NetLogic Microsystems, Inc.

Notes to Condensed Consolidated Financial Statements

(Unaudited)

1. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements of NetLogic Microsystems, Inc. (we, our and the Company) have been prepared in accordance with accounting principles generally accepted in the United States of America and with the instructions for Form 10-Q and Regulation S-X statements. Accordingly, they do not include all of the information and notes required for complete financial statements. In the opinion of management, all adjustments, consisting of only normal recurring items, considered necessary for a fair statement of the results of operations for the periods are shown.

These unaudited financial statements should be read in conjunction with the audited financial statements and accompanying notes included in our Annual Report on Form 10-K for the year ended December 31, 2008. Operating results for the three and six months ended June 30, 2009 are not necessarily indicative of the results that may be expected for the year ending December 31, 2009.

We have evaluated subsequent events through August 4, 2009, which is the date these financial statements were issued.

Critical Accounting Policies and Estimates

The preparation of our unaudited condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We based these estimates and assumptions on historical experience and evaluate them on an on-going basis to help ensure they remain reasonable under current conditions. Actual results could differ from those estimates. During the three and six months ended June 30, 2009, there were no significant changes to the critical accounting policies and estimates discussed in our 2008 annual report on Form 10-K with the exception of those discussed below.

Foreign Currency

Effective January 1, 2009, the functional currency for all of our foreign subsidiaries became the United States dollar. Assets and liabilities denominated in non-U.S. dollars are remeasured into U.S. dollars at end-of-period exchange rates for monetary assets and liabilities, and historical exchange rates for nonmonetary assets and liabilities. Revenue and expenses are remeasured at average exchange rates in effect during the period, except for those revenue and expenses related to the nonmonetary assets and liabilities, which are measured at historical exchange rates. The gains or losses from foreign currency remeasurement are included in interest and other income, net. Such gains or losses have not been material for the three and six months ended June 30, 2009.

Recently Issued Accounting Pronouncements

In April 2009, the FASB issued three related Staff Positions: (i) FSP 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability have Significantly Decreased and Identifying Transactions That Are Not Orderly*, or FSP 157-4, (ii) SFAS 115-2 and SFAS 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments*, or FSP 115-2 and FSP 124-2, and (iii) SFAS 107-1 and APB 28-1, *Interim Disclosures about Fair Value of Financial Instruments*, or FSP 107 and APB 28-1, which will be effective for interim and annual periods ending after June 15, 2009. FSP 157-4 provides guidance on how to determine the fair value of assets and liabilities under SFAS 157 in the current economic environment and reemphasizes that the objective of a fair value measurement remains an exit price. If we were to conclude that there has been a significant decrease in the volume and level of activity of the asset or liability in relation to *normal* market activities, quoted market values may not be representative of fair value and we may conclude that a change in valuation technique or the use of multiple valuation techniques may be appropriate. FSP 115-2 and FSP 124-2 modify the requirements for recognizing other-than-temporarily impaired debt securities and revise the existing impairment model for such securities, by modifying the current *intent and ability* indicator in determining whether a debt security is other-than-temporarily impaired. FSP 107 and APB 28-1 enhance the disclosure of instruments under the scope of SFAS 157 for both interim and annual periods. The adoption of these FSPs did not have a material impact on our unaudited condensed consolidated financial statements.

Edgar Filing: NETLOGIC MICROSYSTEMS INC - Form 10-Q

In April 2009, the FASB issued FSP No. 141R-1 *Accounting for Assets Acquired and Liabilities Assumed in a Business Combination That Arise from Contingencies*, or FSP 141R-1. FSP 141R-1 amends the provisions in Statement 141R for the initial recognition and measurement, subsequent measurement and accounting, and disclosures for assets and liabilities arising from contingencies in business combinations. The FSP eliminates the distinction between contractual and non-contractual contingencies, including the initial recognition and measurement criteria in Statement 141R and instead carries forward most of the provisions in SFAS 141 for acquired contingencies. FSP 141R-1 is effective for contingent assets and contingent liabilities acquired in business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. We will apply the provisions of SFAS141(R) to our acquisitions when they occur.

In May 2009, the FASB issued SFAS No. 165 *Subsequent Events*, or SFAS 165 which establishes general standards of accounting for, and requires disclosure of, events that occur after the balance sheet date but before financial statements are issued or are available to be issued. We adopted the provisions of SFAS 165 for the quarter ended June 30, 2009. The adoption of these provisions did not have a material effect on our consolidated financial statements.

In June 2009, the FASB issued SFAS No. 168, *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting*, or SFAS 168. SFAS 168 represents the last numbered standard to be issued by FASB under the old (pre-Codification) numbering system, and amends the GAAP hierarchy established under SFAS 162. On July 1, 2009 the FASB launched FASB's new Codification entitled *The FASB Accounting Standards Codification*. The Codification will supersede all existing non-SEC accounting and reporting standards. SFAS 168 is effective in the first interim and annual periods ending after September 15, 2009. This pronouncement will have no effect our unaudited condensed consolidated financial statements upon adoption other than current references to GAAP which will be replaced with references to the applicable codification paragraphs.

Table of Contents**2. Basic and Diluted Net Income Per Share**

We compute net income per share in accordance with SFAS 128, Earnings per Share. Basic net income per share is computed by dividing net income attributable to common stockholders (numerator) by the weighted average number of common shares outstanding (denominator) during the period. Diluted net income per share gives effect to all dilutive potential common shares outstanding during the period including stock options and warrants using the treasury stock method.

The following is a reconciliation of the weighted average number of common shares used to calculate basic net income per share to the weighted average common and potential common shares used to calculate diluted net income per share for the three and six months ended June 30, 2009 and 2008 (in thousands, except per share data):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
Numerator:				
Net (loss) income: basic and diluted	\$ (2,156)	\$ 2,332	\$ (6,073)	\$ 3,459
Denominator:				
Add: common shares outstanding	21,994	21,424	21,916	21,311
Less: unvested common shares subject to repurchase	(33)	(34)	(33)	(34)
Total shares: basic	21,961	21,390	21,883	21,277
Add: stock options and warrants outstanding, if dilutive		1,105		903
Add: shares subject to repurchase, if dilutive		34		34
Total shares: diluted	21,961	22,529	21,883	22,214
Basic earnings per share	\$ (0.10)	\$ 0.11	\$ (0.28)	\$ 0.16
Diluted earnings per share	\$ (0.10)	\$ 0.10	\$ (0.28)	\$ 0.16

For the three and six months ended June 30, 2009 and 2008, employee stock options to purchase the following numbers of shares of common stock were excluded from the computation of diluted net income per share as their effect would be anti-dilutive (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
Stock options	2,444	1,927	3,224	2,321

Table of Contents**3. Stock-Based Compensation**

We have adopted stock plans that provide for grants to employees of equity-based awards, which include stock options and restricted stock. In addition, we have an Employee Stock Purchase Plan (ESPP) that allows employees to purchase our common stock at a discount through payroll deductions. The estimated fair value of our equity-based awards, less expected forfeitures, is amortized over the awards' service period. We also grant stock options and restricted stock to new employees in accordance with Nasdaq Marketplace rule 4350(i)(1)(A)(iv) as an inducement material to the new employees entering into employment with the Company.

The following table summarizes stock-based compensation expense recorded for the periods presented (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
Cost of revenue	\$ 180	\$ 326	\$ 355	\$ 606
Research and development	3,461	1,777	5,612	3,795
Selling, general and administrative	2,377	1,171	4,351	2,574
Total stock-based compensation expense	\$ 6,018	\$ 3,274	\$ 10,318	\$ 6,975

In addition, we capitalized approximately \$0.1 million and \$0.2 million of stock-based compensation in inventory as of June 30, 2009 and December 31, 2008, respectively, which represented indirect manufacturing costs related to our inventory.

Stock Options

The exercise price of each stock option generally equals the market price of our common stock on the date of grant. Most options vest over four years and expire no later than ten years from the grant date. During the three and six months ended June 30, 2009 we granted stock options to purchase approximately 2,000 and 260,000 shares of common stock, respectively. During the three and six months ended June 30, 2008, we granted stock options to purchase approximately 51,000 and 256,000 shares of common stock, respectively. As of June 30, 2009 there was approximately \$20.7 million of total unrecognized compensation cost related to unvested stock options granted and outstanding with a weighted average remaining vesting period of 2.1 years.

Restricted Stock

During the three and six months ended June 30, 2009 we granted restricted stock units representing the future right to acquire approximately 196,000 and 319,000 shares of common stock, respectively. During the three and six months ended June 30, 2008, we granted restricted stock units representing the right to acquire approximately 85,000 and 248,000 shares of common stock, respectively. These awards vest over the requisite service period, which ranges from two to four years. The fair value of the restricted stock was determined using the fair value of our common stock on the date of the grant. The fair value of the restricted stock is being amortized on a straight-line basis over the service period, and is reduced for estimated forfeitures. As of June 30, 2009, there was approximately \$19.2 million of total unrecognized compensation cost related to unvested restricted stock granted which is expected to be recognized over a weighted average period of 2.6 years.

Employee Stock Purchase Plan

Our ESPP provides that eligible employees may purchase up to \$25,000 worth of our common stock annually over the course of two six-month offering periods. The purchase price to be paid by participants is 85% of the price per share of our common stock either at the beginning or the end of each six-month offering period, whichever is less. During the six months ended June 30, 2009 and 2008, approximately 40,000 and 22,000 shares, respectively, were purchased under the ESPP.

Valuation Assumptions

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option pricing model. This model was developed for use in estimating the value of publicly traded options that have no vesting restrictions and are fully transferable. Our employee stock options have characteristics significantly different from those of publicly traded options as they have vesting requirements and are not fully transferable.

