See accompanying Notes to Consolidated Financial Statements (Unaudited)

Table of Contents**SPRINT NEXTEL CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)****Note 1. Basis of Presentation**

Our unaudited consolidated financial statements have been prepared in accordance with the rules and regulations of the Securities and Exchange Commission, or SEC, and reflect all adjustments that are necessary for a fair presentation of the results for interim periods. All adjustments made were of a normal recurring nature, except as described in the notes below. Certain information and footnote disclosures normally included in annual consolidated financial statements prepared according to accounting principles generally accepted in the United States have been omitted. As a result, you should read these consolidated financial statements along with the consolidated financial statements and notes contained in our annual report on Form 10-K for the year ended December 31, 2007. Operating results for the interim period should not be viewed as representative of results that may be expected for the year ending December 31, 2008.

We prepare our consolidated financial statements in conformity with accounting principles generally accepted in the United States, which requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Due to the inherent uncertainty involved in making those estimates, actual results could differ from those estimates. Areas in which significant estimates have been made include, but are not limited to, revenue recognition, the allowance for doubtful accounts receivable, inventory obsolescence, tax valuation allowances, useful lives for property, plant and equipment and definite lived intangible assets, goodwill and indefinite lived intangible asset impairment analyses, the evaluation of uncertain tax positions and the fair value of assets acquired and liabilities assumed in business combinations.

During the fourth quarter 2007, we performed our annual goodwill analysis and recorded a non-cash goodwill impairment charge of \$29.729 billion. During the period ended June 30, 2008, we determined that certain net assets should not have been assigned to the wireless reporting unit. Consequently, the 2007 goodwill impairment charge has been reduced by \$80 million to \$29.649 billion. We also reduced our 2007 depreciation expense by \$90 million (\$56 million after-tax) from \$5.711 billion to \$5.621 billion, due principally to the revision of depreciation expense relating to property, plant and equipment from a previous acquisition after those assets were loaded into our asset subledger and depreciation was calculated systematically rather than manually. As a result of the foregoing, the 2007 net loss and loss per share is \$29.444 billion and \$10.27 as compared to the previously reported amounts of \$29.580 billion and \$10.31. The accompanying December 31, 2007 consolidated balance sheet reflects the immaterial adjustments to goodwill, property, plant and equipment, deferred tax liabilities and accumulated deficit.

Certain prior period amounts have been reclassified to conform to the current period presentation.

Supplemental Cash Flow Information from Operations

	Year-to-date June 30,	
	2008	2007
	(in millions)	
Interest paid, net of capitalized interest	\$ 716	\$ 721

SPRINT NEXTEL CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

share for the effects of potentially dilutive common shares, if the effect is not antidilutive. Potentially dilutive common shares include the dilutive effects of shares issuable under our equity plans computed using the treasury stock method, and the dilutive effects of shares issuable upon the conversion of our convertible senior notes computed using the if-converted method.

Shares issuable under our equity plans were antidilutive for the second quarter and year-to-date period 2008 because we incurred net losses. Although not used in the determination of loss per common share for the second quarter and year-to-date period 2008, we had about 25 million and 26 million shares, respectively, issuable under the equity plans that had exercise prices below the average market price during those periods. All 11 million shares issuable upon the assumed conversion of our convertible senior notes could potentially dilute earnings per share in the future; however, they were excluded from the calculation of diluted earnings per common share for the second quarter and year-to-date period 2008 due to their antidilutive effects. Additionally, there were about 126 million average shares for the second quarter 2008 and 129 million average shares for the year-to-date period 2008 issuable under the equity plans that had exercise prices that exceeded the average market price during those periods that could also potentially dilute earnings per common share in the future.

Dilutive shares issuable under our equity plans, used in calculating diluted earnings per common share, were 18 million shares for the second quarter 2007. Although not used in the determination of loss per common share for the year-to-date period 2007, we had about 84 million shares issuable under the equity plans that had exercise prices below the average market price during the period. All 11 million shares issuable upon the assumed conversion of our convertible senior notes could potentially dilute earnings per share in the future; however, they were excluded from the calculation of diluted earnings per common share for the second quarter and year-to-date period 2007 due to their antidilutive effects. Additionally, there were about 52 million average shares for the second quarter 2007 and 88 million average shares for the year-to-date period 2007 issuable under the equity plans that had exercise prices that exceeded the average market price during those periods that could also potentially dilute earnings per common share in the future.

Dividends

We have not declared any dividends to our common shareholders in 2008. On May 8, 2007, our board of directors declared a dividend of \$0.025 per share on our common shares, payable to shareholders of record at the close of business on June 8, 2007. The dividend was paid on June 29, 2007. We also paid a dividend of \$0.025 per share on our common stock in the first quarter 2007.

Share Repurchase Program

On July 25, 2006, our board of directors authorized a program for the purchase of up to \$6.0 billion of our Series 1 common stock through open market purchases. We did not repurchase any shares under this program during 2008, and the program has expired. In the year-to-date period 2007, we repurchased about 66 million shares of our Series 1 common stock for \$1.4 billion at an average price of \$21.24 per share. We repurchased \$3.5 billion of our common shares at an average price of \$18.77 per share over the life of the program.

Significant New Accounting Pronouncements

In December 2007, the Financial Accounting Standards Board, or FASB, issued Statement of Financial Accounting Standards, or SFAS, No. 141R, *Business Combinations*, which replaces SFAS No. 141, *Business Combinations*, originally issued in June 2001. SFAS No. 141R will apply to business combinations for which the acquisition date is on or after January 1, 2009, and this statement could have a material impact on us with respect

Table of Contents

SPRINT NEXTEL CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

to business combinations completed after the effective date. Such significant changes include, but are not limited to the acquirer recording 100% of all assets and liabilities, including goodwill, of the acquired business, generally at their fair values, and acquisition-related transaction and restructuring costs being expensed rather than capitalized as part of the cost of the acquisition. In addition, after the effective date, reversals of valuation allowances related to acquired deferred tax assets and changes to acquired income tax uncertainties related to any business combinations, even those completed prior to the statement's effective date, will generally be recognized in earnings.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements*. This statement amends Accounting Research Bulletin No. 51, *Consolidated Financial Statements*, to establish accounting and reporting standards for a noncontrolling interest in a subsidiary and for deconsolidation of a subsidiary. SFAS No. 160 is effective for our quarterly reporting period ending March 31, 2009. If we were to enter into an arrangement after the effective date of the standard where we are required to consolidate a noncontrolling interest, we would report the noncontrolling interest's equity as a component of our equity in our consolidated balance sheet and report the component of net income or loss and comprehensive income or loss attributable to the noncontrolling interest separately. While certain changes in ownership interests will be treated as equity transactions under the new standard, a gain or loss recognized upon loss of control of a subsidiary will be recognized in the consolidated statement of operations. This practice differs from our current policy of recognizing such gains or losses as a component of equity. In addition, the amount of gain or loss is measured using the fair value of the noncontrolling interest at the date control ceases.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities*. This statement amends SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, by requiring expanded disclosures about an entity's derivative instruments and hedging activities. SFAS No. 161 is effective for our quarterly reporting period ending March 31, 2009. We are in the process of evaluating the impact of this statement on the disclosures included in the notes to our consolidated financial statements.

WiMAX Initiative

On May 7, 2008, we entered into a definitive agreement with Clearwire Corporation to combine our next generation wireless broadband businesses to form a new wireless communications company to be called Clearwire. In addition, six independent partners, including Intel Corporation through Intel Capital, Google Inc., Comcast Corporation, Time Warner Cable Inc., Bright House Networks and Trilogy Equity Partners, have agreed to invest \$3.2 billion in the new Clearwire. The new Clearwire will be focused on expediting the deployment of the first nationwide mobile WiMAX network to provide a true mobile broadband experience for consumers, small businesses, medium and large enterprises, public safety organizations and educational institutions. Upon completion of the proposed transaction, which we expect to occur in the fourth quarter 2008, we will become the largest shareholder in the new Clearwire with approximately 51% of the equity ownership, with final determination of our ownership made based on the trading price of the new Clearwire stock ninety days after close.

Table of Contents**SPRINT NEXTEL CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 2. Intangible Assets****Indefinite Lived Intangibles**

	Balance December 31, 2007	Adjustments and Additions (in millions)	Balance June 30, 2008
Goodwill	\$ 978	\$ (1)	\$ 977
FCC licenses	20,707	573	21,280
Trademarks	416		416
	\$ 22,101	\$ 572	\$ 22,673

Goodwill represents the excess of the estimated equity value of the wireless reporting unit over the fair value of the net tangible and intangible assets, last measured during the fourth quarter 2007. All goodwill has been allocated to the Wireless segment. In addition, we have also identified Federal Communications Commission, or FCC, licenses and our Sprint® and Boost Mobile® trademarks as indefinite lived intangible assets, after considering the expected use of the assets, the regulatory and economic environment within which they are being used, and the effects of obsolescence on their use. We cultivate and protect the use of our brands, such as Sprint and Boost Mobile. We have no legal, regulatory or contractual limitations associated with our trademarks.

We hold several kinds of FCC licenses to deploy our wireless services: 1.9 gigahertz, or GHz, personal communications services, or PCS, licenses utilized in our code division multiple access, or CDMA, network, 800 megahertz, or MHz, and 900 MHz licenses utilized in our integrated Digital Enhanced Network, or iDEN, network and 2.5 GHz licenses that we plan to use for fourth generation wireless Internet access services. We also hold 2.5 GHz, 1.9 GHz and other FCC licenses that we currently do not utilize in our networks or operations. As long as we act within the requirements and constraints of the regulatory authorities, the renewal and extension of our licenses is reasonably certain at minimal cost. FCC licenses authorize wireless carriers to use radio frequency spectrum. That spectrum is a renewable, reusable resource that does not deplete or exhaust over time. We are not aware of any technology being developed that would render spectrum obsolete. Currently, there are no changes in the competitive or legislative environments that would put in question the future need for spectrum licenses.

We also periodically review our remaining goodwill for indicators of impairment. Our procedures include evaluating any changes in our near-term expected cash flows as compared to our plan and deriving the estimated equity value of the wireless reporting unit, which we then compare to the net book value of the wireless reporting unit. Specifically, we evaluate any changes in our near-term expected cash flows and reduce our stock price by the estimated fair value per share of our wireline reporting unit as well as any other necessary adjustments and then add a control premium, as permitted by FASB guidance, to determine an estimate of the equity value of the wireless reporting unit. As of June 30, 2008, we have not identified any indicators of impairment with respect to our goodwill or other indefinite lived intangible assets. However, if an indicator of impairment were to exist, such as a significant decline in expected cash flows of our wireless reporting unit or if our adjusted stock price were to experience a sustained, significant decline as compared to the net book value per share of our wireless reporting unit, we would test our goodwill for impairment, which could cause us to recognize a non-cash impairment charge that could be material to our consolidated financial statements.

Table of Contents**SPRINT NEXTEL CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Definite Lived Intangibles**

	Useful Lives	June 30, 2008			December 31, 2007		
		Gross Carrying Value	Accumulated Amortization	Net Carrying Value	Gross Carrying Value	Accumulated Amortization	Net Carrying Value
				(in millions)

Estimated amortization expense	\$ 1,056	\$ 1,559	\$ 735	\$ 249	\$ 201

Definite lived intangible assets consist primarily of customer relationships that are amortized over two to five years using the sum of the years digits method, which we believe best reflects the estimated pattern in which the economic benefits will be consumed. Other definite lived intangible assets primarily include certain rights under affiliation agreements that we reacquired in connection with the acquisitions of the third-party affiliates, or PCS Affiliates, that provide wireless services under the Sprint brand name and Nextel Partners, Inc., which are being amortized over the remaining terms of those affiliation agreements on a straight-line basis, and the Nextel® and Direct Connect® trademarks, which are also being amortized on a straight-line basis. We recorded aggregate amortization expense of \$689 million for the second quarter 2008 and \$1.4 billion for year-to-date period 2008 and \$906 million for the second quarter 2007 and \$1.8 billion for the year-to-date period 2007.

As of June 30, 2008, Sprint Nextel Corporation, the parent corporation, had \$6.2 billion in principal of debt outstanding, including indebtedness under the credit facilities. In addition, \$16.4 billion in principal of our long-term debt had been issued by wholly-owned subsidiaries and is fully and unconditionally guaranteed by Sprint Nextel Corporation. The indentures and financing arrangements of certain of our subsidiaries contain provisions that limit cash dividend payments on subsidiary common stock held by our parent corporation. The transfer of cash in the form of advances from the subsidiaries to our parent corporation is generally not restricted.

Senior Notes

As of June 30, 2008, we had \$19.4 billion of senior, convertible senior and senior serial redeemable notes after making a payment in June 2008 of \$1.25 billion towards the early redemption of our 6.125% senior notes due November 2008. These senior notes are principally unsecured. Cash interest on these notes is payable semiannually in arrears. Approximately \$17.3 billion of our notes are redeemable at our discretion. We may choose to redeem some or all of these notes at the then applicable redemption price, plus accrued and unpaid interest. The \$607 million in aggregate principal amount of our 5.25% notes due 2010 are convertible at any time

Table of Contents

SPRINT NEXTEL CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

prior to redemption, repurchase or maturity at the option of the holders into shares of our Series 1 common stock at an effective conversion price of \$53.65 per share, plus \$11.37 in cash for each \$1,000 principal amount.

Credit Facilities

In February 2008, we drew down \$2.5 billion under our revolving bank credit facility, and \$1.25 billion of the proceeds was used to repay \$1.25 billion in senior notes. The remainder was drawn to enhance our financial flexibility in general. As of June 30, 2008, we had \$2.3 billion in letters of credit, including a \$2.2 billion letter of credit required by the Report and Order to reconfigure the 800 MHz band, outstanding under our \$6.0 billion unsecured revolving bank credit facility. As of June 30, 2008, we had repaid in full our commercial paper outstanding under our commercial paper program which commenced in April 2006. As a result of the February draw and the letters of credit, each of which directly reduces the availability of the revolving bank credit facility, we had \$1.2 billion of borrowing capacity available under our revolving bank credit facility as of June 30, 2008.

In March 2007, we entered into a \$750 million unsecured loan agreement with Export Development Canada. As of June 30, 2008, we had borrowed all \$750 million available under this agreement and this loan will mature in March 2012. The terms of this loan provide for an interest rate equal to the London Interbank Offered Rate, or LIBOR, plus a spread that varies depending on our credit ratings. We may choose to prepay this loan, in whole or in part, at any time.

Covenants

As of June 30, 2008, we are in compliance with all restrictive and financial covenants associated with all of our borrowings.

Our credit facilities limit our total indebtedness and the indebtedness and liens of certain controlled subsidiaries. Specifically, the credit facilities require we maintain a ratio of total indebtedness to trailing four quarter earnings before interest, taxes, depreciation, amortization and certain other non recurring charges of no more than 3.5 to 1.0. As of June 30, 2008, the ratio was 2.9 to 1.0 as compared to 2.5 to 1.0 as of December 31, 2007. Our credit facilities also require that certain indebtedness and liens of our controlled subsidiaries (other than Nextel Communications, Inc. and Sprint Capital) do not in the aggregate exceed 15% of our consolidated shareholders' equity or about \$3.2 billion as of June 30, 2008. As of June 30, 2008, the relevant controlled subsidiaries had approximately \$500 million in debt and liens subject to this covenant. The maturity dates of the loans under our credit facilities may accelerate if we do not comply with these covenants. We are also obligated to repay the loans if certain change of control events occur.

The indentures that govern our outstanding senior notes also require that we comply with various covenants, including limitations on the incurrence of indebtedness and liens by us and our subsidiaries. A default under our credit facilities could trigger defaults under our other debt obligations, including our senior notes, which in turn could result in the maturities of certain debt obligations being accelerated.

Note 4. Severance, Exit Costs and Asset Impairments

In the second quarter 2008 and year-to-date period 2008, total severance, exit costs and asset impairment charges aggregated \$105 million and \$336 million, respectively, compared to \$85 million and \$259 million, respectively, for the second quarter 2007 and year-to-date period 2007.

