total number of employee participants as of December 31, 2007 was 5,522, with 14 participants retired to date. Additionally, Ultraprev has 1 active participant and 31 former employees receiving benefits according to the policies of a previous plan.

b) Fundação Francisco Martins Bastos

The subsidiaries Distribuidora de Produtos de Petróleo Ipiranga S.A., Companhia Brasileira de Petróleo Ipiranga and Refinaria de Petróleo Ipiranga S.A., together with other companies which formed the Ipiranga Group, are sponsors of Fundação Francisco Martins Bastos, which provides a defined benefit plan to their employees.

FFMB's benefit plan was created in 1993. At first, only the basic benefit was granted (structured in the form of a defined benefit) and in July 1998, the supplementary benefit became effective (in the form of a defined contribution during the stage when programmable benefits are capitalized) with a percentage of contribution applicable on the possible variable remuneration. The cost of the plan is apportioned between the sponsors and participants.

Besides the retirement of eligible employees Ipiranga/Refinery also provide for post-retirement benefits with a bonus for the length of service, severance of the Government Severance Indemnity Fund - FGTS and health insurance plan and life insurance for eligible employees (supplementary benefits).

Amounts related to the supplementary benefits and pension plan have been determined upon an annual actuarial assessment, carried out by independent actuaries, on December 31, 2007 and are recorded in the financial statements in accordance with CVM Resolution No. 371/2000.

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

(Amounts in millions of Brazilian Reals - R\$, unless otherwise stated)

The reconciliation of post-retirement benefits` liabilities at December 31 is as follows:

	2007
Present value of liabilities	(372.2)
Present value of unprovided liabilities	(76.9)
Fair value of assets	417.8
Non-recognized actuarial gains	(62.6)
Liabilities net of post-retirement benefits	(93.9)
Current liabilities	(8.8)
Non-current liabilities	(85.1)

The portion of actuarial gains or losses to be recorded as income or deficit is the amount of unrecorded gains or losses which exceed the highest of the limits below, in each year:

(i) 10% of the current amount of total actuarial liability of the defined benefit; and

(ii) 10% of the fair value of the plan`s assets.

The portion which exceeds the limits shall be amortized on an annual basis and the amount will be divided by the estimated remaining average working life for employees taking part in the plan.

Amounts recorded in the Statement of operations are as follows:

	2007
Current services cost	10.0
Interest cost	47.5
Expected return on assets	(47.0)
Amortization of actuarial losses	0.7
Employee`s contribution	(3.1)
Total expenses for the year	8.1

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

(Amounts in millions of Brazilian Reals - R\$, unless otherwise stated)

The turnover of net liabilities of post-retirement benefits, may be summarized as follows:

	2007
Net liability at the beginning of the year	(91.2)
Expenses in the year	(8.1)
Real contributions of the company in the year	5.1
Real benefits paid in the year	4.4
Liability written-off due to sale/effect reduction	(4.1)
 Net liability at the end of the year	 (93.9)

The principal actuarial assumptions adopted are the following:

Discount rate at present value of actuarial liability - 10.2% p.a.

Expected long-term return on plan assets - 10.2% p.a.

Expected salary increase rate - 6.1% p.a.

Inflation rate (long-term) - 4.0% p.a.

Growth rate of medical benefits - 7.1% p.a.

Biometric assumptions used:

Life table - AT 1983 Basic compensation of 10%*

Turnover table - adjusted Towers Perrin

Disabled persons - life table - RRB 1983

Disability entry table - RRB 1944 changed

* The CSO-80 life table was used for the life insurance benefit

25. SUMMARY AND RECONCILIATION OF THE DIFFERENCES BETWEEN ACCOUNTING PRACTICES ADOPTED IN BRAZIL AND ACCOUNTING PRINCIPLES GENERALLY ACCEPTED IN THE UNITED STATES OF AMERICA (U.S. GAAP)

I - Description of GAAP differences

The consolidated financial statements of the Company are prepared in accordance with accounting practices adopted in Brazil, which comply with those prescribed by Brazilian corporate law and specific standards established by the Brazilian Securities Commission (CVM). Note 3 to the consolidated financial statements summarizes the accounting policies adopted by the Company. Accounting policies, which differ significantly from U.S. GAAP, are summarized below.

a) Inflation accounting

The Company, as described in Note 3.i), accounts for the effects of inflation in its consolidated financial statements through December 31, 1995. Under U.S. GAAP, Brazil was considered to be a highly inflationary economy until July 1, 1997, and the effect of inflation was recognized until December 31, 1997.

In determining amounts under U.S. GAAP, the effects of inflation for the years ended December 31, 1996 and 1997 were determined using the Índice Geral de Preços -Disponibilidade Interna - IGP-DI index, which is widely-accepted and respected index published monthly by the Fundação Getúlio Vargas.

Through December 31, 1995, the Company used indexes established by the government to restate balances and transactions for purposes of its corporate law financial statements. Such indexes do not necessarily represent changes in general price levels, as would be required under U.S. GAAP.

Because the Company's management believes that the Índice Geral de Preços - Disponibilidade Interna - IGP-DI is an appropriate and consistent measure of the general price inflation in Brazil and because of its availability, for U.S. GAAP purposes the Company adopted the IGP-DI for restatement of its financial statements through December 31, 1995, replacing the government mandated index. This procedure is consistent with the recommendation by the Brazilian Task Force (organized under the AICPA International Practices Task Force to review the issue of the appropriate index to be used for preparing price-level adjusted financial statements of Brazilian companies filing with the SEC) of using the IGP-M or IGP-DI for such purposes. Thus, all nonmonetary assets and liabilities were restated using the IGP-DI since the inception of the Company, through December 31, 1997.

b) Reversal of fixed asset revaluations and related deferred tax liabilities

For U.S. GAAP reconciliation purposes, the revaluation of fixed assets and the related deferred income tax effects recorded in the financial statements prepared in accordance with accounting practices adopted in Brazil have been eliminated in order to present fixed assets at historical cost less accumulated depreciation. Accordingly, the depreciation on such revaluation charged to income has also been eliminated for U.S. GAAP reconciliation purposes.

c) Deferred charges

Accounting practices adopted in Brazil permit the deferral of research and development costs and of pre-operating expenses incurred in the construction or expansion of a new facility until the facility begins commercial operations. Deferred charges are amortized over a period of five to ten years.

