FUND DISTRIBUTIONS AND MANAGED DISTRIBUTION PLAN

The Fund has a Managed Distribution Plan to pay 10% of the Fund's net asset value on an annualized basis. Distributions may represent earnings from net investment income, realized capital gains, or, if necessary, return of capital. The board believes that regular monthly, fixed cash payouts will enhance shareholder value and serve the long-term interests of shareholders. You should not draw any conclusions about the Fund's investment performance from the amount of the distributions or from the terms of the Fund's Managed Distribution Plan.

The Fund estimates that it has distributed more than its income and net realized capital gains in the fiscal year to date; therefore, a portion of your distributions may be a return of capital. A return of capital may occur, for example, when some or all of the money that you invested in the Fund is paid back to you. A return of capital distribution does not necessarily reflect the Fund's investment performance and should not be confused with "yield" or "income".

The amounts and sources of distributions reported in Section 19(a) notices of the 1940 Act are only estimates and are not being provided for tax reporting purposes. The actual amounts and sources of the amounts for tax reporting purposes will depend upon the Fund's investment experience during the remainder of its fiscal year and may be subject to changes based on tax regulations. The Fund will send shareholders a Form 1099-DIV for the calendar year that will tell you how to report distributions for federal income tax purposes.

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSR

The Board may amend, suspend or terminate the Managed Distribution Plan at any time, without prior notice to shareholders if it deems such action to be in the best interest of the Fund and its shareholders.

MARKET OVERVIEW AND OUTLOOK

EQUITY MARKET

After a tumultuous year that was among the most volatile on record, the domestic stock markets survived a sluggish U.S. economy, a spreading euro debt crisis, and a gridlocked Washington to end 2011 virtually where they started.

Propelled by a fourth-quarter boost of 11.9%/(1)/, the blue-chip Dow Jones Industrial Average closed the year at 12,217.56, an increase of 5.6%/(1)/, the third consecutive positive year for the Dow. The S&P 500, a broader gauge of market activity, climbed 11.1%/(1)/ in the final quarter and ended at 1,251.60, almost dead even with last year's 1,251.64 close. The technical 0.003%/(1)/ difference was its smallest annual move since 1970. The technology heavy Nasdaq Composite gained 7.8%/(1)/ in the fourth quarter but closed at 2,605.16, down 1.80%/(1)/ for the year.

The lack-luster domestic stock markets still outperformed the major international markets. The Dow Jones Global Index, excluding the U.S., tumbled 16.3%/(1)/ in 2011 while the STOXX Europe 600 Index fell 11.34%/(1)/. U.K.'s FTSE 100 Index dipped 5.6%/(1)/; Germany's DAX Index lost 15%/(1)/, its first annual decline since 2008. France's CAC 40 Index dropped 17%/(1)/ and Italy's FTSE MIB Index, down 26%/(1)/, was the biggest loser.

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSR

Back home, the Federal Reserve ("Fed") reduced its forecasts for U.S. economic growth. It predicted that the economy would grow 2.7% in 2012, well below its June projections of 3.3% to 3.7%. For 2013, the Fed now expects expansion of 3.2%, down from its previous estimates of 3.5%

2

to 4.2%. The Fed projected a gain of up to 4% in 2014.

The Central Bank also predicts that the U.S. unemployment rate will still be at least 8.5% at the end of this year, at least 7.8% at the end of 2013 and at least 6.7% to 7.6% by the fourth quarter of 2014.

There were several bright spots on the economic horizon. For one thing, the Labor Department reported that the private sector added 200,000 jobs in December, marking the sixth consecutive month of gains topping 100,000. As a result, the unemployment rate dipped to 8.5% from November's 8.7%, to its lowest level in nearly three years.

Another positive note was the report by the Institute of Supply Management ("ISM") that U.S. manufacturing expanded in December at its fastest pace in six months. ISM's closely watched gauge of factory activity climbed to 53.9 in December, up from 52.7 in November and its best reading since last June. Scores over 50 indicate expansion. The trade group also reported that its index of non-manufacturing or service industries rose to 52.6 in December from 52 in November, which was the lowest reading in nearly two years.

Housing, a vital factor in the economy, is showing signs of recovery. The Commerce Department reported that housing starts in November reached 685,000 units, up 9.3% from October and the highest level since April 2010. Building permits increased 5.7% to an annual rate of 681,000. The agency also reported that sales of new single-family homes rose 1.8% in November to a seasonally-adjusted 315,000 units, the highest total in seven months.