Table of Contents**SPRINT NEXTEL CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Severance and Exit Costs Activity**

During the second quarter 2008 and the year-to-date period 2008, we recorded \$105 million and \$325 million respectively, of severance and lease termination costs related to the separation of employees and continued organizational realignment initiatives, including \$84 million and \$255 million related to our Wireless segment and \$19 million and \$67 million related to our Wireline segment, respectively. During the second quarter 2007 and the year-to-date period 2007, we recorded \$43 million and \$209 million, respectively, of severance and lease termination costs related to the separation of employees and continued organizational realignment initiatives. The entire second quarter 2007 charge was attributable to our Wireless segment, while \$176 million and \$32 million of the year-to-date 2007 charge related to the Wireless and Wireline segments, respectively. We achieved our headcount reductions through a combination of involuntary and voluntary separation plans for all periods presented.

The following table provides an analysis of our severance and lease termination costs liability, exclusive of exit costs associated with business combinations.

	Balance December 31, 2007	2008 Activity		Balance June 30, 2008
		Expense	Cash Payments and Other (in millions)	
Lease terminations	\$ 95	\$ 15	\$ (26)	\$ 84
Severance	30	310	(139)	201
	\$125	\$ 325	\$ (165)	\$ 285

In addition to the costs described above, we recorded an immaterial amount of impairments during the second quarter and year-to-date period 2008. For the second quarter 2007 and the year-to-date period 2007, we recorded impairment charges for our Wireless segment of \$42 million and \$50 million, respectively, primarily related to the sale of Velocita Wireless Holding Corporation, the closing of retail stores due to integration activities and the write off of network assets.

Note 5. Income Taxes**Effective Income Tax Rate**

The differences that caused our effective income tax rates to vary from the 35% federal statutory rate were as follows:

	Year-to-date June 30,	
	2008	2007
	(in millions)	
Income tax benefit at the federal statutory rate	\$ 478	\$ 121
Effect of:		
State income taxes, net of federal income tax effect	40	19
State law changes, net of federal income tax effect	6	17
Other, net	(7)	(4)
Income tax benefit	\$ 517	\$ 153

Effective income tax rate	37.8%	44.3%
---------------------------	-------	-------

Table of Contents

SPRINT NEXTEL CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

We maintain a valuation allowance against certain of our deferred tax assets in instances where we determine that it is more likely than not that a tax benefit will not be realized. As of June 30, 2008, we maintained a total valuation allowance of \$725 million related to our deferred tax assets. This amount includes a valuation allowance of \$477 million for the total tax benefits related to loss carryforwards, subject to utilization restrictions, acquired in connection with certain acquisitions. The remainder of the valuation allowance relates to state net operating loss and tax credit carryforwards.

We adopted FASB Interpretation No. 48, or FIN 48, *Accounting for Uncertainty in Income Taxes*, an interpretation of SFAS No. 109, *Accounting for Income Taxes*, on January 1, 2007. The adoption of FIN 48 did not have a material impact on our consolidated financial statements. There have been no material changes in the total unrecognized tax benefits, interest or penalties attributable to uncertain tax positions during the second quarter 2008 and the year-to-date period 2008.

Note 6. Fair Value

We carry certain assets and liabilities at fair value with changes in fair value recognized in the consolidated financial statements each period. We make estimates regarding valuation of assets and liabilities measured at fair value in preparing the consolidated financial statements. These assets and liabilities primarily include available-for-sale debt and equity securities accounted for pursuant to SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities*, interest rate derivatives and stock warrants.

On January 1, 2008, we adopted the provisions of SFAS No. 157, *Fair Value Measurements*, for all financial and nonfinancial assets and liabilities recognized at fair value in the consolidated financial statements on a recurring basis. The adoption of this statement did not change our previous accounting for financial assets and liabilities. The provisions of SFAS No. 157 will be applied to nonfinancial assets and liabilities that are recognized at fair value in the consolidated financial statements on a nonrecurring basis beginning January 1, 2009. Upon application of the remaining provisions of SFAS No. 157 on January 1, 2009, we will provide additional disclosures regarding our nonrecurring fair value measurements, including our annual impairment review of goodwill and indefinite lived intangible assets.

SFAS No. 157 changed the definition of fair value, as defined by previous statements, to the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. If market assumptions are not readily available, we use our own assumptions to reflect those that market participants would use in pricing the asset or liability at the measurement date. Our valuation approaches in determining fair value include market, income and/or cost approaches.

SFAS No. 157 also established a hierarchy that classifies the inputs used to measure fair value. This hierarchy prioritizes the use of inputs used in valuation techniques into three levels based on observable and unobservable inputs. Observable inputs are inputs that market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of us. Unobservable inputs, which require more judgment, are those inputs described above that reflect our assumptions about the assumptions market participants would use in pricing the asset or liability, and are developed based on the best information available in the circumstances. The hierarchy is broken down into three levels based on the reliability of inputs. If the inputs used to measure fair value fall into different levels, we disclose the item based on the lowest level input that is significant to the fair value measure. We do not have any significant assets or liabilities that utilize unobservable or Level 3 inputs.

Table of Contents**SPRINT NEXTEL CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following fair value hierarchy table presents information regarding our assets and liabilities measured at fair value on a recurring basis as of June 30, 2008:

	Quoted Prices in Active Markets for Identical Assets (Level 1) ⁽¹⁾	Significant Other Observable Inputs (Level 2) ⁽²⁾ (in millions)	Balance June 30, 2008
Marketable securities	\$ 32	\$	\$ 32
Other investments	62		62
Derivative instruments		20	20
	\$ 94	\$ 20	\$ 114

- (1) Level 1 fair value based on quoted prices in active markets for identical assets or liabilities that we have the ability to access. Level 1 inputs generally reflect fair value and are not adjusted. Assets and liabilities utilizing Level 1 inputs include most exchange-traded equity securities, certain exchange-traded debt securities, and most U.S. Government securities.
- (2) Level 2 fair value based on quoted prices in markets that are not active or in active markets for similar assets or liabilities, inputs other than quoted prices that are observable, and inputs that are not directly observable, but that are corroborated by observable market data. It may be necessary to make adjustments to Level 2 inputs to account for illiquidity or any difference between the asset or liability to which the quote relates and the actual asset or liability being measured at fair value. Assets and liabilities valued utilizing Level 2 inputs include prices of exchange-traded debt and equity securities not actively traded and most derivative instruments.

Note 7. Share-Based Compensation**Share-Based Payment Plans**

As of June 30, 2008, we sponsored four equity incentive plans: the 2007 Omnibus Incentive Plan, or 2007 Plan; the 1997 Long-Term Incentive Program, or the 1997 Program; the Nextel Incentive Equity Plan, or the Nextel Plan; and the Management Incentive Stock Option Plan, or MISOP; as well as our Employees Stock Purchase Plan, or ESPP. On May 8, 2007, our shareholders approved the 2007 Plan, under which we may grant stock options, stock appreciation rights, restricted stock, restricted stock units, performance shares, performance units and other equity-based and cash awards to our employees, outside directors and certain other service providers. On February 11, 2008, we made certain amendments to the 2007 Plan to comply with new tax regulations, including new regulations under Section 409A of the Internal Revenue Code. No new grants can be made under the 1997 Program, the Nextel Plan or the MISOP.

During the second quarter 2008, the number of shares available under the 2007 Plan increased by about 7 million, as the number of shares available under the 2007 Plan is increased by any shares originally granted under the 1997 Program, the Nextel Plan or the MISOP that are forfeited, expired or otherwise terminated. As of June 30, 2008, about 198 million common shares were available under the 2007 Plan. As of June 30, 2008, awards to acquire about 67 million common shares were outstanding under the 1997 Program, awards to acquire about 40 million common shares were outstanding under the Nextel Plan, options to buy about 26 million common shares were outstanding under the MISOP, and the ESPP authorized about 16 million common shares for future purchases. Currently, we use treasury shares to satisfy share-based awards or new shares if no treasury shares are available. Refer to note 11 of the Notes to Consolidated Financial Statements in our annual report on Form 10-K for the year ended December 31, 2007 for additional information regarding these plans.

SPRINT NEXTEL CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Share-Based Compensation

Pre-tax share-based compensation charges included in net loss from our share-based award plans was \$67 million for the second quarter 2008 and \$142 million for the year-to-date period 2008 compared to \$58 million for the second quarter 2007 and \$131 million for the year-to-date period 2007. The total income tax benefit recognized in the consolidated financial statements for share-based award compensation was \$24 million for the second quarter 2008 and \$52 million for the year-to-date period 2008 and \$22 million for the second quarter 2007 and \$50 million for the year-to-date period 2007.

As of June 30, 2008, there was \$201 million of total unrecognized compensation cost related to our share-based award plans that is expected to be recognized over a weighted average period of 1.76 years. Cash received from exercise under all share-based payment arrangements, net of shares surrendered for employee tax obligations was \$26 million for the year-to-date period 2008 and \$312 million for the year-to-date period 2007. The actual tax benefit realized for the tax deductions from exercise of the share-based payment arrangements totaled \$591,000 for the year-to-date period 2008 and \$4 million for the year-to-date period 2007.

Under our share-based payment plans, we had options and restricted stock units outstanding as of June 30, 2008. Awards with graded vesting are recognized using the straight-line method. Forfeitures were estimated for share-based awards using a 6.5% weighted average annual rate.

Options

The fair value of each option award is estimated on the grant date using the Black-Scholes option valuation model. Options outstanding as of June 30, 2008 include options granted under the 2007 Plan, the 1997 Program, the Nextel Plan, and the MISOP, as discussed above.

Options to purchase about 1 million shares were granted in the second quarter 2008, and options to purchase about 8 million shares of our common stock were granted in the year-to-date period 2008. The weighted average grant date fair value of options awarded during the year-to-date period 2008 was \$4.60, compared with \$6.28 for the same prior year period. The total intrinsic value of options exercised was \$7 million during the year-to-date period 2008 and \$137 million during the year-to-date period 2007.

Restricted Stock Units

The fair value of each restricted stock unit award is calculated using the share price at the date of grant. Restricted stock units consist of those units granted under the 2007 Plan and the 1997 Program, as discussed above. About 1 million restricted stock units were granted in the second quarter 2008, and about 5 million restricted stock units were granted in the year-to-date period 2008.

The total fair value of restricted stock units vested was \$27 million during the year-to-date period 2008 and \$68 million during the year-to-date period 2007. The weighted-average grant date fair value of restricted stock units granted during the year-to-date period 2008 was \$6.89 per unit, compared with \$18.83 per unit for the same prior year period.

Most restricted stock units outstanding as of June 30, 2008 are entitled to dividend equivalents paid in cash, but performance-based restricted stock units are not entitled to dividend equivalent payments until the applicable performance period has been completed. Dividend equivalents paid on restricted stock units are charged to accumulated deficit when paid.

Table of Contents**SPRINT NEXTEL CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 8. Segments**

We have two reportable segments: Wireless and Wireline. These segments are organized by products and services.

Our chief operating decision maker uses segment earnings as the primary measure to evaluate segment performance and make resource allocation decisions. We define segment earnings as wireless or wireline operating income before other segment expenses such as depreciation, amortization, severance, exit costs, asset impairments and other, and merger and integration expenses solely and directly attributable to the segment. Expenses and income items excluded from segment earnings are managed at the corporate level.

Our Wireless segment includes revenue from a wide array of wireless mobile telephone and wireless data transmission services and the sale of wireless equipment. Through our Wireless segment, we, together with the remaining third-party PCS Affiliates, offer digital wireless service in all 50 states, Puerto Rico and the U.S. Virgin Islands.

Our Wireline segment includes revenue from domestic and international wireline voice and data communication services and services to the cable multiple systems operators that resell our local and long distance services and/or use our back office systems and network assets in support of their telephone services provided over cable facilities.

We generally account for transactions between segments based on fully distributed costs, which we believe approximate fair value. In certain transactions related to commercial services, pricing is set using market rates. Segment financial information is as follows:

SPRINT NEXTEL CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 9. Commitments and Contingencies

Litigation, Claims and Assessments

A number of cases that allege Sprint Communications Company L.P. failed to obtain easements from property owners during the installation of its fiber optic network in the 1980 s have been filed in various courts. Several of these cases sought certification of nationwide classes, and in one case, a nationwide class was certified. In 2003, a nationwide settlement of these claims was approved by the U.S. District Court for the Northern District of Illinois, but objectors appealed the preliminary approval order to the Seventh Circuit Court of Appeals, which overturned the settlement and remanded the case to the trial court for further proceedings. The parties proceeded with litigation and/or settlement negotiations on a state by state basis, and settlement negotiations have been coordinated in all cases but those pending in Louisiana and Tennessee. The Louisiana claims have been separately settled for an amount not material to us, and that settlement was given final approval by the Court, and the time to appeal that approval has expired. We have reached an agreement in principle to settle the claims in all the other states, excluding Tennessee, for an amount not material to us. The Court issued its preliminary approval of the settlement on July 17, 2008, and a final fairness hearing on the settlement is scheduled for November 17, 2008.

In September 2004, the U.S. District Court for the District of Kansas denied a motion to dismiss a shareholder lawsuit alleging that our 2001 and 2002 proxy statements were false and misleading in violation of federal securities laws to the extent they described new employment agreements with certain senior executives without disclosing that, according to the allegations, replacement of those executives was inevitable. These allegations, made in an amended complaint in a lawsuit originally filed in 2003, are asserted against us and certain current and former officers and directors, and seek to recover any decline in the value of our tracking stocks during the class period. The parties have stipulated that the case can proceed as a class action. All defendants have denied plaintiffs' allegations and intend to defend this matter vigorously. Allegations in the original complaint, which asserted claims against the same defendants and our former independent auditor, were dismissed by the Court in April 2004. Our motion to dismiss the amended complaint was denied, and the parties are engaged in discovery.

Various other commercial and employment suits, proceedings and claims, including purported class actions typical for a large business enterprise, are pending against us or our subsidiaries. While it is not possible to determine the ultimate disposition of each of these proceedings and whether they will be resolved consistent with our beliefs, we expect that the outcome of such proceedings, individually or in the aggregate, will not have a material adverse effect on our financial condition or results of operations.

Spectrum Reconfiguration Obligations

In recent years, the operations of a number of public safety communications systems in the 800 MHz block of spectrum have experienced interference that is believed to be a result of the operations of commercial mobile radio service providers operating on adjacent frequencies in the same geographic area. In 2004, the FCC adopted a Report and Order that included new rules regarding interference in the 800 MHz band and a comprehensive plan to reconfigure the 800 MHz band. In February 2005, Nextel Communications, Inc. accepted the Report and Order, which was necessary before the order became effective, because the Report and Order required Nextel to undertake a number of obligations and accept modifications to its FCC licenses. We assumed these obligations when we merged with Nextel in August 2005.

The Report and Order provides for the exchange of a portion of our 800 MHz FCC spectrum licenses, which the FCC is implementing through modifications to these licenses, and requires us to fund the cost incurred by

Table of Contents

SPRINT NEXTEL CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

public safety systems and other incumbent licensees to reconfigure the 800 MHz spectrum band. Under the Report and Order, we received licenses for 10 MHz of nationwide spectrum in the 1.9 GHz band, but we are required to relocate and reimburse the incumbent licensees in this band for their costs of relocation to another band designated by the FCC. The Report and Order required the completion of the 800 MHz band reconfiguration within a 36-month period, ending June 26, 2008, with exceptions made with respect to markets that border Mexico and Canada. On May 9, 2008, the FCC issued the Canadian border plan which included a 30-month deadline for completion. As more fully described below, the 800 MHz reconfiguration was not completed within the applicable FCC designated time period due primarily to circumstances outside of our control.

