SUMMARY

The following summary is provided solely for your convenience. It is not intended to be complete. You should read carefully this entire prospectus supplement, the accompanying prospectus and all the information included or incorporated by reference herein or therein carefully, especially the risks discussed in the section titled "Risk Factors" beginning on page S-5 of this prospectus supplement and in the documents incorporated by reference herein.

Our Business

We are an asset-based health sciences and regenerative medicine company focused on the acquisition and strategic development of innovative products and businesses having the potential to address significant unmet medical needs, and definable pathways to commercialization, partnering or other monetization following the achievement of corresponding development objectives. Our current portfolio includes Cardium Biologics, Tissue Repair Company and To Go Brands, Inc., companies primarily focused on the development of innovative therapeutic products for cardiovascular indications, wound healing and nutraceutical supplements, respectively. As a development stage company, we have yet to generate positive cash flows from operations and are essentially dependent on debt and equity funding and partnering or other monetization transactions to finance our operations.

Our business model is designed to create multiple opportunities for success while avoiding reliance on any single technology platform or product type, and to leverage our skills in late-stage product development in order to bridge the critical gap between promising new technologies and product opportunities that are ready for commercialization. Consistent with our long-term strategy, we intend to consider various corporate development transactions designed to place our product candidates into larger organizations or with partners having existing commercialization, sales and marketing resources, and a need for innovative products. Such transactions could involve the sale, partnering or other monetization of particular product opportunities or businesses. In parallel, as our businesses are advanced and corresponding valuations established, we plan to pursue new product opportunities and acquisitions with strong value enhancement potential.

Our principal executive offices are located at 12255 El Camino Real, Suite 250, San Diego, California 92130 and our telephone number is (858) 436-1000.

Securities Offered:	4,012 shares of Series A Convertible Preferred Stock, \$0.0001 par value per share.
Series A Preferred Stock:	Each share of our Series A Convertible Preferred Stock has a stated value and liquidation preference of \$1,000 per share. The shares of our Series A Convertible Preferred Stock will participate in any dividends payable upon our common stock on an as converted basis. The shares of our Series A Convertible Preferred Stock will not have voting rights, except as may be provided by Delaware law. Each share of Series A Convertible Preferred Stock is convertible into 10,989 shares of common stock at a per share conversion price of \$0.091, and all 4,012 shares of our Series A Convertible Preferred Stock offered hereby would be convertible into 44,087,912 shares of our common stock, each subject to adjustment as described in this prospectus supplement. We also have the right to require the holders to convert the shares of our Series A Convertible Preferred Stock in certain circumstances described in this prospectus. See the section entitled Description of Series A Preferred stock beginning on page S-7 of this prospectus.
Limitations on Conversion	Notwithstanding anything herein to the contrary, shares of our Series A Convertible Preferred Stock may not be converted, if after such conversion the holder of such security would beneficially own more than 9.99% of the shares of our common stock then outstanding.
Shareholder Approval and Limitations on Issuance	The 44,087,912 shares of common stock issuable upon conversion of all 4,012 shares of Series A Convertible Preferred Stock being offered at the initial conversion price exceeds 20% of our outstanding common stock. Under applicable NYSE MKT market rules, shareholder approval is required for any portion of the transaction which could require us to issue a number of shares of common stock equal to 20% of our outstanding common stock at a price less than the closing price on the day prior the date of the securities purchase agreement. In addition, we do not currently have a sufficient number of shares of common stock authorized to reserve shares for conversion of all 4,012 shares of Series A Convertible Preferred Stock. Accordingly, within 75 calendar days from the date of the closing of the initial sales of Series A Convertible Preferred Stock, we intend to seek stockholder approval for (1) the offering of the Series A Convertible Preferred Stock in an amount that would exceed, on an as converted basis, 19.99% of our outstanding common stock and (2) for a 1 for 20 reverse split of our outstanding common stock. Accordingly sales of Series A Convertible Preferred Stock in an amount that would exceed, on an as converted basis, 19.99% of our outstanding common stock is predicated on our ability to secure the approval of our stockholders.

RISK FACTORS

Your investment in our shares of Series A Convertible Preferred Stock, and our underlying common stock, is subject to certain risks. This prospectus supplement does not describe all of those risks. You should consult your own financial and legal advisors about the risks entailed by an investment in our company and the suitability of your investment in light of your particular circumstances. For a discussion of some of the factors you should carefully consider before deciding to purchase any of our shares of Series A Convertible Preferred Stock that may be offered, please read Risk Factors in the documents incorporated by reference herein, as well as those risk factors included below. Additional risks and uncertainties not currently known to us or that we currently deem immaterial may also adversely affect our business and operations. If any of the matters described in the risk factors were to occur, our business, financial condition, results of operations, cash flows or prospects could be materially adversely affected. In such case, you could lose all or a portion of your investment.

Risks Related to the Offering

You will experience immediate dilution in the book value per share of the Series A Convertible Preferred Stock you purchase.