Edgar Filing: NETLOGIC MICROSYSTEMS INC - Form 10-Q

The weighted average assumptions used in the model are outlined in the following table:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2009	2008	2009	2008
Stock Option Plans:				
Risk-free interest rate	2.85%	3.13%	1.88%	3.10%
Expected life of options (in years)	5.41	5.61	5.90	5.27
Expected dividend yield	0.00%	0.00%	0.00%	0.00%
Volatility	56%	55%	60%	59%
Weighted average fair value	\$ 19.30	\$ 15.53	\$ 12.34	\$ 14.97
Employee Stock Purchase Plan:				
Risk-free interest rate	0.28%	3.32%	0.28%	3.32%
Expected life of options (in years)	0.49	0.50	0.49	0.50
Expected dividend yield	0.00%	0.00%	0.00%	0.00%
Volatility	75%	51%	75%	51%
Weighted average fair value	\$ 7.85	\$ 9.24	\$ 7.85	\$ 9.24

The computation of the expected volatility assumption used in the Black-Scholes calculations for new grants is based on a combination of historical and implied volatilities. When establishing the expected life assumption, we review on a semi-annual basis the historical employee exercise behavior with respect to option grants with similar vesting periods.

Table of Contents**4. Income Taxes**

At January 1, 2009 and June 30, 2009, we had \$15.2 million and \$15.8 million of unrecognized tax benefits. Approximately \$13.6 million of the balance as of June 30, 2009 would affect our effective tax rate if recognized.

We recognize interest and penalties related to uncertain tax positions in income tax expense. As of June 30, 2009, we had \$822,000 of accrued interest and zero penalties related to uncertain tax positions.

The tax years 1997-2008 remain open to examination by one or more of the major taxing jurisdictions in which we are subject to taxation on our taxable income. We do not anticipate that total unrecognized tax benefits will significantly change due to the settlement of audits and the expiration of statute of limitations prior to June 30, 2010.

In February 2009, the California 2009-2010 budget legislature was enacted into law, allowing companies to elect for income tax purposes to apply a single sales factor apportionment for years beginning after January 1, 2011. Based on our anticipated election, we determined a need to establish a valuation allowance for certain deferred tax assets totaling \$3.0 million during the six months ended June 30, 2009.

5. Business Combination*Aeluros, Inc.*

In October 2007, we acquired all outstanding equity securities of Aeluros, Inc. (Aeluros) a privately-held, fabless provider of industry-leading 10-Gigabit Ethernet physical layer products (PLPs). The PLP family extended our product offerings to the physical layer, or Layer 1, of the Open Systems Interconnection (OSI) reference model, which is a layered abstract description for communications and computer network protocol design developed as part of the Open Systems Interconnection initiative. The physical layer provides the physical and electrical means for transmitting data between different nodes on a network. We paid \$57.1 million in cash. During the fourth quarter of fiscal 2008, we became obligated to pay an additional \$15.5 million in cash to the former Aeluros stockholders due to our attainment of post-acquisition revenue milestones, subject to certain adjustments as provided in the Aeluros acquisition agreement. The additional consideration was included in goodwill and accrued liabilities at December 31, 2008, and was paid to the former Aeluros stockholders in February 2009. The results of operations relating to Aeluros have been included in our results of operations since the acquisition date.

6. Goodwill and Intangible Assets

The following table summarizes the components of goodwill, other intangible assets and related accumulated amortization balances, which were recorded as a result of prior business combinations (in thousands):

	June 30, 2009		December 31, 2008			
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Goodwill	\$ 68,712	\$	\$ 68,712	\$ 68,712	\$	\$ 68,712
Other intangible assets:						
Developed technology	\$ 34,180	\$ (15,663)	\$ 18,517	\$ 34,180	\$ (11,668)	\$ 22,512
Composite intangible asset	11,246	(5,155)	6,091	11,246	(3,749)	7,497
Patents and core technology	5,590	(1,884)	3,706	5,590	(1,325)	4,265
Customer relationships	6,900	(2,326)	4,574	6,900	(1,636)	5,264
Backlog	2,106	(2,106)		2,106	(2,106)	
Total	\$ 60,022	\$ (27,134)	\$ 32,888	\$ 60,022	\$ (20,484)	\$ 39,538

As of both June 30, 2009 and December 31, 2008, goodwill represented approximately 28% of our total assets.

For both the six months ended June 30, 2009 and 2008, amortization expense related to intangible assets was \$6.7 million. The amortization expense related to intangible assets was included in cost of sales because it related to products sold during such periods, except for the

Edgar Filing: NETLOGIC MICROSYSTEMS INC - Form 10-Q

amortization of the customer relationships of \$0.7 million for both the six months ended June 30, 2009 and 2008, which was included in selling, general and administrative expenses.

As of June 30, 2009, the estimated future amortization expense of intangible assets in the table above is as follows (in thousands):

Fiscal Year Ending	Estimated Amortization
2009 (remaining 6 months)	\$ 6,649
2010	13,299
2011	10,154
2012	2,786
Total	\$ 32,888

Table of Contents**7. Cash, Cash Equivalents and Short-Term Investments**

The following is a summary of available-for-sale investments as of June 30, 2009 and December 31, 2008 (in thousands):

	June 30, 2009			Estimated Fair Value
	Amortized Cost	Gross Unrealized Gain	Gross Unrealized Losses	
Money market funds (all reported as cash and cash equivalents)	\$ 51,251	\$	\$	\$ 51,251
	December 31, 2008			Estimated Fair Value
	Amortized Cost	Gross Unrealized Gain	Gross Unrealized Losses	
U.S. government agency securities	\$ 16,413	\$ 40	\$	\$ 16,453
Corporate commercial paper	2,944	4		2,948
Money market funds	61,717			61,717
Total	\$ 81,074	\$ 44	\$	\$ 81,118
Reported as:				
Cash and cash equivalents	\$ 68,047	\$ 4	\$	\$ 68,051
Short-term investments	13,027	40		13,067
Total	\$ 81,074	\$ 44	\$	\$ 81,118

The fair value of the Company's investments at June 30, 2009 and December 31, 2008, by contractual maturity, was as follows (in thousands):

	June 30, 2009	December 31, 2008
Due in 1 year or less	\$	\$ 19,401

Net unrealized holding gains and losses on available-for-sale investments were included as a separate component of stockholders' equity.

See Note 17, *Subsequent Events*, below for further discussion of the purchase of intellectual property and other assets related to the Integrated Device Technology's (IDT) network search engine (NSE) business (the IDT NSE Acquisition). As of June 30, 2009 our cash and cash equivalent balance was \$88.3 million. Subsequent to June 30, 2009, our cash and cash equivalent balance decreased as a result of the \$100 million purchase consideration paid on July 17, 2009 for the IDT NSE Acquisition, offset by \$37 million of borrowings under the credit facility to partially finance the acquisition.

Table of Contents**8. Fair Value Measurements**

SFAS No. 157 defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities required or permitted to be recorded at fair value, the Company considers the principal or most advantageous market in which the Company would transact and considers assumptions that market participants would use when pricing the asset or liability, such as inherent risk, transfer restrictions, and risk of nonperformance.

Fair Value Hierarchy

SFAS No. 157 establishes a fair value hierarchy that requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. SFAS No. 157 establishes three levels of inputs that may be used to measure fair value:

Level 1 Quoted prices in active markets for identical assets or liabilities.

Level 2 Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities, quoted prices in markets with insufficient volume or infrequent transactions (less active markets), or model-derived valuations in which all significant inputs are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 Unobservable inputs to the valuation methodology that are significant to the measurement of fair value of assets or liabilities.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The Company measures its financial assets, specifically its cash equivalents and short-term investments, at fair value on a recurring basis. The Company does not have any financial liabilities that are measured at fair value on a recurring basis. The fair value of these financial assets was determined using the following inputs as of June 30, 2009 and December 31, 2008 (in thousands):

	Fair Value Measurements at June 30, 2009 Using			
	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Other Unobservable Inputs (Level 3)
Money market funds ⁽¹⁾	\$ 51,251	\$ 51,251	\$	\$

(1) Included in cash and cash equivalents on the Company's condensed consolidated balance sheet.

	Fair Value Measurements at December 31, 2008 Using			
	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Other Unobservable Inputs (Level 3)
Money market funds ⁽²⁾	\$ 61,717	\$ 61,717	\$	\$
U.S. government agency securities ⁽³⁾	16,453		16,453	
Corporate commercial paper ⁽⁴⁾	2,948		2,948	
Total	\$ 81,118	\$ 61,717	\$ 19,401	\$

- (2) Included in cash and cash equivalents on the Company's condensed consolidated balance sheet.
- (3) \$6.3 million of which is included in cash and cash equivalents and \$10.2 million of which is included in short-term investments on the Company's condensed consolidated balance sheet.
- (4) Included in short-term investments on the Company's condensed consolidated balance sheet.