As part of the reconfiguration process in most regions, we must surrender portions of our 800 MHz spectrum before we are able to commence use of replacement 800 MHz spectrum. On September 11, 2007, the FCC issued a Third Memorandum Opinion and Order, or Third MO&O, in which the FCC ordered, among other things, that by June 26, 2008 we vacate many 800 MHz channels that we currently use, even if the applicable public safety licensee was not ready to relocate to the vacated spectrum. In addition, the Third MO&O also required licensees to submit waiver requests if they did not believe they would be able to complete their reconfiguration by June 26, 2008. On June 17, 2008, the FCC granted approximately 250 waivers to public safety licensees that had indicated that they would not be able to complete their reconfigurations by June 26, 2008. The FCC also granted interim waivers for an additional 225 licensees and requested further information from an additional 25 licensees before they made a determination as to any extension for those licensees. Additionally, on June 19, 2008, the FCC granted us a blanket waiver to allow us to stay on those channels not yet needed by licensees until such time as the licensee provides us with 60-days notice of the need for their channels. As of June 30, 2008, approximately 200 licensees were operating on their new channels. The granting of the waivers noted above could alleviate some of the spectrum constraints we may face as a result of the Third MO&O. The waiver process does not, however, allow for waivers to be granted for a significant portion of the other spectrum that we need in order to have sufficient capacity during individual reconfigurations with respect to which we are required to give up capacity for a period of time, which can be up to a year, while the licensee reconfigures its system and returns its prior spectrum to us for use. Accordingly, on June 17, 2008, we filed a Petition for Relief and presented a proposal to the FCC regarding a staged, milestone-based reduction in the spectrum that we would otherwise have been required to surrender by June 26, 2008. On June 20, 2008, the FCC granted a 30-day extension of the June 26, 2008 deadline for giving up this spectrum while it reviews our request and proposal, and on July 25, 2008, the FCC granted another 30-day extension of the June 26, 2008 deadline.

Any sudden and significant decrease in network capacity that results from the requirements of the Third MO&O could adversely affect the performance of our iDEN network. To compensate, we could attempt to construct additional sites or acquire additional spectrum, to the extent possible. In those markets where these network investments are not possible, we may be required to curtail subscriber additions and/or incentivize certain existing subscribers of iDEN services to use PowerSource or our high performance walkie-talkie, or QChat, devices (which we market as Nextel Direct Connect on CDMA) or move to our CDMA network until the capacity limitation can be alleviated, particularly if the replacement 800 MHz spectrum is not available for a significant length of time. Degradation in network performance in any market could result in higher subscriber churn in that market. The loss of a significant number of subscribers could adversely affect our Wireless segment and consolidated results of operations.

The Report and Order requires us to make a payment to the U.S. Treasury at the conclusion of the band reconfiguration process to the extent that the value of the 1.9 GHz spectrum we received exceeds the total of the value of licenses for spectrum in the 700 MHz and 800 MHz bands that we surrendered under the decision, plus the actual costs that we incur to retune incumbents and our own facilities under the Report and Order. The FCC

Table of Contents**SPRINT NEXTEL CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

determined under the Report and Order that, for purposes of calculating that payment amount, the value of the 1.9 GHz spectrum is about \$4.9 billion and the aggregate value of the 700 MHz spectrum and the 800 MHz spectrum surrendered, net of 800 MHz spectrum received as part of the exchange, is about \$2.1 billion, which, because of the potential payment to the U.S. Treasury, results in minimum cash expenditures of about \$2.8 billion by us under the Report and Order. The FCC has designated the independent Transition Administrator, or TA, to monitor, facilitate and review our expenditures for 800 MHz band reconfiguration.

In addition, a financial reconciliation is required to be completed at the end of the reconfiguration implementation to determine whether the value of the spectrum rights received exceeds the total of (i) the value of spectrum rights that are surrendered and (ii) the qualifying costs referred to above. If so, we will be required to pay the difference to the U.S. Treasury, as described above. Based on the FCC's determination of the values of the spectrum rights received and surrendered by Nextel, the minimum obligation to be incurred under the Report and Order is \$2.8 billion. The Report and Order also provides that qualifying costs we incur as part of the reconfiguration plan, including costs to reconfigure our own infrastructure and spectrum positions, can be used to offset the minimum obligation of \$2.8 billion; however, we are obligated to pay the full amount of the costs relating to the reconfiguration plan, even if those costs exceed that amount. From the inception of the program through June 30, 2008, we have incurred approximately \$1.4 billion of costs directly attributable to the spectrum reconfiguration program. When expended, these costs are accounted for either as property, plant and equipment or as additions to the FCC licenses intangible asset, consistent with our accounting policies. The following table represents payments directly attributable to our performance under the Report and Order from the inception of the program:

	Through December 31, 2007	2008 Additions (in millions)	Through June 30, 2008
FCC licenses	\$ 732	\$ 278	\$ 1,010
Property, plant and equipment	148	1	149
Costs not benefiting our infrastructure or spectrum positions	234	51	285
	\$ 1,114	\$ 330	\$ 1,444

Excluded from the table above are estimated reconfiguration costs incurred to date that are included in property, plant and equipment on our consolidated balance sheet, which are based on allocations between reconfiguration activities and our normal network improvements. These estimated allocations may vary depending on key assumptions, including subscribers, call volumes and other factors over the life of the reconfiguration program. As a result, the amount allocated to reconfiguration activity is subject to change based on additional assessments made over the course of the reconfiguration program. Since we, the independent TA and the FCC have not yet reached an agreement on our methodology for calculating the amount to be submitted for credit, we cannot provide assurance that we will be granted full credit for certain of these allocated network costs.

We estimate, based on our experience to date with the reconfiguration program and on information currently available, that our total direct costs attributable to complete the spectrum reconfigurations will range between \$2.8 billion and \$3.4 billion. This estimate is dependent on significant assumptions including the final licensee costs, and costs associated with relocating licensees in the Canadian border region under the border plan that was adopted by the FCC on May 9, 2008, and the Mexican border region for which there is currently no approved border plan, and does not include any of our apportioned internal network costs. Actual results could differ from such estimates. In addition, we are entitled to receive reimbursement from the mobile-satellite service licensees for their pro rata portion of our costs of clearing a portion of the 1.9 GHz spectrum. Those licensees may be

Table of Contents

SPRINT NEXTEL CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

unable or unwilling to reimburse us for their share of the costs, which we estimate to be approximately \$200 million. As a result of the Third MO&O, we currently anticipate that our apportioned network costs and other costs that we may incur to maintain our network could be substantial and cause the total cost of reconfiguration to exceed \$3.4 billion by an amount that could be material; however, the impact of the Third MO&O may be lessened if the FCC grants our Petition for Relief and adopts our proposal for staying on certain spectrum until certain milestones have been achieved by public safety agencies. Accordingly, we believe that it is unlikely that we will be required to make a payment to the U.S. Treasury.

As required under the terms of the Report and Order, we delivered a \$2.5 billion letter of credit to provide assurance that funds will be available to pay the relocation costs of the incumbent users of the 800 MHz spectrum. The Report and Order provides for the possibility of periodic reductions in the amount of the letter of credit. During the second quarter 2008, we determined, based on the information available to us, that the total cost of reconfiguring the incumbent users of the 800 MHz are likely to be less than \$2.5 billion. The TA reviewed our forecasts and recommended to the FCC a \$337 million reduction in the letter of credit based on costs incurred through December 31, 2007. The FCC concurred with the TA's request and, on May 8, 2008, the letter of credit was reduced to \$2.2 billion.

Note 10. Subsequent Event

On July 23, 2008, we announced that we will sell and subsequently lease back approximately 3,300 towers to TowerCo for approximately \$670 million of net proceeds to be received at closing. We will finalize the number of towers included in this transaction and the related proceeds when the transaction closes which we expect to be in fourth quarter 2008 or sooner.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders

Sprint Nextel Corporation:

We have reviewed the consolidated balance sheet of Sprint Nextel Corporation and subsidiaries as of June 30, 2008, the related consolidated statements of operations for the quarter and year-to-date periods ended June 30, 2008 and 2007, the related consolidated statements of cash flows for the year-to-date periods ended June 30, 2008 and 2007, and the related consolidated statement of shareholders' equity for the year-to-date period ended June 30, 2008. These consolidated financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Sprint Nextel Corporation and subsidiaries as of December 31, 2007, and the related consolidated statements of operations, cash flows and shareholders' equity for the year then ended (not presented herein); and in our report dated February 29, 2008, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying consolidated balance sheet as of December 31, 2007, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

Item 2. *Management's Discussion and Analysis of Financial Condition and Results of Operations*
Forward-Looking Statements

We include certain estimates, projections and other forward-looking statements in our annual, quarterly and current reports, and in other publicly available material. Statements regarding expectations, including performance assumptions and estimates relating to capital requirements, as well as other statements that are not historical facts, are forward-looking statements.

These statements reflect management's judgments based on currently available information and involve a number of risks and uncertainties that could cause actual results to differ materially from those in the forward-looking statements. With respect to these forward-looking statements, management has made assumptions regarding, among other things, customer and network usage, customer growth and retention, pricing, operating costs, the timing of various events and the economic and regulatory environment.

Future performance cannot be assured. Actual results may differ materially from those in the forward-looking statements. Some factors that could cause actual results to differ include:

the effects of vigorous competition, including the impact of competition on the price we are able to charge customers for services and equipment we provide and our ability to attract new customers and retain existing customers; the overall demand for our service offerings, including the impact of decisions of new subscribers between our post-paid and prepaid services offerings and between our two network platforms; and the impact of new, emerging and competing technologies on our business;

the impact of overall wireless market penetration on our ability to attract and retain customers with good credit standing and the intensified competition among wireless carriers for those customers;

the uncertainties related to the implementation of our business strategies, investments in our networks, our systems, and other businesses, including current investments and additional investments that will be required in connection with the planned deployment of a next generation broadband wireless network;

the costs and business risks associated with providing new services and entering new geographic markets, including in connection with the planned deployment of a next generation broadband wireless network;

uncertainty regarding satisfaction of the conditions to completion of the transaction with Clearwire Corporation, including receipt of the necessary approvals and satisfaction of the other conditions to closing;

the impact of recent downgrades and potential further downgrades in the ratings afforded our debt securities by ratings agencies;

the impact of difficulties we may encounter in implementing actions designed to maintain compliance with our financial covenants, including the success of actions involving third parties;

the effects of mergers and consolidations and new entrants in the communications industry and unexpected announcements or developments from others in the communications industry;

unexpected results of litigation filed against us or our suppliers or vendors;

Edgar Filing: SPRINT NEXTEL CORP - Form 10-Q

the impact of third parties not meeting our business requirements, including a significant adverse change in the ability or willingness of such parties to provide handset devices or infrastructure equipment for our code division multiple access, or CDMA, network, or Motorola, Inc.'s ability or willingness to provide related handset devices, infrastructure equipment and software applications, or to develop new technologies or features, for our integrated Digital Enhanced Network, or iDEN, network;

the impact of adverse network performance;

Table of Contents

the costs and/or potential customer impacts of compliance with regulatory mandates, particularly requirements related to the reconfiguration of the 800 megahertz, or MHz, band used to operate our iDEN network, as contemplated by the Federal Communications Commission's, or FCC's, Report and Order released in August 2004 as supplemented by subsequent memoranda;

equipment failure, natural disasters, terrorist acts, or other breaches of network or information technology security;

one or more of the markets in which we compete being impacted by changes in political, economic or other factors such as monetary policy, legal and regulatory changes or other external factors over which we have no control;

the impact of difficulties we may continue to encounter in connection with the integration of the pre-merger Sprint and Nextel Communications, Inc. businesses, and the integration of the businesses and assets of Nextel Partners, Inc. and the third-party affiliates, or PCS Affiliates, that provide wireless personal communications services, or PCS, under the Sprint® brand name, that we have acquired, including the risk that these difficulties may limit our ability to fully integrate the operations of these businesses and the risk that we will be unable to continue to retain key employees; and

other risks referenced from time to time in this report and other filings of ours with the Securities and Exchange Commission, or SEC, including in our annual report on Form 10-K for the year ended December 31, 2007 in Part I, Item 1A, Risk Factors.

The words may, could, estimate, project, forecast, intend, expect, anticipate, believe, target, providing guidance and similar intended to identify forward-looking statements. Forward-looking statements are found throughout this Management's Discussion and Analysis of Financial Condition and Results of Operations, and elsewhere in this report. The reader should not place undue reliance on forward-looking statements, which speak only as of the date of this report. We are not obligated to publicly release any revisions to forward-looking statements to reflect events after the date of this report, including unforeseen events.

Overview

We are a global communications company offering a comprehensive range of wireless and wireline communications products and services that are designed to meet the needs of individual consumers, businesses and government customers. We have organized our operations to meet the needs of our targeted customer groups through focused communications solutions that incorporate the capabilities of our wireless and wireline services. We are one of the three largest wireless companies in the United States based on the number of wireless subscribers. We also are one of the largest providers of Wireline long distance services and one of the largest carriers of Internet traffic in the nation. We own extensive wireless networks and a global long distance, Tier 1 Internet backbone.

Over the past several months, we have been reviewing our overall business strategy, including our sales, distribution and marketing plans, and working to streamline operations by changing the internal organizational structure of our company. As part of this reorganization, we have named new executives to lead key elements of our business, which we believe when fully implemented, will support quick decision-making, improve execution, strengthen our ability to retain our customer base and deliver on the opportunity provided by our assets. This reorganization is ongoing and is expected to be largely completed in the second half of the current year and fully operational by early 2009. As we refine our business strategy, we continue to evaluate opportunities to strengthen our business and implement cost reduction initiatives which may include de-levering and disposing of assets. For example, we are exploring alternatives for our iDEN network and related operations that include improving operations, making additional investments, entering into strategic partnerships and considering potential divestitures. We have not identified all strategic and structural alternatives that may be available to us, and do not know whether we will elect to pursue any alternatives. We may at any time be discussing or negotiating

Table of Contents

transactions that, if consummated, could have a material effect on our business, financial condition, liquidity or results of operations.

We believe the communications industry has been and will continue to be highly competitive on the basis of price, the types of services and devices offered and quality of service. Although we believe that many of our targeted customers base their purchase decisions on quality of service and the availability of differentiated features and services, competitive pricing, both in terms of the monthly recurring charges and the number of minutes or other features available under a particular rate plan, and handset offerings and pricing are often important factors in potential customers' purchase decisions. We also believe consumer and business spending is impacted by changes in the United States economy, and we will monitor any impacts to our business.

The FCC regulates the licensing, operation, acquisition and sale of the licensed radio spectrum that is essential to our business. The FCC and state Public Utilities Commissions also regulate, in whole or part, the provision of communications services. Future changes in regulations or legislation related to spectrum licensing or other matters related to our business could impose significant additional costs either in the form of direct out-of-pocket costs or additional compliance obligations.

Business Segments

We have two reportable segments: Wireless and Wireline. See note 8 of the Notes to Consolidated Financial Statements for additional information on our segments.

Wireless

Products and Services

Our strategy is to utilize state-of-the-art technology to provide differentiated wireless services and applications in order to acquire and retain high-quality wireless subscribers. We offer a wide array of wireless mobile telephone and wireless data transmission services on networks that utilize CDMA and iDEN technologies to meet the needs of individual consumers, businesses and government customers.

Through our Wireless segment, we, together with the PCS Affiliates and resellers of our wholesale wireless services, offer digital wireless service in all 50 states, Puerto Rico and the U.S. Virgin Islands, providing wireless coverage in over 360 metropolitan markets, including 344 of the 349 largest U.S. metropolitan areas, and serving about 52 million wireless subscribers as of June 30, 2008. We offer wireless international voice roaming for subscribers of both CDMA and iDEN-based services in numerous countries. Our CDMA network utilizes high-speed evolution data optimized, or EV-DO, technology to provide high-speed data applications. We have incorporated EV-DO Rev. A, the most recent version of EV-DO technology that is designed to support a variety of internet protocol, or IP, video, and high performance walkie-talkie applications, using QUALCOMM Incorporated's Q-Chat[®] technology (which we market as Nextel Direct Connect, or NDC, on CDMA), into over 86% of our CDMA network.

We offer a wide array of wireless mobile telephone and data transmission services and features in a variety of pricing plans, typically on a contract basis, for one or two year periods. Services are billed on a monthly basis according to the applicable pricing plan, which typically includes a fixed charge for certain services and variable charges for other services. We also offer wireless services that focus on the youth market, including our Boost Mobile prepaid wireless service on our iDEN network and our Boost UnlimitedSM local calling wireless service on our CDMA network. We also offer wholesale CDMA-based wireless services to resellers, commonly known as mobile virtual network operators, or MVNOs, which purchase wireless services from us at wholesale rates and resell the services to their customers under their own brand names. Under these MVNO arrangements, the operators bear the costs of subscriber acquisition, billing and customer service. In light of current industry conditions, it is possible that our MVNOs may reevaluate their long-term business strategies.