For U.S. GAAP reconciliation purposes, such amounts do not meet the conditions established for deferral and, accordingly, have been charged to income and the related amortization under accounting practices adopted in Brazil has been reversed.

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

(Amounts in millions of Brazilian Reais - R\$, unless otherwise stated)

d) Investments in affiliated companies

As from 1996, Brazilian corporate law allows certain less than 20% owned affiliated companies in which an investor owns more than 10% of voting stock to be accounted for under the equity method. In addition, certain more than 20% and less than 50% owned affiliated companies deemed not significant in relation to their parent company are accounted at cost.

For U.S. GAAP reconciliation purposes, less than 20% owned affiliated companies have been accounted for on the basis of cost and more than 20% and less than 50% owned affiliated companies have been accounted for on the equity method for all years presented.

Brazilian corporate law allows certain jointly controlled corporate entities to be consolidated in a pro rata basis. U.S. GAAP requires these entities to be reported under the equity method. The Company's investment in Refining is consolidated using the pro rata method for Brazilian GAAP purposes.

e) Capitalization of interest in relation to construction in progress

Under accounting practices adopted in Brazil, prior to January 1, 1996 the Company was not required to capitalize the interest cost of borrowed funds as part of the cost of the related asset. Under U.S. GAAP, capitalization of borrowed funds during construction of major facilities is recognized as part of the cost of the related assets.

Under U.S. GAAP, interest on construction-period financing denominated in foreign currencies is capitalized using contractual interest rates, exclusive of foreign exchange or monetary correction gains or losses. Interest on construction-period financing denominated in Brazilian Reais is capitalized.

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

(Amounts in millions of Brazilian Reals - R\$, unless otherwise stated)

f) Acquisitions and business combinations

Under accounting practices adopted in Brazil, assets and liabilities of acquired entities are reflected at book values. Goodwill is represented by the excess of purchase price paid over the book value of net assets and is amortized on a straight-line basis over the periods estimated to be benefited.

Under U.S. GAAP, business combinations are accounted for by the purchase method utilizing fair values. Goodwill is not amortized and should be tested for impairment. An impairment test of goodwill is performed annually or more frequently if events or changes in circumstances indicate that the goodwill might be impaired. Such impairment test is performed utilizing a two-step method. The first step compares the fair value of a reporting unit with its carrying amount, including goodwill. If the carrying amount of a reporting unit exceeds its fair value, the second step is performed to measure the amount of impairment loss, if any. The second step compares the implied fair value of reporting unit goodwill with the carrying amount of that goodwill. If the implied fair value of reporting unit goodwill is lower than the carrying amount of such goodwill, an impairment loss is recognized.

Under Brazilian corporate law, purchases by subsidiaries of their own stock from minority shareholders are initially recorded at cost. Upon cancellation of these shares, the difference between cost and the related book value of the subsidiary's shareholders' equity is recorded by the parent company and in the consolidated financial statements as a capital gain or loss. Direct purchases by the parent company of the subsidiaries' stock from minority shareholders are recorded at cost, with the difference between cost and the related book value of the subsidiaries' shareholders' equity recorded as positive or negative goodwill by the parent company and in the consolidated financial statements.

Under U.S. GAAP, purchases of treasury stock by subsidiaries from minority shareholders and direct purchases by the parent company of the subsidiaries' stock from minority shareholders are recorded as step acquisitions under the purchase method, with assignment of the purchase price to the underlying assets and liabilities based on their fair values and recording of goodwill to the extent that the purchase price exceeds the proportionate amount of the net fair value of the assets and liabilities. No gain or loss is recognized upon either purchase or cancellation of the shares.

Ultrapar Participações S.A. and Subsidiaries

(Amounts in millions of Brazilian Reals R\$, unless otherwise stated)

Acquisition of Ipiranga

As mentioned in Note 3.a), on April 18, 2007, the Company acquired the controlling interest of Ipiranga and of Refinery, the management of which is equally shared among Petrobras, Ultrapar and Braskem. The results of Ipiranga and Refinery have been included in the consolidated financial statements since April 2007. Following the transaction, Ultrapar, already the largest LPG distributor in Brazil, became the second largest group in the fuel distribution business in Brazil, with approximately 15% market share. Ultrapar believes that fuel distribution is a natural extension of LPG distribution because it has similar profitability drivers: logistics efficiency, management of a dealer network and leveraging of a renowned brand.

The cost of acquisition was R\$ 1,857.9. Of the total cost of acquisition, R\$ 814.8 relates to DPPI and R\$ 1,043.1 relates to CBPI.

Under U.S. GAAP, the Company recorded the acquisition based on the fair value of the assets acquired and liabilities assumed and determined goodwill in accordance with the purchase method of accounting prescribed by Statement of Financial Accounting Standards (SFAS) 141, Business Combinations . This allocation is completed and resulted in the identification of goodwill as shown below.

The following table summarizes the estimated fair values of the assets acquired and liabilities assumed at the conclusion of the acquisition:

	R\$
Current assets	1,649.6
Noncurrent assets	431.5
Property, plant and equipment	456.3
Intangible assets	95.3
Goodwill	413.7
Total assets acquired and goodwill	3,046.4
Current liabilities	814.7
Noncurrent liabilities	373.8
Net assets	1,857.9

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

(Amounts in millions of Brazilian Reals - R\$, unless otherwise stated)

Goodwill recorded under accounting practices adopted in Brazil	484.0
Goodwill difference between U.S. GAAP and accounting practices adopted in Brazil	(70.3)
Goodwill recorded under U.S. GAAP	413.7
Intangible assets:	
Trademark acquired - Ipiranga	83.4
Franchise agreement - am/pm	11.9
	95.3

Of the R\$ 95.3 of acquired intangible assets, R\$ 83.4 was assigned to a registered trademark that is not subject to amortization. The remaining R\$ 11.9 of acquired intangible assets have a useful life of approximately 8 years.