Because the price per share of our Series A Convertible Preferred Stock being offered is substantially higher than the book value per share of our underlying common stock, you will suffer substantial dilution in the net tangible book value of the shares that you purchase in this offering. Based on an assumed offering price to the public of \$1,000.00 per share, if you purchase shares in this offering, you will suffer immediate and substantial dilution of \$0.05 per share in the net tangible book value of the shares of common stock underlying the Series A Convertible Preferred Stock. See the section entitled Dilution below for a more detailed discussion of the dilution you will incur if you purchase Series A Convertible Preferred Stock in this offering.

Our ability to sell all of the shares of Series A Convertible Preferred Stock offering in this prospectus supplement is dependant on our ability to secure the approval of our stockholders.

The 44,087,912 shares of common stock issuable upon conversion of all 4,012 shares of Series A Convertible Preferred Stock being offered at the initial conversion price exceeds 20% of our outstanding common stock. Under applicable NYSE MKT market rules, shareholder approval is required for any portion of the transaction which could require us to issue a number of shares of common stock equal to 20% of our outstanding common stock at a price less than the closing price on the day prior the date of the securities purchase agreement. In addition, we do not currently have a sufficient number of shares of common stock authorized to reserve shares for conversion of all 4,012 shares of Series A Convertible Preferred Stock. Accordingly, within 75 calendar days from the date of the closing of the initial sales of Series A Convertible Preferred Stock, we intend to seek stockholder approval for (1) the offering of the Series A Convertible Preferred Stock in an amount that would exceed, on an as converted basis, 19.99% of our outstanding common stock and (2) for a 1 for 20 reverse split of our outstanding common stock. Accordingly sales of Series A Convertible Preferred Stock in an amount that would exceed, on an as converted basis, 19.99% of our outstanding common stock is predicated on our ability to secure the approval of our stockholders. No assurances can be given that our stockholders will approve the offering or the reverse stock split.

We intend to effect a reverse stock, which impact the price and liquidity of trading in our common stock.

In connection with this offering, we intend to seek the approval of our stockholders to a 1 for 20 reverse split of our outstanding common stock. We cannot assure you that the price of our common stock will raise to an amount proportionate with the reverse split. In addition, the planned reverse split will reduce the number of shares of our common stock outstanding from approximately 130 million shares to approximately 6.5 million shares. The decrease in the number of shares outstanding may impact the liquidity and trading volume in our common stock.

Table of Contents

Our management will have broad discretion over the use of net proceeds from this offering and may not use the proceeds effectively.

Our management will have broad discretion over the use of the net proceeds from this offering and could spend the proceeds in a variety of ways that may ultimately fail to improve our operating results or enhance the value of our common stock. Our failure to use the net proceeds effectively could have a negative effect on our business and cause the price of our common stock to decline.

Additional Risks Related to our Business, Industry and an Investment in our Common Stock

For a discussion of additional risks associated with our business, our industry and an investment in our common stock, see the section entitled Risk Factors in our most recent annual report on Form 10-K for our fiscal year ended December 31, 2012, filed with the SEC on April 5, 2013, and any other subsequently filed document that is also incorporated or deemed to be incorporated by reference in this prospectus supplement.

Table of Contents**USE OF PROCEEDS**

We intend to use the net proceeds from the sale of securities offered in this prospectus supplement for general corporate purposes, which may include the development and commercialization of our product candidates, repayment of indebtedness, and the acquisitions of businesses, products, technologies or licenses that are complementary to our business.

DILUTION

If you invest in our common stock, your interest will be diluted by an amount equal to the difference between the public offering price and the net tangible book value per share of common stock after this offering.

We calculate net tangible book value per share by dividing our net tangible book value (total assets less intangible assets and total liabilities) by the number of outstanding shares of common stock. Our pro forma net tangible book value at December 31, 2012 was \$3,563,069, or \$0.03 per share of common stock. After giving effect to the sale of 4,012 shares of Series A preferred stock in this offering and assuming the conversion of all the shares of Series A preferred stock sold in the offering and our receipt of the net proceeds from this offering of approximately \$3,751,000, our adjusted net tangible book value at December 31, 2012 would have been \$7,314,289, or \$0.04 per share. This represents an immediate increase in pro forma net tangible book value of \$0.01 per share to existing shareholders and an immediate and substantial dilution of \$0.05 per share of common stock to new investors. The following table illustrates this per share dilution:

Assumed public offering price per share		\$ 0.09
Pro forma net tangible book value per share at December 31, 2012		\$ 0.03
Increase in net tangible book value per share attributable to offering		\$ 0.01
Pro forma net tangible book value per share at December 31, 2012, after giving effect to the offering		\$ 0.04
Dilution per share to new investors in the offering		\$ 0.05

Inc., pursuant to which Ladenburg is acting as our exclusive placement agent on a reasonable best efforts basis to arrange for the sale of up to \$4,012,000 of our registered Series A Convertible Preferred Stock that we are offering to investors by this prospectus supplement.

