PRESENTATION OF FINANCIAL AND OTHER INFORMATION

All references herein to *real*, *reais* or R\$ are to the Brazilian *real*, the official currency of Brazil. All references to U.S. dollars, dollars or U are to U.S. dollars.

On March 6, 2014, the exchange rate for *reais* into U.S. dollars was R\$2.309 to US\$1.00, based on the selling rate as reported by the Central Bank of Brazil (*Banco Central do Brasil*), or the Brazilian Central Bank. The selling rate was R\$2.343 to US\$1.00 on December 31, 2013, R\$2.044 to US\$1.00 on December 31, 2012, and R\$1.876 to US\$1.00 on December 31, 2011, in each case, as reported by the Brazilian Central Bank. The *real*/U.S. dollar exchange rate fluctuates widely, and the selling rate on March 6, 2014 may not be indicative of future exchange rates. See Item 3. Key Information Exchange Rates for information regarding exchange rates for the *real* since January 1, 2009.

Solely for the convenience of the reader, we have translated some amounts included in Item 3. Key Information Selected Financial Information and in this annual report from *reais* into U.S. dollars using the selling rate as reported by the Brazilian Central Bank on December 31, 2013 of R\$2.343 to US\$1.00. These translations should not be considered representations that any such amounts have been, could have been or could be converted into U.S. dollars at that or at any other exchange rate.

Financial Statements

We maintain our books and records in *reais*. Our consolidated financial statements as of December 31, 2013 and 2012 and for the three years ended December 31, 2013 are included in this annual report.

We prepare our consolidated financial statements in accordance with accounting practices adopted in Brazil, or Brazilian GAAP, which are based on:

Brazilian Law No. 6,404/76, as amended by Brazilian Law No. 9,457/97, Brazilian Law No. 10,303/01, and Brazilian Law No. 11,638/07, which we refer to collectively as the Brazilian Corporation Law;

the rules and regulations of the Brazilian Securities Commission (*Comissão de Valores Mobiliários*), or the CVM, and the Brazilian Federal Accounting Council (*Conselho Federal de Contabilidade*); and

the accounting standards issued by the Brazilian Accounting Pronouncements Committee (*Comitê de Pronunciamentos Contábeis*), or the CPC.

Brazilian GAAP differs in certain important respects from accounting principles generally accepted in the United States, or U.S. GAAP. Differences between Brazilian GAAP and U.S. GAAP where applicable to Oi are summarized in note 31 to our audited consolidated financial statements included in this annual report.

Certain Defined Terms

Unless otherwise indicated or the context otherwise requires:

all references to our company, we, our, ours, us or similar terms are to Oi S.A. and its consolidated subsidiaries with respect to current information and information as of and for periods ended after February 27, 2012 and to Brasil Telecom S.A. and its consolidated subsidiaries with respect to information as of and for periods ended on or prior to February 27, 2012;

all references to Oi or Brasil Telecom are to Oi S.A. (formerly known as Brasil Telecom S.A.);

Edgar Filing: Oi S.A. - Form 20-F

all references to TmarPart are to Telemar Participações S.A., the direct controlling shareholder of Oi;

ii

Table of Contents

all references to TNL are to Tele Norte Leste Participações S.A., a company that was directly controlled by TmarPart prior to its merger with and into Oi on February 27, 2012 as part of the corporate reorganization;

all references to Telemar are to Telemar Norte Leste S.A., a company that was directly controlled by TNL prior to the corporate reorganization and which became a wholly-owned subsidiary of Oi on February 27, 2012 as part of the corporate reorganization;

all references to Coari are to Coari Participações S.A., a company that was wholly-owned by Telemar prior to its merger with and into Oi on February 27, 2012 as part of the corporate reorganization;

all references to our Common ADSs are to American Depositary Shares, or ADSs, each representing one common share of our company, all references to our Preferred ADSs are to ADSs, each representing one preferred share of our company, and all references to our ADSs are to our Common ADSs and Preferred ADSs;

all references to Brazil are to the Federative Republic of Brazil; and

all references to the Brazilian government are to the federal government of the Federative Republic of Brazil.

Corporate Reorganization

On February 27, 2012, Tele Norte Leste Participações S.A., or TNL, Telemar Norte Leste S.A., a subsidiary of TNL, or Telemar, Coari Participações S.A., a wholly owned subsidiary of Telemar, or Coari, and Brasil Telecom S.A., a subsidiary of Coari, undertook a corporate reorganization in which:

Telemar and Coari engaged in a split-off (*cisão*) and merger of shares (*incorporação de ações*) under Brazilian law in which (1) Telemar transferred the shares of Coari that it owned to Coari, (2) Coari assumed a portion of the liabilities of Telemar, (3) the common and preferred shares of Telemar were exchanged for newly issued common and preferred shares of Coari, and (4) Telemar became a wholly-owned subsidiary of Coari;

Coari and Brasil Telecom engaged in a merger (*incorporação*) under Brazilian law in which Coari merged with and into Brasil Telecom, which we refer to as the Coari merger;

TNL and Brasil Telecom engaged in a merger (*incorporação*) under Brazilian law in which TNL merged with and into Brasil Telecom, which we refer to as the TNL merger; and

the corporate name of Brasil Telecom was changed to Oi S.A., or Oi.

We refer to these transactions collectively as the corporate reorganization.

The following chart sets forth the ownership structure of TNL, Telemar and Coari in Brasil Telecom immediately prior to the corporate reorganization. The percentages in bold italics represent the percentage of the voting capital owned by the parent company of each entity, and the percentages not in bold italics represent the percentage of the total share capital owned by the parent company of each entity.

Table of Contents

The following chart sets forth the structure of Brasil Telecom and Telemar immediately following the corporate reorganization.

As a result of the corporate reorganization, we have consolidated the results of TNL into results as from February 28, 2012. We have accounted for the Coari merger and the TNL merger using the carry-over basis of our own assets and liabilities and of the assets and liabilities assumed of TNL, Telemar, and Coari as from the date of the reorganization. The carry-over basis of the assets and liabilities were determined at the lowest level entity in the group (i.e., the effects of the purchase accounting relating to Coari's acquisition of Brasil Telecom (now Oi S.A.) will not be reflected in the assets and liabilities of Oi S.A. in its consolidated financial statements as a result of the TNL merger). Additionally, our historical financial statements have not been restated to reflect the impacts of the corporate reorganization on a retrospective basis. Our non-current intangible assets and property, plant and equipment are recorded on a different basis in our parent company's consolidated financial statements, reflecting the amortized purchase price allocated to these assets resulting from Coari's acquisition of our company on January 8, 2009. For more details regarding the corporate reorganization, see Item 4. Information on the Company Our History and Development Corporate Reorganization of TNL, Telemar and Our Company.

Information regarding Oi in this annual report is presented giving effect to the corporate reorganization on February 27, 2012. However, financial and other data included in this annual report regarding Oi and its consolidated subsidiaries as of December 31, 2011 and earlier dates and for periods ended on December 31, 2011 and earlier dates is historical in nature and does not give pro forma effect to the corporate reorganization, except as otherwise noted.

In addition, financial and other data included in this annual report regarding TNL and its consolidated subsidiaries as of December 31, 2011 and earlier dates and for periods ended on December 31, 2011 and earlier

Table of Contents

dates is historical in nature and includes financial and other data regarding Brasil Telecom, a subsidiary of TNL prior to February 27, 2012. The financial statements of TNL as of and for the year ended December 31, 2011 have not been presented elsewhere in this annual report and have not been filed with the SEC.

Proposed Business Combination

On October 1, 2013, we entered into a memorandum of understanding, or the Memorandum of Understanding, with Portugal Telecom, AG Telecom Participações S.A., or AG Telecom, LF Tel S.A., or LF Tel, PASA Participações S.A., or PASA, EDSP75 Participações S.A., or EDSP, Bratel Brasil S.A., or Bratel Brasil, Avistar, SGPS, S.A., or BES, and Nivalis Holding B.V., or Ongoing, in which we and they agreed to the principles governing a series of transactions, including the business combination described below.

The business combination transaction involves three principal components:

a capital increase of our company in which we expect to issue common shares and preferred shares in an underwritten offering for an aggregate of at least R\$7,000 million in cash, and common shares and preferred shares to Portugal Telecom in exchange for the contribution by Portugal Telecom to our company of all of the shares of its subsidiary PT Portugal, which will at that time will own (a) all of the operating assets of Portugal Telecom, except interests held directly or indirectly in Oi and Contax Holding, and (b) all of Portugal Telecom's liabilities at the time of the contribution, which we refer to collectively as the Oi capital increase;

a merger of shares (*incorporação de ações*) under Brazilian law, a Brazilian transaction in which, subject to the approvals of the holders of voting shares of our company and TmarPart, all of the shares of our company not owned by TmarPart will be exchanged for TmarPart common shares and we will become a wholly-owned subsidiary of TmarPart, which we refer to as the merger of shares; and

a merger (*incorporação*) under Portuguese and Brazilian law, of Portugal Telecom with and into TmarPart, with TmarPart as the surviving company in which the shareholders of Portugal Telecom will receive an aggregate number of TmarPart shares equal to the number of TmarPart shares held by Portugal Telecom immediately prior to the merger, which we refer to as the merger.

In connection with the business combination, we expect that:

TmarPart will enter into several additional transactions designed to recapitalize TmarPart so that at the time of the merger of shares, TmarPart will have no net debt;

TmarPart and our company will enter into merger transactions in order to simplify the ownership structure of TmarPart;

The shares of TmarPart will be listed on the Novo Mercado segment of the BM&FBOVESPA and on the NYSE Euronext Lisbon, and ADSs representing the shares of TmarPart will be listed on the NYSE; and

The shareholders agreements among the shareholders of TmarPart will be terminated.

We believe that the business combination will:

permit the formation of a single large multinational telecommunications company based in Brazil with more than 100 million customers in seven countries with a total population of approximately 260 million people;

maintain the continuity of operations under the trademarks of Oi and Portugal Telecom in their respective regions of operation, subject to unified control and management by TmarPart;

further consolidate the operations of our company and Portugal Telecom, with the goal of achieving

v

Table of Contents

significant economies of scale, maximizing operational synergies, reducing operational risks, optimizing efficient investments and adopting best operational practices;

strengthen the capital structure of TmarPart, facilitating its access to capital and financial resources;

consolidate the shareholder bases of our company, Portugal Telecom and TmarPart as holders of a single class of common shares or ADSs traded on the Novo Mercado segment of the BM&FBOVESPA, the NYSE and NYSE Euronext Lisbon;

diffuse TmarPart's shareholder base, as a result of which no shareholder or group of shareholders will hold a majority interest in TmarPart's capital;

result in the adoption by TmarPart of the corporate governance practices of the Novo Mercado segment of the BM&FBOVESPA; and

promote greater liquidity of the TmarPart common shares than currently is available to holders of our shares and Portugal Telecom's shares.

For more information on the proposed business combination and related transactions, see Item 4. Information on the Company Our History and Development Proposed Business Combination.

Share Split

On April 10, 2007, we authorized the reverse split of all of our issued common shares and preferred shares into one share for each 1,000 issued shares. This reverse share split became effective on May 14, 2007. In connection with this reverse share split, we authorized a change in the ratio of our Preferred ADS. Upon the effectiveness of our reverse share split and the ratio change, the ratio of our preferred shares to our Preferred ADSs, changed from 3,000 preferred shares per Preferred ADS to three preferred shares per Preferred ADS. All references to numbers of shares and dividend amounts in this annual report have been adjusted to give effect to the 1,000-for-one reverse share split.

On August 15, 2012, we changed the ratio applicable to our Preferred ADS from three preferred shares per Preferred ADS to one preferred shares per Preferred ADS. All references to numbers of Preferred ADSs in this annual report have been adjusted to give effect to this change in ratio.

Market Share and Other Information

We make statements in this annual report about our market share and other information relating to the telecommunications industry in Brazil. We have made these statements on the basis of information obtained from third-party sources and publicly available information that we believe are reliable, such as information and reports from the Brazilian federal telecommunications regulator (*Agência Nacional de Telecomunicações*), or ANATEL, among others. Notwithstanding any investigation that we may have conducted with respect to the market share, market size or similar data provided by third parties or derived from industry or general publications, we assume no responsibility for the accuracy or completeness of any such information.

Rounding

We have made rounding adjustments to reach some of the figures included in this annual report. As a result, numerical figures shown as totals in some tables may not be arithmetic aggregations of the figures that precede them.

Table of Contents

CAUTIONARY STATEMENT WITH RESPECT TO FORWARD-LOOKING STATEMENTS

This annual report contains forward-looking statements. Some of the matters discussed concerning our business operations and financial performance include forward-looking statements within the meaning of the U.S. Securities Act of 1933, as amended, or the Securities Act, or the U.S. Securities Exchange Act of 1934, as amended, or the Exchange Act.

Statements that are predictive in nature, that depend upon or refer to future events or conditions or that include words such as expects, anticipates, intends, plans, believes, estimates and similar expressions are forward-looking statements. Although we believe that these forward-looking statements are based upon reasonable assumptions, these statements are subject to several risks and uncertainties and are made in light of information currently available to us.

Our forward-looking statements may be influenced by factors, including the following:

competition in the Brazilian telecommunications sector;

the Brazilian government's telecommunications policies that affect the telecommunications industry and our business in general, including issues relating to the remuneration for the use of our network, and changes in or developments of ANATEL regulations applicable to us;

the cost and availability of financing;

the general level of demand for, and changes in the market prices of, our services;

our ability to implement our corporate strategies in order to expand our customer base and increase our average revenue per user;

political, regulatory and economic conditions in Brazil and the specific Brazilian states in which we operate;

inflation and fluctuations in exchange rates;

the outcomes of legal and administrative proceedings to which we are or become a party;

changes in telecommunications technology that could require substantial or unexpected investments in infrastructure or that could lead to changes in our customers' behavior;

our ability to implement the business combination, including the acquisition of PT Portugal, the cash portion of the Oi capital increase, and the merger of shares;

following the pending completion of our acquisition of PT Portugal, the Portuguese government's telecommunications policies that affect the telecommunications industry and the business of PT Portugal in general, including issues relating to the remuneration for the network we will acquire, and changes in or developments of ANACOM regulations applicable to PT Portugal;

our progress in integrating the operations of PT Portugal following our proposed acquisition of PT Portugal so as to achieve the anticipated benefits of this acquisition;

political, regulatory and economic conditions in Portugal and the African and Asian countries in which we will operate following the acquisition of PT Portugal; and

other factors identified or discussed under Item 3. Key Information Risk Factors.

Table of Contents

Our forward-looking statements are not guarantees of future performance, and our actual results or other developments may differ materially from the expectations expressed in the forward-looking statements. As for forward-looking statements that relate to future financial results and other projections, actual results will be different due to the inherent uncertainty of estimates, forecasts and projections. Because of these uncertainties, potential investors should not rely on these forward-looking statements.

We undertake no obligation to publicly update any forward-looking statement, whether as a result of new information, future events or otherwise.

Table of Contents

ITEM 1. IDENTITY OF DIRECTORS, SENIOR MANAGEMENT AND ADVISERS

Not applicable.

ITEM 2. OFFER STATISTICS AND EXPECTED TIMETABLE

Not applicable.

ITEM 3. KEY INFORMATION

Selected Financial Information

The following selected financial data should be read in conjunction with the consolidated financial statements of Oi (including the notes thereto), Item 5. Operating and Financial Review and Prospects and Presentation of Financial and Other Information.

The following selected financial data have been derived from our consolidated financial statements. The selected financial data as of December 31, 2013 and 2012 and for the years ended December 31, 2013, 2012 and 2011 have been derived from our audited consolidated financial statements included in this annual report. The selected financial data as of December 31, 2011, 2010 and 2009 and for the years ended December 31, 2010 and 2009 have been derived from our consolidated financial statements that are not included in this annual report.

Our consolidated financial statements are prepared in accordance with Brazilian GAAP, which differs in certain important respects from U.S. GAAP. Differences between Brazilian GAAP and U.S. GAAP where applicable to Oi are summarized in note 31 to our audited consolidated financial statements included in this annual report.

We have included information with respect to the dividends and/or interest attributable to shareholders equity paid to holders of our common shares and preferred shares since January 1, 2009 in *reais* and in U.S. dollars translated from *reais* at the commercial market selling rate in effect as of the payment date under the caption Item 8. Financial Information Dividends and Dividend Policy Payment of Dividends.

Table of Contents**Exchange Rates**

The Brazilian foreign exchange system allows the purchase and sale of foreign currency and the international transfer of *reais* by any person or legal entity, regardless of the amount, subject to certain regulatory procedures.

Since 1999, the Brazilian Central Bank has allowed the U.S. dollar-*real* exchange rate to float freely, and, since then, the U.S. dollar-*real* exchange rate has fluctuated considerably.

In the past, the Brazilian Central Bank has intervened occasionally to control unstable movements in foreign exchange rates. We cannot predict whether the Brazilian Central Bank or the Brazilian government will continue to permit the *real* to float freely or will intervene in the exchange rate market through the return of a currency band system or otherwise. The *real* may depreciate or appreciate against the U.S. dollar and/or the euro substantially. Furthermore, Brazilian law provides that, whenever there is a significant imbalance in Brazil's balance of payments or there are serious reasons to foresee a significant imbalance, temporary restrictions may be imposed on remittances of foreign capital abroad. We cannot assure you that such measures will not be taken by the Brazilian government in the future. See Risk Factors Risks Relating to Brazil Restrictions on the movement of capital out of Brazil may impair our ability to service certain debt obligations.

The following table shows the commercial selling rate or selling rate, as applicable, for U.S. dollars for the periods and dates indicated. The information in the Average column represents the average of the exchange rates on the last day of each month during the periods presented.

Year	Reais per U.S. Dollar			Period End
	High	Low	Average	
2009	R\$ 2.422	R\$ 1.702	R\$ 1.994	R\$ 1.741
2010	1.881	1.655	1.759	1.666
2011	1.902	1.535	1.671	1.876
2012	2.112	1.702	1.959	2.044
2013	2.446	1.953	2.161	2.343

Month	Reais per U.S. Dollar	
	High	Low
September 2013	R\$ 2.390	R\$ 2.203
October 2013	2.212	2.161
November 2013	2.336	2.243
December 2013	2.382	2.310
January 2014	2.440	2.334
February 2014	2.424	2.333
March 2014(1)	2.324	2.309

(1) Through March 6, 2014.

Risk Factors

You should consider the following risks as well as the other information set forth in this annual report when evaluating an investment in our company. In general, investing in the securities of issuers in emerging market countries, such as Brazil, involves a higher degree of risk than investing in the securities of issuers in the United States. Additional risks and uncertainties not currently known to us, or those that we currently deem to be immaterial, may also materially and adversely affect our business, results of operations, financial condition and prospects. Any of the following risks could materially affect us. In such case, you may lose all or part of your original investment.

Risks Relating to the Brazilian Telecommunications Industry and Our Company

Our fixed-line telecommunications services face increased competition from mobile services providers, other fixed-line service providers and cable television service providers, which may adversely affect our revenues and margins.

Our fixed-line telecommunications services in Region I (which consists of 16 Brazil states located in the northeastern and part of the northern and southeastern regions) and Region II (which consists of the Federal District and nine Brazilian states located in the western, central and southern regions) face increasing competition from mobile services as the prices for mobile services decline and approach those of fixed-line services. Based on information available from ANATEL, from December 31, 2010 to April 30, 2013 (the latest date for which such information is available from ANATEL), the number of fixed lines in service in Brazil increased from 42.0 million to 44.5 million. We expect (1) the number of fixed lines in service in Regions I and II to experience slow growth, as certain customers eliminate their fixed-line services in favor of mobile services, and (2) the use of existing fixed lines for making voice calls to decline as customers substitute calls on mobile phones in place of fixed-line calls as a result of promotional mobile rates (such as free calls within a mobile provider's network). The rate at which the number of fixed lines in service in Brazil may decline depends on many factors beyond our control, such as economic, social, technological and other developments in Brazil. In addition, new fixed lines that we install are expected to be less profitable than existing ones because new fixed-line customers generally have lower average incomes than our existing customers, subscribe to our lower cost service plans and generate fewer chargeable minutes of usage. For the year ended December 31, 2013, our traditional local fixed-line telecommunications services represented 29.4% of our net operating revenue. Because we derive a significant portion of our net operating revenue from our traditional local fixed-line telecommunications services, the reduction in the number of our fixed-lines in service has negatively affected and is likely to continue to negatively affect our net operating revenue and margins.

We also compete in the market for local fixed-line services with other fixed-line service providers, primarily with Empresa Brasileira de Telecomunicações - Embratel, or Embratel, and GVT S.A., or GVT. In addition to direct competition for corporate customers Embratel competes with us for residential customers in Regions I and II with services that it provides using the cable infrastructure of its subsidiary, Net Serviços de Comunicação S.A., or Net. Net is a cable television company that is our main competitor in the broadband services market. Embratel is a subsidiary of América Móvil S.A.B. de C.V., or América Móvil, one of the leading telecommunications service providers in Latin America. Under an agreement entered into between Embratel and Net in November 2005, Net offers integrated voice, broadband and pay television services to the Brazilian residential market through a single network infrastructure. In addition, we compete in each of these service regions with smaller companies that have been authorized by ANATEL to provide local fixed-line services. Embratel, GVT and Net are each controlled by multinational companies that may have more significant financial and marketing resources, and greater abilities to access capital on a timely basis and on more favorable terms, than our company. Our loss of a significant number of fixed-line customers would adversely affect our net operating revenue and may adversely affect our results of operations. For a detailed description of our competition in the local fixed-line services market, see Item 4. Information on the Company - Competition - Local Fixed-Line Services.

Our mobile services face strong competition from other mobile services providers, which may adversely affect our revenues.

The mobile services market in Brazil is extremely competitive. We face competition from large competitors such as TIM Participações S.A., or TIM, Telefônica Brasil S.A., or Telefônica Brasil, which markets its mobile

Table of Contents

services under the brand name Vivo, and Claro S.A., or Claro. As of November 30, 2013, based on information regarding the total number of subscribers as of that date available from ANATEL we had a market share of 18.6% of the total number of subscribers in Brazil, ranking behind Telefônica Brasil with 28.7%, TIM with 27.0% and Claro with 25.2%, and we captured 10.7% of all net additions of mobile subscribers in Brazil (calculated based on the number of mobile subscribers at the end of a period less the number of mobile subscribers at the beginning of that period) during 2013. Telefônica Brasil, TIM and Claro are each controlled by multinational companies that may have more significant financial and marketing resources, and greater abilities to access capital on a timely basis and on more favorable terms, than our company.

Our ability to generate revenues from our mobile services business depends on our ability to increase and retain our customer base. Each additional customer subscribing to our service entails costs, including sales commissions and marketing costs. Recovering these costs depends on our ability to retain such customers. Therefore, high rates of customer churn could have a material adverse effect on the profitability of our mobile services business. During 2013, our average customer churn rate in the mobile services segment, representing the number of subscribers whose service was disconnected during each month, whether voluntarily or involuntarily, divided by the number of subscribers at the beginning of such month, was 4.2% per month.

We have experienced increased pressure to reduce our rates in response to pricing competition. This pricing competition often takes the form of special promotional packages, which may include, among other things, mobile handset subsidies, traffic usage promotions and incentives for calls made within a mobile services provider's own network. Competing with the service plans and promotions offered by our competitors may cause an increase in our marketing expenses and customer-acquisition costs, which has adversely affected and could continue to adversely affect our results of operations. Our inability to compete effectively with these packages could result in our loss of market share and adversely affect our net operating revenue and profitability. For a detailed description of our competition in the mobile services market, see Item 4. Information on the Company Competition Mobile Services.

Our long-distance services face significant competition, which may adversely affect our revenues.

In Brazil, unlike in the United States and elsewhere, a caller chooses its preferred long-distance carrier for each long-distance call, whether originated from a fixed-line telephone or a mobile handset, by dialing such carrier's long-distance carrier selection code (*Código de Seleção de Prestadora*). The long-distance services market in Brazil is highly competitive. Our principal competitors for long-distance services are TIM and Embratel, which are currently offering long-distance services throughout Brazil at rates that are charged on a per call, rather than per minute, basis. We compete with Telefônica Brasil, which is the incumbent fixed-line service provider in Region III. Increased competition from long-distance service providers has resulted in pressure on our long-distance rates and adversely affected our revenue from these services. In addition, the proliferation of new types of service plans, such as same network subscription plans that offer unlimited long distance calls and data combination plans are impacting the long-distance services market in Brazil. Competition in the long-distance market may require us to increase our marketing expenses and/or provide services at lower rates than those we currently expect to charge for such services. Competition in the domestic market has had and could continue to have a material adverse effect on our revenues and margins. See Item 4. Information on the Company Competition Long-Distance Services.

Data transmission services are not subject to significant regulatory restrictions and, as a result, we face an increasing amount of competition in this business.

Competition in data transmission services is not subject to significant regulatory restrictions and, therefore, the market is open to a large number of competitors. Some competitors, such as cable operators, offer telephone and broadband services, which do not require them to use our fixed-line network, thereby allowing them to reach our customers without paying interconnection fees to our company. Increasing competition in data transmission services may lead to rate reductions in this segment, adversely affecting the net operating revenue that we generate from this business. Additionally, increased competition for data transmission customers may require us to increase our marketing expenses and our capital expenditures and may lead to the loss of broadband customers, in each case leading to a decrease in our profitability. For a detailed description of our competition in the data transmission services market, see Item 4. Information on the Company Competition Data Transmission Services.

Table of Contents

The telecommunications industry is subject to frequent changes in technology. Our ability to remain competitive depends on our ability to implement new technology, and it is difficult to predict how new technology will affect our business.

Companies in the telecommunications industry must adapt to rapid and significant technological changes that are usually difficult to anticipate. The mobile telecommunications industry in particular has experienced rapid and significant technological development and frequent improvements in capacity, quality and data-transmission speed. Technological changes may render our equipment, services and technology obsolete or inefficient, which may adversely affect our competitiveness or require us to increase our capital expenditures in order to maintain our competitive position. For example, we have made significant investments in the last three years in connection with the implementation of our UMTS (Universal Mobile Telecommunications System), or 3G, services, and we have begun investing in the implementation of our LTE (Long Term Evolution), or 4G, services. It is possible that alternative technologies may be developed that are more advanced than those we currently provide. We may not obtain the expected benefits of our investments if more advanced technologies are adopted by the market. Even if we adopt new technologies in a timely manner as they are developed, the cost of such technology may exceed the benefit to us, and we cannot assure you that we will be able to maintain our level of competitiveness.

Our industry is highly regulated. Changes in laws and regulations may adversely impact our business.

Our industry is highly regulated by ANATEL. ANATEL regulates, among other things, rates, quality of service and universal service goals, as well as competition among telecommunications service providers. Changes in laws and regulations, grants of new concessions, authorizations or licenses or the imposition of additional universal service obligations, among other factors, may adversely affect our business, financial condition and results of operations.

For example, ANATEL has proposed new regulations under which it would modify the productivity discount factor, or Factor X, applicable to the determination of rate increases available to public concessionaires providing fixed-line services. These regulations were submitted for public consultation in July 2011 and the public consultation period ended on September 1, 2011. We expect these new regulations, as they may be modified as a result of ANATEL's further analysis, to be adopted in 2014. We cannot predict when these regulations will be adopted or whether they will be adopted as proposed. Some of these regulations, if adopted, may have adverse effects on our revenues, costs and expenses, results of operations or financial position.

We cannot predict whether ANATEL, the Brazilian Ministry of Communications (*Ministério das Comunicações*) or the Brazilian government will adopt other telecommunications sector policies in the future or the consequences of such policies on our business and the business of our competitors.

Our local fixed-line and domestic long-distance concession agreements are subject to periodic modifications by ANATEL and expire on December 31, 2025. Our bids for new concessions upon the expiration of our existing concessions may not be successful.

We provide fixed-line telecommunications services in Regions I and II pursuant to concession agreements with the Brazilian government. Our concession agreements expire on December 31, 2025, and may be amended by the parties every five years prior to the expiration date. In connection with each five year amendment, ANATEL has the right, following public consultations, to impose new terms and conditions in response to changes in technology, competition in the marketplace and domestic and international economic conditions.

Our obligations under the concession agreements may be subject to revision in connection with each future amendment. We cannot assure you that any future amendments will not impose requirements on our company that will require us to undertake significant capital expenditures or will not modify the rate-setting procedures applicable to us in a manner that will significantly reduce the net operating revenue that we generate from our fixed-line businesses. If the amendments to our concession agreements have these effects, our business, financial condition and results of operations could be materially adversely affected.

Table of Contents

Our concession agreements will expire on December 31, 2025. We expect the Brazilian government to offer new concessions in competitive auctions prior to the expiration of our existing concession agreements. We may participate in such auctions, but our existing fixed-line and domestic long-distance concession agreements will not entitle us to preferential treatment in these auctions. If we do not secure concessions for our existing service areas in any future auctions, or if such concessions are on less favorable terms than our current concessions, our business, financial condition and results of operations would be materially adversely affected.

Our local fixed-line and domestic long-distance concession agreements, as well as our authorizations to provide personal mobile services, contain certain obligations, and our failure to comply with these obligations may result in various fines and penalties imposed on us by ANATEL.

Our local fixed-line and domestic long-distance concession agreements contain terms reflecting the General Plan on Universal Service (*Plano Geral de Metas de Universalização*), the General Plan on Quality Goals (*Plano Geral de Metas de Qualidade*) and other regulations adopted by ANATEL, the terms of which could affect our financial condition and results of operations. Our local fixed-line concession agreements also require us to meet certain network expansion, quality of service and modernization obligations in each of the states in Regions I and II. In the event of noncompliance with ANATEL targets in any one of these states, ANATEL can establish a deadline for achieving the targeted level of such service, impose penalties and, in extreme situations, terminate the applicable concession agreement for noncompliance with its quality and universal service obligations. See Item 4. Information on the Company Regulation of the Brazilian Telecommunications Industry Regulation of Fixed-Line Services.

On an almost weekly basis, we receive inquiries from ANATEL requiring information from us on our compliance with the various service obligations imposed on us by our concession agreements. If we are unable to respond satisfactorily to those inquiries or comply with our service obligations under our concession agreements, ANATEL may commence administrative proceedings in connection with such noncompliance. We have received numerous notices of the commencement of administrative proceedings from ANATEL, mostly due to our inability to achieve certain targets established in the General Plan on Quality Goals and the General Plan on Universal Service, among others. As of December 31, 2013, we had recorded provisions in the amount of R\$1,045 million in connection with fines sought to be imposed by ANATEL. Additional fines from ANATEL or fines in excess of the provisioned amount could adversely impact our financial condition and results of operations. See Item 4. Information on the Company Regulation of the Brazilian Telecommunications Industry and Item 8. Financial Information Legal Proceedings Civil Claims Administrative Proceedings.

In addition, our authorizations to provide personal mobile services contain certain obligations requiring us to meet network scope and quality of service targets. If we fail to meet these obligations, we may be fined by ANATEL until we are in full compliance with our obligations and, in extreme circumstances, our authorizations could be revoked by ANATEL. For example, on July 23, 2012, ANATEL temporarily suspended our ability to accept new customers for our mobile services in the States of Amazonas, Amapá, Mato Grosso do Sul, Roraima and Rio Grande do Sul due to ANATEL's perception of our failure to meet capital investment and quality of service commitments in those states. This suspension lasted for approximately two weeks until we were able to propose new quality of service goals to ANATEL. See Item 4. Information on the Company Regulation of the Brazilian Telecommunications Industry Regulation of Mobile Services Obligations of Personal Mobile Services Providers.

We may be unable to implement our plans to expand and enhance our existing networks in a timely manner or without unanticipated costs, which could hinder or prevent the successful implementation of our business plan and result in revenues and net income being less than expected.

Our ability to achieve our strategic objectives depends in large part on the successful, timely and cost-effective implementation of our plans to expand and enhance our networks. Factors that could affect this implementation include:

our ability to generate cash flow or to obtain future financing necessary to implement our projects;

delays in the delivery of telecommunications equipment by our vendors;

Table of Contents

the failure of the telecommunications equipment supplied by our vendors to comply with the expected capabilities; and

delays resulting from the failure of third-party suppliers or contractors to meet their obligations in a timely and cost-effective manner.

Although we believe that our cost estimates and implementation schedule are reasonable, we cannot assure you that the actual costs or time required to complete the implementation of these projects will not substantially exceed our current estimates. Any significant cost overrun or delay could hinder or prevent the successful implementation of our business plan and result in revenues and net income being less than expected.

We rely on strategic suppliers of equipment, materials and services necessary for our operations and expansion. If these suppliers fail to provide equipment, materials or services to us on a timely basis, we could experience disruptions, which could have an adverse effect on our revenues and results of operations.

We rely on few strategic suppliers of equipment, materials and services, including Nokia Solutions and Networks do Brasil Telecomunicações Ltda., or Nokia Solutions, Alcatel-Lucent Brasil S.A., or Alcatel-Lucent, Telemont Engenharia de Telecomunicações S.A., or Telemont, A.R.M. Engenharia Ltda., or A.R.M. Engenharia, and Huawei do Brasil Telecomunicações Ltda., or Huawei, to provide us with equipment, materials and services that we need in order to expand and to operate our business. There are a limited number of suppliers with the capability of providing the mobile network equipment and fixed-line network platforms that our operations and expansion plans require or the services that we require to maintain our extensive and geographically widespread networks. In addition, because the supply of mobile network equipment and fixed-line network platforms requires detailed supply planning and this equipment is technologically complex, it would be difficult for our company to replace the suppliers of this equipment. Suppliers of cables that we need to extend and maintain our networks may suffer capacity constraints or difficulties in obtaining the raw materials required to manufacture these cables. As a result, we are exposed to risks associated with these suppliers, including restrictions of production capacity for equipment and materials, availability of equipment and materials, delays in delivery of equipment, materials or services, and price increases. If these suppliers or vendors fail to provide equipment, materials or service to us on a timely basis or otherwise in compliance with the terms of our contracts with these suppliers, we could experience disruptions or declines in the quality of our services, which could have an adverse effect on our revenues and results of operations, and we might be unable to satisfy the requirements contained in our concession and authorization agreements.

Our controlling shareholder, TmarPart, has control over us and TmarPart's interests may not be aligned with your interests.

We are controlled by TmarPart which, as of March 6, 2014 directly and indirectly held 56.4% of our outstanding voting shares, excluding treasury shares but including TmarPart's direct ownership and indirect ownership through its subsidiary Valverde Participações S.A. or Valverde. TmarPart's shareholders are parties to four shareholders' agreements governing their equity interests in TmarPart. See Item 7. Major Shareholders and Related Party Transactions Major Shareholders' TmarPart Shareholders' Agreements. TmarPart is entitled to appoint a majority of the members of our board of directors, and it has the power to determine the decisions to be taken at our shareholders' meetings on matters of our management that require the prior authorization of our shareholders, including in respect of related party transactions, corporate restructurings and the date of payment of dividends and other capital distributions. The decisions of TmarPart on these matters may be contrary to the expectations or preferences of holders of our securities, including holders of our common shares, preferred shares and ADSs.

In order to expand our business, we may take advantage of the consolidation of the telecommunications industry through the acquisition of other telecommunications companies, which could adversely affect our business, results of operations and financial condition.

We may acquire other companies in the telecommunications industry as part of our growth and convergence strategy. A growth strategy that involves acquisitions may present certain risks to our business, results of operations and financial condition, such as:

Table of Contents

difficulties in capturing synergies in the integration process, causing the anticipated benefits of the acquisition to be more limited than originally expected;

costs associated with any unforeseen antitrust restrictions;

failure to identify contingencies during the due diligence process;

uncertainty in relation to regulatory approval; and

distractions from our core business to pursue these acquisitions and implement the integration of acquired businesses.

If acquisition transactions cause us to incur unforeseen costs due to the factors described above, we may have to dedicate more resources than we had originally planned and eventually face substantial losses that would adversely affect our business, results of operations and financial condition.

Even if we identify suitable acquisition targets, we may be unable to complete acquisitions or obtain necessary financing to do so on satisfactory terms. Paying for acquisitions could require us to incur or assume debt and/or contingent liabilities, amortize certain identifiable intangible assets and incur acquisition-related expenses. In addition, we may be unable to realize all or any of the anticipated benefits from acquisitions or expansion in other related businesses because of operational factors or difficulties in integrating the acquisitions or such other related businesses with our existing businesses, including disparate information technology systems, database systems and business processes.

We have a substantial amount of existing debt, which could restrict our financing and operating flexibility and have other adverse consequences.

As of December 31, 2013, we had total debt of R\$35,854 million. We are subject to certain financial covenants that limit our ability to incur additional debt. Our existing level of indebtedness and the requirements and limitations imposed by our debt instruments could adversely affect our financial condition or results of operations. In particular, the terms of some of these debt instruments restrict our ability, and the ability of our subsidiaries, to:

incur additional debt;

grant liens;

pledge assets;

sell or dispose of assets; and

make certain acquisitions, mergers and consolidations.

Furthermore, some of our debt instruments include financial covenants that require us to maintain certain specified financial ratios. Additionally, the instruments governing a substantial portion of our indebtedness contain cross-default or cross-acceleration clauses and the occurrence of an event of default under one of these instruments could trigger an event of default under other indebtedness or enable the creditors under other indebtedness to accelerate that indebtedness.

If we are unable to incur additional debt, we may be unable to invest in our business and make necessary or advisable capital expenditures, which could reduce future net operating revenue and adversely affect our profitability. In addition, cash required to serve our existing

Edgar Filing: OI S.A. - Form 20-F

indebtedness reduces the amount available to us to make capital expenditures. If our growth in net operating revenue slows or declines in a significant manner, for any reason, we may not be able to continue servicing our debt. If we are unable to meet our debt service obligations or comply with our debt covenants, we could be forced to renegotiate or refinance our indebtedness, seek additional equity capital or sell assets. We may be unable to obtain financing or sell assets on satisfactory terms, or at all. For

Table of Contents

more information regarding the debt instruments of our company and our indebtedness as of December 31, 2013, see Item 5. Operating and Financial Review and Prospects Liquidity and Capital Resources.

We are subject to numerous legal and administrative proceedings, which could adversely affect our business, results of operations and financial condition.

We are subject to numerous legal and administrative proceedings. It is difficult to quantify the potential impact of these legal and administrative proceedings. We classify our risk of loss from legal and administrative proceedings as probable, possible or remote. We make provisions for probable losses but do not make provisions for possible and remote losses. As of December 31, 2013, we had provisioned R\$5,616 million for probable losses relating to various tax, labor and civil legal and administrative proceedings against us. As of December 31, 2013, we had claims against us of R\$17,996 million in tax proceedings, R\$877 million in labor proceedings and R\$1,038 million in civil proceedings with a risk of loss classified as possible for which we had made no provisions.

We are not required to disclose or record provisions for proceedings in which our management judges the risk of loss to be remote. However, the amounts involved in certain of the proceedings in which we believe our risk of loss is remote could be substantial. Consequently, our losses could be significantly higher than the amounts for which we have recorded provisions.

If we are subject to unfavorable decisions in any legal or administrative proceedings and the losses in those proceedings significantly exceed the amount for which we have provisioned or involve proceedings for which we have made no provision, our results of operations and financial condition may be materially adversely affected. Even for the amounts recorded as provisions for probable losses, a judgment against us would have an effect on our cash flow if we are required to pay those amounts. Unfavorable decisions in these legal proceedings may, therefore, reduce our liquidity and adversely affect our business, financial condition and results of operations. For a more detailed description of these proceedings, see Item 8. Financial Information Legal Proceedings.

We are subject to potential liabilities relating to our third-party service providers, which could have a material adverse effect on our business, financial condition and results of operations.

We are subject to potential liabilities relating to our third-party service providers. Such potential liabilities may involve claims by employees of third-party service providers directly against us as if we were the direct employer of such employees, as well as claims against us for secondary liability for, among other things, occupational hazards, wage parity or overtime pay, in the event that such third-party service providers fail to meet their obligations to their employees. We have not recorded any provisions for such claims, and significant judgments against us could have a material adverse effect on our business, financial condition and results of operations.

We are subject to delinquencies of our accounts receivables. If we are unable to limit payment delinquencies by our customers, or if delinquent payments by our customers increase, our financial condition and results of operations could be adversely affected.

Our business significantly depends on our customers' ability to pay their bills and comply with their obligations to us. During 2013, we recorded provisions for doubtful accounts in the amount of R\$850 million, or 3.0% of our net operating revenue, primarily due to subscribers delinquencies. As of December 31, 2013, our provision for doubtful accounts was R\$654 million.

ANATEL regulations prevent us from implementing certain policies that could have the effect of reducing delinquency, such as service restrictions or limitations on the types of services provided based on a subscriber's credit record. If we are unable to successfully implement policies to limit subscriber delinquencies or otherwise select our customers based on their credit records, persistent subscriber delinquencies and bad debt will continue to adversely affect our operating and financial results.

In addition, if the Brazilian economy declines due to, among other factors, a reduction in the level of economic activity, depreciation of the *real*, an increase in inflation or an increase in domestic interest rates, a greater portion of

Table of Contents

our customers may not be able to pay their bills on a timely basis, which would increase our provision for doubtful accounts and adversely affect our financial condition and results of operations.

Our operations depend on our ability to maintain, upgrade and operate efficiently our accounting, billing, customer service, information technology and management information systems and to rely on the systems of other carriers under co-billing agreements.

Sophisticated information and processing systems are vital to our growth and our ability to monitor costs, render monthly invoices for services, process customer orders, provide customer service and achieve operating efficiencies. We cannot assure you that we will be able to operate successfully and upgrade our accounting, information and processing systems or that these systems will continue to perform as expected. We have entered into co-billing agreements with each long-distance telecommunications service provider that is interconnected to our networks to include in our invoices the long-distance services rendered by these providers, and they have agreed to include charges owed to us in their invoices. Any failure in our accounting, information and processing systems, or any problems with the execution of invoicing and collection services by other carriers with whom we have co-billing agreements, could impair our ability to collect payments from customers and respond satisfactorily to customer needs, which could adversely affect our business, financial condition and results of operations.

Improper use of our network could adversely affect our costs and results of operations.

We may incur costs associated with the unauthorized and fraudulent use of our networks, including administrative and capital costs associated with detecting, monitoring and reducing the incidence of fraud. Fraud also affects interconnection costs and payments to other carriers for non-billable fraudulent roaming. Improper use of our network could also increase our selling expenses if we need to increase our provision for doubtful accounts to reflect amounts we do not believe we can collect for improperly made calls. Any increase in the improper use of our network in the future could materially adversely affect our costs and results of operations.

Our operations are dependent upon our networks. A system failure could cause delays or interruptions of service, which could cause us to suffer losses.

Failure in our networks, or their backup mechanisms, may result in service delays or interruptions and limit our ability to provide customers with reliable service over our networks. Some of the risks to our networks and infrastructure include (1) physical damage to access lines and long-distance optical cables; (2) power surges or outages; (3) software defects; (4) disruptions beyond our control; (5) breaches of security; and (6) natural disasters. The occurrence of any such event could cause interruptions in service or reduce capacity for customers, either of which could reduce our gross operating revenue or cause us to incur additional expenses. In addition, the occurrence of any such event may subject us to penalties and other sanctions imposed by ANATEL and may adversely affect our business and results of operations.

The mobile telecommunications industry and participants in this industry, including us, may be harmed by reports suggesting that radio frequency emissions cause health problems and interfere with medical devices.

Media and other entities frequently suggest that the electromagnetic emissions from mobile handsets and base stations may cause health problems. If consumers harbor health-related concerns, they may be discouraged from using mobile handsets. These concerns could have an adverse effect on the mobile telecommunications industry and, possibly, expose mobile services providers to litigation. We cannot assure you that further medical research and studies will refute a link between the electromagnetic emissions of mobile handsets and base stations, including on frequency ranges we use to provide mobile services, and these health concerns. Government authorities could increase regulation on electromagnetic emissions of mobile handsets and base stations, which could have an adverse effect on our business, financial condition and results of operations. The expansion of our network may be affected by these perceived risks if we experience problems in finding new sites, which in turn may delay the expansion and may affect the quality of our services. ANATEL may enact new laws or regulations regarding electromagnetic emissions and exposure may be adopted that could have an adverse effect on our business.

Table of Contents

Our commitment to meet the obligations of our employees' pension plans, managed by Fundação Sistel de Seguridade Social and Fundação Atlântico de Seguridade Social may be higher than what is currently anticipated, and therefore, we may be required to make additional contributions of resources to these pension plans or to record liabilities or expenses that are higher than currently recorded.

As sponsors of certain private employee pension plans, which are managed by Fundação Sistel de Seguridade Social, or Sistel and Fundação Atlântico de Seguridade Social, or FATL, our subsidiaries cover the actuarial deficits of these pension benefit plans, which provide guaranteed benefits to our retirees and guaranteed future benefits to our current employees at the time of their retirement. As of December 31, 2013, our pension benefit plans had an aggregate deficit of R\$643.6 million. Our commitment to meet these deficit obligations may be higher THAN WE currently anticipate, and we may be required to make additional contributions or record liabilities or expenses that are higher than we currently record, which may adversely affect our financial results. For a more detailed description of our pension plans, see Item 6. Directors, Senior Management and Employees' Employees' Employee Benefits' Pension Benefit Plans.

Risks Relating to the Proposed Business Combination

The increase in our share capital and the report on the value of PT Portugal, both of which are conditions to our acquisition of PT Portugal, have not been approved by the shareholders of our company, and the approval of the shareholders of Portugal Telecom of the report on the value of PT Portugal, which is a condition to Portugal Telecom's obligation to contribute the shares of PT Portugal to our company, has not been obtained.

Under Brazilian law, prior to our acquisition of PT Portugal, the holders of our voting share capital must (1) approve the proposal to amend our authorized capital limit in order that we will have sufficient authorized shares to complete the Oi capital increase, (2) ratify the engagement of Banco Santander (Brasil) S.A., or Santander Brasil, to prepare the valuation report concerning the shares of PT Portugal that we will acquire in the Oi capital increase, (3) approve the valuation report prepared by Santander Brasil on the shares of PT Portugal that we will acquire in the Oi capital increase, which we refer to as the PT Assets Valuation Report, and (4) approve the proposed value of the shares of PT Portugal that Portugal Telecom will contribute to our company as payment for shares to be issued to Portugal Telecom in the Oi capital increase. We have called a meeting of our shareholders to be held on March 27, 2014 to consider these matters. Approval of these matters will require the affirmative vote of holders representing a majority of our common shares present or represented at this meeting. On January 8, 2014, the technical body of the CVM (the *Superintendência de Relações com Empresas*) issued an official opinion stating that the controlling shareholders of our company cannot vote with respect to the approval of the valuation of the shares of PT Portugal in the meeting of our shareholders called to consider these matters. We have appealed this decision to the full board of the CVM. If this appeal is successful, we have been advised that holders of our controlling shareholders intend to vote in favor of the approval of the valuation of the shares of PT Portugal. However, we can offer no assurances that the CVM will rule favorably on this appeal or that the CVM will rule of the appeal prior to the date of the shareholders meeting. Any decision by the CVM may be challenged by our company, our controlling shareholders or our minority shareholders in Brazilian courts. In addition, we can offer no assurances that if the CVM does not rule favorably on this appeal prior to the date of the shareholders meeting, the approval of the PT Assets Valuation Report will be obtained from our shareholders. The failure of our shareholders to approve the matters to be considered at this meeting would prevent our completion of the Oi capital increase.

Under the subscription agreement that we entered into with Portugal Telecom on February 19, 2014, or the PT subscription agreement, Portugal Telecom's obligation to contribute the shares of PT Portugal to our company is subject to the satisfaction of several conditions, including the approval of the PT Assets Valuation Report by the shareholders of Portugal Telecom. Portugal Telecom has called a meeting of its shareholders to be held on March 27, 2014 to consider this matter. Approval of the PT Assets Valuation Report will require the affirmative vote of holders representing a majority of Portugal Telecom's ordinary shares present or represented at this meeting. We can offer no assurances that the approval of the valuation of the shares of PT Portugal will be obtained from Portugal Telecom's shareholders. The failure of Portugal Telecom's shareholders to approve the valuation of the shares of PT Portugal at this meeting would prevent our completion of the Oi capital increase.

The Oi capital increase may not be successful and as a result, we may not meet certain conditions to Portugal Telecom's obligation to contribute the shares of PT Portugal to our company.

Table of Contents

Under the subscription agreement that we entered into with Portugal Telecom on February 19, 2014, or the PT subscription agreement, Portugal Telecom's obligation to contribute the shares of PT Portugal to our company is subject to the satisfaction of several conditions, including (1) our obtaining proceeds in the cash portion of the Oi capital increase of at least R\$7.0 billion, including proceeds of at least R\$2.0 billion through the sale of share capital to Caravelas Fundo de Investimento em Ações, an investment fund managed by Banco BTG Pactual S.A., or Caravelas, and the shareholders of TmarPart, and (2) the settlement of the Oi capital increase on or prior to May 2, 2014. In the event that any of the conditions to Portugal Telecom's obligation to contribute the shares of PT Portugal to our company, are not satisfied or waived by October 1, 2014, Portugal Telecom may, in its sole discretion, rescind the PT subscription agreement. In addition, Portugal Telecom has the right to terminate the PT subscription agreement if, after the bookbuilding process in the Oi capital increase, Portugal Telecom is expected to hold an interest of less than 36.6% of the share capital of TmarPart following the completion of the merger of shares, and we have the right to terminate the PT subscription agreement if, after the bookbuilding process in the Oi capital increase, Portugal Telecom is expected to hold an interest of more than 39.6% of the share capital of TmarPart following the completion of the merger of shares. As of the date of this annual report, we have not entered into any agreement with any underwriters of our shares which would obligate them to purchase shares in the Oi capital increase and our registrations with the CVM and the SEC of shares to be offered to the public in the Oi capital increase are not effective. The success of the Oi capital increase when commenced and the price of our shares in the Oi capital increase will depend in substantial part on factors outside of our control, including market conditions and investor demand for our shares. We can offer no assurances that the Oi capital increase will meet the conditions to Portugal Telecom's obligation to contribute the shares of PT Portugal to our company or that the termination rights of our company or Portugal Telecom will not be triggered as a result of the bookbuilding process in the Oi capital increase, or that these rights, if triggered will be waived.

The merger of shares has not been approved by the boards of directors or shareholders of our company or TmarPart.

Under Brazilian law, prior to the submission of the merger of shares to the shareholders of our company and TmarPart, the boards of directors of our company and TmarPart must approve the merger of shares and the Protocol of Merger of Shares and Instrument of Justification (*Protocolo e Justificação de Incorporação de Ações*) between TmarPart and our company, which we refer to as the Oi merger agreement. Following the approval of the merger of shares and the Oi merger agreement by the boards of directors of our company and TmarPart, the merger of shares and the Oi merger agreement will be submitted to extraordinary general shareholders meetings of our company and TmarPart. Approval of the merger of shares will require (1) the affirmative vote of holders representing a majority of the number of issued and outstanding TmarPart common shares present or represented at a duly convened extraordinary general shareholders' meeting, and (2) the affirmative vote of holders representing a majority of the total number of issued our common shares. We expect that our board of directors will approve the merger of shares and the Oi merger agreement at a meeting to be convened shortly after the completion of the global offering and we understand that TmarPart's board of directors will approve the merger of shares and the Oi merger agreement at a meeting to be convened on the same date. However, we can offer no assurances that these approvals will be obtained. In addition, we have been advised that holders of a sufficient number of shares of our company and TmarPart intend to vote in favor of the merger of shares at the extraordinary general shareholders meetings of our companies to approve the merger of shares. However, we can offer no assurances that these approvals will be obtained.

The merger has not been approved by the boards of directors or shareholders of TmarPart or Portugal Telecom.

Under Brazilian and Portuguese law, prior to the submission of the merger to the shareholders of TmarPart and Portugal Telecom, the boards of directors of TmarPart and Portugal Telecom must approve the merger and the Protocol of Merger and Instrument of Justification (*Protocolo e Justificação de Incorporação*) between TmarPart and Portugal Telecom, which we refer to as the PT merger agreement. Following the approval of the merger and the PT merger agreement by the boards of directors of TmarPart and Portugal Telecom, the merger and the PT merger agreement will be submitted to extraordinary general shareholders meetings of TmarPart and Portugal Telecom. Approval of the merger will require (1) the affirmative vote of holders representing a majority of the number of issued and outstanding TmarPart common shares present or represented at a duly convened extraordinary general shareholders' meeting, and (2) the affirmative vote of holders representing two-thirds of the total number of outstanding Portugal Telecom ordinary shares and A shares at an extraordinary general shareholders' meeting duly

Table of Contents

convened on first call. We understand that the boards of directors of TmarPart and Portugal Telecom will approve the merger and the PT merger agreement at a meeting to be convened shortly after the completion of the global offering. However, we can offer no assurances that these approvals will be obtained. In addition, we have been advised that holders of a sufficient number of shares of TmarPart intend to vote in favor of the merger at the extraordinary general shareholders meeting of TmarPart to approve the merger. However, we can offer no assurances that this approval will be obtained. Finally, we can offer no assurances that the shareholders of Portugal Telecom will approve the merger.

ANATEL may impose significant obligations on TmarPart as conditions to its approval of the merger, and compliance with these obligations could materially and adversely affect the business, financial condition and results of operations of TmarPart following the merger.

Under Brazilian regulations, the merger must be submitted to ANATEL to assess its effects on the Brazilian telecommunications services market and to confirm whether the applicable requirements will be met. TmarPart submitted the merger to ANATEL on December 12, 2013. If ANATEL takes any action to impose conditions or performance commitments on TmarPart as part of the approval process for the merger, including conditions that would require TmarPart to undertake significant capital expenditures or would require us to divest any significant part of our assets, that action could materially and adversely affect the business, financial condition and results of operations of TmarPart following the merger and prevent TmarPart from achieving the anticipated benefits of the merger.

In addition, under the PT subscription agreement, Portugal Telecom's obligation to contribute the shares of PT Portugal to our company is subject to the approval by ANATEL. We can offer no assurances that ANATEL will grant approval of the merger prior to the date specified in the condition to the PT subscription agreement, or at all. If ANATEL does not grant approval of the merger on a timely basis, we can offer no assurances that Portugal Telecom will waive this condition to its obligation to contribute the shares of PT Portugal to our company.

The Portuguese Competition Authority may prohibit the merger if it determines that the merger is capable of significantly impeding effective competition in the Portuguese market.

The merger is subject to clearance by the Portuguese Competition Authority, and may only be completed after such clearance is obtained following a non-opposition decision (express or tacit). Portugal Telecom submitted a formal filing to the Portuguese Competition Authority on January 23, 2014. The Portuguese Competition Authority may prohibit the merger if it determines that the merger is capable of significantly impeding effective competition in the Portuguese market.

In connection with the Portuguese antitrust review, the Portuguese Competition Authority may ask ANACOM to issue a non-binding opinion on the possible impact of the merger on the Portuguese electronic communications markets in which Portugal Telecom operates. In response to this request, ANACOM may suggest remedies to be adopted by the Portuguese Competition Authority to address effects that ANACOM considers may adversely affect consumers or competition in the Portuguese electronic communications markets.

Additionally, as Portugal Telecom is an active participant in the Portuguese television distribution market, the Portuguese Competition Authority may request an opinion from the Portuguese Media Regulation Authority (*Entidade Reguladora para a Comunicação Social*), or ERC, in connection with the Portuguese antitrust review.

We can offer no assurances that the Portuguese Competition Authority will not prohibit the merger or will not impose additional conditions to the approval of the merger.

In addition, under the PT subscription agreement, Portugal Telecom's obligation to contribute the shares of PT Portugal to our company is subject to the approval by the Portuguese Competition Authority of the merger. We can offer no assurances that the Portuguese Competition Authority will grant approval of the merger prior to the date specified in the condition to the PT subscription agreement, or at all. If the Portuguese Competition Authority does not grant approval of the merger on a timely basis, we can offer no assurances that Portugal Telecom will waive this condition to its obligation to contribute the shares of PT Portugal to our company.

Table of Contents

If Portugal Telecom fails to obtain all required consents, approvals and waivers, third parties may terminate or alter existing contracts.

Third parties hold pre-emption rights in certain licenses and assets of Portugal Telecom and such rights may be exercisable in connection with the business combination. Portugal Telecom is also a party to joint ventures, license agreements and other agreements and instruments, some of which contain change of control provisions that may be triggered by the business combination. In addition, other agreements of Portugal Telecom may require the payment of fees in connection with a change of control transaction. If Portugal Telecom is unable to obtain any necessary waiver or consent, the operation of change of control provisions or the exercise of pre-emption rights may cause the loss of significant contractual rights and benefits, the termination of joint venture agreements and licensing agreements or may require the renegotiation of financing agreements and/or the payment of significant fees. We cannot assure investors that we will be able to negotiate new agreements on terms as favorable to it as those that Portugal Telecom had, or at all.

Under the PT subscription agreement, Portugal Telecom's obligation to contribute the shares of PT Portugal to our company is subject to the approval of creditors of Portugal Telecom, where necessary to complete the business combination, including waivers of creditors of Portugal Telecom. We can offer no assurances that Portugal Telecom will be able to obtain these approvals or the terms under which Portugal Telecom will obtain these approvals. If Portugal Telecom is unable to obtain these approvals, our ability to complete the business combination will be substantially impaired. In addition, if Portugal Telecom enters into agreements to obtain these approvals that impose material obligations on our company following the contribution of the shares of PT Portugal to our company or the merger, such additional obligations could have a material adverse effect on our results of operations or financial position.

The implementation of the business combination may face significant challenges, and the ultimate advantages expected to be derived from this transaction will continue to be subject to a number of factors that are beyond our control.

The implementation of the business combination may present significant challenges, including unanticipated costs and delays, shareholder or creditor opposition, regulatory interference and excessive diversion of the attention of the management of our company, TmarPart and Portugal Telecom from the day-to-day management of our or their respective operating activities. If the senior management of our company, TmarPart and Portugal Telecom are unable to efficiently implement the business combination, the businesses of our company, TmarPart and Portugal Telecom could suffer. We cannot guarantee that the management of our company, TmarPart and Portugal Telecom will successfully or cost-effectively implement the business combination.

The business combination may not result in the benefits that we, TmarPart and Portugal Telecom seek to achieve.

The ultimate advantages that we expect to derive from the business combination, such as the achievement of economies of scale, the maximization of operational synergies, the reduction of operational risks, the optimization of efficient investments, the adoption of best operational practices, the increased liquidity for our shareholders and the shareholders of Portugal Telecom and the diversification of the shareholder bases of our company, TmarPart and Portugal Telecom, will depend upon, among other factors, the future performance of the combined company, market conditions, investor interest in the securities of the combined company, the retention of key employees, the successful integration of the companies, and general economic, political and business conditions in Brazil, Portugal and other countries in which we and Portugal Telecom operate. The integration of our company, TmarPart and Portugal Telecom will be a complex, costly and time-consuming process. We cannot guarantee that the benefits that we, TmarPart and Portugal Telecom seek to achieve through the business combination will be realized. Any failure to integrate the companies or achieve the synergies and other benefits of the business combination could cause significant operating inefficiencies and affect the profitability of TmarPart and the market value of TmarPart common shares and ADSs.

Following the completion of the Oi capital increase, we will be subject to the risks inherent in the operations of PT Portugal and we may not have identified all of these risks.

Table of Contents

Portugal Telecom is a reporting company under the Exchange Act and files periodic reports with the SEC. See Item 10. Additional Information Documents on Display for information on how to obtain reports filed with the SEC. We make no representations with respect to, or assume any responsibility for the accuracy or completeness of the information contained in Portugal Telecom's filings with the SEC. We have entered into the PT subscription agreement largely on the basis of publicly available information regarding Portugal Telecom and the valuation of the shares of PT Portugal prepared by Santander Brasil. We have had limited access to additional information regarding the assets and businesses that will be contributed to PT Portugal and, following our acquisition of PT Portugal may discover undisclosed liabilities or operational issues which could have a material adverse effect on our business, result of operations or financial condition.

Following the completion of the Oi capital increase, we will face risks relating to the operations that we acquire in Portugal, Africa and Asia, many of which are similar to the risks that we currently face in our Brazilian operations. However, as a result of the exposure of PT Portugal to the regulatory regimes of the countries in which it operates, the competitive dynamics in the markets in which it provides services and the agreements that it has entered into with respect to its joint ventures to serve some of these markets, we will face additional risks that are generally described in publicly available information regarding Portugal Telecom and its operations. We cannot assure you that all of the risks relating to these regulatory regimes, markets or joint ventures have been disclosed by Portugal Telecom, that our management of these risks will be successful, or that unanticipated events will not have a material adverse effect on our business, result of operations or financial condition.

We and Portugal Telecom will be subject to business uncertainties and contractual restrictions while the business combination is pending.

Uncertainty about the effect of the business combination on employees, suppliers, partners, regulators and customers may have an adverse effect on Oi, Portugal Telecom and TmarPart. These uncertainties could cause suppliers, customers, business partners and others that deal with Oi or Portugal Telecom to defer purchases, the consummation of other transactions or other decisions concerning their respective businesses, or to seek to change existing business relationships with them. In addition, employee retention may be particularly challenging until the business combination is consummated, as employees may experience uncertainty about their future roles in TmarPart and its consolidated subsidiaries. If key employees depart because of issues relating to the uncertainty and difficulty of integration, our business could be harmed. In addition, the merger plan restricts Oi and Portugal Telecom from undertaking major investments and taking other specified actions until the business combination occurs unless otherwise agreed. These restrictions may prevent Oi and Portugal Telecom from pursuing attractive business opportunities that may arise prior to the completion of the business combination.

The Memorandum of Understanding with respect to the business combination contains exclusivity provisions which prohibit us, Portugal Telecom and certain of our affiliates from soliciting or considering alternative proposals from any third party.

The Memorandum of Understanding with respect to the business combination contains exclusivity provisions which prohibit us, Portugal Telecom and certain of our affiliates from soliciting or considering alternative proposals from any third party. As a result, these provisions may prevent our company or Portugal Telecom from receiving or accepting an alternative proposal that could result in greater value to the shareholders of such entity.

Holders of Oi common shares, preferred shares and ADSs and Portugal Telecom ordinary shares and ADSs will be offered fixed numbers of TmarPart common shares and ADSs, which involves the risk of market fluctuations.

The parties to the merger have advised us that the exchange ratio in the merger will be determined in a manner such that the number of TmarPart common shares received by holders of Portugal Telecom ordinary share is equal to that holder's pro rata portion of the TmarPart shares owned by Portugal Telecom following the completion of the merger of shares. Because the number of TmarPart shares owned by Portugal Telecom following the completion of the merger of shares will depend on the number TmarPart shares acquired by Portugal Telecom in exchange for the shares of PT Portugal in the global offering, the exchange ratio for the merger will not be determinable until the global offering has closed.

Table of Contents

Holders of Oi common shares, preferred shares and ADSs, collectively referred to as Oi securities, will receive a fixed number of TmarPart common shares and ADSs, collectively referred to as TmarPart securities, in the merger of shares, rather than a number of TmarPart securities with a fixed market value. Holders of Portugal Telecom ordinary shares and ADSs, collectively referred to as Portugal Telecom securities, will also receive a fixed number of TmarPart common shares and ADSs, collectively referred to as TmarPart securities, in the merger rather than a number of TmarPart securities with a fixed market value.

There is no mechanism to adjust the exchange ratios for the merger of shares or the merger in the event that the market price of either the Portugal Telecom securities or the Oi securities increase or decrease significantly relative to the other. Consequently, (1) the market value of the TmarPart securities implied by the market values of the Oi securities and the exchange ratios in the merger of shares, and (2) the market value of the TmarPart securities implied by the market values of the Portugal Telecom securities and the exchange ratio in the merger, may fluctuate significantly from the date of this prospectus supplement, and the exchange ratios for the merger of shares and the merger might not be reflective of market price ratios of Oi securities relative to Portugal Telecom securities at the time of the completion of the merger of shares and the merger.

The market price of our securities may be adversely affected by arbitrage activities occurring prior to the completion of the merger of shares and the merger.

The market price of our securities may be adversely affected by arbitrage activities occurring prior to the completion of the merger of shares and the merger. These sales, or the prospects of such sales in the future, could adversely affect the market price for, and the ability to sell in the market, our securities before the merger of shares and the merger are completed and TmarPart securities after the merger of shares and the merger are completed.

TmarPart may have actual or potential conflicts of interest relating to the merger of shares, and TmarPart's significant shareholders who negotiated the terms of the business combination may have different interests from your interests as a holder of securities of Oi.

TmarPart may have actual or potential conflicts of interest with our shareholders because Portugal Telecom, AGSA and Jereissati Telecom, the controlling shareholders of TmarPart and thus of Oi, exercise voting control over the boards of directors of TmarPart and Oi. While the exchange ratios for the merger of shares were determined in accordance with all applicable laws and regulations in Brazil and the exchange ratio for the merger will be determined in accordance with all applicable laws and regulations in Brazil and Portugal, these ratios may be higher or lower than, from the perspective of value to unaffiliated shareholders, those that could be achieved through negotiations between parties without cross-shareholding relationships. Other terms and conditions of the business combination may also differ from those that could have been achieved through negotiations between parties without cross-shareholder relationships, and our shareholders might have preferred such other terms, including any terms that might have enhanced the financial condition, liquidity or results of operations of Oi or PT Portugal.

In addition, the terms of the business combination include the use of funds of Portugal Telecom to subscribe for convertible debentures, the proceeds of which will ultimately be used to repay substantially all of the indebtedness of AG Telecom, LF Tel and TmarPart. This use of funds to subscribe for convertible debentures and to repay substantially all of the indebtedness of these shareholders of Oi might be different than the terms of a transaction that could have been achieved in negotiations between parties without cross-shareholding relationships. As a holder of our securities, you might have preferred different terms or a different use for Portugal Telecom's funds.

Brazilian law does not (1) establish any specific, minimum or maximum exchange ratio, (2) require that the board of directors of TmarPart or Oi formally determine that the terms of the merger of shares or the merger as a whole are fair, either procedurally or financially, to its non-controlling shareholders, (3) establish any special committee or otherwise alter its corporate governance rules in connection with the merger of shares or the merger, or (4) impose any prohibition or limitation on the voting rights of the controlling shareholder.

Under the Brazilian Corporation Law, because the merger of shares involves a controlling and controlled company, we and TmarPart are required to disclose the ratio of the value of Oi shares and TmarPart shares calculated based on the net worth calculated at market prices (as if the assets of TmarPart and Oi had been sold), based on valuation reports prepared by an independent financial advisor. This exchange ratio is required to be

Table of Contents

disclosed in order to provide the non-controlling shareholders with a parameter against which to evaluate the proposed merger of shares. The applicable exchange ratio calculated based on the criteria of net worth calculated at market prices will be determined following the completion of the global offering. Although this ratio is required under Brazilian law to be determined with respect to both the common and Oi preferred shares, holders of Oi preferred shares are not entitled to vote with respect to the merger of shares and will not have withdrawal rights if the merger of shares is approved. Although holders of Oi common shares are entitled to vote with respect to the merger of shares, the holders of these shares will not have withdrawal rights if the merger of shares is approved.

If the merger of shares is approved, holders of our preferred shares (including in the form of ADSs) will have to give up these securities, which provide certain rights that are not conferred by the TmarPart common shares that they will receive in return.

To compensate for not providing certain rights inherent to common shares, such as full voting rights, our preferred shares provide their holders with certain other rights mandated by the Brazilian Corporation Law for this share class that are not conferred by common shares. In the case of our preferred shares, these special preferred shareholder rights include a priority in the payment of a minimum non-cumulative dividend before dividends may be paid on our common shares, equal to the greater of 6.0% per year of their *pro rata* share of our capital or 3.0% per year of their *pro rata* share of the book value of our shareholders' equity. Although the merger of shares, if approved, will allow our preferred shareholders to acquire rights under the Brazilian Corporation Law inherent to common shares as a result of their receipt of TmarPart common shares bearing those rights, they will lose the special rights conferred to them by our preferred shares as a result of their surrender of those shares pursuant to the terms of the transaction.

Upon the completion of the merger of shares and the merger, TmarPart will have a substantial amount of existing debt, which could restrict its financing and operating flexibility and have other adverse consequences.

As of December 31, 2013, (1) we had R\$35,854 million aggregate principal of outstanding debt, (2) Portugal Telecom had 7,371.1 million (R\$24,012.2 million) aggregate principal of outstanding debt, and (3) TmarPart had R\$3,259.1 million aggregate principal of outstanding debt, excluding the consolidated indebtedness of our company. Although we expect that all of TmarPart's outstanding debt (other than the consolidated indebtedness of our company) will be repaid prior to the completion of the merger of shares and the merger, we and Portugal Telecom will remain subject to certain financial covenants that will limit our ability to incur additional debt. The level of TmarPart's consolidated indebtedness after the completion of the merger of shares and the merger and the requirements and limitations imposed by these debt instruments could adversely affect TmarPart's financial condition or results of operations. In particular, the terms of some of these debt instruments will restrict the ability of TmarPart's subsidiaries to:

incur additional debt;

grant liens;

pledge assets;

sell or dispose of assets; and

make certain acquisitions, mergers and consolidations.

Furthermore, some of these debt instruments include financial covenants that will require Oi to maintain certain specified financial ratios. Additionally, the instruments governing a substantial portion of these debt instruments contain cross-default or cross-acceleration clauses and the occurrence of an event of default under one of these instruments could trigger an event of default under other indebtedness or enable the creditors under other indebtedness to accelerate that indebtedness.

If TmarPart or its subsidiaries are unable to incur additional debt after the completion of the merger of shares and the merger, TmarPart may be unable to invest in its businesses and make necessary or advisable capital

Table of Contents

expenditures, which could reduce future net operating revenue and adversely affect its profitability. In addition, the use of cash to service the indebtedness of TmarPart after the completion of the merger of shares and the merger will reduce the amount available to it to make capital expenditures.

If the growth in net operating revenue of the constituent companies in the merger of shares and the merger slows or declines in a significant manner, for any reason, TmarPart may not be able to continue servicing its debt. If TmarPart is unable to meet these debt service obligations or comply with these debt covenants, TmarPart could be forced to renegotiate or refinance this indebtedness, seek additional equity capital or sell assets. In this circumstance, TmarPart may be unable to obtain financing or sell assets on satisfactory terms, or at all. For more information regarding the debt instruments of our company and our subsidiaries, and our indebtedness as of December 31, 2013, see Item 5. Operating and Financial Review and Prospects Indebtedness.

The recapitalization of TmarPart will increase its net indebtedness after the completion of the merger of shares and the merger as compared to the sum of the net indebtedness of our company and Portugal Telecom.

As part of the business combination, Portugal Telecom will purchase convertible debentures of (1) PASA and Venus RJ Participações S.A., or Venus, both subsidiaries of Andrade Gutierrez S.A., or AGSA, or the AGSA Holding Companies, and (2) EDSP and Sayed RJ Participações S.A., or Sayed, both subsidiaries of Jereissati Telecom S.A., or Jereissati Telecom, or the Jereissati Telecom Holding Companies, for R\$4,788 million, the proceeds of which will ultimately be used to repay substantially all of the indebtedness of AG Telecom, LF Tel and TmarPart (excluding the consolidated indebtedness of our company). As of December 31, 2013, AG Telecom had R\$650 million aggregate principal of outstanding debt, LF Tel had R\$662 million aggregate principal of outstanding debt, and TmarPart had R\$3,259 million aggregate principal of outstanding debt (excluding the consolidated indebtedness of our company).

