PLUMAS BANCORP

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. GENERAL

During 2002, Plumas Bancorp (the Company) was incorporated as a bank holding company for the purpose of acquiring Plumas Bank (the Bank) in a one bank holding company reorganization. This corporate structure gives the Company and the Bank greater flexibility in terms of operation expansion and diversification. The Company formed Plumas Statutory Trust I (Trust I) for the sole purpose of issuing trust preferred securities on September 26, 2002. The Company formed Plumas Statutory Trust II (Trust II) for the sole purpose of issuing trust preferred securities on September 28, 2005.

The Bank operates eleven branches in California, including branches in Alturas, Chester, Fall River Mills, Greenville, Kings Beach, Portola, Quincy, Redding, Susanville, Tahoe City, and Truckee. The Bank's administrative headquarters is in Quincy, California. In addition, the Bank operates a loan administrative office in Reno, Nevada and a lending office specializing in government-guaranteed lending in Auburn, California. The Bank's primary source of revenue is generated from providing loans to customers who are predominately small and middle market businesses and individuals residing in the surrounding areas.

On July 21, 2010, President Barack Obama signed the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act), which, in part, permanently raised the current standard maximum deposit insurance amount to \$250,000. Amendments related to the enactment of the Dodd-Frank Act provide full deposit insurance coverage for noninterest bearing deposit transaction accounts beginning December 31, 2010 for a two year period.

2. REGULATORY MATTERS

On February 15, 2012, the Bank received notice from the Federal Deposit Insurance Corporation (FDIC) and the California Department of Financial Institutions (DFI) that the Consent Order (Order) with the FDIC and the DFI which was effective on March 16, 2011 had been terminated. While the Bank is no longer subject to an Order, the Bank has entered into an informal agreement with the FDIC and DFI which, among other things, requests that the Bank continue to maintain a Tier 1 Leverage Capital Ratio of 9% which is in excess of that required for well capitalized institutions and continue to reduce its level of classified asset balances that were outstanding as of September 30, 2011 to not more than 50% of Tier 1 Capital plus the allowance for loan losses. At September 30, 2012 this ratio was 37% down from 68% at December 31, 2011 and the Bank's tier 1 leverage capital ratio was 10.5%.

On July 28, 2011 the Company entered into an agreement with the Federal Reserve Bank of San Francisco (the FRB Agreement). Under the terms of the FRB Agreement, Plumas Bancorp has agreed to take certain actions that are designed to maintain its financial soundness so that it may continue to serve as a source of strength to the Bank. Among other things, the FRB Agreement requires prior written approval related to the payment or taking of dividends and distributions, making any distributions of interest, principal or other sums on subordinated debentures or trust preferred securities, incurrence of debt, and the purchase or redemption of stock. In addition, the FRB Agreement requires Plumas Bancorp to annually submit a written statement of Plumas Bancorp's planned sources and uses of cash for debt service, operating expense and other purposes (Cash Flow Statement). The Company has submitted the Cash Flow Statements within the required time frames.

3. CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

The condensed consolidated financial statements include the accounts of the Company and the accounts of its wholly-owned subsidiary, Plumas Bank. Plumas Statutory Trust I and Plumas Statutory Trust II are not consolidated into the Company's consolidated financial statements and, accordingly, are accounted for under the equity method. In the opinion of management, the unaudited condensed consolidated financial statements contain all adjustments (consisting of only normal recurring adjustments) necessary to present fairly the Company's financial position at September 30, 2012 and December 31, 2011 and its results of operations for the three-month and nine-month periods ended September 30, 2012 and 2011 and its cash flows for the nine-month periods ended September 30, 2012 and 2011. Our condensed consolidated balance sheet at December 31, 2011 is derived from audited financial statements. Certain reclassifications have been made to prior period's balances to conform to classifications used in 2012. These reclassifications had no impact on the Company's consolidated financial position, results of operations or net change in cash and cash equivalents.

The unaudited condensed consolidated financial statements of the Company have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) for interim reporting on Form 10-Q. Accordingly, certain disclosures normally presented in the notes to the annual consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) have been omitted. The Company believes that the disclosures are adequate to make the information not misleading. These interim financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's 2011 Annual Report to Shareholders on Form 10-K. The results of operations for the three-month and nine-month periods ended September 30, 2012 may not necessarily be indicative of future operating results. In preparing such financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheet and revenues and expenses for the periods reported. Actual results could differ significantly from those estimates.

Management has determined that because all of the commercial banking products and services offered by the Company are available in each branch of the Bank, all branches are located within the same economic environment and management does not allocate resources based on the performance of different lending or transaction activities, it is appropriate to aggregate the Bank branches and report them as a single operating segment. No single customer accounts for more than 10% of the revenues of the Company or the Bank.

4. INVESTMENT SECURITIES AVAILABLE FOR SALE

The amortized cost and estimated fair value of investment securities at September 30, 2012 and December 31, 2011 consisted of the following:

	Amortized Cost	September 30, 2012		Estimated Fair Value
		Gross Unrealized Gains	Gross Unrealized Losses	
Debt securities:				
U.S. Government-sponsored agencies	\$ 41,327,000	\$ 179,000	\$	\$ 41,506,000
U.S. Government-sponsored agencies collateralized by mortgage obligations	35,984,000	561,000		36,545,000
	\$ 77,311,000	\$ 740,000	\$	\$ 78,051,000

Unrealized gains on available-for-sale investment securities totaling \$740,000 were recorded, net of \$306,000 in tax expense, as accumulated other comprehensive income within shareholders' equity at September 30, 2012. During the nine months ended September 30, 2012, the Company sold twenty-five available-for-sale securities for total proceeds of \$20,773,000, which resulted in the recognition of a \$403,000 gain on sale. No securities were sold at a loss. During the nine months ended September 30, 2011 the Company sold twenty-five available-for-sale securities for \$27,351,000. The Company realized a gain on sale from twenty-three of these securities totaling \$636,000 and a loss on sale on two securities of \$24,000 resulting in the recognition of a \$612,000 net gain on sale. During the three months ended September 30, 2012, the Company sold seven available-for-sale securities for total proceeds of \$8,492,000, which resulted in the recognition of a \$191,000 gain on sale. No securities were sold at a loss during the three months ended September 30, 2012. No securities were sold during the three months ended September 30, 2011.

	December 31, 2011			Estimated Fair Value
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	
Debt securities:				
U.S. Government-sponsored agencies	\$ 32,708,000	\$ 92,000	\$ (23,000)	\$ 32,777,000
U.S. Government-sponsored agencies collateralized by mortgage obligations	24,941,000	251,000	(52,000)	25,140,000
	\$ 57,649,000	\$ 343,000	\$ (75,000)	\$ 57,917,000

Net unrealized gains on available-for-sale investment securities totaling \$268,000 were recorded, net of \$110,000 in tax expense, as accumulated other comprehensive income within shareholders' equity at December 31, 2011. During the year ended December 31, 2011 the Company sold twenty-seven available-for-sale securities for total proceeds of \$29,404,000. The Company realized a gain on sale from twenty-five of these securities totaling \$690,000 and a loss on sale on two securities of \$24,000 resulting in the recognition of a \$666,000 net gain on sale.

There were no investment securities with unrealized losses as of September 30, 2012.

Investment securities with unrealized losses at December 31, 2011 are summarized and classified according to the duration of the loss period as follows:

	Less than 12 Months	
	Fair Value	Unrealized Losses
Debt securities:		
U.S. Government-sponsored agencies	\$ 11,044,000	\$ 23,000
U.S. Government-sponsored agencies collateralized by mortgage obligations	9,144,000	52,000
	\$ 20,188,000	\$ 75,000

There were no securities in a loss position for more than one year at December 31, 2011.

The amortized cost and estimated fair value of investment securities at September 30, 2012 by contractual maturity are shown below. Expected maturities will differ from contractual maturities because the issuers of the securities may have the right to call or prepay obligations with or without call or prepayment penalties.

	Estimated Amortized Cost	Estimated Fair Value
After one year through five years	\$ 41,327,000	\$ 41,506,000
Investment securities not due at a single maturity date:		
Government-sponsored mortgage-backed securities	35,984,000	36,545,000
	\$ 77,311,000	\$ 78,051,000

Investment securities with amortized costs totaling \$44,849,000 and \$44,878,000 and estimated fair values totaling \$45,125,000 and \$45,149,000 at September 30, 2012 and December 31, 2011, respectively, were pledged to secure deposits and repurchase agreements.

5. LOANS AND THE ALLOWANCE FOR LOAN LOSSES

Outstanding loans are summarized below, in thousands:

	September 30, 2012	December 31, 2011
Commercial	\$ 28,018	\$ 30,235
Agricultural	37,610	38,868
Real estate residential	36,273	39,019
Real estate commercial	122,569	119,412
Real estate construction and land development	16,508	17,063
Equity lines of credit	37,785	37,581
Installment	2,637	2,515
Other	17,748	9,172
	299,148	293,865
Deferred loan costs, net	865	475
Allowance for loan losses	(5,527)	(6,908)
	\$ 294,486	\$ 287,432

Effective for the third quarter of 2012, the Company modified its method of estimating the allowance for loan losses for non-impaired loans. This modification incorporated historical losses from the beginning of the latest business cycle. Previously we utilized historical loss experience based on a rolling eight quarters ending with the most recently completed calendar quarter. This modification had the effect of increasing the required allowance related to the expanded historical loss period. The Company believes that, given the recent trend in historical losses, it was prudent to increase the period examined and that a full business cycle was the appropriate period.

The recorded investment in impaired loans totaled \$18,790,000 and \$24,402,000 at September 30, 2012 and December 31, 2011. The Company had specific allowances for loan losses of \$1,088,000 on impaired loans of \$7,028,000 at September 30, 2012 as compared to specific allowances for loan losses of \$2,066,000 on impaired loans of \$14,130,000 at December 31, 2011. The balance of impaired loans for which no specific reserves were required totaled \$11,761,000 and \$10,272,000 at September 30, 2012 and December 31, 2011, respectively. The average recorded investment in impaired loans for the nine months ended September 30, 2012 and September 30, 2011 was \$18,527,000 and \$27,405,000, respectively. The Company recognized \$370,000 and \$372,000 in interest income on impaired loans during the nine months ended September 30, 2012 and 2011, respectively. During the three months ended September 30, 2012 and 2011 the Company recognized interest income of \$39,000 and \$123,000, respectively.

Included in impaired loans are troubled debt restructurings. A troubled debt restructuring is a formal restructure of a loan where the Company for economic or legal reasons related to the borrower's financial difficulties, grants a concession to the borrower. The concessions may be granted in various forms, one or a combination of the following: a reduction of the stated interest rate of the loan; an extension of the maturity date at a stated rate of interest lower than the current market rate for new debt with similar risk; or a permanent reduction of the recorded investment in the loan. In order to determine whether a borrower is experiencing financial difficulty, an evaluation is performed of the probability that the borrower will be in payment default on any of its debt in the foreseeable future without the modification. This evaluation is performed under the Company's internal underwriting policy.

The carrying value of troubled debt restructurings at September 30, 2012 and December 31, 2011 was \$11,087,000 and \$12,188,000, respectively. The Company has allocated \$571,000 and \$1,164,000 of specific reserves on loans to customers whose loan terms have been modified in troubled debt restructurings as of September 30, 2012 and December 31, 2011, respectively. The Company has not committed to lend additional amounts on loans classified as troubled debt restructurings at September 30, 2012 and December 31, 2011.

During the three and nine month periods ended September 30, 2012, the terms of certain loans were modified as troubled debt restructurings. Modifications involving a reduction of the stated interest rate of the loan was for periods ranging from 1 month to 10 years. During the twelve month period ended December 31, 2011, the terms of certain loans were modified as troubled debt restructurings. Modifications involving a reduction of the stated interest rate of the loan were for periods ranging from 1 month to 2 years. For the periods described above, modifications involving an extension of the maturity date were for periods ranging from 1 month to 10 years.

Edgar Filing: PLUMAS BANCORP - Form 10-Q

The following table presents loans by class modified as troubled debt restructurings that occurred during the nine months ended September 30, 2012, dollars in thousands:

	Number of Loans	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment
Troubled Debt Restructurings:			
Commercial	1	\$ 24	\$ 24
Real estate residential	2	819	800
Real estate commercial	1	516	516
Real estate construction	2	180	180
Other	2	11	11
Total	8	\$ 1,550	\$ 1,531

The troubled debt restructurings described above decreased the allowance for loan losses by \$118,000 and resulted in no charge offs during the nine months ended September 30, 2012.

The following table presents loans by class modified as troubled debt restructurings that occurred during the three months ended September 30, 2012, dollars in thousands:

	Number of Loans	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment
Troubled Debt Restructurings:			
Other	2	\$ 11	\$ 11
Total	2	\$ 11	\$ 11

The troubled debt restructurings described above resulted in no allowance for loan losses or charge offs during the three months ended September 30, 2012.

The following table presents loans by class modified as troubled debt restructurings for which there was a payment default within twelve months following the modification during the nine months ended September 30, 2012.

	Number of Loans	Recorded Investment
Troubled Debt Restructurings:		
Real estate construction	1	\$ 2,978
Total	1	\$ 2,978

The following table presents loans by class modified as troubled debt restructurings that occurred during the twelve months ending December 31, 2011, dollars in thousands:

	Number of Loans	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded
--	--------------------	--------------------------------------------------------	----------------------------------------------

Edgar Filing: PLUMAS BANCORP - Form 10-Q

			Investment
Troubled Debt Restructurings:			
Commercial	2	\$ 129	\$ 129
Agricultural	4	996	996
Real estate-construction and land development	5	4,977	4,977
Equity lines of credit	1	787	787
Other	19	179	179
Total	31	\$ 7,068	\$ 7,068

The troubled debt restructurings described above increased the allowance for loan losses by \$132,000 and resulted in no charge offs during the year ending December 31, 2011.