Table of Contents**9. Balance Sheet Components**

The components of our inventory at June 30, 2009 and December 31, 2008 were as follows (in thousands):

	June 30, 2009	December 31, 2008
Inventories:		
Finished goods	\$ 5,068	\$ 8,170
Work-in-progress	4,588	5,537
	\$ 9,656	\$ 13,707

The components of our accrued liabilities at June 30, 2009 and December 31, 2008 were as follows (in thousands):

	June 30, 2009	December 31, 2008
Accrued Liabilities:		
Accrued payroll and related expenses	\$ 4,635	\$ 4,784
Accrued accounts payable	2,184	131
Accrued inventory purchases	1,040	729
Accrued warranty	1,366	1,445
Accrual for Aeluros earn-out based on post-acquisition revenue milestone		15,501
Other accrued expenses	3,987	3,330
	\$ 13,212	\$ 25,920

10. Product Warranties

We provide a limited product warranty from one to three years from the date of sale. We provide for the estimated future costs of repair or replacement upon shipment of the product. Our warranty accrual is estimated based on actual and historical claims compared to historical revenue and assumes that we have to replace products subject to a claim. The following table summarizes activity related to product warranty liability during the three and six months ended June 30, 2009 and 2008 (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
Warranty Accrual:				
Beginning balance	\$ 1,415	\$ 1,366	\$ 1,445	\$ 1,512
Provision for warranty	13	436	36	628
Settlements made during the period	(62)	(383)	(115)	(721)
Ending balance	\$ 1,366	\$ 1,419	\$ 1,366	\$ 1,419

During the first two quarters of 2006, we provided an additional warranty reserve of \$0.9 million to address a warranty issue related to specific devices sold to one of our international customers. The devices were tested by both us and the customer and passed quality assurance inspection at the time they were sold. The customer subsequently identified malfunctioning systems that included our devices. No specific warranty reserve was provided for additional units shipped subsequent to September 30, 2006 as the customer modified the software associated with its products to remedy the observed malfunction. As of June 30, 2009, we maintained \$0.7 million of warranty reserves for anticipated replacement costs of the parts sold to this customer.

Edgar Filing: NETLOGIC MICROSYSTEMS INC - Form 10-Q

We entered into a master purchase agreement with Cisco in November 2005 under which we provided Cisco and its contract manufacturers a warranty period of as much as five years (in the case of epidemic failure). The extended warranty period in the master purchase agreement with Cisco has not had a material impact on our results of operations or financial condition based on our warranty analysis, which included an evaluation of our historical warranty cost information and experience.

Table of Contents**11. Commitments and Contingencies**

The Company leases its facilities under non-cancelable operating leases, which contain renewal options and escalation clauses, and expires through 2011. The Company also acquires certain assets under software licenses.

Future minimum commitments under non-cancelable software licenses and operating leases agreements, which include common area maintenance charges as of June 30, 2009, were as follows (in thousands):

	Software licenses and other obligations	Operating Leases	Total
2009	\$ 1,993	\$ 505	\$ 2,498
2010	1,583	1,021	2,604
2011	1,139	516	1,655
2012 and thereafter			
	4,715	\$ 2,042	\$ 6,757
Less: Interest component		(145)	
Present value of minimum payments	4,570		
Less: Current portion		(3,425)	
Long-term portion of obligations	\$ 1,145		

Purchase Commitments

At June 30, 2009, we had approximately \$7.8 million in firm, non-cancelable and unconditional purchase commitments with suppliers.

Contingencies

From time to time we are party to claims and litigation proceedings arising in the normal course of business. Currently, we do not believe that there are any claims or litigation proceeds involving matters will result in the payment of monetary damages, net of any applicable insurance proceeds, that, in the aggregate, would be material in relation to our business, financial position, results of operations or cash flows. There can be no assurance, however, that any such matters will be resolved without costly litigation, in a manner that is not adverse to our business, financial position, results of operations or cash flows, or without requiring royalty payments in the future that may adversely impact gross margins.

Indemnities, Commitments and Guarantees

In the normal course of business, we have made certain indemnities, commitments and guarantees under which we may be required to make payments in relation to certain transactions. These include agreements to indemnify our customers with respect to liabilities associated with the infringement of other parties' technology based upon our products, obligation to indemnify our lessors under facility lease agreements, and obligation to indemnify our directors and officers to the maximum extent permitted under the laws of the state of Delaware. The duration of such indemnification obligations, commitments and guarantees varies and, in certain cases, is indefinite. We have not recorded any liability for any such indemnification obligations, commitments and guarantees in the accompanying balance sheets. We do, however, accrue for losses for any known contingent liability, including those that may arise from indemnification provisions, when future payment is estimable and probable.

Under master purchase agreements signed with Cisco in November 2005, we have agreed to indemnify Cisco for costs incurred in rectifying epidemic failures, up to the greater of (on a per claim basis) 25% of all amounts paid to us by Cisco during the preceding 12 months (approximately \$11.1 million at June 30, 2009) or \$9.0 million, plus replacement costs. If we are required to make payments under the indemnity, our operating results may be adversely affected.

Pending Acquisitions

Edgar Filing: NETLOGIC MICROSYSTEMS INC - Form 10-Q

See Note 15, *Pending Acquisition of RMI Corporation*, and Note 17, *Subsequent Events*, below for further discussion on commitments related to our pending acquisitions for RMI and the purchase of intellectual property and other assets related to the IDT NSE Acquisition.

Table of Contents**12. Comprehensive (Loss) Income**

Comprehensive (loss) income is defined as the change in equity of a business enterprise during a period from transactions and other events and circumstances from non-owner sources. The components of comprehensive income were as follows (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
Net (loss) income	\$ (2,156)	\$ 2,332	\$ (6,073)	\$ 3,459
Currency translation adjustments		(12)	53	(22)
Change in unrealized gain/loss on short term investments	(11)		(40)	
Comprehensive (loss) income	\$ (2,167)	\$ 2,320	\$ (6,060)	\$ 3,437

13. Related Party Transactions

We lease our headquarters facility in Mountain View, California from an affiliate of Berg & Berg Enterprises, LLC, which holds shares of our common stock. We made lease payments under this lease agreement of \$249,000 and \$161,000 for the three months ended June 30, 2009 and 2008, respectively, and \$496,000 and \$403,000 for the six months ended June 30, 2009 and 2008, respectively.

14. Operating Segments and Geographic Information

We operate as one operating and reportable segment and sell our products directly to customers in North America, Asia and Europe. Revenue percentages for the geographic regions reported below were based upon the customer headquarter locations. Following is a summary of the geographic information related to revenues for the three and six months ended June 30, 2009 and 2008 (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
Revenue:				
United States	29%	25%	31%	33%
Malaysia	31%	38%	30%	32%
China	24%	23%	22%	21%
Other	16%	14%	17%	14%
Total	100%	100%	100%	100%

The following table summarizes customers comprising 10% or more of our gross account receivable for the periods indicated:

	June 30, 2009	December 31, 2008
Wintec Industries Inc	39%	48%
Celestica Corporation	15%	15%
Sanmina Corporation	*	12%
Jabil Circuit Incorporated	*	11%

* Less than 10% of gross account receivable

Table of Contents

15. Pending Acquisition of RMI Corporation

On May 31, 2009, we entered into an Agreement and Plan of Merger Reorganization, or definitive agreement, with our wholly-owned subsidiary, Roadster Merger Corporation, and RMI Corporation, or RMI, a provider of high-performance and low-power multi-core, multi-threaded processors. Under the terms of the definitive agreement, we agreed to acquire RMI through the merger of Roadster Merger Corporation with and into RMI and to pay the RMI stockholders a combination of cash and shares of our common stock. The parties intend that the merger will constitute a tax-free reorganization for federal income tax purposes.

The merger agreement provides for NetLogic to pay cash to the holders of RMI common stock and to issue shares of our common stock to the holders of RMI preferred stock as merger consideration upon conversion of their RMI stock in the merger. A portion of the merger consideration is payable upon completion of the acquisition and another portion is payable, subject to the attainment of revenue milestones applicable to the acquired business, at the end of a twelve-month post-closing earn-out period. The value of the merger consideration to be paid at the closing date as specified in the merger agreement is equal to \$181.35 million plus \$2.0 million as an advance earn-out payment. The total number of shares of our common stock to be issued to the holders of RMI preferred stock at the closing date will be equal to the amount of calculated value that is allocable to the shares of RMI preferred stock divided by the applicable closing price of our common stock. The applicable closing price will generally be the same as the average closing price of our common stock for the 20-trading day period ending on the third trading day prior to the closing date, but it cannot be more than \$34.90 or less than \$26.97. The total amount of cash to be paid to the holders of RMI common stock at the closing date will be equal to the amount of calculated value that is allocable to the shares of RMI common stock under the merger agreement, plus the \$2 million advance earn-out credit referenced above. In calculating the amount of cash payable to the holders of RMI common stock, the collar does not limit the amount of cash they are paid. The size of the cash payment may therefore be greater than or less than the portion of the nominal value allocable to the RMI common stock.

The value of the maximum remaining earn-out consideration as specified in the merger agreement is \$68.0 million, which will be allocated, determined and paid in the same manner and kind as the merger consideration payable at the closing date but will be reduced by the advance earn-out credit paid to the holders of RMI common stock at the closing date, and may be reduced further by up to \$1 million for a special bonus payment to the chief executive officer of RMI in the circumstances specified in the merger agreement. The earn-out is based on the achievement of a specified revenue target for a 12-month period after the closing date.

One hundred percent of the shares of our common stock issued as merger consideration at the closing date will be subject to a lock-up for six months following the closing date, and 50% of the shares will be subject to a lock-up for one year following the closing date. Earn-out consideration will be paid within 90 days after the end of the 12-month earn-out measurement period.

On June 1, 2009, pursuant to the definitive agreement, we loaned \$15.0 million to RMI, who delivered to us a secured promissory note, or Note, due November 30, 2010 bearing interest at a 10% annual rate. The Note is secured by substantially all of RMI's assets, but repayment of the Note and our security interest have been subordinated to the loans and security interests of RMI's pre-existing institutional lenders. Based on information provided to us by RMI, the total principal amount of such senior loans at May 31, 2009 was approximately \$5.1 million. Repayment of the Note will be accelerated upon an event of default (as defined in the Note), which includes a termination of the definitive agreement by us as a result of certain breaches by RMI and Change of Control (as defined in the Note) of RMI. An RMI Change of Control includes a sale of all or substantially all of RMI's assets and an acquisition of capital stock representing at least 50% of the voting power of RMI (other than in connection with our acquisition of RMI under the definitive agreement). Upon a Change of Control, RMI is obligated to pay us \$5.0 million from the proceeds of such Change of Control in addition to all unpaid principal and accrued interest then due under the Note.