We offer a broad portfolio of data services across our CDMA network, including data and text messaging, photo and video offerings, entertainment and location-based applications, and mobile broadband applications for

Table of Contents

laptops and other devices. We have also launched the QChat® technology in 2008. This technology provides high performance walkie-talkie services on our CDMA network, and we have interfaces to provide interoperability of walkie-talkie services between our CDMA and iDEN networks. We expect that the NDC devices will eventually replace the PowerSource devices, which operate seamlessly between our CDMA and iDEN networks. For information regarding a dispute involving the intellectual property rights of QUALCOMM that relate to QChat, see Item 1A. Risk Factors. The intellectual property rights utilized by us and our suppliers and service providers may infringe on intellectual property rights owned by others in our annual report on Form 10-K for the year ended December 31, 2007.

On our iDEN network, we continue to support features and services designed to meet the needs of our customers. Both the Nextel and prepaid Boost Mobile brands feature our industry-leading walkie-talkie services, which give subscribers the ability to communicate instantly across the continental United States and to and from Hawaii and, through agreements with other iDEN providers, to and from select markets in Canada, Latin America and Mexico, as well as a variety of digital wireless mobile telephone and wireless data transmission services. We offer some data services on the iDEN network, but that network does not support a full complement of data services and many of those services are available only with limited capabilities. In addition, we are also improving our product and service offerings on our iDEN network, including the introduction of several new handsets throughout 2008.

Service Revenue

Our Wireless segment generates revenues from the provision of wireless services, the sale of wireless equipment and the provision of wholesale and other services. The ability of our Wireless segment to generate service revenues is primarily a function of:

the number of subscribers that we serve, which in turn is a function of our ability to acquire new and retain existing subscribers; and

the revenue generated from each subscriber, which in turn is a function of the types and amount of services utilized by each subscriber and the rates that we charge for those services.

The declines in our subscriber base and revenue generated from each subscriber group discussed below have resulted in a decline in service revenue.

Post-Paid and Prepaid Subscribers

The wireless industry is subject to intense competition, which impacts our ability to attract and retain subscribers for wireless services. Most markets in which we operate have very high rates of penetration for wireless services, which limits the growth of subscribers of wireless services. Consequently, we believe that wireless carriers must attract a greater proportion of new subscribers from the existing customer bases of competitors rather than from first time purchasers of wireless services. Because of high penetration rates, first time purchasers of wireless services tend to have lower credit ratings or no credit history. As a result, wireless carriers have focused considerable efforts on the care and service of existing subscribers and retention of valued customers. Some of our competitors have reported significant improvements in their post-paid customer retention rates (i.e., rates of customer churn). The combination of decreased rates of churn of some of our competitors, together with a slowing in the rate of subscriber growth, has reduced the pool of potential subscribers making wireless service provider decisions.

Table of Contents

Below is a table showing (a) net additions (losses) for each quarter beginning with the first quarter 2007 of direct subscribers for our iDEN and CDMA networks, excluding subscribers obtained through business combinations, existing subscribers who have migrated between networks and indirect subscribers of MVNOs and PCS Affiliates, (b) our total iDEN and CDMA post-paid subscribers as of the end of each quarterly period, and (c) our average rates of monthly post-paid and prepaid customer churn.

	March 31, 2007	June 30, 2007	September 30, 2007	December 31, 2007	March 31, 2008	June 30, 2008
Net additions (losses) (in thousands)						
Post-paid:						
iDEN	(744)	(662)	(700)	(686)	(684)	(527)
CDMA	524	678	363	3	(386)	(249)
Total	(220)	16	(337)	(683)	(1,070)	(776)
Boost Mobile-branded service:						
iDEN-based prepaid	272	70	(57)	(202)	(543)	(250)
CDMA-based unlimited local calling plan	3	99	124	257	343	112
Total	275	169	67	55	(200)	(138)
End of period subscribers (in thousands)						
iDEN post-paid	16,535	15,472	14,355	13,246	12,179	11,330
CDMA post-paid ⁽¹⁾	25,050	26,129	27,079	27,505	27,502	27,575
Total	41,585	41,601	41,434	40,751	39,681	38,905
Boost Mobile prepaid	4,284	4,354	4,297	4,095	3,552	3,302
Boost Mobile unlimited local calling plan	3	102	226	483	826	938
Total	4,287	4,456	4,523	4,578	4,378	4,240
Monthly customer churn rate						
Direct post-paid ⁽²⁾	2.3%	2.0%	2.3%	2.3%	2.45%	2.0%
Direct prepaid	7.0%	6.8%	6.2%	7.5%	9.9%	7.4%

(1) Includes subscribers with PowerSource devices and subscribers who have changed from using an iDEN to a CDMA handset.

(2) During the third quarter 2007, we implemented an additional churn rule to remove the impact of activations and deactivations occurring within 30 days in the same account. The new rule, which we believe presents a more precise churn calculation, reduced churn by 10 basis points to 2.3% in the third quarter 2007. The additional churn rule did not impact reported net additions or results of operations. Prior period churn figures have not been adjusted for this additional churn rule.

Throughout 2007 and the year-to-date period 2008, we endeavored to retain subscribers and attract new subscribers by continuing our focus on improving our customer care and sales and distribution functions. We have launched a new rate plan, known as Simply Everything, which offers customers unlimited domestic talking, web surfing, emailing, direct connect, domestic texting, video and picture sharing for \$99.99 per month. We also broadened our handset portfolio through the introduction of several new NDC devices and other new competitive CDMA handsets.

Despite our efforts, we lost 249,000 net post-paid subscribers on the CDMA network and 527,000 net post-paid subscribers on the iDEN network during the second quarter 2008. The subscriber losses were due in part to a decline in new post-paid subscribers caused primarily by increased advertising and promotions by our competitors compared to us, consumer sentiments regarding our networks and customer care, and recent

Table of Contents

measures taken by us to increase the credit quality of our customers. We continually monitor and adjust our credit policies in an effort to attract desirable and profitable customers, including lower credit quality customers. Our ratio of subscribers with a prime credit rating to those with a subprime credit rating has improved from the second quarter 2007. Refer to Results of Operations Segment Results of Operations Wireless Wireless Segment Earnings below for a discussion of subscriber trends.

We calculate churn by dividing net subscriber deactivations for the quarter by the sum of the average number of subscribers for each month in the quarter. For accounts comprised of multiple subscribers, such as family plans and enterprise accounts, net deactivations are defined as deactivations in excess of customer activations in a particular account within 30 days. Post-paid churn consists of both voluntary churn, where the subscriber makes his or her own determination to cease being a customer, and involuntary churn, where we terminate the customer's service due to a lack of payment or other reasons.

Post-paid involuntary churn improved during the second quarter 2008 primarily due to a continued increase in the credit quality of our subscribers, improved collection efforts, as well as seasonal trends. We believe that voluntary churn has recently improved on the CDMA network primarily due to our retention efforts which include new rate plan offerings and improving the customer experience. Voluntary churn among iDEN subscribers has remained relatively stable. Our overall 2008 post-paid churn remains high relative to that of our competitors and consequently we continue to focus on improving the customer experience in order to reduce churn. In the second quarter 2008, prepaid churn related to traditional users returned to levels consistent with 2007, while the churn rate for Boost Unlimited users increased in recent periods. Refer to Results of Operations Segment Results of Operations Wireless Wireless Segment Earnings below for a discussion of subscriber trends.

Average Revenue per Subscriber

Below is a table showing our average revenue per post-paid and prepaid subscriber for each quarter beginning with the first quarter 2007.

	March 31, 2007	June 30, 2007	September 30, 2007	December 31, 2007	March 31, 2008	June 30, 2008
Average monthly service revenue per user						
Direct post-paid	\$ 59	\$ 60	\$ 59	\$ 58	\$ 56	\$ 56
Direct prepaid	\$ 32	\$ 31	\$ 30	\$ 28	\$ 29	\$ 30

Average monthly service revenue per subscriber for the quarter is calculated by dividing our quarterly service revenue by the sum of our average number of subscribers for each month in the quarter. Changes in average monthly post-paid service revenue reflect subscribers who change rate plans, the level of voice and data usage during a quarter, the amount of service credits which we offer our customers, plus the net effect of average monthly revenue generated by new subscribers and deactivating subscribers.

Average monthly service revenue per subscriber in the second quarter 2008 was flat as compared to the first quarter 2008 as we improved the retention of our higher revenue subscribers and lessened the impact of rate plan migrations. Our retention efforts have focused on improving the customer experience including, but not limited to, new Simply Everything bundled plans which provide unlimited voice, data, text, and direct connect services, and improved service levels from our customer care centers. The decline in average monthly post paid service revenue per subscriber in previous quarters is primarily due to the loss of subscribers with higher priced service plans, while new subscribers have selected lower priced service plans and existing subscribers are migrating to lower priced, volume based and shared plans such as family add-on plans. Our average monthly service revenue is also impacted by the number of service credits accepted by our customers, which have increased recently as part of our retention efforts. The increase in average monthly prepaid service revenue per subscriber in recent quarters is due to higher access charges received from our Boost Unlimited users during recent quarters.

Table of Contents

combined with more stable average revenue per subscriber from our traditional prepaid users. There is no assurance that average service revenue per post-paid and prepaid subscriber will continue at these rates.

Segment Earnings

Wireless segment earnings is primarily a function of wireless service revenue, costs to acquire subscribers, network and interconnection costs to serve those subscribers and other Wireless segment operating expenses. The costs to acquire our customers include the net cost at which we sell our handsets, referred to as handset subsidies, as well as the marketing and sales costs incurred to attract those customers. Network costs primarily represent switch and cell site costs and interconnection costs generally consist of per-minute use fees and roaming fees paid to other carriers. The remaining costs associated with operating the Wireless segment include the costs to operate our customer care organization, back office support and bad debt expense. Wireless service revenue, costs to acquire subscribers, and variable network and interconnection costs fluctuate with the growth in our subscriber base, but certain elements are fixed.

Legislative and Regulatory Developments

800 Megahertz Spectrum Reconfiguration

Under the FCC's Report and Order, we are required to complete a reconfiguration plan that is designed to eliminate interference with public safety operators in the 800 MHz spectrum band through a spectrum reallocation that will result in more efficient use of 800 MHz spectrum. For a more detailed discussion of the Report and Order and its impact on us, refer to Item 1. Business Legislative and Regulatory Developments Regulations and Wireless Operations 800 MHz Band Spectrum Reconfiguration in our annual report on Form 10-K for the year ended December 31, 2007.

The Report and Order implemented rules to reconfigure spectrum in the 800 MHz band, in a 36-month phased transition process. We surrendered certain portions of our holdings in the 800 MHz spectrum band and are obligated to fund the cost incurred by public safety systems and other incumbent licensees to reconfigure the 800 MHz spectrum band. As part of this process, in most markets, we must cease using portions of 800 MHz spectrum during the reconfiguration before we are able to commence use of replacement 800 MHz spectrum. Based on the terms of the Report and Order and subsequent FCC and 800 MHz Transition Administrator, or TA, actions, we have been planning and implementing spectrum exchanges with each affected public safety agency based upon that agency's plan to complete the reconfiguration process, thereby limiting the time from when we cease using the surrendered spectrum and when the replacement spectrum is available for our use. In September 2007, the FCC issued an order, the Third Memorandum Opinion and Order, or Third MO&O, that, among other things, required that by June 2008 we vacate many 800 MHz channels that we currently use, even if the applicable public safety licensee was not ready to relocate to the vacated spectrum, which could result in a sudden and significant decrease in network capacity, which in turn would adversely affect the performance of our iDEN network. We appealed this order in the U.S. Court of Appeals for the D.C. Circuit. On May 2, 2008, the Court affirmed the FCC's decision in the Third MO&O. While we are still evaluating the impact of this decision, we remain committed to identifying a resolution to this matter that balances achieving the goals of 800 MHz reconfiguration with meeting the mobile communications needs of our customers. Accordingly, on June 17, 2008, we filed a Petition for Relief and presented a proposal to the FCC regarding a staged, milestone-based reduction with regard to certain spectrum that would otherwise have been required to have been given up by June 26, 2008. On June 20, 2008, the FCC granted a 30-day extension of the June 26, 2008 deadline for giving up this spectrum while it reviews our request and proposal, and on July 25, 2008, the FCC granted another 30-day extension of the June 26, 2008 deadline.

Additionally, on June 17, 2008, the FCC granted approximately 250 waivers to licensees that had indicated that they would not be able to complete their reconfigurations by June 26, 2008. The FCC also granted interim waivers for an additional 225 licensees and requested further information from an additional 25 licensees before

Table of Contents

they made a determination as to any extension for those licensees. On June 19, 2008, the FCC also granted us a blanket waiver to allow us to stay on those channels not yet needed by licensees until such time as the licensee provides us with 60-days notice of the need for their channels.

If the FCC does not accept our proposal to give up certain channels based on the achievement of certain milestones by public safety, we could attempt to construct additional sites or acquire additional spectrum, to the extent possible. In those markets where these network investments are not possible, we may be required to curtail subscriber additions and/or incentivize certain existing subscribers of iDEN services to use PowerSource and QChat devices or move to our CDMA network until the capacity limitation can be alleviated, particularly if the replacement 800 MHz spectrum is not available for an extended length of time. Degradation in network performance in any market could result in higher subscriber churn in that market. The loss of a significant number of subscribers could adversely affect our results of operations.

In addition, a financial reconciliation is required to be completed at the end of the reconfiguration implementation to determine whether the value of the spectrum rights we received exceeds the total of (i) the value of spectrum rights that we surrendered and (ii) certain qualifying costs. If so, we will be required to pay the difference to the U.S. Treasury. Based on the FCC's determination of the values of the spectrum rights received and surrendered by Nextel, the minimum obligation to be incurred under the Report and Order is \$2.8 billion. The Report and Order also provides that qualifying costs we incur as part of the reconfiguration plan, including costs to reconfigure our own infrastructure and spectrum positions, can be used to offset the minimum obligation of \$2.8 billion; however, we are obligated to pay the full amount of the costs relating to the reconfiguration plan, even if those costs exceed that amount. From the inception of the program through June 30, 2008, we have incurred approximately \$1.4 billion of costs directly attributable to the spectrum reconfiguration program. This amount does not include any of our internal network costs that we have preliminarily allocated to the reconfiguration program for capacity sites and modifications for which we may request credit under the reconfiguration program. We estimate, based on our experience to date with the reconfiguration program and on information currently available, that our total direct costs attributable to complete the spectrum reconfigurations will range between \$2.8 and \$3.4 billion. This estimate is dependent on significant assumptions including the final licensee costs, and costs associated with relocating licensees in the Canadian border region under the border plan that was adopted by the FCC on May 9, 2008, and the Mexican border region for which there is currently no approved border plan, and does not include any of our apportioned internal network costs. Actual results could differ from such estimates. In addition, we are entitled to receive reimbursement from the mobile-satellite service licensees for their pro rata portion of our costs of clearing a portion of the 1.9 gigahertz, or GHz, spectrum. Those licensees may be unable or unwilling to reimburse us for their share of the costs, which we estimate to be approximately \$200 million. As a result of the Third MO&O, we currently anticipate that our apportioned network costs and other costs that we may incur to maintain our network, could be substantial and cause the total cost of reconfiguration to exceed \$3.4 billion by an amount that could be material; however, the impact of the Third MO&O may be lessened if the FCC grants our Petition for Relief and adopts our proposal to stay on certain channels. Accordingly, we believe that it is unlikely that we will be required to make a payment to the U.S. Treasury.

As required under the terms of the Report and Order, we delivered a \$2.5 billion letter of credit to provide assurance that funds will be available to pay the relocation costs of the incumbent users of the 800 MHz spectrum. The Report and Order provides for the possibility of periodic reductions in the amount of the letter of credit. During the second quarter 2008, we determined based on the information available to us that the total cost of reconfiguring the incumbent users of the 800 MHz are likely to be less than \$2.5 billion. The TA reviewed our forecasts and recommended to the FCC a \$337 million reduction in the letter of credit based on costs incurred through December 31, 2007. The FCC concurred with the TA's request and, on May 8, 2008, the letter of credit was reduced to \$2.2 billion.