The R\$ 413.7 of goodwill was assigned to the distribution of fuels/lubricants segment. The goodwill of R\$ 484.0 under accounting practices adopted in Brazil is expected to be deductible for tax purposes.

The following summary presents the Company's unaudited pro forma consolidated results of operations for the periods ended December 31, 2007 and 2006, in accordance with accounting practices adopted in Brazil, as if the distribution of fuels/lubricants acquisition had been completed at the beginning of each period. The pro forma information is only presented for comparative purposes and does not purport to be indicative of what would have occurred had the acquisition actually been made at such dates, nor is it necessarily indicative of future operating results:

Amounts under accounting practices adopted in Brazil	2007	2006
Net sales and services	24,743.8	24,894.4
Operating income before financial items	586.7	689.9
Net income	210.2	407.8
Net earnings per thousand shares - whole R\$	1.55	5.03

Ultrapar Participações S.A. and Subsidiaries

(Amounts in millions of Brazilian Reals - R\$, unless otherwise stated)

Acquisition of Petrolog

As mentioned in Note 3.a), on April 30, 2007 the Company acquired, through its subsidiary Transultra - Armazenamento e Transporte Especializado Ltda., the company Petrolog Serviços e Armazéns Gerais Ltda. for the amount of R\$ 8.1, recording goodwill in the amount of R\$ 6.5, amortized in 10 years, based on its expected future profitability. The Company has not identified any significant differences between accounting practices adopted in Brazil and U.S. GAAP in relation to this acquisition.

Acquisition of Oxiteno Andina, C.A.

As mentioned in Note 3.a), on September 13, 2007 the Company acquired, through its subsidiary Barrington S.L., the company Oxiteno Andina, C.A. for the amount of R\$ 15.0, recording goodwill in the amount of R\$ 0.2, amortized in 10 years, based on its expected future profitability. The Company has not identified any significant differences between accounting practices adopted in Brazil and U.S. GAAP in relation to this acquisition.

g) Earnings per share

Under accounting practices adopted in Brazil, it is permitted to determine earnings per share based upon the weighted average number of shares outstanding during each year that earnings are reported. Subsequent changes in the Company's share capital, such as stock dividends, are not retroactively reflected in the disclosure of number of shares outstanding and in the calculation of earnings per share under accounting practices adopted in Brazil, except for the reverse stock split.

Under U.S. GAAP, earnings per share are determined based upon the weighted average number of shares outstanding during the period, giving retroactive effect to stock dividends and stock splits. Nonvested shares granted to certain executives of the Company as disclosed in Note 25.I.1) are not included in the computation of basic earnings per share even though the shares are legally issued, since such shares are contingently returnable. These nonvested shares are included in diluted earnings per share applying the treasury stock method. The calculation of earnings per share under U.S. GAAP is shown in Note 25.V.a).

The Extraordinary Shareholders' Meeting held on July 20, 2005 approved a reverse stock split of the Company's shares, attributing 1 (one) share in substitution for every 1,000 (thousand) existing shares. Likewise, each American Depositary Share - ADS, previously representative of a lot of 1,000 (thousand) preferred shares, became representative of 1 (one) preferred share.

(Amounts in millions of Brazilian Reals - R\$, unless otherwise stated)

h) Available-for-sale securities

Equity securities

Under accounting practices adopted in Brazil, available-for-sale equity securities are generally carried at cost, less provision charged to the statement of income if a loss in value is considered to be other than temporary.

For U.S. GAAP reconciliation purposes, the available-for-sale equity security has been recorded at estimated fair value, and the resulting accumulated adjustment, in the amount of R\$ 10.6 (positive), R\$ 4.1 (positive) and R\$ 5.1 (positive) as of December 31, 2007, 2006 and 2005, respectively, net of deferred tax effect, when applicable, has been recognized as a separate component of shareholders' equity until realization. The estimated fair values of the equity security carried by the Company are R\$ 39.7 and R\$ 22.2 as of December 31, 2007 and 2006, respectively. During the years presented, no equity security classified under U.S. GAAP as available-for-sale was disposed of.

Debt securities

Under accounting practices adopted in Brazil, available-for-sale debt securities are generally carried at cost, plus interest income earned less provisions, when applicable, charged to the statement of income to reduce its carrying value to market value.

For U.S. GAAP reconciliation purposes, available-for-sale debt securities have been recorded at estimated fair value, and the resulting accumulated adjustment, in the amount of R\$ 12.8 positive as of December 31, 2007 (R\$ 9.0 positive as of December 31, 2006 and zero as of December 31, 2005), has been recognized as a separate component of shareholders' equity, net of deferred tax effects and minority interest, when applicable, until realization.

As of December 31, 2007 and 2006, the fair values of available-for-sale debt securities amounted to R\$ 554.3 and R\$ 871.8, respectively, and the gross unrealized gains amount to R\$ 19.5 in 2007 (R\$ 13.7 in 2006).

As of December 31, 2007 and 2006, the amount of R\$ 421.1 and R\$ 704.3, respectively, of available-for-sale debt securities mature within one year and R\$ 113.7 and R\$ 128.3, respectively, mature between one and two years.

For the year ended December 31, 2007, the Company sold debt securities for R\$ 558.0 (R\$ 315.2 in 2006 and R\$ 12.6 in 2005), generating a gross realized loss of R\$ 38.9 (R\$ 6.1 in 2006 and R\$ 3.0 in 2005), recorded in the statement of income. The cost of such securities was based on specific identification.