As of December 31, 2013, Oi had R\$35,854 million aggregate principal of outstanding debt and R\$3,016 million of cash and cash equivalents, and Portugal Telecom had 7,371.1 million (R\$24,012.2 million) aggregate principal of outstanding debt and 2,573.1 million (R\$8,388.3 million) of cash and cash equivalents. As of December 31, 2013, Oi's net debt (which we define as total indebtedness less cash and cash equivalents) was R\$32,838 million and Portugal Telecom's net debt was R\$15,642 million. The use of the proceeds of the Venus and Sayed debentures to repay the indebtedness of AG Telecom, LF Tel and TmarPart will increase TmarPart's net debt following the completion of the merger of shares and the merger as compared to the sum of the net debt of Portugal Telecom and Oi if Portugal Telecom were not to invest in the Venus and Sayed debentures.

As a result of these factors, the risks normally associated with significant amounts of debt, which could have important consequences to you, will be increased. TmarPart's indebtedness could, among other things:

require TmarPart to use a substantial portion of its cash flow from operations to pay its obligations, thereby reducing the availability of its cash flow to fund working capital, operations, capital expenditures, dividend payments, strategic acquisitions, expansion of its operations and other business activities;

increase TmarPart's vulnerability to general adverse economic and industry conditions;

limit, along with financial and other restrictive covenants in TmarPart's debt instruments, its ability to borrow additional funds or dispose of assets; and

place TmarPart at a competitive disadvantage compared to its competitors that have less debt.

TmarPart may also need to refinance all or a portion of this debt on or before maturity, and it may not be able to do this on commercially reasonable terms or at all.

Oi's ordinary shareholders may have withdrawal rights in connection with the business combination.

Brazilian legislation grants the right to withdraw from a company (against reimbursement of shares held) to dissenting shareholders, i.e., shareholders who do not agree with a general shareholders' meeting resolution that

Table of Contents

approves the merger of a company's shares into another company. For this purpose, dissenting shareholders include those that have voted against the resolution, shareholders that did not vote and those who were not present at the relevant meeting. In the case of our shares, whenever withdrawal rights are granted, the reimbursement price is based on our net asset value per share.

The Brazilian legislation also sets forth that the right to withdraw does not apply to holder of a class or type of shares that has market liquidity and dispersion. Liquidity is evidenced when the type or class of share, or the certificate that represents it, is part of a general index representing a portfolio of securities in Brazil or abroad, as defined by the CVM. Dispersion is evidenced when the majority shareholder, the controlling corporation or other corporations under their control hold less than half of the issued shares of the applicable type or class.

We understand that holders of our common shares do not have withdrawal rights in case of approval of the merger of shares. However, the technical body of the CVM issued an official opinion on the matter stating that it understands that our common shares do have withdrawal rights in this case. We have filed a challenge to this opinion with the CVM, but no final decision has been rendered by the CVM. In addition, any decision by the CVM may be challenged by our company or our minority shareholders in Brazilian courts.

In the event we ultimately grant withdrawal rights to holders of our common shares, we may be required to make large cash payments in connection with the merger of shares, and such payments could decrease the cash balances available to TmarPart after the merger of shares and limit its ability to borrow funds or fund capital expenditures, which may adversely affect TmarPart and our shareholders following the merger of shares.

Risks Relating to Brazil

The Brazilian government has exercised, and continues to exercise, significant influence over the Brazilian economy. This involvement, as well as Brazilian political and economic conditions, could adversely impact our business, results of operations and financial condition.

All of our operations and customers are located in Brazil, except for minor operations and the customers of these operations outside of Brazil. Accordingly, our financial condition and results of operations are substantially dependent on Brazil's economy. The Brazilian government frequently intervenes in the Brazilian economy and occasionally makes significant changes in policy and regulations. The Brazilian government's actions to control inflation and implement macroeconomic policies have often involved increases in interest rates, wage and price controls, currency devaluations, blocking access to bank accounts, imposing capital controls and limits on imports, among other things. We do not have any control over, and are unable to predict, which measures or policies the Brazilian government may adopt in the future. Our business, results of operations and financial condition may be adversely affected by changes in policies or regulations, or by other factors such as:

political instability;

devaluations and other currency fluctuations;

inflation;

price instability;

interest rates;

liquidity of domestic capital and lending markets;

energy shortages;

exchange controls;

changes to the regulatory framework governing our industry;

Table of Contents

monetary policy;

tax policy; and

other political, diplomatic, social and economic developments in or affecting Brazil.

Uncertainty over whether possible changes in policies or rules affecting these or other factors may contribute to economic uncertainties in Brazil and to heightened volatility in the Brazilian securities markets and securities issued abroad by Brazilian issuers. The President of Brazil has considerable power to determine governmental policies and actions that relate to the Brazilian economy and, consequently, affect the operations and financial performance of businesses such as our company. Although we do not believe that Ms. Rousseff will significantly alter current governmental policies, we can offer no assurances that the policies that may be implemented by the Brazilian federal or state governments will not adversely affect our business, results of operations and financial condition.

Instability in the international financial system may adversely affect economic growth in Brazil or limit our access to the financial markets and, therefore, negatively impact our business and financial condition.

Global economic instability and related instability in the international financial system have had, and may continue to have, a negative effect on economic growth in Brazil. Although the United States, Europe and China have shown recent signs of recovery, the recovery of the global economy, which depends on a number of factors, including a return of job growth and investments in the private sector as well as the timing of the exit from government credit easing policies by central banks globally, is not certain. Continued or worsening volatility in the global financial markets could reduce the availability of liquidity and credit to fund the continuation and expansion of industrial business operations worldwide. A prolonged slowdown in economic activity in Brazil could reduce demand for some of our services, which would adversely affect our results of operations.

As a result of instability in the international financial system, our ability to access the capital markets or the commercial bank lending markets may be severely restricted at a time when we would like, or need, to access such markets, which could have an impact on our flexibility to react to changing economic and business conditions. The instability in the international financial system or a prolonged slowdown in economic activity in Brazil could have an impact on the lenders under our existing credit facilities, on our customers or on the ability of our suppliers to meet scheduled deliveries, causing them to fail to meet their obligations to us. If the instability in the international financial system continues, it could have an adverse effect on the demand for our services and our ability to fund our planned growth.

Depreciation of the real may lead to substantial losses on our liabilities denominated in or indexed to foreign currencies.

During the four decades prior to 1999, the Brazilian Central Bank periodically devalued the Brazilian currency. Throughout this period, the Brazilian government implemented various economic plans and used various exchange rate policies, including sudden devaluations (such as daily and monthly adjustments), exchange controls, dual exchange rate markets and a floating exchange rate system. Since 1999, exchange rates have been set by the market. The exchange rate between the *real* and the U.S. dollar has varied significantly in recent years. For example, the *real*/U.S. dollar exchange rate increased from R\$1.9554 per U.S. dollar on December 31, 2000 to R\$3.5333 on December 31, 2002. In 2008, primarily as a result of the international financial crisis, the *real* depreciated by 31.9% against the U.S. dollar and prompted foreign investors to remove billions of *reais* from the Brazilian Securities, Commodities and Futures Exchange (*BM&FBOVESPA S.A. - Bolsa de Valores Mercadorias e Futuros*), which we refer to as the *BM&FBOVESPA*. The *real* appreciated against the U.S. dollar by 25.5% during 2009 and by 4.3% during 2010. Since that period, the *real* has depreciated by 12.6% against the U.S. dollar during 2011, by 8.9% during 2012 and by 14.6% during 2013.

A significant amount of our financial liabilities are denominated in or indexed to foreign currencies, primarily U.S. dollars and Euros. As of December 31, 2013, R\$14,948 million of our financial indebtedness was denominated in a foreign currency. When the *real* depreciates against foreign currencies, we incur losses on our liabilities denominated in or indexed to foreign currencies, such as our U.S. dollar-denominated long-term debt and foreign

Table of Contents

currency loans, and we incur gains on our monetary assets denominated in or indexed to foreign currencies, as the liabilities and assets are translated into *reais*. If significant depreciation of the *real* were to occur when the value of such liabilities significantly exceeds the value of such assets, including any financial instruments entered into for hedging purposes, we could incur significant losses, even if the value of those assets and liabilities has not changed in their original currency. In addition, a significant depreciation in the *real* could adversely affect our ability to meet certain of our payment obligations. A failure to meet certain of our payment obligations could trigger a default under certain financial covenants in our debt instruments, which could have a material adverse effect on our business and results of operations. Additionally, we currently have currency swaps and non-deliverable forwards in place for most of our foreign currency debt. If the cost of currency swap instruments increases substantially, we may be unable to maintain our hedge positions, resulting in an increased foreign currency exposure that could in turn lead to substantial foreign exchange losses.

A portion of our capital expenditures require us to acquire assets at prices denominated in or linked to foreign currencies, some of which are financed by liabilities denominated in foreign currencies, principally the U.S. dollar. We generally do not hedge against risks related to movements of the *real* against foreign currencies. To the extent that the value of the *real* decreases relative to the U.S. dollar, it becomes more costly for us to purchase these assets, which could adversely affect our business and financial performance.

Depreciation of the *real* relative to the U.S. dollar could create additional inflationary pressures in Brazil by increasing the price of imported products and requiring recessionary government policies, including tighter monetary policy. On the other hand, appreciation of the *real* against the U.S. dollar may lead to a deterioration of the country's current account and balance of payments, as well as to a dampening of export-driven growth.

If Brazil experiences substantial inflation in the future, our margins and our ability to access foreign financial markets may be reduced. Government measures to curb inflation may have adverse effects on the Brazilian economy, the Brazilian securities market and our business and results of operations.

Brazil has, in the past, experienced extremely high rates of inflation, with annual rates of inflation reaching as high as 2,708% in 1993 and 1,093% in 1994. Inflation and some of the Brazilian government's measures taken in an attempt to curb inflation have had significant negative effects on the Brazilian economy.

Since the introduction of the *real* in 1994, Brazil's inflation rate has been substantially lower than in previous periods. However, actions taken in an effort to control inflation, coupled with speculation about possible future governmental actions, have contributed to economic uncertainty in Brazil and heightened volatility in the Brazilian securities market. More recently, Brazil's rates of inflation, as measured by the General Market Price Index – Internal Availability (*Índice Geral de Preços – Disponibilidade Interna*), or IGP-DI, published by Fundação Getúlio Vargas, or FGV, were 9.1% in 2008, (1.4)% in 2009, 11.3% in 2010, 5.0% in 2011, 8.1% in 2012 and 4.8% in 2013. According to the Broad Consumer Price Index (*Índice Nacional de Preços ao Consumidor Ampliado*), or IPCA, published by the Brazilian Institute for Geography and Statistics (*Instituto Brasileiro de Geografia e Estatística*), or IBGE, the Brazilian consumer price inflation rates were 4.3% in 2009, 5.9% in 2010, 6.5% in 2011, 5.8% in 2012 and 5.9% in 2013.

If Brazil experiences substantial inflation in the future, our costs may increase and our operating and net margins may decrease. Although ANATEL regulations provide for annual price increases for most of our services, such increases are linked to inflation indices, discounted by increases in our productivity. During periods of rapid increases in inflation, the price increases for our services may not be sufficient to cover our additional costs and we may be adversely affected by the lag in time between the incurrence of increased costs and the receipt of revenues resulting from the annual price increases. Inflationary pressures may also curtail our ability to access foreign financial markets and may lead to further government intervention in the economy, including the introduction of government policies that may adversely affect the overall performance of the Brazilian economy.

Fluctuations in interest rates could increase the cost of servicing our debt and negatively affect our overall financial performance.

Our financial expenses are affected by changes in the interest rates that apply to our floating rate debt. As of December 31, 2013, we had, among other debt obligations, R\$10,295 million of loans and financings and debentures

Table of Contents

that were subject to the Interbank Certificate of Deposit (*Certificado de Depósito Interbancário*), or CDI, rate, an interbank rate, R\$5,144 million of loans and financings and debentures that were subject to the Long-Term Interest Rate (*Taxa de Juros de Longo Prazo*), or TJLP, a long-term interest rate, R\$3,843 million of loans and financings that were subject to the London Interbank Offered Rate, or LIBOR, and R\$3,728 million of loans and financings that were subject to the IPCA.

The TJLP includes an inflation factor and is determined quarterly by the National Monetary Council (*Conselho Monetário Nacional*). In particular, the TJLP and the CDI rate have fluctuated significantly in the past in response to the expansion or contraction of the Brazilian economy, inflation, Brazilian government policies and other factors. For example, the CDI increased from 10.64% per annum as of December 31, 2010 to 10.87% per annum as of December 31, 2011, decreased to 6.90% per annum as of December 31, 2012 and increased to 9.77% per annum as of December 31, 2013. A significant increase in any of these interest rates, particularly the CDI rate, could adversely affect our financial expenses and negatively affect our overall financial performance.

The market value of securities issued by Brazilian companies is influenced by the perception of risk in Brazil and other countries, which may have a negative effect on the trading price of our common shares, preferred shares and ADSs and may restrict our access to international capital markets.

Economic and market conditions in other countries, including the United States, the European Union and emerging market countries, may affect to varying degrees the market value of securities of Brazilian issuers. Although economic conditions in these countries may differ significantly from economic conditions in Brazil, investors' reactions to developments in these other countries may have an adverse effect on the market value of securities of Brazilian issuers, the availability of credit in Brazil and the amount of foreign investment in Brazil. Crises in the European Union, the United States and emerging market countries may diminish investor interest in securities of Brazilian issuers, including our company. This could materially and adversely affect the market price of our securities, and could also make it more difficult for us to access the capital markets and finance our operations in the future on acceptable terms or at all.

Restrictions on the movement of capital out of Brazil may impair our ability to service certain debt obligations.

Brazilian law provides that whenever there exists, or there is a serious risk of, a material imbalance in Brazil's balance of payments, the Brazilian government may impose restrictions for a limited period of time on the remittance to foreign investors of the proceeds of their investments in Brazil as well as on the conversion of the *real* into foreign currencies. The Brazilian government imposed such a restriction on remittances for approximately six months in 1989 and early 1990. The Brazilian government may in the future restrict companies from paying amounts denominated in foreign currency or require that any such payment be made in *reais*. Many factors could affect the likelihood of the Brazilian government imposing such exchange control restrictions, including the extent of Brazil's foreign currency reserves, the availability of sufficient foreign exchange on the date a payment is due, the size of Brazil's debt service burden relative to the economy as a whole, and political constraints to which Brazil may be subject. There can be no certainty that the Brazilian government will not take such measures in the future.

A more restrictive policy could increase the cost of servicing, and thereby reduce our ability to pay, our foreign currency-denominated debt obligations and other liabilities. As of December 31, 2013, our foreign-currency denominated debt was R\$14,948 million and represented 41.1% of our indebtedness. If we fail to make payments under any of these obligations, we will be in default under those obligations, which could reduce our liquidity as well as the market price of our common shares, preferred shares and ADSs.

In addition, a more restrictive policy could hinder or prevent the Brazilian custodian of the common shares and preferred shares underlying our ADSs or holders who have exchanged our ADSs for the underlying common shares or preferred shares from converting dividends, distributions or the proceeds from any sale of such shares into U.S. dollars and remitting such U.S. dollars abroad. In such an event, the Brazilian custodian for our common shares and preferred shares will hold the *reais* that it cannot convert for the account of holders of our ADSs who have not been paid. Neither the custodian nor The Bank of New York Mellon, as depository of our ADS programs, or the depository, will be required to invest the *reais* or be liable for any interest.

Table of Contents

Risks Relating to Our Common Shares, Preferred Shares and ADSs

Holders of our common shares, preferred shares or ADSs may not receive any dividends or interest on shareholders' equity.

According to our by-laws and the Brazilian Corporation Law, we must generally pay our shareholders at least 25% of our annual net income as dividends or interest on shareholders' equity, as calculated and adjusted under Brazilian GAAP. This adjusted net income may be capitalized, used to absorb losses or otherwise retained as allowed under Brazilian GAAP and may not be available to be paid as dividends or interest on shareholders' equity. Holders of our common shares or Common ADSs, may not receive any dividends or interest on shareholders' equity in any given year due to the dividend preference of our preferred shares. Additionally, the Brazilian Corporation Law allows a publicly traded company like ours to suspend the mandatory distribution of dividends in any particular year if our board of directors informs our shareholders that such distributions would be inadvisable in view of our financial condition or cash availability. Holders of our preferred shares or Preferred ADSs may not receive any dividends or interest on shareholders' equity in any given year if our board of directors makes such a determination or if our operations fail to generate net income.

Our preferred shares and Preferred ADSs have limited voting rights and are not entitled to vote to approve corporate transactions, including mergers or consolidations of our company with other companies, or the declaration of dividends.

Under the Brazilian Corporation Law and our by-laws, holders of our preferred shares and, consequently, our Preferred ADSs, are not entitled to vote at meetings of our shareholders, except in very limited circumstances. These limited circumstances directly relate to key rights of the holders of preferred shares, such as modifying basic terms of our preferred shares or creating a new class of preferred shares with superior rights. Holders of preferred shares without voting rights are entitled to elect one member and his or her respective alternate to our board of directors and our fiscal council. Holders of our preferred shares and Preferred ADSs are not entitled to vote to approve corporate transactions, including mergers or consolidations of our company with other companies, or the declaration of dividends. See Item 10. Additional Information Description of Our Company's By-laws Voting Rights.

Holders of our ADSs may find it difficult to exercise their voting rights at our shareholders' meetings.

Under Brazilian law, only shareholders registered as such in our corporate books may attend our shareholders' meetings. All common shares and preferred shares underlying our ADSs are registered in the name of the depositary. ADS holders may exercise the voting rights with respect to our common shares and the limited voting rights with respect to our preferred shares represented by our ADSs only in accordance with the deposit agreements relating to our ADSs. There are practical limitations upon the ability of the ADS holders to exercise their voting rights due to the additional steps involved in communicating with ADS holders. For example, we are required to publish a notice of our shareholders' meetings in certain newspapers in Brazil. To the extent that holders of our common shares or preferred shares are entitled to vote at a shareholders' meeting, they will be able to exercise their voting rights by attending the meeting in person or voting by proxy. By contrast, holders of the ADSs may receive notice of a shareholders' meeting by mail from the depositary if notify the depositary of the shareholders' meeting and request the depositary to inform ADS holders of the shareholders' meeting. To exercise their voting rights, ADS holders must instruct the depositary on a timely basis. This noticed voting process will take longer for ADS holders than for holders of our common shares or preferred shares. If the depositary fails to receive timely voting instructions for all or part of our ADSs, the depositary will assume that the holders of those ADSs are instructing it to give a discretionary proxy to a person designated by us to vote their ADSs, except in limited circumstances.

In the circumstances in which holders of our ADSs have voting rights, they may not receive the voting materials in time to instruct the depositary to vote our common shares or preferred shares underlying their ADSs. In addition, the depositary and its agents are not responsible for failing to carry out voting instructions of the holders of our ADSs or for the manner of carrying out those voting instructions. Accordingly, holders of our ADSs may not be able to exercise voting rights, and they will have no recourse if the common shares or preferred shares underlying their ADSs are not voted as requested.

Table of Contents

Holders of our common shares, preferred shares or ADSs in the United States may not be entitled to the same preemptive rights as Brazilian shareholders have, pursuant to Brazilian legislation, in the subscription of shares resulting from capital increases made by us.

Under Brazilian law, if we issue new shares in exchange for cash or assets as part of a capital increase, subject to certain exceptions, we must grant our shareholders preemptive rights at the time of the subscription of shares, corresponding to their respective interest in our share capital, allowing them to maintain their existing shareholding percentage. We may not legally be permitted to allow holders of our common shares, preferred shares or ADSs in the United States to exercise any preemptive rights in any future capital increase unless (1) we file a registration statement for an offering of shares resulting from the capital increase with the U.S. Securities and Exchange Commission, or SEC, or (2) the offering of shares resulting from the capital increase qualifies for an exemption from the registration requirements of the Securities Act. At the time of any future capital increase, we will evaluate the costs and potential liabilities associated with filing a registration statement for an offering of shares with the SEC and any other factors that we consider important in determining whether to file such a registration statement. We cannot assure the holders of our common shares, preferred shares or ADSs in the United States that we will file a registration statement with the SEC to allow them to participate in any of our capital increases. As a result, the equity interest of such holders in our company may be diluted.

If holders of our ADSs exchange them for common shares or preferred shares, they may risk temporarily losing, or being limited in, the ability to remit foreign currency abroad and certain Brazilian tax advantages.

The Brazilian custodian for the common shares and preferred shares underlying our ADSs must obtain an electronic registration number with the Brazilian Central Bank to allow the depository to remit U.S. dollars abroad. ADS holders benefit from the electronic certificate of foreign capital registration from the Brazilian Central Bank obtained by the custodian for the depository, which permits it to convert dividends and other distributions with respect to the common shares or preferred shares into U.S. dollars and remit the proceeds of such conversion abroad. If holders of our ADSs decide to exchange them for the underlying common shares or preferred shares, they will only be entitled to rely on the custodian's certificate of registration with the Brazilian Central Bank for five business days after the date of the exchange. Thereafter, they will be unable to remit U.S. dollars abroad unless they obtain a new electronic certificate of foreign capital registration in connection with the common shares or preferred shares, which may result in expenses and may cause delays in receiving distributions. See Item 10. Additional Information Exchange Controls.

Also, if holders of our ADSs that exchange our ADSs for our common shares or preferred shares do not qualify under the foreign investment regulations, they will generally be subject to less favorable tax treatment of dividends and distribution on, and the proceeds from any sale of, our common shares or preferred shares. See Item 10. Additional information Exchange Controls and Item 10. Additional Information Taxation Brazilian Tax Considerations.

Holders of our ADSs may face difficulties in protecting their interests because, as a Brazilian company, we are subject to different corporate rules and regulations and our shareholders may have fewer and less well-defined rights.

Holders of our ADSs are not direct shareholders of our company and are unable to enforce the rights of shareholders under our by-laws and the Brazilian Corporation Law.

Our corporate affairs are governed by our by-laws and the Brazilian Corporation Law, which differ from the legal principles that would apply if we were incorporated in a jurisdiction in the United States, such as the State of Delaware or New York, or elsewhere outside Brazil. Even if a holder of our ADSs surrenders its ADSs and becomes a direct shareholder, its rights as a holder of our common shares or preferred shares under the Brazilian Corporation Law to protect its interests relative to actions by our board of directors may be fewer and less well-defined than under the laws of those other jurisdictions.

Although insider trading and price manipulation are crimes under Brazilian law, the Brazilian securities markets are not as highly regulated and supervised as the U.S. securities markets or the markets in some other jurisdictions. In addition, rules and policies against self-dealing or for preserving shareholder interests may be less well-defined

Table of Contents

and enforced in Brazil than in the United States and certain other countries, which may put holders of our common shares, preferred shares and ADSs at a potential disadvantage. Corporate disclosures also may be less complete or informative than those of a public company in the United States or in certain other countries.

We are exempt from some of the corporate governance requirements of the New York Stock Exchange.

We are a foreign private issuer, as defined by the SEC for purposes of the Exchange Act. As a result, for so long as we remain a foreign private issuer, we will be exempt from, and you will not be provided with the benefits of, some of the corporate governance requirements of The New York Stock Exchange, or the NYSE. We are permitted to follow practice in Brazil in lieu of the provisions of the NYSE's corporate governance rules, except that:

we are required to have an audit committee that satisfies the requirements of Rule 10A-3 under the Exchange Act;

we are required to disclose any significant ways in which our corporate governance practices differ from those followed by domestic companies under NYSE listing standards;

our chief executive officer is obligated to promptly notify the NYSE in writing after any of our executive officers becomes aware of any non-compliance with any applicable provisions of the NYSE corporate governance rules; and

we must submit an executed written affirmation annually to the NYSE. In addition, we must submit an interim written affirmation as and when required by the interim written affirmation form specified by the NYSE.

The standards applicable to us are considerably different than the standards applied to U.S. domestic issuers. Although Rule 10A-3 under the Exchange Act generally requires that a listed company have an audit committee of its board of directors composed solely of independent directors, as a foreign private issuer, we are relying on a general exemption from this requirement that is available to us as a result of the features of Brazilian law applicable to our fiscal council. In addition, we are not required to, among other things:

have a majority of independent members of our board of directors;

have a compensation committee or a nominating or corporate governance committee of our board of directors;

have regularly scheduled executive sessions with only non-management directors; or

have at least one executive session of solely independent directors each year.

We intend to rely on some or all of these exemptions. As a result, you will not be provided with the benefits of certain corporate governance requirements of the NYSE.

Holders of our ADSs may face difficulties in serving process on or enforcing judgments against us and other persons.

We are organized under the laws of Brazil, and all of the members of our board of directors, our executive officers and our independent registered public accountants reside or are based in Brazil. The vast majority of our assets and those of these other persons are located in Brazil. As a result, it may not be possible for holders of our ADSs to effect service of process upon us or these other persons within the United States or other jurisdictions outside Brazil or to enforce against us or these other persons judgments obtained in the United States or other jurisdictions outside Brazil. In addition, because substantially all of our assets and all of our directors and officers reside outside the United States, any judgment obtained in the United States against us or any of our directors or officers may not be collectible within the United States. Because

judgments of U.S. courts for civil liabilities based upon the U.S. federal securities laws may only be enforced in Brazil if certain conditions are met, holders may face

Table of Contents

greater difficulties in protecting their interests in the case of actions by us or our board of directors or executive officers than would shareholders of a U.S. corporation.

Brazilian tax laws may have an adverse impact on the taxes applicable to the disposition of our common shares, preferred shares and ADSs.

According to Law No. 10,833, enacted on December 29, 2003, if a nonresident of Brazil disposes of assets located in Brazil, the transaction will be subject to taxation in Brazil, even if such disposition occurs outside Brazil or if such disposition is made to another nonresident. A disposition of our ADSs between nonresidents, however, involves the disposal of a non-Brazilian asset and in principle is currently not subject to taxation in Brazil. Nevertheless, in the event that the concept of disposition of assets is interpreted to include the disposition between nonresidents of assets located outside Brazil, this tax law could result in the imposition of withholding taxes in the event of a disposition of our ADSs made between nonresidents of Brazil. Due to the fact that as of the date of this annual report Law No. 10,833/2003 has no judicial guidance as to its application, we are unable to predict whether an interpretation applying such tax laws to dispositions of our ADSs between nonresidents could ultimately prevail in Brazilian courts. See Item 10. Additional Information Taxation Brazilian Tax Considerations.

The relative volatility and illiquidity of the Brazilian securities markets may adversely affect holders of our common shares, preferred shares and ADSs.

The Brazilian securities markets are substantially smaller, less liquid and more volatile than major securities markets in the United States. The BM&FBOVESPA, which is the principal Brazilian stock exchange, had a market capitalization of R\$2,414 billion (US\$1,031 billion) as of December 31, 2013 and an average daily trading volume of R\$7.4 billion (US\$3.5 billion) for 2013. In comparison, aggregate market capitalization of the companies (including U.S. and non-U.S. companies) listed on the NYSE was US\$20.0 trillion as of December 31, 2013 and the NYSE recorded an average daily trading volume of US\$54.7 billion for 2013. There is also significantly greater concentration in the Brazilian securities markets. The ten largest companies in terms of market capitalization represented approximately 51% of the aggregate market capitalization of the BM&FBOVESPA as of December 31, 2013. The ten most widely traded stocks in terms of trading volume accounted for approximately 41% of all shares traded on the BM&FBOVESPA in 2013. These market characteristics may substantially limit the ability of holders of our ADSs to sell the preferred shares underlying our ADSs at a price and at a time when they wish to do so and, as a result, could negatively impact the market price of our ADSs themselves.

The imposition of IOF taxes may indirectly influence the price and volatility of our common shares, preferred shares and ADSs.

Brazilian law imposes the Tax on Foreign Exchange Transactions, or the IOF/Exchange Tax, on the conversion of *reais* into foreign currency and on the conversion of foreign currency into *reais*. Brazilian law also imposes the Tax on Transactions Involving Bonds and Securities, or the IOF/Securities Tax, due on transactions involving bonds and securities, including those carried out on a Brazilian stock exchange.

In October 2009, the Brazilian government imposed the IOF/Exchange Tax at a rate of 2.0% in connection with inflows of funds related to investments carried out by non-Brazilian investors in the Brazilian financial and capital markets with the objective of slowing the pace of speculative inflows of foreign capital into the Brazilian market and the appreciation of the *real* against the U.S. dollar. The rate of the IOF/Exchange Tax generally applicable to foreign investments in the Brazilian financial and capital markets was later increased to 6.0%. In December 2011, the rate of the IOF/Exchange Tax applicable to several types of investments was reduced back to zero percent. As of the date of this prospectus, all investments in the Brazilian financial and capital markets are subject to the IOF/Exchange Tax at zero percent.

In November 2009, the Brazilian government also established that the rate of the IOF/Securities Tax would apply to the transfer of shares with the specific purpose of enabling the issuance of ADSs. In December 2013, the rate of the IOF/Securities Tax applicable to transactions involving the issuance of ADSs was reduced to zero percent.

Table of Contents

The imposition of these taxes may discourage foreign investment in shares of Brazilian companies, including our company, due to higher transaction costs, and may negatively impact the price and volatility of our ADSs and common shares on the NYSE and the BM&FBOVESPA.

Table of Contents
ITEM 4. INFORMATION ON THE COMPANY**Overview**

We are one of the principal integrated telecommunications service providers in Brazil with approximately 74.5 million revenue generating units, or RGUs, based on the most recent data available from ANATEL. We operate throughout Brazil and offer a range of integrated telecommunications services that include fixed-line and mobile telecommunication services, network usage (interconnection), data transmission services (including broadband access services), pay TV (including as part of double-play, triple-play and quadruple-play packages), internet services and other telecommunications services for residential customers, small, medium and large companies and governmental agencies. We own approximately 330 thousand kilometers of installed fiber optic cable, making our network the largest telecommunications backbone in Brazil. Our mobile network covers areas in which approximately 88.5% of the Brazilian population lives and works. According to ANATEL, as of December 31, 2013, we had an 18.6% market share of the Brazilian mobile telecommunications market and, as of April 30, 2013 (the date of the most recent information available from ANATEL), we had a 41.4% market share of the Brazilian fixed-line market. As part of our convergence strategy, we offer more than 520 thousand WiFi hotspots in public places, such as airports and shopping malls.

According to IBGE:

Region I (which consists of 16 Brazilian states located in the northeastern and part of the northern and southeastern regions) had a population of approximately 105.3 million as of 2011, representing 54.7% of the total Brazilian population, and represented approximately 40.3% of Brazil's total gross domestic product, or GDP, for 2011 (the most recent period for which such information is currently available).

Region II (which consists of the Federal District and nine Brazilian states located in the western, central and southern regions) had a population of approximately 45.5 million as of 2011, representing 23.7% of the total Brazilian population, and represented approximately 27.1% of Brazil's total GDP for 2011.

Region III (comprising the state of São Paulo) had a population of approximately 41.6 million as of 2011, representing 21.6% of the total Brazilian population, and represented approximately 32.6% of Brazil's total GDP for 2011.

Fixed-Line Telecommunications and Data Transmission Services

Our traditional fixed-line telecommunications business in Regions I and II includes local and long-distance services, network usage services (interconnection) and public telephones, in accordance with the concessions and authorizations granted to us by ANATEL. We are one of the largest fixed-line telecommunications companies in Brazil in terms of total number of lines in service as of November 30, 2013 (the most recent date for which such information is currently available). We are the principal fixed-line telecommunications services provider in Region I and Region II, based on our 11.6 million and 6.7 million fixed lines in service in Region I and Region II, respectively, as of December 31, 2013, with market shares of 67.8% and 62.4%, respectively, of the total fixed lines in service in these regions as of April 30, 2013, based on the most recent information available from ANATEL.

We offer a variety of high-speed data transmission services in Regions I and II, including services offered by our subsidiaries BrT Serviços de Internet S.A., or BrTI, and Brasil Telecom Comunicação Multimídia Ltda. Our broadband services, primarily utilizing Asymmetric Digital Subscriber Line, or ADSL, technology, are marketed under the brand name *Oi Velox*. As of December 31, 2013, we had 5.3 million ADSL subscribers in Regions I and II, representing 41.5% of our fixed lines in service at that date. Additionally, we provide voice and data services to corporate clients throughout Brazil.

For the year ended December 31, 2013, our fixed-line and data transmission services segment generated R\$20,401 million in net operating revenue and recorded operating income before financial income (expenses) and taxes of R\$3,775 million.

Table of Contents

Mobile Telecommunications Services

We offer mobile telecommunications services throughout Brazil. Based on our 50.2 million mobile subscribers as of December 31, 2013, we believe that we are one of the principal mobile telecommunications service providers in Brazil. Based on information available from ANATEL, as of December 31, 2013 our market share was 22.9% in Region I, 15.0% in Region II and 13.1% in Region III of the total number of mobile subscribers in these regions.

For the year ended December 31, 2013, our mobile services generated R\$12,187 million in net operating revenue and recorded operating income before financial income (expenses) and taxes of R\$1,376 million.

Other Services

We offer subscription television services under our *Oi TV* brand. We deliver subscription television services throughout Regions I and II using direct-to-home, or DTH, satellite technology. In Belo Horizonte, Poços de Caldas, Uberlândia and Barbacena in the State of Minas Gerais, we use a hybrid network of fiber optic and bidirectional coaxial cable. In December 2012 and January 2013, we introduced delivery of *Oi TV* through our fixed-line network in Rio de Janeiro and Belo Horizonte, respectively.

We also operate a call center business for the sole purpose of providing services to our company and our subsidiaries.

Our principal executive office is located at Rua Humberto de Campos No. 425, 6 1/2th floor Leblon, 22430-190 Rio de Janeiro, RJ, Brazil, and our telephone number at this address is (55-21) 3131-2918.

Our History and Development

Prior to the formation in 1972 of Telebrás, the Brazilian state-owned telecommunications monopoly, there were more than 900 telecommunications companies operating throughout Brazil. Between 1972 and 1975, Telebrás and its operating subsidiaries acquired almost all of the other telecommunications companies in Brazil and thus achieved a monopoly in providing public telecommunications services in almost all areas of the country.

Beginning in 1995, the Brazilian government undertook a comprehensive reform of Brazil's telecommunications regulations. In July 1997, Brazil's Congress adopted the Brazilian General Telecommunications Law (*Lei Geral das Telecomunicações*), which, together with the regulations, decrees, orders and plans on telecommunications issued by Brazil's executive branch, provided for the establishment of a comprehensive regulatory framework introducing competition into the Brazilian telecommunications industry and promoting the privatization of Telebrás and its subsidiaries.

Privatization of Telebrás

In January 1998, in preparation for its restructuring and privatization, Telebrás spun-off its previously integrated mobile telecommunications operations from its fixed-line operations into separate companies. In May 1998, Telebrás was restructured to form 12 new holding companies, or the New Holding Companies, by means of a procedure under the Brazilian Corporation Law called *cisão*, or spin-off. Virtually all of the assets and liabilities of Telebrás were allocated to the New Holding Companies, including Telebrás's interest in its operating subsidiaries. The New Holding Companies consisted of:

eight holding companies each of which controlled one or more mobile services providers, each operating in one of the ten service regions into which Brazil had been divided for mobile telecommunications services and using the frequency range called Band A (other than one mobile services provider that operated in two regions and one region in which the mobile services provider was not part of the Telebrás system);

three regional holding companies, including Brasil Telecom Participações S.A., or Brasil Telecom Holding, and TNL, each of which controlled the fixed-line service providers that provided local and intraregional

Table of Contents

long-distance service in one of the three service regions into which Brazil has been divided for fixed-line telecommunications; and

a holding company, which controlled Embratel, a provider of domestic (including interstate and interregional) and international long-distance service throughout Brazil.

We are the successor to Brasil Telecom Holding and TNL, two of the New Holding Companies in the fixed-line telecommunications business. In the restructuring and privatization of Telebrás, Brasil Telecom Holding was allocated all of the share capital held by Telebrás in the operating subsidiaries that provided fixed-line telecommunications service in Region II, including our company, and TNL was allocated all of the share capital held by Telebrás in the operating subsidiaries that provided fixed-line telecommunications service in Region I, including Telemar.

In August 1998, the Brazilian government privatized Telebrás by selling all of the voting shares that it held in the New Holding Companies, including Brasil Telecom Holding and TNL, to private-sector buyers.

Expansion of Fixed-Line Network in Rio Grande do Sul

In July 2000, we acquired the control of Companhia Riograndense de Telecomunicações, or CRT. CRT was the leading fixed-line telecommunications service company in the State of Rio Grande do Sul. In December 2000, CRT was merged with and into us.

Corporate Reorganization of Brasil Telecom

Following the formation of Brasil Telecom Holding, it provided fixed-line telecommunications services through nine separate operating subsidiaries, including our company, each of which provided telecommunications services in one of the nine states of Region II or the Federal District of Brazil. In February 2000, Brasil Telecom Holding implemented a corporate reorganization, which resulted in each of its other fixed-line operating companies being merged into our company.

Corporate Reorganization of TNL

Following its formation, TNL provided fixed-line telecommunications services through 16 separate operating subsidiaries, each of which provided telecommunications services in one of the 16 states of Region I. In August 2001, TNL implemented a corporate reorganization, which resulted in all of the other fixed-line operating companies being merged into our subsidiary Telecomunicações do Rio de Janeiro S.A., or Telerj. In September 2001, Telerj changed its name to Telemar Norte Leste S.A.

Entry into the Internet Service Provider Business

In October 2001, we formed BrTI to provide broadband internet services.

Entry into the Personal Mobile Services Business

In December 2002, we established our wholly-owned subsidiary, Oi Móvel S.A. (formerly known as 14 Brasil Telecom Celular S.A.), which we refer to as Oi Mobile, to provide personal mobile services (*Serviço Móvel Pessoal*) in Region II. In December 2002, Oi Mobile was granted an authorization by ANATEL to provide personal mobile services in Region II following its successful bid in an auction held for the authorization and the related radio frequency license. Oi Mobile commenced operations in September 2004.

Expansion of Our Internet Service Provider Business

In June 2003, we acquired all of the share capital of iBest Holding Corporation that we did not own. Prior to this acquisition, we owned 12.8% of the share capital of iBest Holding Corporation. iBest Holding Corporation

Table of Contents

controlled (1) iBest S.A., or iBest, a free ISP and the then-largest ISP in Region II, (2) Freelance S.A., and (3) Febraio S.A. In May 2004, iBest and Febraio S.A. merged with and into Freelance S.A.

Acquisition of Submarine Fiber-Optic Cable System

In June 2003, we acquired the submarine fiber-optic cable system of 360 Networks Americas do Brasil Ltda. We refer to this system as GlobeNet. GlobeNet consists of a fiber optic cable system that connects the United States, Bermuda, Brazil, Venezuela and Colombia.

Entry into the Internet Protocol Business

In May 2004, we acquired substantially all of the share capital of Vant Telecomunicações S.A., or Vant, that we did not own. Prior to this acquisition, we owned 19.9% of the share capital of Vant. Vant offered Internet Protocol, or IP, services as well as other services to the corporate market throughout Brazil.

Expansion of Data Transmission Network

In May 2004, we acquired substantially all of the share capital of MetroRED Telecomunicações Ltda., or MetroRED, that we did not own. Prior to this acquisition, we owned 19.9% of the share capital of MetroRED. We have changed the corporate name of MetroRED to Brasil Telecom Comunicação Multimídia Ltda., or Brasil Telecom Multimedia. Brasil Telecom Multimedia is a leading local fiber optic network provider and also has an internet solutions data center in São Paulo which provides internet support to our customers. In October 2012, Vant merged with and into Brasil Telecom Multimedia.

Acquisition of iG

In November 2004, we acquired 63.0% of the capital stock of Internet Group (Cayman) Ltd., the parent company of Internet Group do Brasil Ltda., or iG. Prior to this acquisition, Brasil Telecom Holding owned 10.0% of the capital stock of Internet Group (Cayman) Ltd. In July 2005, we acquired an additional 25.6% of the capital stock of Internet Group (Cayman) Ltd. iG is a free internet services provider. iG is the leading dial-up ISP in Brazil and operates in the dial-up and broadband access markets. In October 2012, we implemented a corporate reorganization, which resulted in BrTI holding 100% of the capital stock of iG. In August 2013, BrTI transferred one share of iG to Telemar.

Consolidation of Call Centers

In December 2007, our subsidiary Brasil Telecom Call Center S.A. commenced operations, rendering call center services to us and our subsidiaries that demand this type of service. We invested approximately R\$50 million in infrastructure and customer service technologies to create call centers in Goiânia, Campo Grande, Florianópolis, Brasília and Curitiba to replace our 30 pre-existing sites.

Acquisition by Telemar

On January 8, 2009, Copart 1 Participações S.A., or Copart 1, a wholly-owned subsidiary of Coari, itself a wholly-owned subsidiary of Telemar, acquired indirectly all of the outstanding shares of Invitel S.A., or Invitel, and 12,185,836 common shares of Brasil Telecom Holding owned by the shareholders of Invitel. At that time, Invitel owned 100% of the outstanding shares of Solpart Participações S.A., or Solpart, which owned 52.0% of the outstanding voting share capital, representing 19.0% of the outstanding share capital, of Brasil Telecom Holding, which, in turn, owned 67.2% of the outstanding share capital, including 99.1% of the outstanding voting share capital, of our company.

During 2008, Copart 1 had acquired 76,645,842 preferred shares of Brasil Telecom Holding, representing 33.3% of the outstanding preferred shares of Brasil Telecom Holding, and Copart 2 Participações S.A., or Copart 2, a wholly-owned subsidiary of Coari, had acquired 58,956,565 preferred shares of our company, representing 18.9% of our outstanding preferred shares.

Table of Contents

As a result of the acquisition of Invitel, Telemar acquired indirect control of Brasil Telecom Holding and Brasil Telecom.

In connection with the approval in October 2010 of Telemar's acquisition of control of our company by the Administrative Council for Economic Defense (*Conselho Administrativo de Defesa Econômica*), or CADE, the Brazilian antitrust regulator, Telemar entered into a Performance Commitment Term (*Termo de Compromisso de Desempenho*) containing obligations related to the wholesale market, specifically with regard to the provision of interconnection and Industrial Exploitation of Dedicated Lines (*Exploração Industrial de Linha Dedicada*), or EILD. Under this agreement, we must, among other obligations:

maintain a separate business area exclusively responsible for providing interconnection services, EILD and other wholesale services for a minimum of five years;

adopt specific procedures and provide specified assistance for our interconnection services and EILD customers; and

submit reports to CADE periodically and upon CADE's request regarding our activities in these markets.

In addition, in connection with the approval by ANATEL in December 2008 of Telemar's acquisition of control of our company, ANATEL imposed a number of conditions contained in the order granting the approval, some of which have already been fulfilled. The most significant of the remaining conditions require us to:

extend fiber optic cables to the city of Macapá within six months after the implementation of certain infrastructure connecting the cities of Tucuruí and Macapá by the power companies in this region;

expand our fiber optic network to 40 new municipalities in Regions I and II in each of 2012 through 2015;

offer broadband services in 50% of the municipalities covered by our obligations to provide transmission lines connecting the fiber-optic internet backbones of Brasil Telecom and Telemar to municipalities in their concession areas in which they do not provide internet service, which we refer to as backhaul, at rates no greater than Telemar's highest existing rate for broadband services, within five months of completing the backhaul extensions, and 100% of such municipalities within ten months of completing the backhaul extensions; and

make annual investments in research and development in each of the next ten years in amounts equal to at least 50% of the amounts of Telemar's contributions to the Telecommunications Technology Development Fund (*Fundo para o Desenvolvimento Tecnológico das Telecomunicações*), or the FUNTTEL, which may be increased to 100% at ANATEL's discretion.

Mandatory Tender Offers by Copart 1 and Copart 2

As a result of the acquisition of control of Brasil Telecom and Brasil Telecom Holding by Telemar on January 8, 2009, under Article 254-A of the Brazilian Corporation Law and CVM Instruction No. 361, of March 5, 2002, as amended, Telemar was required to offer to purchase any and all common shares of Brasil Telecom Holding and Brasil Telecom held by public shareholders.

As a result of these auctions, in June 2009 (1) Copart 1 acquired 40,452,227 common shares of Brasil Telecom Holding, representing 30.5% of the outstanding common shares of Brasil Telecom Holding and 11.2% of the outstanding share capital of Brasil Telecom Holding, and (2) Copart 2 acquired 630,872 common shares of Brasil Telecom, representing 0.3% of the outstanding common shares of Brasil Telecom and 0.1% of the outstanding share capital of Brasil Telecom.

Table of Contents

Merger of Copart 1 into Brasil Telecom Holding

On July 31, 2009, (1) Invitel merged with and into Solpart, with Solpart as the surviving company, (2) Solpart merged with and into Copart 1, with Copart 1 as the surviving company, and (3) Copart 1 merged with and into Brasil Telecom Holding, with Brasil Telecom Holding as the surviving company. As a result of these mergers, Coari owned 54.7% of the outstanding share capital, including 91.7% of the outstanding voting share capital, of Brasil Telecom Holding.

Merger of Copart 2 into Brasil Telecom

On July 31, 2009, Copart 2 merged with and into Brasil Telecom, with Brasil Telecom as the surviving company. As a result of this transaction, Coari owned 10.9% of the outstanding share capital, including 0.3% of the outstanding voting share capital, of Brasil Telecom.

Merger of Brasil Telecom Holding into Brasil Telecom

On September 30, 2009, the shareholders of Brasil Telecom and Brasil Telecom Holding approved a merger (*incorporação*) under Brazilian law of Brasil Telecom Holding with and into Brasil Telecom, with Brasil Telecom as the surviving company. In the Brasil Telecom merger:

each issued and then outstanding common share of Brasil Telecom Holding (other than any common shares held by shareholders that exercised their withdrawal rights) was converted automatically into 1.2190981 common shares of Brasil Telecom;

each issued and then outstanding preferred share of Brasil Telecom Holding was converted automatically into 0.1720066 common shares of Brasil Telecom and 0.9096173 preferred shares of Brasil Telecom; and

all issued and then outstanding shares of Brasil Telecom held by Brasil Telecom Holding were cancelled.

As a result of the Brasil Telecom merger, Brasil Telecom Holding ceased to exist and Coari owned 48.2% of the total outstanding share capital of Brasil Telecom, including 79.6% of its outstanding voting share capital.

Corporate Reorganization of TNL, Telemar and Our Company

On February 27, 2012, the shareholders of TNL, Telemar, Coari and Brasil Telecom approved a series of transactions, which we refer to as the corporate reorganization, including:

a split-off (*cisão*) and merger of shares (*incorporação de ações*) under Brazilian law in which:

Telemar transferred its shares of Coari to Coari;

Coari assumed a portion of the liabilities of Telemar, which became joint and several liabilities of Telemar and Coari or obligations of Coari guaranteed by Telemar;

Coari issued one common share and/or one preferred share to the holders of Telemar common and preferred shares (other than the shares of holders who exercised their withdrawal rights with respect to such shares) in exchange for each of their common and preferred shares of Telemar, respectively; and

Edgar Filing: OI S.A. - Form 20-F

Coari retained the Telemar shares exchanged for Coari shares and as a result, Telemar became a wholly-owned subsidiary of Coari;

a merger (*incorporação*) under Brazilian law of Coari with and into our company, with our company as the surviving company, in which:

Table of Contents

each issued and then outstanding share of Brasil Telecom held by Coari and all Coari shares held in treasury were cancelled;

each issued and then outstanding common share of Coari was converted automatically into 5.1149 common shares of Brasil Telecom;

each issued and then outstanding preferred share of Coari was converted automatically into 0.3904 common shares of Brasil Telecom and 4.0034 preferred shares of Brasil Telecom;

Coari ceased to exist; and

Telemar became a wholly-owned subsidiary of Brasil Telecom; and

a merger (*incorporação*) under Brazilian law of TNL with and into our company, with our company as the surviving company, in which:

each TNL share held in treasury prior to the TNL merger was cancelled, and each issued and then outstanding share of Brasil Telecom held by TNL was cancelled, other than 24,647,867 common shares of Brasil Telecom, which were transferred to the treasury of Brasil Telecom;

each issued and then outstanding common share of TNL (other than common shares held by shareholders who exercised their withdrawal rights with respect to such common shares) was converted automatically into 2.3122 common shares of Brasil Telecom;

each issued and then outstanding preferred share of TNL was converted automatically into 0.1879 common shares of Brasil Telecom and 1.9262 preferred shares of Brasil Telecom; and

TNL ceased to exist.

As a result of these transactions, TmarPart has become our direct controlling shareholder. For additional information about TmarPart, see Item 7. Major Shareholders and Related Party Transactions Major Shareholders.

In addition, on February 27, 2012, our shareholders approved:

the issuance and distribution of (1) one Class B redeemable preferred share of our company to the holder of each of our common shares, and (2) one Class C redeemable preferred share of our company to the holder of each of our preferred shares;

the redemption of each Class B redeemable preferred share and Class C redeemable preferred share at a redemption price equal to R\$2.543282 per share, or an aggregate of R\$1,502 million; and

the change of our corporate name to Oi S.A.

Edgar Filing: Oi S.A. - Form 20-F

We have accounted for the Coari merger and the TNL merger using the carry-over basis of our own assets and liabilities and of the assets and liabilities assumed of TNL, Telemar, and Coari as from the date of the reorganization. The carry-over basis of the assets and liabilities were determined at the lowest level entity in the group (i.e., the effects of the purchase accounting relating to Coari's acquisition of Brasil Telecom (now Oi S.A.) will not be reflected in the assets and liabilities of Oi S.A. in its consolidated financial statements as a result of the TNL merger). Additionally, our historical financial statements have not been restated to reflect the impacts of the corporate reorganization on a retrospective basis. Our non-current intangible assets and property, plant and equipment are recorded on a different basis in our parent company's consolidated financial statements, reflecting the amortized purchase price allocated to these assets resulting from Coari's acquisition of our company on January 8, 2009.

Table of Contents

Holders of Telemar common shares, class A preferred shares and class B preferred shares and holder of TNL preferred shares as of the close of trading on May 23, 2011, the date prior to the publication of the Relevant Fact that first announced the split-off and share exchange and the TNL merger were entitled to withdrawal rights in connection with the split-off and share exchange and the TNL merger. Shareholders who exercised these withdrawal rights with respect to the Telemar shares were entitled to receive R\$74.37 per share and shareholders who exercised these withdrawal rights with respect to the TNL preferred shares were entitled to receive R\$28.93 per share. As of March 29, 2012, the expiration of the period for the exercise of these withdrawal rights, holders of 1,020,215 Telemar common shares, 17,856,585 Telemar class A preferred shares, 47,714 Telemar class B preferred shares and 20,446,097 TNL preferred shares had validly exercised their withdrawal rights for an aggregate cost to our company of R\$1,999 million.

Acquisition of Shares of Portugal Telecom

As a result of the corporate reorganization, Oi became the indirect owner of 64,557,566 shares of Portugal Telecom, SGPS, S.A., or Portugal Telecom, representing 7.2% of its outstanding shares that were owned by Telemar. Between April 4, 2012 and May 25, 2012, we acquired 25,093,639 additional shares of Portugal Telecom and now hold 89,651,205 common shares of Portugal Telecom, representing 10.0% of its outstanding shares.

Divestment of Non-Strategic Assets

Beginning in 2012, we entered into various transactions to monetize non-essential assets and acquire the services related to these assets at more favorable financial terms, with an aim to reduce future capital expenditures and maintenance expenses.

Sale of Mobile Communications Towers

In December 2012, we sold Sumbe Participações S.A., or Sumbe, our wholly-owned subsidiary, to São Paulo SPE Locação de Torres Ltda. for R\$516 million. Sumbe owned approximately 1,200 communications towers and rooftop antennae used in our mobile services business. Contemporaneously with the sale of these communications towers and rooftop antennae, we entered into an operating lease agreement with a term of 15 years with Sumbe permitting us and our subsidiaries to continue to use space on these communications towers and rooftop antennae for our mobile services business.

In December 2013, we entered into an agreement with SBA Torres Brasil, Ltda., under which we agreed to sell to SBA Torres Brasil, Ltda. all of our equity interests in a subsidiary that owns 2,007 mobile telecommunications towers in exchange for R\$1,525 million, subject to the completion of certain customary conditions precedent. The parties have also agreed that, upon the transfer of such equity interests, we shall enter into long-term lease agreements to permit us to continue to use space on these communications towers for our mobile services business. We expect to complete this transaction by the first quarter of 2014.

Assignment and Lease of Fixed-Line Communications Towers

In August 2013, we completed the assignment of the right to use 4,226 fixed-line communications towers that formed part of our infrastructure for commercial operations by companies whose core operations consist of providing transmission tower and radiofrequency management and maintenance services. Upon the completion of these assignments, we received proceeds of approximately R\$1,087 million. We have entered into agreements to lease the communications towers from the assignees for 20-year terms (renewable for another 20 years), effective upon completion of the assignments.

In November 2013, we completed the assignment of the right to use 2,113 fixed-line communications towers that formed part of our infrastructure for commercial operations by companies whose core operations consist of providing transmission tower and radiofrequency management and maintenance services. Upon the completion of these assignments, we received proceeds of approximately R\$687 million. We have entered into agreements to lease the communications towers from the assignees for 20-year terms (renewable for another 20 years), effective upon completion of the assignments.

Table of Contents

Sale of GlobeNet

In December 2013, we and our subsidiary BrT Serviços de Internet S.A., or BrTI, sold all of our equity interests in Brasil Telecom Cabos Submarinos Ltda. and its subsidiaries (other than Brasil Telecom de Venezuela S.A.), collectively known as GlobeNet, to BTG Pactual YS Empreendimentos e Participações. On January 17, 2014, the sale was concluded for an aggregate amount of R\$1,779 million (based on the U.S. dollar-*real* exchange rate on January 15, 2014), resulting in a gain of approximately R\$1,497 million after deducting the book value of the assets and related costs. GlobeNet's principal assets consist of 22,500 kilometers of fiber optic submarine cables, composed of two rings of protected submarine cables, linking connection points between the United States, Bermuda, Colombia and Brazil. As part of this transaction, GlobeNet will supply guaranteed submarine cable capacity to us and our subsidiaries at a fixed price for a term of 13 years.

Proposed Business Combination

On October 1, 2013, we entered into a memorandum of understanding, or the MOU, with Portugal Telecom, AG Telecom, LF Tel, PASA, EDSP, Bratel Brasil, BES and Ongoing, in which we and they agreed to the principles governing a series of transactions, including the business combination described below.

The business combination transaction involves three principal components:

a capital increase of our company in which we expect to issue common shares and preferred shares in an underwritten offering for an aggregate of at least R\$7,000 million in cash, and common shares and preferred shares to Portugal Telecom in exchange for the contribution by Portugal Telecom to our company of all of the shares of its subsidiary PT Portugal, which will at that time owns (a) all of the operating assets of Portugal Telecom, except interests held directly or indirectly in Oi and Contax Holding, and (b) all of Portugal Telecom's liabilities at the time of the contribution;

a merger of shares (*incorporação de ações*) under Brazilian law, a Brazilian transaction in which, subject to the approvals of the holders of voting shares of our company and TmarPart, all of the shares of our company not owned by TmarPart will be exchanged for TmarPart common shares and we will become a wholly-owned subsidiary of TmarPart; and

a merger (*incorporação*) under Portuguese and Brazilian law, of Portugal Telecom with and into TmarPart, with TmarPart as the surviving company in which the shareholders of Portugal Telecom will receive an aggregate number of TmarPart shares equal to the number of TmarPart shares held by Portugal Telecom immediately prior to the merger.

In connection with the business combination, we expect that:

TmarPart will enter into several additional transactions designed to recapitalize TmarPart so that at the time of the merger of shares, TmarPart will have no net debt;

TmarPart and our company will enter into merger transactions in order to simplify the ownership structure of TmarPart;

The shares of TmarPart will be listed on the Novo Mercado segment of the BM&FBOVESPA and on the NYSE Euronext Lisbon, and ADSs representing the shares of TmarPart will be listed on the NYSE; and

The shareholders agreements among the shareholders of TmarPart will be terminated.

We believe that the business combination will:

Edgar Filing: OI S.A. - Form 20-F

permit the formation of a single large multinational telecommunications company based in Brazil with more than 100 million customers in seven countries with a total population of approximately 260 million people;

Table of Contents

maintain the continuity of operations under the trademarks of Oi and Portugal Telecom in their respective regions of operation, subject to unified control and management by TmarPart;

further consolidate the operations of our company and Portugal Telecom, with the goal of achieving significant economies of scale, maximizing operational synergies, reducing operational risks, optimizing efficient investments and adopting best operational practices;

strengthen the capital structure of TmarPart, facilitating its access to capital and financial resources;

consolidate the shareholder bases of our company, Portugal Telecom and TmarPart as holders of a single class of common shares or ADSs traded on the Novo Mercado segment of the BM&FBOVESPA, the NYSE and NYSE Euronext Lisbon;

diffuse TmarPart's shareholder base, as a result of which no shareholder or group of shareholders will hold a majority interest in TmarPart's capital;

result in the adoption by TmarPart of the corporate governance practices of the Novo Mercado segment of the BM&FBOVESPA; and

promote greater liquidity of the TmarPart common shares than currently is available to holders of our shares and Portugal Telecom's shares.

Oi Capital Increase

As part of the Oi capital increase, Portugal Telecom is expected to subscribe for common shares and preferred shares of our company and settle this subscription through the contribution of all of the shares of PT Portugal as described below. In addition, we expect that Caravelas will subscribe for common shares and preferred shares in the cash portion of the Oi capital increase with a purchase price equivalent to the difference between R\$2.0 billion and the amount of subscription orders placed in the offering by TmarPart's shareholders, other than Bratel Brasil.

Overview of PT Portugal

In anticipation of the business combination, prior to the settlement of the Oi capital increase, Portugal Telecom will contribute all operating assets directly or indirectly owned by Portugal Telecom, except equity interests held directly or indirectly in our company, Contax Holding and Bratel B.V., to PT Portugal, and we expect that PT Portugal will assume all of Portugal Telecom's liabilities. In addition to the interests held directly or indirectly in our company and Contax Holding, we understand that Portugal Telecom will retain R\$4,788 million in cash and cash equivalents to be used to purchase convertible debentures of the AGSA Holding Companies and the Jereissati Telecom Holding Companies, and cash and cash equivalents equal to the amount of its remaining liabilities following the contribution of PT Portugal to our company. Prior to the consummation of the Oi capital increase, Portugal Telecom is expected to undertake a series of transactions with the purpose of disposing of its interests in CTX Participações S.A., a company controlled by AG Telecom, LF Tel and Portugal Telecom, or CTX, and Contax Participações S.A., a company controlled by CTX, or Contax Holdings.

Following the contribution of these assets to PT Portugal, PT Portugal will provide telecommunications services in Portugal and in certain countries in sub-Saharan Africa and Asia. In Portugal, PT Portugal will provide services in the following customer categories:

Residential services, which include integrated networks inside the customer's home, enabling the simultaneous connection of multiple devices, including fixed line telephone, TV (including IP TV and DTH satellite pay-TV services), game consoles, PCs, laptops, tablets and smartphones. PT Portugal provides these services through its subsidiaries, in particular PT Comunicações S.A., or PT Comunicações.

Table of Contents

Personal services, which are mobile telecommunications services, such as voice, data and Internet-related multimedia services provided to personal (*i.e.*, individual) customers through PT Portugal's subsidiary TMN Telecomunicações Móveis Nacionais, S.A., or TMN.

Enterprise services, including Corporate and SME /SoHo services, which provide PT Portugal's corporate and medium and small business customers with integrated data and business solutions, as well as Information Technology/Information Systems, or IT/IS, and business process outsourcing, or BPO, services.

Wholesale and other services, which primarily include wholesale telecommunications services, public pay telephones, the production and distribution of telephone directories and other services in Portugal.

In addition, PT Portugal will have significant interests in telecommunications companies in Angola, Cape Verde, Namibia and São Tomé and Príncipe in Africa and East Timor in Asia.

Agreement to Assign Priority Subscription Rights

On February 19, 2014, Portugal Telecom executed a private undertaking among TmarPart, Valverde, AG Telecom and LF Tel with respect to the assignment of priority rights to subscribe to our share capital in the Oi capital increase. Under this agreement, TmarPart, Valverde, AG Telecom and LF Tel have agreed to assign and transfer to Portugal Telecom their priority rights to subscribe to 290,549,788 of our common shares and 157,693,458 our preferred shares.

This agreement is intended to provide the priority rights to Portugal Telecom necessary for Portugal Telecom to subscribe for our shares in the Oi capital increase. This agreement will remain in effect until the agreement by Portugal Telecom to subscribe for shares of Oi, as described below, is effective or until other agreements are executed in order transfer the priority rights.

PT Portugal Purchase Agreement

On February 19, 2014, we and Portugal Telecom executed the PT subscription agreement under which Portugal Telecom agreed to subscribe for our common and preferred shares as part of the Oi capital increase by contributing all of the share capital of PT Portugal to our company. The price per share paid by Portugal Telecom will be equivalent to the price per share paid in the cash portion of the Oi capital increase, and the number of our shares to which Portugal Telecom will subscribe will be based on an amount equivalent to the economic value of shares of PT Portugal (and consequently of the assets and liabilities to be transferred to PT Portugal), as determined in the PT Assets Valuation Report prepared by Santander Brasil. According to the PT Assets Valuation Report, the PT Assets were valued at an amount between 1,623.3 million (R\$5,296.4 million) and 1,794.1 million (R\$5,853.9 million). For purposes of Portugal Telecom's subscription in the Oi capital increase, our board of directors has determined a value for the shares of PT Portugal of 1,750 million (R\$5,709.9 million), based on the Euro-*real* exchange rate on February 20, 2014, the day before the first publication of the notice for the extraordinary general meeting of our shareholders, in accordance with the PT subscription agreement. The PT Assets Valuation Report has been submitted for the approval of the general shareholders meetings of our company and Portugal Telecom, each scheduled to be held on March 27, 2014. We have agreed to succeed to the rights and obligations of Portugal Telecom under the contracts that we specify in the offering documentation related to the Oi capital increase and these contracts will be assigned to PT Portugal after the shares of PT Portugal have been transferred to our company.

Under the PT subscription agreement, the obligation of Portugal Telecom to contribute PT Portugal to our company is subject to the satisfaction of certain conditions, including, among others:

the approval of the PT Assets Valuation Report by our shareholders;

the approval by ANATEL and the Portuguese Competition Authority of the business combination;

Table of Contents

the approval of creditors of Portugal Telecom, where necessary to complete the business combination, including waivers of creditors of Portugal Telecom;

Oi of obtaining proceeds of the cash portion of the Oi capital increase of at least R\$7.0 billion, including proceeds of at least R\$2.0 billion through the sale of share capital to Caravelas and the shareholders of TmarPart; and

the settlement of the Oi capital increase on or prior to May 2, 2014.

If the conditions to the PT subscription agreement are not met or waived by October 1, 2014, either party may, in its sole discretion, rescind the PT subscription agreement. The PT subscription agreement may be terminated (1) by either party, if the closing of the Oi capital increase does not occur by October 1, 2014, (2) by Portugal Telecom, if, after the bookbuilding process in the Oi capital increase, Portugal Telecom is expected to hold an interest of less than 36.6% of the share capital of TmarPart following the completion of the merger of shares, or (3) by our company if, after the bookbuilding process in the Oi capital increase, Portugal Telecom is expected to hold an interest of more than 39.6% of the share capital of TmarPart following the completion of the merger of shares. If the PT subscription agreement is terminated for any reason other than due to a breach of contract by Portugal Telecom, we have agreed to reimburse up to US\$10 million of Portugal Telecom's documented costs for its liability management process and creditors' approvals.

Amendments to PT Portugal Bonds and Credit Agreements

In connection with our proposed acquisition of PT Portugal, we understand that Portugal Telecom expects to amend each of its outstanding series of bonds and certain of its credit facilities, as described below.

On March 3, 2014, Portugal Telecom obtained the consent from the holders of the 750,000,000 5.875% Notes due 2018, 1,000,000,000 4.625% Notes due 2020, 600,000,000 5.625% Notes due 2016, 250,000,000 5.242% Notes due 2017, 750,000,000 5.00% Notes due 2019, 500,000,000 4.375% Notes due 2017 and 500,000,000 4.5% Notes due 2025 issued by Portugal Telecom Internacional Finance B.V., or PTIF, and which we refer to collectively as the PTIF Notes, in order to amend and restate the principal trust deed governing such notes to (1) release and discharge Portugal Telecom and PT Comunicações, as keep well providers, from all of their obligations in respect of the PTIF Notes, (2) add an unconditional and irrevocable guarantee from Oi, (3) waive any and all of the defaults and events of default that may be triggered by the Oi capital increase and/or the business combination or any transaction executed as part of, or pursuant to, the Oi capital increase and/or the business combination, and (4) make certain other modifications to the terms and conditions of the PTIF Notes as set forth in the relevant supplemental trust deed pursuant to which such amendments will be implemented. PTIF, Portugal Telecom, PT Comunicações, PT Portugal, Oi and the trustee under Portugal Telecom's Euro Medium Term Note Programme expect to enter into a supplemental trust deed, or the EMTN Supplemental Trust Deed, to effectuate such amendments.

Portugal Telecom expects to obtain the consent from the holders of its 400,000,000 6.25% Notes due 2016 at a meeting of such holders that Portugal Telecom expects to hold on March 18, 2014 in order to enter into the EMTN Supplemental Trust Deed which will (1) substitute, in place of Portugal Telecom, PT Portugal as issuer and principal obligor, (2) add an unconditional and irrevocable guarantee from Oi, (3) waive any and all of the defaults and events of default that may be triggered by the Oi capital increase and/or the business combination or any transaction executed as part of, or pursuant to, the Oi capital increase and/or the business combination, and (4) make certain other modifications to the terms and conditions of these notes as set forth in the relevant supplemental trust deed pursuant to which such amendments will be implemented. The amended and restated trust deed will become effective upon the contribution of PT Portugal to Oi as part of the Oi capital increase.

On March 3, 2014, Portugal Telecom obtained the consent from the holders of PTIF's 750,000,000 4.125% Exchangeable Bonds due 2014 in order to amend and restate the principal trust deed governing such bonds to (1) release and discharge Portugal Telecom and PT Comunicações, as keep well providers, from all of their obligations in respect of the Exchangeable Bonds, (2) add an

Table of Contents

unconditional and irrevocable guarantee from Oi, (3) waive any and all of the defaults and events of default that may be triggered by the Oi capital increase and/or the business combination or any transaction executed as part of, or pursuant to, the Oi capital increase and/or the business combination, (4) upon consummation of the business combination, cause the Exchangeable Bonds to be paid out in cash upon the exercise of any exchange rights by the holders thereof instead of being exchangeable into shares of Portugal Telecom, and (5) make certain other modifications to the terms and conditions of the Exchangeable Notes as set forth in the relevant supplemental trust deed pursuant to which such amendments will be implemented. PTIF, Portugal Telecom, PT Comunicações, Oi and the trustee under Portugal Telecom's Euro Medium Term Note Programme expect to enter into a supplemental trust deed to effectuate such amendments. The amended and restated trust deed will become effective upon the contribution of PT Portugal to Oi as part of the Oi capital increase.

Portugal Telecom, PT Comunicações, PTIF and Oi have engaged in negotiations with the lenders and agents under each of:

the Term and Revolving Credit Facilities Agreement dated March 23, 2011 among, *inter alia*, Portugal Telecom, PT Comunicações and PTIF, as borrowers, Banc of America Securities Limited, as agent, and the lenders from time to time party thereto, or the Revolving Credit Facility;

the Export Credit Facility Agreement dated May 3, 2011 among, *inter alia*, Portugal Telecom, PT Comunicações and PTIF, as borrowers, Bank of China Limited, London Branch, as agent, and the lenders from time to time party thereto, or the Export Credit Facility;

the Tranche B Export Credit Facility Agreement dated May 18, 2013 among, *inter alia*, Portugal Telecom, PT Comunicações and PTIF, as borrowers, Bank of China Limited, London Branch, as agent, and the lenders from time to time party thereto, or the Tranche B Export Credit Facility; and

the Term Loan Agreement dated June 29, 2010 among, *inter alia*, Portugal Telecom, PT Comunicações and PTIF, as borrowers, KfW IPEX-Bank GMBH, as agent, and the lenders from time to time party thereto, or the Term Loan, and together with the Revolving Credit Facility, the Export Credit Facility and the Tranche B Export Credit Facility, the Credit Facilities, and, as a result of such negotiations, Portugal Telecom, PT Comunicações, PTIF and Oi expect to enter into agreements under which such facilities will be amended to (1) substitute, in place of Portugal Telecom, PT Portugal as borrower in respect of each of the Credit Facilities and modify certain definitions, covenants and events of default in each of the Credit Facilities to provide that such provisions apply to PT Portugal instead of Portugal Telecom, (2) add an unconditional and irrevocable guarantee of each of the Credit Facilities from Oi, (3) waive any and all of the defaults and events of default under each of the Credit Facilities that may be triggered by the Oi capital increase and/or the business combination or any transaction executed as part of, or pursuant to, the Oi capital increase and/or the business combination, and (4) modify the maintenance covenants and the definitions related thereto in each of the Credit Facilities to conform such provisions to the corresponding terms of certain existing credit facilities under which Oi is a borrower and to provide that such calculations are made based on the financial statements of TmarPart.

Caravelas Purchase Agreement

On February 19, 2014, we and Caravelas executed a subscription agreement, or the Caravelas subscription agreement, under which Caravelas agreed to subscribe for our common and preferred shares as part of the Oi capital increase with a purchase price equivalent to the difference between R\$2.0 billion and the amount of subscription orders placed in the offering by TmarPart's shareholders, other than Bratel Brasil.

Under the Caravelas subscription agreement, the obligation of Caravelas to subscribe for our common and preferred shares is subject to the satisfaction of certain conditions, including, among others:

the approval of the Oi capital increase by our shareholders;

the approval of the PT Assets Valuation Report by our shareholders;

Table of Contents

no redemptions by the quotaholders of Caravelas prior to the consummation of the Oi capital increase; and

the approval by ANATEL and the Portuguese Competition Authority of the business combination.

Corporate Approvals Required for Oi Capital Increase

On February 19, 2014, our board of directors approved the Oi capital increase and the issuance of our common shares and preferred shares to Portugal Telecom in exchange for the shares of PT Portugal. On February 21, 2014, we called a meeting of the holders of our common shares to consider (1) an amendment to our bylaws increasing our share capital, and (2) approval of the PT Assets Valuation Report.

