SECURITIES AND EXCHANGE COMMISSION

Washington D.C. 20549

FORM 20-F

ANNUAL REPORT PURSUANT TO SECTIONS 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended March 31, 2009

Commission file number 1 - 6784

PANASONIC KABUSHIKI KAISHA

(Exact name of Registrant as specified in its charter)

PANASONIC CORPORATION

(Translation of Registrant's name into English)

Japan

(Jurisdiction of incorporation or organization)

1006, Oaza Kadoma, Kadoma-shi, Osaka 571-8501, Japan

(Address of principal executive offices)

Yukitoshi Onda, +81-6-6906-1763, onda.yukitoshi@jp.panasonic.com, address is same as above

(Name, Telephone, E-mail and/or Facsimile number and Address of Company Contact Person)

Securities registered or to be registered pursuant to Section 12(b) of the Act.

<u>Title of each class</u>	<u>Name of each exchange on which registered</u>
Common Stock*	New York Stock Exchange

* Not for trading, but only in connection with the registration of the American Depositary Shares evidenced by American Depositary Receipts. Each American Depositary Share represents one share of Common Stock.

Securities registered or to be registered pursuant to Section 12(g) of the Act.

None

(Title of Class)

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act.

None

(Title of Class)

Indicate the number of outstanding shares (excluding treasury stock) of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report.

<u>Title of Class</u>	<u>Outstanding as of</u>	
	<u>March 31, 2009 (Japan Time)</u>	<u>March 31, 2009 (New York Time)</u>
Common Stock	2,070,641,621	
American Depositary Shares, each representing 1 share of Common Stock		122,815,684

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No .

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. Yes No .

Indicate by check mark whether the Company (1) has filed all reports required to be filed by Sections 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Company was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No .

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No .

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer .

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

Edgar Filing: PANASONIC Corp - Form 20-F

U.S. GAAP International Financial Reporting Standards as issued by the International Accounting Standards Board Other

If Other has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow.

Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No .

This form contains 147 pages.

- 1 -

All information contained in this annual report is as of March 31, 2009 or for the year ended March 31, 2009 (fiscal 2009) unless the context otherwise indicates.

The noon buying rate for yen in New York City as certified for customs purposes by the Federal Reserve Bank of New York on June 19, 2009 was 96.15 yen = U.S.\$1.

About the Company

Panasonic Corporation (hereinafter, unless the context otherwise requires, "Panasonic," the "Panasonic Group" or the "Company" refers to Panasonic Corporation and its consolidated subsidiaries as a group) is one of the world's leading manufacturers of electronic and electric products for a wide range of consumer, business and industrial uses, as well as a wide variety of components. As from October 1, 2008, the Company changed its company name from Matsushita Electric Co., Ltd. to Panasonic Corporation. Based in Osaka, Japan, the Company recorded consolidated net sales of approximately 7,766 billion yen for fiscal 2009. Over the past nine decades, the Company has grown from a small domestic household electrical equipment manufacturer into a comprehensive electronic and electric equipment, systems and components manufacturer operating internationally. Of the fiscal 2009 net sales, nearly one-half was represented by sales in Japan, with the rest by overseas sales.

Cautionary Statement Regarding Forward-Looking Statements

This annual report includes forward-looking statements (within the meaning of Section 27A of the U.S. Securities Act of 1933 and Section 21E of the U.S. Securities Exchange Act of 1934) about Panasonic. To the extent that statements in this annual report do not relate to historical or current facts, they constitute forward-looking statements. These forward-looking statements are based on the current assumptions and beliefs of the Panasonic Group in light of the information currently available to it, and involve known and unknown risks, uncertainties and other factors. Such risks, uncertainties and other factors may cause the Panasonic Group's actual results, performance, achievements or financial position to be materially different from any future results, performance, achievements or financial position expressed or implied by these forward-looking statements. Panasonic undertakes no obligation to publicly update any forward-looking statements after the date of this annual report (June 2009). Investors are advised to consult any further disclosures by Panasonic in its subsequent filings with the U.S. Securities and Exchange Commission pursuant to the Securities Exchange Act of 1934 and its other filings.

The risks, uncertainties and other factors referred to above include, but are not limited to, economic conditions, particularly consumer spending and corporate capital expenditures in the United States, Europe, Japan, China, and

other Asian countries; volatility in demand for electronic equipment and components from business and industrial customers, as well as consumers in many product and geographical markets; currency rate fluctuations, notably between the yen, the U.S. dollar, the euro, the Chinese yuan, Asian currencies and other currencies in which the Panasonic Group operates businesses, or in which assets and liabilities of the Panasonic Group are denominated; the ability of the Panasonic Group to respond to rapid technological changes and changing consumer preferences with timely and cost-effective introductions of new products in markets that are highly competitive in terms of both price and technology; the possibility of not achieving expected results on the alliances or mergers and acquisitions; the ability of the Panasonic Group to achieve its business objectives through joint ventures and other collaborative agreements with other companies; the ability of the Panasonic Group to maintain competitive strength in many product and geographical areas; the possibility of incurring expenses resulting from any defects in products or services of the Panasonic Group; the possibility that the Panasonic Group may face intellectual property infringement claims by third parties; current and potential, direct and indirect restrictions imposed by other countries over trade, manufacturing, labor and operations; fluctuations in market prices of securities and other assets in which the Panasonic Group has holdings or changes in valuation of long-lived assets, including property, plant and equipment and goodwill, and deferred tax assets and uncertain tax positions; future changes or revisions to accounting policies or accounting rules; as well as natural disasters including earthquakes and other events that may negatively impact business activities of the Panasonic Group. The factors listed above are not all-inclusive.

D. Risk Factors

Once a year, Panasonic implements a Groupwide risk assessment survey to identify potential risks in an integrated and comprehensive manner. By identifying, assessing, evaluating and prioritizing these risks, Panasonic specifies risks at the Corporate Headquarters, business domain companies and Group affiliates, takes countermeasures that correspond to the materiality of each risk, and seeks continuous improvements through the monitoring of the progress of such countermeasures. Primarily because of the business areas and geographical areas where it operates, and the highly competitive nature of the industry to which it belongs, Panasonic is exposed to a variety of risks and uncertainties in conducting its businesses, including, but not limited to, the following. These risks may adversely affect Panasonic's business, operating results and financial condition. This section includes forward-looking statements and future expectations as of the date of this annual report.

Risks Related to Economic Conditions

Continued or further weakness in Japanese and global economies may cause reduced demand for Panasonic's products

Weakness in Japanese and global economies may cause reduced demand for Panasonic's products

Demand for Panasonic's products and services may be affected by general economic trends in the countries or regions in which Panasonic's products and services are sold. Economic downturns and resulting declines in demand in Panasonic's major markets worldwide may thus adversely affect the Company's business, operating results and financial condition. Since the financial crisis occurred in 2008, Panasonic's business environment has been rapidly deteriorating due to declines in global consumption and business activities and due to intensified price competition. Panasonic expects a decrease in profitability in fiscal 2010 because further deterioration of domestic and overseas market conditions will likely cause sales of Panasonic's products to decline and Panasonic will incur increased costs for additional business restructuring in order to cope with the business environment. If global market conditions worsen beyond expectations, the business environment of Panasonic may deteriorate more than currently anticipated, which may adversely affect the Company's business, operating results and financial condition.

Currency exchange rate fluctuations may adversely affect Panasonic's operating results

Foreign exchange rate fluctuations may adversely affect Panasonic's business, operating results and financial condition, because its international business transactions and costs and prices of its products and services in overseas countries are affected by foreign exchange rate changes. In addition, foreign exchange rate changes can also affect the yen value of Panasonic's investments in overseas assets and liabilities because Panasonic's consolidated financial statements are presented in Japanese yen. Generally, an appreciation of the yen against other major currencies such as the U.S. dollar and the euro may adversely affect Panasonic's operating results. Meanwhile, a depreciation of the yen against the aforementioned major currencies may have a favorable impact on Panasonic's operating results. The global financial crisis, which occurred in 2008, caused the rapid appreciation of the yen against other major currencies, which adversely and significantly affected Panasonic's operating results in fiscal 2009. Any further or continued appreciation of the yen may adversely affect the Company's business, operating results and financial condition.

Interest rate fluctuations may adversely affect Panasonic's financial condition, etc.

Panasonic is exposed to interest rate fluctuation risks which may affect the Company's operational costs, interest expenses, interest income and the value of financial assets and liabilities. Accordingly, interest rate fluctuations may adversely affect the Company's business, operating results and financial condition.

Table of Contents

- 4 -

Continuation or deterioration of financial market turmoil may adversely affect Panasonic's ability to raise funds or may increase the cost of fund raising

Panasonic raises funds for its business through methods such as borrowing from financial institutions and issuance of bonds and commercial papers. Where, among other events, financial market turmoil continues or deteriorates, financial institutions reduce lending to Panasonic, or rating agencies downgrade Panasonic's credit ratings, Panasonic may not be able to raise funds in the time and amount necessary for Panasonic, or under conditions which Panasonic deems appropriate, and Panasonic may incur additional costs of raising funds, which may adversely affect the Company's business, operating results and financial condition.

Decreases in the value of Japanese stocks may adversely affect Panasonic's financial results

Panasonic holds mostly Japanese stocks as part of its investment securities. The value of such stocks dropped significantly due to the global financial crisis and economic downturn in Japan, causing Panasonic to record losses on the valuation of its investment securities in fiscal 2009. Further decreases in the value of stocks may cause additional losses due to decreases in the valuation of investment securities, thereby adversely affecting Panasonic's operating results and financial condition. The decrease in the value of Japanese stocks may also reduce stockholders' equity on the balance sheet, as unrealized holding gains (losses) of available-for-sale securities are included as part of accumulated other comprehensive income (loss).

Risks Related to Panasonic's Business

Competition in the industry may adversely affect Panasonic's ability to maintain profitability

Panasonic develops, produces and sells a broad range of products and therefore faces many different types of competitors, from large international companies to relatively small, rapidly growing, and highly specialized organizations. Panasonic may choose not to fund or invest in one or more of its businesses to the same degree as its competitors in those businesses do, or it may not be able to do so in a timely manner or even at all. These competitors may have greater financial, technological, and marketing resources than Panasonic in the respective businesses in which they compete.

Rapid declines in product prices may adversely affect Panasonic's financial condition

Panasonic's business is subject to intense price competition worldwide, which makes it difficult for the Company to determine product prices and maintain adequate profits. Such intensified price competition may adversely affect Panasonic's profits, especially in terms of possible decreases in demand. As global consumption has declined and demand has shifted to low-priced products, Panasonic's product prices in digital electronics and many other business areas may decline significantly.

Panasonic's business is, and will continue to be, subject to risks generally associated with international business operations

One of Panasonic's business strategies is business expansion in overseas markets. In many of these markets, Panasonic may face risks generally associated with international manufacturing and other business operations, such as political instability, cultural and religious differences and labor relations, as well as economic uncertainty and foreign currency exchange risks. Panasonic may also face barriers in commercial and business customs in foreign countries, including difficulties in timely collection of accounts receivable or in building and expanding relationships with customers, subcontractors or parts suppliers. Panasonic may also experience various political, legal or other restrictions in investment, trade, manufacturing, labor or other aspects of operations, including restrictions on foreign investment or the repatriation of profits on invested capital, nationalization of local industry, changes in export or import restrictions or foreign exchange controls, and changes in the tax system or the rate of taxation in countries where Panasonic operates businesses. With respect to products exported overseas, tariffs, other barriers or shipping costs may make Panasonic's products less competitive in terms of price. Expanding its overseas business may require significant investments long before Panasonic realizes returns on such investments, and increased investments may result in expenses growing at a faster rate than revenues.

Table of Contents

- 5 -

Panasonic may not be able to keep pace with technological changes and develop new products or services in a timely manner to remain competitive

Panasonic may fail to introduce new products or services in response to technological changes in a timely manner. Some of Panasonic's core businesses, such as consumer digital electronics and key components and devices, are concentrated in industries where technological innovation is the central competitive factor. Panasonic continuously faces the challenge of developing and introducing viable and innovative new products. Panasonic must predict with reasonable accuracy both future demand and new technologies that will be available to meet such demand. If Panasonic fails to do so, it will not be able to compete effectively in new markets.

Panasonic may not be able to develop product formats that can prevail as de facto standards

Panasonic has been forming alliances and partnerships with other major manufacturers to strengthen technologies and the development of product formats, such as next-generation home and mobile networking products, data storage devices, and software systems. Despite these efforts, Panasonic's competitors may succeed in developing de facto standards for future products before Panasonic can. In such cases, the Company's competitive position, business, operating results and financial condition could be adversely affected.

Panasonic may not be able to successfully recruit and retain skilled employees, particularly scientific, technical and management professionals

Panasonic's future success depends largely on its ability to attract and retain certain key personnel, including scientific, technical and management professionals. Industry demand for skilled employees, however, exceeds the number of personnel available, and the competition for attracting and retaining these employees is intense. Because of this intense competition for skilled employees, Panasonic may be unable to retain its existing personnel or attract additional qualified employees to keep up with future business needs. If this should happen, Panasonic's business, operating results and financial condition could be adversely affected.

Alliances with, and strategic investments in, third parties, and mergers and acquisitions undertaken by Panasonic, may not produce positive results

Panasonic develops its business by forming alliances or joint ventures with, and making strategic investments in, other companies, including investments in start-up companies. Furthermore, the strategic importance of partnering with third parties is increasing. In some cases, such partnerships are crucial to Panasonic's goal of introducing new products and services, but Panasonic may not be able to successfully collaborate or achieve expected synergies with its partners. Panasonic does not, however, control these partners, who may make decisions regarding their business undertakings with Panasonic that may be contrary to Panasonic's interests. In addition, if these partners change their business strategies, Panasonic may fail to maintain these partnerships. Panasonic and SANYO Electric Co., Ltd. (SANYO), upon resolutions of meetings of their respective Boards of Directors held on December 19, 2008, entered into a Capital and Business Alliance Agreement. Panasonic aims to make SANYO its subsidiary through a tender offer (at a purchase price of 131 yen per share of common stock, 1,310 yen per share of Class A preferred stock and 1,310 yen per share of Class B preferred stock), which will be launched subject to, among other conditions, the completion of the procedures and measures that are required under domestic and overseas competition laws and regulations. However, Panasonic may not be able to promptly make SANYO its subsidiary and may fail to achieve the expected synergies with SANYO through the capital and business alliance. Furthermore, as a result of making SANYO its consolidated subsidiary, deterioration of SANYO's operating results and financial condition may adversely affect Panasonic's operating results and financial condition.

Panasonic is dependent on the ability of third parties to deliver parts, components and services in adequate quality and quantity in a timely manner, and at a reasonable price

Panasonic's manufacturing operations depend on obtaining raw materials, parts and components, equipment and other supplies including services from reliable suppliers in adequate quality and quantity in a timely manner. It may be difficult for Panasonic to substitute one supplier for another, increase the number of suppliers or change one component for another in a timely manner or at all due to the interruption of supply caused by, among other conditions, the bankruptcy of suppliers or increased industry demand. This may adversely affect the Panasonic Group's operations. Although Panasonic decides purchase prices by contract, the prices of raw materials including oil, parts and components, may increase due to changes in supply and demand. Some components are only available from a limited number of suppliers, which also may adversely affect Panasonic's business, operating results and financial condition.

Table of Contents

- 6 -

Panasonic is exposed to the risk that its customers may encounter financial difficulties

Many of Panasonic's customers purchase products and services from Panasonic on payment terms that do not provide for immediate payment. If customers from whom Panasonic has substantial accounts receivable encounter financial difficulties and are unable to make payments on time, Panasonic's business, operating results and financial condition could be adversely affected.

Risks Related to Panasonic's Management Plans

Panasonic is implementing its mid-term management plan called GP3 (announced on January 10, 2007), which runs from fiscal 2008 to fiscal 2010. Under this plan, Panasonic aims to achieve sales of ¥10 trillion and ROE of 10% in fiscal 2010 by achieving steady growth with profitability. Panasonic, in an effort to coexist with the global environment, also aims to achieve a target of reducing total global CO₂ emissions by 300,000 tons in fiscal 2010 compared with fiscal 2007 at Panasonic's manufacturing operations worldwide. Due to various factors including, in particular, the global recession resulting from the global financial crisis, it will be very difficult for Panasonic to achieve all the goals set out in its mid-term management plan. Also, Panasonic announced on May 15, 2009, its annual forecast and major initiatives for the year ending March 31, 2010. However, Panasonic may not be successful in achieving all the targets or in realizing the expected benefits because of various external and internal factors including, among other conditions, further deterioration of the business environment and increased costs of business restructuring such as additional business reorganization, the impairment of fixed assets and employment adjustment in order to cope with the business environment.

Risks Related to Legal Restrictions and Litigations

Panasonic may be subject to product liability or warranty claims that could result in significant direct or indirect costs

The occurrence of defects in Panasonic products could make Panasonic liable for damages not covered by product and completed operation liability insurance, whereby the Company could incur significant expenses. Due to negative publicity concerning these problems, Panasonic's business, operating results and financial condition may be adversely affected.

Panasonic may fail to protect its proprietary intellectual properties, or face claims of intellectual property infringement by a third party, and may lose its intellectual property rights on key technologies or be liable for significant damages

Panasonic's success depends on its ability to obtain intellectual property rights covering its products and product design. Patents may not be granted or may not be of sufficient scope or force to provide Panasonic with adequate protection or commercial advantage. In addition, effective copyright and trade secret protections may be unavailable or limited in some countries in which Panasonic operates. Competitors or other third parties may also develop technologies that are protected by patents and other intellectual property rights, which make such technologies unavailable or available only on terms unfavorable to Panasonic. The Company obtains licenses for intellectual property rights from other parties; however, such licenses may not be available at all or on acceptable terms in the future. Litigation may also be necessary to enforce Panasonic's intellectual property rights or to defend against intellectual property infringement claims brought against Panasonic by third parties. In such cases, Panasonic may incur significant expenses for such lawsuits. Furthermore, Panasonic may be prohibited from using certain important technologies or liable for damages in cases of admitted violations of intellectual property rights of others.

Changes in accounting standards and tax systems may adversely affect Panasonic's financial results and condition

Introduction of new accounting standards or tax systems, or changes thereof, which Panasonic cannot predict, may have a material adverse effect on the Company's operating results and financial condition. In addition, if tax authorities have different opinions from Panasonic on the Company's tax declarations, Panasonic may need to make larger tax payments than estimated.

Table of Contents

- 7 -

Payments or compensation related to environmental regulations or issues may adversely affect Panasonic's business, operating results and financial condition

Panasonic is subject to environmental regulations such as those relating to air pollution, water pollution, elimination of hazardous substances, waste management, product recycling, and soil and groundwater contamination, and may be held responsible for certain related payments or compensation. Furthermore, if these regulations become stricter and an additional duty of eliminating the use of environmentally hazardous materials is imposed, or if the Company determines that it is necessary and appropriate, from the viewpoint of corporate social responsibility, to respond to environmental issues, the payment of penalties for the violation of these regulations or voluntary payment of compensation for consolation to parties affected by such issues may adversely affect Panasonic's business, operating results and financial condition.

Leaks of confidential information may adversely affect Panasonic's business

In the normal course of business, Panasonic holds confidential information mainly about customers regarding credit worthiness and other information, as well as confidential information about companies and other third parties. Such information may be leaked due to an accident or other inevitable cause, and any material leakage of confidential information may result in significant expense for related lawsuits and adversely affect Panasonic's business and image. Moreover, there is a risk that Panasonic's trade secrets may be leaked by illegal conduct or by mere negligence of external parties, etc. If such is the case, Panasonic's business, operating results and financial condition may be adversely affected.

Governmental laws and regulations may limit Panasonic's activities or increase its operating costs

Panasonic is subject to governmental regulations in Japan and other countries in which it conducts its business, including governmental approvals required for conducting business and investments, laws and regulations governing the telecommunications businesses and electric product safety, national security-related laws and regulations and export/import laws and regulations, as well as commercial, antitrust, patent, product liability, environmental laws and regulations, consumer protection, financial and business taxation laws and regulations, and internal control regulations due to the implementation of stricter laws and regulations and stricter interpretations. However, to the extent that Panasonic cannot comply with these laws and regulations from technical and economic perspectives, or if they become stricter and Panasonic determines that it would not be economical to continue to comply with them, Panasonic would need to limit its activities in the affected business areas. In addition, these laws and regulations could increase Panasonic's operating costs.

Risks Related to Disasters or Unpredictable Events

Panasonic's facilities and information systems could be damaged as a result of disasters or unpredictable events, which could have an adverse effect on its business operations

Panasonic's headquarters and major facilities including manufacturing plants, sales offices and research and development centers are located in Japan. Panasonic also operates procurement, manufacturing, logistics, sales and research and development facilities all over the world. If major disasters such as earthquakes, fires, floods, wars, terrorist attacks, computer viruses or other events occur, or Panasonic's information system or communications network breaks down or operates improperly as a result of such events, Panasonic's facilities may be seriously damaged, or the Company may have to stop or delay production and shipment. Panasonic may incur expenses relating to such damages. In addition, if an infectious disease, such as a new highly-pathogenic flu strain, becomes prevalent throughout the world, Panasonic's manufacturing and sales may be materially disrupted.

Other Risks

External economic conditions may adversely affect Panasonic's pension plans

Panasonic has contributory, funded benefit pension plans covering substantially all employees in Japan who meet eligibility requirements. A decline in interest rates may cause a decrease in the discount rate on benefit obligations. A decrease in the value of stocks may also affect the return on plan assets. As a result, the actuarial loss may increase, leading to an increase in future net periodic benefit costs of these pension plans.

Table of Contents

- 8 -

Some long-lived assets may not produce adequate returns

Panasonic has many long-lived assets, such as plant, property and equipment, and goodwill, that generate returns. The Company periodically reviews the recorded value of its long-lived assets to determine if the fair value will be sufficient to support the remaining recorded asset values. If these long-lived assets do not generate sufficient cash flows, impairment losses will have to be recognized, adversely affecting Panasonic's results of operations and financial condition.

Realizability of deferred tax assets and uncertain tax positions may increase Panasonic's provision for income tax

In assessing the realizability of deferred tax assets and uncertain tax positions based on the expected future generation of taxable income or assessed sustainability of uncertain tax positions, Panasonic considers whether it is more likely than not that any portion or all of the deferred tax assets or recognized tax position benefit will not be realized. If Panasonic determines that temporary differences and loss carryforwards or recognized tax benefits cannot be realized upon the generation of future taxable income during the deductible periods due to deteriorating business conditions or tax position benefits may not be realized upon settlement, valuation allowance against deferred tax assets or unrecognized tax benefit reserves could be recognized and Panasonic's provision for income tax may increase.

Financial results and condition of associated companies may adversely affect Panasonic's operating results and financial condition

Panasonic holds equities of several associated companies. Panasonic can exercise influence over operating and financing policies of these companies. However, Panasonic does not have the right to make decisions for them since the companies operate independently. Some companies may record losses. If these associated companies do not generate profits, Panasonic's business results and financial condition may be adversely affected.

American Depositary Share (ADS) holders have fewer rights than shareholders and may not be able to enforce judgments based on U.S. securities laws

The rights of shareholders under Japanese law to take actions, including exercising their voting rights, receiving dividends and distributions, bringing derivative actions, examining Panasonic's accounting books and records, and

exercising appraisal rights are available only to shareholders of record. Because the depositary, through its nominee, is the record holder of the shares underlying the ADSs, only the depositary can exercise those rights in connection with the deposited shares. The depositary will make efforts to exercise their voting rights underlying ADSs in accordance with the instructions of ADS holders and will pay the dividends and distributions collected from Panasonic. However, ADS holders will not be able to bring a derivative action, examine Panasonic's accounting books and records, or exercise appraisal rights through the depositary.

Item 4. Information on the Company

A. History and Development of the Company

GENERAL

The Company was incorporated in Japan on December 15, 1935 under the laws of Japan as Matsushita Denki Sangyo Kabushiki Kaisha (Address: 1006, Oaza Kadoma, Kadoma-shi, Osaka 571-8501, Japan. Phone: +81-6-6908-1121 / Agent: Mr. Yoichi Nagata, Director of Overseas Investor Relations of Panasonic Corporation) as the successor to an unincorporated enterprise founded in 1918 by the late Konosuke Matsushita. Mr. Matsushita led the Company with his corporate philosophy of contributing to the peace, happiness and prosperity of humankind through the supply of quality consumer electric and electronic goods. The Company's business expanded rapidly with the recovery and growth of the Japanese economy after World War II, as it met rising demand for consumer electric and electronic products, starting with washing machines, black-and-white TVs and refrigerators. During the 1950s, the Company expanded its operations by establishing mass production and mass sales structures to meet increasing domestic demand, while also creating subsidiaries, making acquisitions and forming alliances. During the 1960s, the Company expanded its overseas businesses, and its products started obtaining worldwide recognition.

Table of Contents

- 9 -

During the global recession caused by the first oil crisis in 1973, the Company strengthened its structure and overseas business relations. The advent and popularity of the video cassette recorder (VCR) from the late 1970s enabled the Company to receive worldwide recognition as a global consumer electronics manufacturer. In the 1980s, the Company further worked to evolve from a consumer products manufacturer to a comprehensive electronics products manufacturer, expanding its business in the areas of information and communications technology, industrial equipment and components and devices. Since the 1990s, the Company has been emphasizing technological development and the use of advanced technology in every phase of life. In particular, the Company has been expanding its development activities in such areas as next-generation audiovisual (AV) equipment, multimedia products, and advanced electronic components and devices, many of which incorporate digital technology.

In June 1995, the Company sold 80% equity interest in MCA (subsequently renamed Universal Studios, Inc.) which the Company purchased in December 1990, to The Seagram Company Ltd. (currently Vivendi Universal S.A.) for approximately U.S. \$5.7 billion, leaving the Company with a minority interest. In February 2006, the Company sold the remaining shares to Vivendi Universal S.A.

In April 2000, the Company made two of its majority-owned subsidiaries, Matsushita Refrigeration Company and Wakayama Precision Company, into wholly-owned subsidiaries by means of share exchanges. As a result of the share exchanges, the Company issued 16,321,187 shares of its common stock to shareholders of the respective companies.

In June 2000, Kunio Nakamura became President of the Company and, under his leadership, the Company implemented structural reforms and growth strategies with an emphasis on enhancing growth potential, profitability and capital efficiency, thereby ensuring the Company's continued contribution to society.

In April 2001, the Company absorbed Matsushita Electronics Corporation, its wholly-owned subsidiary, by merger to implement unified operational management in such key device areas as semiconductors and display devices.

In April 2002, the Company and Toshiba Corporation (Toshiba) separated their respective liquid crystal display (LCD) panel operations and established a joint venture company, Toshiba Matsushita Display Technology Co., Ltd. (TMD), for the development, manufacture and sale of LCD panels and next-generation display devices. Of the new company's initial stated capital of 10 billion yen, 60% was invested by Toshiba and 40% by the Company.

As a drastic structural reform aimed at achieving new growth, the Company implemented share exchanges on October 1, 2002 with five of its majority-owned subsidiaries (Matsushita Communication Industrial Co., Ltd., Kyushu Matsushita Electric Co., Ltd., Matsushita Seiko Co., Ltd., Matsushita Kotobuki Electronics Industries, Ltd. and

Matsushita Graphic Communication Systems, Inc.) and transformed them into wholly-owned subsidiaries of the Company.

As an extension of this Groupwide reorganization, the Company transformed two of its majority-owned subsidiaries, Matsushita Electronic Components Co., Ltd. and Matsushita Battery Industrial Co., Ltd., into wholly-owned subsidiaries via share exchanges, effective April 1, 2003.

Upon the aforementioned Groupwide restructurings, in April 2003, to prepare a framework that enables each business domain company to implement autonomously responsible management, the Company established a new global consolidated management system that focuses on capital efficiency and cash flows.

Also on April 1, 2003, the Company launched another joint venture company with Toshiba, upon separating their respective cathode ray tube (CRT) businesses with the exception of domestic CRT manufacturing operations. The Company formerly accounted for the investment in the new company, Matsushita Toshiba Picture Display Co., Ltd. (MTPD) and its subsidiaries under the equity method, and began to consolidate MTPD on March 1, 2006 in accordance with Financial Accounting Standards Board (FASB) Interpretation No. 46 (revised December 2003),

Consolidation of Variable Interest Entities (FIN 46R), as a result of certain restructuring activities of MTPD. At March 31, 2006, the Company had a 64.5% equity interest in MTPD. At March 30, 2007, the Company acquired the remaining 35.5% equity interest in MTPD from Toshiba and MTPD was renamed MT Picture Display Co., Ltd.

Table of Contents

- 10 -

Since fiscal 2003, the Company has been gradually shifting its focus from restructuring to growth. The Company made concerted efforts to enhance product competitiveness. V-products, which aim to capture leading shares in high-volume markets, made a significant contribution to overall business results.

In April 2003, the Company announced that it would position the Panasonic brand as a globally unified brand for overseas markets under the global brand slogan of "Panasonic ideas for life." This new brand strategy conveys to customers all over the world a new image for the Company and its products, while further enhancing brand value.

In December 2003, the Company reached a basic agreement regarding a comprehensive business collaboration with its affiliate, Panasonic Electric Works Co., Ltd. (PEW), after which the Company initiated a tender offer for additional shares of PEW. As a result of the tender offer in which the Company purchased an additional 140,550 thousand shares of common stock of PEW at the total cost of 147 billion yen, PEW, PanaHome Corporation and their respective subsidiaries became consolidated subsidiaries of the Company in April 2004. For fiscal 2005, Panasonic and PEW integrated overlapping businesses in the area of electrical supplies, building materials and equipment, home appliances and industrial equipment, and reformed distribution channels to establish an optimized, customer-oriented operational structure. In fiscal 2006, the Company leveraged the strengths of both companies to achieve sales increases in Collaboration V-products including bathroom systems, modular kitchens and air purifiers.

In fiscal 2005, as part of business restructuring of its Group companies, power distribution equipment and monitoring and control system operations of Matsushita Industrial Information Equipment Co., Ltd. (MIIE) were transferred to PEW, while MIIE's information machine business was shifted to Panasonic Communications Co., Ltd. Subsequently, MIIE was absorbed by the Company in April 2005, and no longer operates as a separate entity.

In June 2006, Fumio Ohtsubo became President of the Company. Under its new management, it has been making efforts to achieve global excellence, or in other words, to aim to earn the support of all its stakeholders worldwide by sustaining growth through continued innovation and ensuring sound business activities on a global basis.

In July 2007, each of Victor Company of Japan, Limited ("JVC"), a consolidated subsidiary of the Company, KENWOOD and SPARX International (Hong Kong) Limited, an investment management company which belongs to a group of companies headed by SPARX Group Co., Ltd. adopted resolutions for, or affirmed, JVC's issuance of 107,693,000 new shares of its common stock through third party allotments, and the new shares were subscribed by KENWOOD and the several investment funds managed by SPARX International (Hong Kong) Limited. JVC issued and allocated the new shares to KENWOOD and the SPARX funds on August 10, 2007. As a result, the Company's shareholding in JVC decreased from 52.4% to 36.8%, and JVC became an associated company under the equity method from a consolidated subsidiary in the fiscal 2008 second quarter.

In February 2008, the Company finalized a definitive agreement with Hitachi, Ltd. related to comprehensive LCD panel business alliance under which it would acquire a majority voting interest in IPS Alpha Technology, Ltd. (IPS Alpha), which was owned by Hitachi Displays, Ltd. once certain conditions are satisfied. As a result, IPS Alpha became a consolidated subsidiary of the Company on March 31, 2008, in accordance with FIN 46R.

In April 2008, Matsushita Refrigeration Company was absorbed, and in October 2008, Matsushita Battery Industrial Co., Ltd. was absorbed, by the Company.

On October 1, 2008, the Company changed its name from Matsushita Electric Industrial Co., Ltd. to Panasonic Corporation and its ticker symbol on the New York Stock Exchange from MC to PC. The Company will complete its brand name change from the National brand, used for home appliances and housing equipment in Japan, and Technics brand, used for audio equipment, to the Panasonic brand by the end of fiscal 2010, ending March 31, 2010. Subsequently, the National brand will be abolished and the Technics brand will be used only for specific audio products. Accordingly, the corporate brands will be Panasonic and PanaHome.

On October 1, 2008, JVC and Kenwood integrated management by establishing JVC KENWOOD Holdings, Inc. (JVC KENWOOD HD) through a share transfer. The company has 24.4% of total issued shares of JVC KENWOOD HD.

Table of Contents

- 11 -

On December 19, 2008, Panasonic and SANYO Electric Co., Ltd. (SANYO) entered into the capital and business alliance agreement. The Company will aim to acquire the majority of the voting rights of SANYO assuming full dilution (which takes into account conversion of Class A preferred stock and Class B preferred stock into common stock) by means of a public tender offer bid. Panasonic and SANYO will form a close alliance in business with the prospect of organizational restructurings of both companies.

In April 2009, Toshiba acquired all of Panasonic's shares in TMD, a joint venture that develops, manufactures and sells liquid crystal displays (LCDs) and organic light emitting displays (OLEDs).

CAPITAL INVESTMENT

Total capital investment amounted to 494 billion yen, 449 billion yen and 418 billion yen for fiscal 2009, 2008 and 2007, respectively. (For a reconciliation of capital investment to the most directly comparable U.S. GAAP financial measures, see Overview Key performance indicators in Section A of Item 5.) In these years, the Company curbed capital investment in a number of business areas, in line with an increased management emphasis on cash flows and capital efficiency. The Company did, however, selectively invest in facilities for those product areas that are expected to drive future growth, including such key areas as flat-panel TVs, semiconductors, particularly advanced system LSIs and other strategic products.

B. Business Overview

SALES BY BUSINESS SEGMENT

Panasonic is engaged in the production and sales of electronic and electric products in a broad array of business areas. The following table sets forth the Company's sales breakdown by business segment for the last three fiscal years:

Yen (billions) (%)

Fiscal year ended March 31,

	2009		2008		2007
Digital AVC Networks	3,749	(13)%	4,320	6%	4,064
Home Appliances	1,223	(7)	1,316	6	1,247
PEW and PanaHome	1,766	(8)	1,910	3	1,859
Components and Devices	1,127	(19)	1,399	2	1,378
Other	1,072	(1)	1,084	9	998
JVC			183	(72)	646
Eliminations	(1,171)		(1,143)		(1,084)
Total	7,766	(14)%	9,069	0%	9,108

- * Percentage above reflects the changes from the previous year.
- * From fiscal 2009, the name of AVC Networks was changed to Digital AVC Networks.
- * The name of MEW and PanaHome was changed to PEW and PanaHome as of October 1, 2008.
- * The Company has changed the transactions between Global Procurement Service Company and other segments since April 1, 2008. Accordingly, segment information for Other and eliminations for fiscal 2008 have been reclassified to conform to the presentation for fiscal 2009.
- * The healthcare business was transferred to Panasonic Shikoku Electronics Co., Ltd. on April 1, 2007. Accordingly, the segment information for fiscal 2007 has been reclassified to confirm with the presentation for the year ended March 31, 2008.
- * JVC became an associated company under the equity method from a consolidated subsidiary in the fiscal 2008 second quarter.

Table of Contents

- 12 -

Digital AVC Networks

Panasonic's principal products in Digital AVC Networks segment include video and audio equipment and information and communications equipment. This segment provides hardware, software, services and solutions built on cutting-edge technologies as a source of competitiveness. In addition to developing attractive products with the Company's proprietary technology, Digital AVC Networks links together various equipment to offer consumers more secure and comfortable lifestyles. Moreover, this segment works actively on developing products that will help create a ubiquitous networking society, thereby driving Panasonic's global growth.

In the digital AVC business, Panasonic is pursuing the creation of a high definition product group containing a variety of AV, security, electronic, and Internet-enabled equipment that can be linked to a flat-panel VIERA TV and easily operated with a single remote. In fiscal 2009, in a turbulent market, Panasonic stepped up measures to strengthen the competitiveness of each product as pillars of this business. In addition, it proposed consumers new lifestyles unique to the Panasonic brand through the further evolution of VIERA Link.

For flat-panel TVs, although growth in sales slowed and prices declined sharply, Panasonic posted steady sales growth based on the seamless and vigorous promotion of both plasma and LCD TVs. Compared with fiscal 2008, flat-panel TV sales increased 1.3 times, recording 10 million units in fiscal 2009.

In plasma TVs, the Company strengthened sales of high-value-added sets, substantially enhancing its full HD models as well as launching a 46-inch model. The affordable price of HD models also drove high demand for these sets. Consequently, Panasonic remained the market share leader in many countries, exceeding unit sales units. In LCD TVs, the Company delivered high picture quality and performance by incorporating IPS alpha panels*, which demonstrate superior breadth of viewing angle and other outstanding properties. For personal users, Panasonic worked to expand its business by introducing a compact display, which is available in fiscal 2008 by more than 1.32 million units to reach 5.57 million in a wide range of colors, specifically for terrestrial digital broadcasting. As a result, LCD TV unit sales climbed in excess of 1.22 million units year on year, recording 4.47 million units.