As of December 31, 2007 and 2006, the amount of R\$ 424.2 and R\$ 33.0, respectively, of held to maturity debt securities mature within one year, zero and R\$ 386.8, respectively, mature between one and two years and R\$ 7.1 and R\$ 7.1, respectively, mature in 2018. Under accounting practices adopted in Brazil and for U.S. GAAP, held to maturity debt securities are treated similarly.

i) Accounting for derivative financial instruments

In the Company's financial statements prepared in accordance with accounting practices adopted in Brazil derivative financial instruments are recorded at net settlement price as determined on each balance sheet date.

Under U.S. GAAP, effective January 1, 2001, all derivative financial instruments must be reported at fair value on each balance sheet date and classified as a derivative asset or liability. Also under U.S. GAAP, the requirements for a derivative instrument to qualify for hedge accounting and deferral of gains and losses are more restrictive than under Brazilian corporate law. The Company has not accounted for any derivative instrument following hedge accounting.

The following table provides a detail of our derivative financial instruments outstanding at the end of each period for which income statement is being presented.

j) Expenses for public offering of shares

Under accounting practices adopted in Brazil, costs associated with the offering of shares to the public, in the amount of R\$ 2.4, are recorded as financial expenses in 2005.

Under U.S. GAAP, these costs directly reduce the proceeds of the offering recorded in capital.

k) Income and social contribution - FIN 48

On January 1, 2007, the Company adopted Financial Accounting Board Interpretation No.48 (FIN 48) Accounting for Uncertainty in Income Taxes for U.S. GAAP purposes. This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of tax positions taken, or expected to be taken, in a tax return. This interpretation also provides a guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transaction. A reconciliation of the beginning and ending amounts of the unrecognized tax benefits is as follows:

Balance at January 1, 2007	0.9
Increase related to current year tax positions	19.4
Increase from business combination of Ipiranga/Refinery	5.9

Balance at December 31, 2007	26.2
------------------------------	------

If recognized, the total amount of R\$ 20.3 of unrecognized tax benefits would have a positive impact on the Company's effective rate.

It is possible that the amount of unrecognized tax benefits will change in the next twelve months, however, an estimate of the range of the possible change cannot be made at this time due to the long time usually required to reach a settlement agreement with the tax authorities.

The Company's policy is to record penalties and interest related to tax contingencies and obligations as financial expenses in the consolidated statements of income such penalties and interest. Total interest and penalties expenses related to uncertain tax benefits amounted R\$ 1.3 in 2007. Total accrued interest and penalties as of December 31, 2007 and December 31, 2006 were R\$ 3.8 and R\$ 2.5, respectively were not included in the table above.

The Company files its tax returns on income and social contribution taxes as prescribed by the corresponding tax laws. The Company is subject to examination by fiscal authorities from 2002 to 2007.

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

l) Accounting for share compensation plan

As mentioned in Note 23, the Company has approved a share compensation plan on November 26, 2003.

The table below summarizes the information related to the shares granted to the Company's executives:

Grant date	Restricted shares granted	Fair value of shares (whole Brazilian Reais)	Total compensation costs, including tax	Accumulated recognized compensation costs	Unrecognized compensation costs
	(*)				
December 12, 2007	45,000	64.70	4.0		4.0
November 9, 2006	51,800	46.50	3.3	(0.4)	2.9
December 14, 2005	28,400	32.83	1.3	(0.3)	1.0
October 4, 2004	47,150	40.78	2.7	(0.9)	1.8
December 17, 2003	119,600	30.32	5.0	(2.0)	3.0
	291,950		16.3	(3.6)	12.7

(*) Retroactively adjusted for the stock dividend and reverse stock split as mentioned in Note 25.I.g).

Those shares were granted at no cost to the Company's executives. The grant-date fair values were determined based on the market value of these shares on the BOVESPA. These executives have the right to receive dividends on these shares provided that the professional relationship between them and the Company and its subsidiaries is not interrupted. These shares will cliff vest in five to ten years of the initial award. As of December 31, 2007, none of these shares granted to the executives were forfeited. As of December 31, 2007, the total compensation cost related to nonvested awards not yet recognized amounts to R\$ 12.7, and 7.9 years is the weighted-average period over which this compensation cost is expected to be recognized.

Under accounting practices adopted in Brazil, the Company records compensation costs from its share compensation plan similarly to the requirements of SFAS 123 (R) Share-Based Payment, using the fair value of the award. Compensation cost is charged to earnings on a straight-line basis. The fair value of the award equals its intrinsic value at the grant date.

No adjustments are included in the U.S. GAAP reconciliation related to the Company's stock compensation plan since the Company applies SFAS 123 (R) Share-Based Payment to account for the plan for U.S. GAAP purposes.

For U.S. GAAP purposes, dividends declared under these unvested restricted shares are accounted for initially as a charge to retained earnings. If the restricted shares do not vest, all previously declared dividends associated with the restricted shares are reversed from retained earnings and charged to compensation expense. As of December 31, 2007, accumulated dividends declared under all unvested restricted shares outstanding amounted to R\$ 1.3 (R\$ 0.9 as of December 31, 2006).

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

m) Fair value of guarantees under FIN 45

Under accounting practices adopted in Brazil, the Company is not required to record any liability related to guarantees given to third parties unless contingent obligations to make future payments under the guarantees are probable.

Under accounting practices adopted in Brazil, as of December 31, 2007, the Company has not recorded any liability related to these guarantees, as disclosed in Note 14.

Under U.S. GAAP, the Company recognizes, at the inception of a guarantee, a liability for the fair value of the obligation undertaken in issuing guarantees in accordance with FIN 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*. In the event that, at inception of the guarantee, the Company is required to recognize a liability under SFAS 5, *Accounting for Contingencies*, the liability initially recognized would be the greater of: (a) the amount of fair value of the value of the obligation undertaken in issuing guarantee, or (b) the contingent liability amount required to be recognized at inception of the guarantee by applying SFAS 5.

