Notes to Condensed Consolidated Financial Statements

June 30, 2010

(Unaudited)

Note 1 - Basis of Presentation

The unaudited interim financial statements of Franklin Resources, Inc. (Franklin) and its consolidated subsidiaries (collectively, the Company) included herein have been prepared by the Company in accordance with the instructions to Form 10-Q and the rules and regulations of the U.S. Securities and Exchange Commission (the SEC). Under these rules and regulations, some information and footnote disclosures normally included in financial statements prepared under accounting principles generally accepted in the United States of America have been shortened or omitted. Management believes that all adjustments necessary for a fair statement of the financial position and the results of operations for the periods shown have been made. All adjustments are normal and recurring. These financial statements should be read together with the Company's audited financial statements included in its Form 10-K for the fiscal year ended September 30, 2009 (fiscal year 2009). Certain amounts for the comparative prior fiscal year periods have been reclassified to conform to the financial statement presentation as of and for the period ended June 30, 2010, including those required by the retrospective adoption of new accounting guidance relating to noncontrolling interests and the computation of earnings per share (see Note 2 New Accounting Standards).

Note 2 - New Accounting Standards

Recently Adopted Accounting Standards

In the first quarter, the Company adopted a new Financial Accounting Standards Board (FASB) standard that permits a reporting entity to measure the fair value of certain alternative investments that do not have a readily determinable fair value on the basis of the investments' net asset value per share or its equivalent. The adoption of the standard had no impact on the Company's consolidated financial statements.

In the first quarter, the Company adopted a new FASB standard that establishes accounting and reporting standards for noncontrolling interests in a subsidiary (previously referred to as minority interests) and for the deconsolidation of a subsidiary. The standard clarifies that a noncontrolling interest in a subsidiary is an ownership interest in the consolidated entity that should be reported as a component of equity, separate from the parent's equity, in the consolidated financial statements. In addition, it modifies the presentation of consolidated net income to include the amount attributable to noncontrolling interests. The standard requires retrospective adoption of the presentation and disclosure requirements for existing noncontrolling interests. All other requirements of the standard are applied prospectively. The adoption of the standard did not have a material effect on the Company's consolidated financial position or results of operations, but resulted in changes in financial statement presentation and disclosure for all periods presented. Minority interests have been recharacterized as redeemable noncontrolling interests and classified as temporary equity, if currently redeemable or convertible for cash or other assets at the option of the holder, or otherwise as nonredeemable noncontrolling interests and classified as a component of equity. Additionally, the presentation of consolidated net income was modified to include the amount attributable to noncontrolling interests.

In the first quarter, the Company adopted a new FASB standard that specifies that nonvested share-based payment awards containing nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and shall be included in the computation of earnings per share pursuant to the two-class method. All prior period earnings per share data presented must be adjusted retrospectively. The adoption of the standard did not have a material impact on basic or diluted earnings per share.

New Accounting Standards Not Yet Adopted

In February 2010, the FASB issued an amendment to a standard relating to the consolidation of variable interest entities. For certain investments held by a reporting entity, the amendment indefinitely defers a requirement to perform a qualitative analysis to determine whether its variable interests give it a controlling financial interest in a variable interest entity (VIE). The deferral generally applies to the reporting entity's interests in entities that have the attributes of an investment company or that apply the specialized industry accounting guidance for investment companies. The amended standard is effective for fiscal years beginning after November 15, 2009.

The adoption of the amended standard on October 1, 2010 is expected to result in the consolidation of certain qualifying special purpose entities (QSPEs) and VIEs that are not currently consolidated. The consolidation of these entities, which consist of automobile loan securitization trusts and collateralized loan obligations, will result in an increase in loans receivable, net, investment securities, and long-term debt in the Company's consolidated balance sheet and the management and performance fees earned from the entities will be eliminated from its consolidated statement

of income. The Company expects to initially measure the assets and liabilities of the automobile securitization trusts at their carrying values (the amounts at which they would have been carried in the

Company's consolidated financial statements if the Company had always consolidated the trusts). Additionally, the Company expects to elect the fair value option for the collateralized loan obligations, in which all of their financial assets and liabilities will be recorded at fair value upon adoption of the amended standard and subsequent changes in fair value will be recognized in earnings. The entities hold aggregate assets of approximately \$1.4 billion as of June 30, 2010. Total assets held by the entities as of October 1, 2010 are expected to be lower due to anticipated paydowns of receivables held in the entities and scheduled maturities of debt issued by the entities.

Note 3 - Stockholders' Equity and Comprehensive Income

The changes in stockholders' equity and redeemable noncontrolling interests for the nine months ended June 30, 2010 and 2009 were as follows:

<i>(in thousands)</i>	Franklin Resources, Inc. Stockholders Equity	Nonredeemable Noncontrolling Interests	Total Stockholders Equity	Redeemable Noncontrolling Interests
Balance at October 1, 2009	\$ 7,632,173	\$ 2,262	\$ 7,634,435	\$ 65,126

Net unrealized gains on investments, net of tax	55,910	0	55,910	0
Currency translation adjustments	(41,000)	0	(41,000)	0
Net unrealized losses on defined benefit plans, net of tax	(128)	0	(128)	0
Cash dividends on common stock	(146,222)	0	(146,222)	0
Repurchase of common stock	(218,677)	0	(218,677)	0
Other	89,848	(23,567)	66,281	36,707
Balance at June 30, 2009	\$ 7,343,517	\$ 2,444	\$ 7,345,961	\$ 84,285

The components of comprehensive income, including amounts attributable to redeemable noncontrolling interests, were as follows:

<i>(in thousands)</i>	Three Months Ended June 30,		Nine Months Ended June 30,	
	2010	2009	2010	2009
Net income	\$ 359,683	\$ 306,848	\$ 1,075,642	\$ 525,849
Net unrealized gains (losses) on investments, net of tax	(32,416)	51,133	2,738	55,910
Currency translation adjustments	(51,505)	78,877	(46,568)	(41,000)
Net unrealized losses on defined benefit plans, net of tax	(508)	(45)	(263)	(128)

Edgar Filing: FRANKLIN RESOURCES INC - Form 10-Q

Total Comprehensive Income	275,254	436,813	1,031,549	540,631
Less: Comprehensive income (loss) attributable to noncontrolling interests	(812)	9,132	2,859	(3,573)
Total Comprehensive Income attributable to Franklin Resources, Inc.	\$ 276,066	\$ 427,681	\$ 1,028,690	\$ 544,204

Note 4 - Earnings per Share

Basic earnings per share is computed by dividing net income available to the Company's common shareholders, which exclude participating securities, by the weighted average number of shares of common stock outstanding during the period. The Company's participating securities consist of its nonvested stock and stock unit awards that contain nonforfeitable rights to dividends or dividend equivalents. Diluted earnings per share is computed on the basis of the weighted-average number of shares of common stock plus the effect of dilutive potential common shares outstanding during the period using the two-class method.

The components of basic and diluted earnings per share were as follows:

<i>(in thousands, except per share data)</i>	Three Months Ended June 30,		Nine Months Ended June 30,	
	2010	2009	2010	2009
Net Income attributable to Franklin Resources, Inc.	\$ 360,495	\$ 297,716	\$ 1,072,783	\$ 529,422
Less: Allocation of earnings to participating nonvested stock and stock unit awards	2,016	2,438	5,976	4,062
Net Income Available to Common Stockholders	\$ 358,479	\$ 295,278	\$ 1,066,807	\$ 525,360
Weighted-average shares outstanding - basic	225,626	229,804	226,858	230,871
Effect of dilutive common stock options and non-participating nonvested stock unit awards	1,180	1,015	1,282	960
Weighted-Average Shares Outstanding - Diluted	226,806	230,819	228,140	231,831
Earnings per Share				
Basic	\$ 1.59	\$ 1.28	\$ 4.70	\$ 2.28
Diluted	1.58	1.28	4.68	2.27

For the three and nine months ended June 30, 2010, the Company excluded approximately 0.4 million shares of non-participating nonvested stock unit awards from the calculation of diluted earnings per share because their effect would have been anti-dilutive. There were no anti-dilutive potential common shares outstanding during the three and nine months ended June 30, 2009.

Note 5 - Cash and Cash Equivalents

The Company discloses cash and cash equivalents as separate components of current assets and banking/finance assets in its condensed consolidated balance sheets. Cash and cash equivalents consisted of the following:

<i>(in thousands)</i>	June 30, 2010	September 30, 2009
Cash on hand and non-interest-bearing deposits with financial institutions	\$ 36,597	\$ 134,508
Interest-bearing deposits with financial institutions	481,698	350,483
Federal funds sold	1,419	5,242
Sponsored money market funds	1,784,908	1,407,801
Time deposits, securities of the U.S. Treasury and federal agencies and other	1,686,000	1,206,417
Total	\$ 3,990,622	\$ 3,104,451

Federal Reserve Board regulations require certain of the Company's banking subsidiaries to maintain reserve and clearing balances on deposits with the Federal Reserve Banks. The required reserve balances were \$8.7 million at June 30, 2010 and \$7.0 million at September 30, 2009. The required clearing balance was \$1.2 million at June 30, 2010 and September 30, 2009.

Edgar Filing: FRANKLIN RESOURCES INC - Form 10-Q

The Company maintains cash and cash equivalents with financial institutions in various countries, limits the amount of credit exposure with any given financial institution and conducts ongoing evaluations of the creditworthiness of the financial institutions with which it does business.

Note 6 - Investments

Investments consisted of the following:

¹ At June 30, 2010 and September 30, 2009, U.S. government-sponsored enterprise obligations consisted of \$252.4 million and \$313.0 million of residential mortgage-backed securities and \$51.2 million and \$57.9 million of debentures.

² Other investments consist of time deposits with financial institutions having original maturities greater than three months but not exceeding one year from the date of purchase.

³ Corporate debt securities are insured by the Federal Deposit Insurance Corporation or non-U.S. government agencies.

At June 30, 2010 and September 30, 2009, current investment securities, trading included \$223.5 million and \$277.6 million of securities held by sponsored investment products that were consolidated in the Company's condensed consolidated financial statements.

Edgar Filing: FRANKLIN RESOURCES INC - Form 10-Q

At June 30, 2010 and September 30, 2009, banking/finance segment investment securities with aggregate carrying values of \$213.6 million and \$245.9 million were pledged as collateral for the ability to borrow from the Federal Reserve Bank, \$83.2 million and \$99.6 million were pledged as collateral for outstanding Federal Home Loan Bank (FHLB) borrowings and amounts available in secured FHLB short-term borrowing capacity, and \$1.7 million and \$1.9 million were pledged as collateral as required by federal and state regulators. In addition, investment management and related services segment securities with aggregate carrying values of \$6.0 million and \$5.0 million were pledged as collateral, primarily related to a credit facility for a sponsored investment product, at June 30, 2010 and September 30, 2009.

Edgar Filing: FRANKLIN RESOURCES INC - Form 10-Q

A summary of the gross unrealized gains and losses relating to investment securities, available-for-sale is as follows:

(in thousands)

Gross Unrealized

as of June 30, 2010	Cost Basis	Gains	Losses	Fair Value
Sponsored investment products	\$ 821,937	\$ 105,684	\$ (26,200)	\$ 901,421

Note 7 - Fair Value Measurements

The Company uses a three-level fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value based on whether the inputs to those valuation techniques are observable or unobservable. The three levels of fair value hierarchy are set forth below. The Company's assessment of the hierarchy level of the assets or liabilities measured at fair value is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2 Observable inputs other than Level 1 quoted prices, such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; or inputs other than quoted prices that are observable or corroborated by observable market data. Level 2 quoted prices are obtained from independent third-party brokers or dealers, including prices derived from model-based valuation techniques for which the significant assumptions are observable in the market or corroborated by observable market data.
- Level 3 Unobservable inputs that are supported by little or no market activity. These inputs require significant management judgment and reflect the Company's estimation of assumptions that market participants would use in pricing the asset or liability. Level 3 valuations are derived primarily from model-based valuation techniques in which one or more significant inputs are unobservable in the market.

The Company records substantially all of its investments at fair value or amounts that approximate fair value. Trading securities and securities available-for-sale are financial instruments recorded at fair value on a recurring basis. The Company recognizes transfers between levels at the end of each quarter. There were no material transfers between Level 1 and Level 2 during the nine months ended June 30, 2010.

Edgar Filing: FRANKLIN RESOURCES INC - Form 10-Q

--	---------------------	-------------------	------------------	---------------------

The valuation inputs and techniques for the Company's assets measured at fair value on a recurring basis are described below.

Investment securities, trading consist primarily of securities held by consolidated sponsored investment products, non-consolidated sponsored investment products held for trading purposes and retained subordinated securities and residual interests from securitization transactions.

The fair value of securities held by consolidated sponsored investment products is primarily determined using quoted market prices or independent third-party broker or dealer price quotes. These securities are primarily classified as Level 1 or Level 2. If events occur after the close of the primary market for any security, the quoted market prices may be adjusted for the observable price movements within country specific market proxies. Consolidated sponsored investment products may also hold securities that are classified as Level 3 because their fair value is determined using unobservable inputs. In these instances, the Company primarily employs a market-based approach, which may use prices of recent transactions, various market multiples, book values and other relevant information for the investment, related assets or liabilities or other comparable assets or liabilities to determine the fair value of the investment. In developing this fair value, the Company may also give consideration to an income-based approach valuation, which considers anticipated future cash flows of the investment and converts those amounts into a net present value. A discount may also be applied due to the nature or duration of any restrictions on the disposition of the asset or liability. The fair value of non-consolidated sponsored investment products is determined based on the published net asset values of the sponsored investment products and they are classified as Level 1.

The fair value of retained subordinated securities from securitization transactions is determined using independent third-party broker or dealer price quotes and these securities are classified as Level 2. The broker or dealer price quotes are evaluated for reasonableness based upon the performance of the underlying loans and comparable transaction pricing in the securitization market. The fair value of residual interests is estimated using discounted cash flow analyses using unobservable inputs and they are classified as Level 3. Key inputs to the analysis include the excess cash flow discount rate, cumulative life loss rate, expected weighted-average life and prepayment speed assumption. The Company develops the key inputs using actual portfolio experience and recent market activity for similar transactions.

Investment securities, available-for-sale consist primarily of non-consolidated sponsored investment products and debt securities including U.S. government-sponsored enterprise obligations, securities of U.S. states and political subdivisions, securities of the U.S. Treasury and federal agencies, corporate debt securities and other equity securities. The fair value of non-consolidated sponsored investment products is determined based on the published net asset values of the sponsored investment products and they are classified as Level 1. The fair value of debt securities is determined using quoted market prices or independent third-party broker or dealer price quotes, which are evaluated for reasonableness and they are generally classified as Level 2, except for certain U.S. Treasury securities which are classified as Level 1.

The fair value of other equity securities, which consist primarily of non-sponsored investment products, is generally determined based on the published net asset values of the investment products and they are classified as Level 1. The Company may also hold other equity securities that are classified as Level 3 because their fair value is determined using unobservable inputs. In these instances the Company primarily employs the market-based approach described above for Level 3 securities held by consolidated sponsored investment products.

Life settlement contracts. The fair value of life settlement contracts is determined based on discounted cash flows using unobservable inputs and they are classified as Level 3. Inputs used to determine fair value include life expectancy assumptions and internal rates of return.

Edgar Filing: FRANKLIN RESOURCES INC - Form 10-Q

The changes in Level 3 assets measured at fair value on a recurring basis for the three and nine months ended June 30, 2010 and 2009 were as follows:

¹ Other primarily consists of equity securities and life settlement contracts.

² Included in consolidated sponsored investment products gains (losses), net.

³ Included in other, net revenue.

The Company may also measure certain assets or liabilities at fair value on a nonrecurring basis. These fair value measurements generally result from the application of lower of cost or fair value accounting for loans held for sale or write-downs of individual assets.

The Company's financial instruments that were not measured at fair value were as follows:

<i>(in thousands)</i>	June 30, 2010		September 30, 2009	
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
Financial Assets				
Cash and cash equivalents	\$ 3,990,622	\$ 3,990,622	\$ 3,104,451	\$ 3,104,451
Other investments	13,939	13,939	51,950	51,950
Loans held for sale	8,738	9,652	15,711	16,621
Loans receivable, net	371,691	378,141	310,504	323,672
Financial Liabilities				
Commercial paper	\$ 0	\$ 0	\$ 64,156	\$ 64,156
Deposits	669,792	673,516	664,580	667,793
FHLB advances	51,000	52,016	57,000	57,026
Long-term debt	898,836	929,262	0	0

The valuation inputs and techniques for these financial instruments are described below.

Cash and cash equivalents. Due to the short-term nature and liquidity of these financial instruments, the carrying values of cash and cash equivalents approximate fair value.

Other investments consist of time deposits with financial institutions having maturities greater than three months but less than one year from the date of purchase. Due to the short-term nature and liquidity of these financial instruments, the carrying values of these assets approximate fair value.

Loans held for sale. The fair value of automobile loans held for sale generally is estimated based on the whole loan market price that would be received if the loans were sold in their current condition, which may include adjustments based on the composition of the loan portfolio and liquidity factors. In the event of illiquid markets the fair value is determined using discounted cash flow analyses with estimated discount rates for loans with similar terms and collateral.

Edgar Filing: FRANKLIN RESOURCES INC - Form 10-Q

Loans receivable, net. The fair value of loans receivable is estimated using discounted cash flow models with interest rates that consider the current credit and interest rate risks inherent in the loans and the current economic and lending conditions. For

certain loans with no significant credit concerns and frequent repricing, estimated fair values are generally based on the carrying value.

Commercial paper. Due to the short-term nature and liquidity of these financial instruments, the carrying values of these liabilities approximate fair value.