Recapitalization of TmarPart

In connection with the business combination, on February 19, 2014, PTB2 S.A, or PTB2, and Bratel Brasil, both subsidiaries of Portugal Telecom, entered into subscription agreements to purchase convertible debentures to be issued by the AGSA Holding Companies and the Jereissati Telecom Holding Companies, for an aggregate of R\$4,788 million. Each of the AGSA Holding Companies and Jereissati Telecom Holding Companies are expected to use the proceeds of these debentures to subscribe to convertible debentures of their subsidiaries, including AG Telecom and LF Tel, which will use the proceeds of their debentures to repay all of their outstanding indebtedness debt and subscribe to convertible debentures of TmarPart, which is expected to use the proceeds of its debentures to repay all of its outstanding indebtedness. Under the subscription agreements for these debentures, settlement of the issuance and sale of these debentures is expected to occur on the date of the settlement of the Oi capital increase.

Corporate Reorganization of TmarPart

On the date of the shareholders' meetings of TmarPart, AG Telecom, LF Tel, the AGSA Holding Companies and the Jereissati Telecom Holding Companies, Bratel Brasil and PTB2 that will consider the steps of the corporate reorganization of TmarPart described below and the merger of shares, the convertible debentures issued by TmarPart, AG Telecom, LF Tel, the AGSA Holding Companies and the Jereissati Telecom Holding Companies are expected to be converted into shares of the issuers of these debentures.

Immediately after the conversion of these debentures, TmarPart, AG Telecom, LF Tel, the AGSA Holding Companies and the Jereissati Telecom Holding Companies, Bratel Brasil and PTB2 are expected to carry out corporate reorganizations to simplify their organizational structure. We refer to these transactions as the TmarPart corporate reorganization.

We expect that the TmarPart reorganization will consist of the following transactions:

the merger of AG Telecom with and into PASA, the merger of LF Tel with and into EDSP, and mergers of PASA and EDSP with and into Bratel Brasil;

the disproportionate partial split-off of TmarPart with the split-off shares, representing 99.9% of Bratel Brasil's shares of TmarPart, merging into Bratel Brasil;

the partial split-off of Bratel Brasil and the merger of the split-off shares, representing the remainder of Bratel Brasil shares of TmarPart, into Marnaz Participações S.A., a wholly-owned subsidiary of Portugal Telecom, or Marnaz;

the merger of Bratel Brasil with and into our company; and

the mergers of Marnaz, Venus, Sayed and PTB2 with and into TmarPart.

Table of Contents

As a result of the recapitalization of TmarPart, the conversion of the debentures described above and the TmarPart reorganization, we expect that TmarPart will own 126.6 million of our common shares and 96.2 million of our preferred shares and that the shareholding structure of TmarPart will be as set forth in the chart below.

The Merger of Shares

The merger of shares will be the second principal step in the business combination. If the merger of shares is approved by (1) the boards of directors of each of TmarPart and our company and (2) the holders of voting shares of TmarPart and our company, all of our shares not owned by TmarPart will be exchanged for common TmarPart common shares and we will become a wholly-owned subsidiary of TmarPart. If the share exchange is approved:

each of our issued and then outstanding common share (excluding our common shares owned by TmarPart) will be converted automatically into one TmarPart common share without any further action by the holders thereof;

holders of our common shares represented by the our Common ADSs will receive, subject to certain procedure, TmarPart ADSs representing the number of TmarPart common shares into which the Oi common shares represented by their Common ADSs are converted;

each of our issued and then outstanding preferred share will be converted automatically into 0.9211 TmarPart common shares, plus cash in lieu of any fractional shares, without any further action by the holders thereof; and

holders of Oi Preferred ADSs will receive, subject to certain procedures, TmarPart ADSs representing the number of TmarPart common shares into which the Oi preferred shares represented by their Oi Preferred ADS are converted, plus cash in lieu of any fractional TmarPart ADS.

The Merger

The merger will be the third principal step in the business combination. If the merger is approved by the boards of directors of each of TmarPart and Portugal Telecom and the holders of their voting shares:

Portugal Telecom will merge with and into TmarPart, with TmarPart as the surviving company;

each issued and then outstanding Portugal Telecom ordinary share will be cancelled and holder thereof will automatically receive a number of TmarPart common shares calculated in a manner so that the number of shares issued to holders of Portugal Telecom ordinary shares will equal the number of TmarPart common shares held by Portugal Telecom following the merger of shares, plus cash in lieu of any fractional shares, without any further action by the holders thereof;

holders of Portugal Telecom ADSs will receive, subject to certain procedures, a number of TmarPart ADSs for each Portugal Telecom ADS they hold calculated in a manner so that the number of TmarPart ADSs

Table of Contents

issued as consideration for each Portugal Telecom ADSs will equal the number of TmarPart ADSs that represent the number of TmarPart common shares that are issued in exchange for a Portugal Telecom ordinary share, plus cash in lieu of any fractional TmarPart ADS;

all Portugal Telecom ordinary shares held in treasury prior to the merger and all issued and then outstanding TmarPart common shares held by Portugal Telecom will be cancelled;

all TmarPart common shares issued in the merger to Telemar as a result of Telemar holding Portugal Telecom ordinary shares prior to the merger will held in treasury by Telemar; and

Portugal Telecom will cease to exist.

The merger will be conditioned on the approval of the merger of shares by the extraordinary shareholders meetings of TmarPart and our company. If the merger of shares is not approved by the shareholders of TmarPart and our shareholders, the merger will not be completed.

Merger of TNL PCS into Oi Mobile

On February 1, 2014, TNL PCS S.A., the mobile services provider owned by our subsidiary Telemar, or TNL PCS, merged into Oi Mobile. As a result of this merger, Oi Mobile became our sole mobile services provider and mobile data and subscription television provider.

Corporate Structure

The following chart presents our corporate structure and principal operating subsidiaries as of March 6, 2014. The percentages in bold italics represent the percentage of the voting capital owned directly and indirectly by the parent company of each entity, and the percentages not in bold italics represent the percentage of the total share capital owned directly and indirectly by the parent company of each entity.

Table of Contents

Our Service Areas

Our concessions and authorizations from the Brazilian government allow us to provide:

fixed-line telecommunications services in Regions I and II;

long-distance telecommunications services throughout Brazil;

mobile telecommunications services in Regions I, II and III;

data transmission services throughout Brazil; and

direct to home (DTH) satellite television services throughout Brazil.

In addition, we have authorizations to provide fixed-line local telecommunications services in Region III.

Region I consists of 16 Brazilian states located in the northeastern and part of the northern and southeastern regions. Region I covers an area of approximately 5.4 million square kilometers, which represents approximately 64% of the country's total land area and accounted for 40.3% of Brazil's GDP in 2011. The population of Region I was 105.3 million as of 2011, which represented 54.7% of the total population of Brazil as of that date. In 2011, per capita income in Region I was approximately R\$15,869, varying from R\$7,836 in the State of Piauí to R\$28,696 in the State of Rio de Janeiro.

Region II consists of the Federal District and nine Brazilian states located in the western, central and southern regions. Region II covers an area of approximately 2.9 million square kilometers, which represents approximately 33.5% of the country's total land area and accounted for approximately 27.1% of Brazil's GDP in 2011. The population of Region II was 45.5 million as of 2011, which represented 23.7% of the total population of Brazil as of that date. In 2011, per capita income in Region II was approximately R\$24,668, varying from R\$11,782 in the State of Acre to R\$63,020 in the Federal District.

Region III consists of the State of São Paulo. Region III covers an area of approximately 248,000 square kilometers, which represents approximately 2.9% of the country's total land area and accounted for approximately 32.6% of Brazil's GDP in 2011. The population of Region III was 41.6 million as of 2011, which represented 21.6% of the total population of Brazil as of that date. In 2011, per capita income in Region III was approximately R\$32,449.

The following table sets forth key economic data, compiled by IBGE, for the Federal District and each of the Brazilian states.

State	Population (in millions) (2011)	Population per Square Kilometer (2011)	% of GDP (2011)	GDP per Capita (in reais) (2011)

Table of Contents

Set forth below is a map of Brazil showing the areas in Region I, Region II and Region III.

Our business, financial condition, results of operations and prospects depend in part on the performance of the Brazilian economy. See Item 3. Key Information Risk Factors Risks Relating to Brazil.

Our Services

We provide a variety of telecommunications services to the residential market, the personal mobility market and the business and corporate markets throughout Brazil.

Residential Services

Our primary services to the residential market are fixed-line voice services, broadband services from fixed-line devices, subscription television services. We offer these services on an a la carte basis and as bundles, including bundles with other services including our mobile voice services and our mobile data communications services.

Fixed-Line Voice Services

As of December 31, 2013, we and had approximately 9.3 million local fixed-line customers in Region I and approximately 5.4 million local fixed-line customers in Region II. Local fixed-line services include installation,

Table of Contents

monthly subscription, metered services, collect calls and supplemental local services. Metered services include local calls that originate and terminate within a single local area and calls between separate local areas within specified metropolitan regions which, under ANATEL regulations, are charged as local calls. ANATEL has divided Region I into 2,920 local areas and Region II into 1,772 local areas.

Under our concession agreements, we are required to offer two local fixed-line plans to users: the Basic Plan per Minute (*Plano Básico de Minutos*) and the Mandatory Alternative Service Plan (*Plano Alternativo de Serviços de Oferta Obrigatória*), each of which includes installation charges, monthly subscription charges, and charges for local minutes. As of December 31, 2013, 17.4% of our fixed-line customers subscribed to the Basic Plan per Minute or the Mandatory Alternative Service Plan.

Calls within Brazil that are not classified as local calls are classified as domestic long-distance calls. We provide domestic long-distance services for calls originating from fixed-line devices in Region I and Region II through our network facilities in São Paulo, Rio de Janeiro and Belo Horizonte and through interconnection agreements with other telecommunications providers, both fixed-line and mobile, that permit us to interconnect directly with their networks. We provide international long-distance services originating from fixed-line devices in Region I and Region II through agreements to interconnect our network with those of the main telecommunications service providers worldwide.

In addition to the Basic Plan per Minute and the Mandatory Alternative Service Plan, we offer a variety of alternative fixed-line plans that are designed to meet our customers' usage profiles. As of December 31, 2013, 82.6% of our fixed-line customers subscribed to alternative plans, including our bundled plans.

We offer a variety of voice only plans, including:

Our unlimited plans, such as our *Oi Fixo Ilimitado* plan which permits a subscriber to make unlimited local calls from a fixed-line device to fixed-line customers of any carrier and local calls to our mobile customers at the rates established for calls to fixed lines. Subscribers to our *Oi Fixo Ilimitado* plan have the option of upgrading this plan for an additional monthly fee to permit unlimited long distance calls to fixed-line customers of any carrier using our carrier selection codes.

Our controlled plans, such as our *Oi Fixo a Vontade* plan which permits a subscriber to make unlimited local calls from a fixed-line device to fixed-line customers of any carrier and purchase a minutes for long-distance calls and calls to mobile devices.

Our *Orelhão Gratis* plan which we introduced in Rio de Janeiro State introduced in November 2012 and which, in addition to the features of our *Oi Fixo Ilimitado* plan, permits a subscriber to make unlimited local calls from a public telephone to our fixed-line customers.

We also own and operate public telephones throughout Region I and Region II. As of December 31, 2013, we had approximately 655,400 public telephones in service, all of which are operated by pre-paid cards.

We continually monitor market trends and the usage profile of our customer to assist us in designing new plans and promotions in order to retain our existing customers and attract new customers to our fixed-line voice services.

Broadband Services

We provide high-speed internet access services using ADSL technology, which we refer to as broadband services, to residential customers in the primary cities in Region I and Region II under the brand name *Oi Velox*. As of December 31, 2013, we offered broadband services in 2,800 municipalities in Region I and 1,800 municipalities in Region II. As of December 31, 2013, we had 5.3 million residential ADSL customers in Regions I and II.

Table of Contents

We offer ADSL services through ADSL modems installed using our customers' conventional lines which permit customers to use the telephone line simultaneously with the internet. Customers pay a fixed monthly subscription fee, irrespective of their actual connection time to the internet.

We offer broadband subscriptions to customers that do not subscribe to our bundled services plans at speeds ranging from 300 kbps to 15 Mbps. To attract customers to this service, we offer new subscribers complementary anti-virus software and backup services. We offer a free wireless router with subscriptions at speeds of 5 Mbps or more. We offer bundles of voice and broadband services to our fixed-line subscribers at rates that are lower than the combined rate for separate comparable voice and broadband subscriptions. We are engaged in capital expenditure programs to upgrade the broadband speeds that we are able to offer and periodically offer promotions designed to encourage our existing broadband customers to migrate to plans offering higher speeds and to attract new customers to our broadband services.

Subscription Television Services

We offer subscription television services under our *Oi TV* brand. We deliver subscription television services throughout Regions I and II using our DTH satellite network. In Belo Horizonte, Poços de Caldas, Uberlândia and Barbacena in the State of Minas Gerais, we use a hybrid network of fiber optic and bidirectional coaxial cable. In December 2012 and January 2013, we began to deliver *Oi TV* through our fiber optic network using an internet protocol, or IP TV, in the Rio de Janeiro and Belo Horizonte, respectively. We plan to gradually expand our IP TV service to other cities. We are engaged in capital expenditure programs to expand our fiber-to-the-home, or FTTH, network to permit us to offer IP TV to a broader range of potential subscribers. As of December 31, 2013, we had approximately 806,020 subscribers to our DTH subscription television services in Regions I and II, approximately 22,828 subscribers to our cable network in the State of Minas Gerais and approximately 1,719 subscribers to our IP TV subscription television services.

We offer two subscription packages for our *Oi TV* services, one through IP TV, which includes more than 150 channels of content, including 45 high definition channels, and the other through our DTH satellite network, which includes more than 100 channels of content, including 35 high definition channels. Our *Oi TV Mais HD* package was launched in July 2012 and includes 132 channels, including 18 high-definition, or HD, channels. Our *Oi TV Mega HD* package was launched in May 2012 and includes 155 channels, of which 25 are HD channels. Subscribers to each of these packages have the option to customize the package through the purchase of additional channels featuring films offered by HBO/MAX and Telecine. Although these packages are available for a la carte purchase, we promote these packages and approximately 65% of our subscribers for these packages purchase these packages as part of a bundle with our *Oi Velox* service or as part of our *Oi Conta Total* plan.

Bundled Services

In addition to our combined internet and voice services, we offer our *Oi Conta Total* plan and our *Oi Conta Total Smartphone* plans, which provide fixed-line voice services, fixed-line devices broadband services and mobile voice services. Subscribers to these plans have the option to subscribe to our *Oi TV* service.

Our *Oi Conta Total* plan permits subscribers to make unlimited local calls to any of our fixed-line or mobile customers and includes an allowance of minutes selected by the customer for use to make long-distance calls and local calls to customers of other service providers. Subscribers also elect the speed of their fixed-line broadband service, which is available under this plan at speeds ranging from 2 Mbps to 15 Mbps. Subscribers to this plan are entitled to access our Oi WiFi hotspots and subscribers who elect speeds of 5 Mbps or greater are provided with a complimentary wireless router. Subscribers can elect add-on features for this plan, including mobile data plans, unlimited text messages to subscribers of any provider and unlimited long-distance calls to our fixed line or mobile customers.

We also offer our *Oi Conta Total Smartphone* plan which has the same structure as our *Oi Conta Total* plan, with the addition of our *Oi Smartphone* data plan and unlimited text messages. We provide a smartphone, mini-modem or tablet at a subsidized price and access to our network of Oi WiFi hotspots to our *Oi Conta Total Smartphone* subscribers.

Table of Contents

Subscribers to our IP TV service may subscribe to our *Oi TV Mais HD* package, together with a broadband subscription at 100 Mbps, or our *Oi TV Mega HD* package, together with a broadband subscription at 200 Mbps. Subscriptions to our IP TV packages are only available in areas in which we have implemented our FTTH network.

We also launched a bundled plan combining fixed-line voice service with pre-paid mobile service under the brand *Fixo Ilimitado + Pré Ilimitado* in March 2012. This plan is available in most Brazilian states and, in addition to the features of the *Oi Fixo Ilimitado* plan, permits a subscriber to make unlimited local calls to our fixed-line and mobile customers from a mobile device.

Personal Mobility Services

Our personal mobility services are comprised of post-paid and pre-paid mobile voice services and post-paid and pre-paid mobile data communications services. As of December 31, 2013, we had an aggregate of approximately 50.2 million subscribers for our mobile services, including subscribers to our bundled plans. As of December 31, 2013, 83.3% of our mobile voice customers subscribed to pre-paid plans and 16.7% subscribed to post-paid plans.

Post-Paid Voice Services

Post-paid customers pay a monthly subscription fee and are billed on a monthly basis for services provided during the previous month. Post-paid plans include voice mail, caller ID, conference calling, call forwarding, calls on hold and special services.

Our *Oi Conta* plans permit a subscriber to make unlimited local calls to our fixed-line and mobile subscribers and includes an allowance of minutes selected by the customer for use to make calls to customers of other service providers. In addition, customers can choose one among three add-ons: text messages to customers of other providers, long distance calls to our fixed-line and mobile subscribers, and rollover minutes. Customers can share the plan with users of as many as five separate mobile devices by paying a monthly fee per line. Subscribers can buy unlimited add-on features for this plan, including mobile data plans, unlimited text messages to subscribers of any provider and unlimited long-distance calls to our fixed line or mobile customers.

We also offer our *Oi Smartphone* plan which (1) permits a subscriber to make unlimited local calls to our fixed-line and mobile subscribers and includes an allowance of minutes selected by the customer for use to make calls to customers of other service providers, and (2) permits unlimited access to our 3G network and our network of WiFi hotspots and unlimited text messaging. We offer smartphones at subsidized prices to new subscribers to our *Oi Smartphone* plan. Our customers can also include as many as five separate mobile devices in the plan by paying a monthly fee per line. Subscribers can buy add-on features for this plan, including unlimited long-distance calls to our fixed line or mobile customers.

We also offer hybrid plans under the brand name *Oi Controle* for customers who wish to combine the cost savings of our post-paid plans with the self-imposed limits of our pre-paid plans. *Oi Controle* subscribers are permitted to make unlimited local and long-distance calls to our mobile and fixed-line subscribers and purchase credits that can be used for text messaging, internet access and calls to customers of other providers. Credits can be bought through point of sale machines in retail stores, ATMs or mobile applications such as *Minha Oi* and *Recarga Oi*.

Pre-Paid Voice Services

Pre-paid customers activate their cellular numbers through the purchase and installation of a SIM card in their mobile handsets. Our pre-paid customers are able to add credits to their accounts through point-of-sale machines, ATMs, Apple and Android applications installed on their mobile devices such as *Minha Oi* and *Recarga Oi* using a credit card, our toll-free number or the purchase of pre-paid cards at a variety of prices. These credits are valid for a fixed period of time following activation and can be extended when additional credits are purchased.

We regularly launch various packages and promotions designed to incentivize the purchase and use of credits by our pre-paid customers. In September 2013, we launched the *Oi Galera* plan, a voice, data, SMS text

Table of Contents

messaging, music and WIFI internet plan aimed at young consumers whose values, perceptions and consumption patterns are linked to online connectivity and data sharing. To promote the plan and attract new customers, we conducted several field campaigns where we distributed or sold SIM cards and encouraged customers who enrolled in the plan to use a Facebook application to invite their friends to join. The *Oi Galera* plan is being offered for R\$0.99 per day of use. During the launch phase of this plan, *Oi Galera* SIM cards are not available for sale in stores.

In October 2013, we launched a new pre-paid promotion called *Tudo Por Dia*. This promotion is part of our strategy of simplification and service convergence. *Tudo Por Dia* subscribers pay R\$0,10 for the first call of the day and are allotted a certain number of minutes that vary according to region for local and long-distance calls to our mobile and fixed-line customers. This promotion also offers subscribers 530 text messages and 5MB of data for R\$0.50 per day for each service. A subscription to this promotion has minimum recharge requirements and a monthly promotion maintenance fee.

Our customers may also exchange the credits that they purchase for additional services, such as:

Bônus Extra which permits our customers to purchase additional minutes for use for local or long-distance calls to our fixed-line or mobile subscribers at discounted rates;

Pacote de Dados which permits our customers to purchase a specified data allowance for use on their handsets; and

Pacote de SMS which permits our customers to purchase the ability to send specified number of text messages.

Mobile Internet Services

We offer post-paid and pre-paid mobile data communication services to customers that seek to access the internet through our network, using mobile devices, including smartphones or tablets and laptop computers with the aid of a mini-modem. As with our post-paid voice plans, our post-paid mobile internet customers pay a monthly subscription fee and are billed on a monthly basis for services provided during the previous month. We also offer internet access for a daily fee to customers who do not subscribe to a monthly plan.

We offer a variety of post-paid plans that provide data allowances from 100 MB to 5 GB for smartphones and from 300 MB to 10 GB for tablets and laptop computers and provide data transmission at speeds of 1 Mbps (3G network) or 5 Mbps (4G network). In addition to data traffic, our post-paid mobile internet plans for use with mobile devices include allowances for text messages. Our post-paid mobile internet plans for smartphones are available to our *Oi Conta* customers. Our post-paid mobile internet plans for tablets and laptop computers are sold on a stand-alone basis or through voice and data bundles, such as *Oi Conectado* and *Oi Smartphone*. We may also offer mini-modems and tablets at subsidized prices to new subscribers to our post-paid mobile data communication services based on the size of the data package purchased. Subscribers to our access to our post-paid mobile internet plans for tablets and laptop computers also receive free access to our network of WiFi hotspots. In addition to these post-paid plans, subscribers can purchase anti-virus software and backup data storage services.

We offer two pre-paid mobile internet services: through mobile devices and through the purchase and installation of a SIM card in a mini-modem or tablet. Our pre-paid customers are able to add credits to their accounts through the purchase of pre-paid credits at prices that vary based on the data allowance purchased (from 5MB to 500MB) and duration (daily, weekly and monthly).

Mobile Long-Distance

Each mobile subscriber in Brazil is registered in a geographic area (identified by the corresponding area codes, such as 11 (São Paulo) and 21 (Rio de Janeiro)), which we refer to as the subscriber's home registration area. A call originated by a mobile subscriber registered in one home registration area to a mobile subscriber registered in another home registration area, is classified as a mobile long-distance call.

Table of Contents

We provide mobile long-distance services originating from Region I and Region II through network facilities and through interconnection agreements with Telefônica Brasil in Region III and each of the other principal mobile services providers operating in Brazil that permit us to interconnect directly with their local fixed-line and mobile networks. We provide international long-distance services originating or terminating on our customer's mobile handsets through agreements to interconnect our network with those of the main telecommunications service providers worldwide.

Value-Added Services

We provide value-added services include voice, text and data applications, including voicemail, caller ID, and other services, such as personalization (video downloads, games, ring tones and wallpaper), text messaging subscription services (horoscope, soccer teams and love match), chat, mobile television, location-based services and applications (mobile banking, mobile search, email and instant messaging).

Business and Corporate Services

In the business and corporate services market, we serve small and medium-sized enterprise, or SMEs, and large enterprises, or corporate customers. We market a variety of services to SMEs, including our core fixed-line and mobile services, an our higher-value added services, such as broadband services, voice, text and data applications, advanced voice services and commercial data transmission services. We also market these services to corporate customers, combining these service offerings with information technology services.

Services for SMEs

We offer SMEs services similar to those offered to our residential and personal mobility customers, including fixed-line and mobile voice services, and fixed-line and mobile broadband serves. We also recently launched FTTH plans for SMEs. In addition, we offer SMEs:

digital trunk services, which optimize and increase the speed of the customer's telephone system;

advanced voice services, primarily 0800 (toll free) services, as well as voice portals where customers can participate in real-time chats and other interactive voice services;

dedicated Line Services (*Serviços de Linhas Dedicadas*), or SLD, under which we lease dedicated digital and analog lines to customers for use in private networks; and

value-added services, such as help desk support that provides assistance for technical support issues, web services with hosting, e-mail tools and website builder and security applications.

We offer a variety of mobile plans to SMEs, including our *Oi Equipe Flat* plan for groups of employees, our *Oi Empresa Especial* plan for individual users in an SME and our *Oi Controle* plan which, similarly to our residential fixed-line plan, is designed to permit an SME to control usage of mobile minutes. In general, our sales team works with an SME customer to determine their telecommunications needs and negotiates a package of services and pricing structure that is tailored to the needs of that SME. We also offer multi-product packages including fixed-line, broadband and mobile service bundles designed for the SME segment.

Table of Contents

Services for Corporate Customers

We offer corporate customers all of the services offered to our SME customers. In addition, we provide a variety of customized, high-speed data transmission services through various technologies and means of access to corporate customers. Our data transmission services include interconnection between local area networks at data transmission speeds of 34 Mbps, 155 Mbps and 10 Gbps, videoconferencing, video/image transmission and multimedia applications. Our principal commercial data transmission services are:

SLD, under which we lease dedicated lines to corporate customers for use in private networks that link different corporate websites;

IP services which consist of dedicated private lines which we provide to most of the leading ISPs in Brazil, as well as Virtual Private Network, or VPN, services that enable our customers to operate private intranet and extranet networks; and

frame relay services which we provide to our corporate customers to allow them to transmit data using protocols based on direct use of our transmission lines, enabling the creation of VPNs.

In 2012, we have broadened the scope of services that we offer to our corporate clients to include information technology infrastructure services, seeking to offer our customers end-to-end solutions through which we are able to provide and manage their connectivity and information technology needs. In February 2012 we launched *Oi Smartcloud*, a suite of data processing and data storage services that we perform through our six cyber data centers located in Brasília, São Paulo, Curitiba, Porto Alegre and Fortaleza. In addition, through these data centers, we provide hosting, collocation and IT outsourcing services, permitting our customers to outsource their IT structures to us or to use these centers to provide backup for their IT systems.

During the third quarter of 2013, we partnered with Portugal Telecom to offer four major new service groups through *Oi SmartCloud*. These new services groups are:

collaborative solutions, a hosting and sharing platform that provides employees with access to company documents;

business applications, an in-memory computing platform for large amounts of data;

mobility, a one-stop solution for mobile device management; and

security, a centralized, anti-spam filtering solution for corporate email.

The new solutions will operate through our six cyber data centers and Portugal Telecom's recently-opened center in Covilhã, Portugal, which is one of the largest data centers in the world.

In addition, in the second quarter of 2012, we launched our *Oi Gestão* service through which we offer corporate clients managed services for their mobile devices. This service is focused on providing logistics and security solutions relating to mobile devices.

In order to provide complete solutions to our corporate clients, we have entered into service agreements for the joint supply of international data services with a number of important international data services providers. These commercial relationships with international data services providers are part of our strategy of offering telecommunications services packages to our customers.

Table of Contents

Services for Other Telecommunications Providers

We offer specialized services to other telecommunications providers, primarily consisting of interconnection to our networks, network usage charges for the use of portions of our long-distance network, and traffic transportation through our physical infrastructure.

Interconnection and Network Usage Charges

All telecommunications services providers in Brazil are required, if technically feasible, to make their networks available for interconnection on a non-discriminatory basis whenever a request is made by another telecommunications services provider. Interconnection permits a call originated on the network of a requesting local fixed-line, mobile or long-distance service provider's network to be terminated on the local fixed-line or mobile services network of the other provider.

We are authorized to charge for the use of our local fixed-line network on a per-minute basis for (1) all calls terminated on our local fixed-line networks in Regions I and II that originate on the networks of other local fixed-line, mobile and long-distance service providers, and (2) all long-distance calls originated on our local fixed-line networks in Regions I and II that are carried by other long-distance service providers.

Conversely, other local fixed-line service providers charge us interconnection fees (1) to terminate calls on their local fixed-line networks that are originated on our local fixed-line, mobile or long-distance networks, and (2) for long-distance calls originated on their local fixed-line networks that are carried by our long-distance network.

In addition, we charge network usage fees to long-distance service providers and operators of trunking services that connect switching stations to our local fixed-line networks.

We are authorized to charge for the use of our long-distance network on a per-minute basis for all calls that travel through a portion of our long-distance networks for which the caller has not selected us as the long-distance provider. Conversely, other long-distance service providers charge us interconnection fees on a per-minute basis for all calls that travel through a portion of their long-distance networks for which the caller has selected us as the long-distance provider.

We are authorized to charge for the use of our mobile network on a per-minute basis for all calls terminated on our mobile network that originate on the networks of other local fixed-line, mobile and long-distance service providers. Conversely, other mobile services providers charge us interconnection fees to terminate calls on their mobile networks that are originated on our local fixed-line, mobile or long-distance networks.

Transportation

We provide Industrial Exploitation of Dedicated Lines (*Exploração Industrial de Linha Dedicada*), or EILD, services under which lease trunk lines to other telecommunications services providers, primarily mobile services providers, which use these trunk lines to link their radio base stations to their switching centers;

Long-distance and mobile services providers may avoid paying long-distance network usage charges to us by establishing an interconnection to our local fixed-line networks. In order to retain these customers of our long-distance services, we offer a long-distance usage service, called national transportation, under which we provide discounts to our long-distance network usage fees based on the volume of traffic and geographic distribution of calls generated by a long-distance or mobile services provider.

We also offer international telecommunications service providers the option to terminate their Brazilian inbound traffic through our network, as an alternative to Embratel and TIM. We charge international telecommunications service providers a per-minute rate, based on whether a call terminates on a fixed-line or mobile telephone and the location of the local area in which the call terminates.

Table of Contents

Rates

Our rates for local fixed-line services, domestic long-distance services, mobile services, interconnection, EILD and SLD services are subject to regulation by ANATEL, subject to certain exceptions relating to the rates we charge under alternative fixed-line and mobile plans that we are authorized to offer to our customers. For information on ANATEL regulation of our rates, see Regulation of the Brazilian Telecommunications Industry Regulation of Fixed-Line Services Rate Regulation, Regulation of the Brazilian Telecommunications Industry Regulation of Mobile Services Personal Mobile Services Rate Regulation, Regulation of the Brazilian Telecommunications Industry Interconnection Regulations, and Regulation of the Brazilian Telecommunications Industry Regulation of Data Transmission and Internet Services.

Many of the services we provide charge on a per-minute basis. For these services, we charge for calls based on the period of use. The charge unit is a tenth of a minute (six seconds), and rounding is permitted to the next succeeding tenth of a minute. There is a minimum charge period of 30 seconds for every call. For local fixed-line to fixed-line calls during off-peak hours, charges apply on a per-call basis, regardless the duration of the call.

Local Fixed-Line Rates

Local Rates

Our revenues from local fixed-line services consist mainly of monthly subscription charges, charges for local calls and charges for the activation of lines for new subscribers or subscribers that have changed addresses. Monthly subscription charges are based on the plan to which the customer subscribes and whether the customer is a residential, commercial or trunk line customer.

Under our concession agreements, we are required to offer two local fixed-line plans to users: the Basic Plan per Minute and the Mandatory Alternative Service Plan, each of which includes installation charges, monthly subscription charges, and charges for local minutes. As of December 31, 2013, 17.4% of our local fixed-line customers subscribed to the Basic Plan per Minute or the Mandatory Alternative Service Plan.

The monthly subscription fees under the Basic Plan per Minute and the Mandatory Alternative Service Plan vary in accordance with the subscribers' profiles, as defined in the applicable ANATEL regulations. The monthly subscription fee for the Basic Plan per Minute includes the use of 200 local minutes per month by residential customers and 150 local minutes per month by commercial customers and trunk line customers. The monthly subscription fee for the Mandatory Alternative Service Plan includes the use of 400 local minutes per month by residential customers and 360 local minutes per month by commercial customers and trunk line customers. We deduct only two local minutes from a Basic Plan per Minute customer's monthly allotment and four minutes from a Mandatory Alternative Service Plan customer's monthly allotment for each local call made, regardless of the duration of the call, during off-peak hours. If the minute limits are exceeded, customers will incur additional metered-minute charges, the prices of which vary depending on whether the customer is a Basic Plan per Minute subscriber or a Mandatory Alternative Service Plan subscriber. If a customer does not use all of the minutes covered by the monthly subscription fee, the minutes cannot be carried over to the next month.

In addition to the Basic Plan per Minute and the Mandatory Alternative Service Plan, we are permitted to offer non-discriminatory alternative plans to the basic service plans. The rates for applicable services under these plans (e.g., monthly subscription rates and charges for local and long-distance calls) must be submitted for ANATEL approval prior to the offering of those plans to our customers. In general, ANATEL does not raise objections to the terms of these plans. As of December 31, 2013, 82.6% of our local fixed-line customers subscribed to alternative plans.

Under our fixed-line rate plans, we charge for calls on a per-minute basis. There is a minimum charge period of 30 seconds for every call. However, calls of three seconds or less are not charged, except in certain specific instances as provided for in ANATEL regulations.

Table of Contents

On an annual basis, ANATEL increases or decreases the maximum rates that we are permitted to charge for our basic service plans. ANATEL increased the rates that we and Telemar may charge by an average of 0.66% as of October 23, 2010, 1.97% as of December 24, 2011 and 0.55% as of February 8, 2013. In addition, we are authorized to adjust the rates applicable to our alternative plans annually by no more than the rate of inflation, as measured by the IST. Discounts from the rates set in basic service plans and alternative service plans may be granted to customers without ANATEL approval.

Local Fixed Line-to-Mobile Rates

When one of our fixed-line customers makes a call to a mobile subscriber of our company or another mobile services provider that terminates in the mobile registration area in which the call was originated, we charge our fixed-line customer per-minute charges for the duration of the call based on rates designated by ANATEL as VC-1 rates. In turn, we pay the mobile services provider a per-minute charge based on rates designated by ANATEL as VU-M rates for the use of its mobile network in completing the call. VC-1 rates vary depending on the time of the day and day of the week, and are applied on a per-minute basis.

On an annual basis, ANATEL may increase or decrease the maximum VC-1 rates that we are permitted to charge. ANATEL authorized our company and Telemar to increase our VC-1 rates by an average 0.98% as of February 9, 2010. Discounts from the VC-1 rates approved by ANATEL may be granted to customers without ANATEL approval. In November 2011, ANATEL adopted new regulations under which ANATEL was authorized to reduce the then-current VC-1 rates by as much as 18% in 2011, 12% in 2012 and 10% in 2013, after giving effect to an inflation adjustment based on the IST measured from June 2009. In February 2012, ANATEL ordered us to reduce our VC-1 rates by approximately 10%, although we are appealing the timing of the application of this rate decrease to our company as our VC-1 rate was increased in Region I by 1.54% in accordance with our application for this increase in February 2012. In March 2013, ANATEL reduced our VC-1 rates in Region I and Region II by approximately 18.6% and 8%, respectively.

Domestic Long-Distance Rates

Fixed Line-to-Fixed-Line

If a caller selects one of our carrier selection codes for a long-distance call that originates and terminates on fixed-line telephones, we receive the revenues from the call and must pay interconnection fees to the service providers that operate the networks on which the call originates and terminates. Rates for these long-distance calls are based on the physical distance separating callers (which are categorized by four distance ranges), time of the day and day of the week, and are applied on a per-minute basis for the duration of the call. Rates on these calls are applied on a per-minute basis.

On an annual basis, ANATEL increases or decreases the maximum domestic fixed line-to-fixed line long-distance rates that we are permitted to charge. ANATEL increased the rates that our company and Telemar may charge by an average of 0.66% as of October 23, 2010, 1.97% as of December 24, 2011 and 0.55% as of February 8, 2013. Discounts from the domestic fixed line-to-fixed line long-distance rates approved by ANATEL may be granted to customers without ANATEL approval.

Mobile Long-Distance

Rates for long-distance calls that originate or terminate on mobile telephones are based on whether the call is an intrasectorial long-distance call, which is charged at rates designated by ANATEL as VC-2 rates, or an intersectorial long-distance call, which is charged at rates designated by ANATEL as VC-3 rates. If the caller selects one of our carrier selection codes for the call, we receive the revenues from the call and must pay interconnection fees to the service providers that operate the networks on which the call originates and terminates. The applicable VC-2 and VC-3 rates vary depending on the time of the day and day of the week, and are applied on a per-minute basis.

On an annual basis, ANATEL may increase or decrease the maximum VC-2 and VC-3 rates we are authorized to charge. ANATEL authorized our company and Telemar to increase our VC-2 and VC-3 rates by an average of

Table of Contents

0.98% as of February 9, 2010. In November 2011, ANATEL adopted new regulations under which ANATEL was authorized to reduce the then-current VC-2 and VC-3 rates by as much as 18% in 2011, 12% in 2012 and 10% in 2013, after giving effect to an inflation adjustment based on the IST measured from June 2009. In February 2012, ANATEL ordered us to reduce our VC-2 and VC-3 rates by approximately 10%, although we are appealing the timing of the application of these rate decreases to our company as our VC-1, VC-2 and VC-3 rates were increased by 1.54% in Region I in accordance with our application for this increase in February 2012. In March 2013, ANATEL reduced our VC-2 and VC-3 rates in Region I and Region II by approximately 18.6% and 8%, respectively.

Mobile Rates

Mobile telecommunications service in Brazil, unlike in the United States, is offered on a calling-party-pays basis under which a mobile subscriber pays only for calls that he or she originates (in addition to roaming charges paid on calls made or received outside the subscriber's home registration area). A mobile subscriber receiving a collect call is also required to pay mobile usage charges.

Our revenues from mobile services consist mainly of charges for local and long-distance calls paid by our pre-paid and post-paid mobile subscribers and monthly subscription charges paid by our post-paid plan subscribers. Monthly subscription charges are based on a post-paid subscriber's service plan. If one of our mobile subscribers places or receives a call from a location outside of his or her home registration area, we are permitted to charge that customer the applicable roaming rate.

Under ANATEL regulations, TNL PCS and Oi Mobile were each required to submit a basic post-paid service plan and a basic pre-paid service plan to ANATEL for its approval. As of December 31, 2013, fewer than 1% of our mobile customers subscribed to our basic post-paid plans or our basic pre-paid plans.

In addition to the basic service plans, we are permitted to offer non-discriminatory alternative plans to the basic service plans. The rates for applicable services under these plans (*e.g.*, monthly subscription rates, charges for local and long-distance calls and roaming charges) must be submitted for ANATEL approval prior to the offering of those plans to our customers. In general, ANATEL does not raise objections to the terms of these plans. As of December 31, 2013, substantially all of our post-paid and pre-paid customers subscribed to these alternative plans.

Although subscribers of a plan cannot be forced to migrate to new plans, existing plans may be discontinued as long as all subscribers of the discontinued plan receive a notice to that effect and are allowed to migrate to new plans within six months of such notice.

We charge for all mobile calls made by our pre-paid customers, and for mobile calls made by our post-paid customers in excess of their allocated monthly number of minutes, on a per-minute basis.

Rates under our mobile plans may be adjusted annually by no more than the rate of inflation, as measured by the IST. These rate adjustments occur on the anniversary dates of the approval of the specific plans. Discounts from the rates set in basic service plans and alternative service plans may be granted to customers without ANATEL approval. The rate of inflation as measured by the IST was 4.90% in 2011, 4.77% in 2012 and 5.01% in 2013.

Network Usage (Interconnection) Rates

Fixed-Line Networks

Our revenues from the use of our local fixed-line networks consist primarily of payments on a per-minute basis, which are charged at rates designated by ANATEL as TU-RL rates, from:

long-distance service providers to complete calls terminating on our local fixed-line networks;

long-distance service providers for the transfer to their networks of calls originating on our local fixed-line networks;

Table of Contents

mobile services providers to complete calls terminating on our local fixed-line networks; and

other fixed-line service providers for local fixed-line calls that originate on their local fixed-line networks and terminate on our local fixed-line networks.

TU-RL rates vary depending on the time of the day and day of the week, and are applied on a per-minute basis. Charges for the use of our local fixed-line networks to terminate local calls originating on the network of another local fixed-line service provider are only billed and due when usage of one of our networks exceeds 55% of the total traffic registered between that network and the network of the other telecommunications service provider.

Since January 1, 2007, the TU-RL rates of Oi and Telemar have been equal to 40% of the rate included in their respective Basic Plan per Minute for a local fixed-line call, which is adjusted on an annual basis by ANATEL. As of the date of this annual report, Oi's TU-RL rate during peak hours (*i.e.*, between the hours of 9 a.m. and noon and 2 p.m. and 6 p.m. on weekdays) is R\$0.035 per minute, and Telemar's TU-RL rate during peak hours is R\$0.032 per minute. ANATEL announced that beginning in 2008, the method used to determine the TU-RL rates would be based on a cost methodology, known as long-run incremental costs. However, in October 2007, ANATEL published an official letter delaying this change until the end of 2010. In September 2010, ANATEL commenced the bidding process to engage an international consultant to assist with the development of the long-run incremental cost methodology. ANATEL has indicated that in the first quarter of 2014 it will announce rates based on a long-run incremental cost methodology that will be applicable beginning in 2016.

In May 2012, ANATEL adopted revisions to the regulations relating to TU-RL rates that became effective in August 2012. Under the revised regulations (1) between August of 2012 and December of 2013, fixed-line service providers will be able to charge other fixed-line service providers for local fixed-line calls originating on their local fixed-line networks and terminating on the other provider's local fixed-line networks only if the outgoing traffic in a given direction of transmission is higher than 75% of the total traffic between such providers, and (2) beginning in January 2014, fixed-line service providers will no longer be able to charge other fixed-line service providers for local fixed-line calls originating on their local fixed-line networks and terminating on the other provider's local fixed-line networks.

Our revenues from the use of our long-distance networks consist primarily of payments on a per-minute basis, which are charged at rates designated by ANATEL as TU-RIU rates, from other long-distance carriers that use a portion of our long-distance networks to complete calls initiated by callers that have not selected us as the long-distance provider.

TU-RIU rates vary depending on the time of the day and day of the week, and are applied on a per-minute basis. From January 1, 2007 through July 31, 2012, the TU-RIU rates of Oi and Telemar were equal to 30% of their respective domestic fixed line-to-fixed line long-distance rates for calls of more than 300 km, which are typically adjusted on an annual basis by ANATEL. From August 1, 2012 through December 31, 2012, the TU-RIU rates of Oi and Telemar were equal to 25% of their respective domestic fixed line-to-fixed line long-distance rates for such calls. Since January 1, 2013, the TU-RIU rates of Oi and Telemar have been equal to 20% of their respective domestic fixed line-to-fixed line long-distance rates for such calls. See [Local Fixed-Line Rates Domestic Long-Distance Rates Fixed Line-To-Fixed Line](#). As of the date of this annual report, Oi's TU-RIU rate is R\$0.071 per minute and Telemar's TU-RIU rate is R\$0.075 per minute.

Mobile Networks

Our revenues from the use of our mobile networks consist primarily of payments on a per-minute basis from (1) local fixed-line, long-distance and mobile services providers to complete calls terminating on our mobile networks, and (2) long-distance service providers for the transfer to their networks of calls originating on our mobile networks.

The terms and conditions of interconnection to our mobile networks, including the rates charged to terminate calls on these mobile networks, which are designated by ANATEL as VU-M rates, commercial conditions and technical issues, are freely negotiated between us and other mobile and fixed-line telecommunications service providers, subject to compliance with regulations established by ANATEL relating to traffic capacity and

Table of Contents

interconnection infrastructure that must be made available to requesting providers, among other things. We must offer the same VU-M rates to all requesting service providers on a nondiscriminatory basis. We apply VU-M charges on a per-minute basis.

If we are not able to establish interconnection rates for use of our mobile networks with other mobile and fixed-line telecommunications service providers, ANATEL is empowered to arbitrate, at its discretion, the interconnection rates that we may charge. In January 2010, ANATEL set provisional reference rates for each mobile services provider for each region based on the mean VU-M previously charged by that mobile services provider in the applicable service region. In February 2010, ANATEL authorized an increase of 0.67% in the VU-M rates of our company and Telemar, equivalent to 68.5% of the increase in our VC-1 rates granted at that time.

In November 2011, ANATEL adopted new regulations that provided procedures under which ANATEL adopted a maximum VU-M rate that is applicable in the event that providers cannot agree upon the VU-M applicable in their interconnection agreements. Under the General Plan on Competition Targets, in February 2014 the VU-M rate was reduced to 75% of the maximum VU-M rate established by ANATEL in December 2013, and in February 2015 will be reduced to 50% of the maximum VU-M rate established for 2013. The maximum VU-M rate established by ANATEL is R\$0.33 per minute.

Data Transmission Rates

Broadband services, IP services and frame relay services are deemed to be value-added services under ANATEL regulations and, therefore, the rates and prices for these services are not subject to regulation and are market-driven. We offer broadband services subscriptions at prices that vary depending on the download speeds available under the purchased subscription.

A significant portion of our revenues from commercial data transmission services are generated by monthly charges for EILD and SLD services, which are based on contractual arrangements for the use of part of our networks. Under ANATEL regulations, because we are deemed to have significant market power in the fixed-line services business, we are required to make publicly available the forms of agreements that we use for EILD and SLD services, including the applicable rates, and are only permitted to offer these services under these forms of agreements. We are allowed to increase these rates on an annual basis by no more than the rate of inflation, as measured by the IST. ANATEL also publishes reference rates for these services and if one of our customers objects to the rates that we charge for these services, that customer is entitled to seek to reduce the applicable rate through arbitration before ANATEL.

Our revenue from IP services is based on the number of data ports to which the customer is granted access. Our revenue from frame relay services consists mainly of charges for access to the data transmission network and metered service charges based on the amount of data transmitted. Such services are offered as pay-per-use or volume-based packages. Our revenue from cyber data center services is generally based on contractual arrangements that are tailored to the specific services provided.

DTH and IP TV Services Rates

DTH and IP TV services are deemed to be value-added services under ANATEL regulations and, therefore, the rates and prices for these services are not subject to regulation and are market-driven. We offer DTH and IP TV subscriptions at prices that vary depending on the content of the subscription package. We offer basic subscription packages for our *Oi TV* services, as well as a variety of premium packages which allow subscribers to tailor the content that they receive to their individual tastes.

Marketing

In 2013, we incurred R\$556.5 million in marketing expenses, primarily to:

strengthen the *Oi* brand, reinforcing the image of the convergence of the integrated company;

Table of Contents

promote our bundled plans, such as *Oi Internet Total*, *Oi Fixo + Oi Velox + Oi TV* and *Fixo Ilimitado + Pré Ilimitado* as part of our effort to expand and strengthen our customer base;

expand our *Oi TV* customer base with offers through our other services;

promote our pre-paid mobile services through a promotional campaign that awards prizes to new and existing customers who recharge their Oi SIM cards;

promote our post-paid mobile plans, primarily those that include unlimited calls and 3G data services at higher speeds, through specific marketing campaigns and mobile device subsidies for customers who subscribe to our post-paid plans, as part of our effort to increase our market share in mobile services; and

expand our broadband and 3G internet customer base, focusing on geographic regions covered by the National Broadband Plan.

Throughout 2013, we focused our marketing efforts on three types of customers: (1) retail customers, including mobile telephone and residential fixed-line customers; (2) SMEs; and (3) corporate customers.

We advertise through a diverse array of media outlets as part of our strategy to reach all types and classes of customers and potential customers. We use television, radio, billboards, exterior signage, telemarketing, direct mail and internet advertising to market our fixed-line, mobile, long-distance, broadband and subscription television services. We use our branded fixed assets in advertising campaigns, such as the *Orelhão Mágico* Christmas campaign, in which children are able to place calls to Santa Claus from our telephone booths. We also sponsor sporting events and individual athletes, as well as cultural events, such as fashion shows and popular music concerts. We are the official telecom provider and a sponsor of the 2014 World Cup in Brazil. The goal of our marketing initiatives is to increase brand awareness of our company as a convergent provider capable of meeting all of the telecommunications needs of our customers and expand the use of our distribution channels to increase net operating revenue.

Distribution Channels

During the last months of 2011, we revised our distribution model and now distribute our services through channels focused on three separate sectors of the telecommunications services market: (1) residential customers, including customers of our mobile services to whom we sell bundled plans; (2) personal mobility customers that purchase our mobile services independently of our bundled plans; and (3) business and corporate customers.

Residential Customers

Our distribution channels for residential customers are focused on sales of fixed-line services, including voice, *Oi Velox* and *Oi TV*, and post-paid mobile services. As part of the restructuring of our distribution channels, we have begun to provide more extensive training to our employees and the employees of third-party sales agents and have revised our commission structures to incentivize sales of plans and services that generate higher average revenue per user. As of December 31, 2013, the principal distribution channels that we used for sales to residential customers were:

our own network of stores, which we began opening in 2011. As of December 31, 2013, we had opened 189 *Oi* branded stores and expect to open additional *Oi* branded stores during 2014.

approximately 500 *Oi* franchised service stores and kiosks located in the largest shopping malls and other high density areas throughout Brazil.

approximately 350 stores located throughout our service area that primarily sell telecommunications products and services and have entered into exclusivity agreements with us.

Table of Contents

our telemarketing sales channel, which is operated by our call center and other third-party agents and consists of approximately 1,100 sales representatives that answer more than 1.0 million calls per month. This channel provides us with the ability to pro-actively reach new customers, thereby increasing our client base and revenues, and also receives calls prompted by our offers made in numerous types of media.

our teleagents channel, which consists of approximately 600 local sales agents that operate in specific regions and complement our telemarketers.

door-to-door sales calls made by our sales force of approximately 500 salespeople and by exclusive agents with approximately 3,400 salespeople trained to sell our services throughout Brazil in places where customers generally are not reachable by telemarketing.

our e-commerce sites through which customers may purchase a variety of our services.

Personal Mobility

Our distribution channels for personal mobility customers are focused on sales of mobile services to post-paid customers and pre-paid customers, including mobile broadband customers. As part of the restructuring of our distribution channels, our distribution channels for our post-paid personal mobility services have converged with our distribution channels for residential services. As of December 31, 2013, the principal distribution channels that we used for sales of our pre-paid personal mobility services were:

approximately 9,100 stores that are part of large national chains which sell our SIM cards and pre-paid mobile cards.

approximately 40 multibrand distributors that distribute our SIM cards and pre-paid mobile cards to approximately 184,000 pharmacies, supermarkets, newsstands and similar outlets.

our website, through which our pre-paid customers may recharge their SIM cards.

Business and Corporate Customers

We have established separate distribution channels to serve small and medium-sized enterprise, or SMEs, and large enterprises, or corporate customers. We market a variety of services to SMEs, including our core fixed-line and mobile services, and our higher-value added services, such as broadband services, voice, text and data applications, advanced voice services and commercial data transmission services. As part of the restructuring of our distribution channels, in 2012 we opened nine regional offices from which approximately 250 employees supervise our marketing efforts to SMEs and our third-party sales force serving this sector. We also have begun to provide more extensive training to our employees and the employees of third-party sales agents. As of December 30, 2013, the principal distribution channels that we use to market our services to SMEs were:

approximately 200 *Oi* exclusive agents with approximately 3,000 door-to-door sales consultants that are dedicated to understanding and addressing the communications needs of our existing and prospective SME customers.

our telemarketing sales channel, which consists of 14 agents that use approximately 600 sales representatives that are specifically trained to discuss the business needs of our prospective SME customers to make sales calls, as well as representatives in our call center and representatives at call centers under contract with us to receive calls from existing and prospective SME customers to sell services to new customers and promote higher-value and additional services to existing customers. In addition, our telemarketing channel utilizes approximately 480 customer retention representatives.

Edgar Filing: OI S.A. - Form 20-F

We market our entire range of services to corporate customers through our own direct sales force which meets with current and prospective corporate customers to discuss the business needs of these enterprises and design solutions intended to address their communications needs. As part of the restructuring of our distribution channels,

Table of Contents

in 2012 we redesigned our client service model to increase our focus on post-sale service, regularly discussing service needs and improvements with our customers through calls and meetings with our customers. As of December 31, 2013, our corporate sales team, including post-sale service personnel, was composed of approximately 1,000 employees operating in six regional offices.

Billing and Collection

Fixed-Line Telephone Services

We send each of our fixed-line customers a monthly bill covering all the services provided during the prior monthly period. Customers are grouped in billing cycles based on the date their bills are issued. Each bill separately itemizes local calls, long-distance calls, calls terminating on a mobile network, toll-free services and other services such as call waiting, voicemail and call forwarding. We have agreements with several banks for the receipt and processing of payments from our customers. A variety of businesses, such as lottery houses, drugstores and grocery stores, accept payments from our customers as agents for these banks.

We are required to include in our monthly bills charges incurred by our customers for long-distance services provided by other long-distance service providers upon the request of these providers. We have billing agreements with each long-distance telecommunications service provider that interconnects with our networks under which we bill our customers for any long-distance calls originated on our network that are carried by another long-distance service provider and transfer the balance to the relevant provider after deducting any access fees due for the use of our network. Payments are due within an average of 15 days after the billing date. We charge late-payment interest at a rate of 1% per month plus a one-time late charge of 2% of the amount outstanding. As of December 31, 2013, 10.3% of all accounts receivable due from our fixed-line customers were outstanding for more than 30 days and 5.0% were outstanding for more than 90 days.

ANATEL regulations permit us to restrict outgoing calls made by a fixed-line customer when the customer's account is more than 31 days past due, restrict incoming calls received by a fixed-line customer when the customer's account is more than 61 days past due, and disconnect a fixed-line customer when the customer's account is more than 91 days past due, provided in each case that 15-days' prior notice has been given to that customer prior to the imposition of each restriction. The disconnection process thus comprises several stages, including customer notification regarding the referral of their delinquency to credit bureaus, before the fixed-line customer may be ultimately disconnected due to non-payment. Notices range from voice messages to active calls for negotiation with the customer. Our collection system enables us to access delinquent subscribers' accounts according to their payment profile. This profile takes into consideration, among other things, the length of subscription, the outstanding balance of the account and the longest payment delays.

Mobile Telecommunications Services

We bill our mobile post-paid customers on a monthly basis and itemize charges in the same manner as we bill our fixed-line customers. See Fixed-Line Telephone Services. In addition, the monthly bills also provide details regarding minutes used and roaming charges. Payments are due within an average of 15 days after the billing date. We charge late-payment interest at a rate of 1% per month plus a one-time late charge of 2% of the amount outstanding. As of December 31, 2013, 9.4% of all accounts receivable due from our mobile customers were outstanding for more than 30 days and 4.9% were outstanding for more than 90 days.

ANATEL regulations permit us to partially suspend services to a mobile customer when the customer's account is more than 15 days past due, restrict all incoming calls received and outgoing calls made by a mobile customer when the customer's account is more than 45 days past due, and cancel services to a mobile customer when the customer's account is more than 90 days past due, provided in each case that 15-days' prior notice has been given to that customer prior to the imposition of each restriction. The cancellation process thus comprises several stages, including customer notification regarding the referral of their delinquency to credit bureaus, before services to the mobile customer may be ultimately cancelled due to non-payment. Notices range from text messages to active calls for negotiation with the customer. Our collection system enables us to access delinquent subscribers' accounts according to their payment profile. This profile takes into consideration, among other things, the length of subscription, the outstanding balance of the account and the longest payment delays. We have also implemented an

Table of Contents

information tool to assist with account management that is designed to warn subscribers of high outstanding amounts due and unpaid.

Network and Facilities

Our networks are comprised of physical and logical infrastructures through which we provide fully-integrated services, whether fixed-line or mobile, voice, data or image, thereby optimizing available resources. We monitor our networks remotely from our centralized national network operations center in Rio de Janeiro. Network operating and configuration platforms, located at the network operations center, perform failure monitoring, database and configuration management, security management and performance analysis for the each network.

Access Networks

Our access networks connect our customers to our signal aggregation and transportation networks. We have a large number of network access points, including twisted copper pair wires to residences and commercial buildings, fiber optic lines to residences and commercial buildings, wireless transmission equipment and WiFi hotspots. Our fixed-line networks are fully digitalized.

Voice and data signals that originate through fixed-line access points are routed through Multi-service Access Nodes, or MSANs, to our aggregation networks, or are rerouted to our aggregation networks through Digital Subscriber Line Access Multiplexer, or DSLAM, equipment which split the voice signal from the digital signal which is transmitted using ADSL or VDSL technology. We are engaged in a long-term program to update our MSAN equipment to DSLAM equipment as demand for data services increases. As of December 31, 2013, approximately 32.0% of our fixed-line network had been updated to support ADSL2+ or VDSL2 and we provided ADSL or VDSL2 services in 4,703 municipalities.

ADSL technology allows high-speed transmission of voice and data signals on a single copper wire pair for access to the network. Since voice transmission through telephone lines uses only one of many available frequency bands, the remaining frequency bands are available for data transmission. Our network supports ADSL2+ and VDSL2, or very-high-bitrate digital subscriber line, technologies. ADSL2+ is a data communications technology that allows data transmission at speeds of up to 24 Mbps downstream and 1 Mbps upstream, which is much faster than data transmission through conventional ADSL. ADSL2+ permits us to offer a wider range of services than ADSL, including IP TV. VDSL2 is a DSL technology providing faster data transmission, up to 100 Mbps (downstream and upstream), permitting us to support high bandwidth applications such as HDTV, Voice over Internet Protocol, or VoIP, and broadband internet access, over a single connection.

We are engaged in a long-term program to upgrade portions of our fixed-line access networks with optical fiber networks based on gigabit passive optical network, or GPON, technology to support VDSL2 service and facilitate our offering of our *Oi TV* service. The implementation of this technology permits us to provide broadband with speeds up to 100 Mbps to residential customers and up to 1 Gbps to commercial customers.

For our non-residential customers, we have a fully integrated and managed network providing access for networks based on internet protocol, or IP, and Asynchronous Transfer Mode, or ATM, protocol over legacy copper wire through which are able to provide:

symmetric and transparent access to Frame Relay services at speeds from 64 kbps to 1.5 Mbps;

symmetrical access with PPP (Point to Point) for the Internet connection services at speeds from 64 kbps to 1.5 Mbps; and

symmetrical access with PPP (Point to Point) to provide connection services for virtual private networks, or VPNs, through Multiprotocol Label Switching, or MPLS, protocol at speeds from 64 kbps to 1.5 Mbps.

Table of Contents

The following table sets forth selected information about our fixed-line networks as of the dates and for the periods indicated.

	As of and For Year Ended December 31,		
	2013	2012	2011
Region I:			
Installed access lines (in millions)	17.7	17.7	17.8
Access lines in service (in millions)	11.2	11.3	10.6
Public telephones in service (in thousands)	451.6	489.6	504.3
Broadband access lines in service (in millions)	3.7	3.5	2.9
Region II:			
Installed access lines (in millions)	10.6	10.6	10.4
Access lines in service (in millions)	6.5	6.5	6.8
Public telephones in service (in thousands)	204.0	237.9	265.0
Broadband access lines in service (in millions)	2.4	2.3	2.1

Mobile devices access our GSM (Global System for Mobile Communications), or 2G, mobile networks on frequencies of 900 MHz/1800 MHz, our 3G mobile networks on frequencies of 2100 MHz and our 4G mobile networks on frequencies of 2500 MHz. Our 2G access points use General Packet Radio Service, or GPRS, which allows speeds in the range of 115 kilobytes per second (Kbps), and Enhanced Data Rates for Global Evolution, or EDGE, which allows speeds in the range of 230 Kbps, to send and receive data signals. Our 3G access points use high speed packet access, or HSPA, which allows speeds in the range of 14.2 Mbps, to send and receive data signals. Our 4G access points use 10+10 MHz and 2x2 Multiple Input Multiple Output, which allows speeds in the range of 75 Mbps, to send and receive data signals. Voice and data signals sent and received through our 2G and 3G access points are routed to our aggregation networks. Our mobile networks have unique data core and are fully integrated with our fixed-line data networks.

As of December 31, 2013, our 2G mobile access networks, consisting of 13,624 active radio base stations, covered 1,504 municipalities in Region I, or 88.2% of the urban population in Region I, 1,288 municipalities in Region II, or 96.1% of the urban population in Region II, and 553 municipalities in Region III, or 99.5% of the urban population in Region III. We have GPRS coverage in 100% of the localities covered and EDGE coverage in all state capitals.

As of December 31, 2013, our 3G mobile access networks, consisting of 8,305 active radio base stations, covered 411 municipalities in Region I, or 70.8% of the urban population in Region I, 291 municipalities in Region II, or 76.2% of the urban population in Region II, and 189 municipalities in Region III, or 87.0% of the urban population in Region III. We have HSPA coverage in all state capitals.

In the fourth quarter of 2012, we began deploying our 2.1 GHz mobile access networks to support 4G service in cities scheduled to host the 2014 World Cup. As of December 31, 2013, our 4G access networks covered 24 municipalities, including the 12 cities hosting the 2014 World Cup, and we expect that they will cover 45 cities by the end of the second quarter of 2014.

In addition to these mobile access networks, we also operate WiFi hotspots in public areas such as coffee shops, airports and shopping centers. Since 2012, we have provided outdoor urban wireless networks, including in the neighborhoods of Copacabana and Ipanema in the city of Rio de Janeiro. As of December 31, 2013, our WiFi network consisted of approximately 523,000 hotspots. We have also begun to offer broadband access compatible with approximately 521,000 access points provided by Fon Wireless Ltd., or Fon, which allows our customers to access Fon lines worldwide.

Table of Contents

Aggregation Networks

Voice and data signals sent through our access network are routed through our aggregation networks to digital switches which connect voice calls and route digital signals to their destinations. Portions of our aggregation network use conventional copper trunk lines to connect our access network to our switches and transportation networks. We use ATM protocol to permit high speed transmission of these signals. Other portions of our aggregation network use fiber optic cable to connect our access network to our switches and transportation networks using Synchronous Digital Hierarchy, or SDH, protocol. In large metropolitan areas where the density of access point results in increased demand, we have deployed Metro Ethernet networks. We are currently deploying Metro Ethernet networks in additional cities to serve rising customer demand. Our Metro Ethernet networks are fully-integrated management systems and provide:

ethernet data services from 4 Mbps up to 1 Gbps for point-to-point and multipoint dedicated access;

ethernet access services from 4 Mbps up to 1 Gbps for IP access and MPLS/VPN access;

aggregation network services for ADSL2+ and VDSL2 platforms;

aggregation network services for GPON platforms; and

DWDM systems for services above 1Gbps to prevent overbooking our Metro Ethernet network.

Historically, we have used ATM protocol to transport digital signals through our access network from non-residential customers that require dedicated bandwidth to our switching stations. Our ATM networks have a fully-integrated management system and provide:

frame relay data services (a data transmission service using fast protocols based on direct use of transmission lines) from 64 Kbps up to 2 Mbps;

ATM data services supporting access rates from 2 Mbps to 622 Mbps; and

aggregation network services for ADSL2+ platforms.

In response to changing customer needs, we converting elements of our network that use ATM and SDH protocols, that permit us to offer dedicated bandwidth to our customers, to MPLS protocol, which supports IP and permits the creation of VPNs through our MetroEthernet networks.

We have begun to use MPLS-TP capable devices that have been designed to interface with our existing Metro Ethernet Network to increase the bandwidth of our networks to support our 4G network data traffic and replace our legacy SDH networks.

Transportation Networks

Our long-distance transportation network consists of optical fiber cable networks supporting high capacity Dense Wavelength Division Multiplex, or DWDM, systems that can operate with up to 80 channels at 10 and 40 Gbps. Currently We are in the process of quadrupling the capacity of our backbone as a result of the deployment of 40 Gbps optical technology. In 2013, we implemented DWDM links of 100 Gbps between Rio de Janeiro, São Paulo, Belo Horizonte and Salvador. Our optical cable network is complemented by microwave links that we use in Region I and Region II. We have a nationwide long-distance backbone, consisting of an optical fiber network that connects the Federal District and the state capitals in Region I and Region II, other than Macapá (located in the State of Amapá) and is complimented by our satellite system. We expect that our optical fiber network will reach Macapá in the first half of 2014. Most of the large urban areas of Regions I and II are also

connected by our fiber optic cable networks. Our transmission infrastructure connects our digital switches to four international gateway switches: two in Rio de Janeiro, one in Curitiba and one in Brasília.

Table of Contents

We employ automatic traffic protection to improve the reliability of our network and increase its traffic capacity. The network is fully supervised and operated by management systems that allow rapid response to customer service requests and reduce the recovery time in case of failures.

We operate an internet backbone network and a fully IP-routed network, which provides a backbone for all internet dedicated services and VPN offerings. Our internet backbone connects to the public internet via international links that we maintain abroad.

We have implemented an address control and name resolution system for our IP networks with the objective of optimizing resources and improving the availability of internet access services.

Our transportation network is directly interconnected to the national and international long-distance networks of all long-distance service providers operating in Regions I, II and III and all mobile services providers in Regions I, II and III.

Satellite Network

We have deployed an expanded range of satellite-based services to comply with our public service obligations to the rural and remote areas of Brazil, including the Amazon rainforest region. These satellite services include internet access and access to corporate data applications. As of December 31, 2013, our satellite network covered approximately 5,165 localities in 24 states and the Federal District and provided voice and data services to approximately 6.8 million customers.

In 2000, we began the implementation of the land-based segment of our respective satellite networks in order to extend transmission to remote areas in the states of Acre, Paraná, Rondônia, Rio Grande do Sul, Santa Catarina, Pará, Amazonas, Amapá and Roraima, as well as to other areas with limited access to telecommunications services due to geographical conditions, such as Mato Grosso, Mato Grosso do Sul, Goiás and Tocantins. The satellite network comprises satellite earth stations located in less-populated rural areas, as well as hub stations in the cities of Brasília, Manaus, Boa Vista, Macapá, Belém, Santarém, Marabá, Rio de Janeiro, Curitiba, Porto Alegre, Florianópolis, Cuiabá, Porto Velho and Goiânia. These satellite networks use digital technology and began operating in August 2000. The fiber optic and satellite backbones are interconnected in Brasília, Belém, Fortaleza, Rio de Janeiro, Curitiba, Porto Alegre, Florianópolis, Cuiabá, Porto Velho and Goiânia. The integration of the land-based segment of our satellite network allows us to service our subscribers in any location in Regions I and II.

Hispar Satellite S.A., or Hispar, a Spanish-Brazilian consortium created in November 1999 by Hispasat (the leading satellite telecommunications provider in the Iberian Peninsula), and our company operate the Amazonas 1 satellite, which was manufactured by Astrium (EADS Space Company). In December 2002, we entered into an agreement with Hispasat that granted and transferred to Hispar the rights to exploit geostationary orbital position 61 degrees west, and we acquired a minority equity stake in Hispar. The Amazonas 1 satellite was launched into geostationary orbit over the Americas and started to operate in November 2004. The Amazonas 1 satellite provides both C and KU band transponders and on-board switching. The Amazonas 1 satellite is owned by a subsidiary of Hispasat and Hispar has been granted the right to operate and lease all of the transponder space on this satellite.

In 2009, the Amazonas 2 satellite was launched and this satellite commenced commercial operations in early 2010. The Amazonas 2 satellite was manufactured by Astrium and launched into geostationary orbit of 61 degrees West. This satellite provides both C and KU band transponders and on-board switching, with an expected useful life of 15 years. The Amazonas 2 satellite is owned by a subsidiary of Hispasat and Hispar has been granted the right to operate and lease all of the transponder space segment on this satellite.

Table of Contents

In 2013, the Amazonas 3 satellite was launched to replace all traffic from Amazonas 1 satellite, which had reached the end of its useful life.

We lease transponders from:

Hisparmar with 754 MHz of capacity, in the C band, on the Amazonas 3 satellite and 540 MHz of capacity in the C band on the Amazonas 2 satellite to provide voice and data services through 653 remote switches covering 390 municipalities;

Hisparmar with 98.3 Mhz of capacity, in the KU band, on the Amazonas 3 satellite and 576 Mhz of capacity in the KU band on the Amazonas 2 satellite to provide voice and data services to approximately 3,028 localities;

Intelsat Satellite with 122 MHz of capacity, in the C band, on the IS-805 satellite and 648 MHz of capacity in the C band on the IS 10-02 satellite to transport voice and data signals from Manaus to Rio de Janeiro;

SES New Skies with 108 MHz of capacity, in the KU band, on the SES-4 satellite to provide voice and data services throughout Brazil;

Intelsat Satellite with 103 MHz of capacity, in the C band, on the IS-905 satellite to transport voice and data signals from Macapá to Rio de Janeiro and Boa Vista to Rio de Janeiro; and

SES New Skies with 1.5 GHz of capacity, in the KU-band, on the SES-6 satellite to provide our own head-end DTH services within Brazil.

In 2005, we and Telemar started to operate gateways satellite platforms operating in the KU band that are comprised of a satellite transport solution with Digital Video Broadcast Return Channel Satellite, or DVB-RCS, technology and an NGN control solution.

DTH Network

We provide our DTH services through a satellite uplink located in Lurin, Peru which receives, encodes and transmits the television signals to satellite transponders. We lease these facilities and license the related technology from Telefónica.

We lease transponders for the delivery of the television signals to our subscribers from Telefónica. We have leased 216 Mhz of capacity in the KU band on the Amazonas 1 satellite and 36 Mhz of capacity in the KU band on the Amazonas 2 satellite to provide DTH services.

Our customers lease satellite dishes and set-top boxes from us as part of their subscriptions to our *Oi TV* services.

HFC Network

We provide subscription analog and digital television services and broadband internet access to the residential and commercial market segments in the cities of Belo Horizonte, Poços de Caldas, Uberlândia and Barbacena using an HFC network. The analog television signal is distributed from integrated headend equipment owned by Cemig Telecom that is located in these cities. The digital television signal is distributed to the HFC network in Belo Horizonte from our integrated headend equipment located in Alvorada in the city of Rio de Janeiro.

Network Maintenance

Our external plant and equipment maintenance, installation and network servicing are performed by third-party service providers. We employ our own team of technicians for the maintenance of our internal plant and equipment.

Table of Contents

In January 2012, we entered into a services agreement with Telemont for installation, operation, and corrective and preventive maintenance in connection with our external plant and associated equipment, public telephones, and fiber optic and data communication networks (including broadband access services) in the State of Rio de Janeiro. In October 2012 we entered into a substantially a similar services agreement with Telemont with respect to the States of Minas Gerais, Espírito Santo, Mato Grosso, Mato Grosso do Sul, Tocantins, Acre, Rondônia and Goiás and the Federal District. The total estimated payments during the five-year terms of these contracts are expected to be R\$6.6 billion.

In January 2012, we entered into a services agreement with Serede Serviços de Rede S/A for installation, operation, and corrective and preventive maintenance in connection with our external plant and associated equipment, public telephones and fiber optic in the State of Rio de Janeiro. The total estimated payments under this contract are R\$1.4 billion during the five-year term of this contract.

In October 2012, we entered into a services agreement with A.R.M. Engenharia for installation, operation, and corrective and preventive maintenance in connection with our external plant and associated equipment, public telephones, and fiber optic and data communication networks (including broadband access services) in the States of Maranhão, Piauí, Ceará, Rio Grande do Norte, Paraíba, Pernambuco, Alagoas, Sergipe, Bahia, Amazonas, Roraima, Pará, Amapá, Paraná, Santa Catarina and Rio Grande do Sul. The total estimated payments under this contract are R\$6.3 billion during the five-year term of this contract.

From May 2013 to June 2013, we internalized our installation, operations, and corrective and preventive maintenance services in connection with our fixed-line telecommunications services, mobile telecommunications services, data transmission services (including broadband access services), satellite services, buildings, access ways and towers. These services had previously been provided by Nokia Solutions and Alcatel-Lucent.

Competition

Our industry is highly competitive. The competitive environment is significantly affected by key trends, including technological and service convergence, market consolidation and combined service offerings by service providers. See Item 5. Operating and Financial Review and Prospects Principal Factors Affecting Our Financial Condition and Results of Operations Effects of Competition on the Rates that We Realize and the Discounts We Record.