Table of Contents**911 Services**

In September 2007, the FCC adopted an order that changes the method by which wireless carriers measure compliance with accuracy requirements for locating 911 callers. Under the order, accuracy must be measured against each of the more than 6,000 public safety answering point boundaries rather than an average of system performance over a national network. Implementation of this measurement method, which is required over a five-year period, could result in significant costs to us and could subject us to penalties if we do not comply with these new rules. We are evaluating the feasibility of implementing this measurement method, many aspects of which may not be feasible technically, and we are working with the wireless industry to consider an appropriate response, particularly if implementation continues to appear to be technically infeasible. On March 25, 2008, the U.S. Court of Appeals for the D.C. Circuit granted our requested stay of the effectiveness of the FCC's order pending judicial review. Refer to Item 1. Business Legislative and Regulatory Development Regulation and Wireless Operations in our Form 10-K for the year ended December 31, 2007 for additional information.

Emergency Backup Power Rules

In October 2007, the FCC adopted rules that require wireless carriers to have eight hours of backup power at their cell sites and remote terminals. Wireless carriers may be able to exclude some of these facilities from the requirement if they can demonstrate in a report to be filed with the FCC within six months after the rules become effective that the installation of the equipment necessary to comply with the eight-hour backup rules, e.g., generators or batteries, presents a risk to safety, life or health; is precluded by private legal obligation or agreement; or is precluded by Federal, state, tribal or local law. For those facilities that do not fall within one of these exclusions, wireless carriers are required to bring such facilities into compliance with the backup power rules within twelve months from the effective date of the rules or file with the FCC a certified emergency backup power compliance plan detailing how the wireless carrier intends to meet the backup power requirements. The rules have not become effective. Assuming that compliance with these rules is even possible, which is not likely, such compliance could result in significant costs to us. We have requested and been granted a stay of the rules by the U.S. Court of Appeals for the District of Columbia pending the decision by the same court on the Petitions for Review which we, CTIA-The Wireless Association® and USA Mobility have filed. In June 2008, the Court issued a decision holding the appeals in abeyance until the Office of Management and Budget determines whether the FCC's imposition of these new reporting obligations meets the requirements of the Paperwork Reduction Act.

Wireline

Through our Wireline segment, we provide a broad suite of wireline voice and data communications services targeted to domestic business customers, multinational corporations and other communications companies. These services include domestic and international data communications using various protocols, such as multi-protocol label switching, or MPLS, technologies, IP, asynchronous transfer mode, or ATM, frame relay, managed network services and voice services. We also provide services to the cable multiple system operators, or MSOs, that resell our local and long distance service and/or use our back office systems and network assets in support of their telephone service provided over cable facilities primarily to residential end-user customers. We are one of the nation's largest providers of long distance services and operate all-digital long distance and Tier 1 IP networks.

For several years, our long distance voice services have experienced an industry-wide trend of lower revenue from lower prices and competition from other wireline and wireless communications companies, as well as cable MSOs and Internet service providers. Growth in voice services provided by cable MSOs is accelerating as consumers use cable MSOs as alternatives to local and long distance voice communications providers. We continue to assess the portfolio of services provided by our Wireline segment and are focusing our efforts on IP-based services and de-emphasizing stand-alone voice services and non-IP-based data services. For example, in addition to increased emphasis on selling IP and managed services, we are converting most of our existing

Table of Contents

customers from ATM and frame relay to more advanced IP technologies, such as MPLS, Sprintlink Frame Relay and Sprintlink ATM, which will reduce our cost structure by moving toward one consolidated data platform that can provide converged services. Over time, this conversion is expected to result in decreases in revenue from frame relay and ATM service offset by increases in IP and MPLS services. We also are taking advantage of the growth in voice services provided by cable MSOs, by providing large cable MSOs with wholesale voice local and long distance, which they offer as part of their bundled service offerings, as well as traditional voice and data services for their enterprise use.

WiMAX Initiative

On May 7, 2008, we entered into a definitive agreement with Clearwire Corporation to combine our next generation wireless broadband businesses to form a new wireless communications company to be called Clearwire. In addition, six independent partners, including Intel Corporation through Intel Capital, Google Inc., Comcast Corporation, Time Warner Cable Inc., Bright House Networks and Trilogy Equity Partners, have agreed to invest \$3.2 billion in the new Clearwire. The new Clearwire will be focused on expediting the deployment of the first nationwide mobile WiMAX network to provide a true mobile broadband experience for consumers, small businesses, medium and large enterprises, public safety organizations and educational institutions. Upon completion of the proposed transaction, which we expect to occur in the fourth quarter 2008, we will become the largest shareholder in the new Clearwire with approximately 51% of the equity ownership, with final determination of our ownership made based on the trading price of the new Clearwire stock ninety days after close.

Results of Operations

We present consolidated information as well as separate supplemental financial information for our two reportable segments, Wireless and Wireline. The disaggregated financial results for our two reportable segments have been prepared in a manner that is consistent with the basis and manner in which our chief operating decision maker evaluates segment performance and makes resource allocation decisions. Consequently, segment earnings is defined as wireless or wireline operating income before other segment expenses, such as depreciation, amortization, severance, exit costs, asset impairments and other, and merger and integration expenses solely and directly attributable to the segment. Expenses and income items excluded from segment earnings are managed at the corporate level. Merger and integration expenses are generally non-recurring in nature and primarily include costs for the launch of common customer interfacing systems, processes and other integration and planning activities, certain costs to provide wireless devices that operate seamlessly between the CDMA and iDEN networks, certain customer care costs, costs to retain employees, costs related to re-branding, and other integration costs. See note 8 of the Notes to Consolidated Financial Statements for additional information on our segments. For reconciliations of segment earnings to the closest generally accepted accounting principles measure, operating income, see the tables set forth in Wireless and Wireline below. We generally account for transactions between segments based on fully distributed costs, which we believe approximate fair value. In certain transactions, pricing is set using market rates.

Consolidated

	Quarter Ended June 30,		Year-to-Date June 30,	
	2008	2007	2008	2007
	(in millions)			
Net operating revenues	\$ 9,055	\$ 10,163	\$ 18,389	\$ 20,255
Net (loss) income	(344)	19	(849)	(192)

Net operating revenues decreased 11% in the second quarter 2008 as compared to the second quarter 2007 and decreased 9% from the year-to-date period 2007 to year-to-date period 2008, reflecting the continuing

Table of Contents

decline in revenues from our Wireless segment, due to declines in the average revenue per subscriber and a decrease in the number of wireless subscribers. For additional information, see Segment Results of Operations below.

In the second quarter 2008, we incurred a net loss of \$344 million compared to net income of \$19 million in the second quarter 2007, and we incurred a net loss of \$849 million in the year-to-date period 2008 compared to a net loss of \$192 million in the year-to-date period 2007, primarily due to a decline in our Wireless segment earnings due to the reasons stated above. For additional information, see Segment Results of Operations and Consolidated Information below.

Presented below are results of operations for our Wireless and Wireline segments, followed by a discussion of results of operations of consolidated information.

Segment Results of Operations**Wireless**

	Quarter Ended June 30,			Year-to-Date June 30,		
	2008	2007	Change	2008	2007	Change

NM Not Meaningful

(1) Merger and integration expenses are discussed in the Consolidated Information section.

(2) Severance, exit costs, asset impairments, depreciation and amortization are discussed in the Consolidated Information section.

Service Revenue

Service revenue consists of fixed monthly recurring charges, variable usage charges and miscellaneous fees such as activation fees, directory assistance, operator-assisted calling, equipment protection, late payment and early termination charges and certain regulatory related fees, net of service credits. Service revenue totaled \$7.0 billion for the second quarter 2008 and \$14.1 billion for the year-to-date period 2008 and \$7.9 billion for the second quarter 2007 and \$15.7 billion for the year-to-date period 2007.

Table of Contents

The following is the summary of our average subscribers and average revenue per subscriber for the quarters and year-to-date periods ended June 30, 2008 and 2007.

	Quarter Ended June 30,			Year-to-Date June 30,		
	2008	2007	Change ⁽²⁾	2008	2007	Change ⁽²⁾
Average post-paid subscribers ⁽¹⁾ (in thousands)	39,286	41,554	(2,268)	39,726	41,596	(1,870)
Average prepaid subscribers ⁽¹⁾ (in thousands)	4,292	4,375	(83)	4,372	4,243	129
Average monthly service revenue per user:						
Direct post-paid	\$ 56	\$ 60	\$ (4)	\$ 56	\$ 60	\$ (4)
Direct prepaid	30	31	(1)	30	31	(1)
Average direct post and prepaid	54	57	(3)	54	57	(3)

- (1) Average subscribers represent the average number of direct subscribers included in our customer base during the period, net of deactivated subscribers.
- (2) A summary of changes in net additions to subscribers and average monthly revenue per subscriber since the first quarter 2007 may be found on pages 29 and 30.

Service revenue decreased 11% in the second quarter 2008 as compared to the second quarter 2007 and 10% in the year-to-date period 2008 compared to the year-to-date period 2007, primarily due to a decline in average monthly service revenue per direct post-paid user and a decrease in the average number of direct post-paid subscribers, which resulted in a decrease of approximately \$880 million between quarterly periods and approximately \$1.6 billion between year-to-date periods.

Over half of the decline in post-paid service revenue for the quarter and year-to-date period as compared to the same periods in 2007 is attributable to the decrease in average monthly service revenue per subscriber. This decrease is primarily due to our loss of subscribers with higher priced service plans, as well as those who generated more overage revenues, and an increase in the number of customers accepting credits we offered as part of our overall retention efforts. In addition, we have added new subscribers on lower priced service plans and migrated existing subscribers to lower priced, volume based and shared plans. However, this has been partially offset by new and existing subscribers recently migrating to our Simply Everything plans. See discussion of service revenue in *Wireless Segment Earnings* below.

We continue to experience a net loss of iDEN subscribers during the year-to-date period 2008, including more than 705,000 subscribers that transferred to the CDMA network. We have also experienced a slight net increase in CDMA subscribers during the year-to-date period 2008, inclusive of the transfers above. Our overall subscriber losses were due in part to a decline in new post-paid subscribers caused primarily by increased advertising and promotions by our competitors compared to us and a maturing wireless telecommunications market. In addition, consumer sentiment regarding our networks, customer care and recent measures taken by us to increase the credit quality of our customers has impacted our ability to acquire new customers. However, we believe that new subscribers are attracted to our differentiated products and services, particularly CDMA-based data-related services, and other non-voice services. These products and services include data cards, downloading music, global positioning satellite, or GPS, enabled navigation services, instant messaging and emails, sending and receiving pictures, playing on-line games, browsing the Internet wirelessly, and with our PowerSource and Qchat devices, using walkie-talkie applications. See subscriber trends discussed in *Wireless Segment Earnings* below.

Wholesale, Affiliate and Other Revenue

Wholesale, affiliate and other revenue consists primarily of revenues from the sale of wireless services to companies that resell those services to their subscribers and net revenues retained from wireless subscribers residing in PCS Affiliate territories. Wholesale, affiliate and other revenue declined 9% and 6% during the

Table of Contents

second quarter and year-to-date periods 2008, respectively, compared to the second quarter and year-to-date period 2007, primarily due to a decline in average monthly service revenue per wholesale subscriber. In the year-to-date period 2008, wholesale subscriber additions were 157,000, reflecting a 10,000 decline in the second quarter 2008, resulting in about 7.8 million subscribers at quarter end, compared to about 7.0 million subscribers at June 30, 2007.

Cost of Services

Cost of services consists primarily of:

costs to operate and maintain our CDMA and iDEN networks, including direct switch and cell site costs, such as rent, utilities, maintenance, payroll costs associated with our network employees and spectrum frequency leasing costs;

fixed and variable interconnection costs, the fixed component of which consists of monthly flat-rate fees for facilities leased from local exchange carriers based on the number of cell sites and switches in service in a particular period and the related equipment installed at each site, and the variable component of which generally consists of per-minute use fees charged by wireline providers for calls terminating on their networks, which fluctuates in relation to the level and duration of those terminating calls;

long distance costs paid to the Wireline segment;

costs to service and repair handsets and activate service for new subscribers;

roaming fees paid to other carriers; and

variable costs relating to payments to third parties for the use of their proprietary data applications, such as ringers, games, music, TV and navigation services by our customers.

Cost of services increased 3% in the second quarter 2008 and 2% in the year-to-date period 2008 compared to the second quarter and year-to-date period 2007, primarily reflecting increased costs relating to data and voice roaming outside of our networks, increased service and repair and network costs offset by lower employee related and variable telecommunications costs.

Service gross margin declined in the second quarter and year-to-date period 2008 due to the reasons described above.

Subsidy

We recognize equipment revenue and corresponding costs of handsets and accessories when title to the handset or accessory passes to the dealer or end-user customer. Our marketing plans assume that handsets typically will be sold at prices below our cost, which is consistent with industry practice, as subscriber retention efforts often include providing incentives to customers such as offering new handsets at discounted prices. We reduce equipment revenue for these discounts offered directly to the customer, or for certain payments to third-party dealers to reimburse the dealer for point of sale discounts that are offered to the end-user subscriber. Additionally, we reduce the cost of handsets by any rebates that we earn from the supplier. Cost of handsets and accessories also includes order fulfillment related expenses and write-downs of handset and related accessory inventory for shrinkage and obsolescence. Equipment costs in excess of the revenues generated from equipment sales (referred to in our industry as subsidy) as a percentage of equipment revenues increased to 146% in the second quarter 2008 from 105% in the second quarter 2007 and increased to 129% in the year-to-date period 2008 from 110% in the year-to-date period 2007, primarily due to:

a 22% and 15% decline in equipment revenue for the second quarter and year-to-date period 2008, primarily due to a decrease in the number of handsets sold, and

a 6% and 7% decrease in the cost of handsets and accessories for the second quarter and year-to-date period 2008, primarily due to a decrease in the number of handsets sold. For the quarter-to-date period,

Table of Contents

this decline was partially offset by an increase in the average cost per handset sold as we continue to sell a greater number of higher priced units, including several new devices with increased functionality introduced during the second quarter 2008.

Selling, General and Administrative Expense

Sales and marketing costs primarily consist of customer acquisition costs, including commissions paid to our indirect dealers, third-party distributors and direct sales force for new handset activations and upgrades, residual payments to our indirect dealers, payroll and facilities costs associated with our direct sales force, retail stores and marketing employees, advertising, media programs and sponsorships, including costs related to branding. General and administrative expenses primarily consist of costs for billing, customer care and information technology operations, bad debt expense and back office support activities, including collections, legal, finance, human resources, strategic planning and technology and product development.

Sales and marketing expense decreased 19% in the second quarter 2008 from the second quarter 2007 and 14% in the year-to-date period 2008 from the year-to-date period 2007. The decrease we have experienced is primarily due to the decline in gross subscriber additions and a decline in advertising expenses and labor related costs due to our cost reduction activities.

General and administrative costs were almost flat the second quarter 2008 from the second quarter 2007 and increased 2% in the year-to-date period 2008 from the year-to-date period 2007. The increase in costs is primarily due to increases in customer care costs, reflecting additional customer care representatives partially offset by decreases in employee related costs. Bad debt expense was \$159 million and \$405 million for the quarter and year-to-date period ended June 30, 2008, representing a \$19 million decrease and a \$33 million increase when compared to the second quarter and the year-to-date periods 2007, respectively. The decrease for the quarter is primarily due to an overall improvement in our aged accounts receivable for the quarter ended June 30, 2008 when compared to 2007 and a reduction in the expected number of accounts to be written off. The increase in the year-to-date period when compared to 2007 was primarily due to higher expected average write-offs per account as compared to 2007 levels.

Wireless Segment Earnings

Wireless segment earnings decreased \$803 million or 30% in the second quarter 2008 from the second quarter 2007 and decreased \$1.4 billion or 28% in the year-to-date period 2008 from the year-to-date period 2007, primarily due to declines in service revenue.