The \$15.0 million loan to RMI was recorded in other assets balance on the consolidated balance sheet as of June 30, 2009. We recorded interest income of \$125,000 for the three and six month period ended June 30, 2009.

16. Credit Facility

On June 19, 2009, we and our material subsidiaries entered into a credit agreement with a group of lenders led by Silicon Valley Bank to provide \$55 million of new credit facilities for a term of three years. The credit facilities consist of a \$25.0 million senior secured revolving credit facility and \$30.0 million of senior secured term loans. The credit agreement is secured by substantially all of our assets and the assets of our material subsidiaries. The credit facilities can be prepaid (in whole or in part) and terminated at any time without premium or penalty.

Any borrowings under the credit facility will, at our option, bear interest either at an annual rate equal to (a) the higher of the Silicon Valley Bank announced prime rate or the Federal Funds Effective Rate plus 0.50% plus a margin ranging from 0.50% to 1.75% based on the ratio of our reported total consolidated debt to our consolidated EBITDA, or (b) Eurodollar borrowings based on the applicable LIBOR interest period (with a LIBOR floor of 1.50%), plus a margin ranging from 3.00% to 4.00% based on the ratio of our reported total consolidated debt to our

Edgar Filing: NETLOGIC MICROSYSTEMS INC - Form 10-Q

consolidated EBITDA. The revolving credit facility has an unused line fee payable on the undrawn revolving credit facility amount set at a rate per annum ranging from 0.30% to 0.50% determined based on the ratio of our total consolidated debt to our consolidated EBITDA. There are no borrowings under the credit agreement as of June 30, 2009.

Edgar Filing: NETLOGIC MICROSYSTEMS INC - Form 10-Q

The senior secured credit facility includes several quarterly financial covenants and customary operating covenants, including the following:

a covenant requiring us to maintain the ratio of our total consolidated debt to our consolidated EBITDA within specified limits, specifically (for the four trailing quarters ended on the applicable date) 2.25:1 (through March 31, 2010), 2.00:1 (from June 30, 2010 through September 30, 2010) and 1.75:1 (thereafter);

a minimum fixed charge covenant regarding the ratio of our consolidated EBITDA less our capital expenditures to our consolidated interest expense and other fixed charges to be no less than 1.25:1 at quarter end;

a minimum consolidated quick ratio covenant regarding our consolidated cash and cash equivalents plus accounts receivable to our consolidated current liabilities to be no less than 1:1 at quarter end (beginning with the quarter ending December 31, 2009); and

a covenant requiring us and our subsidiaries to maintain at all times at least \$20 million of unencumbered cash and cash equivalents.

We are in compliance with the debt covenants under the credit agreement as of June 30, 2009.

Included in other assets as of June 30, 2009 are direct fees and expenses in connection with the credit line and term loans of approximately \$0.9 million.

17. Subsequent Events

On July 17, 2009, we completed the purchase of intellectual property and other assets relating to IDT's network search engine business for approximately \$100 million in cash, which included inventory valued at approximately \$10 million, subject to price adjustment based on a determination of the actual amount of inventory within 45 days after the closing, pursuant to an Asset Purchase Agreement dated April 30, 2009. The purchase consideration was partially funded by borrowings totaling \$37 million under the senior secured credit facility agreement.

As of June 30, 2009 our cash and cash equivalent balance was \$88.3 million. Subsequent to June 30, 2009, our cash and cash equivalent balance decreased as a result of the \$100 million purchase consideration paid on July 17, 2009 for the IDT NSE Acquisition, offset by \$37 million of borrowings under the credit facility to partially finance the acquisition.

Table of Contents**Item 2: Management's Discussion and Analysis of Financial Condition and Results of Operations**
Forward-looking Statements

This report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which include, without limitation, statements about the market for our technology, our strategy and competition. Such statements are based upon current expectations that involve risks and uncertainties. Any statements contained herein that are not statements of historical fact may be deemed forward-looking statements. For example, the words "believes", "anticipates", "plans", "expects", "intends" and similar expressions are intended to identify forward-looking statements. In addition, all the information under Item 3 below constitutes a forward-looking statement. Our actual results and the timing of certain events may differ significantly from the results discussed in the forward-looking statements. Factors that might cause such a discrepancy include, but are not limited to, those discussed in "Business", "Risk Factors", "Management's Discussion and Analysis of Financial Condition and Results of Operation" and "Qualitative and Quantitative Disclosures About Market Risk" in our Annual Report on Form 10-K filed with the Securities and Exchange Commission on March 4, 2009, under "Management's discussion and Analysis of Financial Condition and Results of Operations" and "Risk Factors" in our quarterly report filed with the Securities and Exchange Commission on May 5, 2009, under "Management's discussion and Analysis of Financial Condition and Results of Operations" and "Risk Factors" below, and under "Risk Factors" in the preliminary proxy statement filed by us on Schedule 14A with the Securities and Exchange Commission on July 24, 2009. All forward-looking statements in this document are based on information available to us as of the date of this report and we assume no obligation to update any such forward-looking statements. The following discussion should be read in conjunction with our condensed financial statements and the accompanying notes contained in this quarterly report, except as required by law. Unless expressly stated or the context otherwise requires, the terms "we", "our", "us" and "NetLogic Microsystems" refer to NetLogic Microsystems, Inc.

Overview

We are a semiconductor company that designs, develops and sells proprietary high-performance processors and high-speed integrated circuits that are used by original equipment manufacturers (OEMs) in routers, switches, wireless infrastructure equipment, network security appliances, datacenter servers, network access equipment and network storage devices to accelerate the delivery of voice, video, data and multimedia content for advanced enterprise, datacenter, communications and mobile wireless networks. Our knowledge-based processors, PLPs, and network search engine products are incorporated in systems used throughout multiple types of networks that comprise the global Internet infrastructure, including the enterprise, metro, access, edge and core networking markets, and are designed into systems offered by leading networking OEMs such as AlaxalA Networks Corporation, Alcatel-Lucent, ARRIS Group, Inc., Brocade Communication Systems, Inc., Cisco Systems, Inc., Huawei Technologies Co., Ltd., and Juniper Networks, Inc.

The products and technologies we have developed and acquired are targeted to enable our customers to develop systems that support the increasing speeds and complexity of the Internet infrastructure. We believe there is a growing need to include knowledge-based processors and high speed integrated circuits in a larger number of such systems as networks transition to all Internet Protocol (IP) packet processing at increasing speeds.

The equipment and systems that use our products are technically complex. As a result, the time from our initial customer engagement design activity to volume production can be lengthy and may require considerable support from our design engineering, research and development, sales, and marketing personnel in order to secure the engagement and commence product sales to the customer. Once the customer's equipment is in volume production, however, it generally has a life cycle of three to five years and requires less ongoing support.

In general, we recognize revenue from sales of our products upon shipment to our customers or our international stocking sales representatives. Usually, we sell the initial shipments of a product for a new design engagement directly to the OEM customer. Once the design enters volume production, the OEM frequently outsources its manufacturing to contract manufacturers who purchase the products directly from us.

As a fabless semiconductor company, our business is less capital intensive than others because we rely on third parties to manufacture, assemble, and test our products. In general, we do not anticipate making significant capital expenditures aside from business acquisitions that we might make from time to time. In the future, as we launch new products or expand our operations, however, we may require additional funds to procure product mask sets, order elevated quantities of wafers from our foundry partners, perform qualification testing and assemble and test those products.

Because we purchase all wafers from suppliers with fabrication facilities and outsource the assembly and testing to third party vendors, a significant portion of our costs of revenue consists of payments to third party vendors. We do not have long-term agreements with any of our suppliers and rely upon them to fulfill our orders.

Table of Contents

On October 24, 2007, we completed the acquisition of Aeluros, Inc (the Aeluros Acquisition). The acquisition was accounted for as a business combination during the fourth quarter of fiscal 2007. We paid \$57.0 million in cash upon the closing of the transaction in exchange for all of the outstanding equity securities of Aeluros. We reserved 104,770 shares of common stock for future issuance upon the exercise of unvested employee stock options of Aeluros that we assumed and are subject to continued employment vesting requirements. In addition, under the terms of the definitive agreement, we paid \$15.5 million cash in February 2009 based on the attainment of revenue performance milestones for the acquired business over the one year period following the close of the transaction.

On May 31, 2009, we entered into an Agreement and Plan of Merger Reorganization, or definitive agreement, with our wholly-owned subsidiary, Roadster Merger Corporation, and RMI Corporation, or RMI, a provider of high-performance and low-power multi-core, multi-threaded processors. Under the terms of the definitive agreement, we agreed to acquire RMI through the merger of Roadster Merger Corporation with and into RMI and to pay the RMI stockholders a combination of cash and shares of our common stock. The parties intend that the merger will constitute a tax-free reorganization for federal income tax purposes.

On July 17, 2009, we completed the acquisition of the network search engine business from Integrated Devices Technology, Inc (the IDT NSE Acquisition). The acquisition will be accounted for as a business combination during the third quarter of fiscal 2009. Upon the closing of the transaction, we paid \$100.0 million in cash, subject to a price adjustment based on a determination of the actual amount of inventory within 45 days after the closing pursuant to an Asset Purchase Agreement dated April 30, 2009.