The Conference Board reported that its consumer confidence index spurted 10 points in December to just above the level of a year ago. Consumer spending, however, which accounts for about 70% of U.S. economic activity, inched up only 0.1% in November compared with October, according to the Commerce Department. Spending was restrained because disposable personal income was flat in November after increasing 0.3% in October.

Indications that inflation is slowing came from the Labor Department report that its consumer price index was unchanged in November from October. Deleting volatile food and energy prices, the index was up 2.7% in November. For the year to date, the rise was 2.2%, slightly above the Fed's preferred range of 2%. The agency also reported that its producer price index grew at a seasonally-adjusted 0.3% in November. Removing energy and food prices, the index was up by just 0.1%.

With U.S. imports declining more than exports, the trade deficit narrowed to \$43.5 billion in October against \$44.2 billion in September, according to the Commerce Department. Exports of goods totaled \$127 billion in October against

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSR

\$129.3 billion in September. Service exports of \$51.4 billion were unchanged from the prior month. Imports of goods came to \$186.6 billion for October against \$188.8 billion in September. Imports for services inched up to \$36.1 billion from \$36.0 billion. U.S. import prices, which had fallen 0.5% in October, grew 0.7% in November, the highest increase since April 2011.

Compared with most major market currencies, the dollar ended 2011 within roughly 3% of where it began the year. The ICE U.S. Dollar Index, which measures the greenback against a basket of other currencies, increased 1.5% in the year. Hitting a new low in the final days of the year, the euro closed at \$1.2960. The chief exception to the strong dollar was the yen. Despite a year of deep trouble in Japan, the yen ended more than 5% higher against the dollar. Climbing from 81.25 yen at the start of the year, the dollar fell to a record low near 75.8 yen in April and completed the year at 76.92 yen.

For information regarding the indexes cited, and key investment terms used in this report see page 7.

Last year was a disappointment for deal makers, with mergers and acquisitions declining after a strong start, according to Thomson Reuters. In the first six months of 2011, announced global deals came to \$1.3 trillion, the highest level since the financial crisis. However, deals slumped 14% in the second half, bringing the 2011 dollar volume to \$2.6 trillion, slightly below the 2010 figure of \$2.66 trillion.

The number of initial public offerings ("IPOs") and dollars raised was the lowest since 2009, according to Dealogic. Globally, there were 240 deals, raising \$25.3 billion, in the fourth quarter, the lowest deal volume since the third quarter of 2009 and the lowest dollar volume since the second quarter of 2009. For all of 2011, there were 1,243 IPOs, raising \$160 billion, again the lowest figures since 2009. For the third consecutive year, the world's leading exchange for IPOs was Hong Kong, with \$31 billion in deals. The volume of deals on the Chinese mainland slightly topped the combined total of Nasdaq and the New York Stock Exchange.

Based on current earnings estimates, Bloomberg News reported that stocks on the S&P 500 were trading at a price/earnings ratio of 13.24 on December 30, 2011. This compares with 11.94 on September 30 and 14.88 on December 30 last year. The P/Es for trailing twelve - month earnings were reported by S&P at 12.96 on December 30, 13.01 on September 30 and 15.01 on December 30, 2010. As we see it, the P/E's are neither terribly high nor terribly low. Given present market conditions, they appear to be in the normal range as far as valuations are concerned.

The current consensus among Wall Street research analysts is that S&P fourth-quarter earnings will climb 8.3% in 2011 to \$24.40, according to Thomson Reuters. In October the analysts were expecting 15% gains in the quarter. For all of 2012, the S&P earnings are projected to increase 10% to \$107.20.

Looking to the future, both analysts and investors were more bullish at the year's end, with analysts the most optimistic. Surveyed by Investors Intelligence, analysts stood at 50% bulls and 29% bears on December 30, a reversal of their position on September 30, which saw 37% bulls and 41% bears. At the end of 2011, analysts came to 56% bulls and 20% bears. Reported by the American Institute of Investors, their members totaled 41% bulls and 31% bears on December 30, 32% bulls and 47% bears on September 30, and 52% bulls and 20%

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSR

bears at the end of 2010.

Since the market had risen since early October, the increased optimism is no surprise. They may be right. From August to October, our sentiment indicators registered a lot of pessimism. While some of our current indicators still include some pretty bad numbers, our sentiment model reading overall is now neutral.