The following table presents loans by class modified as troubled debt restructurings for which there was a payment default within twelve months following the modification during the year ending December 31, 2011:

	Number of Loans	Recorded Investment
Troubled Debt Restructurings:		
Agricultural	3	\$ 630,000
Real estate construction and land development	2	139,000
Equity lines of credit	1	787,000
Total	6	\$ 1,556,000

The troubled debt restructurings that subsequently defaulted described above increased the allowance for loan losses by \$81,000 and resulted in charge-offs of \$51,000 during the year ending December 31, 2011.

The terms of certain other loans were modified during the nine months ending September 30, 2012 that did not meet the definition of a troubled debt restructuring. These loans have a total recorded investment as of September 30, 2012 of \$5.3 million. The terms of certain other loans were modified during the year ending December 31, 2011 that did not meet the definition of a troubled debt restructuring. These loans have a total recorded investment as of December 31, 2011 of \$13.5 million.

These loans which were modified during the nine months ended September 30, 2012 and twelve months ended December 31, 2011 did not meet the definition of a troubled debt restructuring as the modification was a delay in a payment ranging from 30 days to 3 months that was considered to be insignificant or the borrower was not considered to be experiencing financial difficulties.

At September 30, 2012 and December 31, 2011, nonaccrual loans totaled \$14,991,000 and \$16,757,000, respectively. Interest foregone on nonaccrual loans totaled \$531,000 and \$560,000 for the nine months ended September 30, 2012 and 2011, respectively. Interest foregone on nonaccrual loans totaled \$181,000 and \$71,000 for the three months ended September 30, 2012 and 2011, respectively. Loans past due 90 days or more and on accrual status totaled \$37,000 and \$72,000 at September 30, 2012 and December 31, 2011, respectively.

Salaries and employee benefits totaling \$700,000 and \$495,000 have been deferred as loan origination costs during the nine months ended September 30, 2012 and 2011, respectively. Salaries and employee benefits totaling \$235,000 and \$197,000 have been deferred as loan origination costs during the three months ended September 30, 2012 and 2011, respectively.

The Company assigns a risk rating to all loans and periodically, but not less than annually, performs detailed reviews of all such loans over \$100,000 to identify credit risks and to assess the overall collectability of the portfolio. These risk ratings are also subject to examination by independent specialists engaged by the Company and the Company's regulators. During these internal reviews, management monitors and analyzes the financial condition of borrowers and guarantors, trends in the industries in which borrowers operate and the fair values of collateral securing these loans. These credit quality indicators are used to assign a risk rating to each individual loan.

The risk ratings can be grouped into five major categories, defined as follows:

Pass A pass loan is a strong credit with no existing or known potential weaknesses deserving of management's close attention.

Watch A Watch loan has potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or in the Company's credit position at some future date. Watch loans are not adversely classified and do not expose the Company to sufficient risk to warrant adverse classification.

Substandard A substandard loan is not adequately protected by the current sound worth and paying capacity of the borrower or the value of the collateral pledged, if any. Loans classified as substandard have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. Well defined weaknesses include a project's lack of marketability, inadequate cash flow or collateral support, failure to complete construction on time or the project's failure to fulfill economic expectations. They are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected.

Doubtful Loans classified doubtful have all the weaknesses inherent in those classified as substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently known facts, conditions and values, highly questionable and improbable.

Loss Loans classified as loss are considered uncollectible and charged off immediately.

6. COMMITMENTS AND CONTINGENCIES

The Company is party to claims and legal proceedings arising in the ordinary course of business. In the opinion of the Company's management, the amount of ultimate liability with respect to such proceedings will not have a material adverse effect on the financial condition or results of operations of the Company taken as a whole.

In the normal course of business, there are various outstanding commitments to extend credit, which are not reflected in the financial statements, including loan commitments of \$77,502,000 and \$79,164,000 and stand-by letters of credit of \$110,000 and \$50,000 at September 30, 2012 and December 31, 2011, respectively.

Of the loan commitments outstanding at September 30, 2012, \$3,819,000 are real estate construction loan commitments that are expected to fund within the next twelve months. The remaining commitments primarily relate to revolving lines of credit or other commercial loans, and many of these are expected to expire without being drawn upon. Therefore, the total commitments do not necessarily represent future cash requirements. Each loan commitment and the amount and type of collateral obtained, if any, are evaluated on an individual basis. Collateral held varies, but may include real property, bank deposits, debt or equity securities or business assets.

Stand-by letters of credit are conditional commitments written to guarantee the performance of a customer to a third party. These guarantees are primarily related to the purchases of inventory by commercial customers and are typically short-term in nature. Credit risk is similar to that involved in extending loan commitments to customers and accordingly, evaluation and collateral requirements similar to those for loan commitments are used. The deferred liability related to the Company's stand-by letters of credit was not significant at September 30, 2012 or December 31, 2011.

7. EARNINGS PER SHARE

Basic earnings per share is computed by dividing income available to common shareholders by the weighted average number of common shares outstanding for the period. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock, such as stock options, result in the issuance of common stock which shares in the earnings of the Company. The treasury stock method has been applied to determine the dilutive effect of stock options in computing diluted earnings per share.

(In thousands, except share and per share data)	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2012	2011	2012	2011
Net Income:				
Net income	\$ 546	\$ 371	\$ 1,403	\$ 696
Dividends and discount accretion on preferred shares	(171)	(171)	(513)	(513)
Net income available to common shareholders	\$ 375	\$ 200	\$ 890	\$ 183
Basic and Diluted Earnings Per share	\$ 0.08	\$ 0.04	\$ 0.19	\$ 0.04
Basic Weighted Average Number of Shares Outstanding:	4,776	4,776	4,776	4,776
Diluted Weighted Average Number of Shares Outstanding:	4,783	4,776	4,779	4,776

Shares of common stock issuable under stock options for which the exercise prices were greater than the average market prices were not included in the computation of diluted earnings per share due to their antidilutive effect. Stock options not included in the computation of diluted earnings per share, due to shares not being in-the-money and having an antidilutive effect, were 251,000 and 534,000 for the three month periods ended September 30, 2012 and 2011, respectively. Stock options not included in the computation of diluted earnings per share, due to shares not being in-the-money and having an antidilutive effect, were 327,000 and 534,000 for the nine month periods ended September 30, 2012 and 2011, respectively.

8. STOCK-BASED COMPENSATION

In 2001, the Company established a Stock Option Plan for which 462,680 shares of common stock remain reserved for issuance to employees and directors and no shares are available for future grants as of September 30, 2012. The Plan requires that the option price may not be less than the fair market value of the stock at the date the option is granted, and that the stock must be paid in full at the time the option is exercised. Payment in full for the option price must be made in cash or with Company common stock previously acquired by the optionee and held by the optionee for a period of at least six months. The Plan does not provide for the settlement of awards in cash and new shares are issued upon option exercise. The options expire on dates determined by the Board of Directors, but not later than ten years from the date of grant. Upon grant, options vest ratably over a three to five year period.

The Company determines the fair value of the options previously granted on the date of grant using a Black-Scholes-Merton option pricing model that uses assumptions based on expected option life, expected stock volatility and the risk-free interest rate. The expected volatility assumptions used by the Company are based on the historical volatility of the Company's common stock over the most recent period commensurate with the estimated expected life of the Company's stock options. The Company bases its expected life assumption on its historical experience and on the terms and conditions of the stock options it grants to employees. The risk-free rate is based on the U.S. Treasury yield curve for the periods within the contractual life of the options in effect at the time of the grant. The Company also makes assumptions regarding estimated forfeitures that will impact the total compensation expenses recognized under the Plan.

The fair value of each option is estimated on the date of grant using the following assumptions for options granted in 2011. No options were granted during the nine months ended September 30, 2012.

	Nine Months Ended September 30, 2011
Expected life of stock options	5.3 years
Risk-free interest rate	2.26%
Expected stock price volatility	46.1%
Dividend yield	3.05%
Weighted-average fair value of options granted during the period	\$ 0.99

During the nine months ended September 30, 2012, the Company recognized compensation costs of \$86,000 and an increase in future income tax benefit of \$1,000. During the nine months ended September 30, 2011, the Company recognized a net reversal of compensation cost related to a revision in the estimated forfeiture rate. This resulted in a credit to operating expense of \$46,000 and a reduction in the future income tax benefit of \$1,000.

Compensation cost related to stock options recognized in operating results was \$10,000 and \$18,000 for the quarters ended September 30, 2012 and 2011, respectively. The associated future income tax benefit recognized was \$0 and \$1,000 for the quarters ended September 30, 2012 and 2011 respectively.

The following table summarizes information about stock option activity for the nine months ended September 30, 2012:

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (in years)	Intrinsic Value (in thousands)
Options outstanding at December 31, 2011	482,780	\$ 8.74		
Options granted				
Options exercised				
Options cancelled	(20,100)	\$ 6.62		
Options outstanding at September 30, 2012	462,680	\$ 8.83	4.1	\$ 132
Options exercisable at September 30, 2012	303,687	\$ 11.90	2.8	\$ 34
Expected to vest after September 30, 2012	133,673	\$ 2.95	6.5	\$ 82

At September 30, 2012, there was \$97,000 of total unrecognized compensation cost related to non-vested stock option awards which is expected to be recognized over a weighted-average period of 2.5 years. The total fair value of options vested during the nine months ended September 30, 2012 was \$90,000.

9. INCOME TAXES

The Company files its income taxes on a consolidated basis with its subsidiary. The allocation of income tax expense represents each entity's proportionate share of the consolidated provision for income taxes. Differences arise between the Company's effective tax rate and applicable statutory rates due primarily to non-taxable sources of income and non-deductible sources of expenses.

Deferred tax assets and liabilities are recognized for the tax consequences of temporary differences between the reported amount of assets and liabilities and their tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The determination of the amount of deferred income tax assets which are more likely than not to be realized is primarily dependent on projections of future earnings, which are subject to uncertainty and estimates that may change given economic conditions and other factors. The realization of deferred income tax assets is assessed and a valuation allowance is recorded if it is "more likely than not" that all or a portion of the deferred tax asset will not be realized. More likely than not is defined as greater than a 50% chance. All available evidence, both positive and negative is considered to determine whether, based on the weight of that evidence, a valuation allowance is needed.

As part of its analysis, the Company considered the following positive evidence:

The Company's 2009 net loss was largely attributable to losses on its Construction and Land Development portfolio that represented approximately 80% of net charge-offs during the year ended December 31, 2009. This portfolio has decreased from \$74 million at December 31, 2008 to \$16.5 million at September 30, 2012.

The Company's 2009 net loss was also attributable to significant write-downs on foreclosed construction and land development real estate properties which represented the majority of its provision for losses on other real estate during 2009. During 2010 other real estate write-downs decreased by \$4.4 million from \$4.8 million during the year ended December 31, 2009 to \$356 thousand during 2010. Write-downs on construction and land development real estate owned during 2011 totaled \$440 thousand and during the nine months ended September 30, 2012 losses on construction and land development real estate owned totaled \$474 thousand.

Edgar Filing: PLUMAS BANCORP - Form 10-Q

The Company has a long history of earnings and profitability.

The Company has been profitable in 2012 and was profitable in 2011 and 2010. Additionally, the Company is projecting future taxable and book income will be generated by operations.

The volume of potential problem loans in the Company's pipeline has significantly decreased.

The Company does not have a history of net operating losses carry forwards or tax credits expiring unused.

As part of its analysis, the Company also considered the following negative evidence:

The Company recorded a large net loss in 2009 and is in a thirty-six month cumulative loss position. At September 30, 2012 total deferred tax assets were approximately \$7,000,000 and total deferred tax liabilities were approximately \$1,500,000 for a net deferred tax asset of \$5,500,000. The Company's deferred tax assets primarily relate to net operating loss carry-forwards and timing differences in the tax deductibility of the provision for loan losses, impairment charges on other real estate owned and deferred compensation. Based upon our analysis of available evidence, we have determined that it is more likely than not that all of our deferred income tax assets as of September 30, 2012 and December 31, 2011 will be fully realized and therefore no valuation allowance was recorded. On the consolidated balance sheet, net deferred tax assets are included in accrued interest receivable and other assets.

When tax returns are filed, it is highly certain that some positions taken would be sustained upon examination by the taxing authorities, while others are subject to uncertainty about the merits of the position taken or the amount of the position that would be ultimately sustained. The benefit of a tax position is recognized in the financial statements in the period during which, based on all available evidence, management believes it is more likely than not that the position will be sustained upon examination, including the resolution of appeals or litigation processes, if any. Tax positions taken are not offset or aggregated with other positions. Tax positions that meet the more-likely-than-not recognition threshold are measured as the largest amount of tax benefit that is more than 50 percent likely of being realized upon settlement with the applicable taxing authority. The portion of the benefits associated with tax positions taken that exceeds the amount measured as described above is reflected as a liability for unrecognized tax benefits in the accompanying balance sheet along with any associated interest and penalties that would be payable to the taxing authorities upon examination.

Interest expense and penalties associated with unrecognized tax benefits, if any, are classified as income tax expense in the consolidated statement of income. There have been no significant changes to unrecognized tax benefits or accrued interest and penalties for the quarter ended September 30, 2012.