Some of our challenges in fiscal 2009 include improving operating efficiencies in the light of continued challenging macroeconomic conditions, diversifying our product offerings, inventory management, integration of IDT NSE Acquisition, the completion of our pending acquisition of RMI Corporation pursuant to our merger agreement dated May 30, 2009, and thereafter the integration of RMI Corporation. We experienced consecutive declines in year-over-year quarterly revenue from \$36.5 million for our second quarter in 2008 to \$32.5 million in our second quarter in 2009, and \$34.1 million in our first quarter in 2008 to \$30.4 million for our first quarter in 2009 due to decreased demand for our products. We believe the decrease in demand was primarily due to macroeconomic conditions that decreased customer demand for our products. In response, we have focused on operating efficiencies and containing our cash operating expense growth. Our operating expenses grew by \$3.8 million from \$19.0 million in the first quarter of 2009 to \$22.8 million in the second quarter of 2009. Stock-based compensation accounted for \$1.7 million of the expense growth while acquisition-related costs, which includes transaction and integration related costs, accounted for \$1.3 million of the expense growth. While we expect to continue to remain focused on maintaining our operating expenses at an appropriate level relative to our revenue during this period of macroeconomic weakness, we expect to incur more acquisition-related costs for the remainder of 2009. The integration of RMI Corporation following its acquisition would add substantial integration costs and challenges requiring extensive management time and attention, which could detract from the operation and management of other parts of our business operations.

During the three and six months ended June 30, 2009, our top five customers accounted for approximately 72% and 70%, respectively, of total product revenue. Favorable market trends, such as the increasing number of 10 Gigabit ports as enterprises and datacenters upgrade their legacy networks to better accommodate the proliferation of video and virtualization applications, growth in the cable infrastructure area of our business, and the growing mobile wireless infrastructure and IPTV markets, have enabled us to broaden our customer base and increase demand for our knowledge-based processors and network search engines. Additionally, we have further diversified our customer and product revenues by expanding our product portfolio to address Layer 7 content processing with our NETL7 processor family, the Layer 1 physical layer with our 10 Gigabit Ethernet products, and entry level equipment with our NETLite processors.

As an integral part of our efforts to diversify our product and customer base, as well as strengthen our competitive positioning, and broaden our technology portfolio and research and development capabilities, we have entered into strategic acquisitions of products and technology, including the acquisition of the TCAM2 products and Sahasra algorithmic technology from Cypress and the acquisition of Aeluros and its PLP products.

Cisco and its contract manufacturers have accounted for a large percentage of our historical revenue, although the percentage of our overall revenue attributable to Cisco and its contract manufacturers declined for 2008 and the first six months of 2009. At Cisco's request, in 2007, we transitioned into a just-in-time inventory arrangement covering substantially all of our product shipments to Cisco and its contract manufacturers. Pursuant to this arrangement we deliver products to Wintec Industries (Wintec) based on orders they place with us, but we do not recognize product revenue unless and until Wintec reports that it has delivered the product to Cisco or its contract manufacturer to incorporate into its end products. Given this arrangement, unless Cisco or its contract manufacturers take possession of our products from Wintec in accordance with the schedules provided to us, our predicted future revenue stream could vary substantially from our forecasts, and our results of operations could be materially and adversely affected. Additionally, because we own the inventory physically located at Wintec until it is shipped to Cisco and its contract manufacturers, our ability to effectively manage inventory levels may be impaired, causing our total inventory levels to increase. This, in turn, could increase our expenses associated with excess and obsolete product and negatively impact our cash flows. During the three and six months ended June 30, 2009, our revenues from Cisco and Cisco's contract manufactures were \$11.1 million and \$20.8 million, or approximately 34% and 33% of total revenue.

Critical Accounting Policies and Estimates

The preparation of our condensed unaudited financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We base these estimates and assumptions on historical experience and evaluate them on an on-going basis to help ensure they remain reasonable under current conditions. Actual results could differ from those estimates. There were no changes to our critical accounting policies and estimates discussed in our 2008 Annual Report on Form 10-K.

Table of Contents**Results of Operations****Comparison of Three Months Ended June 30, 2009 with Three Months Ended June 30, 2008****Revenue, cost of revenue and gross profit**

The table below sets forth data concerning the fluctuations in our revenue, cost of revenue and gross profit data for the three months ended June 30, 2009 and the three months ended June 30, 2008 (in thousands, except percentage data):

	Three Months ended June 30, 2009		Three Months ended June 30, 2008		Year-to-Year Change	Percentage Change
		Percentage of Revenue		Percentage of Revenue		
Revenue	\$ 32,485	100.0%	\$ 36,543	100.0%	\$ (4,058)	-11.1%
Cost of revenue	13,987	43.1%	15,982	43.7%	(1,995)	-12.5%
Gross profits	\$ 18,498	56.9%	\$ 20,561	56.3%	\$ (2,063)	-10.0%

Revenue. Revenue for the three months ended June 30, 2009 decreased by \$4.1 million compared with the three months ended June 30, 2008. Revenue from sales to Wintec, Cisco and Cisco's contract manufacturers (collectively Cisco) represented \$11.1 million of our total revenue for the three months ended June 30, 2009, compared with \$16.3 million during the three months ended June 30, 2008. The decrease in sales to Cisco was primarily due to a decrease of \$4.5 million in revenue from sales of our NL5000, and network search engine products, although this decline was offset by increased revenue of our new products to Cisco, including NL6000 and NL7000 products which increased \$0.6 million. Revenue from non-Cisco customers represented \$21.4 million of total revenue for the three months ended June 30, 2009 compared with \$20.3 million in the same quarter of the prior year. During the three months ended June 30, 2009 and 2008, Alcatel Lucent and Huawei accounted for 16% and 8%, and 10% and 8%, respectively, of our total revenue. Notwithstanding these increases, in the second quarter of 2009, we recorded an overall decrease in sales to other non-Cisco customers, reflecting an overall softening of customer demand in light of recently deteriorating macroeconomic conditions.

Cost of Revenue/Gross Profit/Gross Margin. Cost of revenue for the three months ended June 30, 2009 decreased by \$2.0 million compared with that of the three months ended June 30, 2008. Cost of revenue decreased primarily due to a decrease in product sales. Cost of revenue for the three months ended June 30, 2009 and 2008 included \$3.0 million and \$3.0 million, respectively, of amortization of intangible assets expense, and \$0.8 million and \$0.1 million of a provision for excess and obsolete inventory.

Table of Contents**Operating expenses**

The table below sets forth operating expense data for the three months ended June 30, 2009 and the three months ended June 30, 2008 (in thousands, except percentage data):

	Three Months ended June 30, 2009		Three Months ended June 30, 2008		Year-to-Year Change	Percentage Change
		Percentage of Revenue		Percentage of Revenue		
Operating expenses:						
Research and development	\$ 14,136	43.5%	\$ 12,357	33.8%	\$ 1,779	14.4%
Selling, general and administrative	7,358	22.7%	6,245	17.1%	1,113	17.8%
Acquisition-related costs	1,335	4.1%			1,335	
Total operating expenses	\$ 22,829	70.3%	\$ 18,602	50.9%	\$ 4,227	22.7%

Research and Development Expenses. Research and development expenses increased for the three months ended June 30, 2009 compared with the same period in 2008 primarily due to increases in payroll and payroll related expenses of \$0.7 million, software licenses expenses of \$0.4 million, and stock-based compensation expenses of \$1.7 million, offset by decreases in product development and qualification expenses of \$0.4 million, and consulting and outside vendor expenses of \$0.4 million. The increase in payroll and payroll related expenses and stock-based compensation expenses resulted primarily due to increases in engineering headcount to support our new product development efforts. The increase in software license expenses was primarily due to amortization expense for our software licenses used for our internal research and development projects. The decrease in product development and qualification expense was primarily due to the production qualification and characterization of our processors. Product development and qualifications costs vary from period to period depending on the timing of development and tape-out of various products. The remainder of the increase in research and development expenses was caused by individually minor items.

Selling, General and Administrative Expenses. Selling, general and administrative expenses increased by \$1.1 million during the three months ended June 30, 2009, compared with the same period in 2008, primarily due to increases in payroll and payroll related expenses of \$0.3 million, stock-based compensation of \$1.2 million, offset by decreases in commission expenses of \$0.2 million. The increase in payroll and payroll related expenses and stock-based compensation expenses resulted primarily from increased headcount to support our growing operations in the sales and marketing areas. The decrease in commission expense was primarily a result of our decrease in revenue. Selling, general and administrative expenses also included \$0.3 million of amortization expense for the customer relationship intangible asset in the three months ended June 30, 2009 and 2008. The remainder of the fluctuation in selling, general and administrative expenses was caused by individually minor items.

Acquisition-Related Costs. Acquisition-related costs were \$1.3 million during the three months ended June 30, 2009 primarily due to legal fees of \$1.2 million related to our acquisitions of RMI and IDT NSE.

Other items

The table below sets forth other data for the three months ended June 30, 2009 and the three months ended June 30, 2008 (in thousands, except percentage data):

	Three Months ended June 30, 2009		Three Months ended June 30, 2008		Year-to-Year Change	Percentage Change
		Percentage of Revenue		Percentage of Revenue		
Other income, net:						
Interest income	\$ 262	0.8%	\$ 356	1.0%	\$ (94)	-26.4%

Edgar Filing: NETLOGIC MICROSYSTEMS INC - Form 10-Q

Other income (expense), net	(16)	0.0%	(98)	-0.3%	82	-83.7%
Total interest and other income, net	\$ 246	0.8%	\$ 258	0.7%	\$ (12)	-4.7%

Interest and Other Income (Expenses), Net. Interest and other income decreased by \$12,000 for the three months ended June 30, 2009 compared with the three months ended June 30, 2008 primarily due to lower market yields for our investments, and offset by the interest income related to the loan to RMI. Our cash, cash equivalents and short-term investments balance increased from \$73.7 million at June 30, 2008 to \$88.3 million at June 30, 2009.

