UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934

For the Quarterly Period Ended September 30, 2008

Commission File Number 001-33653

(Exact name of Registrant as specified in its charter)

Ohio
(State or other jurisdiction of
incorporation or organization)

Fifth Third Center

31-0854434
(I.R.S. Employer
Identification Number)

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

Cincinnati, Ohio 45263

(Address of principal executive offices)

Registrant's telephone number, including area code: (513) 534-5300

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Non-accelerated filer

Accelerated filer

Smaller reporting company

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

There were 577,486,544 shares of the Registrant's Common Stock, without par value, outstanding as of September 30, 2008.

This report may contain forward-looking statements about Fifth Third Bancorp and/or the company as combined acquired entities within the meaning of Sections 27A of the Securities Act of 1933, as amended, and Rule 175 promulgated thereunder, and 21E of the Securities Exchange Act of 1934, as amended, and Rule 3b-6 promulgated thereunder, that involve inherent risks and uncertainties. This report may contain certain forward-looking statements with respect to the financial condition, results of operations, plans, objectives, future performance and business of Fifth Third Bancorp and/or the combined company including statements preceded by, followed by or that include the words or phrases such as "believes," "expects," "anticipates," "plans," "trend," "objective," "continue," "remain" or similar expressions or future or conditional verbs such as "should," "could," "might," "can," "may" or similar expressions. There are a number of important factors that could cause future results to differ materially from historical performance and these forward-looking statements. Factors that might cause such a difference include, but are not limited to: (1) general economic conditions and weakening in the economy, specifically the real estate market, either national or in the states in which Fifth Third, one or more acquired entities and/or the combined company do business, are less favorable than expected; (2) deteriorating credit quality; (3) political developments, wars or other hostilities may disrupt or increase volatility in securities markets or other economic conditions; (4) changes in the interest rate environment reduce interest margins; (5) prepayment speeds, loan origination and sale volumes, charge-offs and loan loss provisions; (6) Fifth Third's ability to maintain required capital levels and adequate sources of funding and liquidity; (7) changes and trends in capital markets; (8) competitive pressures among depository institutions increase significantly; (9) effects of critical accounting policies and judgments; (10) changes in accounting policies or procedures as may be required by the Financial Accounting Standards Board ("FASB") or other regulatory agencies; (11) legislative or regulatory changes or actions, or significant litigation, adversely affect Fifth Third, one or more acquired entities and/or the combined company or the businesses in which Fifth Third, one or more acquired entities and/or the combined company are engaged; (12) ability to maintain favorable ratings from rating agencies; (13) fluctuation of Fifth Third's stock price; (14) ability to attract and retain key personnel; (15) ability to receive dividends from its subsidiaries; (16) potentially dilutive effect of future acquisitions on

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

current shareholders' ownership of Fifth Third; (17) effects of accounting or financial results of one or more acquired entities; (18) difficulties in combining the operations of acquired entities; (19) inability to generate the gains on sale and related increase in shareholders' equity that it anticipates from the sale of certain non-core businesses, (20) loss of income from the sale of certain non-core businesses could have an adverse effect on Fifth Third's earnings and future growth (21) ability to secure confidential information through the use of computer systems and telecommunications networks; (22) the impact of reputational risk created by these developments on such matters as business generation and retention, funding and liquidity; and (23) the Treasury providing satisfactory definitive documentation for its purchase of senior preferred shares and agreement on final terms and conditions. Additional information concerning factors that could cause actual results to differ materially from those expressed or implied in the forward-looking statements is available in the Bancorp's Annual Report on Form 10-K for the year ended December 31, 2007, filed with the U.S. Securities and Exchange Commission (SEC). Copies of this filing are available at no cost on the SEC's website at www.sec.gov or on Fifth Third's website at www.53.com. Fifth Third undertakes no obligation to release revisions to these forward-looking statements or reflect events or circumstances after the date of this report.

Table of Contents**Management's Discussion and Analysis of Financial Condition and Results of Operations (Item 2)**

The following is management's discussion and analysis of certain significant factors that have affected Fifth Third Bancorp's (Bancorp or Fifth Third) financial condition, results of operations and cash flows during the periods included in the Condensed Consolidated Financial Statements, which are a part of this filing. Reference to the Bancorp incorporates the parent holding company and all consolidated subsidiaries.

Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

OVERVIEW

This overview of management's discussion and analysis highlights selected information in the financial results of the Bancorp and may not contain all of the information that is important to you. For a more complete understanding of trends, events, commitments, uncertainties, liquidity, capital resources and critical accounting policies and estimates, you should carefully read this entire document. Each of these items could have an impact on the Bancorp's financial condition, results of operations and cash flows.

The Bancorp is a diversified financial services company headquartered in Cincinnati, Ohio. At September 30, 2008, the Bancorp had \$116.3 billion in assets, operated 18 affiliates with 1,298 full-service Banking Centers including 93 Bank Mart[®] locations open seven days a week inside select grocery stores and 2,329 Jeanie[®] ATMs in the Midwestern and Southeastern regions of the United States. The Bancorp reports on five business segments: Commercial Banking, Branch Banking, Consumer Lending, Fifth Third Processing Solutions (FTPS) and Investment Advisors.

The Bancorp believes that banking is first and foremost a relationship business where the strength of the competition and challenges for growth can vary in every market. Its affiliate operating model provides a competitive advantage by keeping the decisions close to the customer and by emphasizing individual relationships. Through its affiliate operating model, individual managers from the banking center to the executive level are given the opportunity to tailor financial solutions for their customers.

The Bancorp's revenues are dependent on both net interest income and noninterest income. For the three months ended September 30, 2008, net interest income, on a fully taxable equivalent (FTE) basis, and noninterest income provided 60% and 40% of total revenue, respectively. Changes in interest rates, credit quality, economic trends and the capital markets are primary factors that drive the performance of the Bancorp. As discussed later in the Risk Management section, risk identification, measurement, monitoring, control and reporting are important to the management of risk and to the financial performance and capital strength of the Bancorp.

Net interest income is the difference between interest income earned on assets such as loans, leases and securities, and interest expense incurred on liabilities such as deposits, short-term borrowings and long-term debt. Net interest income is affected by the general level of interest rates, the relative level of short-term and long-term interest rates, changes in interest rates and changes in the amount and composition of interest-earning assets and interest-bearing liabilities. Generally, the rates of interest the Bancorp earns on its assets and pays on its liabilities are established for a period of time. The change in market interest rates over time exposes the Bancorp to interest rate risk through potential adverse changes to net interest income and financial position. The Bancorp manages this risk by continually analyzing and adjusting the composition of its assets and liabilities based on their payment streams and interest rates, the timing of their maturities and their sensitivity to changes in market interest rates. Additionally, in the ordinary course of business, the Bancorp enters into certain derivative transactions as part of its overall strategy to manage its interest rate and prepayment risks. The Bancorp is also exposed to the risk of losses on its loan and lease portfolio as a result of changing expected cash flows caused by loan defaults and inadequate collateral due to a weakening economy within the Bancorp's footprint.

Net interest income, net interest margin, net interest rate spread and the efficiency ratio are presented in Management's Discussion and Analysis of Financial Condition and Results of Operations on an FTE basis. The FTE basis adjusts for the tax-favored status of income from certain loans and securities held by the Bancorp that are not taxable for federal income tax purposes. The Bancorp believes this presentation to be the preferred industry measurement of net interest income as it provides a relevant comparison between taxable and non-taxable amounts.

Noninterest income is derived primarily from electronic funds transfer (EFT) and merchant transaction processing fees, card interchange, fiduciary and investment management fees, corporate banking revenue, service charges on deposits and mortgage banking revenue. Noninterest expense is primarily driven by personnel costs and occupancy expenses, in addition to expenses incurred in the processing of credit and debit card transactions for its customers and merchant and financial institution clients.

Earnings Summary

During the third quarter of 2008, the Bancorp continued to be affected by the economic slowdown and market disruptions. The Bancorp's net loss was \$81 million, or \$.14 per diluted share, which included \$25 million in preferred stock dividends. Net income was \$325 million, or \$.61 per diluted share, for the same period last year. Results for both periods reflect a number of significant items.

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

Items affecting the third quarter of 2008 include:

\$226 million of net interest income due to the accretion of purchase accounting adjustments related to the second quarter acquisition of First Charter Corporation (First Charter);

\$76 million of noninterest income, offset by \$36 million in related litigation expense, from the resolution of a court case related to goodwill created in the 1998 acquisition of CitFed (the CitFed litigation);

\$51 million reduction to noninterest income due to other than temporary impairment charges on Federal National Mortgage Association (FNMA) and Federal Home Loan Mortgage Corporation (FHLMC) preferred stock;

Table of Contents

Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

\$27 million reduction to noninterest income to lower the cash surrender value of one of the Bancorp's Bank Owned Life Insurance (BOLI) policies; and

\$45 million of noninterest expense related to Visa's pending litigation settlement with Discover.
For comparison purposes, items affecting the third quarter of 2007 include:

\$16 million of noninterest income from the sale of non-strategic credit card accounts;

\$15 million of other noninterest income from the sale of FDIC deposit insurance credits; and

\$78 million of other noninterest expense relating to the Visa settlement with American Express.

Excluding the items above, net income decreased \$596 million from the third quarter of 2007, due to an increase of \$802 million in the provision for loan and lease losses over the same time period. Overall, trends in net interest income and noninterest income remain positive as net interest income and noninterest income both increased 11% compared to the same quarter in the prior year.

Net interest income (FTE) increased to \$1.1 billion, from \$760 million in the same period last year. This growth directly reflects the benefit from the accretion of purchase accounting adjustments related to the second quarter acquisition of First Charter totaling \$226 million, and was also driven by average earning asset growth of 11%. Net interest margin was 4.24% in the third quarter of 2008, an increase of 90 basis points (bp) from the third quarter of 2007.

Noninterest income increased five percent, from \$681 million to \$717 million, over the same quarter last year. The increase in noninterest income was impacted by growth in mortgage banking revenues of 74% and in service charges on deposits of 13% since the third quarter of 2007. The aforementioned gain of \$76 million from the resolution of litigation relating to goodwill offset the FNMA and FHLMC other than temporary impairment charges and reduction to the cash surrender value of one of the Bancorp's BOLI policies.

Noninterest expense increased \$114 million, or 13%, compared to the third quarter of 2007. Noninterest expense in the third quarter of 2008 included the \$45 million related to Visa's pending settlement with Discover mentioned above, and \$36 million related to the resolution of the CitFed litigation. Noninterest expense in the third quarter of 2007 included the \$78 million related to Visa's settlement with American Express. The growth in noninterest expense can also be attributed to increases in loan and lease processing costs from higher collection activities costs over the past year along with increased volume-related processing expenses.

The Bancorp maintains a conservative approach to both lending and investing activities as it does not originate subprime loans, does not hold credit default swaps, nor does it hold asset-backed securities backed by subprime loans in its securities portfolio. However, the Bancorp has exposure to the housing markets, which continued to weaken during the third quarter of 2008, particularly in the upper Midwest and Florida. Consequently, the provision for loan and lease losses increased to \$941 million for the three months ended September 30, 2008 compared to \$139 million during the third quarter of 2007. In addition, net charge-offs as a percent of average loans and leases were 2.17% in the third quarter of 2008 compared to .60% in the third quarter of 2007. At September 30, 2008, nonperforming assets as a percent of loans, leases and other assets, including other real estate owned increased to 3.30% from .92% at September 30, 2007. Refer to the Credit Risk Management section in Management's Discussion and Analysis for more information on credit quality.

In response to the current economic operating environment and uncertain future trends, the Bancorp continues to strengthen its capital position. During the second quarter of 2008, management raised its capital target to an eight to nine percent Tier 1 capital ratio. The Bancorp's capital ratios exceed the well-capitalized guidelines as defined by the Board of Governors of the Federal Reserve System (FRB). As of September 30, 2008, the Tier 1 capital ratio was 8.57%, the Tier 1 leverage ratio was 8.77% and the total risk-based capital ratio was 12.30%. On October 28,

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

2008, the Bancorp received approval for participation in the U.S. Treasury Capital Purchase Program. As a result, the Bancorp expects to receive approximately \$3.45 billion and issue senior preferred stock and warrants under the terms of the program. The Bancorp currently has senior debt ratings of A1 from Moody's, A+ from Standard & Poor's, A from Fitch Ratings and AAL from DBRS Ltd., which indicate the Bancorp's strong capacity to meet financial commitments. * Additional information on credit ratings is as follows:

Moody's A1 rating is considered upper-medium-grade obligations and is the third highest ranking within its overall classification system;

Standard & Poor's A+ rating indicates the obligor's capacity to meet its financial commitment is STRONG and is the third highest ranking within its overall classification system;

Fitch Ratings A rating is considered high credit quality and is the third highest ranking within its overall classification system; and

DBRS Ltd.'s AAL rating is considered superior credit quality and is the second highest ranking within its overall classification system.

* As an investor, you should be aware that a security rating is not a recommendation to buy, sell or hold securities, that it may be subject to revision or withdrawal at any time by the assigning rating organization, and that each rating should be evaluated independently of any other rating.

Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

RECENT ACCOUNTING STANDARDS

Note 2 of the Notes to Condensed Consolidated Financial Statements provides a discussion of the significant new accounting standards adopted by the Bancorp during 2008 and 2007 and the expected impact of significant accounting standards issued but not yet required to be adopted.

CRITICAL ACCOUNTING POLICIES

The Bancorp's Condensed Consolidated Financial Statements are prepared in accordance with accounting principles generally accepted in the United States of America. Certain accounting policies require management to exercise judgment in determining methodologies, economic assumptions and estimates that may materially affect the value of the Bancorp's assets or liabilities and results of operations and cash flows. The Bancorp has five critical accounting policies, which include the accounting for allowance for loan and lease losses, reserve for unfunded commitments, income taxes, valuation of servicing rights and fair value measurements.

Allowance for Loan and Lease Losses

The Bancorp maintains an allowance to absorb probable loan and lease losses inherent in the portfolio. The allowance is maintained at a level the Bancorp considers to be adequate and is based on ongoing quarterly assessments and evaluations of the collectibility and historical loss experience of loans and leases. Credit losses are charged and recoveries are credited to the allowance. Provisions for loan and lease losses are based on the Bancorp's review of the historical credit loss experience and such factors that, in management's judgment, deserve consideration under existing economic conditions in estimating probable credit losses. In determining the appropriate level of the allowance, the Bancorp estimates losses using a range derived from base and conservative estimates. The Bancorp's strategy for credit risk management includes a combination of conservative exposure limits significantly below legal lending limits and conservative underwriting, documentation and collections standards. The strategy also emphasizes diversification on a geographic, industry and customer level, regular credit examinations and quarterly management reviews of large credit exposures and loans experiencing deterioration of credit quality.

Larger commercial loans that exhibit probable or observed credit weakness are subject to individual review. When individual loans are impaired, allowances are allocated based on management's estimate of the borrower's ability to repay the loan given the availability of collateral and other sources of cash flow, as well as an evaluation of legal options available to the Bancorp. The review of individual loans includes those loans that are impaired as provided in Statement of Financial Standards (SFAS) No. 114, Accounting by Creditors for Impairment of a Loan. Any allowances for impaired loans are measured based on the present value of expected future cash flows discounted at the loan's effective interest rate or the fair value of the underlying collateral. The Bancorp evaluates the collectibility of both principal and interest when assessing the need for a loss accrual. Historical loss rates are applied to commercial loans, which are not impaired and thus not subject to specific allowance allocations. The loss rates are derived from a migration analysis, which tracks the historical net charge-off experience sustained on loans according to their internal risk grade. The risk grading system currently utilized for allowance analysis purposes encompasses ten categories.

Homogenous loans and leases, such as consumer installment and residential mortgage, are not individually risk graded. Rather, standard credit scoring systems and delinquency monitoring are used to assess credit risks. Allowances are established for each pool of loans based on the expected net charge-offs. Loss rates are based on the average net charge-off history by loan category. Historical loss rates for commercial and consumer loans may be adjusted for significant factors that, in management's judgment, are necessary to reflect losses inherent in the portfolio. Factors that management considers in the analysis include the effects of the national and local economies; trends in the nature and volume of delinquencies, charge-offs and nonaccrual loans; changes in mix; credit score migration comparisons; asset quality trends; risk management and loan administration; changes in the internal lending policies and credit standards; collection practices; and examination results from bank regulatory agencies and the Bancorp's internal credit examiners.

The Bancorp's current methodology for determining the allowance for loan and lease losses is based on historical loss rates, current credit grades, specific allocation on impaired commercial credits above specified thresholds and other qualitative adjustments. Allowances on individual loans and historical loss rates are reviewed quarterly and adjusted as necessary based on changing borrower and/or collateral conditions and actual collection and charge-off experience. An unallocated allowance is maintained to recognize the imprecision in estimating and measuring loss when evaluating allowances for individual loans or pools of loans.

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

Loans acquired by the Bancorp through a purchase business combination are evaluated for credit impairment at acquisition. Reductions to the carrying value of the acquired loans as a result of credit impairment are recorded as an adjustment to goodwill. The Bancorp does not carry over the acquired company's allowance for loan and lease losses, nor does the Bancorp add to its existing allowance for the acquired loans as part of purchase accounting.

The Bancorp's determination of the allowance for commercial loans is sensitive to the risk grade it assigns to these loans. In the event that 10% of commercial loans in each risk category would experience a downgrade of one risk category, the allowance for

Table of Contents

Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

commercial loans would increase by approximately \$125 million at September 30, 2008. The Bancorp's determination of the allowance for residential and retail loans is sensitive to changes in estimated loss rates. In the event that estimated loss rates would increase by 10%, the allowance for residential and consumer loans would increase by approximately \$71 million at September 30, 2008. As several quantitative and qualitative factors are considered in determining the allowance for loan and lease losses, these sensitivity analyses do not necessarily reflect the nature and extent of future changes in the allowance for loan and lease losses. They are intended to provide insights into the impact of adverse changes in risk grades and estimated loss rates and do not imply any expectation of future deterioration in the risk ratings or loss rates. Given current processes employed by the Bancorp, management believes the risk grades and estimated loss rates currently assigned are appropriate.

The Bancorp's primary market areas for lending are the Midwestern and Southeastern regions of the United States. When evaluating the adequacy of allowances, consideration is given to these regional geographic concentrations and the closely associated effect changing economic conditions have on the Bancorp's customers.

In the current year, the Bancorp has not substantively changed any material aspect of its overall approach to determining its allowance for loan and lease losses. There have been no material changes in criteria or estimation techniques as compared to prior periods that impacted the determination of the current period allowance for loan and lease losses.

Reserve for Unfunded Commitments

The reserve for unfunded commitments is maintained at a level believed by management to be sufficient to absorb estimated probable losses related to unfunded credit facilities. The determination of the adequacy of the reserve is based upon an evaluation of the unfunded credit facilities, including an assessment of historical commitment utilization experience, credit risk grading and credit grade migration. Net adjustments to the reserve for unfunded commitments are included in other noninterest expense in the Condensed Consolidated Statements of Income.

Income Taxes

The Bancorp estimates income tax expense based on amounts expected to be owed to the various tax jurisdictions in which the Bancorp conducts business. On a quarterly basis, management assesses the reasonableness of its effective tax rate based upon its current estimate of the amount and components of net income, tax credits and the applicable statutory tax rates expected for the full year. The estimated income tax expense is recorded in the Condensed Consolidated Statements of Income.

Deferred income tax assets and liabilities are determined using the balance sheet method. Under this method, the net deferred tax asset or liability is based on the tax effects of the differences between the book and tax basis of assets and liabilities and recognizes enacted changes in tax rates and laws. Deferred tax assets are recognized to the extent they exist and are subject to a valuation allowance based on management's judgment that realization is more-likely-than-not. Deferred taxes are reported in accrued taxes, interest and expenses in the Condensed Consolidated Balance Sheets.

Accrued taxes represent the net estimated amount due to taxing jurisdictions and are reported in accrued taxes, interest and expenses in the Condensed Consolidated Balance Sheets. The Bancorp evaluates and assesses the relative risks and appropriate tax treatment of transactions and filing positions after considering statutes, regulations, judicial precedent and other information and maintains tax accruals consistent with its evaluation of these relative risks and merits. Changes to the estimate of accrued taxes occur periodically due to changes in tax rates, interpretations of tax laws, the status of examinations being conducted by taxing authorities and changes to statutory, judicial and regulatory guidance that impact the relative risks of tax positions. These changes, when they occur, can affect deferred taxes and accrued taxes as well as the current period's income tax expense and can be significant to the operating results of the Bancorp. As described in greater detail in Note 9 of the Notes to Condensed Consolidated Financial Statements, the Internal Revenue Service (IRS) is currently challenging the Bancorp's tax treatment of certain leasing transactions. For additional information on income taxes, see Note 11 of the Notes to Condensed Consolidated Financial Statements.

Valuation of Servicing Rights

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

When the Bancorp sells loans through either securitizations or individual loan sales in accordance with its investment policies, it often obtains servicing rights. Servicing rights resulting from loan sales are initially recorded at fair value and subsequently amortized in proportion to, and over the period of, estimated net servicing income. Servicing rights are assessed for impairment monthly, based on fair value, with temporary impairment recognized through a valuation allowance and permanent impairment recognized through a write-off of the servicing asset and related valuation allowance. Key economic assumptions used in measuring any potential impairment of the servicing rights include the prepayment speeds of the underlying loans, the weighted-average life, the discount rate, the weighted-average coupon and the weighted-average default rate, as applicable. The primary risk of material changes to the value of the servicing rights resides in the potential volatility in the economic assumptions used, particularly the prepayment speeds.

The Bancorp monitors risk and adjusts its valuation allowance as necessary to adequately reserve for any probable impairment in the servicing portfolio. For purposes of measuring impairment, the servicing rights are stratified into classes based on the financial asset type and interest rates. Fees received for servicing loans owned by investors are based on a percentage of the outstanding monthly principal balance of such loans and are included in noninterest income as loan payments are received. Costs of servicing loans are charged to expense as incurred.

Table of Contents**Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)**

The change in the fair value of mortgage servicing rights (MSRs) at September 30, 2008 due to immediate 10% and 20% adverse changes in the current prepayment assumption would be approximately \$30 million and \$58 million, respectively, and due to immediate 10% and 20% favorable changes in the current prepayment assumption would be approximately \$33 million and \$69 million, respectively. The change in the fair value of the MSR portfolio at September 30, 2008 due to immediate 10% and 20% adverse changes in the discount rate assumption would be approximately \$26 million and \$50 million, respectively, and due to immediate 10% and 20% favorable changes in the discount rate assumption would be approximately \$28 million and \$58 million, respectively. The sensitivity analysis related to other consumer and commercial servicing rights is not material to the Bancorp's Condensed Consolidated Financial Statements. These sensitivities are hypothetical and should be used with caution. As the figures indicate, changes in fair value based on a 10% and 20% variation in assumptions typically cannot be extrapolated because the relationship of the change in assumptions to the change in fair value may not be linear. Also, the effect of variation in a particular assumption on the fair value of the interests that continue to be held by the transferor is calculated without changing any other assumption; in reality, changes in one factor may result in changes in another, which might magnify or counteract the sensitivities. Additionally, the effect of the Bancorp's non-qualifying hedging strategy, which is maintained to lessen the impact of changes in value of the MSR portfolio, is excluded from the above analysis.

Fair Value Measurements

Effective January 1, 2008, the Bancorp adopted SFAS No. 157, *Fair Value Measurements*, which provides a framework for measuring fair value under accounting principles generally accepted in the United States of America. SFAS No. 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SFAS No. 157 addresses the valuation techniques used to measure fair value. These valuation techniques include the market approach, income approach and cost approach. The market approach uses prices or relevant information generated by market transactions involving identical or comparable assets or liabilities. The income approach involves converting future amounts to a single present amount. The measurement is valued based on current market expectations about those future amounts. The cost approach is based on the amount that currently would be required to replace the service capacity of the asset.

SFAS No. 157 establishes a fair value hierarchy, which prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the instrument's fair value measurement. The three levels within the fair value hierarchy are described as follows:

Level 1 Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Bancorp has the ability to access at the measurement date.

Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include: quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; inputs other than quoted prices that are observable for the asset or liability; and inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 Unobservable inputs for the asset or liability for which there is little, if any, market activity at the measurement date. Unobservable inputs reflect the Bancorp's own assumptions about what market participants would use to price the asset or liability. The inputs are developed based on the best information available in the circumstances, which might include the Bancorp's own financial data such as internally developed pricing models, discounted cash flow methodologies, as well as instruments for which the fair value determination requires significant management judgment.

The Bancorp measures financial assets and liabilities at fair value in accordance with SFAS No. 157. These measurements involve various valuation techniques and models, which involve inputs that are observable, when available, and include the following significant financial instruments: available-for-sale securities, residential mortgage loans held for sale and certain derivatives. The following is a summary of valuation techniques utilized by the Bancorp for its significant financial assets and liabilities measured at fair value on a recurring basis.

Available-for-sale securities

Where quoted prices are available in an active market, securities are classified within Level 1 of the valuation hierarchy. If quoted market prices are not available, then fair values are estimated using pricing models, quoted prices of securities with similar characteristics, or discounted cash flows and classified within Level 2 of the fair value hierarchy. In certain cases where there is limited activity or less transparency around inputs to the valuation, securities are classified within Level 3 of the valuation hierarchy. A significant portion of the Bancorp's available-for-sale securities are agency mortgage-backed securities that are fair valued using a market approach and the Bancorp has determined them to be Level 2 in the fair value hierarchy.

Table of Contents

Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

Residential mortgage loans held for sale

For residential mortgage loans held for sale, fair value is estimated based upon mortgage backed securities prices and spreads to those prices or, for certain assets, discounted cash flow models that may incorporate the anticipated portfolio composition, credit spreads of asset-backed securities with similar collateral, and market conditions. Residential mortgage loans held for sale are fair valued using a market approach and the Bancorp has determined them to be Level 2 in the fair value hierarchy.

Derivatives

Exchange-traded derivatives valued using quoted prices are classified within Level 1 of the valuation hierarchy. However, few classes of derivative contracts are listed on an exchange. Derivative positions that are valued utilizing models that use as their basis readily observable market parameters are classified within Level 2 of the valuation hierarchy. Derivatives that are valued based upon models with significant unobservable market parameters are classified within Level 3 of the valuation hierarchy. A majority of the derivatives are fair valued using an income approach and the Bancorp has determined them to be Level 2 in the fair value hierarchy.

Valuation techniques and models utilized for measuring financial assets and liabilities are reviewed and validated by the Bancorp on a quarterly basis. Additionally, the Bancorp monitors the fair values of significant assets and liabilities using a variety of methods including the evaluation of pricing runs and exception reports based on certain analytical criteria, comparison to previous trades, and overall review and assessments for reasonableness.