10. FAIR VALUE MEASUREMENT

The Company measures fair value under the fair value hierarchy described below.

Level 1: Quoted prices for identical instruments traded in active exchange markets.

Level 2: Quoted prices (unadjusted) for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active and model-based valuation techniques for which all significant assumptions are observable or can be corroborated by observable market data.

Level 3: Model based techniques that use one significant assumption not observable in the market. These unobservable assumptions reflect the Company's estimates of assumptions that market participants would use on pricing the asset or liability. Valuation techniques include management judgment and estimation which may be significant.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls has been determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset or liability.

Management monitors the availability of observable market data to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

Edgar Filing: PLUMAS BANCORP - Form 10-Q

Management evaluates the significance of transfers between levels based upon the nature of the financial instrument and size of the transfer relative to total assets, total liabilities or total earnings.

Fair Value of Financial Instruments

The carrying amounts and estimated fair values of financial instruments, at September 30, 2012 and December 31, 2011 are as follows:

(Dollars in thousands)	Carrying Value	Fair Value Measurements at September 30, 2012 Using:			Total Fair Value
		Level 1	Level 2	Level 3	
Financial assets:					
Cash and cash equivalents	\$ 54,948	\$ 54,948			\$ 54,948
Investment securities	78,051		\$ 78,051		78,051
Loans, net	294,486			\$ 299,460	299,460
FHLB stock	1,950				N/A
Accrued interest receivable	1,648		192	1,456	1,648
Financial liabilities:					
Deposits	406,267	332,881	73,519		406,400
Repurchase Agreements	5,463		5,463		5,463
Junior subordinated deferrable interest debentures	10,310			3,564	3,564
Accrued interest payable	1,021	7	99	915	1,021

(Dollars in thousands)	Carrying Value	Fair Value Measurements at December 31, 2011 Using:			Total Fair Value
		Level 1	Level 2	Level 3	
Financial assets:					
Cash and cash equivalents	\$ 63,076	\$ 63,076			\$ 63,076
Investment securities	57,917		\$ 57,917		57,917
Loans, net	287,432			\$ 290,710	290,710
FHLB stock	2,043				N/A
Accrued interest receivable	1,638		241	1,397	1,638
Financial liabilities:					
Deposits	391,140	310,765	80,645		391,410
Repurchase Agreements	8,279		8,279		8,279
Junior subordinated deferrable interest debentures	10,310			3,079	3,079
Accrued interest payable	783	7	167	609	783

These estimates do not reflect any premium or discount that could result from offering the Company's entire holdings of a particular financial instrument for sale at one time, nor do they attempt to estimate the value of anticipated future business related to the instruments. In addition, the tax ramifications related to the realization of unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in any of these estimates.

The following methods and assumptions were used by management to estimate the fair value of its financial instruments:

Cash and cash equivalents: The carrying amounts of cash and short-term instruments approximate fair values and are classified as Level 1.

Investment securities: Fair values for securities available for sale are generally determined by matrix pricing, which is a mathematical technique widely used in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities' relationship to other benchmark quoted securities (Level 2).

Loans: Fair values of loans, excluding loans held for sale, are estimated as follows: For variable rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying values resulting in a Level 3 classification. Fair values for other loans are estimated using discounted cash flow analyses, using interest rates currently being offered for loans with similar terms to borrowers of similar credit quality resulting in a Level 3 classification. Impaired loans are valued at the lower of cost or fair value. The methods utilized to estimate the fair value of loans do not necessarily represent an exit price.

FHLB stock: It was not practicable to determine the fair value of the FHLB stock due to restrictions placed on its transferability.

Deposits: The fair values disclosed for demand deposits, including interest and non-interest demand accounts, savings, and certain types of money market account are, by definition, equal to the carrying amount at the reporting date resulting in a Level 1 classification. Fair values for fixed rate certificates of deposit are estimated using a discounted cash flows calculation that applies interest rates currently being offered on certificates to a schedule of aggregated expected monthly maturities on time deposits resulting in a Level 2 classification.

Repurchase agreements: The fair value of securities sold under repurchase agreements is estimated based on bid quotations received from brokers using observable inputs and are included as Level 2.

Junior subordinated deferrable interest debentures: The fair values of the Company's Subordinated Debentures are estimated using discounted cash flow analyses based on the current borrowing rates for similar types of borrowing arrangements resulting in a Level 3 classification.

Commitments to extend credit and letters of credit: The fair value of commitments are estimated using the fees currently charged to enter into similar agreements and are not significant and, therefore, not presented. Commitments to extend credit are primarily for variable rate loans and letters of credit.

Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding current economic conditions, risk characteristics of various financial instruments and other factors. Those estimates that are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision are included in Level 3. Changes in assumptions could significantly affect the fair values presented.

Edgar Filing: PLUMAS BANCORP - Form 10-Q

The following tables present information about the Company's assets and liabilities measured at fair value on a recurring and non-recurring basis as of September 30, 2012 and December 31, 2011, and indicates the fair value hierarchy of the valuation techniques utilized by the Company to determine such fair value:

Assets and liabilities measured at fair value on a recurring basis at September 30, 2012 are summarized below:

	Total Fair Value	Fair Value Measurements at September 30, 2012 Using Significant		Significant Unobservable Inputs (Level 3)
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Other Observable Inputs (Level 2)	
Assets:				
U.S. Government-sponsored agencies	\$ 41,506,000		\$ 41,506,000	
U.S. Government-sponsored agencies collateralized by mortgage obligations	36,545,000		36,545,000	
	\$ 78,051,000	\$	\$ 78,051,000	\$

Assets and liabilities measured at fair value on a recurring basis at December 31, 2011 are summarized below:

	Total Fair Value	Fair Value Measurements at December 31, 2011 Using Significant		Significant Unobservable Inputs (Level 3)
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Other Observable Inputs (Level 2)	
Assets:				
U.S. Government-sponsored agencies	\$ 32,777,000		\$ 32,777,000	
U.S. Government-sponsored agencies collateralized by mortgage obligations	25,140,000		25,140,000	
	\$ 57,917,000	\$	\$ 57,917,000	\$

The fair value of securities available-for-sale equals quoted market price, if available. If quoted market prices are not available, fair value is determined using quoted market prices for similar securities. There were no changes in the valuation techniques used during 2012 or 2011. Transfers between hierarchy measurement levels are recognized by the Company as of the beginning of the reporting period. There were no transfers between levels during the three and nine month periods ended September 30, 2012. During the year ended December 31, 2011, U.S. Government-sponsored agencies were transferred to Level 2 of the fair value hierarchy as the Company currently values these securities by relying on the securities' relationship to other benchmark quoted securities. Changes in fair market value are recorded in other comprehensive income.

Edgar Filing: PLUMAS BANCORP - Form 10-Q

Assets and liabilities measured at fair value on a non-recurring basis at September 30, 2012 are summarized below:

	Fair Value Measurements at September 30, 2012 Using				Total Losses
	Total Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Assets:					
Impaired loans:					
Commercial	\$ 3,292,000			\$ 3,292,000	\$ (293,000)
Agricultural	245,000			245,000	
Real estate residential	1,098,000			1,098,000	(158,000)
Real estate commercial	3,060,000			3,060,000	(225,000)
Real estate construction and land development	3,399,000			3,399,000	(767,000)
Equity lines of credit	1,014,000			1,014,000	(361,000)
Other					(2,000)
Total impaired loans	12,108,000			12,108,000	(1,806,000)
Other real estate:					
Real estate residential	564,000			564,000	(44,000)
Real estate commercial	1,953,000			1,953,000	(287,000)
Real estate construction and land development	2,475,000			2,475,000	(474,000)
Equity lines of credit	72,000			72,000	
Total other real estate	5,064,000			5,064,000	(805,000)
	\$ 17,172,000	\$	\$	\$ 17,172,000	\$ (2,611,000)

Edgar Filing: PLUMAS BANCORP - Form 10-Q

Assets and liabilities measured at fair value on a non-recurring basis at December 31, 2011 are summarized below:

	Fair Value Measurements at December 31, 2011 Using				Total Gains (Losses)
	Total Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Assets:					
Impaired loans:					
Commercial	\$ 2,942,000			\$ 2,942,000	\$ (315,000)
Agricultural	245,000			245,000	(250,000)
Real estate residential	2,558,000			2,558,000	(297,000)
Real estate commercial	3,701,000			3,701,000	(52,000)
Real estate construction and land development	4,070,000			4,070,000	(402,000)
Equity lines of credit	49,000			49,000	(100,000)
Installment					(1,000)
Other					
Total impaired loans	13,565,000			13,565,000	(1,417,000)
Other real estate:					
Real estate residential	644,000			644,000	(85,000)
Real estate commercial	5,021,000			5,021,000	(54,000)
Real estate construction and land development	2,958,000			2,958,000	(440,000)
Total other real estate	8,623,000			8,623,000	(579,000)
	\$ 22,188,000	\$	\$	\$ 22,188,000	\$ (1,996,000)

The Company has no liabilities which are reported at fair value.

The following methods were used to estimate fair value.

Impaired Loans: The fair value of collateral dependent impaired loans with specific allocations of the allowance for loan losses or loans that have been subject to partial charge-offs are generally based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value. Total losses of \$1,806,000 and \$1,417,000 represent impairment charges recognized during the nine months and year ended September 30, 2012 and December 31, 2011, respectively, related to the above impaired loans.

Other Real Estate: Nonrecurring adjustments to certain commercial and residential real estate properties classified as other real estate owned (OREO) are measured at fair value, less costs to sell. Fair values are based on recent real estate appraisals. These appraisals may use a single valuation approach or a combination of approaches including comparable sales and the income approach.

Appraisals for both collateral-dependent impaired loans and other real estate are performed by certified general appraisers (for commercial properties) or certified residential appraisers (for residential properties) whose qualifications and licenses have been reviewed and verified by the Company. Once received, a member of the Appraisal Department reviews the assumptions and approaches utilized in the appraisal as well as the overall resulting fair value in comparison

with independent data sources such as recent market data or industry-wide statistics. On a quarterly basis, the Company compares the actual selling price of similar collateral that has been liquidated to the most recent appraised value for unsold properties to determine what additional adjustment, if any, should be made to the appraisal value to arrive at fair value. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Management made no significant adjustments to third-party appraisals or other quantitative data with significant unobservable inputs for assets categorized as Level 3 to arrive at fair value as of September 30, 2012.

In certain cases we use discounted cash flow or similar internal modeling techniques to determine the fair value of our Level 3 assets and liabilities. Use of these techniques requires determination of relevant inputs and assumptions, some of which represent significant unobservable inputs. Accordingly, changes in these unobservable inputs may have a significant impact on fair value.

Certain of these unobservable inputs will (in isolation) have a directionally consistent impact on the fair value of the instrument for a given change in that input. Alternatively, the fair value of the instrument may move in an opposite direction for a given change in another input. Where multiple inputs are used within the valuation technique of an asset or liability, a change in one input in a certain direction may be offset by an opposite change in another input having a potentially muted impact to the overall fair value of that particular instrument. Additionally, a change in one unobservable input may result in a change to another unobservable input (that is, changes in certain inputs are interrelated to one another), which may counteract or magnify the fair value impact.

11. Adoption of New Accounting Standards

In May, 2011, the FASB issued an amendment to achieve common fair value measurement and disclosure requirements between U.S. and International accounting principles. Overall, the guidance is consistent with existing U.S. accounting principles; however, there are some amendments that change a particular principle or requirement for measuring fair value or for disclosing information about fair value measurements. The amendments in this guidance are effective for interim and annual reporting periods beginning after December 15, 2011. The effect of adopting this standard did not have a material effect on the Company's operating results or financial condition, but the additional disclosures are included in Note 10.

In June 2011, the FASB amended existing guidance and eliminated the option to present the components of other comprehensive income as part of the statement of changes in shareholders' equity. The amendment requires that comprehensive income be presented in either a single continuous statement or in two separate consecutive statements. The amendments in this guidance are effective as of the beginning of a fiscal reporting year, and interim periods within that year, that begins after December 15, 2011. Early adoption is permitted. The implementation of the amended accounting guidance changed the presentation of the components of comprehensive income for the Company from a component of the consolidated statement of shareholders' equity to a separate statement following the consolidated statement of income.

PART I FINANCIAL INFORMATION

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Certain matters discussed in this Quarterly Report are forward-looking statements that are subject to risks and uncertainties that could cause actual results to differ materially from those projected in the forward-looking statements. Such risks and uncertainties include, among others, (1) significant increases in competitive pressures in the financial services industry; (2) changes in the interest rate environment resulting in reduced margins; (3) general economic conditions, either nationally or regionally, maybe less favorable than expected, resulting in, among other things, a deterioration in credit quality; (4) changes in regulatory environment; (5) loss of key personnel; (6) fluctuations in the real estate market; (7) changes in business conditions and inflation; (8) operational risks including data processing systems failures or fraud; and (9) changes in securities markets. Therefore, the information set forth herein should be carefully considered when evaluating the business prospects of Plumas Bancorp (the Company).

When the Company uses in this Quarterly Report the words anticipate, estimate, expect, project, intend, commit, believe and similar, the Company intends to identify forward-looking statements. Such statements are not guarantees of performance and are subject to certain risks, uncertainties and assumptions, including those described in this Quarterly Report. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those anticipated, estimated, expected, projected, intended, committed or believed. The future results and stockholder values of the Company may differ materially from those expressed in these forward-looking statements. Many of the factors that will determine these results and values are beyond the Company's ability to control or predict. For those statements, the Company claims the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995.