Local Fixed-Line Services

In the local fixed-line telecommunications services market, competition has historically been focused on corporate customers, however, recently our competitors have begun compete in the consumer market with bundles or services targeted to the needs of lower income customers. In addition, competition from other telecommunications services has been increasing, particularly from mobile telecommunications services, which has led to traffic migration from fixed-line traffic to mobile traffic and the substitution of mobile services in place of fixed-line services, encouraged by offers of aggressively-priced packages from some mobile telecommunications service providers. Finally, the decrease in interconnection rates has discouraged the construction of new fixed-line networks and has led to decreases in market prices for telecommunications services by enabling telecommunications service providers that use the local fixed-line networks of incumbent fixed-line providers to offer lower prices to their customers.

We are the leading provider of local fixed-line services in Regions I and II with 11.6 million fixed lines in service in Region I and 6.7 million fixed lines in service in Region II as of December 31, 2013. Based on the most recent information available from ANATEL, as of April 30, 2013, we had an estimated market share of 67.8% of the total fixed lines in service in Region I and an estimated market share of 62.4% of the total fixed lines in service in Region II. Our principal competitors for fixed-line services are (1) Embratel (a subsidiary of América Móvil), which had an estimated market share of 20.3% of the total fixed lines in service in Region I and an estimated market share of 13.0% of the total fixed lines in service in Region II as of April 30, 2013, based on the most recent information available from ANATEL, and (2) GVT (an affiliate of Vivendi S.A.), which had an estimated market share of 6.9% of the total fixed lines in service in Region I and an estimated market share of 20.7% of the total fixed lines in service in Region II as of April 30, 2013, based on the most recent information available from ANATEL.

Table of Contents

Embratel provides local fixed-line services to residential customers through fixed devices that receive wireless signals from a single transmission tower located near the subscriber's residence and through the cable network owned by its subsidiary Net in the portions of Regions I and II where Net provides cable television service. As a result, Net is able to offer cable television, broadband and telephone services as a bundle at a very competitive price. We also expect competition from Embratel to increase in certain large cities, such as Rio de Janeiro, Belo Horizonte and Salvador, where it continues to expand its local fixed-line network.

GVT has been increasing its competitive activities in Regions I and II, expanding its fiber optic network in high-income residential areas and increasing its services to low- and medium-size businesses. We expect competition from GVT to increase in certain large cities, such as Rio de Janeiro, Belo Horizonte and Salvador, and in some medium size cities with population in the range of 350,000 to 1,000,000, where GVT continues to expand its local fixed-line network.

We expect to continue to face competition from mobile services providers, which represent the main source of competition in the local fixed-line service market. As of December 31, 2013, there were 137.4 million mobile subscribers (including our mobile customers) in Region I, an 3.91% increase over December 31, 2012, and there were 68.3 million mobile subscribers (including our mobile customers) in Region II, a 2.70% increase over December 31, 2012, based on information available from ANATEL. The increase in the number of mobile users, in addition to reduced mobile services rates, is expected to continue to adversely affect the number of fixed-line subscribers and the volume of local fixed-line traffic. In addition, because mobile providers offer promotions and service plans that permit subscribers to make calls within the mobile provider's network at rates that are less than those charged for calls from a fixed-line telephone to a mobile telephone, we believe that we may be vulnerable to traffic migration as customers with both fixed-line and mobile telephones use their mobile devices to make calls to other mobile subscribers.

Long-Distance Services

The long-distance services market is highly competitive. As of December 31, 2012, based on the most recent information available from ANATEL, of the total number of national long-distance minutes originated nationwide, we had a market share of 11.0%, ranking behind TIM with 50.1% and Embratel with 27.7% and ahead of Telefônica Brasil with 8.44%.

Our principal competitors for long-distance services are TIM and Embratel, which are currently offering long-distance services throughout Brazil at rates that are charged on a per call, rather than per minute, basis. As a result of our commencement of mobile services in Region III, we have also begun to compete with Telefônica Brasil, which is the incumbent fixed-line service provider in Region III.

Increased competition from long-distance service providers has resulted in pressure on our long-distance rates and adversely affected our revenue from these services. In addition, the proliferation of new types of service plans, such as same network subscription plans that offer unlimited long distance calls and data combination plans are impacting the long-distance services market in Brazil. Competition in the long-distance market may require us to increase our marketing expenses and/or provide services at lower rates than those we currently expect to charge for such services. Competition in the domestic market has had and could continue to have a material adverse effect on our revenues and margins.

In addition, the offering of plans by other mobile services providers that include free minutes for calls to other subscribers of those mobile services providers may adversely impact our revenues from mobile long-distance calls if our mobile customers migrate to our competitors to remain within the network of the people to whom they plan to place long-distance calls. However, as a result of the increased use of SIM card only strategies by other mobile service providers, there is a trend among Brazilian pre-paid customers to purchase SIM cards from multiple mobile service providers to maximize the number of calls that they can make which are covered by these promotional offers.

New technologies that serve as an alternative to traditional long-distance telephone calls, such as VoIP, may start to capture part of Brazil's long-distance traffic.

Table of Contents

Mobile Services

The mobile telecommunications services market in Brazil is characterized by intense competition among providers of mobile telecommunications services. We compete primarily with the following mobile services providers, each of which provides services throughout Brazil:

Telefônica Brasil, which is a subsidiary of Telefônica S.A, and which markets its mobile services under the brand name Vivo ;

TIM, which is a subsidiary of Telecom Italia S.p.A.; and

Claro, which is a subsidiary of América Móvil.

In December 2010, Nextel Brazil acquired licenses to provide 3G services throughout Brazil. Nextel launched commercial services on its 3G network in December 2012. Nextel's entrance in the market could increase competition for mobile services as it expands its network.

As of December 31, 2013, based on information available from ANATEL, we had a market share of 18.5% of the total number of subscribers in Brazil, ranking behind Telefônica Brasil with 28.5%, TIM with 27.1% and Claro with 25.3%, and we captured 10.5% of all net additions of mobile subscribers in Brazil (calculated based on the number of mobile subscribers at the end of a period less the number of mobile subscribers at the beginning of that period) during 2013.

Competitive efforts in the Brazilian mobile telecommunications services market generally take the form of handset subsidies in the post-paid market and traffic subsidies in both the pre-paid and post-paid market. The aggressiveness of promotions is generally driven by the desire of the provider offering the promotion to increase market share; however, these promotions generally are for a short duration as the pricing terms offered are not sustainable over the long term.

Data Transmission Services

Cable television providers that offer broadband services, particularly Net, represent our principal competition in the broadband market. We face competition from these providers that offer integrated packages, consisting of subscription television, broadband and voice telephone services to cable television subscribers who, in general, have more purchasing power than other consumers.

Our principal competitors in the commercial data transmission services market are Embratel, GVT and Telefônica Brasil. The commercial data transmission services market is significantly less regulated than the fixed-line, long-distance and mobile services markets. Along with growth in traffic volume and increasing demand for broadband capacity, we expect significant price reductions in data transmission services as competitors expand their networks. In recent years, there has been a shift in competition towards value-added services provided over IP platforms and VPN services.

Subscription Television Services

In Brazil, the high quality programming of television broadcasters has resulted in aggregate ratings for these broadcasters of approximately 90% of viewers and has limited the perceived value of subscription television. As a result, the subscription television market in Brazil has a low penetration compared to developed countries and even to other South American countries such as Argentina, Chile and Mexico. Penetration rates by subscription television have grown from 8.0% of Brazilian households in 2005 to 28.9% in 2013. According to information available from ANATEL, the Brazilian subscription television market grew by more than 9.8% in from December 31, 2012 to December 31, 2013.

The primary providers of subscription television services in Regions I and II in Brazil are, SKY, which provides DTH services, and América Móvil, which provides DTH service through Embratel under the Claro TV brand and

Table of Contents

provides subscription television services using coaxial cable through Net. We commenced offering DTH subscription television services to the low-income residential market in the states of Rio de Janeiro, Minas Gerais, Rio Grande do Sul, Paraná and Santa Catarina. In 2010, we expanded this service to the Distrito Federal and the states of Bahia, Sergipe, Pernambuco, Ceará, Paraíba, Rio Grande do Norte, Alagoas, Espírito Santo and Goiás. In 2011, we expanded this service to the remaining states of Regions I and II.

In December 2012 and January 2013, we began to deliver *Oi TV* through our fiber optic network using an internet protocol, or IP TV, in the Rio de Janeiro and Belo Horizonte, respectively. We plan to gradually expand our IP TV service to other cities.

Concessions, Authorizations and Licenses

Under the General Telecommunications Law and ANATEL regulations, the right to provide telecommunications services is granted either through a concession under the public regime or an authorization under the private regime. For additional details regarding the rights and obligations of service providers operating under the public regime and the private regime, see Regulation of the Brazilian Telecommunications Industry Concessions and Authorizations. We operate under:

a concession to provide local fixed-line services in Region I (other than the 57 municipalities in the State of Minas Gerais that are excluded from the concession area of Region I) and a concession to provide local fixed-line services in Region II (other than the nine municipalities in the States of Goiás, Mato Grosso do Sul and Paraná that are excluded from the concession area of Region II);

a concession to provide domestic long-distance services in Region I (other than the 57 municipalities in the State of Minas Gerais that are excluded from the concession area of Region I) and a concession to provide domestic long-distance services in Region II (other than the nine municipalities in the States of Goiás, Mato Grosso do Sul and Paraná that are excluded from the concession area of Region II);

authorizations to provide personal mobile services in Regions I, II and III;

radio frequency licenses to provide 3G mobile services in Regions I, II and III (other than 23 municipalities in the interior of the State of São Paulo that include the city of Franca and surrounding areas);

radio frequency licenses to provide 4G mobile services in Regions I, II and III;

authorizations to provide local fixed-line services and domestic long-distance services in (1) the 57 municipalities in the State of Minas Gerais that are excluded from the concession area of Region I, (2) the nine municipalities in the States of Goiás, Mato Grosso do Sul and Paraná that are excluded from the concession area of Region II, and (3) Region III;

authorizations to provide international long-distance services originating anywhere in Brazil;

authorizations to provide Multimedia Communication Services (*Serviço de Comunicação Multimídia*) throughout Brazil; and

an authorization to provide subscription television services throughout Brazil.

These concessions and authorizations allow us to provide specific services in designated geographic areas and set forth certain obligations with which we must comply.

Fixed-Line Services Concession Agreements

We have entered into concession agreements with ANATEL that govern our concessions to provide fixed-line services in the Federal District and each of the states of Regions I and II. Each of our concession agreements:

Table of Contents

expires on December 31, 2025;

sets forth the parameters that govern adjustments to our rates for fixed-line services;

requires us to comply with the network expansion obligations set forth in the General Plan on Universal Service;

requires us to comply with certain quality of service obligations set forth in these concession agreements as well as the quality of service obligations set forth in the General Plan on Quality Goals;

requires payment of biannual fees equal to 2.0% of our net operating revenue that is derived from the provision of local fixed-line services (excluding taxes and social contributions) during the immediately preceding year, while allowing us to apply the amount of such fees to finance the expanded service obligations created by the amended General Plan on Universal Service in lieu of making payment to ANATEL;

allows us to offer subscription television services such as IP TV, over our fixed-line networks;

requires us to implement electronic billing systems;

sets forth the conditions under which ANATEL may access information from us;

requires us to pay fines for systemic service interruptions; and

requires us to rescind our contracts if ANATEL determines they are contrary to any rules or regulations, economic order or public interest.

These concession agreements also required us to provide transmission lines connecting our fiber-optic internet backbones to municipalities in our concession areas in which we did not provide internet service, which we refer to as backhaul. Under these concession agreements, we were obligated to set up backhaul in 3,252 municipalities in Regions I and II. The facilities that we constructed to meet these obligations are considered to be property that is part of our concessions and will therefore revert to the Brazilian government on January 1, 2026.

These concession agreements provide that ANATEL may modify their terms in 2015 and 2020 and may revoke them prior to expiration under the circumstances described under Regulation of the Brazilian Telecommunications Industry Regulation of Fixed-Line Services Termination of a Concession. The modification right permits ANATEL to impose new terms and conditions in response to changes in technology, competition in the marketplace and domestic and international economic conditions. ANATEL is obligated to engage in public consultation in connection with each of these potential modifications.

For more information regarding the regulation of our fixed-line services, the General Plan on Universal Service and the General Plan on Quality Goals, see Regulation of the Brazilian Telecommunications Industry Regulation of Fixed-Line Services.

Domestic Long-Distance Services Concession Agreements

We have entered into concession agreements with ANATEL that govern our concessions to provide domestic long-distance services originating from the Federal District and each of the states of Regions I and II. Each of our concession agreements:

expires on December 31, 2025;

sets forth the parameters that govern adjustments to our rates for domestic long-distance services;

Table of Contents

requires us to comply with certain quality of service obligations set forth in these concession agreements as well as the quality of service obligations set forth in the General Plan on Quality Goals;

requires payment of biannual fees equal to 2.0% of our net operating revenue that is derived from the provision of domestic long-distance services (excluding taxes and social contributions) during the immediately preceding year;

requires us to implement electronic billing systems;

sets forth the conditions under which ANATEL may access information from us;

requires us to pay fines for systemic service interruptions; and

requires us to rescind our contracts if ANATEL determines they are contrary to any rules or regulations, economic order or public interest.

These concession agreements provide that ANATEL may further modify their terms in 2015 and 2020 and may revoke them prior to expiration under the circumstances described under Regulation of the Brazilian Telecommunications Industry Regulation of Fixed-Line Services Termination of a Concession. The modification right permits ANATEL to impose new terms and conditions in response to changes in technology, competition in the marketplace and domestic and international economic conditions. ANATEL is obligated to engage in public consultation in connection with each of these potential modifications.

For more information regarding the regulation of our fixed-line services, the General Plan on Universal Service and the General Plan on Quality Goals, see Regulation of the Brazilian Telecommunications Industry Regulation of Fixed-Line Services.

Personal Mobile Services Authorization Agreements and Radio Frequency Spectrum Licenses

We have entered into authorization agreements with ANATEL that govern our authorizations to provide personal mobile services in Regions I, II and III. These authorizations permit us to provide personal mobile services for an indeterminate period of time, but do not provide us with the right to use specific radio frequency spectrum.

We hold five licenses to use radio frequency spectrum to provide 2G services in Regions I and II and four in Region II. These licenses grant us permission to use the applicable radio spectrum for 15 years from the date of the authorization agreement under which they are granted and are renewable for additional 15-year terms. Upon renewal of any of these licenses and on every second anniversary of such renewal, we will be required to pay an amount equal to 2.0% of our prior year's net operating revenue from personal mobile services. The initial terms of our radio frequency spectrum licenses expire between 2016 and 2022.

Our authorization agreements are subject to network scope and service performance obligations set forth in these authorization agreements. Under these obligations we are required to (1) service all municipalities in Regions I and II with a population in excess of 100,000, and (2) service all municipalities in Region III with a population in excess of 200,000. In addition, by the fifth anniversary of the date of the authorization agreement for Region III, we will be required to service all municipalities in Region III with a population in excess of 100,000. A municipality is considered serviced when the covered service area contains at least 80% of the urban area in the municipality. Our failure to meet these targets may result in the imposition of penalties established in ANATEL regulations and, in extreme circumstances, in termination of our personal mobile services authorizations by ANATEL. As of the date of this annual report, we have satisfied the network scope and service performance obligations set forth in these authorization agreements, however we have not yet received ANATEL's inspection report.

In August 2007, ANATEL adopted a revision of the personal mobile services regulations that became effective in February 2008. These revised regulations imposed additional obligations on personal mobile services providers, in particular in connection with customers' rights. For a discussion of these additional obligations, see

Table of Contents

Regulation of the Brazilian Telecommunications Industry Regulation of Mobile Services Additional Obligations.

3G Radio Frequency Licenses

We hold five licenses to use radio frequency spectrum to provide 3G services in Regions I, II and III. Each of these licenses grants us permission to use the applicable radio spectrum for 15 years from the date of grant and is renewable for additional 15-year terms. We will be required to pay an amount equal to 2.0% of our prior year's net operating revenue from personal mobile services upon renewal of the license and on every second anniversary of the renewal. The initial terms of these licenses expire in 2023.

These radio frequency licenses include network scope obligations. Under these obligations, we are currently required to (1) provide service to 459 municipalities in Regions I, II and III that did not have mobile services at the time these licenses were granted with either 2G or 3G mobile telecommunications services, (2) provide 3G service to all state capitals in Regions I, II and III, the Federal District and all municipalities with a population in excess of 200,000 inhabitants, (3) provide 3G service to all of the municipalities covered by these licenses with a population in excess of 100,000 and (4) provide 3G service to 50% of all of the municipalities with a population between 30,000 and 100,000. In addition, we will be required to provide 3G service to 60% of the municipalities, including 641 specified municipalities, covered by these licenses with a population less than 30,000 by the eighth anniversary of the date of these licenses.

A municipality is considered "served" when the covered service area contains at least 80% of the urban area in the municipality. Our failure to meet these targets may result in the imposition of penalties established in ANATEL regulations and, in extreme circumstances, in termination of our 3G frequency licenses by ANATEL. As of the date of this annual report, we have satisfied the network scope and service performance obligations set forth in these licenses, however we have not yet received ANATEL's inspection report.

4G Radio Frequency Licenses

We hold three licenses to use radio frequencies in 2.5 GHz sub-bands to provide 4G services in Regions I, II and III. Each of these licenses grants us permission to use the applicable radio spectrum for 15 years from the date of grant and is renewable for additional 15-year terms. We will be required to pay an amount equal to 2.0% of our prior year's net operating revenue from 4G services upon renewal of the license and on every second anniversary of the renewal. The initial terms of these licenses expire in 2027.

These radio frequency licenses include network scope obligations. Under these obligations, we are currently required to provide 4G service in all of the host municipalities of the 2013 FIFA Confederations Cup by April 30, 2013 and all of the host municipalities of the 2014 FIFA World Cup by December 31, 2013, an obligation with respect to which we are awaiting ANATEL's final inspection report to be considered accomplished. In addition, we will be required to:

provide 4G service in all state capitals, municipalities with a population in excess of 500,000 and the Federal District by May 31, 2014;

provide 4G service to all of the municipalities covered by these licenses with a population in excess of 200,000 by December 31, 2015;

provide 4G service to all of the municipalities covered by these licenses with a population in excess of 100,000 by December 31, 2016;

provide 4G service to all of the municipalities covered by these licenses with a population between 30,000 and 100,000 by December 31, 2017;

provide 4G service to 30% of the municipalities covered by these licenses with a population less than 30,000 by December 31, 2017;

Table of Contents

provide 4G service to 60% of the municipalities covered by these licenses with a population less than 30,000 by December 31, 2018;

provide 4G service to all of the municipalities covered by these licenses with a population less than 30,000 by December 31, 2019;

provide voice services in the 450 MHz spectrum and data services at minimum upload speeds of 128 kbps and download speeds of 256 kbps and a minimum monthly allowance of 250 MB in 289 municipalities in the States of Goiás, Mato Grosso, Mato Grosso do Sul, Rio Grande do Sul and the Federal District by June 30, 2014, and in 384 such municipalities by December 31, 2015 and offer voice services in the 450 MHz spectrum and data services at minimum upload speeds of 256 kbps and download speeds of 1Mbps and a minimum monthly allowance of 500 MB in 962 such municipalities by December 31, 2017;

provide unlimited data services at minimum upload speeds of 256 kbps and download speeds of 128 kbps to rural schools in 289 municipalities in the States of Goiás, Mato Grosso, Mato Grosso do Sul, Rio Grande do Sul and the Federal District by June 30, 2014, in 384 such municipalities by December 31, 2015 and in 962 such municipalities by December 31, 2017; and

make our fixed-line network available to other telecommunications service providers to allow them to comply with their obligations under the General Plan on Universal Service in 289 municipalities in the States of Goiás, Mato Grosso, Mato Grosso do Sul, Rio Grande do Sul and the Federal District by June 30, 2014, in 384 such municipalities by September 30, 2014 and in 962 such municipalities by September 30, 2015.

In addition, our 4G radio frequency licenses impose minimum investment obligations in domestic technologies. At least 60% of the cost of all goods, services, equipment, telecommunications systems and data networks that we purchase to meet our 4G service obligations must developed in Brazil. This minimum requirement will increase to 65% between January 1, 2015 and December 31, 2016 and 70% between January 1, 2017 and December 31, 2022.

Our failure to meet these targets may result in the imposition of penalties established in ANATEL regulations and, in extreme circumstances, in termination of our 4G frequency licenses by ANATEL. As of the date of this annual report, we have satisfied the network scope and service performance obligations set forth in these licenses.

Fixed-Line Services Authorization Agreements

We have entered into authorization agreements with ANATEL that govern our authorizations to provide local fixed-line services in and domestic long-distance services originating from (1) the 57 municipalities in the State of Minas Gerais that are excluded from the concession area of Region I, (2) the nine municipalities in the States of Goiás, Mato Grosso do Sul and Paraná that are excluded from the concession area of Region II, and (3) Region III. These authorizations do not have termination dates and require us to comply with certain quality of service obligations set forth in the General Plan on Quality Goals.

We have also entered into authorization agreements with ANATEL that govern our authorizations to provide international long-distance services originating from anywhere in Brazil. These authorizations do not have termination dates and require us to comply with quality of service obligations set forth in the General Plan on Quality Goals.

Multimedia Communication Services Authorization Agreements

We have a Multimedia Communication Services authorizations, which superseded our prior Telecommunications Network Transportation Services (*Serviço de Rede de Transporte de Telecomunicações*) authorizations, permitting us to provide high speed data service.

The Multimedia Communication Services authorizations became effective in May 2003 and cover the same geographical areas as our concession agreements. In April 2008, in connection with the amendments to our fixed-

Table of Contents

line services concessions, we agreed to provide internet service free of charge until December 31, 2025 to all urban schools in the areas of our concession agreements.

Term of Commitment to Adhere to National Broadband Plan

On June 30, 2011, we entered into a Term of Commitment (*Termo de Compromisso*) with ANATEL and the Ministry of Communications to formalize our voluntary commitment to adhere to the terms of the National Broadband Plan, created in May 2010 by Executive Decree No. 7,175/10 with the goal to make broadband access available at low cost, regardless of technology, throughout Brazil. Pursuant to the Term of Commitment, we are required to offer (1) broadband services with minimum upload and download capabilities to retail customers in certain sectors of Region I and II for a maximum price of R\$35 per month (or R\$29.90 in ICMS-exempt states), plus fees, and (2) access to our broadband infrastructure to certain wholesale customers, including small businesses and municipalities, in certain sectors of Region I and II for a maximum price of R\$1,253 per 2 Mbps per month and a one-time installation fee, while observing all quality standards under ANATEL regulations. Both retail and wholesale services are subject to certain network capacity limits and need only be provided at the demand of the customer. Pursuant to the Term of Commitment, we have offered the required services to all eligible retail and wholesale customers since the date of its execution and have gradually increased the capacities offered to wholesale customers since November 2011. We are obligated to provide the maximum capacities established by the Term of Commitment to eligible wholesale customers by June 30, 2015. In addition, the Term of Commitment requires that we:

provide one public internet access point for the first 20,000 inhabitants and one additional access point for each subsequent 10,000 inhabitants, with a limit of six access points, at a speed of 2 Mbps, in each municipality that has only satellite service, free of charge and upon demand of such municipality;

adequately advertise the services contemplated by the Term of Commitment and present to the Ministry of Communications semi-annual reports detailing our marketing efforts; and

make our best efforts to offer broadband services to retail customers at speeds of up to 5 Mbps, reaching the largest possible number of municipalities by 2015.

The Term of Commitment will expire on December 31, 2016.

Subscription Television Authorization Agreement

In November 2008, we entered into an authorization agreement with ANATEL that governs our use of satellite technology to provide DTH satellite television services throughout Brazil. The authorization agreement permits us to provide DTH satellite television services for 15-years and is renewable for an additional 15 year term in exchange for a fee to be agreed upon between us and ANATEL.

Under this authorization, we are required to furnish equipment to certain public institutions, to make channels available for broadcasting by specified public institutions, and to comply with quality of service obligations set forth in applicable ANATEL regulations.

In December 2012, ANATEL granted our request to convert our DTH authorization agreement into a Conditional Access Service authorization allowing us to provide nationwide subscription television services through any technology, including satellite, wireline and coaxial cable. Although we have not yet signed the Conditional Access Service authorization agreement, the act by which ANATEL granted our request authorized us to begin offering the services to be governed by such agreement, including IP TV. In accordance with the ANATEL resolution that approved the Conditional Access Service regime, our Conditional Access Service authorization will prohibit us from creating television content or owning more than 30% of a company that creates content. We will also be required to carry a certain percentage of Brazilian programming, including open channels and public access channels.

Table of Contents

Research and Development

We conduct independent innovation, research and development in areas of telecommunications services but historically we have not independently developed new telecommunications technologies. We depend primarily on suppliers of telecommunications equipment for the development of new technology.

As a condition to ANATEL's approval of Telemar's acquisition of control of our company in January 2009, Telemar agreed to make annual investments in innovation, research and development through 2018 in amounts equal to at least 50% of the amounts of its contributions to the FUNTTEL. To fulfill this obligation, as well as to centralize our innovation, research and development activities and programs, in 2009, we have created a division to manage innovation, research and development with the mission of coordinating and promoting efforts and projects that it develops.

Our technology laboratory performs a variety of functions, such as operation support systems, business support systems and information security. We conduct trials of technologies from different vendors in this laboratory to evaluate these technologies for deployment.

Since 2009, we have executed cooperation agreements with the following national research centers: CERTI Foundation, C.E.S.A.R., Technological Projects, Research and Studies Coordination Foundation (*Fundação Coordenação de Projetos, Pesquisas e Estudos Tecnológicos COPPETEC*), Telecommunications Research and Development Foundation (*Fundação Centro de Pesquisa e Desenvolvimento em Telecomunicações CPqD*), Technological Innovation Foundation (*Fundação Para Inovações Tecnológicas FITEC*), National Institute for Telecommunications Foundation (*Fundação Instituto Nacional de Telecomunicações Inatel*) and PUC-RJ. We have also executed cooperation agreements with Brazilian national telecommunications suppliers which develop technology in Brazil, such as AsGa S.A., Digitel S.A., Indústria Eletrônica and Padtec S.A.

In order to achieve our goals on innovation investments, in 2011, we intensified the process for the exploration of innovative services and activities concerning innovation, research and development to promote our innovation ecosystem and in October 2011 launched the first call for Innovative Mobile Applications for Major Events through the Oi Innovation Program (*Programa Oi Inovação*).

Our investments in innovation, research and development totaled R\$13 million in 2013, R\$11 million in 2012 and R\$23 million in 2011.

Property, Plant and Equipment

Our principal properties, owned and leased, are located in Regions I and II. As of December 31, 2013, the net book value of our property, plant and equipment was R\$24,786 million. Our main equipment consists of transmission equipment, trunking and switching stations (including local, tandem and transit telephone exchanges), metallic and fiber-optic cable networks and lines, underground ducts, posts and towers, data communication equipment, network systems and infrastructure (including alternating and direct current supply equipment) and motor-generator groups.

As of December 31, 2013, of the net book value of our property, plant and equipment, transmission and other equipment represented 42.0%; infrastructure, primarily underground ducts, post and towers, cables and lines represented 22.0%; work in progress represented 18.4%; automatic switching equipment represented 9.0%; buildings represented 3.7%; and other fixed assets represented 4.9%.

All property, plant and equipment that are essential in providing the services described in our concession agreements are considered reversible assets, which means that, should our concession agreements expire or terminate without being renewed, these assets will automatically revert to ANATEL. There are no other encumbrances that may affect the utilization of our property, plant and equipment. For more details, see note 15 to our consolidated financial statements.

Table of Contents

Intellectual Property

We believe the trademarks that identify us and our businesses are important for us, and as a result, we have taken steps to protect them. As of December 31, 2013, we had 1,027 trademarks registered with the Brazilian Patent and Trademark Office (*Instituto Nacional de Propriedade Industrial*), or BPTO, and 701 pending trademark applications. Our main trademark, *Oi*, is registered with the BPTO in several classes, which allows us to use this trademark in a variety of markets in which we operate, including in connection with our fixed-line, mobile and broadband services. Among the various trademarks we have registered with the BPTO, 12 are being contested by third parties. In addition, of our 701 pending trademark applications, 11 have been challenged by third parties.

As of December 31, 2013, we had 1,574 domain names registered with the Center of Information and Coordination of Dot Br - NIC. Br, an agency responsible for registering domain names in Brazil. The information included on our websites or that might be accessed through our websites is not included in this annual report and is not incorporated into this annual report by reference.

As of December 31, 2013, the INPI had granted eleven patents, utility models or industrial designs to our company. We had also filed 22 patent applications, which are pending with the BPTO. Requests for technical examination have been submitted to the BPTO for all of these pending patent applications. Once examination is concluded, a decision accepting or rejecting the application will be issued. If granted, the patent will have a term of 20 years from the date of filing and no less than ten years from the date the application is granted.

Insurance

Pursuant to requirements in our concession agreements, we maintain the following insurance policies: (1) all risk property insurance covering all insurable assets pertaining to the concessions; (2) loss of profit insurance covering lost profits deriving from property damage and business interruption; and (3) performance bond insurance to assure compliance with our obligations related to quality of service and universal service targets set forth in our concession agreements.

In addition to the above policies, we maintain civil liability insurance. Our assets that are of material value and/or exposed to high degrees of risks are also insured. All of our insurance coverage was purchased from highly rated insurance companies in Brazil.

We believe that our current insurance coverage is suitable to our operations.

Social Responsibility

In 2001, we created *Oi Futuro*, a corporate social responsibility program that has been designated a Public Interest Organization (*Organização da Sociedade Civil de Interesse Público*) by the Brazilian Ministry of Justice (*Ministério da Justiça*). *Oi Futuro* operates cultural, sustainability and educational programs using information technology and communications to promote social change.

Oi Futuro operates two cultural centers in Rio de Janeiro and a cultural center in Belo Horizonte, as well as two telecommunications museums. *Oi Futuro* also manages the *Programa Oi de Patrocínios Culturais Incentivados*. In 2013, we remained one of the primary sponsors of cultural activities in Brazil, sponsoring more than 100 projects through a public selection process.

Oi Futuro supports and develops education projects that use new communication and information technologies to transform the classroom environment and prepare young people for jobs of the future. *Oi Futuro*'s diverse initiatives include (1) the Advanced Education Center (*Núcleo Avançado em Educação*), a public vocational high school established through a public-private partnership with campuses in Rio de Janeiro and Recife that was elected by Microsoft as one of the 33 most innovative schools in the world in 2012, and (2) the *Oi Kabum! Arts and Technology School (Oi Kabum! Escola de Arte e Tecnologia)* with campuses in Rio de Janeiro, Recife, Belo Horizonte and Salvador. In 2013, more than 1,400 students participated in these programs.

Oi Futuro supports social-environmental programs through its *Oi Novos Brasis* program, which focuses on

Table of Contents

guaranteeing rights, employment and income, and on sustainability education. In 2013, more than 8,100 people benefited from these programs. In addition, in 2013, *Oi Futuro* supported 13 projects through the Public Funds for Childhood and Adolescence (*FIA - Fundos Públicos da Infância e da Adolescência*).

We contributed R\$23.6 million in 2013, R\$20 million in 2012 and R\$31 million in 2011.

Regulation of the Brazilian Telecommunications Industry

Overview

Our business, including the nature of the services we provide and the rates we charge, is subject to comprehensive regulation under the General Telecommunications Law and a comprehensive regulatory framework for the provision of telecommunications services promulgated by ANATEL. We provide fixed-line, domestic and international long-distance and mobile telecommunications services under concessions, authorizations and licenses that were granted by ANATEL and allow us to provide specified services in designated geographic areas, as well as set forth certain obligations with which we must comply. See Concessions, Authorizations and Licenses.

ANATEL is a regulatory agency that was established in July 1997 pursuant to the General Telecommunications Law and the *Regulamento da Agência Nacional de Telecomunicações*. ANATEL oversees our activities and enforces the General Telecommunications Law and the regulations promulgated thereunder. ANATEL is administratively independent and is financially autonomous. ANATEL is required to report on its activities to the Brazilian Ministry of Communications. ANATEL has authority to propose and to issue regulations that are legally binding on telecommunications service providers. ANATEL also has the authority to grant concessions and licenses for all telecommunications services, other than broadcasting services. Any regulation or action proposed by ANATEL is subject to a period of public comment, which may include public hearings, and ANATEL's decisions may be challenged administratively before the agency itself or through the Brazilian judicial system.

Concessions and Authorizations

Under the General Telecommunications Law and ANATEL regulations, the right to provide telecommunications services is granted either through a concession under the public regime (as discussed below) or an authorization under the private regime (as discussed below). A concession is granted for a fixed period of time following a public auction and is generally renewable only once. An authorization is granted for an indeterminate period of time and public auctions are held for some authorizations. These concessions and authorizations allow service providers to provide specific services in designated geographic areas, set forth certain obligations with which the service providers must comply and require equal treatment of customers by the service providers.

The three principal providers of fixed-line telecommunications services in Brazil, Telesp, Embratel and our company, provide these services under the public regime. In addition, CTBC and Sercomtel, which are secondary local fixed-line telecommunications service providers, operate under the public regime. All of the other providers of fixed-line telecommunications services and all providers of personal mobile services and data transmission services in Brazil operate under the private regime.

Providers of public regime services are subject to more obligations and restrictions than providers of private regime services. Under Brazilian law, providers of public regime services are subject to certain requirements with respect to services such as quality of service, continuity and universality of service, network expansion and network modernization. Additionally, the rates that public regime service providers may charge customers are subject to ANATEL supervision.

Providers of private regime services, although not generally subject to the requirements concerning continuity and universality of service and network modernization, are subject to certain network expansion and quality of service obligations set forth in their respective authorizations.

Table of Contents

Regulation of Fixed-Line Services

General Policies for the Regulation of the Fixed-Line Telecommunications Sector

In June 2003, Brazil's president issued Decree No. 4,733, outlining a number of new rules and guidelines which were intended to consolidate several changes in the regulation of Brazil's fixed-line telecommunications sector. This decree sets forth general declarations of policy regarding, among other things:

universal access to telecommunications services;

stimulation of employment and development of the Brazilian telecommunications sector;

promotion of competition and adoption of rate readjustment policies that take into account Brazilian socioeconomic considerations; and

the financial equilibrium of existing concession agreements.

This decree also defined certain changes that are reflected in the concession agreements entered into by providers of public regime services that became effective on January 1, 2006.

A number of bills affecting telecommunications policy have been submitted to the Brazilian Congress with an aim to make telecommunications services more accessible to Brazil's low-income population. These bills have proposed to eliminate the monthly subscription fee (*assinatura mensal*) that compensates telecommunications companies for extending and maintaining fixed-line telecommunications services for their customers. If approved, we expect that this proposal will adversely affect the overall margin of telecommunications providers, including us. For a discussion of the legal and regulatory risks associated with our business, see Item 3. Key Information Risk Factors Risks Relating to Our Company and the Brazilian Telecommunications Industry. Our industry is highly regulated. Changes in laws and regulations may adversely impact our business.

Private Regime Authorizations

With the goal of introducing competition in fixed-line telephone services in Brazil, the federal government granted four private-regime authorizations in 1999 to permit fixed-line service providers to compete with the incumbent fixed-line concessionaires. Since 2002, the number of authorizations to provide fixed-line services that the federal government may issue is unlimited.

Public Regime Concessions

Each of the public regime service providers operates under concession agreements that expire in December 2025. Under these concession agreements, each of the public regime service providers is required to comply with the provisions of (1) the General Plan on Universal Service that was adopted by ANATEL in June 2003, (2) the General Plan on Quality Goals that was adopted by ANATEL in June 2003, and (3) the General Plan on Competition Targets (*Plano Geral de Metas de Competição*) that was adopted by ANATEL in November 2012.

The concession agreements provide that ANATEL may modify their terms in 2015 and 2020 and may revoke them prior to expiration under the circumstances described below under Termination of a Concession. The modification right permits ANATEL to impose new terms and conditions in response to changes in technology, competition in the marketplace and domestic and international economic conditions. ANATEL is obligated to engage in public consultation in connection with each of these potential modifications.

Rate Regulation

Public regime service providers must offer a basic service plan comprised of the following basic services: (1) installation; (2) monthly subscription; and (3) switched local minutes. Modifications of the rates charged for these basic services are determined by reference to a local

rate basket that represents the weighted average of the rates for

Table of Contents

monthly subscriptions and switched local minutes. Rates for long-distance services originated and terminated on fixed lines vary in accordance with three basic criteria: (1) physical distance separating callers; (2) time of the day; and (3) day of the week on which the call is placed. Modifications of the rates charged for these long-distance services are determined by reference to a long-distance rate basket that represents the weighted average of the rates for long-distance calls. The rates for the provision of services through payphones and installation rates are treated separately. The rates for international long-distance services provided by Embratel, the incumbent international long-distance concessionaire, are regulated by ANATEL. However, the rates for international long-distance services charged by other long-distance service providers, all of whom provide these services under authorizations rather than concessions, are not subject to ANATEL regulation.

The concession agreements establish a price-cap mechanism for annual rate adjustments for basic service plans and domestic long-distance rates based on formulas set forth in each provider's concession agreement. The formula provides for two adjustments to the price cap based on the local rate basket, the long-distance rate basket and the use of a price index. The price cap is first revised upward to reflect increases in inflation, as measured by an index, then ANATEL applies a productivity discount factor, or Factor X, which reduces the impact of the rate readjustment provided by the index.

Prior to 2008, Factor X, which was discounted from the IST, was equal to 50% of the increase in a public regime provider's productivity. Beginning in 2008, ANATEL has calculated the sector's weighted average productivity rate. As of the date of this annual report, Factor X is equal to (1) 50% of the increase in the weighted average productivity rate of public regime providers, plus (2) 75% of a factor calculated by ANATEL that is designed to reflect cost optimization targets for the telecommunications industry as a whole. If the weighted average productivity rate is negative, ANATEL will not allow an annual adjustment in excess of the IST.

ANATEL has proposed new regulations under which it would modify the Factor X applicable to the determination of rate increases available to public concessionaires providing fixed-line services. These regulations were submitted for public consultation in July 2011 and the public consultation period ended on September 1, 2011. We expect these new regulations, as they may be modified as a result of ANATEL's further analysis, to be adopted in 2014.

A provider may increase rates for individual services within the local rate basket or the long-distance rate basket by up to 5% more than the IST so long as the rates for other services in that rate basket are reduced to the extent necessary to ensure that the weighted average increase for the entire rate basket does not exceed the permitted annual rate adjustment.

A provider may also offer alternative plans in addition to the basic service plan. Alternative plans must be submitted for ANATEL's approval. The rates offered under the alternative plans may be adjusted annually based on the IST.

For information on our rates and service plans, see Rates.

General Plan on Universal Service

The General Plan on Universal Service was approved by ANATEL in June 2003 and became effective in January 2006. The General Plan on Universal Service sets forth the principal network expansion and modernization obligations of the public regime providers, such as providing public telephones in localities with a population in excess of 100, and installing residential fixed lines within seven days of a request in localities with a population in excess of 300. In addition, public regime providers must comply with the Special Individual Access Class (*Acesso Individual Classe Especial*) rules, which are designed to require service for economically disadvantaged people. Under the Special Individual Access Class rules, a qualifying customer may subscribe to a service plan, limited to one fixed-line per household, and pay a lower monthly fee for service than under the basic service plans.

Public regime providers are also subject to network expansion requirements under the General Plan on Universal Service, which are revised by ANATEL from time to time. No subsidies or other supplemental financings are anticipated to finance our network expansion obligations. Our failure to meet the network expansion and

Table of Contents

modernization obligations established by the General Plan on Universal Service or in our concession agreements may result in fines and penalties of up to R\$50 million, as well as potential revocation of our concessions.

On June 30, 2011, the General Plan on Universal Service was amended. Among other things, these amendments:

expanded the obligations of local fixed-line service providers to provide individual access to fixed-line voice services to economically disadvantaged segments of the Brazilian population within their service areas, through programs to be established and regulated by ANATEL;

reduced the density requirements applicable to the obligations of local fixed-line service providers to provide public telephones in urban areas within their service areas; and

expanded the obligations to provide universal service in rural and remote areas of local and long-distance fixed-line providers that obtain authorizations to use radio spectrum in the 450 Mhz band, including increased obligations to provide individual and group access to fixed-line voice services.

Service Restrictions

Pursuant to regulations in effect as of the date of this annual report, public regime providers are subject to certain restrictions on alliances, joint ventures and mergers and acquisitions with other public regime providers, including:

a prohibition on holding more than 20% of the voting shares of more than one other provider of public regime services; and

a restriction on mergers between regional fixed-line service providers.

In December 2010, ANATEL adopted new regulations eliminating the limitation on the number of authorizations to provide subscription television services. In September 2011, the Brazilian congress passed Law No. 12,485, which was signed into law by the President of Brazil in September 2011. Law No. 12,485 creates a new legal framework for subscription television services in Brazil, replacing and unifying the previously existing regulatory provisions that governed various forms of subscription television services, such as cable television, Multichannel Multipoint Distribution Service, or MMDS, and DTH. The principal provisions of Law No. 12,485:

allow fixed-line telephone concessionaires, such as us, who previously were allowed to provide subscription television services using only MMDS and DTH technologies, to enter the cable television market in Brazil;

remove existing restrictions on foreign capital investments in cable television providers;

establish minimum quotas for domestic content programming on every television channel;

limit the total and voting capital held by broadcast concessionaires and authorized providers, and in television programmers and producers, with headquarters in Brazil to 30%; and

Edgar Filing: OI S.A. - Form 20-F

prohibit telecommunications service providers with collective interests from acquiring rights to disseminate images of events of national interest and from hiring domestic artistic talent.

The framework established by Law No. 12,485 is expected to increase the availability and lower the price of subscription television services in Brazil, through increased competition among providers, and improve the quality, speed and availability of broadband internet services as a result of the expected proliferation of fiber optic cables used to transmit cable television.

Table of Contents

In March 2012, ANATEL adopted new regulations under which the authorizations to provide various existing subscription television services have been consolidated into authorizations to provide a newly-defined service called Conditional Access Service. Under these regulations, authorizations to provide Conditional Access Service apply to private telecommunications services, the receipt of which are conditioned on payment by subscribers, for the distribution of audiovisual contents in the form of packages, individual channels and channels with required programming, by means of any communications technology, processes, electronic means or protocols. An authorization granted by ANATEL to provide Conditional Access Service will be valid for the entire Brazilian territory, however, the provider must indicate in its application for an authorization the localities that it will service. In December 2012, ANATEL granted our request to convert our DTH authorization agreement into a Conditional Access Service authorization. Although we have not yet signed the Conditional Access Service authorization agreement, the act by which ANATEL granted our request authorized us to begin offering the services to be governed by such agreement, including IP TV.

Termination of a Concession

ANATEL may terminate the concession of any public regime telecommunications service provider upon the occurrence of any of the following:

an extraordinary situation jeopardizing the public interest, in which case the Brazilian government is authorized to start rendering the services set forth under the concession in lieu of the concessionaire, subject to congressional authorization and payment of adequate indemnification to the owner of the terminated concession;

termination by the provider (through an agreement with ANATEL or pursuant to legal proceedings) as a consequence of an act or omission of the Brazilian government that makes the rendering of the services excessively burdensome to the provider;

annulment of the concession due to a contractual term, which is deemed by subsequent law to be illegal;

material failure to comply with the provider's universalization targets;

failure to meet insurance requirements set forth in the concession agreement;

a split-up, spin-off, amalgamation, merger, capital reduction or transfer of the provider's control without ANATEL's authorization;

the transfer of the concession without ANATEL's authorization;

the dissolution or bankruptcy of the provider; or

an extraordinary situation in which Brazilian government intervention, although legally permissible, is not undertaken, as such intervention would prove to be inconvenient, unnecessary or would result in an unfair benefit to the provider.

In the event a concession is terminated, ANATEL is authorized to administer the provider's properties and its employees in order to continue rendering services.

General Plan on Quality Goals

The General Plan on Quality Goals was approved by ANATEL in June 2003 and became effective in January 2006. Each fixed-line service provider operating under the public regime or the private regime must comply with the provisions of the General Plan on Quality Goals. All costs related to compliance with the quality goals established by the General Plan on Quality Goals must be borne exclusively by the service

provider. The General Plan on Quality Goals establishes minimum quality standards with regard to:

Table of Contents

modernization of the network;

responses to repair requests;

responses to change of address requests;

rate of call completion;

operator availability;

availability of services to customers;

personal services to customers;

issuance of bills;

responses to mail received from customers; and

quality of public telephones.

These quality standards are measured according to the definitions and quality indicators established by ANATEL. Every month, fixed-line service providers are required to report their compliance with quality goals to ANATEL. Additionally, they are obligated to provide ANATEL with an in-depth report and analysis on each quality goal that is not satisfied. ANATEL may also collect such data from fixed-line service providers at any time without prior notice. Fixed-line service providers that fail to meet quality goals established by ANATEL may be subject to warnings, fines, intervention by ANATEL, temporary suspensions of service or cancellation of their concessions and authorizations.

ANATEL measures the performance of fixed-line service providers in each individual state in which they operate. As a result, the performance of fixed-line service providers in any particular state may not meet one or more quality performance targets even if such service provider's overall performance is satisfactory. Therefore, fixed-line service providers, including us, could be subject to fines or penalties as a result of the failure to meet the quality performance targets in one or more particular states.

Our failure to meet the quality of service obligations established by the General Plan on Quality Goals or in our concession agreements may result in fines and penalties of up to R\$40 million.

General Plan on Competition Targets

The General Plan on Competition Targets, which was approved by ANATEL and became effective in November 2012, contemplates the creation of one entity to manage information about telecommunications networks, act as an intermediary in contracts between telecommunications providers and supervise the offering of wholesale data traffic services. The General Plan on Competition Targets also addresses a variety of other matters relating to both fixed-line and mobile service providers, including criteria for the evaluation of telecommunications providers to determine which providers have significant market power, regulations applicable to the wholesale markets for trunk lines, backhaul, access to internet backbone and interconnection services, and regulations related to partial unbundling and/or full unbundling of the local fixed-line networks of the public regime service providers.

Edgar Filing: OI S.A. - Form 20-F

The General Plan on Competition Targets imposes stricter restrictions on providers that are deemed to have significant market power in a particular geographic area, ranging from a neighborhood within a municipality to the entire national territory. In order to determine whether a provider has significant market power, ANATEL established criteria that consider:

Table of Contents

that provider's market share in particular mobile interconnection markets and personal mobile services market;

the economies of scope and scale available to that provider;

that provider's dominance over infrastructure that is not economically viable to duplicate; and

that provider's concurrent operations in the wholesale and retail markets.

Infrastructure Sharing

Prior to the adoption of the General Plan on Competition Targets, ANATEL had established rules for partial unbundling of the local fixed-line networks of the public regime service providers, which we refer to as line sharing, and which (1) limited the rates service providers can charge for line sharing, and (2) addressed related matters such as co-location space requirements. Co-location means that a service provider requesting unbundling may place its switching equipment in or near the local exchange of the service provider whose network the requesting service provider wishes to use and may connect to the network at this local exchange.

The General Plan on Competition Targets requires public regime service providers that have significant market power to share their fixed-line network infrastructure with other providers, including their local fixed-line access networks. Providers that are deemed to have significant market power must offer (1) full unbundling of their copper wire or coaxial cable access networks, and (2) partial unbundling of their broadband networks to accommodate bitstreams of up to 10 Mbps. The methodology by which the wholesale prices for these services will be determined will be established by ANATEL. We expect that ANATEL will commence a public consultation process with respect thereto in 2014.

Providers with significant market power must also share their passive infrastructure, such as telecommunications towers, with other service providers at prices determined by bilateral negotiations between the providers.

Interconnection Regulations Applicable to Personal Mobile Services Providers

The General Plan on Competition Targets established regulations for the rates charged by mobile service providers to terminate calls on their mobile networks (the VU-M rate). The General Plan on Competition Targets established a reference value for VU-M rates of providers that are deemed to hold significant market power and determined that beginning in 2016, VU-M rates will be determined on the basis of costs. Under the General Plan on Competition Targets:

until February 2015, mobile service providers with significant market power will be able to charge service providers without significant market power for calls originating from or terminating on their network only if the outgoing traffic in a given direction of transmission is higher than 80% of the total traffic between such providers;

between February 2015 and February 2016, mobile service providers with significant market power will be able to charge service providers without significant market power for calls originating from or terminating on their network only if the outgoing traffic in a given direction of transmission is higher than 60% of the total traffic between such providers; and

beginning in February 2016, mobile service providers with significant market power will be able to charge service providers without significant market power for calls originating from or terminating on their network at all times.

Roaming

Table of Contents

Under the General Plan on Competition Targets, a mobile service provider with significant market power must offer roaming services to other mobile providers without significant market power at the maximum rate that the mobile service provider with significant market offers such services to its retail customers.

Regulation of Mobile Services

In September 2000, ANATEL adopted regulations that established operating rules for providers under the personal mobile service (*Serviço Móvel Pessoal*) regime. The regulations permitted ANATEL to grant authorizations to provide mobile telecommunications services under the personal mobile service regime. For purposes of the personal mobile service regulations, Brazil is divided into three service regions covering the same geographic areas as the concessions for fixed-line telecommunications services.

Under the personal mobile service regulations:

Band A and Band B service providers can apply for an additional frequency range;

each service provider may apply to provide domestic and international long-distance services originating from its service region;

existing service providers, as well as new entrants into the Brazilian telecommunications market, may bid for new licenses in all frequency bands, other than Band A and Band B;

personal mobile services providers are required to offer a basic service plan to their customers containing certain prescribed features;

personal mobile services providers are required to establish interconnection rates for the use of one provider's network by another provider;

the number of regions in which a personal mobile services provider may offer services is not limited; and

a personal mobile services provider, or its controlling shareholders, may not hold more than one personal mobile services authorization covering any specific region.

Auction of Personal Mobile Services Spectrum

Prior to the establishment of the personal mobile services regime, ANATEL had granted licenses to mobile services providers to operate in each region of Brazil using Bands A and B. In 2001 and 2002, ANATEL successfully auctioned authorizations and licenses to operators in Band D and Band E in each region. TNL PCS was granted its initial authorization to provide personal mobile services in Region I and a license to operate in Band D in March 2001. We were granted our initial authorization to provide personal mobile services in Region II and a license to operate in Band E in December 2002.

ANATEL conducted additional auctions of radio frequency licenses in 2004 and 2006. In April 2004, we acquired an additional license to operate in Region II.

In December 2007, ANATEL auctioned the remaining spectrum of Bands A, B, C, D and E to existing service providers as extension blocks and auctioned additional spectrum in Band M (1.8 GHz) and Band L (1.9 GHz). In these auctions, TNL PCS acquired (1) an authorization to provide personal mobile services in the State of São Paulo and licenses to operate using Band M throughout the State of São Paulo and Band E outside of the city of São Paulo and (2) licenses to use additional spectrum in 12 states in Region I.

Auction of 3G Spectrum

Edgar Filing: OI S.A. - Form 20-F

In preparation for auctions of spectrum in Bands F, G, I and J (2.1 GHz), the use of which allows personal mobile services providers to offer 3G services to their customers, ANATEL issued regulations that divide the

Table of Contents

Brazilian territory into nine regions for purposes of operations using these frequency bands. In December 2007, ANATEL auctioned radio frequency licenses to operate on each of these frequency bands in each of the nine regions and the related licenses to use these frequency bands. In this auction, we acquired the radio frequency licenses necessary to offer 3G services in two of the nine regions delineated by ANATEL for 3G services (corresponding to Regions II under the personal mobile services regime) and TNL PCS acquired radio frequency licenses necessary to offer 3G services in six of the nine regions delineated by ANATEL for 3G services (corresponding to Regions I and III under the personal mobile services regime, other than an area that consists of 23 municipalities in the interior of the State of São Paulo that includes the city of Franca and surrounding areas).

Authorizations to Use 450MHz Band and 2.5 GHz Band

Under Executive Decree 7,512, dated June 30, 2011, or Executive Decree 7,512, ANATEL granted authorizations to telecommunications providers to use radio spectrum in the 450 Mhz band radio spectrum and the 2.5 GHz radio spectrum, the latter of which allows telecommunications providers to offer 4G services to their customers. Among other obligations, licensees of radio frequencies in the 450 Mhz band radio spectrum must agree to provide individual and collective voice and data services in rural and remote areas, in accordance with the provisions of Executive Decree 7,512 and the General Plan on Universal Service. In June 2012, we acquired radio frequency licenses necessary to offer 4G services in 5,564 municipalities in Regions I, II and III.

Personal Mobile Services Rate Regulation

Rates for personal mobile services are regulated by ANATEL. Personal mobile services providers are required to offer a basic service plan that consists of a monthly subscription, local calls and roaming. Basic service plans were approved by ANATEL for each of the personal mobile services providers following the grant of personal mobile services authorizations to each of these providers.

Following the effectiveness of the basic service plans, annual adjustments of the rates under these plans have been subject to a price cap mechanism. Through 2005, rates were adjusted annually by no more than the rate of inflation, as measured by the IGP-DI. In 2006, ANATEL replaced the IGP-DI with the IST to calculate annual rate adjustments.

Personal mobile services providers are permitted to offer non-discriminatory alternative plans to the basic service plan. The rates charged under these plans (e.g., monthly subscription rates, charges for local calls and roaming charges) are subject to ANATEL approval prior to the time that these plans are first offered to mobile customers. Following the approval of these plans, the rates under these plans may be increased up to an annual adjustment that is approved by ANATEL and is no more than the rate of inflation, as measured by the IST.

Although subscribers of a plan cannot be forced to migrate to new plans, existing plans may be discontinued as long as all subscribers receive a notice to that effect and are allowed to migrate to new plans within six months of such notice. Discounts from the rates set in basic service plans and alternative service plans may be granted to customers without ANATEL approval.

In November 2012, ANATEL adopted revisions to the personal mobile services regulations that became effective in February 2013. Under these revised regulations, successive telephone calls originating from one telephone number to the same prior destination are considered one single call if the time elapsed between calls is equal to or less than 120 seconds, regardless of the duration of each individual call.

Obligations of Personal Mobile Services Providers

As a telecommunications service provider, we are subject to requirements concerning network expansion and quality of service, as established in applicable regulations and in our personal mobile services authorizations. If we fail to meet these obligations, we may be fined, subject to a maximum penalty of R\$50 million, until we are in full compliance with our obligations. While it is possible for an authorization to be revoked for non-compliance with these obligations, there are no precedents for such a revocation.

Table of Contents

Network Expansion Obligations

The personal mobile services authorizations set forth certain obligations and targets that must be met by a personal mobile services provider. For a description of the obligations and targets that must be met by our company, see Concessions, Authorizations and Licenses Personal Mobile Services Authorization Agreements and Radio Frequency Spectrum Licenses and Concessions, Authorizations and Licenses 3G Radio Frequency Licenses.

Quality of Service Obligations

Our personal mobile services authorizations impose obligations on us to meet quality of service standards relating to our network's ability to make and receive calls, call failure rates, capacity to handle peak periods, failed interconnection of calls and customer complaints. ANATEL defines these quality of service standards, and we must report information in connection with such standards to ANATEL.

Additional Obligations

In August 2007, ANATEL adopted revisions to the personal mobile services regulations that became effective in February 2008. These revised regulations imposed additional obligations on personal mobile services providers, particularly in connection with customers' rights. These obligations require personal mobile services providers to:

establish at least one customer service center in each registration area served that has more than 100,000 inhabitants;

upgrade customer service centers to improve access by people with hearing disabilities;

increase the term applicable to pre-paid cards from 90 days to 180 days or more;

deliver to pre-paid customers a detailed report of service use upon request;

reimburse unused pre-paid credits;

limit the duration of contracts with pre-paid customers to 12 months;

permit customers to change service plans without penalties; and

unblock mobile handsets, allowing a customer who purchased a mobile handset from any personal mobile services provider to use it on the network of another personal mobile services provider.

Interconnection Regulations

Under the General Telecommunications Law, all telecommunications service providers are required, if technically feasible, to make their networks available for interconnection on a non-discriminatory basis whenever a request is made by another telecommunications service provider. Interconnection permits a call originated on the network of a requesting fixed-line or personal mobile services provider's network to be terminated on the fixed-line or personal mobile services network of the other provider. ANATEL initially adopted General Rules on Interconnection (*Regulamento Geral de Interconexão*) in 1998, which were amended and restated in July 2005.

Interconnection Regulations Applicable to Fixed-Line Providers

Edgar Filing: OI S.A. - Form 20-F

Interconnection fees are charged at a rate per minute of use of a fixed-line provider's network. Interconnection rates charged by a fixed-line provider to terminate a call on its local network (the TU-RL rate) or intercity network (the TU-RIU rate) are subject to a price cap established by ANATEL. The price cap for interconnection rates varies from service provider to service provider based on the retail prices of each service provider.

Table of Contents

Fixed-line service providers must offer the same TU-RL and TU-RIU rates to all requesting providers on a nondiscriminatory basis. The price caps on interconnection rates are adjusted annually by ANATEL at the same time that rates for local and long-distance rates are adjusted.

Fixed-line service providers are only required to pay interconnection fees to another fixed-line service provider for traffic in the same local area in the event that the ratio of the outbound traffic generated by that provider (measured in minutes) to the inbound traffic terminated by that provider (measured in minutes) exceeds 75% or was less than 25%. This system is designated the partial bill-and-keep system.

In 2006, ANATEL established that (1) the TU-RL rates that fixed-line service providers could charge each other to terminate a call on their respective networks was 50% of the rate included in their Basic Plan per Minute for a local fixed-line call, and (2) the TU-RIU rates that fixed-line service providers could charge each other to use a portion of their long-distance networks to complete long-distance calls was 30% of the applicable domestic fixed line-to-fixed line long-distance rates for calls of more than 300 km. In 2007, the TU-RL rates of the fixed-line service providers were reduced to 40% of the rate included in their Basic Plan per Minute for a local fixed-line call.

ANATEL announced that beginning in 2008, the method used to determine the TU-RL rates would be based on a cost methodology, known as long-run incremental costs. However, in October 2007, ANATEL published an official letter delaying this change until the end of 2010. In September 2010, ANATEL commenced the bidding process to engage an international consultant to assist with the development of the long-run incremental cost methodology. ANATEL has indicated that in the first quarter of 2014 it will announce rates based on a long-run incremental cost methodology that will be applicable beginning in 2016.

In May 2012, ANATEL adopted revisions to the regulations relating to TU-RL rates and TU-RIU rates that became effective in August 2012. Under the revised regulations (1) between August of 2012 and December of 2013, fixed-line service providers will be able to charge other fixed-line service providers for local fixed-line calls originating on their local fixed-line networks and terminating on the other provider's local fixed-line networks only if the outgoing traffic in a given direction of transmission is higher than 75% of the total traffic between such providers, and (2) beginning in January 2014, fixed-line service providers were no longer be able to charge other fixed-line service providers for local fixed-line calls originating on their local fixed-line networks and terminating on the other provider's local fixed-line networks.

In August 2012, the TU-RIU rates were reduced to 25% of the applicable domestic fixed line rates for calls with more than 300 km, and in January 2013, TU-RIU rates were reduced to 20% of the applicable domestic fixed line rates for such calls.

Interconnection Regulations Applicable to Personal Mobile Services Providers

Interconnection fees are charged at a flat rate per minute of use of a personal mobile services provider's network. The terms and conditions of interconnection agreements of all personal mobile services providers, including the rates charged by the operator of the network to terminate a call on its mobile network (the VU-M rate), commercial conditions and technical issues, are freely negotiated between mobile and fixed-line telecommunications service providers, subject to compliance with regulations established by ANATEL relating to traffic capacity and interconnection infrastructure that must be made available to requesting providers, among other things.

Personal mobile services providers must offer the same VU-M rate to all requesting providers on a nondiscriminatory basis. Interconnection agreements must be approved by ANATEL before they become effective and they may be rejected if they are contrary to the principles of free competition and the applicable regulations. If the providers cannot agree upon the terms and conditions of interconnection agreements, ANATEL may determine terms and conditions by arbitration. Since no agreement with fixed-line service providers could be reached regarding VU-M rates when we began offering personal mobile services, ANATEL set the initial VU-M rates.

Personal mobile services providers negotiate annual rate increases for their VU-M charges with the fixed-line telecommunications providers. If the providers cannot agree upon the terms and conditions of annual rate increases, ANATEL may determine the annual rate increases by arbitration.

Table of Contents

In November 2011, ANATEL adopted new regulations under which ANATEL was authorized to reduce the then-current VC-1, VC-2 and VC-3 rates by as much as 18% in 2011, 12% in 2012 and 10% in 2013, after giving effect to an inflation adjustment based on the IST measured from June 2009. In February 2012, ANATEL ordered us to reduce our VC-1, VC-2 and VC-3 rates by approximately 10%, although we are appealing the timing of the application of this rate decrease to our company as our VC-1 rate was increased in Region I by 1.54% in accordance with our application for this increase in February 2012. In March 2013, ANATEL reduced our VC-1 rates in Region I and Region II by approximately 18.6% and 8%, respectively. These regulations also provided procedures under which ANATEL adopted a maximum VU-M rate that is applicable in the event that providers cannot agree upon the VU-M applicable in their interconnection agreements. Under the General Plan on Competition Targets, in February 2014 the VU-M rate was reduced to 75% of the maximum VU-M rate established by ANATEL in December 2013, and in February 2015 will be reduced to 50% of the maximum VU-M rate established for 2013. The maximum VU-M rate established by ANATEL is R\$0.33 per minute.

Number Portability Regulations

Number portability is the ability of a customer to move to a new home or office or switch service providers while retaining the same fixed-line or mobile telephone number. In March 2007, ANATEL adopted the General Regulation of Portability (*Regulamento Geral de Portabilidade*), establishing general rules regarding portability of fixed-line and mobile telephone numbers. These regulations permit fixed-line customers to retain their telephone numbers if they become customers of a different fixed-line service provider in the same municipality or if they move to a new home or office in the same municipality. Personal mobile services customers are permitted to retain their telephone numbers if they change their service plan or if they become customers of a different personal mobile services provider within the same registration area. Each telecommunications provider has been required to contract a third-party management entity to manage all procedures relating to number portability. Service providers are permitted to charge a migrating customer that elects to retain its telephone number a one-time fee of no more than R\$4.00. This amount is intended to compensate the customer's current provider for the costs associated with managing the portability process. The new provider may elect to absorb this fee on behalf of the customer.

Regulation of Data Transmission and Internet Services

Under Brazilian regulation, ISPs are deemed to be suppliers of value-added services and not telecommunications service providers. Value-added services are considered an activity that adds features to a telecommunications service supported by such value-added services. Telecommunications service providers are permitted to render value-added services through their own networks. In addition, ANATEL regulations require all telecommunications service providers and cable television operators to grant network access to any party interested in providing value-added services, including internet access, on a non-discriminatory basis, unless not technically feasible.

ANATEL has adopted regulations applicable to fixed-line service providers with significant market power. Under these regulations, these providers are required to make the forms of agreements that they use for EILD and SLD services publicly available, including the applicable rates, and are only permitted to offer these services under these forms of agreement. Following publication of these forms of agreement, the rates under these agreements may be increased on an annual basis by no more than the rate of inflation, as measured by the IST. ANATEL also publishes reference rates for these services, and if a customer of one of these providers objects to the rates which that provider charges for these services, the customer is entitled to seek to reduce the applicable rate through arbitration before ANATEL.

Multimedia Communications Service Quality Management Regulations

In June 2011, the President of Brazil issued Executive Decree No. 7,512/11, which mandated ANATEL to take the necessary regulatory measures to establish quality standards for broadband internet services. In compliance with such decree, on October 31, 2011, ANATEL published a resolution approving the Multimedia Communications Service Quality Management Regulations (*Regulamentação de Gestão da Qualidade do Serviço de Comunicação Multimídia*), or the Regulations, which identify network quality indicators and establish performance goals for multimedia communications service providers, including broadband internet service providers, with more than 50,000 subscribers. Such providers will be required to collect representative data using dedicated equipment

Table of Contents

installed at the site of each network connection and be subject to periodic measurements to ensure their compliance with the Regulations, including:

individual upload and download speeds of at least 20%, 30% and 40% of contracted speeds per measurement for at least 95% of all measurements, during the first year, second year and thereafter, respectively, following implementation of the Regulations;

average upload and download speeds of at least 60%, 70% and 80% of contracted speeds for all measurements during the first year, second year and thereafter, respectively, following implementation of the Regulations; and

individual round-trip latencies for fixed-line connections of up to 80 milliseconds per measurement for at least 95% of the measurements.

To increase transparency, customers must be provided with specialized software at no cost to measure their own network quality, although such customer-generated measurements will not be included in official calculations. In addition to ensuring network quality standards, service providers must hire specialized companies to measure customer service and customer satisfaction indicators, including complaint resolution, customer service personnel competence, customer perceptions relating to billing and quality of technical support staff. Service providers must comply with the above-mentioned quality standards beginning on the thirteenth month following implementation of the Regulations. Failure to meet such standards will subject non-compliant service providers to sanctions. We have met these standards for 2013.

National Broadband Plan

On June 30, 2011, we entered into a Term of Commitment (*Termo de Compromisso*) with ANATEL and the Ministry of Communications to formalize our voluntary commitment to adhere to the terms of the National Broadband Plan, created in May 2010 by Executive Decree No. 7,175/10 with the goal to make broadband access available at low cost, regardless of technology, throughout Brazil. Pursuant to the Term of Commitment, we are required to offer (1) broadband services with minimum upload and download capabilities to retail customers in certain sectors of Region I and II for a maximum price of R\$35 per month (or R\$29.90 in ICMS-exempt states), plus fees, and (2) access to our broadband infrastructure to certain wholesale customers, including small businesses and municipalities, in certain sectors of Region I and II for a maximum price of R\$1,253 per 2 Mbps per month and a one-time installation fee, while observing all quality standards under ANATEL regulations. Both retail and wholesale services are subject to certain network capacity limits and need only be provided at the demand of the customer. Pursuant to the Term of Commitment, we have offered the required services to all eligible retail and wholesale customers since the date of its execution and have gradually increased the capacities offered to wholesale customers since November 2011. We are obligated to provide the maximum capacities established by the Term of Commitment to eligible wholesale customers by June 30, 2015. In addition, the Term of Commitment requires that we:

provide one public internet access point for the first 20,000 inhabitants and one additional access point for each subsequent 10,000 inhabitants, with a limit of six access points, at a speed of 2 Mbps, in each municipality that has only satellite service, free of charge and upon demand of such municipality;

adequately advertise the services contemplated by the Term of Commitment and present to the Ministry of Communications semi-annual reports detailing our marketing efforts; and

make our best efforts to offer broadband services to retail customers at speeds of up to 5 Mbps, reaching the largest possible number of municipalities by 2015.

The Term of Commitment will expire on December 31, 2016.

Table of Contents

Environmental and Other Regulatory Matters

As part of our day-to-day operations, we regularly install ducts for wires and cables and erect towers for transmission antennae. We may be subject to federal, state and/or municipal environmental licensing requirements due to the installation of cables along highways and railroads, over bridges, rivers and marshes and through farms, conservation units and environmental preservation areas, among other places. As of the date of this annual report, we have been required to obtain environmental licenses for the installation of transmission towers and antennae in several municipalities with no material impact on our operations. However, there can be no assurances that other state and municipal environmental agencies will not require us to obtain environmental licenses for the installation of transmission towers and antennae in the future and that such a requirement would not have a material adverse effect on the installation costs of our network or on the speed with which we can expand and modernize our network.

We must also comply with environmental legislation regarding the management of solid waste. According to resolutions adopted by the National Environmental Council (*Conselho Nacional do Meio Ambiente*), companies responsible for the treatment and final disposal of solid industrial waste, special waste and solid urban waste are subject to environmental licensing. Should the waste not be disposed of in accordance with standards established by environmental legislation, the company generating such waste may be held jointly and severally liable with the company responsible for waste treatment for any damage caused. Also, in all states where we operate, we have implemented management procedures promoting the recycling of batteries, transformers and fluorescent lamps.

In addition, we are subject to ANATEL regulations that impose limits on the levels and frequency of the electromagnetic fields originating from our telecommunications transmissions stations.

We believe that we are in compliance with ANATEL standards as well as with all applicable environmental legislation and regulations. We are currently not involved in any administrative or judicial proceeding involving material liability for environmental damage.

Disclosure Pursuant to Section 219 of the Iran Threat Reduction and Syria Human Rights Act

Section 219 of the Iran Threat Reduction and Syria Human Rights Act of 2012 added Section 13(r) to the Exchange Act. Section 13(r) requires an issuer to disclose in its annual or quarterly reports filed with the SEC whether the issuer or any of its affiliates has knowingly engaged in certain activities, transactions or dealings with the Government of Iran, relating to Iran or with designated natural persons or entities involved in terrorism or the proliferation of weapons of mass destruction during the period covered by the annual or quarterly report. Disclosure is required even when the activities were conducted outside the United States by non-U.S. entities and even when such activities were conducted in compliance with applicable law.

In December 2011, we entered into a roaming agreement with MTN Irancell. Pursuant to such roaming agreement, our customers are able to roam in MTN Irancell's network (outbound roaming) and customers of MTN Irancell are able to roam in our network (inbound roaming). For outbound roaming, we pay MTN Irancell roaming fees for use of their network by our customers, and for inbound roaming MTN Irancell pays us roaming fees for use of our network by its customers.

Our inbound and outbound roaming services with MTN Irancell were launched commercially in October and November 2012, respectively. During 2013, we recorded revenues of US\$117 and expenses of US\$237 in connection with this roaming agreement. We do not maintain any bank accounts in Iran. All payments in connection with our international roaming agreements are effected through our bank account in London.

The purpose of this roaming agreement is to provide our customers with coverage in areas where we do not own networks. For that purpose, we intend to continue maintaining this agreement.

We own a 10.0% interest in Portugal Telecom, and Portugal Telecom indirectly through its subsidiary Bratel Brasil owns 7.1% of our voting common shares and 12.1% of the voting shares of our controlling shareholder TmarPart, and owns 19.2% of our non-voting preferred shares. Portugal Telecom has reported to us the following:

Table of Contents

Through its subsidiary MEO - Serviços de Comunicações e Multimedia, S.A. (previously known as TMN Telecomunicações Móveis Nacionais, S.A.), or MEO, Portugal Telecom has entered into roaming agreements with MTN Irancell. Pursuant to such roaming agreement, Portugal Telecom's customers are able to roam on the Iranian network (outbound roaming), and customers of such Iranian operators are able to roam on TMN's network (inbound roaming). For outbound roaming, Portugal Telecom pays the Iranian operator roaming fees for use of its network by Portugal Telecom's customers, and for inbound roaming the Iranian operator pays Portugal Telecom roaming fees for use of its network by the Iranian operator's customers.

In 2013, in connection with the above mentioned roaming agreements entered into with MTN Irancell, MEO recorded gross revenues of 846 and operating costs of 1,234, corresponding to a net loss after tax of 266. In addition to these transactions, MEO also incurred expenses amounting to 1,258 in 2013 with the Mobile Company of Iran, corresponding to a net loss after tax of 862. Portugal Telecom does not maintain any bank accounts in Iran. All payments in connection with Portugal Telecom's international roaming agreements are effected through Portuguese bank accounts.