	Three Months ended June 30, 2009	Percentage of Revenue	Three Months ended June 30, 2008	Percentage of Revenue	Year-to-Year Change	Percentage Change
Benefit from income taxes	\$ (1,929)	-5.9%	\$ (115)	-0.3%	\$ (1,814)	1577.4%

Benefit from Income Taxes. During the three months ended June 30, 2009, we recorded an income tax benefit of \$1.9 million. The effective tax rate for the three months ended June 30, 2009 was primarily driven by a rate differential for book income generated in foreign jurisdictions and book losses generated in the United States.

Table of Contents**Comparison of Six Months Ended June 30, 2009 with Six Months Ended June 30, 2008****Revenue, cost of revenue and gross profit**

The table below sets forth data concerning the fluctuations in our revenue, cost of revenue and gross profit data for the six months ended June 30, 2009 and the six months ended June 30, 2008 (in thousands, except percentage data):

	Six Months ended June 30, 2009		Six Months ended June 30, 2008		Year-to-Year Change	Percentage Change
	Revenue	Percentage of Revenue	Revenue	Percentage of Revenue		
Revenue	\$ 62,851	100.0%	\$ 70,723	100.0%	\$ (7,872)	-11.1%
Cost of revenue	27,531	43.8%	31,365	44.3%	(3,834)	-12.2%
Gross profits	\$ 35,320	56.2%	\$ 39,358	55.7%	\$ (4,038)	-10.3%

Revenue. Revenue for the six months ended June 30, 2009 decreased by \$7.9 million compared with the six months ended June 30, 2008. Revenue from sales to Wintec, Cisco and Cisco's contract manufacturers (collectively Cisco) represented \$20.8 million of our total revenue for the six months ended June 30, 2009 compared with \$29.0 million during the six months ended June 30, 2008. The decrease in sales to Cisco was primarily due to a decrease of \$9.2 million in revenue from sales of our NL5000 and network search engine products, although this decline was partially offset by increased revenue of our new products to Cisco, including NL7000 and NL8000 products which increased \$0.9 million. Revenue from non-Cisco customers represented \$42.1 million of total revenue for the six months ended June 30, 2009 compared with \$41.7 million in the same quarter of the prior year. During the six months ended June 30, 2009 and 2008, Alcatel Lucent and Huawei accounted for 16% and 9%, and 12% and 7%, respectively, of our total revenue. Notwithstanding these increases, in the second quarter of 2009, we recorded an overall decrease in sales to other non-Cisco customers, reflecting an overall softening of customer demand in light of recently deteriorating macroeconomic conditions.

Cost of Revenue/Gross Profit/Gross Margin. Cost of revenue for the six months ended June 30, 2009 decreased by \$3.8 million compared with that of the six months ended June 30, 2008. Cost of revenue decreased primarily due to a decrease in product sales. Cost of revenue for the six months ended June 30, 2009 and 2008 included \$6.0 million and \$6.0 million, respectively, of amortization of intangible assets expense, and \$1.1 million and \$0.6 million of a provision for excess and obsolete inventory.

Table of Contents**Operating expenses**

The table below sets forth operating expense data for the six months ended June 30, 2009 and the six months ended June 30, 2008 (in thousands, except percentage data):

	Six Months ended June 30, 2009		Six Months ended June 30, 2008		Year-to-Year Change	Percentage Change
		Percentage of Revenue		Percentage of Revenue		
Operating expenses:						
Research and development	\$ 26,334	41.9%	\$ 24,563	34.7%	\$ 1,770	7.2%
Selling, general and administrative	14,172	22.6%	12,709	18.0%	1,464	11.5%
Acquisition-related costs	1,335	2.1%			1,335	
Total operating expenses	\$ 41,841	66.6%	\$ 37,272	52.7%	\$ 4,569	12.3%

Research and Development Expenses. Research and development expenses increased for the six months ended June 30, 2009 compared with the same period in 2008 primarily due to increases in payroll and payroll related expenses of \$1.4 million, software licenses expenses of \$0.7 million, and stock-based compensation expenses of \$1.8 million, offset by decreases in product development and qualification expenses of \$1.1 million, travel expenses of \$0.3 million and consulting and outside vendor expenses of \$0.6 million. The increases in payroll and payroll related expenses and stock-based compensation expenses were primarily due to increases in engineering headcount to support our new product development efforts. The increase in software license expenses was primarily due to amortization of software licenses used for our internal research and development projects. The decrease in product development and qualification expense was primarily due to the production qualification and characterization of our processors. Product development and qualifications costs vary from period to period depending on the timing of development and tape-out of various products. The remainder of the increase in research and development expenses was caused by individually minor items.

Selling, General and Administrative Expenses. Selling, general and administrative expenses increased by \$1.5 million during the six months ended June 30, 2009, compared with the same period in 2008, primarily due to increases in payroll and payroll related expenses of \$0.6 million, stock-based compensation of \$1.8 million, offset by decreases in commission expenses of \$0.4 million, other professional service expenses of \$0.2 million and legal fee expenses of \$0.1 million. The increase in payroll and payroll related expenses and stock-based compensation expenses resulted primarily from increased headcount to support our growing operations in the sales and marketing areas. The decrease in commission expense was primarily a result of our decrease in revenue. Selling, general and administrative expenses also included \$0.7 million of amortization expense for the customer relationship intangible asset in the six months ended June 30, 2009 and 2008. The remainder of the fluctuation in selling, general and administrative expenses was caused by individually minor items.

Acquisition-Related Costs. Acquisition-related costs were \$1.3 million during the six months ended June 30, 2009 primarily due to legal fees of \$1.2 million related to our acquisitions of RMI and IDT NSE.

Other items

The table below sets forth other data for the six months ended June 30, 2009 and the six months ended June 30, 2008 (in thousands, except percentage data):

	Six Months ended June 30, 2009		Six Months ended June 30, 2008		Year-to-Year Change	Percentage Change
		Percentage of Revenue		Percentage of Revenue		
Other income, net:						
Interest income	\$ 443	0.7%	\$ 839	1.2%	\$ (396)	-47.2%

Edgar Filing: NETLOGIC MICROSYSTEMS INC - Form 10-Q

Other income (expense), net	(24)	0.0%	(94)	-0.1%	70	-74.5%
Total interest and other income, net	\$ 419	0.7%	\$ 745	1.1%	\$ (326)	-43.8%

Interest and Other Income (Expenses), Net. Interest and other income decreased by \$0.4 million for the six months ended June 30, 2009 compared with the six months ended June 30, 2008 primarily due to lower market yields for our investments, and offset by the interest income related to the loan to RMI. Our cash, cash equivalents and short-term investments balance increased from \$73.7 million at June 30, 2008 to \$88.3 million at June 30, 2009.

	Six Months ended June 30, 2009	Percentage of Revenue	Six Months ended June 30, 2008	Percentage of Revenue	Year-to-Year Change	Percentage Change
Benefit from income taxes	\$ (29)	0.0%	\$ (628)	-0.9%	\$ 599	-95.4%

Benefit from Income Taxes. During the six months ended June 30, 2009, we recorded an income tax benefit of \$29,000. We established a valuation allowance of \$3.0 million for tax credits that are unlikely to be utilized in California in light of a legislative change enacted in February 2009 which affected the rules on state income apportionment for tax years beginning in 2011. Excluding the aforementioned, our effective tax rate for the six months ended June 30, 2009 was primarily driven by a rate differential for book income generated in foreign jurisdictions and book losses generated in the United States.

Table of Contents

Liquidity and Capital Resources: Changes in Financial Condition

Our principal sources of liquidity are our cash and cash equivalents and our senior secured credit facility of \$55 million with a group of banks executed in June 2009. As of June 30, 2009 our cash and cash equivalent balance was \$88.3 million. Subsequent to June 30, 2009, our cash and cash equivalent balance decreased as a result of the \$100 million purchase consideration paid on July 17, 2009 for the IDT NSE Acquisition, offset by \$37 million of borrowings under the credit facility to partially finance the acquisition.

We expect substantial cash outflow requirements in connection with our mergers and acquisitions:

In connection with our merger agreement dated May 31, 2009 with RMI Corporation (RMI), we provided a bridge loan of \$15 million to RMI. Additionally, the merger agreement requires us to pay the merger consideration due to holders of RMI common stock in cash. In addition to an initial merger consideration which is payable at closing, the earn-out portion of the merger consideration, which will be payable upon the achievement of revenue targets for a twelve month period following closing, is dependent in part on the average closing price of our common stock as defined in the agreement. We expect to complete the acquisition of RMI during the quarter ended September 30, 2009.

On July 17, 2009, we paid \$100 million as purchase consideration for the network search engine business (NSE) of Integrated Device Technology, Inc. (IDT). The purchase consideration was partially financed by \$37 million of borrowings under the senior secured credit facility.

We have incurred and may continue to incur significant cash outflow related to transaction costs and integration expenses in connection with the acquisition of RMI, IDT NSE and any other acquisitions.

Under the senior secured credit facility, we are required to satisfy certain financial ratio and other covenants such as:

a covenant requiring us to maintain the ratio of our total consolidated debt to our consolidated EBITDA within specified limits, specifically (for the four trailing quarters ended on the applicable date) 2.25:1 (through March 31, 2010), 2.00:1 (from June 30, 2010 through September 30, 2010) and 1.75:1 (thereafter);

a minimum fixed charge covenant requiring the ratio of our consolidated EBITDA less our capital expenditures to our consolidated interest expense and other fixed charges to be no less than 1.25:1 at quarter end;

a minimum consolidated quick ratio covenant requiring our consolidated cash and cash equivalents plus accounts receivable to our consolidated current liabilities to be no less than 1:1 at quarter end (beginning with the quarter ending December 31, 2009); and

a covenant requiring us and our subsidiaries to maintain at all times at least \$20 million of unencumbered cash and cash equivalents.