Under U.S. GAAP, as of December 31, 2007 and 2006 the Company recorded a liability in the amount of R\$ 1.8 and R\$ 0.8, respectively, related to these guarantees based on their fair value. The respective offsetting entry of this liability was recorded as an expense. The net effect of this matter in the income statement as per U.S. GAAP is R\$ 0.5 (income), R\$ 0.0 and R\$ 0.3 (expenses), per the year ended on December 31, 2007, 2006 and 2005, respectively, at the time those guarantees were issued. The Company reduces the liability (by a credit to earnings) as it is released from risk under the guarantees.

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

n) Translation adjustments

Under accounting practices adopted in Brazil, assets and liabilities of foreign subsidiaries are translated into Brazilian Reais at the exchange rate in effect at the end of the reporting period, and revenues, expenses, gains and losses are translated into Brazilian Reais at the exchange rates prevailing in the end of each month. The net translation gain or loss is reported, net of tax, in the statement of income as Other operating income (loss) .

Under U.S. GAAP, the functional currency of Oxiteno México S.A. de C.V. (Oxiteno México), is the Mexican Peso. As a consequence, the financial statements of Oxiteno México are translated into Brazilian Reais in accordance with the criteria set forth in Statement of Financial Accounting Standards No. 52 (SFAS 52). Under these criteria, assets and liabilities are translated into Brazilian Reais at the exchange rate in effect at the end of the reporting period, and revenues, expenses, gains and losses are translated into Brazilian Reais at the average rates prevailing during the respective months. The net translation gain or loss resulting from this translation process is excluded from income and is presented as cumulative translation adjustments (CTA) in Other comprehensive income (loss) as a separate component of shareholders' equity.

As a result of this difference, the net translation gain or loss, net of tax, reported in the statement of income under accounting practices adopted in Brazil in the amount of R\$ 2.3 (loss) for the year ended December 31, 2007 (R\$ 1.2 (loss) and R\$3.0 (income) as of December 31, 2006 and 2005, respectively) was reclassified to Accumulated other comprehensive income (loss) in shareholders' equity under U.S. GAAP. Such difference has no total shareholders' equity effect.

Other foreign subsidiaries produced a totals adjustment of R\$ 0.1 (gain) in 2007.

o) Classification of export notes

Certain subsidiaries of the Company have discounted certain export notes under recourse financing arrangements with financial institutions operating in Brazil. If the original debtors fail to pay their obligations when due, these subsidiaries would be required to repay the financed amounts. Under accounting practices adopted in Brazil, such transactions are classified as a reduction of accounts receivable as mentioned in Note 6. Under U.S. GAAP, these transactions are recorded gross as accounts receivable and bank loans. As a consequence, current assets and liabilities under U.S. GAAP would be increased by R\$ 89.9 and R\$ 50.9 at December 31, 2007 and 2006, respectively. This U.S. GAAP difference has no net income or equity effect.

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

p) Operating income

Under accounting practices adopted in Brazil, nonoperating income (expenses) includes certain items that would be classified within operating income for U.S. GAAP purposes. These items amounted to R\$ 10.0 (gain), R\$ 14.8 (loss) and R\$ 1.6 (loss) for the years ended December 31, 2007, 2006 and 2005, respectively, and are composed as follows:

	2007	2006	2005
Total net nonoperating expenses, reported under accounting practices adopted in Brazil	8.8	(18.5)	(1.8)
Operating items under U.S. GAAP:			
Loss (gain) on disposals of fixed assets	(11.6)	1.1	1.6
Expenses related to projects	1.6	13.7	
Net nonoperating income (expenses), under U.S. GAAP (loss on disposal of investments)	(1.2)	(3.7)	(0.2)

q) Escrow deposits

Under accounting practices adopted in Brazil, the balances of escrow deposits are offset against their respective provisions under the heading Provision for contingencies in non-current liabilities (as shown in the table of Note 20 a).

Under U.S. GAAP, these balances are recorded gross as escrow deposits and provision for contingencies. As a consequence, non-current assets and liabilities under U.S. GAAP would be increased by R\$ 96.1 and R\$ 32.2 at December 31, 2007 and 2006, respectively. This U.S. GAAP difference has no net income or equity effect.

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

r) Accounting for planned major maintenance activities – change in accounting principle

Under accounting practices adopted in Brazil, the Company used the accrue-in-advance method of accounting for planned major maintenance activities until January 1, 2006. In accordance with the provisions contained in CVM Resolution No. 489, dated of October 3, 2005 and the Accounting Pronouncement and Standard-NPC 22 about Provisions, Liabilities and Contingencies, issued by the Brazilian Institute of Independent Auditors - IBRACON, the accrue-in-advance method of accounting for planned major maintenance was prohibited to be used as from January 1, 2006. As a result, as from January 1, 2006, the Company changed its accounting principle in regard to planned major maintenance activities and selected to use the deferral method by which the Company capitalizes the amounts expended on the major maintenance activities and amortizes them through the period to the next planned major maintenance. The effect of such change in accounting principle is recorded as a prior year adjustment to retained earnings as of January 1, 2006 not restating prior periods.

Under U.S. GAAP, the Company also used the accrue-in-advance method of accounting for planned major maintenance activities until January 1, 2006. In order to be consistent with Company's view and accounting practices adopted in Brazil, the Company early adopted the FSP AUG AIR - Accounting for Planned Maintenance Activities as of January 1, 2006. As a result, as from January 1, 2006, the Company changed its accounting principle in regards to planned major maintenance activities and selected to use the deferral method consistently with accounting principles adopted in Brazil. The Company applied the FSP guidance and SFAS No. 154 – Accounting Changes and Error Corrections to record retrospectively the effect of the change in accounting principle for all periods presented. All effects related to this matter concerns the chemical segment. The table below summarizes this change in accounting principles:

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

Description	Amount previously reported under U.S. GAAP	Gross effect of change in accounting principle	Income tax on change in accounting principle	Net effect of change in accounting principle	Amount reported under U.S. GAAP in these financial statements
Net income					
Year ended December 31, 2005	292.1	(4.9)	1.7	(3.2)	288.9
Other comprehensive income					
Year ended December 31, 2005	290.0	(4.9)	1.7	(3.2)	286.8
Earnings per share - basic and diluted					
Year ended December 31, 2005	3.61	(0.06)	0.02	(0.04)	3.57

s) Accounting for asset retirement obligation

Under accounting practices adopted in Brazil, the Company expenses the amounts to be spent when certain assets are retired, as incurred.