Based on information currently available to management, we expect to experience continued downward pressure on Wireless segment earnings over the next few quarters. Specifically, we expect service revenue to continue to decline over the next few quarters due to expected declines in the number of subscribers, as well as a modest decline in our average monthly service revenue per user as growth from our data services is expected to only partially offset declines in voice services. The expected decline in the number of subscribers over the next few quarters is driven by expected declines in our iDEN subscribers, partially offset by a modest increase in CDMA subscribers. In addition, we have recently lowered the prices of certain handset devices and continue to make targeted investments to improve churn, which may cause an increase in our equipment net subsidy, which could increase the overall cost to acquire and retain subscribers. Although management has implemented a program designed to decrease our cost structure by among other things, reducing our labor costs and eliminating poor performing distribution points, we do not expect that these cost reductions will offset the expected service revenue declines and increases in net equipment subsidy over the next few quarters as described above.

Table of Contents

Internet Revenue

Internet revenue reflects sales of IP-based data services, including MPLS. Internet revenue increased 42% in the second quarter 2008 as compared to the second quarter 2007 and increased 43% in the year-to-date period 2008 as compared to the year-to-date period 2007. The increase was due to higher dedicated IP revenue as business customers increasingly migrate to MPLS services, as well as revenue growth in our cable voice over IP, or VoIP, business, which experienced a 60% increase in the second quarter 2008, as compared to the second quarter 2007 and a 62% increase in the year-to-date period 2008 as compared to the year-to-date period 2007.

Internet revenue generated from the provision of services to Wireless represented 10% of total Internet revenue for the second quarter 2008 as compared to 3% for the second quarter 2007 and 8% for the year-to-date period 2008 as compared to 3% for the year-to-date period 2007.

Other Revenue

Other revenue, which primarily consists of customer premises equipment, decreased 9% in the second quarter 2008 as compared to the second quarter 2007 and decreased 7% in the year-to-date period 2008 as compared to the year-to-date period 2007 as a result of fewer projects.

Costs of Services and Products

Costs of services and products include access costs paid to local phone companies, other domestic service providers and foreign phone companies to complete calls made by our domestic customers, costs to operate and maintain our networks and costs of equipment. Costs of services and products decreased 5% in the second quarter 2008 from the second quarter 2007 and decreased 4% in the year-to-date period 2008 from the year-to-date period 2007 due to improved access cost rates and declining voice and data volumes, partially offset by increased volumes in the cable VoIP business. Network cost decreased due mainly to headcount reductions.

Service gross margin increased from 31% in the second quarter 2007 to 34% in the second quarter 2008 and from 30% in the year-to-date period 2007 to 34% in the year-to-date period 2008, primarily as a result of the decrease in cost of services and products.

Selling, General and Administrative Expense

Selling, general and administrative expense decreased 3% in the second quarter 2008, as compared to the second quarter 2007 and decreased 4% in the year-to-date period 2008 as compared to the year-to-date period 2007. The decline was primarily due to headcount reductions and decreased customer care expenses due to a smaller customer base. These declines were partially offset by increases in costs associated with cable VoIP support in the second quarter and the year-to-date period 2008.

Wireline Segment Earnings

Wireline segment earnings increased \$40 million or 15% in the second quarter 2008 from the second quarter 2007 and \$122 million or 26% in the year-to-date period 2008 from year-to-date period 2007, primarily due to a decrease in credits and adjustments and a decrease in costs of services and products. An increase in Internet revenue, generally reflecting new customers, was offset by decreases in voice and data revenue.

Based on information currently available to management, we expect to experience a decline in Wireline segment earnings in the third quarter principally due to an expected decline in voice revenue due to lower pricing on commercial contracts and continued pressure in the long distance market, partially offset by growth in Internet revenue. In addition, increased competition and the excess capacity resulting from new technologies and networks may result in further price reductions. See Forward-Looking Statements.

Table of Contents**Consolidated Information**

	Quarter Ended June 30,			Year-to-Date June 30,		
	2008	2007	Change	2008	2007	Change
	(dollars in millions)					
Selling, general and administrative expenses	\$ (2,826)	\$ (3,107)	(9)%	\$ (6,014)	\$ (6,366)	(6)%

Net (loss) income	(344)	19	NM	(849)	(192)	NM

Selling, General and Administrative Expense

Selling, general and administrative expenses are primarily allocated at the segment level and are discussed in the segment earnings discussions above. The selling, general and administrative expenses related to the Wireless segment were \$2.5 billion and \$5.3 billion in the second quarter 2008 and the year-to-date period 2008 and \$2.7 billion and \$5.5 billion in the second quarter 2007 and the year-to-date period 2007. The selling, general and administrative expenses related to the Wireline segment were \$242 million and \$501 million in the second quarter 2008 and the year-to-date period 2008, as compared to \$250 million and \$520 million in the second quarter 2007 and the year-to-date period 2007.

In addition to the selling, general and administrative expenses discussed in the segment earnings, we incurred corporate general and administrative expenses of \$81 million in the second quarter 2008 and \$180 million in the year-to-date period 2008 and \$90 million in the second quarter 2007 and \$146 million in the year-to-date period 2007, including corporate merger and integration costs of \$9 million in the second quarter 2008 and \$29 million in the year-to-date period 2008 and \$41 million in the second quarter 2007 and \$81 million in the year-to-date period 2007 as discussed in *Merger and Integration Expenses* below. Also included in corporate general and administrative expenses are \$77 million and \$153 million of expenses related to the planned deployment of a next generation broadband wireless network incurred in the second quarter 2008 and the year-to-date period 2008 and \$48 million and \$64 million incurred in the second quarter 2007 and the year-to-date period 2007.

Merger and Integration Expenses

We incurred \$44 million of merger and integration expenses in the second quarter 2008 and \$130 million in the year-to-date period 2008 compared to \$163 million in the second quarter 2007 and \$262 million in the year-to-date period 2007. Of these amounts, \$35, \$101, \$122 and \$181 million, respectively, are included in our Wireless segment as the expenses are solely and directly attributable to that segment. These expenses are generally classified as selling, general and administrative and cost of products as appropriate in our consolidated statement of operations. Merger and integration expenses that are not solely and directly attributable to the Wireless segment are included in our Corporate segment and are classified as selling, general and administrative expenses. Merger and integration expense continued to decrease in the second quarter 2008 compared to the second quarter 2007, primarily due to declines in employee and consulting costs.

Severance, Exit Costs and Asset Impairments

We had severance, exit costs and asset impairments of \$105 million and \$336 million in the second quarter 2008 and the year-to-date period 2008 compared to \$85 million and \$259 million for the second quarter 2007 and the year-to-date period 2007.

Table of Contents

We recorded severance and exit costs of \$105 million and \$325 million in the second quarter 2008 and the year-to-date period 2008 and \$43 million and \$209 million in the second quarter 2007 and the year-to-date period 2007 related to the separation of employees and continued organizational realignment initiatives. In addition to the costs described above, we recorded an immaterial amount of impairments during the second quarter and the year-to-date period 2008. For the second quarter 2007 and the year-to-date period 2007, we wrote off \$42 million and \$50 million primarily related to the sale of Velocita Wireless Holding Corporation, the closing of retail stores due to integration activities and the write off of network assets.

Depreciation and Amortization Expense

Depreciation expense increased 4% in the second quarter 2008 from the second quarter 2007 and increased 7% in the year-to-date period 2008 from the year-to-date period 2007, primarily due to increases to our in service network assets. These increases were partially offset by the impact of our annual review of depreciation rates and lives completed in the quarter ended March 31, 2008. These rate changes are primarily related to certain assets becoming fully depreciated and net changes in service lives of assets primarily in the CDMA network. The impact of these changes is expected to reduce annual depreciation expense by about \$135 million. Additionally, the impact of these changes reduced the Wireless segment second quarter and the year-to-date 2008 depreciation expense by about \$25 million and \$50 million, and reduced the Wireline segment second quarter and the year-to-date 2008 depreciation expense by about \$10 million and \$20 million, respectively.

Amortization expense decreased \$217 million and \$433 million in the second quarter 2008 and the year-to-date period 2008 from the second quarter 2007 and the year-to-date period 2007, respectively, primarily due to the amortization of the customer relationships acquired as part of the Sprint-Nextel merger, which are amortized using the sum of the years' digits method, resulting in higher amortization rates in early periods that decline over time. See note 2 to the Notes to Consolidated Financial Statements for additional information regarding our definite lived intangible assets.

Interest Expense

Interest expense decreased \$13 million in the second quarter 2008 as compared to the second quarter 2007 and \$41 million in the year-to-date period 2008 as compared to the year-to-date period 2007, due to the reduction in the effective interest rates on our long-term debt, partially offset by the increase in the average long-term debt balance related to the draw down of \$2.5 billion under the revolving bank credit facility in February 2008. The effective interest rate on our average long-term debt balance of \$23.9 billion in the second quarter 2008 was 6.4%. The effective interest rate on our average long-term debt balance of \$21.9 billion in the second quarter 2007 was 7.0%. The effective interest rate on our average long-term debt balance of \$23.4 billion in the year-to-date period 2008 was 6.5%. The effective interest rate on our average long-term debt balance of \$21.8 billion in the year-to-period 2007 was 7.0%. The effective interest rate includes the effect of interest rate swap agreements. As of June 30, 2008, the average floating rate of interest on the interest rate swaps was 6.0%, while the weighted average coupon on the underlying debt was 7.5%. See Liquidity and Capital Resources for more information on our financing activities.

Interest Income and Other, Net

Interest income includes dividends received from certain investments in equity securities and interest earned on marketable debt securities and cash equivalents. In the second quarter 2008, interest income and other decreased \$32 million as compared to the second quarter 2007 and decreased \$37 million in the year-to-date period 2008 compared to the year-to-date period 2007 primarily due to the \$20 million premium paid on the early retirement of our senior notes in June 2008.

Other includes equity in earnings of unconsolidated investees, which remained flat in the second quarter 2008 and the year-to-date period 2008 compared to the second quarter 2007 and the year-to-date period 2007.

Table of Contents***Income Tax Benefit***

Our consolidated effective tax rate was a 37.8% and 44.3% benefit for the year-to-date periods 2008 and 2007, respectively, due to net losses. Information regarding the items that caused the effective tax rates to vary from the statutory federal rate for income taxes can be found in note 5 of the Notes to Consolidated Financial Statements.

Net (Loss) Income

We recorded net losses of \$344 million and \$849 million in the second quarter 2008 and the year-to-date period 2008 compared to net income of \$19 million in the second quarter 2007 and a net loss of \$192 million in the year-to-date period 2007, respectively. Our second quarter 2008 and the year-to-date period 2008 net losses were primarily due to decreases in our Wireless segment revenue, while the year-to-date period 2007 loss was principally due to increases in our Wireless segment operating expenses, including an increase in severance costs related to workforce reductions.

We expect downward pressure on our consolidated results of operations in the near term caused principally by the expected decline in Wireless segment earnings discussed above. See Forward-Looking Statements.

Critical Accounting Policies and Estimates

We consider the following accounting policies and estimates to be the most important to our financial position and results of operations, either because of the significance of the financial statement item or because they require the exercise of significant judgment and/or use of significant estimates. While management believes that the estimates used are reasonable, actual results could differ from those estimates.

Revenue Recognition and Allowance for Doubtful Accounts Policies

Operating revenues primarily consist of wireless service revenues, revenues generated from handset and accessory sales and revenues from wholesale operators and PCS Affiliates, as well as local and long distance voice, data and Internet revenues. Service revenues consist of fixed monthly recurring charges, variable usage charges such as roaming, directory assistance, and operator-assisted calling and miscellaneous fees, such as activation, upgrade, late payment, reconnection and early termination fees and certain regulatory related fees. We recognize service revenues as services are rendered and equipment revenue when title passes to the dealer or end-user customer, in accordance with SEC Staff Accounting Bulletin, or SAB, No. 104, *Revenue Recognition*, and Emerging Issues Task Force, or EITF, Issue No. 00-21, *Revenue Arrangements with Multiple Deliverables*. We recognize revenue for access charges and other services charged at fixed amounts ratably over the service period, net of credits and adjustments for service discounts, billing disputes and fraud or unauthorized usage. We recognize excess wireless usage and long distance revenue at contractual rates per minute as minutes are used. Additionally, we recognize excess wireless data usage based on kilobytes and one-time use charges, such as for the use of premium services, when rendered. As a result of the cutoff times of our multiple billing cycles each month, we are required to estimate the amount of subscriber revenues earned but not billed from the end of each bill cycle to the end of each reporting period. These estimates are based primarily on rate plans in effect and our historical usage and billing patterns. Subscriber revenue earned but not billed represented about 11% of our accounts receivable balance as of June 30, 2008.

We establish an allowance for doubtful accounts receivable sufficient to cover probable and reasonably estimable losses. Because of the number of accounts that we have, it is not practical to review the collectibility of each of those accounts individually when we determine the amount of our allowance for doubtful accounts each period, although we do perform some account level analysis with respect to large wireless and wireline customers. Our estimate of the allowance for doubtful accounts considers a number of factors, including collection experience, aging of the accounts receivable portfolios, the credit quality of our subscriber base, estimated proceeds from future bad debt sales, and other qualitative considerations, including macro-economic

Table of Contents

factors. The accounting estimates related to the recognition of revenue require us to make assumptions about future billing adjustments for disputes with customers, unauthorized usage, and future returns and mail-in rebates on handset sales. The allowance amounts recorded represent our best estimate of future outcomes; to the extent that our actual experience differs significantly from historical trends, the required allowance amounts could differ from our estimate. Any resulting adjustments would change the net accounts receivable reported on our consolidated balance sheet, and bad debt expense, in the case of estimates related to doubtful accounts, or revenue, in the case of estimates related to other allowances, reported in our results of operations in future periods. For example, if our allowance for doubtful accounts estimate were to change by 10%, it would result in a corresponding change in bad debt expense of \$29 million for the Wireless segment and \$1 million for the Wireline segment.

Device and Accessory Inventory

Inventories of handsets and accessories in the Wireless segment are stated at the lower of cost or market. We determine cost by the first-in, first-out, or FIFO, method. Handset costs and related revenues generated from handset sales, or handset subsidies, are expensed at the time of sale. We do not recognize the expected handset subsidies prior to the time of sale because the promotional discount decision is made at the point of sale and/or because we expect to recover the handset subsidies through service revenues.

As of June 30, 2008, we held \$625 million of inventory. We analyze the realizable value of our handset and other inventory on a quarterly basis. This analysis includes assessing obsolescence, sales forecasts, product life cycle, marketplace and other considerations. If our assessments regarding the above factors change, we may be required to sell handsets at a higher subsidy or potentially record expense in future periods prior to the point of sale to the extent that we expect that we will be unable to sell handsets with a service contract.

Valuation and Recoverability of Long-lived Assets Including Definite Lived Intangible Assets

A significant portion of our total assets are long-lived assets, consisting primarily of property, plant and equipment and definite lived intangible assets. Changes in technology or in our intended use of these assets, as well as changes in economic or industry factors or in our business or prospects, may cause the estimated period of use or the value of these assets to change.

Property, plant and equipment represented \$25.7 billion of our \$62.8 billion in total assets as of June 30, 2008. We generally calculate depreciation on these assets using the straight-line method based on estimated economic useful lives as follows:

Long-lived Assets	Estimated Useful Life	Average Useful Life
Buildings and improvements	3 to 30 years	12 years
Network equipment, site costs and software	3 to 30 years	8 years
Non-network internal use software, office equipment and other	3 to 12 years	4 years

We calculate depreciation on certain of our assets using the group life method. Accordingly, ordinary asset retirements and disposals are charged against accumulated depreciation with no gain or loss recognized.

Since changes in technology or in our intended use of these assets, as well as changes in broad economic or industry factors, may cause the estimated period of use of these assets to change, we perform annual internal studies to confirm the appropriateness of depreciable lives for certain categories of property, plant and equipment. These studies take into account actual usage, physical wear and tear, replacement history, and assumptions about technology evolution, to calculate the remaining life of our asset base. When these factors indicate that an asset's useful life is different from the original assessment, we depreciate the remaining book values prospectively over the adjusted estimated useful life.