Deposits. The fair value of deposits with no stated maturities is considered to approximate their carrying value because they are payable on demand. The fair value of deposits with stated maturities is estimated based on discounted cash flow models using interest rates offered by comparable institutions on deposits with similar remaining maturities.

FHLB advances. The fair value is estimated using discounted cash flow models using rates available to the Company for FHLB advances with similar terms and remaining maturities.

Long-term debt. The fair value of the long-term debt is determined using quoted market prices or independent third-party broker or dealer price quotes. The fair value may also be determined using prices of publicly traded debt with similar maturities, credit risk and interest rates.

Note 8 - Securitization of Loans Held for Sale

From time to time, the Company enters into automobile loan securitization transactions with securitization trusts structured as qualified special purpose entities (the securitization trusts), which then issue asset-backed securities to private investors. The Company records these transactions as sales. The securitization transactions are comprised of prime, non-prime and sub-prime contracts for retail installment sales that are secured by new and used automobiles purchased from motor vehicle dealers. The Company purchases the sale contracts in the ordinary course of business.

When the Company sells automobile loans in a securitization transaction, it retains certain interests. Residual interests, which include interest-only strips receivable and cash on deposit, represent the Company's contractual right to receive excess interest and cash from the pool of securitized loans after the payment of required amounts to holders of the asset-backed securities and certain other costs associated with the securitization. The residual interests are generally fully realizable and subject to limited recourse provisions. Credit enhancements for the securitization trusts require the Company to maintain a certain amount of cash on deposit, which provides protection for the holders of the asset-backed securities against delays in payment and certain losses on the securitized loans. At June 30, 2010 and September 30, 2009, the amounts of cash on deposit were \$31.6 million and \$46.9 million. Discounted values of the cash on deposit were recognized as part of the residual interests. The Company may also retain subordinated securities from securitization transactions, which are senior to the residual interests. The retained interests in securitized assets, including the residual interests and the retained subordinated securities, are recognized as banking/finance trading securities in the condensed consolidated balance sheets. Changes in the fair value of the retained interests are recognized in earnings.

The Company did not enter into any automobile loan securitization transactions during the nine months ended June 30, 2010 or fiscal year 2009. The securitization transactions which the Company entered into through September 30, 2008 were similar in all material respects. As a result of a securitization transaction that the Company entered into in June 2008, it retained subordinated securities in addition to the residual interests. The retained subordinated securities were sold in fiscal year 2010.

The Company determines the fair value of the retained interests in securitized assets at the end of each period (see Note 7 Fair Value Measurements for a description of fair value methodologies used).

Edgar Filing: FRANKLIN RESOURCES INC - Form 10-Q

The following table shows the sensitivity of the retained interests to hypothetical adverse changes in the key economic assumptions used to measure fair value:

<i>(dollar amounts in thousands)</i>	June 30, 2010	September 30, 2009
<i>Fair value of retained interests</i>		
Retained subordinated securities	\$ 0	\$ 81,886
Residual interests	24,551	28,714
Total	\$ 24,551	\$ 110,600
<i>Excess cash flow discount rate (annual rate)</i>		
	8.0%	12.2%-14.4%
Impact on fair value of 10% adverse change	\$ (321)	\$ (4,133)
Impact on fair value of 20% adverse change	(636)	(8,225)
<i>Cumulative life loss rate</i>		
	7.3%	7.4%
Impact on fair value of 10% adverse change	\$ (2,031)	\$ (2,376)
Impact on fair value of 20% adverse change	(4,059)	(4,763)
<i>Expected weighted-average life (years)</i>		
	1.6	2.2
<i>Prepayment speed (average monthly rate)</i>		
	1.2%	1.2%
Impact on fair value of 10% adverse change	\$ (2,092)	\$ (2,737)
Impact on fair value of 20% adverse change	(3,419)	(5,241)

Actual future market conditions may differ materially. Accordingly, this sensitivity analysis should not be considered the Company's projection of future events or losses.

The Company retains servicing responsibilities for automobile loan securitizations and receives annual servicing fees ranging from 1% to 2% of the loans securitized for services that it provides to the securitization trusts. The servicing fees are recognized in other, net revenue in the condensed consolidated statements of income. The Company does not recognize a servicing asset or liability because the benefits of servicing are just adequate to compensate for its servicing responsibilities as the servicing fees are consistent with current market rates that would be charged to compensate a substitute servicer for providing these services.

The following table provides a summary of cash flows received from and paid to securitization trusts.

<i>(in thousands)</i>	Three Months Ended		Nine Months Ended	
	June 30,		June 30,	
	2010	2009	2010	2009
Servicing fees received	\$ 2,089	\$ 3,118	\$ 7,133	\$ 10,538
Cash flows received related to retained subordinated securities	0	1,698	1,933	5,093
Cash flows received related to residual interests	10,859	0	10,859	1,554
Cash paid related to residual interests	0	(1,469)	(1,286)	(39,677)

Amounts payable to the trustee related to loan principal and interest collected on behalf of the securitization trusts of \$21.0 million at June 30, 2010 and \$24.1 million at September 30, 2009 were included in other banking/finance liabilities in the condensed consolidated balance sheets.

The Company provides guarantees to cover shortfalls for the securitization trusts in amounts due to the holders of the asset-backed securities if the shortfall exceeds cash on deposit. At June 30, 2010 and September 30, 2009, the maximum potential amounts of future payments related to these guarantees were \$6.2 million and \$7.4 million. The fair value of the guarantees was recognized as banking/finance liabilities in the condensed consolidated balance sheets and was not significant.

During the nine months ended June 30, 2010 and 2009, the Company did not provide any financial or other support to the securitization trusts or the holders of the asset-backed securities, other than as described above.

The original amount of loans serviced for the securitization trusts that were still in existence at June 30, 2010 and September 30, 2009 totaled \$1.8 billion. At June 30, 2010 and September 30, 2009, the securitization trusts had 34,671 and 44,221 loans outstanding, and their weighted-average annualized interest rate was 10.5% as of the end of each period. Net charge-offs on the securitized loans held by the securitization trusts and the loans that were managed together with them were \$4.3 million and \$20.2 million for the three and nine months

Edgar Filing: FRANKLIN RESOURCES INC - Form 10-Q

ended June 30, 2010, and \$10.1 million and \$36.5 million for the three and nine months ended June 30, 2009.

The following table shows further details of the loans serviced by the Company that were held by the securitization trusts and the loans that were managed together with them:

<i>(dollar amounts in thousands)</i>	June 30, 2010	September 30, 2009
Principal amount of loans		
Securitized loans	\$ 371,038	\$ 551,369
Loans held for sale	9,300	16,274
Loans receivable	72,971	85,520
Total	\$ 453,309	\$ 653,163
Principal amount of loans 30 days or more past due ¹	\$ 14,458	\$ 29,238
Credit quality as a percentage of aggregate outstanding principal balance		
Prime	46.5%	47.4%
Non-prime	48.6%	49.4%
Sub-prime	4.9%	3.2%

¹ The majority of the balances were related to securitized loans.

Note 9 - Goodwill and Other Intangible Assets

Goodwill and other intangible assets have been assigned to one reporting unit, the investment management and related services segment. The changes in the carrying values of goodwill and gross intangible assets were as follows:

<i>(in thousands)</i>	Goodwill	Amortized Intangible Assets	Non-amortized Intangible Assets
Balance at October 1, 2009	\$ 1,436,626	\$ 200,952	\$ 507,737
Foreign currency movements	1,483	36	1,633
Balance at June 30, 2010	\$ 1,438,109	\$ 200,988	\$ 509,370

Certain of the goodwill and intangible assets are denominated in currencies other than the U.S. dollar; therefore, their gross and net carrying values are subject to foreign currency movements.

Intangible assets were as follows:

(in thousands)

<i>as of June 30, 2010</i>	Gross Carrying Value	Accumulated Amortization	Net Carrying Value
Amortized intangible assets			
Customer base	\$ 165,952	\$ (115,671)	\$ 50,281
Other	35,036	(32,877)	2,159
	200,988	(148,548)	52,440
Non-amortized intangible assets			
Management contracts	509,370	0	509,370
Total	\$ 710,358	\$ (148,548)	\$ 561,810

(in thousands)

	Gross Carrying		Net Carrying
as of September 30, 2009	Value	Accumulated Amortization	Value
Amortized intangible assets			
Customer base	\$ 165,915	\$ (109,059)	\$ 56,856
Other	35,037	(31,656)	3,381
	200,952	(140,715)	60,237
Non-amortized intangible assets			
Management contracts	507,737	0	507,737
Total	\$ 708,689	\$ (140,715)	\$ 567,974

The Company completed its most recent annual impairment tests of goodwill and indefinite-lived intangible assets during the quarter ended September 30, 2009, and determined that there was no impairment in the value of these assets as of August 1, 2009. During the quarter ended June 30, 2010 an indication of potential impairment occurred for approximately 11% of the indefinite-lived intangible assets. The Company performed an updated impairment test and determined that there was no impairment as the discounted future cash flow projections exceeded the carrying value of these assets. No impairment loss in the value of goodwill and indefinite-lived intangible assets was recognized during the nine months ended June 30, 2010 and 2009.

No impairment loss in the value of intangible assets subject to amortization was recognized during the nine months ended June 30, 2010 and 2009 as the estimates of the undiscounted expected cash flows from these assets or their fair values exceeded the asset carrying values.

Amortization expense related to definite-lived intangible assets was \$2.6 million for the three months ended June 30, 2010 and 2009, and \$7.8 million for the nine months ended June 30, 2010 and 2009. The estimated remaining amortization expense related to definite-lived intangible assets as of June 30, 2010 was as follows:

(in thousands)

For the fiscal years ending September 30,	Amount
2010 (remaining three months)	\$ 2,603
2011	10,376
2012	8,906
2013	8,783
2014	8,783
Thereafter	12,989
Total	\$ 52,440

Note 10 - Debt

Outstanding debt consisted of the following:

(in thousands)	June 30, 2010	Effective Interest Rate	September 30, 2009	Effective Interest Rate
Current				
Commercial paper	\$ 0	N/A	\$ 64,156	0.27%
Banking/Finance				
FHLB advances	51,000	3.64%	57,000	2.94%
Non-Current				
\$300 million 2.000% notes due 2013	299,489	2.28%	0	N/A
\$250 million 3.125% notes due 2015	249,731	3.32%	0	N/A
\$350 million 4.625% notes due 2020	349,616	4.75%	0	N/A
Total Long-term debt	898,836		0	
Total Debt	\$ 949,836		\$ 121,156	

At June 30, 2010, maturities for the FHLB advances and long-term debt were as follows:

(in thousands)

For the fiscal years ending September 30,	Amount
2010 (remaining three months)	\$ 0

Edgar Filing: FRANKLIN RESOURCES INC - Form 10-Q

2011	2,000
2012	0
2013	317,989
2014	0
Thereafter	629,847
Total	\$ 949,836

The banking/finance segment secures advances from the FHLB to fund its retail banking and consumer lending services. At June 30, 2010, the Company had \$51.0 million of FHLB advances outstanding, which are subject to collateralization requirements.

In May 2010, the Company completed the issuance of senior unsecured and unsubordinated notes with a face value of \$900.0 million. The net proceeds from the issuance of the notes are available for general corporate purposes; a portion of the proceeds has been used for the repayment of previously issued commercial paper. Of these notes, \$300.0 million was issued at a fixed interest rate of 2.000% per annum and matures in 2013, \$250.0 million was issued at a fixed interest rate of 3.125% per annum and matures in 2015 and \$350.0 million was issued at a fixed interest rate of 4.625% and matures in 2020. Interest is payable semi-annually. The notes were issued collectively at a discount of \$1.2 million that is being amortized over the term of the notes. The Company incurred approximately \$6.4 million in debt issuance costs, which are included in other non-current assets in the condensed consolidated balance sheet and are being amortized over the term of the notes. The notes contain an optional redemption feature that allows the Company to redeem each series of notes prior to maturity in whole or in part at any time, at a make-whole redemption price. The indenture governing the notes contains limitations on the Company's ability and the ability of its subsidiaries to pledge voting stock or profit participating equity interests in its subsidiaries to secure other debt without similarly securing the notes equally and ratably. The indenture also includes requirements that must be met if the Company consolidates or merges with, or sells all or substantially all of its assets to, another entity. As of June 30, 2010, the Company was in compliance with the covenants of the notes.

In addition, at June 30, 2010, the Company had \$500.0 million of short-term commercial paper available for issuance under an uncommitted private placement program, and \$14.1 million available in uncommitted short-term bank lines of credit. The Company's banking/finance segment had \$295.0 million available in uncommitted short-term bank lines of credit under the Federal Reserve system, \$209.1 million available through the secured Federal Reserve Bank short-term discount window and \$56.3 million available in secured FHLB short-term borrowing capacity. On June 9, 2010, the Company's \$420.0 million five-year revolving credit facility expired with no borrowings outstanding.

At June 30, 2010 and September 30, 2009, loans receivable with aggregate carrying values of \$39.0 million and \$30.6 million were pledged as collateral for the ability to obtain FHLB advances.

Note 11 - Commitments and Contingencies

Guarantees

The Company is obligated to cover shortfalls for the automobile loan securitization trusts in amounts due to the holders of the asset-backed securities up to certain levels (see Note 8 - Securitization of Loans Held for Sale).

At June 30, 2010, the banking/finance segment had issued financial standby letters of credit totaling \$6.3 million which beneficiaries would be able to draw upon in the event of non-performance by its customers, primarily in relation to lease and lien obligations of these banking customers. These standby letters of credit were secured by marketable securities with a fair value of \$9.8 million as of June 30, 2010.

Legal Proceedings

As previously reported, between 2003 and 2006, following industry-wide market timing and late trading investigations by U.S. and Canadian regulators, and U.S. state government offices, Franklin and certain related parties were named in civil lawsuits in the U.S. and one of Franklin's adviser subsidiaries was named in civil lawsuits in Canada.

In the U.S., the lawsuits were filed against Franklin and certain of its adviser and distributor affiliates, individual Franklin officers and directors, a former Franklin employee, and trustees of certain Franklin Templeton Investments mutual funds (the Funds). In 2004, the lawsuits were consolidated for coordinated proceedings with similar lawsuits against numerous other mutual fund complexes in a multi-district litigation titled *In re Mutual Funds Investment Litigation*, pending in the U.S. District Court for the District of Maryland, Case No. 04-md-15862 (the MDL). Plaintiffs filed consolidated amended complaints in the MDL on September 29, 2004. The three consolidated lawsuits involving the Company include a class action (*Sharkey IRO/IRA v. Franklin Resources, Inc., et al.*, Case No. 04-cv-01310), a derivative action on behalf of the Funds (*McAlvey v. Franklin Resources, Inc., et al.*, Case No. 04-cv-01274), and a derivative action on behalf of Franklin (*Hertz v. Burns, et al.*, Case No. 04-cv-01624) and seek, among other forms of relief, one or more of the following: unspecified monetary damages; punitive damages; removal of Fund trustees, directors, advisers, administrators, and distributors; rescission of management contracts and distribution plans under Rule 12b-1 promulgated under the Investment Company Act of 1940; and attorneys' fees and costs.

On February 25, 2005, the Company-related defendants filed motions to dismiss the consolidated amended class action and Fund derivative action complaints. On June 26, 2008, the court issued its order granting in part and denying in part the Company's motion to dismiss the consolidated amended class action complaint. In its order, the court dismissed certain claims, while allowing others under Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 and under Sections 36(b) and 48(a) of the Investment Company Act of 1940 to remain, and dismissed all class action claims against the named Funds. Pursuant to stipulation, the court

also dismissed all claims against certain individual defendants, including the independent trustees to the named Funds, and a former Franklin executive. On September 4, 2009, the court entered as its order the parties' stipulation to dismiss without prejudice the remaining Fund trustee defendants named in the consolidated amended class action complaint. On January 12, 2010, lead plaintiff in the consolidated class action filed a second consolidated amended class action complaint. The Company-related defendants filed a motion for partial summary judgment in the consolidated class action on March 24, 2010, and lead plaintiff filed its opposition and cross-motion for partial summary judgment on June 4, 2010. All briefing on the motions is expected to be completed by late August 2010. The Company-related defendants' motion to dismiss the consolidated fund derivative action remains under submission with the court. In addition, pursuant to stipulation, the derivative action brought on behalf of Franklin has been stayed since 2004.

In Canada, Franklin Templeton Investments Corp., a Franklin subsidiary and the manager of Franklin Templeton Investments' Canadian mutual funds, is named (along with several other non-Franklin affiliated manager defendants) in two market timing lawsuits that are styled as class actions (*Huneault v. AGF Funds, Inc., et al.*, Case No. 500-06-000256-046, filed in the Superior Court for the Province of Quebec, District of Montreal on October 25, 2004, and *Fischer v. IG Investment Management Ltd., et al.*, Case No. 06-CV-307599CP, filed in the Ontario Superior Court of Justice on March 9, 2006). The lawsuits seek, among other forms of relief, one or more of the following: unspecified monetary damages, punitive damages, an order barring any increase in management fees for a period of two years following judgment, and attorneys' fees and costs. Oral argument on petitioners' motion for authorization to institute a class action in the Huneault lawsuit concluded on May 5, 2009, and the matter has remained under submission with the court since then. Separately, on January 12, 2010, the court in the Fischer lawsuit denied plaintiffs' motion for class certification, and plaintiffs filed a notice of appeal of that ruling on February 22, 2010. On July 20, 2010, the parties reached an agreement-in-principle to resolve both the Huneault and Fischer actions for a total proposed payment of approximately \$5.0 million subject to certain conditions including certification of a class in each lawsuit on consent for settlement purposes and court approval of the settlement.