The purpose of all of these agreements is to provide Portugal Telecom's customers with coverage in areas where it does not own networks. For that purpose, Portugal Telecom intends to continue maintaining these agreements.

Portugal Telecom also provides telecommunications services in the ordinary course of business to the Embassy of Iran in Lisbon, Portugal. Portugal Telecom recorded gross revenues and net profits of less than 10,000 from these services in 2013. As one of the primary providers of telecommunications services in Lisbon, Portugal, Portugal Telecom intends to continue providing such services, as it does to the embassies of many other nations.

ITEM 4A. UNRESOLVED STAFF COMMENTS

Not applicable.

Table of Contents

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

The following discussion of our financial condition and results of operations should be read in conjunction with our consolidated financial statements as of December 31, 2013 and 2012 and for the three years ended December 31, 2013, which are included in this annual report, as well as with the information presented under the sections entitled Presentation of Financial and Other Information and Item 3. Key Information Selected Financial Information.

The following discussion contains forward-looking statements that involve risks and uncertainties. Our actual results may differ materially from those discussed in the forward-looking statements as a result of various factors, including those set forth in Forward-Looking Statements and Item 3. Key Information Risk Factors.

Overview

We are one of the largest integrated telecommunication service provider in Brazil, based on information available from ANATEL regarding the total number of fixed-lines in service and mobile subscribers of our company as of December 31, 2013, and one of the principal telecommunication services provider offering quadruple play services in Brazil. We offer a range of integrated telecommunication services that includes fixed-line and mobile telecommunications services, data transmission services (including broadband access services), ISP services and other services, for residential customers, small, medium and large companies, and governmental agencies. In 2013, we recorded net operating revenue of R\$28,422 million and net income of R\$1,493 million.

Our results of operations and financial condition have been and will be significantly influenced in future periods by the corporate reorganization of our company, TNL, Telemar and Coari described under Corporate Reorganization. In addition, our results of operations for the years ended December 31, 2013, 2012 and 2011 have been influenced, and our future results of operations will continue to be influenced, by a variety of factors, including:

the rate of growth of Brazilian GDP, which grew by an estimated 2.3% in 2013, and grew by 0.9% in 2012 and 2.7% in 2011, which we believe affects demand for our services and, consequently, our net operating revenue;

the number of our fixed lines in service, which declined to 16.9 million as of December 31, 2013 from 17.8 million as of December 31, 2012, and the percentage of our fixed-line customers that subscribe to our alternative plans which increased to 80.5% as of December 31, 2013 from 79.8% as of December 31, 2012;

the number of our mobile customers, which increased to 50.2 million as of December 31, 2013 from 49.3 million as of December 31, 2012;

the number of our fixed-line customers that subscribe to our broadband services, which increased to 5.9 million as of December 31, 2013 from 5.7 million as of December 31, 2012;

the increased competition in the Brazilian market for telecommunications services, which affects the amount of the discounts that we offer on our service rates and the quantity of services that we offer at promotional rates;

inflation rates in Brazil, which were 4.90% in 2013 and 4.77% in 2012, as measured by the IST, and the resulting adjustments to our regulated rates, as well as the effects of inflation on our *real*-denominated debt that is indexed to take into account the effects of inflation or bears interest at rates that are partially adjusted for inflation;

our compliance with our quality of service obligations under the General Plan on Quality Goals and our network expansion and modernization obligations under the General Plan on Universal Service and our concession agreements, the amount of the fines

Edgar Filing: OI S.A. - Form 20-F

assessed against us by ANATEL for alleged failures to meet these obligations and our success in challenging fines that we believe are assessed in error;

Table of Contents

changes in the *real*/U.S. dollar exchange rate, including the 14.6% depreciation of the *real* against the U.S. dollar in 2013 and the 8.9% depreciation of the *real* against the U.S. dollar in 2012, which has affected the cost in *reais* of a substantial portion of the network equipment that we purchase for our capital expenditure projects, the prices of which are denominated in U.S. dollars or are U.S. dollar-linked; and

the level of our outstanding indebtedness, fluctuations in benchmark interest rates in Brazil, principally the CDI rate and the TJLP rate, which affects our interest expenses on our *real*-denominated floating rate debt.

Our financial condition and liquidity is influenced by a variety of factors, including:

our ability to generate cash flows from our operations;

prevailing Brazilian and international interest rates, which affect our debt service requirements;

our ability to borrow funds from Brazilian and international financial institutions and to sell our debt securities in the Brazilian securities markets, which is influenced by a number of factors discussed below;

our capital expenditure requirements, primarily relating to a variety of projects designed to expand and upgrade our data transmission networks, our mobile services networks, our voice transmission networks, our information technology equipment and our telecommunications services infrastructure;

the dividend distribution policy that we have announced, under which we have stated that we intend to approve the distribution of approximately R\$500 million at each of our annual general shareholders meetings in 2014, 2015 and 2016 through the distribution of dividends, payment of interest on capital, share grants or redemption, capital reduction or other forms that enable the distribution of funds to shareholders; and

the requirement under Brazilian corporate law and our by-laws that we pay dividends on an annual basis in an amount equal to at least 25% of our adjusted net income, unless our board of directors deems it inconsistent with our financial position.

Corporate Reorganization

On February 27, 2012, the shareholders of TNL, Telemar, Coari and Brasil Telecom approved a series of transactions including:

a split-off (*cisão*) and merger of shares (*incorporação de ações*) under Brazilian law in which:

Telemar transferred its shares of Coari to Coari;

Coari assumed a portion of the liabilities of Telemar, which became joint and several liabilities of Telemar and Coari or obligations of Coari guaranteed by Telemar;

Coari issued one common share and/or one preferred share to the holders of Telemar common and preferred shares (other than the shares of holders who exercised their withdrawal rights with respect to such shares) in exchange for each

Edgar Filing: OI S.A. - Form 20-F

of their common and preferred shares of Telemar, respectively; and

Coari retained the Telemar shares exchanged for Coari shares and as a result, Telemar became a wholly-owned subsidiary of Coari;

a merger (*incorporação*) under Brazilian law of Coari with and into our company, with our company as the surviving company, which we refer to as the Coari merger, in which:

Table of Contents

each issued and then outstanding share of Brasil Telecom held by Coari and all Coari shares held in treasury were cancelled;

each issued and then outstanding common share of Coari was converted automatically into 5.1149 common shares of Brasil Telecom;

each issued and then outstanding preferred share of Coari was converted automatically into 0.3904 common shares of Brasil Telecom and 4.0034 preferred shares of Brasil Telecom;

Coari ceased to exist; and

Telemar became a wholly-owned subsidiary of Brasil Telecom; and

a merger (*incorporação*) under Brazilian law of TNL with and into our company, with our company as the surviving company, which we refer to as the TNL merger, in which:

each TNL share held in treasury prior to the TNL merger was cancelled, and each issued and then outstanding share of Brasil Telecom held by TNL was cancelled, other than 24,647,867 common shares of Brasil Telecom, which were transferred to the treasury of Brasil Telecom;

each issued and then outstanding common share of TNL (other than common shares held by shareholders who exercised their withdrawal rights with respect to such common shares) was converted automatically into 2.3122 common shares of Brasil Telecom;

each issued and then outstanding preferred share of TNL was converted automatically into 0.1879 common shares of Brasil Telecom and 1.9262 preferred shares of Brasil Telecom; and

TNL ceased to exist.

In addition, on February 27, 2012, our shareholders approved:

the issuance and distribution of (1) one Class B redeemable preferred share of our company to the holder of each of our common shares, and (2) one Class C redeemable preferred share of our company to the holder of each of our preferred shares; and

the redemption of each Class B redeemable preferred share and Class C redeemable preferred share at a redemption price equal to R\$2.543282 per share, or an aggregate of R\$1,502 million.

Holders of Telemar common shares, class A preferred shares and class B preferred shares and holders of TNL preferred shares as of the close of trading on May 23, 2011, the date prior to the publication of the Relevant Fact that first announced the split-off and share exchange and the TNL merger were entitled to withdrawal rights in connection with the split-off and share exchange and the TNL merger. Shareholders who exercised these withdrawal rights with respect to the Telemar shares were entitled to receive R\$74.37 per share and shareholders who exercised these withdrawal rights with respect to the TNL preferred shares were entitled to receive R\$28.93 per share. As of March 29, 2012, the expiration of the period for the exercise of these withdrawal rights, holders of 1,020,215 Telemar common shares, 17,856,585 Telemar class A preferred

Edgar Filing: OI S.A. - Form 20-F

shares, 47,714 Telemar class B preferred shares and 20,446,097 TNL preferred shares had validly exercised their withdrawal rights for an aggregate cost to our company of R\$1,999 million.

Proposed Business Combination

On October 1, 2013, we entered into a memorandum of understanding, or the MOU, with Portugal Telecom, AG Telecom, LF Tel, PASA, EDSP, Bratel Brasil, BES and Ongoing, in which we and they agreed to the principles governing a series of transactions, including the business combination described below.

Table of Contents

The business combination transaction involves three principal components:

a capital increase of our company in which we expect to issue common shares and preferred shares in an underwritten offering for an aggregate of at least R\$7,000 million in cash, and common shares and preferred shares to Portugal Telecom in exchange for the contribution by Portugal Telecom to our company of all of the shares of its subsidiary PT Portugal, which will at that time owns (a) all of the operating assets of Portugal Telecom, except interests held directly or indirectly in Oi and Contax Holding, and (b) all of Portugal Telecom's liabilities at the time of the contribution, which we refer to collectively as the Oi capital increase;

a merger of shares (*incorporação de ações*) under Brazilian law, a Brazilian transaction in which, subject to the approvals of the holders of voting shares of our company and TmarPart, all of the shares of our company not owned by TmarPart will be exchanged for TmarPart common shares and we will become a wholly-owned subsidiary of TmarPart; and

a merger (*incorporação*) under Portuguese and Brazilian law, of Portugal Telecom with and into TmarPart, with TmarPart as the surviving company in which the shareholders of Portugal Telecom will receive an aggregate number of TmarPart shares equal to the number of TmarPart shares held by Portugal Telecom immediately prior to the merger.

In connection with the business combination, we expect that:

TmarPart will enter into several additional transactions designed to recapitalize TmarPart so that at the time of the merger of shares, TmarPart will have no net debt;

TmarPart and our company will enter into merger transactions in order to simplify the ownership structure of TmarPart;

The shares of TmarPart will be listed on the Novo Mercado segment of the BM&FBOVESPA and on the NYSE Euronext Lisbon, and ADSs representing the shares of TmarPart will be listed on the NYSE; and

The shareholders agreements among the shareholders of TmarPart will be terminated.

We believe that the business combination will:

permit the formation of a single large multinational telecommunications company based in Brazil with more than 100 million customers in seven countries with a total population of approximately 260 million people;

maintain the continuity of operations under the trademarks of Oi and Portugal Telecom in their respective regions of operation, subject to unified control and management by TmarPart;

further consolidate the operations of our company and Portugal Telecom, with the goal of achieving significant economies of scale, maximizing operational synergies, reducing operational risks, optimizing efficient investments and adopting best operational practices;

strengthen the capital structure of TmarPart, facilitating its access to capital and financial resources;

consolidate the shareholder bases of our company, Portugal Telecom and TmarPart as holders of a single class of common shares or ADSs traded on the Novo Mercado segment of the BM&FBOVESPA, the NYSE and NYSE Euronext Lisbon;

diffuse TmarPart's shareholder base, as a result of which no shareholder or group of shareholders will hold a majority interest in TmarPart's capital;

Table of Contents

result in the adoption by TmarPart of the corporate governance practices of the Novo Mercado segment of the BM&FBOVESPA; and

promote greater liquidity of the TmarPart common shares than currently is available to holders of our shares and Portugal Telecom's shares.

For more information on the proposed business combination and related transactions, see Item 4. Information on the Company Our History and Development Proposed Business Combination.

Financial Presentation and Accounting Policies

Presentation of Financial Statements

We have prepared our consolidated financial statements as of December 31, 2013 and 2012 and for the years ended December 31, 2013, 2012 and 2011 in accordance with Brazilian GAAP, which differs in certain important respects from U.S. GAAP. Differences between Brazilian GAAP and U.S. GAAP where applicable to Oi are summarized in note 31 to our audited consolidated financial statements included in this annual report.

Business Segments and Presentation of Segment Financial Data

We have implemented an organizational structure that we believe reflects our business activities and corresponds to the principal services that we provide. We report our results in three segments to reflect this organizational structure:

Fixed-Line and Data Transmission Services This segment includes our local fixed-line services (including public telephones), our long-distance services, our fixed-line data transmission services and interconnections to our fixed-line network.

Mobile Services This segment includes our mobile services, including voice, mobile data communications and other value added services, and interconnections to our mobile network.

Other Services This segment includes the operations of our internet portal, ISP services and call center.

We evaluate and manage business segment performance based on information prepared in accordance with Brazilian GAAP, and, accordingly, the segment data included in this annual report is presented under Brazilian GAAP. We have included a reconciliation of the operating results of our segments to our consolidated results under Results of Operations below.

Critical Accounting Policies and Estimates

Our critical accounting policies and estimates described in note 2(c) to our consolidated financial statements. In preparing our consolidated financial statements, we relied on estimates and assumptions derived from historical experience and various other factors that we deemed reasonable and relevant. Critical accounting policies are those that are important to the portrayal of our consolidated financial position and results of operations and require management's subjective and complex judgments, estimates and assumptions. The application of these critical accounting policies often requires judgments made by management regarding the effects of matters that are inherently uncertain with respect to our results of operations and the carrying value of our assets and liabilities. Our results of operations and financial position may differ from those set forth in our consolidated financial statements, if our actual experience differs from management's assumptions and estimates. In order to provide an understanding of our critical accounting policies, including some of the variables and assumptions underlying the estimates, and the sensitivity of those assumptions and estimates to different parameters and conditions, we set forth below a discussion of our critical accounting policies relating to:

revenue recognition and trade receivables;

Table of Contents

provision for doubtful accounts;

depreciation of property, plant and equipment;

impairment of long-lived assets;

provisions;

derivative instruments;

deferred income taxes and social contribution;

employee benefits; and

amortization of intangible assets.

Revenue Recognition and Trade Receivables

Our revenue recognition policy is significant because our revenue is a material component of our results of operations. Management's determination of price, collectability and the rights to receive certain revenues for the use of our network are based on judgments regarding the nature of the fee charged for services rendered, the price for certain services delivered and the collectability of those revenues. Should changes in conditions cause management to conclude that these criteria are not met for certain transactions, the amount of accounts receivable could be adversely affected. In addition, for certain categories of revenue we rely upon revenue recognition measurement guidelines set by ANATEL.

Revenues are generally recognized on an accrual basis. Revenues from local fixed-line, long-distance and post-paid mobile calls and data transmission services are recognized when services are provided. Services provided and not billed at the end of each month are estimated and recorded on an accrual basis. Late-payment interest is recognized upon the issuance of the first bill following the payment of the overdue bill.

Revenues from pre-paid mobile cards are recognized based on the use of the respective credits. Revenue from the sale of public telephone cards is recognized when the credits are effectively consumed by customers. Revenues related to the sale of mobile handsets and accessories are accounted for when the goods are delivered and accepted by the customer.

Revenues from the usage of our network by other telecommunications service providers are recorded based on a formal document of declared traffic and services rendered, the Traffic Exchange Declaration (*Documento de Declaração de Tráfego e Prestação de Serviço*), or DETRAF, issued by an independent, outsourced clearinghouse.

We consider revenue recognition to be a critical accounting policy, because of the uncertainties caused by different factors such as the complex information technology required, high volume of transactions, fraud and piracy, accounting regulations, management's determination of collectability and uncertainties regarding our right to receive certain revenues (mainly revenues for use of our network). Significant changes in these factors could cause us to fail to recognize revenues or to recognize revenues that we may not be able to realize in the future, despite our internal controls and procedures. We have not identified any significant need to change our revenue recognition policy.

Provision for Doubtful Accounts

Our provision for doubtful accounts is established in order to recognize probable losses on accounts receivable and takes into account limitations we impose to restrict the provision of services to customers with past-due accounts and actions we take to collect delinquent accounts. We include government entities, corporate customers and other telecommunications service providers in the basis for our calculation of the provision for doubtful

Table of Contents

accounts. For additional information regarding our provision for doubtful accounts, see note 10 to our consolidated financial statements.

We have entered into agreements with certain customers to collect past-due accounts receivable, including agreements allowing customers to settle their delinquent accounts in installments. The amounts that we actually fail to collect in respect of these accounts may differ from the amount of the allowance established, and additional allowances may be required.

Depreciation of Property, Plant and Equipment

We depreciate property, plant and equipment using the straight-line method at rates we judge compatible with the useful lives of the underlying assets. The depreciation rates of our most significant assets are presented in note 15 to our consolidated financial statements. The useful lives of assets in certain categories may vary based on whether they are used primarily to provide fixed-line or mobile services. We review the estimated useful lives of the assets taking into consideration technical obsolescence and a valuation by outside experts.

Given the complex nature of our property, plant and equipment, the estimates of useful lives require considerable judgment and are inherently uncertain, due to rapidly changing technology and industry practices, which could cause early obsolescence of our property, plant and equipment. If we materially change our assumptions of useful lives and if external market conditions require us to determine the possible obsolescence of our property, plant and equipment, our depreciation expense, obsolescence write-off and consequently net book value of our property, plant and equipment could be materially different.

Impairment of Long-Lived Assets

We test property, plant and equipment items and intangible assets for impairment whenever (1) we decide to discontinue activities in which such assets are used, or (2) there is evidence that future operating results will not be sufficient to ensure their realization.

Assets with finite useful lives are tested for impairment whenever events or changes in circumstances indicate that the asset might be impaired. We test asset with indefinite useful lives (goodwill) for impairment at least annually.

Impairment losses, if any, are recognized in an amount by which the carrying amount of an asset exceeds its recoverable value. Recoverable value is the higher of fair value less cost to sell and the value in use. These calculations require the use of judgments and assumptions. The determination of fair values and discounted future operating cash flows requires that we make certain assumptions and estimates with respect to projected cash inflows and cash outflows related to future revenue, costs and expenses. These assumptions and estimates may be influenced by different external and internal factors, such as economic trends, industry trends and interest rates, changes in business strategies, and changes in the type of services and products sold by our company. The use of different assumptions and estimates could significantly change our consolidated financial statements.

We have not recorded any impairment of our long-lived assets during the three years ended December 31, 2013.

Provisions

We recognize provisions for losses in labor, tax and civil proceedings, as well as administrative proceedings. The recognition of a provision is based on the assessment of the risk of loss made for each proceeding, which includes assessing available evidence and recent decisions.

We classify our risk of loss in legal proceedings as remote, possible or probable. Provisions recorded in our consolidated financial statements in connection with these proceedings reflect reasonably estimated losses at the relevant date as determined by our management after consultation with our general counsel and the outside legal counsel. As discussed in note 22 to our consolidated financial statements, we record as a liability our estimate of the costs of resolution of such claims, when we consider our losses probable. We continually evaluate the provisions

Table of Contents

based on changes in relevant facts, circumstances and events, such as judicial decisions, that may impact the estimates, which could have a material impact on our results of operations and shareholders' equity. While management believes that the current provision is adequate, it is possible that our assumptions used to estimate the provision and, therefore, our estimates of loss in respect of any given contingency will change in the future based on changes in the relevant situation. This may therefore result in changes in future provisioning for legal claims. For more information regarding material pending claims against our company, see Item 8. Financial Information - Legal Proceedings and note 22 to our consolidated financial statements.

Derivative Instruments

We recognize derivative financial instruments at fair value based on future cash flow estimates associated with each instrument contracted. Our estimates of future cash flows may not necessarily be indicative of the amounts that could be obtained in the current market. The use of different assumptions to measure the fair value could have a material effect on the amounts obtained and not necessarily be indicative of the cash amounts that we would receive or pay to settle such transactions.

Deferred Income Taxes and Social Contribution

Income taxes in Brazil are calculated and paid on a legal entity basis, and there are no consolidated tax returns. Accordingly, we only recognize deferred tax assets, related to tax loss carryforwards and temporary differences, if it is likely that they will be realized on a legal entity basis.

We recognize and settle taxes on income based on the results of operations determined in accordance with the Brazilian Corporation Law, taking into consideration the provisions of Brazilian tax law, which are materially different from the amounts calculated for Brazilian GAAP and U.S. GAAP purposes. Under Brazilian GAAP and U.S. GAAP, we recognize deferred tax assets and liabilities based on the differences between the carrying amounts and the taxable bases of the assets and liabilities.

We regularly test deferred tax assets for impairment and recognize a provision for impairment losses when it is probable that these assets may not be realized, based on the history of taxable income, the projection of future taxable income, and the time estimated for the reversal of existing temporary differences. These projections require the use of estimates and assumptions. In order to project future taxable income, we need to estimate future taxable revenues and deductible expenses, which are subject to a variety of external and internal factors, such as economic trends, industry trends and interest rates, changes in business strategies, and changes in the type of services and products sold by our company. The use of different estimates and assumptions could result in the recognition of a provision for impairment losses for the entire or a significant portion of the deferred tax assets.

Employee Benefits

We record liabilities for employee benefits based on actuarial valuations which are calculated based on assumptions and estimates regarding discount rates, investment returns, inflation rates for future periods, mortality indices and projected employment levels relating to pension fund benefit liabilities. The accuracy of these assumptions and estimates will determine whether we have created sufficient reserves for the costs of accumulated pensions and healthcare plans, and the amount we are required to disburse each year to fund pension benefits. These assumptions and estimates are subject to significant fluctuations due to different external and internal factors, such as economic trends, social indicators, our capacity to create new jobs and our ability to retain our employees. All of these assumptions are reviewed at the end of each reporting period. If these assumptions and estimates are not accurate, we may be required to revise our reserves for pension benefits, which could materially impact our results of operations.

The Brazilian Accounting Pronouncements Committee has adopted amendments to CPC 33, *Employee Benefits*, that changed the accounting for defined benefit plans and termination benefits. This amendment eliminated the use of the corridor approach to recognizing actuarial gains and losses of defined benefit plans and required that actuarial gains and losses was recognized directly in the other comprehensive income component of shareholders' equity. This amendment became effective for periods ending on or after January 1, 2013. The revision

Table of Contents

of our accounting for defined benefit plans and termination benefits in compliance with this amendment had a negative impact on our shareholders' equity of R\$314 million (R\$207 million net of taxes) as of December 31, 2012. The adoption of this standard does not have any material impact as of December 31, 2011, 2010 or 2009.

Amortization of Intangible Assets

Intangible assets consist primarily of authorizations to provide personal mobile services and radio frequency licenses, licenses to use software and goodwill on the acquisition of investments, which is calculated based on expected future economic benefits.

Amortization of intangible assets, other than goodwill, is calculated under the straight-line method over (1) the effective term of the authorization to provide personal mobile services or of the radio frequency license, or (2) over a maximum period of five years in the case of software licenses.

We do not amortize goodwill in our consolidated statements of income and we are required to test goodwill for impairment at least on an annual basis.

Principal Factors Affecting Our Financial Condition and Results of Operations

Rate of Growth of Brazil's Gross Domestic Product and Demand for Telecommunications Services

As a Brazilian company with substantially all of our operations in Brazil, we are affected by economic conditions in Brazil. Brazilian GDP grew by an estimated 2.3% in 2013, and grew by 0.9% in 2012 and 2.7% in 2011. While we believe that growth in Brazil's GDP stimulates demand for telecommunications services, we believe that demand for telecommunications services is relatively inelastic in periods of economic stagnation and that the effect on our revenues of low growth or a recession in Brazil would not be material under foreseeable scenarios. However, a substantial and prolonged deterioration of economic conditions in Brazil could have a material adverse effect on the number of subscribers to our services and the volume of usage of our services by our subscribers and, as a result, our net operating revenue.

Based on information available from ANATEL, the number of fixed lines in service in Brazil increased from 34.7 million as of December 31, 2000 to 44.5 million as of April 30, 2013, the latest date for which such information has been made available by ANATEL, and the number of mobile subscribers in Brazil increased from 28.8 million as of December 31, 2000 to 271.1 million as of December 31, 2013. Although the demand for telecommunications services has increased substantially during the past ten years, the tastes and preferences of Brazilian consumers of these services have shifted.

During the two-year period ended December 31, 2013, the number of mobile subscribers in Brazil has grown at an average rate of 10.3% per year while the number of fixed lines in service in Brazil during the two-year period ended December 31, 2013, has declined by an average rate of 12.4% per year. As the incumbent provider of fixed-line services and a provider of mobile services in Region I and Region II, we are both a principal target and a beneficiary of this trend. During the two-year period ended December 31, 2013, the number of our mobile subscribers in Region II has grown at an average rate of 19.8% per year from 8.1 million at December 31, 2011 to 9.7 million at December 31, 2013 and the number of mobile subscribers in Region I has grown at an average rate of 11.3% per year from 27.1 million as of December 31, 2011 to 30.2 million at December 31, 2013, while the number of our fixed lines in service in Region II has declined by an average rate of 10.5% per year from 5.2 million at December 31, 2011 to 4.6 million at December 31, 2013 and the number of fixed lines in service in Region I of our subsidiary Telemar has declined by an average rate of 13.4% per year from 10.0 million at December 31, 2011 to 8.7 million at December 31, 2013.

Table of Contents

Demand for Our Telecommunications Services

Demand for Our Local Fixed-Line Services

Brazil's fixed-line penetration level is now similar to that of other countries with similar per capita income, and, as has happened in such other countries, the fixed-line telecommunications customer base has remained stable. Demand for local fixed-line services of our company has reached a plateau in recent years. Because the number of customers our company terminating their fixed-line services has exceeded new activations during this period, the number of our fixed lines in service in Region II declined by 0.8 million between December 31, 2010 and December 31, 2013 and the number of fixed lines in service in Region I of Telemar declined by 1.6 million. In addition, the new fixed lines that we have activated between December 31, 2010 and December 31, 2013 generally represent customers that have changed addresses or low-income customers from whom we generate revenues at a rate below our average revenue per customer.

We have sought to combat the general trend in the Brazilian telecommunications industry of substitution of mobile services in place of local fixed-line services by offering a variety of bundled plans that include mobile services, broadband services and *Oi TV* subscriptions to our fixed-line customers. As a result of these service offerings, we expect that the rate of decline in number of our fixed lines in service will be reduced. As of December 31, 2013, 35.2% of our fixed lines in service also subscribed for ADSL service. As of December 31, 2013, 7.6% of our local fixed-line customers subscribed for bundled service packages, which account for 28.9% of our post-paid mobile subscribers as each fixed-line subscriber may include multiple mobile devices in a bundled plan.

We are required under ANATEL regulations and our concession contracts to offer a basic service plan to our fixed-line residential customers that permits 200 minutes of usage of our fixed-line network to make local calls. A basic plan customer pays a monthly fee for this service, and when the customer makes local calls in excess of this limit, we charge the customer for the excess minutes on a per-minute basis. We offer alternative local fixed-line plans that include significantly larger numbers of minutes and charge higher monthly fees for these plans, although these monthly fees represent a discount from the amount that the customer would be charged under our basic plan if the customer used the number of minutes included in the alternative plan. As the number of our customers selecting these alternative plans has grown in response to our marketing and promotional efforts, we have recorded increased revenues for monthly subscription fees, offset by corresponding declines in revenues for the use of excess minutes. Subscribers to our alternative fixed-line plans represented 80.5% of our fixed lines in service as of December 31, 2013 as compared to 55.0% of the fixed lines in service of our company and Telemar as of December 31, 2010. We believe that our alternative local fixed-line plans contribute to a net increase in our local fixed-line revenue as many subscribers of our alternative fixed-line plans do not use their full monthly allocations of local minutes.

The substantial increase in the number of mobile service users in Brazil has also negatively impacted the use of our public telephones. As the incumbent local fixed-line service provider in Region I and Region II, we are required under ANATEL regulations and our concession contracts to meet specified targets with respect to the availability of public telephones throughout our concession area. However, as a larger portion of the population of Region I and Region II uses mobile handsets to make calls when not in proximity to a fixed-line telephone, use of public telephones of our company and Telemar declined by 80.0% from 2010 to 2013.

Demand for Our Mobile Services

Our customer base for mobile services has grown from 39.3 million at December 31, 2010 to 50.2 million at December 31, 2013. We believe that the primary reason that our customer base for mobile services has been the success of our marketing and promotion campaigns.

The market for mobile services is extremely competitive in each of the regions that we serve. During 2013, the average monthly churn rate of our mobile services segment was 4.2% per month. As a result, (1) we incur selling expenses in connection with marketing and sales efforts designed to retain existing mobile customers and attract new mobile customers, and (2) from time to time the discounts that we offer in connection with our promotional activities lead to charges against our gross operating revenue from mobile services. In addition, competitive pressures have in the past required us to introduce service plans under which the monthly and per-minute rates that we charge our mobile customers are lowered, reducing our average revenue per customer.

Table of Contents

We expect our overall mobile services business to continue to grow in terms of its customer base, traffic volumes and revenues from value-added services. However, due to market saturation, we expect future growth in our mobile services business to occur at lower rates than we have historically achieved.

Demand for Our Data Transmission Services

Our broadband services customer base (including the broadband customers of Telemar prior to the corporate reorganization) has grown from 3.2 million at December 31, 2010 to 5.9 million as of December 31, 2013, primarily as a result of (1) our marketing and promotional campaigns, (2) the growth in the number of households in Region I and Region II that own personal computers, and (3) a shift in consumer preferences that has led an increasing number of our fixed-line customers to value the data transmission speeds available through our broadband services. We expect the number of our fixed-line customers that subscribe to our broadband services to continue to increase in the near term.

Effects of Expansion of Mobile Data Transmission Services

In December 2007, we acquired the authorizations and radio frequency licenses necessary for us to commence the offering of 3G services throughout Region II and TNL PCS acquired the authorizations and radio frequency licenses necessary for us to commence the offering of 2G services in the State of São Paulo and 3G services throughout Region I and Region III. In June 2012, we acquired the authorizations and radio frequency licenses necessary for us to commence the offering of 4G services throughout Brazil. During 2011, 2012 and 2013, we undertook extensive capital expenditure projects to install the network equipment necessary to expand our offerings of these services.

In 2013, our mobile data transmission services, consisting of 2G, 3G and 4G services to mobile handsets and mini-modems, captured approximately 79,000 net additions (calculated based on the number of subscribers at the end of a period less the number of subscribers at the beginning of that period). We began offering 4G services in 24 municipalities, covering 23.1% of the population of Brazil, during 2013, and we increased the number of municipalities in which we offered 3G services to 891, covering 68.0% of the population of Brazil, as of December 31, 2013 from 692 as of December 31, 2012. In November 2013, we launched our *Oi Conectado* post-paid bundled voice, data and SMS text messaging plan as part of our efforts to expand our base of mobile data transmission customers. We expect that these services, together with our 4G services when commenced, will generate significant additions to our mobile customer base and lead to long-term increases in our revenues and operating income before financial income (expenses) and taxes.

The aggregate cost of our 3G authorizations and radio frequency licenses and our 2G authorizations and radio frequency licenses in Region III was R\$3,766 million, which we will pay to ANATEL in installments through 2023. The cost of our 4G authorizations and radio frequency licenses was R\$368 million, which we will pay to ANATEL in installments through 2020.

During 2013, 2012 and 2011, Oi Mobile and TNL PCS invested R\$1,392 million, R\$971 million and R\$851 million, respectively, in the network equipment necessary to offer these services, which has increased in our depreciation expenses. We financed the purchase and installation of our network equipment through loans and vendor financing.

Under our 3G radio frequency licenses, we are required to meet certain service expansion obligations that will require capital expenditures through 2016. Under our 4G radio frequency licenses, we are required to meet certain service expansion obligations that will require capital expenditures through 2019. If we are unable to fund these capital expenditures through our operating cash flows, we may incur additional indebtedness or vendor financing obligations, which would increase our outstanding indebtedness and financial expenses.

Table of Contents
Effects of Divestment of Non-Core Assets

Beginning in 2012, we entered into various transactions to monetize non-essential assets and acquire the services related to these assets at more favorable financial terms, with an aim to reduce future capital expenditures and maintenance expenses.

In December 2012, we sold our wholly-owned subsidiary Sumbe, which owned approximately 1,200 communications towers and rooftop antennae used in our mobile services business, to São Paulo SPE Locação de Torres Ltda. for R\$516 million. Contemporaneously with the sale of these communications towers and rooftop antennae, we entered into an operating lease agreement with a term of 15 years with Sumbe permitting us and our subsidiaries to continue to use space on these communications towers and rooftop antennae for our mobile services business.

In August 2013, we completed the assignment of the right to use 4,226 fixed-line communications towers that formed part of our infrastructure for commercial operations by companies whose core operations consist of providing transmission tower and radiofrequency management and maintenance services. Upon the completion of these assignments, we received proceeds of approximately R\$1,087 million. We have entered into agreements to lease the communications towers from the assignees for 20-year terms (renewable for another 20 years), effective upon completion of the assignments.

In November 2013, we completed the assignment of the right to use 2,113 fixed-line communications towers that formed part of our infrastructure for commercial operations by companies whose core operations consist of providing transmission tower and radiofrequency management and maintenance services. Upon the completion of these assignments, we received proceeds of approximately R\$687 million. We have entered into agreements to lease the communications towers from the assignees for 20-year terms (renewable for another 20 years), effective upon completion of the assignments.

In December 2013, we and our subsidiary BrTI sold all of our equity interests in GlobeNet (other than Brasil Telecom de Venezuela S.A.) to BTG Pactual YS Empreendimentos e Participações. On January 17, 2014, the sale was concluded for an aggregate amount of R\$1,779 million (based on the U.S. dollar-*real* exchange rate on January 15, 2014), resulting in a gain of approximately R\$1,497 million after deducting the book value of the assets and related costs of approximately R\$1,497 million. GlobeNet's principal assets consist of 22,500 kilometers of fiber optic submarine cables, composed of two rings of protected submarine cables, linking connection points between the United States, Bermuda, Colombia and Brazil. As part of this transaction, GlobeNet will supply guaranteed submarine cable capacity to us and our subsidiaries at a fixed price for a term of 13 years.

In December 2013, we entered into an agreement to sell all of our equity interests in a subsidiary that owns 2,007 mobile telecommunications towers to SBA Torres Brasil, Ltda. in exchange for R\$1,525 million, subject to the completion of certain customary conditions precedent. The parties have also agreed that, upon the transfer of such equity interests, we shall enter into long-term lease agreements to permit us to continue to use space on these communications towers for our mobile services business. We expect to complete this transaction by the first quarter of 2014.

As a result of these transactions, we have received cash related to these transactions and recorded gains on disposals of these assets of R\$200 million during 2012 and R\$1,497 million during 2013. As a result of these transactions, the amount of property and equipment that we record has been reduced, and consequently we will no longer record depreciation and amortization expenses relating to these assets nor will we be required to maintain these assets. As a result of our entering lease and other agreements to continue to use these assets in the provision of our services, we expect our lease and related expenses to increase in future periods.

Effects of Competition on the Rates that We Realize and the Discounts We Record

The Brazilian telecommunications industry is highly competitive. The competitive environment is significantly affected by key trends, including the convergence of technology and services enables telecommunications service providers that were previously limited to providing a single service to provide services in other industry segments, such as in the case of broadband services provided by cable television service providers and by mobile service

Table of Contents

providers (using 3G technology) and in the case of traditional fixed-voice services transmitted by mobile telecommunications service providers.

In response to these competitive pressures, (1) we may offer our services at rates below the rate caps established by ANATEL, and (2) from time to time we offer our services with promotional discounts or offer additional complimentary services with the purchase of some of our services. We record the services sold at the rates established under our service plans or at rates approved by ANATEL and record the amount of these services represented by the promotional discounts or delivered on a complimentary basis as discounts and returns in our income statement.

Effects of Adjustments to Our Regulated Rates and Inflation

Telecommunications services rates are subject to comprehensive regulation by ANATEL. Our rates for local fixed-line services, domestic long-distance services, mobile services, interconnection to our fixed-line network, and EILD and SLD services are subject to regulation by ANATEL. We are required to obtain ANATEL approval prior to offering new alternative fixed-line or mobile plans. The rates established or approved by ANATEL for our services act as caps on the prices that we charge for these services, and we are permitted to offer these services at a discount from the rates approved by ANATEL. After ANATEL establishes or approves rate caps for these services, these rate caps are subject to annual adjustment based on the rate of inflation, as measured by the IST. Rate caps for local fixed-line plans are adjusted by inflation, as measured by the IST, less an amount that serves as a proxy for productivity gains achieved by our company and the local fixed-line services industry as a whole.

Because substantially all of our cost of services and operating expenses are incurred in *reais* in Brazil, these rate increases act as a natural hedge against inflation and, as a result, our operating margins have not been materially affected by inflation. However, because these rate adjustments are only made on an annual basis, in periods of severe inflation, we may not be able to pass our increased costs through to our customers as incurred.

A significant portion of our *real*-denominated debt bears interest at the TJLP or the CDI rate, which are partially adjusted for inflation, and the ICPA rate, an inflation index, and, as a result, inflation results in increases in our interest expenses and debt service obligations.

Effects of Claims by ANATEL that Our Company Has Not Fully Complied with Our Quality of Service and Other Obligations

As a fixed-line service provider, we must comply with the provisions of the General Plan on Quality Goals. As a public regime service provider, we must comply with the network expansion and modernization obligations under the General Plan on Universal Service and our concession agreements. Our personal mobile services authorizations set forth certain network expansion obligations and targets and impose obligations on us to meet quality of service standards. In addition, we must comply with regulations of general applicability promulgated by ANATEL, which generally relate to quality of service measures.

If we fail to meet quality goals established by ANATEL under the General Plan on Quality Goals, fail to meet the network expansion and modernization targets established by ANATEL under the General Plan on Universal Service and our concession agreements, fail to comply with our obligations under our personal mobile services authorizations or fail to comply with our obligations under other ANATEL regulations, we may be subject to warnings, fines, intervention by ANATEL, temporary suspensions of service or cancellation of our concessions and authorizations.

On an almost weekly basis, we receive inquiries from ANATEL requiring information from us on our compliance with the various service obligations imposed on us by our concession agreements. If we are unable to respond satisfactorily to those inquiries or comply with our service obligations under our concession agreements, ANATEL may commence administrative proceedings in connection with such noncompliance. We have received numerous notices of commencement of administrative proceedings from ANATEL, mostly due to our inability to achieve certain targets established in the General Plan on Quality Goals and the General Plan on Universal Service.

Table of Contents

At the time that ANATEL notifies us it believes that we have failed to comply with our obligations, we evaluate the claim and, based on our assessment of the probability of loss relating to that claim, may establish a provision. We vigorously contest a substantial number of the assessments made against us. As of December 31, 2013, the total estimated contingency in connection with all pending administrative proceedings brought by ANATEL against us in which we deemed the risk of loss as probable totaled R\$1,046 million and we had recorded an aggregate provision related to these proceedings in the same amount.

During 2013, we recorded provisions related to administrative proceedings brought by ANATEL in the amount of R\$66 million. Our provisions related to administrative proceedings brought by ANATEL generally have been sufficient to pay all amounts that we were ultimately required to pay with respect to claims brought by ANATEL.

Effects of Fluctuations in Exchange Rates between the Real and the U.S. Dollar

Substantially all of our cost of services and operating expenses are incurred in *reais* in Brazil. As a result, the appreciation or depreciation of the *real* against the U.S. dollar does not have a material effect on our operating margins. However, the costs of a substantial portion of the network equipment that we purchase for our capital expenditure projects are denominated in U.S. dollars or are U.S. dollar-linked. This network equipment is recorded on our balance sheet at its cost in *reais* based on the applicable exchange rate on the date the transfer of ownership, risks and rewards related to the purchased equipment occurs. As a result, depreciation of the *real* against the U.S. dollar results in this network equipment being more costly in *reais* and leads to increased depreciation expenses. Conversely, appreciation of the *real* against the U.S. dollar results in this network equipment being less costly in *reais* and leads to reduced depreciation expenses.

Our consolidated indebtedness denominated in U.S. dollars and euros represented 34.4% and 6.7%, respectively, of our consolidated outstanding indebtedness at December 31, 2013. As a result, when the *real* appreciates against the U.S. dollar or the euro:

the interest costs on our indebtedness denominated in U.S. dollars or euros declines in *reais*, which positively affects our results of operations in *reais*;

the amount of our indebtedness denominated in U.S. dollars or euros declines in *reais*, and our total liabilities and debt service obligations in *reais* decline; and

our net interest expenses tend to decline as a result of foreign exchange gains that we record.

A depreciation of the *real* against the U.S. dollar has the converse effects.

In order to mitigate the effects of foreign exchange variations, we have established a hedging policy under which our exposure to foreign exchange variations is subject to limits set by our board of directors. In compliance with this policy, we typically enter into derivative transactions to swap the foreign exchange rate variation for variations of the CDI. At December 31, 2013, we had entered into hedging transactions in respect of 99.6% of our consolidated indebtedness affected by exchange rate variations. The purpose of these hedging transactions is to seek to match the currency of our debt with that of our revenues to mitigate foreign exchange risk.

Effect of Level of Indebtedness and Interest Rates

At December 31, 2013, our total outstanding indebtedness on a consolidated basis was R\$35,854 million. The level of our indebtedness results in significant interest expenses that are reflected in our income statement. Financial expenses consist of interest expense, exchange variations of U.S. dollar- and other foreign currency-denominated debt, foreign exchange losses or gains, and other items as set forth in note 7 to our consolidated financial statements. In 2013, we recorded total financial expenses of R\$4,650 million on a consolidated basis, of which R\$2,452 million consisted primarily of interest expenses on loans and debentures payable to third parties and R\$2,013 million consisted of losses from monetary correction and exchange differences on third-party loans and financings. The interest rates that we pay depend on a variety of factors, including prevailing Brazilian and international interest rates and risk assessments of our company, our industry and the Brazilian economy made by potential lenders to our

Table of Contents

company, potential purchasers of our debt securities and the rating agencies that assess our company and its debt securities.

Standard & Poor's, Moody's and Fitch maintain ratings of our company and our debt securities. Any ratings downgrades in the future would likely result in increased interest and other financial expenses relating to loans and financings, including debt securities, and could adversely affect our ability to obtain such financing on satisfactory terms or in amounts required by us.

Seasonality

We do not have material seasonal operations.

Recent Developments

Merger of TNL PCS into Oi Mobile

On February 1, 2014, TNL PCS merged into Oi Mobile. As a result of this merger, Oi Mobile became our sole mobile services provider and mobile data and subscription television provider.

Proposed Business Combination

On October 1, 2013, we entered into a memorandum of understanding, or the MOU, with Portugal Telecom, AG Telecom, LF Tel, PASA, EDSP, Bratel Brasil, BES and Ongoing, in which we and they agreed to the principles governing a series of transactions. For more information on the proposed business combination and related transactions, see Item 4. Information on the Company Our History and Development Proposed Business Combination.

In connection with the business combination, on February 19, 2014, we entered into (1) the PT Portugal subscription agreement, under which Portugal Telecom agreed to subscribe for our common and preferred shares as part of the Oi capital increase by contributing all of the share capital of PT Portugal to our company, and (2) the Caravelas subscription agreement, under which Caravelas agreed to subscribe for our common and preferred shares as part of the Oi capital increase with a purchase price equivalent to the difference between R\$2.0 billion and the amount of subscription orders placed in the offering by TmarPart's shareholders, other than Bratel Brasil. The obligations of the parties to each of these subscription agreements are subject to the satisfaction of a variety of conditions. For more information regarding the PT Portugal subscription agreement and the Caravelas subscription agreement, see Item 4. Information on the Company Our History and Development Proposed Business Combination.

Table of Contents**Results of Operations**

The following discussion of our results of operations is based on our consolidated financial statements prepared in accordance with Brazilian GAAP. The discussion of the results of our business segments is based upon financial information reported for each of the segments of our business, as presented in the table below.

The following tables set forth the operating results of each of our segments and the reconciliation of these results of our segments to our consolidated income statement. This segment information was prepared on the same basis as the information that our senior management uses to allocate resources among segments and evaluate their performance. We evaluate and manage the performance of our segments based on information prepared in accordance with Brazilian GAAP and reflected in our consolidated financial statements.

Net income	R\$ 1,493	R\$ 1,785	(16.4)

Net Operating Revenue

Net operating revenue increased by 13.0% in 2013, principally due to a 12.7% increase in net operating revenue of our fixed-line and data transmission services segment, an 11.0% increase in net operating revenue of our mobile services segment, and a 59.6% increase in net operating revenue of our other segment. Net operating revenue generated by intersegment sales, which are eliminated in the consolidation of our financial statements, increased by 17.7% in 2013.

Net Operating Revenue of Our Fixed-Line and Data Transmission Services Segment

The following table sets forth the components of the net operating revenue of our fixed-line and data transmission services segment, as well as the percentage change from the prior year, for the years ended December 31, 2013 and 2012.

	Year Ended December 31,		
	2013	2012	% Change

Edgar Filing: OI S.A. - Form 20-F

(in millions of *reais*, except percentages)

Local fixed-line services	R\$ 8,360	R\$ 7,645	9.4
---------------------------	-----------	-----------	-----

Table of Contents

	Year Ended December 31,		
	2013	2012	% Change
	(in millions of reais, except percentages)		
Long-distance fixed-line services	2,947	3,013	(2.2)
Remuneration for the use of the fixed-line network	1,299	1,181	10.0
Data transmission services	7,088	5,611	26.3
Other fixed-line services	708	648	9.4
Net operating revenue	R\$ 20,401	R\$ 18,098	12.7

Net operating revenue of our fixed-line and data transmission services segment increased by 12.7% in 2013, principally due to (1) a 26.3% increase in net operating revenue from data transmission services, (2) a 9.4% increase in net operating revenue from local fixed-line services and (3) a 10.0% increase in the remuneration for the use of the fixed-line network.

Net Operating Revenue from Local Services

Net operating revenue from local fixed-line services increased by 9.4% in 2013, primarily due to our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which generated net operating revenue from local fixed-line services of R\$5,453 million during 2013 compared to R\$4,650 million during the ten-month period ended December 31, 2012 (the period of 2012 during which Oi consolidated the results of Telemar and its subsidiaries), the effects of which were partially offset by a 2.9% decline in net operating revenue from local fixed-line services of our legacy operations to R\$2,907 million during 2013 from R\$2,995 during 2012, principally as a result of a 2.3% decline in the average number of lines in service of our legacy operations to 6.6 million during 2013 from 6.8 million during 2012, as a result of the general trend in the Brazilian telecommunications industry to substitute mobile services in place of local fixed-line services.

Net Operating Revenue from Long-Distance Services

Net operating revenue from long-distance services declined by 2.2% in 2013, primarily due a 10.6% decline in net operating revenue from long-distance services of our legacy operations to R\$1,006 million during 2013 from R\$1,126 million during 2012, principally as a result of a 9.2% decline in the total number of long-distance minutes of our legacy operations, primarily as a result of (1) aggressive discounting campaigns undertaken by our competitors, (2) the effects of the 2.3% decline in the number of fixed-line customers of our legacy operations, who are more likely to choose our long-distance services than customers of other fixed-line providers, and (3) the increase in the proportion of fixed line customers of our legacy operations that subscribe to alternative plans, which include long-distance fixed line minutes as part of the monthly subscription fee, resulting in a reduction in the number of minutes that we record as long-distance services. The effects of this decline were partially offset by the effects of our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which generated net operating revenue from long-distance services of R\$1,940 million during 2013 compared to R\$1,887 million during the ten-month period ended December 31, 2012.

Net Operating Revenue from Remuneration for the Use of the Fixed-Line Network

Net operating revenue from remuneration for the use of the fixed-line network increased by 10.0% in 2013, primarily due to our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which generated net operating revenue from remuneration for the use of the fixed-line network of R\$849 million during 2013 compared to R\$732 million during the ten-month period ended December 31, 2012.

Of our net operating revenue from remuneration for the use of the fixed-line network, 42.1% in 2013 and 38.8% in 2012 represented interconnection fees paid by our mobile services subsidiaries for the use of our fixed-line network to complete mobile-to-fixed calls and was eliminated in the consolidation of our financial statements.

Table of Contents*Net Operating Revenue from Data Transmission Services*

Net operating revenue from data transmission services increased by 26.3% in 2013, primarily due to (1) a 24.7% increase in net operating revenue from ADSL subscriptions, (2) a 47.2% increase in net operating revenue from commercial data transmission services, and (3) a 17.7% increase in net operating revenue from data services.

Net operating revenue of our ADSL subscriptions increased by 24.7% to R\$2,694 million during 2013 from R\$2,161 million during 2012, primarily due to (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which generated net operating revenue from ADSL subscriptions of R\$1,613 million during 2013 compared to R\$1,172 million during the ten-month period ended December 31, 2012, and (2) a 9.4% increase in net operating revenue from ADSL subscriptions of our legacy operations to R\$1,081 million during 2013 from R\$989 million during 2012, principally as a result of an 8.5% increase in the average number of ADSL subscriptions of our legacy operations to approximately 2.3 million during 2013 from approximately 2.1 million during 2012, and a 0.8% increase in the average net operating revenue per subscriber of our legacy operations. As of December 31, 2013, our ADSL customer base represented 33.9% of our total fixed lines in service as compared to 30.4% as of December 31, 2012.

Net operating revenue of our commercial data transmission services increased by 47.2%, principally as a result of our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which generated net operating revenue from commercial data transmission services of R\$1,102 million during 2013 compared to R\$542 million during the ten-month period ended December 31, 2012, principally as a result of increased demand for these services, including requests for increased capacity by our customers, particularly from public entities and financial institutions. Of our net operating revenue from commercial data transmission services, 23.2% during 2013 and 17.0% during 2012 represented fees paid by our mobile services subsidiaries and was eliminated in the consolidation of our financial statements.

Net operating revenue of our data services increased by 17.8%, principally as a result of (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which generated net operating revenue from data services of R\$1,239 million during 2013 compared to R\$966 million during the ten-month period ended December 31, 2012, and (2) an 8.9% increase in net operating revenue from data services of our legacy operations to R\$1,276 million during 2013 from R\$1,172 million during 2012, principally as a result of the increased demand for these services from our legacy operations, particularly from public entities, banks and card payment companies.

Net Operating Revenue

As a result of the foregoing, net operating revenue of our fixed-line and data transmission services segment increased by 12.7% to R\$20,401 million in 2013 from R\$18,098 million in 2012.

Net Operating Revenue of Our Mobile Services Segment

The following table sets forth the components of the net operating revenue of our mobile services segment, as well as the percentage change from the prior year, for the years ended December 31, 2013 and 2012.

	Year Ended December 31,		
	2013	2012	% Change
	(in millions of reais, except percentages)		
Mobile telephone services	R\$ 6,113	R\$ 4,931	24.0
Remuneration for the use of the mobile network	5,491	5,516	(0.4)
Sales of handsets and accessories	582	537	8.3
Net operating revenue	R\$ 12,187	R\$ 10,983	11.0

Net operating revenue of our mobile services segment increased by 11.0% in 2013, principally due to a 24.0% increase in net operating revenue from mobile services.

Table of Contents*Net Operating Revenue from Mobile Services*

Net operating revenue from mobile services increased by 24.0% during 2013, primarily due to (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which generated net operating revenue from mobile services of R\$4,911 million during 2013 compared to R\$3,910 million during the ten-month period ended December 31, 2012, (2) a 17.8% increase in net operating revenue from mobile services of Oi's legacy operations to R\$1,202 million during 2013 from R\$1,021 million in 2012, principally as a result of an 18.6% increase in net operating revenue generated by the pre-paid plans of our legacy operations to R\$560 million during 2013 from R\$472 million during 2012, an increase in net operating revenue generated by roaming charges of our legacy operations to R\$68 million during 2013 from R\$13 million during 2012, and a 7.7% increase in net operating revenue generated by the post-paid plans of our legacy operations, including our *Oi Controle* plans, to R\$576 million during 2013 from R\$535 million during 2012.

The average number of our post-paid mobile customers, including customers that subscribe to our *Oi Controle* plans, increased by 36.7% to approximately 8.4 million during 2013 from approximately 6.1 million during 2012, primarily as a result of (1) the inclusion in our customer base of 4.7 million post-paid customers of Telemar and its subsidiaries as from February 27, 2012, and (2) the success of commercial and operational initiatives focused on increasing sales of our premium services, such as data services and value added services markets, that are available to subscribers of our plans.

The average number of our pre-paid mobile customers increased by 17.3% to approximately 41.5 million during 2013 from approximately 35.3 million during 2012, primarily as a result of (1) the inclusion in our customer base of 32.5 million pre-paid customers of Telemar and its subsidiaries as from February 27, 2012, and (2) our launch of new promotions that include bonus minutes for long distance calls, packages of data services and credits for use for our text messaging services.

Our average monthly net revenue per user (calculated based on the total revenue for the year divided by the monthly average customer base for the year divided by 12) declined by 7.7% to R\$20.4 in 2013 from R\$22.1 in 2012.

Net Operating Revenue from Remuneration for the Use of the Mobile Network

Net operating revenue from remuneration for the use of the mobile network declined by 0.4% during 2013. Of the net operating revenue from remuneration for the use of the mobile network, 58.4% in 2013 and 59.4% in 2012 represented interconnection fees paid by Oi and our fixed-line subsidiaries for the use of our mobile subsidiaries' network to complete fixed-to-mobile calls and was eliminated in the consolidation of our financial statements.

Sales of Handsets and Accessories

Net operating revenue from sales of handsets and accessories increased by 8.3% in 2013, primarily as a result of our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which generated net operating revenue from sales of handsets and accessories of R\$574 million during 2013 compared to R\$525 million during the ten-month period ended December 31, 2012, principally as a result of our strategy of selling premium mobile devices, such as smart phones, as part of its efforts to acquire new high value customers and retain existing ones.

Net Operating Revenue

As a result of the foregoing, net operating revenue of our mobile services segment increased by 11.0% to R\$12,187 million in 2013 from R\$10,983 million in 2012.

Table of Contents**Cost of Sales and Services**

Cost of sales and services increased by 20.4% in 2013, principally due to a 28.9% increase in cost of sales and services of our mobile services segment, a 9.6% increase in cost of sales and services of our fixed-line and data transmission services segment, and a 97.5% increase in cost of sales and services of our other segment.

Of the cost of sales and services of our fixed-line and data transmission services segment, 27.1% in 2013 and 26.5% in 2012 represented interconnection fees paid by Oi for the use of the mobile networks of TNL PCS and Oi Mobile to complete fixed-to-mobile calls. These fees were eliminated in the consolidation of our financial statements.

Of the cost of sales and services of our mobile services segment, 16.4% in 2013 and 16.9% in 2012 represented (1) interconnection fees paid by TNL PCS and Oi Mobile for the use of Oi's fixed-line network to complete mobile-to-fixed calls, and (2) fees paid by TNL PCS and Oi Mobile for EILD services. These fees were eliminated in the consolidation of our financial statements.

The following table sets forth the components of our cost of sales and services, as well as the percentage change from the prior year, for the years ended December 31, 2013 and 2012.

	Year Ended December 31,		
	2013	2012	% Change
	(in millions of reais, except percentages)		
Interconnection	R\$ 3,966	R\$ 3,915	1.3
Depreciation and amortization	3,661	2,639	38.7
Grid maintenance service	2,372	2,029	16.7
Rental and insurance	1,632	1,293	26.3
Personnel	1,090	576	89.1
Costs of handsets and accessories	515	507	1.6
Concession contract renewal fee	94	121	(22.8)
Other costs of sales and services	1,930	1,590	21.4
Total cost of sales and services	R\$ 15,259	R\$ 12,670	20.4

Cost of Sales and Services of Our Fixed-Line and Data Transmission Services Segment

Cost of sales and services of our fixed-line and data transmission services segment increased by 9.6% in 2013, principally due to:

a 26.3% increase in depreciation and amortization costs to R\$1,828 million during 2013 from R\$1,447 million during 2012, primarily as a result of our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which incurred depreciation and amortization costs of R\$1,439 million during 2013 compared to R\$861 million during the ten-month period ended December 31, 2012; and

a 17.5% increase in network maintenance costs to R\$2,147 million during 2013 from R\$1,827 million during 2012, primarily as a result of (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which incurred network maintenance costs of R\$1,455 million during 2013 compared to R\$1,168 million during the ten-month period ended December 31, 2012, and (2) our negotiations with third-party network maintenance providers focused on improving the quality of our broadband network to permit it to improve the services that we provide to our customers; and

a 20.4% increase in rental and insurance costs to R\$1,569 million during 2013 from R\$1,303 million during 2012, primarily as a result of (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which incurred rental and

Edgar Filing: OI S.A. - Form 20-F

insurance costs of R\$1,079 million during 2013 compared to R\$778 million during the ten-month period ended December 31, 2012, and (2) an increase in real estate

Table of Contents

rental and network infrastructure leasing costs of our legacy operations as a result of our sales of non-strategic assets which we now rent or lease.

The effects of these factors were partially offset by a 3.2% decline in interconnection costs to R\$5,395 million during 2013 from R\$5,575 million during 2012, primarily as a result of (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which incurred interconnection costs of R\$3,841 million during 2013 compared to R\$3,925 million during the ten-month period ended December 31, 2012, and (2) decreases in our VU-M rates beginning in February 2013, which reduced our costs to complete fixed-to-mobile calls, and (3) a 2.3% decline in the average number of lines in service of our legacy operations.

The gross profit of our fixed-line and data transmission services segment increased by 17.8% to R\$8,030 million in 2013 from R\$6,816 million in 2012. As a percentage of net operating revenue of this segment, gross profit increased to 39.4% in 2013 from 37.7% in 2012.

Cost of Sales and Services of Our Mobile Services Segment

Cost of sales and services of our mobile services segment increased by 28.9% in 2013, principally due to:

a 54.2% increase in depreciation and amortization costs to R\$1,816 million during 2013 from R\$1,179 million during 2012, primarily as a result of (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which incurred depreciation and amortization costs of R\$1,553 million during 2013 compared to R\$965 million during the ten-month period ended December 31, 2012, and (2) the commencement of 4G services by our legacy operation and the growth of this network, which has increased the amount of amortizable license costs and depreciable property, plant and equipment of our legacy operations;

an 84.9% increase in rental and insurance costs to R\$1,142 million during 2013 from R\$618 million during 2012, primarily as a result of (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which incurred rental and insurance costs of R\$791 million during 2013 compared to R\$292 million during the ten-month period ended December 31, 2012, and (2) an increase in real estate rental and network infrastructure leasing costs of our legacy operations as a result of our sales of non-strategic assets which we now rent or lease; and

a 12.1% increase in interconnection costs to R\$2,515 million during 2013 from R\$2,244 million during 2012, primarily as a result of (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which incurred interconnection costs of R\$1,966 million during 2013 compared to R\$1,683 million during the ten-month period ended December 31, 2012, and (2) an increase in the total number of minutes used by the mobile customers of our legacy operations to make calls to customers of mobile providers for which we pay interconnection fees at the mobile providers' VU-M rates, as a result of an 8.2% increase in the average number of mobile subscribers of our legacy operations, the effects of which were partially offset by decreases in the VU-M rates charged by mobile providers beginning in February 2013.

The gross profit of our mobile services segment declined by 7.9% to R\$4,934 million in 2013 from R\$5,355 million in 2012. As a percentage of net operating revenue of this segment, gross profit declined to 40.5% in 2013 from 48.8% in 2012.

Cost of Sales and Services of Our Other Segment

Cost of sales and services of our other segment increased by 97.5% in 2013, principally due to:

a 96.9% increase in third-party services costs to R\$488 million during 2013 from R\$248 million during 2012, primarily as a result of a R\$251 million increase in the cost of pay-TV content acquisitions as a result of our expansion of these services; and

Table of Contents

a 105.2% increase in personnel costs to R\$322 million during 2013 from R\$157 million during 2012, primarily as a result of an increase in the number of employees of our call center and increases in the compensation of some of our employees as a result of the renegotiation of some of our collective bargaining agreements at the end of 2012.

The gross profit of our other segment increased by 30.1% to R\$779 million in 2013 from R\$599 million in 2012. As a percentage of net operating revenue of this segment, gross profit declined to 45.8% in 2013 from 56.2% in 2012.

Gross Profit

As a result of the foregoing, our consolidated gross profit increased by 5.4% to R\$13,163 million in 2013 from R\$12,491 million in 2012. As a percentage of net operating revenue, gross profit declined to 46.3% in 2013 from 49.6% in 2012.

Operating Expenses

Selling Expenses

Selling expenses increased by 14.7% in 2013, principally due to (1) a 19.1% increase in selling expenses of our fixed-line and data transmission services segment, and (2) a 16.0% increase in selling expenses of our mobile services segment.

Fixed-Line and Data Transmission Services Segment

Selling expenses of our fixed-line and data transmission services segment increased by 19.1% in 2013, principally due to:

a 31.5% increase in call center expenses to R\$1,078 million during 2013 from R\$820 million during 2012, primarily as a result of (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which incurred call center expenses of R\$552 million during 2013 compared to R\$417 million during the ten-month period ended December 31, 2012, and (2) the renegotiation of some collective bargaining agreements by our contact center and expenditures related to service quality campaigns conducted to support our broadband service; and

an 86.1% increase in provision for doubtful accounts to R\$412 million during 2013 from R\$222 million during 2012, primarily as a result of (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which incurred provision for doubtful accounts of R\$214 million during 2013 compared to R\$123 million during the ten-month period ended December 31, 2012, and (2) the increase in the percentage of accounts receivable of our legacy operations that we record as a provision based on an increase in the rate of delinquency of our fixed-line customers.

As a percentage of net operating revenue of this segment, selling expenses increased to 17.2% in 2013 from 16.3% in 2012.

Mobile Services Segment

Selling expenses of our mobile services segment increased by 16.0% in 2013, principally due to:

a 60.1% increase in provision for doubtful accounts to R\$425 million during 2013 from R\$266 million during 2012, primarily as a result of (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which incurred provision for doubtful accounts of R\$330 million during 2013 compared to R\$194 million during the ten-month period ended December 31, 2012, and (2) the increase in the percentage of accounts receivable of our legacy operations that we record as a provision based on an

Table of Contents

increase in the rate of delinquency, mainly as a result of the growth of the mobile customer base our legacy operations; and

a 40.4% increase in publicity and advertising expenses to R\$461 million during 2013 from R\$328 million during 2012, primarily as a result of (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which incurred publicity and advertising expenses of R\$360 million during 2013 compared to R\$245 million during the ten-month period ended December 31, 2012, and (2) an increase in expenditures on our advertising campaigns to launch to promote the *Oi Galera* mobile campaign and expenditures on advertising campaigns to promote Oi at Rock in Rio.

The effects of these factors was partially offset by a 12.0% decline in sales commission expenses to R\$808 million during 2013 from R\$918 million during 2012, primarily as a result of (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which incurred sales commission expenses of R\$627 million during 2013 compared to R\$637 million during the ten-month period ended December 31, 2012, and (2) our efforts to improve our franchise commission policy which resulted in the restructuring of the franchise network based on sales efficiency and quality, which reduced the total number of franchisees.

As a percentage of net operating revenue of this segment, selling expenses increased to 19.8% in 2013 from 18.9% in 2012.

General and Administrative Expenses

General and administrative expenses increased by 17.3% during 2013, principally due to a 34.9% increase in general and administrative expenses of our mobile services segment, a 9.9% increase in general and administrative expenses of our fixed-line segment, and a 50.1% increase in general and administrative expenses of our other segment.

Fixed-Line and Data Transmission Services Segment

General and administrative expenses of our fixed-line and data transmission services segment increased by 9.9% in 2013, principally due to:

a 16.8% increase in third-party service expenses to R\$1,392 million during 2013 from R\$1,192 million during 2012, primarily as a result of our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which incurred third-party service expenses of R\$826 million during 2013 compared to R\$635 million during the ten-month period ended December 31, 2012;

a 30.8% increase in depreciation and amortization expenses to R\$476 million during 2013 from R\$364 million during 2012, primarily as a result of our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which incurred depreciation and amortization expenses of R\$263 million during 2013 compared to R\$186 million during the ten-month period ended December 31, 2012; and

a 38.2% increase in rental and insurance expenses to R\$128 million during 2013 from R\$93 million during 2012, primarily as a result of our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which incurred rental and insurance expenses of R\$106 million during 2013 compared to R\$66 million during the ten-month period ended December 31, 2012.

As a percentage of net operating revenue of this segment, general and administrative expenses declined to 11.7% in 2013 from 12.0% in 2012.

Mobile Services Segment

General and administrative expenses of our mobile services segment increased by 34.9% in 2013, principally due to:

Table of Contents

a 52.2% increase in rental and insurance costs to R\$258 million during 2013 from R\$170 million during 2012, primarily as a result of (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which incurred rental and insurance costs of R\$211 million during 2013 compared to R\$168 million during the ten-month period ended December 31, 2012, and (2) an increase in rental and insurance costs of our legacy operations to R\$47 million during 2013 from R\$1 million during 2012, principally due to an increase in real estate rental and administrative infrastructure leasing expenses of our legacy operations as a result of our sales of non-strategic assets;

a 27.6% increase in third-party service costs to R\$387 million during 2013 from R\$304 million during 2012, primarily as a result of our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which incurred third-party service costs of R\$321 million during 2013 compared to R\$249 million during the ten-month period ended December 31, 2012; and

a 76.2% increase in personnel costs to R\$184 million during 2013 from R\$105 million during 2012, primarily as a result of (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which incurred personnel costs of R\$142 million during 2013 compared to R\$85 million during the ten-month period ended December 31, 2012, and (2) a 120.0% increase in personnel costs of our legacy operations to R\$43 million during 2013 from R\$19 million during 2012, principally due to an increase in the number of employees of our administrative operations and increases in the compensation of some of our employees as a result of the renegotiation of some of our collective bargaining agreements at the end of 2012.

As a percentage of net operating revenue of this segment, general and administrative expenses increased to 7.4% in 2013 from 6.1% in 2012.

Other Segment

General and administrative expenses of our other segment increased by 50.1% in 2013, principally due to a 115.4% increase in personnel costs to R\$144 million during 2013 from R\$67 million during 2012, primarily as a result of a 150.4% increase in personnel costs of our legacy operations to R\$120 million during 2013 from R\$48 million during 2012, principally due to an increase in the number of employees of our call center and increases in the compensation of some of our employees as a result of the renegotiation of some of our collective bargaining agreements at the end of 2012.

As a percentage of net operating revenue of this segment, general and administrative expenses declined to 14.3% in 2013 from 15.2% in 2012.

*Other Operating Expenses, Net**Other Operating Income*

Other operating income increased by 56.7% to R\$3,128 million in 2013 from R\$1,996 million in 2012, primarily as a result of income from the sale of assets of R\$1,497 million during 2013, principally due to our sale of GlobeNet. The effects of this factor were partially offset by a 45.1% decline in income from asset sales to R\$214 million during 2013 from R\$390 million during 2012.

Other Operating Expense

Other operating expenses increased by 1.7% to R\$1,913 million in 2013 from R\$1,880 million in 2012, primarily as a result of a R\$116 million reversal of employee and management profit sharing reversal accruals during 2013 compared to an accrual of R\$387 million during 2012, primarily as a result of the decline in the performance of indicators used to estimate this provision. The effects of this factor were partially offset by:

a 31.1% increase in taxes (other than income taxes) to R\$1,171 million during 2013 from R\$893 million during 2012, primarily as a result of (1) our consolidation of the results of Telemar and its subsidiaries as

Table of Contents

from February 27, 2012, which recorded taxes (other than income taxes) of R\$818 million during 2013 compared to R\$578 million during the ten-month period ended December 31, 2012, and (2) an increase in ICMS, PIS and COFINS taxes due to an increase in other revenues; and

a 547.2% increase in late-payment charges to R\$123 million during 2013 from R\$19 million during 2012, primarily as a result of our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which recorded late-payment charges of R\$102 million during 2013 compared to R\$3 million during the ten-month period ended December 31, 2012.

Operating Income before Financial Income (Expenses) and Taxes

As a result of the foregoing, our consolidated operating income before financial income (expenses) and taxes increased by 11.1% to R\$5,286 million in 2013 from R\$4,760 million in 2012. As a percentage of net operating revenue, operating income before financial income (expenses) and taxes increased to 18.6% in 2013 from 18.9% in 2012.

Fixed-Line and Data Transmission Services Segment

The operating income before financial income (expenses) and taxes of our fixed-line and data transmission services segment increased by 101.9% to R\$3,775 million in 2013 from R\$1,870 million in 2012. As a percentage of the net operating revenue of this segment, operating income before financial income (expenses) and taxes increased to 18.5% in 2013 from 10.3% in 2012.

Mobile Services Segment

The operating income before financial income (expenses) and taxes of our mobile services segment declined by 45.4% to R\$1,376 million in 2013 from R\$2,503 million in 2012. As a percentage of the net operating revenue of this segment, operating income before financial income (expenses) and taxes declined to 11.2% in 2013 from 22.8% in 2012.

Financial Expenses, Net*Financial Income*

Financial income declined by 39.6% to R\$1,375 million in 2013 from R\$2,275 million in 2012, primarily due to:

an 89.3% decline in exchange rate gains on foreign investments to R\$70 million during 2013 from R\$650 million during 2012, primarily as a result of a decrease in our balances invested in foreign currencies and the 14.6% depreciation of the *real* against the U.S. dollar during 2013 compared to the 8.9% depreciation of the *real* against the U.S. dollar during 2012; and

a 45.9% decline in income from short-term investments to R\$279 million during 2013 from R\$515 million during 2012, primarily as a result of a decrease in the average amount of our short-term investments.

Financial Expenses

Financial expenses increased by 3.5% to R\$4,650 million in 2013 from R\$4,491 million in 2012, primarily due to:

an 18.7% increase in interest on loans payable to third parties and interest on debentures to R\$2,452 million during 2013 from R\$2,066 million during 2012, primarily as a result of an increase in the average amount of our loans payable to third parties and debentures, principally as a result of our consolidation of the indebtedness of Telemar and its subsidiaries as from February 27, 2012; and

Table of Contents

a 26.2% increase in interest and inflation adjustments on other liabilities to R\$616 million during 2013 from R\$488 million during 2012, primarily as a result of (1) an increase in interest and inflation adjustments of our legacy operations primarily due to an increase in average amount of our other liabilities, and (2) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012, which recorded interest and inflation adjustments of R\$285 million during 2013 compared to R\$242 million during the ten-month period ended December 31, 2012.

The effects of these factors were partially offset by a 23.0% increase in gains on derivatives transactions to R\$1,159 million during 2013 from R\$942 million during 2012, primarily as a result of the 14.6% depreciation of the *real* against the U.S. dollar and the 19.7% depreciation of the *real* against the Euro during 2013 compared to the 8.9% depreciation of the *real* against the U.S. dollar and the 10.7% depreciation of the *real* against the Euro during 2012.

Income Tax and Social Contribution

The composite corporate statutory income tax and social contribution rate was 34% in each of 2013 and 2012. Income tax and social contribution expense declined by 31.6% to R\$519 million in 2013 from R\$759 million in 2012. Our effective tax rate was 25.3% in 2013 and 29.9% in 2012. The table below sets forth a reconciliation of the composite corporate statutory income tax and social contribution rate to our effective tax rate for each of the periods presented.