Table of Contents

During the first quarter 2008, we implemented depreciation rate and life changes with respect to certain assets that comprise the wireless and wireline networks resulting from our annual depreciable lives study. These revised rates reflected both changes in the useful life estimates of certain of our asset groups and adjustments to our accumulated depreciation accounts under the group life depreciation method. The reduced expense associated with the depreciation rate and life changes resulted in an approximate pre-tax \$35 million reduction in depreciation expense or \$0.01 per share savings, net of tax, in the second quarter 2008 and a \$70 million reduction, or \$0.02 per share savings, net of tax, in the year-to-date period 2008. In addition to performing our annual study, we also continue to assess the estimated useful life of the iDEN network assets, which had a net carrying value of \$7.8 billion as of June 30, 2008, and our future strategic plans for this network, as an increasingly larger portion of our subscriber base is served by our CDMA network. A reduction in our estimate of the useful life of the iDEN network assets would cause increased depreciation charges in future periods that could be material. For example, a 10% reduction in the remaining weighted average useful life of the iDEN network assets would increase annual depreciation expense by about \$176 million. In conjunction with our fourth quarter 2007 annual goodwill impairment review, we re-assessed the remaining useful lives of our long-lived assets and concluded they were appropriate.

Intangible assets with definite useful lives represented \$4.7 billion of our \$62.8 billion in total assets as of June 30, 2008. Definite lived intangible assets consist primarily of customer relationships that are amortized over two to five years using the sum of the years' digits method, which we believe best reflects the estimated pattern in which the economic benefits will be consumed. Other definite lived intangible assets primarily include certain rights under affiliation agreements that we reacquired in connection with the acquisitions of certain PCS Affiliates and Nextel Partners, which are being amortized over the remaining terms of those affiliation agreements on a straight-line basis, and the Nextel and Direct Connect® trade names, which are being amortized over ten years on a straight-line basis. We also evaluate the remaining useful lives of our definite lived intangible assets each reporting period to determine whether events and circumstances warrant a revision to the remaining periods of amortization, which would be addressed prospectively. For example, we review certain trends such as customer churn, average revenue per user, revenue, our future plans regarding the iDEN network and changes in marketing strategies, among others. Significant changes in certain trends may cause us to adjust, on a prospective basis, the remaining estimated life of certain of our definite lived intangible assets. For additional information, refer to note 2 of the Notes to Consolidated Financial Statements.

We review our long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. We group our long-lived assets at the lowest level for which identifiable cash flows are largely independent of the cash flows of other groups of assets and liabilities. Our asset groups consist of wireless and wireline, and the wireless asset group includes our intangible assets, our wireless property, plant and equipment and goodwill. As previously discussed in Overview, we are in the process of reorganizing our business, which could change the asset groups used for testing our long-lived assets for impairment, specifically testing for impairment at a level lower than our wireless asset group. Indicators of impairment for our asset groups include, but are not limited to, a sustained significant decrease in the market price of or the cash flows expected to be derived from the asset groups, or a significant change in the extent or manner in which the assets in the group are utilized. A significant amount of judgment is involved in determining the occurrence of an indicator of impairment that requires an evaluation of the recoverability of our long-lived assets. If the total of the expected undiscounted future cash flows is less than the carrying amount of our assets, a loss is recognized for the difference between the fair value and carrying value of the assets. Impairment analyses, when performed, are based on our current business and technology strategy, our views of growth rates for our business, anticipated future economic and regulatory conditions and expected technological availability.

In conjunction with our 2007 annual assessment of goodwill for impairment, we performed a recoverability test of the wireless long-lived assets in accordance with Statement of Financial Accounting Standards, or SFAS, No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. We included cash flow projections from our wireless operations along with cash flows associated with the eventual disposition of the long-lived assets, which included estimated proceeds from the sale of FCC licenses, trade names, and customer

Table of Contents

relationships. The undiscounted future cash flows of the wireless long-lived assets exceeded their net book value. As a result, no impairment charge was recorded.

In addition to the analyses described above, we periodically assess certain assets that have not yet been deployed in our business, including network equipment, cell site development costs, and software in development, to determine if an impairment charge is required. Network equipment and cell site development costs are impaired whenever events or changes in circumstances cause us to abandon such assets if they are no longer needed to meet management's strategic network plans. Software development costs are impaired when it is no longer probable that the software project will be deployed. We also periodically assess network equipment that has been removed from the network to determine if an impairment charge is required. If we continue to have challenges retaining subscribers and as we continue to assess the impact of rebanding the iDEN network, management may abandon certain CDMA and iDEN assets in future periods if we conclude those assets will either never be deployed or redeployed, in which case we would recognize a non-cash impairment charge that could be material to our consolidated financial statements.

Valuation and Recoverability of Goodwill and Indefinite Lived Intangible Assets

Intangible assets with indefinite useful lives represented \$22.7 billion of our \$62.8 billion in total assets as of June 30, 2008. We have identified FCC licenses and our Sprint and Boost Mobile trademarks as indefinite lived intangible assets, in addition to our goodwill, after considering the expected use of the assets, the regulatory and economic environment within which they are being used, and the effects of obsolescence on their use. We review our goodwill, which relates solely to our wireless reporting unit, and other indefinite lived intangibles annually in the fourth quarter for impairment, or more frequently if indicators of impairment exist. We continually assess whether any indicators of impairment exist, which requires a significant amount of judgment. Such indicators may include a sustained significant decline in our share price and market capitalization; a decline in our expected future cash flows, a significant adverse change in legal factors or in the business climate; unanticipated competition; the testing for recoverability of a significant asset group within a reporting unit; and/or slower growth rates, among others. As previously discussed in Overview, we are in the process of reorganizing our business, which could change the reporting units used for testing our goodwill and indefinite lived assets for impairment, specifically testing for impairment at a level lower than our wireless reporting unit. Any adverse change in these factors could have a significant impact on the recoverability of these assets and could have a material impact on our consolidated financial statements.

When required, we first test goodwill for impairment by comparing the fair value of our wireless reporting unit with its net book value. If the fair value of the wireless reporting unit exceeds its net book value, goodwill is not deemed to be impaired, and no further testing would be necessary. If the net book value of our wireless reporting unit exceeds its fair value, we perform a second test to measure the amount of impairment loss, if any. To measure the amount of any impairment loss, we determine the implied fair value of goodwill in the same manner as if our wireless reporting unit were being acquired in a business combination. Specifically, we allocate the fair value of the wireless reporting unit to all of the assets and liabilities of that reporting unit, including any unrecognized intangible assets, in a hypothetical calculation that would yield the implied fair value of goodwill. If the implied fair value of goodwill is less than the recorded goodwill, we record an impairment charge for the difference. The valuation analyses used in the analysis utilize both income and market approaches as described below:

Income Approach: To determine fair value, we discount the expected cash flows of the wireless reporting unit. The discount rate used represents the estimated weighted average cost of capital, which reflects the overall level of inherent risk involved in our wireless operations and the rate of return an outside investor would expect to earn. To estimate cash flows beyond the final year of our model, we use a terminal value approach. Under this approach, we use estimated operating income before interest, taxes, depreciation and amortization in the final year of our model, adjust it to estimate a normalized cash flow, apply a perpetuity growth assumption and discount by a perpetuity discount factor to

Table of Contents

determine the terminal value. We incorporate the present value of the resulting terminal value into our estimate of fair value.

Market-Based Approach: To corroborate the results of the income approach described above, we estimate the fair value of our wireless reporting unit using several market-based approaches. We also use the guideline company method, which focuses on comparing our risk profile and growth prospects to select reasonably similar/guideline publicly traded companies.

The determination of fair value of the wireless reporting unit and other assets and liabilities within the wireless reporting unit requires significant estimates and assumptions. These estimates and assumptions primarily include, but are not limited to, the discount rate, terminal growth rates, operating income before depreciation and amortization, or OIBDA, and capital expenditures forecasts. Due to the inherent uncertainty involved in making those estimates, actual results could differ from those estimates. We evaluate the merits of each significant assumption, both individually and in the aggregate, used to determine the fair value of the wireless reporting unit, as well as the fair values of the corresponding assets and liabilities within the wireless reporting unit, for reasonableness.

The allocation of the fair value of the wireless reporting unit to individual assets and liabilities within the wireless reporting unit also requires us to make significant estimates and assumptions. The allocation requires several analyses to determine fair value of assets and liabilities including, among others, customer relationships, FCC licenses, trademarks and current replacement costs for certain property, plant and equipment.

When required, we test other indefinite lived intangibles for impairment by comparing the asset's respective carrying value to estimates of fair value, determined using the direct value method. Our FCC licenses are combined as a single unit of accounting following the unit of accounting guidance as prescribed by EITF Issue No. 02-7, *Unit of Accounting for Testing Impairment of Indefinite-Lived Intangible Assets*, except for our FCC licenses in the 2.5 GHz band, which are tested separately as a single unit of accounting.

The accounting estimates related to our indefinite lived intangible assets require us to make significant assumptions about fair values. Our assumptions regarding fair values require significant judgment about economic factors, industry factors and technology considerations, as well as our views regarding the prospects of our business. Changes in these judgments may have a significant effect on the estimated fair values.

In the fourth quarter 2007, we performed our annual analysis of goodwill for impairment. Based on the results of our annual analysis of goodwill for impairment, we determined that the net book value of the wireless reporting unit exceeded its fair value. Therefore, we performed the second step of the impairment test to determine the implied fair value of goodwill. Specifically, we hypothetically allocated the fair value of the wireless reporting unit as determined in the first step to our recognized and unrecognized net assets, including allocations to intangible assets such as customer relationships, FCC licenses and trade names. Such items had fair values substantially in excess of current book values. Our goodwill analysis resulted in our recording a non-cash goodwill impairment charge of \$29.649 billion in the fourth quarter 2007.

Changes in certain assumptions could have had a significant impact on the goodwill impairment charge. For example, a decrease in OIBDA by 5% or an increase in capital expenditures by 5% would have resulted in an additional goodwill impairment charge equal to our remaining goodwill of \$977 million. Conversely, an increase in OIBDA by 5% or a decrease in capital expenditures by 5% would have resulted in a reduction to the goodwill impairment charge by \$2.9 billion and \$2.0 billion, respectively. A 50 basis point increase or decrease in the discount rate would have resulted in an approximate \$350 million increase or decrease to the goodwill impairment charge, respectively. A 50 basis point increase or decrease in the terminal growth rate would have resulted in an approximate \$400 million decrease or increase to the charge, respectively. The sensitivity amounts above are calculated based on the impact of the change on the fair value of the wireless reporting unit, as well as the impact of changes in the fair values of the assets and liabilities of the wireless reporting unit.

Table of Contents***Tax Valuation Allowances and Uncertain Tax Positions***

We are required to estimate the amount of taxes payable or refundable for the current year and the deferred income tax liabilities and assets for the future tax consequences of events that have been reflected in our consolidated financial statements or tax returns for each taxing jurisdiction in which we operate. This process requires our management to make assessments regarding the timing and probability of the ultimate tax impact. We record valuation allowances on deferred tax assets if we determine it is more likely than not that the asset will not be realized. The accounting estimates related to the tax valuation allowance requires us to make assumptions regarding the timing of future events, including the probability of expected future taxable income and available tax planning opportunities. These assumptions require significant judgment because actual performance has fluctuated in the past and may do so in the future. The impact that changes in actual performance versus these estimates could have on the realization of tax benefits as reported in our results of operations could be material.

We carried an income tax valuation allowance of \$725 million as of June 30, 2008. This amount includes a valuation allowance of \$477 million for the total tax benefits related to loss carryforwards, subject to utilization restrictions, acquired in connection with certain acquisitions. The remainder of the valuation allowance relates to state net operating loss and tax credit carryforwards. Within our total valuation allowance, we had \$102 million related to separate company state net operating losses incurred by our subsidiaries after we acquired them. The valuation allowance was provided on these separate company state net operating loss benefits since these subsidiaries do not have a sufficient history of taxable income. Current analyses of cumulative historical income and qualitative factors indicate that the valuation allowance continues to be appropriate, meaning that we currently believe that is more likely than not that we will not realize such tax benefits in the future. We will continue to monitor these analyses and factors in future periods and may adjust the valuation allowance based on the facts and circumstances existing in future periods. For the valuation allowance relating to the acquired tax benefits described above, if we reverse any allowance in 2008, we would first reduce goodwill or intangible assets resulting from the acquisitions. Any adjustment to the valuation allowance after 2008 would generally be recorded to the consolidated statement of operations following the guidance in the recently issued SFAS No. 141R, *Business Combinations*, described in further detail in *Significant New Accounting Pronouncements* below.

We adopted Financial Accounting Standards Board, or FASB, Interpretation No. 48, or FIN 48, *Accounting for Uncertainty in Income Taxes*, an interpretation of SFAS No. 109, *Accounting for Income Taxes*, on January 1, 2007. The adoption of FIN 48 did not have a material impact on our consolidated financial statements. The accounting estimates related to the liability for uncertain tax positions requires us to make judgments regarding the sustainability of each uncertain tax position based on its technical merits. If we determine it is more likely than not a tax position will be sustained based on its technical merits, we record the impact of the position in our consolidated financial statements at the largest amount that is greater than fifty percent likely of being realized upon ultimate settlement. These estimates are updated at each reporting date based on the facts, circumstances and information available. We are also required to assess at each annual reporting date whether it is reasonably possible that any significant increases or decreases to the unrecognized tax benefits will occur during the next twelve months. See note 5 of the Notes to Consolidated Financial Statements for additional information regarding FIN 48. There have been no material changes in the total unrecognized tax benefits, interest or penalties attributable to uncertain tax positions during the second quarter 2008.

Actual income tax assets and liabilities could vary from these estimates due to future changes in income tax law, significant changes in the jurisdictions in which we operate, our inability to generate sufficient future taxable income or unpredicted results from the final determination of each year's liability by taxing authorities. These changes could have a significant impact on our financial position.

Table of Contents

Significant New Accounting Pronouncements

In December 2007, the FASB issued SFAS No. 141R, which replaces SFAS No. 141, *Business Combinations*, originally issued in June 2001. SFAS No. 141R will apply to business combinations for which the acquisition date is on or after January 1, 2009, and this statement could have a material impact on us with respect to business combinations completed after the effective date. Such significant changes include, but are not limited to the acquirer recording 100% of all assets and liabilities, including goodwill, of the acquired business, generally at their fair values, and acquisition-related transaction and restructuring costs being expensed rather than capitalized as part of the cost of the acquisition. In addition, after the effective date, reversals of valuation allowances related to acquired deferred tax assets and changes to acquired income tax uncertainties related to any business combinations, even those completed prior to the statement's effective date, will generally be recognized in earnings.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements*. This statement amends Accounting Research Bulletin No. 51, *Consolidated Financial Statements*, to establish accounting and reporting standards for a noncontrolling interest in a subsidiary and for a deconsolidation of a subsidiary. SFAS No. 160 is effective for our quarterly reporting period ending March 31, 2009. If we were to enter into an arrangement after the effective date of the standard where we are required to consolidate a noncontrolling interest, we would report the noncontrolling interest's equity as a component of our equity in our consolidated balance sheet and report the component of net income or loss and comprehensive income or loss attributable to the noncontrolling interest separately. While certain changes in ownership interests will be treated as equity transactions under the new standard, a gain or loss recognized upon loss of control of a subsidiary will be recognized in the consolidated statement of operations. This practice differs from our current policy of recognizing such gains or losses as a component of equity. In addition, the amount of gain or loss is measured using the fair value of the noncontrolling interest at the date control ceases.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities*. This statement amends SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, by requiring expanded disclosures about an entity's derivative instruments and hedging activities. SFAS No. 161 is effective for our quarterly reporting period ending March 31, 2009. We are in the process of evaluating the impact of this statement on the disclosures included in the notes to our consolidated financial statements.

Financial Condition

Our consolidated assets were \$62.8 billion as of June 30, 2008, which included \$27.3 billion of intangible assets and \$64.3 billion as of December 31, 2007, which included \$28.1 billion of intangible assets. The decrease in our consolidated assets was primarily as a result of the amortization of \$1.4 billion related to our definite lived intangible assets. Our consolidated liabilities were \$41.4 billion as of June 30, 2008 and \$42.2 billion as of December 31, 2007. The decrease in our consolidated liabilities was primarily a result of a \$1.0 billion decrease in our accounts payable. The decrease in accounts payable was primarily a result of a reduction in our obligations relating to capital expenditures, inventory and other items, reflecting lower levels of purchasing activity in the business. See [Liquidity and Capital Resources](#) for additional information on the change in cash and cash equivalents.