Under U.S. GAAP, the Company adopts SFAS No. 143 - Accounting for Asset Retirement Obligations (SFAS 143). Asset retirement obligations correspond to the legally required obligation to remove fuel tanks upon retirement. Under SFAS 143, the fair value of asset retirement obligations are recorded as liabilities on a discounted basis when they are incurred, which is typically at the time the related assets are installed. Amounts recorded for the related assets will be increased by the amount of these obligations and depreciated over the related useful lives of such assets. Over time, the amounts recognized as liabilities will be accreted for the change in their present value until the related assets are retired or sold.

t) Financial statement note disclosures

Under accounting practices adopted in Brazil, a certain set of information is required to be disclosed in the notes to financial statements. The additional disclosures required by U.S. GAAP, which are relevant to the accompanying financial statements, are included herein.

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

u) Lease agreements for distribution of fuels and IT equipment
As mentioned in Note 20.d), the subsidiaries CBPI and DPPI have lease agreements.

Under accounting practices adopted in Brazil, the lease for distribution of fuels and IT equipment are treated as operating leases.

Under U.S. GAAP, the Company adopts SFAS No. 13 - Accounting for Leases (SFAS 13). This statement defines financial leases as those leases that meet at least one of the following criteria:

the lease transfers ownership of the property to the lessee by the end of the lease;

the lease contains a bargain purchase option, for price below than market value;

the lease term is equal to 75 percent or more of the estimated economic life of the leased asset; or

the present value at the beginning of the lease term be equals or higher than 90% of the fair value of the leased asset at the inception of the lease.

Considering the rule above, under U.S. GAAP these leases are treated as financial leases, so the equipments are recorded as property, plant and equipment and depreciated over 10 years for the fuels equipment and 5 years for IT equipment. The obligations are recorded in short and long-term liabilities, including accrued interest net of the respective payments.

v) Pension and other post-employment benefits

v.1) Pension benefits

Pension benefit obligations for accounting practices adopted in Brazil should be accounted for following CVM Instruction 371/2000, which requires the mandatory application of Brazilian Accounting Standard IBRACON NPC 26. Under IBRACON NPC 26 the Company has accounted for the plan administered by Fundação Francisco Martins Bastos (FFMB) (to which several Petróleo Ipiranga companies contribute) by recognizing a percentage attributed to the Company of the funded status and of the cost of the plan.

Under U.S. GAAP, considering that the financial information of the Company does not consolidate all the sponsors of the FFMB, the Company has accounted for its participation in the pension plan administered by FFMB as if it were a multi-employer plan.

As a result, the reconciliation presents: (a) the reversal of the pension plan asset/liability recognized for accounting practices adopted in Brazil as of each reporting date and the reversal of the related pension cost, and (b) the recognition as expense of the contribution due to the plan over the corresponding period.

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

v.2) Other post-retirement benefits

As explained in Note 24.b), under accounting practices adopted in Brazil the Company accounts for other post-retirement benefits following IBRACON NPC 26. Other post-retirement benefits are unfunded and are the sole responsibility of each Petróleo Ipiranga company. Under IBRACON NPC 26 actuarial gains and losses are deferred and recognized in income over the estimated remaining service period of the employees to the extent that those actuarial gains and losses exceed 10% of the higher of the plan assets or the projected benefit obligation.

Under U.S. GAAP such benefits are accounted for following SFAS No. 106 Employers Accounting for Post-retirement Benefits Other Than Pensions and, as from December 31, 2006, following SFAS 158 Employers Accounting for Defined Benefit Pension and Other Post-retirement Plans - an amendment of FASB Statements No. 87, 88, 106 and 132(R) . Under SFAS 158 the funded status of the other post-retirement benefits must be recognized as a liability with an offsetting amount in accumulated other comprehensive income. As required by SFAS 158, provisions of SFAS 158 were applied effective on December 31, 2006.

F-69

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

w) Accounting for refunds

The Company and its subsidiary CBPI offer to certain of their customers refunds in cash if they meet a specified cumulative volume of sales over a specified period of time. Under accounting practices adopted in Brazil, the refund is recognized as an expense when the cumulative volume of sales has been met. Such refunds are offered to a reduced group of customers and have begun to be offered recently.

Under U.S. GAAP, EITF 01-9, Accounting for Consideration Given by a Vendor to a Customer (Including a Reseller of the Vendor's Products), a Company should recognize a liability based on a systematic and rational allocation of the cost of honoring the commitment in each of the underlying transactions that result in progress toward earning the refund. Considering the reduced number of customers to which the refund is offered and the reduced historical experience, the Company believes that it cannot reasonably estimate the ultimate amount that will be earned by customers. As a result, under U.S. GAAP a liability is recognized for the maximum potential amount of the refund.

x) Dividends and interest on shareholders' equity

Under accounting practices adopted in Brazil, at each year-end, management is required to propose a dividend distribution from earnings and accrue for it in the financial statements. Under Brazilian GAAP, companies are permitted to distribute or capitalize an amount of interest, subject to certain limitations, calculated based on a government interest rate, on shareholders' equity. Such amounts are tax-deductible and are presented as a deduction from shareholders' equity.