Other significant areas include purchase price allocations and the analysis of potential impairment of goodwill. No material changes have been made during the nine months ended September 30, 2008 to the valuation techniques or models described previously.

Table of Contents**Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****STATEMENTS OF INCOME ANALYSIS****Net Interest Income**

Net interest income is the interest earned on debt securities, loans and leases (including yield-related fees) and other interest-earning assets less the interest paid for core deposits (includes transaction deposits and other time deposits) and wholesale funding (includes certificates \$100,000 and over, other foreign office deposits, federal funds purchased, short-term borrowings and long-term debt). The net interest margin is calculated by dividing net interest income by average interest-earning assets. Net interest spread is the difference between the average rate earned on interest-earning assets and the average rate paid on interest-bearing liabilities. Net interest margin is typically greater than net interest rate spread due to the interest income earned on those assets that are funded by non-interest-bearing liabilities, or free funding, such as demand deposits or shareholders' equity.

Net interest income (FTE) was \$1.1 billion for the third quarter of 2008, compared to \$760 million earned in the third quarter of 2007 and \$744 million in the second quarter of 2008. Net interest income was affected by the amortization and accretion of premiums and discounts on acquired loans and deposits that increased interest income by \$226 million during the third quarter of 2008, compared to a decrease of less than \$1 million for the third quarter of 2007 and an increase of \$39 million during the second quarter of 2008. Additionally, the sequential comparison is affected by the recalculation of cash flows on certain leveraged leases that reduced interest income on commercial leases during the second quarter of 2008 by approximately \$130 million. Exclusive of the items above, net interest income increased \$83 million compared to the third quarter of 2007 and \$8 million compared to the second quarter of 2008. This increase from the third quarter of 2007 resulted from a 10% increase in average loan and lease balances combined with a 33 bp increase in net interest spread. Sequentially, net interest income was modestly higher as increases in earning assets offset higher short-term borrowing costs.

Reported net interest margin was 4.24% in the third quarter of 2008, compared to 3.34% in the third quarter of 2007 and 3.04% in the second quarter of 2008. Net interest margin was affected by the amortization and accretion of premiums and discounts on acquired loans and deposits that increased net interest margin approximately 90 bp in the third quarter of 2008 and 16 bp in the second quarter of 2008. Second quarter 2008 net interest margin was also affected by the recalculation of cash flows on certain leveraged leases, which decreased net interest margin approximately 53 bp. Exclusive of the adjustments above, net interest margin was flat on a year-over-year basis as widening credit spreads were offset by a greater concentration in lower yielding commercial loans. Sequentially, net interest margin modestly decreased as increased loan spreads were offset by higher nonaccrual balances and increased market rates on short-term funding.

Total average interest-earning assets increased 11% from the third quarter of 2007 and increased two percent on a sequential basis. On a year-over-year basis, average total commercial loans increased 20% and the investment portfolio increased 19%, while consumer loans decreased three percent. Commercial mortgage and commercial construction loans increased primarily as a result of acquisitions during the past year. Commercial and industrial loans increased due to the origination for portfolio of investment grade loans that historically were sold to the Bancorp's off balance sheet commercial paper conduit, coupled with the use of contingent liquidity facilities related to certain off-balance sheet programs that were drawn upon in the third quarter of 2008. Sequentially, increases in loans and leases due to the full quarter effect of the First Charter acquisition, particularly in commercial mortgage, commercial construction and home equity balances, were offset by overall decreases in loan production. Increases in the investment portfolio relate to the Bancorp's overall balance sheet growth and the purchase of securities as part of the Bancorp's non-qualifying hedging strategy related to mortgage servicing rights.

Interest income (FTE) from loans and leases increased \$3 million compared to the third quarter of 2007 and increased \$329 million compared to the second quarter of 2008. Exclusive of the amortization and accretion of premiums and discounts on acquired loans and the leveraged lease adjustment during the second quarter of 2008, interest income (FTE) from loans and leases decreased \$216 million, or 16%, compared to the prior year quarter and increased \$16 million, or one percent, compared to the sequential quarter. The year-over-year decrease in interest income is a result of the repricing of variable rate loans in a declining rate environment, partially offset by the increase in average loan and lease balances. The sequential increase in interest income is a result of an increase in loans and leases due to the full quarter effect of the First Charter acquisition. At the end of the third quarter of 2008, the Bancorp's prime rate was 5.00% compared to 7.75% at the end of the third quarter of 2007.

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

Interest income (FTE) from investment securities and short-term investments increased ten percent compared to the third quarter of 2007 and eight percent compared to the second quarter of 2008. The increase in interest income from investment securities was a result of increases in the average investment portfolio offset by a decrease in the weighted-average yield.

Core deposits increased \$2.0 billion, or three percent, compared to the third quarter of last year and decreased modestly compared to the sequential quarter. The cost of interest-bearing core deposits was 1.64% in the third quarter of 2008, which was a decrease of 172 bp from 3.36% in the third quarter of 2007 and a 4 bp increase from the 1.60% paid in the second quarter of 2008. The year over year decrease is a result of the decrease in short-term market interest rates as, over the past year, the federal funds target rate decreased 275 bp to a target of 2.00% at September 30, 2008 compared to 4.75% at September 30, 2007. The sequential increase in core deposit interest expense is a result of the highly competitive deposit rate environment created by the disruption in the credit markets.

Interest-bearing liabilities to interest-earning assets			85.96			83.21			

- (a) Changes in interest not solely due to volume or yield/rate are allocated in proportion to the absolute dollar amount of change in volume and yield/rate.
- (b) The fully taxable-equivalent adjustments included in the above table are \$17 million and \$18 million for the nine months ended September 30, 2008 and 2007.

Interest expense on wholesale funding decreased 23% compared to the prior year quarter as declining interest rates more than offset a 32% increase in average balances. Interest expense on wholesale funding increased \$10 million, or 4%, since the second quarter of 2008 primarily due to increased balances.

Overall, the growth in average loans and leases since the third quarter of 2007 outpaced core deposit growth by \$5.6 billion. In the third quarter of 2008, wholesale funding represented 43% of interest-bearing liabilities, up from 37% in the third quarter of 2007.

Table of Contents**Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)**

The increase in wholesale funding as a percentage of interest-bearing liabilities was the result of the issuance of \$2.2 billion of trust preferred securities during 2007, \$750 million of senior notes in April 2008 and \$400 million of trust preferred securities in May 2008, partially offset by the repurchase of \$690 million of mandatorily redeemable securities, which occurred in the fourth quarter of 2007. The Bancorp's net free funding position modestly increased from the third quarter of 2007 and the second quarter of 2008 as a result of increased demand deposits.

Provision for Loan and Lease Losses

The Bancorp provides as an expense an amount for probable loan and lease losses within the loan and lease portfolio that is based on factors previously discussed in the Critical Accounting Policies section. The provision is recorded to bring the allowance for loan and lease losses to a level deemed appropriate by the Bancorp. Actual credit losses on loans and leases are charged against the allowance for loan and lease losses. The amount of loans actually removed from the Condensed Consolidated Balance Sheets is referred to as charge-offs. Net charge-offs include current period charge-offs less recoveries on previously charged-off loans and leases.

The provision for loan and lease losses increased to \$941 million in the third quarter of 2008 compared to \$139 million in the same period last year. The primary factors in the increase were the increase in commercial impaired loans, increase in delinquencies, the deterioration in real estate collateral values in certain of the Bancorp's key lending markets and declines in general economic conditions. As of September 30, 2008, the allowance for loan and lease losses as a percent of loans and leases increased to 2.41% from 1.08% at September 30, 2007.

Refer to the Credit Risk Management section for more detailed information on the provision for loan and lease losses including an analysis of loan portfolio composition, non-performing assets, net charge-offs, and other factors considered by the Bancorp in assessing the credit quality of the loan portfolio and the allowance for loan and lease losses.

Noninterest Income

For the three months ended September 30, 2008, noninterest income increased by \$36 million, or five percent, on a year-over-year basis. The components of noninterest income for these periods are as follows:

TABLE 4: Noninterest Income

(\$ in millions)	For the three months ended September 30,			For the nine months ended September 30,		
	2008	2007	Percent Change	2008	2007	Percent Change

Total noninterest income	\$ 717	681	5	\$ 2,304	1,958	18

NM: Percentage change is not meaningful.

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

Electronic payment processing revenue increased \$23 million, or 11%, in the third quarter of 2008 compared to the same period last year as the Bancorp continued to realize growth in each of its three main product lines. Merchant processing revenue increased nine percent, to \$89 million, compared to the same period in 2007. Financial institutions revenue increased to \$82 million, up \$5 million or six percent, compared to the third quarter of 2007 due to higher transaction volumes as a result of continued success in attracting financial institution customers. Card issuer interchange increased 19%, to \$64 million, compared to the same period in 2007 due to continued growth related to debit and credit card usage and increases in the average dollar amount per debit card transaction. The Bancorp processes over 26.7 billion transactions annually and handles electronic processing for over 160,000 merchant locations worldwide.

Service charges on deposits increased to \$172 million, up \$21 million, or 13%, in the third quarter of 2008 compared to the same period last year. Commercial deposit revenue increased \$13 million, or 21%, compared to the same quarter last year. This increase was primarily impacted by a decrease in earnings credits on compensating balances resulting from the decline in short-term interest rates. Commercial customers receive earnings credits to offset the fees charged for banking services on their deposit accounts such as account maintenance, lockbox, ACH transactions, wire transfers and other ancillary corporate treasury management services. Earnings credits are based on the customer's average balance in qualifying deposits multiplied by the crediting rate. Qualifying deposits include demand deposits and interest-bearing checking accounts. The Bancorp has a standard crediting rate that is adjusted as necessary based on competitive market conditions and changes in short-term interest rates. Retail deposit revenue increased eight percent, to \$97 million, in the third quarter of 2008 compared to the same period last year. The increase in retail service charges was attributable to higher customer activity. Growth in the number of customer deposit account relationships and deposit generation continues to be a primary focus of the Bancorp.

Table of Contents**Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)**

Corporate banking revenue increased \$13 million, or 15%, in the third quarter of 2008 over the same period in 2007. The growth in corporate banking revenue was largely attributable to higher foreign exchange derivative income of \$27 million, an increase of \$12 million compared to the prior year quarter. Growth also occurred in institutional sales and asset securitization fees, which grew \$2 million and \$3 million, respectively, compared to the third quarter of 2007. The Bancorp is committed to providing a comprehensive range of financial services to large and middle-market businesses and continues to see opportunities to expand its product offering.

Investment advisory revenue decreased \$5 million, or five percent, from the third quarter of 2007. The Bancorp experienced broad-based decreases in several categories within investment advisory revenue. Brokerage fee income, which includes Fifth Third Securities income, decreased 16%, or \$4 million, in the third quarter of 2008 as investors continued to migrate balances from stock and bond funds to money markets funds due to market volatility. Mutual fund revenue decreased 6%, to \$14 million, in the third quarter of 2008 due to the declining market. Private client services increased 2%, to \$36 million, in the third quarter of 2008 as growth was seen in wealth planning services. As of September 30, 2008, the Bancorp had approximately \$196 billion in assets under care and managed \$30 billion in assets for individuals, corporations and not-for-profit organizations.

Mortgage banking net revenue increased to \$45 million in the third quarter of 2008 from \$26 million in the same period last year. The components of mortgage banking net revenue for the three and nine months ended September 30, 2008 and 2007 are shown in Table 5.

TABLE 5: Components of Mortgage Banking Net Revenue

(\$ in millions)	For the three months ended September 30,		For the nine months ended September 30,	
	2008	2007	2008	2007
Origination fees and gains on loan sales	\$ 43	9	\$ 214	61
Servicing revenue:				
Servicing fees	39	37	122	105
Servicing rights amortization	(22)	(23)	(86)	(66)
Net valuation adjustments on servicing rights and free-standing derivatives entered into to economically hedge MSR	(15)	3	(22)	7
Net servicing revenue	2	17	14	46
Mortgage banking net revenue	\$ 45	26	\$ 228	107

Mortgage banking net revenue increased compared to the same period last year due to higher sales margins on loans held for sale, higher sales volume of portfolio loans and the impact of the adoption of SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115, for residential mortgage loans held for sale, offset by lower net valuation adjustments. Mortgage originations decreased 31%, from \$3.0 billion to \$2.0 billion, in comparison to the same quarter last year as application volumes decreased as a result of market disruptions. The increase in sales margins on loans held for sale and sales volume of portfolio loans contributed \$30 million and \$6 million, respectively, to the increase in mortgage banking net revenue. The adoption of SFAS No. 159 on January 1, 2008 for residential mortgage loans held for sale also contributed approximately \$11 million to the increase in mortgage banking net revenue. Prior to adoption, mortgage loan origination costs were capitalized as part of the carrying amount of the loan and recognized as a reduction of mortgage banking net revenue upon the sale of the loans. Subsequent to the adoption, mortgage loan origination costs are recognized as expense when incurred and included in noninterest expense within the Condensed Consolidated Statements of Income.

Mortgage net servicing revenue decreased \$15 million compared to the third quarter of 2007. Net servicing revenue is comprised of gross servicing fees and related amortization as well as valuation adjustments on mortgage servicing rights and mark-to-market adjustments on both settled and outstanding free-standing derivative financial instruments. Temporary impairment on servicing rights, partially offset by gains on

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

derivatives economically hedging the mortgage servicing rights (MSRs), resulted in lower mortgage net servicing revenue compared to the third quarter of 2007. The Bancorp's total residential mortgage loans serviced at September 30, 2008 and 2007 was \$50.1 billion and \$43.1 billion, respectively, with \$39.8 billion and \$33.1 billion, respectively, of residential mortgage loans serviced for others.

Servicing rights are deemed temporarily impaired when a borrower's loan rate is distinctly higher than prevailing rates. Temporary impairment on servicing rights is reversed when the prevailing rates return to a level commensurate with the borrower's loan rate. Further detail on the valuation of mortgage servicing rights can be found in Note 4 of the Notes to the Condensed Consolidated Financial Statements. The Bancorp maintains a non-qualifying hedging strategy to manage a portion of the risk associated with changes in impairment on the MSR portfolio. The Bancorp recognized a gain from MSR derivatives of \$8 million, offset by a temporary impairment of \$23 million, resulting in a net loss of \$15 million for the three months ended September 30, 2008 related to changes in fair value and settlement of free-standing derivatives purchased to economically hedge the MSR portfolio. See Note 7 of

Table of Contents**Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)**

the Notes to the Condensed Consolidated Financial Statements for more information on the free-standing derivatives used to hedge the MSR portfolio. Additionally, the Bancorp had net securities gains on non-qualifying hedges on mortgage service rights of \$22 million in the third quarter of 2008 that is included in noninterest income within the Condensed Consolidated Statements of Income, but is shown separate from mortgage banking net revenue.

The major components of other noninterest income are as follows:

TABLE 6: Components of Other Noninterest Income

(\$ in millions)	For the three months ended September 30,		For the nine months ended September 30,	
	2008	2007	2008	2007
Litigation settlement	\$ 76		\$ 76	
Cardholder fees	15	14	43	40
Consumer loan and lease fees	13	13	39	33
Operating lease income	13	8	34	22
Insurance income	7	8	28	24
Banking center income	7	7	24	20
Gain on redemption of Visa, Inc. ownership interests			273	
Gain on sale of FDIC deposit insurance credits		15		15
Loss on sale of other real estate owned	(12)	(2)	(38)	(6)
Bank owned life insurance (loss) income	(13)	17	(136)	59
Other	6	13	(4)	60
Total other noninterest income	\$ 112	93	\$ 339	267

Other noninterest income increased \$19 million in the third quarter of 2008 compared to the same period last year. The increase was primarily due to a \$76 million gain related to the satisfactory resolution of the CitFed litigation. This increase was offset by higher losses from the sale of other real estate owned properties and a \$27 million charge to lower the current cash surrender value of one of the Bancorp's BOLI policies.

Net securities losses totaled \$63 million in the third quarter of 2008 compared to \$13 million of net securities gains during the same period last year. The net securities losses in the current quarter include other than temporary impairment charges of \$28 million and \$23 million relating to FNMA and FHLMC preferred stock, respectively, along with a \$12 million impairment charge on subordinated tranches and residual interests related to previous automobile loan securitizations.

Noninterest Expense

Total noninterest expense increased \$114 million, or 13%, in the third quarter of 2008 compared to the same period last year. Noninterest expense in the third quarter of 2008 includes a \$45 million charge related to Visa's pending settlement with Discover, \$36 million in legal expenses related to the litigation settlement from a prior acquisition and \$31 million of additional operating expenses from acquisitions since the same period in 2007. Noninterest expense in the third quarter of 2007 included \$78 million related to Visa's settlement with American Express. Excluding these items, noninterest expense increased \$80 million, or 10%, due to higher personnel costs, increased volume-related processing expenses, increased provision for unfunded commitments and higher loan processing costs resulting from increased collections activities.

The Bancorp continues to focus on efficiency initiatives, as part of its core emphasis on operating leverage and on expense control. The efficiency ratio (noninterest expense divided by the sum of net interest income (FTE) and noninterest income) was 54.2% and 59.2% for the third quarter of 2008 and 2007, respectively. The Bancorp views investments in information technology and banking center expansion as its platform for future growth and increasing expense efficiency.

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

The major components of noninterest expense are as follows:

TABLE 7: Noninterest Expense

(\$ in millions)	For the three months ended September 30,			For the nine months ended September 30,		
	2008	2007	Percent Change	2008	2007	Percent Change
Salaries, wages and incentives	\$ 321	310	4	\$ 1,000	912	10
Employee benefits	72	67	8	216	222	(2)
Net occupancy expense	77	66	16	222	199	12
Payment processing expense	70	65	8	203	176	16
Technology and communications	47	41	14	142	122	17
Equipment expense	34	30	12	95	90	5
Other noninterest expense	346	274	26	665	649	2
Total noninterest expense	\$ 967	853	13	\$ 2,543	2,370	7

Table of Contents**Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)**

Total personnel costs (salaries, wages and incentives plus employee benefits) increased 4% from September 30, 2007 due primarily to approximately \$11 million in mortgage origination costs that prior to the adoption of SFAS No. 159 on January 1, 2008, were included as a component of mortgage banking net revenue. Full time equivalent employees totaled 21,522 as of September 30, 2008 compared to 20,775 as of September 30, 2007.

Net occupancy expenses increased \$11 million, or 16%, in the third quarter of 2008 over the same period last year due to the addition of 117 banking centers since September 30, 2007. Growth in the number of banking centers was primarily driven by acquisitions, which added 96 banking centers since the third quarter of 2007. Payment processing expense includes third-party processing expenses, card management fees and other bankcard processing expenses. Payment processing expense increased eight percent compared to the same period last year due to higher network charges of \$4 million from increased processing volumes for both the merchant and financial institutions businesses.

The major components of other noninterest expense are as follows:

TABLE 8: Components of Other Noninterest Expense

(\$ in millions)	For the three months ended September 30,		For the nine months ended September 30,	
	2008	2007	2008	2007
Professional services fees	\$ 50	14	\$ 78	37
Loan processing	46	29	123	84
Marketing	29	19	74	57
FDIC insurance and other taxes	17	9	47	23
Affordable housing investments	17	13	48	36
Provision for unfunded commitments and letters of credit	17	2	35	3
Intangible asset amortization	17	10	40	31
Travel	14	14	41	40
Postal and courier	14	13	41	38
Operating lease	9	5	23	15
Supplies	8	8	24	22
Recruitment and education	7	10	24	30
Visa litigation settlement (accrual)	45	78	(107)	78
Other	56	50	174	155
Total other noninterest expense	\$ 346	274	\$ 665	649

Total other noninterest expense increased by \$72 million from the same quarter last year. The increased professional service fees compared to the same quarter last year resulted from legal expenses of \$36 million stemming from the CitFed litigation. FDIC insurance and other taxes were higher due to the depletion of the Bancorp's prior FDIC insurance premium credits in the third quarter of 2008. Loan processing expense was higher in comparison to the same quarter last year as a result of increased collection activities. In addition, the provision for unfunded commitments increased \$15 million compared to the third quarter of 2007 due to higher estimates of inherent losses resulting from deterioration in credit quality.

Applicable Income Taxes

The Bancorp's income (loss) before income taxes, applicable income tax expense and effective tax rate for each of the periods indicated are as follows:

TABLE 9: Applicable Income Taxes

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

(\$ in millions)	For the three months ended September 30,		For the nine months ended September 30,	
	2008	2007	2008	2007
Income (loss) before income taxes	\$ (128)	443	\$ 179	1,473
Applicable income taxes	(72)	118	150	414
Effective tax rate	56.6%	26.7	84.0%	28.1

Applicable income tax expense for all periods includes the benefit from tax-exempt income, tax-advantaged investments and general business tax credits, partially offset by the effect of nondeductible expenses. The effective tax rate for the three months ended September 30, 2008 was primarily impacted by lower projected pre-tax income for 2008. The effective tax rate for the nine months ended September 30, 2008 was primarily impacted by the charge to tax expense of approximately \$140 million in the second quarter of 2008 required for interest related to the tax treatment of certain of the Bancorp's leveraged leases for previous tax years.

Table of Contents**Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****BUSINESS SEGMENT REVIEW**

The Bancorp reports on five business segments: Commercial Banking, Branch Banking, Consumer Lending, Processing Solutions and Investment Advisors. Further detailed financial information on each business segment is included in Note 17 of the Notes to Condensed Consolidated Financial Statements.

Results of the Bancorp's business segments are presented based on its management structure and management accounting practices. The structure and accounting practices are specific to the Bancorp; therefore, the financial results of the Bancorp's business segments are not necessarily comparable with similar information for other financial institutions. The Bancorp refines its methodologies from time to time as management accounting practices are improved and businesses change. During the fourth quarter of 2007, the Bancorp changed the reporting of Processing Solutions to include certain revenues and expenses related to credit card processing that were previously listed under the Commercial and Branch Banking segments. Revisions to the Bancorp's methodologies are applied on a retroactive basis.

The Bancorp manages interest rate risk centrally at the corporate level by employing a funds transfer pricing (FTP) methodology. This methodology insulates the business segments from interest rate volatility, enabling them to focus on serving customers through loan originations and deposit taking. The FTP system assigns charge rates and credit rates to classes of assets and liabilities, respectively, based on expected duration and the LIBOR swap curve. Matching duration allocates interest income and interest expense to each segment so its resulting net interest income is insulated from interest rate risk. In a rising rate environment, the Bancorp benefits from the widening spread between deposit costs and wholesale funding costs. However, the Bancorp's FTP system credits this benefit to deposit-providing businesses, such as Branch Banking and Investment Advisors, on a duration-adjusted basis. The net impact of the FTP methodology is captured in General Corporate and Other.

Management made several changes to the FTP methodology in the fourth quarter of 2007 to more appropriately calculate FTP charges and credits to each of the Bancorp's business segments. Changes to the FTP methodology were applied retroactively and included adding a liquidity premium to loans and deposits to properly reflect the Bancorp's marginal cost of longer term funding. In addition, an FTP charge on fixed assets was added to the new FTP methodology.

The business segments are charged provision expense based on the actual net charge-offs experienced by the loans owned by each segment. Provision expense attributable to loan growth and changes in factors in the allowance for loan and lease losses are captured in General Corporate and Other. The financial results of the business segments include allocations for shared services and headquarters expenses. Even with these allocations, the financial results are not necessarily indicative of the business segments' financial condition and results of operations as if they were to exist as independent entities. Additionally, the business segments form synergies by taking advantage of cross-sell opportunities and when funding operations by accessing the capital markets as a collective unit. Net income (loss) by business segment is summarized as follows:

TABLE 10: Business Segment Results

(\$ in millions)	For the three months ended September 30,		For the nine months ended September 30,

Table of Contents**Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)***Commercial Banking*

Commercial Banking offers banking, cash management and financial services to large and middle-market businesses, government and professional customers. In addition to the traditional lending and depository offerings, Commercial Banking products and services include, among others, foreign exchange and international trade finance, derivatives and capital markets services, asset-based lending, real estate finance, public finance, commercial leasing and syndicated finance. The table below contains selected financial data for the Commercial Banking segment.

TABLE 11: Commercial Banking

(\$ in millions)	For the three months ended September 30,		For the nine months ended September 30,	
	2008	2007	2008	2007
Income Statement Data				
Net interest income (FTE) (a)	\$ 502	330	\$ 1,210	976
Provision for loan and lease losses	235	22	517	71
Noninterest income:				
Corporate banking revenue	98	82	301	238
Service charges on deposits	46	37	136	112
Other noninterest income	17	17	42	48
Noninterest expense:				
Salaries, incentives and benefits	78	63	230	196
Other noninterest expenses	150	130	436	387
Income before taxes	200	251	506	720
Applicable income taxes (a)	45	68	102	189
Net income	\$ 155	183	\$ 404	531
Average Balance Sheet Data				
Commercial loans	\$ 43,829	35,580	\$ 42,505	34,831
Demand deposits	6,328	5,843	6,066	5,903
Interest checking	4,397	4,055	4,540	4,007
Savings and money market	4,009	4,377	4,389	4,509
Certificates over \$100,000 and other time	2,184	1,687	1,932	1,878
Foreign office deposits	1,842	1,531	1,935	1,332

(a) Includes taxable-equivalent adjustments of \$4 million for the three months ended September 30, 2008 and 2007 and \$11 million and \$10 million for the nine months ended September 30, 2008 and 2007, respectively.

Net income decreased \$28 million, or 15%, compared to the third quarter of 2007 as strong growth in net interest income and corporate banking revenue was more than offset by increased provision for loan and lease losses. Net interest income increased \$172 million, or 52%, compared to the same period last year. The accretion of purchase accounting adjustments, totaling \$154 million, related to the second quarter acquisition of First Charter drove the increase in net interest income with the remainder attributed to the growth in loans, partially funded by an increase in deposits. Average commercial loans and leases were up 23%, to \$43.9 billion, over the same quarter last year due to solid loan production across most of the Bancorp's footprint and the result of acquisitions since the third quarter of 2007. Excluding acquisitions, commercial loans increased approximately 18% compared to the third quarter of 2007. Average core deposits increased five percent due to growth in interest checking and foreign office deposits. The segment is focusing on growing deposits through deeper penetration of its premium customer base. Net charge-offs

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

as a percent of average loans and leases increased to 213 bp from 25 bp in the third quarter of 2007. Net charge-offs increased in comparison to the prior year quarter due to weakening economies and the continuing deterioration of credit within the Bancorp's footprint, particularly in Michigan and Florida, involving commercial and commercial construction loans. Higher charge-offs were particularly concentrated in homebuilder and developer loans, where these loans accounted for approximately 69% of net charge-offs during the third quarter of 2008.