In addition, Franklin/Templeton Distributors, Inc. (one of Franklin's subsidiaries and the principal underwriter to the Funds), as well as the individual trustees to the Franklin Custodian Funds (the Trust), have been named in a lawsuit brought derivatively on behalf of the Trust, concerning payment of asset-based compensation between July 22, 2005 and the present to broker-dealers that hold Fund shares in brokerage accounts and that are not registered as investment advisers. The lawsuit is captioned *Smith v. Franklin/Templeton Distributors, Inc., et al.*, Case No. CV 09-4775, and was filed in the U.S. District Court for the Northern District of California on October 6, 2009. Specifically, plaintiff is attempting to allege claims under Section 47(b) of the Investment Company Act of 1940, and for breach of fiduciary duty, breach of contract, and waste of Trust assets, and is seeking unspecified monetary damages, declaratory and injunctive relief enjoining further asset-based compensation to such broker-dealers, and attorneys' fees and costs. Defendants filed a motion to dismiss the complaint on January 22, 2010. On June 8, 2010, the court granted defendants' motion to dismiss the Section 47(b) claim (the lone federal claim), giving plaintiff limited leave to amend his complaint to cure the deficiency in that claim. Plaintiff filed an amended complaint on July 7, 2010, and, pursuant to stipulation, defendants have until August 20, 2010 to respond to the amended complaint.

Management strongly believes that the claims made in each of the unresolved lawsuits identified above are without merit and the Company intends to defend against them vigorously. The Company cannot predict with certainty, however, the eventual outcome of those lawsuits, nor whether they will have a material negative impact on the Company.

The Company is from time to time involved in litigation relating to claims arising in the normal course of business. Management is of the opinion that the ultimate resolution of such claims will not materially affect the Company's business, financial position or results of operations. In management's opinion, an adequate accrual has been made as of June 30, 2010, to provide for any probable losses that may arise from these matters for which the Company could reasonably estimate an amount.

Variable Interest Entities

The Company's variable interest entities (VIEs) primarily include certain sponsored investment products and certain other investment products (collectively, investment products). The Company's variable interests generally include its equity ownership interest in the investment products and its investment management and related services fees earned from sponsored investment products. Based on its evaluations, the Company believes it was not the primary beneficiary of its VIEs and, as a result, did not consolidate these entities as of and for the periods ended June 30, 2010 and 2009.

Total assets under management of investment products in which the Company held a variable interest, but was not the primary beneficiary, were approximately \$38.8 billion at June 30, 2010 and \$35.8 billion at September 30, 2009. The carrying values of the Company's equity ownership interest in and investment management and related service fees receivable from these investment products as recorded in the Company's consolidated balance sheets at June 30, 2010 and September 30, 2009 are set forth below. These amounts represent the Company's maximum exposure to loss and do not reflect an estimate of the actual losses.

<i>(in thousands)</i>	June 30, 2010	September 30, 2009
Current Assets		
Receivables	\$ 71,497	\$ 50,088
Investment securities, available-for-sale	107,679	112,853
Total Current	179,176	162,941
Non-Current Assets		
Investment securities, available-for-sale	23,604	20,208
Investments in equity method investees and other	570,412	305,024
Total Non-Current	594,016	325,232
Total	\$ 773,192	\$ 488,173

While the Company has no contractual obligation to do so, it routinely makes cash investments in the course of launching sponsored investment products. The Company also may voluntarily elect to provide its sponsored investment products with additional direct or indirect financial support based on its business objectives.

The Company's other VIEs include limited liability partnerships, limited liability companies, and joint ventures. The Company's variable interest generally comprises its equity ownership interest. These investments are recognized as investments in equity method investees because the Company is not the primary beneficiary. The investment carrying values in the Company's consolidated balance sheets related to these VIEs were \$4.1 million at June 30, 2010 and \$14.9 million at September 30, 2009. These amounts represent the Company's maximum exposure to loss. The Company did not provide financial or other support to its other VIEs during the nine months ended June 30, 2010 and 2009.

The joint venture VIEs previously included Lightning Finance Company Limited (LFL) and Lightning Asset Finance Limited (LAFL), in which the Company held 49% ownership interests at September 30, 2009. The Company liquidated its ownership interests in LFL and LAFL during the three months ended December 31, 2009.

Other Commitments and Contingencies

At June 30, 2010, the banking/finance segment had commitments to extend credit in an aggregate amount of \$173.8 million, primarily under credit card lines.

The Company in its role as agent or trustee facilitates the settlement of investor share purchase, redemption, and other transactions with affiliated mutual funds. The Company is appointed by the affiliated mutual funds as agent or trustee to manage, on behalf of the affiliated mutual funds, bank deposit accounts that contain only (i) cash remitted by investors to the affiliated mutual funds for the direct purchase of fund shares, or (ii) cash remitted by the affiliated mutual funds for direct delivery to the investors for either the proceeds of fund shares liquidated at the investors' direction, or dividends and capital gains earned on fund shares. As of June 30, 2010 and September 30, 2009, the Company held cash of approximately \$171.4 million and \$214.5 million off-balance sheet in agency or trust for investors and the affiliated mutual funds.

At June 30, 2010, there were no changes in other commitments and contingencies that would have a material effect on commitments and contingencies reported in the Company's Form 10-K for fiscal year 2009, except for the capital commitments from the issuance of long-term debt as disclosed in Note 10 Debt.

Note 12 - Stock-Based Compensation

The Company's stock-based compensation plans include the Amended and Restated Annual Incentive Compensation Plan (the AIP) and the 2002 Universal Stock Incentive Plan, as amended and restated (the USIP). Under the terms of the AIP, eligible employees may receive cash, equity awards, and/or cash-settled equity awards generally based on the performance of the Company, its funds and the individual employee. The USIP provides for the issuance of up to 30.0 million shares of the Company's common stock for various stock-related awards to officers, directors and employees. At June 30, 2010, approximately 3.5 million shares were available for grant under the USIP. In addition to stock and stock unit awards, the Company may award options and other forms of stock-based compensation to officers, directors and employees under the USIP. The Compensation Committee of the Board of Directors determines the terms and conditions of awards under the AIP and USIP.

Stock Options

The following table summarizes stock option activity:

<i>(in thousands, except weighted-average exercise price and remaining contractual term)</i>	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term (in Years)	Aggregate Intrinsic Value
Outstanding at September 30, 2009	2,737	\$ 37.86		
Exercised	(475)	37.72		
Outstanding and Exercisable at June 30, 2010	2,262	\$ 37.89	2.0	\$ 109,265

Stock option awards outstanding under the USIP generally have been granted at prices that are either equal to or above the market value of the underlying shares of the Company's common stock on the date of grant, generally vest over three years and expire no later than ten years after the grant date. No stock option awards have been granted under the USIP since November 2004. All stock options were fully vested and all related compensation cost was recognized prior to fiscal year 2008.

Cash received from stock option exercises for the three and nine months ended June 30, 2010 was \$5.1 million and \$18.0 million, and \$4.8 million and \$14.7 million for the three and nine months ended June 30, 2009. Income tax benefits from stock option exercises were \$0.9 million and \$10.0 million for the three and nine months ended June 30, 2010, and \$0.5 million and \$4.2 million for the three and nine months ended June 30, 2009.

Stock and Stock Unit Awards

The fair value of stock and stock unit awards granted under the USIP is estimated on the date of grant based on the market price of the underlying shares of the Company's common stock and is amortized to compensation expense on a straight-line basis over the related vesting period, which is generally three to four years. The total number of stock and stock unit awards expected to vest is adjusted for estimated forfeitures.

Total unrecognized compensation cost related to nonvested stock and stock unit awards, net of estimated forfeitures, was \$91.4 million at June 30, 2010. This cost is expected to be recognized over a remaining weighted-average vesting period of 1.6 years.

The following table summarizes nonvested stock and stock unit award activity:

<i>(shares in thousands)</i>	Shares	Weighted-Average Grant-Date Fair
------------------------------	--------	----------------------------------

Edgar Filing: FRANKLIN RESOURCES INC - Form 10-Q

		Value per Share
Nonvested balance at September 30, 2009	954	\$ 85.21
Granted	820	107.10
Vested	(8)	102.18
Forfeited/cancelled	(80)	94.94
Nonvested Balance at June 30, 2010	1,686	\$ 95.31

The stock awards generally entitle holders to the right to sell the underlying shares of the Company's common stock once the awards vest. Stock unit awards generally entitle holders to receive the underlying shares of common stock once the awards vest.

Certain performance-based long-term stock and stock unit awards have been granted to the Company's executive officers and other employees. These awards generally vest over a three-year period based on the achievement of predetermined Company financial performance goals. In the event a performance measure is not achieved at or above a specified threshold level, the portion of the award tied to such performance measure will be forfeited. At June 30, 2010, the balance of nonvested awards was 423.2 thousand and had a weighted-average grant-date fair value of \$107.94 per share.

Employee Stock Investment Plan

The amended and restated Franklin Resources, Inc. 1998 Employee Stock Investment Plan (the "ESIP") allows eligible participants to buy shares of the Company's common stock at a discount of its market value on defined dates. The Compensation Committee of the Board of Directors determines the terms and conditions of awards under the ESIP. No shares were issued under the ESIP during the three months ended June 30, 2010. A total of 179.0 thousand shares were issued under the ESIP during the nine months ended June 30, 2010. At June 30, 2010, approximately 2.9 million shares were reserved for future issuance under this plan.

All Stock-Based Plan Arrangements

Total stock-based compensation costs of \$22.3 million and \$62.7 million were recognized in the condensed consolidated statements of income for the three and nine months ended June 30, 2010, and \$22.1 million and \$61.9 million for the three and nine months ended June 30, 2009. The income tax benefits realized from all stock-based arrangements totaled \$1.1 million and \$10.9 million for the three and nine months ended June 30, 2010, and \$0.6 million and \$3.3 million for three and nine months ended June 30, 2009.

The Company generally does not repurchase shares upon share option exercise or vesting of stock and stock unit awards. However, in order to pay taxes due in connection with the vesting of employee and executive officer stock and stock unit awards under the USIP, shares are repurchased using a net stock issuance method.

Note 13 - Common Stock Repurchases

During the three and nine months ended June 30, 2010, the Company repurchased 2.1 million and 4.9 million shares of its common stock at a cost of \$212.3 million and \$503.8 million. The common stock repurchases made as of June 30, 2010 reduced capital in excess of par value to nil and the excess amount was recognized as a reduction to retained earnings. At June 30, 2010, approximately 4.7 million shares of common stock remained available for repurchase under the stock repurchase program. During the three and nine months ended June 30, 2009, the Company repurchased 1.7 million and 3.8 million shares of its common stock at a cost of \$109.7 million and \$218.7 million. The stock repurchase program is not subject to an expiration date.

Note 14 - Segment Information

The Company bases its operating segment selection process primarily on services offered. The Company derives substantially all of its operating revenues and net income from providing investment management and related services to its sponsored investment products. This is the Company's primary business activity and operating segment. The Company's investment management and related services are marketed to the public globally under six distinct brand names: Franklin, Templeton, Mutual Series, Bissett, Fiduciary Trust and Darby.

The Company's secondary business activity and operating segment is banking/finance. The banking/finance segment offers selected retail banking and consumer lending services and private banking services to high net-worth clients. Consumer lending and retail banking activities include automobile lending services related to the purchase, securitization and servicing of retail installment sales contracts originated by independent automobile dealerships, consumer credit and debit cards, real estate equity lines, home equity/mortgage lending and other consumer lending.

Financial information for the Company's two operating segments is presented in the table below. Inter-segment transactions are immaterial and excluded from segment income (loss) and assets. Operating revenues of the banking/finance segment are reported net of interest expense, the provision for loan losses and changes in fair value of residual interests from securitization transactions.

<i>(in thousands)</i>	Three Months Ended June 30,		Nine Months Ended June 30,	
	2010	2009	2010	2009
Operating Revenues				
Investment management and related services	\$ 1,521,687	\$ 1,062,364	\$ 4,295,302	\$ 2,966,243
Banking/finance	12,384	11,194	29,293	(11,083)
Total	\$ 1,534,071	\$ 1,073,558	\$ 4,324,595	\$ 2,955,160
Income (Loss) Before Taxes				
Investment management and related services	\$ 475,948	\$ 418,752	\$ 1,485,553	\$ 851,047
Banking/finance	18,848	4,300	31,884	(77,064)
Total	\$ 494,796	\$ 423,052	\$ 1,517,437	\$ 773,983

Operating revenues of the banking/finance operating segment included above were as follows:

<i>(in thousands)</i>	Three Months Ended June 30,		Nine Months Ended June 30,	
	2010	2009	2010	2009
Interest and fees on loans	\$ 4,675	\$ 4,611	\$ 13,945	\$ 15,009
Interest and dividends on investment securities	3,520	5,083	10,805	15,528
Total interest income	8,195	9,694	24,750	30,537
Interest on deposits	(1,040)	(1,423)	(3,621)	(4,748)
Interest on short-term debt	(21)	(34)	(32)	(905)
Interest on long-term debt	(463)	(428)	(1,392)	(1,257)
Total interest expense	(1,524)	(1,885)	(5,045)	(6,910)
Net interest income	6,671	7,809	19,705	23,627
Unrealized gains (losses) on trading investments, net	3,143	(846)	2,744	(44,511)
Other income	2,832	4,986	9,566	15,753
Provision for loan losses	(262)	(755)	(2,722)	(5,952)
Total	\$ 12,384	\$ 11,194	\$ 29,293	\$ (11,083)

Operating segment assets were as follows:

<i>(in thousands)</i>	June 30, 2010	September 30, 2009
Investment management and related services	\$ 9,433,464	\$ 8,429,298
Banking/finance	976,350	1,039,165
Total	\$ 10,409,814	\$ 9,468,463

The investment management and related services segment incurs substantially all of the Company's depreciation and amortization costs and expenditures on long-lived assets.

Note 15 - Other Income (Expenses)

Other income (expenses) consisted of the following:

<i>(in thousands)</i>	Three Months Ended		Nine Months Ended	
	June 30,		June 30,	
	2010	2009	2010	2009
Consolidated Sponsored Investment Products Gains (Losses), Net				
Realized gains (losses), net	\$ 10,783	\$ (5,435)	\$ 22,970	\$ (41,498)
Unrealized gains (losses), net	(25,453)	49,938	(16,899)	27,453

Interest income	2,801	6,514	9,828	26,586
Capital gain distributions	288	36	1,176	14,309
Other-than-temporary impairment of investment securities, available-for-sale	0	(2,092)	(1,463)	(59,744)
Realized gains on sale of investment securities, available-for-sale	12,642	2,478	14,867	4,438
Realized losses on sale of investment securities, available-for-sale	(1,263)	(2,393)	(1,743)	(16,874)
Gains (losses) on trading investment securities, net	1,583	18,394	23,980	(29,397)
Income (losses) from investments in equity method investees	(37,728)	27,868	(20,438)	(8,608)
Foreign currency exchange gains (losses), net	3,242	(9,057)	7,811	7,240
Other, net	2,314	2,565	5,269	6,506
Total	(7,262)	52,574	68,204	(26,341)
Interest Expense	(4,836)	(211)	(6,514)	(3,503)
Other Income (Expenses), Net	\$ (26,768)	\$ 96,866	\$ 67,761	\$ (43,889)

Substantially all of the Company's dividend income, capital gain distributions and realized gains and losses on sale of investment securities, available-for-sale were generated by investments in its sponsored investment products. Interest income was primarily generated by investments in debt securities of the U.S. Treasury and federal agencies and cash equivalents. Proceeds from the sale of investment securities, available-for-sale were \$73.9 million and \$208.7 million for the three and nine months ended June 30, 2010, and \$256.9 million and \$594.9 million for the three and nine months ended June 30, 2009.

The Company recognized net gains (losses) on trading investment securities, including securities held by consolidated sponsored investment products, that were still held at June 30, 2010 and 2009 in the amounts of \$(23.1) million and \$2.4 million during the three and nine months ended June 30, 2010, and \$56.7 million and \$(42.3) million during the three and nine months ended June 30, 2009.

Note 16 - Banking Regulatory Ratios

Franklin is a bank holding company and a financial holding company subject to various regulatory capital requirements administered by federal banking agencies, including the Federal Reserve Board. Failure to meet minimum capital requirements can result in certain mandatory, and possibly additional, discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's consolidated financial statements. The Company must meet specific capital adequacy guidelines that involve quantitative measures of its assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Company to maintain a minimum Tier 1 capital and Tier 1 leverage ratio (as defined in the regulations), as well as minimum Tier 1 and Total risk-based capital ratios (as defined in the regulations). As of June 30, 2010, the Company revised its calculation methodology to follow the most conservative risk-weighting assumptions within the Federal Reserve Board guidelines. Based on the Company's calculations as of June 30, 2010 and September 30, 2009, it exceeded the applicable capital adequacy requirements as listed below.

<i>(dollar amounts in thousands)</i>	June 30, 2010	September 30, 2009	Capital Adequacy Minimum
Tier 1 capital	\$ 5,214,547	\$ 5,495,995	N/A
Total risk-based capital	5,220,341	5,503,022	N/A
Tier 1 leverage ratio	67%	75%	4%
Tier 1 risk-based capital ratio	62%	97%	4%
Total risk-based capital ratio	62%	97%	8%

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Forward-Looking Statements

In this section, we discuss and analyze the results of operations and financial condition of Franklin Resources, Inc. ("Franklin") and its subsidiaries (collectively, the "Company"). In addition to historical information, we also make statements relating to the future, called "forward-looking statements," which are provided under the "safe harbor" protection of the U.S. Private Securities Litigation Reform Act of 1995. Forward-looking statements are generally written in the future tense and/or are preceded by words such as "will," "may," "could," "expect," "believe," "anticipate," "plan," "seek," "estimate," or other similar words. Moreover, statements that speculate about future events are forward-looking statements. These forward-looking statements involve a number of known and unknown risks, uncertainties and other important factors that could cause actual results and outcomes to differ materially from any future results or outcomes expressed or implied by such forward-looking statements. Forward-looking statements are based on our current expectations and assumptions regarding our business, the economy and other future conditions. Because forward-looking statements relate to the future, they are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict. We caution you therefore against relying on any of these forward-looking statements. They are neither statements of historical fact nor guarantees or assurances of future performance.