* The In-Plane-Switching mode system utilizes horizontally oriented liquid crystal molecules to provide for wider viewing angles.

Meanwhile, Panasonic worked to establish its flat-panel TV production system to be ready for future expansion in demand for both plasma and LCD TVs. For plasma TVs, the Company increased panel production efficiency by concentrating PDP production in the Amagasaki plants. For LCD TVs, the Company has started to construct an IPS Alpha plant in Himeji. Panasonic aims to establish a flexible production system that can adjust to demand growth. In

light of recent conditions, the Company has reduced its planned capital investment for construction of the fifth domestic PDP plant in Amagasaki and the IPS Alpha plant in Himeji and also postponed the start-up dates.

For digital cameras, amid the sharp downturn in global demand and severe price declines, sales of LUMIX digital cameras fell year on year in fiscal 2009. However, Panasonic's products were highly evaluated by the market for their pursuit of high performance and ease of use. The Company launched the LUMIX G1, the world's most compact and lightest* digital interchangeable lens camera which also achieves high performance and picture quality thanks to an unconventional mirror-less structure. The combination of compactness, light weight and ease of use has enabled the Company to attract new customers. Panasonic's compact digital cameras were particularly popular in the market, including models incorporating face recognition, an evolution from face detection, and models capable of long periods of HD moving picture recording.

* For an interchangeable lens digital camera equipped with a movable LCD as of February 9, 2009

For BD and DVD recorders, in fiscal 2009, robust sales were recorded in BD recorders, which were widely embraced by customers, due to the spread of digital HD broadcasting and the unification of next-generation DVD standards. BD recorders that drove sales included models capable of long recording periods for full HD video and of transferring a recorded program onto an SD Memory Card allowing the user to view the program on one-segment-enabled mobile phones or VIERA One-Seg. These models helped Panasonic maintain its top share in the global market.

Table of Contents

- 13 -

For portable One-Segment TVs in Japan, demand for products that allow people to watch TV or listen to music in the bath is growing. To meet this demand, Panasonic developed VIERA One-Seg, a portable waterproof TV in fiscal 2009. This new product held the top market share for a portable one-segment-enabled AV device for nine consecutive months after its launch. The latest model has earned high marks not only by taking advantage of the technology developed for VIERA to provide high picture quality, but also by enabling content recorded on DIGA recorders to be transferred to an SD Memory Card and viewed where one likes.

For digital video cameras, in fiscal 2009, sales were down due to demand and price declines, particularly in Europe and the United States, and came in under last year's figures. Nevertheless, the Company's strengthened lineup of HD camcorders registered firm growth, mainly in Japan and Europe.

With respect to PCs, in fiscal 2009, consumers and business users have given high marks to the Company's Let'snote and TOUGHBOOK series, which have made strong advances under the concept of integrating high-performance, lightness, extended battery life, and toughness. In particular, the TOUGHBOOK series has maintained the top position in the global market for durable field notebooks for seven consecutive years.

In the mobile communications business, Panasonic offers mobile phones incorporating advanced technologies, and communications infrastructure equipment such as base stations. In fiscal 2008, Panasonic launched the handset VIERA Keitai, which has a screen that can be opened vertically or horizontally. In fiscal 2009, the domestic mobile phone market shrank rapidly, due mainly to a change in handset sales incentives and the economic downturn. Nevertheless, the VIERA Keitai series firmly maintained its high market share. This mobile phone series allows users to view one-segment broadcasts and features Panasonic's high-quality image technology derived from flat-panel TVs.

In the fixed-line communications business, Panasonic annually supplies households around the world with over 30 million telephones and facsimile machines. The Company is also developing its multi-function printers, electronic whiteboard, TV door intercom system, and PC optical disk drive operations. In fiscal 2007, Panasonic launched its HD-PLC adapter in Europe and Japan. In fiscal 2009, Panasonic's PLC technology, which is used in this HD-PLC adapter, was approved as one of the global standard baseline technologies for broadband over power line networks (IEEE P1901). The technology attracted considerable interest. As awareness of security and crime prevention increases, sales of TV door intercoms with wireless monitors and sensor cameras that can be connected by VIERA Link were strong in Japan.

In the automotive electronics business, Panasonic is developing operations in wide-ranging fields, from car navigation systems to key devices such as engine control unit. In fiscal 2009, Panasonic commercialized Strada F Class, a car navigation system equipped with a world-first*¹ home-link feature, which enables drivers to remotely control

household appliances from their vehicles. Amid growing use of Electronic Toll Collection (ETC) systems, Panasonic's ETC terminal, the smallest in the world*², was popular among car owners and retained a high market share. The ETC systems are installed in more than 80%*³ of the cars passing through expressway toll booths in Japan, and this is easing traffic congestion at these bottlenecks, which is expected to reduce CO₂ emissions.

*1 As of April 25, 2008; as a car navigation product for the consumer market. Panasonic estimate.

*2 As of April 2008; as an antenna separation type on-board device. Panasonic estimate.

*3 As of June 2009

In the system solutions business, Panasonic conducts business in a variety of fields including security systems, broadcasting systems and business solutions. In fiscal 2009, the Company promoted its security business to respond to a variety of growing security needs. Sales of security and surveillance camera systems increased in China, where they were used at the Beijing Olympics, and in the emerging markets. Amid the growing popularity of HD video content, Panasonic introduced multi-format cameras and video editing equipment, which have been well received both in Japan and abroad.

Home Appliances

Panasonic's principal products in this segment include home appliances such as washing machines, vacuum cleaners, dishwasher/dryers, rice cookers, microwave ovens, refrigerators, room air conditioners, water heating systems, and compressors. This segment also includes lighting business and environmental systems.

Table of Contents

- 14 -

In home appliances, leveraging its many years of experience in insulation and refrigeration technology, Panasonic developed the U-Vacua series of high-performance vacuum insulation boasting the world's highest level of thermal insulation in fiscal 2007. With this technology, the Company boosted the storage space of refrigerators and secured the leading market share in Japan. In fiscal 2009, the Company marketed its home appliance products, such as room air conditioners, refrigerators, and tilted-drum washer/dryers, featuring improved energy-saving performance and a variety of new functions, under the Panasonic brand for the first time nationwide in Japan. The lineup of products for all-electric homes demonstrated the superiority of Panasonic's product competitiveness and sales network. As a result, sales of Eco Cute natural-refrigerant water heating systems and induction-heating (IH) cooking equipment were steady. Panasonic has reached the 3-million mark in cumulative production of IH cooking units since Panasonic developed the first IH cooking unit for the mass market as a 200V model in 1990. In the energy-generation business, which aims to lead the way in eco ideas, Panasonic became the first Company to ship a home-use fuel cell, Ene Farm, in July 2008. Overseas, Panasonic introduced new refrigerators and washing machines with cutting-edge technologies in Europe in March 2009.

In the lighting business, Panasonic is endeavoring to develop products that help to effectively conserve energy, utilize resources and reduce the use of substances that may impact the environment. In addition, the Company has maintained a top-class share of the general lighting and optical device markets in Japan, by developing highly-efficient and long-lasting lamps based on its nanotechnology. In fiscal 2009, Panasonic was the first in the fluorescent lamp industry to eliminate the use of environmentally damaging lead, replacing all of its in-house manufactured products with non-lead glass. The Company also increased its recycling of glass from used fluorescent lamps. Overseas, Panasonic developed energy-saving measures, primarily in China, such as promoting the use of high-frequency (Hf) fluorescent lamps. These lamps achieved significant reductions in power consumption as a result of greater efficiency when used in combination with special fixtures.

The environmental systems business aims to realize environmentally friendly and comfortable lifestyles and a recycling-oriented society through the purification of air, water and soil. In fiscal 2008, the Company operated a new environmentally friendly factory with significantly reduced air conditioning costs and the installation of thermal insulating material in the roof. In fiscal 2009, Panasonic's DC motor-driven ceiling mount ventilation fan, which was designed to save energy, be long-lasting and quiet, acquired a market acclaim for its energy conservation. In the home environment systems field, humidifier/air purifiers featuring humidifiers combined with air purifiers to combat influenza and hay fever were popular in the market, as were dehumidifiers that can be used all year round. In the environmental engineering field, sales of ultra pure water manufacturing equipment, for use not only in plasma and LCD panel but also semiconductor production equipment, increased favorably. Sales of purification equipment for coating processes were also steady.

PEW and PanaHome

This segment includes Panasonic Electric Works Co., Ltd. (PEW), PanaHome Corporation (PanaHome) and their respective subsidiaries.

PEW manufactures, sells, installs and provides services related to a wide variety of products. These include electrical construction materials, home appliances, building products, electronic materials and automation controls.

In fiscal 2007 and 2008, the electrical construction materials business recorded a rise in sales of home fire alarms, in response to an increase of public demand. In the home appliances business, aesthetic products such as nanocare facial ionic steamers won strong market acceptance. In electronic materials business, sales of environmentally friendly products like multilayer printed circuit board materials and semiconductor encapsulation materials grew significantly. In fiscal 2009, the core construction-related business suffered from the domestic housing market downturn and curbs in private-sector capital expenditures. Furthermore, sales in electronic materials, automation controls and other businesses fell under the impact of production declines across industry sectors. Since sales of horseback-riding fitness machines and other health-related products were also weak, overall sales dropped. Nevertheless, new Panasonic brand products, including personal care products, such as men's shavers and nanoparticle ion steamers, and fully automated cleaning toilet systems, received strong market acceptance. In addition, sales of home fire alarms, increasingly popular products for all-electric homes, and environmentally friendly lighting products including LED lighting showed steady growth.

PanaHome's operations are primarily focused on detached housing, asset and property management, and home remodeling. In all these businesses, to provide living spaces that are friendly to both people and the environment, the Company's product strategies are guided by the basic Eco-Life Home concept, which advocates all-electric homes with an emphasis on safety, security, health, comfort and high energy efficiency.

Table of Contents

- 15 -

In fiscal 2008, PanaHome became the first in the Japanese housing industry to offer an all-electric rental apartment house series called EL MAISON NEXT. In fiscal 2009, PanaHome proposed the Kajiraku plan, which was designed from a woman's perspective to make housekeeping easier by facilitating ease of movement. PanaHome also actively developed Overnight-stay Model Homes where customers can see, feel, and experience homes by staying the night in a model home. As environmental awareness increases, PanaHome's achievements in contributing to the reduction of CO₂ emissions through the use of superior insulation and energy-saving features, such as solar power generation systems, have been given high marks.

Components and Devices

This business segment of Components and Devices supplies high-performance and high-value-added components and devices used in various products ranging from digital AV equipment and information and communication devices to home appliances and industrial equipment. Panasonic develops and strengthens the competitiveness of cutting-edge devices that help equipment become smaller, lighter, slimmer and more sophisticated. This business segment also contributes significantly to making finished products more energy efficient.

In the semiconductor business, Panasonic provides a wide range of semiconductor products as total solutions, such as system LSIs, image sensors, analog LSIs and discrete devices.

The UniPhier[®] Integrated Platform combines software and hardware resources across different product categories to improve R&D efficiency and design quality. In fiscal 2007, Panasonic began the full-scale mass production of 65-nanometer process system LSIs using 300mm wafers to meet accelerated demand for high-performance digital consumer products. This platform was fully extended to digital product categories such as plasma TVs, DVD recorders and mobile phones. In fiscal 2008, the Company began mass production of 45-nanometer process system LSIs using 300mm wafers. In fiscal 2009, the growth in sales of key finished products slumped under the global economic downturn, leading to a sharp slowdown in semiconductor demand and other severe business conditions. Under these circumstances, Panasonic proceeded with the commercialization of 45-nanometer process next-generation UniPhier[®] system LSIs. The Company also developed an application/transmission integrated LSI that combines one system LSI for the communications function of mobile phones and another system LSI for an application function in one UniPhier[®]. By the end of fiscal 2009, UniPhier[®] was applied in about 200 digital products. Amid the shift to full HD digital TVs, Panasonic has supplied optimal image-processing engines for a variety of flat-panel TV models. In producing semiconductors for cameras, Panasonic achieved higher picture quality and speed in digital interchangeable lens cameras by fusing the high-sensitivity technology of its image sensors with the high-speed technology of its system LSIs. The Company has also aggressively developed system LSIs in core business fields including optical disk devices and mobile phones, and accelerated the use of system LSIs in finished products.

The electronic devices business utilizes a wide-ranging product group, including capacitors, printed circuit boards and electromechanical components.

To provide optimal key devices and total solutions worldwide to meet finished product concepts, Panasonic has developed high-value-added components mainly for Digital AV equipment, information and communication equipment, and automotive electronics equipment in recent years. In fiscal 2008, the Company opened Device Application Centers which have both development and sales functions, in the U.S., Europe and China, to improve competitive total solutions for its customers. In fiscal 2009, Panasonic maintained its leading global market share for angular rate sensors, which are used for increasing the precision of car navigation systems and for image stabilizers used in digital cameras. In addition, sales of power supplies for plasma TVs were relatively steady. However, sales of capacitors, electromechanical components and other products struggled due to deteriorating market conditions and inventory cutbacks at finished product manufacturers. Nevertheless, the Company focused on growing industries amid the economic downturn and actively endeavored to expand sales.

The battery business consists of primary batteries, including dry batteries and rechargeable batteries, such as lithium-ion batteries. In this business, besides creating safer batteries, Panasonic develops products that address market needs for higher capacity, longer life and batteries that are thinner, smaller and lighter, and more cost effective.

Table of Contents

- 16 -

In fiscal 2008, responding to increasing demand for electronic equipment that consumes less electricity, Panasonic developed the EVOLTA dry alkaline battery, which offers long life in a wide range of products beyond just digital AV equipment. In fiscal 2009, the Company started to sell the EVOLTA dry alkaline batteries and rechargeable EVOLTA batteries, expanding its lineup to meet diversified needs. Although battery sales decreased due to the economic slowdown, the EVOLTA series were highly evaluated as an eco product combining both ecology and economy, thereby recording favorable sales.

The electric motors business provides products in a variety of fields, including home appliances, industrial equipment, and AV equipment and office products. It develops and supplies motors that meet such market needs as high efficiency and performance.

In fiscal 2007 and 2008, strong sales were recorded in FA servo motors, motors for vacuum cleaners and compact brushless motors used in game consoles. During fiscal 2009, although sales declined due to a fall in demand, the electric motors business pushed ahead with efforts to accelerate collaboration with Panasonic's finished product divisions by proceeding with the start up of mass production of Dual DD motor for the Dancing laundering & drying system washer/dryer. Moreover, the electric motors business contributed to lower energy consumption in finished products by upgrading motor efficiency using design optimization that leverages analysis technology and other techniques.

Other

In the factory automation (FA) business, Panasonic is contributing to the greater sophistication of electronic devices with its proprietary wafer processing, surface modification technologies, and flip chip mounting technologies. The Company also contributes to high-quality mounting and increased productivity in printed circuit board production.

In fiscal 2008, Panasonic released new products that enable multiple mounting and mounting of high-brightness LEDs. In fiscal 2009, although the mounting equipment market was stagnant due to the global trend to reduce capital investment, Panasonic targeted a further increase in the performance of its core high-speed modular mounting machines. The Company developed a high-performance head and improved productivity and versatility in response to its client needs. NPM (Next Production Modular), a new modular moulder announced in December 2008, achieves high area productivity by carrying out all processes, from printing and mounting to inspection using the same platform. In addition, NPM reduces equipment switching losses with changes in product type or production volume. Panasonic expanded its lineup of mounting equipment and maintained a global leading market share.

MARKETING CHANNELS

The table below shows a breakdown of Panasonic's net sales by geographical area for the periods indicated:

	Yen (billions) (%)					
	Fiscal year ended March 31,					
	2009		2008		2007	
Japan	4,082	53%	4,545	50%	4,616	51%
North and South America	997	13	1,251	14	1,381	15
Europe	963	12	1,213	13	1,218	13
Asia and Others	1,724	22	2,060	23	1,893	21
Total	7,766	100%	9,069	100%	9,108	100%

Sales and Distribution in Japan

In Japan, Panasonic's products are sold through several sales channels, each established according to the type of products or customers: Sales of consumer and household products are handled or coordinated by relevant corporate sales divisions, such as the Corporate Marketing Division for Digital AVC Products and the Home Appliances and Wellness Products Marketing Division, while sales of general electronic components and certain other devices to manufacturers are handled by the Corporate Industrial Marketing & Sales Division, in each case to stay close to respective customers and meet their specific and ever-diversifying needs. For other products, there are also organizations under the direct control of business domain companies that conduct sales and marketing of their own products, mostly to non-consumer customers, such as industrial and business corporations, public institutions, construction companies and governments through their sales offices and subsidiaries or through outside agencies.

Table of Contents

- 17 -

In fiscal 2005, Panasonic and PEW integrated the sales functions of each of the electrical supplies, building materials and equipment, and home appliances businesses as a part of collaboration between the two companies.

Overseas Operations

Worldwide, Panasonic has 540 consolidated companies as well as 182 companies which are accounted for by the equity method. International marketing and sales of Panasonic's products are handled mainly through its sales subsidiaries and affiliates located in respective countries or regions in coordination with business domain companies and regional headquarter companies. In some countries, however, marketing and sales are handled through independent agents or distributors, depending on regional characteristics. Additionally, certain products are also sold on an OEM basis and marketed under the brand names of third parties.

Overseas sales represented approximately 47% of the Company's total consolidated sales in fiscal 2009.

Overseas operations are expected to serve as a growth engine for the entire Panasonic Group. Panasonic will therefore further strengthen ties between manufacturing companies in various regions and business domain companies in Japan. Panasonic will also identify strategic products and sales channels for each region and country, and effectively allocate management resources in order to achieve further progress and strengthen management structure. In addition to markets in Europe and the United States, Panasonic views the growing BRICs and Vietnam markets as a key to success overseas.

The Company established a Russia Division, India Coordination Department and Brazil Coordination Department in April 2007.

Customers

The largest markets for Panasonic have traditionally been consumer products. However, since the 1980s, the proportion of sales to non-consumer customers, such as industrial and business corporations, governments and other institutions, including large customers such as electric and electronic equipment manufacturers, automotive manufacturers and various other machinery makers, has been rising as Panasonic places increasing emphasis on industrial and commercial products and systems and electronic components. Panasonic's business is not materially dependent on any single customer.

SEASONALITY OF BUSINESS

The Company's business has no significant seasonality in terms of sales or profits. However, for the consumer electronics business, the fiscal third quarter (October to December) is normally a peak period because it falls in the year-end shopping season in Japan and many overseas markets. Additionally, seasonal appliances, such as air conditioners and refrigerators, have different business cycles, sales of which peak in summer. These do not have a material effect upon the Company's overall operations.

RAW MATERIALS AND SOURCE OF SUPPLY

Panasonic purchases a wide variety of parts and materials from various suppliers globally. The Company applies a multi-sourcing policy not depending upon any one particular source of supply for most essential items. The Company has also been endeavoring to promote a policy of global optimum procurement by concentrating order placements to qualified suppliers from all over the world and purchasing the most competitive parts and materials.

In an attempt to improve operational efficiency and to reduce parts and materials costs, Panasonic has been increasing centralized purchasing at its headquarters for materials commonly used in many product divisions throughout Panasonic, such as steel, plastics, semiconductors and electronic components, while at the same time accelerating the initiatives to standardize parts and grade unification of steel and resin. Such efforts are coordinated by the Global Sourcing Centre established in April 2003. At the business domain company level, an increasing focus has been put on centralized purchasing for parts and materials commonly used in factories within each business domain company.

Table of Contents

- 18 -

To minimize the adverse effects of global price increase of raw materials, Panasonic further strengthened materials cost reduction initiatives including a reduction in the number of parts through the standardization of design, use of Value Engineering techniques, and additional cost reduction activities covering indirect materials.

With an increasing global awareness of CSR values, the Company recently decided to extend its commitment to social responsibility by requiring its suppliers to maintain environmental preservations, quality, safety, information security management, human rights and comply with the related laws and regulations.

To strengthen Panasonic eco ideas Declaration, Panasonic promotes joint activities with business partners to reduce impact of business activities on the global environment and accelerate PDCA management cycle effective from 2009.

By implementing above mentioned activities and strengthening partnership with excellent suppliers, Panasonic aims to reinforce its procurement activities.

PATENT LICENSE AGREEMENTS

Panasonic holds numerous Japanese and foreign patent registrations for its products, and shares technologies with a number of Japanese and foreign manufacturers. Its technical assistance, or licensing, to other manufacturers has been increasing year by year.

For example, Panasonic's patents related to MPEG2 technology, which is widely used in digital TVs, are licensed to other companies through MPEG LA LLC. Patents which are essential to DVD technology are licensed as a part of the joint licensing program operated by seven Japanese, U.S. and Korean companies. Furthermore, the Company's patents relating to CD technology are licensed to many manufacturers. Further, Panasonic has non-exclusive cross-license agreements with Samsung Electronics Co., Ltd. for semiconductor technology and with Sharp Corporation for mobile phone technology.

Panasonic is a licensee under various license agreements which cover a wide range of products, including AV products, computers, communications equipment, semiconductors and other components. Panasonic has non-exclusive patent license agreements with, among others, Thomson Licensing Inc. and Thomson Licensing S.A.

covering a broad range of products, including TVs, VCRs and DVD products. Panasonic has non-exclusive patent cross-license agreements with, among others, Texas Instruments Incorporated and International Business Machines Corporation, both covering semiconductors, information equipment and certain other related products. Further, Panasonic has a non-exclusive patent cross-license agreement with Eastman Kodak Company covering digital still camera, camcorder and mobile phones. Panasonic has a non-exclusive patent cross-license agreement with Ericsson covering mobile phones

The Company considers all of its technical exchange and license agreements beneficial to its operations.

COMPETITION

The markets in which the Company sells its products are highly competitive. Panasonic's principal competitors, across the full range of its products, consist of several large Japanese and overseas manufacturers and a number of smaller and more specialized companies. Advancements toward a borderless economy have also applied pressure to Japanese manufacturers, including Panasonic, in terms of global price competition, especially from Chinese and Korean manufacturers. To counter this, the Company is devising various measures to enhance its competitiveness, with a focus on the development of differentiated products, cost reduction and efficiency improvements. Such measures include the development of products with Panasonic's differentiated technologies, innovation of manufacturing processes through the use of information technology, increasing overseas production for optimum manufacturing allocation from a global perspective, and shortening production and distribution lead time through the expansion of supply chain management (SCM) in cooperation with several overseas and domestic mass-scale retailers and the introduction of cell-style production, as well as developing joint ventures and other cooperative agreements with domestic and overseas partners.

Also, with the development of digital and networking technologies, competition in terms of the so-called de facto standard has become crucial. In response, Panasonic has been strengthening its efforts toward alliances with leaders not only in the electronics industry but also the software, devices, broadcasting, communications services and other diverse industries.

GOVERNMENT REGULATIONS

Like other electronics manufacturers, Panasonic is subject to governmental regulations related to environmental preservation.

To comply with recycling laws both in Japan and other countries/regions, Panasonic has been actively taking measures. The Company established an efficient system to collect and recycle used home appliances, comprising air conditioners, CRT TVs, flat-panel TVs, refrigerators, washing machines and clothes dryers in compliance with the Law for Recycling of Specified Kinds of Home Appliances in Japan effective April 1, 2001. As one of its measures to contribute to the establishment of a recycling-oriented society, the Company established the Panasonic Eco Technology Center Co., Ltd. not only to dismantle used products or recycle scrapped materials, but also to promote research and development of recycling technologies. In Europe, the Waste Electrical and Electronic Equipment (WEEE) Directive designed to promote recycling came into force in August 2005. Preparing for mandatory recycling under the WEEE directive, Panasonic established Ecology Net Europe GmbH (ENE) in Germany in April 2005. The Company promotes construction of networks connecting manufacturers, recycling companies and hauling companies through ENE. In the U.S., Panasonic Corporation of North America, which is a regional company of Panasonic, has established a new electronic product recycling management company, Electronics Manufacturers Recycling Management Company, LLC (MRM) with other manufacturers to satisfy requirements enacted in July 2007 in the state of Minnesota. Although MRM's initial focus was to collect products in Minnesota, a scope of operation has been developing to expand its activities to other states with electronic product recycling mandates. Through these efforts, Panasonic is carrying out its compliance programs not only to meet the requirements demanded by legislations, but also to establish cost efficient systems that will further enhance its competitive edge.

In January 2003, the Company announced that disposed electric equipment that contained polychlorinated biphenyl (PCB) might be buried in the ground of its four manufacturing facilities and one former manufacturing facility in Japan. The applicable laws in Japan require that PCB equipment be appropriately maintained and disposed of by July 2016. The Company has accrued estimated total cost of approximately 12 billion yen by March 31, 2009 for necessary actions, such as investigation on whether the PCB equipment is buried at the facilities by excavating, maintaining and disposing the PCB equipment that is already discovered, and soil remediation. Although it represents management's best estimate or minimum of the cost, the payments are not considered to be fixed and determined.

To deal with climate change issues, various kinds of measures have been taken worldwide, especially those for energy efficiency of products. In Japan, the Energy Conservation Law was revised in 1999, and the Top-runner standard was introduced, which aims to continuously increase products' energy efficiency performance on an industry-wide basis. The Program uses a value of the product with the highest energy consumption efficiency on a market at the time of the standard establishment process as a target value for a goal year. An area of targeted products has been expanding, and a standard gets stricter if necessary. Other countries/regions, such as the European Union, the United States, China,

Korea, and Australia also have regulations for energy conservation improvement (energy-saving standards and labeling systems) for home appliances and AV products. Panasonic takes a proactive measure to comply with these requirements, and further promotes development of energy-saving products.

Also, Panasonic is promoting its initiatives for directives relevant to chemical substances management. In Europe, the RoHS Directive that bans the sales of electrical and electronic equipment using six specified hazardous substances (Lead, Mercury, Cadmium, Hexavalent chromium, Polybrominated biphenyls, Polybrominated diphenyl ethers) from the EU market was issued in February 2003. The Company completed initiatives for the non-use of the abovementioned six specified hazardous substances in its target products* (31,400 models) by the end of October 2005, in order to reduce possible contamination by these substances after products are disposed of. And the Registration, Evaluation, Authorisation and Restriction of Chemical Substances (REACH) came into force in June 2007. The REACH requires all chemicals of one ton or more in volume that are manufactured in or imported into the European Union each year to be evaluated for health and safety and registered with a central European Chemical Agency. In Japan, the Law Concerning the Examination and Regulation of Manufacture, etc of Chemical Substances were introduced in 1973, and revised in 1986 and 2003. It aims for preventing pollution of the environment by chemical substances with persistent harmful properties by establishing a system of examination by regulating target substances manufactured, imported and used. In the revised Law for the Promotion of Effective Utilization of Resources in Japan, it is required for manufacturers to disclose information about targeted chemical substances same as the EU RoHS substances contained in 7 specific products (air conditioners, refrigerators, television sets, personal computers, washing machines, microwaves, and clothing dryers) by attaching a label. In China, Management Methods on the Control of Pollution from Electronic Information Products, commonly known as China RoHS, took effect from March 1, 2007. This applies to electronic information products imported or manufactured in China, that are sold on the Chinese market. Restricted substances are the same as the 6 EU RoHS substances, and it is required to disclose information about substances contained in products by placing a label on a product packaging. Panasonic is carrying out its compliance programs to meet the requirements of relevant regulations.

Table of Contents

- 20 -

The Company is subject to a number of other government regulations in Japan and overseas as mentioned above, but overall, it presently manages to operate its businesses without any significant difficulty or financial burden in coping with them.

- * Excluding products that use materials and components with no feasible alternatives or suppliers, for example products or material/components commonly used in other industries (e.g. housing materials, and bicycles). Also excluding components/materials for which applications to be exempted from the RoHS Directive were submitted to the EU by the end of October 2005.

REPORT ON KEROSENE FAN HEATER RECALL
AND COMPANY'S COUNTERMEASURES

In 2005, certain kerosene fan heaters, which were manufactured by Panasonic between 1985 and 1992, resulted in hospitalization, and in some cases death, due to exposure to carbon monoxide exhaust. To prevent a recurrence, in November 2005, the Company established a special committee led by President Nakamura to implement recall efforts, product inspections and repairs of affected models of kerosene fan heaters. Using various media, Panasonic notified customers of the risks involved in the use of these products, while sending out employees (approximately 200,000 in total) to distribute leaflets directly to users, and visit kerosene suppliers.

Panasonic has made all-out efforts to locate recalled kerosene fan heaters through the cooperation of various parties, and will continue efforts to identify the purchasers and users of all remaining recalled heaters. At the same time, to prevent a recurrence, the Company is carrying out a wide range of initiatives. On May 1, 2006, Panasonic reorganized the aforementioned special committee into a permanent organization, the Corporate FF Customer Support & Management Division, under which Panasonic has continued recall efforts through various public awareness campaigns. Furthermore, the Company thoroughly has reviewed product safety in design and manufacturing processes. Specifically, Panasonic has undertaken studies of material deterioration caused by long-term use, together with the development of technologies to prevent risks caused by complex factors involved in the extended use of certain products. Furthermore, the Company has established a new risk management system to enable prompt action in an emergency, in compliance with its primary principle, the customer comes first. The Company has also reinforced safety education programs for the presidents of all Group companies, the directors of all divisions and the managers responsible for specific operations (such as design, manufacturing, and quality control). In terms of product quality issues, in addition to its commitment to the idea that safety and quality come first from the product design stage, Panasonic will continue to take all possible measures, such as the analysis of product age-related degradation and user environments, to ensure the quality and safety of products.

C. Organizational Structure

In order to maintain production, sales and service activities effectively in broad business areas as a comprehensive electronics manufacturer, Panasonic has been operating under a decentralized divisional management structure with substantial delegation of authority to divisional companies and subsidiaries, with the headquarters focusing on Groupwide strategic functions. In January 2003, Panasonic launched a new business domain-based organizational structure, and introduced new Group management control systems from April 1, 2003. Under this new structure, each business domain company, either an internal divisional company of the parent company or a subsidiary, takes full responsibility in its own business area, thereby establishing an autonomous management structure that expedites self-completive business operations to accelerate growth. On April 1, 2004, PEW, PanaHome and their respective subsidiaries became consolidated subsidiaries of the Company. Accordingly, the Company successfully eliminated overlaps in R&D, manufacturing and sales, thereby creating an optimum Group structure that facilitates the effective use of management resources to achieve growth strategies. JVC (Victor Company of Japan Ltd. and its subsidiaries) became associated companies under the equity method from consolidated subsidiaries in August 2007.

Table of Contents

- 21 -

Panasonic's consolidated financial statements as of March 31, 2009 comprise the accounts of 540 consolidated companies, with 182 companies reflected by the equity method.

Principal divisional companies and subsidiaries as of March 31, 2009 are as listed below:

- (1) Internal divisional companies of Panasonic Corporation:

<u>Name of internal divisional company</u>
AVC Networks Company
Automotive Systems Company
System Solutions Company
Home Appliances Company
Lighting Company
Semiconductor Company
Energy Company
Motor Company

- (2) Principal domestic subsidiaries:

D. Property, Plants and Equipment

The Company's principal executive offices and key research laboratories are located in Kadoma, Osaka, Japan.

Panasonic's manufacturing plants are located principally in Japan, other countries in Asia, North and South America and Europe. The Company considers all of its factories well maintained and suitable for current production requirements. In addition to its manufacturing facilities, Panasonic's properties all over the world include sales offices, research and development facilities, employee housing and welfare facilities, and administrative offices.

Substantially all of facilities are fully owned by the Company and its subsidiaries. The following table sets forth information as of March 31, 2009 with respect to the Company-owned principal facilities:

<u>Name and Principal Location</u>	<u>Floor Space (thousands of square feet)</u>	<u>Principal Products Manufactured or Functions</u>
(The Company)		
Kadoma Plant, Osaka	2,456	Video and audio equipment
Ibaraki Plant, Osaka	818	Video equipment

Panasonic Corporation of China, China		Sales with regional headquarters functions

In addition to the Company-owned facilities, as of March 31, 2009, the Company and its subsidiaries shown in above table leased approximately 22.4 million square feet of floor space from third parties, most of which was for sales office space.

Substantially all of Panasonic's properties are free of material encumbrances and Panasonic believes such properties are in adequate condition for their purposes and suitably utilized. During fiscal 2009, there was no material problem, regarding both the productive capacity and the extent of utilization of the Company's properties.

In terms of environmental issues, all of the Panasonic Group's properties operate in compliance with governmental and municipal laws and regulations. Furthermore, the Company established a number of internal environmental guidelines which are stricter than those provided by the relevant authorities. In case any occasional non-compliance may take place, such as the previously mentioned PCB issue, Panasonic takes immediate and appropriate actions to meet the regulatory requirements and to ensure current good utilization standards.

Item 4A. Unresolved Staff Comments

The Company is a large accelerated filer as defined in Rule 12b-2 under the Securities Exchange Act of 1934. There are no written comments which have been provided by the staff of the Securities and Exchange Commission regarding the Company's periodic reports under that Act not less than 180 days before the end of the fiscal year ended March 31, 2009 and which remain unresolved as of the date of the filing of this Form 20-F with the Commission.

Item 5. Operating and Financial Review and Prospects**A. Operating Results****Overview**

Panasonic is one of the world's leading producers of electronic and electric products. Panasonic currently offers a comprehensive range of products, systems and components for consumer, business and industrial use based on sophisticated electronics and precision technology, expanding to building materials and equipment, and housing business. As of October 1, 2008, the Company changed its company name from Matsushita Electric Industrial Co., Ltd. to Panasonic Corporation. Upon the company name change, Panasonic implemented its brand name change from the National brand, used for home appliances and housing equipment in Japan, and Technics brand, used for audio equipment, to the Panasonic brand. This brand name change will be completed by the end of fiscal 2010, ending March 31, 2010. Accordingly, the corporate brands will be Panasonic and PanaHome.

Panasonic divides its businesses into five segments: Digital AVC Networks, Home Appliances, PEW and PanaHome, Components and Devices, and Other. Digital AVC Networks includes video and audio equipment, and information and communications equipment. Home Appliances includes household equipment. PEW and PanaHome includes electrical supplies, home appliances, building materials and equipment, and housing business. Components and Devices includes semiconductors, general electronic components, batteries and electric motors. Other includes FA equipment and other industrial equipment.

JVC issued and allocated new shares of its common stock to third parties on August 10, 2007. As a result, Panasonic's shareholding of JVC decreased from 52.4% to 36.8%, and JVC and its subsidiaries became an associated company under the equity method from a consolidated subsidiary in the fiscal 2008 second quarter. On October 1, 2008, JVC and Kenwood integrated management by establishing JVC KENWOOD Holdings, Inc. (JVC KENWOOD HD) through a share transfer. The Company has 24.4% of total issued shares of JVC KENWOOD HD. Given JVC's equity method investment status, the income statement and balance sheet impact of JVC is expected to decrease significantly in future periods and insignificant compared to both existing business segment reporting and consolidated income before income taxes. The provisions of SFAS No. 131 in these circumstances are not applicable to insignificant entities and accordingly, sales and profit in the JVC segment are no longer reported subsequent to the date of deconsolidation.

Economic environment

In the year ended March 31, 2007, the Japanese economy maintained a recovery trend as a result of favorable exports and increased capital investment. In the year ended March 31, 2008, the Japanese economy for the first half continued a recovery trend with an improvement in consumer spending, but for the second half the Japanese economy slowed down, as a result of negative factors such as rising prices for crude oil and raw materials, and a stronger yen against the U.S. dollar. In the year ended March 31, 2009, the Japanese economy encountered very severe conditions due to the global financial crisis and the sharply deteriorated world economy.

The overseas economy, in the year ended March 31, 2007, the U.S. economy, despite a decrease in housing investment, continued growth with robust consumer spending and an increase in capital investment. Meanwhile, in major European countries, there was a trend toward moderate economic recovery with increased consumer spending. In Asia, the Chinese economy maintained a high growth rate. In the year ended March 31, 2008, the U.S. economy proved sluggish in the second half of fiscal 2008 since the subprime loan problem in the U.S. led to downturns in both housing investment and consumer spending. Meanwhile, European economy, although economic growth continued for the first half, slowed down in the second half of fiscal 2008, due mainly to a downturn in consumer spending. In Asia, the Chinese economy maintained a high growth rate due mainly to favorable export. In the year ended March 31, 2009, the global financial crisis caused a rapid economic downturn worldwide, and this caused negative effects on the Japanese economy through a sharp decrease in exports and capital investment.