Noninterest income increased \$25 million compared to the same quarter last year due to corporate banking revenue growth of \$16 million, or 19%, and an increase in service charges on deposits of \$9 million, or 25%. Corporate banking revenue increased as a result of growth in foreign exchange derivative income, which increased \$11 million, to \$24 million, during the third quarter of 2008. Service charges on deposits increased 25%, to \$46 million, compared to the third quarter of 2007. The increase in service charges was a result of higher business service charges (net of discounts) and a reduction in the amount of offsetting earnings credits as short-term rates remain lower than the third quarter of 2007.

Noninterest expense increased \$35 million, or 18%, compared to the third quarter of 2007 primarily due to sales incentives increasing 36% to \$28 million compared to the third quarter of 2007. Additionally, loan expenses increased \$10 million, to \$17 million, during the third quarter of 2007 due to increased collection activities.

Table of Contents**Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)***Branch Banking*

Branch Banking provides a full range of deposit and loan and lease products to individuals and small businesses through 1,298 full-service banking centers. Branch Banking offers depository and loan products, such as checking and savings accounts, home equity loans and lines of credit, credit cards and loans for automobile and other personal financing needs, as well as products designed to meet the specific needs of small businesses, including cash management services. The table below contains selected financial data for the Branch Banking segment.

TABLE 12: Branch Banking

(\$ in millions)	For the three months ended September 30,		For the nine months ended September 30,	
	2008	2007	2008	2007
Income Statement Data				
Net interest income	\$ 442	374	\$ 1,226	1,081

Other noninterest expenses	129	115	383	341
Income before taxes	257	256	701	725
Applicable income taxes	91	90	247	256
Net income	\$ 166	166	\$ 454	469

Average Balance Sheet Data

Consumer loans	\$ 12,738	11,872	\$ 12,551	11,731
Commercial loans	5,850	5,133	5,559	5,149
Demand deposits	6,205	5,734	5,972	5,760
Interest checking	7,876	8,310	7,986	8,909
Savings and money market	16,239	15,167	16,270	14,316
Certificates over \$100,000 and other time	13,256	13,073	12,935	13,626

Net income was flat compared to the third quarter of 2007 as increases in net interest income and service fees were offset by a higher provision for loan and lease losses and increases in salaries and net occupancy expense. Net interest income increased 18% compared to the third quarter of 2007 due to loan growth and the accretion of purchase accounting adjustments, totaling \$27 million, related to the second quarter acquisition of First Charter. Average loans and leases increased nine percent compared to the third quarter of 2007 as home equity loans grew nine percent due to acquisitions since the third quarter of 2007. The segment grew credit card balances by \$318 million, or 26%, resulting from an increased focus on relationships with its current customers through the cross-selling of credit cards. Average core deposits were up 4% compared to the third quarter of 2007 with growth in savings and money market accounts and CDs offset by a decrease in interest checking deposits. The growth in core deposits was driven by acquisitions since the third quarter of 2007. Net charge-offs as a percent of average loan and leases increased to 187 bp from 103 bp in the third quarter of 2007. Net charge-offs increased in comparison to the prior year quarter as the Bancorp experienced higher charge-offs involving home equity lines of and loans of \$19 million reflecting borrower stress and a decrease in home prices within the Bancorp's footprint. Charge-offs involving credit cards increased \$11 million compared to the third quarter of 2007 due to higher card balances

and maturing of the portfolio.

Noninterest income increased \$9 million compared to the third quarter of 2007 primarily due to an increase in service charges on deposits of \$11 million, or nine percent. The increase in deposit fees, including consumer overdraft fees, is attributed to higher customer activity in comparison to the prior year quarter. Noninterest expense increased \$33 million, or 12%, compared to the third quarter of 2007 as net occupancy and equipment costs increased 19% as a result of additional banking centers. Since the third quarter of 2007, the Bancorp's banking centers have increased by 117 to 1,298 as of September 30, 2008, mainly due to acquisitions, which contributed 96 banking centers. Other noninterest expense increased 12%, which can be attributed to higher loan cost associated with collections. The Bancorp continues to position itself for sustained long-term growth through new banking center additions in key markets.

Table of Contents**Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)***Consumer Lending*

Consumer Lending includes the Bancorp's mortgage, home equity, automobile and other indirect lending activities. Mortgage and home equity lending activities include the origination, retention and servicing of mortgage and home equity loans or lines of credit, sales and securitizations of those loans or pools of loans or lines of credit and all associated hedging activities. Other indirect lending activities include loans to consumers through mortgage brokers, automobile dealers and federal and private student education loans. The table below contains selected financial data for the Consumer Lending segment.

TABLE 13: Consumer Lending

Applicable income taxes	3	15	24	60
Net income	\$ 6	28	\$ 45	111
Average Balance Sheet Data				
Residential mortgage loans	\$ 10,574	10,026	\$ 10,869	9,960
Automobile loans	7,376	9,844	8,138	9,565
Home equity	1,114	1,318	1,164	1,347
Consumer leases	815	872	798	952

Net income decreased \$22 million, compared to the third quarter of 2007 as the increases in net interest income and mortgage banking net revenue, net of related expenses, were more than offset by growth in provision for loan and lease losses. The accretion of purchase accounting adjustments, totaling \$38 million, primarily related to the second quarter acquisition of First Charter drove the growth in net interest income compared to the third quarter of 2007. Average residential mortgage loans increased six percent compared to the prior year quarter due primarily to acquisitions, including R-G Crown Bank (Crown) and First Charter. Excluding acquisitions, residential mortgage loans decreased 12% from the same quarter last year. Average automobile loans decreased 25% compared to the same quarter last year due to the securitization of \$2.7 billion of automobile loans in the first quarter of 2008. Net charge-offs as a percent of average loan and leases increased from 77 bp in the third quarter of 2007 to 261 bp in the third quarter of 2008. Net charge-offs, primarily in residential mortgage loans, increased in comparison to the prior year quarter due to the continuing deterioration of real estate values within the Bancorp's footprint, particularly in Florida. The segment continues to focus on managing credit risk through the restructuring of certain residential mortgage loans and careful consideration of underwriting and collection standards. As of September 30, 2008, the Bancorp had restructured approximately \$360 million and \$170 million of residential mortgage loans and home equity loans, respectively, to mitigate losses due to declining collateral values.

Mortgage originations decreased to \$2.0 billion in the third quarter of 2008 from \$3.0 billion in the third quarter of 2007 due to lower application volumes resulting from market disruptions. The increase in sales margins on loans held for sale and sales volume of portfolio loans were the

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

primary reasons for increased mortgage banking net revenue compared to the third quarter of 2007. Also contributing to the increase in mortgage banking net revenue in the third quarter of 2008 was the \$11 million impact from the adoption of SFAS No. 159, as of January 1, 2008, on residential mortgage loans held for sale. Prior to adoption, mortgage loan origination costs were capitalized as part of the carrying amount of the loan and recognized as a reduction of mortgage banking net revenue upon the sale of the loans. Subsequent to the adoption, mortgage loan origination costs are recognized in earnings when incurred, which primarily drove the increase in salaries and incentives of \$14 million in comparison to the same quarter last year.

Table of Contents**Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)***Processing Solutions*

Fifth Third Processing Solutions provides electronic funds transfer, debit, credit and merchant transaction processing, operates the Jeanie® ATM network and provides other data processing services to affiliated and unaffiliated customers. The table below contains selected financial data for the Processing Solutions segment.

TABLE 14: Processing Solutions

(\$ in millions)	For the three months ended		For the nine months ended	
	September 30, 2008	September 30, 2007	September 30, 2008	September 30, 2007
Income Statement Data				
Net interest income	\$ 1	(3)	\$ 3	(4)
Provision for loan and lease losses	3	3	11	8
Noninterest income:				
Financial institutions processing	90	80	276	239
Merchant processing	89	83	255	224
Card issuer interchange	22	17	62	47
Other noninterest income	12	10	35	30
Noninterest expense:				
Salaries, incentives and benefits	20	18	60	55
Payment processing expense	68	63	197	171
Other noninterest expenses	56	43	164	126
Income before taxes	67	60	199	176
Applicable income taxes	24	21	70	62
Net income	\$ 43	39	\$ 129	114

Net income increased \$4 million, or 11%, compared to the third quarter of 2007 as the segment continues to increase its presence in the electronic payment processing business. The segment continues to realize year-over-year growth in transaction volumes and revenue growth, despite the slowdown in consumer spending, due to the addition and conversion of large national clients over the past year and current initiatives involving merchant pricing and sales. Financial institutions processing revenues increased \$10 million, or 12%, driven by higher debit card usage volumes. Merchant processing revenue increased \$6 million, or 7%, over the same quarter last year. Growth in card issuer interchange of \$5 million, or 30%, can be attributed to organic growth in the Bancorp's credit card portfolio. The Bancorp continues to see significant opportunities to attract new financial institution customers and retailers within this business segment.

Payment processing expense increased seven percent from the third quarter of 2007 due to higher network charges, increasing 10% to \$48 million, resulting from increased transaction volumes. Financial institution transactions and merchant transactions processed both increased in comparison to the third quarter of 2007. Other noninterest expense increased due to higher technology and communications expense.

Table of Contents**Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)***Investment Advisors*

Investment Advisors provides a full range of investment alternatives for individuals, companies and not-for-profit organizations. The Bancorp's primary services include investments, trust, asset management, retirement plans and custody. Fifth Third Securities, Inc., (FTS) an indirect wholly-owned subsidiary of the Bancorp, offers full service retail brokerage services to individual clients and broker dealer services to the institutional marketplace. Fifth Third Asset Management, Inc., an indirect wholly-owned subsidiary of the Bancorp, provides asset management services and also advises the Bancorp's proprietary family of mutual funds. The table below contains selected financial data for the Investment Advisors segment.

TABLE 15: Investment Advisors

(\$ in millions)	For the three months ended September 30,		For the nine months ended September 30,	
	2008	2007	2008	2007
Income Statement Data				
Net interest income	\$ 46	39	\$ 137	113
Provision for loan and lease losses	12	5	21	10
Noninterest income:				
Investment advisory income	89	96	276	291
Other noninterest income	7	6	22	17
Noninterest expense:				
Salaries, incentives and benefits	38	41	120	125
Other noninterest expenses	52	55	165	173
Income before taxes	40	40	129	113
Applicable income taxes	14	14	46	40
Net income	\$ 26	26	\$ 83	73
Average Balance Sheet Data				
Loans	\$ 3,599	3,229	\$ 3,548	3,168
Core deposits	4,308	4,918	4,751	4,969

Net income was flat compared to the third quarter of 2007 as higher net interest income was offset by lower investment advisory income. The segment grew loans and benefited from an overall decrease in interest rates to increase net interest income \$7 million, or 18%, as spreads widened due to decreases in funding costs. Investment advisors realized average loan growth of 11% and a decrease in average core deposits of 12% compared to the third quarter of 2007. Core deposits decreased due to a 21% decline in interest checking balances.

Noninterest income decreased \$6 million, or six percent, compared to the third quarter of 2007, as investment advisory income decreased eight percent, to \$89 million. Mutual fund fees decreased as a result of the decline in the equity markets since the third quarter of 2007. In addition, the decrease in broker income was driven by clients moving to lower fee, cash based products from equity products due to extreme market volatility and a decline in transaction based revenues. Noninterest expense decreased \$6 million compared to the prior year quarter as the segment continues to focus on expense control. As of September 30, 2008, the Bancorp had \$196 billion in assets under care and \$30 billion in managed assets, modestly lower than the previous year quarter.

General Corporate and Other

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

General Corporate and Other includes the unallocated portion of the investment securities portfolio, securities gains/losses, certain non-core deposit funding, unassigned equity, provision expense in excess of net charge-offs, the payment of preferred stock dividends and certain support activities and other items not attributed to the business segments.

The results of General Corporate and Other were primarily impacted by the significant increase in the provision for loan and lease losses, which increased from \$25 million in the third quarter of 2007 to \$480 million in the third quarter of 2008. The results also included \$45 million related to Visa's pending litigation settlement with Discover, a net benefit of \$40 million from the resolution of the CitFed litigation, the other than temporary impairment of FNMA and FHLMC preferred stock of \$51 million and the charge related to a reduction in the current cash surrender value of one of the Bancorp's BOLI policies of \$27 million.

Table of Contents**Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****BALANCE SHEET ANALYSIS****Loans and Leases**

The following tables summarize the end of period and average total loans and leases, including loans held for sale. The Bancorp classifies its loans and leases based upon the primary purpose of the loan.

TABLE 16: Components of Total Loans and Leases (includes held for sale)

(\$ in millions)	September 30, 2008		December 31, 2007		September 30, 2007	
	Balance	% of Total	Balance	% of Total	Balance	% of Total
Commercial:						
Commercial loans	\$ 29,424	34	\$ 26,079	31	\$ 23,317	29
Commercial mortgage loans	13,355	16	11,967	14	11,178	14
Commercial construction loans	6,002	7	5,561	6	5,463	7
Commercial leases	3,642	4	3,737	5	3,710	5
Subtotal commercial	52,423	61	47,344	56	43,668	55
Consumer:						
Residential mortgage loans	10,292	12	11,433	14	9,945	13
Home equity	12,599	14	11,874	14	11,737	15
Automobile loans	8,306	10	11,183	13	11,043	14
Credit card	1,688	2	1,591	2	1,460	2
Other consumer loans and leases	1,190	1	1,157	1	1,162	1
Subtotal consumer	34,075	39	37,238	44	35,347	45
Total loans and leases	\$ 86,498	100	\$ 84,582	100	\$ 79,015	100

Total loans and leases increased \$7.5 billion, or 10%, over the third quarter of 2007. The growth in total loans and leases was due to acquisitions since the third quarter of 2007, the use of contingent liquidity facilities related to certain off-balance sheet programs and increased loan production across the Bancorp's footprint.

Total commercial loans and leases increased \$8.8 billion, or 20%, compared to September 30, 2007. The increase was primarily due to strong growth in commercial loans of 26% compared to the third quarter of 2007 resulting from increased loan production, acquisitions since the third quarter of 2007 and an additional \$1.5 billion from the use of contingent liquidity facilities related to certain off-balance sheet programs that were drawn upon in the third quarter of 2008. Included within the contingent liquidity facilities were approximately \$335 million in draws on outstanding letters of credit that were supporting certain securities issued as variable rate demand notes (VRDNs). Draws on these outstanding letters of credit have continued in October with outstanding draws of approximately \$909 million as of October 31, 2008. For further information on these arrangements, see the Off-Balance Sheet Arrangements section and Note 8 of the Notes to Condensed Consolidated Financial Statements. Commercial mortgage loans increased 19% over the third quarter of 2007, which included the impact of acquisitions since the third quarter of 2007 of \$1.1 billion. The overall mix of commercial loans and leases is relatively consistent with prior periods.

Total consumer loans and leases decreased \$1.3 billion, or four percent, compared to the third quarter of 2007, as a result of the decrease in automobile loans partially offset by credit card and home equity loan growth. Credit card loans increased to \$1.7 billion, an increase of 16% over

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

the third quarter of 2007, due to continued success in cross-selling credit cards to its existing retail customer base. Home equity loans increased \$862 million, primarily due to acquisitions since the third quarter of 2007. Residential mortgage loans were \$10.3 billion at September 30, 2008, an increase of four percent over the third quarter of 2007, with growth driven by approximately \$1.5 billion of loans from acquisitions. Automobile loans decreased by approximately \$2.7 billion, or 25%, due largely to automobile loan securitizations during the first quarter of 2008.

Average total commercial loans and leases increased \$8.6 billion, or 20%, compared to the third quarter of 2007. The increase in average total commercial loans and leases was primarily driven by growth in commercial loans and commercial mortgage loans, which increased 27% and 19%, respectively, over the third quarter of 2007. Commercial construction loans increased 11% compared to the same quarter last year. The growth in commercial mortgage loans and commercial construction loans included the impact of acquisitions since the third quarter of 2007 of \$1.0 billion and \$588 million, respectively. Growth in overall average commercial loans and leases was realized in the majority of the Bancorp's markets, including 15% growth in Chicago and approximately \$1.5 billion of loans in North Carolina from acquisitions.

Average total consumer loans and leases decreased \$1.1 billion, or three percent, compared to the third quarter of 2007 as a result of a decrease in automobile loans of 24% largely due to the aforementioned automobile securitizations that occurred in the first quarter. The decline was partially offset by growth in credit card balances of \$354 million, or 26%, and home equity loans of \$783 million, or seven percent. Acquisitions since the third quarter of 2007 impacted the change in residential mortgage loans and home equity loans by \$1.7 billion and \$627 million, respectively. The Bancorp experienced a decrease in average consumer loans and leases in a majority of its markets.

Investment Securities

The Bancorp uses investment securities as a means of managing interest rate risk, providing liquidity support and providing collateral for pledging purposes. As of September 30, 2008, total investment securities were \$14.5 billion compared to \$11.3 billion at September 30, 2007. Securities are classified as available-for-sale when, in management's judgment, they may be sold in response to, or in anticipation of, changes in market conditions. The Bancorp's management has evaluated the securities in an unrealized loss position in the available-for-sale portfolio on the basis of both the duration of the decline in value of the security and the severity of that decline, and maintains the intent and ability to hold these securities to the earlier of the recovery of the losses or maturity.

At September 30, 2008, the Bancorp's investment portfolio primarily consisted of AAA-rated agency mortgage-backed securities. The investment portfolio includes FHLMC preferred stock and FNMA preferred securities with a remaining carrying value of \$4 million after recognizing other than temporary impairment charges of \$64 million during the second and third quarters of 2008. The Bancorp did not hold asset-backed securities backed by subprime loans in its investment portfolio at September 30, 2008. Additionally, there were no material securities below investment grade as of September 30, 2008.

TABLE 18: Components of Investment Securities (amortized cost basis)

(\$ in millions)

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

	September 30, 2008	December 31, 2007	September 30, 2007
Available-for-sale and other:			
U.S. Treasury and Government agencies	\$ 187	3	3
U.S. Government sponsored agencies	329	160	500
Obligations of states and political subdivisions	357	490	538
Agency mortgage-backed securities	9,773	8,738	8,290
Other bonds, notes and debentures	1,552	385	705
Other securities	1,051	1,045	971
Total available-for-sale and other securities	\$ 13,249	10,821	11,007
Held-to-maturity:			
Obligations of states and political subdivisions	\$ 355	351	344
Other bonds, notes and debentures	5	4	2
Total held-to-maturity	\$ 360	355	346

On an amortized cost basis, at the end of the third quarter of 2008, available-for-sale securities increased \$2.2 billion since September 30, 2007. At September 30, 2008 and 2007, available-for-sale securities were 13% and 12%, respectively, of interest-earning assets. Increases in the available-for-sale securities portfolio relate to the Bancorp's overall balance sheet growth and the purchase of securities as a part of the Bancorp's non-qualifying hedging strategy related to mortgage servicing rights. The estimated weighted-average life of the debt securities in the available-for-sale portfolio was 6.0 years at September 30, 2008 compared to 5.7 years at September 30, 2007. At September 30, 2008, the fixed-rate securities within the available-for-sale securities portfolio had a weighted-average yield of 5.26% compared to 5.51% at September 30, 2007.

Trading securities increased from \$171 million and \$241 million as of December 31, 2007 and June 30, 2008, respectively, to \$915 million as of September 30, 2008. The increase was driven by a residential mortgage loan securitization in the third quarter of 2008 in which the Bancorp continued to hold the underlying securities of \$359 million. Additionally, as of September 30, 2008, the Bancorp

Table of Contents**Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)**

held \$366 million of VRDNs in its trading securities portfolio. These securities were purchased from the market, through FTS, who was also the remarketing agent. The overall position in VRDNs has continued to increase and was \$1.6 billion as of October 31, 2008. For more information on the Bancorp's obligations in remarketing variable rate demand notes, see Note 8 in the Notes to Condensed Consolidated Financial Statements.

Information presented in Table 19 is on a weighted-average life basis, anticipating future prepayments. Yield information is presented on an FTE basis and is computed using historical cost balances. Maturity and yield calculations for the total available-for-sale portfolio exclude equity securities that have no stated yield or maturity.

TABLE 19: Characteristics of Available-for-Sale and Other Securities

As of September 30, 2008 (\$ in millions)	Amortized Cost	Fair Value	Weighted-Average Life (in years)	Weighted-Average Yield

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

Total		1,552	1,485	2.7	5.89
Other securities (d)		1,051	1,043		
Total available-for-sale and other securities	\$	13,249	\$ 13,177	6.0	5.26%

- (a) Taxable-equivalent yield adjustments included in the above table are 2.48%, 2.40%, 2.58%, 1.26% and 2.45% for securities with an average life of one year or less, 1-5 years, 5-10 years, greater than 10 years and in total, respectively.
- (b) Weighted-average yield excludes \$1 million and \$52 million of securities with an average life of 1-5 years and 5-10 years, respectively, related to qualified zone academy bonds whose yields are realized through income tax credits. The weighted-average effective yield of these instruments is 6.77%.
- (c) Other bonds, notes, and debentures consist of commercial paper, non-agency mortgage backed securities, certain other asset backed securities (primarily automobile and commercial loan backed securities) and corporate bond securities.
- (d) Other securities consist of Federal Home Loan Bank (FHLB) and Federal Reserve Bank restricted stock holdings that are carried at par, FHLMC and FNMA preferred stock holdings, certain mutual fund holdings and equity security holdings.

Interest rate spreads in mortgage products contracted during the third quarter, reversing the considerable widening that took place during the second quarter of 2008, resulting in a net unrealized loss on agency mortgage-backed securities of \$2 million as of September 30, 2008. In addition, credit spreads on corporate bonds increased, resulting in an increase in unrealized losses on other bonds, notes and debentures of \$67 million as of September 30, 2008. Total net unrealized losses on the available-for-sale securities portfolio was \$72 million at September 30, 2008 compared to an unrealized loss of \$144 million at December 31, 2007 and a \$230 million unrealized loss at September 30, 2007.

Table of Contents**Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****Deposits**

Deposit balances represent an important source of funding and revenue growth opportunity. The Bancorp is continuing to focus on core deposit growth in its retail and commercial franchises by expanding its retail franchise through acquisitions and its de novo strategy and enhancing its product offerings. At September 30, 2008, core deposits represented 54% of the Bancorp's asset funding base, compared to 59% at September 30, 2007.

Included in core deposits are foreign office deposits, which are Eurodollar sweep accounts for the Bancorp's commercial customers. These accounts bear interest at rates slightly higher than money market accounts, but the Bancorp does not have to pay FDIC insurance nor hold collateral. The remaining foreign office balances are brokered deposits and the Bancorp uses these, as well as certificates of deposit \$100,000 and over, as a method to fund earning asset growth.

TABLE 20: Deposits

(\$ in millions)	September 30, 2008		December 31, 2007		September 30, 2007	
	Balance	% of Total	Balance	% of Total	Balance	% of Total
Demand	\$ 14,241	18	\$ 14,404	19	\$ 13,174	19
Interest checking	13,251	17	15,254	20	14,294	21
Savings	15,955	21	15,635	21	15,599	22
Money market	5,352	7	6,521	9	6,163	9
Foreign office	1,999	3	2,572	4	2,014	3
Transaction deposits	50,798	66	54,386	73	51,244	74
Other time	11,778	15	11,440	15	10,267	15
Core deposits	62,576	81	65,826	88	61,511	89
Certificates - \$100,000 and over	13,173	17	6,738	9	5,973	8
Other foreign office	1,711	2	2,881	3	1,898	3
Total deposits	\$ 77,460	100	\$ 75,445	100	\$ 69,382	100

Core deposits increased two percent compared to the third quarter of 2007 due to acquisitions during the past year. Exclusive of acquisitions, core deposits decreased three percent as five percent growth in demand deposits was more than offset by a five percent decrease in interest-bearing core deposits as a result of increased competitor pricing on time deposits. A majority of the increase in deposit pricing was the result of illiquidity in the marketplace that provided other financial institutions limited access to alternative funding sources. The Bancorp increased its rates at the end of the third quarter to approximate competitor rates and realized stabilization in its interest-bearing core deposit products. The Bancorp is committed to its Everyday Great Rates strategy that places each customer in the best deposit product for his/her rate and service need.

Certificates \$100,000 and over at September 30, 2008 increased compared to December 31, 2007 and September 30, 2007 primarily due to actions taken by the Bancorp as a liquidity management strategy, which involved extending the average duration of wholesale borrowings to reduce exposure to high levels of market volatility.

Other time	10,780	14	11,011	15	10,290	15
Core deposits	63,179	84	62,978	88	61,212	88
Certificates - \$100,000 and over	11,623	15	6,613	9	6,062	9
Other foreign office	395	1	2,464	3	1,981	3
Total deposits	\$ 75,197	100	\$ 72,055	100	\$ 69,255	100

On an average basis, core deposits increased three percent primarily due to acquisitions that occurred since the third quarter of 2007. Exclusive of acquisitions, average core deposits decreased two percent as increases in demand deposits due to decreased earnings credit rates was more than offset by the decrease in interest-bearing core deposit products.

Table of Contents**Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****Borrowings**

Total short-term borrowings were \$11.3 billion at September 30, 2008 compared to \$8.9 billion at September 30, 2007. As of both September 30, 2008 and September 30, 2007, total borrowings as a percentage of interest-bearing liabilities were 28%, as the Bancorp continues to explore additional alternatives regarding the level and cost of various other sources of funding.

TABLE 22: Borrowings

(\$ in millions)	September 30, 2008	December 31, 2007	September 30, 2007
Federal funds purchased	\$ 2,521	4,427	\$ 5,130
Other short-term borrowings	8,791	4,747	3,796
Long-term debt	12,947	12,857	12,498
Total borrowings	\$ 24,259	22,031	\$ 21,424

Total borrowings increased \$2.8 billion, or 13%, over the third quarter of 2007, as growth in loans and declines in core deposits dictated a larger amount of funding needed from borrowings. The increase in other short-term borrowings of \$5.0 billion, partially offset by a decrease in federal funds purchased of \$2.6 billion, was utilized to meet these funding needs. Current economic conditions and market illiquidity were the primary drivers of this mix shift in the past year, causing a decrease in the availability of federal funds. Growth in other short-term borrowings occurred primarily through FHLB advances and Term Auction Facility funds.

Long-term debt at September 30, 2008 was consistent with December 31, 2007 as debt issuances during the first and second quarters of 2008 were offset by \$2.1 billion of long-term bank notes maturing during the third quarter of 2008. In February 2008, the Bancorp issued \$1.0 billion of 8.25% subordinated notes, a portion of which were subsequently hedged to floating, with a maturity date of March 1, 2038. In April 2008, the Bancorp issued \$750 million of 6.25% senior notes with a maturity date of May 1, 2013. The notes are not subject to redemption at the Bancorp's option at any time prior to maturity. Additionally, in May 2008, a deconsolidated trust issued \$400 million of Tier 1-qualifying trust preferred securities and invested these proceeds in junior subordinated notes issued by the Bancorp. The notes mature on May 15, 2068 and bear a fixed rate of 8.875% until May 15, 2058. After May 15, 2058, the notes bear interest at a variable rate of three-month LIBOR plus 5.00%. The Bancorp has subsequently entered into hedges related to these notes.