You should carefully review the "Risk Factors" section set forth below and in any more recent filings with the SEC, each of which describes these risks, uncertainties and other important factors in more detail. While forward-looking statements are our best prediction at the time that they are made, you should not rely on them. Factors or events that could cause our actual results to differ may emerge from time to time, and it is not possible for us to predict all of them. If a circumstance occurs after the date of this Form 10-Q that causes any of our forward-looking statements to be inaccurate, whether as a result of new information, future developments or otherwise, we do not have an obligation, and we undertake no obligation, to announce publicly the change to our expectations, or to make any revisions to our forward-looking statements, unless required by law.

The following discussion should be read in conjunction with our Form 10-K for the fiscal year ended September 30, 2009 filed with the SEC, and the condensed consolidated financial statements and notes thereto included elsewhere in this Form 10-Q.

Overview

We are a global investment management company and derive substantially all of our operating revenues and net income from providing investment management and related services to our retail and institutional mutual funds, unregistered funds, and to institutional, high net-worth and separately-managed accounts and other investment products. Our services include fund administration, shareholder services, transfer agency, underwriting, distribution, custodial, trustee and other fiduciary services. Our sponsored investment products and investment management and related services are distributed or marketed to the public globally under six distinct brand names: Franklin, Templeton, Mutual Series, Bissett, Fiduciary Trust and Darby.

We offer a broad range of sponsored investment products under equity, hybrid, fixed-income and cash management funds and accounts that meet a wide variety of specific investment needs of individual and institutional investors. Cash management funds consist of U.S.-registered money market funds and non-U.S. registered funds with similar investment objectives.

The level of our revenues depends largely on the level and relative mix of assets under management. As noted in the "Risk Factors" section set forth below, the amount and mix of our assets under management are subject to significant fluctuations and can negatively impact our revenues and income. To a lesser degree, the level of our revenues also depends on the level of mutual fund sales and the number of mutual fund shareholder accounts. The fees charged for our services are based on contracts with our sponsored investment products or our clients. These arrangements could change in the future.

Our secondary business is banking/finance. Our banking/finance group offers retail banking and consumer lending services and private banking services to high net-worth clients. Our consumer lending and retail banking activities include automobile lending services related to the purchase, securitization, and servicing of retail installment sales contracts originated by independent automobile dealerships, consumer credit and debit cards, real estate equity lines, home equity/mortgage lending, and other consumer lending.

During the first half of fiscal year 2010, market returns improved as the global economy appeared to emerge from recession and move toward recovery. However, the sovereign debt crisis in Europe led to more turbulent conditions and lower returns throughout the world during the third fiscal quarter, as evidenced by 12% and 11% decreases in the MSCI World Index and the S&P 500 Index. The indexes decreased by 6% and 1% for the nine months ended June 30, 2010.

Our total assets under management at June 30, 2010 were \$570.5 billion, 3% lower than the balance at March 31, 2010, but 26% higher than the balance at June 30, 2009. Simple monthly average assets under management for the three and nine months ended June 30, 2010 increased 36%

Edgar Filing: FRANKLIN RESOURCES INC - Form 10-Q

and 31% from the same periods in the prior fiscal year. Net new flows remained strong in our third quarter, totaling \$18.8 billion and \$50.5 billion for the three and nine months ended June 30, 2010. However, significant market

depreciation of \$34.5 billion during the quarter eliminated the year-to-date appreciation as of March 31, 2010, resulting in net depreciation of \$1.4 billion for the nine month period. Long-term sales activity for the quarter increased 10% from the prior quarter and 83% from the same period in the prior year, mainly due to increases in sales of our global/international taxable fixed-income products.

Our revenues and operating income improved versus the prior fiscal year periods consistent with the improved market conditions and our positive net new flows.

Uncertainties regarding the economic recovery remain in the foreseeable future. As we confront the challenges of this economic environment, we continue to focus on the investment performance of our sponsored investment products and on providing high quality customer service to our clients. While we are focused on expense management, we will also seek to attract, retain and develop employees and invest strategically in systems and technology that will provide a secure and stable environment. We will continue to protect and further our brand recognition while developing and maintaining broker/dealer and client relationships. The success of these and other strategies may be influenced by the factors discussed in the Risk Factors section set forth below.

RESULTS OF OPERATIONS

<i>(dollar amounts in millions, except per share data)</i>	Three Months Ended			Nine Months Ended		
	June 30, 2010	June 30, 2009	Percent Change	June 30, 2010	June 30, 2009	Percent Change
Operating Income	\$ 521.6	\$ 326.2	60%	\$ 1,449.7	\$ 817.9	77%
Net Income attributable to Franklin Resources, Inc.	360.5	297.7	21%	1,072.8	529.4	103%
Earnings per Share						
Basic	\$ 1.59	\$ 1.28	24%	\$ 4.70	\$ 2.28	106%
Diluted	1.58	1.28	23%	4.68	2.27	106%
Operating Margin ¹	34%	30%		34%	28%	

¹ Defined as operating income divided by total operating revenues.

Operating income increased for the three and nine months ended June 30, 2010 as compared to the same periods in the prior fiscal year. The increases were primarily due to 47% and 44% increases in investment management revenue, which resulted from 36% and 31% increases in simple monthly average assets under management and higher effective management fee rates during the current fiscal year periods.

Net income attributable to Franklin Resources, Inc. increased for the three months ended June 30, 2010 primarily due to a \$195.4 million increase in operating income, partially offset by a \$123.6 million decrease in other income (expenses). Other income (expenses) decreased primarily due to current fiscal year losses from equity method investees and consolidated sponsored investment products.

Net income attributable to Franklin Resources, Inc. increased for the nine months ended June 30, 2010 primarily due to a \$631.8 million increase in operating income and a \$111.7 million increase in other income (expenses). Other income (expenses) increased primarily due to higher investment valuations resulting from improved market conditions.

Diluted earnings per share increased in both periods consistent with the increases in net income as well as 2% decreases in diluted average common shares outstanding resulting primarily from the repurchase of shares of our common stock.

Assets Under Management

Assets under management by investment objective were as follows:

<i>(dollar amounts in billions)</i>	June 30, 2010	June 30, 2009	Percent Change
Equity			
Global/international	\$ 172.9	\$ 153.1	13%
Domestic (U.S.)	63.2	56.7	11%
Total equity	236.1	209.8	13%
Hybrid	101.6	85.8	18%
Fixed-Income			
Tax-free	73.8	62.4	18%
Taxable			
Global/international	109.4	50.2	118%
Domestic (U.S.)	43.3	35.5	22%
Total fixed-income	226.5	148.1	53%
Cash Management¹	6.3	7.5	(16)%
Total	\$ 570.5	\$ 451.2	26%
Simple Monthly Average for the Three-Month Period²	\$ 583.1	\$ 428.0	36%
Simple Monthly Average for the Nine-Month Period²	\$ 557.6	\$ 424.6	31%

¹ Includes both U.S.-registered money market funds and non-U.S. registered funds with similar investment objectives.

² Investment management fees from approximately 56% of our assets under management at June 30, 2010 were calculated using daily average assets under management.

Assets under management at June 30, 2010 were 26% higher than they were at June 30, 2009, primarily due to positive net new flows of \$62.7 billion and market appreciation of \$59.3 billion during the twelve-month period. The increases occurred in both equity and fixed-income products as improved market conditions led to significant valuation increases, higher sales and lower redemptions. Simple monthly average assets under management, which are generally more indicative of trends in revenue for providing investment management and fund administration services than the year over year change in ending assets under management, increased 36% and 31% during the three and nine months ended June 30, 2010, as compared to the same periods in the prior fiscal year.

The simple monthly average mix of assets under management is shown below. The change in mix for the nine months ended June 30, 2010 as compared to the same period in the prior fiscal year reflects an investor shift to lower risk investments during the prior twelve months.

	Nine Months Ended June 30,	
	2010	2009
Equity	45%	47%
Hybrid	18%	19%
Fixed-income	36%	32%
Cash management	1%	2%
Total	100%	100%

Edgar Filing: FRANKLIN RESOURCES INC - Form 10-Q

Assets under management by sales region were as follows:

<i>(dollar amounts in billions)</i>	June 30, 2010	Percent of Total	June 30, 2009	Percent of Total
United States ¹	\$ 409.9	72%	\$ 339.2	75%
Europe ²	72.0	13%	44.6	10%
Asia-Pacific ³	59.6	10%	41.0	9%
Canada	29.0	5%	26.4	6%
Total	\$ 570.5	100%	\$ 451.2	100%

¹ Approximately 67% and 70% of our operating revenues originated from U.S. operations in the nine months ended June 30, 2010 and 2009.

² Europe sales region includes Middle East and Africa.

³ Asia-Pacific sales region includes Latin America and Australia.

Due to the global nature of our business operations, investment management and related services may be performed in locations unrelated to the sales region.

Components of the change in our assets under management were as follows:

<i>(dollar amounts in billions)</i>	Three Months Ended			Nine Months Ended		
	June 30, 2010	June 30, 2009	Percent Change	June 30, 2010	June 30, 2009	Percent Change
Beginning assets under management	\$ 586.8	\$ 391.1	50%	\$ 523.4	\$ 507.3	3%
Long-term sales	51.0	27.9	83%	139.6	75.5	85%
Long-term redemptions	(33.6)	(22.4)	50%	(91.1)	(92.3)	(1)%
Net cash management	1.4	0.5	180%	2.0	(0.9)	NM
Net new flows	18.8	6.0	213%	50.5	(17.7)	NM
Reinvested distributions	3.1	2.7	15%	8.9	11.7	(24)%
Net flows	21.9	8.7	152%	59.4	(6.0)	NM
Distributions	(3.7)	(3.3)	12%	(10.9)	(14.8)	(26)%
Appreciation (depreciation) and other	(34.5)	54.7	NM	(1.4)	(35.3)	(96)%
Ending Assets Under Management	\$ 570.5	\$ 451.2	26%	\$ 570.5	\$ 451.2	26%

Assets under management decreased during the three months ended June 30, 2010, resulting from market depreciation of \$34.5 billion, primarily in our equity products, partially offset by positive net new flows of \$18.8 billion, primarily in our fixed-income products.

Assets under management increased during the nine months ended June 30, 2010, resulting from \$50.5 billion of positive net new flows, primarily in our fixed-income products, partially offset by \$1.4 billion of market depreciation, primarily in our equity products.

Investment Management Fee Rate

Our effective investment management fee rate (investment management fees divided by simple monthly average assets under management) increased to 0.612% for the nine months ended June 30, 2010 from 0.559% for the same period in the prior fiscal year. The increase was primarily due to higher levels of global/international assets under management and performance fees earned. Generally, investment management fees earned on global/international products are higher than fees earned on domestic (U.S.) products.

Operating Revenues

The table below presents the percentage change in each revenue category.

(dollar amounts in millions)	Three Months Ended			Nine Months Ended		
	2010	June 30, 2009	Percent Change	2010	June 30, 2009	Percent Change
Investment management fees	\$ 915.9	\$ 625.0	47%	\$ 2,558.6	\$ 1,778.2	44%
Underwriting and distribution fees	529.3	365.2	45%	1,514.1	974.8	55%
Shareholder servicing fees	73.0	67.1	9%	214.0	200.0	7%
Consolidated sponsored investment products income, net	1.4	2.9	(52)%	2.4	6.6	(64)%
Other, net	14.5	13.4	8%	35.5	(4.4)	NM
Total Operating Revenues	\$ 1,534.1	\$ 1,073.6	43%	\$ 4,324.6	\$ 2,955.2	46%

Investment Management Fees

Investment management fees are generally calculated under contractual arrangements with our sponsored investment products and sub-advised accounts as a percentage of the market value of assets under management. Annual rates vary by investment objective and type of services provided.

Investment management fees increased for the three and nine months ended June 30, 2010 primarily due to 36% and 31% increases in simple monthly average assets under management. The increases were also impacted by higher effective management fee rates during both periods.

Underwriting and Distribution Fees

We earn underwriting fees from the sale of certain classes of sponsored investment products on which investors pay a sales commission at the time of purchase. Sales commissions are reduced or eliminated on some share classes and for some sale transactions depending upon the amount invested and the type of investor. Therefore, underwriting fees will change with the overall level of gross sales, the size of individual transactions, and the relative mix of sales between different share classes and types of investors.

Globally, our mutual funds and certain other products generally pay us distribution fees in return for sales, marketing and distribution efforts on their behalf. Specifically, the majority of U.S.-registered mutual funds, with the exception of certain of our money market mutual funds, have adopted distribution plans (the Plans) under Rule 12b-1 promulgated under the Investment Company Act of 1940, as amended (Rule 12b-1). The Plans permit the mutual funds to bear certain expenses relating to the distribution of their shares, such as expenses for marketing, advertising, printing and sales promotion, subject to the Plans' limitations on amounts. The individual Plans set a percentage limit for Rule 12b-1 expenses based on average daily net assets under management of the mutual fund. Similar arrangements exist for the distribution of our non-U.S. funds and where, generally, the distributor of the funds in the local market arranges for and pays commissions.

We pay a significant portion of underwriting and distribution fees to the financial advisers and other intermediaries who sell our sponsored investment products to the public on our behalf. See the description of underwriting and distribution expenses below.

Overall, underwriting and distribution fees increased for the three and nine months ended June 30, 2010. Underwriting fees increased 50% and 84% primarily due to 66% and 109% increases in gross commissionable sales, partially offset by a shift in sales from equity products to fixed-income products, which typically generate lower underwriting fees. Distribution fees increased 42% for the three and nine months ended June 30, 2010 primarily due to 36% and 31% increases in simple monthly average assets under management.

Shareholder Servicing Fees

We receive shareholder servicing fees as compensation for providing transfer agency services, which include providing customer statements, transaction processing, customer service, and tax reporting. These fees are generally fixed charges per shareholder account that vary with the particular type of fund and the service being rendered. In some instances, we charge sponsored investment products these fees based on the level of assets under management. In the United States, transfer agency service agreements provide that accounts closed in a calendar year generally remain billable at a reduced rate through the second quarter of the following calendar year. In Canada, such agreements provide that accounts closed in the calendar year remain billable for four months after the end of the calendar year. Accordingly, the level of fees will vary with the

Edgar Filing: FRANKLIN RESOURCES INC - Form 10-Q

change in open accounts and the level of closed accounts that remain billable. Approximately 3.2 million accounts closed in the U.S. during calendar year 2009 were no longer billable effective July 1, 2010, as compared to approximately 2.1 million accounts closed during calendar year 2008 that were no

longer billable effective July 1, 2009. Approximately 235.6 thousand accounts closed in Canada during calendar year 2009 were no longer billable effective May 1, 2010, as compared to approximately 300.0 thousand accounts closed during calendar year 2008 that were no longer billable effective May 1, 2009.

Shareholder servicing fees increased for the three and nine months ended June 30, 2010 primarily due to 5% increases in simple monthly average billable shareholder accounts and favorable currency impacts during both periods. The account increases were predominantly related to shareholder accounts originated in the United States. The favorable currency impacts mainly resulted from 14% and 16% increases in the value of the Canadian dollar against the U.S. dollar during the three and nine month periods.

Consolidated Sponsored Investment Products Income, Net

Consolidated sponsored investment products income, net reflects the net investment income, including dividend and interest income, of sponsored investment products that we consolidate in our financial statements.

Consolidated sponsored investment products income, net decreased for the three and nine months ended June 30, 2010, reflecting investment performance and net asset balances of the specific sponsored investment products that we consolidated during each period and the deconsolidation of certain sponsored investment products during each period.

Other, Net

Other, net revenue primarily consists of revenues from the banking/finance segment as well as income from custody services. Banking/finance revenues include interest income on loans, servicing income, and realized and unrealized gains (losses) on residual interests from securitization transactions, and are reduced by interest expense and the provision for loan losses.

Other, net revenue increased for the three and nine months ended June 30, 2010 primarily due to gains from increases in the fair value of retained interests from securitizations of \$3.1 million and \$2.7 million, compared to losses from decreases in fair value during the same periods in the prior fiscal year of \$0.8 million and \$44.5 million. The increases were partially offset by \$1.8 million and \$5.9 million decreases in servicing fees from automobile loans.

Operating Expenses

The table below presents the percentage change in each expense category.

<i>(dollar amounts in millions)</i>	Three Months Ended			Nine Months Ended		
	June 30, 2010	June 30, 2009	Percent Change	June 30, 2010	June 30, 2009	Percent Change
Underwriting and distribution	\$ 519.6	\$ 350.7	48%	\$ 1,473.7	\$ 933.7	58%
Compensation and benefits	280.3	230.9	21%	805.7	711.7	13%
Information systems, technology and occupancy	76.0	68.2	11%	214.2	202.2	6%
Advertising and promotion	38.0	27.9	36%	110.9	78.8	41%
Amortization of deferred sales commissions	50.1	32.9	52%	143.0	103.2	38%
Other	48.5	36.8	32%	127.4	107.7	18%
Total Operating Expenses	\$ 1,012.5	\$ 747.4	35%	\$ 2,874.9	\$ 2,137.3	35%

Underwriting and Distribution

Underwriting and distribution expenses include payments to financial advisers and other third parties for providing sales, marketing and distribution services to investors in our sponsored investment products. The increases in underwriting and distribution expenses for the three and nine months ended June 30, 2010 were consistent with the 45% and 55% increases in underwriting and distribution revenues during the same periods.