We currently anticipate the initial closing of the sale of the Series A Convertible Preferred Stock offered hereby on or about April 9, 2013. On such closing date, the following will occur:

the investor will tender funds in the amount of the aggregate purchase price of the securities being sold by us on such closing date, less the amount of the placement agent's fee we are paying to the placement agent;

we will issue the shares of Series A Convertible Preferred Stock being sold on such date to such investors; and

we will pay Ladenburg a placement agent fee in accordance with the terms of our placement agent agreement.

We have agreed to pay Ladenburg a cash fee equal to 6.5% of the gross proceeds of the offering. Pursuant to FINRA rule 5110(g)(2), the warrants issued to the placement agent and any shares issued upon any exercise of such warrants issued to the placement agent will not be sold, transferred, assigned, pledged, or hypothecated, or be the subject of any hedging, short sale, derivative, put, or call transaction that would result in the effective economic disposition of the securities by any person for a period of 180 days immediately following the date of effectiveness or commencement of sales of the public offering except the transfer of any security:

by operation of law or by reason of our reorganization;
to any FINRA member firm participating in the offering and the officers and partners thereof, if all securities so transferred remain subject to the lock-up restriction described above for the remainder of the time period;
if the aggregate amount of our securities held by the Placement Agent or related person does not exceed 1% of the securities being offered;
that is beneficially owned on a pro-rata basis by all equity owners of an investment fund, provided that no participating member manages or otherwise directs investments by the fund, and participating members in the aggregate do not own more than 10% of the equity in the fund; or
the exercise or conversion of any security, if all securities received remain subject to the lock-up restriction set forth above for the remainder of the time period.

In addition, we have also agreed to pay the placement agent's expenses in an amount equal to 1% of the gross proceeds raised in the offering.

In no event will the maximum commission or discount to be received by any Financial Industry Regulatory Authority, or FINRA, member or independent broker-dealer exceed 8% for the sale of the securities registered herein.

Table of Contents

The following table shows the per share and total placement agent's fees (not including placement agent's expenses) we will pay to the placement agent in connection with the sale of the shares pursuant to this prospectus assuming the purchase of all of the shares offered hereby.

Maximum offering total	\$ 260,780

The placement agent agreement we entered into with Ladenburg will be filed as an exhibit to a Current Report on Form 8-K that we will file with the SEC in connection with this offering.

We have agreed to indemnify the placement agent against certain liabilities, including liabilities under the Securities Act of 1933, as amended, or the Securities Act. We may also be required to contribute to payments the placement agent may be required to make in respect of such liabilities.

The placement agent may be deemed to be an underwriter within the meaning of Section 2(a)(11) of the Securities Act and any commissions received by it and any profit realized on the sale of the securities by them while acting as principal might be deemed to be underwriting discounts or commissions under the Securities Act. The placement agent would be required to comply with the requirements of the Securities Act, and the Securities Exchange Act of 1934, as amended, or the Exchange Act, including, without limitation, Rule 10b-5 and Regulation M under the Exchange Act. These rules and regulations may limit the timing of purchases and sales of shares of common stock by the placement agent. Under these rules and regulations, the placement agent may not (i) engage in any stabilization activity in connection with our securities; and (ii) bid for or purchase any of our securities or attempt to induce any person to purchase any of our securities, other than as permitted under the Exchange Act, until they have completed their participation in the distribution.

Ladenburg may, from time to time in the future, engage in transactions with and perform services for us in the ordinary course of its business, but we have no present arrangements or understandings to do so.

Voting Rights

Except as required by law, holders of the shares of our Series A Convertible Preferred Stock will not have rights to vote on any matters, questions or proceedings, including the election of directors. However, as long as any shares of our Series A Convertible Preferred Stock are outstanding, we will not, without the affirmative vote of the holders of a majority of the then outstanding shares of our Series A Convertible Preferred Stock, (1) alter or change adversely the powers, preferences or rights given to the shares of our Series A Convertible Preferred Stock or alter or amend its certificate of designation, (2) authorize or create any class of shares ranking as to dividends, redemption or distribution of assets upon liquidation senior to, or otherwise pari passu with, the shares of our Series A Convertible Preferred Stock, (3) amend our certificate of incorporation or other charter documents in any manner that adversely affects any rights of the holders of our Series A Convertible Preferred

Stock, (4) increase the number of authorized shares of our Series A Convertible Preferred Stock, or (5) enter into any agreement with respect to any of the foregoing.

Delaware Law

Notwithstanding certain protections in the certificate of designation of our Series A Convertible Preferred Stock, Delaware law also provides holders of preferred stock with certain rights. The holders of the outstanding shares of Series A Convertible Preferred Stock will be entitled to vote as a class upon a proposed amendment to our certificate of incorporation if the amendment would:

increase or decrease the aggregate number of authorized shares of our Series A Convertible Preferred Stock;

increase or decrease the par value of the shares of our Series A Convertible Preferred Stock; or

alter or change the powers, preferences, or special rights of the shares of our Series A Convertible Preferred Stock so as to affect them adversely.