Liquidity and Capital Resources

Management exercises discretion regarding the liquidity and capital resource needs of our business segments. This responsibility includes the ability to prioritize the use of capital and debt capacity, to determine cash management policies and to make decisions regarding the timing and amount of capital expenditures.

Table of Contents**Cash Flows**

	Year-to-date June 30,		Change
	2008	2007	
	(in millions)		
Cash provided by operating activities	\$ 3,186	\$ 4,434	(28)%
Cash used in investing activities	(2,851)	(2,732)	4%
Cash provided by (used in) financing activities	888	(1,324)	NM

NM Not Meaningful

At June 30, 2008, cash and cash equivalents were \$3.5 billion as compared to \$2.4 billion as of June 30, 2007.

Operating Activities

Net cash provided by operating activities of \$3.2 billion in the year-to-date period 2008 decreased \$1.2 billion from the year-to-date period 2007, primarily due to a \$1.7 billion decrease in cash received from our customers. This was partially offset by a \$545 million decrease in cash paid to suppliers and employees.

Investing Activities

Net cash used in investing activities for the year-to-date period 2008 increased by \$119 million from the year-to-date period 2007, primarily due to \$866 million in cash collateral received from our securities loan agreements in 2007, partially offset by an increase of \$140 million in proceeds from the sale and maturity of marketable securities. The \$866 million in cash received from our securities loan agreements is fully offset during 2007 by cash used to pay off our securities loan agreement as described in the Financing Activities section below. Capital expenditures decreased \$821 million in 2008 compared to 2007 primarily due to reduced spending in our Wireless segment. This was partially offset by an increase in expenditures relating to FCC licenses of \$210 million.

Financing Activities

Net cash provided by financing activities was \$888 million during the year-to-date period 2008 compared to net cash used in financing activities of \$1.3 billion in the year-to-date period 2007, primarily due to the draw down of \$2.5 billion under our revolving bank credit facility in February 2008 offset by the early redemption of \$1.25 billion of our senior notes in June 2008 and net maturities of commercial paper of \$379 million. In comparison, the year-to-date period 2007 activity included cash outflows of \$866 million to pay off our securities loan agreements, \$611 million towards repayments of debt and capital lease obligations, \$114 million in net commercial paper maturities, \$1.4 billion of common share repurchases and \$144 million of dividends, partially offset by \$750 million in proceeds from our unsecured loan agreement with Export Development Canada, \$750 million in principal from the sale in June 2007 of floating rate notes due 2010 and proceeds from issuance of common shares of \$312 million.

Capital Requirements

We currently anticipate that future funding needs in the next twelve months will principally relate to:

operating expenses relating to our segment operations;

capital expenditures, particularly with respect to the expansion of the coverage and capacity of our wireless networks and the deployment of new technologies in those networks, including plans to build a next generation broadband wireless network;

scheduled debt service requirements;

Table of Contents

amounts required to be expended in connection with the Report and Order;

certain costs of compliance with regulatory mandates; and

other general corporate expenditures.

Liquidity

As of June 30, 2008, our cash, cash equivalents and marketable securities totaled \$3.5 billion. We depend on these funds as well as cash provided by operating activities and cash available under our revolving bank credit facility to satisfy our liquidity needs. Our revolving bank credit facility expires in December 2010 and provides for interest rates equal to the London Interbank Offered Rate, or LIBOR, or prime rate plus a spread that varies depending on our parent company's credit ratings.

In February 2008, we drew down \$2.5 billion under our revolving bank credit facility to repay \$1.25 billion in senior notes, as well as to enhance our financial flexibility in general. As of June 30, 2008, we had \$2.3 billion in letters of credit, including a \$2.2 billion letter of credit required by the Report and Order, outstanding under our \$6.0 billion revolving bank credit facility. As a result of the February draw and the letters of credit, each of which directly reduces the availability of the revolving bank credit facility, we had \$1.2 billion of borrowing capacity available under our revolving bank credit facility as of June 30, 2008.

Our credit facilities limit our total indebtedness and the indebtedness and liens of certain controlled subsidiaries. Specifically, the credit facilities require we maintain a ratio of total indebtedness to trailing four quarter earnings before interest, taxes, depreciation, amortization and certain other nonrecurring charges of no more than 3.5 to 1.0. As of June 30, 2008, the ratio was 2.9 to 1.0 as compared to 2.9 to 1.0 as of March 31, 2008 and 2.5 to 1.0 as of December 31, 2007. Our credit facilities also require that certain indebtedness and liens of our controlled subsidiaries (other than Nextel Communications and Sprint Capital) do not in the aggregate exceed 15% of our consolidated shareholders' equity or about \$3.2 billion as of June 30, 2008. As of June 30, 2008, the relevant controlled subsidiaries had approximately \$500 million in debt and liens subject to this covenant. The maturity dates of the loans under our credit facilities may accelerate if we do not comply with these covenants. We are also obligated to repay the loans if certain change of control events occur.

The indentures that govern our outstanding senior notes also require that we comply with various covenants, including limitations on the incurrence of indebtedness and liens by us and our subsidiaries. A default under our credit facilities could trigger defaults under our other debt obligations, including our senior notes, which in turn could result in the maturities of certain debt obligations being accelerated.

We currently expect to remain in compliance with our covenants for the foreseeable future as we continue to implement cost reduction initiatives and are exploring, and in certain instances engaging in, de-levering and disposition of assets. We do not currently anticipate seeking amendments of such covenants, other than potentially with respect to specific transactions, such as in connection with the Clearwire transaction.

Our ability to fund our capital needs from outside sources is ultimately affected by the overall capacity and terms of the banking and securities markets. Given our recent financial performance as well as the volatility in these markets, we continue to monitor them closely and to take steps to maintain financial flexibility and a reasonable cost of capital.

On February 28, 2008 and May 1, 2008, Fitch Ratings and Standard & Poor's downgraded our rating on senior unsecured debt to BB+ and BB, respectively. These ratings are below investment grade. Moody's Investors Service has rated our senior unsecured debt as Baa3. Downgrades of our current ratings to below

Table of Contents

investment grade do not accelerate scheduled principal payments of our existing debt; however, downgrades may cause us to incur higher interest costs on our borrowings and could negatively impact our access to the public capital markets. Downgrades could also affect our access to the commercial paper market, as terms available may not be attractive to us.

As of June 30, 2008, we had working capital of \$1.8 billion compared to a working capital deficit of \$441 million as of December 31, 2007, with the change primarily due to the \$2.5 billion draw down under our revolving bank credit facility. Approximately half of these proceeds were used to repay \$1.25 billion in senior notes. In addition, during 2008, we reclassified approximately \$250 million in deferred tax assets out of working capital due to the anticipated timing of the realization of those deferred tax benefits. This reclass reduced our long term deferred tax liabilities and our current deferred tax assets. In light of conditions in our business and financial markets, we decided in early 2008 that we will not pay dividends for the foreseeable future.

Future Contractual Obligations

There have been no significant changes to our future contractual obligations as disclosed in our annual report on Form 10-K for the year ended December 31, 2007.

Off-Balance Sheet Financing

We do not participate in, or secure, financings for any unconsolidated, special purpose entities.

Future Outlook

We expect to be able to meet our currently identified funding needs for at least the next 12 months by using:

our anticipated cash flows from operating activities as well as our cash, cash equivalents and marketable securities on hand; and/or

any remaining borrowing capacity available under the revolving bank credit facility.

In making this assessment, we have considered:

anticipated levels of capital expenditures, which are expected to be significantly lower than 2007 levels, and FCC license acquisitions, including funding required in connection with the planned deployment of next generation technologies and the next generation broadband wireless network;

anticipated payments under the Report and Order, as supplemented;

scheduled debt service requirements; and

other future contractual obligations.

If there are material changes in our business plans, or currently prevailing or anticipated economic conditions in any of our markets or competitive practices in the mobile wireless communications industry, or if other presently unexpected circumstances arise that have a material effect on our cash flow or profitability, anticipated cash needs could change significantly.

The conclusion that we expect to meet our funding needs for at least the next 12 months as described above does not take into account:

Edgar Filing: SPRINT NEXTEL CORP - Form 10-Q

any significant acquisition transactions or the pursuit of any significant new business opportunities or spectrum acquisition strategies;

potential material purchases, redemptions or repayments of our long term outstanding debt securities for cash; and

Table of Contents

potential material increases in the cost of compliance with regulatory mandates.

Any of these events or circumstances could involve significant additional funding needs in excess of anticipated cash flows from operating activities and the identified currently available funding sources, including existing cash on hand, borrowings available under our existing revolving bank credit facility and our commercial paper program. If existing capital resources are not sufficient to meet these funding needs, it would be necessary to raise additional capital to meet those needs. Our ability to raise additional capital on both a short-term and long-term basis, if necessary, is subject to a variety of additional factors that cannot currently be predicted with certainty, including:

the commercial success of our operations;

the volatility and demand of the capital markets; and

the market prices of our securities.

We expect our longer term funding needs after the next 12 months will be met through a combination of cash, cash equivalents and marketable securities as well as our cash flows and other sources potentially including existing or new credit facilities, commercial paper or sales of our securities. However, because of uncertainties relating to our business, the telecommunications industry in general and the overall credit markets, as well as other factors, we are currently unable to identify specific sources to meet our liquidity needs over the longer term. We expect to have sufficient cash on hand to operate our business and repay all of our scheduled debt maturities through at least the end of 2009.

We have in the past and may in the future have discussions with third parties regarding potential sources of new capital to satisfy actual or anticipated financing needs. At present, other than the existing arrangements that have been described in this report, we have no legally binding commitments or understandings with any third parties to obtain any material amount of additional capital. The above discussion is subject to the risks and other cautionary and qualifying factors set forth under *Forward-Looking Statements* and in Part I, Item 1A *Risk Factors* in our annual report on Form 10-K for the year ended December 31, 2007.

Financial Strategies

General Risk Management Policies

We primarily use derivative instruments for hedging and risk management purposes. Hedging activities may be done for various purposes, including, but not limited to, mitigating the risks associated with an asset, liability, committed transaction or probable forecasted transaction. We seek to minimize counterparty credit risk through stringent credit approval and review processes, credit support agreements, continual review and monitoring of all counterparties, and thorough legal review of contracts. We also control exposure to market risk by regularly monitoring changes in hedge positions under normal and stress conditions to ensure they do not exceed established limits.

Our board of directors has adopted a financial risk management policy that authorizes us to enter into derivative transactions, and all transactions comply with the policy. We do not purchase or hold any derivative financial instruments for speculative purposes with the exception of equity rights obtained in connection with commercial agreements or strategic investments, usually in the form of warrants to purchase common shares.

Item 3. *Quantitative and Qualitative Disclosures About Market Risk*

We are primarily exposed to the market risk associated with unfavorable movements in interest rates, foreign currencies and equity prices. The risk inherent in our market risk sensitive instruments and positions is the potential loss arising from adverse changes in those factors. There have been no material changes to our market risk policies or our market risk sensitive instruments and positions as described in our annual report on Form 10-K for the year ended December 31, 2007.

Table of Contents

**Item 4. *Controls and Procedures*
Evaluation of Disclosure Controls and Procedures**

Disclosure controls are procedures that are designed with the objective of ensuring that information required to be disclosed in our reports under the Securities Exchange Act of 1934, such as this Form 10-Q, is reported in accordance with the SEC's rules. Disclosure controls are also designed with the objective of ensuring that such information is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

In connection with the preparation of this Form 10-Q as of June 30, 2008, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures. Based on this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the design and operation of the disclosure controls and procedures were effective as of June 30, 2008, in providing reasonable assurance that information required to be disclosed in reports we file or submit under the Securities Exchange Act of 1934 is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure and in providing reasonable assurance that the information is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

We continue to update our internal control over financial reporting as necessary to accommodate any modifications to our business processes, changes due to our reorganization, or changes in our accounting procedures. During the second quarter 2008, we migrated certain customers onto a single billing platform and converted portions of our handset inventory onto a new inventory platform. There have been no other changes in our internal control over financial reporting that occurred during the second quarter 2008 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

A number of cases that allege Sprint Communications Company L.P. failed to obtain easements from property owners during the installation of its fiber optic network in the 1980 s have been filed in various courts. Several of these cases sought certification of nationwide classes, and in one case, a nationwide class was certified. In 2003, a nationwide settlement of these claims was approved by the U.S. District Court for the Northern District of Illinois, but objectors appealed the preliminary approval order to the Seventh Circuit Court of Appeals, which overturned the settlement and remanded the case to the trial court for further proceedings. The parties now are proceeding with litigation and/or settlement negotiations on a state by state basis, and settlement negotiations have been coordinated in all cases but those pending in Louisiana and Tennessee. The Louisiana claims have been separately settled for an amount not material to us, and that settlement was given final approval by the Court, and the time to appeal that approval has expired. We have reached an agreement in principle to settle the claims in all the other states, excluding Tennessee, for an amount not material to us, and the settlement is subject to approval by the Court.

We are involved in certain other legal proceedings that are described in note 9 of the Notes to Consolidated Financial Statements included in this report. During the quarter ended June 30, 2008, there were no material developments in the status of these legal proceedings.

Various other suits, proceedings and claims, including purported class actions typical for a large business enterprise, are pending against us or our subsidiaries. While it is not possible to determine the ultimate disposition of each of these proceedings and whether they will be resolved consistent with our beliefs, we expect that the outcome of such proceedings, individually or in the aggregate, will not have a material adverse effect on our financial condition or results of operations.

Item 1A. Risk Factors

The only material change to our risk factors as described in our annual report on Form 10-K for the year ended December 31, 2007 is to add the following:

Our agreement to combine our next generation broadband business with Clearwire is subject to numerous conditions, many of which are beyond our control. If the proposed transaction fails to close, we will need to explore strategic options and/or seek funding to deploy our next generation broadband network.

We have entered into an agreement with Clearwire to combine our next generation broadband businesses. In addition, six other parties have agreed to invest \$3.2 billion in the combined entity. The transaction is subject to numerous closing conditions, many of which are beyond our control, including:

approval by Clearwire s stockholders;

receipt of regulatory approvals including approval by the FCC; and

compliance with covenants regarding the spectrum and other assets to be contributed to the combined business.

There can be no assurance of receipt of necessary approvals, or that other conditions to closing will be satisfied. If the transaction does not close, we will need to explore strategic options and/or seek funding to deploy our next generation broadband network. There can be no assurance that we could obtain funding to deploy the network in a timely manner or at all.

Item 4. Submission of Matters to a Vote of Security Holders

On May 13, 2008, we held our annual meeting of shareholders in Reston, Virginia. Only shareholders of record as of March 14, 2008 were entitled to vote at the annual meeting.

In addition to electing nine directors to serve a term of one year and ratifying the appointment of KPMG LLP as our independent registered public accounting firm for 2008, the shareholders rejected a shareholder proposal.

As of the record date, the following shares were outstanding and entitled to vote:

	Outstanding	Votes per Share
Series 1 common stock	2,774,213,326	1.0000
Series 2 common stock	74,831,333	0.1000

The following votes were cast for the election of each director to serve on our board for a term of one year until the 2009 annual meeting or until a successor has been elected and qualified.

	For	Against
Robert R. Bennett	2,382,553,794	95,034,956
Gordon M. Bethune	2,219,761,718	257,500,573
Larry C. Glasscock	2,430,177,373	47,251,402
James H. Hance, Jr.	2,378,454,329	99,137,852
Daniel R. Hesse	2,438,656,040	39,404,416
V. Janet Hill	2,220,687,933	256,857,830
Irvine O. Hockaday, Jr.	2,267,952,086	186,147,209
Rodney O Neal	2,423,671,955	54,043,690
Ralph V. Whitworth	2,452,742,143	24,055,308

The following votes were cast with respect to the proposal to ratify the appointment of KPMG LLP as our independent registered public accounting firm for 2008:

For	2,462,350,009
Against	15,350,454
Abstain	20,141,803

The following votes were cast with respect to a shareholder proposal concerning shareholder rights to call special meetings of shareholders:

For	898,891,665
Against	1,338,186,747
Abstain	22,389,832

Broker Non-Votes