Compensation and Benefits

Edgar Filing: FRANKLIN RESOURCES INC - Form 10-Q

Compensation and benefit expenses increased for the three and nine months ended June 30, 2010 primarily due to increases in variable compensation and commissions, partially offset by decreases related to severance costs incurred in the prior fiscal year. Variable compensation increases of \$34.8 million and \$111.6 million were mainly due to higher bonus expense based on our performance. Commissions increased \$8.3 million and \$20.1 million, reflecting higher levels of sponsored investment product sales.

Severance costs of \$0.1 million and \$36.8 million were recognized in the three and nine months ended June 30, 2009 related to reductions in our global workforce of approximately 10% announced during the first half of fiscal year 2009. Lower salaries, wages and benefits resulting from reduced staffing levels during the current fiscal year were offset by unfavorable currency impacts and annual merit salary adjustments effective December 1, 2009. The level of our global workforce throughout the current year was lower than in each of the same periods in the prior fiscal year until June 2010. At June 30, 2010, our global workforce had increased to approximately 7,900 employees from approximately 7,800 employees at June 30, 2009.

We continue to place a high emphasis on our pay for performance philosophy. As such, any changes in the underlying performance of our sponsored investment products or changes in the composition of our incentive compensation offerings could have an impact on compensation and benefit expenses going forward. However, in order to attract and retain talented individuals, our level of compensation and benefit expenses may increase more quickly or decrease more slowly than our revenue.

Information Systems, Technology and Occupancy

Information systems, technology and occupancy costs increased for the three and nine months ended June 30, 2010 primarily due to non-recurring occupancy costs of approximately \$6.0 million relating to a property sublease.

Details of capitalized information systems and technology costs, which exclude occupancy costs, are shown below.

<i>(in millions)</i>	Three Months Ended June 30,		Nine Months Ended June 30,	
	2010	2009	2010	2009
Net carrying value at beginning of period	\$ 56.9	\$ 67.9	\$ 65.2	\$ 66.5
Additions during period, net of disposals	10.4	4.9	18.9	22.3
Amortization during period	(9.0)	(7.9)	(25.8)	(23.9)
Net Carrying Value at End of Period	\$ 58.3	\$ 64.9	\$ 58.3	\$ 64.9

Advertising and Promotion

Advertising and promotion expenses increased for the three and nine months ended June 30, 2010 primarily due to \$6.5 million and \$26.6 million increases in marketing support payments to intermediaries resulting from higher product sales and assets under management.

We are committed to investing in advertising and promotion in response to changing business conditions, and to advance our products where we see continued or potential new growth opportunities. As a result of potential changes in our strategic marketing campaigns, the level of advertising and promotion expenditures may increase more rapidly, or decrease more slowly, than our revenues.

Amortization of Deferred Sales Commissions

Certain fund share classes sold globally, including Class C and Class R shares marketed in the United States, are sold without a front-end sales charge to shareholders, although our distribution subsidiaries pay an up-front commission to financial intermediaries on these sales. In addition, certain share classes, such as Class A shares sold in the United States, are sold without a front-end sales charge to shareholders when minimum investment criteria are met, although our distribution subsidiaries pay an up-front commission to financial intermediaries on these sales. We defer all up-front commissions paid by our distribution subsidiaries and amortize them over the periods in which commissions are generally recovered from distribution and service fee revenues and contingent sales charges received from shareholders of the funds upon redemption of their shares. We evaluate deferred commission assets (DCA) for recoverability on a periodic basis using undiscounted expected cash flows from the shares of mutual funds sold without a front-end sales charge.

We previously held 49% ownership interests in Lightning Finance Company Limited (LFL) and Lightning Asset Finance Limited (LAFL). Due to our significant interest in LAFL, we carried on our consolidated balance sheets the DCA generated in the United States and the financing liability for the related future revenue we previously sold to LFL, which was subsequently transferred to LAFL. We repurchased the remaining DCA from LAFL in September 2009 and liquidated our ownership interests in LFL and LAFL during the three months ended December 31, 2009.

Edgar Filing: FRANKLIN RESOURCES INC - Form 10-Q

Amortization of deferred sales commissions increased for the three and nine months ended June 30, 2010 mainly due to higher product sales with up-front commissions in fiscal year 2010, primarily related to U.S. funds. Accelerated amortization of the DCA repurchased from LAFL also contributed to the increase for the nine-month period.

Other Operating Expenses

Other operating expenses primarily consist of professional fees, fund administration services and shareholder servicing fees payable to external parties, corporate travel and entertainment, and other miscellaneous expenses.

Other operating expenses increased for the three and nine months ended June 30, 2010 primarily due to \$10.2 million and \$16.3 million increases in fund administration services and shareholder servicing fees payable to external parties, which resulted from higher average assets under management.

Other Income (Expenses)

<i>(in millions)</i>	Three Months Ended June 30,		Nine Months Ended June 30,	
	2010	2009	2010	2009
Consolidated sponsored investment products gains (losses), net	\$ (14.7)	\$ 44.5	\$ 6.1	\$ (14.1)
Investment and other income (losses), net	(7.3)	52.6	68.2	(26.3)
Interest expense	(4.8)	(0.2)	(6.5)	(3.5)
Other income (expenses), net	\$ (26.8)	\$ 96.9	\$ 67.8	\$ (43.9)

Other income (expenses) includes net realized and unrealized investment gains (losses) on consolidated sponsored investment products, investment and other income (losses), net and interest expense from our investment management and related services business. Investment and other income (losses), net is comprised primarily of income related to our investments, including interest and dividend income, realized gains and losses on sale of and other-than-temporary impairments of available-for-sale investment securities, gains (losses) from trading investments, income (losses) from equity method investees, and foreign currency exchange gains and losses.

Other income (expenses) decreased to a net loss position for the three months ended June 30, 2010, as compared to a net income position in the prior fiscal year, primarily due to lower investment valuations. The market conditions resulted in net losses from equity method investees of \$37.7 million and securities held by our consolidated sponsored investment products of \$14.7 million, compared to net gains of \$27.9 million and \$44.5 million in the prior fiscal year. Additionally, net gains from trading investments decreased by \$16.8 million. These decreases were partially offset by increases of \$12.8 million in realized gains on sale of available-for-sale investment securities and \$12.3 million in foreign currency exchange gains.

Other income (expenses) increased to a net income position for the nine months ended June 30, 2010, as compared to a net loss position in the prior fiscal year, primarily due to higher investment valuations during the first half of the current fiscal year. The market recovery resulted in a \$58.3 million decrease in other-than-temporary impairments of available-for-sale investments, and current year net gains from trading investments of \$24.0 million, sale of available-for-sale investment securities of \$13.1 million and securities held by our consolidated sponsored investment products of \$6.1 million, compared to net losses of \$29.4 million, \$12.4 million and \$14.1 million in the prior fiscal year. These increases were partially offset by reductions of \$16.8 million in interest income, \$13.6 million in capital gain distributions and \$11.8 million in income from equity method investees.

Our investments in sponsored investment products primarily consist of the initial cash investments made in the course of launching mutual fund and other investment product offerings; however we may also invest in our products for other business reasons. The market conditions that impact our assets under management similarly affect the investment income earned or losses incurred on our sponsored investment product investments.

Taxes on Income

As a multinational corporation, we provide investment management and related services to a wide range of international sponsored investment products, often managed from locations outside the United States. Some of these jurisdictions have lower tax rates than the United States. The mix of pre-tax income (primarily from our investment management and related services business) subject to these lower rates, when aggregated with income originating in the United States, produces a lower overall effective income tax rate than existing U.S. federal and state income tax rates.

Edgar Filing: FRANKLIN RESOURCES INC - Form 10-Q

Our effective income tax rates were 27.31% and 29.11% for the three and nine months ended June 30, 2010, as compared to 27.47% and 32.06% for the same periods in the prior fiscal year. The decreases were primarily due to a change in the mix of earnings combined with a favorable international tax ruling.

The effective income tax rate for future reporting periods will continue to reflect the relative contributions of non-U.S. earnings that are subject to reduced tax rates and that are not currently included in U.S. taxable income.

LIQUIDITY AND CAPITAL RESOURCES

The following table summarizes certain key financial data relating to our liquidity, capital resources and uses of capital:

<i>(in millions)</i>	June 30, 2010	September 30, 2009
Balance Sheet Data		
Assets		
Liquid assets	\$ 6,458.8	\$ 5,832.6
Cash and cash equivalents	\$ 3,990.6	\$ 3,104.5
Liabilities		
Debt		
Commercial paper	\$ 0	\$ 64.2
Federal Home Loan Bank (FHLB) advances	51.0	57.0
Long-term debt	898.8	0
Total debt	\$ 949.8	\$ 121.2

<i>(in millions)</i>	Nine Months Ended June 30,	
	2010	2009
Cash Flow Data		
Operating cash flows	\$ 1,339.9	\$ 489.0
Investing cash flows	(9.4)	(374.2)
Financing cash flows	(414.6)	(254.6)
<i>Liquidity</i>		

Liquid assets consist of cash and cash equivalents, current receivables, and current and certain other investments (trading, available-for-sale and other). Cash and cash equivalents include cash on hand, non-interest-bearing and interest-bearing deposits with financial institutions, federal funds sold, time deposits, U.S. government-sponsored enterprise obligations, securities of the U.S. Treasury and federal agencies, debt instruments with original maturities of three months or less at the purchase date and other highly liquid investments, including money market funds, which are readily convertible into cash. Cash and cash equivalents at June 30, 2010 increased primarily due to net cash provided by operating activities, partially offset by net cash used in financing activities. At June 30, 2010, the percentages of cash and cash equivalents held by our U.S. and non-U.S. operations were approximately 48% and 52%, as compared to approximately 49% and 51% at September 30, 2009. The percentage of cash and cash equivalents held by our U.S. operations decreased slightly primarily due to dividends paid to our shareholders and common stock repurchases, partially offset by proceeds from the issuance of long-term debt.

The increase in total debt outstanding during the nine months ended June 30, 2010 primarily relates to the issuance of long-term debt in May 2010, partially offset by the repayment of previously issued commercial paper.

We experienced an increase in net cash provided by operating activities during the nine months ended June 30, 2010, as compared to the same period in the prior fiscal year, primarily due to an increase in net income. Net cash used in investing activities decreased mainly due to a decrease in purchases of investments, partially offset by a decrease in liquidations of investments and an increase in loans receivable. Net cash used in financing activities increased during the nine months ended June 30, 2010, as compared to the same period in prior fiscal year, primarily due to increased dividends paid on common stock and common stock repurchases, partially offset by proceeds from the issuance of long-term debt.

Capital Resources

We believe that we can meet our present and reasonably foreseeable operating cash needs and future commitments through existing liquid assets, continuing cash flows from operations, borrowing capacity under current credit facilities and the ability to issue additional debt or equity securities.

Edgar Filing: FRANKLIN RESOURCES INC - Form 10-Q

In March 2008, we filed an automatic shelf registration statement with the SEC as a well-known seasoned issuer . Using the shelf registration statement, we may sell, at any time and from time to time, in one or more offerings, our shares of common stock, shares of preferred stock, debt securities, convertible securities, warrants or units.

In May 2010, we completed the issuance of senior unsecured and unsubordinated notes with a face value of \$900.0 million. The net proceeds from the issuance of the notes are available for general corporate purposes; a portion of the proceeds has been used for the repayment of previously issued commercial paper. Of the notes, \$300.0 million was issued at a fixed interest rate of 2.000% per annum and matures in 2013, \$250.0 million was issued at a fixed interest rate of 3.125% per annum and matures in 2015 and \$350.0 million was issued at a fixed interest rate of 4.625% and matures in 2020. Interest is payable semi-annually. The notes were issued collectively at a discount of \$1.2 million that is being amortized over the term of the notes. We incurred approximately \$6.4 million in debt issuance costs, which are included in other non-current assets in the condensed consolidated balance sheet and are being amortized over the term of the notes. The notes contain an optional redemption feature that allows us to redeem each series of notes prior to maturity in whole or in part at any time, at a make-whole redemption price. The indenture governing the notes contains limitations on our ability and the ability of our subsidiaries to pledge voting stock or profit participating equity interests in our subsidiaries to secure other debt without similarly securing the notes equally and ratably. The indenture also includes requirements that must be met if we consolidate or merge with, or sell all or substantially all of our assets to, another entity. As of June 30, 2010, we were in compliance with the covenants of the notes.

The banking/finance segment secures advances from the FHLB to fund its retail banking and consumer lending services. At June 30, 2010, we had \$51.0 million of FHLB advances outstanding. These advances had a weighted-average interest rate of 3.64% at June 30, 2010 and are subject to collateralization requirements.

At June 30, 2010, we had \$500.0 million of short-term commercial paper available for issuance under an uncommitted private placement program and \$14.1 million available in uncommitted short-term bank lines of credit. Our banking/finance segment had \$295.0 million available in uncommitted short-term bank lines of credit under the Federal Reserve system, \$209.1 million available through the secured Federal Reserve Bank short-term discount window and \$56.3 million available in secured FHLB short-term borrowing capacity. On June 9, 2010, our \$420.0 million five-year revolving credit facility expired with no borrowings outstanding.

Our ability to access the capital markets in a timely manner depends on a number of factors, including our credit rating, the condition of the global economy, investors' willingness to purchase our securities, interest rates, credit spreads and the valuation levels of equity markets. If we are unable to access capital markets in a timely manner, our business could be adversely impacted.

Uses of Capital

We expect that our main uses of cash will be to expand our core business, make strategic acquisitions, acquire shares of our common stock, fund property and equipment purchases, pay operating expenses of the business, enhance technology infrastructure and business processes, pay stockholder dividends and repay and service debt.

On June 15, 2010, our Board of Directors declared a regular quarterly cash dividend of \$0.22 per share which was payable on July 9, 2010 to stockholders of record on June 30, 2010.

We maintain a stock repurchase program to manage our equity capital with the objective of maximizing shareholder value. Our stock repurchase program is affected through regular open-market purchases and private transactions in accordance with applicable laws and regulations. During the three and nine months ended June 30, 2010, we repurchased 2.1 million and 4.9 million shares of our common stock at costs of \$212.3 million and \$503.8 million. The common stock repurchases made as of June 30, 2010 reduced our capital in excess of par value to nil and the excess amount was recognized as a reduction to retained earnings. At June 30, 2010, approximately 4.7 million shares of our common stock remained available for repurchase under our stock repurchase program. Our stock repurchase program is not subject to an expiration date.

The funds that we manage have their own resources available for purposes of providing liquidity to meet shareholder redemptions, including securities that can be sold or provided to investors as in-kind redemptions, and lines of credit. While we have no contractual obligation to do so, we may voluntarily elect to provide the funds with direct or indirect financial support based on our business objectives.

CONTRACTUAL OBLIGATIONS AND COMMERCIAL COMMITMENTS

Our contractual obligations and commercial commitments are summarized in our Form 10-K for the fiscal year ended September 30, 2009. At June 30, 2010, there were no material changes outside the ordinary course in our contractual obligations and commercial commitments from September 30, 2009, except for our capital commitments from the issuance of long-term debt disclosed in Note 10 Debt in the notes to the condensed consolidated financial statements in Item 1 of Part I of this Form 10-Q.

OFF-BALANCE SHEET ARRANGEMENTS

Our banking/finance operating segment periodically enters into automobile loan securitization transactions with qualified special purpose entities, which then issue asset-backed securities to private investors (see Note 8 – Securitization of Loans Held for Sale in the notes to the condensed consolidated financial statements in Item 1 of Part I of this Form 10-Q). Our main objective in entering into these securitization transactions is to obtain financing for automobile loan activities. Securitized loans held by the securitization trusts totaled \$371.0 million at June 30, 2010 and \$551.4 million at September 30, 2009.

In our role as agent or trustee, we facilitate the settlement of investor share purchase, redemption, and other transactions with affiliated mutual funds. We are appointed by the affiliated mutual funds as agent or trustee to manage, on behalf of the affiliated mutual funds, bank deposit accounts that contain only (i) cash remitted by investors to the affiliated mutual funds for the direct purchase of fund shares, or (ii) cash remitted by the affiliated mutual funds for direct delivery to the investors for either the proceeds of fund shares liquidated at the investors' direction, or dividends and capital gains earned on fund shares. As of June 30, 2010 and September 30, 2009, we held cash of approximately \$171.4 million and \$214.5 million off-balance sheet in agency or trust for investors and the affiliated mutual funds.

CRITICAL ACCOUNTING POLICIES

Our consolidated financial statements and accompanying notes are prepared in accordance with accounting principles generally accepted in the United States of America, which require the use of estimates, judgments, and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the periods presented. Actual results may differ from those estimates under different assumptions. Following are updates to our critical accounting policies disclosed in Management's Discussion and Analysis of Financial Condition and Results of Operations in our Form 10-K for the fiscal year ended September 30, 2009.

Fair Value Measurements

We record substantially all of our investments in the consolidated financial statements at fair value or amounts that approximate fair value. We use a three-level fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value based on whether the inputs to those valuation techniques are observable or unobservable.

Level 3 assets represented approximately 2.2% of total assets measured at fair value at June 30, 2010 and Level 3 liabilities measured at fair value were insignificant. There were no transfers into and immaterial transfers out of Level 3 during the nine months ended June 30, 2010.

Goodwill and Other Intangible Assets

We make significant estimates and assumptions when valuing goodwill and other intangible assets in connection with the initial purchase price allocation of an acquired entity, as well as when evaluating impairment of goodwill and other intangible assets on an ongoing basis.

Goodwill is tested for impairment annually and when an event occurs or circumstances change that more likely than not reduce the fair value of a reporting unit below its carrying value. Indefinite-lived intangible assets are tested for impairment annually and when events or changes in circumstances indicate the assets might be impaired. Impairment is indicated when the carrying value of the intangible asset exceeds its fair value.