Table of Contents

- 28 -

Condition of foreign currency exchange rates and Panasonic's policy

Foreign currency exchange rates fluctuated during the three-year period ended March 31, 2009. In the year ended March 31, 2007, the Japanese yen was weak against the U.S. dollar and euro. In the year ended March 31, 2008, there was a sharp increase in the Japanese yen against the U.S. dollar. In the year ended March 31, 2009, there continued a sharp increase in the Japanese yen against the major currencies such as the U.S. dollar and euro. In order to alleviate the effects of currency-related transaction risks, Panasonic has traditionally used several currency risk hedging methods, such as forward foreign-exchange contracts and currency options contracts with leading banks. Panasonic has also increased matching of export and import exchange contracts. As a basic countermeasure against currency exchange risk, the Company has been strengthening production operations outside Japan to meet overseas demand, while reducing dependence on exports from Japan. The Company does not have any material unhedged monetary assets, liabilities or commitments denominated in currencies other than the individual operations' functional currencies.

Summary of operations

Panasonic's consolidated sales and earnings results during the last three fiscal years, reflecting the aforementioned external and internal conditions, can be summarized as follows:

In fiscal 2009, net sales amounted to 7,766 billion yen, down 14% from the previous year. Sales declined in all segments mainly as a result of a sharp deterioration of the world economy from October 2008. Regarding earnings, although the Company implemented thorough streamlining of material cost by reducing number of components and improving material yield ratio and made all-out efforts to reduce fixed cost, the effect of a sharp sales decline including approximately 20-30% decrease in prices for flat-panel TVs and rising prices for crude oil and other raw materials on a yearly basis led to a decrease in earnings. In addition, the Company incurred 314 billion yen as expenses associated with impairment losses of fixed assets, 53 billion yen as restructuring charges and 92 billion yen as a write-down of investment securities. As a result of these and other factors, the Company incurred a pre-tax loss of 383 billion yen and a net loss of 379 billion yen.

In fiscal 2008, net sales amounted to 9,069 billion yen, mostly the same level from the previous year. In real terms except JVC (Victor Company of Japan, Ltd. and its subsidiaries), the Company cited sales gains in all segments, due mainly to favorable sales in digital AV products and white goods. Regarding earnings, despite the effects from rising prices for crude oil and other raw materials, and ever-intensified global price competition, sales gains excluding the effect of JVC and the cost reduction efforts including materials costs and fixed costs led to the earnings gains. In addition, the Company incurred 33 billion yen as expenses associated with the implementation of early retirement programs and 32 billion yen as impairment losses on the investments, as well as 45 billion yen as impairment losses

from tangible fixed assets. Reflecting all these factors and a decrease in provision for income taxes, the Company recorded a net income of 282 billion yen, up 30% from the previous year.

In fiscal 2007, net sales increased 2% to 9,108 billion yen, due mainly to an increase in sales of digital products such as flat-panel TVs in Japan and overseas. Regarding earnings, despite the effects from rising raw materials prices and ever-intensified global price competition, an increase in sales, cost rationalization and a weaker yen contributed to earnings gains. In addition, the Company recorded gains on the sale of the investments regarding cable broadcasting business and gains on sales of tangible fixed assets, and incurred restructuring expenses, including 14 billion yen associated with the implementation of early retirement programs, and 49 billion yen as impairment losses. Accordingly, the Company recorded a net income of 217 billion yen.

Key performance indicators

The following are performance measures that Panasonic believes are key indicators of its business results for the last three fiscal years.

	Yen (billions) (%)		
	Fiscal year ended March 31,		
	2009	2008	2007
Net sales	7,766	9,069	9,108
Income (loss) before income taxes to net sales ratio	(4.9)%	4.8%	4.8%
Research and development costs to net sales ratio	6.7%	6.1%	6.3%
Total assets	6,403	7,444	7,897
Stockholders' equity	2,784	3,742	3,917
Stockholders' equity to total assets ratio	43.5%	50.3%	49.6%
Return on equity	(11.8)%	7.4%	5.6%
Capital investment	494	449	418
Free cash flow	(353)	405	(35)

Note: Return on equity is calculated by dividing net income by the average of stockholders' equity at the beginning and the end of each fiscal year.

Panasonic defines Capital investment as purchases of property, plant and equipment (PP&E) on an accrual basis which reflects the effects of timing differences between acquisition dates and payment dates. Panasonic has included the information concerning capital investment because its management uses this indicator to manage its capital expenditures and it believes that such indicator is useful to investors to present accrual basis capital investments in addition to the cash basis information in the consolidated statements of cash flows.

Panasonic's management also believes that this indicator provides useful information when it is compared with depreciation expenses, which are shown in Note 15 of the Notes to Consolidated Financial Statements, for purposes of evaluating the replacement of PP&E. This indicator is, however, subject to the limitation that capital investments may not produce future returns (because current expenditures may not provide an efficient use of capital) and may also be subject to impairment. Also, this indicator is subject to the limitation that it may not represent the true cost of maintaining the Company's portfolio of PP&E as it excludes expenditures for repairs and maintenance, operating

leases, and intangible assets that may be integral to the use of PP&E. Panasonic compensates for these limitations by referring to this indicator together with relevant U.S. GAAP financial measures, such as capital expenditures, depreciation and amortization, shown in its consolidated statements of cash flows, to present an accurate and complete picture for purposes of capital expenditure analysis.

The following table shows a reconciliation of capital investment to purchases of property, plant and equipment:

	Yen (billions)		
	Fiscal year ended March 31,		
	2009	2008	2007
Purchases of property, plant and equipment shown as capital expenditures in the consolidated statements of cash flows	522	419	411
Effects of timing difference between acquisition dates and payment dates	(28)	30	7
Capital investment	494	449	418

Table of Contents

- 30 -

Panasonic defines Free cash flow as the sum of net cash provided by operating activities and net cash provided by investing activities. Panasonic has included the information concerning free cash flow because its management uses this indicator, and it believes that such indicator is useful to investors, to assess its cash availability after financing of its capital projects.

Panasonic's management also believes that this indicator is useful in understanding Panasonic's current liquidity and financing needs in light of its operating and investing activities, i.e., its ability to pay down and draw on available cash. It should be noted, however, that free cash flow Panasonic reports may not be comparable to free cash flow reported by other companies. It should also be noted that free cash flow should not be viewed in a manner that inappropriately implies that it represents the residual cash flow available for discretionary uses, since at any given time Panasonic may be subject to mandatory debt service requirements and may have other non-discretionary expenditures that are not deducted from this indicator. Panasonic compensates for these limitations by referring to this indicator together with relevant U.S. GAAP financial measures shown in its consolidated statements of cash flows and consolidated balance sheets, to present an accurate and complete picture for purposes of cash availability analysis.

The following table shows a reconciliation of free cash flow to net cash provided by operating activities:

	<u>Yen (billions)</u>		
	<u>Fiscal year ended March 31,</u>		
	<u>2009</u>	<u>2008</u>	<u>2007</u>
Net cash provided by operating activities	117	466	533
Net cash used in investing activities	(470)	(61)	(568)
Free cash flow	<u>(353)</u>	<u>405</u>	<u>(35)</u>

Details of Panasonic's consolidated sales and earnings results were as follows:

Year ended March 31, 2009 compared with 2008(1) Sales

Consolidated group sales for fiscal 2009 amounted to 7,766 billion yen, down 14% from 9,069 billion yen in the previous fiscal year. Explaining fiscal 2009 results, the Company cited sales declines in all business segments. (For further details, see (10) Results of Operations by Business Segments of this section.)

In fiscal 2009, the second year of the mid-term management plan GP3, Panasonic steadily implemented initiatives focused on four major themes: double-digit growth for overseas sales, four strategic businesses, manufacturing innovation and the eco ideas strategy. To achieve double-digit growth in overseas sales, the Company widened its target from affluent customers to upper-income customers in the strategic market regions of BRICs countries and Vietnam. With regard to the second theme, four strategic businesses digital AV business, businesses providing comfortable living, semiconductors/components and devices business, and automotive electronics business Panasonic launched various cross-group projects, established new strategies and implemented initiatives to expand sales in each business. As for manufacturing innovation, in addition to proactively promoting Itakona activities, which seek to standardize cost-reduction processes on a finer level, the Company established the New Business Promotion Subcommittee in April 2009 to strengthen cost-reduction activities. In terms of the eco ideas strategy, the Company made steady progress in reducing CO₂ emissions.

Despite these measures, the Company's performance differed markedly between the first and second half of fiscal 2009, due to a sharp deterioration in the business environment from September 2008, when the global financial crisis caused a rapid downturn in global demand and a sharp appreciation of the yen. In response to these business conditions, the Company accelerated business restructuring initiatives based on a policy of selection and concentration. These included integration and closure of manufacturing sites, from the view point of global optimal production, withdrawing from unprofitable businesses, and reassigning and downsizing of workforce. As a result of these and other factors, consolidated group sales for the period under review decreased compared with the previous year.

Table of Contents

- 31 -

(2) Cost of Sales and Selling, General and Administrative Expenses

In fiscal 2009, cost of sales amounted to 5,667 billion yen, down from the previous year, and selling, general and administrative expenses amounted to 2,025 billion yen, down from the previous year. These results are due mainly to the effects of sharp sales declines.

(3) Interest Income, Dividends Received and Other Income

In fiscal 2009, interest income decreased 32% to 23 billion yen, and dividends received increased 11% to 11 billion yen. In other income, in addition to gains on sales of tangible fixed assets, the Company recorded 16 billion yen gain on the sale of the investment securities.

(4) Interest Expense, Goodwill Impairment and Other Deductions

Interest expense decreased 5% to 19 billion yen, owing primarily to a reduction in short-term borrowings. In other deductions, the Company incurred 314 billion yen as expenses associated with impairment losses of fixed assets, 53 billion yen as restructuring charges and 92 billion yen as a write-down of investment securities. (For further details, see Notes 3, 4, 6, and 14 of the Notes to Consolidated Financial Statements.)

(5) Income (loss) before Income Taxes

As a result of the above-mentioned factors, income (loss) before income taxes for fiscal 2009 amounted to a loss of 383 billion yen, compared with a profit of 435 billion yen in fiscal 2008.

(6) Provision for Income Taxes

Provision for income taxes for fiscal 2009 amounted to 37 billion yen, a significant decrease compared with 115 billion yen in the previous year. This result was due primarily to the fact that the Company increased the valuation allowances to deferred tax assets as a result of incurring the aforementioned impairment losses of fixed assets and restructuring charges. (For further details, see Notes 10 of the Notes to Consolidated Financial Statements.)

(7) Minority Interests

Minority interests amounted to a loss of 25 billion yen for fiscal 2009, compared with minority interests of 29 billion yen in fiscal 2008. This result was due mainly to decreased profits in Panasonic Electric Works Co., Ltd. for the period and the consolidation of IPS Alpha Technology, Ltd.

(8) Equity in Earnings (Losses) of Associated Companies

In fiscal 2009, equity in earnings of associated companies amounted to gains of 16 billion yen, from the previous year's losses of 10 billion yen. This result is due mainly to the consolidation of IPS Alpha Technology Ltd. and the improvement of earnings in its associated companies under the equity method in China.

(9) Net Income (Loss)

As a result of all the factors stated in the preceding paragraphs, the Company recorded a net loss of 379 billion yen for fiscal 2009, a decrease of 661 billion yen from the previous year's net income of 282 billion yen.

(10) Results of Operations by Business Segment

Results of operations by business segment for fiscal 2009, as compared with the previous fiscal year, were as follows:

	Yen (billions)		Percent change
	2009	2008	
Sales:			
Digital AVC Networks	3,749	4,320	(13)%
Home Appliances	1,223	1,316	(7)
PEW and PanaHome	1,766	1,910	(8)
Components and Devices	1,127	1,399	(19)
Other	1,072	1,084	(1)
JVC		183	
Eliminations	(1,171)	(1,143)	
Total	7,766	9,069	(14)%
Segment profit:			
Digital AVC Networks	3	252	(99)%
Home Appliances	49	87	(43)
PEW and PanaHome	40	96	(58)
Components and Devices	7	105	(93)
Other	24	64	(63)
JVC		(10)	
Corporate and eliminations	(50)	(75)	
Total	73	519	(86)%

* The Company has changed the internal business transaction between Global Procurement Service Company and other segments since April 1, 2008. Accordingly, segment information for Other and Corporate and eliminations of fiscal 2008 has been reclassified to conform to the presentation for fiscal 2009.

* The name of AVC Networks was changed to Digital AVC Networks from fiscal 2009.

* The name of MEW and PanaHome was changed to PEW and PanaHome as of October 1, 2008.

Digital AVC Networks sales decreased 13% to 3,749 billion yen, compared with 4,320 billion yen in the previous year. Within this segment, sales of video and audio equipment decreased, due mainly to weak sales of digital AV products, such as plasma TVs and digital cameras. Regarding flat-panel TVs, although sales of plasma TVs were lower than the previous year, LCD TVs recorded a double-digit increase in sales from the previous year, mainly as a

result of expanding its product line-ups. Regarding digital cameras, although the world's smallest and lightest digital interchangeable lens cameras and products incorporating face recognition, an evolution from face detection, won market acclaim, weak demand particularly overseas led to a decrease in sales. Meanwhile, sales of information and communications equipment also decreased as a result of sluggish sales of automotive electronics and other products. This result was due mainly to further price erosion of car navigation system caused by the growing market share of low-priced Portable Navigation Devices (PND) in the domestic market, and sluggish sales of mobile phones due to a change in handsets sales incentives and economic downturn in Japan.

With respect to this segment, profit decreased 99% from 252 billion yen in fiscal 2008, to 3 billion yen for fiscal 2009, which is equivalent to 0.1% against sales. This decrease was attributable mainly to a decrease in sales as a result of a rapidly deteriorated market conditions, the negative effects of the appreciation of the yen and the effects of price declines. These factors led to a significant decrease in profit in this segment.

Sales of Home Appliances decreased 7% to 1,223 billion yen, compared with 1,316 billion yen in the previous year. Within Home Appliances, although induction-heating (IH) cooking equipment, Eco Cute natural-refrigerant water heating systems and other products for all-electric homes recorded strong sales, weak sales of air conditioners and compressors resulted in an overall sales decrease.

Table of Contents

- 33 -

Profit in this segment decreased 43% from 87 billion yen in fiscal 2008, to 49 billion yen for fiscal 2009, or 4.0% of sales. Although there were the positive effects of various cost rationalization activities, a decrease in sales, the effects of price declines and rising costs for raw materials led to decreased earnings in this segment.

Sales of PEW and PanaHome decreased 8% to 1,766 billion yen, compared with 1,910 billion yen a year ago. At PEW and its subsidiaries, sluggish sales of electronic materials, automation controls and health-enhancing products led to a decrease in sales from the previous year. At PanaHome Corporation and its subsidiaries, a rapid deterioration sluggish housing market conditions after September 2008 led to a decrease in sales.

With respect to this segment, profit decreased 58% to 40 billion yen, which is equal to 2.3% of sales, from 96 billion yen in the previous year, as a result of the aforementioned decrease in sales and the effects of price declines.

Sales of Components and Devices decreased 19% to 1,127 billion yen, from the previous year's 1,399 billion yen, mainly as a result of sluggish sales in semiconductors and general electronic components. In general electronic components, Panasonic maintained its leading global market share in angular rate sensors for car navigation systems and digital cameras. In addition, sales of power supplies for plasma TVs were relatively steady. However, sales of capacitors, electromechanical components and other products dropped sharply due to deteriorated market conditions and inventory cutbacks at finished product manufacturers. In the semiconductor business, sales fell as demand slowed for semiconductors for digital equipment. In batteries, weak sales of such products as alkaline dry batteries and car batteries led to an overall decrease in sales.

With respect to this segment, profit decreased 93% from 105 billion yen in fiscal 2008, to 7 billion yen for fiscal 2009, or 0.6% of sales. Although there were positive effects of cost rationalization, decreased sales and price declines resulted in decreased earnings in this segment.

Sales in the Other segment amounted to 1,072 billion yen, down 1% from 1,084 billion yen in the previous year. Although the Company expanded product line-ups of high-speed modular placement machines, sluggish sales of factory automation equipment as a result of sharply deteriorated market conditions led to a decrease in sales in this category.

With respect to this segment, profit was down 63% from 64 billion yen for fiscal 2008, to 24 billion yen, which were equivalent to 2.2% against sales in fiscal 2009. This result was due mainly to sales declines as a result of the aforementioned sales declines.

(11) Sales Results by Region

Sales results by region for fiscal 2009, as compared with the previous fiscal year, were as follows:

	<u>Yen (billions)</u>		<u>Percent change</u>
	<u>2009</u>	<u>2008</u>	
Domestic Sales:	4,082	4,545	(10)%
Overseas Sales:			
North and South America	997	1,251	(20)
Europe	963	1,213	(21)
Asia and Others	1,724	2,060	(16)
Total	3,684	4,524	(19)
Total	7,766	9,069	(14)%

Sales in Japan amounted to 4,082 billion yen, down 10% from 4,545 billion yen in fiscal 2008. Sales declined in all segments, and there were sharp sales declines particularly in automotive electronics equipment, mobile phones, semiconductors, general components and devices, and FA equipment.

Overseas sales amounted to 3,684 billion yen, down 19% from 4,524 billion yen in the previous fiscal year. Sales declined in all segments, and there were sharp sales declines particularly in business-use AV equipment, automotive electronics, PCs and peripherals, semiconductors, and general components and devices.

Table of Contents

- 34 -

By region, sales in the Americas amounted to 997 billion, down 20% from 1,251 billion yen in fiscal 2008. Sales downturns in digital AV equipment, broadcast- and business-use AV equipment, automotive electronics, general components and other products led to decreased sales from the previous year for this region.

Sales in Europe amounted to 963 billion yen, down 21% from the previous year's 1,213 billion yen. Sales for this region decreased, due mainly to weak sales in digital cameras, automotive electronics, white goods, general components and batteries.

In the Asia and Others region, sales decreased 16% to 1,724 billion yen, from the previous year's 2,060 billion yen. In Asia (excluding China), sales decreased in PCs and peripherals, automotive electronics, compressors, as well as semiconductors and general components, resulting in overall sales declines. Meanwhile, in China, sales decreased mainly in PCs and peripherals, air-conditioners, compressors, and general components, resulting in overall decreased sales.

Year ended March 31, 2008 compared with 2007**(1) Sales**

Consolidated group sales for fiscal 2008 amounted to 9,069 billion yen, mostly the same level from 9,108 billion yen in the previous fiscal year. Explaining fiscal 2008 results, the Company cited sales gains in all business segments except JVC (Victor Company of Japan, Ltd. and its subsidiaries), due mainly to favorable sales in digital AV products and white goods. (For further details, see (10) Results of Operations by Business Segments of this section.) The electronics industry in the fiscal year ended March 31, 2008 faced severe business conditions in Japan and overseas, due mainly to ever-rising prices for crude oil and other raw materials, and continued price declines caused by continuously intensifying global competition, mainly in digital products. Under these circumstances, the Panasonic Group worked to accelerate growth strategies in fiscal 2008, the first year of the new three-year mid-term management plan GP3. Specifically, Panasonic continued to strengthen V-products, which are the core of its growth strategies and make a significant contribution to overall business results in order to boost market shares. With regard to the strategic plasma display panel (PDP) business, Panasonic started operation of its fourth domestic PDP plant in June 2007, and began construction of its fifth in November 2007. In addition, Panasonic implemented initiatives to achieve double-digit growth in overseas sales of consumer products. To accelerate growth in emerging markets as well as the U.S. and Europe, the Company established a framework to boost sales in Russia, Brazil and India, and also promoted its cutting-edge products. These initiatives contributed to an increase in sales, as mentioned above.

Domestic sales amounted to 4,545 billion yen, down 2% from 4,617 billion yen a year ago. Although favorable sales were recorded mainly in digital AV products as a result of a significant contribution of V-products, this result is due primarily to the effects of JVC as mentioned above. Overseas sales increased 1% to 4,524 billion yen, from 4,492 billion yen in fiscal 2007, ended March 31, 2007. Despite the effects of JVC, favorable sales in all business segments except JVC led to an increase in overseas sales.

(2) Cost of Sales and Selling, General and Administrative Expenses

In fiscal 2008, cost of sales amounted to 6,377 billion yen, mostly the same level from the previous year, while net sales remained the same level. Negative effects such as rising prices for raw materials were offset mainly as a result of the rationalization of materials costs. Selling, general and administrative expenses were down 4% to 2,172 billion yen compared to the previous year, due mainly to comprehensive cost reduction efforts.

(3) Interest Income, Dividends Received and Other Income

In fiscal 2008, interest income increased 12% to 34 billion yen, and dividends received increased 36% to 10 billion yen. In other income, in addition to gains on sales of tangible fixed assets, the Company recorded 15 billion yen gain on the sale of the investments.

Table of Contents

- 35 -

(4) Interest Expense, Goodwill Impairment and Other Deductions

Interest expense decreased 3% to 20 billion yen, owing primarily to a reduction in short-term borrowings. In other deductions, compared with 20 billion yen of restructuring charges in fiscal 2007, the Company incurred 40 billion yen including 33 billion yen as expenses associated with the implementation of early retirement programs, 32 billion yen as write-down of investment securities, and 45 billion yen as other impairment losses on long-lived assets related to fixed assets, compared with the previous year's 49 billion yen including 19 billion yen as other impairment losses on long-lived assets and a loss of 30 billion yen as goodwill impairment. (For further details, see Notes 3, 4, 6, 7, and 14 of the Notes to Consolidated Financial Statements.)

(5) Income before Income Taxes

As a result of the above-mentioned factors, income before income taxes for fiscal 2008 decreased 1% to 435 billion yen, compared with 439 billion yen in fiscal 2007, while the ratio to net sales were 4.8%, the same level from the previous year.

(6) Provision for Income Taxes

Provision for income taxes for fiscal 2008 amounted to 115 billion yen, a significant improvement compared with 192 billion yen in the previous year. The effective tax rate to income before income taxes declined to 26.3%, down 17.4% from 43.7% a year ago. This improvement was due mainly to a strategic merger of domestic device businesses in order to reinforce manufacturing competitiveness such as strengthening of cost competitiveness by seeking streamlining and efficiency of operations which consequently resulted in the utilization of net operating loss carryforwards to which a deferred tax asset valuation allowance was provided for in previous years, an improvement in general profitability of certain subsidiaries which resulted in the reversal of a portion of deferred tax valuation allowance as improvement in future profitability is projected to allow for the utilization of net operating carryforwards in these subsidiaries, and a decrease in tax expenses associated with tax benefits generated through certain business reorganizations. This decrease in the effective rate is a non-recurring event. (For further details, see Notes 10 of the Notes to Consolidated Financial Statements.)

(7) Minority Interests

Minority interests amounted to 29 billion yen for fiscal 2008, compared with minority interests of 31 billion yen in fiscal 2007. This result was due mainly to decreased profits in Victor Company of Japan, Ltd. and its subsidiaries for the period when these companies were consolidated subsidiaries of Panasonic.

(8) Equity in Losses of Associated Companies

In fiscal 2008, equity in earnings of associated companies amounted to losses of 10 billion yen, from the previous year's gains of 1 billion yen. This result is due mainly to losses in Victor Company of Japan, Ltd. and its subsidiaries which became associated companies under the equity method in August 2007, and lower profit in a joint-venture of LCD panels with Toshiba.

(9) Net Income

As a result of all the factors stated in the preceding paragraphs, the Company recorded a net income of 282 billion yen for fiscal 2008, an increase of 30% from 217 billion yen in the previous year.

Table of Contents

- 36 -

(10) Results of Operations by Business Segment

Results of operations by business segment for fiscal 2008, as compared with the previous fiscal year, were as follows:

	Yen (billions)		Percent change
	2008	2007	
Sales:			
Digital AVC Networks	4,320	4,064	6%
Home Appliances	1,316	1,247	6
PEW and PanaHome	1,910	1,859	3
Components and Devices	1,399	1,378	2
Other	1,084	998	9
JVC	183	646	(72)
Eliminations	(1,143)	(1,084)	
Total	9,069	9,108	0%
Segment profit:			
Digital AVC Networks	252	220	15%
Home Appliances	87	83	4
PEW and PanaHome	96	79	22
Components and Devices	105	100	5
Other	64	61	6
JVC	(10)	(6)	
Corporate and eliminations	(75)	(77)	
Total	519	460	13%

- * From fiscal 2009, the name of AVC Networks was changed to Digital AVC Networks.
- * The name of MEW and PanaHome was changed to PEW and PanaHome as of October 1, 2008.
- * The Company has changed the transactions between Global Procurement Service Company and other segments since April 1, 2008. Accordingly, segment information for Other and eliminations for fiscal 2008 have been reclassified to conform to the presentation for fiscal 2009.
- * The healthcare business was transferred to Panasonic Shikoku Electronics Co., Ltd. on April 1, 2007. Accordingly, the segment information for fiscal 2007 has been reclassified to confirm with the presentation for the year ended March 31, 2008.
- * JVC became an associated company under the equity method from a consolidated subsidiary in the fiscal 2008 second quarter.

Digital AVC Networks sales increased 6% to 4,320 billion yen, compared with 4,064 billion yen in the previous year. Within this segment, sales of video and audio equipment increased, due mainly to strong sales of digital AV products, such as flat-panel TVs and digital cameras. Regarding TVs, the VIERA series recorded a significant increase in sales from the previous year, due primarily to expanding demand for large-sized, full high-definition (HD) models amid the global progress of digital broadcasting. Sales of LUMIX series of digital cameras significantly increased, due mainly to strong sales of new models that feature an automatic iA (Intelligent Auto) mode, which include functions such as a face detection system that automatically chooses settings optimal for each condition. Meanwhile, sales of information and communications equipment also increased as a result of favorable sales of automotive electronics and mobile phones. Sales of automotive electronics such as car AV and the Strada series of car navigation systems remained strong, and sales of mobile phones significantly increased due mainly to strong demand for models with high-resolution screens for watching One Segment broadcasting.

With respect to this segment, profit improved 15% from 220 billion yen in fiscal 2007, to 252 billion yen for fiscal 2008, which is equivalent to 5.8% against sales. This increase was attributable mainly to expanded sales in flat-panel TVs, digital cameras, automotive electronics equipment and mobile phones, as well as cost rationalization effects. Particularly in plasma TVs, despite price declines under ever-intensified global competition, the Company expanded lineups of full HD models and comprehensive cost reduction efforts including curbing materials costs. These factors, as well as a significant improvement of profitability in mobile phones, led to double-digit profit growth in this segment.

Table of Contents

- 37 -

Sales of Home Appliances increased 6% to 1,316 billion yen, compared with 1,247 billion yen in the previous year. Within Home Appliances, sales gains were recorded mainly in air conditioners and refrigerators, as a result of strong sales in high value-added products that leverage Panasonic's proprietary technologies. These products include air conditioners that automatically adjust air flows depending on people's feeling of temperature and refrigerators featuring nano-e crispers that keep vegetables and other cold-sensitive foods fresh with nano-e technology.

Profit in this segment rose 4% from 83 billion yen in fiscal 2007, to 87 billion yen for fiscal 2008, or 6.6% of sales. Despite the adverse effects from rising costs for raw materials including plastic materials, double-digit growth in overseas sales in air conditioners, washing machines and refrigerators as a result of a successful introduction of aforementioned unique products, as well as the effects of various cost rationalization activities, led to increased earnings in this segment.

Sales of PEW and PanaHome increased 3% to 1,910 billion yen, compared with 1,859 billion yen a year ago. Despite weak sales of building products as a result of a decrease in new residential construction, sales at PEW and its subsidiaries increased from the previous year. This result is due primarily to favorable sales in electrical construction materials such as home fire alarms and high energy-efficient lighting fixtures, and electronic and plastic materials such as semiconductor encapsulation materials. At PanaHome Corporation and its subsidiaries, sluggish housing market conditions led to a slight decrease in sales.

With respect to this segment, despite the adverse effects of rising prices for raw materials including coppers and nickels, profit increased 22% to 96 billion yen, which is equal to 5.0% of sales, from 79 billion yen in the previous year, as a result of the aforementioned sales gains in electrical construction materials and electronic and plastic materials, and the comprehensive cost rationalizations including a decrease of direct material costs and fixed costs.

Sales of Components and Devices increased 2% to 1,399 billion yen, from the previous year's 1,378 billion yen, mainly as a result of favorable sales in general electronic components, semiconductors, batteries. In general electronic components, sales gains were recorded due mainly to favorable sales in angular rate sensors used for increasing precision of car navigation systems and digital cameras, specialty polymer aluminum electrolytic capacitors that are compact and have a high noise reduction function, and light touch switches used for mobile phones. In semiconductors, in addition to favorable sales of image sensors for digital cameras, a significant sales increase was recorded in system LSIs primarily for digital AV equipment. In batteries, although sales of lithium-ion batteries were weak, due mainly to a voluntary replacement of NOKIA brand lithium-ion battery pack units and a decrease in production capacity by the damage from fires in Japan, favorable sales of alkaline dry batteries led to increased sales overall.

With respect to this segment, profit increased 5% from 100 billion yen in fiscal 2007, to 105 billion yen for fiscal 2008, or 7.5% of sales. Despite the negative effects from rising prices for raw materials including copper and aluminum, sales gains and cost rationalization efforts contributed to increased earnings in this segment. In particular, a significant profit growth was recorded in electronic components and devices, mainly as a result of strong sales in general electronic components for digital AV products and automotive electronics equipment.

Sales in the Other segment amounted to 1,084 billion yen, up 9% from the previous year. Sales gain was recorded in factory automation equipment by expanding lineups of high-speed modular placement machines and providing optimal solutions for its customers.

With respect to this segment, profit was up 6% from 61 billion yen for fiscal 2007, to 64 billion yen, which was equivalent to 5.9% of sales in fiscal 2008. Despite severe market conditions, this result was due mainly to sales gains and cost rationalization.

Sales of JVC were 183 billion yen, compared with 646 billion yen in the previous year. Victor Company of Japan, Ltd. and its subsidiaries became associated companies under the equity method from Panasonic's consolidated subsidiaries in August 2007. Accordingly, JVC sales for the period from then on are not included in Panasonic's consolidated results.

With respect to this segment, losses amounted to 10 billion yen, compared with losses of 6 billion yen in fiscal 2007.

Table of Contents

- 38 -

(11) **Sales Results by Region**

Sales results by region for fiscal 2008, as compared with the previous fiscal year, were as follows:

	<u>Yen (billions)</u>		<u>Percent change</u>
	<u>2008</u>	<u>2007</u>	
Domestic Sales:	4,545	4,616	(2)%
Overseas Sales:			
North and South America	1,251	1,381	(9)
Europe	1,213	1,218	0
Asia and Others	2,060	1,893	9
Total	4,524	4,492	1
Total	9,069	9,108	0%

Sales in Japan amounted to 4,545 billion yen, down 2% from 4,616 billion yen in fiscal 2007. However, the Company cited sales gains in all business segments except JVC, including favorable sales of digital AV products and automotive electronics equipment.

Overseas sales were up 1%, to 4,524 billion yen, from 4,492 billion yen in the previous fiscal year. This result, despite the effects of JVC, is due mainly to favorable sales in digital AV products and white goods.

By region, sales in the Americas amounted to 1,251 billion, down 9% from 1,381 billion yen in fiscal 2007. Although sales of flat-panel TVs, digital cameras, PCs and video broadcasting systems were favorable, sales downturns in automotive electronics and batteries, as well as the effects of JVC, led to decreased sales from the previous year for this region.

Sales in Europe amounted to 1,213 billion yen, mostly the same level from the previous year's 1,218 billion yen. Despite the effect of JVC, favorable sales in flat-panel TVs, digital cameras and automotive electronics led to this sales results for this region.

In the Asia and Others region, sales increased 9% to 2,060 billion yen, from the previous year's 1,893 billion yen. In Asia (excluding China), strong sales were recorded in flat-panel TVs, digital cameras, air-conditioners and compressors, as well as semiconductors, resulting in overall sales gains. Meanwhile, in China, sales gains were recorded mainly in flat-panel TVs, air-conditioners, semiconductors and electronic components and devices, resulting in overall increased sales.

B. Liquidity and Capital Resources

Panasonic's Policy on Financial Position and Liquidity

As its basic policy, Panasonic has long placed emphasis on maintaining sound balance sheets, and on generating as much available funding as possible from internal sources through efforts to raise the operational efficiency or asset turnover ratios, so as not to overly rely on external fund raising. This conservativeness is exemplified in the tradition of maintaining the ratio of stockholders' equity to total assets at a relatively high level and keeping large cash balance. The ratio of stockholders' equity to total assets as of March 31, 2009 was 43.5%, down from 50.3% in the previous year. The total of short-term borrowings and long-term debt amounted to 746 billion yen as of March 31, 2009, up by 357 billion yen from a year ago. Cash balance decreased to 1,163 billion yen (the total of cash and cash equivalents of 974 billion yen plus time deposits with a maturity of more than three months of 189 billion yen) as of March 31, 2009, compared with the previous year's 1,285 billion yen (the total of cash and cash equivalents of 1,215 billion yen plus time deposits of 70 billion yen).

Table of Contents

- 39 -

In order to facilitate access to global capital markets, Panasonic obtains credit ratings from the world's two leading credit rating agencies, Moody's Investors Service, Inc. (Moody's) and Standard & Poor's Rating Services (S&P). In addition, Panasonic maintains credit ratings from Rating and Investment Information, Inc. (R&I), a rating agency nationally recognized in Japan, primarily for access to the Japanese capital markets. As of March 31, 2009, Panasonic's debt ratings are: Moody's: Aa2 (long-term), P-1 (short-term); S&P: AA- (long-term, outlook: stable), A-1+ (short-term); and R&I: AA+ (long-term), a-1+ (short-term).

Within the rating classification system of R&I, a-1 is the highest of five categories for short-term debt and indicates a strong degree of certainty regarding debt repayment, with a plus (+) sign added to a rating in that category to indicate an especially high degree of certainty regarding debt repayment; and AA is the second highest of nine categories for long-term debt and indicates a very high degree of certainty regarding debt repayment, with a plus (+) or minus (-) sign added to a rating in that category to indicate its relative standing within that category.

Panasonic believes that its credit ratings include the rating agencies' assessment of the general operating environment, its positions in the markets in which it competes, reputation, movements and volatility in its earnings, risk management policies, liquidity and capital management. An adverse change in any of these factors could result in a reduction of Panasonic's credit ratings, and that could, in turn, increase its borrowing costs and limit its access to the capital markets or require it to post additional collateral and permit counterparties to terminate transactions pursuant to certain contractual obligations.

With the above-mentioned cash balance, combined with the generally high credit ratings from leading credit rating agencies, Panasonic believes that it has sufficient sources of liquidity for either working capital or long-term investment needs.

As of March 31, 2009, the outstanding balance of short-term borrowings totaled 95 billion yen, and long-term debt was 651 billion yen. Panasonic's borrowings are not significantly affected by seasonal factors. (For further details, see Note 8 of the Notes to Consolidated Financial Statements.) Most borrowings are at fixed rates.

In recent years, Panasonic has focused on raising capital efficiency upon review of its balance sheet. In fiscal 2007, to meet the needs of more sophisticated global operations, Panasonic established Panasonic Global Treasury Center B.V. in Amsterdam, the Netherlands, a new overseas financial subsidiary with in-house banking functions that facilitate various finance and foreign exchange transactions worldwide. Along with the establishment of the new company, Panasonic has implemented initiatives to further enhance the efficiency of group-wide treasury transactions by introducing a new round-the-clock treasury system.

Regarding cash flows, Panasonic uses free cash flow (see Overview Key performance indicators in Section A of this Item 5) as an important indicator to evaluate its performance.

Regarding the use of financial instruments for hedging purposes, see Item 11.

Fiscal 2009 Financial Position and Liquidity

The Company's consolidated total assets as of the end of fiscal 2009 decreased to 6,403 billion yen, as compared with 7,444 billion yen at the end of the last fiscal year. This result was due primarily to a decrease on trade receivables and a reduction of inventories affected by deteriorated market conditions, and a decrease in investments and advances affected by a decline of stock price.

The Company's consolidated total liabilities as of March 31, 2009 amounted 3,191 billion yen, mostly unchanged from the previous year. Although current liabilities decreased as a result of the repayment of short-term borrowings and current liabilities including trade payables, an increase in noncurrent liabilities including long-term debt led to this result. (For further details, see Note 8 of the Notes to Consolidated Financial Statements.)

Table of Contents

- 40 -

Minority interests decreased 86 billion yen, to 429 billion yen.

Stockholders' equity decreased 958 billion yen to 2,784 billion yen, from the previous year's 3,742 billion yen. This decrease was due mainly to a decrease of 469 billion yen in retained earnings and a decrease of 420 billion yen in accumulated other comprehensive income (loss), which reflects a decrease in pension liability adjustments, decreases in cumulative translation adjustments due primarily to the appreciation of the yen and a decrease in unrealized holding gains of available-for-sale securities, amounting to 242 billion yen, 113 billion yen and 56 billion yen, respectively.