INTRODUCTION

The following discussion and analysis sets forth certain statistical information relating to the Company as of September 30, 2012 and December 31, 2011 and for the nine and three month periods ended September 30, 2012 and 2011. This discussion should be read in conjunction with the condensed consolidated financial statements and related notes included elsewhere in this Quarterly Report on Form 10-Q and the consolidated financial statements and notes thereto included in Plumas Bancorp's Annual Report filed on Form 10-K for the year ended December 31, 2011.

Plumas Bancorp trades on The NASDAQ Capital Market under the ticker symbol PLBC.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

There have been no changes to the Company's critical accounting policies from those disclosed in the Company's 2011 Annual Report to Shareholders on Form 10-K.

This discussion should be read in conjunction with our unaudited condensed consolidated financial statements, including the notes thereto, appearing elsewhere in this report.

OVERVIEW

The Company recorded net income of \$1.4 million for the nine months ended September 30, 2012, up \$707 thousand from net income of \$696 thousand during the nine months ended September 30, 2011. The largest components of this increase were a \$988 thousand reduction in non-interest expense and an \$800 thousand reduction in the provision for loan losses. Additionally, net interest income increased by \$193 thousand. The effect of these items was partially offset by a decline in non-interest income of \$710 thousand and an increase in the provision for income taxes of \$564 thousand. The decline in non-interest income was related to a reduction in gains on sale of government guaranteed loans of \$742 thousand and a reduction in gain on sale of investment securities of \$209 thousand.

Interest income in the nine month periods declined by \$286 thousand related to a decline in yield on investment securities resulting in a \$282 thousand decline in interest income on investments. The decline in interest income was offset by a decline in interest expense of \$479 thousand as interest on time deposits declined by \$474 thousand related to a decrease in the rate paid and average balance. Non-interest expense benefited from a \$435 thousand decline in salary and benefit expense, a \$389 thousand decrease in FDIC insurance expense, a \$189 thousand decrease in Other Real Estate Owned (OREO) expense and a \$600 thousand reduction in loss on sale of OREO partially offset by a \$468 thousand increase in the provision for changes in valuation of OREO. Pre-tax earnings increased by \$1.3 million from \$923 thousand during the three months ended September 30, 2011 to \$2.2 million during the current nine month period. The provision for income taxes increased from \$227 thousand during the 2011 period to \$791 thousand during the current nine month period.

Net income allocable to common shareholders increased from \$183 thousand or \$0.04 per share during the nine months ended September 30, 2011 to \$890 thousand or \$0.19 per share during the current nine month period. Income allocable to common shareholders is calculated by subtracting dividends and discount amortized on preferred stock from net income.

Total assets at September 30, 2012 were \$470 million, an increase of \$14.7 million from \$455 million at December 31, 2011. A decline in cash and cash equivalents of \$8.1 million and an increase in deposits of \$15.1 million were used to fund an increase in investment securities of \$20.1 million and loans of \$7.1 million. Net loan balances increased from \$287.4 million at December 31, 2011 to \$294.5 million at September 30, 2012 and investment securities increased from \$57.9 million at December 31, 2011 to \$78.0 million at September 30, 2012. OREO and Other Vehicles Owned (OVO) declined by \$3.6 million and all other assets declined by \$0.7 million.

Deposits increased by \$15.1 million from \$391 million at December 31, 2011 to \$406 million at September 30, 2012. Non-interest bearing demand deposits increased by \$11.1 million and savings and money market accounts increased by \$12.5 million. Interest bearing transaction accounts (NOW) accounts decreased by \$1.5 million and time deposits declined by \$7.0 million. Partially offsetting this increase in deposits was a decline of \$2.8 million in repurchase agreements. Shareholders' equity increased by \$1.8 million from \$39.6 million at December 31, 2011 to \$41.4 million at September 30, 2012.

The annualized return on average assets was 0.41% for the nine months ended September 30, 2012 up from 0.20% for the nine months ended September 30, 2011. The annualized return on average common equity was 4.1% for the nine months ended September 30, 2012 up from 0.9% for the nine months ended September 30, 2011.

RESULTS OF OPERATIONS FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2012

Net interest income before provision for loan losses. Net interest income, on a nontax-equivalent basis, for the nine months ended September 30, 2012 was \$12.75 million, an increase of \$193 thousand from the \$12.56 million earned during the same period in 2011. The largest components of the increase in net interest income were a decline in the average balance and rate paid on time deposits, an increase in yield on the Company's loan portfolio and an increase in the average balance of investment securities. These items were mostly offset by a decline in yield in investment securities and a decline in the average balance of loans. Net interest margin for the nine months ended September 30, 2012 increased 14 basis points, or 3%, to 4.20%, up from 4.06% for the same period in 2011.

Interest income decreased by \$286 thousand or 2%, to \$13.7 million for the nine months ended September 30, 2012 primarily as a result of a decline in the average balance on loans and a decline in yield on investment securities. Interest and fees on loans increased by \$11 thousand to \$13.0 million for the nine months ended September 30, 2012. This increase resulted from an increase in loan yield mostly offset by a decline in average loan balances. The Company's average loan balances were \$300.0 million for the nine months ended September 30, 2012, down \$5 million, or 2%, from \$305 million for the same period in 2011. The decline in loan balances includes net charge-offs which totaled \$3.6 million from October 1, 2011 to September 30, 2012 as well as \$1.0 million in loans transferred to OREO. The average rate earned on the Company's loan balances increased by 10 basis points to 5.80% during the first nine months of 2012 compared to 5.70% during the first nine months of 2011. The increase in loan yield reflects a decrease in nonaccruing loan balances which averaged \$14.7 million during the nine months ended September 30, 2012 and \$21.6 million during the same period in 2011. Interest income on investment securities decreased by \$282 thousand related to a decline in yield of 78 basis points from 2.07% to 1.29%, partially offset by an increase in average balance from \$60.1 million during the nine months ended September 30, 2011 to \$66.9 million during the current nine month period. The decline in yield is primarily related to the replacement of matured, called and sold investment securities with new investments with market yields below those which they replaced. Interest income on other interest-earning assets, which totaled \$76 thousand in 2012 and \$91 thousand in 2011, mostly relates to interest on cash balances held at the Federal Reserve.

Interest expense on deposits decreased by \$536 thousand, or 44%, to \$673 thousand for the nine months ended September 30, 2012, down from \$1.2 million for the same period in 2011. This decrease primarily relates to decreases in the average balance and rate paid on time deposits and NOW accounts and a decline in the rate paid on money market accounts.

Interest on time deposits declined by \$474 thousand. Average time deposits declined by \$24.5 million from \$102.0 million during the first nine months of 2011 to \$77.5 million during the nine months ended September 30, 2012. The decrease in time deposits is substantially related to a promotional time deposit product we began offering in June, 2009 and continued to offer until April 30, 2010. These promotional time deposits, which totaled \$4 million at September 30, 2011, had all matured prior to January 1, 2012. In addition, the Bank has held down the rate paid on time deposits in 2012 as it has excess liquidity and does not need to pay for deposits at above market rates. The average rate paid on promotional deposits during the nine months ended September 30, 2011 was 2%. The average rate paid on time deposits decreased from 1.17% during the first nine months of 2011 to 0.72% during the current nine month period. This decrease primarily relates to a decline in market rates in the Company's service area and the maturity of the higher rate promotional deposits.

Interest expense on NOW accounts declined by \$63 thousand. Rates paid on NOW accounts declined by 7 basis points from 0.21% during the first nine months of 2011 to 0.14% during the same period in 2012, mostly related to a decline in higher rate public sweep accounts. Public sweep accounts declined from \$23.3 million at September 30, 2011 to \$14.0 million at September 30, 2012 and are the primary reason for the decline in average balance in NOW deposits from \$95.7 million during the nine months ended September 30, 2011 to \$83.0 million during the current nine month period.

Interest expense on money market accounts decreased by \$20 thousand related to a decrease in rate paid on these accounts of 7 basis points from 0.30% during the nine months ended September 30, 2011 to 0.23% during the current nine month period. This was primarily related to our money market sweep product which paid rates in excess of those offered on our other money market products. We no longer offer the money market sweep account having replaced it with a product that utilizes repurchase agreements during the third quarter of 2011. Interest expense on savings accounts increased by \$21 thousand related to an increase in average balance from \$57.9 million during the nine months ended September 30, 2011 to \$67.9 million during the current period.

Interest expense on repurchase agreements totaled \$12 thousand during the nine months ended September 30, 2012 and the average rate paid was 0.28%. This compares to interest of \$5 thousand and an average rate of 0.44% during the nine months ended September 30, 2011. Other interest expense which totaled \$47 thousand mostly relates to interest charged on past due preferred stock dividend payments. Interest expense on junior subordinated debentures, which totaled \$259 thousand reflecting an increase of \$31 thousand from the nine months of 2011, fluctuates with changes in the 3-month London Interbank Offered Rate (LIBOR) rate. In addition, as a result of deferring our interest payments under the debentures we are required to pay interest on the deferred interest payments. This has the effect of increasing the effective yield and interest expense on the debentures.

Edgar Filing: PLUMAS BANCORP - Form 10-Q

The following table presents for the nine-month periods indicated the distribution of consolidated average assets, liabilities and shareholders equity. It also presents the amounts of interest income from interest-earning assets and the resultant annualized yields, as well as the amounts of interest expense on interest-bearing liabilities and the resultant cost expressed in both dollars and annualized rate percentages. Average balances are based on daily averages. Nonaccrual loans are included in the calculation of average loans while nonaccrued interest thereon is excluded from the computation of yields earned:

	For the Nine Months Ended September 30, 2012			For the Nine Months Ended September 30, 2011		
	Average Balance (in thousands)	Interest (in thousands)	Yield/ Rate	Average Balance (in thousands)	Interest (in thousands)	Yield/ Rate
Interest-earning assets:

- (1) Not computed on a tax-equivalent basis.
- (2) Average nonaccrual loan balances of \$14.7 million for 2012 and \$21.6 million for 2011 are included in average loan balances for computational purposes.
- (3) Net loan fees included in loan interest income for the nine-month periods ended September 30, 2012 and 2011 were \$4,000 and \$42,000, respectively.
- (4) Total annualized interest expense divided by the average balance of total earning assets.
- (5) Annualized net interest income divided by the average balance of total earning assets.

Edgar Filing: PLUMAS BANCORP - Form 10-Q

The following table sets forth changes in interest income and interest expense for the nine-month periods indicated and the amount of change attributable to variances in volume, rates and the combination of volume and rates based on the relative changes of volume and rates:

	2012 over 2011 change in net interest income for the nine months ended September 30 (in thousands)			
	Volume (1)	Rate (2)	Mix (3)	Total
Interest-earning assets:				
Loans	\$ (215)	\$ 218	\$ 8	\$ 11
Investment securities	106	(349)	(39)	(282)
Interest bearing deposits	(18)	3		(15)
Total interest income	(127)	(128)	(31)	(286)
Interest-bearing liabilities:				
NOW deposits	(20)	(50)	7	(63)
Money market deposits	4	(23)	(1)	(20)
Savings deposits	13	7	1	21
Time deposits	(214)	(343)	83	(474)
Repurchase agreements	14	(2)	(5)	7
Other	20	(1)		19
Junior subordinated debentures		31		31
Total interest expense	(183)	(381)	85	(479)
Net interest income	\$ 56	\$ 253	\$ (116)	\$ 193

- (1) The volume change in net interest income represents the change in average balance multiplied by the previous year's rate.
- (2) The rate change in net interest income represents the change in rate multiplied by the previous year's average balance.
- (3) The mix change in net interest income represents the change in average balance multiplied by the change in rate.

Provision for loan losses. During the nine months ended September 30, 2012 we recorded a provision for loan losses of \$1.9 million down \$800 thousand from the \$2.7 million provision recorded during the nine months ended September 30, 2011. A large portion of the \$2.7 million provision in the 2011 period was related to a specific reserve required on one land development loan relationship. See *Analysis of Asset Quality and Allowance for Loan Losses* for further discussion of loan quality trends, loan charge-offs and the provision for loan losses.

The allowance for loan losses is maintained at a level that management believes will be appropriate to absorb inherent losses on existing loans based on an evaluation of the collectability of the loans and prior loan loss experience. The evaluations take into consideration such factors as changes in the nature and volume of the portfolio, overall portfolio quality, review of specific problem loans, and current economic conditions that may affect the borrower's ability to repay their loan. The allowance for loan losses is based on estimates, and ultimate losses may vary from the current estimates. These estimates are reviewed not less than quarterly and, as adjustments become necessary, they are reported in earnings in the periods in which they become known.

Based on information currently available, management believes that the allowance for loan losses is appropriate to absorb inherent risks in the portfolio. However, no assurance can be given that the Company may not sustain charge-offs which are in excess of the allowance in any given period.

Non-interest income. During the nine months ended September 30, 2012 non-interest income decreased by \$710 thousand to \$5.1 million from \$5.8 million during the first nine months of 2011. The largest component of this decrease was a decrease of \$742 thousand in gains on the sale of government guaranteed loans from \$1.8 million during the first nine months of 2011 to \$1.1 million during the current nine month period. Beginning in the first quarter of 2011, related to a change in SBA requirements, guaranteed portions of SBA loans were no longer required to be sold with a 90 day

premium recourse requirement. This resulted in recording gains on sales of loans during the nine months of 2011 representing both loans sold during the nine months ended September 30, 2011 and loans sold during the fourth quarter of 2010. In addition, gain on sale of loans during the first nine months of 2011 benefited from a government program temporarily increasing the government guarantee in order to stimulate small business lending. The remaining decrease in non-interest income was related to a decline in gains on sale of investment securities from \$612 thousand during the nine months ended September 30, 2011 to \$403 thousand during the current period. During the 2011 period proceeds of \$27.4 million were generated on the sale of twenty-five securities and during the current period proceeds of \$20.8 million were received on the sale of twenty-five securities.