We performed our annual impairment tests for goodwill and indefinite-lived intangible assets as of August 1, 2009. We did not recognize any impairment because our estimates of the fair values of our reporting unit and our indefinite-lived assets exceeded their respective carrying values. A hypothetical 500 basis point decline in the assets under management growth rate or a 500 basis point increase in the discount rate would not have caused either the investment management and related services reporting unit or the management contracts to fail step one of the impairment tests for goodwill or indefinite-lived intangible assets.

We subsequently monitor the market conditions and their potential impact on the assumptions used in the annual calculations of fair value to determine whether circumstances have changed that would more likely than not reduce the fair value of our reporting unit below its carrying value, or indicate that our indefinite-lived intangible assets might be impaired. We consider, among other things, changes in our assets under management and pre-tax profit margin amounts, which affect our revenue growth rate assumptions, by assessing whether these changes would impact the reasonableness of the assumptions used in our impairment test as of August 1, 2009. We also monitor fluctuations of our common stock per share price to evaluate our market capitalization relative to the reporting unit as a whole.

As of June 30, 2010, approximately 11% of our indefinite-lived intangible assets related to investment management contracts of Franklin Templeton Asset Management (India) Private Limited (FTAMIPL). As a result of recent clarifications made to regulations implemented in 2009 by the Securities and Exchange Board of India, certain expenses are expected to increase which

will negatively impact FTAMIPL's pre-tax profit margin and therefore indicated potential impairment of its indefinite-lived intangible assets. We tested these intangible assets for impairment as of June 30, 2010, and the related discounted future cash flow projections exceeded their carrying values by approximately 60%. The assumptions used in our impairment test for FTAMIPL indefinite-lived intangible assets were developed taking into consideration ongoing regulatory and market conditions. As of June 30, 2010, a decline in the pre-tax profit margin of approximately 800 basis points may cause the fair value of these indefinite-lived intangible assets to be below the asset carrying value.

We determined that no events occurred or circumstances changed subsequent to August 1, 2009 that would more likely than not reduce the fair value of the reporting unit below its carrying value, or indicate that our indefinite-lived intangible assets other than those related to FTAMIPL might be impaired. Accordingly, there were no impairments to goodwill or indefinite-lived intangible assets.

We test definite-lived intangible assets for impairment quarterly. As of June 30, 2010, approximately 90% of our definite-lived intangible assets related to investment management contracts of Fiduciary Trust Company International (FTCI). The undiscounted future cash flow projections for FTCI institutional and high net-worth management contracts exceeded their carrying values by approximately 50% and 10%, respectively. We estimated the undiscounted future cash flows using assets under management growth rates ranging from -6.2% to 6.0% depending on the type of management contracts. The undiscounted future cash flow projections for the other definite-lived intangible assets exceeded their respective carrying values by more than 100%. The assumptions used in our impairment tests for definite-lived intangible assets were developed taking into consideration ongoing market conditions. As of June 30, 2010, a decline in the assets under management of approximately 800 basis points could cause us to evaluate whether the fair value of our definite-lived intangible assets is below the asset carrying value.

While we believe that our impairment tests and the assumptions used to estimate fair value are reasonable and appropriate, if the assumptions used in our estimates of fair value change in the future, we may be required to record impairment charges or otherwise accelerate amortization expense.

Income Taxes

We record deferred tax assets and liabilities for temporary differences between the tax basis of assets and liabilities, and the reported amounts in the consolidated financial statements using the statutory tax rates in effect for the year when the reported amount of the asset or liability is recovered or settled, respectively. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the results of operations in the period that includes the enactment date. A valuation allowance is recorded to reduce the carrying values of deferred tax assets to the amount that is more likely than not to be realized. For each tax position taken or expected to be taken in a tax return, we determine whether it is more likely than not that the position will be sustained upon examination based on the technical merits of the position, including resolution of any related appeals or litigation. A tax position that meets the more likely than not recognition threshold is measured to determine the amount of benefit to recognize. The tax position is measured at the largest amount of benefit that is greater than 50% likely of being realized upon settlement. We recognize the accrual of interest on uncertain tax positions in interest expense and penalties in other operating expenses.

As a multinational corporation, we operate in various locations outside the United States and generate earnings from our non-U.S. subsidiaries. We indefinitely reinvest the undistributed earnings of our non-U.S. subsidiaries, except for Subpart F income taxed in the U.S., subject to regulatory or contractual repatriation restrictions or contractual repatriation requirements, and the excess net earnings after debt service payments and regulatory capital requirements of our Canadian and U.K. consolidated subsidiaries. Changes to our policy of reinvestment or repatriation of non-U.S. earnings may have a significant effect on our financial condition and results of operations.

Loss Contingencies

We are involved in various lawsuits and claims encountered in the normal course of business. When such a matter arises and periodically thereafter, we consult with our legal counsel and evaluate the merits of the claims based on the facts available at that time. In management's opinion, an adequate accrual has been made as of June 30, 2010 to provide for probable losses that may arise from these matters for which we could reasonably estimate an amount. See also Note 11 Commitments and Contingencies in the notes to the condensed consolidated financial statements in Item 1 of Part I of this Form 10-Q.

RISK FACTORS

Volatility and disruption of the capital and credit markets, and adverse changes in the global economy, may significantly affect our results of operations and may put pressure on our financial results. The capital and credit markets continue to experience substantial volatility and disruption. Although global market conditions have shown some stabilization and improvement, the decline in global market conditions has in the past resulted in significant decreases in our assets under management, revenues and income, and future declines may negatively impact our performance. Such declines have had and

may in the future have an adverse impact on our results of operations. Even if legislative or regulatory initiatives or other efforts successfully stabilize and add liquidity to the financial markets, we may need to modify our business, strategies or operations, and we may be subject to additional constraints or costs in order to satisfy new regulatory requirements or to compete in a changed business environment.

The amount and mix of our assets under management are subject to significant fluctuations. Fluctuations in the amount and mix of our assets under management may be attributable in part to market conditions outside of our control that have had, and could continue to have, a negative impact on our revenues and income. We derive the majority of our operating revenues and net income from providing investment management and related services. The level of our revenues depends largely on the level and mix of assets under management. Any decrease in the value or amount of our assets under management because of market volatility or other factors negatively impacts our revenues and income. We are subject to an increased risk of asset volatility from changes in the global financial and equity markets. Individual financial and equity markets may be adversely affected by economic, political, financial, or other instabilities that are particular to the country or regions in which a market is located, including without limitation local acts of terrorism, economic crises or other business, social or political crises. Declines in these markets have caused in the past, and would cause in the future, a decline in our revenues and income. Global economic conditions, exacerbated by war or terrorism or financial crises, changes in the equity market place, currency exchange rates, interest rates, inflation rates, the yield curve, defaults by derivative counterparties and other factors that are difficult to predict affect the mix, market values and levels of our assets under management. The funds we manage may be subject to an unanticipated large number of redemptions as a result of such events, causing the funds to sell securities they hold, possibly at a loss, or draw on any available lines of credit to obtain cash to settle these redemptions, or settle in-kind with securities held in the applicable fund. The Company, in its discretion, may also provide financial support to a fund to enable it to maintain sufficient liquidity in such event. Our investment management services revenues are derived primarily from fees based on a percentage of the value of assets under management and vary with the nature of the account or product managed. A decline in the price of stocks or bonds, or in particular market segments, or in the securities market generally, could cause the value and returns on our assets under management to decline, resulting in a decline in our revenues and income. Moreover, changing market conditions may cause a shift in our asset mix between international and U.S. assets, potentially resulting in a decline in our revenue and income depending upon the nature of our assets under management and the level of management fees we earn based on them. Additionally, changing market conditions may cause a shift in our asset mix towards fixed-income products and a related decline in our revenue and income, as we generally derive higher fee revenues and income from equity assets than from fixed-income products we manage. On the other hand, increases in interest rates, in particular if rapid, or high interest rates, as well as any uncertainty in the future direction of interest rates, may have a negative impact on our fixed-income products as rising interest rates or interest rate uncertainty typically decrease the total return on many bond investments due to lower market valuations of existing bonds. Any decrease in the level of our assets under management resulting from price declines, interest rate volatility or uncertainty, increased redemptions or other factors could negatively impact our revenues and income.

We are subject to extensive and complex, overlapping and frequently changing rules, regulations and legal interpretations. Our investment management and related services business and our banking/finance business are subject to extensive and complex, overlapping and frequently changing rules, regulations and legal interpretations in the countries in which we operate, including, among others, securities, banking, accounting and tax laws and regulations. On July 21, 2010, President Obama signed into law the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the Reform Act). The Reform Act, as well as other legislative and regulatory changes, could impose additional restrictions and limitations on us and will likely result in increased scrutiny and oversight of our financial services and products.

Moreover, financial reporting requirements, and the processes, controls and procedures that have been put in place to address them, are often comprehensive and complex. While management has focused attention and resources on our compliance policies, procedures and practices, non-compliance with applicable laws or rules or regulations, conflicts of interest requirements or fiduciary principles, or our inability to keep up with, or adapt to, an ever changing, complex regulatory environment could result in sanctions against us, including fines and censures, injunctive relief, suspension or expulsion from a particular jurisdiction or market or the revocation of licenses, any of which could also adversely affect our reputation, prospects, revenues, and earnings.

We are subject to U.S. federal securities laws, state laws regarding securities fraud, other federal and state laws and rules and regulations of certain regulatory and self-regulatory organizations, including those rules and regulations promulgated by, among others, the SEC, the Financial Industry Regulatory Authority and the New York Stock Exchange. To the extent operations or trading in our securities take place outside the United States, we are subject to regulation by non-U.S. regulations and regulators, such as the U.K. Financial Services Authority, and U.S. regulations and regulators such as the Department of Justice and the SEC with respect to the Foreign Corrupt Practices Act of 1977. Certain of our subsidiaries are registered with the SEC under the Investment Advisers Act of 1940 and many of our funds are registered with the SEC under the Investment Company Act of 1940, both of which impose numerous obligations, as well as detailed operational requirements, on our subsidiaries which are investment advisers to registered investment companies. Our subsidiaries must comply with a myriad of complex and changing U.S. and/or non-U.S. rules and

regulations, some of which may conflict, as well as complex tax regimes. Additionally, as we expand our operations, sometimes rapidly, into non-U.S. jurisdictions, the rules and regulations of these non-U.S. jurisdictions become applicable, sometimes with short compliance deadlines, and add further regulatory complexity to our ongoing compliance operations.

In addition, we are a bank holding company and a financial holding company subject to the supervision and regulation of the Federal Reserve Board (the FRB) and are subject to the restrictions, limitations, or prohibitions of the Bank Holding Company Act of 1956, as amended, and the Gramm-Leach-Bliley Act. The provisions of the Reform Act are expected to have an impact on our banking/finance business. Significant aspects of the Reform Act relate to changes in the regulation of banks, thrifts, holding companies, and related institutions, including with respect to regulation and supervision in the banking industry and, the imposition of various restrictions and limitations on certain activities. The Reform Act includes a number of measures that increase capital and liquidity requirements, impose limits on leverage, and enhance supervisory authority and regulatory oversight of non-banking entities. We are not able to predict at this time the specific guidelines or regulations that may be adopted by regulatory agencies having authority over us or the impact that any changes in regulation would have on our business. The FRB may impose additional limitations or restrictions on our activities, including if the FRB believes that we do not have the appropriate financial and managerial resources to commence or conduct an activity or make an acquisition. Further, our subsidiary, Fiduciary Trust, is subject to extensive regulation, supervision and examination by the Federal Deposit Insurance Corporation and New York State Banking Department, while other subsidiaries are subject to oversight by the Office of Thrift Supervision and various state regulators. The laws and regulations imposed by these regulators generally involve restrictions and requirements in connection with a variety of technical, specialized, and expanding matters and concerns. For example, compliance with anti-money laundering and Know-Your-Customer requirements, both domestically and internationally, and the Bank Secrecy Act has taken on heightened importance with regulators as a result of efforts to, among other things, limit terrorism. At the same time, there has been increased regulation with respect to the protection of customer privacy and the need to secure sensitive customer information. As we continue to address these requirements or focus on meeting new or expanded ones, we may expend a substantial amount of time and resources, even though our banking/finance business does not constitute our dominant business sector. Any inability to meet these requirements, within the timeframes set by regulators, may subject us to sanctions or other restrictions by the regulators that could impact our broader business. Moreover, being subject to banking regulation may put us at a disadvantage compared to our competitors which are not subject to such requirements.

Regulatory and legislative actions and reforms have made the regulatory environment in which we operate more costly and future actions and reforms could adversely impact our assets under management, increase costs and negatively impact our profitability and future financial results. Since 2001, the federal securities laws have been augmented substantially and made significantly more complex by, among other measures, the Sarbanes-Oxley Act of 2002, the USA Patriot Act of 2001 and the Reform Act. Moreover, the adoption of new laws or regulations and changes in the interpretation or enforcement of existing laws or regulations have directly affected, and may continue to affect, our business. With new laws and changes in interpretation and enforcement of existing requirements, the associated time we must dedicate to, and related costs we must incur in, meeting the regulatory complexities of our business have increased. In particular, many provisions of the Reform Act require the adoption of rules to implement the Reform Act and mandate multiple studies, which could result in additional legislative or regulatory action. We may be required to invest significant management time and resources to address the various provisions of the Reform Act and the numerous regulations that are required to be issued under it. In addition, the SEC has proposed changes to Rule 12b-1 promulgated under the Investment Company Act of 1940, which could affect our ability to recover expenses relating to the distribution of our funds. Outlays associated with meeting regulatory complexities have also increased as we expand our business into new jurisdictions. Compliance activities to meet these and other new legal requirements have required us to expend additional time and resources, and, consequently, we are incurring increased costs of doing business, which potentially negatively impacts our profitability and future financial results. Moreover, any potential accounting or reporting error, whether financial or otherwise, if material, could damage our reputation, adversely affect our ability to conduct business, and decrease revenue and net income. Finally, any regulatory and legislative actions and reforms affecting the mutual fund industry, including compliance initiatives, may negatively impact revenues by increasing our costs of accessing or dealing in the financial markets or by making certain investment offerings less favorable to our customers.

Changes in tax laws or exposure to additional income tax liabilities could have a material impact on our financial condition, results of operations and liquidity. We are subject to income taxes as well as non-income based taxes, in both the United States and various foreign jurisdictions and are subject to ongoing tax audits in various jurisdictions. Tax authorities may disagree with certain positions we have taken and assess additional taxes. We regularly assess the likely outcomes of these audits in order to determine the appropriateness of our tax provision. However, there can be no assurance that we will accurately predict the outcomes of these audits, and the actual outcomes of these audits could have a material impact on our net income or financial condition. Changes in tax laws or tax rulings could materially impact our effective tax rate. For example, proposals for fundamental U.S. international tax reform, such as recent proposals by the Obama administration, if enacted, could increase the amount of taxes we are required to pay and have a significant adverse impact on our future results of operations and profitability.

Any significant limitation or failure of our software applications, technology or other systems that are critical to our operations could constrain our operations. We are highly dependent upon the use of various proprietary and third-party software applications and other technology systems to operate our business. We use our technology to, among other things, obtain securities pricing information, process client transactions, and provide reports and other customer services to the clients of the funds we manage. Any inaccuracies, delays, or systems failures in these and other processes could subject us to client dissatisfaction and losses. Although we take protective measures, including measures to effectively secure information through system security technology, our technology systems may still be vulnerable to unauthorized access, computer viruses or other events that have a security impact, such as an authorized employee or vendor inadvertently causing us to release confidential information, which could materially damage our operations or cause the disclosure or modification of sensitive or confidential information. Moreover, loss of confidential customer identification information could harm our reputation and subject us to liability under laws that protect confidential personal data, resulting in increased costs or loss of revenue.

Further, although we take precautions to password protect our laptops and other mobile electronic hardware, if such hardware is stolen, misplaced or left unattended, it may become vulnerable to hacking or other unauthorized use, creating a possible security risk and resulting in potentially costly actions by us. Most of the software applications that we use in our business are licensed from, and supported, upgraded and maintained by, third-party vendors. A suspension or termination of certain of these licenses or the related support, upgrades and maintenance could cause temporary system delays or interruption. In addition, we recently revised our operations such that the majority of the services previously performed by a third party vendor with respect to the operation of our U.S. data centers are now performed by us and by a separate third-party vendor. The failure by us or the new third-party vendor to adequately perform the services performed by the prior vendor could have an adverse impact on our business. Although we have in place certain disaster recovery plans, we may experience system delays and interruptions as a result of natural disasters, power failures, acts of war, and third-party failures. Technology is subject to rapid change and we cannot guarantee that our competitors may not implement more advanced Internet platforms for their products, which could affect our business. Potential system failures or breaches, or advancements in technology, and the cost necessary to address them, could result in material financial loss or costs, regulatory actions, breach of client contracts, reputational harm or legal claims and liability, which in turn could negatively impact our revenues and income.

Our investment management business operations are complex and a failure to properly perform operational tasks or the misrepresentation of our products and services could have an adverse effect on our revenues and income. Through our subsidiaries, we provide investment management and related services to funds and institutional, high net-worth and separately-managed accounts (collectively, our sponsored investment products). Our investment management and related services include fund administration, shareholder services, transfer agency, underwriting, distribution, custodial, trustee and other fiduciary services. In order to be competitive, we must properly perform our fund and portfolio administration and related responsibilities, including portfolio recordkeeping and accounting, security pricing, corporate actions, investment restrictions compliance, daily net asset value computations, account reconciliations, and required distributions to fund shareholders. In addition, the intentional or unintentional misrepresentation of our products and services in advertising materials, public relations information or other external communications could adversely affect our reputation and business prospects. Further, certain of our subsidiaries may act as general partner for various investment partnerships, which may subject them to liability for the partnerships' liabilities. If we fail to properly perform and monitor our investment management operations, our business could suffer and our revenues and income could be adversely affected.