Information on the average rates paid on borrowings is located in the Statements of Income Analysis. In addition, refer to the Liquidity Risk Management section for a discussion on the role of borrowings in the Bancorp's liquidity management.

Quantitative and Qualitative Disclosures About Market Risk (Item 3)

RISK MANAGEMENT OVERVIEW

Managing risk is an essential component of successfully operating a financial services company. The Bancorp's risk management function is responsible for the identification, measurement, monitoring, control and reporting of risk and mitigation of those risks that are inconsistent with the Bancorp's risk profile. The Enterprise Risk Management division (ERM), led by the Bancorp's Chief Risk Officer, ensures consistency in the Bancorp's approach to managing and monitoring risk within the structure of the Bancorp's affiliate operating model. In addition, the Internal Audit division provides an independent assessment of the Bancorp's internal control structure and related systems and processes. The risks faced by the Bancorp include, but are not limited to, credit, market, liquidity, operational and regulatory compliance. ERM includes the following key functions:

Risk Policy ensures consistency in the approach to risk management as the Bancorp's clearinghouse for credit, market and operational risk policies, procedures and guidelines;

Credit Risk Review responsible for evaluating the sufficiency of underwriting, documentation and approval processes for consumer and commercial credits, counter-party credit risk, the accuracy of risk grades assigned to commercial credit exposure, and appropriate accounting for charge-offs, non-accrual status and specific reserves and reports directly to the Risk and Compliance Committee of the Board of Directors;

Consumer Credit Risk Management responsible for credit risk management in consumer lending, including oversight of underwriting and credit administration processes as well as analytics and reporting functions;

Capital Markets Risk Management responsible for establishing and monitoring proprietary trading limits, monitoring liquidity and interest rate risk and utilizing value at risk and earnings at risk models;

Compliance Risk Management responsible for oversight of compliance with all banking regulations;

Operational Risk Management responsible for enterprise operational risk programs such as risk self-assessments, new products review, the key risk indicator program, and root cause analysis and corrective action plans relating to identified operational losses;

Bank Protection responsible for fraud prevention and detection, and investigations and recovery;

Insurance Risk Management responsible for all property, casualty and liability insurance policies including the claims administration process for the Bancorp;

Investment Advisors Risk Management responsible for trust compliance, fiduciary risk, trading risk and credit risk in the Investment Advisors line of business; and

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

Risk Strategies and Reporting responsible for quantitative analytics and Board of Directors and senior management reporting on credit, market and operational risk metrics.

Designated risk managers have been assigned to all business lines. Affiliate risk management is handled by regional risk managers who are responsible for multiple affiliates and who report to ERM.

Risk management oversight and governance is provided by the Risk and Compliance Committee of the Board of Directors and through multiple management committees whose membership includes a broad cross-section of line of business, affiliate and support representatives. The Risk and Compliance Committee of the Board of Directors consists of five outside directors and has the responsibility for the oversight of credit, market, operational, regulatory compliance and strategic risk management activities for the Bancorp, as well as for the Bancorp's overall aggregate risk profile. The Risk and Compliance Committee of the Board of Directors has approved the formation of key management governance committees that are responsible for evaluating risks and controls. These committees include the Market Risk Committee, the Corporate Credit Committee, the Credit Policy Committee, the Operational Risk Committee and the Executive Asset Liability Committee. There are also new products and initiatives processes applicable to every line of business to ensure an appropriate standard readiness assessment is performed before launching a new product or initiative. Significant risk policies approved by the management governance committees are also reviewed and approved by the Risk and Compliance Committee of the Board of Directors.

Table of Contents**Quantitative and Qualitative Disclosures About Market Risk (continued)****CREDIT RISK MANAGEMENT**

The objective of the Bancorp's credit risk management strategy is to quantify and manage credit risk on an aggregate portfolio basis, as well as to limit the risk of loss resulting from an individual customer default. The Bancorp's credit risk management strategy is based on three core principles: conservatism, diversification and monitoring. The Bancorp believes that effective credit risk management begins with conservative lending practices. These practices include conservative exposure and counterparty limits and conservative underwriting, documentation and collection standards. The Bancorp's credit risk management strategy also emphasizes diversification on a geographic, industry and customer level as well as regular credit examinations and monthly management reviews of large credit exposures and credits experiencing deterioration of credit quality. Lending officers with the authority to extend credit are delegated specific authority amounts, the utilization of which is closely monitored. Underwriting activities are centralized, while ERM manages the policy and the authority delegation process directly. The Credit Risk Review function, within ERM, provides objective assessments of the quality of underwriting and documentation, the accuracy of risk grades and the charge-off, nonaccrual and reserve analysis process. The Bancorp's credit review process and overall assessment of required allowances is based on quarterly assessments of the probable estimated losses inherent in the loan and lease portfolio. The Bancorp uses these assessments to promptly identify potential problem loans or leases within the portfolio, maintain an adequate reserve and take any necessary charge-offs. In addition to the individual review of larger commercial loans that exhibit probable or observed credit weaknesses, the commercial credit review process includes the use of two risk grading systems. The risk grading system currently utilized for reserve analysis purposes encompasses ten categories. The Bancorp also maintains a dual risk rating system that provides for thirteen probabilities of default grade categories and an additional six grade categories for estimating actual losses given an event of default. The probability of default and loss given default evaluations are not separated in the ten-grade risk rating system. The Bancorp is in the process of completing significant validation and testing of the dual risk rating system prior to its implementation for reserve analysis purposes. The dual risk rating system is expected to be consistent with Basel II expectations and allows for more precision in the analysis of commercial credit risk. Scoring systems, various analytical tools and delinquency monitoring are used to assess the credit risk in the Bancorp's homogenous consumer loan portfolios.

Commercial Portfolio

The Bancorp's credit risk management strategy includes minimizing concentrations of risk through diversification. Table 23 provides breakouts of the total commercial loan and lease portfolio, including held for sale, by major industry classification (as defined by the North American Industry Classification System), by loan size and by state, illustrating the diversity and granularity of the Bancorp's portfolio. Table 24 provides further information on the location of commercial real estate and construction industry loans and leases.

At September 30, 2008, homebuilder exposure represents the most significant weakness in the commercial portfolio. As of September 30, 2008, the Bancorp had homebuilder exposure of \$4.3 billion and outstanding loans of \$3.1 billion with \$702 million in nonaccrual loans. As of September 30, 2008, approximately 41% of the outstanding loans to homebuilders are located in the states of Michigan and Florida and represent approximately 59% of the nonaccrual loans. As of December 31, 2007, the Bancorp had homebuilder exposure of \$4.4 billion, outstanding loans of \$2.9 billion with \$176 million in nonaccrual loans. The increase in homebuilder balances during 2008 is primarily attributable to the acquisition of First Charter.

Table of Contents**Quantitative and Qualitative Disclosures About Market Risk (continued)****Residential Mortgage Portfolio**

The Bancorp manages credit risk in the mortgage portfolio through conservative underwriting and documentation standards and geographic and product diversification. The Bancorp may also package and sell loans in the portfolio without recourse or may purchase mortgage insurance for the loans sold in order to mitigate credit risk.

Certain mortgage products have contractual features that may increase the risk of loss to the Bancorp in the event of a decline in housing prices. These types of mortgage products offered by the Bancorp include loans with high loan-to-value (LTV) ratios, multiple loans on the same collateral that when combined result in a high LTV (80/20) and interest-only loans. Table 25 shows the Bancorp's originations of these products for the three and nine months ended September 30, 2008 and 2007. The Bancorp does not originate mortgage loans that permit customers to defer principal payments or make payments that are less than the accruing interest.

TABLE 25: Residential Mortgage Originations

(\$ in millions)	2008		2007	
	Amount	Percent of total	Amount	Percent of total
For the three months ended September 30:				
Greater than 80% LTV with no mortgage insurance	\$ 4	%	\$ 45	2%
Interest-only	98	5	438	16
80/20 loans	1		66	2
For the nine months ended September 30:				
Greater than 80% LTV with no mortgage insurance	14		243	3
Interest-only	721	8	1,496	17
Greater than 80% LTV and interest-only	2		19	
80/20 loans	36		177	2
80/20 loans and interest-only			44	1

Table 26 provides the amount of these loans as a percent of the residential mortgage loans in the Bancorp's portfolio and the delinquency rates of these loan products as of September 30, 2008 and 2007. Reset of rates on adjustable rate mortgages are not expected to have a material impact on credit cost as two-thirds of adjustable rate mortgages have an LTV less than 80%. Geographically, the Bancorp's residential mortgage portfolio is dominated by three states with Florida, Ohio and Michigan representing 30%, 24% and 14% of the portfolio, respectively.

TABLE 26: Residential Mortgage Outstandings

As of September 30 (\$ in millions)	2008			2007		
	Amount	Percent of total	Delinquency Ratio	Amount	Percent of total	Delinquency Ratio
Greater than 80% LTV with no mortgage insurance	\$ 2,060	22%	9.72%	\$ 1,855	21%	6.89%
Interest-only	1,686	18	2.83	1,567	18	1.44
Greater than 80% LTV and interest-only	424	5	7.51	514	6	3.68
80/20 loans	1					

The Bancorp previously originated certain non-conforming residential mortgage loans known as Alt-A loans. Borrower qualifications were comparable to other conforming residential mortgage products. As of September 30, 2008, the Bancorp held \$118 million of Alt-A mortgage loans in its portfolio with approximately \$13 million in nonaccrual.

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

The Bancorp previously sold certain mortgage products in the secondary market with recourse. The outstanding balances and delinquency rates for those loans sold with recourse as of September 30, 2008 and 2007 were \$1.4 billion and 4.98%, and \$1.6 billion and 2.36%, respectively. The Bancorp maintained an estimated credit loss reserve of approximately \$13 million and \$18 million relating to these residential mortgage loans sold at September 30, 2008 and 2007, respectively.

Home Equity Portfolio

The home equity portfolio is characterized by 73% of outstanding balances within the Bancorp's Midwest footprint of Ohio, Michigan, Kentucky, Indiana and Illinois. The portfolio has an average FICO score of 735 as of September 30, 2008, comparable with 734 at September 30, 2007. Further detail on location and origination LTV ratios is included in Table 27.

Table of Contents**Quantitative and Qualitative Disclosures About Market Risk (continued)****TABLE 27: Home Equity Outstandings**

As of September 30 (\$ in millions)	2008			2007		
	LTV less than 80%	LTV greater than 80%	Delinquency Ratio	LTV less than 80%	LTV greater than 80%	Delinquency Ratio
Ohio	\$ 1,922	2,011	1.45%	\$ 1,876	2,057	1.44%
Michigan	1,415	1,279	2.31	1,411	1,305	2.02

Illinois	763	567	1.84	614	545	1.53
Kentucky	520	566	1.65	502	599	1.47
Florida	665	293	3.34	446	246	2.19
All other states	424	951	2.81	166	687	2.83
Total	\$ 6,328	6,271	2.05%	\$ 5,650	6,087	1.78%

As of September 30, 2008 the home equity portfolio contains \$2.4 billion, or 19%, of brokered home equity balances primarily located in the Midwest. The Bancorp stopped origination of this product in 2007.

Analysis of Nonperforming Assets

A summary of nonperforming assets is included in Table 28. Nonperforming assets include: (i) nonaccrual loans and leases for which ultimate collectibility of the full amount of the principal and/or interest is uncertain; (ii) restructured consumer loans which have not yet met the requirements to be classified as a performing asset; and (iii) other assets, including other real estate owned and repossessed equipment. Loans are placed on nonaccrual status when the principal or interest is past due 90 days or more (unless the loan is both well secured and in process of collection) and payment of the full principal and/or interest under the contractual terms of the loan is not expected. Additionally, loans are placed on nonaccrual status upon deterioration of the financial condition of the borrower or upon the restructuring of the loan. When a loan is placed on nonaccrual status, the accrual of interest, amortization of loan premium, accretion of loan discount and amortization or accretion of deferred net loan fees or costs are discontinued and previously accrued but unpaid interest is reversed. Commercial loans on nonaccrual status are reviewed for impairment at least quarterly. If the principal or a portion of principal is deemed a loss, the loss amount is charged off to the allowance for loan and lease losses.

Total nonperforming assets were \$2.8 billion at September 30, 2008, compared to \$1.1 billion at December 31, 2007 and \$706 million at September 30, 2007. Nonperforming assets as a percentage of total loans, leases and other assets, including other real estate owned, as of September 30, 2008 was 3.30% compared to 1.32% as of December 31, 2007 and .92% as of September 30, 2007. The composition of nonaccrual credits continues to be concentrated in real estate as 82% of nonaccrual credits were secured by real estate as of September 30, 2008 compared to approximately 84% as of December 31, 2007 and approximately 74% as of September 30, 2007.

Commercial nonaccrual credits increased from \$431 million at September 30, 2007 and \$672 million at December 31, 2007 to \$1.9 billion as of September 30, 2008. Sequentially, commercial nonaccrual credits increased \$447 million, or 30%. The majority of the increase was driven by the real estate and construction industries in the states of Florida and Michigan. These states combined represent 57% of total commercial nonaccrual credits as of September 30, 2008. As shown in Table 23, the real estate and construction industries contributed to approximately three-fourths of the year-over-year increase in nonaccrual credits. Of the \$1.4 billion of real estate and construction nonaccrual credits, \$702 million is related to homebuilders or developers. During 2008, due to the deterioration in real estate prices in Michigan and Florida, the Bancorp has charged off \$239 million against the loans that make up homebuilder and developer nonaccrual credits and, as of September 30, 2008, has provided an additional \$142 million in reserves held against these loans. For additional information on credit reserves, see the discussion on allowance for credit losses later in this section.

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

Consumer nonaccrual credits increased from \$138 million as of September 30, 2007 and \$221 million as of December 31, 2007 to \$673 million as of September 30, 2008. Sequentially, consumer nonaccrual credits increased \$171 million, or 34%. The increase in consumer nonperforming assets is primarily attributable to declines in the housing markets in the Michigan and Florida markets and the restructuring of certain high risk loans. Michigan and Florida accounted for 52% of the increase in consumer nonperforming assets and, as of September 30, 2008, represented 58% of total consumer nonperforming assets. The Bancorp has devoted significant attention to loss mitigation activities and has proactively restructured certain loans. Consumer restructured loans are recorded as nonaccrual credits until there is a sustained period of payment by the borrower, generally a minimum of six months of payments in accordance with the loans' modified terms. Consumer restructured loans contributed approximately \$427 million to nonaccrual loans as of September 30, 2008 compared to \$22 million in restructured loans as of September 30, 2007.

Table of Contents**Quantitative and Qualitative Disclosures About Market Risk (continued)****TABLE 28: Summary of Nonperforming Assets and Delinquent Loans**

Allowance for loan and lease losses as a percent of total nonperforming assets	73	88	117

(a) Information for all periods presented excludes advances made pursuant to servicing agreements to Government National Mortgage Association (GNMA) mortgage pools whose repayments are insured by the Federal Housing Administration or guaranteed by the Department of Veterans Affairs. As of September 30, 2008, December 31, 2007 and September 30, 2007, these advances were \$32 million, \$25 million and \$19 million, respectively.

Analysis of Net Charge-offs

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

Net charge-offs as a percent of average loans and leases were 217 bp for the third quarter of 2008, compared to 89 bp for the fourth quarter of 2007 and 60 bp for the third quarter of 2007. Table 29 provides a summary of credit loss experience and net charge-offs as a percentage of average loans and leases outstanding by loan category.

The ratio of commercial loan net charge-offs to average commercial loans outstanding increased to 207 bp in the third quarter of 2008 compared to 66 bp in the fourth quarter of 2007 and 33 bp in the third quarter of 2007, as homebuilders, developers and related suppliers were affected by the downturn in the real estate markets. Charge-offs for the third quarter of 2008 included \$163 million, or 61%, related to homebuilders and developers.

The ratio of consumer loan net charge-offs to average consumer loans outstanding increased to 233 bp in the third quarter of 2008 compared to 118 bp in the fourth quarter of 2007 and 93 bp in the third quarter of 2007. Residential mortgage charge-offs increased to \$77 million in the third quarter of 2008 compared to \$18 million in the fourth quarter of 2007 and \$9 million in the third quarter of 2007, reflecting increased foreclosure rates in the Bancorp's key lending markets coupled with an increase in severity of loss on mortgage loans. Florida, Michigan and Ohio continue to rank among the top states in total mortgage foreclosures. These foreclosures not only added to the volume of charge-offs, but also hampered the Bancorp's ability to recover the value of the homes collateralizing the mortgages as they contributed to declining home prices. Florida affiliates continue to experience the most stress and accounted for over half of the residential mortgage charge-offs in the third quarter. While Michigan residential mortgage charge-offs remain elevated above historical norms, there was no increase in charge-offs in the third quarter of 2008 compared to the first and second quarters of 2008. Home equity charge-offs increased to \$55 million and 177 bp of average loans, primarily due to increases in the Michigan and Florida affiliates and among those products originated through a broker channel. Brokered home equity loans represented 54% of home equity charge-offs during the third quarter of 2008 despite representing 19% of home equity lines and loans as of September 30, 2008. Management responded to the performance of the brokered home equity portfolio by reducing originations

Table of Contents**Quantitative and Qualitative Disclosures About Market Risk (continued)**

in 2007 of this product by 64% compared to 2006 and, at the end of 2007, eliminating this channel of origination. Management actively manages lines of credits and makes reductions in lending limits when it believes it is necessary based on FICO score deterioration and property devaluation. The ratio of automobile loan net charge-offs to average automobile loans was 151 bp for the third quarter of 2008, an increase of 60 bp compared to the third quarter 2007 displaying an expected increase due to a shift in the portfolio to a higher percentage of used automobiles and an increase in loss severity due to increased market depreciation of used automobiles. The net charge-off ratio on credit card balances increased compared to the same quarter last year as the Bancorp increased originations of card balances throughout the past year. The credit characteristics of the credit card portfolio have been maintained during the origination of new cards, including the weighted average FICO and average line outstanding, however, the Bancorp does expect the charge-off ratio to increase as the portfolio matures. The Bancorp employs a risk-adjusted pricing methodology to help ensure adequate compensation is received for those products that have higher credit costs.

TABLE 29: Summary of Credit Loss Experience

(\$ in millions)	For the three months ended September 30,		For the nine months ended September 30,

Total net losses charged off	2.17%	.60	1.74%	.51

Table of Contents**Quantitative and Qualitative Disclosures About Market Risk (continued)****Allowance for Credit Losses**

The allowance for credit losses is comprised of the allowance for loan and lease losses and the reserve for unfunded commitments. The allowance for loan and lease losses provides coverage for probable and estimable losses in the loan and lease portfolio. The Bancorp evaluates the allowance each quarter to determine its adequacy to cover inherent losses. Several factors are taken into consideration in the determination of the overall allowance for loan and lease losses, including an unallocated component. These factors include, but are not limited to, the overall risk profile of the loan and lease portfolios, net charge-off experience, the extent of impaired loans and leases, the level of nonaccrual loans and leases, the level of 90 days past due loans and leases and the overall percentage level of the allowance for loan and lease losses. The Bancorp also considers overall asset quality trends, credit administration and portfolio management practices, risk identification practices, credit policy and underwriting practices, overall portfolio growth, portfolio concentrations and current national and local economic conditions that might impact the portfolio. The Bancorp continues to monitor recent developments in the credit markets.

In the current year, the Bancorp has not substantively changed any material aspect of its overall approach in the determination of the allowance for loan and lease losses and there have been no material changes in assumptions or estimation techniques as compared to prior periods that impacted the determination of the current period allowance. In addition to the allowance for loan and lease losses, the Bancorp maintains a reserve for unfunded commitments recorded in other liabilities in the Condensed Consolidated Balance Sheets. The methodology used to determine the adequacy of this reserve is similar to the Bancorp's methodology for determining the allowance for loan and lease losses. The provision for unfunded commitments is included in other noninterest expense in the Condensed Consolidated Statements of Income.

TABLE 30: Changes in Allowance for Credit Losses

(\$ in millions)	For the three months ended September 30,		For the nine months ended September 30,	
	2008	2007	2008	2007
Allowance for loan and lease losses:				
Beginning balance	\$ 1,580	803	\$ 937	771
Net losses charged off	(463)	(115)	(1,082)	(288)
Provision for loan and lease losses	941	139	2,203	344
Ending balance	\$ 2,058	827	\$ 2,058	827
Reserve for unfunded commitments:				
Beginning balance	\$ 115	77	\$ 95	76
Provision for unfunded commitments	17	2	35	3
Acquisitions			2	
Ending balance	\$ 132	79	\$ 132	79

The allowance for loan and lease losses as a percent of the total loan and lease portfolio increased to 2.41% at September 30, 2008, compared to 1.17% at December 31, 2007 and 1.08% at September 30, 2007. This increase is reflective of a number of factors including: the increase in delinquencies, increased loss estimates due to the real estate price deterioration in some of the Bancorp's key lending markets and declines in general economic conditions. These factors were the primary drivers of the increased reserve amounts for most of the Bancorp's loan categories.

As discussed previously, nonperforming assets increased to \$2.8 billion as of September 30, 2008. Impaired commercial loans increased \$752 million from the fourth quarter of 2007; impaired commercial loans above specified thresholds require individual review to determine loan and lease reserves. Delinquency trends also increased across most product lines and credit grades from the prior year leading to increases in loss factors for those products.

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

Real estate price deterioration, as measured by the Home Price Index, was most prevalent in Florida due to past real estate price appreciation, and related over-development, and in Michigan due in part to cutbacks by automobile manufacturers. The year-over-year deterioration in home prices has been as high as 20% in some of the Bancorp's hardest hit geographies. The deterioration in real estate values increased the expected loss once a loan became delinquent, particularly for residential mortgage, home equity and residential homebuilder loans with high loan-to-value ratios.

Compared to the prior year, negative trends in general economic conditions, as measured by items such as unemployment rate, home sales and inventory, consumer price index and bankruptcy filings in the national and local economies, also caused increases in reserve factors used to determine the losses inherent within the loan and lease portfolio.

The Bancorp continually reviews its credit administration and loan and lease portfolio and makes changes based on the performance of its products. Over the past year, the Bancorp has reduced its lending to homebuilders and developers and borrowers with non-owner occupied real estate as collateral, eliminated brokered home equity production and engaged in significant loss mitigation strategies.

Table of Contents

Quantitative and Qualitative Disclosures About Market Risk (continued)

MARKET RISK MANAGEMENT

Market risk arises from the potential for market fluctuations in interest rates, foreign exchange rates and equity prices that may result in potential reductions in net income. Interest rate risk, a component of market risk, is the exposure to adverse changes in net interest income or financial position due to changes in interest rates. Management considers interest rate risk a prominent market risk in terms of its potential impact on earnings. Interest rate risk can occur for any one or more of the following reasons:

Assets and liabilities may mature or reprice at different times;

Short-term and long-term market interest rates may change by different amounts; or

The expected maturity of various assets or liabilities may shorten or lengthen as interest rates change.

In addition to the direct impact of interest rate changes on net interest income, interest rates can indirectly impact earnings through their effect on loan demand, credit losses, mortgage originations, the value of servicing rights and other sources of the Bancorp's earnings. Stability of the Bancorp's net income is largely dependent upon the effective management of interest rate risk. Management continually reviews the Bancorp's balance sheet composition and earnings flows and models the interest rate risk, and possible actions to reduce this risk, given numerous possible future interest rate scenarios.

Earnings Simulation Model

The Bancorp employs a variety of measurement techniques to identify and manage its interest rate risk, including the use of an earnings simulation model to analyze the sensitivity of net interest income and certain noninterest items to changing interest rates. The model is based on contractual and assumed cash flows and repricing characteristics for all of the Bancorp's financial instruments, and incorporates market-based assumptions regarding the effect of changing interest rates on the prepayment rates of certain assets and liabilities. The model also includes senior management projections of the future volume and pricing of each of the product lines offered by the Bancorp as well as other pertinent assumptions. Actual results will differ from these simulated results due to timing, magnitude and frequency of interest rate changes as well as changes in market conditions and management strategies.

The Bancorp's Executive Asset Liability Committee (ALCO), which includes senior management representatives and is accountable to the Risk and Compliance Committee of the Board of Directors, monitors and manages interest rate risk within Board approved policy limits. In addition to the risk management activities of ALCO, the Bancorp has a Market Risk Management function as part of ERM that provides independent oversight of market risk activities. The Bancorp's current interest rate risk exposure is evaluated by measuring the anticipated change in net interest income and mortgage banking net revenue over 12-month and 24-month horizons assuming a 200 bp parallel ramped increase and a 100 bp parallel ramped increase or decrease in interest rates. The Fed Funds interest rate would be negative in a 200 bp parallel ramped decrease scenario; therefore, that scenario was omitted from all interest rate risk analyses in the third quarter of 2008. In accordance with the current policy, the rate movements are assumed to occur over one year and are sustained thereafter.

The following table shows the Bancorp's estimated earnings sensitivity profile and ALCO policy limits as of September 30, 2008:

TABLE 31: Estimated Earnings Sensitivity Profile

Change in Earnings (FTE)

ALCO Policy Limits

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

Change in Interest Rates (bp)	12 Months	13 to 24 Months	12 Months	13 to 24 Months
+200	.11%	2.10	(5.00)	(7.00)
+100	(.06)	.65		
-100	(1.44)	(3.28)	(5.00) (a)	(7.00) (a)

(a) (5.00) and (7.00) are the 200 bp policy limits. There are no specific policy limits for the 100 bp scenario.

Economic Value of Equity

The Bancorp also employs economic value of equity (EVE) as a measurement tool in managing interest rate risk. Whereas the earnings simulation highlights exposures over a relatively short time horizon, the EVE analysis incorporates all cash flows over the estimated remaining life of all balance sheet and derivative positions. The EVE of the balance sheet, at a point in time, is defined as the discounted present value of asset and derivative cash flows less the discounted value of liability cash flows. The sensitivity of EVE to changes in the level of interest rates is a measure of longer-term interest rate risk. In contrast to the earnings simulation, which assumes interest rates will change over a period of time, EVE uses instantaneous changes in rates. EVE values only the current balance sheet and does not incorporate the growth assumptions used in the earnings simulation model. As with the earnings simulation model, assumptions about the timing and variability of balance sheet cash flows are critical in the EVE analysis. Particularly important are the assumptions driving prepayments and the expected changes in balances and pricing of the transaction deposit portfolios.

Table of Contents**Quantitative and Qualitative Disclosures About Market Risk (continued)**

The following table shows the Bancorp's EVE sensitivity profile and the ALCO policy limits as of September 30, 2008:

TABLE 32: Estimated EVE Sensitivity Profile

Change in Interest Rates (bp)	Change in EVE	ALCO Policy Limits
+200	(4.2)%	(20.0)
+100	(1.7)	
-100	(.3)	(20.0) (a)

(a) (20.0) is the 200 bp policy limit. There is no specific policy limit for the 100 bp scenario.