Service charges on deposit accounts increased by \$130 thousand primarily related to an increase in use of overdraft protection services. During the fourth quarter of 2011 we introduced a new overdraft protection (ODP) program which we made available to a larger portion of our customer base than the prior program, resulting in an increase in service fee income. This new program has enabled us to increase income while strengthening our regulatory compliance over the ODP function. The increase in other non-interest income mostly relates to a \$74 thousand adjustment to accrued life insurance.

The following table describes the components of non-interest income for the nine-month periods ending September 30, 2012 and 2011, dollars in thousands:

	For the Nine Months Ended September 30		Dollar Change	Percentage Change
	2012	2011		
Service charges on deposit accounts	\$ 2,712	\$ 2,582	\$ 130	5.0%
Gain on sale of loans	1,053	1,795	(742)	-41.3%
Gain on sale of securities	403	612	(209)	-34.2%
Earnings on life insurance policies	258	261	(3)	-1.1%
Loan servicing income	155	148	7	4.7%
Customer service fees	113	107	6	5.6%
Other	403	302	101	33.4%
Total non-interest income	\$ 5,097	\$ 5,807	\$ (710)	-12.2%

Non-interest expense. We continue to achieve savings in many categories of non-interest expense resulting in a reduction in non-interest expense of \$988 thousand from \$14.7 million during the nine months ended September 30, 2011 to \$13.8 million during the current nine month period. Significant reductions in salary and benefits expense, FDIC insurance, OREO expense and loss on sale of OREO and OVO were partially offset by an increase in the provision for changes in valuation of OREO of \$468 thousand, an increase in outside service fees of \$99 thousand, an increase in professional fees of \$73 thousand and an increase in insurance expense of \$65 thousand.

Salaries and employee benefits decreased by \$435 thousand primarily related to a decline in officer salary continuation costs, a decline in commission expense and an increase in deferred loan origination costs. Salary continuation expense was abnormally high during the first nine months of 2011 as we were required to record a one-time adjustment to reflect the early retirement of the Company's Chief Credit Officer, this along with no longer having a need for an ongoing accrual for this individual were the primary reasons for a decline in officer salary continuation expense of \$95 thousand. Commission expense, which relates to government-guaranteed lending personnel, decreased by \$139 thousand consistent with the decline in government-guaranteed loan sales during the comparison periods. Related to an increase in lending activity, the deferral of loan origination costs increased by \$205 thousand. Partially offsetting these reductions in salary and benefit expense was an increase in stock compensation expense of \$137 thousand from a credit of \$53 thousand during the first nine months of 2011 to expense of \$84 thousand during the current period. The credit in stock compensation expense during the 2011 period was related to a revision in the estimated forfeiture rate compared to the current periods adjustment to estimated forfeiture rate which resulted in an increase in compensation expense. Salary expense, excluding commissions, decreased by \$16 thousand.

A decline of \$389 thousand in FDIC insurance expense relates to a decline in the rate charged Plumas Bank by the FDIC. This decline in rate includes a change in the assessment base and assessment rate under new rules enacted pursuant to the Dodd-Frank Wall Street Reform and Consumer Protection Act. These new rules changed the assessment base from total deposits to average total assets less tangible capital, but also significantly lowered the assessment rates, causing a net favorable impact on our FDIC insurance premiums.

OREO expense declined by \$189 thousand from \$292 thousand during the nine months ended September 30, 2011 to \$103 thousand during the current period. OREO expense benefited from \$80 thousand in rental income net of operating expenses on an apartment building acquired in July 2011. This compares to \$14 thousand in net rental income during the 2011 period. Both the rental income and the operating expenses are included under the category of OREO expense. This building was sold during August, 2012. Additionally, during the 2011 period the Bank experienced significant cleanup costs on one property, which was subsequently sold and legal costs related to another property which also was sold during 2011.

Loss on sale of OREO and OVO totaled \$8 thousand during the nine months ended September 30, 2012 a decrease of \$600 thousand from the \$608 thousand incurred in the 2011 period. In the second quarter of 2011 the Bank sold its largest OREO holding which represented approximately half of its OREO holdings at that time. The Bank incurred a \$617 thousand loss on sale of this large OREO holding in 2011.

OREO represents real property taken by the Bank either through foreclosure or through a deed in lieu thereof from the borrower. When other real estate is acquired, any excess of the Bank's recorded investment in the loan balance and accrued interest income over the estimated fair market value of the property less costs to sell is charged against the allowance for loan losses. A valuation allowance for losses on other real estate is maintained to provide for temporary declines in value. The allowance is established through a provision for subsequent losses on other real estate which is included in other expenses. Subsequent gains or losses on sales or write-downs resulting from permanent impairment are recorded in other income or expenses as incurred. The \$805 thousand in OREO provision, an increase of \$468 thousand from the nine months ended September 30, 2011, was related to a decline in the value of ten properties based on appraisals received during the first nine months of 2012. Of these ten properties, five have been sold and the remaining five represent 56% of the Bank's OREO balance as of September 30, 2012.

Significant components of the increase in outside service fees were a \$20 thousand one-time recruitment fee incurred on the employment of a new SBA loan production officer based in southern California and \$61 thousand in costs related to the outsourcing of our statement processing operations in June, 2012. The Company anticipates meaningful savings, primarily in the form of reduced postage and salary costs related to the statement outsourcing. The increase in professional fees mostly relates to an increase in consulting costs in the Company's data processing and network administration functions. Insurance expense was abnormally low during 2011 as it included the reversal of the accrual for split dollar life insurance for the Bank's former Chief Credit Officer who forfeited his right to this insurance when he left the Bank prior to obtaining the age of sixty-five.

Edgar Filing: PLUMAS BANCORP - Form 10-Q

The following table describes the components of non-interest expense for the nine-month periods ending September 30, 2012 and 2011, dollars in thousands:

	For the Nine Months Ended September 30		Dollar Change	Percentage Change
	2012	2011		
Salaries and employee benefits	\$ 6,623	\$ 7,058	\$ (435)	-6.2%
Occupancy and equipment	2,298	2,337	(39)	-1.7%
Outside service fees	1,066	967	99	10.2%
Provision for changes in valuation of OREO	805	337	468	138.9%
Professional fees	675	602	73	12.1%
FDIC insurance	462	851	(389)	-45.7%
Telephone and data communication	238	250	(12)	-4.8%
Business development	196	193	3	1.6%
Advertising and shareholder relations	182	166	16	9.6%
Loan and collection expenses	174	223	(49)	-22.0%
Director compensation and retirement	169	172	(3)	-1.7%
Armored car and courier	167	168	(1)	-0.6%
Deposit premium amortization	130	130		%
OREO expense	103	292	(189)	-64.7%
Stationery and supplies	99	104	(5)	-4.8%
Postage	91	148	(57)	-38.5%
Insurance expense	89	24	65	270.8%
Loss on sale of OREO and OVO	8	608	(600)	-98.7%
Other	178	111	67	60.4%
Total non-interest expense	\$ 13,753	\$ 14,741	\$ (988)	-6.7%

Provision for income taxes. The Company recorded an income tax provision of \$791 thousand, or 36.1% of pre-tax income for the nine months ended September 30, 2012. This compares to an income tax provision of \$227 thousand, or 24.6% of pre-tax income for the nine months ended September 30, 2011. The percentages for 2012 and 2011 differ from the statutory rate as tax exempt income such as earnings on Bank owned life insurance and municipal loan and investment income decrease the tax provision.

Deferred tax assets and liabilities are recognized for the tax consequences of temporary differences between the reported amount of assets and liabilities and their tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The determination of the amount of deferred income tax assets which are more likely than not to be realized is primarily dependent on projections of future earnings, which are subject to uncertainty and estimates that may change given economic conditions and other factors. The realization of deferred income tax assets is assessed and a valuation allowance is recorded if it is more likely than not that all or a portion of the deferred tax asset will not be realized. More likely than not is defined as greater than a 50% chance. All available evidence, both positive and negative is considered to determine whether, based on the weight of that evidence, a valuation allowance is needed. Based upon the analysis of available evidence, management has determined that it is more likely than not that all deferred income tax assets as of September 30, 2012 and December 31, 2011 will be fully realized and therefore no valuation allowance was recorded. On the consolidated balance sheet, net deferred tax assets are included in accrued interest receivable and other assets.

RESULTS OF OPERATIONS FOR THE THREE MONTHS ENDED SEPTEMBER 30, 2012

Net Income. The Company recorded net income of \$546 thousand for the three months ended September 30, 2012, up \$175 thousand from net income of \$371 thousand for the three months ended September 30, 2011. This increase in earnings was related to a decrease of \$399 thousand in non-interest expense, and increases of \$170 thousand in net-interest income and \$264 thousand in non-interest income. These items were partially offset by an increase in the provision for loan losses of \$600 thousand and an increase in the provision for income taxes of \$58 thousand.

Net income allocable to common shareholders increased from \$200 thousand or \$0.04 per share during the three month period ending September 30, 2011 to \$375 thousand or \$0.08 per share during the current three month period. Income allocable to common shareholders is calculated by subtracting dividends and discount amortized on preferred stock from net income.

Net interest income before provision for loan losses. Net interest income, on a nontax-equivalent basis, was \$4.4 million for the three months ended September 30, 2012, an increase of \$170 thousand, or 4%, from \$4.2 million for the same period in 2011. The increase in net interest income was primarily related to a decline in the rate paid and average balance of time deposits and an increase in the average balance and yield on loans. Interest income increased by \$91 thousand mostly related to an increase in interest and fees on loans of \$81 thousand. Interest expense declined by \$79 thousand from \$396 thousand during the three months ended September 30, 2011 to \$317 thousand during the current three month period. Net interest margin for the three months ended September 30, 2012 increased 13 basis points to 4.20%, up from 4.07% for the same period in 2011.

Interest income increased from \$4.6 million during the three months ended September 30, 2011 to \$4.7 million during the current three month period primarily as a result of an increase in the average balance and yield on loans. While the yield on the Company's investment portfolio declined, this was more than offset by an increase in average balance resulting in a \$28 thousand increase in interest on investments. Mostly related to a decline in average balance, interest earned on other interest earning assets declined by \$18 thousand.

Interest and fees on loans increased \$81 thousand to \$4.4 million for the three months ended September 30, 2012 as compared to \$4.3 million during the third quarter of 2011. The Company's average loan balances were \$306 million during the three months ended September 30, 2012, up \$4.7 million, or 2%, from \$301 million for the same period in 2011. Loan yield increased from 5.69% during the third quarter of 2011 to 5.72% during the current quarter. This increase in yield was related to a decline in the average balance of nonaccruing loans from \$17.8 million during the three months ended September 30, 2011 to \$12.9 million during the current quarter. Interest income on investment securities increased by \$28 thousand related to an increase in the average balance of investment securities from \$46.3 million during the third quarter of 2011 to \$78.2 million during the current quarter. The effect of this increase in average balance on interest income was mostly offset by a decline in yield of 63 basis points from 1.91% during the 2011 quarter to 1.28% during the current quarter. The decline in yield is primarily related to the replacement of matured, called and sold investment securities with new investments with market yields below those which they replaced. Interest income on other interest-earning assets, which totaled \$21 thousand in 2012 and \$39 thousand in 2011, mostly relates to interest on balances held at the FRB.

Interest expense on deposits decreased by \$99 thousand, or 32%, to \$208 thousand for the three months ended September 30, 2012, down from \$307 thousand for the same period in 2011. This decrease primarily relates to decreases in the average balance and rate paid on time deposits and to a much lesser extent a decline in the rate paid on NOW and money market accounts.

Interest on time deposits declined by \$80 thousand related both to a decrease in average balance and a decline in rate paid. Average time deposits declined by \$13.3 million from \$89.0 million during the third quarter of 2011 to \$75.7 million during the three months ended September 30, 2012. The decrease in time deposits is largely related to a promotional time deposit product we began offering in June, 2009 and continued to offer until April 30, 2010. These promotional time deposits, which totaled \$4 million at September 30, 2011, had all matured prior to January 1, 2012. In addition, the Bank has maintained low rates offered on time deposits in 2012 as it has excess liquidity and does not need to pay for deposits at above market rates. The average rate paid on promotional deposits during the nine months ended September 30, 2011 was 2%. The average rate paid on time deposits decreased from 0.92% during the third quarter of 2011 to 0.66% during the current three month period. This decrease primarily relates to a decline in market rates in the Company's service area and the maturity of the higher rate promotional deposits.

Interest expense on NOW accounts declined by \$20 thousand. Rates paid on NOW accounts declined by 6 basis points from 0.19% during the third quarter of 2011 to 0.13% during the current quarter, mostly related to a decline in higher rate public sweep accounts. The average balance in public sweep accounts declined from \$22.1 million during the third quarter of 2011 to \$14.7 million during the three months ended September 30, 2012 and is the primary reason for the decline in average balance in NOW deposits from \$91.8 million during the three months ended September 30, 2011 to \$78.9 million during the current quarter. Interest expense on money market accounts decreased by \$5 thousand related to a decrease in rate paid on these accounts of 6 basis points from 0.27% during the three months ended September 30, 2011 to 0.21% during the current three month period. This was primarily related to our money market sweep product which paid rates in excess of those offered on our other money market products. We no longer offer the money market sweep account having replaced it with a product that utilizes repurchase agreements during the third quarter of 2011. Interest expense on savings accounts increased by \$6 thousand related to an increase in average balance from \$60.9 million during the three months ended September 30, 2011 to \$70.0 million during the current period.