	Yen (billions)	
	Fiscal year ended March 31,	
	2009	2008
Purchases of property, plant and equipment shown as capital expenditures in the consolidated statements of cash flows	522	419
Effects of timing difference between acquisition dates and payment dates	(28)	30
Capital investment	494	449

Capital investment (excluding intangibles) during fiscal 2009 totaled 494 billion yen, up 10% from the previous fiscal year's total of 449 billion yen, as shown on the above table. The Company implemented capital investment primarily to increase production capacity in strategic business areas such as flat panel TVs and semiconductors, while curbing capital investment in a number of business areas, in line with increasing management emphasis on capital efficiency. Principal capital investments consisted of PDP manufacturing facilities for Plant No. 4 and Plant No. 5 in Amagasaki, Hyogo Prefecture, Japan; LCD panel production facilities for the Himeji plant in Hyogo Prefecture, Japan; and semiconductor manufacturing facilities for the Uozu plant located in Toyama Prefecture, Japan.

Depreciation (excluding intangibles) during fiscal 2009 amounted to 326 billion yen, up 16% compared with 282 billion yen in the previous fiscal year.

Net cash provided by operating activities in fiscal 2009 amounted to 117 billion yen, compared with 466 billion yen in the previous fiscal year. This was attributable primarily to depreciation and a decrease in trade receivables, despite net loss and a decrease in trade payables. Net cash used in investing activities amounted to 469 billion yen, compared with 61 billion yen in fiscal 2008. Despite having proceeds from disposition of investments and advances, this was due

primarily to capital expenditures for tangible fixed assets of 522 billion yen, mainly consisting of manufacturing facilities for priority business areas such as plasma and liquid crystal display panels, and semiconductors. Net cash provided by financing activities was 149 billion yen compared with cash outflow of 204 billion yen in fiscal 2008. This was due mainly to an increase in long-term debt by issuing unsecured straight bonds of 400 billion yen by Panasonic Corporation, despite repurchase of the Company's common stock of 72 billion yen and the payment of cash dividends. All these activities, as well as a net decrease in cash and cash equivalents of 36 billion yen associated with the effect of exchange rate fluctuations, resulted in a net decrease of 241 billion yen in cash and cash equivalents during fiscal 2009. Cash and cash equivalents at the end of fiscal 2009 totaled 974 billion yen, compared with 1,215 billion yen a year ago.

Free cash flow in fiscal 2009 amounted to a cash outflow of 353 billion yen, compared with a cash inflow of 405 billion yen in fiscal 2008. This result was due mainly to a decrease in net income and an increase in capital expenditures. (For a reconciliation of free cash flow to the most directly comparable U.S. GAAP financial measure and related discussion, see [Overview](#) [Key performance indicators](#) in Section A of this Item 5.)

Table of Contents

- 41 -

Commitments for Capital Expenditures

As of March 31, 2009, commitments outstanding for the purchase of property, plant and equipment amounted to 79 billion yen.

C. Research and Development

In fiscal 2009, Panasonic executed initiatives to accelerate R&D with a focus on key development themes, to enhance R&D efficiency primarily by creating a common platform for technologies straddling different products and business segments, and to develop energy-saving and environmental technologies.

Panasonic engages in a broad range of R&D themes, including digital network software, device and environmental technologies. The Company has established R&D sites at optimal locations globally as it builds an R&D structure that optimally utilizes the personnel and technologies in Japan, North America, Europe, China and the ASEAN region. For example, at the Panasonic Hollywood Laboratory in North America, Panasonic has developed Blu-ray technologies in collaboration with movie studios. In Europe and China, meanwhile, the Company has strengthened its development of products such as refrigerators and air conditioners that are more tailored to regional characteristics in terms of food, clothing and housing.

Key development themes during the fiscal year were as follows:

- (1) Approximately 1-inch Thin Full-Flat Plasma TVs that Consume about 50% Less Electricity^{*1} Panasonic succeeded in nearly doubling the luminous efficiency^{*2} of its plasma TVs with a newly developed structure that uses wider electrodes along the front panel to expand the discharge area and with other advances. These plasma TVs also offer the world's highest^{*3} moving picture resolution of 1,080 lines^{*4} while consuming approximately half the power. Thanks to the lower power consumption, heat problems have been alleviated. As a result, Panasonic has created a full-flat display that is only approximately 1-inch, or 24.7 mm^{*5}, thin at its thickest part.
- (2) UniPhier[®] System LSI for Mobile Phones that Integrates Communication and Application Functions Tapping system LSI design technology to integrate approximately 280 million transistors on a single chip and 45nm semiconductor micro-processing technology, Panasonic reduced the chip area by around 40%^{*6}. At the same time, Panasonic extended one-segment DTV broadcast viewing and audio playback times by approximately 25%^{*7}. This was achieved by power consumption-reduction technologies that control the

operating frequency for applications and communication, and by adopting power supply control architectures optimal for both times of operation and non-operation.

- (3) Refrigerator with Top-Unit Compressor that Achieves the Best Energy Saving in the Industry^{*8} through Highly Effective Cooling Control Panasonic has employed a compressor with a highly efficient operating pattern and smaller control board components to limit electricity consumption. And with an efficient layout which concentrates frozen zones in the center and optimal placement of vacuum insulating materials, power consumption has been reduced by approximately 30%^{*9}.
- (4) Rechargeable EVOLTA Battery that Delivers the Highest Number of Recharges in the Industry^{*10} Panasonic developed an EVOLTA series battery that can be recharged and used approximately 1,200 times, an approximate 20% improvement^{*11}. This development drew on technology that stops materials from degrading through a homogeneous distribution of hydrogen-absorbing alloy constituents; a proprietary technique to increase the capacity of the can; and technology that prevents surface deterioration to maintain high performance over an extended period.

Expenditures for research and development amounted to 518 billion yen, 555 billion yen and 578 billion yen for the three fiscal years ended March 31, 2009, 2008 and 2007, respectively, representing 6.7%, 6.1% and 6.3% of Panasonic's total net sales for each of those periods.

(Notes)

- *1. Approximately 40% annual reduction in a 50-inch display and approximately 46% annual reduction in a 46-inch display compared with equivalent-sized models in Panasonic's P Z800/85/80 series.
- *2. Compared with the Company's 2007 models (PZ750 series, etc.)

- *9. Compared with the Company's 2007 models (NR-F532T, NR-F472T)
- *10. As of August 28, 2008 for commercialized nickel-metal hydride batteries (AA batteries with a minimum capacity of 1,900 mAh, and AAA batteries with a minimum capacity of 750 mAh)
- *11. Existing Company product (HHR-3MPS): Approximately 1,000 recharges.

D. Trend Information

Panasonic expects that the economic environment in fiscal 2010 will be more severe than the past fiscal year, as the global recession and shrinking demand triggered by the financial crisis coincide with changes in market structure, including the expansion of emerging markets and a shift to lower-priced products. Responding to these business conditions, the Company will simultaneously rebuild its management structure while preparing and taking action for future growth. Fiscal 2010 is the final year of the GP3 plan and although the current business environment is significantly different from the plan's initial assumptions, Panasonic will continue to push ahead with initiatives set forth in the GP3 plan without changing it, and aims to ready itself to leap ahead when the market recovers.

In order to rebuild its management structure, Panasonic will implement drastic business structural reforms. Guided by the policies of selection and concentration and the strategic placement of overseas sites, Panasonic will strive for new growth by clarifying which businesses to withdraw from and shifting resources to growing businesses based on the results of its examinations. Furthermore, the Company will ensure *Itakona* becomes standard practice and accelerate initiatives to reduce procurement costs. It will also step up actions including implementing comprehensive cost rationalization efforts, curbing capital expenditures and reducing inventories.

Regarding preparations and actions for future growth, the cornerstone is strengthening products. The Company's approach is to create products that are unique to Panasonic, products that link well with one another, have superior energy-efficiency and are based on universal design concepts. These products will incorporate its customer's viewpoint, as well as excel in terms of safety, quality and environmental performance. On top of that, Panasonic will push steadily ahead with the four major themes of the GP3 plan: double-digit growth for overseas sales, four strategic businesses, manufacturing innovation and the eco ideas strategy.

In the digital AV business, one of the four strategic businesses, Panasonic has decided to reduce major capital investment for the 5th domestic PDP plant in Amagasaki and the IPS Alpha plant in Himeji, because of lower growth in the flat-panel TV markets caused by the economic recession. However, the Company aims to outgrow its competitors by strengthening product development to maintain growth momentum in its flat-panel TV business.

In addition to these activities, Panasonic will start operating the New Business Promotion Support System in fiscal 2010. The Head Office will assist in creating new businesses by providing financial, technical and personnel assistance when the priority projects of business domain companies and Company-wide common projects are launched commercially.

Regarding the capital and business alliance with SANYO, a Collaboration Committee, which was set up to form a close alliance after completing the TOB, is looking at wide-ranging themes, while giving sufficient consideration to competition laws. Panasonic has positioned the energy business as a business field with extremely high growth potential. Therefore, Panasonic intends to broaden this business as its fifth strategic business to drive the Company's future growth.

Table of Contents

- 43 -

E. Off-Balance Sheet Arrangements

The Company established sale-leaseback arrangements for manufacturing machinery and equipment, and sale of receivables without recourse and with recourse, as off-balance sheet arrangements in order to reduce its total assets.

In fiscal 2009, Panasonic sold machinery and equipment for 17 billion yen, which are used in manufacturing semiconductors, to Sumishin Matsushita Financial Services Co., Ltd. The assets are leased back to Panasonic over a period of one to five years. Panasonic guarantees a specific value of the leased assets. These leases are classified as operating leases for U.S. GAAP purposes. Including the above-mentioned, the aggregate amount of future minimum lease payments under non-cancelable operating leases is 175 billion yen at March 31, 2009. (For further details, see Note 5 of the Notes to Consolidated Financial Statements.)

In fiscal 2009, Panasonic sold, without recourse, trade receivables of 458 billion yen to independent third parties for proceeds of 457 billion yen. In fiscal 2009, Panasonic sold, with recourse, trade receivables of 412 billion yen to independent third parties for proceeds of 411 billion yen. (For further details, see Note 15 of the Notes to Consolidated Financial Statements.)

In addition, the Company provides several types of guarantees and similar arrangements. (For further details, see Note 18 of the Notes to Consolidated Financial Statements.)

F. Tabular Disclosure of Contractual Obligations

The two tables below show Panasonic's cash payment obligations and guarantees and other commercial commitments, broken down by the payment amounts due for each of the periods specified below, as of March 31, 2009:

	Yen (millions)				
	Payments Due by Period				
	Total	Less than 1 year	1-3 years	3-5 years	After 5 years
Contractual Obligations:					
Long-Term Debt Obligations	585,322	7,475	213,782	221,886	142,179
Interest Obligations	45,383	9,051	16,265	10,230	9,837
Capital Lease Obligations	112,331	38,868	51,667	12,693	9,103
Operating Lease Obligations	174,929	56,444	92,466	21,394	4,625
Purchase Obligations	79,068	79,068			
Defined benefit plan contribution	73,823	73,823			
Total Contractual Cash Obligations	1,070,856	264,729	374,180	266,203	165,744

Note : Contingent payments related to uncertain tax positions of 7 billion yen are excluded from the table above, as it is not possible to reasonably predict the ultimate amount of settlement or timing of payment.

	Yen (millions)
	Total Amounts Committed
Other Commercial Commitments:	
Guarantees	33,434
Total Commercial Commitments	33,434

Discounted exported bills generally have contractual lives of less than one year. Loan guarantees are principally provided on behalf of employees, associated companies and customers, and generally have long-term contractual lives coinciding with the maturities of the guaranteed obligations. (For further details, see Notes 5, 8, 9, 10 and 18 of the

Notes to Consolidated Financial Statements.)

See Cautionary Statement Regarding Forward-Looking Statements.

Table of Contents

- 45 -

H. Accounting Principles

Critical Accounting Policies

The Company has identified the following critical accounting policies which are important to its financial condition and results of operations, and require management's judgment.

Long-lived Assets

The useful lives of long-lived assets are summarized in Note 1(h) of the Notes to Consolidated Financial Statements included in this annual report and reflect the estimated period that the Company expects to derive economic benefit from their use. In estimating the useful lives and determining whether subsequent revisions to the useful lives are necessary, the Company considers the likelihood of technological obsolescence, changes in demand for the products related to such assets, and other factors which may affect their utilization of the long-lived assets. The effect of any future changes to the estimated useful lives of the long-lived assets could be significant to the Company's results of operations.

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amounts of assets or asset group may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future net cash flows (undiscounted and without interest charges) expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset. Assets to be disposed of are reported at the lower of the carrying amount or fair value less selling costs. Factors which may contribute to the need for future impairment charges include changes in the use of assets resulting from the Company's restructuring initiatives, technological changes or any significant declines in the demand for related products.

Valuation of Investment Securities

The Company holds available-for-sale securities, equity method securities and cost method securities, included in short-term investments, and investments and advances. Available-for-sale securities are carried at fair value with unrealized holding gains and losses included as a component of accumulated other comprehensive income (loss), net of applicable taxes.

Individual securities are reduced to net realizable value by a charge to earnings for other-than-temporary declines in fair value. Management regularly reviews each investment security for impairment based on criteria that includes the extent to which cost exceeds market value, the duration of that market decline and the financial health of and specific prospects for the issuer. Because such specific information may become available after the Company makes the impairment evaluation, and whether the impairment is other-than-temporary depends upon future events that may or may not occur, the Company may be required to recognize an other-than-temporary impairment in the future. Determination of whether a decline in value is other-than-temporary requires judgment. At March 31, 2009, the Company has recorded 296 billion yen of available-for-sale securities, 41 billion yen of cost method securities, 13 billion yen of equity method securities that have market values, and 204 billion yen of equity method securities that do not have market values, advances and others. These investments could be determined to be other-than-temporarily impaired, depending on changes to the current facts and assumptions. In fiscal 2009, the Company recorded 92 billion yen impairment losses on investment securities.

For further discussion on valuation of investment securities, see Notes 3 and 4 of the Notes to Consolidated Financial Statements included in this annual report.

Valuation of Inventory

Inventories are stated at the lower of cost, determined on a first-in, first-out basis, or net realizable value. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make a sale. The Company routinely reviews its inventories for their salability and for indications of obsolescence to determine if inventories should be written-down to net realizable value. Judgments and estimates must be made and used in connection with establishing such allowances in any accounting period. In estimating the net realizable value of its inventories, the Company considers the age of the inventories and the likelihood of spoilage or changes in market demand for its inventories.

Table of Contents

- 46 -

Warranties

The Company makes estimates of potential warranty claims related to its goods sold. The Company provides for such costs based upon historical experience and its estimate of the level of future claims. Management makes judgments and estimates in connection with establishing the warranty reserve in any accounting period. Differences may result in the amount and timing of its revenue for any period if management makes different judgments or utilizes different estimates. (For further details, see Note 18 of the Notes to Consolidated Financial Statements.)

Valuation of Accounts Receivable and Noncurrent Receivables

The Company reviews its accounts receivable on a periodic basis and provides an allowance for doubtful receivables based on historical loss experience and current economic conditions. In evaluating the collectibility of individual receivable balances, the Company considers the age of the balance, the customers' payment history, their current credit-worthiness and adequacy of collateral.

The Company records noncurrent receivables, representing loans from finance lease transactions, at cost, less the related allowance for impaired receivables. A loan is considered to be impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. When a loan is considered to be impaired, the amount of impairment is measured based on the present value of expected future cash flows or the fair value of the collateral. Cash receipts on impaired receivables are applied to reduce the principal amount of such receivables until the principal has been recovered and are recognized as interest income thereafter. Management's judgment is required in making estimates of the future cash flows of an impaired loan. Such estimates are based on current economic conditions and the current and expected financial condition of the debtor. (For further details, see Schedule II of Item 18.)

Valuation of Goodwill

Goodwill is tested for impairment on an annual basis, or more frequently if events or changes in circumstances indicate that the goodwill may be impaired, such as an adverse change in business climate. Impairment is recorded if the implied fair value of goodwill is less than its carrying amount. The fair value determination used in the impairment assessment requires estimates of the fair value of reporting units based on quoted market prices, prices of comparable businesses, present value or other valuation techniques, or a combination thereof, necessitating management to make subjective judgments and assumptions. These estimates and assumptions could result in significant differences to the amounts reported if underlying circumstances were to change. At March 31, 2009, the Company has recorded 411

billion yen of goodwill, part or all of which could be determined to be impaired in future periods, depending on changes to the current facts and assumptions. For further discussion on goodwill, see Note 7 of the Notes to Consolidated Financial Statements included in this annual report.

Valuation of Deferred Tax Assets and Sustainability of Uncertain Tax Positions

In assessing the realizability of deferred tax assets and uncertain tax positions based on the expected future generation of taxable income or assessed sustainability of uncertain tax positions, Panasonic considers whether it is more likely than not that any portion or all of the deferred tax assets or recognized benefit under uncertain tax position benefit will not be realized. The ultimate realization of deferred tax assets and uncertain tax positions is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible or dependent on assessed sustainability of uncertain tax positions. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income, and tax planning strategies in making this assessment over the valuation of deferred tax assets.

At March 31, 2009, the Company has recorded gross deferred tax assets of 1,264 billion yen with a total valuation allowance of 478 billion yen. Included in the gross deferred tax assets is 333 billion yen resulting from net operating loss carryforwards (NOLs) of 936 billion yen, which are available to offset future taxable income. In order to fully realize these NOLs, the Company will need to generate sufficient taxable income by the expiration of these NOLs. These NOLs of 835 billion yen expire from fiscal 2010 through 2016 and the remaining balance expire thereafter or do not expire. Based upon the level of historical taxable income and projections for future taxable income over the periods in which the deferred tax assets are deductible, management believes it is more likely than not that the Company will realize the benefits of these deductible differences, net of the existing valuation allowance at March 31, 2009 based on available evidence. The Company could be required to increase the valuation allowance if such assumptions would change concluding that the Company would not be able to generate sufficient taxable income. At March 31, 2009, the Company has recorded 7 billion yen of unrecognized tax benefits. For further discussion on valuation of deferred tax assets and realizability of uncertain tax positions, see Note 10 of the Notes to Consolidated Financial Statements included in this annual report.

Table of Contents

- 47 -

Retirement and Severance Benefits

Retirement and severance benefits costs and obligations are dependent on assumptions used in calculating such amounts. The discount rate and expected return on assets are the most critical assumptions among others, including retirement rates, mortality rates and salary growth. While management believes that the assumptions used are appropriate, actual results in any given year could differ from actuarial assumptions because of economic and other factors. The resulting difference is accumulated and amortized and therefore, generally affect the Company's retirement and severance benefit costs and obligations in future period.

The Company determines discount rates by looking to rates of return on high-quality fixed income investments, and the expected long-term rate of return on pension plan assets by considering the current and expected asset allocations, as well as historical and expected returns on various categories of plan assets. Decreases in discount rates lead to increases in benefit obligations which, in turn, could lead to an increase in amortization cost through amortization of actuarial gain or loss, and vice versa. A decrease of 50 basis points in the discount rate is expected to increase the projected benefit obligation by approximately eight percent. A decline in market stock values generally results in a lower expected rate of return on plan assets, which would result in an increase of future retirement and severance benefit costs.

Accounting for Derivatives

The Company has limited involvement with derivative financial instruments and does not use them for trading purposes. The Company uses derivative instruments principally to manage foreign currency risks resulting from transactions denominated in currencies other than the Japanese yen. The Company recognizes all derivatives as either assets or liabilities on the balance sheet at their fair values. Changes in the fair value of a derivative are reported in earnings or other comprehensive income (loss) depending on their use and whether they qualify for hedge accounting. The accounting for gains and losses associated with changes in the fair value of the derivative depends on its hedge designation and whether the hedge is highly effective in achieving offsetting changes in the fair value or cash flows of the hedged item. The Company evaluates and determines on a continuous basis if the derivative remains highly effective in offsetting changes in the fair value or cash flows of the hedged item. If the derivative ceases to be highly effective in offsetting changes in the fair value or cash flows of the hedged item, the Company discontinues hedge accounting prospectively. Because the derivatives the Company uses are not complex, significant judgment is not required to determine their fair values. Fair values are determined principally by receiving quotations from banks or brokers.

Loss Contingencies

Loss contingencies may from time to time arise from situations such as product liability claims, warranty claims, disputes over intellectual property rights, environmental remediation obligations, and other legal actions. Loss contingencies are recorded as liabilities when it is probable that a liability has been incurred and the amount of the loss is reasonably estimable. Disclosure is required when there is a reasonable possibility that the ultimate loss will exceed the recorded provision. Contingent liabilities are often resolved over long time periods. In recording liabilities for probable losses, management is required to make estimates and judgments regarding the amount or range of the probable loss. Management continually assesses the adequacy of estimated loss contingencies and, if necessary, adjusts the amounts recorded as better information becomes known.

New Accounting Pronouncements

In September 2006, FASB issued SFAS No. 157, Fair Value Measurements. SFAS No. 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. In February 2008, FASB issued FASB Staff Position No. 157-2, Effective Date of FASB Statement No. 157, which partially delays the effective date of SFAS No. 157 by one year for certain nonfinancial assets and liabilities. On April 1, 2008, the Company adopted SFAS No. 157 for all financial assets and liabilities that are recognized or disclosed at fair value in the consolidated financial statements. The adoption of SFAS No. 157 did not have a material effect on the Company's consolidated financial statements. On April 1, 2009, the Company adopted SFAS No. 157 for all nonfinancial assets and liabilities. The adoption of SFAS No. 157 for all nonfinancial assets and liabilities is not expected to have a material effect on the Company's consolidated financial statements. However, the Company frequently utilized an entity specific fair values in calculating charges such as certain impairments on a continuous basis. With the adoption of SFAS No. 157, a use of market participant fair values may have an impact on the valuation of the various charges.

In December 2007, FASB issued SFAS No. 141 (revised 2007), Business Combinations (SFAS No. 141R) and SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements—an amendment to ARB No. 51. SFAS No. 141R and No. 160 require most identifiable assets, liabilities, noncontrolling interests, and goodwill acquired in a business combination to be recorded at full fair value and require noncontrolling interests (previously referred to as minority interests) to be reported as a component of equity, which changes the accounting for transactions with noncontrolling interest holders. SFAS No. 141R and No. 160 will be effective for the Company as of April 1, 2009. SFAS No. 141R will be applied to business combinations occurring after the effective date. SFAS No. 160 will be applied prospectively to all noncontrolling interests, including any that arose before the effective date and the disclosure requirement will be applied retrospectively. The Company is currently in the process of assessing the impact of the adoption of SFAS No. 141R and No. 160 on the Company's consolidated financial statements.

In December 2008, FASB issued FASB Staff Position FAS 132R-1, *Employers' Disclosures about Postretirement Benefit Plan Assets* (FSP FAS 132R-1). FSP FAS 132R-1 provides guidance on an employer's disclosures about plan assets of a defined benefit pension or other postretirement plan. The disclosures about plan assets required by FSP FAS 132R-1 must be provided for the Company in periods beginning on or after April 1, 2009. The Company is currently in the process of assessing the impact of the adoption of FSP FAS 132R-1 on the Company's consolidated financial statements.

In April 2008, the FASB issued FASB Staff Position FAS 142-3, *Determination of the Useful Life of Intangible Assets* (FSP FAS 142-3). FSP FAS 142-3 amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under SFAS No. 142. FSP FAS 142-3 will be effective for the Company as of April 1, 2009. The Company is currently in the process of assessing the impact of adoption of FSP FAS 142-3 on the Company's consolidated financial statements.

Item 6. Directors, Senior Management and Employees

A. Directors and Senior Management

The Articles of Incorporation of the Company provide that the number of Directors of the Company shall be three or more and that of Corporate Auditors shall be three or more. Directors and Corporate Auditors shall be elected at the general meeting of shareholders.

The Board of Directors has ultimate responsibility for administration of the Company's affairs and monitoring of the execution of business by Directors. Directors may, by resolution of the Board of Directors, appoint a Chairman of the Board of Directors, a Vice Chairman of the Board of Directors, a President and Director, and one or more Executive Vice Presidents and Directors, Senior Managing Directors and Managing Directors. The Chairman of the Board of Directors, Vice Chairman of the Board of Directors, President and Director, Executive Vice Presidents and Directors, and Senior Managing Directors are Representative Directors and severally represent the Company. A Japanese joint stock corporation with corporate auditors, such as Panasonic, is not obliged under the Company Law of Japan and related laws and ordinances (collectively, the Company Law), to have any outside directors on its board of directors. However, Panasonic has two (2) outside Directors. An outside director is defined as a director of the company who does not engage or has not engaged in the execution of business of the company or its subsidiaries as a director of any of these corporations, and who does not serve or has not served as an executive officer, manager or in any other capacity as an employee of the company or its subsidiaries. The term of office of Directors shall, under the Articles of Incorporation of the Company, expire at the conclusion of the ordinary general meeting of shareholders with respect to the last business year ending within one year from their election.

Corporate Auditors of the Company are not required to be, and are not, certified public accountants. Corporate Auditors may not at the same time be Directors, accounting counselors, executive officers, managers or any other capacity as employees of the Company or any of its subsidiaries. Under the Company Law, at least half of the Corporate Auditors shall be outside corporate auditors. An outside corporate auditor is defined as a corporate auditor of the company who has never been a director, accounting counselor, executive officer, manager or in any other capacity as an employee of the company or any of its subsidiaries. Each Corporate Auditor has the statutory duty to audit the non-consolidated and consolidated financial statements and business reports to be submitted by a Director to the general meeting of shareholders and, based on such audit and a report of an Accounting Auditor referred to below, to respectively prepare his or her audit report. Each Corporate Auditor also has the statutory duty to supervise Directors' execution of their duties. The Corporate Auditors are required to attend meetings of the Board of Directors and express opinions, if necessary, at such meetings, but they are not entitled to vote. The terms of office shall expire at the conclusion of the ordinary general meeting of shareholders with respect to the last business year ending within four years from their election. However, they may serve any number of consecutive terms if re-elected.

Corporate Auditors constitute the Board of Corporate Auditors. The Board of Corporate Auditors has a statutory duty to, based on the reports prepared by respective Corporate Auditors, prepare and submit its audit report to Accounting Auditors and certain Directors designated to receive such report (if such Directors are not designated, the Directors who prepared the financial statements and the business report). A Corporate Auditor may note his or her opinion in the audit report if his or her opinion expressed in his or her audit report is different from the opinion expressed in the audit report of the Board of Corporate Auditors. The Board of Corporate Auditors shall elect one or more full-time Corporate Auditors from among its members. The Board of Corporate Auditors is empowered to establish auditing policies, the manner of investigation of the status of the corporate affairs and assets of the Company, and any other matters relating to the execution of the duties of Corporate Auditors. However, the Board of Corporate Auditors may not prevent each Corporate Auditor from exercising his or her powers.

In addition to Corporate Auditors, an independent certified public accountant or an independent audit corporation must be appointed by general meetings of shareholders as Accounting Auditor of the Company. Such Accounting Auditor has the duties to audit the consolidated and non-consolidated financial statements proposed to be submitted by a Director at general meetings of shareholders and to report their opinion thereon to certain Corporate Auditors designated by the Board of Corporate Auditors to receive such report (if such Corporate Auditors are not designated, all Corporate Auditors) and certain Directors designated to receive such report (if such Directors are not designated, the Directors who prepared the financial statements). The consolidated financial statement is prepared in conformity with U.S. generally accepted accounting principles (U.S. GAAP) and financial information on a non-consolidated (a parent company alone) basis is in conformity with Japanese regulations.

Table of Contents

- 50 -

Under the Company Law and the Articles of Incorporation of the Company, the Company may, by a resolution of the Board of Directors, exempt Directors or Corporate Auditors, acting in good faith and without significant negligence, from their liabilities owed to the Company arising in connection with their failure to perform their duties to the extent permitted by the Company Law. In addition, the Company has entered into liability limitation agreements with each of the outside Directors and outside Corporate Auditors, acting in good faith and without significant negligence, which limit the maximum amount of their liabilities owed to the Company arising in connection with their failure to perform their duties to the extent permitted by the Company Law.

The Company implemented in fiscal 2004 a reform of its corporate management and governance structure by (i) reorganizing the role of the Board of Directors, (ii) introducing Panasonic's own Executive Officer system* in its Group and (iii) strengthening its Corporate Auditor system, all tailored to the Group's new business domain-based, autonomous management structure.

Panasonic's Executive Officer system was introduced to address the diversity of business operations over the entire Group through delegation of authority and to help integrate the comprehensive strengths of all Group companies in Japan and overseas. The Board of Directors appoints Executive Officers mainly from senior management personnel of business domain companies, such as internal divisional companies and subsidiaries, as well as from management personnel responsible for overseas subsidiaries and certain senior corporate staff. The Executive Officers assume responsibility as the Group's executives regarding execution of business. The Executive Officers may be given such titles as Vice President Executive Officer, Senior Managing Executive Officer, Managing Executive Officer and Executive Officer, depending on the extent of responsibility and achievement of each individual. The terms of office of the Executive Officers shall expire at the conclusion of the ordinary general meeting of shareholders with respect to the last business year of the Company ending within one year from their election. Each of the Executive Officers has the authority to operate businesses for which such Executive Officer is responsible, under the supervision of the Board of Directors and in accordance with the Board of Directors' decisions on the management of corporate affairs.

The Board of Directors has, at the same time, been reformed in order to concentrate on establishing corporate strategies and supervising the implementation thereof by the Executive Officers. The Company has reduced the number of Directors to facilitate more effective decision-making, and shortened their term of office to one year in order to clarify their responsibilities. Taking into consideration the diversified scope of the Company's business operations, the Company has chosen to continue its policy of having management personnel, who are well-versed in day-to-day operations at operational fronts, be members of the Board of Directors, while outside Directors continue to fully participate in Board meetings.

Meanwhile, the non-statutory full-time Senior Auditors were newly appointed within the Company's internal divisional companies in order to strengthen auditing functions at each business domain company. In addition, the Company has also launched the Group Auditor's Meeting chaired by the Chairman of the Board of Corporate Auditors

of the Company in order to promote collaboration among the Company's Corporate Auditors, the non-statutory full-time Senior Auditors of the internal divisional companies and the corporate auditors of the Company's subsidiaries and affiliates. Moreover, as a part of their audit duties, Corporate Auditors maintain a close working relationship with the Internal Audit Group of the Company to ensure effective audits. Furthermore, in order to enhance the effectiveness of audits conducted by Corporate Auditors and ensure the smooth implementation of audits, the Company has established a Corporate Auditor's Office with full-time staff under the direct control of the Board of Corporate Auditors.

* Panasonic's Executive Officer (*Yakuin*) system is a non-statutory system and different from the corporate executive officer (*Shikkoyaku*) system that large Japanese corporations may adopt at their option under the statutory corporate governance system referred to as "Company with Committees" system stipulated in the Company Law.

Table of Contents

- 51 -

The following table shows information about Panasonic's Directors and Corporate Auditors as of June 25, 2009, including their dates of birth, positions, responsibilities and brief personal records.

<u>Name</u>	<u>Position and responsibilities in the Company, and brief personal records</u>
(Date of birth)	
Kunio Nakamura (Jul. 5, 1939)	<u>Chairman of the Board of Directors</u> -Jun. 1993 Director of the Company; -Jun. 1996 Managing Director of the Company; -Jun. 1997 Senior Managing Director of the Company; -Jun. 2000 President of the Company; -Jun. 2006 Chairman of the Board of Directors.
Masayuki Matsushita (Oct. 16, 1945)	<u>Vice Chairman of the Board of Directors</u> -Feb. 1986 Director of the Company; -Jun. 1990 Managing Director of the Company; -Jun. 1992 Senior Managing Director of the Company; -Jun. 1996 Executive Vice President of the Company; -Jun. 2000 Vice Chairman of the Board of Directors.

B. Compensation

The aggregate amounts of remunerations, including equity compensation such as stock options, bonuses, and other financial benefits given in consideration of performance of duties (collectively, the remunerations), paid by the Company during fiscal 2009 to all 20 Directors and all 6 Corporate Auditors for services in all capacities were 966 million yen and 88 million yen, respectively.

Under the Company Law, the maximum amounts of remunerations of directors and corporate auditors of Japanese joint stock corporations, except for a joint stock corporation with specified committees, must be approved at a general meeting of shareholders if the articles of incorporation of the company do not provide items about remunerations of

directors and corporate auditors. Companies must also obtain the approval at a general meeting of shareholders to change such maximum amounts. Therefore, the remuneration of the directors and corporate auditors are subject to the approval of shareholders if the articles of incorporation of the company do not prescribe such items. The maximum total amounts of remunerations for Directors and Corporate Auditors of the Company is therefore determined by a resolution at a general meeting of shareholders, because the Articles of Incorporation of the Company do not provide such items, and thus remunerations of Directors and Corporate Auditors of the Company are under the oversight of shareholders. The remuneration amount for each Director is determined by the Company's Representative Directors who are delegated to do so by the Board of Directors, and the amount of remuneration for each Corporate Auditor is determined upon discussions amongst Corporate Auditors.

The amounts of the remuneration and bonuses of Directors are linked to individual performance based on Capital Cost Management (CCM), sales and CO₂ emissions (an environmental management indicator). By implementing this new performance evaluation criteria based on shareholder interests, the Company intends to promote continuous growth and enhance profitability on a long-term basis for the Panasonic Group as a whole. In order to realize a remuneration system with a high level of transparency and acceptability, the Company terminated its retirement benefits for Directors and Corporate Auditors in June 2006. (For details of the Company's stock option plans for Board members and select senior executives, see Section E of this Item 6.)

Table of Contents

- 57 -

C. Board Practices

For information on the Company's Directors and Corporate Auditors, see Section A of this Item 6.

The rights of ADR holders, including their rights relating to corporate governance practices, are governed by the Amended and Restated Deposit Agreement dated as of December 11, 2000, as amended by Amendment No.1 dated as of October 1, 2008 (incorporated by reference to the Registration Statements on Form F-6 (File Nos. 333-12694 and 333-133099) filed on October 4, 2000 and September 30, 2008, respectively).

D. Employees

The following table lists the number of full-time employees of Panasonic as of March 31, 2009, 2008 and 2007.

	<u>2009</u>	<u>2008</u>	<u>2007</u>
Employees:			
Domestic	132,144	135,563	145,418
Overseas	160,106	170,265	183,227
Total	<u>292,250</u>	<u>305,828</u>	<u>328,645</u>

Most regular Company employees in Japan, except management personnel, are members of unions that belong to the Panasonic Workers Unions. As is customary in Japan, the Company negotiates annually with the unions and revises annual wage. The annual bonuses of unionized employees are determined in consideration of the Company's performance of the previous year. The Company also renews the terms and conditions of labor contracts, other than those relating to wages and bonuses, every other year. In recent years, the Company has introduced in Japan new comprehensive employment and personnel systems to satisfy the diverse needs of employees.

Such systems include an individual performance-oriented annual salary system, a regional-based employee remuneration system and an alternative payment system under which employees can receive retirement and fringe benefits up front in addition to their semiannual bonuses. During the last few years, the Company and its several subsidiaries have also implemented special early retirement programs for employees who wished to pursue careers outside the Company. For a quarter century, Panasonic has not experienced any major labor strikes or disputes. The Company considers its labor relations to be excellent.

E. Share Ownership

- (1) The following table lists the number of shares owned by the Directors and Corporate Auditors of the Company as of June 25, 2009. The total is 17,892,376 shares constituting 0.86% of all issued and outstanding shares of the Company's common stock, excluding its own stock.

<u>Name</u>	<u>Position</u>	<u>Number of Panasonic Shares Owned as of June 25, 2009</u>
Kunio Nakamura	Chairman of the Board of Directors	72,200
Masayuki Matsushita	Vice Chairman of the Board of Directors	7,913,000

- (2) The full-time employees of the Company and its major subsidiaries in Japan are eligible to participate in the Panasonic Corporation Employee Shareholding Association, whereby participating employees contribute a portion of their salaries to the Association and the Association purchases shares of the Company's common stock on their behalf. The Company provides the subsidy in proportion to the number of points that each employee selects to exchange within certain limitations under the Cafeteria Plan, the Company's flexible benefit plan. Under the Cafeteria Plan, each employee is allotted a certain number of points based on prescribed standards, which he or she may exchange for various benefits, including the Company's subsidy for contributions to the Association, subsidies for rental housing, subsidies for asset building savings, educational assistance, hotel accommodations, etc. As of March 31, 2009, the Association owned 37,151 thousand shares of the Company's common stock constituting 1.79% of all issued and outstanding shares of the Company's common stock, excluding treasury stock.

Item 7. Major Shareholders and Related Party Transactions

A. Major Shareholders

- (1) To the knowledge of the Company, no shareholders beneficially own more than five percent of the Company's common stock, which is the only class of stock it has issued.