	Year Ended December 31,	
	2013	2012
Composite corporate statutory income tax and social contribution rate	34.0%	34.0%
Tax effects of equity method	0.3	0.2
Tax effects of interest on shareholders' equity		0.2
Tax effects of permanent exclusions (additions)	(7.1)	0.5
Tax incentives (SUDENE)	(1.5)	(6.1)
Utilization of tax loss carryforwards	(1.3)	
Tax effects of unrecognized deferred tax assets	4.6	1.6
Tax effects of recognized deferred tax assets		(0.3)
Tax effects of recognized income tax from prior years	(3.6)	
Effective rate	25.3%	29.9%

Our effective tax rate was 25.3% in 2013, primarily as a result of (1) the tax effect of permanent additions, primarily as a result of the net effects of permanent exclusion (additions) of prescribed dividends, nondeductible fines, tax incentives and sponsorships, which decreased our effective tax rate by 7.1%, (2) the tax effect of tax incentives provided by the Superintendency for the Development of the Northeast Region of Brazil (*Superintendência de Desenvolvimento do Nordeste*), or the SUDENE, resulting from a reduction in the basis of calculation of profit in the regions promoted by the SUDENE, which reduced our effective tax rate by 1.5%, (3) the tax effects of income tax from prior years, which reduced our effective tax rate by 3.6% and (4) the tax effect of our utilization of tax loss carryforwards, which reduced our the effective tax rate by 1.3%. The effects of these factors were partially offset by the tax effect of unrecognized deferred tax assets regarding legal entities that are not eligible to recognize tax credits on tax loss carryforwards, which increased our effective tax rate by 4.6%.

Our effective tax rate was 29.9% in 2012, primarily as a result of tax incentives provided by the SUDENE resulting from a reduction in the basis of calculation of profit in the regions promoted by SUDENE, which lowered our effective tax rate by 6.1%. These effects of this incentive was partially offset by (1) the tax effect of unrecognized deferred tax assets regarding legal entities that are not eligible to recognize tax credits on tax loss carryforwards, which increased our effective tax rate by 1.6%, and (2) the tax effect of permanent additions, primarily as a result of the net effects of permanent exclusion (additions) of prescribed dividends, nondeductible fines, tax incentives and sponsorships, which increased our effective tax rate by 0.5%.

Table of Contents**Net Income**

Our consolidated net income declined by 16.4% to R\$1,493 million in 2013 from R\$1,785 million in 2012. As a percentage of net operating revenue, net income declined to 5.3% in 2013 from 7.1% in 2012.

Year Ended December 31, 2012 Compared with Year Ended December 31, 2011

The following table sets forth the components of our consolidated income statement, as well as the percentage change from the prior year, for the years ended December 31, 2012 and 2011.

	Year ended December 31,		
	2012	2011	% Change
	(in millions of reais, except percentages)		
Net operating revenue	R\$ 25,161	R\$ 9,245	172.2
Cost of sales and services	(12,670)	(4,587)	176.3
Gross profit	12,491	4,659	168.2
Operating income (expenses)			
Selling expenses	(4,841)	(1,161)	316.9
General and administrative expenses	(2,993)	(1,445)	107.1
Other operating income (expenses), net	103	(486)	n.m.
Operating income before financial income (expenses) and taxes	4,760	1,567	203.7
Financial income	2,275	1,406	61.8

Net income	R\$ 1,785	R\$ 1,006	77.5

n.m.: Not meaningful.

Net Operating Revenue

The composition of gross operating revenue by category of service before deduction of value-added and other indirect taxes and discounts is discussed below. Prior to 2013, we did not determine net operating revenue for each category of service as we did not believe such information to be useful to investors.

Gross operating revenue increased by 143.2% in 2012, principally due to (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased the gross operating revenue by R\$23,293 million, (2) a 15.7% increase in gross operating revenue of our mobile services segment generated by our legacy operations, the effects of which were partially offset by a 2.3% decline in gross operating revenue of our fixed-line and data transmission services segment generated by our legacy operations.

Net operating revenue increased by 172.2% in 2012, principally due to (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased the net operating revenue by R\$16,204 million, and (2) a 16.2% increase in net operating revenue of our mobile services segment generated by our legacy operations, the effects of which were partially offset by a 5.8% decline in net operating revenue of our fixed-line and data transmission services segment generated by our legacy operations. Net

operating revenue generated by intersegment sales, which are eliminated in the consolidation of our financial statements, increased by 253.2% in 2012.

Table of Contents**Net Operating Revenue of Our Fixed-Line and Data Transmission Services Segment**

The following table sets forth the components of the gross operating revenue and net operating revenue of our fixed-line and data transmission services segment, as well as the percentage change from the prior year, for the years ended December 31, 2012 and 2011.

	Year Ended December 31,		
	2012	2011	% Change
(in millions of reais, except percentages)			
Local fixed-line services	R\$ 9,586	R\$ 4,310	122.4
Local fixed-to-mobile calls (VC-1)	2,750	1,373	100.3
Long-distance fixed-line services	2,883	1,392	107.1
Long-distance fixed-to-mobile calls (VC-2 and VC-3)	739	344	114.8
Remuneration for the use of the fixed-line network	1,228	484	153.7
Data transmission services	9,614	5,681	69.2
Public phones	132	156	(15.4)
Other fixed-line services	1,280	638	100.6
Total gross operating revenue	28,212	14,377	96.2
Value-added and other indirect taxes	(6,313)	(2,877)	119.5
Discounts and returns	(3,801)	(3,452)	10.1
Net operating revenue	R\$ 18,098	R\$ 8,048	124.9

Gross operating revenue of our fixed-line and data transmission services segment increased by 96.2% in 2012, principally due to our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased the gross operating revenue of this segment by R\$14,190 million, the effects of which were partially offset by the 2.3% decline in gross operating revenue of the legacy operations of this segment.

Gross Operating Revenue from Local Services

Gross operating revenue from local fixed-line services increased by 122.4% in 2012, primarily due to (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased gross operating revenue from local fixed-line services by R\$5,205 million, and (2) a 1.6% increase in gross operating revenue from local fixed-line services of our legacy operations.

Gross operating revenue from monthly subscription fees of our legacy operations increased by 7.0%, primarily as a result of the increase in the percentage of our fixed line customers that subscribe to alternative plans which include local and long-distance fixed line minutes as part of the monthly subscription fee, the effects of which were partially offset by a 3.4% decline in the average number of lines in service to 6.8 million in 2012 from 7.0 million during 2011, which occurred primarily as a result of the general trend in the Brazilian telecommunications industry to substitute mobile services in place of local fixed-line services.

Gross operating revenue from metered services charges of our legacy operations declined by 44.9%, principally due to the 45.5% decline in total billed minutes, which are the number of local minutes that exceed the monthly allowance under a customer's service plan, primarily as a result of (1) the decline in the average number of lines in service of our legacy operations, (2) the migration of fixed-line customers of our legacy operations from our basic service plans to our alternative plans that have higher monthly allowances of minutes, and (3) the migration of local traffic origination to mobile handsets.

Gross Operating Revenue from Local Fixed-to-Mobile Calls

Gross operating revenue from local fixed-to-mobile calls, which are charged at the VC-1 rate, increased by 100.3% in 2012 due to our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased gross operating revenue from local fixed-to-mobile calls by

Table of Contents

R\$1,567 million, the effects of which were partially offset by a 13.8% decline in gross operating revenue from local fixed-to-mobile calls of our legacy operations, principally as a result of a 12.8% decline in the total number of revenue-generating local fixed-to-mobile minutes in 2012 as a result of (1) the 3.4% decline in the number of fixed-line customers of our legacy operations, (2) the migration of local traffic origination to mobile handsets, and (3) the increase in the proportion of our fixed line customers that subscribe to alternative plans which include fixed-to-mobile minutes as part of the monthly subscription fee, resulting in a reduction in the number of minutes that we record as local fixed-to-mobile calls.

Gross Operating Revenue from Long-Distance Fixed-Line Services

We account for revenue from long-distance calls that (1) originate and terminate on a fixed-line, (2) originate and terminate on a mobile device, or (3) originate on a mobile device and terminate on a fixed-line as revenue from long-distance fixed-line services.

Gross operating revenue from long-distance fixed line services increased by 107.1% in 2012 due to our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased gross operating revenue from long-distance fixed line services by R\$1,902 million, the effects of which were partially offset by a 29.5% decline in gross operating revenue from long-distance fixed line services of our legacy operations, principally due to a 28.8% decline in the total number of long-distance minutes, primarily as a result of (1) aggressive discounting campaigns undertaken by our competitors, which resulted in a decline in the total number of long-distance minutes of our legacy operations, (2) the effects of the 3.4% decline in the number of fixed-line customers of our legacy operations, who are more likely to choose our long-distance fixed-line services than customers of other fixed-line providers, and (3) the increase in the proportion of our fixed line customers that subscribe to alternative plans which include long-distance fixed line minutes as part of the monthly subscription fee, resulting in a reduction in the number of minutes that we record as long-distance fixed line services.

Gross Operating Revenue from Long-Distance Fixed-to-Mobile Services

We account for revenue from long-distance calls that originate on a fixed-line and terminate on a mobile device as revenue from long-distance fixed-to-mobile calls.

Gross operating revenue from long-distance fixed-to-mobile services, which are charged at the VC-2 or VC-3 rate, increased by 114.8% in 2012 due to our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased gross operating revenue from long-distance fixed-to-mobile services by R\$443 million, the effects of which were partially offset by a 14.0% decline in gross operating revenue from long-distance fixed-to-mobile services of our legacy operations, principally as a result of an 18.6% decline of in the total number of fixed-to-mobile minutes charged at VC-2 rates and VC-3 rates, primarily as a result of (1) aggressive discounting campaigns undertaken in 2012 by our competitors, and (2) the effects of the 3.4% decline in the number of fixed-line customers of our legacy operations, who are more likely to choose our long-distance services for mobile-to-mobile long-distance calls than customers of other fixed-line providers.

Gross Operating Revenue from Remuneration for the Use of the Fixed-Line Network

Gross operating revenue from remuneration for the use of the fixed-line network increased by 153.7% in 2012 due to our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased gross operating revenue from remuneration for the use of the fixed-line network by R\$763 million, the effects of which were partially offset by a 3.9% decline in gross operating revenue from remuneration for the use of the fixed-line network of our legacy operations.

Of our gross operating revenue from remuneration for the use of the fixed-line network, 38.8% in 2012 and 21.2% in 2011 represented interconnection fees paid by our mobile services subsidiaries for the use of our fixed-line network to complete mobile-to-fixed calls and was eliminated in the consolidation of our financial statements.

Table of Contents

Gross Operating Revenue from Data Transmission Services

Gross operating revenue from data transmission services increased by 69.2% in 2012, primarily due to (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased gross operating revenue from data transmission services by R\$3,700 million, and (2) a 4.1% increase in gross operating revenue from data transmission services of our legacy operations.

Gross operating revenue of our legacy operations from commercial data transmission services increased by 10.2%, primarily as a result of (1) a 24.5% increase in gross operating revenue from IP services, principally as a result of the increased demand for these services, particularly from public entities, banks and card payment companies, and (2) a 14.8% increase in gross operating revenue from SLD services, principally as a result of an increased demand for these services, including requests for increased capacity by our customers, particularly from public entities and financial institutions.

Of our gross operating revenue from commercial data transmission services, 13.8% during 2012 and 16.0% during 2011 represented fees paid by our mobile services subsidiaries and was eliminated in the consolidation of our financial statements.

Gross operating revenue of our legacy operations from ADSL subscriptions declined by 0.8%, primarily due to a 2.0% decline in our average gross operating revenue per subscriber as a result of promotions that we launched during 2012 in an effort to expand our base of broadband customers, the effects of which were partially offset by an 8.3% increase in the average number of ADSL subscriptions in Region II to approximately 2,240,000 during 2012 from approximately 2,032,000 during 2011.

As of December 31, 2012, our ADSL customer base represented 33.4% of our total fixed lines in service as compared to 29.8% of our total fixed lines in service in Region II as of December 31, 2011.

Gross Operating Revenue from the Sale of Pre-paid Calling Cards for Use in Public Telephones

Gross operating revenue from the sale of pre-paid calling cards for use in public telephones declined by 15.4% in 2012, primarily as a result of a 57.1% decline in gross operating revenue from the sale of pre-paid calling cards for use in public telephones of our legacy operations, principally due to (1) the reduction in the number of public telephones that we operate, and (2) the decline in the number of public phone credits used as a result of a general trend to reduce usage of pre-paid calling cards for use in public telephones as customers substitute usage of mobile handsets in place of usage of public phones, the effects of which were partially offset by our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased gross operating revenue from the sale of pre-paid calling cards for use in public telephones by R\$65 million.

Charges Against Gross Operating Revenue

Value-Added and Other Indirect Taxes

Value-added and other indirect taxes on our fixed-line and data transmission services increased by 119.5% in 2012 due to our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased these taxes by R\$3,763 million, the effects of which were partially offset by an 11.4% decline in these taxes on our legacy operations, primarily reflecting the decline in the gross operating revenue of the principal fixed-line services provided by our legacy operations with respect to which these taxes are assessed.

We are required to contribute to the Universal Telecommunications Service Fund (*Fundo de Universalização dos Serviços de Telecomunicações*), which we refer to as the FUST, and the FUNTTEL. We are required to contribute 1.0% of our gross operating revenue from the rendering of telecommunications services, net of (1) the Social Integration Program (*Programa de Integração Social*), or PIS, taxes, (2) the federal Contribution for Social Security Financing (*Contribuição para Financiamento da Seguridade Social COFINS*), or COFINS, and (3)

Table of Contents

ICMS, to the FUST. We are required to contribute 0.5% of our gross operating revenue from the rendering of telecommunications services, net of PIS, COFINS and ICMS taxes, to the FUNTTEL.

Discounts

Discounts offered on our fixed-line services generally applied to data transmission services, monthly subscription fees and intelligent network services (such as caller ID, call forwarding and conference calling).

Discounts on our fixed-line and data transmission services increased by 10.1% in 2012 due to a 13.3% increase in discounts recorded by our legacy operations, primarily as a result of an increase in discounts offered for our broadband services as a result of increased competition for other providers and as part of our efforts to promote the migration of our broadband customers to higher bandwidth subscriptions.

Net Operating Revenue

Net operating revenue of our fixed-line and data transmission services segment increased by 124.9% to R\$18,098 million in 2012 from R\$8,048 million in 2011 due to our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased net operating income of this segment by R\$10,536 million, the effects of which were partially offset by a 5.8% decline net operating income of our legacy operations in this segment.

Net Operating Revenue of Our Mobile Services Segment

The following table sets forth the components of the gross operating revenue and net operating revenue of our mobile services segment, as well as the percentage change from the prior year, for the years ended December 31, 2012 and 2011.

	Year Ended December 31,		
	2012	2011	% Change
	(in millions of reais, except percentages)		
Mobile telephone services	R\$ 9,055	R\$ 1,658	446.1
Remuneration for the use of the mobile network	5,745	1,203	377.6
Sales of handsets and accessories	579	16	3,518.8
Total gross operating revenue	15,379	2,877	434.5
Value-added and other indirect taxes(2,672)		(492)	443.1
Discounts and returns	(1,723)	(379)	354.7
Net operating revenue	R\$ 10,983	R\$ 2,006	447.5

Gross operating revenue of our mobile services segment increased by 434.5% in 2012, principally due to (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased the gross operating revenue of this segment by R\$12,049 million, and (2) a 15.7% increase in gross operating revenue of the legacy operations of this segment.

Gross Operating Revenue from Mobile Services

Gross operating revenue from mobile services increased by 446.1% in 2012, primarily due to (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased gross operating revenue from mobile services by R\$7,090 million, and (2) an 18.5% increase in gross operating revenue from mobile services of our legacy operations.

The average number of our pre-paid mobile customers increased by 472.1% to 40.7 million during 2012 from 7.1 million during 2011, primarily as a result of our consolidation of Telemar and its subsidiaries as part of the corporate reorganization. The average number of our pre-paid mobile customers in Region II increased by 10.7% to 7.9 million during 2012 from 7.1 million during 2011, primarily as a result of our launch of new promotions that

Table of Contents

include bonus minutes for long distance calls, packages of data services and credits for use for our text messaging services. The average number of our post-paid mobile customers, including customer that subscribe to our *Oi Controle* plans, increased by 558.4% to approximately 6.9 million during 2012 from approximately 1.1 million during 2011, primarily as a result of our acquisition of Telemar and its subsidiaries as part of the corporate reorganization. The average number of our post-paid mobile customers in Region II, including customer that subscribe to our *Oi Controle* plans, increased by 40.6% to approximately 1,477,000 during 2012 from approximately 1,050,000 during 2011, primarily as a result of the success of commercial and operational initiatives focused on increasing sales of our premium services, such as data services and value added services markets, that are available to subscribers of our *Oi Conta*, *Oi Smartphone* and *Oi Conta Total* plans. As of December 31, 2012, pre-paid customers represented 83.6% of our mobile customer base and post-paid customers represented 16.4% of our mobile customer base. Our average monthly net revenue per user (calculated based on the total revenue for the year divided by the monthly average customer base for the year divided by 12) increased by 2.9% to R\$21.6 during 2012 from R\$21.0 during 2011.

Gross operating revenue of our legacy operations from monthly subscription fees, which includes gross operating revenue from our mobile data transmission services, increased by 25.0%, primarily as a result of a 40.6% increase in the number of post-paid customers of our legacy operations. The effects of this increase were partially offset by a 13.4% decline in our average monthly subscription fee.

Gross operating revenue of our legacy operations from billed minutes, which are the number of local minutes used by pre-paid customers plus the number of local minutes used by post-paid customers in excess of the monthly allowance under the customer's service plan, increased by 11.4%, primarily as a result of a 10.7% increase in the average number of our pre-paid mobile customers.

Gross operating revenue of our legacy operations from value-added services increased by 22.5%, primarily as a result of (1) a 14.6% increase in the average number of our mobile subscribers, and (2) an increase in average number of text messages sent by our mobile customers as a result of our strategy of offering text messaging packages as part of the purchases of additional credits by our pre-paid customers.

Gross Operating Revenue from Remuneration for the Use of the Mobile Network

Gross operating revenue from remuneration for the use of the mobile network increased by 377.6% in 2012, primarily due to (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased gross operating revenue from remuneration for the use of the mobile network by R\$4,393 million, and (2) a 12.3% increase in gross operating revenue from remuneration for the use of the mobile network of our legacy operations, primarily as a result of a 14.6% increase in the number of mobile customers of our legacy operations, the effects of which were partially offset by customers of others mobile providers taking advantage of promotions offered by those providers that include packages of minutes and text messaging services for on net traffic.

Of the gross operating revenue from remuneration for the use of the mobile network, 59.4% in 2012 and 45.2% in 2011 represented interconnection fees paid by Oi and our fixed-line subsidiaries for the use of our mobile subsidiaries' network to complete fixed-to-mobile calls and was eliminated in the consolidation of our financial statements.

Sales of Handsets and Accessories

Gross operating revenue from sales of handsets and accessories increased to R\$579 million in 2012 from R\$16 million in 2011, primarily as a result of the introduction in 2012 of our strategy of selling premium mobile devices, such as smart phones, at a discount as part of our efforts to acquire new high value customers and retain existing ones.

Table of Contents*Charges Against Gross Operating Revenue**Value-Added and Other Indirect Taxes*

Value-added and other indirect taxes on our mobile services increased by 443.1% in 2012 due to (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased these taxes by R\$2,111 million, and (2) a 13.9% increase in these taxes on our legacy operations, primarily reflecting the increase in the gross operating revenue of our mobile services segment in 2012.

Discounts

Discounts offered on our mobile services generally consist of rebates on pre-paid telephone cards (typically having commissions of approximately 10.0% over the face amount sold), local fixed-line calls, long-distance calls, and intelligent network services (such as caller ID, call forwarding and conference calling).

Discounts on our mobile services increased by 354.7% in 2012 due to (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased these discounts by R\$1,286 million, and (2) a 15.4% increase in discounts recorded by our legacy operations, primarily as a result of our strategy to increase discounts to maintain and increase our market share.

Net Operating Revenue

Net operating revenue of our mobile services segment increased by 447.5% to R\$10,983 million in 2012 from R\$2,006 million in 2011 due to (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased net operating income of this segment by R\$8,651 million, and (2) a 16.3% increase in net operating income of our legacy operations in this segment.

Cost of Sales and Services

Cost of sales and services increased by 176.3% in 2012, principally due to (1) a 176.0% increase in cost of sales and services of our fixed-line and data transmission services segment and (2) a 330.0% increase in cost of sales and services of our mobile services segment.

Of the cost of sales and services of our fixed-line and data transmission services segment, 26.5% in 2012 and 13.4% in 2011 represented interconnection fees paid by Oi for the use of the mobile networks of TNL PCS and Oi Mobile to complete fixed-to-mobile calls. These fees were eliminated in the consolidation of our financial statements.

Of the cost of sales and services of our mobile services segment, 16.9% in 2012 and 22.0% in 2011 represented (1) interconnection fees paid by TNL PCS and Oi Mobile for the use of Oi's fixed-line network to complete mobile-to-fixed calls, and (2) fees paid by TNL PCS and Oi Mobile for EILD services. These fees were eliminated in the consolidation of our financial statements.

The following table sets forth the components of our cost of sales and services, as well as the percentage change from the prior year, for the years ended December 31, 2012 and 2011.

	Year Ended December 31,		
	2012	2011	% Change
	(in millions of reais, except percentages)		
Interconnection	R\$ 3,915	R\$ 1,711	128.8
Depreciation and amortization	2,639	843	213.3
Grid maintenance service	2,029	687	195.6
Rental and insurance	1,294	504	156.3

Table of Contents

	Year Ended December 31,		
	2012	2011	% Change
	(in millions of reais, except percentages)		
Personnel	577	375	53.9
Costs of handsets and accessories	507	24	2,016.7
Concession contract renewal fee	121	49	146.9

Total cost of sales and services	R\$ 12,670	R\$ 4,587	176.3

Cost of Sales and Services of Our Fixed-Line and Data Transmission Services Segment

Cost of sales and services of our fixed-line and data transmission services segment increased by 176.0% in 2012, principally due to our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased the cost of sales and services of this segment by R\$7,565 million, the effects of which were partially offset by a 8.7% decline in cost of sales and services of the legacy operations of this segment. The decline in cost of sales and services of the legacy operations of this segment was principally due to:

a 10.0% decline in interconnection costs of our legacy operations to R\$1,650 million in 2012 from R\$1,834 million in 2011, primarily as a result of (1) a decline in fixed-to-mobile traffic and long-distance fixed-line traffic and (2) a 3.4% decline in the average number of lines in service; and

a 19.7% decline in rental and insurance costs to R\$525 million in 2012 from R\$654 million in 2011, primarily as a result of our program to reduce costs by maximizing synergies mainly with our related party companies; and

a 42.4% decline in third party services other than network maintenance services to R\$94 million in 2012 from R\$163 million in 2011, primarily as a result of our continuing program to reduce costs.

The gross profit of our fixed-line and data transmission services segment increased by 72.3% to R\$6,816 million in 2012 from R\$3,960 million in 2011. As a percentage of net operating revenue of this segment, gross profit declined to 37.7% in 2012 from 49.2% in 2011.

Cost of Sales and Services of Our Mobile Services Segment

Cost of sales and services of our mobile services segment increased by 330.0% in 2012, principally due to (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased the cost of sales and services of this segment by R\$4,257 million, and (2) a 4.6% increase in cost of sales and services of the legacy operations of this segment.

The increase in cost of sales and services of the legacy operations of this segment was principally due to a 6.7% increase in interconnection expenses to R\$561 million in 2012 from R\$526 million in 2011, primarily as a result of an increase in the total number of minutes used by our mobile customers to make calls to customers of mobile providers for which we pay interconnection fees at the VU-M rate, as a result of 14.6% increase in the average number of our mobile subscribers. The effects of these increases were partially offset by (1) a 64.6% decline in third party services other than network maintenance services to R\$12 million in 2012 from R\$34 million in 2011, primarily as a result of our continuing program to reduce costs, and (2) a 7.8% decline in depreciation and amortization expenses to R\$214 million in 2012 from R\$232 million in 2011.

The gross profit of our mobile services segment increased by 668.2% to R\$5,355 million in 2012 from R\$697 million in 2011. As a percentage of net operating revenue of this segment, gross profit increased to 48.8% in 2012 from 34.7% in 2011.

Table of Contents

Gross Profit

As a result of the foregoing, our consolidated gross profit increased by 168.2% to R\$12,491 million in 2012 from R\$4,659 million in 2011. As a percentage of net operating revenue, gross profit declined to 49.6% in 2012 from 50.4% in 2011.

Operating Expenses

Selling Expenses

Selling expenses increased by 316.9% during 2012, principally due to (1) a 197.1% increase in selling expenses of our fixed-line and data transmission services segment, and (2) a 376.9% increase in selling expenses of our mobile services segment.

Fixed-Line and Data Transmission Services Segment

Selling expenses of our fixed-line and data transmission services segment increased by 197.1% in 2012, principally due to (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased selling expenses of this segment by R\$1,748 million, and (2) a 20.9% increase in selling expenses of the legacy operations of this segment. The increase in selling expenses of the legacy operations of this segment was principally due to:

a R\$175 million increase in sales commissions to R\$176 million in 2012 from R\$1 million in 2011, primarily as a result of (1) the repositioning of our sales support primarily relating to our creation of regional distribution channel structures, and (2) an increase in commissions paid relating to sales of our *Oi Velox* service as a result of the 8.3% increase in the average number of ADSL subscriptions;

a 72.4% increase in personnel expenses of our legacy operations to R\$205 million in 2012 from R\$119 million in 2011, primarily as a result of increased headcount to support sales the regional distribution channel structures that we have created and the increase in the size of the door-to-door sales force composed of our employees; and

an 18.3% increase in call center expenses of our legacy operations to R\$402 million in 2012 from R\$340 million in 2011, primarily as a result of the renegotiation of some collective bargaining agreements by our contact center and expenditures related to service quality campaigns conducted to support our broadband service.

The effects of these increases were partially offset by a 61.9% decline in provision for doubtful accounts of our legacy operations to R\$99 million in 2012 from R\$260 million in 2011, primarily as a result of our program to improve our billing and collection practices and the lower the rate of customer defaults, especially among our corporate customers.

As a percentage of net operating revenue of this segment, selling expenses increased to 16.3% in 2012 from 12.3% in 2011.

Mobile Services Segment

Selling expenses of our mobile services segment increased by 376.9% in 2012, principally due to (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased selling expenses of this segment by R\$1,512 million, and (2) a 29.7% increase in selling expenses of the legacy operations of this segment. The increase in selling expenses of the legacy operations of this segment was principally due to a R\$100 million increase in third-party services, including sales commissions, call center, postage and collection expenses, to R\$373 million in 2012 from R\$273 million in 2011, primarily as a result of (1) and increase in commissions paid relating to our sales of mobile services as a result of the 14.6% increase in the average number of mobile subscribers, and (2) a R\$23 million increase in publicity and advertising

Table of Contents

expenses to R\$83 million in 2012 from R\$60 million in 2011, primarily as a result of an increase in expenditures on our advertising campaigns to support our principal mobile services.

As a percentage of net operating revenue of this segment, selling expenses increased to 18.9% in 2012 from 21.7% in 2011.

General and Administrative Expenses

General and administrative expenses increased by 107.1% during 2012, principally due to an 82.4% increase in general and administrative expenses of our fixed-line segment and a 294.8% increase in general and administrative expenses of our mobile services segment.

Fixed-Line and Data Transmission Services Segment

General and administrative expenses of our fixed-line and data transmission services segment increased by 82.4% in 2012, principally due to our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased general and administrative expenses of this segment by R\$1,138 million, the effects of which were partially offset by a 13.0% decline in general and administrative expenses of the legacy operations of this segment, principally due to a 25.9% decline in third-party services to R\$557 million in 2012 from R\$752 million in 2011, primarily as a result of the repositioning of our sales support primarily relating to our creation of regional distribution channel structures.

As a percentage of net operating revenue of this segment, general and administrative expenses declined to 12.0% in 2012 from 14.8% in 2011.

Mobile Services Segment

General and administrative expenses of our mobile services segment increased by 294.8% in 2012, principally due to our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased general and administrative expenses of this segment by R\$521 million, the effects of which were partially offset by a 14.3% decline in general and administrative expenses of the legacy operations of this segment. The decline in general and administrative expenses of the legacy operations of this segment was principally due to a 53.3% decline in third-party services to R\$55 million in 2012 from R\$118 million in 2011, primarily as a result of our continuing program to reduce costs, the effects of which were partially offset by a 191.3% increase in depreciation and amortization expenses of the legacy operations of this segment to R\$67 million in 2012 from R\$23 million in 2011.

As a percentage of net operating revenue of this segment, general and administrative expenses declined to 6.1% in 2012 from 8.4% in 2011.

Other Operating Expenses, Net

Other Operating Income

Other operating income increased by 256.2% to R\$1,996 million in 2012 from R\$560 million in 2011, primarily as a result of:

a 342.4% increase in recovered expenses to R\$693 million in 2012 from R\$157 million in 2011, primarily as a result of our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased our recovered expenses by R\$407 million;

a 1,718.6% increase in income from the disposal of property, plant and equipment to R\$390 million in 2012 from R\$21 million in 2011, primarily as a result of our strategy of monetizing non-strategic assets;

Table of Contents

a 230.8% increase in rental of infrastructure to R\$398 million in 2012 from R\$120 million in 2011, primarily as a result of our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased our rental of infrastructure related to physical space and tower rentals by R\$261 million; and

a 164.7% increase in income from late payment charges to R\$240 million in 2012 from R\$91 million in 2011, primarily as a result of our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased our income from late payment charges by R\$144 million.

Other Operating Expense

Other operating expenses increased by 79.7% to R\$1,880 million in 2012 from R\$1,046 million in 2011, primarily as a result of:

a 189.7% increase in taxes to R\$894 million in 2012 from R\$309 million in 2011, primarily as a result of (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased our taxes by R\$558 million, and (2) PIS and COFINS taxes recorded on the increased distributions of interest on shareholders equity received from some of our subsidiaries; and

a 1,311.3% increase in employee and management profit sharing to R\$387 million in 2012 from R\$27 million in 2011, primarily as a result of (1) our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased our employee and management profit sharing by R\$215 million, and (2) the increase in the performance of indicators used to estimate this provision.

The effects of these factors were partially offset by a 29.8% decline in provisions for contingencies to R\$401 million in 2012 from R\$571 million in 2011, primarily as a result of (1) a R\$53 million decline related to the effects of the completion of the standardization of the calculation methodology we utilize for the provisions for labor contingencies to be consistent with the procedures adopted by Telemar in 2011, and (2) the reduction in provision for contingencies as part of our efficiency in the reviewing and controlling of the labor, taxes and civil claims.

Operating Income before Financial Income (Expenses) and Taxes

As a result of the foregoing, our consolidated operating income before financial income (expenses) and taxes increased by 203.7% to R\$4,760 million in 2012 from R\$1,567 million in 2011. As a percentage of net operating revenue, operating income before financial income (expenses) and taxes increased to 18.9% in 2012 from 17.0% in 2011.

Fixed-Line and Data Transmission Services Segment

The operating income before financial income (expenses) and taxes of our fixed-line and data transmission services segment increased by 23.2% to R\$1,870 million in 2012 from R\$1,519 million in 2011. As a percentage of the net operating revenue of this segment, operating income before financial income (expenses) and taxes declined to 10.3% in 2012 from 18.9% in 2011.

Mobile Services Segment

The operating income before financial income (expenses) and taxes of our mobile services segment increased by 5,074.9% to R\$2,503 million in 2012 from R\$48 million in 2011. As a percentage of the net operating revenue of this segment, operating income before financial income (expenses) and taxes increased to 22.8% in 2012 from 2.4% in 2011.

Table of Contents

Financial Expenses, Net

Financial Income

Financial income increased by 61.8% to R\$2,275 million in 2012 from R\$1,406 million in 2011, primarily due to:

exchange gains on foreign transactions of R\$650 million in 2012 from R\$0 in 2011, primarily as a result of an increase in our balances invested in foreign currencies following our consolidation of the Telemar and its subsidiaries as a result of the corporate reorganization, the 8.9% depreciation of the *real* against the dollar during 2012;

a 539.5% increase in other financial income to R\$243 million in 2012 from R\$38 million in 2011, primarily as a result of our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization, which increased our other financial income by R\$252 million;

a 34.2% increase in income from short-term investments to R\$515 million in 2012 from R\$384 million in 2011, primarily as a result of an increase in the average amount of our financial investments, primarily due to our consolidation of the results of Telemar and its subsidiaries as from February 27, 2012 due to the corporate reorganization; and

income from dividends received of R\$99 million in 2012 primarily as a result of our investment in Portugal Telecom.

The effects of these factors were partially offset by an 84.3% decline in interest and inflation adjustment on amounts due from related parties to R\$48 million in 2012 from R\$307 million in 2011, primarily as a result of the settlement of intercompany debts as part of the corporate reorganization.

Financial Expenses

Financial expenses increased by 203.9% to R\$4,491 million in 2012 from R\$1,478 million in 2011, primarily due to:

exchange losses on third-party borrowings of R\$2,076 million in 2012, primarily as a result of our consolidation of the foreign currency-denominated debt of Telemar and its subsidiaries as a result of the corporate reorganization, the 8.9% depreciation of the *real* against the dollar during 2012 and the 10.7% depreciation of the *real* against the euro during 2012; and

a 313.5% increase in interest on debentures to R\$753 million in 2012 from R\$182 million in 2011, primarily as a result of our consolidation of the debentures issued by Telemar and its subsidiaries as a result of the corporate reorganization.

The effects of these factors was partially offset by our results from derivatives transactions to income of R\$942 million in 2012 from an expense of R\$49 million in 2011, primarily as a result of the increase in derivative transactions used by our company to mitigate foreign exchange risk as a result of our consolidation of the foreign currency-denominated debt of Telemar and its subsidiaries due to the corporate reorganization.

Income Tax and Social Contribution

The composite corporate statutory income tax and social contribution rate was 34% in each of 2012 and 2011. Income tax and social contribution expense increased by 55.0% to R\$759 million in 2012 from R\$490 million in 2011. Our effective tax rate was 29.9% in 2012 and 33.0% in 2011. The table below sets forth a reconciliation of the composite corporate statutory income tax and social contribution rate to our effective tax rate for each of the periods presented.

Table of Contents

	Year Ended December 31,	
	2012	2011
Composite corporate statutory income tax and social contribution rate	34.0%	34.0%
Tax effects of equity method	0.2	
Tax effects of interest on shareholders' equity	0.2	
Tax effects of permanent exclusions (additions)	0.5	(1.0)
Tax incentives (SUDENE)	(6.1)	
Tax effects of unrecognized deferred tax assets	1.6	
Tax effects of recognized deferred tax assets	(0.3)	0.0
Effective rate	29.9%	33.0%

Our effective tax rate was 29.9% in 2012, primarily as a result of tax incentives provided by the SUDENE resulting from a reduction in the basis of calculation of profit in the regions promoted by SUDENE, which lowered our effective tax rate by 6.1%. These effects of this incentive was partially offset by (1) the tax effect of unrecognized deferred tax assets regarding legal entities that are not eligible to recognize tax credits on tax loss carryforwards, which increased our effective tax rate by 1.6%, and (2) the tax effect of permanent additions, primarily as a result of the net effects of permanent exclusion (additions) of prescribed dividends, nondeductible fines, tax incentives and sponsorships, which increased our effective tax rate by 0.5%.

Our effective tax rate was 33.0% in 2011, primarily as a result of the tax effects of non-taxable income and non-deductible expenses, which lowered our effective tax rate by 1.0%.

Net Income

Our consolidated net income increased by 77.5% to R\$1,785 million in 2012 from R\$1,006 million in 2011. As a percentage of net operating revenue, net income declined to 7.1% in 2012 from 10.9% in 2011.

Liquidity and Capital Resources

Our principal cash requirements consist of the following:

working capital requirements;

servicing of our indebtedness;

capital expenditures related to investments in operations, expansion of our networks and enhancements of the technical capabilities and capacity of our networks; and

dividends on our shares, including in the form of interest attributable to shareholders' equity.

Unless our board of directors deems it inconsistent with our financial position, payment of dividends is mandatory under our by-laws and, consequently, may give rise to significant cash requirements in future periods.

Our principal sources of liquidity have traditionally consisted of the following:

cash flows from operating activities;

short-term and long-term loans; and

sales of debt securities in domestic and international capital markets.

During 2013, cash flow generated by operations was used primarily for investing activities, for working capital requirements and to service our outstanding debt obligations. As of December 31, 2013, our consolidated cash and

Table of Contents

cash equivalents and cash investments amounted to R\$3,016 million. As of December 31, 2013, we had working capital of R\$2,147 million. We believe that our working capital is sufficient for our requirements during 2014.

Cash Flow
Cash Flows from Operating Activities

Our primary source of operating funds is cash flow generated from our operations. Net cash provided by operating activities was R\$7,035 million in 2013, R\$3,910 million in 2012 and R\$1,839 million in 2011. We consider cash flows provided by our operating activities to be sufficient for our expected cash requirements related to operations. However, we generally finance our investments in property, plant and equipment through the use of bank loans, vendor financing, capital markets and other forms of financing.

Cash Flows Used in Investing Activities

Investing activities used net cash of R\$6,770 million in 2013, R\$6,495 million in 2012 and R\$2,089 million in 2011.

During 2013, investing activities for which we used cash primarily consisted of (1) investments of R\$5,976 million in purchases of property, plant and equipment and intangible assets, primarily related to the expansion of our data communications network, the acquisition of our 4G authorization and the implementation of projects to meet ANATEL's regulatory requirements, and (2) net judicial deposits (consisting of deposits less redemptions) of R\$735 million, primarily related to provisions for labor, taxes and civil contingencies.

During 2012, investing activities for which we used cash primarily consisted of (1) investments of R\$5,330 million in purchases of property, plant and equipment and intangible assets, primarily related to the expansion of our data communications network, the acquisition of our 4G authorization and the implementation of projects to meet ANATEL's regulatory requirements, and (2) net judicial deposits (consisting of deposits less redemptions) of R\$1,662 million, primarily related to provisions for labor, taxes and civil contingencies.

During 2011, investing activities for which we used cash primarily consisted of (1) net judicial deposits (consisting of deposits less redemptions) of R\$1,224 million, primarily related to provisions for labor, taxes and civil contingencies, and (2) investments of R\$884 million in additions to property, plant and equipment, primarily related to the expansion of our data communications network and the implementation of regulatory projects to meet ANATEL's requirements.

Cash Flows from Financing Activities

Financing activities used net cash of R\$2,299 million in 2013, and provided net cash of R\$975 million in 2012 and R\$2,919 million in 2011.

During 2013, our principal sources of borrowed funds consisted of (1) R\$1,500 million aggregate principal amount of non-convertible debentures issued in March 2013, (2) R\$873.5 million aggregate principal amount borrowed under a R\$5.4 billion credit facility with the Brazilian national development bank (*Banco Nacional de Desenvolvimento Econômico e Social*), or BNDES, that we entered into in December 2012, (3) US\$96 million aggregate principal amount borrowed under an export credit facility that Telemar entered into with EDC in July 2012, and (4) US\$37 million aggregate principal amount borrowed under an export credit facility that Telemar entered into with SEK in July 2011.

During 2013, we used cash to (1) repay R\$3,568 million principal amount of our outstanding loans and financings and derivatives, (2) to make installment payments relating to our permits and concessions in the aggregate amount of R\$711 million, (3) to pay dividends and interest on shareholders' equity in the aggregate amount of R\$1,280 million, and (4) to make installment payments under the tax refinancing plan in the aggregate amount of R\$174 million.

Table of Contents

During 2012, our principal sources of borrowed funds consisted of (1) the issuance of US\$1,500 million aggregate principal amount of 5.75% Senior Notes due 2022, (2) the issuance of R\$2,000 million aggregate principal amount of non-convertible debentures due 2020, and (3) R\$2,000 million aggregate principal amount borrowed under a R\$5.4 billion credit facility with BNDES that we entered into in December 2012. In addition, we consolidated cash and cash equivalents of R\$4,930 million as a result of the corporate reorganization.

During 2012, we used cash to (1) repay R\$4,980 million principal amount of our outstanding loans and financings and derivatives, (2) to pay dividends and interest on shareholders' equity in the aggregate amount of R\$2,405 million, (3) to pay R\$2,008 million to shareholders of TNL and Telemar who exercised their withdrawal rights in connection with the corporate reorganization, and (4) to pay R\$1,156 million for the redemption of class B and class C preferred shares issued as a bonus and distributed to shareholders of our common and preferred shares.

During 2011, our principal sources of borrowed funds consisted of (1) the issuance of R\$2,350 million aggregate principal amount of non-convertible debentures due 2018, (2) the issuance of R\$1,100 million aggregate principal amount of 9.75% Senior Notes due 2016, and (3) the issuance of R\$1,000 million aggregate principal amount of non-convertible debentures due 2017.

During 2011, we used cash to (1) to repay R\$1,096 million principal amount of our outstanding loans and financings, derivatives and leases, (2) to pay dividends and interest on shareholders' equity in the aggregate amount of R\$462 million, and (3) to pay R\$80 million of fees related to our licenses and concessions.

Projected Sources and Uses of Cash

We anticipate that we will be required to spend approximately R\$15.1 billion to meet our short-term contractual obligations and commitments and budgeted capital expenditures during 2014, and an additional approximately R\$30.4 billion to meet our long-term contractual obligations and commitments and budgeted capital expenditures in 2015 and 2016, before giving effect to any additional contractual obligations and commitments and capital expenditures that we will incur relating to PT Portugal following the anticipated completion of the business combination. We expect that we will meet these cash requirements for (1) our operating and maintenance activities through sales of our services, and (2) our debt service and capital expenditure commitments through a combination of cash generated from operating activities and cash generated by financing activities, including new debt financings and the refinancing of our existing indebtedness as it becomes due.

We have commitments from several financial institutions to provide us with financing in the future, including commitments from under two revolving credit facilities that we entered into in November 2011 and December 2012, an export credit facility that we entered into in July 2012 and unused commitments under various other credit facilities described under **Indebtedness**. We pay commitment fees to these financial institutions in connection with their commitments.

In November 2011, Oi, Oi Mobile, Telemar and TNL PCS entered together into a revolving credit facility with a syndicate of international institutions. Under this facility, up to US\$1 billion aggregate principal amount will be available for disbursement to the borrowers during the five-year term of this facility. As of December 31, 2013, there were no outstanding loans under this facility. As a result of the merger of TNL PCS with and into Oi Mobile in February 2014, Oi Mobile assumed all of TNL PCS's rights and obligations under this credit facility.

In December 2012, Oi entered into a revolving credit facility with a syndicate of financial institutions. Under this facility, up to R\$1.5 billion aggregate principal amount will be available for disbursement to the borrowers during the three-year term of this facility. As of December 31, 2013, there were no outstanding loans under this facility.

In March 2013, Oi entered into an export credit facility agreement with the Office National Du Dueroire/Nationale Delcrededienst, or ONDD, under which ONDD agreed to disburse loans in two tranches in the aggregate principal amount of up to US\$257 million. The proceeds of this export credit facility will be used to fund equipment purchases from Alcatel-Lucent. Loans under this export credit facility bear interest at the rate of LIBOR plus 1.50% per annum. Interest on each of these loans is payable semi-annually in arrears through maturity in March

Table of Contents

2024. The outstanding principal amount of these loans is payable in 18 semi-annual installments commencing in September 2014. As of December 31, 2013, there were no outstanding loans under this facility.

Contractual Commitments

The following table summarizes our significant contractual obligations and commitments as of December 31, 2013:

	Payments Due by Period				Total
	Less than One Year	One to Three Years	Three to Five Years	More than Five Years	
	(in millions of reais)				
Loans and financings (1)	R\$ 3,750	R\$ 16,423	R\$ 4,358	R\$ 8,371	R\$ 32,902
Debentures (2)	2,825	5,363	4,555	2,016	14,759
Purchase obligations (3)	1,978	695	398		3,071
Concession fees (4)		520	279	920	1,719
Usage rights (5)	457	1,025	3		1,485
Pension plan contributions(6)	123	370	247	123	863
Total contractual obligations and commitments	R\$ 9,133	R\$ 24,396	R\$ 9,840	R\$ 11,430	R\$ 54,799

- (1) Includes (1) estimated future payments of interest on our loans and financings, calculated based on interest rates and foreign exchange rates applicable at December 31, 2013 and assuming that all amortization payments and payments at maturity on our loans and financings will be made on their scheduled payment dates, and (2) estimated future cash flows on our derivative obligations, calculated based on interest rates and foreign exchange rates applicable as of December 31, 2013 and assuming that all payments on our derivative obligations will be made on their scheduled payment dates.
- (2) Includes estimated future payments of interest on our debentures, calculated based on interest rates applicable as of December 31, 2013 and assuming that all amortization payments and payments at maturity on our debentures will be made on their scheduled payment dates.
- (3) Consists of (1) obligations in connection with a business process outsourcing agreement, and (2) purchase obligations for network equipment pursuant to binding obligations which include all significant terms, including fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transaction.
- (4) Consists of estimated bi-annual fees due to ANATEL under our concession agreements expiring in 2025. These estimated amounts are calculated based on our results for the year ended December 31, 2013.
- (5) Consists of payments due to ANATEL for radio frequency licenses. Includes accrued and unpaid interest as of December 31, 2013.
- (6) Consists of expected contributions to amortize the actuarial deficit of the BrTPREV plan.

We are also subject to contingencies with respect to tax, civil, labor and other claims and have made provisions for accrued liability for legal proceedings related to certain tax, civil, labor and other claims of R\$5,616 million as of December 31, 2013. See Item 8. Financial Information Legal Proceedings and note 22 to our consolidated financial statements.

Indebtedness

As of December 31, 2013, our total outstanding indebtedness on a consolidated basis was R\$35,854 million, consisting of R\$4,159 million of short-term indebtedness, all of which represented current portion of long-term indebtedness (or 11.6% of our total indebtedness), and R\$31,695 million of long-term indebtedness (or 88.4% of our total indebtedness).

On a consolidated basis, our *real*-denominated indebtedness as of December 31, 2013 was R\$21,287 million, or 59.4% of our total indebtedness, and our foreign currency-denominated indebtedness was R\$14,566 million, or

Table of Contents

40.6% of our total indebtedness. As of December 31, 2013, our *real*-denominated indebtedness bore interest at an average rate of 11.84% per annum, and our foreign currency denominated indebtedness bore interest at an average rate of 4.51% per annum for loans denominated in U.S. dollars and 5.13% per annum for loans denominated in euros. As of December 31, 2013, 76.0% of our debt bore interest at floating rates, including the effect of swap operations.

Short-Term Indebtedness

Our consolidated short-term debt, consisting of the current portion of long-term loans and financings and debentures, was R\$4,159 million as of December 31, 2013. Under our financing policy, we generally do not incur short-term indebtedness, as we believe that our cash flows from operations generally will be sufficient to service our current liabilities.

Long-Term Indebtedness

Our principal sources of long-term debt are:

debentures issued in the Brazilian market;

fixed-rate notes issued in the international market;

credit facilities with BNDES;

credit facilities with international export credit agencies;

unsecured lines of credit obtained from Brazilian financial institutions;

real estate securitization transactions; and

credit facilities with a development banks.

Some of our debt instruments require that we and Telemar comply with financial covenants, semi-annually or quarterly. Under each of these debt instruments, the creditor has the right to accelerate the debt if, at the end of any applicable period we are not in compliance with the defined financial covenants ratios. We were in compliance with these financial covenants at December 31, 2013, and we believe that we will be able to comply with these financial covenants during 2014. In addition, we believe that our compliance with these financial covenants will not adversely affect our ability to implement our financing plans.

The instruments governing a substantial portion of our indebtedness contain cross-default or cross-acceleration clauses and the occurrence of an event of default under one of these instruments could trigger an event of default under other indebtedness or enable the creditors under other indebtedness to accelerate that indebtedness.

As of December 31, 2013, all of our debt instruments with BNDES were secured by pledges of certain of our accounts receivable.

The following discussion briefly describes certain of our significant financing transactions.

Fixed-Rate Notes

Edgar Filing: OI S.A. - Form 20-F

We have issued four series of fixed-rate debt securities in the international market. All of these securities pay interest semi-annually in arrears. The table below sets forth our outstanding fixed-rate debt securities as of December 31, 2013, the outstanding principal amount of these securities and their maturity dates.

Table of Contents

Security	Outstanding Principal Amount (in millions)	Final Maturity
9.75% senior notes due 2016(1)	R\$ 1,100	September 2016
5.125% senior notes due 2017	750	December 2017
9.500% senior notes due 2019	US\$ 142	April 2019
5.500% senior notes due 2020	US\$ 1,787	October 2020
5.75% senior notes due 2022(2)	US\$ 1,500	February 2022

- (1) These notes are denominated in *reais* and payments of principal and interest under these notes are payable in U.S. dollars at prevailing exchange rates at the time of payment.
- (2) These notes are obligations of our subsidiary Oi Brasil Holdings Coöperatief U.A. and are fully and unconditionally guaranteed by Oi S.A. *Debentures*

We have issued several series of debentures in the Brazilian market. All of these securities pay interest annually or semi-annually in arrears. The table below sets forth our outstanding debentures as of December 31, 2013, the outstanding principal amount of these securities, the applicable interest rates, and their maturity dates.

Security	Outstanding Principal Amount (in millions of <i>reais</i>)	Interest Rate	Final Maturity
Oi debentures due 2014	R\$ 1,754	CDI plus 1.20%	April 2014
Oi debentures due 2017	R\$ 400	CDI plus 0.94%	March 2017
Oi debentures due 2017	R\$ 1,000	CDI plus 1.00%	August 2017
Oi Debentures due 2018	R\$ 2,350	CDI plus 1.15%	December 2018(1)
Oi Debentures due 2019	R\$ 1,500	CDI plus 0.75%	March 2019
Oi Debentures due 2020	R\$ 1,600	IPCA plus 6.20%	March 2020(2)
Oi Debentures due 2020	R\$ 246	IPCA plus 7.98%	April 2020
Telemar Debentures due 2021	R\$ 30	IPCA plus 0.50%	July 2021

- (1) The outstanding principal amount of these debentures is payable in three equal annual installments commencing in December 2016.
- (2) The outstanding principal amount of these debentures is payable in two equal annual installments commencing in March 2019.

Credit Facilities with BNDES

We and our subsidiaries have entered into a variety of credit facilities with BNDES. The proceeds of these credit facilities have been used for a variety of purposes, including funding our investment plans, funding the expansion of our telecommunications plant (voice, data and video), and making operational improvements to meet the targets established in the General Plan on Universal Service and the General Plan on Quality Goals in effect at the time of these loans.

The following table sets forth selected information with respect to our BNDES credit facilities as of December 31, 2013.

Table of Contents

Facility	Outstanding Principal Amount (in millions of reais)	Interest Rate	Amortization Schedule	Final Maturity
Oi 2006 credit facility:				
A loans	108	TJLP plus 4.30%	Monthly	May 2014
TNL PCS 2006 credit facility(1):				
A loans	172	TJLP plus 4.30%	Monthly	May 2014
	268	TJLP plus 4.50%	Monthly	June 2014
B loans	4	TJLP plus 2.30%	Monthly	May 2014
	12	TJLP plus 2.50%	Monthly	June 2014
TNL PCS 2009 credit facility(1):				
Floating-rate loans	459	TJLP plus 3.95%	Monthly(2)	December 2018
Fixed-rate loans	22	4.50%	Monthly(2)	December 2018
Oi Mobile 2009 credit facility:				
A loans	359	TJLP plus 3.95%	Monthly(2)	December 2018
B loans	9	4.50%	Monthly(2)	December 2018
Telemar 2012 credit facility:				
A loans	610	TJLP plus 4.08%	Monthly(3)	July 2021
B loans	129	2.50%	Monthly(3)	January 2021
D loans	150	TJLP plus 2.18%	Monthly(3)	January 2021
TNL PCS 2012 credit facility:				
A loans	312	TJLP plus 4.08%	Monthly(3)	July 2021
B loans	80	2.50%	Monthly(3)	January 2021
C loans	20	2.50%	Monthly(3)	January 2021
Oi 2012 credit facility:				
A loans	339	TJLP plus 4.08%	Monthly(3)	July 2021
B loans	58	2.50%	Monthly(3)	January 2021
C loans	169	2.50%	Monthly(3)	January 2021
Oi Mobile 2012 credit facility:				
A loans	90	TJLP plus 4.08%	Monthly(3)	July 2021

- (1) On September 30, 2013, the obligations of Telemar under its 2006 Credit Facility and 2009 Credit Facility and the obligations of Oi under its 2009 Credit Facility were assumed by TNL PCS, in each case with the consent of BNDES. As a result of the merger of TL PCS with and into Oi Mobile in February 2014, Oi Mobile assumed TNL PCS's obligations under these credit facilities.
- (2) Amortization on this facility commenced in January 2012.
- (3) Amortization on this facility commences in August 2015.

*Credit Facilities with Export Credit Agencies**Credit Facilities with FINNVERA*

In June 2008, Telemar entered into an export credit facility agreement with FINNVERA under which FINNVERA agreed to disburse loans in the aggregate principal amount of up to US\$300 million. Disbursements of US\$192 million and US\$108 million under this export credit facility were received in 2008 and 2009, respectively. The proceeds of this export credit facility have been and will be used to fund equipment purchases related to Telemar's capital expenditures on its fixed-line and mobile telecommunications infrastructure. Loans under this export credit facility bear interest at an average rate of LIBOR plus 1.07% per annum. Interest on each of these loans is payable semi-annually in arrears through maturity in December 2018. The outstanding principal amount of these loans is payable in 17 equal semi-annual installments commencing in December 2010. As of December 31, 2013, the outstanding principal amount under this credit facility was US\$176 million.

In August 2009, Telemar entered into an export credit facility agreement with FINNVERA under which FINNVERA agreed to disburse loans in the aggregate principal amount of up to US\$500 million. Disbursements of US\$208 million, US\$27 million, US\$74 million, US\$97 million and US\$92 million under this export credit facility were received in February 2010, May 2010, February 2011, June 2011 and January 2012, respectively. The proceeds of this export credit facility have been and will be used to fund equipment purchases related to Telemar's capital expenditures on our fixed-line and mobile telecommunications infrastructure. Loans under this export credit facility bear interest at an average rate of LIBOR plus 1.70% per annum. Interest on each of these loans is payable semi-

Table of Contents

annually in arrears through maturity in August 2019. The outstanding principal amount of these loans is payable in 17 equal semi-annual installments commencing in August 2011. As of December 31, 2013, the outstanding principal amount under this credit facility was US\$353 million.

In December 2011, Telemar entered into an export credit facility with FINNVERA under which FINNVERA agreed to disburse loans in the aggregate principal amount of up to US\$200 million. A disbursement of US\$188 under this export credit facility was received in December 2012. The proceeds of this export credit facility have been and will be used to fund equipment purchases related to Telemar's capital expenditures on our fixed-line and mobile telecommunications infrastructure. Loans under this facility bear interest at the rate of LIBOR plus 0.90% per annum, payable semi-annually in arrears. The principal amount of these loans is payable in 17 semiannual installments commencing in February 2013. As of December 31, 2013, the outstanding principal amount under this credit facility was US\$176 million.

Credit Facility with Nordic Investment Bank

In July 2008, Telemar entered into a credit facility with Nordic Investment Bank under which Nordic Investment Bank disbursed loans in the aggregate principal amount of US\$250 million. The proceeds of this credit facility have been used to fund equipment purchases related to Telemar's infrastructure.

Under this credit facility, loans in the principal amount of US\$100 million (the A loan) and US\$150 million (the B loan) were disbursed in July 2008. The A loan bears interest at the rate of LIBOR plus 1.18% per annum and the B loan bears interest at the rate of LIBOR plus 0.80% per annum. Interest on each of these loans is payable semi-annually in arrears through maturity. The outstanding principal amount of the A loan is payable in 17 equal semi-annual installments commencing in July 2010, and the outstanding principal amount of the B loan is payable in 11 equal semi-annual installments commencing in July 2010. As of December 31, 2013, the outstanding principal amount under this credit facility was US\$113 million.

Credit Facilities with China Development Bank

In February 2009, Telemar entered into a credit facility agreement with China Development Bank Corporation, or China Development Bank, under which China Development Bank agreed to disburse loans in the aggregate principal amount of up to US\$300 million. Disbursements of US\$227 million and US\$52 million under this credit facility were received in 2009 and 2010, respectively. The proceeds of this credit facility have been and will be used to fund equipment purchases related to Telemar's capital expenditures on telecommunications infrastructure. Loans under this credit facility bear interest at a rate of LIBOR plus 2.5% per annum. Interest on each of these loans is payable semi-annually in arrears through maturity in February 2016. The outstanding principal amount of these loans is payable in 11 equal semi-annual installments commencing in April 2011 and terminating upon maturity in February 2016. As of December 31, 2013, the outstanding principal amount under this credit facility was US\$136 million.

In October 2009, Telemar entered into a credit facility agreement with China Development Bank under which China Development Bank agreed to disburse loans in the aggregate principal amount of up to US\$500 million. Disbursements of US\$94 million and US\$98 million under this credit facility were received in 2010 and 2011, respectively. The proceeds of this credit facility have been and will be used to fund equipment purchases related to Telemar's capital expenditures on telecommunications infrastructure. Loans under this credit facility bear interest at a rate of LIBOR plus 2.5% per annum. Interest on each of these loans is payable semi-annually in arrears through maturity in October 2016. The outstanding principal amount of these loans is payable in 11 equal semi-annual installments commencing in April 2012 and terminating upon maturity in October 2016. As of December 31, 2013, the outstanding principal amount under this credit facility was US\$123 million.

In June 2011, Telemar entered into a stand-by credit facility with China Development Bank under which China Development Bank agreed to disburse loans in the aggregate principal amount of up to US\$500 million. A disbursement of US\$380 million under this stand-by credit facility was received in July 2011. The proceeds of this stand-by credit facility have been and will be used to refinance other indebtedness of Telemar. Loans under this stand-by credit facility bear interest at the rate of LIBOR plus 2.30% per annum, payable semi-annually in arrears through maturity in June 2016. The principal of these loans is payable in five semi-annual installments, commencing

Table of Contents

in October 2014. As of December 31, 2013, the outstanding principal amount under this credit facility was US\$380 million.

Credit Facility with Crédit Agricole Corporate and Investment Bank

In April 2010, Telemar entered into an export credit facility agreement with Crédit Agricole, as lender and facility agent, under which Crédit Agricole agreed to disburse loans in the aggregate principal amount of up to US\$220 million, in two tranches of US\$110 million each. Disbursements in the aggregate principal amount of US\$46 million and US\$31 million under the first tranche of this facility were received in July 2010 and February 2011, respectively, and a disbursements in the aggregate principal amount of US\$55 million and US\$89 million under the second tranche of this facility were received in May 2011 and February 2012, respectively. The proceeds of these disbursements have been and will be used to fund equipment purchases related to Telemar's capital expenditures on its fixed-line and mobile telecommunications infrastructure. Loans under the first and second tranches of this facility bear interest at an average rate of LIBOR plus 1.40% per annum. Loans under the first tranche of this facility pay interest semi-annually in arrears through maturity in August 2019. Loans under the second tranche of this facility pay interest semi-annually in arrears through maturity in August 2020. The outstanding principal amount of these loans is payable in 17 equal semi-annual installments, commencing in August 2011 for the first tranche and in August 2012 for the second tranche. The Office National Du Ducroire, the Belgian national export credit agency, is providing an insurance policy in connection with this facility. As of December 31, 2013, the outstanding principal amount under this credit facility was US\$172 million.

Export Credit Facility with Cisco Systems Capital

In March 2011, Telemar entered into an export credit facility agreement with Cisco Systems Capital, or Cisco, under which Cisco agreed to disburse loans in the aggregate principal amount of up to US\$100 million. A disbursement of US\$46 million under this export credit facility was received in May 2011. The proceeds of this export credit facility have been and will be used to fund equipment purchases related to Telemar's capital expenditures on its fixed-line and mobile telecommunications infrastructure. Loans under this export credit facility bear interest at the rate of 3.5% per annum. Interest on each of these loans is payable semi-annually in arrears through maturity in May 2018. The outstanding principal amount of these loans is payable in 13 semi-annual installments commencing in May 2012. As of December 31, 2013, the outstanding principal amount under this credit facility was US\$34 million.

Export Credit Facility with Swedish Export Corporation

In June 2011, Telemar entered into an export credit facility with Swedish Export Corporation, or SEK, and Deutsche Bank under which SEK agreed to disburse loans in the aggregate principal amount of up to US\$103 million. Disbursements of US\$5 million, US\$9 million, US\$39 million, US\$14 million, US\$21 million, US\$6 million and US\$10 million under this export credit facility were received in July 2011, November 2011, July 2012, October 2012, February 2013, June 2013 and October 2013, respectively. The proceeds of this export credit facility have been and will be used to fund equipment purchases related to Telemar's capital expenditures on its fixed-line and mobile telecommunications infrastructure. Loans under this export credit facility bear interest at the rate of 2.21% per annum, payable semi-annually in arrears, through maturity in February 2020. The principal of these loans is payable in 17 equal semi-annual installments, commencing in February 2012. As of December 31, 2013, the outstanding principal amount under this credit facility was US\$88 million.

Export Credit Facility with Export Development Canada

In February 2013, Telemar entered into an export credit facility agreement with EDC under which EDC agreed to disburse loans in the aggregate principal amount of up to US\$200 million. A disbursement of US\$96 million under this export credit facility was received in February 2013. The proceeds of this export credit facility have been and will be used to fund equipment purchases related to Telemar's capital expenditures on its fixed-line and mobile telecommunications infrastructure. Loans under this export credit facility bear interest at the rate of 2.25% per annum. Interest on each of these loans is payable semi-annually in arrears through maturity in May 2022. The outstanding principal amount of these loans is payable in 17 semi-annual installments commencing in May 2014. As of December 31, 2013, the outstanding principal amount under this credit facility was US\$96 million.

Table of Contents*Unsecured Lines of Credit*

In May 2008, Telemar entered into an unsecured line of credit with a Brazilian financial institution in the aggregate amount of R\$4,300 million to finance the acquisition of control of Oi. The loans under this line of credit originally bore interest at the rate of the CDI rate plus 1.30% per annum, payable semi-annually in arrears in May and November of each year, commencing in May 2010. As a result of the renegotiation of the terms and conditions of these loans in May 2011, these loans bear interest at the rate of the CDI rate plus 1.00% per annum from May 2011 to May 2014 and at the rate of CDI rate plus 1.83% per annum from May 2014 to May 2018. The principal of these loans is payable in seven equal annual installments, commencing in May 2010. As of December 31, 2013, the outstanding principal amount under this line of credit was R\$3,071 million.

Real Estate Securitization Transaction

In August 2010, Telemar transferred 162 real estate properties to our wholly-owned subsidiary Copart 4 Participações S.A., or Copart 4, and Oi transferred 101 real estate properties to Copart 5 Participações S.A., or Copart 5, our wholly-owned subsidiary. Telemar entered into lease contracts with terms of up to 12 years for the continued use of all of the properties transferred to Copart 4 and Oi entered into lease contracts with terms of up to 12 years for the continued use of all of the properties transferred to Copart 5.

Copart 4 and Copart 5 assigned the receivables representing all payments under these leases to Brazilian Securities Companhia de Securitização, which issued Real Estate Receivables Certificates (*Certificados de Recebíveis Imobiliários*), or CRIs, backed by these receivables. The CRIs were purchased by Brazilian financial institutions.

We received net proceeds from the assignment of lease receivables in the total aggregate amount of R\$1,585 million on a consolidated basis, and recorded our obligations to make the assigned payments as short- and long-term debt in our consolidated financial statements. The aggregate net effective interest rate on this transaction is 102% of the CDI rate. The proceeds raised in this transaction were used to repay short-term debt. In June 2012, each of Copart 4 and Copart 5 partially redeemed the CRIs that they had issued for an aggregate amount of R\$393 million. As of December 31, 2013, the aggregate liability under these leases was R\$922 million.

Credit Facilities with Development Banks

In February 2009, TNL PCS entered into a credit facility with Banco do Nordeste do Brasil S.A., or BNB, under which BNB agreed to disburse loans in an aggregate principal amount of up to R\$369 million. The proceeds of this credit facility have been used for capital expenditures on Telemar's mobile telecommunications infrastructure for the northeastern region of Brazil. Disbursements of R\$370 million under this credit facility were received in 2009. Loans under this credit facility bear interest at 10.0% per annum, with a 15% discount available for timely payment of the interest payments under these loans. Interest is payable quarterly in arrears from May 2009 through February 2011 and monthly in arrears thereafter through maturity in February 2019. The outstanding principal amount is payable in 96 equal monthly installments commencing in March 2011. At December 31, 2013, the outstanding principal amount under this credit facility was R\$250 million. As a result of the merger of TNL PCS with and into Oi Mobile in February 2014, Oi Mobile assumed TNL PCS's obligations under this credit facility.

Capital Expenditures

Our capital expenditures on property, plant and equipment and intangible assets were R\$6,614 million in 2013, R\$6,477 million in 2012 and R\$1,297 million in 2011. The following table sets forth our capital expenditures on plant expansion and modernization for the periods indicated.

	Year Ended December 31,		
	2013	2012	2011
	(in millions of reais)		
Data transmission equipment	R\$ 1,740	R\$ 1,365	R\$ 443

Table of Contents

Installation services and devices	411	1,318	115
Mobile network and systems	1,147	1,081	96
Voice transmission	908	645	144
Information technology services	378	392	60
Telecommunication services infrastructure	539	322	11
Buildings, improvements and furniture	542	244	6
Submarine cables	25	152	15
Network management system equipment	202	142	13
Backbone transmission	71	36	25
Internet services equipment	7	19	12
Other	644	761	357
Total capital expenditures	6,614	6,477	1,297
(Unpaid) amount and cash outflow to settle previously recorded liabilities	(638)	(1,147)	(413)
Total capital expenditures according to the cash flow statement	R\$ 5,976	R\$ 5,330	R\$ 884

Our principal capital expenditures relate to a variety of projects designed to expand and upgrade our data transmission networks, our mobile services networks, our voice transmission networks, our information technology equipment and our telecommunications services infrastructure.

Data Transmission Equipment Programs

In our access networks, we have been engaged in a program of deploying FTTH technology to support our triple play services, using a GPON network engineered to support IP TV and RF overlay video services, internet with speeds up to up to 200 Mbps, and VoIP services.

We have been engaged in a program of acquiring and installing data communications equipment to convert elements of our networks that use ATM protocol over legacy copper wire and SDH protocols to MPLS protocol over optical fiber, which supports IP and permits the creation of VPNs through our MetroEthernet networks.

Our transport network currently is based on 40 Gbps line rate interfaces and we are upgrading our optical DWDM systems and IP backbone routers to support 100 Gbps line rates. We also deployed an optical switching layer based on optical transport network technology in order to provide more efficient use of our DWDM capacity, fast restorations, and IP routers traffic offloading. In 2013, we implemented DWDM links of 100 Gbps between the States of Rio de Janeiro, São Paulo, Minas Gerais and Bahia and extended our optical fiber backbone to Macapá (located in the State of Amapá).

In addition to the capacity expansion, we are simplifying our transport network architecture through the adoption of the single edge concept, which means using one single router to perform many functions, such as aggregation, service protocol termination, access gateway and others, that otherwise would require many specialized routers. We believe that this network simplification will reduce both capital and operational expenditures.

Mobile Services Network Programs

We have undertaken a project to upgrade a portion of our mobile networks to enable us to increase the capacity of our mobile network. In 2012, we constructed 2,237 new radio base stations to support the growth of our subscriber base and expand the capacity at many of our existing radio base stations. In addition, we have undertaken a project to replace approximately 1,407 of our radio base stations in Region I, all of which employ Alcatel-Lucent technology, with Huawei base stations. We completed the replacement of these radio base stations in December 2012. Our total investment in these projects was R\$151 million in 2010, R\$100 million in 2011 and R\$1,000 million in 2012.

We are engaged in a program of introducing wireless local loop technology which will provide service to our customers through our 2G network in areas not supported by our fixed-line network.

Table of Contents

Since December 2007, when we acquired our authorizations to provide 3G services, we have engaged in a program of developing our 3G network. We are deploying new radio base stations and transceivers to improve our 3G coverage and quality in areas which we already serve, reducing the level of signal congestion in these areas, and to expand our 3G service to municipalities in Regions I, II and III where we currently do not provide 3G service. We are continuing to upgrade portions of our 3G mobile network to support greater data rates through the HSPA+ standard.

In June 2012, we acquired the authorizations and radio frequency licenses necessary for us to commence the offering of 4G services throughout Brazil. We intend to offer these services using LTE network technology and have begun deploying our 4G network. As part of this project, we have upgraded our existing mobile core to the LTE Evolved Packet Core, using an Evolved NodeB base station under a Radio Access Network that we will share with other Brazilian mobile services operators. In 2013, we commenced offering 4G services in the 12 cities where the FIFA World Cup will be held. Our deployment was conducted in cooperation with TIM, another Brazilian mobile operator, under a RAN Sharing regime. Through this regime, both operators share the same physical network, each using its own frequency spectrum resources, thus reducing the deployment costs by approximately 50% while maintaining all of the characteristics of an individual network with respect to our customers. RAN sharing makes use of 3GPP standard features, permitting full technical support. The deployment of this network under a RAN Sharing arrangement was the first of its kind in Latin America.

In November 2011, we began deploying a network of Wi-Fi hotspots in order to offload traffic from our mobile network. The Oi Wi-Fi network is composed of sub networks that are accessible (1) from indoor public and commercial sites, (2) from outdoor public spaces, and (3) from residential access points of our fixed-line customers that share access points in association with Fon.

Voice Transmission Network Programs

We are engaged in a program of investing in new equipment for our switching station to support next-generation networks to support offerings of new value-added services to our fixed-line customers. We believe that our investment in next-generation networks will:

assist us in meeting the increased demand for long distance traffic, both domestic and international, through the use of VoIP;

permit us to offer differentiated services, such voice over broadband; and

significantly promote fixed-mobile convergence.

As part of this program, we are concluding the deployment of an IP Multimedia Subsystem, or IMS, core that will facilitate our convergent voice, broadband and IP TV offerings. The IMS core not only will provide control for the VoIP resource but also integrated access control and authentication for all three services, significantly improving automation and speed for customer provisioning.

We are also undertaking a program of removing and replacing smaller switching stations and integrating these operations with other switching stations to promote efficiency in our operations.

We monitor the anticipated demands of new residential developments and the service demand growth of existing residential areas to ensure that we make adequate network equipment available to service the demands of these areas.

Information Technology Services Programs

We are investing in the expansion of capacity of our servers dedicated to our corporate customers with a view to increasing the efficiency of the services that we provide to these customers and to support our *Oi Smart Cloud* service, which we launched in 2012 to provide end-to-end virtual telecommunications and information technology solutions for our corporate clients.