Liquidation

The shares of our Series A Convertible Preferred Stock would rank, with respect to rights upon liquidation, winding-up or dissolution, (1) senior to shares of our common stock, (2) senior to any series of preferred stock ranked junior to the shares of our Series A Convertible Preferred Stock, and (3) junior to all of our existing and future indebtedness. Upon any liquidation, dissolution or winding up of our company, after payment or provision for payment of our debts and other liabilities and before any distribution or payment is made to the holders of any junior securities, the holders of our Series A Convertible Preferred Stock will first be entitled to be paid out of our assets available for distribution to our stockholders an amount equal to \$1,000 per share plus any other fees, liquidated damages or dividends then owing, after which any of our remaining assets will be distributed among the holders of the other classes or series of shares of our capital stock in accordance with our certificate of incorporation.

Conversion

Subject to certain ownership limitations as described below, the shares of our Series A Convertible Preferred Stock are convertible at any time at the option of the holder into shares of our common stock at a conversion ratio determined by dividing the stated value of the shares of our Series A Convertible Preferred Stock (or \$1,000) by a conversion price of \$0.091 per share. Accordingly, each share of our Series A Convertible Preferred Stock is convertible into 10,989.01 shares of our common stock.

The conversion price is subject to adjustment in the case of share splits, share dividends, combinations of shares and similar recapitalization transactions. In addition, upon the first reverse stock split of our common stock that is effected while Series A Convertible Preferred Stock is outstanding (the Reverse Stock Split and the date on which the Reverse Stock Split is effected by Corporation's filing of an amendment to its certificate of incorporation with the State of Delaware, the Reverse Stock Split Date and the 10th Trading Day following the Reverse Stock Split Date, the Adjustment Date), the Conversion Price shall be reduced, and only reduced, on the Adjustment Date to the greater of (a) \$0.05, or (b) 80% of the average of the volume weighted average price (VWAP) for the Company's common stock for the 10 Trading Days immediately following the Reverse Stock Split Date. Further, in the event that the Company has not effected a Reverse Stock Split on or before the 75th calendar day following the date of the initial sales of Series A Convertible Preferred Stock (the Trigger Date and the 10th Trading Day following the Trigger Date, the Trigger Adjustment Date), then the Conversion Price shall be reduced, and only reduced, on the Trigger Adjustment Date to the greater of (a) \$0.05, or (b) 80% of the average of the VWAPs for the 10 Trading Days immediately following the Trigger Date.

From the date of original issuance of the Series A Convertible Preferred Stock until such date immediately following the 30 consecutive Trading Days wherein (i) the VWAP for each of any 25 Trading Days during such

30 consecutive Trading Day period (which 30 consecutive Trading day period shall have commenced after Shareholder Approval is obtained) exceeds \$0.60 (subject to adjustment for forward and reverse stock splits and the like) and (ii) the daily dollar trading volume for each Trading Day during such 30 Trading Day period exceeds \$2,000,000 per Trading Day, if, at any time while this Preferred Stock is outstanding, the Company sells or grants any option to purchase or sells or grants any right to reprice, or otherwise disposes of or issues (or announces any sale, grant or any option to purchase or other disposition), any common stock or common stock equivalents entitling any person to acquire shares of common stock at an effective price per share that is lower than the then Conversion Price, then the Conversion Price shall be reduced to equal such lower price; provided, however, that in the event that the Company is not able to obtain stockholder approval of this offering and a reverse split, upon any such dilutive issuance that occurs 60 days or more after the Trigger Adjustment Date, the Conversion Price shall be reduced to the greater of \$0.05 per share (subject to adjustment for forward and reverse stock splits, recapitalizations and the like) or 80% of the then current Conversion Price.

Forced Conversion

Notwithstanding anything herein to the contrary, if after the date stockholder approval of this offering and a reverse stock split is received and effective and after the earlier of the Adjustment Date or the Trigger Adjustment Date (i) the VWAP for each of any 25 Trading Days during any such 30 consecutive Trading Day period (Threshold Period), exceeds \$0.60 (subject to adjustment for forward and reverse stock splits and the like) and (ii) the dollar trading volume for each Trading Day during such Threshold Period exceeds \$2,000,000 per Trading Day, the Company may cause each holder to convert all or part of such holder's Series A Convertible Preferred Stock into common stock. The company may not force conversion unless during the Threshold Period through and including the later of the forced conversion and the delivery of the common stock, unless the Company has met certain Equity Conditions : (1) we must have timely honored all previously requested or required conversions, if any, (2) we must have paid all liquidated damages and other amounts owing to the applicable holder in respect of our Series A Convertible Preferred Stock, (3)(i) there must be an effective registration statement pursuant to which we may issue shares upon conversion of our Series A Convertible Preferred Stock or (ii) all of the conversion shares may be issued to the holder pursuant to Section 3(a)(9) of the Securities Act of 1933, and immediately resold without restriction, (4) the shares of our common stock must be trading on a national exchange and all of the shares of our common stock issuable pursuant to the terms of the shares of our Series A Convertible Preferred Stock issued in connection with such shares must be listed or quoted for trading on such trading market (and we must believe, in good faith, that trading of the shares of our common stock on a trading market will continue uninterrupted for the foreseeable future), (5) there must be a sufficient number of authorized, but unissued and otherwise unreserved, shares of our common stock for the issuance of all of the shares of our common stock then issuable pursuant to this offering, (6) the issuance of the shares in question to the applicable holder would not violate the beneficial ownership limitations described below, (7) there must not have been a public announcement of a pending or proposed fundamental transaction (as defined in the Certificate of Designation) or change of control transaction that has not been consummated, and (8) the applicable stockholder must not be in possession of any information provided by us that constitutes, or may constitute, material non-public information.