The shareholders that owned more than five percent of the Company's common stock on the register of shareholders as of March 31, 2009 were The Master Trust Bank of Japan, Ltd. (trust account) and Moxley & Co., which are securities processing services companies. The Company understands that these shareholders are not the beneficial owners of the Company's common stock, but the Company does not have available further information concerning such beneficial ownership by these shareholders. The ten largest shareholders of record and their share holdings as of the end of fiscal 2009 are as follows:

Table of Contents

- 59 -

<u>Name</u>	<u>Share ownership (in thousands of shares)</u>	<u>Percentage of total issued shares</u>
The Master Trust Bank of Japan, Ltd. (trust account)	132,211	6.38%
Moxley & Co.	122,865	5.93
Japan Trustee Services Bank, Ltd. (trust account)	118,812	5.73
Japan Trustee Services Bank, Ltd. (trust account 4G)	113,446	5.47
Nippon Life Insurance Company	67,000	3.23
Sumitomo Mitsui Banking Corporation	57,024	2.75
Panasonic Employee Shareholding Association	37,151	1.79
Mitsui Sumitomo Insurance Co., Ltd.	35,105	1.69
State Street Bank and Trust Co.	33,399	1.61
Sumitomo Life Insurance Co.	31,382	1.51

* Holdings of less than 1,000 shares have been omitted.

* Percentage of total issued shares is calculated excluding the Company's own shares (382,411,876).

- (2) As of March 31, 2009, approximately 13.80% of the Company's common stock was owned by 172 United States shareholders, including the ADR Depositary's nominee, Moxley & Co., considered as one shareholder of record, owning approximately 5.93% of the total common stock.
- (3) Panasonic is not, directly or indirectly, owned or controlled by other corporations, by the Japanese government or any foreign government or by any natural or legal person or persons severally or jointly.
- (4) As far as is known to the Company, there is no arrangement, the operation of which may at a subsequent date result in a change in control of Panasonic.

B. Related Party Transactions

In the ordinary course of the Company's business, it has entered into transactions with certain of its related parties (as described in Item 7.B of Form 20-F), but none of such transactions that were entered into during the year ended March 31, 2009 was material to the Company or to any such related party.

C. Interests of Experts and Counsel

Not applicable

Item 8. Financial Information

A. Consolidated Statements and Other Financial Information

(1) Consolidated Statements

Refer to Consolidated Financial Statements and Notes to Consolidated Financial Statements (see Item 18).

Finished goods and materials sent out of Japan are mainly bound for consolidated subsidiaries of the Panasonic Group, and are not, therefore, recorded as exports on a consolidated basis. For this reason, the proportion of exports to total net sales is not significant.

(2) Legal Proceedings

There are some legal actions and administrative investigations against Panasonic. Management is of the opinion that damages, based on the information currently available, if any, resulting from these actions will not have a material effect on Panasonic's results of operations or financial position.

Table of Contents

- 60 -

(3) Dividend Policy

Since its establishment, Panasonic has managed its businesses under the concept that returning profits to shareholders is one of its most important policies. Based on this basic policy, along with the implementation of a mid-term growth strategy since fiscal 2005, the Company has implemented a proactive and comprehensive profit return to shareholders through dividend payments and own share repurchases, upon careful consideration of its consolidated business performance.

From the perspective of return on the capital investment made by shareholders, Panasonic, in principle, distributes profits to shareholders based on its business performance and is aiming for stable and continuous growth in dividends, targeting a dividend payout ratio of between 30% and 40% with respect to consolidated net income. Regarding share buybacks, the Company is repurchasing its own shares as it considers appropriate, taking comprehensively into consideration strategic investments and the Company's financial condition, with the aim of increasing shareholder value per share and return on capital.

The Company paid an interim dividend of 22.50 yen per share on November 28, 2008. Regrettably, while the Company puts emphasis on returning profits to shareholders, it paid a year-end dividend of 7.50 yen per share, due mainly to the significant deterioration of consolidated financial results due to the global recession and shrinking demand, making a total annual cash dividend of 30.00 yen per share. In fiscal 2009, the Company repurchased some of its own shares at a cost of approximately 70 billion yen. Although Panasonic expects severe business conditions to continue, the Company will strive to improve its performance as soon as possible and distribute earnings to shareholders.

(4) Initiatives to Maximize Shareholder Value

On April 28, 2005, the Board of Directors resolved to adopt a policy related to a Large-scale Purchase of the Company's shares called the Enhancement of Shareholder Value (ESV) Plan. The ESV Plan has been approved at every Board of Directors meeting since then. On May 15, 2009, the Board of Directors resolved to continue the ESV Plan.

With respect to a Large-scale Purchaser who intends to acquire 20% or more of all voting rights of the Company, this policy requires that (i) a Large-scale Purchaser provides sufficient information, such as its outline, purposes or conditions, the basis for determination of the purchase price and funds for purchase, and management policies and business plans which the Large-scale Purchaser intends to adopt after the completion of the Large-scale Purchase, to the Board of Directors before a Large-scale Purchase is to be conducted and (ii) after all required information is provided, the Board of Directors should be allowed a sufficient period of time (a sixty-day period or a ninety-day

period) for consideration.

The Board of Directors intends to assess and examine any proposed Large-scale Purchase after the information on such purchase is provided, and subsequently to disclose the opinion of the Board of Directors and any other information needed to assist shareholders in making their decisions. The Board of Directors may negotiate with the Large-scale Purchaser regarding purchase conditions or suggest alternative plans to shareholders, if it is deemed necessary.

If a Large-scale Purchaser does not comply with the rules laid out in the ESV Plan, the Company's Board of Directors may take countermeasures against the Large-scale Purchaser to protect the interests of all shareholders. Countermeasures include the implementation of stock splits, issuance of stock acquisition rights (including allotment of share options without contribution) or any other measures that the Board of Directors is permitted to take under the Company Law in Japan, other laws and the Company's Articles of Incorporation.

If a Large-scale Purchaser complies with the Large-scale Purchase rules, the Board of Directors does not intend to prevent the Large-scale Purchase at its own discretion, unless it is clear that such Large-scale Purchase will cause irreparable damage or loss to the Company.

The Board of Directors will make decisions relating to countermeasures by referring to advice from outside professionals, such as lawyers and financial advisers, and fully respect the opinions of outside directors and statutory corporate auditors.

Table of Contents

- 61 -

When invoking the aforementioned countermeasures, if the Company's Board of Directors decides that it is appropriate to confirm the will of shareholders from the perspective of the interest of all shareholders, a general meeting of shareholders will be held. If the Company's Board of Directors decides to hold a general meeting of shareholders, it will give notice to that effect as well as the reasons for such a meeting at that time.

The Board of Directors will adopt specific countermeasures which it deems appropriate at that time. If the Board of Directors elects to make a stock split for shareholders as of a certain record date, the maximum ratio of the stock split shall be five-for-one. If the Board of Directors elects to issue stock acquisition rights to shareholders, the Company will issue one stock acquisition right for every share held by shareholders on a specified record date. One share shall be issued on the exercise of each stock acquisition right.

If the Board of Directors elects to issue stock acquisition rights as a countermeasure, it may determine the exercise period and exercise conditions of the stock acquisition rights, as well as the conditions that allow the Company to acquire share options by swapping Company stock with a party other than the Large-scale Purchaser, in consideration of the effectiveness thereof as a countermeasure, such as the condition that shareholders do not belong to a specific group of shareholders including a Large-scale Purchaser. The Company recognizes that the aforementioned countermeasures may cause damage or loss, economic or otherwise, to a prospective Large-scale Purchaser who does not comply with the Large-scale Purchase Rules.

The Company does not anticipate that taking such countermeasures will cause shareholders, other than the Large-scale Purchaser, economic damage or loss of any rights. However, in the event that the Board of Directors determines to take a specific countermeasure, the Board of Directors will disclose such countermeasure in a timely and appropriate manner, pursuant to relevant laws and stock exchange regulations.

The term of office for all Directors is one year, and Directors are elected at the Ordinary General Meeting of Shareholders held in June every year. The Company's Board of Directors intends to review the Large-scale Purchase Rules, as necessary, for reasons including amendments to applicable legislation. Any such review would be conducted in the interests of all shareholders.

For further details about the ESV Plan, please see the press release issued on May 15, 2009 at the Company's Web site: <http://panasonic.co.jp/corp/news/official.data/data.dir/en090515-9/en090515-9-1.pdf>

B. Significant Changes

No significant changes have occurred since the date of the annual financial statements included in this annual report.

Item 9. The Offer and Listing

A. Offer and Listing Details

The primary market for the Company's common stock (Common Stock) is the Tokyo Stock Exchange (TSE). The Common Stock is traded on the First Section of the TSE and is also listed on two other stock exchanges (Osaka and Nagoya) in Japan. In the United States, the Company's American Depositary Shares (ADSs) have been listed on and traded in the NYSE in the form of American Depositary Receipts (ADRs). There may from time to time be a differential between the Common Stock's price on exchanges outside the United States and the market price of ADSs in the United States.

Panasonic delisted its shares from Amsterdam Stock Exchange in June 2006 and Frankfurt Stock Exchange in August 2006.

ADRs were originally issued pursuant to a Deposit Agreement dated as of April 28, 1970, as amended from time to time (Deposit Agreement), among the Company, the Depositary for ADRs, and the holders of ADRs. The current Depositary for ADRs is JPMorgan Chase Bank, N.A., which succeeded to this business from Morgan Guaranty Trust Company of New York upon their merger. Effective December 11, 2000, Panasonic again revised its ADR Deposit Agreement and executed a 10:1 ADS ratio change. As a result, one ADS now represents one share of Common Stock. ADRs evidence ADSs that represent the underlying Common Stock deposited under the Deposit Agreement with Sumitomo Mitsui Banking Corporation, as agent of the Depositary.

Organization

The Company is a joint stock corporation (*kabushiki kaisha*) incorporated in Japan under the Company Law (*kaishaho*) of Japan (Company Law). The Company is registered in the Commercial Register (*shogyo tokibo*) maintained by the Moriguchi Branch Office of the Osaka Legal Affairs Bureau.

Objects and purposes

Article 3 of the Articles of Incorporation of the Company provides that its purpose is to engage in the following lines of business:

1. manufacture and sale of electric machinery and equipment, communication and electronic equipment, as well as lighting equipment;
- 2.

Edgar Filing: PANASONIC Corp - Form 20-F

manufacture and sale of gas, kerosene and kitchen equipment, as well as machinery and equipment for building and housing;

3. manufacture and sale of machinery and equipment for office and transportation, as well as for sales activities;
4. manufacture and sale of medical, health and hygienic equipment, apparatus and material;
5. manufacture and sale of optical and precision machinery and equipment;
6. manufacture and sale of batteries, battery-operated products, carbon and manganese and other chemical and metal products;
7. manufacture and sale of air conditioning and anti-pollution equipment, as well as industrial machinery and equipment;
8. manufacture and sale of other machinery and equipment;
9. engineering and installation of machinery and equipment related to any of the preceding items as well as engineering and performance of and contracting for other construction work;
10. production and sale of software;
11. sale of iron and steel, nonferrous metals, minerals, oil, gas, ceramics, paper, pulp, rubber, leather, fibre and their products;
12. sale of foods, beverages, liquor and other alcoholics, agricultural, livestock, dairy and marine produces, animal feed and their raw materials;

13. manufacture and sale of drugs, quasi-drugs, cosmetics, fertilizer, poisonous and deleterious substance and other chemical products;
14. manufacture and sale of buildings and other structures and components thereof;
15. motion picture and musical entertainment business and promotion of sporting events;
16. export and import of products, materials and software mentioned in each of the preceding items (other than item 9);
17. providing repair and maintenance services for the products, goods and software mentioned in each of the preceding items for itself and on behalf of others;
18. provision of information and communication services, and broadcasting business;
19. provision of various services utilizing the Internet including Internet access and e-commerce;
20. business related to publishing, printing, freight forwarding, security, maintenance of buildings, nursing care, dispatch of workers, general leasing, financing, non-life insurance agency and buying, selling, maintaining and leasing of real estate;
21. investment in various businesses;
22. accepting commission for investigations, research, development and consulting related to any of the preceding items; and
23. all other business or businesses incidental or related to any of the preceding items.

Table of Contents

- 65 -

Directors

Each Director (other than an outside Director) has executive powers and duties to manage the affairs of the Company and each Representative Director, who is elected from among the Directors by the Board of Directors, has the statutory authority to represent the Company in all respects. Under the Company Law, the Directors must refrain from engaging in any business competing with the Company unless approved by the Board of Directors and any Director who has a special interest in the subject matter of a resolution to be taken by the Board of Directors cannot vote on such resolution. Under the Company Law, the maximum total amounts of remunerations must be approved at a general meeting of shareholders. The Company must also obtain the approval at a general meeting of shareholders to change such maximum amounts. Within such authorized amounts, the remuneration amount for each Director is determined by Representative Director who is delegated to do so by the Board of Directors, and the amount of remuneration for each Corporate Auditor is determined upon discussions amongst the Corporate Auditors.

Except as stated below, neither the Company Law nor the Company's Articles of Incorporation make special provisions as to the Directors' or Corporate Auditors' power to vote in connection with their own compensation or retirement age, the borrowing power exercisable by a Representative Director (or a Director who is given power by a Representative Director to exercise such power), or requirements to hold any shares of Common Stock of the Company. Under the Company Law, the Company is required to obtain resolutions of the Board of Directors in specific circumstances, e.g. for a company to acquire or dispose of material assets; to borrow a substantial amount of money; to appoint or dismiss important employees and to establish, change or abolish material corporate organizations such as a branch office; to determine such material conditions for offering of corporate bonds as set forth in the ordinances of the Ministry of Justice; to establish and maintain the internal control system to secure legitimate performance of duties of Directors as set forth in the ordinances of the Ministry of Justice; and to exempt a Director or Corporate Auditor from the liability for his/her actions under Article 423, Paragraph 1 of the Company Law pursuant to Article 426, Paragraph 1 of the Company Law.

The Regulations of the Board of Directors of the Company require a resolution of the Board of Directors for the Company to borrow a large amount of money or to give a guarantee in a large amount. There is no statutory requirement as to what constitutes a large amount in these contexts. However, it has been the general practice of the Company's Board of Directors to adopt a resolution for a borrowing in an amount not less than 10 billion yen or its equivalent.

Common Stock

General

Except as otherwise stated, set forth below is information relating to the Company's Common Stock, including brief summaries of the relevant provisions of the Company's Articles of Incorporation and Share Handling Regulations, as currently in effect, and of the Company Law and related regulations.

Effective on January 5, 2009, a new central book-entry transfer system for listed shares of Japanese companies was established pursuant to the Law Concerning Book-Entry Transfer of Corporate Bonds, Shares etc. and regulations thereunder (collectively, the "Book-entry Transfer Law"), and this system is applied to the shares of Common Stock of the Company. Under this system, shares of all Japanese companies listed on any Japanese stock exchange are dematerialized, and shareholders of listed shares must have accounts at account management institutions to hold their shares unless such shareholder has an account at Japan Securities Depository Center, Inc. ("JASDEC"), the only institution that is designated by the relevant authorities as a clearing house under the Book-entry Transfer Law.

Account management institutions are financial instruments business operators (i.e., securities companies), banks, trust companies and certain other financial institutions which meet the requirements prescribed by the Book-entry Transfer Law. Transfer of the shares of Common Stock of the Company is effected exclusively through entry in the records maintained by JASDEC and the account management institutions, and title to the shares passes to the transferee at the time when the transfer of the shares is recorded at the transferee's account at an account management institution. The holder of an account at an account management institution is presumed to be the legal holder of the shares recorded in such account.

Table of Contents

- 66 -

Under the Company Law and the Book-entry Transfer Law, in order to assert shareholders' rights to which shareholders as of record dates are entitled (such as the rights to vote at a general meeting of shareholders or receive dividends) against the Company, a shareholder must have its name and address registered in the Company's register of shareholders. Under the central book-entry transfer system, shareholders shall notify the relevant account management institutions of certain information prescribed under the Book-entry Transfer Law and the Company's Share Handling Regulations, including their names and addresses, and the registration on the register of shareholders is made upon receipt by the Company of necessary information from JASDEC (as described in Record date). On the other hand, in order to assert, directly against the Company, shareholders' rights to which shareholders are entitled regardless of record dates such as minority shareholders' rights including the right to propose a matter to be considered at a general meeting of shareholders, except for shareholders' rights to request the Company to purchase or sell shares constituting less than a full unit (as described in Unit share system), JASDEC shall, upon the shareholder's request, issue a notice of certain information including the name and address of such shareholder to the Company. Thereafter, such shareholder is required to present the Company with a receipt of the request of the notice in accordance with the Company's Share Handling Regulations. Under the Book-entry Transfer Law, the shareholder shall exercise such shareholders' right within four weeks after the notice above has been given.

Non-resident shareholders are required to appoint a standing proxy in Japan or provide a mailing address in Japan. Each such shareholder must give notice of such standing proxy or mailing address to the relevant account management institution. Such notice will be forwarded to the Company through JASDEC. Japanese securities companies and commercial banks customarily act as standing proxies and provide related services for standard fees. Notices from the Company to non-resident shareholders are delivered to such standing proxies or mailing addresses.

The registered holder of deposited shares underlying the American Depositary Shares (ADSs) is the Depository for the ADSs. Accordingly, holders of ADSs will not be able to directly assert shareholders' rights against the Company.

Authorized capital

Article 6 of the Articles of Incorporation of the Company provides that the total number of shares authorized to be issued by the Company is four billion nine hundred and fifty million (4,950,000,000) shares.

As of March 31, 2009, 2,453,053,497 shares of Common Stock were issued. All shares of Common Stock of the Company have no par value. All issued shares of the Company are fully-paid and non-assessable.

Distribution of Surplus

Distribution of Surplus General

Under the Company Law, dividends shall be paid by way of distribution of Surplus (Surplus is defined in Restriction on Distributions of Surplus) in cash or in kind.

The Company may make distributions of Surplus to the shareholders any number of times per business year, subject to certain limitations described in Restriction on Distributions of Surplus. Distributions of Surplus need, in principle, to be declared by a resolution of a general meeting of shareholders, but the Company may also authorize distributions of Surplus by a resolution of the Board of Directors as long as its non-consolidated annual financial statements for the last business year fairly present its assets and profit or loss, as required by ordinances of the Ministry of Justice.

Distributions of Surplus may be made in cash or in kind in proportion to the number of shares of Common Stock of the Company held by respective shareholders. A resolution of a general meeting of shareholders or the Board of Directors, as the case may be, authorizing a distribution of Surplus must specify the kind and aggregate book value of the assets to be distributed, the manner of allocation of such assets to shareholders, and the effective date of the distribution. If a distribution of Surplus is to be made in kind, the Company may, pursuant to a resolution of a general meeting of shareholders or the Board of Directors, as the case may be, grant a right to the shareholders to require the Company to make such distribution in cash instead of in kind. If no such right is granted to shareholders, the relevant distribution of Surplus must be approved by a special resolution of a general meeting of shareholders (see Voting Rights with respect to a special resolution).

Table of Contents

- 67 -

Under the Company's Articles of Incorporation, year-end dividends and interim dividends may be distributed to shareholders appearing in the Company's register of shareholders as of March 31 and September 30 each year respectively, in proportion to the number of shares of the Common Stock of the Company held by respective shareholders following approval by the general meeting of shareholders or the Board of Directors. The Company is not obliged to pay any dividends in cash which have not been received within three years from the commencement of payment thereof. In Japan, the ex-dividend date and the record date for dividends precede the date when the amount of the dividends to be paid is determined by the Company. The shares of common stock generally go ex-dividend on the third business day prior to the record date for dividends.

Distribution of Surplus Restriction on Distributions of Surplus

In making a distribution of Surplus, the Company must, until the sum of its additional paid-in capital and legal reserve reaches one-quarter of its stated capital, set aside to its additional paid-in capital and/or legal reserve an amount equal to one-tenth of the amount of Surplus so distributed.

Table of Contents

- 68 -

The amount of Surplus at any given time must be calculated in accordance with the following formula:

$$A + B + C + D - (E + F + G)$$

In the above formula:

A = the total amount of other capital surplus and other retained earnings, each such amount being that appearing on the non-consolidated balance sheet as of the end of the last business year

B = (if the Company has disposed of its treasury stock after the end of the last business year) the amount of the consideration for such treasury stock received by the Company less the book value thereof

C = (if the Company has reduced its stated capital after the end of the last business year) the amount of such reduction less the portion thereof that has been transferred to additional paid-in capital or legal reserve (if any)

D = (if the Company has reduced its additional paid-in capital or legal reserve after the end of the last business year) the amount of such reduction less the portion thereof that has been transferred to stated capital (if any)

E = (if the Company has cancelled its treasury stock after the end of the last business year) the book value of such treasury stock

F = (if the Company has distributed Surplus to its shareholders after the end of the last business year) the total book value of the Surplus so distributed

G = certain other amounts set forth in ordinances of the Ministry of Justice, including (if the Company has reduced Surplus and thereby increased its stated capital, additional paid-in capital or legal reserve after the end of the last fiscal year) the amount of such reduction and (if the Company has distributed Surplus to the shareholders after the end of the last business year) the amount set aside from such Surplus to additional paid-in capital or legal reserve (if any) as

required by ordinances of the Ministry of Justice.

The aggregate book value of Surplus to be distributed by the Company may not exceed a prescribed distributable amount (the Distributable Amount), as calculated on the effective date of such distribution. The Distributable Amount at any given time shall be equal to the amount of Surplus less the aggregate of the followings:

- (a) the book value of its treasury stock;
- (b) the amount of consideration for any of treasury stock disposed of by the Company after the end of the last business year; and
- (c) certain other amounts set forth in ordinances of the Ministry of Justice, including (if the sum of one-half of goodwill and the deferred assets exceeds the total of stated capital, additional paid-in capital and legal reserve, each such amount being that appearing on the non-consolidated balance sheet as of the end of the last business year) all or certain part of such exceeding amount as calculated in accordance with the ordinances of the Ministry of Justice.

The Company, for the fiscal year ended March 31, 2009, elected to become a company with respect to which consolidated balance sheets should be considered in the calculation of the Distributable Amount (*renketsu haito kisei tekiyo kaisha*) as described below. If a company has become at its option a company with respect to which consolidated balance sheets should also be considered in the calculation of the Distributable Amount, a company shall, in calculating the Distributable Amount, further deduct from the amount of Surplus the excess amount, if any, of (x) the total amount of stockholders' equity appearing on the non-consolidated balance sheet as of the end of the last business year and certain other amounts set forth by ordinances of the Ministry of Justice over (y) the total amount of stockholders' equity and certain other amounts set forth by ordinances of the Ministry of Justice appearing on the consolidated balance sheet as of the end of the last business year.

If the Company has prepared interim financial statements as described below, and if such interim financial statements have been approved by the board of directors or, if so required by the Company Law, by a general meeting of shareholders, then the Distributable Amount must be adjusted to take into account the amount of profit or loss, and the amount of consideration for any of the treasury stock disposed of by the Company, during the period in respect of which such interim financial statements have been prepared. The Company may prepare non-consolidated interim financial statements consisting of a balance sheet as of any date subsequent to the end of the last business year and an income statement for the period from the first day of the current business year to the date of such balance sheet. Interim financial statements so prepared by the Company must be audited by the Corporate Auditors and the Accounting Auditor, as required by ordinances of the Ministry of Justice.

Stock splits

The Company may at any time split shares in issue into a greater number of shares by resolution of the Board of Directors, and may in principle amend its Articles of Incorporation to increase the number of authorized shares to be issued in proportion to the relevant stock split pursuant to a resolution of the Board of Directors rather than a special shareholders resolution (as defined in *Voting Rights*) as is otherwise required for amending the Articles of Incorporation.

When a stock split is to be made, the Company must give public notice of the stock split, specifying the record date therefor, at least two weeks prior to such record date. Under the central book-entry transfer system operated by JASDEC, the Company must also give notice to JASDEC regarding a stock split at least two weeks prior to the relevant record date. On the effective date of the stock split, the number of shares recorded in all accounts held by the Company's shareholders at account managing institutions or JASDEC will be increased in accordance with the applicable ratio.

Consolidation of shares

The Company may at any time consolidate shares in issue into a smaller number of shares by a special shareholders resolution (as defined in *Voting Rights*). When a consolidation of shares is to be made, the Company must give public notice or notice to each shareholder at least two weeks prior to the effective date of the consolidation of shares. Under the central book-entry transfer system operated by JASDEC, the Company must also give notice to JASDEC regarding a consolidation of shares at least two weeks prior to the effective date of the consolidation of shares. On the effective date of the consolidation of shares, the number of shares recorded in all accounts held by the Company's shareholders at account managing institutions or JASDEC will be decreased in accordance with the applicable ratio. The Company must disclose the reason for the consolidation of shares at the general meeting of shareholders.

General meeting of shareholders

The ordinary general meeting of shareholders of the Company for each fiscal year is normally held in June in each year. In addition, the Company may hold an extraordinary general meeting of shareholders whenever necessary by giving notice of convocation thereof at least two weeks prior to the date set for the meeting.

Notice of convocation of a shareholders' meeting setting forth the place, time, purpose thereof and certain matters set forth in the Company Law and the ordinances of the Ministry of Justice, must be mailed to each shareholder having voting rights (or, in the case of a non-resident shareholder, to his or her standing proxy or mailing address in Japan) at least two weeks prior to the date set for the meeting. Under the Company Law, such notice may be given to shareholders by electronic means, subject to the consent of the relevant shareholders. The record date for exercising voting rights at the ordinary general meeting of shareholders is March 31 of each year.

Any shareholder or group of shareholders of the Company holding at least three percent of the total number of voting rights for a period of six months or more may require the convocation of a general meeting of shareholders for a particular purpose by showing such a purpose and reason for convocation to a Representative Director. Unless such shareholders' meeting is convened promptly or a convocation notice of a meeting which is to be held not later than eight weeks from the day of such demand is dispatched, the requiring shareholder may, upon obtaining a court approval, convene such shareholders' meeting.

Any shareholder or group of shareholders of the Company holding at least 300 voting rights or one percent of the total number of voting rights for a period of six months or more may propose a matter to be considered at a general meeting of shareholders by showing such matter to a Representative Director at least eight weeks prior to the date of such meeting.

Table of Contents

- 70 -

Under the Company Law, any of minimum percentages, time periods and number of voting rights necessary for exercising the minority shareholder rights described above may be decreased or shortened if the articles of incorporation of a joint stock corporation so provide.

Voting rights

So long as the Company maintains the unit share system (see Item 10.B. Memorandum and Articles of Association Common Stock Unit share system below; currently 100 shares constitute one unit) a holder of shares constituting one or more full units is entitled to one voting right per unit of shares subject to the limitations on voting rights set forth in the following two sentences. Any corporate or certain other entity, one-quarter or more of whose total voting rights are directly or indirectly owned by the Company, may not exercise its voting rights with respect to shares of Common Stock of the Company that it owns. In addition, the Company may not exercise its voting rights with respect to its shares that it owns. If the Company eliminates from its Articles of Incorporation the provisions relating to the unit of shares, holders of Common Stock will have one voting right for each share they hold. Except as otherwise provided by law or by the Articles of Incorporation, a resolution can be adopted at a general meeting of shareholders by a majority of the number of voting rights of all the shareholders entitled to exercise their voting rights represented at the meeting. The Company Law and the Company's Articles of Incorporation provide, however, that the quorum for the election of Directors and Corporate Auditors shall not be less than one-third of the total number of voting rights of all the shareholders entitled to exercise their voting rights. The Company's shareholders are not entitled to cumulative voting in the election of Directors. Shareholders may exercise their voting rights through proxies, provided that the proxies are also shareholders holding voting rights. The Company's shareholders also may cast their votes in writing, or exercise their voting rights by electronic means pursuant to the method determined by the Board of Directors.

The Company Law and the Company's Articles of Incorporation provide that in order to amend the Articles of Incorporation and in certain other instances, including:

- (1) acquisition of its own shares from a specific party other than its subsidiaries;
- (2) consolidation of shares;
- (3) any offering of new shares at a specially favorable price (or any offering of stock acquisition rights to acquire shares of capital stock, or bonds with stock acquisition rights at specially favorable conditions) to any persons other than shareholders;
- (4) the removal of a Corporate Auditor;

- (5) the exemption of liability of a Director, Corporate Auditor or Accounting Auditor to a certain extent set forth in the Company Law;
- (6) a reduction of stated capital with certain exceptions in which just a usual resolution of shareholders is required or a shareholders resolution is not required;
- (7) a distribution of in-kind dividends which meets certain qualifications;
- (8) dissolution, liquidation, merger, consolidation, or corporate split with certain exceptions in which a shareholders resolution is not required;
- (9) the transfer of the whole or a material part of the business;

Table of Contents

- 71 -

- (10) the taking over of the whole of the business of any other corporation with certain exceptions in which a shareholders' resolution is not required; or
- (11) share exchange or share transfer for the purpose of establishing 100% parent-subsidary relationships with certain exceptions in which a shareholders' resolution is not required;

the quorum shall be one-third of the total voting rights of all the shareholders and the approval by at least two-thirds of the voting rights of all the shareholders entitled to exercise their voting rights represented at the meeting is required (the special shareholders resolutions).

Pursuant to the terms of the Amended and Restated Deposit Agreement relating to American Depositing Receipts (ADRs) evidencing ADSs, each ADS representing one share of Common Stock of the Company, as soon as practicable after receipt of notice of any meeting of shareholders of the Company, the Depository (currently JPMorgan Chase Bank, N.A.) will mail to the record holders of ADRs a notice which will contain the information in the notice of the meeting. The record holders of ADRs on a date specified by the Depository will be entitled to instruct the Depository as to the exercise of the voting rights pertaining to the shares of Common Stock of the Company represented by their ADSs. The Depository will endeavor, in so far as practicable, to vote the number of shares of Common Stock of the Company represented by such ADSs in accordance with such instructions. In the absence of such instructions, the Depository has agreed to give a discretionary proxy to a person designated by the Company to vote in favor of any proposals or recommendations of the Company. However, such proxy may not be given with respect to any matter which the Company informs the Depository that the Company does not wish such proxy given, or for any proposal that has, in the discretion of the Depository, a materially adverse effect on the rights of shareholders of the Company.

Issue of additional shares

Holders of the Company's shares of Common Stock have no pre-emptive rights under the Company Law. Authorized but unissued shares may be issued at such times and upon such terms as the Board of Directors determines, subject to the limitations as to the offering of new shares at a specially favorable price mentioned under *Voting rights* above. The Board of Directors may, however, determine that shareholders shall be given subscription rights regarding a particular issue of new shares, in which case such rights must be given on uniform terms to all shareholders as at a record date at least two weeks prior to which public notice must be given. Each of the shareholders to whom such rights are given must also be given notice of the expiry thereof at least two weeks prior to the date on which such rights expire.

Subject to certain conditions, the Company may issue stock acquisition rights or bonds with stock acquisition rights by a resolution of the Board of Directors. Holders of stock acquisition rights may exercise their rights to acquire a

certain number of shares within the exercise period as prescribed in the terms of their stock acquisition rights. Upon the exercise of stock acquisition rights, the Company will be obliged to issue the relevant number of new shares or alternatively to transfer the necessary number of treasury stock held by it. The Company may determine by a resolution of the Board of Directors at the time of offerings that a transfer of the stock acquisition rights shall require the approval of the Company. Whether the Company will determine such a matter in future stock acquisition rights offerings will depend upon the circumstances at the time of such offerings.

Liquidation rights

In the event of a liquidation of the Company, the assets remaining after payment of all debts and liquidation expenses and taxes will be distributed among shareholders in proportion to the respective numbers of shares of Common Stock held.

Table of Contents

- 72 -

Record date

As mentioned above (see Item 10.B. Memorandum and Articles of Association Common Stock *Distribution of Surplus* *Distribution of Surplus* *General*), March 31 is the record date for the Company's year-end dividends. So long as the Company maintains the unit share system, the shareholders who are registered as the holders of one or more units of shares in the Company's registers of shareholders at the end of each March 31 are entitled to exercise shareholders' rights at the ordinary general meeting of shareholders with respect to the business year ending on such March 31. September 30 is the record date for interim dividends. In addition, the Company may set a record date for determining the shareholders entitled to other rights and for other purposes by giving at least two weeks' prior public notice. Under the Book-entry Transfer Law, JASDEC is required to give the Company a notice of the names and addresses of the shareholders, the number of shares held by them and other relevant information as of each such record date, and the Company's register of shareholders shall be updated accordingly.

The shares generally goes ex-dividends or ex-rights on Japanese stock exchanges on the third business day prior to a record date (or if the record date is not a business day, the fourth business day prior thereto), for the purpose of dividends or rights offerings.

Acquisition by the company of its common stock

Under the Company Law and the Company's Articles of Incorporation, the Company may acquire its own shares of Common Stock (i) from a specific shareholder other than any of its subsidiaries (pursuant to a special shareholders resolution), (ii) from any of its subsidiaries (pursuant to a resolution of the Board of Directors), or (iii) by way of purchase on any Japanese stock exchange on which the Company's shares of Common Stock are listed or by way of tender offer (as long as its non-consolidated annual financial statements and certain documents for the last business year fairly present its asset and profit or loss status, as required by ordinances of the Ministry of Justice) (in either case pursuant to an ordinary resolution of a general meeting of shareholders or a resolution of the Board of Directors). In the case of (i) above, any other shareholder may make a request to the Company that such other shareholder be included as a seller in the proposed purchase, provided that no such right will be available if the purchase price or any other consideration to be received by the relevant specific shareholder will not exceed the last trading price of the shares on the relevant stock exchange on the day immediately preceding the date on which the resolution mentioned in (ii) above was adopted (or, if there is no trading in the shares on the stock exchange or if the stock exchange is not open on such day, the price at which the shares are first traded on such stock exchange thereafter).

Shares acquired by the Company may be held for any period or may be cancelled by a resolution of the Board of Directors. The Company may also transfer such shares to any person, subject to a resolution of the Board of Directors

and to other requirements similar to those applicable to the issuance of new shares, as described in Issue of additional shares and pre-emptive rights above. The Company may also utilize its treasury stock for the purpose of transfer to any person upon exercise of stock acquisition rights or for the purpose of acquiring another company by way of merger, share exchange or corporate split through exchange of treasury stock for shares or assets of the acquired company.

Unit share system

The Articles of Incorporation of the Company provide that 100 shares constitute one unit of shares of Common Stock. Although the number of shares constituting one unit is included in the Articles of Incorporation, any amendment to the Articles of Incorporation reducing (but not increasing) the number of shares constituting one unit or eliminating the provisions for the unit of shares may be made by a resolution of the Board of Directors rather than by a special shareholders resolution, which is otherwise required for amending the Articles of Incorporation. The number of shares constituting one unit, however, cannot exceed 1,000. In May 2008, the Board of Directors resolved to amend the Articles of Incorporation of the Company, reducing the number of shares consisting one unit from 1,000 shares to 100 shares, with effect as from February 1, 2009.

Under the unit share system, shareholders shall have one voting right for each unit of shares that they hold. Any number of shares less than a full unit will carry no voting rights.

Under the central book-entry transfer system operated by JASDEC, shares constituting less than one unit are generally transferable. Under the rules of the Japanese stock exchanges, however, shares constituting less than one unit do not comprise a trading unit, except in limited circumstances, and accordingly may not be sold on the Japanese stock exchanges.

A holder of shares constituting less than one unit may require the Company to purchase such shares at their market value in accordance with the provisions of the Share Handling Regulations of the Company. In addition, the Articles of Incorporation of the Company provide that a holder of shares constituting less than one unit may request the Company to sell to such holder such amount of shares which will, when added together with the shares constituting less than one unit held by such holder, constitute one unit of stock, in accordance with the provisions of the Share Handling Regulations of the Company. As prescribed in the Share Handling Regulations, such requests shall be made through an account management institution and JASDEC pursuant to the rules set by JASDEC, without going through the notification procedure required for the exercise of shareholders' rights entitled regardless of record dates as described in General .

Table of Contents

- 73 -

A holder who owns ADRs evidencing less than 100 ADSs will indirectly own less than one full unit of shares of Common Stock. Although, as discussed above, under the unit share system holders of less than one unit have the right to require the Company to purchase their shares or sell shares held by the Company to such holders, holders of ADRs evidencing ADSs that represent other than integral multiples of units are unable to withdraw the underlying shares of Common Stock representing less than one unit and, therefore, are unable, as a practical matter, to exercise the rights to require the Company to purchase such underlying shares or sell shares held by the Company to such holders. As a result, access to the Japanese markets by holders of ADRs through the withdrawal mechanism will not be available for dispositions of shares of Common Stock in lots less than one unit. The unit share system does not affect the transferability of ADSs, which may be transferred in lots of any size.

Sale by the Company of shares held by shareholders whose location is unknown

The Company is not required to send a notice to a shareholder if a notice to such shareholder fails to arrive at the registered address of the shareholder in the Company's register of shareholders or at the address otherwise notified to the Company continuously for five years or more.