We face risks, and corresponding potential costs and expenses, associated with conducting operations and growing our business in numerous countries. We sell mutual funds and offer investment management and related services in many different regulatory jurisdictions around the world, and intend to continue to expand our operations internationally. As we do so, we will continue to face challenges to the adequacy of our resources, procedures and controls to consistently and effectively operate our business. In order to remain competitive, we must be proactive and prepared to implement necessary resources when growth opportunities present themselves, whether as a result of a business acquisition or rapidly increasing business activities in particular markets or regions. As we grow, we face a heightened risk that the necessary resources and/or personnel will be unavailable to take full advantage of strategic opportunities when they appear or that strategic decisions can be efficiently implemented. Local regulatory environments may vary widely, as may the adequacy and sophistication of each. Similarly, local distributors, and their policies and practices as well as financial viability, may be inconsistent or less developed or mature. Notwithstanding potential long-term cost savings by increasing certain operations, such as transfer agent and other back-office operations, in countries or regions of the world with lower operating costs, growth of our international operations may involve near-term increases in expenses as well as additional capital costs, such as information, systems and technology costs and costs related to compliance with particular regulatory or other local requirements or needs. Local requirements or needs may also place additional demands on sales

and compliance personnel and resources, such as meeting local language requirements, while also integrating personnel into an organization with a single operating language. Finding and hiring additional, well-qualified personnel and crafting and adopting policies, procedures and controls to address local or regional requirements remain a challenge as we expand our operations internationally. Moreover, regulators in non-U.S. jurisdictions could also change their policies or laws in a manner that might restrict or otherwise impede our ability to distribute or register investment products in their respective markets. Any of these local requirements, activities, or needs could increase the costs and expenses we incur in a specific jurisdiction without any corresponding increase in revenues and income from operating in the jurisdiction. In addition, from time to time we enter into international joint ventures in which we may not have control. These investments in joint ventures may involve risks, including the risk that the controlling joint venture partner may have business interests, strategies or goals that are inconsistent with ours, and the risk that business decisions or other actions or omissions of the controlling joint venture partner or the joint venture company may result in harm to our reputation or adversely affect the value of our investment in the joint venture.

We depend on key personnel and our financial performance could be negatively affected by the loss of their services. The success of our business will continue to depend upon our key personnel, including our portfolio and fund managers, investment analysts, investment advisers, sales and management personnel and other professionals as well as our executive officers and business unit heads. Competition for qualified, motivated, and highly skilled executives, professionals and other key personnel in the asset management and banking/finance industries remains significant. Our success depends to a substantial degree upon our ability to attract, retain, and motivate qualified individuals, including through competitive compensation packages, and upon the continued contributions of these people. Regulations required to be adopted under the Reform Act as well as regulations under consideration outside the Reform Act, could impose restrictions on compensation paid by financial institutions, which could restrict our ability to compete effectively for qualified professionals. As our business grows, we are likely to need to increase correspondingly the overall number of individuals that we employ. Moreover, in order to retain certain key personnel, we may be required to increase compensation to such individuals, resulting in additional expense without a corresponding increase in potential revenue. We cannot assure you that we will be successful in attracting and retaining qualified individuals, and the departure of key investment personnel, in particular, if not replaced, could cause us to lose clients, which could have a material adverse effect on our financial condition, results of operations and business prospects.

Strong competition from numerous and sometimes larger companies with competing offerings and products could limit or reduce sales of our products, potentially resulting in a decline in our market share, revenues and net income. We compete with numerous asset management companies, mutual fund, stock brokerage, and investment banking firms, insurance companies, banks, savings and loan associations and other financial institutions. Our investment products also compete with products offered by these competitors as well as real estate investment trusts, hedge funds and others. The periodic establishment of new asset management companies and other competitors increases the competition that we face in our business. At the same time, consolidation in the financial services industry has created stronger competitors with greater financial resources and broader distribution channels than our own. Competition is based on various factors, including, among others, business reputation, investment performance, product mix and offerings, service quality and innovation, distribution relationships, and fees charged. Additionally, competing securities broker/dealers whom we rely upon to distribute and sell our mutual funds may also sell their own proprietary funds and investment products, which could limit the distribution of our investment products. To the extent that existing or potential customers, including securities broker/dealers, decide to invest in or distribute the products of our competitors, the sales of our products as well as our market share, revenues and net income could decline. Our ability to attract and retain assets under our management is also dependent on the relative investment performance of our funds and other managed investment portfolios, offering a mix of sponsored investment products that meets investor demand and our ability to maintain our investment management services fees at competitive levels.

Changes in the third-party distribution and sales channels on which we depend could reduce our revenues and hinder our growth. We derive nearly all of our fund sales through third-party broker/dealers and other similar investment advisers. Increasing competition for these distribution channels and regulatory initiatives have caused our distribution costs to rise and could cause further increases in the future or could otherwise negatively impact the distribution of our products. Higher distribution costs lower our net revenues and earnings. Additionally, consolidations in the broker/dealer industry could adversely impact our revenues and earnings. Moreover, if several of the major financial advisers who distribute our products were to cease operations or limit or otherwise end the distribution of our products, it could have a significant adverse impact on our revenues and earnings. There is no assurance we will continue to have access to the third-party broker/dealers and similar investment advisers that currently distribute our products, or continue to have the opportunity to offer all or some of our existing products through them. A failure to maintain strong business relationships with the major investment advisers who currently distribute our products may also impair our distribution and sales operations. Because we use broker/dealers and other similar investment advisers to sell our products, we do not control the ultimate investment recommendations given to clients. Any inability to access and successfully sell our products to clients through third-party distribution channels could have a negative effect on our level of assets under management, related revenues and overall business and financial condition.

Our increasing focus on international markets as a source of investments and sales of investment products subjects us to increased exchange rate and other risks in connection with earnings and income generated overseas. While we operate primarily in the United States, we also provide services and earn revenues in The Bahamas, Asia, Canada, Europe, Latin America, Africa, and Australia. As a result, we are subject to foreign exchange risk through our non-U.S. operations. Fluctuations in the exchange rates to the U.S. dollar may affect our financial results from one period to the next. While we have taken steps to reduce our exposure to foreign exchange risk, for example, by denominating a significant amount of our transactions in U.S. dollars, the situation may change in the future as our business continues to grow outside the United States. Appreciation of the U.S. dollar could moderate revenues from managing investment products internationally or could affect relative investment performance of certain funds invested in non-U.S. securities. In addition, we have risk associated with the foreign exchange revaluation of U.S. dollar balances held by certain non-U.S. subsidiaries for which the local currency is the functional currency. Separately, management fees that we earn tend to be higher in connection with international assets under management than with U.S. assets under management. Consequently, a downturn in international markets could have a significant effect on our revenues and income. Moreover, as our business grows in non-U.S. markets, any business, economic, social or political unrest affecting these markets, in addition to any direct consequences such as unrest may have on our personnel and facilities located in the affected area, may also have a more lasting impact on the long-term investment climate in these and other areas and, as a result, our assets under management and the corresponding revenues and income that we generate from them may be negatively affected.

Poor investment performance of our products could affect our sales or reduce the level of assets under management, potentially negatively impacting our revenues and income. Our investment performance, along with achieving and maintaining superior distribution and client services, is critical to the success of our investment management and related services business. Strong investment performance often stimulates sales of our investment products. Poor investment performance as compared to third-party benchmarks or competitive products could lead to a decrease in sales of investment products we manage and stimulate redemptions from existing products, generally lowering the overall level of assets under management and reducing the management fees we earn. We cannot assure you that past or present investment performance in the investment products we manage will be indicative of future performance. Any poor investment performance may negatively impact our revenues and income.

We could suffer losses in earnings or revenue if our reputation is harmed. Our reputation is important to the success of our business. We believe that our Franklin Templeton Investments brand has been, and continues to be, well received both in our industry and with our clients, reflecting the fact that our brand, like our business, is based in part on trust and confidence. If our reputation is harmed, existing clients may reduce amounts held in, or withdraw entirely from, funds that we advise or funds may terminate their management agreements with us, which could reduce the amount of assets under management and cause us to suffer a corresponding loss in earnings or revenue. Moreover, reputational harm may cause us to lose current employees and we may be unable to continue to attract new ones with similar qualifications, motivations, or skills. If we fail to address, or appear to fail to address, successfully and promptly the underlying causes of any reputational harm, we may be unsuccessful in repairing any existing harm to our reputation and our future business prospects would likely be affected.

Our future results are dependent upon maintaining an appropriate level of expenses, which is subject to fluctuation. The level of our expenses is subject to fluctuation and may increase for the following or other reasons: changes in the level and scope of our advertising expenses in response to market conditions; variations in the level of total compensation expense due to, among other things, bonuses, changes in our employee count and mix, and competitive factors; changes in expenses and capital costs, including costs incurred to maintain and enhance our administrative and operating services infrastructure or to cover uninsured losses and an increase in insurance expenses including through the assumption of higher deductibles and/or co-insurance liability.

Our ability to successfully integrate widely varied business lines can be impeded by systems and other technological limitations. Our continued success in effectively managing and growing our business depends on our ability to integrate the varied accounting, financial, information, and operational systems of our various businesses on a global basis. Moreover, adapting or developing our existing technology systems to meet our internal needs, as well as client needs, industry demands and new regulatory requirements, is also critical for our business. The constant introduction of new technologies presents new challenges to us. We have an ongoing need to continually upgrade and improve our various technology systems, including our data processing, financial, accounting, and trading systems. Further, we also must be proactive and prepared to implement technology systems when growth opportunities present themselves, whether as a result of a business acquisition or rapidly increasing business activities in particular markets or regions. These needs could present operational issues or require, from time to time, significant capital spending. It also may require us to reevaluate the current value and/or expected useful lives of our technology systems, which could negatively impact our results of operations.

Our inability to successfully recover should we experience a disaster or other business continuity problem could cause material financial loss, loss of human capital, regulatory actions, reputational harm, or legal liability. Should we experience a local or regional disaster or other business continuity problem, such as an earthquake, terrorist attack, pandemic or other natural or man-made disaster, our continued success will depend, in part, on the availability of our personnel, our office facilities, and the proper

functioning of our computer, telecommunication and other related systems and operations. While our operational size, the diversity of locations from which we operate, and our redundant back-up systems provide us with a strong advantage should we experience a local or regional disaster or other business continuity event, we could still experience near-term operational challenges, in particular depending upon how a local or regional event may affect our human capital across our operations or with regard to particular segments of our operations, such as key executive officers or personnel in our technology group. Moreover, as we grow our operations in new geographic regions, the potential for particular types of natural or man-made disasters, political, economic or infrastructure instabilities, or other country- or region-specific business continuity risks increases. Past disaster recovery efforts have demonstrated that even seemingly localized events may require broader disaster recovery efforts throughout our operations and, consequently, we regularly assess and take steps to improve upon our existing business continuity plans and key management succession. However, a disaster on a significant scale or affecting certain of our key operating areas within or across regions, or our inability to successfully recover should we experience a disaster or other business continuity problem, could materially interrupt our business operations and cause material financial loss, loss of human capital, regulatory actions, reputational harm, or legal liability.

Certain of the portfolios we manage, including our emerging market portfolios, are vulnerable to significant market-specific political, economic, or other risks, any of which may negatively impact our revenues and income. Our emerging market portfolios and revenues derived from managing these portfolios are subject to significant risks of loss from political, economic, and diplomatic developments, currency fluctuations, social instability, changes in governmental policies, expropriation, nationalization, asset confiscation and changes in legislation related to foreign ownership. International trading markets, particularly in some emerging market countries, are often smaller, less liquid, less regulated and significantly more volatile than those in the U.S.

Our revenues, earnings, and income could be adversely affected if the terms of our management agreements are significantly altered or these agreements are terminated by the funds and other sponsored investment products we advise. Our revenues are dependent on fees earned under investment management and related services agreements that we have with the funds and other sponsored investment products we advise. These revenues could be adversely affected if these agreements are altered significantly or terminated. The decline in revenue that might result from alteration or termination of our investment management services agreements could have a material adverse impact on our earnings or income.

Regulatory and governmental examinations and/or investigations, civil litigation relating to previously-settled regulatory and governmental investigations, and the legal risks associated with our business, could adversely impact our assets under management, increase costs and negatively impact our profitability and/or our future financial results. From time to time we may receive requests for documents or other information from governmental authorities or regulatory bodies or we also may become the subject of governmental or regulatory investigations and/or examinations. Moreover, governmental or regulatory investigations or examinations that have been inactive could become active. We may be obligated, and under our standard form of indemnification agreement with certain officers and directors in some instances, we are obligated, or we may choose, to indemnify directors, officers, or employees against liabilities and expenses they may incur in connection with such matters to the extent permitted under applicable law. In addition, we have been named as a defendant in mutual fund shareholder class action and fund derivative lawsuits, as well as in a corporate derivative lawsuit, that relate to previously settled regulatory and governmental investigations. While management believes that the claims made in these lawsuits are without merit, and intends to defend against them vigorously, litigation typically is an expensive process. Risks associated with legal liability often are difficult to assess or quantify and their existence and magnitude can remain unknown for significant periods of time. Moreover, settlements or judgments against us have the potential of being substantial if we are unsuccessful in settling or otherwise resolving matters early in the process and/or on favorable terms. Eventual exposures from and expenses incurred relating to current and future litigation, investigations, examinations and settlements could adversely impact our assets under management, increase costs and negatively impact our profitability and/or our future financial results. Judgments or findings of wrongdoing by regulatory or governmental authorities or in civil litigation against us could affect our reputation, increase our costs of doing business and/or negatively impact our revenues, any of which could have a material negative impact on our financial results.

Our ability to meet cash needs depends upon certain factors, including the market value of our assets, operating cash flows and our perceived credit worthiness. Our ability to meet anticipated cash needs depends upon factors such as the market value of our assets, our operating cash flows and our creditworthiness as perceived by lenders. If we are unable to obtain funds and financing, we may be forced to incur unanticipated costs or revise our business plans. Further, our access to the capital markets depends significantly on our credit ratings. A reduction in our long- or short-term credit ratings could increase our borrowing costs and limit our access to the capital markets. Volatility in the global financing markets may also impact our ability to access the capital markets should we seek to do so, and have an adverse affect on investors' willingness to purchase our securities, interest rates, credit spreads and the valuation levels of equity markets. If we are unable to obtain funds and financing, or access the capital markets in a timely manner, we may be forced to incur unanticipated costs or revise our business plans, and our business could be adversely impacted.

Diverse and strong competition limits the interest rates that we can charge on consumer loans. We compete with many types of institutions for consumer loans, certain of which can provide loans at significantly below-market interest rates or, in some cases, zero interest rates in connection with automobile sales. Our inability to compete effectively against these companies or to maintain our relationships with the various automobile dealers through whom we offer consumer loans could limit the growth of our consumer loan business. Economic and credit market downturns could reduce the ability of our customers to repay loans, which could cause losses to our consumer loan portfolio.

Our business could be negatively affected if we or our banking subsidiaries fail to remain well capitalized, and liquidity needs could affect our banking business. Our bank and thrift subsidiaries are subject to significant regulation and supervision, which includes minimum regulatory capital standards. Franklin is also subject to minimum regulatory capital standards because it is a bank holding company and financial holding company registered with the FRB under the Bank Holding Company Act of 1956. Franklin and its bank and thrift subsidiaries are currently well capitalized under applicable guidelines. However, our business could be negatively affected if Franklin or its bank or thrift subsidiaries failed to remain well capitalized. For example, because our bank and thrift subsidiaries are well capitalized and we otherwise qualify as a financial holding company, we are permitted to engage in a broader range of activities than are permitted to a bank holding company. Loss of financial holding company status would require that we either cease these broader activities or divest our bank subsidiaries if we desire to continue such activities. The banking regulators are authorized (and sometimes required) to impose a wide range of requirements, conditions, and restrictions on banks, thrifts, and bank holding companies that fail to maintain adequate capital levels. The Reform Act imposes more stringent capital, liquidity and leverage ratio requirements on bank holding companies which will apply to our business. In addition, liquidity needs could affect our banking business, which may be subject to an unanticipated large number of withdrawals as a result of a number of factors, such as changed or unstable economic conditions, adverse trends or events, business closings and lay-offs, rates paid by competitors, general interest rate levels, and returns available to clients on alternative investments. Our banking subsidiaries may be required from time to time to rely on secondary sources of liquidity, such as the sale of investment securities, FHLB and federal funds lines to enable them to meet such withdrawal demands. These secondary sources may not be sufficient to meet liquidity needs.

We are dependent on the earnings of our subsidiaries. Substantially all of our operations are conducted through our subsidiaries. As a result, our cash flow and our ability to fund operations are dependent upon the earnings of our subsidiaries and the distribution of earnings, loans or other payments by our subsidiaries. Our subsidiaries are separate and distinct legal entities and have no obligation to provide us with funds for our payment obligations, whether by dividends, distributions, loans or other payments. Any payments to us by our subsidiaries could be subject to statutory or contractual restrictions and are contingent upon our subsidiaries' earnings and business considerations.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

In the normal course of business, our financial position is subject to market risk, including, but not limited to, potential loss due to changes in the value of financial instruments including those resulting from adverse changes in interest rates, foreign currency exchange rates and market valuation. Financial instruments include, but are not limited to, investment securities, loans, deposits and debt obligations. Management is responsible for managing market risk. Our Enterprise Risk Management Committee is responsible for providing a framework to assist management to identify, assess, and manage market and other risks.

We are exposed to changes in interest rates, primarily through our investment in debt securities, outstanding debt, and our banking/finance segment. We minimize the impact of changes in interest rates related to our investments in debt securities by managing the maturities of these securities, and through diversification. We minimize the impact of changes in interest rates related to our outstanding debt by entering into financing transactions that ensure an appropriate mix of debt at fixed and variable interest rates. In addition, our banking/finance segment monitors the net interest rate margin and average maturity of interest earning assets and its funding sources. From time to time, we may enter into interest-rate swap agreements to mitigate interest rate exposure arising from the loans receivable portfolio.