Interest expense on repurchase agreements totaled \$3 thousand during the three months ended September 30, 2012 and the average rate paid was 0.23%. This compares to interest of \$4 thousand and an average rate of 0.49% during the three months ended September 30, 2011. Other interest expense which totaled \$18 thousand mostly relates to interest charged on past due preferred stock dividend payments. Interest expense on junior subordinated debentures, which totaled \$88 thousand reflecting an increase of \$12 thousand from the third quarter of 2011, fluctuates with changes in the 3-month London Interbank Offered Rate (LIBOR) rate. In addition, as a result of deferring our interest payments under the debentures we are required to pay interest on the deferred interest payments. This has the effect of increasing the effective yield on the debentures.

Edgar Filing: PLUMAS BANCORP - Form 10-Q

The following table presents for the three-month periods indicated the distribution of consolidated average assets, liabilities and shareholders equity. It also presents the amounts of interest income from interest earning assets and the resultant annualized yields expressed in both dollars and annualized yield percentages, as well as, the amounts of interest expense on interest bearing liabilities and the resultant cost expressed in both dollars and annualized rate percentages. Average balances are based on daily averages. Nonaccrual loans are included in the calculation of average loans while nonaccrued interest thereon is excluded from the computation of yields earned:

	For the Three Months Ended September 30, 2012			For the Three Months Ended September 30, 2011		
	Average Balance (in thousands)	Interest (in thousands)	Yield/ Rate	Average Balance (in thousands)	Interest (in thousands)	Yield/ Rate

- (1) Not computed on a tax-equivalent basis.
- (2) Average nonaccrual loan balances of \$12.9 million for 2012 and \$17.8 million for 2011 are included in average loan balances for computational purposes.
- (3) Net loan fees included in loan interest income for the three-month periods ended September 30, 2012 and 2011 were \$2,000 and \$1,000, respectively.
- (4) Total annualized interest expense divided by the average balance of total earning assets.
- (5) Annualized net interest income divided by the average balance of total earning assets.

Edgar Filing: PLUMAS BANCORP - Form 10-Q

The following table sets forth changes in interest income and interest expense for the three-month periods indicated and the amount of change attributable to variances in volume, rates and the combination of volume and rates based on the relative changes of volume and rates:

	2012 over 2011 change in net interest income for the three months ended September 30 (in thousands)			
	Volume (1)	Rate (2)	Mix (3)	Total
Interest-earning assets:				
Loans	\$ 67	\$ 25	\$ (11)	\$ 81
Investment securities	152	(73)	(51)	28
Interest bearing deposits	(21)	6	(3)	(18)
Total interest income	198	(42)	(65)	91
Interest-bearing liabilities:				
NOW deposits	(6)	(16)	2	(20)
Money market deposits	2	(6)	(1)	(5)
Savings deposits	4	2		6
Time deposits	(30)	(57)	7	(80)
Repurchase agreements	2	(2)	(1)	(1)
Other	5	2	2	9
Junior subordinated debentures		13	(1)	12
Total interest expense	(23)	(64)	8	(79)
Net interest income	\$ 221	\$ 22	\$ (73)	\$ 170

- (1) The volume change in net interest income represents the change in average balance divided by the previous year's rate.
- (2) The rate change in net interest income represents the change in rate divided by the previous year's average balance.
- (3) The mix change in net interest income represents the change in average balance multiplied by the change in rate.

Provision for loan losses. The Company recorded a \$1 million provision for loan losses for the three months ended September 30, 2012 compared to the \$400 thousand provision for loan losses for the three months ended September 30, 2011. The increase in provision during the current quarter mostly relates to a decline in collateral value for two of our larger impaired loans both of which are collateral dependent.

The allowance for loan losses is maintained at a level that management believes will be appropriate to absorb inherent losses on existing loans based on an evaluation of the collectability of the loans and prior loan loss experience. The evaluations take into consideration such factors as changes in the nature and volume of the portfolio, overall portfolio quality, review of specific problem loans, and current economic conditions that may affect the borrower's ability to repay their loan. The allowance for loan losses is based on estimates, and ultimate losses may vary from the current estimates. These estimates are reviewed not less than quarterly and, as adjustments become necessary, they are reported in earnings in the periods in which they become known.

Based on information currently available, management believes that the allowance for loan losses is appropriate to absorb inherent risks in the portfolio. However, no assurance can be given that the Company may not sustain charge-offs which are in excess of the allowance in any given period. See "Analysis of Asset Quality and Allowance for Loan Losses" for further discussion of loan quality trends and the provision for loan losses.

Non-interest income. During the three months ended September 30, 2012, total non-interest income increased by \$264 thousand from the same period in 2011. This increase was mostly related to an increase in gain on sale of investment securities of \$191 thousand. During the third quarter of 2012 we received \$8.5 million on the sale of seven securities and recorded a gain on sale of \$191 thousand. No investment securities were sold during the third quarter of 2011. In addition, the Company benefited from a \$74 thousand adjustment to accrued life insurance. Other increases in non-interest income include \$45 thousand in service charge income and \$21 thousand in loan servicing income. The

increase in service charge income was related to an increase in use of overdraft protection services. Loan servicing income is mostly related to our SBA portfolio and the increase is consistent with the increase in the guaranteed portion of sold loans we are servicing.

Proceeds from the sale of government guaranteed loans during the current quarter totaled \$7.7 million and we realized a net gain on sale of \$580 thousand. This compares to proceeds of \$9.6 million and a \$656 thousand net gain on sale of loans during the third quarter of 2011. The decline in gains on sale of loans was primarily related to a decrease in the guarantee percentage during the 2012 quarter. Sales and gains on sale were strong during 2011 as many loans sold represented 90% of the loan originated (the guaranteed portion) under a government program to stimulate small business lending. During 2012, most SBA loans sold represented a 75% SBA guarantee.

The following table describes the components of non-interest income for the three-month periods ending September 30, 2012 and 2011, dollars in thousands:

	For the Three Months Ended September 30		Dollar Change	Percentage Change
	2012	2011		
Service charges on deposit accounts	\$ 926	\$ 881	\$ 45	5.1%
Gain on sale of loans	580	656	(76)	-11.6%
Gain on sale of securities	191		191	100.0%
Earnings on life insurance policies	87	84	3	3.6%
Loan servicing income	64	43	21	48.8%
Customer service fees	44	38	6	15.8%
Other	191	117	74	63.2%
Total non-interest income	\$ 2,083	\$ 1,819	\$ 264	14.5%

Non-interest expenses. Non-interest expense totaled \$4.6 million during the three months ended September 30, 2012 a decline of \$399 thousand from \$5.0 million during the same period in 2011. Significant savings were realized in several categories of non-interest expense including reductions of \$125 thousand in salary and benefit expense, \$161 thousand in the provision for changes in valuation of OREO, \$88 thousand in FDIC insurance and assessments, \$61 thousand in postage expense and \$48 thousand in OREO expense.

The decrease in salary and employee benefits expense was primarily related to a decline in group insurance expense and an increase in deferred loan origination costs. Related to an increase in lending activity, the deferral of loan origination costs increased by \$38 thousand. Group insurance decreased by \$62 thousand as the number of participants in our insurance plans has declined. In addition, we determined that our accrued dental insurance liability was overstated and we recorded a \$29 thousand reduction in this accrual. Salary expense, excluding commissions, decreased by \$18 thousand.

The provision for changes in valuation of OREO during the 2011 quarter included a \$452 thousand adjustment related to one property. The largest adjustment to any one property during the current quarter was a \$288 thousand reduction.

The decline in FDIC insurance expense relates to a decline in the rate charged Plumas Bank by the FDIC. This decline in rate includes a change in the assessment base and assessment rate under new rules enacted pursuant to the Dodd-Frank Wall Street Reform and Consumer Protection Act. These new rules changed the assessment base from total deposits to average total assets less tangible capital, but also significantly lowered the assessment rates, causing a net favorable impact on our FDIC insurance premiums.

Postage expense during the current quarter benefited from the outsourcing of our statement processing operations and a \$12 thousand refund in postage that had been expensed during the previous quarter.

Edgar Filing: PLUMAS BANCORP - Form 10-Q

The following table describes the components of non-interest expense for the three-month periods ending September 30, 2012 and 2011, dollars in thousands:

	For the Three Months Ended September 30,		Dollar Change	Percentage Change
	2012	2011		
Salaries and employee benefits	\$ 2,179	\$ 2,304	\$ (125)	-5.4%
Occupancy and equipment	754	768	(14)	-1.8%
Outside Service fees	358	324	34	10.5%
Provision from changes in valuation of OREO	312	473	(161)	-34.0%
Professional fees	279	250	29	11.6%
FDIC insurance and assessments	148	236	(88)	-37.3%
Telephone and data communication	77	80	(3)	-3.8%
Business development	69	62	7	11.3%
Loan and collection expenses	64	104	(40)	-38.5%
Director compensation and retirement	57	57		%
Advertising and shareholder relations	56	62	(6)	-9.7%
Armored car and courier	56	60	(4)	-6.7%
OREO expense	56	104	(48)	-46.2%
Deposit premium amortization	43	43		%
Insurance expense	31	26	5	19.2%
Stationery and supplies	26	34	(8)	-23.5%
Loss on sale of OREO and OVO	2	(65)	67	103.1%
Postage		61	(61)	-100.0%
Other	55	38	17	44.7%
Total non-interest expense	\$ 4,622	\$ 5,021	\$ (399)	-7.9%

Provision for income taxes. The Company recorded income tax expense of \$273 thousand, or 33.3% of pre-tax income for the three months ended September 30, 2012. This compares to income tax expense of \$215 thousand, or 36.7% of pre-tax income for the three months ended September 30, 2011. The percentages for 2012 and 2011 differ from the statutory rate as tax exempt income such as earnings on Bank owned life insurance and municipal loan and investment income decrease taxable income.

FINANCIAL CONDITION

Loan Portfolio. The Company continues to manage the mix of its loan portfolio consistent with its identity as a community bank serving the financing needs of all sectors of the area it serves. Although the Company offers a broad array of financing options, it continues to concentrate its focus on small to medium sized commercial businesses. These commercial loans offer diversification as to industries and types of businesses, thus limiting material exposure in any industry concentrations. The Company offers both fixed and floating rate loans and obtains collateral in the form of real property, business assets and deposit accounts, but looks to business and personal cash flows as its primary source of repayment.

The Company's largest lending categories are commercial real estate loans, agricultural loans, equity lines of credit and residential real estate loans. These categories accounted for approximately 41.0%, 12.6%, 12.6% and 12.1%, respectively of the Company's total loan portfolio at September 30, 2012, and approximately 40.6%, 13.2%, 12.8% and 13.3%, respectively of the Company's total loan portfolio at December 31, 2011. Construction and land development loans decreased slightly representing 5.5% and 5.8% of the loan portfolio as of September 30, 2012 and December 31, 2011, respectively. The construction and land development portfolio component has been identified by Management as a higher-risk loan category. The quality of the construction and land development category is highly dependent on property values both in terms of the likelihood of repayment by the current owner as well as the level of collateral the Company has securing the loan in the event of default. Loans in this category are characterized by the speculative nature

of commercial and residential development properties and can include property in various stages of development from raw land to finished lots or structures. Construction and land development loans have declined from \$73.8 million at December 31, 2008 to \$16.5 million at September 30, 2012. This decline reflects management's efforts, which began in 2009, to reduce its exposure to construction and land development loans due to the severe valuation decrease in the real estate market.

The Company's real estate related loans, including real estate mortgage loans, real estate construction loans, consumer equity lines of credit, and agricultural loans secured by real estate comprised 78% and 80% of the total loan portfolio at September 30, 2012 and December 31, 2011, respectively. Moreover, the business activities of the Company currently are focused in the California counties of Plumas, Nevada, Placer, Lassen, Modoc, Shasta, Sierra and in Washoe County in Northern Nevada. Consequently, the results of operations and financial condition of the Company are dependent upon the general trends in these economies and, in particular, the residential and commercial real estate markets. In addition, the concentration of the Company's operations in these areas of Northeastern California and Northwestern Nevada exposes it to greater risk than other banking companies with a wider geographic base in the event of catastrophes, such as earthquakes, fires and floods in these regions.

The rates of interest charged on variable rate loans are set at specific increments in relation to the Company's lending rate or other indexes such as the published prime interest rate or U.S. Treasury rates and vary with changes in these indexes. At September 30, 2012 and December 31, 2011, approximately 72% and 73%, respectively of the Company's loan portfolio was comprised of variable rate loans. While real estate mortgage, commercial and consumer lending remain the foundation of the Company's historical loan mix, some changes in the mix have occurred due to the changing economic environment and the resulting change in demand for certain loan types. In addition, the Company remains committed to the agricultural industry in Northeastern California and will continue to pursue high quality agricultural loans. Agricultural loans include both commercial and commercial real estate loans. The Company's agricultural loan balances totaled \$38 million at September 30, 2012 and \$39 million at December 31, 2011.