In addition, the Company may sell or otherwise dispose of shares of Common Stock for which the location of the shareholder is unknown. Generally, if (i) notices to a shareholder fail to arrive continuously for five years or more at the shareholder's registered address in the Company's register of shareholders or at the address otherwise notified to the Company, and (ii) the shareholder fails to receive distribution of Surplus on the shares continuously for five years or more at the address registered in the Company's register of shareholders or at the address otherwise notified to the Company, the Company may sell or otherwise dispose of the shareholder's shares by a resolution of the Board of Directors and after giving at least three months' prior public and individual notice, and hold or deposit the proceeds of such sale or disposal of shares at the then market price of the shares for the shareholder, the location of which is unknown.

Reporting of substantial shareholdings, etc.

The Financial Instruments and Exchange Law of Japan and regulations thereunder requires any person, regardless of his/her residence, who has become, beneficially and solely or jointly, a holder of more than five percent of the total issued shares with voting rights of common stock of a company listed on any Japanese stock exchange or whose shares are traded on the over-the-counter market in Japan, to file with the Director-General of a competent Local Finance Bureau of Ministry of Finance within five business days a report concerning such shareholdings.

A similar report must also be filed in respect to any subsequent change of one percent or more in any such holding or any change in material matters set out in reports previously filed, with certain exceptions. For this purpose, shares issuable to such person upon conversion of convertible securities or exercise of share subscription warrants or stock acquisition rights are taken into account in determining both the number of shares with voting rights held by such holder and the issuer's total issued share capital with voting rights. Any such report shall be filed with the Director General of the relevant Finance Bureau of the Ministry of Finance through the Electronic Disclosure for Investors Network (EDINET) system. Copies of such report must also be furnished to the issuer of such shares.

Except for the general limitations under Japanese anti-trust and anti-monopoly regulations on holding shares of common stock of a Japanese corporation which leads or may lead to a restraint of trade or a monopoly, except for the limitations under the Foreign Exchange Regulations as described in D. Exchange Controls below, and except for general limitations under the Company Law or the Company's Articles of Incorporation on the rights of shareholders applicable regardless of residence or nationality, there is practically no limitation under Japanese laws and regulations applicable to the Company or under its Articles of Incorporation on the rights of non-resident or foreign shareholders to hold the shares of Common Stock of the Company or exercise voting rights thereon.

Table of Contents

- 74 -

There is no provision in the Company's Articles of Incorporation that would have an effect of delaying, deferring or preventing a change in control of the Company and that would operate only with respect to merger, consolidation, acquisition or corporate restructuring involving the Company. However, the Board of Directors resolved to adopt the ESV Plan which provides certain rules which a Large-scale Purchaser who intends to acquire 20% or more of all voting rights of the Company must comply with. (For details, please see (4) Initiatives to Maximize Shareholder Value in Section A of Item 8.)

Daily price fluctuation limits under Japanese stock exchange rules

Stock prices on Japanese stock exchanges are determined on a real-time basis by the balance between bids and offers. These stock exchanges are order-driven markets without specialists or market makers to guide price formation. In order to prevent excessive volatility, these stock exchanges set daily upward and downward price range limitations for each listed stock, based on the previous day's closing price. Although transactions may continue at the upward or downward limit price if the limit price is reached on a particular trading day, no transactions may take place outside these limits. Consequently, an investor wishing to sell at a price above or below the relevant daily limit on these stock exchanges may not be able to effect a sale at such price on a particular trading day, or at all.

C. Material Contracts

All contracts concluded by the Company during the two years preceding the date of this annual report were entered into in the ordinary course of business.

D. Exchange Controls

The Foreign Exchange and Foreign Trade Law of Japan and its related cabinet orders and ministerial ordinances (the Foreign Exchange Regulations) govern the acquisition and holding of shares of Common Stock of the Company by exchange non-residents and by foreign investors. The Foreign Exchange Regulations currently in effect may affect transactions between exchange non-residents to purchase or sell shares in certain circumstances, even if such transactions are being made outside Japan using currencies other than Japanese yen.

Exchange non-residents are:

- (i) individuals who do not reside in Japan; and
- (ii) corporations whose principal offices are located outside Japan.

Generally, branches and other offices of non-resident corporations that are located within Japan are regarded as residents of Japan. Conversely, branches and other offices of Japanese corporations located outside Japan are regarded as exchange non-residents.

Foreign investors are:

- (i) individuals who are exchange non-residents;
- (ii) corporations that are organized under the laws of foreign countries or whose principal offices are located outside of Japan; and

Table of Contents

- 75 -

- (iii) corporations (1) of which 50% or more of their shares are held by individuals who are exchange nonresidents and/or corporations (a) that are organized under the laws of foreign countries or (b) whose principal offices are located outside of Japan or (2) a majority of whose officers, or officers having the power of representation, are individuals who are exchange non-residents.

In general, the acquisition of shares of a Japanese company (such as the shares of Common Stock of the Company) by an exchange non-resident from a resident of Japan is not subject to any prior filing requirements. In certain circumstances, however, the Minister of Finance may require prior approval of an acquisition of this type. While prior approval, as described above, is not required, in the case where a resident of Japan transfers shares of a Japanese company (such as the shares of Common Stock of the Company) for consideration exceeding 100 million yen to an exchange non-resident, the resident of Japan who transfers the shares is required to report the transfer to the Minister of Finance within 20 days from the date of the transfer, unless the transfer was made through a bank or financial instruments firms licensed under Japanese law.

If a foreign investor acquires shares of a Japanese company that is listed on a Japanese stock exchange (such as the shares of Common Stock of the Company) or that is traded on an over-the-counter market in Japan and, as a result of the acquisition, the foreign investor, in combination with any existing holdings, directly or indirectly holds 10% or more of the issued shares of the relevant company, the foreign investor must file a report of the acquisition with the Minister of Finance and any other competent Ministers having jurisdiction over that Japanese company within 15 days from and including the date of the acquisition. However, in certain circumstances, such as where a business of a Japanese company falls under any business related to the national security of Japan or to maintenance of public safety, etc. which is listed in a schedule included in the Foreign Exchange Regulations, or where the foreign investor is in a country that is not listed in an exemption schedule included in the Foreign Exchange Regulations, a prior notification of the acquisition must be filed with, and the proposed acquisition must be subject to an examination process by, the Minister of Finance and any other competent Ministers, who may then modify or prohibit the proposed acquisition. In such circumstances, the foreign investor must wait until the examination process is completed, which ordinarily takes 30 days after the filing in principle although such waiting period may be shortened or extended to up to 5 months. The Company believes that certain businesses of the Company fall under businesses listed in the above-mentioned schedule in the Foreign Exchange Regulation, and thus, a foreign investor must file a prior notification of the acquisition with, and must be subject to an examination process by, the Minister of Finance and any other competent Ministers.

Under the Foreign Exchange Regulations, dividends paid on and the proceeds from the sale in Japan of shares of Common Stock of the Company held by non-residents of Japan may generally be converted into any foreign currency and repatriated abroad.

E. Taxation

The discussion below is not intended to constitute a complete analysis of all tax consequences relating to the ownership and disposition of shares of Common Stock and ADSs. Prospective purchasers and holders of the shares of Common Stock or ADSs should consult their own tax advisors concerning the tax consequences of their particular situations.

The following is a summary of the principal Japanese national and U.S. federal tax consequences of the ownership and disposition of shares of Common Stock or ADSs by an Eligible U.S. Holder and a U.S. Holder (each as defined below), as the case may be, that holds those shares or ADSs as capital assets (generally, property held for investment). This summary does not purport to address all material tax consequences that may be relevant to holders of shares of Common Stock or ADSs, and does not take into account the specific circumstances of any particular investors, some of which (such as tax-exempt entities, banks, insurance companies, broker-dealers, traders in securities that elect to use a mark-to-market method of accounting for their securities holdings, regulated investment companies, real estate investment trusts, investors liable for alternative minimum tax, investors that own or are treated as owning 10% or more of the Company's voting stock, investors that hold shares of Common Stock or ADSs as part of a straddle, hedge, conversion or constructive sale transaction or other integrated transaction, investors that hold shares of Common Stock or ADSs through a partnership or other pass-through entity and investors whose functional currency is not the U.S. dollar) may be subject to special tax rules. This summary is based on the national or federal tax laws of Japan and of the United States as in effect on the date hereof, as well as on the current income tax convention between the United States and Japan (the Treaty), all of which are subject to change (possibly with retroactive effect) and to differing interpretations.

Table of Contents

- 76 -

In addition, this summary is based in part upon the representations of the Depositary and the assumption that each obligation in the Deposit Agreement for ADSs and in any related agreement will be performed in accordance with its terms.

For purposes of this discussion, a **U.S. Holder** is any beneficial owner of shares of Common Stock or ADSs that, for U.S. federal income tax purposes, is:

- (i) a citizen or individual resident of the United States;
- (ii) a corporation or other entity taxable as a corporation for U.S. federal income tax purposes organized in or under the laws of the United States, any State, or the District of Columbia;
- (iii) an estate the income of which is subject to U.S. federal income tax without regard to its source; or
- (iv) a trust that is subject to the primary supervision of a U.S. court and the control of one or more U.S. persons, or that has a valid election in effect under applicable Treasury regulations to be treated as a U.S. person.

An **Eligible U.S. Holder** is a U.S. Holder that:

- (i) is a resident of the United States for purposes of the Treaty;
- (ii) does not maintain a permanent establishment in Japan (a) with which shares of Common Stock or ADSs are effectively connected or (b) of which shares of Common Stock or ADSs form part of the business property; and
- (iii) is eligible for benefits under the Treaty, with respect to income and gain derived in connection with the shares of Common Stock or ADSs.

This summary does not address any aspects of U.S. federal tax law other than income taxation, and does not discuss any aspects of Japanese tax law other than national income taxation, inheritance and gift taxation. Investors are urged to consult their tax advisors regarding the U.S. federal, state and local and Japanese and other tax consequences of owning and disposing of shares of Common Stock or ADSs. In particular, where relevant, investors are urged to confirm their status as Eligible U.S. Holders with their tax advisors and to discuss with their tax advisors any possible

consequences of their failure to qualify as Eligible U.S. Holders. In general, taking into account the earlier assumption, for purposes of the Treaty and for U.S. federal income and Japanese income tax purposes, beneficial owners of ADRs evidencing ADSs will be treated as the owners of the shares of Common Stock represented by those ADSs, and exchanges of shares of Common Stock for ADRs, and exchanges of ADRs for shares of Common Stock, will not be subject to U.S. federal income tax or Japanese income tax.

Japanese taxation

The following is a summary of the principal Japanese tax consequences (limited to national taxes) to nonresidents of Japan or non-Japanese corporations without permanent establishments in Japan (non-resident Holders) who are holders of shares of Common Stock of the Company or of ADRs evidencing ADSs representing shares of Common Stock of the Company.

Generally, non-resident Holders are subject to Japanese withholding tax on dividends paid by a Japanese corporation. Such taxes are withheld prior to payment of dividends as required by Japanese law. Stock splits in themselves are not subject to Japanese income tax in general.

In the absence of an applicable tax treaty, convention or agreement reducing the maximum rate of Japanese withholding tax or allowing exemption from Japanese withholding tax, the rate of Japanese withholding tax applicable to dividends paid by Japanese corporations to non-resident Holders is 20%. However, with respect to dividends paid on listed shares issued by a Japanese corporation (such as the shares of Common Stock of the Company) to non-resident Holders, except for any individual shareholder who holds 5% or more of the total issued shares of the relevant Japanese corporation, the aforementioned

Table of Contents

- 77 -

20% withholding tax rate is reduced to (i) 7% for dividends due and payable on or before December 31, 2011, and (ii) 15% for dividends due and payable on or after January 1, 2012. At the date of this annual report, Japan has income tax treaties, conventions or agreements whereby the above-mentioned withholding tax rate is reduced, in most cases to 15% or 10% for portfolio investors (15% under the income tax treaties with, among other countries, Belgium, Canada, Denmark, Finland, Germany, Ireland, Italy, Luxembourg, the Netherlands, New Zealand, Norway, Singapore, Spain, Sweden and Switzerland, and 10% under the income tax treaties with Australia, France, the U.K. and the United States.)

Under the Treaty, the maximum rate of Japanese withholding tax which may be imposed on dividends paid by a Japanese corporation to an Eligible U.S. Holder that is a portfolio investor is generally limited to 10% of the gross amount actually distributed, and dividends paid by a Japanese corporation to an Eligible U.S. Holder that is a pension fund are exempt from Japanese taxation by way of withholding or otherwise unless such dividends are derived from the carrying on of a business, directly or indirectly, by such pension fund.

If the maximum tax rate provided for in the income tax treaty applicable to dividends paid by the Company to any particular non-resident Holder is lower than the withholding tax rate otherwise applicable under Japanese tax law, or if any particular non-resident Holder is exempt from Japanese income tax with respect to such dividends under the income tax treaty applicable to such particular non-resident Holder, such non-resident Holder who is entitled to a reduced rate of or exemption from Japanese withholding tax on payment of dividends on the Company's shares of Common Stock is required to submit an Application Form for Income Tax Convention Regarding Relief from Japanese Income Tax on Dividends in advance through the withholding agent to the relevant tax authority before such payment of dividends. A standing proxy for nonresident Holders of a Japanese corporation may provide this application service. With respect to ADSs, this reduced rate or exemption is applicable if the Depositary or its agent submits two Application Forms (one before payment of dividends, the other within eight months after the record date concerning such payment of dividends) to the Japanese tax authorities. To claim this reduced rate or exemption, any relevant non-resident Holder of ADSs will be required to file a proof of taxpayer status, residence and beneficial ownership (as applicable) and to provide other information or documents as may be required by the Depositary. A nonresident Holder who is entitled, under an applicable income tax treaty, to a reduced treaty rate lower than the withholding tax rate otherwise applicable under Japanese tax law or an exemption from the withholding tax, but failed to submit the required application in advance will be entitled to claim the refund of withholding taxes withheld in excess of the rate under an applicable tax treaty (if such non-resident Holder is entitled to a reduced treaty rate under the applicable income tax treaty) or the whole of the withholding tax withheld (if such non-resident Holder is entitled to an exemption under the applicable income tax treaty) from the relevant Japanese tax authority, by complying with a certain subsequent filing procedure. The Company does not assume any responsibility to ensure withholding at the reduced treaty rate or not withholding for shareholders who would be so eligible under an applicable tax treaty but do not follow the required procedures as stated above.

Gains derived from the sale of shares of Common Stock or ADSs outside Japan by a non-resident Holder holding such shares or ADSs as a portfolio investor are, in general, not subject to Japanese income or corporation tax. Eligible U.S.

Holders are not subject to Japanese income or corporation tax with respect to such gains under the Treaty, subject to a certain filing requirement under Japanese law.

Japanese inheritance and gift taxes at progressive rates may be payable by an individual who has acquired from an individual shares of Common Stock or ADSs as a legatee, heir or donee even though neither the acquiring individual nor the deceased nor donor is a Japanese resident.

Holders of shares of Common Stock of the Company or ADSs should consult their tax advisors regarding the effect of these taxes and, in the case of U.S. Holders, the possible application of the Estate and Gift Tax Treaty between the U.S. and Japan.

U.S. federal income taxation

The following is a summary of certain United States federal income tax consequences of the ownership of shares of Common Stock or ADSs by a U.S. Holder. This summary is based on United States tax laws, including the United States Internal Revenue Code of 1986, as amended, and on the Treaty all of which are subject to change possibly with retroactive effect.

This summary is not a comprehensive description of all the tax considerations that may be relevant with respect to a U.S. holder's shares or ADSs. Each beneficial owner of shares or ADSs should consult its own tax advisor regarding the U.S. federal, state and local and other tax consequences of owning and disposing of shares and ADSs in its particular circumstances.

Table of Contents

- 78 -

Taxation of dividends

Under the United States federal income tax laws, and subject to the passive foreign investment company (PFIC) rules discussed below, the gross amount of any dividends received by a U.S. Holder (before reduction for Japanese withholding taxes) to the extent paid out of the Company's current or accumulated earnings and profits (as determined for United States federal income tax purposes) will be subject to U.S. federal taxation. Dividends paid to non-corporate U.S. Holders in taxable years beginning before January 1, 2011 that constitute qualified dividend income will be taxable at a maximum tax rate of 15% provided that the U.S. Holders held the shares of Common Stock or ADSs for more than 60 days during the 121-day period beginning 60 days before the ex-dividend date and meet other holding period requirements. Dividends the Company pays with respect to the shares of Common Stock or ADSs generally will be qualified dividend income. The U.S. Holder must include any Japanese tax withheld from the dividend payment in this gross amount even though it does not in fact receive it. The dividend is taxable to the U.S. Holder when the U.S. Holder, in the case of shares of Common Stock, or the Depositary, in the case of ADSs, receives the dividend, actually or constructively. The dividend will not be eligible for the dividends-received deduction generally allowed to United States corporations in respect of dividends received from other United States corporations. The amount of the dividend the U.S. Holder must include in its income will be the U.S. dollar value of the Japanese yen payments made, determined at the spot Japanese yen/U.S. dollar rate on the date the dividend is includible in the U.S. Holder's income, regardless of whether the payment is in fact converted into U.S. dollars. Generally, any gain or loss resulting from currency exchange fluctuations during the period from the date the U.S. Holder includes the dividend payment in income to the date the U.S. Holder converts the payment into U.S. dollars will be treated as ordinary income or loss and will not be eligible for the special tax rate applicable to qualified dividend income. The gain or loss generally will be income or loss from sources within the United States for foreign tax credit limitation purposes. Distributions in excess of current and accumulated earnings and profits, as determined for United States federal income tax purposes, will be treated as a non-taxable return of capital to the extent of the U.S. Holder's basis in the shares of Common Stock or ADSs and thereafter as capital gain.

Subject to certain limitations, the Japanese tax withheld in accordance with the Treaty will be creditable against the U.S. Holder's United States federal income tax liability. Special rules apply in determining the foreign tax credit limitation with respect to dividends that are subject to the maximum 15% tax rate. For foreign tax credit limitation purposes, the dividend will be income from sources outside the United States and will, depending on the U.S. Holder's circumstances, be either passive income or general income for purposes of computing the foreign tax credit allowable to a U.S. Holder.

Taxation of capital gains

Subject to the PFIC rules discussed below, upon a sale or other disposition of shares of Common Stock or ADSs, a U.S. Holder will recognize gain or loss in an amount equal to the difference between the U.S. dollar value of the

amount realized and the U.S. Holder's tax basis (determined in U.S. dollars) in such shares of Common Stock or ADSs. Generally, such gain or loss will be capital gain or loss and will be long-term capital gain or loss if the U.S. Holder's holding period for such shares of Common Stock or ADSs is greater than 1 year. Long-term capital gain of a non-corporate U.S. Holder that is recognized in taxable years beginning before January 1, 2011 is generally taxed at a maximum rate of 15%. Any such gain or loss will generally be income or loss from sources within the United States for foreign tax credit limitation purposes.

Transfers of retained earnings and sales of shares of Common Stock to the Company

A transfer of retained earnings or legal reserve to stated capital is generally treated as a dividend payment for Japanese tax purposes subject to withholding tax. A sale of shares of Common Stock or ADSs to the Company results in a deemed dividend for Japanese tax purpose to the selling shareholders to the extent that the sales price exceeds the aggregate of the stated capital and the capital surplus attributable to the shares sold. Transfers of retained earnings or legal reserves to stated capital and deemed dividends that may result from sales of shares of Common Stock to the Company are not generally taxable events that give rise to foreign source income for U.S. federal income tax purposes and U.S. Holders would not be able to use the foreign tax credit arising from any Japanese withholding tax imposed on such transactions unless they can apply the credit (subject to limitations) against U.S. tax due on other foreign source income in the appropriate category for foreign tax credit purposes.

Table of Contents

- 79 -

Passive foreign investment company considerations

The Company believes that shares of Common Stock and ADSs should not be treated as stock of a PFIC for United States federal income tax purposes, but this conclusion is a factual determination made annually and thus may be subject to change. If the Company were to be treated as a PFIC (unless a U.S. Holder elects to be taxed annually on a mark-to-market basis with respect to the shares of Common Stock or ADSs), gain realized on the sale or other disposition of shares of Common Stock or ADSs would in general not be treated as capital gain, and a U.S. Holder would be treated as if such holder had realized such gain and certain excess distributions ratably over the holder's holding period for the shares of Common Stock or ADSs and would be taxed at the highest tax rate in effect for each such year to which the gain was allocated, together with an interest charge in respect of the tax attributable to each such year. With certain exceptions, shares of Common stock or ADSs will be treated as stock in a PFIC if the Company were a PFIC at any time during the U.S. Holder's holding period in the shares of Common Stock or ADSs.

Dividends that such U.S. Holder receives from the Company will not be eligible for the special tax rates applicable to qualified dividend income if the Company is treated as a PFIC with respect to such U.S. Holder either in the taxable year of the distribution or the preceding taxable year, but instead will be taxable at rates applicable to ordinary income.

H. Documents on Display

According to the Securities Exchange Act of 1934, as amended, the Company is subject to the requirements of informational disclosure. The Company files various reports and other information, including its annual report on Form 20-F, with the U.S. Securities and Exchange Commission. These reports and other information may be inspected at the public reference room at the Securities and Exchange Commission, 100 F Street, N.E., Washington D.C. 20549. You can also obtain a copy of such material by mail from the public reference room of the Securities and Exchange Commission at prescribed fees. You may obtain information on the operation of the Securities and Exchange Commission public reference room by calling the Securities and Exchange Commission in the United States at 1-800-SEC-0330.

Also, documents filed via the Electronic Data Gathering, Analysis, and Retrieval system (EDGAR) are available at the website of the U.S. Securities and Exchange Commission (<http://www.sec.gov>).

Item 11. Quantitative and Qualitative Disclosures about Market Risk

The Company is exposed to market risk, including changes of foreign exchange rates, interest rates and prices of marketable securities and commodities. In order to hedge the risks of changes in foreign exchange rates, interest rates and commodity prices, the Company uses derivative financial instruments. The Company does not hold or issue financial instruments for trading purposes. Although the use of derivative financial instruments exposes the Company to the risk of credit-related losses in the event of nonperformance by counterparties, the Company believes that such risk is minor because of the high credit rating of the counterparties.

Table of Contents

- 80 -

Equity Price Risk

The Company holds available-for-sale securities included in short-term investments and investments and advances. In general, highly-liquid and low risk instruments are preferred in the portfolio. Available-for-sale securities included in investments and advances are held as longer term investments. The Company does not hold marketable securities for trading purposes.

Maturities of investments in available-for-sale securities at March 31, 2009 and 2008 are as follows:

	Yen (millions)			
	2009		2008	
	Cost	Fair value	Cost	Fair value
Due within one year	1,972	1,998	47,262	47,414
Due after one year through five years	9,782	9,910	34,991	35,456
Due after five years through ten years			2,200	2,197
Equity securities	269,735	284,356	333,057	441,839
Total	281,489	296,264	417,510	526,906

Foreign Exchange Risk

The primary purpose of the Company's foreign currency hedging activities is to protect against the volatility associated with foreign currency transactions. The Company primarily utilizes forward exchange contracts and options with a duration of less than a few months. The Company also enters into foreign exchange contracts from time to time to hedge the risk of fluctuation in foreign currency exchange rates associated with long-term debt that is denominated in foreign currencies. Foreign exchange contracts related to such long-term debt have the same maturity as the underlying debt.

The following table provides the contract amounts and fair values of foreign exchange contracts, primarily hedging

U.S. dollar and euro revenues, at March 31, 2009 and 2008. Amounts related to foreign exchange contracts entered into in connection with long-term debt denominated in foreign currencies which eliminate all foreign currency exposures, are shown in the table of Interest Rate Risk.

	Yen (millions)			
	2009		2008	
	Contract amount	Fair value	Contract amount	Fair value
Forward:				
To sell foreign currencies	334,586	(9,902)	312,390	11,682
To buy foreign currencies	190,495	2,503	185,267	(2,388)
Cross currency swaps	33,953	1,535	32,717	(874)

Commodity Price Risk

The Company is exposed to market risk of changes in prices of commodities including various non-ferrous metals used in the manufacturing of various products. The Company enters into commodity future contracts to offset such exposure.

The following table provides the contract amounts and fair values of commodity futures at March 31, 2009 and 2008.

	Yen (millions)			
	2009		2008	
	Contract amount	Fair value	Contract amount	Fair value
Commodity futures:				
To sell commodity	48,858	13,955	129,425	(9,746)
To buy commodity	168,527	(57,720)	294,884	28,325

Table of Contents

- 81 -

Interest Rate Risk

The Company's exposure to market risk for changes in interest rates relates principally to its debt obligations. The Company has long-term debt primarily with fixed rates. Fixed-rate debt obligations expose the Company to variability in their fair values due to changes in interest rates. To manage the variability in the fair values caused by interest rate changes, the Company enters into interest rate swaps when it is determined to be appropriate based on market conditions. Interest rate swaps change fixed-rate debt obligations to variable-rate debt obligations by entering into fixed-receiving, variable-paying interest rate swap contracts. The hedging relationship between interest rate swaps and hedged debt obligations is highly effective in achieving offsetting changes in fair values resulting from interest rate risk. The following tables provide information about the Company's financial instruments that are sensitive to changes in interest rates at March 31, 2009 and 2008. For debt obligations, the table presents principal cash flows by expected maturity dates, related weighted average interest rates and fair values of financial instruments.

Long-term debt, including current portion:

	Yen (millions)								
	Carrying amount and maturity date (as of March 31, 2009)

Item 15. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company's management, with the participation of its principal executive and principal financial officers, evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the U.S. Securities Exchange Act of 1934) as of March 31, 2009. Based on that evaluation, the Company's principal executive and principal financial officers concluded that the Company's disclosure controls and procedures were effective as of that date.

Management's Report on Internal Control Over Financial Reporting

Panasonic's management is responsible for establishing and maintaining effective internal control over financial reporting. Internal control over financial reporting is a process designed by, or under the supervision of, the Company's principal executive and principal officers, or persons performing similar functions, and effected by the Company's board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles and includes those policies and procedures that:

(i) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Company;

(ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and

(iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or because the degree of compliance with policies or procedures may deteriorate.

The management of the Company, with the participation of the Company's principal executive and principal financial officers, conducted an evaluation of the effectiveness of internal control over financial reporting as of March 31, 2009 based on the framework in "Internal Control-Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on the assessment, the management of the Company concluded that the internal control over financial reporting of the Company was effective as of March 31, 2009.

The Company's independent registered public accounting firm, KPMG AZSA & Co., has audited the effectiveness of the Company's internal control over financial reporting as stated in their report which is included herein.

Table of Contents

- 84 -

Evaluation of Changes in Internal Control Over Financial Reporting

No change in the Company's internal control over financial reporting (as defined in Rules 13a-15(f) under the U.S. Securities Exchange Act of 1934) occurred during the year ended March 31, 2009 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 16A. Audit Committee Financial Expert

Panasonic's Board of Corporate Auditors has determined that Kenichi Hamada, a Senior Corporate Auditor of Panasonic, is an audit committee financial expert as such term is defined by Item 16A of Form 20-F. Mr. Hamada meets the independence requirements imposed on corporate auditors under the Company Law of Japan.

Item 16B. Code of Ethics

Panasonic has adopted a Code of Ethics applicable to the Chief Executive Officer, the Chief Financial Officer and other Executive Officers. The Code of Ethics is attached as an exhibit to the annual report (exhibit 11.1).

Item 16C. Principal Accountant Fees and Services

Fees and services by the Company's principal accountant

The following table shows the aggregate fees accrued or paid to KPMG AZSA & Co. and its member firms (KPMG), the Company's principal accountant for the years ended March 31, 2009 and 2008:

Yen (millions)

	<u>2009</u>	<u>2008</u>
Audit fees	2,439	2,635
Audit-related fees	330	541
Tax fees	220	148
All other fees	4	27
	<u> </u>	<u> </u>
Total	2,993	3,351
	<u> </u>	<u> </u>

Audit fees are fees for professional services for the audit of the Company's annual financial statements or services that are normally provided by the accountant in connection with statutory and regulatory filings or engagements.

Audit-related fees are fees for assurance and related services that are reasonably related to the performance of the audit or review of the Company's financial statements and are not reported under the Audit fees category, such as financial due diligence service. Tax fees are fees for professional services rendered mainly for tax compliance, tax advice, tax consulting associated with international transfer prices and expatriate employee tax services. All other fees are fees for those services not reported under the Audit fees, Audit-related fees, and Tax fees categories.

No services were provided for which pre-approval was waived pursuant to paragraph (c)(7)(i)(C) of Rule 2-01 of Regulation S-X.

Policy of the Company's Board of Corporate Auditors on pre-approval of audit or non-audit services

In accordance with paragraph (c)(7)(i) of Rule 2-01 of Regulation S-X and the related adopting release of the U.S. Securities and Exchange Commission, the Company's Board of Corporate Auditors must pre-approve the engagement of the Company's principal accountant, currently KPMG AZSA & Co., by Panasonic or its subsidiaries to render audit or non-audit services. Also, paragraph (c)(4) of Rule 2-01 of Regulation S-X provides that an accountant is not independent from an audit client if the accountant provides certain non-audit services to the audit client. Under the policy adopted by the Company's Board of Corporate Auditors, all audit or non-audit services provided by KPMG AZSA & Co. must be specifically pre-approved by the Board of Corporate Auditors. Such pre-approval is considered at the monthly meetings of the Board of Corporate Auditors. Any service that either falls into a category of services that are not permitted by the applicable law or regulation or is otherwise deemed by the Board of Corporate Auditors to be inconsistent with the maintenance of the principal accountant's independence is rejected. Management's requests for proposed engagement of the principal accountant to render services that require immediate approval, if considered necessary, are pre-approved by a designated member of the Board of Corporate Auditors, and then reported to the Board of Corporate Auditors at its next meeting.

Item 16D. Exemptions from the Listing Standards for Audit Committees

With respect to the requirements of Rule 10A-3 under the Securities Exchange Act of 1934 relating to listed company audit committees, which apply to the Company through Section 303A.06 of the New York Stock Exchange's Listed Company Manual, the Company relies on an exemption provided by paragraph (c)(3) of that Rule available to foreign private issuers with boards of corporate auditors meeting certain requirements. For a New York Stock Exchange-listed Japanese company with a board of corporate auditors, the requirements for relying on paragraph (c)(3) of Rule 10A-3 are as follows:

The board of corporate auditors must be established, and its members must be selected, pursuant to Japanese law expressly requiring such a board for Japanese companies that elect to have a corporate governance system with corporate auditors.

Japanese law must and does require the board of corporate auditors to be separate from the board of directors.

None of the members of the board of corporate auditors is elected by management, and none of the listed company's executive officers is a member of the board of corporate auditors.

Japanese law must and does set forth standards for the independence of the members of the board of corporate auditors from the listed company or its management.

The board of corporate auditors, in accordance with Japanese law or the listed company's governing documents, must be responsible, to the extent permitted by Japanese law, for the appointment, retention and oversight of the work of any registered public accounting firm engaged (including, to the extent permitted by Japanese law, the resolution of disagreements between management and the auditor regarding financial reporting) for the purpose of preparing or issuing an audit report or performing other audit, review or attest services for the listed company, including its principal accountant which audits its consolidated financial statements included in its annual reports on Form 20-F.

To the extent permitted by Japanese law:

the board of corporate auditors must establish procedures for (i) the receipt, retention and treatment of complaints received by the listed company regarding accounting, internal accounting controls, or auditing matters, and (ii) the confidential, anonymous submission by the listed company's employees of concerns regarding questionable accounting or auditing matters;

the board of corporate auditors must have the authority to engage independent counsel and other advisers, as it determines necessary to carry out its duties; and

the listed company must provide for appropriate funding, as determined by its board of corporate auditors, for payment of (i) compensation to any registered public accounting firm engaged for the purpose of preparing or issuing an audit report or performing other audit, review or attest services for the listed company, (ii) compensation to any advisers employed by the board of corporate auditors, and (iii) ordinary administrative expenses of the board of corporate auditors that are necessary or appropriate in carrying out its duties.

In the Company's assessment, its Board of Corporate Auditors, which meets the requirements for reliance on the exemption in paragraph (c)(3) of Rule 10A-3 described above, is not materially less effective than an audit committee meeting all the requirements of paragraph (b) of Rule 10A-3 (without relying on any exemption provided by that Rule) at acting independently of management and performing the functions of an audit committee as contemplated therein.

March 1 - 31, 2009	31,409	1,158		
Total	31,058,286	2,341	29,634,000	

* The amounts less than yen are rounded to the nearest whole of a yen.

On April 28, 2008, the Company announced that the Board of Directors resolved to repurchase its own shares from the market, pursuant to Article 459, Paragraph 1, Item 1 of the Company Law of Japan as follows:

Class of shares	: Common stock
Aggregate number of shares to be repurchased	: Up to 50 million shares
Aggregate amount to be repurchased	: Up to 100 billion yen

Period of repurchase : Between April 30, 2008 and late March 2009

Under the Company Law of Japan, a holder of shares consisting less than a full unit may require the Company to purchase such shares at their market value (see Common Stock Unit share system in Section B of Item 10). During the year ended March 31, 2009, the Company purchased 1,057,208 shares for a total purchase price of 2,069,369,133 yen upon such requests from holders of shares consisting less than one full unit.

The Directors, Corporate Auditors, Executive Officers and Executive Counselors in Japan are eligible to participate in the Panasonic Corporation Directors and Executive Officers Shareholding Association, which is an affiliated purchaser, and the Association purchases shares of the Company's common stock on their behalf. During the year ended March 31, 2009, the Association purchased 183,078 shares for a total purchase price of 287,341,005 yen.

The information for the period November 1 - 30, 2008 in the above table includes the purchase by the Company of 184,000 shares of its common stock from a certain shareholder at a price of 1,900 yen per share in November 2008. This purchase relates to the merger of a wholly-owned Japanese subsidiary into the Company, which was conducted through the procedures provided under the Company Law of Japan and became effective on October 1, 2008. This shareholder followed the procedures provided under the Company Law to require the Company to purchase his shares of its common stock.

Item 16F. Change in Registrant's Certifying Accountant

Not applicable

Item 16G. Corporate Governance

Companies listed on the NYSE must comply with certain standards regarding corporate governance under Section 303A of the NYSE Listed Company Manual. However, listed companies that are foreign private issuers, such as Panasonic, are permitted to follow home country practice in lieu of certain provisions of Section 303A.

The following table shows the significant differences between the corporate governance practices followed by U.S. listed companies under Section 303A of the NYSE Listed Company Manual and those followed by Panasonic.

Corporate Governance Practices Followed by NYSE-listed U.S. companies

Corporate Governance Practices Followed by Panasonic

A NYSE-listed U.S. company must have a majority of directors meeting the independence requirements under Section 303A of the NYSE Listed Company Manual.

The Company Law does not require independent directors on the board of directors. The Company Law has provisions for an outside director, whose definition is similar to, but not the same as, an independent director under the NYSE Listed Company Manual. An outside director is defined as a director of the company who does not engage or has not engaged in the execution of business of the company or its subsidiaries as a director of any of these corporations, and who does not serve or has not served as an executive officer, manager or in any other capacity as an employee of the company or its subsidiaries. A Japanese joint stock corporation with corporate auditors, such as Panasonic, is not obliged under the Company Law to have any outside directors on its board of directors.

However, Panasonic had two (2) outside Directors as of June 25, 2009. The tasks of supervising the administration of the Company's affairs are assigned not only to the Board of Directors but also to Corporate Auditors, as more fully described below.

A NYSE-listed U.S. company must have an audit committee

A Japanese joint stock corporation is not required to have any audit, nominating and compensation committees, except for a joint stock corporation with specified

with responsibilities described under Section 303A of the NYSE Listed Company Manual, including those imposed by Rule 10A-3 under the U.S. Securities Exchange Act of 1934. The audit committee must be composed entirely of independent directors, and the audit committee must have at least three members and satisfy the requirements of Rule 10A-3 under the U.S. Securities Exchange Act of 1934.

committees, which is a corporate governance system that may be adopted by Japanese joint stock corporations meeting certain criteria.

Most Japanese joint stock corporations, including Panasonic, employ a corporate governance system based on corporate auditors. With this system, the tasks of supervising the administration of the company's affairs conducted by directors are assigned not only to the board of directors but also to corporate auditors who are appointed at a general meeting of shareholders, and who are separate and independent from the board of directors. All corporate auditors must meet certain independence requirements under the Company Law. Under the Company Law, Panasonic is required to appoint at least three (3) Corporate Auditors, and at least half of Panasonic's Corporate Auditors are required to be Outside Corporate Auditors who must meet additional independence requirements. An outside corporate auditor is defined as a corporate auditor of the Company who has never been as a director, accounting counselor, executive officer, manager or in any other capacity as an employee of the company or any of its subsidiaries prior to the appointment. Under the Company Law, Panasonic is required to establish a Board of Corporate Auditors, comprising all the Company's Corporate Auditors.