We are in compliance with the debt covenants under the credit agreement as of June 30, 2009.

The Company's cash and cash equivalents are invested with financial institutions in deposits that, at times, may exceed federally insured limits. The Company had not experienced any losses on its deposits of cash and cash equivalents as of June 30, 2009. However, we believe that the capital and credit markets have been experiencing unprecedented levels of volatility and disruption and that recent U.S. sub-prime mortgage defaults have had a significant impact across various sectors of the financial markets, causing global credit and liquidity issues. We can provide no assurance that our cash and cash equivalents will not be adversely affected by these matters in the future.

Edgar Filing: NETLOGIC MICROSYSTEMS INC - Form 10-Q

The table below sets forth the key components of cash flow for the six months ended June 30, 2009 and 2008 (in thousands):

	Six Months Ended June 30,	
	2009	2008
Net cash provided by operating activities	\$ 19,659	\$ 20,193
Net cash used in investing activities	\$ (17,913)	\$ (601)
Net cash provided by financing activities	\$ 3,043	\$ 3,419

Cash Flows during the Six Months Ended June 30, 2009

Our net cash provided by operating activities was \$19.7 million for the six months ended June 30, 2009, which primarily consisted of \$6.1 million of net loss, \$23.4 million of non-cash operating expenses and \$2.5 million in changes in operating assets and liabilities. Non-cash operating expenses for the six months ended June 30, 2009, included stock-based compensation of \$10.3 million, depreciation and amortization of \$8.6 million, deferred income taxes, net of \$3.4 million, and provision for inventory reserves of \$1.1 million. Changes in operating assets and liabilities were primarily driven by a decrease in deferred margin of \$1.1 million, inventory of \$2.9 million due to a decrease in product sales, offset by an increase in prepaid and other current assets of \$5.1 million, accounts payable and accrued liabilities of \$4.7 million and other long-term liabilities of \$0.6 million.

Our net cash used in investing activities was \$17.9 million for the six months ended June 30, 2009, of which we used \$15.5 million for the payment of Aeluros post-acquisition revenue milestone, \$15.0 million for the loan to RMI, \$14.6 million for the purchase of short-term investments, and \$0.5 million to purchase property and equipment offset by \$27.7 million of sales and maturities of short-term investments. We expect to make capital expenditures of approximately \$0.7 million primarily for design tools during the remainder of 2009, to support product development activities. We will use our cash and cash equivalents to fund these expenditures.

Our net cash provided by financing activities was \$3.0 million for the six months ended June 30, 2009, primarily from proceeds of stock option exercises of \$4.9 million, offset by payments of debt issuance costs of \$0.8 million, prepayments of software licenses and other obligations of \$0.5 million and shares withheld for employee taxes of \$0.6 million.

Table of Contents**Cash Flows during the Six Months Ended June 30, 2008**

Our net cash provided by operating activities was \$20.2 million for the three months ended June 30, 2008, which resulted primarily from net income of \$3.5 million adjusted for non-cash reconciling items of approximately \$16.2 million, related to depreciation and amortization expenses of \$8.5 million, stock-based compensation expenses of \$7.0 million, and a provision for inventory reserves of \$0.6 million. Net cash provided by operating activities was adversely affected by net changes in assets and liabilities of \$0.5 million, primarily consist of increases in inventory of \$2.0 million and deferred margin of \$1.8 million on higher product sales, an increase in accounts payable of \$3.1 million and a decrease in accrued liabilities of \$1.7 million. We used \$0.6 million to purchase computer equipment and research and development design tools to support our on-going R&D projects. We expect to use our cash on hand for capital expenditures of approximately \$2.2 million primarily for design tools during the remainder of 2008 to support product development activities.

Our net cash provided by financing activities was \$3.4 million for the six months ended June 30, 2008, as \$5.7 million of proceeds of stock option exercises were partially offset by \$2.3 million of payments of software licenses and other obligations.

Capital Resources

We believe that our existing cash and cash equivalents balance of \$88.3 million as of June 30, 2009 and our senior secured credit facility of \$55 million will be sufficient to meet our anticipated cash needs for at least the next 12 months. Our anticipated cash needs in the next twelve months include the purchase consideration payment to IDT, the potential payments to holders of RMI common stock and significant acquisition and integration costs.

Although in recent years we have generated sufficient net cash from operations to meet our capital requirements, we will be substantially larger with greater operating cash needs as a result of the acquisition of IDT NSE and, RMI Corporation at such time as we complete our acquisition of it. Our future cash needs will depend on many factors, including the amount of revenue we generate, the timing and extent of spending to support product development efforts, the expansion of sales and marketing activities, the timing of introductions of new products, the costs to ensure access to adequate manufacturing capacity, and the continuing market acceptance of our products, and any future business acquisitions that we might undertake. We may seek additional funding through public or private equity or debt financing. However, additional funding will be constrained by the terms and covenants under our senior secured credit facility and may not be available on terms acceptable to us or at all. We also might decide to raise additional capital at such times and upon such terms as management considers favorable and in the interests of the Company, including, but not limited to, from the sale of our debt and/or equity securities (before reductions for expenses, underwriting discounts and commissions) under our shelf registration statement.

Contractual Obligations

Our principal commitments as of June 30, 2009 consisted of operating lease obligation payments, wafer purchases, and payments on software licenses and other obligations, which are summarized below (in thousands):

	Total	Less than 1 year	1 - 3 years	4 - 5 years	After 5 years
Operating lease obligations	\$ 2,042	\$ 1,010	\$ 1,032	\$	\$
Software license obligations	4,570	3,425	1,145		
Wafer purchases	7,803	7,803			
Total	\$ 14,415	\$ 12,238	\$ 2,177	\$	\$

In addition to the enforceable and legally binding obligations quantified in the table above, we have other obligations for goods and services entered into in the normal course of business. These obligations, however, are either not enforceable or legally binding, or are subject to change based on our business decisions.

On July 17, 2009, we completed the purchase of intellectual property and other assets relating to IDT's network search engine business for approximately \$100 million in cash, which included inventory valued at approximately \$10 million, subject to price adjustment based on a determination of the actual amount of inventory within 45 days after the closing, pursuant to an Asset Purchase Agreement dated April 30, 2009. The purchase consideration was partially funded by borrowings totaling \$37 million under the senior secured credit facility agreement.

Table of Contents

Item 3: Quantitative and Qualitative Disclosures About Market Risk

The primary objective of our investment activities is to preserve principal while maximizing the income we receive from our investments without significantly increasing the risk of loss. Some of the investable securities permitted under our cash management policy may be subject to market risk for changes in interest rates. To mitigate this risk, we plan to maintain a portfolio of cash equivalent and short-term investments in a variety of securities which may include investment grade commercial paper, money market funds, government debt issued by the United States of America, state debt, certificates of deposit and investment grade corporate debt. Presently, we are exposed to minimal market risks associated with interest rate changes. We manage the sensitivity of our results of operations to these risks by maintaining investment grade short-term investments. Our cash management policy does not allow us to purchase or hold derivative or commodity instruments or other financial instruments for trading purposes. Additionally, our policy stipulates that we periodically monitor our investments for adverse material holdings related to the underlying financial solvency of the issuer. As of June 30, 2009, our investments consisted primarily of money market funds. Our results of operations and financial condition would not be significantly impacted by either a 10% increase or decrease in interest rates due mainly to the short-term nature of our investment portfolio.

Our sales outside the United States are transacted in U.S. dollars; accordingly our sales are not generally affected by foreign currency rate changes. Our operating expenses are denominated primarily in U.S. Dollars, except for expenses incurred by our wholly owned subsidiaries, which are denominated in the local currency. To date, fluctuations in foreign currency exchange rates have not had a material impact on our results of operations.

Item 4: Controls and Procedures

Our management evaluated, with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures as of June 30, 2009. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of June 30, 2009 to ensure that information we are required to disclose in reports that we file or submit under the Securities Exchange Act of 1934, as amended, is (i) recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms, and (ii) accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. During our last fiscal quarter, there were no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1A: Risk Factors

We face many significant risks in our business, some of which are unknown to us and not presently foreseen. These risks could have a material adverse impact on our business, financial condition and results of operations in the future. We have disclosed a number of material risks under Item 1A of our annual report on Form 10-K for the year ended December 31, 2008, which we filed with the Securities and Exchange Commission on March 4, 2009 and under Management's Discussion and Analysis of Financial Condition and Results of Operations and Risk Factors in our quarterly report filed with the Securities and Exchange Commission on May 5, 2009. The following discussion is of material changes to risk factors disclosed in that report. The following discussion is of material changes to risk factors disclosed in that report.

Because we rely on a small number of customers for a significant portion of our total revenue, the loss of, or a significant reduction in, orders for our products from these customers would negatively affect our total revenue and business.

To date, we have been dependent upon orders for sales of knowledge-based processors to a limited number of customers, and, in particular, Cisco, for most of our total revenue. During the six months ended June 30, 2009 and 2008, Cisco and its contract manufacturers accounted for 33% and 45% of our total revenue, respectively. We expect that our future financial performance will continue to depend in large part upon our relationship with Cisco and several other networking OEMs.

We cannot assure you that existing or potential customers will not develop their own solutions, purchase competitive products or acquire companies that use alternative methods in their systems. We do not have long-term purchase commitments from any of our OEM customers or their contract manufacturers. Although we entered into master purchase agreements with Cisco, one of Cisco's foreign affiliates and a Cisco purchasing agent, these agreements do not include any long-term purchase commitments. Cisco and our other customers do business with us currently only on the basis of short term purchase orders (subject, in the case of Cisco, to the terms of the master purchase agreements), which often are cancelable prior to shipment. The loss of orders for our knowledge-based processors for Cisco products or products of other major users of our knowledge-based processors would have a significant negative impact on our business.