Analysis of Asset Quality and Allowance for Loan Losses. The Company attempts to minimize credit risk through its underwriting and credit review policies. The Company's credit review process includes internally prepared credit reviews as well as contracting with an outside firm to conduct periodic credit reviews. The Company's management and lending officers evaluate the loss exposure of classified and impaired loans on a quarterly basis, or more frequently as loan conditions change. The Management Asset Resolution Committee (MARC) reviews the asset quality of criticized loans on a monthly basis and reports the findings to the full Board of Directors. The Board's Loan Committee reviews the asset quality of new loans on a monthly basis and reports the findings to the full Board of Directors. In management's opinion, this loan review system helps facilitate the early identification of potential criticized loans.

The Company has implemented MARC to develop an action plan to significantly reduce nonperforming loans. It consists of members of executive management and credit administration management, and the activities are governed by a formal written charter. The MARC meets at least monthly and reports to the Board of Directors.

More specifically, a formal plan to effect repayment and/or disposition of every significant nonperforming loan relationship is developed and documented for review and on-going oversight by the MARC. Some of the strategies used include but are not limited to: 1) obtaining additional collateral, 2) obtaining additional investor cash infusion, 3) sale of the promissory note to an outside party, 4) proceeding with foreclosure on the underlying collateral, and 5) legal action against borrower/guarantors to encourage settlement of debt and/or collect any deficiency balance owed. Each step includes a benchmark timeline to track progress.

MARC also provides guidance for the maintenance and timely disposition of OREO properties; including developing financing and marketing programs to incent individuals to purchase OREO.

The allowance for loan losses is established through charges to earnings in the form of the provision for loan losses. Loan losses are charged to and recoveries are credited to the allowance for loan losses. The allowance for loan losses is maintained at a level deemed appropriate by management to provide for known and inherent risks in the loan portfolio. The adequacy of the allowance for loan losses is based upon management's continuing assessment of various factors affecting the collectability of loans; including current economic conditions, maturity of the portfolio, size of the portfolio, industry concentrations, borrower credit history, collateral, the existing allowance for loan losses, independent

credit reviews, current charges and recoveries to the allowance for loan losses and the overall quality of the portfolio as determined by management, regulatory agencies, and independent credit review consultants retained by the Company. There is no precise method of predicting specific losses or amounts which may ultimately be charged off on particular segments of the loan portfolio. The collectability of a loan is subjective to some degree, but must relate to the borrower's financial condition, cash flow, quality of the borrower's management expertise, collateral and guarantees, and state of the local economy.

Formula allocations are calculated by applying loss factors to outstanding loans with similar characteristics. Loss factors are based on the Company's historical loss experience as adjusted for changes in the business cycle and may be adjusted for significant factors that, in management's judgment, affect the collectability of the portfolio as of the evaluation date. Effective for the third quarter of 2012, the Company modified its method of estimating the allowance for loan losses for non-impaired loans. This modification incorporated historical losses from the beginning of the latest business cycle. Previously we utilized historical loss experience based on a rolling eight quarters ending with the most recently completed calendar quarter. This modification had the effect of increasing the required allowance related to the expanded historical loss period. The Company believes that, given the recent trend in historical losses, it was prudent to increase the period examined and that a full business cycle was the appropriate period.

The discretionary allocation is based upon management's evaluation of various loan segment conditions that are not directly measured in the determination of the formula and specific allowances. The conditions may include, but are not limited to, general economic and business conditions affecting the key lending areas of the Company, credit quality trends, collateral values, loan volumes and concentrations, and other business conditions.

The following table provides certain information for the nine-month periods indicated with respect to the Company's allowance for loan losses as well as charge-off and recovery activity, in thousands:

	For the Nine Months Ended September 30, (in thousands)	
	2012	2011
Balance at January 1,	\$ 6,908	\$ 7,324
Charge-offs:		
Commercial and agricultural	(1,141)	(479)
Real estate mortgage	(678)	(690)
Real estate construction	(1,524)	(2,484)
Consumer	(152)	(205)
Total charge-offs	(3,495)	(3,858)
Recoveries:		
Commercial and agricultural	53	189
Real estate mortgage	13	16
Real estate construction	54	5
Consumer	94	84
Total recoveries	214	294
Net charge-offs	(3,281)	(3,564)
Provision for loan losses	1,900	2,700
Balance at September 30,	\$ 5,527	\$ 6,460
Annualized net charge-offs during the nine-month period to average loans	1.46%	1.56%
Allowance for loan losses to total loans	1.85%	2.19%

Edgar Filing: PLUMAS BANCORP - Form 10-Q

The following table provides a breakdown of the allowance for loan losses as of September 30 for each period presented:

	Balance at End of Period 2012	Percent of Loans in Each Category 2012	Balance at End of Period 2011	Percent of Loans in Each Category 2011
Commercial and agricultural	\$ 971	22.0%	\$ 1,211	23.4%
Real estate mortgage (includes equity lines)	3,086	65.7%	2,932	65.6%
Real estate construction	1,086	5.5%	2,026	7.7%
Installment and other	384	6.8%	291	3.3%
Total	\$ 5,527	100%	\$ 6,460	100%

The allowance for loan losses totaled \$5.5 million at September 30, 2012 and \$6.9 million at December 31, 2011. Specific reserves related to impaired loans decreased from \$2.1 million at December 31, 2011 to \$1.1 million at September 30, 2012. At least quarterly the Company evaluates each specific reserve and if it determines that the loss represented by the specific reserve is uncollectable it reverses the specific reserve and takes a partial charge-off in its place. General reserves totaled \$4.4 million, a decrease of \$403 thousand from December 31, 2011. The allowance for loan losses as a percentage of total loans decreased from 2.35% at December 31, 2011 to 1.85% at September 30, 2012. The percentage of general reserves to unimpaired loans decreased from 1.80% at December 31, 2011 to 1.58% at September 30, 2012.

The decrease in general reserves reflects a decline in historical loss rates with net charge-offs declining from \$7.7 million in 2010 to \$3.9 million in 2011 and \$3.3 million for the nine months ended September 30, 2012. Currently the Company utilizes historical losses from 2008 to the present which represents the latest business cycle in the calculation of its required allowance for loan losses. The loss period covered 19 consecutive quarters at September 30, 2012.

Previously we utilized historical loss experience based on a rolling eight quarters ending with the most recently completed calendar quarter. This had the effect of increasing the emphasis on current loss history and therefore a higher reserve as a percentage of unimpaired loans was required during the 2010 and 2011 period; however, given the declining loss trend in 2011 and 2012 this methodology would have produced a significantly lower percentage of losses to unimpaired loans at September 30, 2012 and we felt it was now appropriate to consider a longer historical loss period.

The Company places loans 90 days or more past due on nonaccrual status unless the loan is well secured and in the process of collection. A loan is considered to be in the process of collection if, based on a probable specific event, it is expected that the loan will be repaid or brought current. Generally, this collection period would not exceed 90 days. When a loan is placed on nonaccrual status the Company's general policy is to reverse and charge against current income previously accrued but unpaid interest. Interest income on such loans is subsequently recognized only to the extent that cash is received and future collection of principal is deemed by management to be probable. Where the collectability of the principal or interest on a loan is considered to be doubtful by management, it is placed on nonaccrual status prior to becoming 90 days delinquent.

Impaired loans are measured based on the present value of the expected future cash flows discounted at the loan's effective interest rate or the fair value of the collateral if the loan is collateral dependent. The amount of impaired loans is not directly comparable to the amount of nonperforming loans disclosed later in this section. The primary difference between impaired loans and nonperforming loans is that impaired loan recognition considers not only loans 90 days or more past due, restructured loans and nonaccrual loans but also may include identified problem loans other than delinquent loans where it is considered probable that we will not collect all amounts due to us (including both principal and interest) in accordance with the contractual terms of the loan agreement.

A restructuring of a debt constitutes a troubled debt restructuring (TDR) if the Company, for economic or legal reasons related to the debtor's financial difficulties, grants a concession to the debtor that it would not otherwise consider. Restructured workout loans typically present an elevated level of credit risk as the borrowers are not able to perform according to the original contractual terms. Loans that are reported as TDRs are considered impaired and measured for impairment as described above.

Nonperforming loans at September 30, 2012 were \$15.0 million, a decrease of \$1.8 million from the \$16.8 million balance at December 31, 2011. Specific reserves on nonaccrual loans totaled \$1.0 million at September 30, 2012 and \$1.3 million at December 31, 2011. Performing loans past due thirty to eighty-nine days were \$3.7 million and \$5.1 million at September 30, 2012 and December 31, 2011, respectively.

A substandard loan is not adequately protected by the current sound worth and paying capacity of the borrower or the value of the collateral pledged, if any. Total substandard loans decreased by \$10.9 million from \$29.2 million at December 31, 2011 to \$18.3 million at September 30, 2012. Loans classified as watch decreased from \$10.7 million at December 31, 2011 to \$9.0 million at September 30, 2012. At September 30, 2012 and December 31, 2011, \$7.4 million and \$13.9 million, respectively of performing loans were classified as substandard. Further deterioration in the credit quality of individual performing substandard loans or other adverse circumstances could result in the need to place these loans on nonperforming status.

At September 30, 2012 and December 31, 2011, the Company's recorded investment in impaired loans totaled \$18.8 million and \$24.4 million, respectively. The specific allowance for loan losses related to impaired loans totaled \$1.1 million and \$2.1 million at September 30, 2012 and December 31, 2011, respectively. Additionally, \$3.1 million has been charged off against the impaired loans at September 30, 2012 and \$940 thousand at December 31, 2011.

It is the policy of management to make additions to the allowance for loan losses so that it remains adequate to absorb the probable inherent risk of loss in the portfolio. Management believes that the allowance at September 30, 2012 is adequate. However, the determination of the amount of the allowance is judgmental and subject to economic conditions which cannot be predicted with certainty. Accordingly, the Company cannot predict whether charge-offs of loans in excess of the allowance may occur in future periods.

OREO represents real property taken by the Bank either through foreclosure or through a deed in lieu thereof from the borrower. Repossessed assets include vehicles and other commercial assets acquired under agreements with delinquent borrowers. Repossessed assets and OREO are carried at fair market value, less selling costs. OREO holdings represented forty-one properties totaling \$5.1 million at September 30, 2012 and forty-three properties totaling \$8.6 million at December 31, 2011. Nonperforming assets as a percentage of total assets were 4.28% at September 30, 2012 and 5.60% at December 31, 2011.

The following table provides a summary of the change in the OREO balance for the nine months ended September 30, 2012 and 2011:

	Nine Months Ended September 30,	
	2012	2011
	(in thousands)	
Beginning Balance	\$ 8,623	\$ 8,867
Additions	588	5,239
Dispositions	(3,342)	(4,812)
Provision from change in OREO valuation	(805)	(337)
Ending Balance	\$ 5,064	\$ 8,957

The provision for OREO losses relates to a decrease in value of several REO properties based on recent appraisals. During the nine months ended September 30, 2012, we sold seven properties and a portion of two other properties and added two lots, two single family residences and one commercial building to our OREO portfolio.

Investment Portfolio and Federal Funds Sold. Total investment securities increased by \$20.1 million from \$57.9 million at December 31, 2011 to \$78.0 million as of September 30, 2012. The investment portfolio at September 30, 2012 and December 31, 2011 was invested entirely in U.S. Government-sponsored agencies. There were no Federal funds sold at September 30, 2012 or December 31, 2011; however, the Bank maintained interest earning balances at the Federal Reserve Bank (FRB) totaling \$39.5 million at September 30, 2012 and \$47.8 million at December 31, 2011, respectively. These balances currently earn 25 basis points. The increase in investment securities is consistent with our asset/liability management policy as we chose to reduce excess balances held at the FRB in order to increase our return on these balances.

The Company classifies its investment securities as available-for-sale or held-to-maturity. Currently all securities are classified as available-for-sale. Securities classified as available-for-sale may be sold to implement the Company's asset/liability management strategies and in response to changes in interest rates, prepayment rates and similar factors.

Deposits. Deposits increased by \$15.1 million from \$391 million at December 31, 2011 to \$406 million at September 30, 2012. Non-interest bearing demand deposits increased by \$11.1 million and savings and money market accounts increased by \$12.5 million. Interest bearing transaction accounts (NOW) accounts decreased by \$1.5 million and time deposits declined by \$7.0 million. We attribute much of the increase in demand deposits to seasonal factors.

The Company continues to manage the mix of its deposits consistent with its identity as a community bank serving the financial needs of its customers. The deposit mix changed slightly from December 31, 2011. Non-interest bearing demand deposits were 34% of total deposits at September 30, 2012 and 32% of total deposits at December 31, 2011. NOW accounts were 20% of total deposits at September 30, 2012 and 21% of deposits at December 31, 2011. Money market and savings deposits totaled 28% of total deposits at September 30, 2012 and 26% of total deposits at December 31, 2011. Time deposits were 18% of total deposits at September 30, 2012 and 21% of total deposits at December 31, 2011.

Deposits represent the Bank's primary source of funds. Deposits are primarily core deposits in that they are demand, savings and time deposits generated from local businesses and individuals. These sources are considered to be relatively stable, long-term relationships thereby enhancing steady growth of the deposit base without major fluctuations in overall deposit balances. The Company experiences, to a small degree, some seasonality with the slower growth period between November through April, and the higher growth period from May through October. In order to assist in meeting any funding demands, the Company maintains a secured borrowing arrangement with the Federal Home Loan Bank of San Francisco. There were no brokered deposits at September 30, 2012 or December 31, 2011.

