Applications for Currency ETPs  
Applications for Currency ETPs  
Buying  
international  
stocks  
and

bonds  
inherently  
introduces  
some  
exposure  
to  
fluctuating currency values, which can significantly impact returns for U.S. investors.  
International  
Hedging  
Equipped  
with  
currency  
ETPs,  
investors  
can  
make  
calls  
on  
the  
future  
value  
of  
any  
given  
pair of currencies. For example, an investor who believes the U.S. dollar will weaken  
compared  
to  
the  
euro  
may  
choose  
to  
go  
long  
the  
CurrencyShares®  
Euro  
Trust,  
while  
an investor who thinks the euro is relatively overvalued may choose to short the trust  
instead.

between two currencies. A simple version of the trade can be achieved by purchasing a high-yielding currency ETP and shorting a low-yielding one.

Alpha  
Strategies

Just as investors diversify their international stock and bond portfolios to reduce risk, investors can also diversify their cash allocations.