Table of Contents

Telecommunications Services Infrastructure Programs

We are investing in the expansion of the network operating platform supporting our network operations center to assist us in monitoring transmission failures in real time and assist us in correlating and integrating data related to these transmission failures to their root causes with the aim of reducing the frequency of these events. In 2012, we initiated projects to consolidate and replace Oi's systems architecture.

We are currently undergoing an effort to transform the existing service provisioning systems and to create new ones according to a TOM framework. Our goal is to speed service creation and provisioning, reduce costly human intervention and increase overall customer quality of experience through automation of fulfillment processes.

We are investing in the expansion of our transport networks in an effort to ensure that our networks continue to have the capacity to serve our existing customers and to support our plans to expand our services. Among other investments, we are investing in the expansion of our national backbone to support the expansion of 3G services and new services, the expansion of our satellite network, taking measures to improve our network synchronization and signaling links, taking measures to improve our interconnection traffic, investing in projects to improve route optimization.

We are also investing in projects to improve our networks by increasing the redundancy of our wire and fiber optic cable routes and establishing new linear and ring routes. We also perform preventive maintenance on sections of our network that have unusually high failure rates, and have a program to replace network elements in these sections.

We are investing in the standardization of our facilities to deter fraud and improve the quality of our services, including the replacement of some of our public telephones.

Off-Balance Sheet Arrangements

We do not currently have any transactions involving off-balance sheet arrangements.

U.S. GAAP Reconciliation

We reported net income in accordance with Brazilian GAAP in the amount of R\$1,493 million in 2013, R\$1,785 million in 2012 and R\$1,006 million in 2011. Under U.S. GAAP, we would have reported net income of R\$604 million in 2013 and R\$866 million in 2012, and net loss of R\$557 million in 2011.

Our total shareholders' equity in accordance with Brazilian GAAP was R\$11,524 million as of December 31, 2013 and R\$11,109 million as of December 31, 2012. Under U.S. GAAP, we would have reported total shareholders' equity of R\$20,013 million as of December 31, 2013 and R\$20,428 million as of December 31, 2012.

The principal differences between Brazilian GAAP and U.S. GAAP that affected our net income in 2013, 2012 and 2011, as well as total shareholders' equity as of December 31, 2013 and 2012, are described in note 31 to our audited consolidated financial statements included elsewhere in this annual report. The differences that result in significant adjustments relate to the accounting treatment of the following items:

capitalized interest;

business combinations and goodwill;

accounting treatment of the restructuring occurred in February 2012; and

prepaid pension plan costs.

Table of Contents

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

Our board of directors (*conselho de administração*) and our board of executive officers (*diretoria*) are responsible for operating our business.

Board of Directors

Our board of directors is a decision-making body responsible for, among other things, determining policies and guidelines for our business and our wholly-owned subsidiaries and controlled companies. Our board of directors also supervises our board of executive officers and monitors its implementation of the policies and guidelines that are established from time to time by the board of directors. Under the Brazilian Corporation Law, our board of directors is also responsible for hiring independent accountants.

Our by-laws provide for a board of directors of up to 17 members and an equal number of alternate members. As of the date of this annual report, our board of directors is composed of 16 members and 14 alternate members. During periods of absence or temporary unavailability of a regular member of our board of directors, the corresponding alternate member substitutes for the absent or unavailable regular member.

The members of our board of directors are elected at general meetings of shareholders for two-year terms and are eligible for reelection. The terms of all current members expire at our annual shareholders meeting in 2014. Members of our board of directors are subject to removal at any time with or without cause at a general meeting of shareholders. Our by-laws do not contain any citizenship or residency requirements for members of our board of directors. Our board of directors is presided over by the chairman of the board of directors, and, in his absence, on an interim basis, by his designated alternate. The chairman of our board of directors is elected by the members of the board of directors, serves for a two-year term and is eligible for reelection. Our bylaws provide that the chairman of our board of directors may not serve as our chief executive officer.

Our board of directors ordinarily meets once every month and extraordinarily when a meeting is called by the chairman or any two other members of our board of directors. Decisions of our board of directors require a quorum of a majority of the directors and are taken by a majority vote of those directors present.

Table of Contents

The following table sets forth certain information with respect to the current members of our board of directors and their alternates.

<i>Name</i>	<i>Position</i>	<i>Member Since</i>	<i>Age</i>
José Mauro Mettrau Carneiro da Cunha	Chairman	February 2009	64
José Augusto da Gama Figueira	Alternate	April 2011	66
Luís Miguel da Fonseca Pacheco de Melo	Director	June 2013	45
Shakhaf Wine	Director	April 2012	46

(1) Elected by the preferred shareholders.

We summarize below the business experience, areas of expertise and principal outside business interests of our current directors and their alternates.

Directors

José Mauro Mettrau Carneiro da Cunha. Mr. Cunha has served as our chairman since February 2009, and serves on our board of directors as a nominee of FATL. From January 2013 until June 2013, Mr. Cunha served as our interim chief executive officer, during which time he resigned as chairman and member of our board of directors. He resumed his position as our chairman and a member of our board of directors in June 2013. Mr. Cunha previously served as chairman of the board of directors of TNL from April 2007 until February 2012. He has also been an alternate director of TmarPart since April 2008. Mr. Cunha was a member of the board of directors of Telemar from April 1999 to May 2012. He has also served on the board of directors of Santo Antonio Energia S.A. since April 2008 and Vale S.A. since April 2010. Mr. Cunha was an executive officer of Lupatech S.A. from April 2006 to April 2012, where he served as a member of the board of directors from April 2006 to April 2012. He has also held several executive positions at BNDES, and was a member of its board of executive officers from 1991 to 2002. He was the vice president of strategic planning of Braskem S.A. from February 2003 to October 2005, and business consultant from November 2005 to February 2007. Mr. Cunha was a member of the board of directors of

Table of Contents

Log-In Logística Intermodal from April 2007 to March 2011, Braskem S.A. from July 2007 to April 2010, Banco do Estado do Espírito Santo S.A. (Banestes) from April 2008 to April 2009, Light Serviços de Eletricidade S.A. from December 1997 to July 2000, Aracruz Celulose S.A. from June 1997 to July 2002, FUNTTEL from December 2000 to January 2002, FUNCEX- Fundação Centro de Estudos do Comércio Exterior from June 1997 to January 2002, and Politeno Indústria e Comércio S.A. from April 2003 to April 2004. Mr. Jereissati is the son of our alternate director Carlos Francisco Ribeiro Jereissati, brother of our director Pedro Jereissati and our alternate director Erika Jereissati Zullo and cousin of our director Alexandre Jereissati Legey.

Carlos Francisco Ribeiro Jereissati. Mr. Jereissati has served as an alternate member of our board of directors since April 2012 as a nominee of LF Tel and was an alternate member of the board of directors of TNL from April 2007 until February 2012, having previously served as a member of TNL's board of directors from August 1998 to April 2007, including as chairman from August 1998 to August 2000, from November 2002 to October 2003, and from November 2005 to April 2007. He has also served as a member of the board of directors of TmarPart since 1999, LF Tel since April 1999, and chairman of the board of directors of LF Tel since July 1999. He has been the chief executive officer of Jereissati Telecom since April 1984. Since 1970, Mr. Jereissati has served as the chief executive officer of Jereissati Participações S.A., a holding company that controls several companies, including Iguatemi Empresa de Shopping Centers S.A. and Jereissati Telecom. He also served as a member of the board of directors of the BM&FBOVESPA, vice-chairman of the board of directors of Companhia Vidraria Santa Marina (a member of the Saint Gobain Group), president of the executive council of the Brazilian Association of Shopping Centers (*Associação Brasileira de Shopping Centers*), and member of the consultant council of the São Paulo State Union of Real Estate Companies. Mr. Jereissati holds a bachelor's degree in economics from Mackenzie University of São Paulo. Mr. Jereissati is the father of our director Pedro Jereissati and our alternate directors Carlos Jereissati and Erika Jereissati Zullo and uncle of our director Alexandre Jereissati Legey.

Cristina Anne Betts. Ms. Betts has served as an alternate member of our board of directors since April 2012 as a nominee of LF Tel. She has been vice-president of finance at Iguatemi Empresa de Shopping Centers S.A. since April 2008. She was a member of the board of directors of Contax Holdings from 2009 until 2012. Previously, she worked at Tam Linhas Aéreas S.A., where she was director of the strategic planning and controlling departments and investor relations officer from 2004 until 2008; Bain & Company from 1999 until 2004; Banco Credit Suisse First Boston Garantia from 1995 until 1999; and PriceWaterhouse from 1992 until 1995. Ms. Betts holds a bachelor's degree in business administration from Fundação Getúlio Vargas and an MBA from INSEAD in France.

Erika Jereissati Zullo. Ms. Zullo has served as an alternate member of our board of directors since April 2012 as a nominee of LF Tel. She is vice-president for retail at Iguatemi Empresas de Shopping Centers, where she has worked since 1989. She has been an associate of the ICSC International Council of Shopping Centers since 1994, an associate of the Luxury Marketing Council since June 1996 and an alternate member of the board of directors of Abrasce Associação Brasileira de Shopping Center S.A. since June 1996. She holds a bachelor's degree in business administration from Universidade Makenzie and a post-graduate degree in communication and marketing from ESPM in 1995. Ms. Zullo is the daughter of our alternate director Carlos Francisco Ribeiro Jereissati, sister of our

Table of Contents

director Pedro Jereissati and our alternate director Carlos Jereissati and cousin of our director Alexandre Jereissati Legey.

Laura Bedeschi Rego de Mattos. Mrs. Mattos has served as an alternate member of our board of directors since April 2012 as a nominee of BNDESPar and was an alternate member of the board of directors of TNL from April 2011 until February 2012. She has ten years of experience structuring debt and equity transactions at various institutions in the financial sector (BNDESPar, BNDES and FINEP). Since March 2002, Mrs. Mattos has worked at BNDES, where she has chaired the department that manages equity investments at BNDESPar since December 2010. In this role, Mrs. Mattos is responsible for leading the team that manages BNDESPar's equity positions in the logistics, mining, steel, pulp and paper, telecommunications, capital goods, information technology and pharmaceutical industries. She also has experience structuring debt and infrastructure project finance transactions. From May 2005 to December 2010, Mrs. Mattos served as manager and chair of the capital markets investment department, where she was responsible for BNDESPar's equity investments in new companies for the portfolio. Since December 2010, she has served as an alternate member of the board of directors of Valepar S.A., the controlling company of Vale S.A. Since April 2011, she has served as an alternate member of the board of directors of América Latina Logística S/A. Since December 2011, she has served as an alternate member of the board of directors of Fibria Celulose S/A. Mrs. Mattos holds a bachelor's degree in chemical engineering from Universidade Federal do Rio de Janeiro, a post-graduate degree in finance from IBMEC Instituto Brasileiro de Mercados de Capitais Rio de Janeiro and a master's degree in energy planning from Instituto Alberto Luiz Coimbra de Pós-graduação e Pesquisa de Engenharia (COPPE) at Universidade Federal do Rio de Janeiro.

Luciana Freitas Rodrigues. Ms. Rodrigues has served as an alternate member of our board of directors since April 2012 as a nominee of PREVI. She is core manager at PREVI, where she has worked since 2000. She has been a member of the board of directors of Valepar S.A., the holding company that controls Vale S.A., since April 2011. Previously, she was a member of the board of directors of Termopernambuco S.A. from April 2003 until April 2011; COSERN Companhia Energética do Rio Grande do Norte from April 2003 until April 2011; ITAPEBI Geração de Energia S.A. from April 2003 until April 2011; and Neoenergia from April 2003 until April 2011. Ms. Rodrigues holds bachelor's degrees in statistics from Universidade do Estado do Rio de Janeiro (UERJ) and actuarial sciences from Universidade Estácio de Sá, an MBA in finance from IBMEC, an MBA in corporate governance from Fundação Getúlio Vargas and an MBA in complementary social security from IDEAS.

Marcelo Almeida de Souza. Mr. Souza has served as an alternate member of our board of directors since June 2012 as a nominee of PETROS. He has been executive manager of the private credit department at PETROS since April 2012. From January 2011 to March 2012, he served as executive officer for investment planning at PETROS. From 2006 to 2008, he served as a manager in the private credit department at PETROS and investment analyst at the Brazilian Association of Financial Institutions (*ANDIMA Associação Nacional das Instituições do Mercado Financeiro*). Since 2012, Mr. Souza has served as an alternate member of the board of directors of Invepar Investimentos e Participações em Infra-Estrutura S.A., where he was a member of the fiscal council from November 2011 to May 2012. Mr. Souza holds a degree in business administration from Universidade Gama Filho and a specialization in finance from Coppead/UFRJ.

Emerson Tetsuo Miyazaki. Mr. Miyazaki has served as an alternate member of our board of directors since November 2013 as a nominee of FUNCEF. He has been senior analyst at Fundação dos Economistas Federais FUNCEF since February 2011. From February 2010 to February 2011, he served as financial analyst in the financial planning and investor relations department at Norte Energia S.A., a company composed of state and private companies in the electrical, contracting, pension funds and investment sectors and responsible for building and operating the Belo Monte Hydroelectric Complex. From April 2009 to January 2011, he was a controlling market analyst at FUNCEF. From November 2007 to April 2009, Mr. Miyazaki served as financial analyst at Brasil Telecom. Mr. Miyazaki holds a degree in business administration from Universidade de Brasília.

Executive Officers

Our board of executive officers is our executive management body. Our executive officers are our legal representatives and are responsible for our internal organization and day-to-day operations and the implementation of the general policies and guidelines established from time to time by our board of directors.

Table of Contents

Our by-laws require that the board of executive officers consist of between two and ten members, including a chief executive officer and a chief financial officer. Our by-laws provide that our chief executive officer may not serve as chairman of our board of directors. Each officer is responsible for business areas that our board of directors assigns to them. The members of our board of executive officers, other than our chief executive officer and our chief financial officer, have no formal titles (other than the title of executive officer or *Diretor*).

The members of our board of executive officers are elected by our board of directors for two-year terms and are eligible for reelection. The current term of all of our executive officers ends on the date of our first board of directors meeting following our annual shareholders meeting in 2015. Our board of directors may remove any executive officer from office at any time with or without cause. According to the Brazilian Corporation Law, executive officers must be residents of Brazil but need not be shareholders of our company. Our board of executive officers holds meetings when called by our chief executive officer or any two other members of our board of executive officers.

The following table sets forth certain information with respect to the current members of our board of executive officers.

<i>Name</i>	<i>Position</i>	<i>Date Elected/ Appointed</i>	<i>Age</i>
Zeinal Abedin Mahomed Bava	Chief Executive Officer	June 2013	48
Bayard De Paoli Gontijo	Chief Financial Officer and Investor	June 2013	
	Relations Officer		42
Eurico De Jesus Teles Neto	Executive Officer	April 2012	57

Summarized below is information regarding the business experience, areas of expertise and principal outside business interests of our current executive officers.

Zeinal Abedin Mahomed Bava. Mr. Bava has served as our chief executive officer since June 2013. Previously, he served as a member of our board of directors from April 2012 until June 2013 as a nominee of Bratel Brasil and was a member of the board of directors of TNL from April 2011 until February 2012. Mr. Bava has been chief executive officer of Portugal Telecom since March 2008. He was chief executive officer of PT Multimédia Serviços de Telecomunicações e Multimédia, SGPS, S.A. from May 2003 until September 2007; executive director and Portugal Telecom relationship manager at Merrill Lynch from 1998 until 1999; executive director and Portugal Telecom relationship manager at Deutsche Morgan Grenfell & Co. from 1996 to 1998; and executive officer of Warburg Dillon Read from 1989 to 1996. Mr. Bava has held various board positions throughout his career, including chairman of the board of directors of: PT Prime Soluções Empresariais de Telecomunicações e Sistemas, S.A. from September 2007 until December 2011, PT Ventures, SGPS, S.A. from November 2008 until July 2010, PT Centro Corporativo, S.A. from March 2006 until April 2009, PT Sistemas de Informação, S.A. from September 2007 until April 2009, PT PRO, Serviços Administrativos e de Gestão Partilhados, S.A. from February 2003 until June 2008, Previsão Sociedade Gestora de Fundos de Pensões, S.A. from March 2003 to October 2007, TV Cabo Portugal, S.A. from March 2004 until September 2007, PT Conteúdos Atividade de Televisão e de Produção de Conteúdos, S.A. from until September 2007, Lusomundo Cinemas, S.A. from until September 2007, Lusomundo Audiovisuais, S.A. from until September 2007, PT Televisão por Cabo, SGPS, S.A. from until September 2007, PT Prestações Mandatária de Aquisições de Gestão de Bens, S.A. from March 2004 until 2006; vice-chairman of the board of directors of: PT Multimédia Serviços de Telecomunicações e Multimédia, SGPS, S.A. from November 2002 until September 2007, PT Comunicações, S.A. from January 2004 until December 2005 and PT Ventures, SGPS S.A. from 2000 until 2002; and a member of the board of directors of: Fundação Luso Brasileira from June 2009 until September 2009; Brasilcel, NV from December 2002 until October 2007, Portugal Telecom Investimentos Internacionais, S.A. from April 2004 until April 2006, PT Rede Fixa, SGPS S.A., from March 2006 until June 2009, PT Sistemas de Informação, S.A. from May 2004 until April 2006, PT Corporate Soluções Empresariais de Telecomunicações e Sistemas, S.A. from June 2003 until April 2006, Páginas Amarelas, S.A. from January 2004 until May 2005; PT Compras Serviços de Consultoria e Negociação, S.A. from May 2003 until 2005; CRT Celular Participações, S.A. from 2003 until

Table of Contents

2005; Tele Sudeste Participações, S.A. from 2003 until 2005; Tele Leste Participações, S.A. from 2003 until 2005; Tele Centro Oeste Celular Participações, S.A. from 2003 until 2005; Portugal Telecom Brasil, S.A. from July 2002 until March 2004; BEST Banco Eletrônico de Serviço Total, S.A. from May 2001 until October 2004; and Telesp Celular Participações, S.A. from April 2001 until December 2003. Mr. Bava holds a degree in Electrical and Electrotechnical Engineering from University College London.

Bayard De Paoli Gontijo. Mr. Gontijo has served as our chief financial officer and investor relations officer since June 2013 and has served as one of our executive officers since April 2012. Mr. Gontijo started working at Oi as Treasury Manager in 2003 and currently holds the position of Director of Treasury and Investor Relations. Mr. Bayard has over 19 years experience in the financial market and, since 1993, works with large companies and banks such as Banco Bamerindus do Brasil S.A., HSBC Bank Brasil S.A., and NET Serviços de Comunicações S.A. Mr. Gontijo holds a degree in Business Administration and holds an MBA from Coppead / UFRJ.

Eurico de Jesus Teles Neto. Mr. Teles has served as one of our executive officers since April 2012. He was member of our board of directors from 2009 to 2011 and an alternate member of our board of directors until April 2012. He previously served as member of the board of directors of Coari from 2009 until February 2012 and has been a member of the board of directors of Telemar Norte Leste since 2009. He was the legal officer of TNL from April 2007 through February 2012 and the legal manager of Telemar from April 2005 until April 2007. He previously served as manager of the real estate division at Telebahia, where he went on to hold the position of legal consultant in 1990. Mr. Teles holds a bachelor's degree in legal sciences and law from Universidade Católica de Salvador and holds a master's degree in Employment Law from Universidade Estácio de Sá.

Jason Santos Inácio. Mr. Inácio was appointed to our board of executive officers in January 2014. However, as of the date of this annual report, he is awaiting his permanent visa to work in Brazil as a manager of Brazilian companies before he begins to exercise his duties as a member of our board of executive officers. Beginning in 2006, he had previously worked at Portugal Telecom, where he served in various capacities, most recently as infrastructure and operations director of PTM.com, a multimedia division of Pay-TV Multimídia. In 2007, he joined Portugal Telecom's telecommunications division, where he was responsible for several large transformation projects. Mr. Inácio joined Portugal Telecom in 2006 as operations manager at PTM.Com, a multimedia unit of the Portugal Telecom's subscription television division. Mr. Inácio holds a bachelor's degree in marketing from Instituto Superior de Línguas e Administração (ISLA) and a post-graduate degree in business management from Instituto para o Desenvolvimento da Gestão Empresarial (INDEG) do Instituto Superior de Ciências do Trabalho e da Empresa (ISCTE).

Fiscal Council

The Brazilian Corporation Law requires us to establish a permanent or non-permanent fiscal council (*conselho fiscal*). Our by-laws provide for a permanent fiscal council composed of between three and five members and their respective alternate members. The fiscal council is a separate corporate body independent of our board of directors, our board of executive officers and our independent accountants. The primary responsibility of the fiscal council is to review our management's activities and our financial statements and to report their findings to our shareholders.

The members of our fiscal council are elected by our shareholders at the annual shareholders meeting for one-year terms and are eligible for reelection. The terms of the members of our fiscal council expire at the next annual shareholders meeting. Under the Brazilian Corporation Law, the fiscal council may not contain members who are members of our board of directors or our board of executive officers, spouses or relatives of any member of our board of directors or our board of executive officers, or our employees. To be eligible to serve on our fiscal council, a person must be a resident of Brazil and either be a university graduate or have been a company officer or fiscal council member of another Brazilian company for at least three years prior to election to our fiscal council. Holders of preferred shares without voting rights and non-controlling common shareholders that together hold at least 10.0% of our voting share capital are each entitled to elect one member and his or her respective alternate to the fiscal council.

The following table sets forth certain information with respect to the current members of our fiscal council and their alternates.

Table of Contents

Name	Position	Member Since	Age
Allan Kardec de Melo Ferreira	Chairman	February 2009	67
Newton Brandão Ferraz Ramos	Alternate	April 2012	44
Sidnei Nunes	Member	March 2013	54
Aparecido Carlos Correia Galdino	Alternate	March 2013	62
Umberto Conti	Member	March 2013	39
Carmela Carloni Gaspar	Alternate	March 2013	31
Marcos Duarte dos Santos (1)	Member	April 2010	44
Peter Edward Cortes Marsden Wilson (1)	Alternate	April 2012	41
Manuel Jeremias Leite Caldas (2)	Member	March 2013	58
Vanessa Montes de Moraes (2)	Alternate	March 2013	32

(1) Elected by the preferred shareholders.

(2) Elected by the minority shareholders.

We summarize below the business experience, areas of expertise and principal outside business interests of the current members of our fiscal council and their alternates.

Fiscal Council Members

Allan Kardec de Melo Ferreira. Mr. Ferreira has served as chairman of our fiscal council since February 2009. He has also served as an alternate member of the fiscal council of TmarPart since April 2006 and a member of the fiscal council of TNL from April 2002 through February 2012. From 1971 to 1993, he was an in-house counsel with Construtora Andrade Gutierrez. His current activities include management consultancy services to a number of companies in the civil, commercial and tax areas, participation in corporate restructuring processes (mergers, spin-offs, disposals, sale of assets) of the telecommunications companies of the Andrade Gutierrez Group and in several bidding processes conducted by the Minas Gerais Roads Department (*Departamento de Estrada de Rodagem de Minas Gerais*), the Belo Horizonte Traffic Department (*Empresa de Transporte e Trânsito de Belo Horizonte*), the Ministry of Communications, the National Road Department (*Departamento Nacional de Estradas de Rodagem*) and ANATEL. He holds a degree in law from Pontifícia Universidade Católica de Minas Gerais, in addition to having participated in several extension courses in foreign trade, in particular export services, at Fundação Centro de Comércio Exterior, FDC, Foreign Trade Ministry, and Construtora Andrade Gutierrez.

Sidnei Nunes. Mr. Nunes has served as a member of our fiscal council since March 2013. He served as an alternate member of our fiscal council from April 2012 to March 2013 and as a member of our fiscal council from April 2011 to April 2012. He served as an alternate member of the fiscal council of TNL from April 2007 through February 2012, an alternate member of the fiscal council of TmarPart since April 2008 and an alternate member of the fiscal council of Telemar from April 2007 through February 2012. He served as an alternate member of our fiscal council from February 2009 to April 2011. He has been managing officer of Jereissati Participações S.A. since April 2008, chief financial officer of Jereissati Telecom since April 2008 and managing officer of LF Tel since April 2006. Mr. Nunes has served as a member of the boards of directors of Iguatemi Empresa de Shopping Centers S.A. since April 2006, LF Tel since April 2006, and Grande Moinho Cearense S.A. since April 2005. Mr. Nunes is a financial officer and controller of several companies of the Jereissati Group since September 1995. Mr. Nunes holds bachelor's degrees in business administration and accounting from the Faculdade de Administração Paulo Eiró and an MBA from the University of São Paulo.

Umberto Conti. Mr. Conti has served as a member of our fiscal council since March 2013. Since October 2010, he has been the new business development coordinator at FUNCEF, where he previously served as special consultant to the president from November 2006 to October 2010. From September 1999 to November 2006, Mr. Conti was an economist at Caixa Econômica Federal. He has also served as a member of the investment committees of the Brazilian private equity investment funds FIP CRP VII since March 2010 and FIP Terra Viva since January 2009. He holds bachelor's degrees in data processing technology from Universidade Mackenzie and geography from Universidade de São Paulo and a graduate degree in finance from IBMEC.

Table of Contents

Marcos Duarte dos Santos. Mr. Duarte has served as a member of our fiscal council as a nominee of our preferred shareholders since April 2010. He served as a member of the fiscal council of Telemar from April 2007 through February 2012. Mr. Duarte was a vice president and fixed income trader at CSFB – Garantia from 1997 to 1998, a vice president for Bankers Trust Company in New York from 1996 to 1997, and a vice president for Bankers Trust Company in Rio de Janeiro from 1994 to 1996. He served as a member of the fiscal councils of Tele Norte Celular S.A., Tele Ceará S.A. and Tele Espírito Santo S.A. from 2001 to 2002. He holds a bachelor's degree in production engineering from the Universidade Federal do Rio de Janeiro.

Manuel Jeremias Leite Caldas. Mr. Caldas has served as a member of our fiscal council as a nominee of our minority shareholders since March 2013. He has been a consultant at Alto Capital Gestão de Recursos since 2007. Previously, he was manager of the technical department of Banco PEBB S.A. from 1996 to 2006, research manager at Banco Gulfinvest S.A. from 1994 to 1995, manager of the economics department at Banco Nacional S.A. from 1991 to 1994, financial analyst at Banco Bozano Simonsen S.A. from 1990 to 1991, engineer at Light Serviços de Eletricidade S.A. from 1989 to 1990 and engineer at Usina Itaipu in 1981. Mr. Caldas has served as a member of the board of directors of Eletropaulo Metropolitana Eletricidade de São Paulo S.A. since April 2012, an alternate member of the board of directors of Contax Holdings since 2012 and São Carlos Empreendimentos e Participações S.A. since 2011 and a member of the fiscal council of Centrais Elétricas Brasileiras S.A. – Eletrobras since 2012. He also served as a member of the fiscal council of Companhia Energética do Rio Grande do Norte (Cosern) from 2009 to 2011. Mr. Caldas holds a bachelor's degree in electrical engineering from Instituto Militar de Engenharia – IME and a master's degree and a doctorate in economics from FGV.

Alternate Fiscal Council Members

Newton Brandão Ferraz Ramos. Mr. Ramos has served as an alternate member of our fiscal council since April 2012. He has been the controller at AG Concessões since July 1998. Mr. Ramos has served as a member of the fiscal council of Cia. de Saneamento do Paraná – SANEPAR since 2006, Cia. de Concessões Rodoviárias – CCR S.A. since 2005 and Dominó Holdings S.A. since 2008. He has also served as an alternate member of the board of directors of CEMIG – Companhia Energética de Minas Gerais S.A. since 2010. Mr. Ramos holds a degree in accounting sciences from Pontifícia Universidade Católica de Minas Gerais, a graduate degree in business administration from Universidade FUMEC and an MBA in finance from Fundação Dom Cabral.

Aparecido Carlos Correia Galdino. Mr. Galdino has served as an alternate member of our fiscal council since March 2013. He previously served as a member of our fiscal council, from February 2011 to March 2013. He has also served as a member of the fiscal council of TmarPart since April 2008. Mr. Galdino was an alternate member of the fiscal council of TNL from April 2009 through February 2012. He joined the Jereissati Group in 1971 and has been managing officer and investor relations officer of Jereissati Participações S.A. since April 1990. He has served as the chief financial officer of La Fonte Participações S.A. since April 1990, and has been a member of the board of directors of LF Tel since February 2008, Iguatemi Empresa de Shopping Centers S.A. since July 2008 and Jereissati Telecom since April 1991. He has served as a member of the fiscal council of Contax Holdings since April 2008, as a member of the fiscal council of Tele Norte Celular Participações S.A. from May 2008 to present and as a member of the fiscal council of Amazônia Celular S.A. from May 2008 to March 2009. Mr. Galdino holds a bachelor's degree in business administration from Faculdades Integradas Princesa Isabel.

Carmela Carloni Gaspar. Ms. Gaspar has served as an alternate member of our fiscal council since March 2013. She has been an analyst at FUNCEF since December 2012. She was a products analyst at BANCOOB – Banco Cooperativo do Brasil S.A. from June 2012 to November 2012 and projects manager at R8 Consultoria Empresarial Ltda. from December 2009 to June 2012. From December 2006 to December 2009, she held various positions at Oi, including junior analyst in the controlling department from December 2006 to March 2008, senior analyst in the planning and marketing department from March 2008 to February 2009 and senior analyst in the Region II offers department from February 2009 to December 2009. Ms. Gaspar began her professional career as a business analyst at Spectrum Latino América S.A. /Value Partners. Ms. Gaspar holds a bachelor's degree in economic sciences from Universidade de Brasília and an MBA in projects from FGV.

Peter Edward Cortes Marsden Wilson. Mr. Wilson has served as an alternate member of our fiscal council since April 2012. He has been a partner at Managrow Consultoria Estratégica em Finanças Ltda. since 2007. From 2004 to 2007, he was an equity manager at PHI Capital Management; from 2001 to 2004, he was adjunct manager of

Table of Contents

investments at Grupo Ourinvest; and from 1993 to 1998, he was responsible for the middle and back offices of Banque Nationale de Paris, Latin America Investment Banking Group, where he was also an equity and fixed income fund trader. Mr. Wilson holds a degree in public administration, an MBA in finance and a master's degree in economics from FGV.

Vanessa Montes de Moraes. Ms. Moraes has served as an alternate member of our fiscal council since March 2013. She has been a partner at Argucia Capital Management Ltda. since February 2006, where she is responsible for the compliance, risk and products department. From August 2003 to December 2005, she was an analyst and variable income manager at Mellon Global Investments Brasil S/C Ltda.; from April 2003 to August 2003, she worked in the treasury department of Souza Cruz S.A.; and from January 2002 to October 2002, she was a research assistant at FGV. Ms. Moraes served as a member of the fiscal council of Contax Holdings from 2010 to 2011 and an alternate member of Companhia Energética do Rio Grande do Norte (Cosern) from 2009 to 2011. Ms. Moraes holds a bachelor's degree and a master's degree in economics from IBMEC, and graduate degrees in corporate law from FGV and IBMEC.

Compensation

According to our by-laws, our shareholders are responsible for establishing the aggregate compensation we pay to the members of our board of directors and our board of executive officers, as well as the individual compensation we pay to members of our fiscal council. Our shareholders determine this compensation at the annual shareholders' meeting. Once aggregate compensation is established, our board of directors is responsible for distributing such aggregate compensation individually to the members of our board of directors and our board of executive officers in compliance with our by-laws.

The aggregate compensation paid by us to all members of our board of directors, board of executive officers and our fiscal council for services in all capacities was R\$15.1 million in 2013. This amount includes pension, retirement or similar benefits for our officers and directors.

At our annual shareholders' meeting to be held not later than April 30, 2014, our shareholders will establish the aggregate compensation limits for each of our board of directors, our board of executive officers and our fiscal council.

We compensate our alternate directors for each meeting of our board of directors that they attend. We compensate alternate members of our fiscal council for each meeting of our fiscal council that they attend.

Our executive officers receive the same benefits generally provided to our employees, such as medical (including dental) assistance, private pension plan and meal vouchers. Like our employees, our executive officers also receive an annual bonus equal to one-month's salary (known as the thirteenth (monthly) salary in Brazil), an additional one-third of one-month's salary for vacation, and contributions of 8.0% of their salary into a defined contribution pension fund known as the Guarantee Fund for Time of Service (*Fundo de Garantia por Tempo de Serviço*). Members of our board of directors and fiscal council are not entitled to these benefits.

Members of our board of directors, board of executive officers and fiscal council are not parties to contracts providing for benefits upon the termination of employment other than, in the case of executive officers, the benefits described above.

Our Human Resources and Compensation Committee, or the Compensation Committee, is an advisory committee to our board of directors. It meets every two months but may hold additional meeting if necessary. According to its charter, the Compensation Committee is responsible for: (1) reviewing, recommending and monitoring talent and human resources training and management strategies; (2) assisting our board of directors with large-scale changes to our organizational structure at the first and second organizational levels below the Chief Financial Officer; (3) analyzing our global compensation strategy, including fixed and variable compensation, benefits and long-term incentives, and recommending bonus guidelines; (4) preparing an assessment of the Chief Financial Officer and reviewing the evaluations of our senior executives for submission to our board of directors; and (5) reviewing and recommending an employee performance evaluation system, among other things.

Table of Contents

The Compensation Committee is composed of three to eight members, including members of our board of directors, who are elected by our board of directors. The current membership of the Compensation Committee includes members of our board of directors (José Mauro Mettrau Carneiro da Cunha, Armando Galhardo Nunes Guerra Junior and Shakhaf Wine), alternate members of our board of directors (Carlos Jereissati, Laura Bedeschi Rego de Mattos, and Emerson Tetsuo Miyazaki), and other individuals (Bruno da Silva Almeida and Daniel Gonçalves Pereira). All of the members of the Compensation Committee have been elected to terms that expire at the annual general shareholders meeting to be held in 2014.

Share Ownership

As of March 6, 2014, the number of our common and preferred shares held by the members of our board of directors and board of executive officers, supervisory or management bodies, including outstanding stock options, do not exceed 1% of either class of our outstanding shares.

Employees

As of December 31, 2013, we had a total of 42,571 employees. All of our employees are employed on a full-time basis, divided into the following functions: network operations, sales and marketing, information technology, call center operations, support areas and authorized agents.

The table below sets forth a breakdown of our employees by main category of activity and geographic location as of the dates indicated:

	As of December 31,		
	2013	2012	2011
Number of employees by category of activity:			
Plant operation, maintenance, expansion and modernization	13,943	9,286	1,806

We negotiate separate collective bargaining agreements with the local unions in each of the states in Regions I, II and Region III for our company and each of our subsidiaries operating in such states. New collective bargaining agreements with these unions are negotiated every year. We maintain good relations with each of the unions representing our employees. As of December 31, 2013, approximately 18% of the employees of our company were members of state labor unions associated either with the National Federation of Telecommunications Workers (*Federação Nacional dos Trabalhadores em Telecomunicações*), or Fenattel, or with the Interstate Federation of Telecommunications Workers (*Federação Interestadual dos Trabalhadores em Telecomunicações*), or Fittel. We have never experienced a strike that had a material effect on our operations.

Employee Benefits*Pension Benefit Plans**Sistel*

Sistel is a not-for-profit private pension fund created by Telebrás in November 1977 to supplement the benefits provided by the federal government to employees of the former Telebrás System. The following are pension plans managed by Sistel.

PBS-A Plan

Since the privatization of Telebrás, the Sistel Benefits Plan (*Plano de Benefícios da Sistel Assistidos*), or PBS-A plan, a defined benefit plan, has been sponsored by the fixed-line telecommunications companies that resulted from the privatization of Telebrás, including our company and TNL. The PBS-A plan is self-funded and has been closed to new members since January 2000. Contributions to the PBS-A plan are contingent on the determination of an accumulated deficit and we are jointly and severally liable, along with other fixed-line telecommunications companies, for 100% of any insufficiency in payments owed to members of the PBS-A plan. As of December 31, 2013, the PBS-A plan had a surplus of R\$3.2 billion. We were not required to make contributions to the PBS-A plan in 2013, 2012 or 2011.

PBS-TNCP Plan

Since the privatization of Telebrás, our subsidiary Tele Norte Celular Participações S.A., or TNCP, has sponsored the Sistel Benefits Plan TNCP (*Plano de Benefícios da Sistel TNCP*), or PBS-TNCP plan. The PBS-TNCP plan has been closed to new members since April 2004. Contributions to the PBS-TNCP plan are contingent on the determination of an accumulated deficit. As a result of the corporate reorganization and TNL's earlier acquisition of control of TNCP, we are liable for 100% of any insufficiency in payments owed to members of the PBS-TNCP plan. As of December 31, 2013, the PBS-TNCP plan had a surplus of R\$21 million. We made contributions to the PBS-TNCP plan of less than R\$1 million in each of 2013, 2012 and 2011.

Table of Contents

CELPREV Plan

In March 2004, Amazônia Celular S.A., or Amazônia, a subsidiary of TNCP, began sponsoring the CelPrev Amazônia, or CELPREV, plan, a defined contribution plan managed by Sistel. The CELPREV plan was offered to employees of Amazônia who did not participate in the PBS-TNCP plan, as well as to its new employees. Participants in the PBS-TNCP plan were encouraged to migrate to the CELPREV plan. Approximately 27.3% of Amazônia's active employees that were participants in the PBS-TNCP plan migrated to the CELPREV plan. As of December 31, 2013, the CELPREV plan had a surplus of R\$2 million. We made contributions to the CELPREV plan of less than R\$1 million in each of 2013, 2012 and 2011.

Fundação Atlântico de Seguridade Social

FATL is a not-for-profit, independent private pension fund that manages pension plans for the employees of its plans' sponsors.

TCSPREV Plan

In December 1999, we and the other companies that participate in the plans managed by Sistel agreed to withdraw the active participants in these plans and each company agreed to establish its own separate new plan for these participants. In February 2000, we began sponsoring the TCSPREV Plan, a private defined contribution pension plan and settled benefit plan offered to our employees that participated in the PBS-A plan and new employees who were employed by our company after the privatization of the Telebrás System. Approximately 80% of our active employees that were participants in the PBS-A plan migrated to the TCSPREV plan. In March 2005, Fundação 14 de Previdência Privada, or Fundação 14, a private not-for-profit pension fund created by Brasil Telecom Holding in 2004 to manage the TCSPREV plan, began managing the TCSPREV plan. In January 2010, FATL began managing the TCSPREV plan.

The TCSPREV plan offers three categories of benefits to its members: (1) risk benefits, which are funded according to the defined benefit method; (2) programmable benefits, which are funded according to the defined contribution method; and (3) proportional paid benefits, applicable to those employees who migrated to a defined contribution method with their rights reserved as contributors to the defined benefit system. This plan was closed to new participants in March 2003; however, we resumed offering programmable benefits under this plan to new employees beginning in March 2005. We are liable for any deficits incurred by the TCSPREV plan according to the existing proportion of the contributions we make to this plan. As of December 31, 2013, the TCSPREV plan had a surplus of R\$962 million. We were not required to make contributions to the TCSPREV plan in 2013, 2012 or 2011.

Table of Contents

BrTPREV Plan

In 2000, as a result of our acquisition of CRT, we assumed liability for retirement benefits to CRT's employees by means of the creation of the Fundador/Alternativo plan, a defined benefit plan, which is managed by Fundação BrTPREV, a private not-for-profit pension fund created by CRT in 1971 to manage the CRT plans. This plan has been closed to new members since October 2002.

In October 2002, we began sponsoring the BrTPREV plan, a private defined contribution pension plan and settled benefit plan offered to our employees that participated in the Fundador/Alternativo plan and new employees of our company. Approximately 96% of our active employees that were participants in the Fundador/Alternativo plan migrated to the BrTPREV plan. This plan was offered to our new employees from March 2003 to February 2005, when it was closed to new participants. In March 2005, Fundação BrTPREV began managing these plans. In January 2010, FATL began managing the Fundador/Alternativo plan and the BrTPREV plan. In July 2012, the Fundador/Alternativo plan was merged into the BrTPREV plan, and participants and beneficiaries of the Fundador/Alternativo plan automatically became members of the BrTPREV plan.

The BrTPREV plan offers three categories of benefits to its members: (1) risk benefits, which are funded according to the defined benefit method; (2) programmable benefits, which are funded according to the defined contribution method; (3) proportional paid benefits, applicable to those employees who migrated to a defined contribution method with their rights reserved as contributors to the defined benefit system. We are liable for any deficits incurred by the BrTPREV plan according to the existing proportion of the contributions we make to this plan. As of December 31, 2013, the BrTPREV plan had a deficit of R\$640 million, which is being amortized through 2022. Since February 2003, we have been making additional monthly contributions to the Fundador/Alternativo plan and the BrTPREV plan to reduce these deficits. During 2011, 2012 and 2013, we contributed R\$91 million, R\$95 million and R\$117 million, respectively, to the BrTPREV plan and the Fundador/Alternativo plan to reduce these deficits.

PBS Telemar Plan

In September 2000, Telemar began sponsoring the PBS-Telemar plan, a private defined benefit plan offered to Telemar's employees. In February 2005, FATL began managing the PBS Telemar plan. As a result of the corporate reorganization, we have assumed Telemar's obligations under the PBS-Telemar plan.

The PBS-Telemar plan has the same characteristics as the PBS-A plan. The PBS-Telemar plan was closed to new participants in September 2000. We are responsible for any deficits incurred by the PBS-Telemar plan according to the existing proportion of the contributions we make to this plan and those made by participants. As of December 31, 2013, the PBS-Telemar plan had a surplus of R\$28 million. We were not required to make contributions to the PBS-Telemar plan in 2013, 2012 or 2011.

TelemarPrev Plan

In September 2000, Telemar began sponsoring the TelemarPrev plan, a private defined contribution pension plan and settled benefit plan offered to Telemar's employees that participated in the PBS-Telemar plan and new employees who were employed by Telemar after the privatization of the Telebrás System. Approximately 96% of Telemar's active employees that were participants in the PBS-Telemar plan migrated to the TelemarPrev plan. In February 2005, FATL began managing the TelemarPrev plan. As a result of the corporate reorganization, we have assumed Telemar's obligations under the TelemarPrev plan.

The TelemarPrev plan offers two categories of benefits to its members: (1) risk benefits, which are funded according to the defined benefit method; and (2) programmable benefits, which are funded according to the defined contribution method. We are liable for any deficits incurred by the TelemarPrev plan according to the proportion of the contributions we make to this plan. As of December 31, 2013, the TelemarPrev plan had a surplus of R\$481 million. We were not required to make contributions to the TelemarPrev plan in 2013, 2012 or 2011.

For more information on our pension benefit plans, see note 25 to our consolidated financial statements.

Table of Contents*Medical, Dental and Employee Assistance Benefits*

We provide our employees with medical and dental assistance, pharmacy and prescription drug assistance, group life insurance and meal, food and transportation assistance. We and our employees cover the costs of these benefits on a shared basis. In 2013, we contributed R\$75 million to the medical and dental assistance plans, R\$5 million to the occupational medicine plans, R\$94 million for the Worker's Food Program (*Programa de Alimentação do Trabalhador*), or PAT, and R\$7 million to the other benefits programs.

Profit Sharing Plans

Our collective bargaining agreements with several labor unions require us to pay bonuses to employees who reach certain operational targets. As of December 31, 2013, we had provisioned R\$219.7 million to be distributed in bonuses with respect to 2013.

We also have implemented a profit sharing plan as an incentive for employees to pursue our goals and to align employees' interests with those of our shareholders. Profit sharing occurs if economic value-added targets and other targets defined annually by our board of directors are achieved.

Education and Training

We contribute to the professional qualification of our employees by offering training for the development of organizational and technical skills. We offered approximately 253,000 hours of training in 2013. In 2013, we invested approximately R\$10 million in the qualification and training of our employees.

ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS**Major Shareholders**

Oi has two outstanding classes of share capital: common shares and preferred shares with no par value. Generally, only Oi's common shares have voting rights. Oi's preferred shares have voting rights only in exceptional circumstances.

As of March 6, 2014, we had 599,008,629 issued common shares and 1,198,077,775 issued preferred shares, including 84,250,695 common shares and 72,808,066 preferred shares held in treasury.

As of March 6, 2014, we had approximately 2.1 million shareholders, including 104 U.S. resident holders of our common shares and approximately 247 U.S. resident holders of our preferred shares (including The Bank of New York Mellon, as depository under our American Depositary Receipt, or ADR, facilities). As of March 6, 2014, there were 44,261,110 common shares (including common shares represented by ADSs) and 309,726,671 preferred shares (including preferred shares represented by ADSs) held by U.S. resident holders.

The following table sets forth information concerning the ownership of our common shares and preferred shares as of March 6, 2014, by each person whom we know to be the owner of more than 5% of our outstanding common shares, and by all of our directors and executive officers as a group. Except for the shareholders listed below, we are not aware of any other of our shareholders holding more than 5% of any class of our share capital. Our principal shareholders have the same voting rights with respect to each class of our shares that they own as other holders of shares of that class.

- (4) Represents 69,701,555 preferred shares held directly by LF Tel, and 290,549,788 common shares and 18,289,917 preferred shares held by TmarPart. LF Tel disclaims beneficial ownership of the shares of our company owned by TmarPart, other than with respect to its proportionate interest in these shares.

* less than 1%

Changes in Share Ownership

On February 27, 2012, the shareholders of TNL, Telemar, Coari and Brasil Telecom approved the corporate reorganization, including:

the Coari merger, in which:

each issued and then outstanding share of Brasil Telecom held by Coari and all Coari shares held in treasury were cancelled;

each issued and then outstanding common share of Coari was converted automatically into 5.1149 common shares of Brasil Telecom;

each issued and then outstanding preferred share of Coari was converted automatically into 0.3904 common shares of Brasil Telecom and 4.0034 preferred shares of Brasil Telecom;

Coari ceased to exist; and

Telemar became a wholly-owned subsidiary of Brasil Telecom; and

The TNL merger, in which:

Table of Contents

each TNL share held in treasury prior to the TNL merger was cancelled, and each issued and then outstanding share of Brasil Telecom held by TNL was cancelled, other than 24,647,867 common shares of Brasil Telecom, which were transferred to the treasury of Brasil Telecom;

each issued and then outstanding common share of TNL (other than common shares held by shareholders who exercised their withdrawal rights with respect to such common shares) was converted automatically into 2.3122 common shares of Brasil Telecom;

each issued and then outstanding preferred share of TNL was converted automatically into 0.1879 common shares of Brasil Telecom and 1.9262 preferred shares of Brasil Telecom; and

TNL ceased to exist.

On August 21, 2013, TmarPart issued 252,729,128 common shares to its shareholders in exchange for an aggregate amount of R\$100 million in cash and preferred shares of our company. In connection with this transaction, Bratel Brasil contributed 3,002,358 of our preferred shares to TmarPart, AG Telecom contributed 4,814,918 of our preferred shares to TmarPart, LF Tel contributed 4,814,918 of our preferred shares to TmarPart, BNDESPar contributed 3,246,518 of our preferred shares to TmarPart, and PREVI contributed 2,411,205 of our preferred shares to TmarPart.

As of March 6, 2014, TmarPart directly and indirectly owned 18.8% of the total outstanding share capital of Oi, including 56.4% of its outstanding voting share capital.

TmarPart

TmarPart has two outstanding classes of share capital: common shares and preferred shares with no par value. Generally, only TmarPart's common shares have voting rights. TmarPart's preferred shares have voting rights only in exceptional circumstances.

Certain of TmarPart's shareholders are parties to shareholders' agreements that address, among other matters, (1) voting rights at TmarPart shareholders' meetings, and (2) rights of first refusal and preemptive rights for disposal and purchase. See TmarPart Shareholders' Agreements.

On April 25, 2008, TmarPart announced that its shareholders had agreed to a restructuring of their holdings of TmarPart. In July 2009, Fiago Participações S.A., or Fiago, one of the shareholders of TmarPart, distributed the shares of TmarPart that it held to PREVI, PETROS, FUNCEF and FATL. On June 17, 2010, BNDESPar conducted an auction of a portion of its common shares of TmarPart over the BM&FBOVESPA, and FUNCEF and PETROS each exercised its respective pre-emptive rights with respect to the sale of these shares. The transfer of these shares from BNDESPar to FUNCEF and PETROS was settled on November 18, 2010.

On March 28, 2011:

Bratel Brasil purchased an aggregate of 261,631,051 common shares of TmarPart, representing 9.6% of the outstanding common shares of TmarPart, from BNDESPar, PREVI, PETROS and FUNCEF; and

TmarPart conducted a capital increase in which it issued 186,664,449 common shares, in which (1) Bratel Brasil purchased an aggregate of 91,225,537 common shares of TmarPart, representing 3.1% of the outstanding common shares of TmarPart, (2) AG Telecom and its subsidiary Luxemburgo Participações S.A., or Luxemburgo, which merged into AG Telecom in December 2011, purchased an aggregate of 36,784,481 common shares of TmarPart, representing 1.3% of the outstanding common shares of TmarPart, (3) LF Tel purchased an aggregate of 36,784,491 common shares of TmarPart, representing 1.9% of the outstanding common shares of TmarPart, and (4) FATL purchased an aggregate of 21,869,930 common shares of TmarPart, representing 0.7% of the outstanding common shares of TmarPart.

The following table sets forth information concerning the ownership of the common shares and preferred shares of TmarPart following the completion of the sale of these shares.

The following is a brief description of the principal shareholders of TmarPart:

L.F. Tel S.A. is a subsidiary of Jereissati Telecom, a holding company that is part of the Jereissati Group. The Jereissati Group partially owns and manages fourteen shopping malls in the Southern and Southeastern regions of Brazil. In 1997, the Jereissati Group made its first investment in the telecommunications sector by acquiring a small stake in the Band B telephone mobile operators Americel S.A. and Telet, which it sold in 2001. LF Tel has then been investing in telecommunications in Brazil through TNL and its subsidiaries.

AG Telecom Participações S.A. is a subsidiary of AGSA responsible for managing the telecommunications business of the Andrade Gutierrez Group. This Group is focused on three core businesses: (1) engineering and construction work in Brazil and abroad; (2) public concessions in Brazil; and (3) telecommunications in Brazil.

BNDES Participações S.A. is a subsidiary of BNDES that offers long-term financing to Brazilian companies to contribute to the country's development. BNDESPar is dedicated to strengthening the capital structure of private companies in Brazil and developing the capital markets in Brazil in a manner that is consistent with the operational priorities and policies established by BNDES. See Related Party Transactions BNDES Facilities.

Bratel Brasil S.A. is an indirect wholly-owned subsidiary of Portugal Telecom. Portugal Telecom is a telecommunications services provider with operations mainly in Portugal, Brazil and other countries, primarily in sub-Saharan Africa, which offers (1) wireline services, which include IP TV, DTH satellite and fiber-to-the-home, or FTTH, pay television services, internet access (broadband ADSL and FTTH), fixed line telephone services for residential and nonresidential customers, leased lines, unbundled local loop access and wholesale line rental, interconnection, data and business solutions, portal and e-commerce services, (2) mobile telecommunications services, such as voice, data and internet-related services in primarily in Portugal, Brazil, Angola and Namibia, (3) fixed-mobile and IT-telecoms convergent service, and (4) sales of telecommunications equipment.

Fundação Atlântico de Seguridade Social is a private supplementary pension entity that TNL incorporated in August 2004, and which manages private pension plans for the benefit of the employees of TNL and its subsidiaries.

PREVI Caixa de Previdência dos Funcionários do Banco do Brasil is a private pension entity that manages pension plans for the benefit of the employees of the Bank of Brazil and PREVI's employees.

FUNCEF Fundação dos Economiários Federais is a private pension entity that manages pension plans for the benefit of the employees of Caixa Econômica Federal, a Brazilian Federal Economic Bank.

PETROS Fundação Petrobras de Seguridade Social is a private supplementary pension entity established by Petróleo Brasileiro S.A., whose objective is to establish, administer and manage the benefit plans of various entities with whom it has entered into advisory agreements.

Table of Contents
TmarPart Shareholders Agreements

On April 25, 2008, TmarPart's shareholders entered into two shareholders' agreements. We refer to the shareholders' agreement among AG Telecom, LF Tel, Asseca Participações S.A., or Asseca, BNDESPar, Fiago, and FATL as parties, with TmarPart, PREVI, PETROS, FUNCEF and Andrade Gutierrez Investimentos em Telecomunicações S.A., as intervening parties, as the Global Shareholders' Agreement. We refer to the shareholders' agreement among AG Telecom, LF Tel, Asseca and FATL as parties, with TmarPart and Andrade Gutierrez Investimentos em Telecomunicações S.A., as intervening parties, as the Control Group Shareholders' Agreement.

On June 20, 2008, the 352,730,590 common shares of TmarPart owned by Asseca were distributed to LF Tel and Luxemburgo (which merged into AG Telecom in December 2011), with each receiving 176,365,295 common shares of TmarPart. As a result, Asseca is no longer a shareholder of TmarPart and has no rights under the Global Shareholders' Agreement or the Control Group Shareholders' Agreement.

In July 2009, Fiago distributed the shares of TmarPart that it held to PREVI, PETROS, FUNCEF and FATL. As a result of this distribution, Fiago is no longer a shareholder of TmarPart and has no rights under the Global Shareholders' Agreement. Following this distribution, PREVI holds sufficient voting share capital of TmarPart to designate one member of the board of directors of each of the controlled subsidiaries and his or her alternate, as described below.

On January 25, 2011, TmarPart's shareholders amended the Global Shareholders' Agreement and the Control Group Shareholders' Agreement to reflect Bratel Brasil's acquisition of voting shares of TmarPart and to increase the quorum requirements to hold pre-meetings and approve certain designated matters. The amendment to the Global Shareholders' Agreement was entered into among AG Telecom, Luxemburgo (which merged into AG Telecom in December 2011), BNDESPar, PREVI, FATL, FUNCEF, PETROS, LF Tel and Bratel Brasil, as parties, with TmarPart and Portugal Telecom, as intervening parties. The amendment to the Control Group Shareholders' Agreement was entered into among AG Telecom, Luxemburgo (which merged into AG Telecom in December 2011), LF Tel and FATL, as parties, with TmarPart, as intervening party.

On February 19, 2014, TmarPart's shareholders amended the Global Shareholders' Agreement and the Control Group Shareholders' Agreement to facilitate the business combination and to provide for contingent remedies in the event that the business combination is not completed on or prior to December 31, 2014. In addition, TmarPart's shareholders executed agreements to terminate the Global Shareholders' Agreement and the Control Group Shareholders' Agreement upon the completion of the merger of shares and the merger.

The amendment to the Global Shareholders' Agreement and the agreement to terminate the Global Shareholders' Agreement were entered into among AG Telecom, BNDESPar, PREVI, FATL, FUNCEF, PETROS, LF Tel and Bratel Brasil, as parties, with TmarPart and Portugal Telecom, as intervening parties. The amendment to the Control Group Shareholders' Agreement and the agreement to terminate the Control Group Shareholders' Agreement were entered into among AG Telecom, LF Tel and FATL, as parties, with TmarPart, as intervening party.

Global Shareholders Agreement

The initial term of the Global Shareholders' Agreement expires on the later of April 25, 2048 and the expiration date of the last to expire of the concessions or authorizations held by TmarPart or its subsidiaries, subject to the agreement of the parties to the Global Shareholders' Agreement to terminate this agreement upon the completion of the merger of shares and the merger. The term of the Global Shareholders' Agreement may be extended for successive periods of 10 years with the consent of each of the parties thereto.

The parties to the Global Shareholders' Agreement have agreed to the following provisions with respect to elections of members of the boards of directors and executive officers, and the voting of their shares, of Oi and each of Oi's subsidiaries that have annual net operating revenue equal to or greater than R\$100 million, which we refer to as the controlled subsidiaries:

Table of Contents

AG Telecom, LF Tel, and FATL will together have the right to designate a majority of the members of the board of directors of each of the controlled subsidiaries;

each increment of 7% of the voting share capital of TmarPart held by each of AG Telecom, LF Tel and FATL will entitle that party to designate one member of the board of directors of each of the controlled subsidiaries and his or her alternate;

each increment of 7% of the voting share capital of TmarPart held by each of BNDESPar, PREVI, PETROS and FUNCEF will entitle that party to designate (1) one member of the board of directors of TNL and his or her alternate, and (2) one member of the board of directors of each of the controlled subsidiaries and his or her alternate;

PREVI, PETROS and FUNCEF will be entitled to aggregate their shares with BNDESPar to determine their eligibility to exercise the rights described above;

AG Telecom, LF Tel, BNDESPar, Bratel Brasil, FATL, PREVI, PETROS, and FUNCEF will together, through rules outlined in the Global Shareholders Agreement, select the chief executive officers of each of the controlled subsidiaries;

the chief executive officer of TNL will select the other executive officers of TNL;

the chief executive officer of TNL in conjunction with the chief executive officer of each of the other controlled subsidiaries will select the other executive officers of that controlled subsidiary;

BNDESPar, PREVI, PETROS, and FUNCEF collectively have the right to designate one member to the Fiscal Council of each of the controlled subsidiaries; and

AG Telecom, LF Tel, BNDESPar, Bratel Brasil, FATL, PREVI, FUNCEF and PETROS will hold pre-meetings prior to meetings of shareholders and of the boards of directors of the controlled subsidiaries and will vote their TmarPart shares and instruct their representatives on these boards of directors to vote in accordance with the decisions made at the pre-meetings.

Under the Global Shareholders Agreement, each of the parties has agreed:

not to enter into other shareholders agreements with respect to its TmarPart shares, other than (1) the Global Shareholders Agreement, (2) the Control Group Shareholders Agreement, (3) the EDSP Shareholders Agreement (defined below) and (4) the PASA Shareholders Agreement (defined below);

not to amend the Global Shareholders Agreement, the Control Group Shareholders Agreement, the EDSP Shareholders Agreement or the PASA Shareholders Agreement without the consent of all parties to the Global Shareholders Agreement;

not to grant any liens on any of its TmarPart shares;

to grant a right of first refusal and tag along rights to the other parties to the Global Shareholders Agreement with respect to any sale of its TmarPart shares, except that FATL must grant the right of first refusal for its TmarPart shares to AG Telecom and LF Tel;

that the other parties to the Global Shareholders Agreement have the right to sell, and Bratel Brasil has the obligation to buy, up to all of the other parties' shares of TmarPart in the event that Bratel Brasil acquires control of TmarPart;

to offer its TmarPart shares to the other parties to the Global Shareholders Agreement in the event of a transfer of control of such shareholder;

Table of Contents

that AG Telecom or LF Tel, as the case may be, must offer its TmarPart shares to the other parties to the Global Shareholders Agreement in the event that Bratel Brasil acquires control of AG Telecom or LF Tel; and

that the other shareholders have the right to purchase all of Bratel Brasil's TmarPart shares in the event of a change of control of Portugal Telecom.

The Global Shareholders Agreement, as amended, provides that each of the shareholders of TmarPart will exercise their voting rights to approve each step of the business combination.

The Global Shareholders Agreement, as amended, provides that if the Oi capital increase occurs and any of the subsequent steps of the business combination, including the merger of shares, does not occur by December 31, 2014, the shareholders of TmarPart will use their best efforts to implement the TmarPart corporate reorganization and Oi to achieve the same goals intended with the business combination, although without the obligation to implement the TmarPart corporate reorganization, the merger of shares and the merger.

In case the business combination is not completed by December 31, 2014, the required quorums provided in the Global Shareholders Agreement will be adjusted considering the percentage interests held by BNDESPAR, PREVI, PETROS and FUNCEF on December 31, 2014, in order to ensure that the voting rights of such shareholders are equal to those on February 19, 2014, and provided they have not reduced their respective capital interests before December 31, 2014 through sale of shares to third parties that are not original signatories of the Global Shareholders Agreement or their related parties. An amendment to the Global Shareholders Agreement would be executed on December 31, 2014 in order to reflect such adjustments.

Control Group Shareholders Agreement

The initial term of the Control Group Shareholders Agreement expires on April 25, 2048 and may be extended for successive periods of 10 years with the consent of each of the parties thereto, subject to the agreement of the parties to the Control Group Shareholders Agreement to terminate this agreement upon the completion of the merger of shares and the merger.

Under the Control Group Shareholders Agreement, each of the parties has agreed:

to hold pre-meetings prior to the pre-meetings to be held pursuant to the Global Shareholders Agreement and to vote their TmarPart shares in accordance with the decisions made at such pre-meetings;

that any TmarPart shares sold by a party to the Control Group Shareholders Agreement to any other party to this agreement will remain subject to this agreement; and

that if a party to the Control Group Shareholders Agreement sells all or part of its TmarPart shares to another party or to a third party, the purchaser(s) and the selling party, as the case may be, will be considered one voting block for the purposes of the Control Group Shareholders Agreement (even if the purchaser(s) is/are already a party to the agreement) and that such voting block will hold pre-meetings prior to the meetings of the parties to the Control Group Shareholders Agreement.

The Control Group Shareholders Agreement, as amended, provides that each of the shareholders of TmarPart party to that agreement will exercise their voting rights to approve each step of the business combination.

The Control Group Shareholders Agreement, as amended, provides that if the Oi capital increase occurs and any of the subsequent steps of the business combination, including the merger of shares, does not occur by December 31, 2014, the shareholders of TmarPart party to that agreement will use their best efforts to implement the TmarPart corporate reorganization and Oi to achieve the same goals intended with the business combination, although without the obligation to implement the TmarPart corporate reorganization, the merger of shares and the merger.

Table of Contents

PASA and EDSP Shareholders' Agreements

On January 25, 2011, (1) Jereissati Telecom S.A. (formerly known as La Fonte Telecom S.A.), or Jereissati Telecom, entered into a shareholders agreement with Bratel Brasil, in relation to EDSP75 Participações S.A., or EDSP, with EDSP, LF Tel, Pasa Participações S.A., or PASA, Andrade Gutierrez Telecomunicações Ltda. (which subsequently merged with AGSA), AG Telecom, and Portugal Telecom as intervening parties, or the EDSP Shareholders' Agreement, and (2) AGSA entered into a shareholders' agreement with Bratel Brasil in relation to PASA, with PASA, AG Telecom and Portugal Telecom as intervening parties, or the PASA Shareholders' Agreement.

On February 19, 2014, EDSP's shareholders amended the EDSP Shareholders' Agreement and PASA's shareholders amended the PASA Shareholders' Agreement to facilitate the business combination and to provide for contingent remedies in the event that the business combination is not completed on or prior to December 31, 2014. In addition, EDSP's shareholders executed agreements to terminate the EDSP Shareholders' Agreement upon the completion of the merger of EDSP with and into Bratel Brasil, and PASA's shareholders executed agreements to terminate the PASA Shareholders' Agreement upon the completion of the merger of PASA with and into Bratel Brasil.

The initial terms of these shareholders' agreements expire on April 25, 2048 but may be extended for successive periods of 10 years with the consent of each of the parties, subject to the agreement of the parties to the EDSP Shareholders' Agreement and the PASA Shareholders' Agreement to terminate these agreements upon the completion of the mergers of EDSP and PASA with and into Bratel Brasil.

These shareholders' agreements are intended to coordinate the corporate governance of PASA and EDSP and streamline the decision-making process among Jereissati Telecom, AGSA and Portugal Telecom in connection with TmarPart. These shareholders' agreements provide that, among other things:

pre-meetings are to be held between the shareholders to decide in advance the matters to be analyzed during pre-meetings to be held under the Global Shareholders' Agreement and the Control Group Shareholders' Agreement; and

approval of certain matters are subject to the supermajority vote of the shareholders, including:

approval of, and amendments to, the annual budget of PASA, EDSP, AG Telecom and LF Tel, which are subject to an 83% majority vote;

the entering by PASA, EDSP, AG Telecom or LF Tel into any loan agreements in excess of R\$50 million, or the entering into any agreement imposing a pecuniary obligation on PASA, EDSP, AG Telecom or LF Tel in excess of R\$50 million, or the granting of any guarantees by PASA, EDSP, AG Telecom or LF Tel in excess of R\$50 million, which are subject to a 90% majority vote; and

any amendments to the Global Shareholders' Agreement or the issuance of preferred shares by Pasa, EDSP, AG Telecom or LF Tel, the approval of any decision subject to supermajority vote under the Global Shareholders' Agreement (defined as a material decision under the PASA Shareholders' Agreement and the EDSP Shareholders' Agreement), among other matters, which are subject to the unanimous vote of the shareholders.

These shareholders' agreements also contemplate:

rights of first offer to the shareholders with respect to the transfer of the shares issued by PASA and EDSP;

tag-along rights for the benefit of Portugal Telecom in case of the sale of PASA and EDSP shares by AGSA or Jereissati Telecom, as the case may be;

Table of Contents

a general restriction on the sale of the shares issued by PASA and EDSP by AGSA or Jereissati Telecom, as the case may be, to competitors of Portugal Telecom; and

a general right to PREVI, PETROS, FUNCEF and BNDESPar, while they remain shareholders of TmarPart, or to any third parties that may acquire the shares held by these companies in TmarPart, to substitute AGSA or Jereissati Telecom in the exercise of their preemptive rights under the PASA Shareholders Agreement and the EDSP Shareholders Agreement Portugal Telecom or one of its subsidiaries sells its shares in PASA and/or EDSP.

The EDSP Shareholders Agreement, as amended, provides that each of the shareholders of EDSP will exercise their voting rights to approve each step of the business combination. The PASA Shareholders Agreement, as amended, provides that each of the shareholders of PASA will exercise their voting rights to approve each step of the business combination.

The EDSP Shareholders Agreement, as amended, and PASA Shareholders Agreement, as amended, provide that if the Oi capital increase occurs and any of the subsequent steps of the business combination, including the mergers of EDSP and PASA with and into Bratel, do not occur by December 31, 2014, the shareholders of EDSP and PASA, respectively, will use their best efforts to implement the TmarPart corporate reorganization to achieve the same goals intended with the business combination, although without the obligation to implement the TmarPart corporate reorganization.

In case the business combination is not completed by December 31, 2014, any of the shareholders party to the PASA Shareholders Agreement and the EDSP75 Shareholders Agreement may send a notification of non-occurrence of the reorganization and require the adoption of the necessary measures in order to Bratel, PTB2 S.A., or PTB2, Andrade Gutierrez and Jereissati Telecom receive shares of capital stock of Oi held by AG Telecom and LF Tel, in proportion to their respective direct and indirect capital interest in those entities.

Temporary Voting Agreement of the Shareholders of Oi and TmarPart

On February 19, 2014, Portugal Telecom executed a temporary voting agreement with Caravelas, Bratel Brasil, TmarPart, AGSA and Jereissati Telecom, with Oi as intervening party, for the purpose of approving steps of the TmarPart corporate reorganization, including the merger of shares and the merger.

The parties thereto agreed to (1) call a meeting of Oi shareholders to engage the valuation bank and to approve the correspondent valuations as part of the steps of the TmarPart Reorganization, (2) vote in favor of the merger of shares and (3) vote in favor of the merger.

The temporary voting agreement will remain in effect until the earlier of the merger and December 31, 2014.

Related Party Transactions

The following summarizes the material transactions that we and TNL have engaged in with our principal shareholders and their affiliates since January 1, 2013.

We are a party to two shareholder s agreements with the controlling shareholders of our company. See Major Shareholders TmarPart Shareholders Agreements.

Under the Brazilian Corporation Law, each of our directors, their alternates and our executive officers cannot vote on any matter in which they have a conflict of interest and such transactions can only be approved on reasonable and fair terms and conditions that are no more favorable than the terms and conditions prevailing in the market or offered by third parties. However, if one of our directors is absent from a meeting of our board of directors, that director s alternate may vote even if that director has a conflict of interest, unless the alternate director shares that conflict of interest or has another conflict of interest.

Proposed Business Combination

Table of Contents

On October 1, 2013, we entered into a memorandum of understanding, or the MOU, with Portugal Telecom, AG Telecom, LF Tel, PASA, EDSP, Bratel Brasil, BES and Ongoing, in which we and they agreed to the principles governing a series of transactions. Each of AG Telecom, LF Tel and Bratel Brasil is a member of a group of shareholders that controls TmarPart, and consequently, our company. PASA is the sole shareholder of AG Telecom, EDSP is the sole shareholder of LF Tel, and Portugal Telecom is the indirect sole shareholder of Bratel Brasil. For more information on the proposed business combination and related transactions, see Item 4. Information on the Company Our History and Development Proposed Business Combination.

In connection with the business combination, on February 19, 2014, we entered into the PT Portugal subscription agreement, under which Portugal Telecom agreed to subscribe for our common and preferred shares as part of the Oi capital increase by contributing all of the share capital of PT Portugal to our company. The obligations of the parties to the PT Portugal subscription agreement are subject to the satisfaction of a variety of conditions. For more information regarding the PT Portugal subscription agreement, see Item 4. Information on the Company Our History and Development Proposed Business Combination.

In connection with the business combination, on February 19, 2014, we, as an intervening party, entered into a temporary voting agreement among Portugal Telecom, Caravelas, Bratel, TmarPart, AGSA and Jereissati Telecom, for the purpose of approving steps of the TmarPart corporate reorganization, including the merger of shares and the merger. For more information regarding this temporary voting agreement, see Major Shareholders TmarPart Shareholders Agreements.

As part of the business combination, we expect to enter into the merger of shares, subject to the approvals of the holders of voting shares of our company and TmarPart, in which all of the shares of our company not owned by TmarPart will be exchanged for TmarPart common shares and we will become a wholly-owned subsidiary of TmarPart. For more information regarding the merger of shares, see Item 4. Information on the Company Our History and Development Proposed Business Combination.

BNDES Facilities

For a description of our credit facilities with BNDES, see Item 5. Operating and Financial Review and Prospects Indebtedness and Financing Strategy Long-Term Indebtedness. For other information about these agreements, see note 18 to our consolidated financial statements.

Transactions with AIX

Companhia AIX de Participações S.A., in which we own 50% of the outstanding share capital, renders services to us relating to the rental of ducts for transmission of traffic originated outside our local network in Region I. In 2013, our total consolidated expenses for services rendered by AIX amounted to R\$19.8 million.

Table of Contents***Transactions with Contax***

On November 30, 2004, Telemar and TNL PCS entered into a call center services agreement with Contax S.A., or Contax, a call center business owned principally by the controlling shareholders of TmarPart, according to which Contax renders call center services to TNL PCS on a fully outsourced basis. Telemar and TNL PCS agreed to pay an estimated amount of R\$550 million per year, subject to adjustment based on services actually rendered at the request of Telemar and TNL PCS. As a result of the merger of TNL PCS with and into Oi Mobile in February 2014, Oi Mobile assumed all of TNL PCS's rights and obligations under this agreement. Contax currently provides a variety of services to Telemar and Oi Mobile, including customer services for our fixed-line business in Regions I and III, outbound telemarketing to attract additional mobile customers, customer support for pre-paid and post-paid mobile telephone users, technical support for ADSL subscribers and debt collection services. In 2013, our total consolidated expenses for services rendered by Contax amounted to R\$1,602 million.

ITEM 8. FINANCIAL INFORMATION
Consolidated Statements and Other Financial Information

Reference is made to Item 19 for a list of all financial statements filed as part of this annual report.

