NOTE 1 NATURE OF BUSINESS

Ottawa Savings Bancorp, Inc. (the Company) was incorporated under the laws of the United States on July 11, 2005, for the purpose of serving as the holding company of Ottawa Savings Bank (the Bank), as part of the Bank s conversion from a mutual to a stock form of organization. The Company is a publicly traded banking company with assets of \$186.3 million at June 30, 2011 and is head quartered in Ottawa, Illinois.

In 2005, the Board of Directors of the Bank unanimously adopted a plan of conversion providing for the conversion of the Bank from an Illinois chartered mutual savings bank to a federally chartered stock savings bank and the purchase of all of the common stock of the Bank by the Company. The depositors of the Bank approved the plan at a meeting held in 2005.

In adopting the plan, the Board of Directors of the Bank determined that the conversion was advisable and in the best interests of its depositors and the Bank. The conversion was completed in 2005 when the Company issued 1,223,701 shares of common stock to Ottawa Savings Bancorp MHC (a mutual holding company), and 1,001,210 shares of common stock to the public. As of June 30, 2011, Ottawa Savings Bancorp MHC holds 1,223,701 shares of common stock, representing 57.7% of the Company s common shares outstanding.

The Bank s business is to attract deposits from the general public and use those funds to originate and purchase one-to-four family, multi-family and non-residential real estate, construction, commercial and consumer loans, which the Bank primarily holds for investment. The Bank has continually diversified its products to meet the needs of the community.

NOTE 2 BASIS OF PRESENTATION

The consolidated financial statements presented in this quarterly report include the accounts of the Company and the Bank. The consolidated financial statements of the Company have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and predominant practices followed by the financial services industry, and are unaudited. In the opinion of the Company s management, all adjustments, consisting of normal recurring adjustments, which the Company considers necessary to fairly state the Company s financial position and the results of operations and cash flows have been recorded. The interim financial statements should be read in conjunction with the audited financial statements and accompanying notes of the Company for the year ended December 31, 2010. Certain amounts in the accompanying financial statements and footnotes for 2010 have been reclassified with no effect on net income or stockholders equity to be consistent with the 2011 classifications. The results of the Company s operations for any interim period are not necessarily indicative of the results of the Company s operations for any other interim period or for a full fiscal year.

NOTE 3 USE OF ESTIMATES

The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect amounts reported in the consolidated financial statements. Changes in these estimates and assumptions are considered reasonably possible and may have a material impact on the consolidated financial statements and, thus, actual results could differ from the amounts reported and disclosed herein.

At June 30, 2011, there were no material changes in the Company s significant accounting policies from those disclosed in the Form 10-K filed with the Securities and Exchange Commission on March 30, 2011.

NOTE 4 CRITICAL ACCOUNTING POLICIES

We consider accounting policies involving significant judgments and assumptions by management that have, or could have, a material impact on the carrying value of certain assets or on income to be critical accounting policies. We consider the allowance for loan losses to be our critical accounting policy.

Allowance for Loan Losses. For all portfolio segments, the allowance for loan losses is an amount necessary to absorb known and inherent losses that are both probable and reasonably estimable through a provision for loan losses charged to earnings. Loan losses, for all portfolio segments, are charged against the allowance when management believes the uncollectability of a loan balance has been confirmed. Subsequent recoveries, if any, are credited to the allowance. For all portfolio segments, the allowance for loan losses is evaluated on a regular basis by management and is based upon management s periodic review by portfolio segment of the collectability of the loans in light of historical experience over the most recent eight quarters with heavier weighting given to most recent quarters, the nature and volume of the loan portfolio, adverse situations that may affect each borrower s ability to repay, the estimated value of any underlying collateral and prevailing economic conditions. This actual loss experience is supplemented with other economic factors based on risks present for each portfolio segment. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

A loan is considered impaired when, based on current information and events, it is probable that we will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower s prior payment record and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan by loan basis by either the present value of expected future cash flows discounted at the loan s effective interest rate, the loan s obtainable market price or the fair value of the collateral if the loan is collateral dependent.

NOTE 5 EARNINGS PER SHARE

Basic earnings per share is based on net income divided by the weighted average number of shares outstanding during the period, including allocated and committed-to-be-released Employee Stock Ownership Plan (ESOP) shares and vested Management Recognition Plan (MRP) shares. Diluted earnings per share show the dilutive effect, if any, of additional common shares issuable under stock options and awards.

On July 11, 2005, the Company adopted an ESOP for the benefit of substantially all employees. Upon adoption of the ESOP, the ESOP borrowed \$763,140 from the Company and used those funds to acquire 76,314 shares of the Company s stock in the initial public offering at a price of \$10.00 per share.

Shares purchased by the ESOP with the loan proceeds are held in a suspense account and are allocated to ESOP participants on a pro rata basis as principal and interest payments are made by the ESOP to the Company. The loan is secured by shares purchased with the loan proceeds and will be repaid by the ESOP with funds from the Company s discretionary contributions to the ESOP and earnings on the ESOP assets. Annual principal and interest payments of approximately \$77,000 are to be made by the ESOP.

^{**} The effect of share options was not included in the calculation of diluted earnings per share because to do so would have been anti-dilutive.

As shares are released from collateral, the Company will report compensation expense equal to the current market price of the shares, and the shares will become outstanding for earnings-per-share (EPS) computations. Dividends on allocated ESOP shares reduce retained earnings, and dividends on unallocated ESOP shares reduce accrued interest.

A terminated participant or the beneficiary of a deceased participant who received a distribution of employer stock from the ESOP has the right to require the Company to purchase such shares at their fair market value any time within 60 days of the distribution date. If this right is not exercised, an additional 60 day exercise period is available in the year following the year in which the distribution is made and begins after a new valuation of the stock has been determined and communicated to the participant or beneficiary. At June 30, 2011, 26,820 shares at a fair value of \$7.84 have been classified as mezzanine capital.

The following table reflects the status of the shares held by the ESOP:

Management evaluates securities for other-than-temporary impairment at least on a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. Consideration is given to (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, and (3) the intent and ability to retain and whether it is not more likely than not the Company will be required to sell its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. In analyzing an issuer s financial condition, management considers whether the securities are issued by the federal government or its agencies, whether downgrades by bond rating agencies have occurred, and industry analysts reports.

At June 30, 2011, two securities had unrealized losses with an aggregate depreciation of .88% from the Company s amortized cost basis. Because the decline in market value is attributable to changes in interest rates and not credit quality, and because the Company does not intend to sell these securities and it is not more likely than not the Company will be required to sell this security before recovery of the amortized cost basis,

which may be maturity, the Company does not consider these investments to be other than temporarily impaired at June 30, 2011.

Proceeds from the sales of securities were \$4.1 million and \$67,283 for the three months ended June 30, 2011 and 2010, respectively. There was \$275,139 in gross realized gains for the three months ended June 30, 2011 and no gross realized gains for the three months ended June 30, 2010. There were no gross realized losses for the three months ended June 30, 2011 and \$1,984 in gross realized losses for the three months ended June 30, 2010. The tax provision (benefit) applicable to these net realized gains and losses amounted to \$93,547 and \$(675), respectively.

Proceeds from the sales of securities were \$4.1 million and \$1.6 million for the six months ended June 30, 2011 and 2010, respectively. There was \$276,474 and \$24,367 in gross realized gains for the six months ended June 30, 2011 and 2010, respectively. There were no gross realized losses for the six months ended June 30, 2011 and \$24,789 in gross realized losses for the six months ended June 30, 2010. The tax provision (benefit) applicable to these net realized gains and losses amounted to \$93,547 and \$(143), respectively.