At June 30, 2010, we have considered the potential impact of a 2% movement in market interest rates on our investment in debt securities, outstanding debt, and interest earning assets, net of interest-bearing liabilities of our banking/finance segment. Based on our analysis, we do not expect such a change to have a material impact on our operating revenues or results of operations in the next twelve months for each of these categories or in the aggregate.

We are subject to foreign currency exchange risk through our international operations. While we operate primarily in the United States, we also provide services and earn revenues in The Bahamas, Asia-Pacific, Canada, Europe, Latin America and Africa. Our exposure to foreign currency exchange risk is minimized in relation to our results of operations since a significant portion of these revenues are denominated in U.S. dollars. This situation may change in the future as our business continues to grow outside the United States and expenses incurred denominated in foreign currencies increase. Our exposure to foreign currency exchange risk in relation to our condensed consolidated balance sheet mostly relates to cash and cash equivalents and investments that are denominated in foreign currencies, primarily in Euro, Pound Sterling, Canadian Dollar, and Indian Rupee. These assets accounted for approximately 11% of the total cash and cash equivalents and investments at June 30, 2010. We also have exposure to foreign exchange revaluation of U.S. dollar balances held by certain non-U.S. subsidiaries for which their local currency is the functional currency. These assets accounted for approximately 3% of the total cash and cash equivalents and investments at June 30, 2010. We do not use derivative financial instruments to manage foreign currency exchange risk exposure. As a result, both positive and negative currency fluctuations against the U.S. dollar may affect our results of operations and accumulated other comprehensive income.

We are exposed to market valuation risks related to securities we hold that are carried at fair value and securities held by sponsored investment products that we consolidate, which are also carried at fair value.

The following table summarizes the effect of a 10% increase or decrease in the carrying values of our financial instruments that are subject to market valuation risks at June 30, 2010.

<i>(in thousands)</i>	Carrying Value	Carrying Value Assuming a 10% Increase	Carrying Value Assuming a 10% Decrease
Current			
Investment securities, trading	\$ 473,895	\$ 521,285	\$ 426,505
Investment securities, available-for-sale	895,394	984,933	805,855
Total Current	\$ 1,369,289	\$ 1,506,218	\$ 1,232,360
Banking/Finance			
Investment securities, trading	\$ 24,551	\$ 27,006	\$ 22,096
Investment securities, available-for-sale	430,243	473,267	387,219
Total Banking/Finance	\$ 454,794	\$ 500,273	\$ 409,315
Non-Current			
Investment securities, available-for-sale	\$ 104,121	\$ 114,533	\$ 93,709

Total	\$ 1,928,204	\$ 2,121,024	\$ 1,735,384
--------------	---------------------	---------------------	---------------------

To mitigate the market valuation risks, we maintain a diversified investment portfolio and, from time to time, we may enter into derivative agreements. Our exposure to these risks is also minimized as we sponsor a broad range of investment products in various global jurisdictions, which allows us to mitigate the impact of changes in any particular market(s) or region(s).

Our cash, cash equivalents and investments portfolio by investment objective at June 30, 2010 was as follows:

<i>(dollar amounts in thousands)</i>	Total Portfolio	Percent of Total Portfolio	Trading Securities Included in Portfolio	Percent of Total Trading Securities
Cash and Cash Equivalents	\$ 3,990,622	61%	\$ 0	0%
Investment Securities				
Equity

Other¹	645,544	10%	0	0%
Total Cash and Cash Equivalents and Investments	\$ 6,564,370	100%	\$ 498,446	100%

¹ Includes investments in equity method investees and other investments.

Investments categorized as investment securities, trading in our condensed consolidated balance sheets include securities held by consolidated sponsored investment products. These securities, which amounted to \$223.5 million at June 30, 2010, are generally assigned a classification in the table presented above based on the investment objective of the consolidated sponsored investment products holding the trading securities. Investment securities, trading also include securities held by our banking/finance operating segment, which amounted to \$24.6 million at June 30, 2010.

Item 4. Controls and Procedures.

The Company's management evaluated, with the participation of the Company's principal executive and principal financial officers, the effectiveness of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of June 30, 2010. Based on their evaluation, the Company's principal executive and principal financial officers concluded that the Company's disclosure controls and procedures as of June 30, 2010 were designed and are functioning effectively to provide reasonable assurance that the information required to be disclosed by the Company in reports filed under the Exchange Act is (i) recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and (ii) accumulated and communicated to management, including the principal executive and principal financial officers, as appropriate, to allow timely decisions regarding required disclosure.

There has been no change in the Company's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the Company's fiscal quarter ended June 30, 2010, that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings.

For a description of our legal proceedings, please see the description of our legal proceedings set forth in the Legal Proceedings section in Note 11 Commitments and Contingencies in the notes to the condensed consolidated financial statements in Item 1 of Part I of this Form 10-Q, which is incorporated herein by reference.

Item 1A. Risk Factors.

Our Form 10-K for the fiscal year ended September 30, 2009 includes a detailed discussion of the risk factors applicable to us, which are also set forth under the heading Risk Factors in Item 2 of Part I of this Form 10-Q, as updated since the filing of our Form 10-K to reflect certain material changes as set forth below in **bold**. Other than as set forth below in **bold**, there are no material changes from the risk factors as previously disclosed in our Form 10-K for the fiscal year ended September 30, 2009.

We are subject to extensive and complex, overlapping and frequently changing rules, regulations and legal interpretations. Our investment management and related services business and our banking/finance business are subject to extensive and complex, overlapping and frequently changing rules, regulations and legal interpretations in the countries in which we operate, including, among others, securities, banking, accounting and tax laws and regulations. **On July 21, 2010, President Obama signed into law the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the Reform Act). The Reform Act, as well as other legislative and regulatory changes, could impose additional restrictions and limitations on us and will likely result in increased scrutiny and oversight of our financial services and products.**

In addition, we are a bank holding company and a financial holding company subject to the supervision and regulation of the Federal Reserve Board (the FRB) and are subject to the restrictions, limitations, or prohibitions of the Bank Holding Company Act of 1956, as amended, and the Gramm-Leach-Bliley Act. **The provisions of the Reform Act are expected to have an impact on our banking/finance business. Significant aspects of the Reform Act relate to changes in the regulation of banks, thrifts, holding companies, and related institutions, including with respect to regulation and supervision in the banking industry and, the imposition of various restrictions and limitations on certain activities. The Reform Act includes a number of measures that increase capital and liquidity requirements, impose limits on leverage, and enhance supervisory authority and regulatory oversight of non-banking entities. We are not able to predict at this time the specific guidelines or regulations that may be adopted by regulatory agencies having authority over us or the impact that any changes in regulation would have on our business.** The FRB may impose additional limitations or restrictions on our activities, including if the FRB believes that we do not have the appropriate financial and managerial resources to commence or conduct an activity or make an acquisition. Further, our subsidiary, Fiduciary Trust, is subject to extensive regulation, supervision and examination by the Federal Deposit Insurance Corporation and New York State Banking Department, while other subsidiaries are subject to oversight by the Office of Thrift Supervision and various state regulators. The laws and regulations imposed by these regulators generally involve restrictions and requirements in connection with a variety of technical, specialized, and expanding matters and concerns. For example, compliance with anti-money laundering and Know-Your-Customer requirements, both domestically and internationally, and the Bank Secrecy Act has taken on heightened importance with regulators as a result of efforts to, among other things, limit terrorism. At the same time, there has been increased regulation with respect to the protection of customer privacy and the need to secure sensitive customer information. As we continue to address these requirements or focus on meeting new or expanded ones, we may expend a substantial amount of time and resources, even though our banking/finance business does not constitute our dominant business sector. Any inability to meet these requirements, within the timeframes set by regulators, may subject us to sanctions or other restrictions by the regulators that could impact our broader business. Moreover, being subject to banking regulation may put us at a disadvantage compared to our competitors which are not subject to such requirements.

Regulatory and legislative actions and reforms have made the regulatory environment in which we operate more costly and future actions and reforms could adversely impact our assets under management, increase costs and negatively impact our profitability and future financial results. Since 2001, the federal securities laws have been augmented substantially and made significantly more complex by, among other measures, the Sarbanes-Oxley Act of 2002, the USA Patriot Act of 2001 **and the Reform Act.** Moreover, the adoption of new laws or regulations and changes in the interpretation or enforcement of existing laws or regulations have directly affected, and may continue to affect, our business. With new laws and changes in interpretation and enforcement of existing requirements, the associated time we must dedicate to, and related costs we must incur in, meeting the regulatory complexities of our business have increased. **In particular, many provisions of the Reform Act require the adoption of rules to implement the Reform Act and mandate multiple studies, which could result in additional legislative or regulatory action. We may be required to invest significant management time and resources to address the various provisions of the Reform Act and the numerous regulations that are required to be issued under it. In addition, the SEC has proposed changes to Rule 12b-1 promulgated under the Investment Company Act of 1940, which could affect our ability to recover expenses relating to the distribution of our funds. Outlays associated with meeting regulatory complexities** have also increased as we expand our business into new jurisdictions. Compliance activities to meet these and other new legal requirements have required us to expend additional time and resources, and, consequently, we are incurring increased costs of doing business, which potentially negatively impacts our profitability and future financial results. Moreover, any potential accounting or reporting error, whether financial or otherwise, if material, could damage our reputation, adversely affect our ability to conduct business, and decrease revenue and net income. Finally, any regulatory and legislative actions and reforms affecting the mutual fund industry, including compliance initiatives, may negatively impact revenues by increasing our costs of accessing or dealing in the financial markets or by making certain investment offerings less favorable to our customers.

Changes in tax laws or exposure to additional income tax liabilities could have a material impact on our financial condition, results of operations and liquidity. We are subject to income taxes as well as non-income based taxes, in both the United States and various foreign jurisdictions and are subject to ongoing tax audits in various jurisdictions. Tax authorities may disagree with certain positions we have taken and assess additional taxes. We regularly assess the likely outcomes of these audits in order to determine the appropriateness of our tax provision. However, there can be no assurance that we will accurately predict the outcomes of these audits, and the actual outcomes of these audits could have a material impact on our net income or financial condition. Changes in tax laws or tax rulings could materially impact our effective tax rate. For example, proposals for fundamental U.S. international tax reform, such as recent proposals by the Obama administration, if enacted, **could increase the amount of taxes we are required to pay and** have a significant adverse impact on our future results of operations and profitability.

We depend on key personnel and our financial performance could be negatively affected by the loss of their services. The success of our business will continue to depend upon our key personnel, including our portfolio and fund managers, investment analysts, investment advisers, sales and management personnel and other professionals as well as our executive officers and business unit heads. Competition for qualified, motivated, and highly skilled executives, professionals and other key personnel in the asset management and banking/finance industries remains significant. Our success depends to a substantial degree upon our ability to attract, retain, and motivate qualified individuals, including through competitive compensation packages, and upon the continued contributions of these people. **Regulations required to be adopted under the Reform Act as well as regulations under consideration outside the Reform Act, could impose restrictions on compensation paid by financial institutions, which could restrict our ability to compete effectively for qualified professionals.** As our business grows, we are likely to need to increase correspondingly the overall number of individuals that we employ. Moreover, in order to retain certain key personnel, we may be required to increase compensation to such individuals, resulting in additional expense without a corresponding increase in potential revenue. We cannot assure you that we will be successful in attracting and retaining qualified individuals, and the departure of key investment personnel, in particular, if not replaced, could cause us to lose clients, which could have a material adverse effect on our financial condition, results of operations and business prospects.

Our increasing focus on international markets as a source of investments and sales of investment products subjects us to increased exchange rate and other risks in connection with earnings and income generated overseas. While we operate primarily in the United States, we also provide services and earn revenues in The Bahamas, Asia, Canada, Europe, Latin America, Africa, and Australia. As a result, we are subject to foreign exchange risk through our non-U.S. operations. Fluctuations in the exchange rates to the U.S. dollar may affect our financial results from one period to the next. While we have taken steps to reduce our exposure to foreign exchange risk, for example, by denominating a significant amount of our transactions in U.S. dollars, the situation may change in the future as our business continues to grow outside the United States. Appreciation of the U.S. dollar could moderate revenues from managing investment products internationally or could affect relative investment performance of certain funds invested in non-U.S. securities. **In addition, we have risk associated with the foreign exchange revaluation of U.S. dollar balances held by certain non-U.S. subsidiaries for which the local currency is the functional currency.** Separately, management fees that we earn tend to be higher in connection with international assets under management than with U.S. assets under management. Consequently, a downturn in international markets could have a significant effect on our revenues and income. Moreover, as our business grows in non-U.S. markets, any business, economic, social or political unrest affecting these markets, in addition to any direct consequences such as unrest may have on our personnel and facilities located in the affected area, may also have a more lasting impact on the long-term investment climate in these and other areas and, as a result, our assets under management and the corresponding revenues and income that we generate from them may be negatively affected.

Our business could be negatively affected if we or our banking subsidiaries fail to remain well capitalized, and liquidity needs could affect our banking business. Our bank and thrift subsidiaries are subject to significant regulation and supervision, which includes minimum regulatory capital standards. Franklin is also subject to minimum regulatory capital standards because it is a bank holding company and financial holding company registered with the FRB under the Bank Holding Company Act of 1956. Franklin and its bank and thrift subsidiaries are currently well capitalized under applicable guidelines. However, our business could be negatively affected if Franklin or its bank or thrift subsidiaries failed to remain well capitalized. For example, because our bank and thrift subsidiaries are well capitalized and we otherwise qualify as a financial holding company, we are permitted to engage in a broader range of activities than are permitted to a bank holding company. Loss of financial holding company status would require that we either cease these broader activities or divest our bank subsidiaries if we desire to continue such activities. The banking regulators are authorized (and sometimes required) to impose a wide range of requirements, conditions, and restrictions on banks, thrifts, and bank holding companies that fail to maintain adequate capital levels. **The Reform Act imposes more stringent capital, liquidity and leverage ratio requirements on bank holding companies which will apply to our business.** In addition, liquidity needs could affect our banking business, which may be subject to an unanticipated large number of withdrawals as a result of a number of factors, such as changed or unstable economic conditions, adverse trends or events, business closings and lay-offs, rates paid by competitors, general interest rate levels, and returns available to clients on alternative investments. Our banking subsidiaries may be required from time to time to rely on secondary sources of liquidity, such as the sale of investment securities, FHLB and federal funds lines to enable them to meet such withdrawal demands. These secondary sources may not be sufficient to meet liquidity needs.

In addition, the following risk factor has been deleted:

Our ability to maintain the beneficial tax treatment we anticipate with respect to non-U.S. earnings we have repatriated is based on current interpretations of the American Jobs Creation Act of 2004 (the Jobs Act) and permitted use of such amounts in accordance with our domestic reinvestment plan and the Jobs Act.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

The following table provides information with respect to the shares of Franklin's common stock we repurchased during the three months ended June 30, 2010.

Month	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
April 2010	84,912	\$ 112.94	84,912	6,781,812
May 2010	1,123,053	\$ 104.41	1,123,053	5,658,759
June 2010	928,466	\$ 92.00	928,466	4,730,293
Total	2,136,431		2,136,431	

Under our stock repurchase program, we can repurchase shares of Franklin's common stock from time to time in the open market and in private transactions in accordance with applicable laws and regulations, including without limitation applicable federal securities laws. From time to time we have announced the existence of and updates to the Company's continuing policy of repurchasing shares of its common stock, including the most recent announcements made in January 2008 and March 2009. At June 30, 2010, approximately 4.7 million shares of our common stock remained available for repurchase under our stock repurchase program. Our stock repurchase program is not subject to an expiration date. There were no unregistered sales of equity securities during the period covered by this report.

Item 6. Exhibits.

Exhibit No.	Description
Exhibit 3(i)(a)	Registrant's Certificate of Incorporation, as filed November 28, 1969, incorporated by reference to Exhibit (3)(i) to the Registrant's Annual Report on Form 10-K for the fiscal year ended September 30, 1994 (File No. 001-09318) (the 1994 Annual Report).
Exhibit 3(i)(b)	Registrant's Certificate of Amendment of Certificate of Incorporation, as filed March 1, 1985, incorporated by reference to Exhibit (3)(ii) to the 1994 Annual Report.
Exhibit 3(i)(c)	Registrant's Certificate of Amendment of Certificate of Incorporation, as filed April 1, 1987, incorporated by reference to Exhibit (3)(iii) to the 1994 Annual Report.
Exhibit 3(i)(d)	Registrant's Certificate of Amendment of Certificate of Incorporation, as filed February 2, 1994, incorporated by reference to Exhibit (3)(iv) to the 1994 Annual Report.
Exhibit 3(i)(e)	Registrant's Certificate of Amendment of Certificate of Incorporation, as filed on February 4, 2005, incorporated by reference to Exhibit (3)(i)(e) to the Registrant's Quarterly Report on Form 10-Q for the period ended December 31, 2004 (File No. 001-09318).
Exhibit 3(ii)	Registrant's Amended and Restated By-laws (as adopted and effective February 4, 2010), incorporated by reference to Exhibit 3.1 to the Registrant's Form 8-K filed with the SEC on February 5, 2010 (File No. 001-09318).
Exhibit 4	Second Supplemental Indenture dated as of May 20, 2010 by and between Registrant and The Bank of New York Mellon Trust Company, N.A., as Trustee, (inclusive of the form of global note of the Registrant's 2.000% Notes due 2013, the Registrant's 3.125% Notes due 2015 and the Registrant's 4.625% Notes due 2010), incorporated by reference to Exhibit 4.1 to the Registrant's Form 8-K filed with the SEC on May 20, 2010 (File No. 001-09318).
Exhibit 31.1	Certification of Chief Executive Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 (filed herewith).