While an instantaneous shift in interest rates is used in this analysis to provide an estimate of exposure, the Bancorp believes that a gradual shift in interest rates would have a much more modest impact. Since EVE measures the discounted present value of cash flows over the estimated lives of instruments, the change in EVE does not directly correlate to the degree that earnings would be impacted over a shorter time horizon (i.e., the current fiscal year). Further, EVE does not take into account factors such as future balance sheet growth, changes in product mix, changes in yield curve relationships and changing product spreads that could mitigate the adverse impact of changes in interest rates. The earnings simulation and EVE analyses do not necessarily include certain actions that management may undertake to manage this risk in response to anticipated changes in interest rates.

Use of Derivatives to Manage Interest Rate Risk

An integral component of the Bancorp's interest rate risk management strategy is its use of derivative instruments to minimize significant fluctuations in earnings and cash flows caused by changes in market interest rates. Examples of derivative instruments that the Bancorp may use as part of its interest rate risk management strategy include interest rate swaps, interest rate floors, interest rate caps, forward contracts, principal only swaps, options and swaptions.

As part of its overall risk management strategy relative to its mortgage banking activity, the Bancorp enters into forward contracts accounted for as free-standing derivatives to economically hedge interest rate lock commitments that are also considered free-standing derivatives. In addition, the Bancorp also economically hedges its exposure to mortgage loans held for sale.

The Bancorp also establishes derivative contracts with major financial institutions to economically hedge significant exposures assumed in commercial customer accommodation derivative contracts. Generally, these contracts have similar terms in order to protect the Bancorp from market volatility. Credit risks arise from the possible inability of counterparties to meet the terms of their contracts, which the Bancorp minimizes through approvals, limits and monitoring procedures. The notional amount and fair values of these derivatives as of September 30, 2008 are included in Note 7 of the Notes to Condensed Consolidated Financial Statements.

Portfolio Loans and Leases and Interest Rate Risk

Although the Bancorp's portfolio loans and leases contain both fixed and floating/adjustable rate products, the rates of interest earned by the Bancorp on the outstanding balances are generally established for a period of time. The interest rate sensitivity of loans and leases is directly related to the length of time the rate earned is established. Table 33 summarizes the expected principal cash flows of the Bancorp's portfolio loans and leases as of September 30, 2008:

TABLE 33: Portfolio Loan and Lease Principal Cash Flows

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

(\$ in millions)	Less than 1 year	1 to 5 years	Greater than 5 years	Total
Commercial loans	\$ 15,528	11,941	1,955	\$ 29,424
Commercial mortgage loans	5,286	5,821	2,248	13,355

Total	\$ 33,605	35,336	16,557	\$ 85,498

Table of Contents**Quantitative and Qualitative Disclosures About Market Risk (continued)**

Segregated by interest rate type, the following is a summary of expected principal cash flows occurring after one year as of September 30, 2008:

TABLE 34: Portfolio Loan and Lease Principal Cash Flows Occurring After One Year

(\$ in millions)	Interest Rate	
	Fixed	Floating or Adjustable
Commercial loans	\$ 3,111	10,785
Commercial mortgage loans	3,087	4,982
Commercial construction loans	189	1,373
Commercial leases	3,050	
Subtotal commercial loans	9,437	17,140
Residential mortgage loans	4,060	3,027
Home equity	1,689	9,109
Automobile loans	5,215	42
Credit card	825	716
Other consumer loans and leases	630	3
Subtotal consumer loans	12,419	12,897
Total	\$ 21,856	30,037

Mortgage Servicing Rights and Interest Rate Risk

The net carrying amount of the MSR portfolio was \$684 million and \$621 million as of September 30, 2008 and 2007, respectively. The value of servicing rights can fluctuate sharply depending on changes in interest rates and other factors. Generally, as interest rates decline and loans are prepaid to take advantage of refinancing, the total value of existing servicing rights declines because no further servicing fees are collected on repaid loans. The Bancorp maintains a non-qualifying hedging strategy relative to its mortgage banking activity in order to manage a portion of the risk associated with changes in the value of its MSR portfolio as a result of changing interest rates.

Mortgage rates decreased during the third quarter of 2008. This decrease in rates caused prepayment assumptions to increase and led to \$23 million in temporary impairment during the three months ended September 30, 2008 compared to the \$9 million in temporary impairment in the third quarter of 2007. Servicing rights are deemed temporarily impaired when a borrower's loan rate is distinctly higher than prevailing rates. Temporary impairment on servicing rights is reversed when the prevailing rates return to a level commensurate with the borrower's loan rate. Offsetting the mortgage servicing rights valuation, the Bancorp recognized net gains of \$30 million and \$12 million on its non-qualifying hedging strategy for the three months ended September 30, 2008 and 2007, respectively. See Note 4 of the Notes to Condensed Consolidated Financial Statements for further discussion on servicing rights.

Foreign Currency Risk

The Bancorp enters into foreign exchange derivative contracts to economically hedge certain foreign denominated loans. The derivatives are classified as free-standing instruments with the revaluation gain or loss being recorded in other noninterest income in the Condensed Consolidated Statements of Income. The balance of the Bancorp's foreign denominated loans at September 30, 2008 and September 30, 2007 was approximately \$330 million and \$262 million, respectively. The Bancorp also enters into foreign exchange contracts for the benefit of commercial customers involved in international trade to hedge their exposure to foreign currency fluctuations. The Bancorp has internal controls in place to help ensure excessive risk is not being taken in providing this service to customers. These controls include an independent

determination of currency volatility and credit equivalent exposure on these contracts, counterparty credit approvals and country limits.

LIQUIDITY RISK MANAGEMENT

The goal of liquidity management is to provide adequate funds to meet changes in loan and lease demand, unexpected deposit withdrawals and other contractual obligations. Mitigating liquidity risk is accomplished by maintaining liquid assets in the form of investment securities, maintaining sufficient unused borrowing capacity in the debt markets and delivering consistent growth in core deposits. The estimated weighted-average life of the available-for-sale portfolio was 6.0 years at September 30, 2008, based on current prepayment expectations. Of the \$13.2 billion of securities in the portfolio at September 30, 2008, \$3.3 billion in principal and interest is expected to be received in the next 12 months, and an additional \$1.7 billion is expected to be received in the next 13 to 24 months. In addition to the securities portfolio, asset-driven liquidity is provided by the Bancorp's ability to sell or securitize loan and lease assets. In order to reduce the exposure to interest rate fluctuations and to manage liquidity, the Bancorp has developed securitization and sale procedures for several types of interest-sensitive assets. A majority of the long-term, fixed-rate single-family residential mortgage loans underwritten according to FHLMC or FNMA guidelines are sold for cash upon origination. Additional assets such as jumbo fixed-rate residential mortgages, certain floating rate short-term commercial loans, certain floating-rate home equity loans, certain automobile loans and other consumer loans are also capable of being securitized, sold or transferred off-balance sheet. For the three months ended September 30, 2008 and 2007, loans totaling \$2.4 billion and \$9.4 billion, respectively, were sold, securitized or transferred off-balance sheet.

Table of Contents

Quantitative and Qualitative Disclosures About Market Risk (continued)

Core deposits have historically provided the Bancorp with a sizeable source of relatively stable and low cost funds. The Bancorp's average core deposits and shareholders' equity funded 69% of its average total assets during the third quarter of 2008. In addition to core deposit funding, the Bancorp also accesses a variety of other short-term and long-term funding sources, which include the use of various regional Federal Home Loan Banks as a funding source. Certificates carrying a balance of \$100,000 or more and deposits in the Bancorp's foreign branch located in the Cayman Islands are wholesale funding tools utilized to fund asset growth. Management does not rely on any one source of liquidity and manages availability in response to changing balance sheet needs.

The Bancorp has a shelf registration in place with the SEC permitting ready access to the public debt markets and qualifies as a well-known seasoned issuer under SEC rules. As of September 30, 2008, \$4.4 billion of debt or other securities were available for issuance from this shelf registration under the current Bancorp's Board of Directors' authorizations. The Bancorp also has \$16.2 billion of funding available for issuance through private offerings of debt securities pursuant to its bank note program and currently has approximately \$14.2 billion of borrowing capacity available through secured borrowing sources including the Federal Home Loan Banks and Federal Reserve Banks. The Bancorp has no significant unsecured borrowings that will mature during the remainder of 2008 and approximately \$1.3 billion of unsecured borrowings that will mature during 2009.

CAPITAL MANAGEMENT

Management and the Bancorp's Board of Directors regularly reviews its capital position to help ensure that the Bancorp is appropriately positioned under various operating environments. Due to the deterioration in credit trends over the past year and the uncertainty involving future economic trends, on June 18, 2008, the Bancorp's Board of Directors approved the following actions to strengthen its capital position;

The issuance of approximately \$1 billion in Tier 1 capital in the form of convertible preferred shares;

A reduction in the quarterly dividend level. The Bancorp declared its third quarter cash dividend on its common stock and set the level at \$0.15 per share, a reduction from the first quarter of 2008 dividend of \$0.44 per share; and

The anticipated sale of certain non-strategic businesses that, if successfully completed, would supplement common equity capital by an estimated additional \$1 billion or more.

In addition, on October 14, 2008, the U.S. Department of Treasury announced a series of initiatives to strengthen market stability, improve the strength of financial institutions, and enhance market liquidity. Among the initiatives, the U.S. Department of Treasury created a voluntary Capital Purchase Program (CPP) as part of its efforts to provide a firmer capital foundation for financial institutions and to increase credit availability to consumers and businesses. As part of the program, eligible financial institutions will be able to sell equity interests to the U.S. Department of Treasury in amounts equal to 1 percent to 3 percent of the institution's risk-weighted assets. These equity interests will constitute Tier 1 capital. On October 28, 2008, the Bancorp received notification that the U.S. Department of Treasury intends to invest approximately \$3.45 billion in senior preferred stock and related warrants under the terms of the CPP. As of September 30, 2008, this investment would have increased the Bancorp's Tier 1 capital ratio to approximately 11.5% and the total risk-based capital ratio to approximately 15.3%. If the U.S. Department of Treasury and the Bancorp are unable to reach mutual agreement on final terms and conditions for this investment, then the Bancorp may not be able to consummate the CPP investment, or may be unable to consummate such investment on terms favorable to the Bancorp. The CPP investment would provide capital in excess of the Bancorp's previously planned levels, on terms the Bancorp believes are favorable to its investors. As a result, while the Bancorp will continue to evaluate its businesses from a strategic planning perspective, the sale of non-core assets is no longer a part of the Bancorp's near-term capital planning.

The Federal Reserve Board established quantitative measures that assign risk weightings to assets and off-balance sheet items and also define and set minimum regulatory capital requirements (risk-based capital ratios). Additionally, the guidelines define well-capitalized ratios for Tier 1 and total risk-based capital as 6% and 10%, respectively. The Bancorp exceeded these well-capitalized ratios for all periods presented.

TABLE 35: Regulatory Capital

(\$ in millions)	September 30, 2008	December 31, 2007	September 30, 2007
Tier 1 capital	\$ 9,735	8,924	9,201
Total risk-based capital	13,973	11,733	11,824
Risk-weighted assets	113,601	115,529	108,754
Regulatory capital ratios:			
Tier 1 capital	8.57%	7.72	8.46
Total risk-based capital	12.30	10.16	10.87
Tier 1 leverage	8.77	8.50	9.23

Table of Contents**Quantitative and Qualitative Disclosures About Market Risk (continued)**

At September 30, 2008, shareholders' equity was \$10.7 billion, compared to \$9.2 billion at December 31, 2007 and \$9.3 billion at September 30, 2007. Tangible equity as a percent of tangible assets was 6.19% at September 30, 2008, 6.14% at December 31, 2007 and 7.00% at September 30, 2007. The increase in shareholders' equity from the third quarter of 2007 is primarily a result of the approximately \$1.1 billion issuance of convertible preferred stock and \$770 million in shares issued in the First Charter acquisition in June 2008.

Dividend Policy and Stock Repurchase Program

The Bancorp's common stock dividend policy reflects its earnings outlook, desired payout ratios, the need to maintain adequate capital levels and alternative investment opportunities. The Bancorp's quarterly dividend for the third quarter 2008 was \$.15 per share, consistent with the \$.15 per share declared in second quarter 2008 and a decrease compared to the \$.42 per share declared in the third quarter of 2007. The decrease in the dividend provides the Bancorp with an estimated \$170 million per quarter in additional capital that may be needed during a difficult operating environment.

The Bancorp's stock repurchase strategy is an important element of its capital planning activities. The Bancorp's repurchase of equity securities is shown in Table 36. On May 21, 2007, the Bancorp announced that its Board of Directors had authorized management to purchase 30 million shares of the Bancorp's common stock through the open market or in any private transaction. The timing of the purchases and the exact number of shares to be purchased depends upon market conditions. The authorization does not include specific price targets or an expiration date. At September 30, 2008, the Bancorp had approximately 19 million shares remaining under the current Board of Directors' authorization.

As previously discussed, the Bancorp has received notification that the U.S. Department of Treasury intends to invest approximately \$3.45 billion in senior preferred stock and related warrants under the terms of the CPP. Although the Bancorp has not yet executed definitive agreements with the U.S. Department of Treasury, the Bancorp anticipates that participation in this program will impact its future ability to alter the current dividend policy and repurchase of the Bancorp's equity securities, among other restrictions.

TABLE 36: Share Repurchases

Period	Total Number of Shares Purchased (a)	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
July 1, 2008 – July 31, 2008		\$		19,201,518
August 1, 2008 – August 31, 2008				19,201,518
September 1, 2008 – September 30, 2008				19,201,518
Total		\$		19,201,518

(a) The Bancorp repurchased 346 shares during the third quarter of 2008 in connection with various employee compensation plans. These purchases are not included in the calculation for average price paid per share and do not count against the maximum number of shares that may yet be purchased under the Board of Directors' authorization.

OFF-BALANCE SHEET ARRANGEMENTS

The Bancorp consolidates all of its majority-owned subsidiaries and variable interest entities for which the Bancorp is the primary beneficiary. Other entities, including certain joint ventures in which there is greater than 20% ownership, but upon which the Bancorp does not possess and cannot exert significant influence or control, are accounted for by the equity method of accounting and not consolidated. Those entities in which

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

there is less than 20% ownership are generally carried at the lower of cost or fair value.

In the ordinary course of business, the Bancorp enters into financial transactions to extend credit, and various forms of commitments and guarantees that may be considered off-balance sheet arrangements. These transactions involve varying elements of market, credit and liquidity risk. The nature and extent of these transactions are provided in Note 8 of the Notes to Condensed Consolidated Financial Statements. In addition, the Bancorp uses conduits, asset securitizations and certain defined guarantees to provide a source of funding. The use of these investment vehicles involves differing degrees of risk. A summary of these transactions is provided below.

Through September 30, 2008 and 2007, the Bancorp had transferred, subject to credit recourse, certain primarily floating-rate, short-term, investment grade commercial loans to an unconsolidated qualified special purpose entity (QSPE) that is wholly owned by an independent third-party. Generally, the loans transferred provide a lower yield due to their investment grade nature, and therefore transferring these loans to the QSPE allows the Bancorp to reduce its exposure to these lower yielding loan assets while maintaining the customer relationships. Under current accounting provisions, QSPEs are exempt from consolidation and, therefore, not included in the Bancorp's Condensed Consolidated Financial Statements. The outstanding balance of these loans at September 30, 2008 and 2007 was \$2.5 billion and \$3.0 billion, respectively. As of September 30, 2008, the loans transferred had a weighted average life of 2.3 years. These loans may be transferred back to the Bancorp upon the occurrence of certain specified events. These events include borrower default on the loans transferred, bankruptcy preferences initiated against underlying borrowers, ineligible loans transferred

Table of Contents**Quantitative and Qualitative Disclosures About Market Risk (continued)**

by the Bancorp to the QSPE, and the ability of the QSPE to issue commercial paper. The maximum amount of credit risk in the event of nonperformance by the underlying borrowers is approximately equivalent to the total outstanding balance. During the nine months ended September 30, 2008 and 2007, the QSPE did not transfer any loans back to the Bancorp as a result of a credit event. In addition, there have been no material changes in the overall ratings of the loans transferred to the QSPE. For the nine months ended September 30, 2008, the Bancorp collected \$501 million in net cash proceeds from loan transfers and \$10 million in fees from the QSPE. For the nine months ended September 30, 2007, the Bancorp collected \$1.1 billion in cash proceeds from loan transfers and \$21 million in fees from the QSPE.

The QSPE issues commercial paper and uses the proceeds to fund the acquisition of commercial loans transferred to it by the Bancorp. The ability of the QSPE to issue commercial paper is a function of general market conditions and the credit rating of the liquidity provider. In the event the QSPE is unable to issue commercial paper, the Bancorp has agreed to provide liquidity support to the QSPE in the form of purchases of commercial paper, a line of credit to the QSPE and the repurchase of assets from the QSPE. As of September 30, 2008 and 2007, the liquidity asset purchase agreement was \$3.0 billion and \$4.0 billion, respectively. During the third quarter of 2008, the dislocation in the short-term funding market continued, causing the QSPE difficulty in obtaining sufficient funding through the issuance of commercial paper. As a result, the Bancorp provided liquidity support to the QSPE during the third quarter through purchases of commercial paper, a line of credit to the QSPE, and the repurchase of assets from the QSPE under the liquidity asset purchase agreement. As of September 30, 2008, the Bancorp held approximately \$1.0 billion of asset-backed commercial paper issued by the QSPE, representing 39% of the total commercial paper issued by the QSPE.

During the third quarter of 2008, the Bancorp repurchased \$513 million of commercial loans at par from the QSPE under the liquidity asset purchase agreement. A fair value adjustment charge of \$3 million was recorded on the loans in the third quarter upon repurchase. As of September 30, 2008, there were no delinquent repurchased loans. As of September 30, 2008, there were no outstanding balances on the line of credit from the Bancorp to the QSPE. At September 30, 2008 and 2007, the Bancorp's loss reserve related to the liquidity support and credit enhancement provided to the QSPE was \$27 million and \$13 million, respectively, and was recorded in other liabilities in the Condensed Consolidated Balance Sheets. To determine the credit loss reserve, the Bancorp used an approach that is consistent with its overall approach in estimating credit losses for various categories of residential mortgage loans held in its loan portfolio.

The Bancorp utilizes securitization trusts and conduits, formed as QSPEs, to facilitate the securitization process of certain floating-rate home equity lines of credit and certain automobile loans. In each of the securitization trusts and conduits, the Bancorp sold the loans without recourse and does not maintain control over the assets. The Bancorp's securitization policy permits the retention of subordinated tranches, servicing rights, interest-only strips and residual interests. The cash flows to and from the securitization trusts and QSPEs are principally limited to the initial proceeds from the securitization trust at the time of sale, with subsequent cash flows relating to interests that continue to be held by the Bancorp. At September 30, 2008, the Bancorp had retained servicing assets totaling \$1 million, subordinated tranche security interests totaling \$61 million and residual interests totaling \$149 million. At September 30, 2007, the Bancorp had retained servicing assets totaling \$2 million, subordinated tranche security interests totaling \$4 million and residual interests totaling \$11 million. For the nine months ended September 30, 2008 and 2007, cash proceeds from transfers reinvested in revolving-period securities totaled \$56 million and \$55 million, respectively. Additionally, for the nine months ended September 30, 2008 and 2007, the Bancorp received fees of \$8 million and \$2 million, respectively, from securitization trusts and conduits. See Note 4 of the Notes to Condensed Consolidated Financial Statements for more information on securitizations and the interests that continue to be held by the Bancorp.

At September 30, 2008 and 2007, the Bancorp had provided credit recourse on approximately \$1.4 billion and \$1.6 billion, respectively, of residential mortgage loans previously sold to unrelated third parties. In the event of any customer default, pursuant to the credit recourse provided, the Bancorp is required to reimburse the third party. The maximum amount of credit risk in the event of nonperformance by the underlying borrowers is equivalent to the total outstanding balance. In the event of nonperformance, the Bancorp has rights to the underlying collateral value attached to the loan. The Bancorp maintained an estimated credit loss reserve of approximately \$13 million and \$18 million relating to these residential mortgage loans sold at September 30, 2008 and 2007, respectively. To determine the credit loss reserve, the Bancorp used an approach that is consistent with its overall approach in estimating credit losses for various categories of residential mortgage loans held in its loan portfolio.

Table of Contents

Controls and Procedures (Item 4)

The Bancorp conducted an evaluation, under the supervision and with the participation of the Bancorp's management, including the Bancorp's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Bancorp's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act). Based on the foregoing, as of the end of the period covered by this report, the Bancorp's Chief Executive Officer and Chief Financial Officer concluded that the Bancorp's disclosure controls and procedures were effective, at the reasonable assurance level, to ensure that information required to be disclosed in the reports the Bancorp files and submits under the Exchange Act is recorded, processed, summarized and reported as and when required and to provide reasonable assurance that information required to be disclosed by the Bancorp in such reports is accumulated and communicated to the Bancorp's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

The Bancorp's management also conducted an evaluation of internal control over financial reporting to determine whether any changes occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, the Bancorp's internal control over financial reporting. Based on this evaluation, there has been no such change during the period covered by this report.

See Notes to Condensed Consolidated Financial Statements.

Table of Contents**Fifth Third Bancorp and Subsidiaries****Notes to Condensed Consolidated Financial Statements (unaudited)****1. Basis of Presentation**

The Condensed Consolidated Financial Statements include the accounts of the Bancorp and its majority-owned subsidiaries and variable interest entities in which the Bancorp has been determined to be the primary beneficiary. Other entities, including certain joint ventures, in which there is greater than 20% ownership, but upon which the Bancorp does not possess and cannot exert significant influence or control, are accounted for by the equity method and not consolidated; those in which there is less than 20% ownership are generally carried at the lower of cost or fair value. Intercompany transactions and balances have been eliminated.

In the opinion of management, the unaudited Condensed Consolidated Financial Statements include all adjustments, which consist of normal recurring accruals, necessary to present fairly the financial position as of September 30, 2008 and 2007, the results of operations for the three and nine months ended September 30, 2008 and 2007, the cash flows for the nine months ended September 30, 2008 and 2007 and the changes in shareholders' equity for the nine months ended September 30, 2008 and 2007. In accordance with accounting principles generally accepted in the United States of America and the rules and regulations of the United States Securities and Exchange Commission for interim financial information, these statements do not include certain information and footnote disclosures required for complete annual financial statements and it is suggested that these condensed financial statements be read in conjunction with the latest annual financial statements. The results of operations for the three and nine months ended September 30, 2008 and 2007 and the cash flows for the nine months ended September 30, 2008 and 2007 are not necessarily indicative of the results to be expected for the full year. Financial information as of December 31, 2007 has been derived from the annual Consolidated Financial Statements of the Bancorp.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates. Certain reclassifications have been made to prior periods' Condensed Consolidated Financial Statements and related notes to conform to the current period presentation.

2. New Accounting Pronouncements

In July 2006, the FASB issued FASB Staff Position (FSP) No. FAS 13-2, Accounting for a Change or Projected Change in the Timing of Cash Flows Relating to Income Taxes Generated by a Leveraged Lease Transaction. This FSP addresses the accounting for a change or projected change in the timing of lessor cash flows, but not the total net income, relating to income taxes generated by a leveraged lease transaction. This FSP amends SFAS No. 13, Accounting for Leases, and applies to all transactions classified as leveraged leases. The timing of cash flows relating to income taxes generated by a leveraged lease is an important assumption that affects the periodic income recognized by the lessor. Under this FSP, the projected timing of income tax cash flows generated by a leveraged lease transaction are required to be reviewed annually or more frequently if events or circumstances indicate that a change in timing has occurred or is projected to occur during the lease term. If the expected timing of the income tax cash flows generated by a leveraged lease is revised, the rate of return and the allocation of income would be recalculated from the inception of the lease. In the year of adoption, the cumulative effect of the change in the net investment balance resulting from the recalculation will be recognized as an adjustment to the beginning balance of retained earnings. On an ongoing basis following the adoption, a change in the net investment balance resulting from a recalculation will be recognized as a gain or a loss in the period in which the assumption changed and included in income from continuing operations in the same line item where leveraged lease income is recognized. These amounts would then be recognized back into income over the remaining terms of the affected leases. Additionally, upon adoption, only tax positions that meet the more-likely-than-not recognition threshold should be reflected in the financial statements and all recognized tax positions in a leveraged lease must be measured in accordance with FIN 48, Accounting for Uncertainty in Income Taxes An Interpretation of FASB Statement No. 109, issued in July 2006. Upon adoption of this FSP on January 1, 2007, the Bancorp recognized an after-tax adjustment to beginning retained earnings of \$96 million representing the cumulative effect of applying the provisions of this FSP. Furthermore, due to recent court decisions related to leveraged leases and uncertainty regarding the outcome of outstanding litigation involving certain of the Bancorp's leveraged leases, the Bancorp recognized after-tax charges relating to leveraged leases of \$229 million and \$3 million in the second and third quarters of 2008, respectively. See Note 9 for additional information.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements. This Statement defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. This Statement emphasizes that fair value is a market-based measurement and should be determined based on assumptions that a market participant would use when pricing an asset or liability. This Statement clarifies that market participant assumptions should include assumptions about risk as well as the effect of a restriction on the sale or use of an asset. Additionally, this Statement establishes a fair value hierarchy that provides the highest priority to quoted prices in active markets and the lowest priority to unobservable data. This Statement was effective for fiscal years beginning after November 15, 2007, and interim

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

periods within those fiscal years. The adoption of SFAS No. 157 on January 1, 2008 did not have a material effect on the Bancorp's Condensed Consolidated Financial Statements. In February 2008, the FASB issued FSP No. FAS 157-2, "Effective Date of FASB Statement No. 157", which delayed the effective date of SFAS No. 157 for non-financial assets and non-financial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually), to fiscal years beginning after November 15, 2008. In October 2008, the FASB issued FSP No. FAS 157-3, "Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active", which clarifies the application of SFAS No. 157 in a market that is not active. FSP No. FAS 157-3 was effective upon issuance, including prior periods for which financial statements had not been issued. The adoption of FSP No. FAS 157-3 did not have a material impact on the Bancorp's Condensed Consolidated Financial Statements.

Table of Contents**Fifth Third Bancorp and Subsidiaries****Notes to Condensed Consolidated Financial Statements (continued)**

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities – Including an Amendment of FASB Statement No. 115*. This Statement permits an entity to choose to measure certain financial instruments and certain other items at fair value, on an instrument-by-instrument basis. Once an entity has elected to record eligible items at fair value, the decision is irrevocable and the entity should report unrealized gains and losses on items for which the fair value option has been elected in earnings. On January 1, 2008, upon adoption of this Statement, the Bancorp elected to prospectively measure at fair value, residential mortgage loans originated on or after January 1, 2008 that have a designation as held for sale. Based on this prospective election, the adoption of the fair value option did not have a material effect on the Bancorp's Condensed Consolidated Financial Statements.

In December 2007, the FASB issued SFAS No. 141(R), *Business Combinations* which replaces SFAS No. 141, *Business Combinations*. This Statement retains the fundamental requirements in SFAS No. 141 that the acquisition method of accounting (formerly referred to as purchase method) be used for all business combinations and that an acquirer be identified for each business combination. SFAS No. 141(R) defines the acquirer as the entity that obtains control of one or more businesses in the business combination and establishes the acquisition date as of the date that the acquirer achieves control. This Statement requires an acquirer to recognize the assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree at the acquisition date, measured at their fair values. SFAS No. 141(R) requires the acquirer to generally recognize acquisition-related costs and restructuring costs separately from the business combination as period expenses. This Statement is effective for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008, with early adoption prohibited.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements – an Amendment to ARB No. 51*. This Statement establishes new accounting and reporting standards that require the ownership interests in subsidiaries held by parties other than the parent be clearly identified, labeled, and presented in the consolidated statement of financial position within equity, but separate from the parent's equity. SFAS No. 160 also requires the amount of consolidated net income attributable to the parent and to the noncontrolling interest be clearly identified and presented on the face of the consolidated statement of income. In addition, when a subsidiary is deconsolidated, any retained noncontrolling equity investment in the former subsidiary shall be initially measured at fair value, with the gain or loss on the deconsolidation of the subsidiary measured using the fair value of any noncontrolling equity investment rather than the carrying amount of that retained investment. SFAS No. 160 also clarifies that changes in a parent's ownership interest in a subsidiary that do not result in deconsolidation are equity transactions if the parent retains its controlling financial interest. The Statement also includes expanded disclosure requirements regarding the interests of the parent and its noncontrolling interest. SFAS No. 160 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008, with early adoption prohibited. The adoption of this Statement is not expected to have a material impact on the Bancorp's Condensed Consolidated Financial Statements.

In June 2008, the FASB issued FSP No. EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities*. This FSP provides that unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and shall be included in the computation of earnings per share pursuant to the two-class method described in paragraphs 60 and 61 of SFAS No. 128, *Earnings per Share*. This FSP is effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those years. All prior-period earnings per share data presented shall be adjusted retrospectively (including interim financial statements, summaries of earnings, and selected financial data) to conform with the provisions of this FSP. Early application is not permitted. The Bancorp's adoption of this FSP on January 1, 2009 is not expected to have a material impact on Bancorp's Condensed Consolidated Financial Statements.

In June 2008, the Emerging Issues Task Force issued EITF Issue No. 07-5, *Determining Whether an Instrument (or Embedded Feature) Is Indexed to an Entity's Own Stock*. This Issue provides guidance an entity should use to evaluate whether an equity-linked financial instrument (or embedded feature) is indexed to its own stock. This Issue is effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within that period. Early adoption is not permitted. The Bancorp is currently in the process of evaluating the impact of adopting this Issue on the Bancorp's Condensed Consolidated Financial Statements.

In November 2007, the SEC issued Staff Accounting Bulletin (SAB) No. 109, *Written Loan Commitments Recorded at Fair Value through Earnings*. This SAB supersedes SAB No. 105, *Application of Accounting Principles to Loan Commitments*, and expresses the current view of

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

the staff that, consistent with guidance in SFAS No. 156 and SFAS No. 159, the expected net future cash flows related to the associated servicing of a loan should be included in the measurement of all written loan commitments that are accounted for at fair value through earnings. Additionally, this SAB expands the SAB No. 105 view that internally-developed intangible assets should not be recorded as part of the fair value for any written loan commitments that are accounted for at fair value through earnings. This SAB was effective for fiscal quarters beginning after December 15, 2007. The adoption of SAB 109 on January 1, 2008 did not have a material impact on the Bancorp's Condensed Consolidated Financial Statements.

Table of Contents**Fifth Third Bancorp and Subsidiaries****Notes to Condensed Consolidated Financial Statements (continued)**

In September 2008, the FASB issued FSP FAS 133-1 and FIN 45-4, Disclosures about Credit Derivatives and Certain Guarantees. An Amendment of FASB Statement No. 133 and FASB Interpretation No. 45; and Clarification of the Effective Date of FASB Statement No. 161. This FSP applies to: (a) credit derivatives within the scope of SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities; (b) hybrid instruments that have embedded credit derivatives; and (c) guarantees within the scope of FIN No. 45, Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others. This FSP amends SFAS No. 133 to require disclosures by sellers of credit derivatives, including credit derivatives embedded in a hybrid instrument similar to the disclosures required by FIN 45. This FSP also amends FIN 45 to require an additional disclosure about the current status of the payment/performance risk of a guarantee. In addition, this FSP clarifies the FASB's intent that the disclosures required by SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities, should be provided for any reporting period (annual or interim) beginning after November 15, 2008. The provisions of this FSP that amend SFAS No. 133 and FIN 45 are effective for reporting periods (annual or interim) ending after November 15, 2008.

3. Intangible Assets and Goodwill

Intangible assets consist of servicing rights, core deposit intangibles, customer lists, non-compete agreements and cardholder relationships. Intangible assets, excluding servicing rights, are amortized on either a straight-line or an accelerated basis over their estimated useful lives and have an estimated weighted-average life at September 30, 2008 of 3.8 years. The Bancorp reviews intangible assets for possible impairment whenever events or changes in circumstances indicate that carrying amounts may not be recoverable. The details of the Bancorp's intangible assets are shown in the following table. For further information on servicing rights, see Note 4.

(\$ in millions)	Gross Carrying Amount	Accumulated Amortization	Valuation Allowance	Net Carrying Amount
As of September 30, 2008:				
Mortgage servicing rights	\$ 1,573	(841)	(48)	684
Other consumer and commercial servicing rights	14	(11)		3
Core deposit intangibles	485	(333)		152
Other	67	(31)		36
Total intangible assets	\$ 2,139	(1,216)	(48)	875
As of December 31, 2007:				
Mortgage servicing rights	\$ 1,417	(755)	(49)	613
Other consumer and commercial servicing rights	24	(19)		5
Core deposit intangibles	430	(302)		128
Other	44	(25)		19
Total intangible assets	\$ 1,915	(1,101)	(49)	765
As of September 30, 2007:				
Mortgage servicing rights	\$ 1,372	(730)	(21)	621
Other consumer and commercial servicing rights	24	(19)		5
Core deposit intangibles	410	(293)		117
Other	46	(25)		21
Total intangible assets	\$ 1,852	(1,067)	(21)	764

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

As of September 30, 2008, all of the Bancorp's intangible assets were being amortized. Amortization expense recognized on intangible assets, including servicing rights, for the three months ended September 30, 2008 and 2007 was \$39 million and \$33 million, respectively. For the nine months ended September 30, 2008 and 2007, amortization expense was \$127 million and \$99 million, respectively.

Estimated amortization expense, including servicing rights, for the years ending December 31, 2008 through 2012 is as follows:

(\$ in millions)	
2008 (a)	\$ 152
2009	137
2010	117
2011	88
2012	73

(a) Includes nine months actual and three months estimated.

Table of Contents**Fifth Third Bancorp and Subsidiaries****Notes to Condensed Consolidated Financial Statements (continued)**

Changes in the net carrying amount of goodwill by reporting segment for the nine months ended September 30, 2008 and 2007 were as follows:

(\$ in millions)	Commercial Banking	Branch Banking	Consumer Lending	Processing Solutions	Investment Advisors	Total
Balance as of December 31, 2007	\$ 995	950	182	205	138	2,470
Acquisition activity	375	704	33		10	1,122
Balance as of September 30, 2008	\$ 1,370	1,654	215	205	148	3,592
Balance as of December 31, 2006	\$ 871	797	182	205	138	2,193
Acquisition activity		(1)				(1)
Balance as of September 30, 2007	\$ 871	796	182	205	138	2,192

The Bancorp completed its annual goodwill impairment test as of September 30, 2008 and determined that no impairment existed. The Bancorp evaluates goodwill at the segment level for impairment. Acquisition activity includes acquisitions in the respective period in addition to purchase accounting adjustments related to previous acquisitions. During 2008, purchase accounting adjustments were made relating to the initial goodwill recorded from prior acquisitions. During the second quarter of 2008, the Bancorp acquired First Charter, which resulted in the recognition of \$1.1 billion of goodwill and \$56 million of core deposit intangibles.

4. Sales of Receivables and Servicing Rights

The Bancorp sold fixed and adjustable rate residential mortgage loans during 2008 and 2007. In those sales, the Bancorp obtained servicing responsibilities. The Bancorp receives annual servicing fees based on a percentage of the outstanding balance. The investors have no recourse to the Bancorp's other assets for failure of debtors to pay when due. The Bancorp identifies classes of servicing assets based on financial asset type and interest rates. For the three months ended September 30, 2008 and 2007, the Bancorp recognized pre-tax gains of \$43 million and \$9 million, respectively, on origination fees and the sales of residential mortgage loans. Additionally, the Bancorp recognized \$39 million and \$37 million, respectively, in servicing fees on residential mortgages for the three months ended September 30, 2008 and 2007. For the nine months ended September 30, 2008 and 2007, the Bancorp recognized pre-tax gains of \$214 million and \$61 million, respectively, on origination fees and the sales of residential mortgage loans. Additionally, the Bancorp recognized \$122 million and \$105 million in servicing fees on residential mortgages for the nine months ended September 30, 2008 and 2007, respectively. The gains on sales of residential mortgages and servicing fees related to residential mortgages are included in mortgage banking net revenue in the Condensed Consolidated Statements of Income. Initial carrying values of servicing rights recognized during the nine months ended September 30, 2008 and 2007 were \$156 million and \$162 million, respectively.

During the first quarter of 2008, the Bancorp securitized and sold \$2.7 billion of automobile loans in three separate transactions. Each transaction isolated the related loans through the use of a securitization trust or a conduit, formed as QSPEs, to facilitate the securitization process in accordance with SFAS No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities. The Bancorp recognized pre-tax gains of \$15 million on the sale of automobile loans offset by \$26 million in losses on related hedges. In each of those sales, the Bancorp obtained servicing responsibility, but no servicing asset or liability was recorded as the market based servicing fee was considered adequate compensation. The initial carrying amounts of the interests that continue to be held by the Bancorp were estimated at the date of the sales using discounted projected cash flows. As of September 30, 2008, the Bancorp held automobile-related subordinated tranche security interests totaling \$60 million and related residual interests totaling \$141 million. These interests are net of a \$12 million impairment charge recognized during the three months ended September 30, 2008 as a result of a decline in estimated cash flows.

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

The key economic assumptions used in measuring the initial carrying values of the mortgage interests and automobile residual interests that continue to be held by the Bancorp were as follows:

	Rate	September 30, 2008			September 30, 2007			Weighted-Average Default Rate	
		Weighted-Average Life (in years)	Prepayment Speed (annual)	Discount Rate (annual)	Weighted-Average Life (in years)	Prepayment Speed (annual)	Discount Rate (annual)		
Residential mortgage loans:									
Servicing assets	Fixed	7.0	11.8%	9.6%	N/A	6.8	9.9%	9.7%	N/A
Servicing assets	Adjustable	2.9	29.8	11.0	N/A	3.3	26.2	12.5	N/A
Automobile loans:									
Residual interest	Fixed	1.8	22.9	8.0	1.5%	N/A	N/A	N/A	N/A

During 2008 and 2007, the Bancorp sold student loans and certain commercial loans and obtained servicing responsibilities. In addition, the Bancorp transferred certain commercial loans to an unconsolidated QSPE that is wholly owned by an independent third party. See Note 8 for further information. At September 30, 2008 and 2007, the value of the servicing asset and subordinated interests related to these sales were immaterial to the Bancorp's Condensed Consolidated Financial Statements.

Table of Contents**Fifth Third Bancorp and Subsidiaries****Notes to Condensed Consolidated Financial Statements (continued)**

Based on historical credit experience, expected credit losses for residential mortgage loan servicing assets have been deemed immaterial. At September 30, 2008 and 2007, the Bancorp serviced \$39.8 billion and \$33.1 billion, respectively, of residential mortgage loans for other investors.

The value of interests that continue to be held by the Bancorp is subject to credit, prepayment and interest rate risks on the sold financial assets. At September 30, 2008, the sensitivity of a decline in the current fair value of residual cash flows to immediate 10% and 20% adverse changes in those assumptions are as follows:

(\$ in millions)	Rate	Fair Value	Weighted Average Life (in years)	Prepayment Speed Assumption		Residual Servicing Cash Flows			Weighted-Average Default		
				Rate	Impact of Adverse Change on Fair Value	Discount Rate	Impact of Adverse Change on Fair Value	Rate	Impact of Adverse Change on Fair Value	Rate	Impact of Adverse Change on Fair Value
Residential mortgage loans:											
Servicing assets	Fixed	\$ 655	6.4	11.2%	\$ 27	52	9.8%	\$ 25	48	%	\$
Servicing assets	Adjustable	44	2.3	29.6	3	6	11.8	1	2		
Automobile loans:											
Residual interest	Fixed	\$ 141	2.0	23.9%	\$ 3	6	11.4%	\$ 3	7	1.6%	\$ 3 6

These sensitivities are hypothetical and should be used with caution as changes in fair value based on a 10% variation in assumptions typically cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, in the previous table, the effect of a variation in a particular assumption on the fair value of the interests that continue to be held by the transferor is calculated without changing any other assumption; in reality, changes in one factor may result in changes in another. For example, increases in market interest rates may result in lower prepayments and increased credit losses, which might magnify or counteract the sensitivities.

Changes in the servicing asset related to residential mortgage loans for the nine months ended September 30 were:

(\$ in millions)	2008	2007
Carrying amount as of the beginning of period	\$ 662	546
Servicing obligations that result from transfer of residential mortgage loans	155	162
Acquisitions	1	
Amortization	(86)	(66)
Carrying amount before valuation allowance	\$ 732	642
Valuation allowance for servicing assets:		
Beginning balance	\$ (49)	(27)
Servicing valuation recovery	1	6
Ending balance	(48)	(21)

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

Carrying amount as of the end of the period **\$ 684** 621

Temporary impairment or impairment recovery, effected through a change in the MSR valuation allowance, is captured as a component of mortgage banking net revenue in the Condensed Consolidated Statements of Income.

The fair value of the servicing asset is based on the present value of expected future cash flows. The following table displays the beginning and ending fair value for the nine months ended September 30:

(\$ in millions)	2008	2007
Fixed rate residential mortgage loans:		
Fair value at beginning of period (December 31, 2007 and 2006)	\$ 565	483
Fair value at end of period	655	586
Adjustable rate residential mortgage loans:		
Fair value at beginning of period (December 31, 2007 and 2006)	50	45
Fair value at end of period	44	50

The Bancorp maintains a non-qualifying hedging strategy to manage a portion of the risk associated with changes in value of the MSR portfolio. This strategy includes the purchase of free-standing derivatives (principal-only swaps, swaptions and interest rate swaps) and various available-for-sale securities (primarily principal-only strips). The interest income, mark-to-market adjustments

Table of Contents**Fifth Third Bancorp and Subsidiaries****Notes to Condensed Consolidated Financial Statements (continued)**

and gain or loss from sale activities associated with these portfolios are expected to economically hedge a portion of the change in value of the MSR portfolio caused by fluctuating discount rates, earnings rates and prepayment speeds. For the nine months ended September 30, 2008, the Bancorp recognized a net gain of \$24 million, classified as a securities gains in noninterest income, related to sales of available-for-sale securities purchased to economically hedge the MSR portfolio and net loss of \$23 million, classified as mortgage banking net revenue in noninterest income, related to changes in fair value and settlement of free-standing derivatives purchased to economically hedge the MSR portfolio. For the nine months ended September 30, 2007, the Bancorp recognized a net gain of \$1 million related to changes in fair value and settlement of free-standing derivatives purchased to economically hedge the MSR portfolio. There was no gain or loss recognized for the nine months ended September 30, 2007 related to sales of available-for-sale securities purchased to economically hedge the MSR portfolio. See Note 7 for information on the types and amount of free-standing derivatives used to economically hedge the MSR portfolio. As of September 30, 2008 and 2007, the available-for-sale securities portfolio included \$1.1 billion and \$314 million, respectively, of securities related to the non-qualifying hedging strategy.

5. Loans Acquired in a Transfer

In 2008 and 2007, the Bancorp acquired certain loans, primarily related to the Crown and First Charter acquisitions, for which there was evidence of deterioration of credit quality since origination and for which it was probable, at acquisition, that all contractually required payments would not be collected. These loans were evaluated either individually or segregated into pools based on common risk characteristics and accounted for under Statement of Position 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer (SOP 03-3). SOP 03-3 requires acquired loans within its scope to be recorded at fair value and prohibits carrying over valuation allowances when applying purchase accounting. Loans carried at fair value, mortgage loans held for sale and loans under revolving credit agreements are excluded from the scope of SOP 03-3. During the three and nine months ended September 30, 2008, the Bancorp recorded provision expense for loans accounted for under SOP 03-3 of \$11 million and \$18 million, respectively, in the Condensed Consolidated Statements of Income. As of September 30, 2008, the Bancorp maintained an allowance for loan and lease losses of \$6 million on loans accounted for under SOP 03-3.

The following table reflects the outstanding balance of all contractually required payments and carrying amount of those loans accounted for under SOP 03-3 as of:

(\$ in millions)	September 30, 2008	December 31, 2007
Commercial	\$ 129	\$ 94
Consumer	98	135
Outstanding balance	\$ 227	\$ 229
Carrying amount	\$ 107	\$ 101

At the acquisition date, the Bancorp determines the excess of the loans contractually required payments over all cash flows expected to be collected as an amount that should not be accreted into interest income (nonaccretable difference). The remaining amount representing the difference in the expected cash flows of acquired loans and the basis in the acquired loans is accreted into interest income over the remaining life of the loan or pool of loans (accretable yield). A summary of activity is provided below.

(\$ in millions)	Accretable Yield
Balance as of December 31, 2007	\$ 6

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

Additions	5
Accretion	(10)
Reclassifications from (to) nonaccretable difference	7
Balance as of September 30, 2008	\$ 8

The following table reflects loans acquired, for which it was probable at acquisition that all contractually required payments would not be collected as of:

(\$ in millions)	September 30, 2008	December 31, 2007
Contractually required payments receivable at acquisition date:		
Commercial	\$ 63	\$ 99
Consumer	34	136
Total	\$ 97	\$ 235
Cash flows expected to be collected at acquisition date	\$ 44	\$ 113
Fair value of acquired loans at acquisition date	39	105

Table of Contents

Fifth Third Bancorp and Subsidiaries

Notes to Condensed Consolidated Financial Statements (continued)

6. Bank-Owned Life Insurance

The Bancorp purchases life insurance policies on the lives of certain directors, officers and employees and is the owner and beneficiary of the policies. The Bancorp invests in these policies, known as BOLI, to provide an efficient form of funding for long-term retirement and other employee benefits costs. Therefore, the Bancorp's BOLI policies are intended to be long-term investments to provide funding for future payment of long-term liabilities. The Bancorp records these BOLI policies within other assets in the Condensed Consolidated Balance Sheets at each policy's respective cash surrender value, with changes recorded in noninterest income in the Condensed Consolidated Statements of Income.

Certain BOLI policies have a stable value agreement through either a large, well-rated bank or multi-national insurance carrier that provides limited cash surrender value protection from declines in the value of each policy's underlying investments. During the second half of 2007 and throughout 2008, the value of the investments underlying one of the Bancorp's BOLI policies declined significantly due to disruptions in the credit markets, widening of credit spreads between U.S. treasuries/swaps versus municipal bonds and bank trust preferred securities, and illiquidity in the asset-backed securities market. These factors caused the decline in the cash surrender value to exceed the protection provided by the stable value agreement.

As a result of further exceeding the cash surrender value protection, the Bancorp recorded a charge of \$27 million during the third quarter of 2008 and \$181 million for the nine months ended September 30, 2008 to reflect the change in cash surrender value related to this BOLI policy. The cash surrender value of the policy was \$324 million at September 30, 2008 and may increase or decrease further depending on the impact of market conditions on the underlying investments.

At September 30, 2008, the cash surrender value protection had not been exceeded for any other BOLI policies.

7. Derivative Financial Instruments

The Bancorp maintains an overall risk management strategy that incorporates the use of derivative instruments to reduce certain risks related to interest rate, prepayment and foreign currency volatility. Additionally, the Bancorp holds derivative instruments for the benefit of its commercial customers. The Bancorp does not enter into derivative instruments for speculative purposes.

The Bancorp's interest rate risk management strategy involves modifying the repricing characteristics of certain financial instruments so that changes in interest rates do not adversely affect the net interest margin and cash flows. Derivative instruments that the Bancorp may use as part of its interest rate risk management strategy include interest rate swaps, interest rate floors, interest rate caps, forward contracts, options and swaptions. Interest rate swap contracts are exchanges of interest payments, such as fixed-rate payments for floating-rate payments, based on a common notional amount and maturity date. Interest rate floors protect against declining rates, while interest rate caps protect against rising interest rates. Forward contracts are contracts in which the buyer agrees to purchase, and the seller agrees to make delivery of, a specific financial instrument at a predetermined price or yield. Options provide the purchaser with the right, but not the obligation, to purchase or sell a contracted item during a specified period at an agreed upon price. Swaptions are financial instruments granting the owner the right, but not the obligation, to enter into or cancel a swap.

Prepayment volatility arises mostly from changes in fair value of the largely fixed-rate MSR portfolio, mortgage loans and mortgage-backed securities. The Bancorp may enter into various free-standing derivatives (principal-only swaps, swaptions, floors, options and interest rate swaps) to economically hedge prepayment volatility. Principal-only swaps are total return swaps based on changes in the value of the underlying mortgage principal-only trust.

Foreign currency volatility occurs as the Bancorp enters into certain foreign denominated loans. Derivative instruments that the Bancorp may use to economically hedge these foreign denominated loans include foreign exchange swaps and forward contracts.

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

The Bancorp also enters into derivative contracts (including foreign exchange contracts, commodity contracts and interest rate swaps, floors and caps) for the benefit of commercial customers. The Bancorp may economically hedge significant exposures related to these free-standing derivatives by entering into offsetting third-party contracts with approved, reputable counterparties with substantially matching terms and currencies. Credit risk arises from the possible inability of counterparties to meet the terms of their contracts. The Bancorp's exposure is limited to the replacement value of the contracts rather than the notional, principal or contract amounts. The Bancorp minimizes the credit risk through credit approvals, limits, counterparty collateral and monitoring procedures.

The Bancorp holds certain derivative instruments that qualify for hedge accounting treatment under SFAS No. 133 and are designated as fair value hedges or cash flow hedges. Derivative instruments that do not qualify for hedge accounting treatment under SFAS No. 133, or for which hedge accounting is not established, are held as free-standing derivatives and provide the Bancorp an economic hedge. All customer accommodation derivatives are held as free-standing derivatives.

Table of Contents**Fifth Third Bancorp and Subsidiaries****Notes to Condensed Consolidated Financial Statements (continued)*****Fair Value Hedges***

The Bancorp may enter into interest rate swaps to convert its fixed-rate, long-term debt to floating-rate debt. Decisions to convert fixed-rate debt to floating are made primarily through consideration of the asset/liability mix of the Bancorp, the desired asset/liability sensitivity and interest rate levels. For the three and nine months ended September 30, 2008 and 2007, certain interest rate swaps met the criteria required to qualify for the shortcut method of accounting. Based on this shortcut method of accounting treatment, no ineffectiveness is assumed. For interest rate swaps that do not meet the shortcut requirements, an assessment of hedge effectiveness was performed and such swaps were accounted for using the long-haul method. The long-haul method requires a quarterly assessment of hedge effectiveness and measurement of ineffectiveness. For interest rate swaps accounted for as a fair value hedge using the long-haul method, ineffectiveness is the difference between the changes in the fair value of the interest rate swap and changes in fair value of the long-term debt attributable to the risk being hedged. The ineffectiveness on interest rate swaps hedging long-term debt is reported within interest expense in the Condensed Consolidated Statements of Income.

The following table reflects the change in fair value for interest rate contracts and the related hedged items included in the Condensed Consolidated Statements of Income:

(\$ in millions)	Income statement caption	For the three months ended September 30,		For the nine months ended September 30,	
		2008	2007	2008	2007
Interest rate contracts:					
Change in fair value on interest rate swaps derivative	Interest on long-term debt	\$ 69	83	\$ 62	108
Change in fair value on long-term debt hedged item	Interest on long-term debt	(60)	(83)	(51)	(111)

The Bancorp previously entered into forward contracts that met the criteria for fair value hedge accounting to hedge its residential mortgage loans held for sale. Upon adoption of SFAS No. 159 on January 1, 2008 and the Bancorp's election to carry residential mortgage loans held for sale at fair value, all new forward contracts held to hedge its residential mortgage loans held for sale were held as free-standing derivative instruments. For the three and nine months ended September 30, 2007, the ineffectiveness of the hedging relationships related to residential mortgage loans held for sale was insignificant to the Bancorp's Condensed Consolidated Statements of Income.

The following table reflects fair value hedges included in the Condensed Consolidated Balance Sheets:

(\$ in millions)	September 30, 2008		December 31, 2007		September 30, 2007	
	Notional Amount	Fair Value	Notional Amount	Fair Value	Notional Amount	Fair Value
Interest rate contracts included in other assets:						
Interest rate swaps related to debt	\$ 3,705	\$ 127	3,000	67	500	9
Forward contracts related to mortgage loans held for sale			183	1	489	2
Total included in other assets		\$ 127		68		11
Interest rate contracts included in other liabilities:						
Interest rate swaps related to debt	\$ 1,725	\$ 19	775	21	2,575	77
Forward contracts related to mortgage loans held for sale			511	4	896	8
Total included in other liabilities		\$ 19		25		85

During 2006, the Bancorp terminated interest rate swaps designated as fair value hedges and, in accordance with SFAS No. 133, an amount equal to the cumulative fair value adjustment to the hedged items at the date of termination will be amortized as an adjustment to interest expense over the remaining term of the long-term debt. For the three months ended September 30, 2008 and 2007, \$1 million and \$2 million in net deferred losses on the terminated fair value hedges were amortized into interest expense, respectively. For the nine months ended September 30, 2008 and 2007, \$6 million and \$8 million, respectively, in net deferred losses on the terminated fair value hedges were amortized into interest expense.

Cash Flow Hedges

The Bancorp may enter into interest rate swaps to convert floating-rate assets and liabilities to fixed rates or to hedge certain forecasted transactions. The assets or liabilities are typically grouped and share the same risk exposure for which they are being hedged. The Bancorp may also enter into interest rate caps and floors to limit cash flow variability of floating rate assets and liabilities. As of September 30, 2008, all hedges designated as cash flow hedges are assessed for effectiveness using regression analysis. Ineffectiveness is generally measured as the amount by which the cumulative change in the fair value of the hedging instrument exceeds the present value of the cumulative change in the hedged item's expected cash flows. Ineffectiveness is reported within other noninterest income in the Condensed Consolidated Statements of Income.

The effective portion of the gains or losses on derivative contracts are reported within accumulated other comprehensive income and are reclassified from accumulated other comprehensive income to current period earnings when the forecasted transaction affects

Table of Contents**Fifth Third Bancorp and Subsidiaries****Notes to Condensed Consolidated Financial Statements (continued)**

earnings. Reclassified gains and losses on interest rate floors related to commercial loans and interest rate caps related to debt are recorded within interest income and interest expense, respectively. As of September 30, 2008, \$40 million of deferred gains, net of tax, on cash flow hedges are recorded in accumulated other comprehensive income.

The following table presents the net gains (losses) recorded in the Condensed Consolidated Statements of Income and accumulated other comprehensive income relating to cash flow derivative instruments:

(\$ in millions)	Amount of gain (loss) recognized in OCI		Amount of gain (loss) reclassified from OCI into net interest income		Amount of ineffectiveness recognized in other noninterest income	
	2008	2007	2008	2007	2008	2007
For the three months ended September 30:						
Interest rate contracts	\$ 17	23	8	2	1	(1)
For the nine months ended September 30:						
Interest rate contracts	25	12	2	1	1	(1)

As of September 30, 2008, \$6 million in net deferred gains, net of tax, recorded in accumulated other comprehensive income are expected to be reclassified into earnings during the next twelve months.

The following table reflects the notional amount and fair value of all cash flow hedges included in the Condensed Consolidated Balance Sheets:

(\$ in millions)	September 30, 2008		December 31, 2007		September 30, 2007	
	Notional Amount	Fair Value	Notional Amount	Fair Value	Notional Amount	Fair Value
Interest rate contracts included in other assets:						
Interest rate floors related to commercial loans	\$ 1,500	\$ 113	1,500	107	1,500	67
Interest rate caps related to debt	1,750	12	1,750	11	1,750	20
Total included in other assets		\$ 125		118		87
Interest rate contracts included in other liabilities:						
Interest rate swaps related to consumer loans	\$	\$	1,000	11	1,000	8
Total included in other liabilities		\$		11		8

Free-Standing Derivative Instruments Risk Management

The Bancorp enters into foreign exchange derivative contracts to economically hedge certain foreign denominated loans. Derivative instruments that the Bancorp may use to economically hedge these foreign denominated loans include foreign exchange swaps and forward contracts. The Bancorp does not designate these instruments against the foreign denominated loans, and therefore, does not obtain hedge accounting treatment. Revaluation gains and losses on such foreign currency derivative contracts are recorded within other noninterest income in the Condensed Consolidated Statements of Income, as are revaluation gains and losses on foreign denominated loans.

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

As part of its overall risk management strategy relative to its mortgage banking activity, the Bancorp may enter into various free-standing derivatives (principal-only swaps, swaptions, floors, options and interest rate swaps) to economically hedge changes in fair value of its largely fixed-rate MSR portfolio. Principal-only swaps hedge the mortgage-LIBOR spread because these swaps appreciate in value as a result of tightening spreads. Principal-only swaps also provide prepayment protection by increasing in value when prepayment speeds increase, as opposed to MSRs that lose value in a faster prepayment environment. Receive fixed/pay floating interest rate swaps and swaptions increase in value when interest rates do not increase as quickly as expected. The Bancorp enters into forward contracts to economically hedge the change in fair value of certain residential mortgage loans held for sale due to changes in interest rates. The Bancorp may also enter into forward swaps to economically hedge the change in fair value of certain commercial mortgage loans held for sale due to changes in interest rates. Interest rate lock commitments issued on residential mortgage loan commitments that will be held for resale are also considered free-standing derivative instruments and the interest rate exposure on these commitments is economically hedged primarily with forward contracts. The Bancorp also enters into risk participation agreements, which are included in interest rate contracts for customers, to share some of the credit exposure with other counterparties related to interest rate derivative contracts or to take on credit exposure for interest rate derivative contracts. The Bancorp only enters into these risk participation agreements in instances in which the Bancorp has participated in the loan that the interest rate derivative contract was designed to hedge. The Bancorp will make/receive payments under these guarantees if a customer defaults on its obligation to perform under certain credit agreements.

Revaluation gains and losses from free-standing derivatives related to mortgage banking activity are recorded as a component of mortgage banking net revenue in the Condensed Consolidated Statements of Income.

Table of Contents**Fifth Third Bancorp and Subsidiaries****Notes to Condensed Consolidated Financial Statements (continued)**

Additionally, the Bancorp occasionally may enter into free-standing derivative instruments (options, swaptions and interest rate swaps) in order to minimize significant fluctuations in earnings and cash flows caused by interest rate volatility. The gains and losses on these derivative contracts are recorded within other noninterest income in the Condensed Consolidated Statements of Income.

The net gains (losses) recorded in the Condensed Consolidated Statements of Income relating to free-standing derivative instruments used for risk management are summarized below:

(\$ in millions)	Income Statement Caption	For the three months ended September 30,		For the nine months ended September 30,	
		2008	2007	2008	2007

Free-Standing Derivative Instruments Customer Accommodation

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

The majority of the free-standing derivative instruments the Bancorp enters into are for the benefit of commercial customers. These derivative contracts are not designated against specific assets or liabilities on the Condensed Consolidated Balance Sheets or to forecasted transactions and, therefore, do not qualify for hedge accounting. These instruments include foreign exchange derivative contracts entered into for the benefit of commercial customers involved in international trade to hedge their exposure to foreign currency fluctuations, commodity contracts to hedge such items as natural gas and various other derivative contracts. The Bancorp may economically hedge significant exposures related to these derivative contracts entered into for the benefit of customers by entering into offsetting contracts with approved, reputable, independent counterparties with substantially matching terms. The Bancorp hedges its interest rate exposure on commercial customer transactions by executing offsetting swap agreements with primary dealers. Revaluation gains and losses on foreign exchange, commodity and other commercial customer derivative contracts are recorded as a component of corporate banking revenue in the Condensed Consolidated Statements of Income.

The Bancorp previously offered its customers an equity-linked certificate of deposit that had a return linked to equity indices. Under SFAS No. 133, a certificate of deposit that pays interest based on changes on an equity index is a hybrid instrument that requires separation into a host contract (the certificate of deposit) and an embedded derivative contract (written equity call option). The Bancorp entered into an offsetting derivative contract to economically hedge the exposure taken through the issuance of equity-linked certificates of deposit. Both the embedded derivative and derivative contract entered into by the Bancorp were recorded as free-standing derivatives and recorded at fair value with offsetting gains and losses recognized within noninterest income in the Condensed Consolidated Statements of Income.

Table of Contents**Fifth Third Bancorp and Subsidiaries****Notes to Condensed Consolidated Financial Statements (continued)**

The net gains (losses) recorded in the Condensed Consolidated Statements of Income relating to free-standing derivative instruments used for customer accommodation are summarized in the following table:

(\$ in millions)	Income Statement Caption	For the three months ended		For the nine months ended	
		September 30, 2008	September 30, 2007	September 30, 2008	September 30, 2007

8. Commitments, Contingent Liabilities and Guarantees

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

The Bancorp, in the normal course of business, enters into financial instruments and various agreements to meet the financing needs of its customers. The Bancorp also enters in certain transactions and agreements to manage its interest rate and prepayment risks, provide funding, equipment and locations for its operations and invest in its communities. These instruments and agreements involve, to varying degrees, elements of credit risk, counterparty risk and market risk in excess of the amounts recognized in the Bancorp's Condensed Consolidated Balance Sheets. Creditworthiness for all instruments and agreements is evaluated on a case-by-case basis in accordance with the Bancorp's credit policies. The Bancorp's significant commitments, contingent liabilities and guarantees in excess of the amounts recognized in the Condensed Consolidated Balance Sheets are summarized as follows:

Commitments

The Bancorp has certain commitments to make future payments under contracts. A summary of significant commitments at September 30:

(\$ in millions)	2008	2007
Commitments to extend credit	\$ 50,301	47,072
Letters of credit (including standby letters of credit)	8,899	8,330
Forward contracts to sell mortgage loans	1,695	1,552
Noncancelable lease obligations	910	770
Purchase obligations	87	60
Capital expenditures	83	92

Table of Contents

Fifth Third Bancorp and Subsidiaries

Notes to Condensed Consolidated Financial Statements (continued)

Commitments to extend credit are agreements to lend, typically having fixed expiration dates or other termination clauses that may require payment of a fee. Since many of the commitments to extend credit may expire without being drawn upon, the total commitment amounts do not necessarily represent future cash flow requirements. The Bancorp is exposed to credit risk in the event of nonperformance for the amount of the contract. Fixed-rate commitments are also subject to market risk resulting from fluctuations in interest rates and the Bancorp's exposure is limited to the replacement value of those commitments. As of September 30, 2008 and 2007, the Bancorp had a reserve for probable credit losses on unfunded commitments totaling \$132 million and \$79 million, respectively, included in other liabilities in the Condensed Consolidated Balance Sheets.

Standby and commercial letters of credit are conditional commitments issued to guarantee the performance of a customer to a third party. At September 30, 2008, approximately \$3.2 billion of standby letters of credit expire within one year, \$5.3 billion expire between one to five years and \$0.4 billion expire thereafter. At September 30, 2008, letters of credit of approximately \$53 million were issued to commercial customers for a duration of one year or less to facilitate trade payments in domestic and foreign currency transactions. At September 30, 2008, the reserve related to these standby letters of credit was \$2 million. Approximately 69% and 72% of the total standby letters of credit were secured as of September 30, 2008 and 2007, respectively. In the event of nonperformance by the customers, the Bancorp has rights to the underlying collateral, which can include commercial real estate, physical plant and property, inventory, receivables, cash and marketable securities.

At September 30, 2008, the Bancorp had outstanding letters of credit that were supporting certain securities issued as variable rate demand notes (VRDNs). The Bancorp facilitates financing for its commercial customers, which consist of companies and municipalities, by marketing the VRDNs to investors. The VRDNs pay interest to holders at a rate of interest that fluctuates based upon market demand. The VRDNs generally have long-term maturity dates, but can be tendered by the holder for purchase at par upon proper advance notice. When the VRDNs are tendered, a remarketing agent generally finds another investor to purchase the VRDNs to keep the securities outstanding in the market. FTS acts as the remarketing agent to issuers on approximately \$4.6 billion of VRDNs at September 30, 2008. As remarketing agent, FTS is responsible for finding purchasers for investors that put VRDNs. The Bancorp issues letters of credit, as a credit enhancement, to the VRDNs remarketed by FTS, in addition to approximately \$2.1 billion in VRDNs remarketed by third parties at September 30, 2008. At September 30, 2008, FTS held \$163 million of these securities in its portfolio and classified them as trading securities. The Bancorp purchased \$203 million of the VRDNs from the market, through FTS, and held them in its trading securities portfolio at September 30, 2008. For the VRDNs remarketed by third parties, in some cases, the remarketing agent has failed to remarket the securities and has instructed the indenture trustee to draw upon approximately \$335 million of letters of credit issued by the Bancorp. The Bancorp recorded these draws as commercial loans in its Condensed Consolidated Balance Sheets at September 30, 2008.

The Bancorp's subsidiaries have entered into a number of noncancelable lease agreements. The minimum rental commitments under noncancelable lease agreements are shown in the previous table. The Bancorp or its subsidiaries have also entered into a limited number of agreements for work related to banking center construction and to purchase goods or services.

Contingent Liabilities

The Bancorp, through its electronic payment processing division, processes Visa and MasterCard merchant card transactions. Pursuant to Visa and MasterCard rules, the Bancorp assumes certain contingent liabilities relating to these transactions which typically arise from billing disputes between the merchant and cardholder that are ultimately resolved in the cardholder's favor. In such cases, these transactions are charged back to the merchant and disputed amounts are refunded to the cardholder. If the Bancorp is unable to collect these amounts from the merchant, it will bear the loss for refunded amounts. The likelihood of incurring a contingent liability arising from chargebacks is relatively low, as most products or services are delivered when purchased and credits are issued on returned items. For the nine months ended September 30, 2008 and 2007, the Bancorp processed approximately \$100 million and \$102 million, respectively, of chargebacks presented by issuing banks, resulting in no material losses to the Bancorp. The Bancorp accrues for probable losses based on historical experience and did not carry a credit loss reserve related to such chargebacks at September 30, 2008 and 2007.

There are legal claims pending against the Bancorp and its subsidiaries that have arisen in the normal course of business. See Note 9 for additional information regarding these proceedings.

Guarantees

The Bancorp has performance obligations upon the occurrence of certain events under financial guarantees provided in certain contractual arrangements.

Through September 30, 2008 and 2007, the Bancorp had transferred, subject to credit recourse, certain primarily floating-rate, short-term, investment grade commercial loans to an unconsolidated QSPE that is wholly owned by an independent third-party. Generally, the loans transferred provide a lower yield due to their investment grade nature, and therefore transferring these loans to the QSPE allows the Bancorp to reduce its exposure to these lower yielding loan assets while maintaining the customer relationships. Under current accounting provisions, QSPEs are exempt from consolidation and, therefore, not included in the Bancorp's Condensed Consolidated Financial Statements. The outstanding balance of these loans at September 30, 2008 and 2007 was \$2.5 billion and \$3.0

Table of Contents**Fifth Third Bancorp and Subsidiaries****Notes to Condensed Consolidated Financial Statements (continued)**

billion, respectively. As of September 30, 2008, the loans transferred had a weighted average life of 2.3 years. These loans may be transferred back to the Bancorp upon the occurrence of certain specified events. These events include borrower default on the loans transferred, bankruptcy preferences initiated against underlying borrowers, ineligible loans transferred by the Bancorp to the QSPE, and the ability of the QSPE to issue commercial paper. The maximum amount of credit risk in the event of nonperformance by the underlying borrowers is approximately equivalent to the total outstanding balance. During the nine months ended September 30, 2008 and 2007, the QSPE did not transfer any loans back to the Bancorp as a result of a credit event. In addition, there have been no material changes in the overall ratings of the loans transferred to the QSPE. For the nine months ended September 30, 2008, the Bancorp collected \$501 million in net cash proceeds from loan transfers and \$10 million in fees from the QSPE. For the nine months ended September 30, 2007, the Bancorp collected \$1.1 billion in cash proceeds from loan transfers and \$21 million in fees from the QSPE.

The QSPE issues commercial paper and uses the proceeds to fund the acquisition of commercial loans transferred to it by the Bancorp. The ability of the QSPE to issue commercial paper is a function of general market conditions and the credit rating of the liquidity provider. In the event the QSPE is unable to issue commercial paper, the Bancorp has agreed to provide liquidity support to the QSPE in the form of purchases of commercial paper, a line of credit to the QSPE and the repurchase of assets from the QSPE. As of September 30, 2008 and 2007, the liquidity asset purchase agreement was \$3.0 billion and \$4.0 billion, respectively. During the third quarter of 2008, the disruption in the short-term funding market continued causing the QSPE difficulty in obtaining sufficient funding through the issuance of commercial paper. As a result, the Bancorp provided liquidity support to the QSPE during the third quarter through purchases of commercial paper, a line of credit to the QSPE, and the repurchase of assets from the QSPE under the liquidity asset purchase agreement. As of September 30, 2008, the Bancorp held approximately \$1.0 billion of asset-backed commercial paper issued by the QSPE, representing 39% of the total commercial paper issued by the QSPE.

During the third quarter of 2008, the Bancorp repurchased \$513 million of commercial loans at par from the QSPE under the liquidity asset purchase agreement. A fair value adjustment charge of \$3 million was recorded on the loans upon repurchase. As of September 30, 2008, there were no delinquent repurchased loans. As of September 30, 2008, there were no outstanding balances on the line of credit from the Bancorp to the QSPE. At September 30, 2008 and 2007, the Bancorp's loss reserve related to the liquidity support and credit enhancement provided to the QSPE was \$27 million and \$13 million, respectively, and was recorded in other liabilities in the Condensed Consolidated Balance Sheets. To determine the credit loss reserve, the Bancorp used an approach that is consistent with its overall approach in estimating credit losses for various categories of commercial loans held in its loan portfolio.

At September 30, 2008 and 2007, the Bancorp had provided credit recourse on residential mortgage loans sold to unrelated third parties of approximately \$1.4 billion and \$1.6 billion, respectively. In the event of any customer default, pursuant to the credit recourse provided, the Bancorp is required to reimburse the third party. The maximum amount of credit risk in the event of nonperformance by the underlying borrowers is equivalent to the total outstanding balance. In the event of nonperformance, the Bancorp has rights to the underlying collateral value securing the loan. The Bancorp maintained an estimated credit loss reserve of approximately \$13 million and \$18 million relating to these residential mortgage loans sold at September 30, 2008 and 2007, respectively, recorded in other liabilities on the Condensed Consolidated Balance Sheets. To determine the credit loss reserve, the Bancorp used an approach that is consistent with its overall approach in estimating credit losses for various categories of residential mortgage loans held in its loan portfolio.

FTS, a subsidiary of the Bancorp, guarantees the collection of all margin account balances held by its brokerage clearing agent for the benefit of FTS customers. FTS is responsible for payment to its brokerage clearing agent for any loss, liability, damage, cost or expense incurred as a result of customers failing to comply with margin or margin maintenance calls on all margin accounts. The margin account balance held by the brokerage clearing agent as of September 30, 2008 was \$17 million compared to \$48 million as of September 30, 2007. In the event of any customer default, FTS has rights to the underlying collateral provided. Given the existence of the underlying collateral provided and negligible historical credit losses, the Bancorp does not maintain a loss reserve related to the margin accounts.

As of September 30, 2008 and 2007, the Bancorp had fully and unconditionally guaranteed certain long-term borrowing obligations issued by wholly-owned issuing trust entities of \$2.8 billion and \$1.4 billion, respectively. Refer to Note 10 for more information regarding long-term debt issued by the Bancorp.

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

The Bancorp, as a member bank of Visa, Inc. (Visa) prior to Visa 's completion of their initial public offering (IPO) on March 19, 2008, had certain indemnification obligations pursuant to Visa 's certificate of incorporation and bylaws and in accordance with their membership agreements. In accordance with Visa 's by-laws prior to the IPO, the Bancorp could have been required to indemnify Visa for the Bancorp 's proportional share of losses based on the pre-IPO membership interests. In contemplation of the IPO, Visa announced that it had completed restructuring transactions during the fourth quarter of 2007. As part of this restructuring, the Bancorp 's indemnification obligation was modified to include only certain known litigation as of the date of the restructuring. This modification triggered a requirement to recognize the fair value of the indemnification obligation in accordance with FIN 45, Guarantor 's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others.

Table of Contents**Fifth Third Bancorp and Subsidiaries****Notes to Condensed Consolidated Financial Statements (continued)**

Accordingly, the Bancorp recorded an indemnification liability under FIN 45 of \$3 million. Additionally, during 2007, the Bancorp recorded \$169 million for its share of litigation formally settled by Visa and for probable future litigation settlements. During the third quarter of 2008, the Bancorp recorded an additional \$45 million related to Visa's pending litigation settlement with Discover. These amounts were accrued under SFAS No. 5, Accounting for Contingencies. In connection with the IPO, Visa retained a portion of the proceeds to fund an escrow account in order to resolve existing litigation settlements as well as fund potential future litigation settlements. As of September 30, 2008, the Bancorp has recorded its proportional share of \$124 million of the Visa escrow account net against the current Visa litigation reserve of \$189 million.

9. Legal and Regulatory Proceedings

As previously disclosed, during May 2005, the Bancorp filed suit in the United States District Court for the Southern District of Ohio against the IRS seeking a refund of taxes paid as a result of the audit of the 1997 tax year. This suit involves a determination of the correct tax treatment of certain leveraged leases entered into by the Bancorp. The outcome of this litigation will likely impact a number of leveraged leases entered into during 1997 through 2004. After a jury trial, the jury rendered a verdict in the form of answers to interrogatories, some of which favored Fifth Third and some of which favored the IRS. No judgment has been entered by the court in the case and the parties dispute the judgment that should be entered in light of the jury's responses to the interrogatories. During the third quarter of 2008, the IRS announced a global settlement initiative relating to disputed leveraged leases. Because Fifth Third is currently engaged in litigation on this matter, the Bancorp has not been invited to participate in the settlement initiative. However, the Bancorp is currently in settlement discussions with the IRS. The nature and timing of a potential settlement and/or any future decision by the court are uncertain. During the second quarter of 2008, decisions in two other cases involving the tax treatment of leveraged leases were issued where the courts ruled in favor of the IRS. To date, the decisions issued have been dependent on the specific facts in each case. The Bancorp continues to believe that the facts and circumstances related to its leveraged leases are different from these other cases, that its tax treatment was proper under the tax law as it existed at the time the tax benefits were reported, and that the facts in its case support its position. The Bancorp is required under applicable accounting standards to assess the likeliness of a favorable outcome of this litigation. In light of recent decisions and uncertainty related to its own case, the Bancorp concluded during the second quarter that previously recognized benefits from the transactions at issue in the litigation and certain other leveraged leases described above must be remeasured as required by FIN 48 and recorded an increase to tax expense of approximately \$140 million, or \$0.26 per share, both pre-tax and after-tax, for interest related to previous tax years pursuant to FIN 48 and a charge of approximately \$130 million pre-tax, or \$0.16 per share after-tax, to reflect a projected change in the timing of tax benefits pursuant to FSP No. FAS 13-2. The Bancorp believes these charges address the downside risk it has related to leveraged leases should there be a negative outcome in its case.

During April 2006, the Bancorp was added as a defendant in a consolidated antitrust class action lawsuit originally filed against Visa®, MasterCard® and several other major financial institutions in the United States District Court for the Eastern District of New York. The plaintiffs, merchants operating commercial businesses throughout the U.S. and trade associations, claim that the interchange fees charged by card-issuing banks are unreasonable and seek injunctive relief and unspecified damages. In addition to being a named defendant, the Bancorp is also subject to an indemnification obligation of Visa as discussed in Note 8. Accordingly, in the third and fourth quarters of 2007, the Bancorp recorded a contingent liability included in the \$172 million litigation reserve. In connection with Visa's IPO, Visa retained a portion of the proceeds to fund an escrow account in order to resolve existing litigation settlements as well as fund potential future litigation settlements. As of September 30, 2008, the Bancorp has recorded its proportional share of \$124 million of the Visa escrow account net against the current Visa litigation reserve of \$189 million. This antitrust litigation is still in the discovery phase.

Several putative class action complaints have been filed against the Bancorp in various federal and state courts. The federal cases were consolidated by the Judicial Panel on Multidistrict Litigation and are now known as *In Re TJX Security Breach Litigation*. The state court actions have been removed to federal court and have been consolidated into that same case. The complaints relate to the alleged intrusion of The TJX Companies, Inc.'s (TJX) computer system and the potential theft of their customers' non-public information and alleged violations of the Gramm-Leach-Bliley Act. Some of the complaints were filed by consumers and seek unquantified damages on behalf of putative classes of persons who transacted business at any one of TJX's stores during the period of the alleged intrusion. Another was filed by financial institutions and seeks unquantified damages on behalf of other similarly situated entities that suffered losses in relation to the alleged intrusion. The U.S. District Court (Court) has granted the Bancorp's motion to dismiss certain of the claims, but additional claims remain pending. On November 29, 2007, the U.S. District Court, District of Massachusetts (District Court) issued an order denying Plaintiffs' Motion for Class Certification in the consolidated cases brought by financial institutions (the Financial Institution Track). On December 18, 2007, the District Court entered its final

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

order in the Financial Institution Track litigation that i) denied Plaintiffs' Motion for Leave to Amend their Complaint, without prejudice; ii) dismissed the case for lack of subject matter jurisdiction; and iii) transferred the case from the United States District Court to the Massachusetts Superior Court in and for the County of Middlesex (Massachusetts State Court). On December 18, 2007, Tjx Companies, Inc. filed a Notice of Appeal to the United States Court of Appeals for the First Circuit (First Circuit) as to that portion of the Court's December 18 order transferring the case to Massachusetts State Court and an emergency motion to stay the Massachusetts State Court proceedings pending the appeal. On December 19, 2007, the First Circuit granted the request for stay until further order of the Court. On December 20, 2007, the Bancorp likewise filed a Notice of Appeal to the First Circuit solely as to that portion of the District Court's December 18 Order transferring the case to the Massachusetts State Court. On December 21, 2007,

Table of Contents**Fifth Third Bancorp and Subsidiaries****Notes to Condensed Consolidated Financial Statements (continued)**

Plaintiffs also filed a Notice of Appeal in the First Circuit as to the entirety of the District Court's December 18 Order and also as to all other prior adverse rulings including, without limitation, the District Court's denial of class certification and dismissal of various claims. Both TJX and the Bancorp amended their Notices of Appeal to likewise appeal all adverse rulings by the District Court. Separately, on January 16, 2008, the two remaining financial institution plaintiff banks who had not reached a settlement with TJX filed a new lawsuit against the Bancorp and TJX in Massachusetts State Court asserting similar allegations to those set forth in the Financial Institution Track litigation. After TJX and the Bancorp removed the case to the District Court, it was remanded to Massachusetts State Court and a motion to stay those proceedings is now pending. In regards to the consumer track litigation, on January 9, 2008, the District Court issued an Order of Preliminary Approval of a proposed class action settlement funded solely by TJX. A Final Fairness Hearing was held July 15, 2008, at which time the Court approved the proposed settlement with certain changes that are subject to objection by the parties.

In September 2007, Ronald A. Katz Technology Licensing, L.P. (Katz) filed a suit in the United States District Court for the Southern District of Ohio against the Bancorp and its Ohio banking subsidiary. In the suit, Katz alleges that the Bancorp and its Ohio bank are infringing on Katz's patents for interactive call processing technology by offering certain automated telephone banking and other services. This lawsuit is one of many related patent infringement suits brought by Katz in various courts against numerous other defendants. Katz is seeking unspecified monetary damages and penalties as well as injunctive relief in the suit. Management believes there are substantial defenses to these claims and intends to defend them vigorously. The impact of the final disposition of this lawsuit cannot be assessed at this time.

In June through September of 2008, five putative securities class action complaints were filed against the Bancorp and its Chief Executive Officer, among other parties, and are currently pending in the United States District Court for the Southern District of Ohio. The lawsuits allege violations of federal securities laws related to disclosures made by the Bancorp in press releases and filings with the Securities and Exchange Commission regarding its quality and sufficiency of capital, credit losses and related matters, and seeking unquantified damages on behalf of putative classes of persons who either purchased the Bancorp's securities, or acquired the Bancorp's securities pursuant to the First Charter Corporation Acquisition. In addition to the foregoing, two cases were filed in the United States District Court for the Southern District of Ohio against the Bancorp and certain officers alleging violations of ERISA based on allegations similar to those set forth in the securities class action cases filed during the same period of time. Also, in July 2008, a shareholder of the Bancorp filed a shareholder derivative suit in the Court of Common Pleas for Hamilton County, Ohio, against the members of the Bancorp's Board of Directors and, nominally, the Bancorp, alleging breach of fiduciary duty in connection with the Bancorp's alleged violations of federal and state securities laws, among other charges, in relation to its previous statements regarding its quality and sufficiency of capital, credit losses and related matters. The suit seeks unspecified compensatory damages in favor of the Bancorp from the Board of Directors, punitive damages, and interest, as well as costs, disbursements and attorney and other expert fees to the plaintiff. The impact of the final disposition of these lawsuits cannot be assessed at this time.

The Bancorp and its subsidiaries are not parties to any other material litigation. However, there are other litigation matters that arise in the normal course of business. While it is impossible to ascertain the ultimate resolution or range of financial liability with respect to these contingent matters, management believes any resulting liability from these other actions would not have a material effect upon the Bancorp's consolidated financial position, results of operations or cash flows.

10. Long-term Debt

In March 2008, the Bancorp issued \$1.0 billion of subordinated notes to third party investors. The subordinated notes bear a fixed rate of interest of 8.25% per annum. The notes are unsecured, subordinated obligations of the Bancorp. Payment of the full principal amount of the notes will be due upon maturity on March 1, 2038. The notes will not be subject to redemption at the Bancorp's option at any time prior to maturity.

In April 2008, the Bancorp issued \$750 million of senior notes to third party investors. The senior notes bear a fixed rate of interest of 6.25% per annum. The notes are unsecured, senior obligations of the Bancorp. Payment of the full principal amount of the notes will be due upon maturity on May 1, 2013. The notes will not be subject to redemption at the Bancorp's option at any time prior to maturity.

In May 2008, Fifth Third Capital Trust VII (Trust VII), a wholly-owned non-consolidated subsidiary of the Bancorp, issued \$400 million of Tier 1-qualifying trust preferred securities to third party investors and invested these proceeds in junior subordinated notes (JSN VII) issued by the

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

Bancorp. The Bancorp's obligations under the transaction documents, taken together, have the effect of providing a full and unconditional guarantee by the Bancorp, on a subordinated basis, of the payment obligations of the Trust VII. No other subsidiaries of the Bancorp are guarantors of the JSN VII. The JSN VII will mature on May 15, 2068. The JSN VII held by the Trust VII bear a fixed rate of interest of 8.875% until May 15, 2058. After May 15, 2058, the JSN VII bear interest at a variable rate of three-month LIBOR plus 5.00%. The Bancorp has subsequently entered into hedges related to these notes. The JSN VII may be redeemed at the option of the Bancorp on or after May 15, 2013, or in certain other limited circumstances, at a redemption price of 100% of the principal amount plus accrued but unpaid interest. All redemptions are subject to certain conditions and generally require approval by the Federal Reserve Board.

Table of Contents

Fifth Third Bancorp and Subsidiaries

Notes to Condensed Consolidated Financial Statements (continued)

In August 2008, \$839 million of senior extendable notes matured and were paid. The extendable notes were issued in November 2004 to third-party investors and paid interest at one-month LIBOR plus 1 bp. In September 2008, an additional \$800 million of the senior extendable notes matured.

In August 2008, \$500 million of senior fixed-rate bank notes issued in July of 2003 matured and were paid. These long-term bank notes were issued to third-party investors at a fixed rate of 3.375%.

11. Income Taxes

The actual effective tax rate for the nine months ended September 30, 2008 has been used in the computation of the applicable income taxes (benefits) of \$(72) million and \$150 million for the three and nine months ended September 30, 2008, respectively.

The Bancorp accounts for its uncertain tax positions in accordance with FIN 48. At September 30, 2008 and December 31, 2007, the Bancorp had unrecognized tax benefits of \$969 million and \$469 million, respectively. Those balances included \$83 million and \$100 million of tax positions that, if recognized, would impact the effective tax rate and \$2 million and \$6 million in tax positions that would impact goodwill. The remaining \$884 million and \$363 million is related to tax positions for which the ultimate deductibility is highly certain but for which there is uncertainty about the timing of the deductions. A significant portion of these tax positions relate to the leveraged lease litigation discussed in Note 9.

It is reasonably possible that the amount of the unrecognized benefit with respect to certain of the Bancorp's uncertain tax positions could significantly increase or decrease during the next 12 months. An estimate of the range of the reasonably possible changes to the unrecognized tax benefits cannot be made at this time.

Any interest and penalties incurred in connection with income taxes are accrued as a component of tax expense. At September 30, 2008 and December 31, 2007, the Bancorp had accrued interest liabilities of \$210 million and \$67 million, net of the related tax benefits. A significant portion of the interest accrued as well as the increase during the year relates to the leveraged lease charge discussed in Note 9. No liabilities were recorded for penalties. At September 30, 2008, the Bancorp had an approximately \$1 billion deposit with the IRS to mitigate the risk associated with the disputed leases. This deposit enables the Bancorp to stop the accrual of interest, to the extent of the deposits, if the Bancorp is not ultimately successful in its legal dispute.

The statute of limitations for Federal income tax returns remains open for tax years 2004 through 2007. In addition, limited statute extensions have been agreed to for tax years 1997 through 2003 primarily for leasing uncertainties. With the exception of the state impact of the Federal items discussed above as well as a few states with insignificant uncertain liabilities, the statutes of limitations for state income tax returns remain open for tax years in accordance with the various states' statutes.

12. Retirement and Benefit Plans

Net periodic pension cost is recorded as a component of employee benefits expense in the Condensed Consolidated Statements of Income. The plan assumptions are evaluated annually and are updated as necessary. The discount rate assumption reflects the yield on a portfolio of high quality fixed-income instruments that have a similar duration to the plan's liabilities. The expected long-term rate of return assumption reflects the average return expected on the assets invested to provide for the plan's liabilities. In determining the expected long-term rate of return, the Bancorp evaluated actuarial and economic inputs, including long-term inflation rate assumptions and broad equity and bond indices long-term return projections, as well as actual long-term historical plan performance. Based on the current year actuarial assumptions, the Bancorp did not make any cash contributions to its pension plans during the nine months ended September 30, 2008, and does not expect to contribute to the plans during the remainder of 2008.

The following table summarizes the components of net periodic pension cost:

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

(\$ in millions)	For the three months ended September 30,		For the nine months ended September 30,	
	2008	2007	2008	2007
Service cost	\$		\$	
Interest cost	3	3	10	10
Expected return on assets	(4)	(5)	(14)	(15)
Amortization of actuarial loss	2	2	5	6
Amortization of net prior service cost				1
Settlement	7	6	7	6
Net periodic pension cost	\$ 8	6	\$ 8	8

Table of Contents**Fifth Third Bancorp and Subsidiaries****Notes to Condensed Consolidated Financial Statements (continued)****13. Stock-Based Compensation**

Stock-based compensation awards are eligible for issuance under the 2008 Incentive Compensation Plan to key employees and directors of the Bancorp and its subsidiaries. The Incentive Compensation Plan provides for incentive and non-qualified stock options, stock appreciation rights (SARs), restricted stock and restricted stock units, and performance share and restricted stock awards. All of the Bancorp's stock-based awards are to be settled with stock with the exception of a portion of the performance shares that are to be settled in cash. The Bancorp has historically used treasury stock to settle stock-based awards, when available. Stock options, issued at fair market value based on the closing price of the Bancorp's common stock on the date of grant, have up to ten-year terms and vest and become fully exercisable ratably over a three or four year period of continued employment. SARs, issued at fair market value based on the closing price of the Bancorp's common stock on the date of grant, have up to ten-year terms and vest and become exercisable either ratably or fully over a four year period of continued employment. The Bancorp does not grant discounted stock options or SARs, re-price previously granted stock options or SARs, or grant reload stock options. Restricted stock grants vest either fully after four years or ratably after three, four and five years of continued employment and include dividend and voting rights. Performance share and performance restricted stock awards have three-year cliff vesting terms with performance or market conditions as defined by the plan.

For stock options, approximately 1.1 million options were issued in conjunction with acquisitions, 1,000 were granted, 200,000 were exercised, and 2.9 million were forfeited or expired during the nine months ended September 30, 2008. Approximately 5,000 options were granted, 2.7 million were exercised, and 556,000 were forfeited or expired during the nine months ended September 30, 2007. For SARs, approximately 6.8 million were granted and 1.7 million were forfeited or expired during the nine months ended September 30, 2008. No SARs were exercised during the nine months ended September 30, 2008. Approximately 6.6 million SARs were granted, 43,000 were exercised, and 1.3 million were forfeited or expired during the nine months ended September 30, 2007. For restricted stock awards, approximately 3.1 million awards were granted, 412,000 awards vested and were released, and 506,000 awards were forfeited during the nine months ended September 30, 2008. Approximately 1.6 million awards were granted, 74,000 awards vested and were released, and 290,000 awards were forfeited during the nine months ended September 30, 2007.

The Bancorp uses assumptions, which are evaluated and revised as necessary, in estimating the grant-date fair value of each SAR grant. For the nine months ended September 30, 2008 and 2007, the weighted-average assumptions were as follows:

	2008	2007
Expected life (in years)	6	6
Expected volatility	30%	22%
Expected dividend yield	8.69%	4.44%
Risk-free interest rate	3.25%	4.56%

The expected life is derived from historical exercise patterns and represents the amount of time that options granted are expected to be outstanding. The expected volatility is based on a combination of historical and implied volatilities of the Bancorp's common stock. The expected dividend yield is based on annual dividends divided by the Bancorp's stock price at the date of the grant. The risk-free interest rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of grant.

Stock-based compensation expense was \$15 million and \$12 million for the three months ended September 30, 2008 and 2007, respectively, and \$42 million and \$48 million for the nine months ended September 30, 2008 and 2007, respectively, and is included in salaries, wages and incentives expense in the Condensed Consolidated Statements of Income.

14. Accumulated Other Comprehensive Income

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

The Bancorp has elected to present the disclosures required by SFAS No. 130, Reporting Comprehensive Income, in the Condensed Consolidated Statements of Changes in Shareholders' Equity and in the following table. Disclosure of the reclassification adjustments, related tax effects allocated to other comprehensive income and accumulated other comprehensive income for the nine months ended September 30 were as follows:

Table of Contents**Fifth Third Bancorp and Subsidiaries****Notes to Condensed Consolidated Financial Statements (continued)**

(\$ in millions)	Pre-Tax Activity	Tax Effect	Net Activity	Beginning Balance	Net Activity	Ending Balance
2008						
Unrealized holding gains on available-for-sale securities arising during period	\$ 51	(18)	33

Total other comprehensive income	\$ (30)	11	(19)			
Total accumulated other comprehensive income				\$ (179)	(19)	(198)

15. Earnings Per Share

The calculation of earnings per share and the reconciliation of earnings per share and earnings per diluted share were as follows:

For the three months ended September 30:	2008			2007		
	Income	Average Shares	Per Share Amount	Income	Average Shares	Per Share Amount
(\$ in millions, except per share data)						
Earnings per share:						
Net income (loss)	\$ (56)			\$ 325		
Dividends on preferred stock	25					
Net income (loss) available to common shareholders	\$ (81)	572	\$ (0.14)	\$ 325	530	\$ 0.61
Earnings per diluted share:						
Net income (loss) available to common shareholders	\$ (81)	572	\$ (0.14)	\$ 325	530	\$ 0.61
Effect of dilutive securities:						
Stock based awards					2	
Convertible preferred stock (a)						
Net income (loss) available to common shareholders plus assumed conversions	\$ (81)	572	\$ (0.14)	\$ 325	532	\$ 0.61

Table of Contents**Fifth Third Bancorp and Subsidiaries****Notes to Condensed Consolidated Financial Statements (continued)**

For the nine months ended September 30:	2008			2007		
	Income	Average Shares	Per Share Amount	Income	Average Shares	Per Share Amount
(\$ in millions except per share data)						
Earnings per share:						
Net income	\$ 29			\$ 1,059		
Dividends on preferred stock	26					
Net income available to common shareholders	\$ 3	547	\$ 0.01	\$ 1,059	540	\$ 1.96
Earnings per diluted share:						
Net income available to common shareholders	\$ 3	547	\$ 0.01	\$ 1,059	540	\$ 1.96
Effect of dilutive securities:						
Stock based awards		2			3	(0.01)
Convertible preferred stock (a)						
Net income available to common shareholders plus assumed conversions	\$ 3	549	\$ 0.01	\$ 1,059	543	\$ 1.95

(a) The effect of dilutive securities on the dividends on preferred stock for the three and nine months ended September 30, 2008 was included in the calculation of net income available to common shareholders, however, it was excluded from assumed conversions because the effect would be anti-dilutive.

Due to the net loss for the three months ended September 30, 2008, the diluted earnings per share calculation excludes all common stock equivalents, including 44 million stock options and stock appreciation rights, 6 million shares of restricted stock and 96 million shares of convertible preferred stock as their inclusion would have been anti-dilutive to earnings per share.

Options to purchase 38 million shares outstanding during the three months ended September 30, 2007 were not included in the computation of net income per diluted share as the effect would have been anti-dilutive. The outstanding shares consist of options and stock appreciation rights that have not yet been exercised, and unvested restricted stock. These options and stock appreciation rights are excluded from the computation of net income per diluted share for the three months ended September 30, 2007 because the exercise price of the shares is greater than the average market price of the common shares and, therefore, the effect would be anti-dilutive. Restricted shares are excluded from the calculation until vested.

Options to purchase 81 million shares outstanding, including 36 million shares of convertible preferred stock, and 34 million shares outstanding during the nine months ended September 30, 2008 and September 30, 2007, respectively, were not included in the computation of net income per diluted share as the effect would have been anti-dilutive.

16. Fair Value Measurements

Effective January 1, 2008, the Bancorp adopted SFAS No. 157, Fair Value Measurements, which provides a framework for measuring fair value under accounting principles generally accepted in the United States of America. SFAS No. 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SFAS No. 157 also establishes a fair value hierarchy, which prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the instrument's fair value measurement. The three levels within the fair value hierarchy are described as

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

follows:

Level 1 Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Bancorp has the ability to access at the measurement date.

Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include: quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; inputs other than quoted prices that are observable for the asset or liability; and inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 Unobservable inputs for the asset or liability for which there is little, if any, market activity at the measurement date. Unobservable inputs reflect the Bancorp's own assumptions about what market participants would use to price the asset or liability. The inputs are developed based on the best information available in the circumstances, which might include the Bancorp's own financial data such as internally developed pricing models, discounted cash flow methodologies, as well as instruments for which the fair value determination requires significant management judgment.

There were no financial instruments measured at fair value that moved to a lower level in the fair value hierarchy due to the lack of observable quotes in inactive markets for those instruments at September 30, 2008.

Effective January 1, 2008, the Bancorp adopted SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115", which allows an entity the irrevocable option to elect fair value

Table of Contents**Fifth Third Bancorp and Subsidiaries****Notes to Condensed Consolidated Financial Statements (continued)**

for the initial and subsequent measurement for certain financial assets and liabilities on an instrument-by-instrument basis. Upon election of the fair value option in accordance with SFAS No. 159, subsequent changes in fair value are recorded as an adjustment to earnings.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The following table summarizes assets and liabilities measured at fair value on a recurring basis, including financial instruments in which the Bancorp has elected the fair value option in accordance with SFAS No. 159.

As of September 30, 2008 (\$ in millions)	Fair Value Measurements Using			Total Fair Value
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Assets:				
Available-for-sale securities (a)	\$ 427	11,805	149(f)	\$ 12,381
Trading securities	3	912		915
Loans held for sale (b)		844		844
Residential mortgage loans (c)			5	5
Other assets (d)	16	1,181	4	1,201
Total assets	\$ 446	14,742	158	\$ 15,346
Liabilities:				
Other liabilities (e)	\$ 33	846	14	\$ 893
Total liabilities	\$ 33	846	14	\$ 893

(a) Excludes FHLB and FRB stock totaling \$544 million and \$252 million, respectively, which are carried at par.

(b) Includes residential mortgage loans held for sale.

(c) Includes residential mortgage loans originated as held for sale and subsequently transferred to held for investment.

(d) Includes derivatives with a positive fair value.

(e) Includes derivatives with a negative fair value, short positions and certain deferred compensation liabilities.

(f) See Note 4 for a sensitivity analysis on residual interests from securitizations of automobile loans.

The following is a description of the valuation methodologies used for significant instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy.

Available-for-sale and Trading securities

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

Where quoted prices are available in an active market, securities are classified within Level 1 of the valuation hierarchy. Level 1 securities include government bonds and exchange traded equities. If quoted market prices are not available, then fair values are estimated using pricing models, quoted prices of securities with similar characteristics, or discounted cash flows. Examples of such instruments, which would generally be classified within Level 2 of the valuation hierarchy, include corporate and municipal bonds, mortgage-backed securities, and asset-backed securities. In certain cases where there is limited activity or less transparency around inputs to the valuation, securities are classified within Level 3 of the valuation hierarchy. Securities classified within Level 3 include residual interests in securitizations of automobile and home equity loans.

Residential mortgage loans held for sale

For residential mortgage loans held for sale, fair value is estimated based upon mortgage-backed securities prices and spreads to those prices or, for certain assets, discounted cash flow models that may incorporate the anticipated portfolio composition, credit spreads of asset-backed securities with similar collateral, and market conditions. Residential mortgage loans held for sale are classified within Level 2 of the valuation hierarchy.

Derivatives

Exchange-traded derivatives valued using quoted prices are classified within Level 1 of the valuation hierarchy. However, few classes of derivative contracts are listed on an exchange. The majority of the Bancorp's derivative positions are valued utilizing models that use as their basis readily observable market parameters and are classified within Level 2 of the valuation hierarchy. Such derivatives include basic and structured interest rate swaps and options. Derivatives that are valued based upon models with significant unobservable market parameters are classified within Level 3 of the valuation hierarchy. Interest rate lock commitments on residential mortgage loans are an example of derivatives designated as Level 3.

Table of Contents**Fifth Third Bancorp and Subsidiaries****Notes to Condensed Consolidated Financial Statements (continued)**

The following table is a reconciliation of all assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the three and nine months ended September 30, 2008.

(\$ in millions)	Fair Value Measurements Using Significant Unobservable Inputs (Level 3)							
	Three Months Ended				Nine Months Ended			
	Available- for-Sale Securities	Residential Mortgage Loans	Derivatives, Net (a)	Total Fair Value	Available- for- Sale Securities	Residential Mortgage Loans	Derivatives, Net (a)	Total Fair Value
Beginning balance	\$ 173		(7)	\$ 166	\$ 10		(4)	\$ 6
Total gains or losses (realized/unrealized):								
Included in earnings	(10)	(1)	11		(8)	(1)		(9)
Included in other comprehensive income	(1)			(1)	1			1
Purchases, sales, issuances, settlements-net	(13)	6	(14)	(21)	146	6	(6)	146
Transfers in and/or out of Level 3								
Ending balance	\$ 149	5	(10)	\$ 144	\$ 149	5	(10)	\$ 144

The amount of total gains or losses for the period included in earnings attributable to the change in unrealized gains or losses relating to assets still held at September 30, 2008 (b)

\$ (10)	(1)	(7)	\$ (18)	\$ (8)	(1)	(7)	\$ (16)
---------	-----	-----	---------	--------	-----	-----	---------

(a) Net derivatives include derivative assets of \$4 million and derivative liabilities of \$14 million at September 30, 2008.

(b) Includes interest income and expense.

The total gains and losses included in earnings for the three and nine months ended September 30, 2008 for assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) were recorded in the Condensed Consolidated Statements of Income as follows:

(\$ in millions)	Gains (Losses) For Three Months Ended	Gains (Losses) For Nine Months Ended
Interest income	\$ 2	\$ 5
Corporate banking revenue		(5)
Mortgage banking net revenue	8	10
Other noninterest income	2	(5)
Securities gains (losses), net	(12)	(14)
Total gains (losses)	\$	\$ (9)

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

The total gains and losses included in earnings for the three and nine months ended September 30, 2008 attributable to changes in unrealized gains and losses related to assets still held at September 30, 2008 were recorded in the Condensed Consolidated Statements of Income as follows:

(\$ in millions)	Gains (Losses) For Three Months Ended	Gains (Losses) For Nine Months Ended
Interest income	\$ 2	\$ 5
Corporate banking revenue	1	1
Mortgage banking net revenue	(3)	(3)
Other noninterest income	(6)	(5)
Securities gains (losses), net	(12)	(14)
 Total gains (losses)	 \$ (18)	 \$ (16)

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

Certain assets and liabilities are measured at fair value on a nonrecurring basis. These assets and liabilities are not measured at fair value on an ongoing basis; however, they are subject to fair value adjustments in certain circumstances, such as when there is evidence of impairment.

Table of Contents**Fifth Third Bancorp and Subsidiaries****Notes to Condensed Consolidated Financial Statements (continued)**

	Carrying Value at September 30, 2008			Total Gains (Losses)		
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total	Three Months Ended September 30, 2008	Nine months Ended September 30, 2008
(\$ in millions)						
Commercial loans	\$		356	\$ 356	\$ (70)	\$ (207)
Commercial mortgage loans			205	205	(83)	(150)
Commercial construction loans			293	293	(116)	(237)
Servicing rights			294	294	(23)	1
Total	\$		1,148	\$ 1,148	\$ (292)	\$ (593)

During 2008, certain loans included in the Bancorp's loan portfolio were deemed impaired in accordance with SFAS No. 114. The fair value of the impaired commercial loans totaled \$167 million at September 30, 2008. The losses from fair value adjustments relating to impairment on these commercial loans totaled \$67 million and \$204 million for the three and nine months ended September 30, 2008. The fair value and impairment on commercial mortgage and commercial construction loans is shown in the previous table. The fair value was calculated based on the fair value of the underlying collateral. Therefore, these loans were classified within Level 3 of the valuation hierarchy.

During the third quarter of 2008, the Bancorp repurchased \$513 million of commercial loans at par from a QSPE under its liquidity asset purchase agreement. A fair value charge of \$3 million was recorded on \$213 million of the loans upon repurchase. The fair value of these commercial loans was \$189 million at September 30, 2008. The fair value of the commercial loans was valued based on the difference between the existing interest rate spread on each commercial loan and the target spread and utilization of a discounted cash flow analysis. Therefore, these loans were classified within Level 3 of the valuation hierarchy. See Note 8 for further information on the loans repurchased from the QSPE.

During the first quarter of 2008, the Bancorp recognized temporary impairment of \$56 million in certain classes of the MSR portfolio in which the carrying value of the MSRs was written down to the fair value as of March 31, 2008. In the second quarter of 2008, the Bancorp recognized a recovery of the impairment of \$80 million. During the third quarter of 2008, the Bancorp recognized temporary impairment of \$23 million in certain classes of the MSR portfolio in which the carrying value of the MSRs was written down to the fair value as of September 30, 2008. MSRs do not trade in an active, open market with readily observable prices. While sales of MSRs do occur, the precise terms and conditions typically are not readily available. Accordingly, the Bancorp estimates the fair value of MSRs using discounted cash flow models with certain unobservable inputs, primarily prepayment speed assumptions, resulting in a classification within Level 3 of the valuation hierarchy.

Fair Value Option

The Bancorp elected on January 1, 2008 to measure residential mortgage loans held for sale at fair value in accordance with SFAS No. 159. The election was prospective, at the instrument level, for residential mortgage loans that have a designation as held for sale on the day the specific loan closes. Existing loans held for sale as of December 31, 2007 were not included in the fair value option election and were valued at the lower of cost or market. Electing to measure residential mortgage loans held for sale at fair value reduces certain timing differences, better matches changes in the value of these assets with changes in the value of derivatives used as economic hedges for these assets and eliminates the complex hedge accounting requirements that were followed prior to the adoption of SFAS No. 159.

Management's intent to sell residential mortgage loans classified as held for sale may change over time due to such factors as changes in the overall liquidity markets or changes in characteristics specific to certain loans held for sale. Consequently, these loans may be reclassified to loans held for investment and maintained in the Bancorp's loan portfolio. In such cases, the loans will continue to be measured at fair value in

Edgar Filing: FIFTH THIRD BANCORP - Form 10-Q

accordance with SFAS No. 159. Residential loans with a fair value of \$5 million at September 30, 2008, including fair value losses of \$1 million, were transferred to the Bancorp's portfolio during the three and nine months ended September 30, 2008.

Fair value changes included in earnings for instruments for which the fair value option was elected included gains of \$1 million and \$9 million, respectively, for the three and nine months ended September 30, 2008 and are reported as mortgage banking net revenue in the Condensed Consolidated Statements of Income.

Losses included in earnings attributable to changes in instrument-specific credit risk for residential mortgage loans reclassified from held for sale to held for investment were \$1 million for the three and nine months ended September 30, 2008. Instrument-specific credit risk for residential mortgage loans held for sale measured at fair value are immaterial to the Bancorp's Condensed Consolidated Financial Statements due to the short time period between the origination and sale of the loans, and the lack of delinquent loans at September 30, 2008. Interest on residential mortgage loans measured at fair value is accrued as it is earned using the effective interest method and is reported as interest income in the Condensed Consolidated Statements of Income.

Table of Contents**Fifth Third Bancorp and Subsidiaries****Notes to Condensed Consolidated Financial Statements (continued)**

The following table summarizes the difference between the aggregate fair value and the aggregate unpaid principal balance for residential mortgage loans measured at fair value as of September 30, 2008.

(\$ in millions)	Aggregate Fair Value	Aggregate Unpaid Principal Balance	Difference
Residential mortgage loans measured at fair value	\$ 849	832	\$ 17
Past due loans of 90 days or more			
Nonaccrual loans			

17. Business Segments

Results of operations and selected financial information by business segment are as follows:

(d) Dividends on preferred stock were \$.555 million for the nine months ended September 30, 2007.

18. Subsequent Event

On October 14, 2008, the U.S. Department of Treasury announced the creation of a voluntary Capital Purchase Program as part of its efforts to provide a firmer capital foundation for financial institutions and to increase credit availability to consumers and businesses. As part of the program, eligible financial institutions will be able to sell equity interests to the U.S. Department of Treasury in amounts equal to 1 percent to 3 percent of the institution's risk-weighted assets. These equity interests will constitute Tier 1 capital. On October 28, 2008, the Bancorp received notification that the U.S. Department of Treasury intends to invest approximately \$3.45 billion in senior preferred stock and related warrants under the terms of the Capital Purchase Program.