Under U.S. GAAP, since proposed dividends may be ratified or modified at the annual Shareholders' Meeting, such dividends should not be considered as declared at the balance sheet date and therefore should not be accrued. However, interim dividends paid or interest credited to shareholders as interest attributable to shareholders' equity under Brazilian legislation should be considered as declared for U.S. GAAP purposes.

At December 31, 2007, the difference between accounting practices adopted in Brazil and U.S. GAAP for dividends and interest on shareholders' equity amounted R\$ 58.3.

y) New pronouncements

In February 2007, the FASB issued SFAS No. 159 The Fair Value Option for Financial Assets and Financial Liabilities including an amendment of SFAS No. 115 which permits companies to choose to measure many financial instruments and certain other items at fair value in order to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. This statement is effective for the Company's fiscal year beginning after November 15, 2007. The Company is currently assessing the impact of this statement on its consolidated financial statements.

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

In December 2007, the FASB issued SFAS No. 160 *Noncontrolling Interests in Consolidated Financial Statements* an amendment of ARB No. 51, which clarifies that a noncontrolling interest in a subsidiary is a ownership interest in the consolidated entity that should be reported as equity in the consolidated financial statements. This statement is effective for fiscal years beginning on or after December 15, 2008. Earlier adoption is prohibited. The Company will adopt this statement on its consolidated financial statements.

In December 2007, the FASB issued SFAS No. 141 (revised 2007), *Business Combination*, which replaces SFAS No. 141. This Statement retains the fundamental requirements in SFAS No. 141 that the acquisition method of accounting be used for all business combinations and for an acquirer to be identified for each business combination. This Statement defines the acquirer as the entity that obtains control of one or more businesses in the business combination and establishes the acquisition date as the date that the acquirer achieves control. This Statement applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. An entity may not apply it before that date. The Company will adopt this statement for new business combination.

V - Additional disclosures required by U.S. GAAP

a) Earnings per share

The following table provides a reconciliation of the numerators and denominators used in computing earnings per share as required by SFAS 128. The calculation of earnings per share as summarized below is retroactively adjusted for the stock dividend and reverse stock split as mentioned in Note 25.I.g). As discussed in Notes 23 and 25.I.1), the Company has a share compensation plan. For all periods presented, the impact of this share compensation plan on diluted earnings per share was minimal and, consequently, the Company has not presented a separate calculation of the diluted earnings per share amount.

	2007	2006	2005
Distributed income	240.8	144.2	157.1
Undistributed income	(23.3)	136.3	131.8

b) Concentrations of credit risk

Financial instruments which potentially subject the Company to credit risk are cash and cash equivalents, financial investments and trade receivables. Based on the factors described below, the Company considers the risk of counterparty default to be minimal.

The Company manages its credit risk with respect to cash equivalents and financial investments by investing only in liquid instruments with highly-rated financial institutions. In addition, investments are diversified in several institutions, and credit limits are established for each individual institution.

Credit risk from accounts receivable is managed following specific criteria for each of the segments in which the Company operates, as follows:

Chemical segment (Oxiteno)

Oxiteno's customers of commodity chemicals are principally chemical companies, surface coating producers and polyester resin producers, while customers of specialty chemicals comprise a variety of industrial and commercial enterprises. No single customer or group accounts for more than 10% of total revenue. Management believes that by distributing its products to a variety of markets it is able to protect itself, to a certain extent, from the effects of negative trends in any particular market. Oxiteno acts as a member of a Credit Committee of the Brazilian chemical manufacturers which meets monthly to review the financial position of clients showing past-due accounts.

Historically, the Company has not experienced significant losses on trade receivables.

Gas segment (Ultragaz)

Ultragaz sells its products to the residential, commercial and industrial markets.

Sales to the residential market are carried out directly by Ultragaz using cash terms, from which no significant credit risk exists, or through outside distributors. Credit risk in sales to outside distributors is reduced due to the large customer base, the ongoing control procedures that monitor the creditworthiness of distributors, and by short payment terms (19 days on average) that permit continuous monitoring of distributors compliance.

Sales to the commercial and industrial markets are usually made to customers that have signed a credit agreement with the Company and have provided guarantees or collateral. Periodic monitoring of these accounts is performed by specific staff with the support of financial information systems.

No single customer or group accounts for more than 10% of total revenue.

Historically, the Company has not experienced significant losses on trade receivables.

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

Logistic segment (Ultracargo)

The main customers of Ultracargo are chemical companies. The average-term payment is 39 days.

Historically, the Company has not experienced significant losses on trade receivables.

Distribution segment (Ipiranga)

Ipiranga engages in distribution of fuels/lubricants and related products.

Credit risk in sales is reduced due to the large customer base and by short payment terms (13 days on average). Periodic monitoring of these accounts is performed by specific staff with the support of financial information systems.

No single customer or group accounts for more than 10% of total revenue.

Historically, the Company has not experienced significant losses on trade receivables.

Company is dependent on few major suppliers

The Company is dependent on third-party manufacturers for all of its supply of ethylene, fuels/lubricants and LPG. In 2007, 2006 and 2005, products purchased from the Company's three largest suppliers accounted for approximately 77%, 72% and 73% of cost of sales and services, respectively. The Company is dependent on the ability of its suppliers to provide products on a timely basis and on favorable pricing terms. The loss of certain principal suppliers or a significant reduction in product availability from principal suppliers could have a material adverse effect on the Company. The Company believes that its relationship with its suppliers is satisfactory.

c) Impairment of long-lived assets

The Company reviews the carrying value of property, plant, and equipment for impairment whenever events and circumstances indicate that the carrying value of an asset may not be recoverable from the estimated future cash flows expected to result from its use and eventual disposition. In cases where undiscounted expected future cash flows are less than the carrying value, an impairment loss is recognized equal to an amount by which the carrying value exceeds the fair value of assets. The factors considered by management in performing this assessment include current operating results, trends, and prospects, as well as the effects of obsolescence, demand, competition, and other economic factors.

No impairment has been recorded in the consolidated financial statements as of December 31, 2007.