Limitations on Conversion

A holder of our Series A Convertible Preferred Stock will not have the right to convert, and we will not have the right to force such holder to convert, any portion of its shares of our Series A Convertible Preferred Stock if the holder, together with its affiliates, would beneficially own in excess of 9.99% of the number shares of our common stock outstanding immediately after giving effect to its conversion.

Issuance Limitations.

Unless and until the Company has obtained stockholder approval for this offering and a reverse stock split in the amount of 1 for 20, then the Company shall not issue, upon conversion of the Series A Convertible Preferred

Stock, a number of shares of common stock which, when aggregated with any shares of common stock issued on or after the original issue date of the Series A Convertible Preferred Stock and prior to such conversion date (i) in connection with any conversion of Series A Convertible Preferred Stock issued pursuant to the Purchase Agreement and (ii) in connection with the exercise of any warrants issued to any registered broker-dealer as a fee in connection with the issuance of the securities in this offering, would exceed 25,899,624 shares of common stock (subject to adjustment for forward and reverse stock splits, recapitalizations and the like).

Negative Covenants

As long as any shares of Series A Convertible Preferred Stock are outstanding, unless the holders of at least 67% in Stated Value of the then outstanding shares of Series A Convertible Preferred Stock shall have otherwise given prior written consent, the Company shall not, and shall not permit any of the subsidiaries to, directly or indirectly:

other than Permitted Indebtedness (as defined in the Certificate of Designations), enter into, create, incur, assume, guarantee or suffer to exist any indebtedness for borrowed money of any kind, including but not limited to, a guarantee, on or with respect to any of its property or assets now owned or hereafter acquired or any interest therein or any income or profits therefrom;

other than Permitted Liens (as defined in the Certificate of Designations), enter into, create, incur, assume or suffer to exist any Liens (as defined in the Certificate of Designations) of any kind, on or with respect to any of its property or assets now owned or hereafter acquired or any interest therein or any income or profits therefrom;

amend the Company's charter documents, including, without limitation, its certificate of incorporation and bylaws, in any manner that materially and adversely affects any rights of the holder;

repay, repurchase or offer to repay, repurchase or otherwise acquire more than a de minimis number of shares of the Company's common stock, common stock equivalents or junior securities, other than as to (i) the shares of common stock as permitted or required under this offering and (ii) repurchases of common stock or common stock equivalents of departing officers and directors of the Company, provided that such repurchases shall not exceed an aggregate of \$100,000 for all officers and directors for so long as the Series A Convertible Preferred Stock is outstanding;

pay cash dividends or distributions on any of the Company's junior securities;

enter into any transaction with any affiliate of the Company which would be required to be disclosed in any public filing with the Commission, unless such transaction is made on an arm's-length basis and expressly approved by a majority of the disinterested directors of the Company (even if less than a quorum otherwise required for board approval); or

enter into any agreement with respect to any of the foregoing.

PROSPECTUS SUMMARY

This summary highlights certain information about Cardium and its business. This summary does not contain all of the information that is important to an investment decision. You should carefully read the entire prospectus and any prospectus supplement, including Risk Factors beginning below on page 7, before deciding to invest in our common stock.

Our Business

We were organized in Delaware in December 2003. Our business is focused on the acquisition and strategic development of product opportunities or businesses having the potential to address significant unmet medical needs, and definable pathways to commercialization, partnering or other monetization following the achievement of corresponding development objectives.

In October 2005, we acquired a portfolio of biologic growth factors and related delivery techniques from the Schering AG Group (now part of Bayer AG) for potential use in treating ischemic and other cardiovascular conditions, including Generx™, a product candidate being developed for patients with chronic myocardial ischemia (insufficient blood flow within the heart muscle) due to coronary heart disease.

In August 2006, we acquired rights to the assets and technologies of Tissue Repair Company, a company focused on the development of therapeutics for the potential treatment of chronic wounds and other tissue injuries. Tissue Repair Company's Excellagen™ and Excellerate™ product candidates are initially being developed for the potential treatment of chronically non-healing diabetic foot ulcers. Tissue Repair Company is operated as a wholly-owned subsidiary of Cardium.

Our business model is designed to create multiple opportunities for success while avoiding reliance on any single technology platform or product type, and to leverage Cardium's skills in late-stage product development in order to bridge the critical gap between promising new technologies and product opportunities that are ready for commercialization. Consistent with our long-term strategy, we intend to consider various corporate development transactions designed to place our product candidates into larger organizations or with partners having existing commercialization, sales and marketing resources, and a need for innovative products. Such transactions could involve the sale, partnering or other monetization of particular product opportunities or businesses. In parallel, as our businesses are advanced and corresponding valuations established, we plan to pursue new product opportunities and acquisitions with strong value enhancement potential.

Cardium Biologics

The lead product candidate from our Cardium Biologics unit is Generx (alferminogene tadenovec, Ad5FGF-4), which is being developed as a potential treatment for myocardial ischemia (insufficient blood flow within the heart muscle) due to coronary heart disease. Generx represents a new therapeutic class of cardiovascular biologics designed to promote collateral angiogenesis, a natural process of blood vessel growth within the heart muscle, to increase blood supply to ischemic areas of the heart following a one-time intracoronary administration.

The FDA has cleared Generx for a Phase 3 clinical study in the U.S. for women with late stage coronary artery disease who are unresponsive to traditional drug therapy and are not appropriate candidates for mechanical revascularization (angioplasty/stents or by-pass surgery). However, in view of published results from an independent 10-year study among men and women with chronic coronary heart disease showing that improved collateral circulation was associated with substantially lower cardiac mortality (Circulation 116:975-983, 2007),

Table of Contents

and prior studies showing that a one-time infusion of Generx has the potential to achieve improved coronary collateral circulation in both men and women at levels approximately equivalent to bypass surgery as measured by SPECT imaging (Journal of American College of Cardiology 42(8):1339-1347, 2003), we believe that Generx could potentially be developed as a cost effective front-line therapy for patients with coronary artery disease in the large markets of newly-industrializing countries who often do not have access to costly procedures such as bypass surgery. We also believe that having such additional clinical evidence confirming the safety and effectiveness of Generx for improving coronary collateral circulation in men and women with severe coronary artery disease could potentially be used to optimize and broaden commercial development pathways in the U.S. and other industrialized countries.

Tissue Repair Company

Our Tissue Repair Company subsidiary is focused on the development of therapeutics and devices for the potential treatment of chronic wounds such as non-healing diabetic ulcers and other wounds, as well as the repair of other tissues, including both hard tissue injuries such as bone fracture, as well as soft tissue injuries affecting ligaments, tendons or cartilage.

On December 3, 2009 our Tissue Repair Company subsidiary filed a 510(k) premarket notification filing with the U.S. Food and Drug Administration (FDA) for its fibrillar collagen-based Excellagen topical gel for wound healing of diabetic foot ulcers and potentially other wounds. Our 510(k) filing covers ExcellagenXL and ExcellagenFX^M, advanced wound care management medical devices comprising customized protein-based gels designed for topical application by health care professionals for patients with dermal wounds, which can include diabetic ulcers, pressure ulcers, venous ulcers, tunneled/undermined wounds, surgical and trauma wounds, second degree burns, and other types of wounds. The 510(k) submission is based in part on positive findings from our Phase 2b Matrix clinical study, reported on October 14, 2009, demonstrating substantial improvements in wound healing responses in patients with non-healing diabetic foot ulcers following one or two applications of Excellagen, an enhanced, customized collagen-based gel matrix. ExcellagenXL is designed for use by health care professionals in a clinical setting and as an adjunct to standard of care topical wound therapy, which in the case of diabetic ulcers typically includes surgical debridement and off-loading. The ExcellagenFX kit is designed for use by health care providers in a clinical setting in the treatment of larger soft tissue or tunneling wounds that may occur with pressure, venous and diabetic ulcers, as well as surgical wounds. The ExcellagenFX flowable matrix product allows for deeper administration and direct intimate contact with the wound bed in these more complex, irregular and difficult to access wounds.

For Tissue Repair Company's Excellerate product candidate, which comprises a mixture of our collagen-based gel with a biologic encoding a stimulatory growth factor (PDGF-B), we plan to introduce a combined formulation that allows for longer term stability without the need to maintain the biologic separately at -70 degrees centigrade, and to introduce the easier to use single-syringe product candidate into clinical studies designed to further evaluate the safety and effectiveness of Excellerate, and to allow for repeat dosing of Excellerate for wounds that are responding to treatment but have not yet achieved complete closure.

This prospectus may not be used to consummate a sale of any securities unless it is accompanied by a prospectus supplement.

We may sell the securities directly to investors or to or through agents, underwriters or dealers. We, and our agents or underwriters, reserve the right to accept or reject all or part of any proposed purchase of securities. Table of Contents

Preferred Stock

We may issue shares of our preferred stock from time to time, in one or more series. Our board of directors may determine the rights, preferences, privileges and restrictions of the preferred stock, including dividend rights, conversion rights, preemptive rights, voting rights, terms of redemption, liquidation preferences, sinking fund terms and the number of shares constituting any series or the designation of any series. Convertible preferred stock will be convertible into our common stock. Conversion may be mandatory or at your option and would be at prescribed conversion rates. If we sell any series of preferred stock under this prospectus and applicable prospectus supplements, we will fix the rights, preferences, privileges, qualifications and restrictions of the preferred stock of such series in the certificate of designation relating to that series. We will file as an exhibit to the registration statement of which this prospectus is a part, or will incorporate by reference from a current report on Form 8-K that we file with the SEC, the form of any certificate of designation that describes the terms of the series of preferred stock we are offering before the issuance of the related series of preferred stock. We urge you to read the prospectus supplements related to the series of preferred stock being offered, as well as the complete certificate of designation that contains the terms of the applicable series of preferred stock.

Debt Securities

We may offer debt securities from time to time, in one or more series, as either senior or subordinated debt or as senior or subordinated convertible debt. The senior debt securities will rank equally with any other unsecured and unsubordinated debt. The subordinated debt securities will be subordinate and junior in priority of payment to certain of our other indebtedness to the extent described in a prospectus supplement. Convertible debt securities will be convertible into or exchangeable for our common stock or our other securities. Conversion may be mandatory or at your option and would be at prescribed conversion rates.

The debt securities will be issued under one or more documents called indentures, which are contracts between us and a national banking association or other eligible party, as trustee. In this prospectus, we have summarized certain general features of the debt securities. We will file as an exhibit to the registration statement of which this prospectus is a part, or will incorporate by reference from a current report on Form 8-K that we file with the SEC, the form of any indenture or supplemental indenture and the form of any debt securities which describes the terms of the series of debt securities being offered. We urge you to read the prospectus supplements related to the series of debt securities being offered, as well as the complete indentures that contain the terms of the debt securities.

Warrants

We may issue warrants for the purchase of common stock, preferred stock and/or debt securities, in one or more series. We may issue warrants independently or together with common stock, preferred stock and/or debt securities, and the warrants may be attached to or separate from these securities. In this prospectus, we have summarized certain general features of the warrants. We urge you, however, to read the prospectus supplements related to the particular series of warrants being offered, as well as the warrant agreements and warrant certificates that contain the terms of the warrants. Forms of the warrant agreements and forms of warrant certificates containing the terms of the warrants being offered will be incorporated by reference into the registration statement of which this prospectus is a part from a current report on Form 8-K that we file with the SEC.

We will evidence each series of warrants by warrant certificates that we will issue under a separate agreement. We will enter into the warrant agreements with a warrant agent. Each warrant agent will be a bank or trust company that we select. We will indicate the name and address of the warrant agent in the applicable prospectus supplement relating to a particular series of warrants.

In this prospectus, we have summarized certain general features of the units. Table of Contents**RISK FACTORS**

An investment in the securities offered through this prospectus involves certain risks. Before making an investment decision, you should carefully consider the specific risk factors set forth under the caption **Risk Factors** in the applicable prospectus supplement and under the caption **Risk Factors** in our filing with the Securities and Exchange Commission pursuant to Sections 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934, as amended, incorporated by reference in this prospectus. To the extent that a particular offering implicates additional significant risks, we will include a discussion of those risks in the applicable prospectus supplement.

DEFICIENCY OF EARNINGS TO FIXED CHARGES

Our earnings were insufficient to cover fixed charges for each of the periods presented. Accordingly, the following table sets forth the deficiency of earnings to fixed charges for each of the periods presented. Because of the deficiency, the ratio information is not applicable. Amounts shown are in thousands.

	Six Months	Year Ended December 31,		
	Ended	2009	2008	2007
	June 30, 2010			
Deficiency earnings available to cover fixed charges	\$ (1,730)	\$ (16,158)	\$ (17,602)	\$ (16,885)

For purposes of computing the deficiency of earnings available to cover fixed charges, fixed charges represent interest expense, the portion of operating lease rental expense that is considered by us to be representative of interest and amortization of discount related to indebtedness; deficiency of earnings consists of loss before income taxes.

USE OF PROCEEDS

Unless otherwise provided in the applicable prospectus supplement, we intend to use the net proceeds from the sale of securities offered hereby for general corporate purposes, which may include the development and commercialization of our product candidates and the acquisitions of businesses, products, technologies or licenses that are complementary to our business. For each offering of securities hereunder, the prospectus supplement relating to that offering will set forth our intended use of the net proceeds received from the sale of those securities.

PLAN OF DISTRIBUTION

We may sell the securities from time to time pursuant to underwritten public offerings, negotiated transactions, block trades or a combination of these methods. We may sell the securities through underwriters or dealers, through agents, or directly to one or more purchasers. We may distribute the securities from time to time in one or more transactions:

at a fixed price or prices, which may be changed;

at market prices prevailing at the time of sale;

at prices related to such prevailing market prices; or

at negotiated prices.

A prospectus supplement or supplements will describe the terms of the offering of the securities, including:

the name or names of the underwriters, dealers or agents, if any;

the purchase price of the securities and the proceeds we will receive from the sale;

any over-allotment options under which underwriters may purchase additional securities from us;

any agency fees or underwriting discounts and other items constituting agents' or underwriters' compensation;

any public offering price;

any discounts or concessions allowed or reallocated or paid to dealers; and

any securities exchange or market on which the securities may be listed.

Only the underwriters named in a prospectus supplement are underwriters of the securities offered by that prospectus supplement.

If underwriters are used in the sale, they will acquire the securities for their own account and may resell the securities from time to time in one or more transactions at a fixed public offering price or at varying prices determined at the time of sale. The obligations of the underwriters to purchase the securities will be subject to the conditions set forth in the applicable underwriting agreement. We may offer the securities to the public through underwriting syndicates represented by managing underwriters or by underwriters without a syndicate. Subject to certain conditions, the underwriters will be obligated to purchase all of the securities offered by the prospectus supplement. Any public offering price and any discounts or concessions allowed or reallocated or paid to dealers may change from time to time. We may use underwriters with whom we have a material relationship. We will describe in the prospectus supplement, naming the underwriter, the nature of any such relationship.

Edgar Filing: Cardium Therapeutics, Inc. - Form 424B5

We may sell securities directly or through agents we designate from time to time. We will name any agent involved in the offering and sale of securities and we will describe any commissions we will pay the agent in the prospectus supplement. Unless the prospectus supplement states otherwise, our agent will act on a best-efforts basis for the period of its appointment.

We may authorize agents or underwriters to solicit offers by certain types of institutional investors to purchase securities from us at the public offering price set forth in the prospectus supplement pursuant to delayed delivery contracts providing for payment and delivery on a specified date in the future. We will describe the conditions to these contracts and the commissions we must pay for solicitation of these contracts in the prospectus supplement.

We may provide agents and underwriters with indemnification against civil liabilities related to this offering, including liabilities under the Securities Act, or contribution with respect to payments that the agents or underwriters may make with respect to these liabilities. Agents and underwriters may engage in transactions with, or perform services for, us in the ordinary course of business.

All securities we may offer, other than common stock, will be new issues of securities with no established trading market. Any underwriters may make a market in these securities, but will not be obligated to do so and may discontinue any market making at any time without notice. We cannot guarantee the liquidity of the trading markets for any securities.

Any underwriter may engage in over-allotment, stabilizing transactions, short-covering transactions and penalty bids in accordance with Regulation M under the Exchange Act. Over-allotment involves sales in excess of the offering size, which create a short position. Stabilizing transactions permit bids to purchase the underlying security so long as the stabilizing bids do not exceed a specified maximum price. Syndicate-covering or other short-covering transactions involve purchases of the securities, either through exercise of the over-allotment option or in the open market after the distribution is completed, to cover short positions. Penalty bids permit the underwriters to reclaim a selling concession from a dealer when the securities originally sold by the dealer are purchased in a covering transaction to cover short positions. Those activities may cause the price of the securities to be higher than it would otherwise be. If commenced, the underwriters may discontinue any of the activities at any time.

In compliance with guidelines of the Financial Industry Regulatory Authority, or FINRA, the maximum consideration or discount to be received by any FINRA member or independent broker dealer may not exceed 8% of the aggregate amount of the securities offered pursuant to this prospectus and any applicable prospectus supplement.

DESCRIPTION OF PREFERRED STOCK

Pursuant to our certificate of incorporation, our board of directors has the authority, without further action by the stockholders (unless such stockholder action is required by applicable law or NYSE AMEX rules), to designate and issue up to 40,000,000 shares of preferred stock, par value \$0.0001 per share, in one or more series, to establish from time to time the number of shares to be included in each such series, to fix the powers, designations, rights and preferences of the shares of each wholly unissued series and any qualifications, limitations or restrictions thereon, and to increase or decrease the number of shares of any such series, but not below the number of shares of such series then outstanding.

We will fix the powers, designations, rights and preferences and qualifications, limitations or restrictions of the preferred stock of each series in the certificate of designation relating to that series. We will file as an exhibit to the registration statement of which this prospectus is a part, or will incorporate by reference from reports that we file with the SEC, the form of any certificate of designation that describes the terms of the series of preferred stock we are offering before the issuance of that series of preferred stock. This description will include:

Table of Contents

If we issue shares of preferred stock under this prospectus, the shares will be fully paid and non-assessable.

The General Corporation Law of the State of Delaware, the state of our incorporation, provides that the holders of preferred stock will have the right to vote separately as a class (or, in some cases, as a series,) on an amendment of the certificate of incorporation if the amendment would change the par value or, unless the certificate of incorporation provided otherwise, the number of authorized shares of the class or change the powers, preferences or special rights of the class or series so as to adversely affect the class or series, as the case may be. This right is in addition to any voting rights that may be provided for in the applicable certificate of designation.

Our board of directors may authorize the issuance of preferred stock with voting or conversion rights that could adversely affect the voting power or other rights of the holders of our common stock. Preferred stock could be issued quickly with terms designed to delay or prevent a change in control of our company or make removal of management more difficult. Additionally, the issuance of preferred stock may have the effect of decreasing the market price of our common stock.