Short-term Borrowing Arrangements. The Company is a member of the FHLB and can borrow up to \$94,300,907 from the FHLB secured by commercial and residential mortgage loans with carrying values totaling \$189,905,330 at September 30, 2012. The Company is required to hold FHLB stock as a condition of membership. At September 30, 2012, the Company held \$1,950,000 of FHLB stock which is recorded as a component of other assets. At this level of stock holdings, the Company can borrow up to \$41,481,000. There were no borrowings outstanding as of September 30, 2012. To borrow the \$94,300,907 in available credit, the Company would need to purchase \$2,483,000 in additional FHLB stock. The Company also has an unsecured \$6 million Federal Funds borrowing line with one of its correspondent banks.

Repurchase Agreements. During 2011 Plumas Bank introduced a new product for their larger business customers which uses repurchase agreements as an alternative to interest-bearing deposits. The balance in this product at September 30, 2012 and December 31, 2011 was \$5.5 million and \$8.3 million, respectively. Interest paid on this product is similar to that which is paid on the Bank's premium money market account; however, these are not deposits and are not FDIC insured.

Capital Resources

Shareholders' equity as of September 30, 2012 totaled \$41.4 million up from \$39.6 million as of December 31, 2011.

On January 30, 2009, under the Capital Purchase Program, the Company sold (i) 11,949 shares of the Company's Fixed Rate Cumulative Perpetual Preferred Stock, Series A (the Preferred Shares) and (ii) a ten-year warrant to purchase up to 237,712 shares of the Company's common stock, no par value at an exercise price, subject to anti-dilution adjustments, of \$7.54 per share, for an aggregate purchase price of \$11,949,000 in cash. Ten million of the twelve million in proceeds from the sale of the Series A Preferred Stock was injected into Plumas Bank providing addition capital for the bank to support growth in loans and investment securities and strengthen its capital ratios. The remainder provided funds for holding company activities and general corporate purposes.

It is the policy of the Company to periodically distribute excess retained earnings to the shareholders through the payment of cash dividends. Such dividends help promote shareholder value and capital adequacy by enhancing the marketability of the Company's stock. All authority to provide a return to the shareholders in the form of a cash or stock

dividend or split rests with the Board of Directors (the Board). The Board will periodically, but on no regular schedule, reviews the appropriateness of a cash dividend payment. Banking regulations limit the amount of dividends that may be paid without prior approval of regulatory agencies. No common cash dividends were paid in 2009, 2010 or 2011 and none are anticipated to be paid in 2012. The Company is subject to various restrictions on the payment of dividends.

At the request of the FRB, Plumas Bancorp deferred its regularly scheduled quarterly interest payments on its outstanding junior subordinated debentures relating to its two trust preferred securities and suspended quarterly cash dividend payments on its Series A Preferred Stock. As a result, Plumas Bancorp is currently in arrears with the dividend payments on the Series A Preferred Stock and interest payments on the junior subordinated debentures as permitted by the related agreements. As of September 30, 2012 the amount of the arrearage on the dividend payments of the Series A Preferred Stock is \$1.5 million representing ten quarterly payments and the amount of the arrearage on the payments on the subordinated debt associated with the trust preferred securities is \$821 thousand also representing ten quarterly payments. The arrearage dividend payments on the Series A Preferred Stock have not been accrued.

Capital Standards. The Company uses a variety of measures to evaluate its capital adequacy, with risk-based capital ratios calculated separately for the Company and the Bank. Management reviews these capital measurements on a monthly basis and takes appropriate action to ensure that they are within established internal and external guidelines. The FDIC has promulgated risk-based capital guidelines for all state non-member banks such as the Bank. These guidelines establish a risk-adjusted ratio relating capital to different categories of assets and off-balance sheet exposures. There are two categories of capital under the guidelines: Tier 1 capital includes common shareholders' equity, and qualifying trust-preferred securities (including notes payable to unconsolidated special purpose entities that issue trust-preferred securities), less goodwill and certain other deductions, notably the unrealized net gains or losses (after tax adjustments) on available-for-sale investment securities carried at fair market value; Tier 2 capital can include qualifying subordinated debt and the allowance for loan losses, subject to certain limitations. The Series A Preferred Stock qualifies as Tier 1 capital for the Company.

As noted previously, the Company's junior subordinated debentures represent borrowings from its unconsolidated subsidiaries that have issued an aggregate \$10 million in trust-preferred securities. These trust-preferred securities currently qualify for inclusion as Tier 1 capital for regulatory purposes as they do not exceed 25% of total Tier 1 capital, but are classified as long-term debt in accordance with GAAP. On March 1, 2005, the Federal Reserve Board adopted a final rule that allows the continued inclusion of trust-preferred securities (and/or related subordinated debentures) in the Tier 1 capital of bank holding companies.

New Proposed Capital Rules. The federal bank regulatory agencies recently issued joint proposed rules that would increase minimum capital ratios, add a new minimum common equity ratio, add a new capital conservation buffer, and would change the risk-weightings of certain assets. The proposed changes, if implemented, would be phased in from 2013 through 2019. Management has completed a preliminary assessment of the impact of the proposed rules and believes Plumas Bank's ratios would be in compliance with the requirements of the proposed rules if they were presently in effect. Community bank associations are currently discussing their concerns with the regulatory agencies regarding the additional regulatory burdens the proposals would place on community banks and their holding companies.

The following table presents the Company's and the Bank's capital ratios as of September 30, 2012 and December 31, 2011, in thousands:

	September 30, 2012		December 31, 2011	
	Amount	Ratio	Amount	Ratio
Tier 1 Leverage Ratio				
Plumas Bancorp and Subsidiary	\$ 48,234	10.4%	\$ 45,024	9.8%
Minimum regulatory requirement	18,522	4.0%	18,313	4.0%
Plumas Bank	48,737	10.5%	45,073	9.8%
Minimum requirement for Well-Capitalized institution under the prompt corrective action plan	23,143	5.0%	22,882	5.0%
Minimum regulatory requirement	18,514	4.0%	18,305	4.0%
Tier 1 Risk-Based Capital Ratio				
Plumas Bancorp and Subsidiary	48,234	14.2%	45,024	13.7%
Minimum regulatory requirement	13,607	4.0%	13,149	4.0%
Plumas Bank	48,737	14.4%	45,073	13.7%
Minimum requirement for Well-Capitalized institution under the prompt corrective action plan	20,321	6.0%	19,710	6.0%
Minimum regulatory requirement	13,547	4.0%	13,140	4.0%
Total Risk-Based Capital Ratio				
Plumas Bancorp and Subsidiary	52,487	15.5%	46,169	15.0%
Minimum regulatory requirement	27,214	8.0%	26,298	8.0%
Plumas Bank	52,987	15.6%	49,215	15.0%
Minimum requirement for Well-Capitalized institution under the prompt corrective action plan	33,868	10.0%	32,850	10.0%
Minimum regulatory requirement	27,095	8.0%	26,280	8.0%

Management believes that the Company and the Bank currently meet all their capital adequacy requirements including a minimum 9% Tier 1 Leverage Ratio required under the Bank's informal agreement with the FDIC and DFI.

The current and projected capital positions of the Company and the Bank and the impact of capital plans and long-term strategies are reviewed regularly by management. The Company's policy is to maintain the Bank's ratios above the prescribed well-capitalized leverage, Tier 1 risk-based and total risk-based capital ratios of 5%, 6% and 10%, respectively, at all times.

Off-Balance Sheet Arrangements

Loan Commitments. In the normal course of business, there are various commitments outstanding to extend credits that are not reflected in the financial statements. Commitments to extend credit and letters of credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Annual review of commercial credit lines, letters of credit and ongoing monitoring of outstanding balances reduces the risk of loss associated with these commitments. As of September 30, 2012, the Company had \$77.5 million in unfunded loan commitments and \$110 thousand in letters of credit. This compares to \$79.2 million in unfunded loan commitments and \$50 thousand in letters of credit at December 31, 2011. Of the \$77.5 million in unfunded loan commitments, \$35.5 million and \$42.0 million represented commitments to commercial and consumer customers, respectively. Of the total unfunded commitments at September 30, 2012, \$33.8 million were secured by real estate, of which \$8.4 million was secured by commercial real estate and \$25.4 million was secured by residential real estate in the form of equity lines of credit. The commercial loan commitments not secured by real estate primarily represent business lines of credit, while the consumer loan commitments not secured by real estate primarily represent revolving credit card lines and overdraft protection lines. Since some of the commitments are expected to expire without being drawn upon the total commitment amounts do not necessarily represent future cash requirements.

Operating Leases. The Company leases one depository branch, two lending offices and one loan administration office and two non-branch automated teller machine locations. Total rental expenses under all operating leases totaled \$140,000 during the nine months ended September 30, 2012 and \$138,000 during the nine months ended September 30, 2011. The expiration dates of the leases vary, with the first such lease expiring during 2012 and the last such lease expiring during 2015.

Liquidity

The Company manages its liquidity to provide the ability to generate funds to support asset growth, meet deposit withdrawals (both anticipated and unanticipated), fund customers' borrowing needs, satisfy maturity of short-term borrowings and maintain reserve requirements. The Company's liquidity needs are managed using assets or liabilities, or both. On the asset side, in addition to cash and due from banks, the Company maintains an investment portfolio which includes unpledged U.S. Government-sponsored agency securities that are classified as available-for-sale. On the liability side, liquidity needs are managed by charging competitive offering rates on deposit products and the use of established lines of credit.

The Company is a member of the FHLB and can borrow up to \$94,300,907 from the FHLB secured by commercial and residential mortgage loans with carrying values totaling \$189,905,330 at September 30, 2012. See **Short-term Borrowing Arrangements** for additional information on our FHLB borrowing capacity. The Company also has an unsecured \$6 million Federal Funds borrowing line with one of its correspondent banks.

Customer deposits are the Company's primary source of funds. Total deposits were \$406.3 million as of September 30, 2012, an increase of \$15.1 million, or 4%, from the December 31, 2011 balance of \$391.1 million. Deposits are held in various forms with varying maturities. The Company's securities portfolio, Federal funds sold, Federal Home Loan Bank advances, and cash and due from banks serve as the primary sources of liquidity, providing adequate funding for loans during periods of high loan demand. During periods of decreased lending, funds obtained from the maturing or sale of investments, loan payments, and new deposits are invested in short-term earning assets, such as cash held at the FRB, Federal funds sold and investment securities, to serve as a source of funding for future loan growth. Management believes that the Company's available sources of funds, including borrowings, will provide adequate liquidity for its operations in the foreseeable future.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

As a smaller reporting company we are not required to provide the information required by this item.

ITEM 4. CONTROLS AND PROCEDURES

The Company's Chief Executive Officer and Chief Financial Officer, based on their evaluation of the Company's disclosure controls and procedures as of the end of the Company's fiscal quarter ended September 30, 2012 (as defined in Exchange Act Rule 13a-15(e)), have concluded that the Company's disclosure controls and procedures are adequate and effective for purposes of Rule 13a-15(e) in timely alerting them to material information relating to the Company required to be included in the Company's filings with the SEC under the Securities Exchange Act of 1934.

During the quarter ended September 30, 2012, there were no changes in the Company's internal control over financial reporting that have materially affected, or is reasonably likely to material affect the Company's internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

From time to time, the Company and/or its subsidiaries are a party to claims and legal proceedings arising in the ordinary course of business. In the opinion of the Company's management, the amount of ultimate liability with respect to such proceedings will not have a material adverse effect on the financial condition or results of operations of the Company taken as a whole.

ITEM 1A RISK FACTORS

As a smaller reporting company we are not required to provide the information required by this item.

ITEM 2. UNREGISTERD SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(a) None.

(b) None.

(c) None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Under the terms of the Series A Preferred Stock, Plumas Bancorp is required to pay dividends on a quarterly basis at a rate of 5% per year for the first five years, after which the dividend rate automatically increases to 9%. Dividend payments on the Series A Preferred Stock may be deferred without default, but the dividend is cumulative and, if Plumas Bancorp fails to pay dividends for six quarters, the holder will have the right to appoint representatives to Plumas Bancorp's board of directors. As previously disclosed, Plumas Bancorp has determined to defer regularly scheduled quarterly interest payments on its Series A Preferred Stock. Therefore, Plumas Bancorp is currently in arrears with the dividend payments on the Series A Preferred Stock. As of the date of filing this report, the amount of the arrearage on the dividend payments of the Series A Preferred Stock is \$1.5 million representing ten quarterly payments. At this time the holders of the Series A Preferred Stock have not appointed representatives to the Company's board of directors.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

ITEM 5. OTHER INFORMATION

None.

ITEM 6. EXHIBITS

The following documents are included or incorporated by reference in this Quarterly Report on Form 10Q:

- 3.1 Articles of Incorporation as amended of Registrant included as exhibit 3.1 to the Registrant's Form S-4, File No. 333-84534, which is incorporated by reference herein.
- 3.2 Bylaws of Registrant as amended on March 16, 2011 included as exhibit 3.2 to the Registrant's Form 10-K for December 31, 2010, which is incorporated by this reference herein.
- 3.3 Amendment of the Articles of Incorporation of Registrant dated November 1, 2002, is included as exhibit 3.3 to the Registrant's 10-Q for September 30, 2005, which is incorporated by this reference herein.
- 3.4 Amendment of the Articles of Incorporation of Registrant dated August 17, 2005, is included as exhibit 3.4 to the Registrant's 10-Q for September 30, 2005, which is incorporated by this reference herein.
- 4 Specimen form of certificate for Plumas Bancorp included as exhibit 4 to the Registrant's Form S-4, File No. 333-84534, which is incorporated by reference herein.