Cash expenditures and capital commitments associated with our proposed acquisition of RMI and other recent acquisitions may create significant liquidity and cash flow risks for us, and we may incur substantial debt in order to satisfy our obligations.

Our principal sources of liquidity are our cash and cash equivalents and our credit facility of \$55 million with a group of banks executed in June 2009. As of June 30, 2009, our adjusted cash and cash equivalent balance totaled \$25.3 million, after accounting for the \$100 million purchase consideration paid on July 17, 2009 for the network search engine assets of Integrated Device Technology, Inc. and the \$37 million borrowings under the credit facility to partially finance the acquisition. The cash expenditures required in connection with the RMI acquisition will be substantial. The merger agreement requires us to pay cash to holders of RMI common stock as part of the merger consideration payable at closing and, if applicable, the earn-out portion of the merger consideration, which amounts will increase as the average closing price of our common stock increases and could be substantial under some circumstances. We have also loaned approximately \$15.0 million to RMI as a short-term bridge loan to allow RMI to meet its working capital needs and fund its operations in the ordinary course of business. In addition, we have also incurred and may continue to incur significant transaction expenses in connection with the IDT NSE Acquisition, the RMI acquisition and other transactions.

Under the senior secured credit facility, we are required to satisfy certain financial ratio and other covenants such as:

a covenant requiring us to maintain the ratio of our total consolidated debt to our consolidated EBITDA within specified limits, specifically (for the four trailing quarters ended on the applicable date) 2.25:1 (through March 31, 2010), 2.00:1 (from June 30, 2010 through September 30, 2010) and 1.75:1 (thereafter);

a minimum fixed charge covenant requiring the ratio of our consolidated EBITDA less our capital expenditures to our consolidated interest expense and other fixed charges to be no less than 1.25:1 at quarter end;

Edgar Filing: NETLOGIC MICROSYSTEMS INC - Form 10-Q

a minimum consolidated quick ratio covenant requiring our consolidated cash and cash equivalents plus accounts receivable to our consolidated current liabilities to be no less than 1:1 at quarter end (beginning with the quarter ending December 31, 2009); and

a covenant requiring us and our subsidiaries to maintain at all times at least \$20 million of unencumbered cash and cash equivalents.

Violation of those covenants would place us in default, so we must manage our financial condition carefully. Although in recent years we have generated sufficient net cash from our operations to meet our capital requirements, we will be substantially larger with greater operating cash needs as a result of the RMI acquisition. If actual results fail to meet our expectations regarding the revenues and expenses of these acquired businesses, our historical cash flows may not be sufficient to meet our capital requirements. If additional funding is required for operations, to cure loan defaults or for other purposes, we may attempt to seek funds from time to time through public or private equity or debt financing, although additional funds may not be available on terms acceptable to us or at all. We may also decide to raise additional capital at such times and upon such terms as management considers favorable and in our interests, and we have a \$150 million shelf registration statement which we might use for this purpose. Under the terms of the merger agreement, however, we have agreed to limit the total amount of capital raised through equity financings prior to the closing of the merger to \$50.0 million. Any such additional capital-raising transactions would be likely to further dilute the interests of our stockholders, as described below.

Our business and prospects may have been adversely impacted by the announcement of the proposed acquisition of RMI and the uncertainty regarding our business pending the completion of the acquisition.

The negotiation and announcement of our proposed acquisition of RMI, the focus of our management on satisfying the conditions to the closing of the acquisition and the uncertainty regarding our business pending completion of the acquisition may have a number of negative affects on our business, including the following:

our management may be diverted from day-to-day business operations, possibly leading to a loss of revenues and market position;

our current and potential customers may delay or cancel purchasing decisions in response to the announcement of the proposed acquisition, resulting in a material decline in our revenues;

our business partners, including OEMs, distributors and suppliers, may adversely change or terminate their relationships with us in response to the announcement of the proposed acquisition; and

our employees may experience uncertainty about their future role with us, harming our ability to attract and retain key management, sales and technical personnel.

Our proposed acquisition of RMI may not be completed.

The consummation of our proposed acquisition of RMI is subject to a number of conditions under the merger agreement which must be satisfied or waived at or prior to the closing. For example, the respective obligations of both NetLogic and RMI to consummate the acquisition are subject to the satisfaction (or waiver) of the following conditions, among others:

the completion of a definitive proxy statement to send to our stockholders for approval of the shares of our common stock to be issued in connection with the merger that is subject to review by the Securities and Exchange Commission, which review process is of uncertain duration;

the merger agreement shall have been approved and adopted by the requisite vote of the stockholders of RMI, and our stockholders shall have approved the issuance of the shares of our common stock to be issued in connection with the merger; and

Edgar Filing: NETLOGIC MICROSYSTEMS INC - Form 10-Q

no temporary restraining order, preliminary or permanent injunction or other order or judgment preventing the consummation of the merger shall have been issued by any court of competent jurisdiction and remain in effect.

NetLogic's obligation to consummate the acquisition is subject to the satisfaction (or waiver) of the following additional conditions, among others:

that, subject to certain exceptions, the representations and warranties of RMI contained in the merger agreement shall be true, complete and correct on the date of the merger agreement and as of the effective time of the merger, and that RMI shall have performed and shall not have materially breached its covenants under the merger agreement required to be performed and complied with as of the effective time;

that no material adverse change affecting RMI or its ability to complete the acquisition shall have occurred since the date of the merger agreement;

that RMI shall have obtained the approval of the holders of at least 75% of its capital stock with respect to the merger agreement and the merger, including the approval of the holders of at least 80% of its preferred stock and the holders of at least a majority of its common stock;

that holders of no more than 5% of RMI's preferred stock and 30% of its common stock shall have exercised appraisal rights under Delaware law;

that a specified group of key RMI employees and at least 75% of all other RMI employees to whom we or the surviving corporation shall have extended offers of employment shall have agreed to accept such offers of employment; and

that all outstanding options and warrants to purchase shares of RMI stock shall have been terminated.

Table of Contents

RMI's obligation to consummate the acquisition is subject to the satisfaction (or waiver) of the following additional conditions, among others:

that, subject to certain exceptions, our representations and warranties contained in the merger agreement shall be true, complete and correct on the date of the merger agreement and on and as of the effective time of the merger, and that we shall have performed and shall not have materially breached our covenants under the merger agreement that are required to be performed or complied with as of the effective time;

that no material adverse change affecting NetLogic or our ability to complete the acquisition shall have occurred since the date of the merger agreement;

that the shares of our common stock to be issued in the acquisition shall have been approved for listing on the Nasdaq Global Market or such exchange as our common stock may then be listed; and

that RMI shall have received a written opinion from its counsel Pillsbury Winthrop Shaw Pittman LLP, counsel to RMI, to the effect that the merger will be treated for federal income tax purposes as a reorganization within the meaning of Section 368(a) of the IRS code.

If the merger agreement is terminated, the acquisition will not be completed. The merger agreement may be terminated under certain circumstances, including the following:

by mutual written consent duly authorized by the boards of directors of NetLogic and RMI;

by either RMI or us if the merger shall not have been consummated by October 31, 2009, unless the action, or failure to act, of the terminating party has been a principal cause of the failure of the merger to occur and constitutes a breach of the merger agreement;

by either RMI or us if a governmental authority shall have issued or enacted any legal requirement or taken any other final and nonappealable action that has the effect of permanently prohibiting the acquisition;

by either RMI or us, upon a breach of any representation, warranty, covenant or agreement set forth in the merger agreement by the other party, subject to a cure period in some circumstances;

by us, if material adverse change affecting RMI shall have occurred, or we first become aware of such a material adverse effect, after the date of the merger agreement; or

by RMI, if our board of directors fails to include our board of directors' recommendation to adopt and approve the matters set forth in this proxy statement or changes its recommendation.

If our proposed acquisition of RMI is not completed on a timely basis or at all, our business, financial condition and results of operations may be harmed and the market price of our common stock may be adversely impacted.

If the conditions to closing described above are not satisfied or waived in a timely manner and the acquisition is delayed, we may lose some or all of the intended or perceived benefits of the transaction which could cause our stock price to decline and harm our business.

Edgar Filing: NETLOGIC MICROSYSTEMS INC - Form 10-Q

In addition, if the acquisition is not completed for any reason:

our stock price may decline, including to the extent that the current market price reflects a market assumption that the acquisition will be completed;

we will be required to pay our costs related to the acquisition even if the acquisition is not completed, such as amounts payable to legal and financial advisors and independent accountants, and such costs could be significant; and

our reputation and relationships with our customers, suppliers, distributors and other business partners may be harmed.

Item 4. Submission of Matters to a Vote of Stockholders

On May 15, 2009, we held an annual meeting of our stockholders. The stockholders elected two Class II directors to hold office until our 2012 annual meeting of stockholders. Each such director received the number of votes set forth below:

Name	For	Withheld
Steven Domenik	19,628,915	216,662
Douglas Broyles	19,635,724	209,853

Directors Ron Jankov, Norman Godinho, Leonard Perham and Alan Krock, were not subject to election at the annual meeting and will continue to serve on the board of directors after the meeting.

The ratification of the appointment of PricewaterhouseCoopers LLP, an independent registered public accounting firm, as our independent registered auditors for the fiscal year ended December 31, 2009, was approved by the votes set forth below:

For	Against	Abstentions	Broker Non-Votes
19,792,196	46,452	6,929	0