Table of Contents

- 88 -

As of June 25, 2009, Panasonic had five (5) Corporate Auditors, of which three (3) were Outside Corporate Auditors. Each Corporate Auditor of Panasonic has a four-year term. In contrast, the term of each Director of Panasonic is one year. Corporate Auditors are obliged to attend the meetings of the Board of Directors and express their opinion at the meetings if necessary. The Board of Corporate Auditors and Corporate Auditors have a statutory duty to supervise the administration of the Company's affairs by Directors. The Board of Corporate Auditors has a statutory duty to, based on the reports prepared by respective Corporate Auditors, prepare and submit its audit report to Accounting Auditors and the Directors who prepared the financial statements and the business report. A copy of the audit report is included in the appendix to the convocation notice of the ordinary general meeting of shareholders.

A Corporate Auditor also has a statutory duty to examine the financial statements of Panasonic, and receives auditors' reports from an accounting auditor (a certified public accountant or an accounting firm). The Board of Corporate Auditors has the power to request that Panasonic's Directors submit a proposal for dismissal of an accounting auditor to a general meeting of shareholders. The Board of Corporate Auditors also has the power to directly dismiss an accounting auditor under certain conditions. Panasonic's Directors must obtain the consent of its Board of Corporate Auditors in order to submit a proposal for election, dismissal and/or non-reelection of an accounting auditor to a general meeting of shareholders.

With respect to the requirements of Rule 10A-3 under the U.S. Securities Exchange Act of 1934 relating to listed company audit committees, Panasonic relies on an exemption under that rule which is available to foreign private issuers with a board of corporate auditors meeting certain requirements.

A NYSE-listed U.S. company must have a nominating/corporate governance committee with responsibilities described under Section 303A of the NYSE Listed Company Manual. The nominating/corporate governance committee must be composed entirely of independent directors.

Under the Company Law, Panasonic's Directors must be elected and/or dismissed at a general meeting of shareholders. The Board of Directors nominates Director candidates and submits a proposal for election of directors to a general meeting of shareholders. The Board of Directors does not have the power to fill vacancies thereon.

Panasonic's Corporate Auditors must also be elected and/or dismissed at a general meeting of shareholders. Panasonic's Directors must obtain the consent of the Board of Corporate Auditors in order to submit a proposal for election and/or dismissal of a Corporate Auditor to a general meeting of shareholders. Each of the Corporate

Auditors has the right to state his/her opinion concerning the election, dismissal and/or resignation of any Corporate Auditor, including himself/herself, at a general meeting of shareholders. The Board of Corporate Auditors is also empowered to request Directors to submit a proposal for election of a specific person as a Corporate Auditor to a general meeting of shareholders.

- 89 -

A NYSE-listed U.S. company must have a compensation committee with responsibilities described under Section 303A of the NYSE Listed Company Manual. The compensation committee must be composed entirely of independent directors.

Under the Company Law, the maximum amounts of remunerations, including equity compensation such as stock options, bonuses, and other financial benefits given in consideration of performance of duties (collectively, the remunerations) of directors and corporate auditors of Japanese joint stock corporations, except for a joint stock corporation with specified committees, must be approved at a general meeting of shareholders. Companies must also obtain the approval at a general meeting of shareholders to change such maximum amounts. Therefore, the remunerations of the directors and corporate auditors are subject to the approval of shareholders.

The maximum total amounts of remunerations for Directors and Corporate Auditors of Panasonic is therefore determined by a resolution at a general meeting of shareholders, and thus remunerations of the Directors and Corporate Auditors of Panasonic are under the oversight of shareholders. The remuneration amount for each Director is determined by Panasonic's Representative Directors who are delegated to make such determination by the Board of Directors, and the amount of remuneration for each Corporate Auditor is determined upon discussions amongst the Corporate Auditors.

A NYSE-listed U.S. company must generally obtain shareholder approval with respect to any equity compensation plan.

Pursuant to the Company Law, if a Japanese joint stock corporation, such as Panasonic, desires to adopt an equity compensation plan under which stock acquisition rights are granted on specially favorable conditions (except where such rights are granted to all shareholders on a pro rata basis), such plan must be approved by a special resolution of a general meeting of shareholders that satisfies the prescribed quorum. (In the case of Panasonic, such quorum is one-third of the total number of voting rights and the approval of at least two-thirds of the voting rights represented at the meeting is required as provided by Panasonic's Articles of Incorporation pursuant to the Company Law.)

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Panasonic Corporation:

We have audited the consolidated financial statements of Panasonic Corporation and subsidiaries as listed in the accompanying index. In connection with our audits of the consolidated financial statements, we also have audited the financial statement schedule as listed in the accompanying index. These consolidated financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Panasonic Corporation and subsidiaries as of March 31, 2009 and 2008, and the results of their operations and their cash flows for each of the years in the three-year period ended March 31, 2009, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated statements taken as a whole, present fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Panasonic Corporation and subsidiaries' internal control over financial reporting as of March 31, 2009, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria), and our report dated June 30, 2009 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Panasonic Corporation:

We have audited Panasonic Corporation and subsidiaries' Internal Control over Financial Reporting as of March 31, 2009, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Panasonic Corporation and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of March 31, 2009, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements and the related financial statement schedule of Panasonic Corporation and subsidiaries as of March 31, 2009 and 2008, and the results of their operations and cash flows for each of the years in the three-year period ended March 31, 2009, and our report dated June 30, 2009 expressed an unqualified opinion on those consolidated financial statements.

**PANASONIC CORPORATION
AND SUBSIDIARIES**

Notes to Consolidated Financial Statements

March 31, 2009, 2008 and 2007

(1) Summary of Significant Accounting Policies

(a) **Description of Business**

From October 1, 2008, the name of Matsushita Electric Industrial Co., Ltd. was changed to Panasonic Corporation. Panasonic Corporation (hereinafter, the Company, including consolidated subsidiaries, unless the context otherwise requires) is one of the world's leading producers of electronic and electric products. The Company currently offers a comprehensive range of products, systems and components for consumer, business and industrial use based on sophisticated electronics and precision technology, expanding to building materials and equipment, and housing business.

Sales by product category in fiscal 2009 were as follows: Digital AVC Networks 45%, Home Appliances 15%, PEW and PanaHome* 20%, Components and Devices 12%, and Other 8%. A sales breakdown in fiscal 2009 by geographical market was as follows: Japan 53%, North and South America 13%, Europe 12%, and Asia and Others 22%.

The Company is not dependent on a single supplier, and has no significant difficulty in obtaining raw materials from suppliers.

* PEW stands for Panasonic Electric Works Co., Ltd. and PanaHome stands for PanaHome Corporation. From October 1, 2008, the name of Matsushita Electric Works, Ltd. (MEW) was changed to Panasonic Electric Works Co., Ltd. (PEW).

(b) Basis of Presentation of Consolidated Financial Statements

The Company and its domestic subsidiaries maintain their books of account in conformity with financial accounting standards of Japan, and its foreign subsidiaries in conformity with those of the countries of their domicile.

The consolidated financial statements presented herein have been prepared in a manner and reflect adjustments which are necessary to conform with U.S. generally accepted accounting principles.

(c) Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its majority-owned, controlled subsidiaries. The Company also consolidates entities in which controlling interest exists through variable interests in accordance with Financial Accounting Standards Board (FASB) Interpretation No. 46 (revised December 2003),

Consolidation of Variable Interest Entities (FIN 46R). Investments in companies and joint ventures over which the Company has the ability to exercise significant influence (generally through a voting interest of between 20% to 50%) are included in Investments and advances Associated companies in the consolidated balance sheets. All significant intercompany balances and transactions have been eliminated in consolidation.

Table of Contents

- 101 -

(d) Revenue Recognition

The Company generates revenue principally through the sale of consumer and industrial products, equipment, and supplies. The Company recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred, and title and risk of loss have been transferred to the customer or services have been rendered, the sales price is fixed or determinable, and collectibility is reasonably assured.

Revenue from sales of products is generally recognized when the products are received by customers. Revenue from sales of certain products with customer acceptance provisions related to their functionality is recognized when the product is received by the customer and the specific criteria of the product functionality are successfully tested and demonstrated.

The Company enters into arrangements with multiple elements, which may include any combination of products, equipment, installation and maintenance. The Company allocates revenue to each element based on its relative fair value if such element meets the criteria for treatment as a separate unit of accounting as prescribed in the Emerging Issues Task Force (EITF) Issue 00-21, Revenue Arrangements with Multiple Deliverables. Product revenue is generally recognized upon completion of installation or upon shipment if installation is not required. Maintenance revenue is recognized on a straight-line basis over the term of the maintenance agreement.

The Company's policy is to accept product returns only in the case that the products are defective. The Company issues contractual product warranties under which it guarantees the performance of products delivered and services rendered for a certain period of time. A liability for the estimated product warranty related cost is established at the time revenue is recognized, and is included in Other accrued expenses. Estimates for accrued warranty cost are primarily based on historical experience and current information on repair cost.

Historically, the Company has made certain allowances related to sales to its consumer business distributors. Such allowances are generally provided to compensate the distributors for a decline in the product's value, and are classified as a reduction of revenue on the consolidated statements of operations. Estimated price adjustments are accrued when the related sales are recognized. The estimate is made based primarily on the historical experience or specific arrangements made with the distributors.

The Company also occasionally offers incentive programs to its distributors in the form of rebates. These rebates are accrued at the later of the date at which the related revenue is recognized or the date at which the incentive is offered, and are recorded as reductions of sales in accordance with EITF Issue 01-09, Accounting for Consideration Given by a Vendor to a Customer (Including a Reseller of the Vendor's Products).

Taxes collected from customers and remitted to governmental authorities are accounted for on a net basis and therefore are excluded from revenues in the consolidated statements of operations.

(e) **Leases (See Note 5)**

The Company accounts for leases in accordance with Statement of Financial Accounting Standards (SFAS) No. 13, Accounting for Leases. Leases of the assets under certain conditions are recorded as capital leases in property, plant and equipment in the consolidated balance sheets.

Table of Contents

- 102 -

(f) Inventories (See Note 2)

Finished goods and work in process are stated at the lower of cost (average) or market. Raw materials are stated at cost, principally on a first-in, first-out basis, not in excess of current replacement cost.

(g) Foreign Currency Translation (See Note 12)

Foreign currency financial statements are translated in accordance with SFAS No. 52, Foreign Currency Translation, under which all assets and liabilities are translated into yen at year-end rates and income and expense accounts are translated at weighted-average rates. Adjustments resulting from the translation of financial statements are reflected under the caption, Accumulated other comprehensive income (loss), a separate component of stockholders' equity.

(h) Property, Plant and Equipment

Property, plant and equipment is stated at cost. Depreciation is computed primarily using the declining balance method based on the following estimated useful lives:

Buildings	5 to 50 years
Machinery and equipment	2 to 10 years

(i) Goodwill and Other Intangible Assets (See Notes 6 and 7)

Goodwill represents the excess of costs over the fair value of net assets of businesses acquired. The Company adopted the provisions of SFAS No. 142, Goodwill and Other Intangible Assets. Goodwill and intangible assets determined to have an indefinite useful life are not amortized, and are instead reviewed for impairment at least annually based on assessment of current estimated fair value of the intangible asset. The goodwill impairment test is a two-step test. Under the first step, the fair value of the reporting unit is compared with its carrying value (including goodwill). If the fair value of the reporting unit is less than its carrying value, an indication of goodwill impairment exists for the reporting unit and the enterprise must perform the second step of the impairment test (measurement). If the fair value of the reporting unit exceeds its carrying amount, the second step does not need to be performed. Under the second step, an impairment loss is recognized for any excess of the carrying amount of the reporting unit's goodwill over the implied fair value of that goodwill. The implied fair value of goodwill is determined by allocating the fair value of the reporting unit in a manner similar to a purchase price allocation in business combinations. The residual fair value after this allocation is the implied fair value of the reporting unit goodwill. Fair value of the reporting unit is determined using a discounted cash flow analysis. SFAS No. 142 also requires that intangible assets with estimable useful lives be

amortized over their respective estimated useful lives to their estimated residual values, and reviewed for impairment based on an assessment of the undiscounted cash flows expected by the asset. An impairment charge is recognized for the amount by which the carrying amount of the asset exceeds the fair value of the asset.

Table of Contents

- 103 -

(j) Investments and Advances (See Notes 3, 4, 12 and 17)

Investments and advances primarily consist of investments in and advances to associated companies, cost method investments, available-for-sale securities, and long-term deposits. Cost method investments and long-term deposits are recorded at historical cost.

The equity method is used to account for investments in associated companies in which the Company exerts significant influence, generally having a 20% to 50% voting interest, and corporate joint ventures. The Company also uses the equity method for certain investees if the minority shareholders have substantive participating rights. Under the equity method of accounting, investments are stated at their underlying net equity value after elimination of intercompany profits. The cost method is used when the Company does not have significant influence.

The excess of cost of the stock of the associated companies over the Company's share of their net assets at the acquisition date, included in the equity investment balance, is recognized as equity method goodwill. Such equity method goodwill is not being amortized and is instead tested for impairment as part of the equity method investment.

The Company accounts for debt and marketable equity securities in accordance with SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities.

SFAS No. 115 requires that certain investments in debt and marketable equity securities be classified as held-to-maturity, trading, or available-for-sale securities. The Company classifies its existing marketable equity securities other than investments in associated companies and all debt securities as available-for-sale. Available-for-sale securities are carried at fair value with unrealized holding gains or losses included as a component of accumulated other comprehensive income (loss), net of applicable taxes.

Realized gains and losses are determined on the average cost method and reflected in earnings.

On a continuous basis, but no less frequently than at the end of each semi-annual period, the Company evaluates the carrying amount of each of the investments in associated companies, cost method investments and available-for-sale securities for possible other-than-temporary impairment. Factors considered in assessing whether an indication of other-than-temporary impairment exists include the period of time the fair value has been below the carrying amount or cost basis of investment, financial condition and prospects of each investee, and other relevant factors.

Investments in associated companies, cost method investments and available-for-sale securities are reduced to fair value by a charge to earnings when impairment is considered to be other than temporary. Impairment is measured based on the amount by which the carrying amount or cost basis of the investment exceeds its fair value. Fair value is determined based on quoted market prices, discounted cash flows or other valuation techniques as appropriate.

(k) **Allowance for Doubtful Receivables**

An allowance for doubtful trade receivables and advances is provided at an amount calculated based on historical experience, while specific allowances for doubtful trade receivables and advances are provided for the estimated amounts considered to be uncollectible after reviewing individual collectibility.

Table of Contents

- 104 -

(l) Income Taxes (See Note 10)

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases, and operating loss and tax credit carryforwards.

Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

The Company accounts for uncertainty in tax positions in accordance with FASB interpretation No. 48, Accounting for Uncertainty in Income Taxes, an Interpretation of SFAS No. 109 (FIN 48) from April 1, 2007. The Company recognizes the effect of income tax positions only if those positions are more likely than not of being sustained. Recognized income tax positions are measured at the largest amount that is greater than 50% likely of being realized. Changes in recognition or measurement are reflected in the period in which the change in judgment occurs. The Company records interests and penalties related to unrecognized tax benefits in Provision for income taxes Current in the consolidated statements of operations.

(m) Advertising (See Note 15)

Advertising costs are expensed as incurred.

(n) Net Income (loss) per Share (See Notes 11 and 13)

The Company accounts for net income (loss) per share in accordance with SFAS No. 128, Earnings per Share. This statement establishes standards for computing net income (loss) per share and requires dual presentation of basic and diluted net income (loss) per share on the face of the statements of operation for all entities with complex capital structures.

Under SFAS No. 128, basic net income (loss) per share is computed based on the weighted-average number of common shares outstanding during each period, and diluted net income (loss) per share assumes the dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock.

(o) **Cash Equivalents**

Cash equivalents include all highly liquid debt instruments purchased with a maturity of three months or less.

Table of Contents

- 105 -

(p) Derivative Financial Instruments (See Notes 12, 16 and 17)

Derivative financial instruments utilized by the Company are comprised principally of foreign exchange contracts, cross currency swaps and commodity futures used to hedge currency risk and commodity price risk.

The Company accounts for derivative instruments in accordance with SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, as amended. On the date the derivative contract is entered into, the Company ordinarily designates the derivative as either a hedge of the fair value of a recognized asset or liability or of an unrecognized firm commitment (fair-value hedge), a hedge of a forecasted transaction or of the variability of cash flows to be received or paid related to a recognized asset or liability (cash-flow hedge), or a foreign-currency fair-value or cash-flow hedge (foreign-currency hedge). The Company formally documents all relationships between hedging instruments and hedged items, as well as its risk-management objective and strategy for undertaking various hedge transactions. The Company also formally assesses, both at the hedge s inception and on an ongoing basis, whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items. The Company does not offset fair value of contracts in gain and loss positions.

Changes in the fair value of a derivative that is highly effective and that is designated and qualifies as a fair-value hedge, along with the loss or gain on the hedged asset or liability or unrecognized firm commitment of the hedged item that is attributable to the hedged risk, are recorded in earnings. Changes in the fair value of a derivative that is highly effective and that is designated and qualifies as a cash-flow hedge are recorded in other comprehensive income (loss), until earnings are affected by the variability in cash flows of the designated hedged item. Changes in the fair value of derivatives that are highly effective as hedges and that are designated and qualify as foreign-currency hedges are recorded in either earnings or other comprehensive income (loss), depending on whether the hedge transaction is a fair-value hedge or a cash-flow hedge. The ineffective portion of the change in fair value of a derivative instrument that qualifies as either a fair-value hedge or a cash-flow hedge is reported in earnings.

(q) Impairment of Long-Lived Assets (See Note 6)

The Company accounts for impairment or disposition of long-lived assets in accordance with SFAS No. 144, Accounting for Impairment or Disposal of Long-Lived Assets. In accordance with SFAS No. 144, long-lived assets, such as property, plant and equipment, and purchased intangibles subject to amortization, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset or asset group may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future cash flows, an impairment charge is recognized for the amount by which the carrying amount of the asset exceeds the fair value of the asset.

Table of Contents

- 106 -

(r) **Restructuring Charges (See Note 14)**

The Company accounts for costs associated with exit or disposal activities in accordance with SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities. Pursuant to SFAS No. 146, liabilities for restructuring costs are recognized when the liability is incurred, which may be subsequent to the date when the Company has committed to a restructuring plan.

(s) **Stock-Based Compensation (See Note 11)**

SFAS No. 123 (revised 2004), Share-Based Payment addresses accounting and disclosure requirements with measurement of the cost of employee service using a fair-value-based method of accounting for stock-based employee compensation plans.

(t) **Segment Information (See Note 19)**

The Company accounts for segment information in accordance with SFAS No. 131, Disclosures about Segments of an Enterprise and Related Information. Pursuant to SFAS No. 131, the reporting segments are the components of the Company for which separate financial information is available that is evaluated regularly by the chief operating decision maker of the Company in deciding how to allocate resources and in assessing performance.

(u) **Use of Estimates**

The preparation of consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates and assumptions are reflected in valuation and disclosure of revenue recognition, allowance for doubtful receivables, valuation of inventories, impairment of long-lived assets, environmental liabilities, valuation of deferred tax assets, uncertain tax positions and employee retirement and severance benefit plans.

(v) **New Accounting Pronouncements**

In September 2006, FASB issued SFAS No. 157, Fair Value Measurements. SFAS No. 157 defines fair value,

establishes a framework for measuring fair value, and expands disclosures about fair value measurements. In February 2008, FASB issued FASB Staff Position No. 157-2, Effective Date of FASB Statement No. 157, which partially delays the effective date of SFAS No. 157 by one year for certain nonfinancial assets and liabilities. On April 1, 2008, the Company adopted SFAS No. 157 for all financial assets and liabilities that are recognized or disclosed at fair value in the consolidated financial statements. The adoption of SFAS No. 157 did not have a material effect on the Company's consolidated financial statements. On April 1, 2009, the Company adopted SFAS No. 157 for all nonfinancial assets and liabilities. The adoption of SFAS No. 157 for all nonfinancial assets and liabilities is not expected to have a material effect on the Company's consolidated financial statements.

Table of Contents

- 107 -

In December 2007, FASB issued SFAS No. 141 (revised 2007), Business Combinations (SFAS No. 141R) and SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements an amendment to ARB No. 51. SFAS No. 141R and No. 160 require most identifiable assets, liabilities, noncontrolling interests, and goodwill acquired in a business combination to be recorded at full fair value and require noncontrolling interests (previously referred to as minority interests) to be reported as a component of equity, which changes the accounting for transactions with noncontrolling interest holders. SFAS No. 141R and No. 160 will be effective for the Company as of April 1, 2009. SFAS No. 141R will be applied to business combinations occurring after the effective date. SFAS No. 160 will be applied prospectively to all noncontrolling interests, including any that arose before the effective date and the disclosure requirement will be applied retrospectively. The Company is currently in the process of assessing the impact of the adoption of SFAS No. 141R and No. 160 on the Company's consolidated financial statements.

In December 2008, FASB issued FASB Staff Position FAS 132R-1, Employers' Disclosures about Postretirement Benefit Plan Assets (FSP FAS 132R-1). FSP FAS 132R-1 provides guidance on an employer's disclosures about plan assets of a defined benefit pension or other postretirement plan. The disclosures about plan assets required by FSP FAS 132R-1 must be provided for the Company in periods beginning on or after April 1, 2009. The Company is currently in the process of assessing the impact of the adoption of FSP FAS 132R-1 on the Company's consolidated financial statements.

In April 2008, the FASB issued FASB Staff Position FAS 142-3, Determination of the Useful Life of Intangible Assets (FSP FAS 142-3). FSP FAS 142-3 amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under SFAS No. 142. FSP FAS 142-3 will be effective for the Company as of April 1, 2009. The Company is currently in the process of assessing the impact of adoption of FSP FAS 142-3 on the Company's consolidated financial statements.

Table of Contents

- 108 -

(2) Inventories

Inventories at March 31, 2009 and 2008 are summarized as follows:

	Yen (millions)	
	2009	2008
Finished goods	439,747	499,316
Work in process	129,949	132,894
Raw materials	201,441	232,054
	771,137	864,264

(3) Investments in and Advances to, and Transactions with Associated Companies

Certain financial information in respect of associated companies in aggregate at March 31, 2009 and 2008, and for the three years ended March 31, 2009 is shown below. The most significant of these associated companies as of March 31, 2009 are JVC KENWOOD Holdings, Inc. (JVC KENWOOD HD), Toshiba Matsushita Display Technology Co., Ltd. (TMD) and Sumishin Matsushita Financial Services Co., Ltd. (SMFC). At March 31, 2009, the Company has a 24.4% equity ownership in JVC KENWOOD HD, a 40.0% equity ownership in TMD and a 34.0% equity ownership in SMFC.

The Company formerly consolidated Victor Company of Japan, Ltd. (JVC) and its subsidiaries. On August 10, 2007, JVC issued and allocated new shares of its common stock to third parties. As a result, the Company's shareholding of JVC decreased from 52.4% to 36.8%, and JVC and its subsidiaries became associated companies under equity method. On October 1, 2008, JVC and Kenwood Corporation integrated management by establishing JVC KENWOOD HD through a share transfer. As a result, the Company has 24.4% shareholding of JVC KENWOOD HD.

On April 1, 2009, the Company concluded an agreement with Toshiba Corporation to sell all of its shares in TMD. The sale was finalized on April 28, 2009.

The Company formerly accounted for the investment in IPS Alpha technology, Ltd. (IPS) and its subsidiary under the equity method, and began to consolidate IPS and its subsidiary on March 31, 2008, in accordance with FIN 46R, as a

result of modification of Joint-Venture agreement. IPS, a variable interest entity, is engaged in manufacturing LCD panels. At March 31, 2008, the amount of total assets of IPS and its subsidiary is 237,259 million yen and the Company has a 44.9% equity ownership interest in IPS. Financial information associated with IPS for the year ended March 31, 2008 is included in the aggregate information below, however, financial information as of and for the year ended March 31, 2009, and as of March 31, 2008 is not included.

	Yen (millions)	
	2009	2008
Current assets	1,012,194	1,082,483
Other assets	526,722	584,566
	<u>1,538,916</u>	<u>1,667,049</u>
Current liabilities	961,503	809,544
Other liabilities	292,788	417,241
	<u>284,625</u>	<u>440,264</u>
Net assets	<u>284,625</u>	<u>440,264</u>
Company's equity in net assets	<u>102,966</u>	<u>170,330</u>

Table of Contents

- 109 -

	Yen (millions)		
	2009	2008	2007
Net sales	1,568,499	1,968,527	1,352,107
Gross profit	292,589	377,989	216,002
Net loss	(70,779)	(52,915)	(7,595)

Purchases and dividends received from associated companies for the three years ended March 31, 2009 are as follows:

	Yen (millions)		
	2009	2008	2007
Purchases from	315,829	424,242	301,859
Dividends received	4,528	5,434	3,365

Retained earnings include undistributed earnings of associated companies in the amount of 36,594 million yen and 32,519 million yen, as of March 31, 2009 and 2008, respectively.

During the years ended March 31, 2009 and 2008, the Company incurred a write-down of 18,121 million yen and 23,668 million yen, respectively, for other-than-temporary impairment of investments and advances in associated companies. The fair values of the investments and advances in associated companies were based on quoted market price or discounted cash flows by using appropriate discounted rate. An impairment charge was recorded to reduce the carrying value of the assets to fair value. The write-down is included in other deductions in the consolidated statements of operations.

Investments in associated companies include equity securities which have quoted market values at March 31, 2009 and 2008 compared with related carrying amounts as follows:

	Yen (millions)	
	2009	2008
Carrying amount	12,825	30,644
Market value	11,093	35,921

Table of Contents

- 111 -

Maturities of investments in available-for-sale securities at March 31, 2009 and 2008 are as follows:

	Yen (millions)			
	2009		2008	
	Cost	Fair value	Cost	Fair value
Due within one year	1,972	1,998	47,262	47,414
Due after one year through five years	9,782	9,910	34,991	35,456
Due after five years through ten years			2,200	2,197
Equity securities	269,735	284,356	333,057	441,839
	<u>281,489</u>	<u>296,264</u>	<u>417,510</u>	<u>526,906</u>

Proceeds from sale of available-for-sale securities for the years ended March 31, 2009, 2008 and 2007 were 73,782 million yen, 106,466 million yen and 84,806 million yen, respectively. The gross realized gains on sale of available-for-sale securities for the years ended March 31, 2009, 2008 and 2007 were 797 million yen, 7,415 million yen and 12,452 million yen, respectively. The gross realized losses on sale of available-for-sale securities for the years ended March 31, 2009, 2008 and 2007 were 11 million yen, 148 million yen and 313 million yen, respectively. The cost of securities sold in computing gross realized gains and losses is determined by the average cost method.

During the years ended March 31, 2009, 2008 and 2007, the Company incurred a write-down of 73,861 million yen, 8,002 million yen and 939 million yen, respectively, for other-than-temporary impairment of available-for-sale securities, mainly reflecting the aggravated market condition of certain industries in Japan. The write-down is included in other deductions in the consolidated statements of operations.

Gross unrealized holding losses on investment securities and the fair value of the related securities, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, at March 31, 2009 and 2008, are as follows:

Table of Contents

- 112 -

Yen (millions)

	<u>89,712</u>	<u>15,681</u>			<u>89,712</u>	<u>15,681</u>

The gross unrealized loss position has been continuing for a relatively short period of time. Based on this and other relevant factors, management has determined that these investments are not considered other-than-temporarily impaired. The Company did not have investment securities that had been in a continuous loss position for twelve months or more at March 31, 2009 and 2008.

The carrying amounts of the Company's cost method investments totaled 40,755 million yen and 29,837 million yen at March 31, 2009 and 2008. For substantially all such investments, the Company estimated that the fair value exceeded the carrying amounts of investments (that is, the investments were not impaired). For the years ended March 31, 2009, 2008 and 2007, certain investments were considered other-than-temporarily impaired, resulting in a write-down of 34 million yen, 172 million yen and 2,209 million yen, respectively.

At March 31, 2009 and 2008, equity securities with a book value of 13,333 million yen and 19,880 million yen were pledged as collateral for the deferred payments of certain taxes based on the Japanese Custom Act and Consumption Tax Law.

(5) Leases

The Company has capital and operating leases for certain land, buildings, and machinery and equipment with SMFC and other third parties.

During the years ended March 31, 2009, 2008 and 2007, the Company sold and leased back certain land, buildings, and machinery and equipment for 16,582 million yen, 109,311 million yen and 73,578 million yen, respectively. The base lease term is 1 to 10 years. The resulting leases are being accounted for as operating leases or capital leases. The resulting gains of these transactions, included in other income in the consolidated statements of operations, were not significant. Regarding certain leased assets, the Company has options to purchase the leased assets, or to terminate the leases and guarantee a specified value of the leased assets thereof, subject to certain conditions, during or at the end of the lease term. Regarding leased land and buildings, there are no future commitments, obligations, provisions, or circumstances that require or result in the Company's continuing involvement.

At March 31, 2009 and 2008, the gross book value of land, buildings, and machinery and equipment under capital leases, including the above-mentioned sale-leaseback transactions was 136,445 million yen and 207,999 million yen, and the related accumulated depreciation recorded was 65,001 million yen and 89,977 million yen, respectively.

Rental expenses for operating leases, including the above-mentioned sale-leaseback transactions were 63,490 million yen, 59,886 million yen and 47,094 million yen for the years ended March 31, 2009, 2008 and 2007, respectively.

Future minimum lease payments under non-cancelable capital leases and operating leases at March 31, 2009 are as follows:

	Yen (millions)	
	Capital leases	Operating leases
Year ending March 31		
2010	40,312	56,444
2011	31,216	62,809
2012	22,463	29,657
2013	9,741	13,606
2014	3,446	7,788
Thereafter	9,458	4,625

Total minimum lease payments	116,636	174,929
Less amount representing interest	4,305	
Present value of net minimum lease payments	112,331	
Less current portion	38,868	
Long-term capital lease obligations	73,463	

(6) Long-Lived Assets

The Company periodically reviews the recorded value of its long-lived assets to determine if the future cash flows to be derived from these assets or related asset group will be sufficient to recover the remaining recorded asset values. Impairment losses are included in other deductions in the consolidated statements of operations, and are not charged to segment profit.

The Company recognized impairment losses in the aggregate of 313,466 million yen of long-lived assets during fiscal 2009.

The Company recorded impairment losses for certain buildings, machinery and finite-lived intangible assets related to domestic liquid crystal display panel manufacturing facilities. As a result of the substantial decline of product prices due to the significant market downturn, the Company estimated that the carrying amounts would not be recoverable through future cash flows. The fair value of buildings and remaining assets, respectively, was determined through an appraisal based on the comparable sales method and the discounted estimated cash flows expected to result from the use and eventual disposition of the assets.

Table of Contents

- 114 -

The Company also recorded impairment losses for certain buildings, machinery and finite-lived intangible assets related to domestic and overseas plasma display panel manufacturing facilities. As a result of the substantial decline of product prices due to the significant market downturn, the Company estimated that the carrying amounts would not be recoverable through future cash flows. The fair value of buildings and remaining assets, respectively, was determined through an appraisal based on the comparable sales method and the orderly liquidation value.

Impairment losses of 252,372 million yen, 18,131 million yen, 19,077 million yen, 18,747 million yen and 5,139 million yen were related to Digital AVC Networks, Home Appliances, PEW and PanaHome, Components and Devices and the remaining segments, respectively.

The Company recognized impairment losses in the aggregate of 44,554 million yen of long-lived assets during fiscal 2008.

The Company recorded impairment losses related to manufacturing facilities used in its domestic semiconductors business. As the profitability of domestic business declined, the Company estimated that the carrying amounts would not be recovered by the future cash flows. The fair value of manufacturing facilities was based on the discounted estimated future cash flows expected to result from the use and eventual disposition of them.

The Company also recorded impairment losses related to certain buildings and manufacturing facilities used in its device business at an overseas subsidiary. Due to the downsizing of business, the Company wrote down the carrying amounts of these assets to the fair value. The fair value was based on the discounted estimated future cash flows.

Impairment losses of 1,167 million yen, 2,231 million yen, 39,490 million yen and 1,666 million yen were related to Digital AVC Networks, Home Appliances, Components and Devices and the remaining segments, respectively.

The Company recognized impairment losses in the aggregate of 18,440 million yen of long-lived assets during fiscal 2007.

The Company closed a domestic factory that manufactured air conditioner devices and recorded an impairment loss related to buildings, and machinery and equipment, as the Company estimated that the carrying amounts would not be recovered by the discounted estimated future cash flows expected to result from their eventual disposition.

The Company also recorded impairment losses related to buildings, machinery and equipment, and finite-lived intangible assets in building equipment, and electronic and plastic materials of some domestic and overseas subsidiaries. The profitability of each subsidiary was expected to be low in the future and the Company estimated the carrying amounts would not be recovered by the future cash flows.

Impairment losses of 1,416 million yen, 10,279 million yen, 3,901 million yen, 1,571 million yen and 1,273 million yen were related to Home Appliances, PEW and PanaHome, Components and Devices, Other and the remaining segments, respectively.

(7) Goodwill and Other Intangible Assets

The changes in the carrying amount of goodwill by business segment for the years ended March 31, 2009 and 2008 are as follows:

	Yen (millions)					
	Digital AVC Networks	Home Appliances	PEW and PanaHome	Components and Devices	Other	Total
Balance at March 31, 2007	234,893	14,273	45,958	71,239	12,961	379,324
Goodwill acquired during the year	7,711	1,405	45,906	574	29	55,625
Goodwill written off related to disposals during the year	(561)	(922)	(1,923)	(111)		(3,517)
Other				(1,530)		(1,530)
Balance at March 31, 2008	242,043	14,756	89,941	70,172	12,990	429,902
Goodwill acquired during the year	702		262		30	994
Translation adjustments			(10,583)			(10,583)
Other	(3,780)		(5,741)			(9,521)
Balance at March 31, 2009	238,965	14,756	73,879	70,172	13,020	410,792

Acquired intangible assets, excluding goodwill, at March 31, 2009 and 2008 are as follows:

	Yen (millions)				
	2009		2008		Average amortization period
	Gross carrying amount	Accumulated amortization	Gross carrying amount	Accumulated amortization	
Finite-lived intangible assets:					
Patents	60,317	41,063	61,654	36,782	8 years

Edgar Filing: PANASONIC Corp - Form 20-F

Software	257,859	188,439	233,375	162,946	4 years
Other	56,040	28,059	42,706	13,985	18 years
	<u>374,216</u>	<u>257,561</u>	<u>337,735</u>	<u>213,713</u>	

	<u>Yen (millions)</u>	
	<u>2009</u>	<u>2008</u>
Indefinite-lived intangible assets	4,057	4,895

Aggregate amortization expense for finite-lived intangible assets for the years ended March 31, 2009, 2008 and 2007 was 38,903 million yen, 38,343 million yen and 37,337 million yen, respectively. Estimated amortization expense for the next five years is as follows:

Year ending March 31	<u>Yen (millions)</u>
2010	30,791
2011	23,904
2012	16,479
2013	10,956
2014	7,945

The Company recognized impairment losses of 73 million yen and 239 million yen of indefinite-lived intangible assets, in connection with the decline of their fair value during fiscal 2008 and 2007, respectively. The impairment losses are included in other deductions in the consolidated statements of operations.

Impairment losses of finite-lived intangible assets that are being amortized are included in impairment losses of long-lived assets discussed in Note 6.

(8) Long-term Debt and Short-term Borrowings

Long-term debt at March 31, 2009 and 2008 is set forth below:

	<u>Yen (millions)</u>	
	<u>2009</u>	<u>2008</u>
Unsecured Straight bond, due 2011, interest 1.64%	100,000	100,000
Unsecured Straight bond, due 2012, interest 1.14%	100,000	
Unsecured Straight bond, due 2014, interest 1.404%	200,000	
Unsecured Straight bond, due 2019, interest 2.05%	100,000	
Unsecured Straight bonds issued by subsidiaries, due 2008 - 2015, interest 0.6% - 2.02%	60,143	50,150
Unsecured bank loans, due 2008 - 2013, effective interest 1.6% in fiscal 2009 and 2.0% in fiscal 2008	22,043	33,920
Secured yen bank loans by subsidiaries, due 2008 - 2027, effective interest 2.51% in fiscal 2009 and 2.55% in fiscal 2008	3,136	4,011
Capital lease obligations	112,331	122,267
	<u>697,653</u>	<u>310,348</u>
Less current portion	46,343	78,002
	<u>651,310</u>	<u>232,346</u>

The aggregate annual maturities of long-term debt after March 31, 2009 are as follows:

	<u>Yen (millions)</u>
Year ending March 31	
2010	46,343
2011	37,921
2012	227,528
2013	10,910
2014	223,669
2015 and thereafter	151,282

As is customary in Japan, short-term and long-term bank loans are made under general agreements which provide that security and guarantees for future and present indebtedness will be given upon request of the bank, and that the bank shall have the right, as the obligations become due, or in the event of their default, to offset cash deposits against such obligations due to the bank.