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

d) Impairment of goodwill

Under U.S. GAAP financial statements, goodwill consists of the excess of the cost paid for the acquisitions of SPGás, Oxiteno México, Oxiteno Andina, Petrolog and Ipiranga over the net fair value assigned to assets acquired and liabilities assumed of these companies.

The Company has recorded the following amounts of goodwill under the U.S. GAAP financial statements:

Description	2007	2006
Gas segment (Ultragaz):		
Goodwill on the acquisition of SPGás (merged into Ultragaz Participações Ltda.) (see Note 3.a)	39.9	39.9
Chemical segment (Oxiteno):		
Goodwill on the acquisition of Oxiteno México S.A. de C.V.	2.6	2.6
Goodwill on the acquisition of Oxiteno Andina, C.A.	0.2	
Cargo segment (Ultracargo):		
Goodwill on the acquisition of Petrolog	6.5	
Distribution segment (Ultrapar):		
Goodwill on the acquisition of Ipiranga	413.7	

As mentioned in Note 25.I.f), goodwill is not amortized and is annually tested for impairment.

e) Fair value of financial instruments

The fair values of accounts receivables and trade suppliers approximate their book values. The fair value of financial assets and financial liabilities, including cash and cash equivalents, short and long-term investments, financing, debentures and swap instruments are disclosed in Note 19.

Table of Contents

Ultrapar Participações S.A. and Subsidiaries

f) Environmental issues

The Company and its subsidiaries are subject to federal, state and local laws and regulations relating to the environment. These laws generally provide for control of air and effluent emissions and require responsible parties to undertake remediation of hazardous waste disposal sites. Civil penalties may be imposed for noncompliance. The Company provides for remediation costs and penalties when a loss is probable and the amount is reasonably determinable. It is not presently possible to estimate the amount of all remediation costs that might be incurred or penalties that may be imposed; however, management does not presently expect that such costs and penalties will have a material effect on the Company's consolidated financial position or results of operations. Recurring costs associated with managing hazardous substances and pollution in on-going operations, mainly composed of costs for treatment of effluents and for incinerations, amounted to R\$ 16.9, R\$ 4.4 and R\$ 3.6 for the years ended December 31, 2007, 2006 and 2005, respectively. Capital expenditures to limit or monitor hazardous substances and pollutants amounted to R\$ 8.9, R\$ 5.0 and R\$ 8.3, for the years ended December 31, 2007, 2006 and 2005, respectively.

The Company's subsidiary Ultracargo Operações Logísticas e Participações Ltda. has controlled environmental liabilities in two of its terminals, situated in Santos and Paulínia, which are in monitoring and remediation phases, respectively.

We have no historical mandated expenditures to remediate previously contaminated sites, and other infrequent or non-recurring clean-up expenditures that can be anticipated but which are not required in the present circumstances.

g) Statement of cash flows

Accounting practices adopted in Brazil do not require the presentation of a statement of cash flows as required by U.S. GAAP. Changes in working capital are presented in the statement of changes in financial position. U.S. GAAP requires the presentation of a statement of cash flows describing the Company's cash flows from operating, financing and investing activities. Statements of cash flows derived from the information based on accounting practices adopted in Brazil are as follows:

j) Geographical area information

All long-lived assets are located in Brazil, except for long-lived assets located in Mexico, in the amount of R\$ 30.1, as of December 31, 2007 (R\$ 26.5 as of December 31, 2006), and in Venezuela in the amount of R\$ 4.2, as of December 31, 2007.

The Company generates revenues from operations in Brazil and, as from December 2003, from Mexico and as from September 2007, from Venezuela, as well as from exports of products to clients located in foreign countries as shown below:

	2007	2006	2005
Gross sales:			
Brazil	20,327.1	4,789.3	4,683.7
Latin America, other than Brazil	219.9	240.4	244.3
Far East	93.6	71.8	110.8
Europe	113.1	70.9	67.0
North America	63.3	36.6	28.8
Other	24.1	20.9	23.4
Total	20,841.1	5,229.9	5,158.0

k) Research and development expenses

Total research and development expenses amounted to R\$ 23.5, R\$ 18.4 and R\$ 17.4 for the years ended December 31, 2007, 2006 and 2005, respectively.

l) Employee severance fund and termination payments

The Company is required to contribute 8% of each employee's gross pay to an account maintained in the employee's name in the Government Severance Indemnity Fund (FGTS). No other contributions to the FGTS are required. Additionally, effective September 2001, the Company is required to pay an additional tax equal to 0.5% of gross pay. Contributions are expensed as incurred.

Under Brazilian law, the Company is also required to pay termination benefits to employees who have been dismissed. The amount of the benefit is calculated as 40% of the accumulated contributions made by the Company to the FGTS during the employee's period of service. Additionally, effective September 2001, the Company is required to pay a social tax of 10% of these accumulated contributions.

The Company does not accrue for these termination costs before a decision to terminate has been made, since the benefits are neither probable nor reasonably estimable. Actual termination costs paid on dismissal totaled R\$ 15.4, R\$ 6.3 and R\$ 5.3 for the years ended December 31, 2007, 2006 and 2005, respectively.

26. SUBSEQUENT EVENT

a) Changes in the Brazilian Corporate Law

On December 28, 2007, Law n. 11.638/07 was issued, modifying certain aspects of the Brazilian Corporate Law (Law n. 6.404, of December 15, 1976). These changes are designed to increase the harmonization of accounting practices adopted in Brazil with the international standards (IFRS) derived from practices issued by the International Accounting Standard Board (IASB).

The Company already reports the Cash Flow Statement and the Statement of Value Added, and is analyzing the impacts of other changes introduced by the new law. Management believes that the main impacts of the new law would consist in the creation of new sub-groups of accounts, the application of new criteria for the valuation and classification of financial instruments and the present value adjustment of long term and relevant short term assets and liabilities. The impacts of the changes introduced by the new law will be recognized in the Company's financial statements during 2008.