Among our other models, the monetary reading is bullish. That's because the Fed has driven interest rates to zero and is buying securities. However, we wonder how bullish it can really be when rates are at zero. As far as the tape is concerned, we consider the current action quite positive. It's difficult to know the tape's actual performance because of the distortions caused by the computer traders who account for more than half of the volume. There are far more unusual up and down days than we have seen in the past. Taking a long view, the tape is acting reasonably well. Our stance on the equity market at this writing is somewhat bullish.

BOND MARKET

The extreme volatility in equities globally, driven by the European debt crisis and worries regarding future economic growth, resulted in a very favorable background for the U.S. bond market, specifically Treasuries. The year began with the benchmark 10-year Treasury bond yielding 3.3% and ended with the yield at 1.88%. (When yields fall, prices rise.) The stunning 1.42 basis point drop in yields reflected an almost unbroken downward trend this year. The brief exception was a backup in October as global equities rallied sharply and optimism grew about a possible solution to the European debt crisis.

Generally, bonds did well because risk assets, such as stocks, endured high volatility and investors looked for a "safe haven" in the form of U.S. Treasury notes and bonds. With the exception of German bonds, most European bonds fared poorly, further directing money into U.S. Treasuries, the only seemingly stable asset. Even the S&P downgrade of U.S. Government debt in August from AAA to AA did nothing to stop the rising prices in the bond market and yields now stand at generational lows.

Ironically, the downgrade of the debt by S&P did more to sour the stock market and raise concerns over the ability of peripheral Europe to pay debt obligations than it did to hurt U.S. Treasuries, the one bond that was downgraded. The "flight to quality," regardless of the symbolic downgrade by the S&P, still bolsters U.S. Treasury bonds.

Further helping to push bond yields lower and prices higher was the ongoing concern over global economic growth. With the European woes, it is likely that the eurozone is already experiencing a recession. China has also slowed significantly and the concerns from mid-summer onward during 2011 were that the U.S. might slip into a double-dip recession.

While that fate seems to have passed for the time being, bonds have still continued to be a safety net, largely due to economic growth concerns. The political climate has been tense, both domestically and internationally, further fueling a "de-risking" by market participants. The upshot has been a

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSR

major confluence of reasons to see money flow into the perceived safest asset: U.S. Treasuries.

Our Fund largely maintained its positions in the bond portion, holding lower duration for Australian government bonds, Norwegian bonds, a few remaining corporate issues and Treasury Inflation Protected Securities (TIPS). The low duration of our bond portfolio was a hinderance to returns. However, exposure to both Norway and Australia had a positive effect.

The bond market remains very fluid and difficult, with uncertainties everywhere. The outcome for bonds during 2012 will very likely depend on how Europe deals with its budget woes, whether the U.S. can solve its own fiscal problems, and, ultimately, what economic growth occurs in the next several months.

Sincerely,

/s/Martin E. Zweig, Ph.D.

(1)Closing Price -- New York Stock Exchange.

(2)Total investment return is calculated assuming a purchase of a share of the Fund's common stock at the opening NYSE share price on the first business day and a sale at the closing NYSE share price on the last business day of each period reported. Dividends and distributions, if any, are assumed for the purpose of this calculation, to be reinvested at prices obtained under the Fund's Automatic Reinvestment and Cash Purchase Plan. Generally, total investment return based on net asset value will be higher than total investment return based on market value in periods where there is an increase in the discount or a decrease in the premium of the market value to the net assets from the beginning to the end of such years. Conversely, total investment return based on net asset value will be lower than total investment return based on market value in periods where there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of such periods.

(3)Computed using average shares outstanding

(4)Shares were sold at a 5% discount from a 5 day average market price from 5/14/07 to 5/18/07.

THE ZWEIG TOTAL RETURN FUND, INC.

NOTES TO FINANCIAL STATEMENTS

DECEMBER 31, 2011

NOTE 1 -- ORGANIZATION

The Zweig Total Return Fund, Inc. (the "Fund") is a closed-end, diversified management investment company registered under the Investment Company Act of 1940 (the "Act"). The Fund was incorporated under the laws of the State of Maryland on July 21, 1988. The Fund's investment objective is to seek the highest total return, consisting of capital appreciation and current income, consistent with the preservation of capital.

NOTE 2 -- SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The preparation of financial statements in conformity with accounting principals generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates and those differences could be significant.

A. SECURITY VALUATION:

Security Valuation procedures for the funds have been approved by the Board of Trustees. All internally fair valued securities referred to below are approved by a valuation committee appointed under the direction of the Board of Trustees.

The Fund utilizes a fair value hierarchy which prioritizes the inputs to

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSR

valuation techniques used to measure fair value into three broad levels.

- . Level 1 -- quoted prices in active markets for identical securities
- . Level 2 -- prices determined using other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- . Level 3 -- prices determined using significant unobservable inputs (including the valuation committee's own assumptions in determining the fair value of investments)

A description of the valuation techniques applied to the Fund's major categories of assets and liabilities measured at fair value on a recurring basis is as follows:

Equity securities are valued at the official closing price (typically last sale) on the exchange on which the securities are primarily traded, or if no closing price is available, at the last bid price and are categorized as Level 1 in the hierarchy. Restricted equity securities and private placements that are not widely traded, are illiquid or are internally fair valued by the valuation committee, are generally categorized as Level 3 in the hierarchy.

19

Certain foreign securities may be fair valued in cases where closing prices are not readily available or are deemed not reflective of readily available market prices. For example, significant events (such as movement in the U.S. securities market, or other regional and local developments) may occur between the time that foreign markets close (where the security is principally traded) and the time that the Fund calculates its net asset value (generally, the close of the NYSE) that may impact the value of securities traded in these foreign markets. In such cases the Fund fair values foreign securities using an external pricing service which considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, exchange-traded funds, and certain indexes as well as prices for similar securities. Such fair valuations are categorized as Level 2 in the hierarchy. Because the frequency of significant events is not predictable, fair valuation of certain foreign common stocks may occur on a frequent basis.

Debt securities, including restricted securities, are valued based on evaluated quotations received from independent pricing services or from dealers who make markets in such securities. For most bond types, the pricing service utilizes matrix pricing which considers yield or price of bonds of comparable quality, coupon, maturity, current cash flows, type, and current day trade information, as well as dealer supplied prices. These valuations are generally categorized as Level 2 in the hierarchy. Structured debt instruments such as mortgage-backed and asset-backed securities may also incorporate collateral analysis and utilize cash flow models for valuation and are generally categorized as Level 2 in the hierarchy. Pricing services do not provide pricing for all securities and therefore dealer supplied prices are utilized representing indicative bids based on pricing models used by market makers in the security and are generally categorized as Level 2 in the hierarchy. Debt securities that are not widely traded, are illiquid, or are internally fair valued by the valuation committee are generally categorized as Level 3 in the hierarchy.

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSR

Listed derivatives, such as options, that are actively traded are valued based on quoted prices from the exchange and are categorized as Level 1 in the hierarchy. Over the counter (OTC) derivative contracts, which include forward currency contracts and equity linked instruments are valued based on inputs observed from actively quoted markets and are categorized as Level 2 in the hierarchy.

Investments in open-end mutual funds are valued at their closing net asset value determined as of the close of business of the New York Stock Exchange (generally 4:00 p.m. Eastern time) each business day and are categorized as Level 1 in the hierarchy.

Short-term notes having a remaining maturity of 60 days or less are valued at amortized cost, which approximates market and are generally categorized as Level 2 in the hierarchy.

A summary of the inputs used to value the Fund's major categories of assets and liabilities, which primarily include investments of the Fund, by each major security type is disclosed at the end of the Schedule of Investments for the Fund. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

B. SECURITY TRANSACTIONS AND RELATED INCOME:

Security transactions are recorded on the trade date. Dividend income is recorded on the ex-dividend date, or in the case of certain foreign securities, as soon as the Fund is notified. Interest income is recorded on the accrual basis. The Fund amortizes premiums and accretes discounts using the effective interest method. Realized gains and losses are determined on the identified cost basis.

20

C. INCOME TAXES:

The Fund is treated as a separate taxable entity. It is the Fund's intention to comply with the requirements of Subchapter M of the Internal Revenue Code and to distribute substantially all of its taxable income to its shareholders. Therefore, no provision for federal income taxes or excise taxes has been made.

The Fund may be subject to foreign taxes on income, gains on investments or currency repatriation, a portion of which may be recoverable. The Fund will accrue such taxes and recoveries as applicable based upon current interpretations of the tax rules and regulations that exist in the markets in which it invests.

The Fund has adopted the authoritative guidance on accounting for and disclosure of uncertainty in tax positions, which requires the Fund to determine whether a tax position is more likely than not to be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. The Fund has determined that there was no effect on the financial statements from the adoption of this authoritative guidance. The Fund files tax returns as prescribed by the tax laws of the jurisdictions in which they operate. In the normal course of business, the Fund is subject to examination by federal, state and local jurisdictions, where applicable. As of December 31, 2011, the tax years that remain subject to examination by the major tax jurisdictions under the statute of limitations is from the year 2008 forward (with limited

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSR

exceptions).

D. DIVIDENDS AND DISTRIBUTIONS TO SHAREHOLDERS:

Distributions are recorded by the Fund on the ex-dividend date. Income and capital gain distributions are determined in accordance with income tax regulations, which may differ from accounting principles generally accepted in the United States of America. These differences may include the treatment of non-taxable dividends, market premium and discount, non-deductible expenses, expiring capital loss carryovers, foreign currency gain or loss, operating losses and losses deferred due to wash sales. Permanent book and tax basis differences relating to shareholder distributions will result in reclassifications to capital paid in on shares of beneficial interest.

The Fund has a Managed Distribution Plan to pay 10 percent of the Fund's net asset value ("NAV") on an annualized basis. Distributions may represent earnings from net investment income, realized capital gains, or, if necessary, return of capital. Shareholders should not draw any conclusions about the Fund's investment performance from the terms of the Fund's Managed Distribution Plan.

E. FOREIGN CURRENCY TRANSLATION:

Foreign securities and other assets and liabilities are valued using the foreign currency exchange rate effective at the end of the reporting period. Cost of investments is translated at the currency exchange rate effective at the trade date. The gain or loss resulting from a change in currency exchange rates between the trade and settlement dates of a portfolio transaction is treated as a gain or loss on foreign currency. Likewise, the gain or loss resulting from a change in currency exchange rates between the date income is accrued and paid is treated as a gain or loss on foreign currency. The Fund does not isolate that portion of the results of operations arising from changes in exchange rates and that portion arising from changes in the market prices of securities.

21

F. DERIVATIVE FINANCIAL INSTRUMENTS:

Disclosures on derivatives instruments and hedging activities are intended to improve financial reporting for derivative instruments by enhanced disclosure that enables the investors to understand how and why a fund uses derivatives, how derivatives are accounted for, and how derivative instruments affect a fund's results of operations and financial position. Summarized below is a specific type of derivative instrument used by the Fund.

OPTIONS CONTRACTS

An options contract provides the purchaser with the right, but not the obligation, to buy (call option) or sell (put option) a financial instrument at an agreed upon price. The Fund may purchase or write listed covered and uncovered put and call options on portfolio securities for hedging purposes or to facilitate the rapid implementation of investment strategies if the Fund anticipates a significant market or market sector advance. The Fund is subject to equity price risk in the normal course of pursuing its investment objectives. The Fund may use options contracts to hedge against changes in the values of equities.

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSR

When the Fund purchases an option, it pays a premium and an amount equal to that premium is recorded as an asset. When the Fund writes an option, it receives a premium and an amount equal to that premium is recorded as a liability. The asset or liability is adjusted daily to reflect the current market value of the option. Holdings of the Fund designated to cover outstanding written options are noted in the Schedules of Investments. Purchased options are reported as an asset within "Investment securities at value before written options" on the Statement of Assets and Liabilities. Options written are reported as a liability within "Written options outstanding at value". Changes in value of the purchased option is included in unrealized appreciation/(depreciation) on investments on the Statement of Investments. Changes in value of written options is included in unrealized appreciation/(depreciation) on written options.

If an option expires unexercised, the Portfolio realizes a gain or loss to the extent of the premium received or paid. If an option is exercised, the premium received or paid is recorded as an adjustment to the proceeds from the sale or the cost basis of the purchase. The difference between the premium and the amount received or paid on effecting a closing purchase or sale transaction is also treated as a realized gain or loss. Gain or loss on purchased options is included in net realized gain/(loss) on investment transactions on the Statement of Operations. Gain or loss on written options is presented separately as net realized gain/(loss) on written options transactions.

The risk in writing call options is that the Fund gives up the opportunity for profit if the market price of the security increases and the option is exercised. The risk in writing put options is that the Fund may incur a loss if the market price of the security decreases and the option is exercised. The risk in buying options is that the Fund pays a premium whether or not the option is exercised. The use of such instruments may involve certain additional risks as a result of unanticipated movements in the market. Writers (sellers) of options are subject to unlimited risk of loss, as the seller will be obligated to deliver or take delivery of the security at a predetermined price which may, upon exercise of the option, be significantly different from the then-market value.

G. SECURITY LENDING (\$ REPORTED IN THOUSANDS):

The Fund may loan securities to qualified brokers through an agreement with The Bank of New York Mellon ("BNY Mellon"). Under the terms of the agreement, the Fund is required to maintain collateral with a market value not less than 100% of the market value of loaned securities. Collateral is adjusted daily in connection with changes in the market value of securities on loan. Collateral may consist

22

of cash and U.S. Government Securities. Cash collateral is invested in a short-term money market fund. Dividends earned on the collateral and premiums paid by the broker are recorded as income by the Fund net of fees and rebates charged by BNY Mellon for its services in connection with this securities lending program. Lending portfolio securities involves a risk of delay in the recovery of the loaned securities or in the foreclosure on collateral.

NOTE 8 -- CREDIT RISK AND ASSET CONCENTRATIONS

In countries with limited or developing markets, investments may present greater risks than in more developed markets and the prices of such investments may be volatile. The consequences of political, social or economic changes in these markets may have disruptive effects on the market prices of these investments and the income they generate, as well as the Fund's ability to repatriate such amounts.

The Fund may invest a high percentage of its assets in specific sectors of the market in its pursuit of a greater investment return. Fluctuations in these sectors of concentration may have a greater impact on the Fund, positive or negative, than if the Fund did not concentrate its investments in such sectors.

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSR

At December 31, 2011, the Fund held 43% of its total investments in U.S. Government securities (includes 19% of U.S. Treasury Bills which are Short-term investments).

NOTE 9 -- REGULATORY EXAMS

Federal and state regulatory authorities from time to time make inquiries and conduct examinations regarding compliance by Virtus and its subsidiaries (collectively "the Company") with securities and other laws and regulations affecting their registered products.

There are currently no such matters which the Company believes will be material to these financial statements.

NOTE 10 -- FEDERAL INCOME TAX INFORMATION

(\$ REPORTED IN THOUSANDS)

At December 31, 2011, federal tax cost and aggregate gross unrealized appreciation (depreciation) of securities held by the Fund were as follows:

	FEDERAL TAX COST	UNREALIZED APPRECIATION	UNREALIZED DEPRECIATION	NET UNREALIZED APPRECIATION (DEPRECIATION)
	-----	-----	-----	-----
Investments.....	\$476,667	\$44,217	\$(9,376)	\$34,841
Written Options.....	(522)	48	(15)	33

Under the Regulated Investment Company Modernization Act of 2010 (the "Act"), net capital losses recognized for tax years beginning after December 22, 2010 may be carried forward indefinitely, and their character is retained as short-term and/or long-term losses. Previously, net capital losses were carried forward for eight years and treated as short-term losses. As a transition rule, the Act requires that post-enactment net capital losses be used before pre-enactment net capital losses.

Capital losses realized after October 31 and certain late year losses (e.g. foreign currency) may be deferred and treated as occurring on the first day of the following fiscal year. For the fiscal year ended December 31, 2011, the Fund deferred ordinary losses of \$45, and recognized post-October losses of \$218.

The components of distributable earnings on a tax basis (excluding unrealized appreciation (depreciation) which is disclosed in the table above) consist of undistributed ordinary income of \$0 and undistributed long-term capital gains of \$0.

The differences between the book and tax basis components of distributable earnings relate principally to the timing of recognition of income and gains for federal income tax purposes. Short-term gain distributions reported in the Statement of Changes in Net Assets, if any, are reported as ordinary income for federal tax purposes. Distributions are determined on a tax basis and may

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSR

differ from net investment income and realized capital gains for financial reporting purposes.

NOTE 11 -- RECLASSIFICATION OF CAPITAL ACCOUNTS

As of December 31, 2011, the Fund decreased undistributed net investment income by \$18, decreased the accumulated net realized loss by \$868, and decreased capital paid in on shares of beneficial interest by \$850.

26

NOTE 12 -- RECENT ACCOUNTING PRONOUNCEMENT

In May 2011, the Financial Accounting Standards Board issued Accounting Standards Update ("ASU") No. 2011-04 "Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs". ASU 2011-04 includes common requirements for measurement of and disclosure about fair value between U.S. GAAP and IFRS. ASU 2011-04 will require reporting entities to disclose quantitative information about the unobservable inputs used in the fair value measurements categorized within Level 3 of the fair value hierarchy. In addition, ASU 2011-04 will require reporting entities to make disclosures about amounts and reasons for all transfers in and out of Level 1 and Level 2 fair value measurements. The new and revised disclosures are effective for interim and annual reporting periods beginning after December 15, 2011. At this time, management is evaluating the implications of ASU No. 2011-04 and its impact on the financial statements has not been determined.

NOTE 13 -- SUBSEQUENT EVENT EVALUATIONS

Management has evaluated the impact of all subsequent events on the Fund through the date the financial statements were issued, and has determined that the following subsequent events require recognition or disclosure in these financial statements.

On March 1, 2012, the current investment services agreement with Zweig Consulting expired and was replaced with a new consulting agreement wherein Zweig Consulting would provide consulting services to the Adviser including the provision of general market and economic research, the provision of additional information based on Zweig Consulting's proprietary models and continued interaction with, and access to, Dr. Zweig and Zweig Consulting personnel.

AUTOMATIC REINVESTMENT AND CASH PURCHASE PLAN

The Zweig Total Return Fund, Inc. (the "Fund") allows you to conveniently reinvest distributions monthly in additional Fund shares thereby enabling you to compound your returns from the Fund. By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

ENROLLMENT IN THE REINVESTMENT PLAN

It is the policy of the Fund to automatically reinvest distributions payable to shareholders. A "registered" shareholder automatically becomes a participant in the Fund's Automatic Reinvestment and Cash Purchase Plan (the "Plan"). The Plan authorizes the Fund to credit all shares of common stock to participants upon a distribution regardless of whether the shares are trading at a discount or premium to the net asset value. Registered shareholders may terminate their participation and receive distributions in cash by contacting Computershare Trust Company, N.A. (the "Plan Administrator"). The termination will become effective with the next distribution if the Plan Administrator is notified at least 7 business days prior to the distribution payment date. Registered shareholders that wish to change their distribution option from cash payment to reinvest may do so by contacting the Plan Administrator at 1-800-272-2700.

In the case of banks, brokers, or other nominees which hold your shares for you as the beneficial owner, the Plan Administrator will administer the Plan based on the information provided by the bank, broker or nominee. To the extent that you wish to participate in the Plan, you should contact the broker, bank or nominee holding your shares to ensure that your account is properly represented. If necessary, you may have your shares taken out of the name of the broker, bank or nominee and register them in your own name.

HOW SHARES ARE PURCHASED THROUGH THE REINVESTMENT PLAN

When a distribution is declared, nonparticipants in the plan will receive cash. Participants in the Plan will receive shares of the Fund valued as described below:

If on the payable date of the distribution, the market price of the Fund's common stock is less than the net asset value, the Plan Administrator will buy Fund shares on behalf of the Participant in the open market, on the New York Stock Exchange (NYSE) or elsewhere. The price per share will be equal to the weighted average price of all shares purchased, including commissions. Commission rates are currently \$0.02 per share, although the rate is subject to change and may vary. If, following the commencement of purchases and before the Plan Administrator has completed its purchases, the trading price equals or exceeds the most recent net asset value of the common shares, the Plan Administrator may cease purchasing shares on the open market and the Fund may issue the remaining shares at a price equal to the greater of (a) the net asset value on the last day the Plan Administrator purchased shares or (b) 95% of the market price on such day. In the case where the Plan Administrator has terminated open market purchases and the Fund has issued the remaining shares, the number of shares received by the Participant in respect of the cash

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSR

distribution will be based on the weighted average of prices paid for shares

34

purchased in the open market and the price at which the Fund issued the remaining shares. Under certain circumstances, the rules and regulations of the Securities and Exchange Commission may require limitation or temporary suspension of market purchases of shares under the Plan. The Plan Administrator will not be accountable for its inability to make a purchase during such a period.

If on the payable date of the distribution, the market price is equal to or exceeds the net asset value, Participants will be issued new shares by the Fund at the greater of the (a) the net asset value on the payable date or (b) 95% of the market price on such date.

The automatic reinvestment of distributions will not relieve Participants of any income tax which may be payable on such distributions. A Participant in the Plan will be treated for federal income tax purposes, as having received on a payment date, a distribution in an amount equal to the cash the participant could have received instead of shares. If you participate in the Plan, you will receive a Form 1099-DIV concerning the Federal tax status of distributions paid during the year.

VOLUNTARY CASH PURCHASE PLAN

Participants in the Plan have the option of making additional cash payments for investment in shares of the Fund. Such payments can be made in any amount from \$100 per payment to \$3,000 per month. The Plan Administrator will use the funds received to purchase Fund shares in the open market on the 15th of each month or the next business day if the 15th falls on a weekend or holiday (the "Investment Date"). The purchase price per share will be equal to the weighted average price of all shares purchased on the Investment Date, including commissions. There is no charge to shareholders for Cash Purchases. The plan administrator's fee will be paid by the Fund. However, each participating shareholder will pay pro rata share of brokerage commissions incurred (currently \$0.02 per share, but may vary and is subject to change) with respect to the Plan Administrator's open market purchases in connection with all cash investments. POTENTIAL CONFLICTS OF INTERESTS

There may be certain inherent conflicts of interest that arise in connection with the Mr. Neel's and Mr. Dickerson's management of each Fund's investments and the investments of any other accounts they manage individually or together. Such conflicts could arise from the aggregation of orders for all accounts managed by a particular portfolio manager, the allocation of purchases across all such accounts, the allocation of IPOs and any soft dollar arrangements that the Adviser may have in place that could benefit the Funds and/or such other accounts. The Board of Trustees/Directors has adopted on behalf of the Funds policies and procedures designed to address any such conflicts of interest to ensure that all transactions are executed in the best interest of the Funds' shareholders. The Advisers and Sub adviser are required to certify their compliance with these procedures to the Board of Trustees on a quarterly basis. There have been no material compliance issues with respect to any of these policies and procedures during the Funds' most recent fiscal year ended December 31, 2011. Additionally, there are no material conflicts of interest between the investment strategy of a Fund and the investment strategy of other accounts managed by Mr. Neel and Mr. Dickerson since portfolio managers generally manage funds and other accounts having similar investment strategies.

(A) (3) COMPENSATION STRUCTURE OF PORTFOLIO MANAGER(S) OR MANAGEMENT TEAM MEMBERS

For the most recently completed fiscal year ended December 31, 2011, following is a description of Mr. Neel's and Mr. Dickerson's compensation structure as portfolio managers of ZA.

Virtus Investment Partners, Inc. and its affiliated investment management firms (collectively, "Virtus"), believe that the firm's compensation program is adequate and competitive to attract and retain high-caliber investment professionals. Investment professionals at Virtus receive a competitive base salary, an incentive bonus opportunity and a benefits package. Portfolio managers may also have the opportunity to participate in long-term equity programs, including potential awards of Virtus restricted stock units ("RSUs") with multi-year vesting, subject to Virtus board approval.

Following is a more detailed description of the compensation structure of the Fund's portfolio managers.

Base Salary. Each Portfolio Manager is paid a fixed base salary, which is designed to be competitive in light of the individual's experience and responsibilities. Base salary is determined using compensation survey results of investment industry compensation conducted by an independent third party in evaluating competitive market compensation for its investment management professionals.

Incentive Bonus. Annual incentive payments are based on targeted

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSR

compensation levels, adjusted based on profitability, investment performance factors and a subjective assessment of contribution to the team effort. The short-term incentive payment is generally paid in cash, but a portion may be made in Virtus RSUs. Individual payments are assessed using comparisons of actual investment performance compared with specific peer group or index measures. Performance of the funds managed is generally measured over one-, three- and five year periods and an individual manager's participation is based on the performance of each fund/account managed.

While portfolio manager compensation contains a performance component, this component is further adjusted to reward investment personnel for managing within the stated framework and for not taking unnecessary risks. This approach ensures that investment management personnel remain focused on managing and acquiring securities that correspond to a Fund's mandate and risk profile and are discouraged from taking on more risk and unnecessary exposure to chase performance for personal gain. We believe we have appropriate controls in place to handle any potential conflicts that may result from a substantial portion of portfolio manager compensation being tied to performance

Other Benefits. Portfolio managers are also eligible to participate in broad-based plans offered generally to employees of Virtus and its affiliates, including 401(k), health and other employee benefit plans.

In summary, the Investment Manager believes that overall compensation is both fair and competitive while rewarding employees for not taking unnecessary risks to chase personal performance.

(A) (4) DISCLOSURE OF SECURITIES OWNERSHIP

For the most recently completed fiscal year ended December 31, 2011, beneficial ownership of shares of the Fund by Messrs. Dickerson and Neel are as follows. Beneficial ownership was determined in accordance with rule 16a-1(a)(2) under the Securities Exchange Act of 1934 (17 CFR 240.161-1(a)(2)).