Each of the loan agreements grants the lender the right to request additional security or mortgages on certain assets. At March 31, 2009 and 2008, other investments and advances, and property, plant and equipment with a book value of 4,967 million yen and 6,218 million yen respectively, was pledged as collateral by subsidiaries for secured yen loans from banks. At March 31, 2009 and 2008, short-term loans subject to such general agreements amounted to 7,130 million yen and 15,156 million yen, respectively. The balance of short-term loans also includes borrowings under acceptances and short-term loans of foreign subsidiaries. The weighted-average interest rate on short-term borrowings outstanding at March 31, 2009 and 2008 was 3.5% and 4.6%, respectively.

- 117 -

(9) **Retirement and Severance Benefits**

The Company and certain subsidiaries have contributory, funded benefit pension plans covering substantially all employees who meet eligibility requirements. Benefits under the plans are primarily based on the combination of years of service and compensation.

In addition to the plans described above, upon retirement or termination of employment for reasons other than dismissal, employees are entitled to lump-sum payments based on the current rate of pay and length of service. If the termination is involuntary or caused by death, the severance payment is greater than in the case of voluntary termination. The lump-sum payment plans are not funded.

Effective April 1, 2002, the Company and some of the above-mentioned subsidiaries amended their benefit pension plans by introducing a point-based benefits system, and their lump-sum payment plans to cash balance pension plans. Under point-based benefits system, benefits are calculated based on accumulated points allocated to employees each year according to their job classification and years of service. Under the cash balance pension plans, each participant has an account which is credited yearly based on the current rate of pay and market-related interest rate.

On March 31, 2007, the Company adopted the recognition and disclosure provisions of SFAS No. 158, *Employers Accounting for Defined Benefit Pension and Other Postretirement Plans* an amendment of FASB Statement No. 87, 88, 106, and 132(R). SFAS No. 158 required the Company to recognize the funded status (i.e., the difference between the fair value of plan assets and the projected benefit obligations) of its pension plans in the March 31, 2007 consolidated balance sheet, with a corresponding adjustment to accumulated other comprehensive income (loss), net of tax. The adjustment to accumulated other comprehensive income (loss) at adoption represents the unrecognized prior service benefit and unrecognized actuarial loss, both of which were previously netted against the plans' funded status in the consolidated balance sheet pursuant to the provisions of SFAS No. 87, *Employers Accounting for Pensions*. These amounts will be subsequently amortized as net periodic benefit cost. Further, actuarial gains and losses that arise in subsequent periods and that are not recognized as net periodic benefit cost in the same periods will be recognized as a component of other comprehensive income (loss). Those amounts will be subsequently recognized as a component of net periodic benefit cost on the same basis as the amounts recognized in accumulated other comprehensive income (loss) at adoption of SFAS No. 158.

During the year ended March 31, 2009, the Company changed the measurement date to March 31 for those postretirement benefit plans with a December 31 measurement date in conformity with the measurement date provisions of SFAS No. 158. The benefit obligations and plan assets of these plans were remeasured as of April 1, 2008. Net periodic benefit cost, net of tax, for the period from January 1, 2008 to March 31, 2008, in the amount of 3,727 million yen has been recorded as a reduction of beginning fiscal 2009 balance of retained earnings. Changes in

fair value of plan assets and benefit obligations during the same transition period has been recorded, as a reduction of beginning fiscal 2009 balance of accumulated other comprehensive income (loss), in the amount of 73,571 million yen, net of tax of 44,726 million yen.

Reconciliation of beginning and ending balances of the benefit obligations of the contributory, funded benefit pension plans, the unfunded lump-sum payment plans, and the cash balance pension plans, and the fair value of the plan assets at March 31, 2009 and 2008 are as follows:

Table of Contents

- 118 -

	Yen (millions)	
	2009	2008
Change in benefit obligations:		
Benefit obligations at beginning of year prior to adjustment	1,828,803	1,955,007
SFAS No. 158 measurement date adjustment	4,378	
Benefit obligations at beginning of year as adjusted	1,833,181	1,955,007
Service cost	49,660	52,830
Interest cost	50,114	50,667
Prior service benefit	(666)	(1,930)
Actuarial (gain) loss	(6,150)	(14,173)
Benefits paid	(85,073)	(94,130)
Effect of changes in consolidated subsidiaries	(5,560)	(108,636)
Foreign currency exchange impact	(13,569)	(10,832)
Benefit obligations at end of year	1,821,937	1,828,803
Change in plan assets:		
Fair value of plan assets at beginning of year	1,737,634	1,813,616
SFAS No. 158 measurement date adjustment	(118,514)	
Fair value of plan assets at beginning of year as adjusted	1,619,120	1,813,616
Actual return on plan assets	(268,049)	(40,591)
Employer contributions	153,161	157,798
Benefits paid	(77,682)	(79,511)
Effect of changes in consolidated subsidiaries		(105,459)
Foreign currency exchange impact	(12,904)	(8,219)
Fair value of plan assets at end of year	1,413,646	1,737,634
Funded status	(408,291)	(91,169)

The accumulated benefit obligation for the pension plans was 1,814,118 million yen and 1,817,222 million yen at March 31, 2009 and 2008, respectively.

The projected benefit obligations and the fair value of plan assets for the pension plans with projected benefit obligations in excess of plan assets, and the accumulated benefit obligations and the fair value of plan assets for the pension plans with accumulated benefit obligations in excess of plan assets at March 31, 2009 and 2008 are as

follows:

	Yen (millions)	
	2009	2008
Plans with projected benefit obligations in excess of plan assets:		
Projected benefit obligations	1,821,937	840,967
Fair value of plan assets	1,413,646	598,369
Plans with accumulated benefit obligations in excess of plan assets:		
Accumulated benefit obligations	1,814,118	805,235
Fair value of plan assets	1,413,646	569,587

Table of Contents

- 119 -

Accounts recognized in the consolidated balance sheet at March 31, 2009 and 2008 consist of:

	Yen (millions)	
	2009	2008
Other assets		151,430
Other current liabilities	(3,924)	(4,203)
Retirement and severance benefits	(404,367)	(238,396)
	<u>(408,291)</u>	<u>(91,169)</u>

Amounts recognized in accumulated other comprehensive income (loss) at March 31, 2009 and 2008 consist of:

	Yen (millions)	
	2009	2008
Prior service benefit	(222,519)	(251,718)
Actuarial loss	641,371	248,918
	<u>418,852</u>	<u>(2,800)</u>

Net periodic benefit cost for the contributory, funded benefit pension plans, the unfunded lump-sum payment plans, and the cash balance pension plans of the Company for the three years ended March 31, 2009 consist of the following components:

	Yen (millions)		
	2009	2008	2007
Service cost benefits earned during the year	49,660	52,830	59,415
Interest cost on projected benefit obligation	50,114	50,667	52,659
Expected return on plan assets	(48,659)	(52,861)	(50,069)
Amortization of prior service benefit	(24,606)	(27,046)	(25,201)

Edgar Filing: PANASONIC Corp - Form 20-F

Recognized actuarial loss	22,391	15,448	18,407
	<u> </u>	<u> </u>	<u> </u>
Net periodic benefit cost	48,900	39,038	55,211
	<u> </u>	<u> </u>	<u> </u>

The estimated prior service benefit and actuarial loss for the defined benefit pension plans that will be amortized from accumulated other comprehensive income (loss) into net periodic benefit cost for fiscal 2010 are gain of 24,786 million yen and loss of 37,519 million yen, respectively.

Weighted-average assumptions used to determine benefit obligations at March 31, 2009 and 2008 are as follows:

	<u>2009</u>	<u>2008</u>
Discount rate	2.7%	2.7%
Rate of compensation increase	1.7%	1.7%

Table of Contents

- 120 -

Weighted-average assumptions used to determine net cost for the three years ended March 31, 2009 are as follows:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
Discount rate	2.7%	2.7%	2.7%
Expected return on plan assets	3.1%	3.1%	3.3%
Rate of compensation increase	1.7%	1.6%	1.6%

The expected return on plan assets is determined based on the portfolio as a whole and not on the sum of the returns on individual asset categories, considering long-term historical returns, asset allocation, and future estimates of long-term investment returns.

The weighted-average asset allocations of the Company's pension plans at March 31, 2009 and 2008 are as follows:

	<u>2009</u>	<u>2008</u>
Asset category:		
Equity securities	35%	43%
Debt securities	50	44
Life insurance company general accounts	11	9
Other	4	4
	<u> </u>	<u> </u>
Total	100%	100%
	<u> </u>	<u> </u>

Each plan of the Company has a different investment policy, which is designed to ensure sufficient plan assets are available to provide future payments of pension benefits to the eligible plan participants and is individually monitored for compliance and appropriateness on an on-going basis. Considering the expected long-term rate of return on plan assets, each plan of the Company establishes a basic portfolio comprised of the optimal combination of equity securities and debt securities. Plan assets are invested in individual equity and debt securities using the guidelines of the basic portfolio in order to generate a total return that will satisfy the expected return on a mid-term to long-term basis. The Company evaluates the difference between expected return and actual return of invested plan assets on an annual basis to determine if such differences necessitate a revision in the formulation of the basic portfolio. The Company revises the basic portfolio when and to the extent considered necessary to achieve the expected long-term rate of return on plan assets.

The Company expects to contribute 73,823 million yen to its defined benefit plans in fiscal 2010.

The benefits expected to be paid from the defined pension plans in each fiscal year 2010 - 2014 are 99,237 million yen, 95,421 million yen, 99,861 million yen, 101,830 million yen and 101,584 million yen, respectively. The aggregate benefits expected to be paid in the five years from fiscal 2015 - 2019 are 538,968 million yen. The expected benefits are based on the same assumptions used to measure the Company's benefit obligation at March 31 and include estimated future employee service.

(10) Income Taxes

Income (loss) before income taxes and income taxes for the three years ended March 31, 2009 are summarized as follows:

	Yen (millions)		
	<u>Domestic</u>	<u>Foreign</u>	<u>Total</u>
For the year ended March 31, 2009			
Income (loss) before income taxes	(345,776)	(36,858)	(382,634)
Income taxes:			
Current	38,297	23,543	61,840
Deferred	(10,232)	(14,250)	(24,482)
Total income taxes	28,065	9,293	37,358
For the year ended March 31, 2008			
Income before income taxes	266,972	168,021	434,993
Income taxes:			
Current	85,009	43,172	128,181
Deferred	(16,068)	2,460	(13,608)
Total income taxes	68,941	45,632	114,573
For the year ended March 31, 2007			
Income before income taxes	317,007	122,137	439,144
Income taxes:			
Current	84,012	35,453	119,465
Deferred	67,984	4,414	72,398
Total income taxes	151,996	39,867	191,863

The Company and its subsidiaries in Japan are subject to a National tax of 30%, an Inhabitant tax of approximately 20.5%, and a deductible Enterprise tax of approximately 7.4% varying by local jurisdiction, which, in aggregate, resulted in a combined statutory tax rate in Japan of approximately 40.5% for the three years ended March 31, 2009.

Table of Contents

- 122 -

The effective tax rates for the years differ from the combined statutory tax rates for the following reasons:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
Combined statutory tax rate	(40.5)%	40.5%	40.5%
Tax credit related to research expenses	(0.1)	(1.2)	(2.2)
Lower tax rates of overseas subsidiaries	(1.1)	(6.9)	(4.2)
Expenses not deductible for tax purposes	0.8	0.7	0.8
Change in valuation allowance allocated to income tax expenses	41.8	(5.4)	9.8
Tax effects attributable to investments in subsidiaries	5.8	(4.8)	0.5
Other	3.1	3.4	(1.5)
	<u> </u>	<u> </u>	<u> </u>
Effective tax rate	9.8%	26.3%	43.7%
	<u> </u>	<u> </u>	<u> </u>

The significant components of deferred income tax expenses for the three years ended March 31, 2009 are as follows:

	<u>Yen (millions)</u>		
	<u>2009</u>	<u>2008</u>	<u>2007</u>
Deferred tax expense (exclusive of the effects of other components listed below)	94,250	16,898	114,132
Benefits of net operating loss carryforwards	(118,732)	(30,506)	(41,734)
	<u> </u>	<u> </u>	<u> </u>
	(24,482)	(13,608)	72,398
	<u> </u>	<u> </u>	<u> </u>

Table of Contents

- 123 -

The tax effects of temporary differences that give rise to significant portions of the deferred tax assets and deferred tax liabilities at March 31, 2009 and 2008 are presented below:

	Yen (millions)	
	2009	2008
Deferred tax assets:		
Inventory valuation	78,930	87,441
Expenses accrued for financial statement purposes but not currently included in taxable income	138,580	186,633
Property, plant and equipment	246,276	168,886
Retirement and severance benefits	233,924	72,803
Tax loss carryforwards	333,383	242,474
Other	232,994	179,672
	<u>1,264,087</u>	<u>937,909</u>
Total gross deferred tax assets		
Less valuation allowance	477,997	348,570
	<u>786,090</u>	<u>589,339</u>
Deferred tax liabilities:		
Net unrealized holding gains of available-for-sale securities	(5,882)	(44,018)
Other	(41,814)	(53,810)
	<u>(47,696)</u>	<u>(97,828)</u>
Total gross deferred tax liabilities		
Net deferred tax assets	<u>738,394</u>	<u>491,511</u>

In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences and loss carryforwards become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. Based upon the level of historical taxable income and projections for future taxable income over the periods in which the deferred tax assets are deductible, management believes it is more likely than not that the Company will realize the benefits of these deductible differences and loss carryforwards, net of the existing valuation allowances at March 31, 2009.

The net change in total valuation allowance for the years ended March 31, 2009, 2008 and 2007 was an increase of 129,427 million yen, a decrease of 90,267 million yen and a decrease of 25,263 million yen, respectively.

At March 31, 2009, the Company had, for income tax purposes, net operating loss carryforwards of approximately 936,060 million yen, of which 835,152 million yen expire from fiscal 2010 through 2016 and the remaining balance will expire thereafter or do not expire.

Table of Contents

- 124 -

Net deferred tax assets and liabilities at March 31, 2009 and 2008 are reflected in the accompanying consolidated balance sheets under the following captions:

	Yen (millions)	
	2009	2008
Other current assets	227,059	232,248
Other assets	547,580	292,457
Other current liabilities	(1,168)	(1,082)
Other liabilities	(35,077)	(32,112)
Net deferred tax assets	738,394	491,511

The Company has not recognized a deferred tax liability for the undistributed earnings of its foreign subsidiaries and foreign corporate joint ventures of 750,123 million yen as of March 31, 2009, because the Company currently does not expect those unremitted earnings to reverse and become taxable to the Company in the foreseeable future. A deferred tax liability will be recognized when the Company no longer plans to indefinitely reinvest undistributed earnings. The calculation of related unrecognized deferred tax liability is not practicable.

A reconciliation of the beginning and ending amounts of unrecognized tax benefits for the years ended March 31, 2009 and 2008, is as follows:

	Yen (millions)	
	2009	2008
Balance at beginning of year	(9,327)	(4,281)
Increase related to prior year tax positions	(1,835)	(4,657)
Decrease related to prior year tax positions	3,561	82
Increase related to current year tax positions	(484)	(2,023)
Settlements	60	1,552
Translation adjustments	838	
Balance at end of year	(7,187)	(9,327)

As of March 31, 2009 and 2008, the total amount of unrecognized tax benefits are 7,187 million yen and 8,287 million yen, respectively, that if recognized, would reduce the effective tax rate. The Company does not expect that the total amount of unrecognized tax benefits will significantly change within the next twelve months. The Company has accrued interests and penalties related to unrecognized tax benefits and the amount of interest and penalties included in provision for income taxes and cumulative amount accrued were not material as of and for the years ended March 31, 2009 and 2008.

The Company files income tax returns in Japan and various foreign tax jurisdictions. There are a number of subsidiaries which operate within each of the Company's major jurisdictions resulting in a range of open tax years. The open tax years for the Company and its significant subsidiaries in Japan, the United States of America, the United Kingdom and China range from fiscal 2004 and thereafter.

(11) Stockholders Equity

The Company may repurchase its common stock from the market pursuant to the former Japanese Commercial Code and the Company Law of Japan. For the years ended March 31, 2009, 2008 and 2007, respectively, 30,875,208, 45,294,912 and 63,385,266 shares were repurchased for the aggregate cost of approximately 72,416 million yen, 103,112 million yen and 153,179 million yen, respectively, primarily with the intention to hold as treasury stock to improve capital efficiency.

The Company sold 399,673, 127,610 and 137,733 shares of its treasury stock for the years ended March 31, 2009, 2008 and 2007, respectively. The difference between sales price and book value was charged to capital surplus in the consolidated balance sheets.

The Company Law of Japan provides that an amount equal to 10% of appropriations be appropriated as a capital reserve or legal reserve until the aggregated amount of capital reserve and legal reserve equals 25% of stated capital. The capital reserve and legal reserve are not available for dividends but may be transferred to capital surplus or retained earnings or stated capital upon approval of the shareholders meeting.

Cash dividends and transfers to the legal reserve charged to retained earnings during the three years ended March 31, 2009 represent dividends paid out during the periods and related appropriation to the legal reserve. Cash dividends per share paid during the three years ended March 31, 2009 amounted to 40.00 yen, 32.50 yen and 25.00 yen, respectively. The accompanying consolidated financial statements do not include any provisions for the year-end dividend of 7.50 yen per share, totaling approximately 15,530 million yen in respect of the year ended March 31, 2009 approved by the board of directors in May 2009.

In accordance with the Company Law of Japan, there are certain restrictions on payment of dividends in connection with the treasury stock repurchased. As a result of restrictions on the treasury stock repurchased, retained earnings of 671,182 million yen at March 31, 2009 were restricted as to the payment of cash dividends.

The Company's directors and certain senior executives were granted options to purchase the Company's common stock. All stock options become fully exercisable two years from the date of grant and have a four-year term. Information with respect to stock options is as follows:

Edgar Filing: PANASONIC Corp - Form 20-F

(13) Net Income (loss) per Share

A reconciliation of the numerators and denominators of the basic and diluted net income (loss) per share computation for the three years ended March 31, 2009 is as follows:

	Yen (millions)		
	2009	2008	2007
Net income (loss)	(378,961)	281,877	217,185
	Number of shares		
	2009	2008	2007
Average common shares outstanding	2,079,296,525	2,120,986,052	2,182,791,138
Dilutive effect:			
Stock options		3,818	13,858
Diluted common shares outstanding	2,079,296,525	2,120,989,870	2,182,804,996
	Yen		
	2009	2008	2007
Net income (loss) per share:			
Basic	(182.25)	132.90	99.50
Diluted	(182.25)	132.90	99.50

The effect of stock options was not included in the calculation of diluted net loss per share for the year ended March 31, 2009 as the effect would be antidilutive due to the net loss incurred for the year.

(14) Restructuring Charges

Edgar Filing: PANASONIC Corp - Form 20-F

In connection with the reorganization of the Company's operations, the Company has incurred certain restructuring charges. Components and related amounts of the restructuring charges, before the related tax effects, for the years ended March 31, 2009, 2008 and 2007 are as follows:

	Yen (millions)		
	2009	2008	2007
Expenses associated with the implementation of early retirement programs:			
Domestic	26,452	27,050	8,733
Overseas	11,899	5,594	5,465
Total	38,351	32,644	14,198
Expenses associated with the closure and integration of locations	15,049	6,922	5,376
Total restructuring charges	53,400	39,566	19,574

These restructuring charges are included in other deductions in the consolidated statements of operations.

Table of Contents

- 130 -

The Company has provided early retirement programs to those employees voluntarily leaving the Company. The accrued early retirement programs are recognized when the employees accept the offer and the amount can be reasonably estimated. Expenses associated with the closure and integration of locations include amounts such as moving expenses of facilities and costs to terminate leasing contracts incurred at domestic and overseas manufacturing plants and sales offices. An analysis of the accrued restructuring charges for the years ended March 31, 2009, 2008 and 2007 is as follows:

	Yen (millions)		
	2009	2008	2007
Balance at beginning of year	4,761	10,020	1,335
New charges	53,400	39,566	19,574
Cash payments	(25,638)	(44,825)	(10,889)
Balance at end of year	32,523	4,761	10,020

The following represents significant restructuring activities for the year ended March 31, 2009 by business segment:

Digital AVC Networks

Digital AVC Networks segment restructured mainly to accelerate selection and concentration of its businesses for improving its cost competitiveness. The restructuring activities mainly consisted of the implementation of early retirement programs in Japan.

Total restructuring charges amounted to 34,748 million yen, including expenses associated with the implementation of early retirement programs of 29,029 million yen.

Home Appliances

Home Appliances segment restructured its operations to accelerate concentration of its business for strengthening its management structure. The restructuring activities mainly consisted of integrations in Japan.

Total restructuring charges amounted to 3,206 million yen.

PEW and PanaHome

PEW and PanaHome segment restructured mainly its housing business in Japan.

Total restructuring charges amounted to 5,673 million yen.

Components and Devices

Components and Devices segment restructured mainly to improve efficiency in its components business.

Total restructuring charges amounted to 3,957 million yen, including expenses associated with the implementation of early retirement programs of 3,277 million yen.

Other

Other segment restructured mainly to improve efficiency in overseas sales companies.

The restructuring charges amounted to 5,816 million yen, including expenses associated with the implementation of early retirement programs of 4,145 million yen.

The following represents significant restructuring activities for the year ended March 31, 2008 by business segment:

Digital AVC Networks

Digital AVC Networks segment restructured mainly to accelerate selection and concentration of its businesses for improving its cost competitiveness. The restructuring activities mainly consisted of the implementation of early retirement programs in Japan.

Table of Contents

- 131 -

Total restructuring charges amounted to 15,356 million yen, including expenses associated with the implementation of early retirement programs of 14,168 million yen.

Home Appliances

Home Appliances segment restructured its operations to accelerate concentration of its business for strengthening its management structure. The restructuring activities mainly consisted of integrations in Japan.

Total restructuring charges amounted to 8,375 million yen, including expenses associated with the implementation of early retirement programs of 5,611 million yen.

PEW and PanaHome

PEW and PanaHome segment mainly restructured its housing business in Japan. The restructuring activities mainly consisted of the implementation of early retirement programs.

Total restructuring charges amounted to 11,581 million yen, including expenses associated with the implementation of early retirement programs of 8,888 million yen.

Components and Devices

Components and Devices segment restructured mainly to improve efficiency in its battery business.

Total restructuring charges amounted to 3,128 million yen.

JVC

JVC segment incurred restructuring charges in the amount of 750 million yen in its domestic entertainment business.

Other

Other segment incurred restructuring charges in the amount of 376 million yen mainly in overseas sales companies.

The following represents significant restructuring activities for the year ended March 31, 2007 by business segment:

Digital AVC Networks

Digital AVC Networks segment restructured mainly to accelerate selection and concentration of its businesses for strengthening its management structure. The restructuring activities mainly consisted of the implementation of early retirement programs in Japan and Europe.

Total restructuring charges amounted to 11,909 million yen, including expenses associated with the implementation of early retirement programs of 10,440 million yen.

Home Appliances

Home Appliances segment restructured its operations. The restructuring activities mainly consisted of closure and integrations in Japan.

Total restructuring charges amounted to 3,113 million yen.

PEW and PanaHome

PEW and PanaHome segment incurred restructuring charges in the amount of 328 million yen mainly in Japan.

Table of Contents

- 132 -

Components and Devices

Components and Devices segment restructured mainly to enhance cost competitiveness as well as to address continuous price declines. The restructuring activities mainly consisted of the implementation of early retirement programs in Asia for electronic devices business.

Total restructuring charges amounted to 3,468 million yen.

JVC

JVC segment incurred restructuring charges in the amount of 531 million yen mainly in Asia.

Other

Other segment incurred restructuring charges in the amount of 225 million yen mainly in domestic sales companies.

(15) Supplementary Information to the Statements of Operations and Cash Flows

Research and development costs, advertising costs, shipping and handling costs and depreciation charged to income for the three years ended March 31, 2009 are as follows:

	Yen (millions)		
	2009	2008	2007
Research and development costs	517,913	554,538	578,087
Advertising costs	174,939	200,890	199,155
Shipping and handling costs	146,920	159,418	170,311
Depreciation	325,835	282,102	280,177

Foreign exchange losses included in other deductions for the years ended March 31, 2009, 2008 and 2007 are 7,501 million yen, 11,492 million yen and 18,950 million yen, respectively.

Shipping and handling costs are included in selling, general and administrative expenses in the consolidated statements of operations.

Table of Contents

- 133 -

In fiscal 2009, 2008 and 2007, the Company sold, without recourse, trade receivables of 458,321 million yen, 443,464 million yen and 315,329 million yen to independent third parties for proceeds of 456,870 million yen, 441,778 million yen and 314,265 million yen, and recorded losses on the sale of trade receivables of 1,451 million yen, 1,686 million yen and 1,064 million yen, respectively. In fiscal 2009, 2008 and 2007, the Company sold, with recourse, trade receivables of 411,778 million yen, 397,796 million yen and 303,769 million yen to independent third parties for proceeds of 411,022 million yen, 397,421 million yen and 303,561 million yen, and recorded losses on the sale of trade receivables of 756 million yen, 375 million yen and 208 million yen, respectively. Those losses are mainly included in selling, general and administrative expenses. The Company is responsible for servicing the receivables. Included in trade notes receivable and trade accounts receivable at March 31, 2009 are amounts of 37,962 million yen without recourse and 28,394 million yen with recourse scheduled to be sold to independent third parties. The sale of trade receivables was accounted for under SFAS No. 140, Accounting for Transfer and Servicing of Financial Assets and Extinguishments of Liabilities, which provides accounting and reporting standards for transfer and servicing of financial assets and extinguishments of liabilities.

Interest expenses and income taxes paid, and noncash investing and financing activities for the three years ended March 31, 2009 are as follows:

	Yen (millions)		
	2009	2008	2007
Cash paid:			
Interest	19,627	20,911	22,202
Income taxes	95,198	122,416	109,692
Noncash investing and financing activities:			
Capital leases	12,235	36,330	27,803

JVC and its subsidiaries became associated companies under equity method from consolidated companies in August, 2007. Certain financial information of JVC and its subsidiaries at the date of deconsolidation is as follows:

	Yen (millions)
Assets:	
Current assets	311,080
Other assets	115,546
Total	426,626

Liabilities:	
Current liabilities	242,336
Other liabilities	36,149
	<hr/>
Total	278,485
	<hr/>

(16) Derivatives and Hedging Activities

The Company operates internationally, giving rise to significant exposure to market risks arising from changes in foreign exchange rates and commodity prices. The Company assesses these risks by continually monitoring changes in these exposures and by evaluating hedging opportunities. Derivative financial instruments utilized by the Company to hedge these risks are comprised principally of foreign exchange contracts, cross currency swaps and commodity derivatives. The Company does not hold or issue derivative financial instruments for trading purpose.

Gains and losses related to derivative instruments are classified in other income (deductions) and cost of sales in the consolidated statements of operations. The amount of the hedging ineffectiveness and net gain or loss excluded from the assessment of hedge effectiveness is not material for the three years ended March 31, 2009. Amounts included in accumulated other comprehensive income (loss) at March 31, 2009 are expected to be recognized in earnings principally over the next twelve months. The maximum term over which the Company is hedging exposures to the variability of cash flows for foreign currency exchange risk is approximately five months.

The Company is exposed to credit risk in the event of non-performance by counterparties to the derivative contracts, but such risk is considered mitigated by the high credit rating of the counterparties.

The contract amounts of foreign exchange contracts, cross currency swaps and commodity futures at March 31, 2009 and 2008 are as follows:

	<u>Yen (millions)</u>	
	<u>2009</u>	<u>2008</u>
Forward:		
To sell foreign currencies	334,586	312,390
To buy foreign currencies	190,495	185,267
Cross currency swaps	33,953	32,717
Commodity futures:		
To sell commodity	48,858	129,425
To buy commodity	168,527	294,884

From the interim reporting period for the three months ended March 31, 2009, the Company adopted SFAS No. 161,

Disclosures about Derivative Instruments and Hedging Activities an amendment of FASB statement No. 133. SFAS No. 161 requires disclosures of how and why an entity uses derivative instruments, how derivative instruments and

related hedged items affect an entity's financial position, financial performance and cash flows.

The fair values of derivative instruments at March 31, 2009 are as follows:

Yen (millions)			
Asset derivatives		Liability derivatives	
Consolidated balance sheet location	Fair value	Consolidated balance sheet location	Fair value
Derivatives designated as hedging instruments under SFAS No. 133:			
Foreign exchange			
contracts	Other current assets	2,299	Other current liabilities (9,094)
Cross currency swaps	Other current assets	275	Other current liabilities
Commodity futures	Other current assets	9,285	Other current liabilities (53,050)
Total derivatives designated as hedging instruments under SFAS No. 133		11,859	(62,144)
Derivatives not designated as hedging instruments under SFAS No. 133:			
Foreign exchange contracts	Other current assets	204	Other current liabilities (808)
Cross currency swaps	Other current assets	1,260	Other current liabilities

(17) Fair Value of Financial Instruments

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate that value:

Cash and cash equivalents, Time deposits, Trade receivables, Short-term borrowings, Trade payables and Accrued expenses

The carrying amount approximates fair value because of the short maturity of these instruments.

Short-term investments

The fair value of short-term investments is estimated based on quoted market prices.

Investments and advances

The fair value of investments and advances is estimated based on quoted market prices or the present value of future cash flows using appropriate current discount rates.

Long-term debt

The fair value of long-term debt is estimated based on quoted market prices or the present value of future cash flows using appropriate current discount rates.

Table of Contents

- 137 -

Derivative financial instruments

The fair value of derivative financial instruments, all of which are used for hedging purposes, are estimated by obtaining quotes from brokers.

The estimated fair values of financial instruments, all of which are held or issued for purposes other than trading, at March 31, 2009 and 2008 are as follows:

	Yen (millions)			
	2009		2008	
	Carrying amount	Fair value	Carrying amount	Fair value
Non-derivatives:				
Assets:				
Short-term investments	1,998	1,998	47,414	47,414
Other investments and advances	424,237	423,223	686,510	686,575
Liabilities:				
Long-term debt, including current portion	(697,653)	(698,502)	(310,348)	(312,674)
Derivatives:				
Other current assets:				
Forward:				
To sell foreign currencies			11,682	11,682
To buy foreign currencies	2,503	2,503		
Cross currency swaps	1,535	1,535		
Commodity futures:				
To sell commodity	13,955	13,955		
To buy commodity			28,325	28,325
Other current liabilities:				
Forward:				
To sell foreign currencies	(9,902)	(9,902)		
To buy foreign currencies			(2,388)	(2,388)
Cross currency swaps			(874)	(874)
Commodity futures:				
To sell commodity			(9,746)	(9,746)
To buy commodity	(57,720)	(57,720)		

Limitations

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instruments. These estimates are subjective in nature and involve uncertainties and matters of significant judgements and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

On April 1, 2008, the Company adopted SFAS No. 157, Fair Value Measurements. SFAS No. 157 defines fair value and establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The three levels of the fair value hierarchy are as follows:

- Level 1 Quoted prices (unadjusted) in active markets for identical assets.
- Level 2 Quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable, and inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3 Unobservable inputs for the asset or liability.

The following table presents assets and liabilities that are measured at fair value on a recurring basis at March 31, 2009:

Table of Contents

- 138 -

	Yen (millions)			
	2009			
	Level 1	Level 2	Level 3	Total
Assets:				
Available-for-sale securities	284,356	11,908		296,264
Derivatives	9,285	8,708		17,993
Total	293,641	20,616		314,257
Liabilities:				
Derivatives	(57,720)	(9,902)		(67,622)
Total	(57,720)	(9,902)		(67,622)

The Company's existing marketable equity securities and commodity futures are included in Level 1, which are valued using an unadjusted quoted market price in active markets with sufficient volume and frequency of transactions.

Level 2 available-for-sale securities include all debt securities, which are valued using inputs other than quoted prices that are observable. Foreign exchange contracts and commodity futures included in Level 2 derivatives are valued using quotes obtained from brokers, which are periodically validated by pricing models using observable market inputs, such as foreign currency exchange rates and interest rates.

The Company recorded a write-down of 18,121 million yen of securities under investments and advances in associated companies with a carrying value of 29,598 million yen, to the estimated fair value of 11,477 million yen for other-than-temporary impairment. The Company classified the impaired security, representing a substantial portion of the write-down, in Level 1 as the Company used an unadjusted quoted market price in active markets as input to value the investment. The remaining impaired security is classified in Level 3 as the Company used unobservable inputs to value the investment.

(18) Commitments and Contingent Liabilities

The Company provides guarantees to third parties mainly on bank loans provided to associated companies and customers. The guarantees are made to enhance their credit. For each guarantee provided, the Company is required to

perform under the guarantee if the guaranteed party defaults on a payment. Also, as discussed in Note 15, the Company sold certain trade receivables to independent third parties, some of which are with recourse. If the collectibility of those receivables with recourse becomes doubtful, the Company is obligated to assume the liabilities. At March 31, 2009, the maximum amount of undiscounted payments the Company would have to make in the event of default is 33,434 million yen. The carrying amount of the liabilities recognized for the Company's obligations as a guarantor under those guarantees at March 31, 2009 and 2008 was immaterial.

As discussed in Note 5, in connection with the sale and leaseback of certain machinery and equipment, the Company guarantees a specific value of the leased assets. For each guarantee provided, the Company is required to perform under the guarantee if certain conditions are met during or at the end of the lease term. At March 31, 2009, the maximum amount of undiscounted payments the Company would have to make in the event that these conditions are met is 32,613 million yen. The carrying amount of the liabilities recognized for the Company's obligations as guarantors under those guarantees at March 31, 2009 and 2008 was immaterial.

The Company issues contractual product warranties under which it generally guarantees the performance of products delivered and services rendered for a certain period or term. The change in accrued warranty costs for the years ended March 31, 2009 and 2008 are summarized as follows:

Table of Contents

- 139 -

	<u>Yen (millions)</u>	
	<u>2009</u>	<u>2008</u>
Balance at beginning of year	36,178	38,079
Change in consolidated subsidiaries		(5,189)
Liabilities accrued for warranties issued during the period	51,526	42,178
Warranty claims paid during the period	(45,797)	(37,016)
Changes in liabilities for pre-existing warranties during the period, including expirations	(429)	(1,874)
Balance at end of year	<u>41,478</u>	<u>36,178</u>

At March 31, 2009, commitments outstanding for the purchase of property, plant and equipment approximated 79,068 million yen.

Liabilities for environmental remediation costs are recorded when it is probable that obligations have been incurred and the amounts can be reasonably estimated. In January 2003, the Company announced that disposed electric equipment that contained polychlorinated biphenyls (PCB equipment) might be buried in the ground of its four manufacturing facilities and one former manufacturing facility. The applicable laws require that PCB equipment be appropriately maintained and disposed of by July 2016. The Company has accrued estimated total cost of 12,147 million yen for necessary actions such as investigating whether the PCB equipment is buried at the facilities, including excavations, maintaining and disposing the PCB equipment that is already discovered, and soil remediation, since it represents management's best estimate or minimum of the cost, but the payments are not considered to be fixed and reliably determinable.

There are a number of legal actions against the Company and certain subsidiaries. Management is of the opinion that damages, if any, resulting from these actions will not have a material effect on the Company's consolidated financial statements.

(19) Segment Information

In accordance with SFAS No. 131, Disclosures about Segments of an Enterprise and Related Information, the segments reported below are the components of the Company for which separate financial information is available that is evaluated regularly by the chief operating decision maker of the Company in deciding how to allocate resources and in assessing performance.

Business segments correspond to categories of activity classified primarily by markets, products and brand names.

Digital AVC Networks includes video and audio equipment, and information and communications equipment. Home Appliances includes household equipment. PEW and PanaHome includes electrical supplies, electric products, building materials and equipment, and housing business. Components and Devices includes electronic components, semiconductors, electric motors and batteries. Other includes electronic-parts-mounting machines, industrial robots and industrial equipment.

The Company has changed the internal business transactions between Global Procurement Service Company and other segments since April 1, 2008. Accordingly, segment information for Other and Corporate and eliminations of fiscal 2008 has been reclassified to conform to the presentation for fiscal 2009.

From April 1, 2008, the name of AVC Networks was changed to Digital AVC Networks. From October 1, 2008, the name of Matsushita Electric Works, Ltd. (MEW) was changed to Panasonic Electric Works Co., Ltd. (PEW).

Information by segment for the three years ended March 31, 2009 is shown in the tables below:

By Business Field:

In a new phase of further growth, the Company has been accelerating initiatives to achieve global excellence. From April 1, 2008, in order to further clarify its business fields for investors, the Company discloses three business fields. This represents a voluntary and supplementary disclosure by the Company to further enhance readers' understanding of the Company's strategy, financial condition and results of operations. This disclosure is not intended to substitute for the segment disclosures as required by SFAS No. 131. The business fields are comprised of the Company's five segments as follows:
