Enclosed: News Release Oyu Tolgoi Project update

October 9, 2012

Press release

Turquoise Hill Resources provides update on Oyu Tolgoi Project

VANCOUVER, CANADA As construction at the Oyu Tolgoi Project is essentially complete and initial production is anticipated in the near term, Turquoise Hill Resources today provided investors an update on key elements of the project s development.

Power

Negotiations with Chinese authorities on a power purchase agreement (PPA) for the Oyu Tolgoi Project are actively progressing. Power from Inner Mongolia is required for full commissioning of the project and the commencement of production. Turquoise Hill remains optimistic that negotiations will result in a final PPA.

Once a final power agreement has been concluded, first ore is expected to be processed through the concentrator within six weeks. First concentrate production will follow within one month and the start of commercial production is expected three to five months thereafter.

Construction of the power transmission infrastructure in both Mongolia and China is complete. The power lines have been successfully tested with full power loads and are ready for use.

Investment Agreement

The Government of Mongolia s recently released Government Platform 2012 2016 specified that the Government will study to make amendments to the stability, investment and product-sharing agreements concluded with investors in the mining, energy, and petroleum sectors and will decide on amendments through mutual discussion with investors. The Investment Agreement is the cornerstone upon which Turquoise Hill has invested more than US\$5 billion in Oyu Tolgoi. Turquoise Hill and Rio Tinto s position is consistent with the Government of Mongolia s reaffirmation in October 2011 that the Investment Agreement was signed in full compliance with all laws and regulations of Mongolia.

Underground Feasibility Study

The Definitive Integrated Development and Operations Plan (DIDOP) underground feasibility study is ongoing and is now expected to be released in the first half of 2013. The study team is currently evaluating the optimum development plan and updating various sensitivity cases. Capital approvals for underground development will likely be approved in distinct stages.

Turquoise Hill continues to expect underground production at Oyu Tolgoi to commence in 2016.

Project Financing

Plans to secure US\$3 - \$4 billion of project financing for Oyu Tolgoi continue to progress with Rio Tinto leading the process. Financial terms are being reviewed by lenders and the Oyu Tolgoi environmental and social impact study was released in August 2012. Turquoise Hill now expects closing of final binding documentation in the first quarter of 2013 and funding in the first half of 2013.

About Turquoise Hill Resources

Turquoise Hill Resources (NYSE, NASDAQ & TSX: TRQ), formerly Ivanhoe Mines, is an international mining company focused on copper, gold and coal mines in the Asia Pacific region. The company s primary operation is its 66% interest in the Oyu Tolgoi copper-gold-silver mine development in southern Mongolia, which is expected to begin commercial production in the first half of 2013. Other assets include a 58% interest in Mongolian coal miner SouthGobi Resources (TSX: SGQ; HK: 1878); a 59% interest in copper-gold miner Ivanhoe Australia (ASX, TSX: IVA); and a 50% interest in Altynalmas Gold, a private company developing the Kyzyl Gold Project in Kazakhstan.