Legal Proceedings***General***

We are a party to certain legal proceedings arising in the normal course of business, including civil, administrative, tax, social security, labor, government and arbitration proceedings. We classify our risk of loss in legal proceedings as remote, possible or probable, and we only record provisions for reasonably estimable probable losses, as determined by our management. As of December 31, 2013, the total estimated amount in controversy for those proceedings in respect of which the risk of loss was deemed probable or possible totaled approximately R\$25,527.4 million, and we had established provisions of R\$5,616.3 million relating to these proceedings. Our provisions for legal contingencies are subject to monthly monetary adjustments. For a detailed description of our provisions for contingencies, see note 22 to our consolidated financial statements.

In certain instances, we are required to make judicial deposits or post financial guarantees with the applicable judicial bodies. As of December 31, 2013, we had made judicial deposits in the aggregate amount of R\$12,367 million and obtained financial guarantees from third parties in the aggregate amount of R\$13,193.8 million. During 2013, we paid fees in the aggregate amount of R\$145.9 million to the financial institutions from which we had obtained these guarantees, and as of December 31, 2013, we had pledged 18,117,553 common shares of Telemar, representing 5.27% of its outstanding share capital, as security for one of these financial guarantees.

Tax Proceedings

As of December 31, 2013, the total estimated contingency in connection with tax proceedings against us in respect of which the risk of loss was deemed probable or possible totaled R\$18,636.3 million and we had recorded provisions of R\$640.4 million relating to these proceedings.

The Brazilian corporate tax system is complex, and we are currently involved in tax proceedings regarding, and have filed claims to avoid payment of, certain taxes that we believe are unconstitutional. These tax contingencies, which relate primarily to value-added tax, service tax and taxes on revenue, are described in detail in note 22 to our consolidated financial statements. We record provisions for probable losses in connection with these claims based on an analysis of potential results, assuming a combination of litigation and settlement strategies. We currently do not believe that the proceedings that we consider as probable losses, if decided against us, will have a material adverse effect on our financial position. It is possible, however, that our future results of operations could be materially affected by changes in our assumptions and the effectiveness of our strategies with respect to these proceedings.

Table of Contents*Value-Added State Taxes (ICMS)*

Under the regulations governing the ICMS, in effect in all Brazilian states, telecommunications companies must pay ICMS on every transaction involving the sale of telecommunications services they provide. We may record ICMS credits for each of our purchases of operational assets. The ICMS regulations allow us to apply the credits we have recorded for the purchase of operational assets to reduce the ICMS amounts we must pay when we sell our services.

We have received various tax assessments challenging the amount of tax credits that we recorded to offset the ICMS amounts we owed. Most of the tax assessments are based on two main issues: (1) whether ICMS is due on those services subject to the Local Service Tax (*Imposto Sobre Serviços de Qualquer Natureza*), or ISS; and (2) whether some of the assets we have purchased are related to the telecommunications services provided, and, therefore, eligible for an ICMS tax credit. A small part of the assessments that are considered to have a probable risk of loss are related to: (1) whether certain revenues are subject to ICMS tax or ISS tax; (2) offset and usage of tax credits on the purchase of goods and other materials, including those necessary to maintain the network; and (3) assessments related to non-compliance with certain ancillary (non-monetary) obligations.

As of December 31, 2013, we deemed the risk of loss as possible with respect to approximately R\$5,865.6 million of these assessments and had not recorded any provisions in respect of these assessments. As of that date, we had recorded provisions in the amount of R\$361.5 million for those assessments in respect of which we deemed the risk of loss as probable.

Local Service Tax (ISS)

We have received various tax assessments claiming that we owe ISS taxes on supplementary services. We have challenged these assessments on the basis that ISS taxes should not be applied to supplementary services (such as, among others things, equipment leasing and technical and administrative services) provided by telecommunications service providers, because these services do not clearly fit into the definition of telecommunications services.

As of December 31, 2013, we deemed the risk of loss as possible with respect to approximately R\$2,078.2 million of these assessments and had not recorded any provisions in respect of these assessments. As of that date, we had recorded provisions in the amount of R\$67.4 million for those assessments in respect of which we deemed the risk of loss as probable.

FUST and FUNTTEL

The FUST is a fund that was established to promote the expansion of telecommunications services to non-commercially viable users. The FUNTTEL was established to finance telecommunications technology research. We are required to make contributions to the FUST and the FUNTTEL. Due to a change by ANATEL in the basis for calculation of our contributions to the FUST and the FUNTTEL, we made provisions for additional contributions to the FUST and TNL made provisions for additional contributions to the FUST and the FUNTTEL. With respect to the calculation of the contribution to the FUST, the Brazilian Association of Fixed-Line Companies (*Associação Brasileira das Empresas de Telefonia Fixa*) of which we are members, filed a lawsuit to request a review of the applicable legislation.

As of December 31, 2013, we deemed the risk of loss as possible with respect to approximately R\$2,284.1 million of these assessments and had not recorded any provisions in respect of these assessments. As of that date, we had recorded provisions in the amount of R\$147.4 million for assessments of the FUST in respect of which we deemed the risk of loss as probable.

Contributions to the INSS

Pursuant to Brazilian social security legislation, companies must pay contributions to the National Social Security Institute (*Instituto Nacional do Seguro Social*), or INSS, based on their payroll. In the case of outsourced services, the contracting parties must, in certain circumstances, withhold the social contribution due from the third-

Table of Contents

party service providers and pay the retained amounts to the INSS. In other cases, the parties are jointly and severally liable for contributions to the INSS. Assessments have been filed against us primarily relating to claims regarding joint and several liability and claims regarding the percentage to be used to calculate workers' compensation benefits and other amounts subject to social security tax.

As of December 31, 2013, we deemed the risk of loss as possible with respect to approximately R\$1,002.1 million of these assessments and had not recorded any provisions in respect of these assessments. As of that date, we had recorded provisions of R\$12.5 million for those assessments in respect of which we deemed the risk of loss as probable.

PIS and COFINS

In 2006, the Brazilian federal tax authorities filed a claim in the amount of R\$1,026.4 million related to the basis for the calculation of PIS/COFINS. In 2007, TNL obtained a partially favorable decision in a lower court that reduced the amount of this claim to R\$584.5 million. Both TNL and the Brazilian federal tax authorities filed appeals, with respect to which decisions are pending. As of December 31, 2013, we deemed the risk of loss as possible with respect to approximately R\$150.8 million of these assessments and had not recorded any provisions in respect of this claim.

ILL

TNL used credits from the Tax on Net Profit (*Imposto sobre Lucro Líquido*), or ILL, to offset certain other taxes based on decisions rendered by the Brazilian Federal Supreme Court in cases brought by other taxpayers that have held this tax unconstitutional. No final administrative or judicial ruling has been rendered setting forth the criteria by which to calculate the amounts permitted to be offset. As of December 31, 2013, we had recorded provisions in the amount of R\$20.0 million for those assessments in respect of which we deem the risk of loss as probable.

Other Tax Claims

There are various federal taxes that have been assessed against us, largely relating to (1) assessments of taxes against our company that we do not believe are due and which we are contesting, and (2) our use of tax credits to offset certain federal taxes, which the federal tax authorities are contesting.

As of December 31, 2013, we deemed the risk of loss as possible with respect to approximately R\$6,315.4 million of these assessments and had not recorded any provisions in respect of these assessments. As of that date, we had recorded provisions in the amount of R\$31.7 million for those assessments in respect of which we deemed the risk of loss as probable.

Table of Contents

Civil Claims

As of December 31, 2013, the total estimated contingency in connection with civil claims against us, including ANATEL proceedings, in respect of which the risk of loss was deemed probable or possible, totaled R\$4,871.6 million and we had recorded provisions of R\$3,833.7 million relating to these proceedings.

Administrative Proceedings

Almost every week, we receive notifications from ANATEL requesting information about our compliance with the various services obligations imposed on our company by virtue of our concession agreements. When we are not able to comply with these requests or with our concession obligations, ANATEL may initiate administrative proceedings to impose sanctions on us. We have received various notifications, mainly for not meeting certain goals or obligations set out in the General Plan on Universal Service or the General Plan on Quality Goals, such as responding to complaints relating to billing errors, requests for service repairs on a timely basis and requests from locations with collective or individual access.

As of December 31, 2013, we deemed the risk of loss as possible with respect to approximately R\$143.8 million of these claims and had not recorded any provisions in respect of these claims. As of that date, we had recorded provisions in the amount of R\$1,045.5 million for those claims in respect of which we deemed the risk of loss as probable.

As a condition to ANATEL's approval of the Portugal Telecom Alliance, ANATEL required that Telemar and Oi pay all pending administrative fines, amounting to approximately R\$218 million, regardless of the procedural posture of the proceedings which Telemar and Oi had instituted to contest these fines. Telemar and Oi deemed the risk of loss as possible and had not recorded any provisions in respect of these claims. Telemar and Oi sought and have been granted injunctive relief which has permitted them to make judicial deposits of these amounts while preserving its rights to contest these fines. ANATEL has appealed these injunctions, which appeals remain pending.

Brazilian Antitrust Proceedings

We are subject to administrative proceedings and preliminary investigations conducted by the Brazilian antitrust authorities with respect to potential violations of the Brazilian antitrust law. Such investigations may result in penalties, including fines. To date, no fines or penalties have been levied against us. We deemed the risk of loss as possible that we will be fined in one or more of such proceedings and have not recorded any provisions for those claims.

Financial Interest Agreement (CRT and Community Telephone Program)

As successor to CRT, which we acquired in July 2000, we are subject to various civil claims. The claims, filed in 1998 and 1999, allege: (1) error in the sale of CRT's share capital; (2) the illegality of bidding procedure No. 04/98; (3) errors in the calculation of the number of shares offered; (4) procedural nonconformities in the shareholders' meeting that approved the sale of shares of CRT; and (5) errors in the valuation of the shares of CRT.

We are also a defendant in several claims filed by users of telephone lines in the State of Rio Grande do Sul. Prior to our acquisition of control of CRT in July 2000, CRT entered into financial interest agreements with its fixed-line subscribers. Under these financial interest agreements, customers subscribing to CRT's fixed-line service had the right to subscribe to a number of CRT shares. The number of shares to be issued to such subscribers was determined based on a formula that divided the cost of the fixed-line subscription by the book value of CRT's shares.

Beginning in June 1997, certain of CRT's fixed-line subscribers began to file suits in which they claimed that the calculation used by CRT to arrive at the number of shares to be issued pursuant to the financial interest agreements was incorrect and resulted in the claimants receiving too few shares.

Table of Contents

In addition, as successor to Telecomunicações do Mato Grosso do Sul S.A. Telems, Telecomunicações de Goiás S.A. Telegoiás and Telecomunicações do Mato Grosso S.A. Telemat, which were operating companies that Brasil Telecom Holding acquired in the privatization of Telebrás and which were subsequently merged into our company, we are subject to various civil claims in connection with telephone programs (Community Telephone Programs) established in the States of Mato Grosso do Sul, Goiás and Mato Grosso.

In 2009, two court decisions significantly changed the assumptions underlying our estimate of the potential losses relating to these suits.

On March 30, 2009, the Superior Court of Justice ruled that for suits that had yet to be adjudicated, the number of shares to be issued must be calculated using CRT's balance sheet at the end of the month in which the shares were issued. However, for those lawsuits that have already been adjudicated, the number of shares to be issued must be calculated according to the most recent judicial decision, which, in most of the cases, used the balance sheet at the end of the year prior to the date on which the shares were issued.

On May 28, 2009, a member of the Brazilian Supreme Court published a decision ruling that the financial interest agreements are not subject to a statute of limitations, which resulted in a change in the likelihood of an unfavorable outcome in these pending cases to probable.

As of December 31, 2013, we had recorded provisions in the amount of R\$2,062.7 million for those claims in respect of which we deemed the risk of loss as probable.

Customer Service Centers

We are a defendant in 65 civil class actions filed by the Attorney General of the National Treasury jointly with certain consumer agencies demanding the re-opening of customer service centers. The lower courts have rendered decisions in all of these proceedings, some of which have been unfavorable to us. All of these proceedings are currently under appeal. As of December 31, 2013, we had recorded provisions in the amount of R\$11.2 million for those claims in respect of which we deemed the risk of loss as probable.

Customer Service

We are a defendant in a civil class action lawsuit filed by the Federal Prosecutor's Office (*Ministério Público Federal*) seeking recovery for alleged collective moral damages caused by TNL's alleged non-compliance with the Customer Service (*Serviço de Atendimento ao Consumidor SAC*) regulations established by the Ministry of Justice (*Ministério da Justiça*). TNL presented its defense and asked for a change of venue to federal court in Rio de Janeiro, where we are headquartered. Other defendants have been named and await service of process. The amount involved in this action is R\$300 million. As a result of the corporate reorganization, we have succeeded to TNL's position as a defendant in this action. As of December 31, 2013, we deemed the risk of loss as possible with respect to these lawsuits and had not made any provisions with respect to this action since it was awaiting the court's initial decision.

Special Civil Court Proceedings

We are party to proceedings in special civil courts relating to customer claims in connection with our basic subscription services. The value of any individual claim does not exceed 40 minimum wages. As of December 31, 2013, we had recorded provisions in the amount of R\$137.9 million for these claims in respect of which we deemed the risk of loss as probable.

Other Claims

We are defendants in various claims involving contract termination, indemnification of former suppliers and contractors, review of contractual conditions due to economic stabilization plans and breach of contract. As of December 31, 2013, we had recorded provisions in the amount of R\$587.6 million in respect of these claims.

Table of Contents

Labor Claims

We are a party to a large number of labor claims arising out of the ordinary course of our businesses. We do not believe any of these claims, individually or in the aggregate would have a material effect on our business, financial condition or results of operations if such claims are decided against us. These proceedings generally involve claims for: (1) risk premium payments sought by employees working in dangerous conditions; (2) wage parity claims seeking equal pay among employees who do the same kind of work, within a given period of time, and have the same productivity and technical performance; (3) indemnification payments for, among other things, work accidents, occupational injuries, employment stability, child care allowances and achievement of productivity standards set forth in our collective bargaining agreements; (4) overtime wages; and (5) joint liability allegations by employees of third-party service providers.

As of December 31, 2013, the total estimated contingency in connection with labor claims against us in respect of which the risk of loss was deemed probable or possible totaled R\$2,019.6 million and we had recorded provisions of R\$1,142.3 million relating to these proceedings.

Non-Provisioned Contingencies

We are defendants in various proceedings with no legal precedent involving network expansion plans, compensation for moral and material damages, collections and bidding proceedings, among others, for which we deem the risk of loss as possible and have not recorded any provisions. As of December 31, 2013, we deemed the risk of loss as possible with respect to R\$19.9 billion of these proceedings. This amount is based on total value of the damages being sought by the plaintiffs. Typically, we believe the value of individual claims to be beyond the merits of the case in question.

Dividends and Dividend Policy

Payment of Dividends

Our dividend distribution policy has historically included the distribution of periodic dividends, based on annual balance sheets approved by our board of directors. On August 13, 2013, our board of directors approved an amendment to our shareholder compensation policy for the 2013 to 2016 fiscal years, which provides for dividends to be paid in the estimated amount of R\$500.0 million, representing approximately the minimum amount necessary to meet the following objectives: (1) pay dividends in the amount equivalent to the greatest of (i) 25% of adjusted net income for the year, (ii) 3% of shareholders' equity or (iii) 6% of the capital stock; and (2) ensure equitable compensation between classes of preferred and common shares. Our distribution policy may be implemented through the distribution of dividends, payment of interest on capital, share grants or redemption, capital reduction or other forms that enable the distribution of funds to shareholders. Payment of intermediate or interim dividends will also be permitted, subject to market conditions, our then-prevailing financial condition and other factors deemed relevant by our board of directors.

When we declare dividends, we are generally required to pay them within 60 days of declaring them unless the shareholders' resolution establishes another payment date. In any event, if we declare dividends, we must pay them by the end of the fiscal year for which they are declared. Under Article 9 of Law 9,249/95 and our by-laws, we also may pay interest attributable to shareholders' equity as an alternative form of dividends upon approval of our board of directors. For a more detailed description of interest attributable to shareholders' equity, see *Payment of Dividends and Interest Attributable to Shareholders' Equity* Interest Attributable to Shareholders' Equity.

The following table sets forth the dividends and/or interest attributable to shareholders' equity paid to holders of our common shares and preferred shares since January 1, 2009 in *reais* and in U.S. dollars translated from *reais* at the commercial market selling rate in effect as of the payment date.

- (3) Represents dividends of R\$0.3095 (US\$0.1525) per common and preferred share, plus payment for the redemption of class B and class C preferred shares issued as a bonus and distributed to shareholders of common and preferred shares of the Company in the total amount of R\$0.3002 (US\$0.1479) per common and preferred share.
- (4) Represents dividends of R\$0.5107(US\$0.2536) per common and preferred share.
- (5) Represents payment for the redemption of class B and class C preferred shares issued as a bonus and distributed to shareholders of common and preferred shares of the Company in the total amount of R\$0.0991(US\$0.0491) per common and preferred share.
- (6) Represents dividends of R\$0.3049 (US\$0.1397) per common and preferred share.

The following discussion summarizes the principal provisions of the Brazilian Corporation Law and our by-laws relating to the distribution of dividends, including interest attributable to shareholders' equity.

Calculation of Adjusted Net Profit

At each annual shareholders' meeting, our board of directors is required to recommend how to allocate our net profit for the preceding fiscal year, which recommendation our board of executive officers initially submits to our board of directors for approval. This allocation is subject to approval by our common shareholders. The Brazilian Corporation Law defines net profit for any fiscal year as our net income after income taxes for that fiscal year, net of any accumulated losses from prior fiscal years and any amounts allocated to employees' participation in our net profit in that fiscal year. Under the Brazilian Corporation Law, our adjusted net profit available for distribution are equal to our net profit in any fiscal year, reduced by amounts allocated to our legal reserve and other applicable reserves, and increased by any reversals of reserves that we constituted in prior years.

Our calculation of net profit and allocations to reserves for any fiscal year are determined on the basis of financial statements prepared in accordance with Brazilian GAAP.

Reserve Accounts

Under the Brazilian Corporation Law and our by-laws, we are required to maintain a legal reserve. In addition, we are permitted by the Brazilian Corporation Law to establish the following discretionary reserves:

a contingency reserve for an anticipated loss that is deemed probable in future years. Any amount so allocated in a previous year must be reversed in the fiscal year in which the loss had been anticipated if the loss does not occur as projected or charged off in the event that the anticipated loss occurs;

a reserve for investment projects, in an amount based on a capital expenditure budget approved by our shareholders;

a special goodwill reserve for the merger, which represents the net amount of the counterpart of the premium amount recorded in the asset, pursuant to provisions of CVM Instruction 319/1999;

Table of Contents

an unrealized income reserve described under Mandatory Distributions below; and

a tax incentive investment reserve, included in our capital reserve accounts, in the amount of the reduction in our income tax obligations due to government tax incentive programs.

Allocations to each of these reserves (other than the legal reserve) are subject to approval by our common shareholders voting at our annual shareholders meeting.

The Brazilian Corporation Law provides that the legal reserve and the tax incentive investment reserve may be credited to shareholders equity or used to absorb losses, but these reserves are unavailable for the payment of distributions in subsequent years. The amounts allocated to the other reserves may be credited to shareholders equity and used for the payment of distributions in subsequent years.

Legal Reserve Account

Under the Brazilian Corporation Law and our by-laws, we must allocate 5% of our net profit for each fiscal year to our legal reserve until the aggregate amount of our legal reserve equals 20% of our paid-in capital. However, we are not required to make any allocations to our legal reserve in a fiscal year in which our legal reserve, when added to our other reserves, exceeds 30% of our shareholders equity. At December 31, 2013, we had a balance of R\$383 million in our legal reserve account.

Capital Reserve Accounts

Under the Brazilian Corporation Law, we are also permitted to record a capital reserve that may be used only (1) to absorb losses which exceed retained earnings and income reserves as defined in the Brazilian Corporation Law, (2) to redeem or repurchase share capital and/or participation certificates, (3) to increase our capital, or (4) if specified in our by-laws (which currently do not so specify), to pay preferred share dividends. Amounts allocated to our capital reserves are unavailable for the payment of distributions and are not taken into consideration for purposes of determining the mandatory distributable amount. At December 31, 2013, we had a balance of R\$3,978 million in our capital reserve accounts.

Dividend Preference of Preferred Shares

As permitted by the Brazilian Corporation Law, our by-laws specify that 25% of our adjusted net income for each fiscal year must be distributed to shareholders as dividends or interest attributable to shareholders equity. We refer to this amount as the mandatory distributable amount. Distributions of dividends in any year are made:

first, to the holders of preferred shares, up to the greater non-cumulative amount of: (1) 6.0% per year of the amount resulting from our share capital divided by the number of our total issued shares, or (2) 3.0% per year of the book value of our shareholders equity divided by the number of our total issued shares, or the Minimum Preferred Dividend;

then, to the holders of common shares, until the amount distributed in respect of each common share is equal to the amount distributed in respect of each preferred share; and

thereafter, to the common and preferred shareholders on a *pro rata* basis.

If the Minimum Preferred Dividend is not paid for a period of three years, holders of preferred shares shall be entitled to full voting rights.

Mandatory Distributions

The mandatory distributable amount of dividends and interest attributable to shareholders equity is recognized as a provision at the year-end. Any proposed dividends above the mandatory distributable amount are only recognized when declared.

Table of Contents

Under the Brazilian Corporation Law, the amount by which the mandatory distributable amount exceeds the realized portion of net income for any particular year may be allocated to the unrealized income reserve, and the mandatory distribution may be limited to the realized portion of net income. The realized portion of net income is the amount by which our net income exceeds the sum of (1) our net positive results, if any, from the equity method of accounting for earnings and losses of our subsidiaries and certain associated companies, and (2) the profits, gains or income obtained on transactions maturing after the end of the following fiscal year. As amounts allocated to the unrealized income reserve are realized in subsequent years, such amounts must be added to the dividend payment relating to the year of realization.

In addition to the mandatory distributable amount, our board of directors may recommend that holders of our common shares approve the payment of additional distributions. Distributions made to holders of our preferred shares are computed in determining whether we have paid the required mandatory distribution. We net any payment of interim distributions against the required mandatory distribution for that fiscal year.

The Brazilian Corporation Law permits us to suspend the mandatory distribution in respect of common shares and preferred shares if our board of directors reports to our annual shareholders' meeting that the distribution would be incompatible with our financial condition at that time. Our fiscal council must approve any suspension of the mandatory distribution. In addition, our management must report the reasons of any suspension of the mandatory distribution to the CVM. We must allocate net profit not distributed by our company as a result of a suspension to a special reserve and, if not absorbed by subsequent losses, we must distribute these amounts as soon as our financial condition permits. In case our profits reserves, as defined in the Brazilian Corporation Law, exceed our share capital, the excess must be credited to shareholders' equity or used for the payment of distributions.

Payment of Dividends and Interest Attributable to Shareholders' Equity

We may pay the mandatory distributable amount as dividends or as interest attributable to shareholders' equity, which is similar to a dividend but is deductible in calculating our income tax obligations.

Because our shares are issued in book-entry form, dividends with respect to any share are automatically credited to the account holding such share. Shareholders who are not residents of Brazil must register with the Brazilian Central Bank in order for dividends, sales proceeds or other amounts with respect to their shares to be eligible to be remitted outside of Brazil.

The common and preferred shares underlying our ADSs are held in Brazil by the depositary, which has registered with the Brazilian Central Bank as the registered owner of our common and preferred shares. Payments of cash dividends and distributions, if any, will be made in Brazilian currency to the depositary. The depositary will then convert such proceeds into dollars and will cause such dollars to be distributed to holders of our ADSs. As with other types of remittances from Brazil, the Brazilian government may impose temporary restrictions on remittances to foreign investors of the proceeds of their investments in Brazil, as it did for approximately six months in 1989 and early 1999, and on the conversion of Brazilian currency into foreign currencies, which could hinder or prevent the depositary from converting dividends into U.S. dollars and remitting these U.S. dollars abroad. See Item 3. Key Information Risk Factors Risks Relating to Our Preferred Shares and the ADSs.

In addition, remittances are subject to a Brazilian financial transactions tax, which as of the date of this annual report is 0%, but may be subject to change.

Normative Instruction 1,397/2013, or NI 1,397/2013, published in the Official Gazette on September 17, 2013, was enacted to regulate the transitional tax regime, or RTT, in force as of January 1, 2008 to adjust, for tax purposes, the net profit calculated under the IFRS rules in accordance with Law 11,638/2007. According to NI 1,397/2013, for purposes of calculating dividends and interest on net equity, taxpayers must use the accounting books prepared according to the criteria in force on December 31, 2007, and not IFRS. According to such provisions, depending on the tax basis used by the taxpayer, certain dividend distributions may be subject to a 15% withholding tax (or 25% if the taxpayer resides in a tax haven jurisdiction. See Item 10. Additional Information Taxation Brazilian Tax Considerations.

Table of Contents

Provisional Measure 627/2013, or PM 627/2013, published in the Official Gazette on November 12, 2013, introduced changes to different tax provisions including, but not limited to payments of dividends and interest on net equity. According to PM 627/2013, companies electing to be taxed under the new regime on January 1, 2014 as opposed to January 1, 2015 will not be subject to retroactive taxation on dividends distributions effectively made before November 12, 2013, as established by NI 1,397/2013. As of the date of this annual report, we have not decided whether we will elect to be taxed under the new tax regime as of January 1, 2014, which is pending regulation by the Brazilian tax authorities. PM 627/2013 is an act of the executive government, and will only become ordinary legislation after it is reviewed by Brazil's National Congress, which may make significant changes to the new tax rules set out in PM 627/2013. Moreover, if PM 627/2013 does not become ordinary legislation within 120 days from publication, plus the time period established for presidential sanction, it will cease to have effect.

Dividends

We are required by the Brazilian Corporation Law and by our by-laws to hold an annual shareholders' meeting by April 30 of each year. At our annual shareholders' meeting, our common shareholders may vote to declare an annual dividend. Our payment of annual dividends is based on our audited financial statements prepared for our preceding fiscal year.

Any holder of record of shares at the time that a dividend is declared is entitled to receive dividends. Under the Brazilian Corporation Law, we are generally required to pay dividends within 60 days after declaring them, unless the shareholders' resolution establishes another payment date, which, in any case, must occur prior to the end of the fiscal year in which the dividend is declared.

Our board of directors may declare interim dividends based on the accrued profits recorded or the realized profits in our annual or semi-annual financial statements. In addition, we may pay dividends from net income based on our unaudited quarterly financial statements. We may set off any payment of interim dividends against the amount of the mandatory distributable amount for the year in which the interim dividends were paid.

Interest Attributable to Shareholders' Equity

Brazilian companies, including our company, are permitted to pay interest attributable to shareholders' equity as an alternative form of payment of dividends to our shareholders. These payments may be deducted when calculating Brazilian income tax and social contribution tax. The interest rate applied to these distributions generally cannot exceed the TJLP for the applicable period. The amount of interest paid that we can deduct for tax purposes cannot exceed the greater of:

50% of our net income (after the deduction of the provision for social contribution tax and before the deduction of the provision for corporate income tax) before taking into account any such distribution for the period for which the payment is made; and

50% of the sum of our retained earnings and income reserves.

Any payment of interest attributable to shareholders' equity to holders of our common shares or preferred shares or our ADSs, whether or not they are Brazilian residents, is subject to Brazilian withholding tax at the rate of 15%, except that a 25% withholding tax rate applies if the recipient is a resident of a tax haven jurisdiction. See Item 10. Additional Information Taxation Brazilian Tax Considerations. Under our by-laws, we may include the amount distributed as interest attributable to shareholders' equity, net of any withholding tax, as part of the mandatory distributable amount.

Prescription of Payments

Our shareholders have three years to claim dividend distributions made with respect to their shares, as from the date that we distribute the dividends to our shareholders, after which any unclaimed dividend distributions legally revert to us. We are not required to adjust the amount of any distributions for inflation that occurs during the period from the date of declaration to the payment date.

Table of Contents**Significant Changes**

Other than as disclosed in this annual report, no significant change has occurred since the date of the audited consolidated financial statements included in this annual report.

ITEM 9. THE OFFER AND LISTING**Markets for Our Equity Securities**

The principal trading market for our common shares and preferred shares is the BM&FBOVESPA, where they are traded under the symbols OIBR3 and OIBR4, respectively. Our common shares and preferred shares began trading on the BM&FBOVESPA on July 10, 1992. On November 16, 2001, our Preferred ADSs began trading on the NYSE under the symbol BTM. On November 17, 2009, our Common ADSs began trading on NYSE under the symbol BTMC. On April 9, 2012, the trading symbols for our Preferred ADSs and Common ADSs on the NYSE were changed to OIBR and OIBR.C, respectively.

We have registered our Common ADSs and Preferred ADSs with the SEC pursuant to the Exchange Act. On December 31, 2013, there were 8,250,091 Common ADSs outstanding, representing 8,250,091 common shares, or 1.6% of our outstanding common shares and 151,482,461 Preferred ADSs outstanding, representing 151,482,461 preferred shares, or 13.5% of our outstanding preferred shares.

Price History of Our Common Shares, Preferred Shares and the ADSs

The tables below set forth the high and low closing sales prices and the approximate average daily trading volume for our common shares and preferred shares on the BM&FBOVESPA and the high and low closing sales prices and the approximate average daily trading volume for the Common ADSs and the Preferred ADSs on the NYSE for the periods indicated.

On March 6, 2014, the closing sales price of:

our common shares on the BM&FBOVESPA was R\$3.78 per common share;

our Common ADSs on the NYSE was US\$1.63 per Common ADS;

our preferred shares on the BM&FBOVESPA was R\$3.54 per preferred share; and

our Preferred ADSs on the NYSE was US\$1.56 per Preferred ADS.

Regulation of Brazilian Securities Markets

The Brazilian securities markets are regulated by the CVM, which has regulatory authority over the stock exchanges and the securities markets generally, the National Monetary Council and the Brazilian Central Bank, which has, among other powers, licensing authority over brokerage firms and which regulates foreign investment and foreign exchange transactions. The Brazilian securities markets are governed by (1) Law No. 6,385, as amended and supplemented, which is the principal law governing the Brazilian securities markets, (2) the Brazilian Corporation Law, and (3) the regulations issued by the CVM, the National Monetary Council and the Brazilian Central Bank.

These laws and regulations provide for, among other things, disclosure requirements applicable to issuers of publicly traded securities, restrictions on insider trading (including criminal sanctions under the Brazilian Penal Code) and price manipulation, protection of minority shareholders and disclosure of transactions in a company's securities by its insiders, including directors, officers and major shareholders. They also provide for the licensing and oversight of brokerage firms and the governance of Brazilian stock exchanges.

However, the Brazilian securities markets are not as highly regulated or supervised as U.S. securities markets or securities markets in some other jurisdictions. In addition, rules and policies against self-dealing or for preserving shareholder interests may be less well-defined and enforced in Brazil than in the United States, which may put holders of our preferred shares and the ADSs at a disadvantage. Finally, corporate disclosures also may be less complete than for public companies in the United States and certain other jurisdictions.

Under the Brazilian Corporation Law, a company is either publicly held (*companhia aberta*), as we are, or privately held (*companhia fechada*). All publicly held companies are registered with the CVM and are subject to reporting and regulatory requirements. A company registered with CVM may have its securities traded either on the BM&FBOVESPA or in the Brazilian over-the-counter market. Shares of companies, such as our company, that are listed on the BM&FBOVESPA may not simultaneously trade on the Brazilian over-the-counter market. The shares of a publicly held company may also be traded privately, subject to certain limitations.

The Brazilian over-the-counter market consists of direct trades between individuals in which a financial institution registered with the CVM serves as intermediary. No special application, other than registration with the CVM, is necessary for securities of a public company to be traded in this market. The CVM requires that it be given notice of all trades carried out in the Brazilian over-the-counter market by the respective intermediaries.

Disclosure Requirements

Law No. 6,385 requires that a publicly traded company, such as our company, submit to the CVM and the BM&FBOVESPA certain periodic information, including annual and quarterly reports prepared by management and independent auditors. Law No. 6,385 also requires us to file with the CVM our shareholders' agreements, notices of shareholders' meetings and copies of the minutes of these meetings.

CVM Instruction No. 358, which became effective in April 2002, revised and consolidated the requirements regarding the disclosure and use of information related to material facts and acts of publicly traded companies,

Table of Contents

including the disclosure of information in the trading and acquisition of securities issued by publicly traded companies.

CVM Instruction No. 358 includes provisions that:

establish the concept of a material fact that gives rise to reporting requirements. Material facts include decisions made by the controlling shareholders, resolutions of the general meeting of shareholders and of management of the company, or any other facts related to the company's business (whether occurring within the company or otherwise related thereto) that may influence the price of its publicly traded securities, or the decision of investors to trade such securities or to exercise any of such securities' underlying rights;

specify examples of facts that are considered to be material, which include, among others, the execution of agreements providing for the transfer of control, the entry or withdrawal of shareholders that maintain any managing, financial, technological or administrative function with or contribution to the company, and any corporate restructuring undertaken among related companies;

require the investor relations officer, controlling shareholders, other officers or directors, members of the fiscal council and other advisory boards to disclose material facts;

require simultaneous disclosure of material facts to all markets in which the company's securities are admitted for trading;

require the acquirer of a controlling stake in a company to publish material facts, including its intentions as to whether or not to de-list the company's shares, within one year;

establish rules regarding disclosure requirements in the acquisition and disposal of a material shareholding stake; and

prohibit trading on the basis of material non-public information.

Brazilian regulations also require that any person or group of persons representing the same interest that has directly or indirectly acquired an interest corresponding to 5% of a type or class of shares of a publicly traded company must provide such publicly traded company with information on such acquisition and its purpose, and such company must transmit this information to the CVM. If this acquisition causes a change in the control of the company or in the administrative structure of the company, or if this acquisition triggers the obligation to make a public offering in accordance with CVM Instruction No. 361, as amended, then the acquirer must disclose this information to the applicable stock exchanges and the appropriate Brazilian newspapers.

Integrated Disclosure

CVM Instruction No. 480, which the CVM issued in December 2009:

created two different categories of securities issuers in accordance with the securities that those issuers are authorized to issue in the Brazilian regulated markets and established different disclosure requirements for each category. A category A issuer is authorized to issue any and all securities and is subject to more stringent disclosure requirements. A category B issuer is authorized to issue any and all securities, other than shares, share certificates and other securities issued by the issuer of such shares or shares certificates or by a company of its group that grants to its holders the right to acquire such shares or shares certificates.

Edgar Filing: OI S.A. - Form 20-F

created the current CVM form for annual reports (*Formulário de Referência*). The *Formulário de Referência* requires extensive disclosures in several areas, including, among others, management's discussion and analysis of the financial statements, management compensation and risk controls and derivative policies.

Table of Contents

introduced a requirement that an issuer publish an offering note with respect to a public securities offering with information on the public securities offering to supplement the *Formulário de Referência*.

classified as Well-Known Seasoned Issuers (*Emissor de Grande Exposição ao Mercado*) companies (1) that have had securities traded in the BM&FBOVESPA for at least three years, (2) that are in compliance with the CVM rules on current and periodic reporting obligations in the previous 12 months, and (3) which have shares traded in the market with a market value equal or greater than R\$5 billion. The CVM is expected to issue regulations regarding which public securities offerings by Well-Known Seasoned Issuers that will permit these issuers to register public securities offerings through an expedited procedure.

Recommendations Regarding Business Combination Transactions Between Affiliated Companies

In September 2008, the CVM issued CVM Practice Bulletin No. 35/08 (*Parecer de Orientação No. 35/08*) recommending that where a controlling company and its subsidiaries or affiliated companies engage in a business combination transaction, certain additional procedures be followed to protect the non-controlling shareholders. The release constitutes guidance for Brazilian companies engaging in business combination transactions, and does not mandate that any procedure be followed. The release recommends that the constituent companies implement one of the following procedures in connection with a business combination transaction:

establish an independent advisory committee to protect the interests of the non-controlling shareholders and to negotiate the terms and conditions for such business combination transaction; or

condition the of approval of the business combination transaction upon the affirmative vote of a majority of the non-controlling shareholders of the controlled company, including the minority holders of the voting and the non-voting shares of the controlled company.

Proxy Solicitation Rules

CVM Instruction No. 481, which the CVM issued in December 2009, sets forth (1) the procedures relating to the public solicitation of proxies for the exercise of voting rights at shareholders meetings of publicly held companies, and (2) disclosure requirements to be followed by publicly held companies before such shareholders meetings.

CVM Instruction No. 481 provides that:

shareholders that own 0.5% or more of a company's share capital may nominate members of the board of directors and the fiscal council in a public solicitation of proxies conducted by the company's management, and that shareholders will be entitled to vote with respect to these nominations;

companies that accept digital proxies sent through the internet must allow shareholders who hold 0.5% or more of the company's share capital to make a public solicitation of proxies through the company's digital proxy system; and

publicly held companies that do not accept digital proxies sent through the internet must pay part of the costs of the public solicitation of proxies made by shareholders that own 0.5% or more of the company's share capital.

CVM Instruction No. 481 also specifies the information and documents that must be made available to shareholders following the date of the publication of the first call notice for the shareholders meeting. The information and documents that must be provided varies according to the agenda of the shareholders meeting. This information must be available through the CVM's website before the shareholders meeting, must be prepared in accordance with the requirements of Instruction No. 481, and, if the information and documents relate to the annual shareholders meeting, must include management's discussion and analysis of the financial statements, personal data and history of the nominees for election to the company's board of directors and/or fiscal council, and a proposal for the compensation of the company's management.

Trading on the BM&FBOVESPA

Overview of the BM&FBOVESPA

In 2000, the São Paulo Stock Exchange (*Bolsa de Valores de São Paulo S.A. BVSP*), or the BOVESPA, was reorganized through the execution of memoranda of understanding by the Brazilian stock exchanges. Following this reorganization, the BOVESPA was a non-profit entity owned by its member brokerage firms and trading on the BOVESPA was limited to these member brokerage firms and a limited number of authorized nonmembers. Under the memoranda, all securities are now traded only on the BOVESPA, with the exception of electronically traded public debt securities and privatization auctions, which are traded on the Rio de Janeiro Stock Exchange.

In August 2007, the BOVESPA underwent a corporate restructuring that resulted in the creation of BOVESPA Holding S.A., a public corporation, whose wholly-owned subsidiaries were (1) the BOVESPA, which is responsible for the operations of the stock exchange and the organized over-the-counter markets, and (2) the Brazilian Settlement and Custodial Company (*Companhia Brasileira de Liquidação e Custódia*), or CBLC, which is responsible for settlement, clearing and depositary services. In the corporate restructuring, all holders of membership certificates of the BOVESPA and of shares of CBLC became shareholders of BOVESPA Holding S.A. As a result of the corporate restructuring, access to the trading and other services rendered by the BOVESPA is not conditioned on stock ownership in BOVESPA Holding S.A.

In May 2008, the BOVESPA merged with the Commodities and Futures Exchange (*Bolsa de Mercadorias & Futuros*) to form the BM&FBOVESPA. In November 2008, the CBLC merged with the BM&FBOVESPA. As a result, the BM&FBOVESPA now performs its own settlement, clearing and depositary services.

Trading and Settlement

Trading of equity securities on the BM&FBOVESPA is conducted through an electronic trading system called Megabolsa every business day from 10:00 a.m. to 5:30 p.m., São Paulo time. Trading of equity securities on the BM&FBOVESPA is also conducted after market between 6:00 p.m. and 7:30 p.m., São Paulo time, in an after-market system connected to both traditional brokerage firms and brokerage firms operating on the internet. This after-market trading is subject to regulatory limits on price volatility of securities and on the volume of shares traded by investors operating on the internet.

Since March 2003, market making activities have been allowed on the BM&FBOVESPA. On July 23, 2012, we announced the engagement of Brasil Plural Corretora de Câmbio, Títulos e Valores Mobiliários S.A. (formerly known as Flow Corretora de Câmbio, Títulos e Valores Mobiliários S.A.) as market maker of our common shares and preferred shares on the BM&FBOVESPA. Trading in securities listed on the BM&FBOVESPA may be effected off the exchange in the unorganized over-the-counter market under certain circumstances, although such trading is very limited.

The trading of securities of a company on the BM&FBOVESPA may be suspended at the request of a company in anticipation of the announcement of a material event. A requesting company must also suspend trading of its securities on international stock exchanges on which its securities are traded. The CVM and the BM&FBOVESPA have discretionary authority to suspend trading in shares of a particular issuer, based on or due to a belief that, among other reasons, a company has provided inadequate information regarding a material event or has provided inadequate responses to inquiries by the CVM or the BM&FBOVESPA.

In order to reduce volatility, the BM&FBOVESPA has adopted a circuit breaker mechanism under which trading sessions may be suspended for a period of 30 minutes or one hour whenever the Ibovespa index falls 10% or 15%, respectively, compared to the closing of the previous trading session.

Settlement of transactions on the BM&FBOVESPA is effected three business days after the trade date, without adjustment of the purchase price for inflation. Delivery of and payment for shares is made through the facilities of the clearing and settlement chamber of the BM&FBOVESPA. The seller is ordinarily required to deliver shares to the clearing and settlement chamber of the BM&FBOVESPA on the second business day following the trade date.

Table of Contents

Market Size

Although the Brazilian equity market is Latin America's largest in terms of market capitalization, it is smaller, more volatile and less liquid than the major U.S. and European securities markets. Moreover, the BM&FBOVESPA is significantly less liquid than the NYSE or other major exchanges in the world.

As of December 31, 2013, the aggregate market capitalization of all companies listed on the BM&FBOVESPA was equivalent to approximately R\$2,414 billion (US\$1,031 billion) and the 10 largest companies listed on the BM&FBOVESPA represented approximately 51% of the total market capitalization of all listed companies. By comparison, as of December 31, 2013, the aggregate market capitalization of the companies (including U.S. and non-U.S. companies) listed on the NYSE was approximately US\$20.0 trillion. The average daily trading volume of the BM&FBOVESPA and the NYSE for 2013 was approximately R\$7.4 billion (US\$3.5 billion) and US\$54.7 billion, respectively.

Although any of the outstanding shares of a listed company may trade on the BM&FBOVESPA, in most cases fewer than half of the listed shares are actually available for trading by the public, the remainder being held by small groups of controlling persons, one principal shareholder or governmental entities that rarely trade their shares. For this reason, data showing the total market capitalization of the BM&FBOVESPA tends to overstate the liquidity of the Brazilian equity market. The relative volatility and illiquidity of the Brazilian equity markets may substantially limit your ability to sell our common shares or preferred shares at the time and price you desire and, as a result, could negatively impact the market price of these securities.

Regulation of Foreign Investments

Trading on the BM&FBOVESPA by a holder not deemed to be domiciled in Brazil for Brazilian tax and regulatory purposes, or a non-Brazilian holder, is subject to certain limitations under Brazilian foreign investment regulations. With limited exceptions, non-Brazilian holders may trade on the BM&FBOVESPA only in accordance with the requirements of Resolution No. 2,689 of the National Monetary Council. Resolution No. 2,689 requires that securities held by non-Brazilian holders be maintained in the custody of, or in deposit accounts with, financial institutions that are authorized by the Brazilian Central Bank and the CVM. In addition, Resolution No. 2,689 requires non-Brazilian holders to restrict their securities trading to transactions on the BM&FBOVESPA or qualified over-the-counter markets. With limited exceptions, non-Brazilian holders may not transfer the ownership of investments made under Resolution No. 2,689 to other non-Brazilian holders through private transactions. See Item 10. Additional Information Exchange Controls Resolution 2,689 for further information about Resolution 2,689, and Item 10. Additional Information Taxation Brazilian Tax Considerations Taxation of Gains for a description of certain tax benefits extended to non-Brazilian holders who qualify under Resolution No. 2,689.

BM&FBOVESPA Corporate Governance Standards

In December 2000, the BM&FBOVESPA introduced three special listing segments:

Level 1 of Differentiated Corporate Governance Practices;

Level 2 of Differentiated Corporate Governance Practices; and

The *Novo Mercado* (New Market).

These special listing segments were designed for the trading of shares issued by companies that voluntarily undertake to abide by corporate governance practices and disclosure requirements in addition to those already required by Brazilian law. The inclusion of a company in any of the special listing segments requires adherence to a series of corporate governance rules. These rules were designed to increase shareholders' rights and enhance the quality of information provided to shareholders.

Our shares joined Level 1 of Differentiated Corporate Governance Practices on December 14, 2012. As a Level 1 company, we must, among other things:

Table of Contents

ensure that shares representing 25% of our total share capital are effectively available for trading;

adopt offering procedures that favor widespread ownership of shares whenever we make a public offering;

comply with minimum quarterly disclosure standards, including issuing consolidated financial information, a cash flow statement, and special audit revisions on a quarterly basis;

follow stricter disclosure policies with respect to contracts with related parties, material contracts and transactions involving our securities made by our controlling shareholders, directors or executive officers;

make a schedule of corporate events available to our shareholders; and

hold public meetings with analysts and investors at least annually.

Pursuant to the regulations of the BM&FBOVESPA, the members of our board of directors and board of executive officers are personally liable for our compliance with the rules and regulations of the BM&FBOVESPA's Level 1 Listing Segment.

ITEM 10. ADDITIONAL INFORMATION

Description of Our Company's By-laws

The following is a summary of the material provisions of our by-laws and of the Brazilian Corporation Law. In Brazil, a company's by-laws (*estatuto social*) are the principal governing document of a corporation (*sociedade anônima*).

General

Our registered name is Oi S.A., and our registered office is located in the City of Rio de Janeiro, State of Rio de Janeiro, Brazil. Our registration number with the Board of Trade of the State of Rio de Janeiro is No. 33.3.0029520-8. We have been duly registered with the CVM under No. 11312 since March 27, 1980. Our headquarters are located in City of Rio de Janeiro, State of Rio de Janeiro, Brazil. Our company has a perpetual existence.

As of March 6, 2014, we had outstanding share capital of R\$7,471,208,836.63, comprised of 1,797,086,404 total shares, consisting of 599,008,629 issued common shares and 1,198,077,775 issued preferred shares, including 84,250,695 common shares and 72,808,066 preferred shares held in treasury. All of our outstanding share capital is fully paid. All of our shares are without par value. Under the Brazilian Corporation Law, the aggregate number of our non-voting and limited voting preferred shares may not exceed two-thirds of our total outstanding share capital. In addition, our board of directors may increase our share capital up to 2,500,000 common or preferred shares without amendment to our by-laws. However, we have proposed an amendment to our bylaws to change the amount by which our board of directors may increase our share capital to a number of common and preferred shares equivalent to R\$34,038,701,741.49, subject to the legal limit for non-voting and limited voting preferred shares described below. This amendment will be voted on at an extraordinary general shareholders' meeting called for March 27, 2014.

Corporate Purposes

Under Article 2 of our by-laws, our corporate purposes are:

Edgar Filing: OI S.A. - Form 20-F

to offer telecommunications services and all activities required or useful for the operation of these services, in conformity with our concessions, authorizations and permits;

to participate in the capital of other companies;

Table of Contents

to organize wholly-owned subsidiaries for the performance of activities that are consistent with our corporate purposes and recommended to be decentralized;

to import, or promote the importation of, goods and services that are necessary to the performance of activities consistent with our corporate purposes;

to provide technical assistance services to other telecommunications companies engaged in activities of common interest;

to perform study and research activities aimed at the development of the telecommunications sector;

to enter into contracts and agreements with other telecommunications companies or other persons or entities to assure the operations of our services, with no loss of its attributions and responsibilities; and

to perform other activities related to the above corporate purposes.

Board of Directors

Under our by-laws, any matters subject to the approval of our board of directors can be approved only by an absolute majority of votes of the members of our board of directors. Under our by-laws, our board of directors may only deliberate if a majority of its members are present at a duly convened meeting.

Election of Directors

The shareholders of TmarPart, our controlling shareholder, have entered into shareholders agreements that determine the representation of these shareholders on our board of directors. See [Item 7. Major Shareholders and Related Party Transactions](#) [Major Shareholders](#) [TmarPart Shareholders](#) [Agreements](#). The members of our board of directors are elected at general meetings of shareholders for concurrent two-year terms. The tenure of the members of the board of directors and board of executive officers will be conditioned on such members signing a Term of Consent (*Termo de Anuência dos Administradores*) in accordance with the Level 1 Corporate Governance Listing Segment of the BM&FBOVESPA and complying with applicable legal requirements.

Qualification of Directors

There is no minimum share ownership or residency requirement to qualify for membership on our board of directors. Our by-laws do not require the members of our board of directors to be residents of Brazil. The Brazilian Corporation Law requires each of our executive officers to be residents of Brazil. The tenure of the members of the board of directors will be conditioned to the appointment of a representative who resides in Brazil, with powers to receive service of process in proceedings initiated against such member based on the corporate legislation, by means of a power-of-attorney with a validity term of at least three years.

Fiduciary Duties and Conflicts of Interest

All members of our board of directors and their alternates owe fiduciary duties to us and all of our shareholders.

Under the Brazilian Corporation Law, if one of our directors or his or her respective alternate or one of our executive officers has a conflict of interest with our company in connection with any proposed transaction, such director, alternate director or executive officer may not vote in any decision of our board of directors or of our board of executive officers, as the case may be, regarding such transaction and must disclose the nature and extent of his conflicting interest for inclusion in the minutes of the applicable meeting. However, if one of our directors is absent from a meeting of our board of directors, that director's alternate may vote even if that director has a conflict of interest, unless the alternate director shares that conflict of interest or has another conflict of interest.

Edgar Filing: OI S.A. - Form 20-F

Any transaction in which one of our directors (including the alternate members) or executive officers may have an interest, including any financings, can only be approved on reasonable and fair terms and conditions that are no

Table of Contents

more favorable than the terms and conditions prevailing in the market or offered by third parties. If any such transaction does not meet this requirement, then the Brazilian Corporation Law provides that the transaction may be nullified and the interested director or executive officer must return to us any benefits or other advantages that he obtained from, or as result of, such transaction. Under the Brazilian Corporation Law and upon the request of a shareholder who owns at least 5.0% of our total share capital, our directors and executive officers must reveal to our shareholders at an ordinary meeting of our shareholders certain transactions and circumstances that may give rise to a conflict of interest. In addition, our company or shareholders who own 5.0% or more of our share capital may bring an action for civil liability against directors and executive officers for any losses caused to us as a result of a conflict of interest.

Compensation

Under our by-laws, our common shareholders approve the aggregate compensation payable to our directors, executive officers and members of our fiscal council. Subject to this approval, our board of directors establishes the compensation of its members and of our executive officers. See Item 6. Directors, Senior Management and Employees Compensation.

Mandatory Retirement

Neither the Brazilian Corporation Law nor our by-laws establish any mandatory retirement age for our directors or executive officers.

Share Capital

Under the Brazilian Corporation Law, the number of our issued and outstanding non-voting shares or shares with limited voting rights, such as our preferred shares, may not exceed two-thirds of our total outstanding share capital.

Each of our common shares entitles its holder to one vote at our annual and extraordinary shareholders meetings. Holders of our common shares are not entitled to any preference in respect of our dividends or other distributions or otherwise in case of our liquidation.

Our preferred shares are non-voting, except in limited circumstances, and do not have priority over our common shares in the case of our liquidation. See Voting Rights for information regarding the voting rights of our preferred shares and Item 8. Financial Information Dividends and Dividend Policy Calculation of Adjusted Net Profit and Dividend Preference of Preferred Shares for information regarding the distribution preferences of our preferred shares.

Shareholders Meetings

Under the Brazilian Corporation Law, we must hold an annual shareholders meeting by April 30 of each year in order to:

approve or reject the financial statements approved by our board of directors and board of executive officers, including any recommendation by our board of directors for the allocation of net profit and distribution of dividends; and

elect members of our board of directors (upon expiration of their two-year terms) and members of our fiscal council, subject to the right of preferred shareholders and minority common shareholders to elect members of our board of directors and our fiscal council. In addition to the annual shareholders meetings, holders of our common shares have the power to determine any matters related to changes in our corporate purposes and to pass any resolutions they deem necessary to protect and enhance our development whenever our interests so require, by means of extraordinary shareholders meetings.

Table of Contents

We convene our shareholders' meetings, including our annual shareholders' meeting, by publishing a notice in the national edition of *Valor Econômico*, a Brazilian newspaper, and in the Official Gazette of the state of Rio de Janeiro (*Diário Oficial do Estado do Rio de Janeiro*). On the first call of any meeting, the notice must be published no fewer than three times, beginning at least 15 calendar days prior to the scheduled meeting date. For meetings involving the issuance of securities or deliberations where preferred shareholders are entitled to vote, the notice must be published at least 30 calendar days prior to the scheduled meeting date. The notice must contain the meeting's place, date, time, agenda and, in the case of a proposed amendment to our by-laws, a description of the subject matter of the proposed amendment.

Our board of directors may convene a shareholders' meeting. Under the Brazilian Corporation Law, shareholders' meetings also may be convened by our shareholders as follows:

by any of our shareholders if, under certain circumstances set forth in the Brazilian Corporation Law, our directors do not convene a shareholders' meeting required by law within 60 days;

by shareholders holding at least 5% of our total share capital if, after a period of eight days, our directors fail to call a shareholders' meeting that has been requested by such shareholders; and

by shareholders holding at least 5% of either our total voting share capital or our total non-voting share capital, if after a period of eight days, our directors fail to call a shareholders' meeting for the purpose of appointing a fiscal council that has been requested by such shareholders.

In addition, our fiscal council may convene a shareholders' meeting if our board of directors does not convene an annual shareholders' meeting within 30 days or at any other time to consider any urgent and serious matters.

Each shareholders' meeting is presided over by the chief executive officer, who is responsible for choosing a secretary of the meeting. A shareholder may be represented at a shareholders' meeting by an attorney-in-fact appointed by the shareholder not more than one year before the meeting. The attorney-in-fact must be a shareholder, a member of our board of directors, a member of our board of executive officers, a lawyer or a financial institution, and the power of attorney appointing the attorney-in-fact must comply with certain formalities set forth under Brazilian law. To be admitted to a shareholders' meeting, a person must produce proof of his or her shareholder status or a valid power of attorney.

In order for a valid action to be taken at a shareholders' meeting, shareholders representing at least 25% of our issued and outstanding voting share capital must be present on first call. However, shareholders representing at least two-thirds of our issued and outstanding voting share capital must be present at a shareholders' meeting called to amend our by-laws. If a quorum is not present, our board of directors may issue a second call by publishing a notice as described above at least eight calendar days prior to the scheduled meeting. Except as otherwise provided by law, the quorum requirements do not apply to a meeting held on the second call, and the shareholders' meetings may be convened with the presence of shareholders representing any number of shares (subject to the voting requirements for certain matters described below). A shareholder without a right to vote may attend a shareholders' meeting and take part in the discussion of matters submitted for consideration.

Voting Rights

Under the Brazilian Corporation Law and our by-laws, each of our common shares entitles its holder to one vote at our shareholders' meetings. Our preferred shares generally do not confer voting rights, except in limited circumstances described below. We may not restrain or deny any voting rights without the consent of the majority of the shares affected. Whenever the shares of any class of share capital are entitled to vote, each share is entitled to one vote.

Voting Rights of Common Shares

Except as otherwise provided by law, resolutions of a shareholders' meeting are passed by a simple majority vote of the holders of our common shares present or represented at the meeting, without taking abstentions into

Table of Contents

account. Under the Brazilian Corporation Law, the approval of shareholders representing at least half of our outstanding voting shares is required for the types of action described below:

creating preferred shares or disproportionately increasing an existing class of our preferred shares relative to the other classes of our preferred shares, other than to the extent permitted by our by-laws;

changing a priority, preference, right, privilege or condition of redemption or amortization of any class of our preferred shares or creating a new class of preferred shares that has a priority, preference, right, condition or redemption or amortization superior to an existing class of our preferred shares;

reducing the mandatory dividend set forth in our by-laws;

changing our corporate purpose;

merging our company with another company, or consolidating our company, subject to the conditions set forth in the Brazilian Corporation Law;

transferring all of our shares to another company, known as an *incorporação de ações* under the Brazilian Corporation Law;

participating in a centralized group of companies (*grupo de sociedades*) as defined under the Brazilian Corporation Law and subject to the conditions set forth in the Brazilian Corporation Law;

dissolving or liquidating our company or canceling any ongoing liquidation of our company;

creating any founders' shares (*partes beneficiárias*) entitling the holders thereof to participate in the profits of our company; and

spinning-off of all or any part of our company.

Decisions on the transformation of our company into another form of company require the unanimous approval of our shareholders, including the holders of our preferred shares.

Our company is required to give effect to shareholders agreements that contain provisions regarding the purchase or sale of our shares, preemptive rights to acquire our shares, the exercise of the right to vote our shares or the power to control our company, if these agreements are filed with our headquarters in Rio de Janeiro. Brazilian Corporation Law obligates the president of any shareholder or board of directors meeting to disregard any vote taken by any of the parties to any shareholders agreement that has been duly filed with our company that violates the provisions of any such agreement. In the event that a shareholder that is party to a shareholders agreement (or a director appointed by such shareholder) is absent from any shareholders' or board of directors' meeting or abstains from voting, the other party or parties to that shareholders agreement have the right to vote the shares of the absent or abstaining shareholder (or on behalf of the absent director) in compliance with that shareholders agreement.

Under the Brazilian Corporation Law, neither our by-laws nor actions taken at a shareholders' meeting may deprive any of our shareholders of certain specific rights, including:

the right to participate in the distribution of our profits;

the right to participate in any remaining residual assets in the event of our liquidation;

the right to supervise the management of our corporate business as specified in the Brazilian Corporation Law;

Table of Contents

the right to preemptive rights in the event of an issuance of our shares, debentures convertible into our shares or subscription bonuses, other than with respect to a public offering of our securities; and

the right to withdraw from our company under the circumstances specified in the Brazilian Corporation Law.

Voting Rights of Minority Shareholders

Shareholders holding shares representing not less than 5% of our voting shares have the right to request that we adopt a cumulative voting procedure for the election of the members of our board of directors. This procedure must be requested by the required number of shareholders at least 48 hours prior to a shareholders meeting.

Under the Brazilian Corporation Law, shareholders that are not controlling shareholders, but that together hold either:

non-voting preferred shares representing at least 10% of our total share capital; or

common shares representing at least 15% of our voting capital,

have the right to appoint one member and an alternate to our board of directors at our annual shareholders meeting. If no group of our common or preferred shareholders meets the thresholds described above, shareholders holding preferred shares or common shares representing at least 10% of our total share capital are entitled to combine their holdings to appoint one member and an alternate to our board of directors. In the event that minority holders of common shares and/or holders of non-voting preferred shares elect a director and the cumulative voting procedures described above are also used, our controlling shareholders always retain the right to elect at least one member more than the number of members elected by the other shareholders, regardless of the total number of members of our board of directors. The shareholders seeking to exercise these minority rights must prove that they have held their shares for not less than three months preceding the shareholders meeting at which the director will be appointed. Any directors appointed by the non-controlling shareholders have the right to veto for cause the selection of our independent registered public accounting firm.

In accordance with the Brazilian Corporation Law, the holders of preferred shares without voting rights or with restricted voting rights are entitled to elect one member and an alternate to our fiscal council in a separate election. Minority shareholders have the same right as long as they jointly represent 10% or more of the voting shares. The other shareholders with the right to vote may elect the remaining members and alternates, who, in any event, must number more than the directors and alternates elected by the holders of the non-voting preferred shares and the minority shareholders.

Voting Rights of Preferred Shares

Holders of our preferred shares are not entitled to vote on any matter, except:

with respect to the election of a member of our board of directors by preferred shareholders holding at least 10% of our total share capital as described above;

with respect to the election of a member and alternate member of our fiscal council as described above;

with respect to the approval of the contracting of foreign entities related to the controlling shareholders of our company to render management services, including technical assistance, in which decisions preferred shares will have the right to vote separately from the common shares;

Edgar Filing: OI S.A. - Form 20-F

with respect to decisions relating to the employment of foreign entities linked to the controlling shareholders of our company to provide management services, including technical assistance, if the remuneration for such services will exceed 0.2% of our consolidated annual sales for fixed switched

Table of Contents

telephone service, network service transport telecommunications and the mobile highway telephone service, after deductions of tax and contributions; and

in the limited circumstances described below.

The Brazilian Corporation Law and our by-laws provide that our preferred shares will acquire unrestricted voting rights after the third consecutive fiscal year that we fail to pay the minimum dividends to which our preferred shares are entitled. This voting right will continue until the past due minimum dividend for any year in that three consecutive-year period is paid in full. Our preferred shareholders will also obtain unrestricted voting rights if we enter into a liquidation process.

Under the Brazilian Corporation Law, the following actions require ratification by the majority of issued and outstanding shares of the affected class within one year from the shareholders' meeting at which the common shareholders approve the action:

the creation of preferred shares or a disproportionate increase of an existing class of our preferred shares relative to the other classes of our preferred shares, other than to the extent permitted by our by-laws;

a change of a priority, preference, right, privilege or condition of redemption or amortization of any class of our preferred shares; or

the creation of a new class of preferred shares that has a priority, preference, right, condition or redemption or amortization superior to an existing class of our preferred shares.

Liquidation

We may be liquidated in accordance with the provisions of Brazilian law. In the event of our extrajudicial liquidation, a shareholders' meeting will determine the manner of our liquidation, appoint our liquidator and our fiscal council that will function during the liquidation period.

Upon our liquidation, our preferred shares do not have a liquidation preference over our common shares in respect of the distribution of our net assets. In the event of our liquidation, the assets available for distribution to our shareholders would be distributed to our shareholders in an amount equal to their *pro rata* share of our legal capital. If the assets to be so distributed are insufficient to fully compensate our all of our shareholders for their legal capital, each of our shareholders would receive a *pro rata* amount (based on their *pro rata* share of our legal capital) of any assets available for distribution.

Preemptive Rights

Under the Brazilian Corporation Law, each of our shareholders has a general preemptive right to subscribe for our shares or securities convertible into our shares in any capital increase, in proportion to the number of our shares held by such shareholder.

Under our by-laws, our board of directors or our shareholders, as the case may be, may decide not to extend preemptive rights to our shareholders with respect to any issuance of our shares, debentures convertible into our shares or warrants made in connection with a public exchange made to acquire control of another company or in connection with a public offering or sale through a stock exchange. The preemptive rights are transferable and must be exercised within a period of at least 30 days following the publication of notice of the issuance of shares or securities convertible into our shares. Holders of our ADSs may not be able to exercise the preemptive rights relating to our shares underlying their ADSs unless a registration statement under the Securities Act is effective with respect to those rights or an exemption from the registration requirements of the Securities Act is available. We are not obligated to file a registration statement with respect to the shares relating to these preemptive rights or to take any other action to make preemptive rights available to holders of our ADSs, and we may not file any such registration statement.

Table of Contents

Redemption, Amortization, Tender Offers and Rights of Withdrawal

Our by-laws or our shareholders at a shareholders meeting may authorize us to use our profits or reserves to redeem or amortize our shares in accordance with conditions and procedures established for such redemption or amortization. The Brazilian Corporation Law defines redemption (*resgate de ações*) as the payment of the value of the shares in order to permanently remove such shares from circulation, with or without a corresponding reduction of our share capital. The Brazilian Corporation Law defines amortization (*amortização*) as the distribution to the shareholders, without a corresponding capital reduction, of amounts that they would otherwise receive if we were liquidated. If an amortization distribution has been paid prior to our liquidation, then upon our liquidation, the shareholders who did not receive an amortization distribution will have a preference equal to the amount of the amortization distribution in the distribution of our capital.

The Brazilian Corporation Law authorizes us to redeem shares not held by our controlling shareholders, if, after a tender offer effected as a consequence of delisting or a substantial reduction in the liquidity of our shares, our controlling shareholders increase their participation in our total share capital to more than 95%. The redemption price in such case would be the same price paid for our shares in any such tender offer.

The Brazilian Corporation Law and our by-laws also require the acquirer of control (in case of a change of control) or the controller (in case of delisting or a substantial reduction in liquidity of our shares) to make a tender offer for the acquisition of the shares held by minority shareholders under certain circumstances described below under **Mandatory Tender Offers**. The shareholder can also withdraw its capital from our company under certain circumstances described below under **Rights of Withdrawal**.

Mandatory Tender Offers

The Brazilian Corporation Law requires that if our common shares are delisted from the BM&FBOVESPA or there is a substantial reduction in liquidity of our common shares, as defined by the CVM, in each case as a result of purchases by our controlling shareholders, our controlling shareholders must effect a tender offer for acquisition of our remaining common shares at a purchase price equal to the fair value of our common shares taking into account the total number of our outstanding common shares.

If our controlling shareholders enter into a transaction which results in a change of control of our company, the controlling shareholders must include in the documentation of the transaction an obligation to effect a public offer for the purchase of all our common shares for the same price per share paid to the controlling shareholders. The tender offer must be submitted to the CVM within 30 days from the date of execution of the documents that provide for the change of control.

Rights of Withdrawal

The Brazilian Corporation Law provides that, in certain limited circumstances, a dissenting shareholder may withdraw its equity interest from our company and be reimbursed by us for the value of our common or preferred shares that it then holds.

This right of withdrawal may be exercised by the dissenting or non-voting holders of the adversely affected class of shares (including any holder of preferred shares of an adversely affected class) in the event that the holders of a majority of all outstanding common shares authorize:

the creation of preferred shares or a disproportionate increase of an existing class of our preferred shares relative to the other classes of our preferred shares, other than to the extent permitted by our by-laws;

a change of a priority, preference, right, privilege or condition of redemption or amortization of any class of our preferred shares; or

the creation of a new class of preferred shares that has a priority, preference, right, condition or redemption or amortization superior to an existing class of our preferred shares.

Table of Contents

In addition, this right of withdrawal may be exercised by any dissenting or non-voting shareholder (including any holder of preferred shares) in the event that the holders of a majority of the outstanding common shares authorize:

a reduction of the mandatory dividend set forth in our by-laws;

our participation in a centralized group of companies;

a change in our corporate purpose;

spinning-off of all or any part of our company, if such spin-off implies (1) a change in our business purpose (except if the spun-off assets revert to a company whose main purpose is the same as ours), (2) a reduction of the mandatory dividend set forth in our by-laws, or (3) our participation in a centralized group of companies; or

in one of the following transactions in which the shares held by such holders do not meet liquidity and dispersion thresholds under the Brazilian Corporation Law:

the merger of our company with another company, or the consolidation of our company, in a transaction in which our company is not the surviving entity;

the transfer of all of our outstanding shares to another company in an *incorporação de ações* transaction;

the transfer of all of the outstanding shares of another company to us in an *incorporação de ações* transaction; or

the acquisition of control of another company at a price that exceeds certain limits set forth in the Brazilian Corporation Law. Dissenting or non-voting shareholders are also entitled to withdraw in the event that the entity resulting from a merger or spin-off does not have its shares listed in an exchange or traded in the secondary market within 120 days from the shareholders' meeting that approved the relevant merger or spin-off.

Notwithstanding the above, in the event that we are consolidated or merged with another company, become part of a centralized group of companies, or acquire the control of another company for a price in excess of certain limits imposed by the Brazilian Corporation Law, holders of any type or class of our shares or the shares of the resulting entity that have minimal market liquidity and are dispersed among a sufficient number of shareholders will not have the right to withdraw. For this purpose, shares that are part of general indices representative of portfolios of securities traded in Brazil or abroad are considered liquid, and sufficient dispersion will exist if the controlling shareholder, the parent company or other companies under its control hold less than half of the total number of outstanding shares of that type or class. In case of a spin-off, the right of withdrawal will only exist if (1) there is a significant change in the corporate purpose, (2) there is a reduction in the mandatory dividend, or (3) the spin-off results in our participation in a centralized group of companies.

Only shareholders who own shares on the date of publication of the first notice convening the relevant shareholders' meeting or the press release concerning the relevant transaction is published, whichever is earlier, will be entitled to withdrawal rights.

The redemption of shares arising out of the exercise of any withdrawal rights would be made at the economic value of the shares, generally equal to the book value per share, determined on the basis of our most recent audited balance sheet approved by our shareholders. The economic value of the shares may be lower than the net book value amount if it is based on the economic value of the enterprise, as determined by an appraisal process in accordance with Brazilian Corporation Law. If the shareholders' meeting approving the action that gave rise to withdrawal

Table of Contents

rights occurred more than 60 days after the date of the most recent approved audited balance sheet, a shareholder may demand that its shares be valued on the basis of a balance sheet prepared specifically for this purpose.

The right of withdrawal lapses 30 days after the date of publication of the minutes of the shareholders' meeting that approved the action that gave rise to withdrawal rights, except when the resolution is approved pending confirmation by the holders of our preferred shares (such confirmation to be given at an extraordinary meeting of such preferred shareholders to be held within one year). In this event, the 30-day period for dissenting shareholders begins at the date of publication of the minutes of the extraordinary meeting of such preferred shareholders. Our shareholders may reconsider any resolution giving rise to withdrawal rights within 10 days after the expiration of the exercise period of withdrawal rights if we believe that the withdrawal of shares of dissenting shareholders would jeopardize our financial stability.

Liability of Our Shareholders for Further Capital Calls

Neither Brazilian law nor our by-laws require any capital calls. Our shareholders' liability for capital calls is limited to the payment of the issue price of any shares subscribed or acquired.

Inspection of Corporate Records

Shareholders that own 5% or more of our outstanding share capital have the right to inspect our corporate records, including shareholders' lists, corporate minutes, financial records and other documents of our company, if (1) we or any of our officers or directors have committed any act contrary to Brazilian law or our by-laws, or (2) there are grounds to suspect that there are material irregularities in our company. However, in either case, the shareholder that desires to inspect our corporate records must obtain a court order authorizing the inspection.

Disclosures of Share Ownership

Brazilian regulations require that (1) each of our controlling shareholders, directly or indirectly, (2) shareholders who have elected members of our board of directors or fiscal council, and (3) any person or group of persons representing a person that has directly or indirectly acquired or sold an interest corresponding to at least 5% of the total number of our shares of any type or class to disclose its or their share ownership or divestment to us, and we are responsible for transmitting such information to the CVM and the market. In addition, if a share acquisition results in, or is made with the intention of, change of control or company's management structure, as well as acquisitions that cause the obligation of performing a tender offer, the persons acquiring such number of shares are required to publish a statement containing certain required information about such acquisition.

Our controlling shareholders, shareholders that appoint members of our board of directors or fiscal council and members of our board of directors, board of executive officers or fiscal council must file a statement of any change in their holdings of our shares with the CVM and the Brazilian stock exchanges on which our securities are traded.

Form and Transfer

Our preferred shares and common shares are in book-entry form, registered in the name of each shareholder or its nominee. The transfer of our shares is governed by Article 35 of the Brazilian Corporation Law, which provides that a transfer of shares is effected by our transfer agent, Banco do Brasil S.A., by an entry made by the transfer agent in its books, upon presentation of valid written share transfer instructions to us by a transferor or its representative. When preferred shares or common shares are acquired or sold on a Brazilian stock exchange, the transfer is effected on the records of our transfer agent by a representative of a brokerage firm or the stock exchange's clearing system. The transfer agent also performs all the services of safe-keeping of our shares. Transfers of our shares by a non-Brazilian investor are made in the same manner and are executed on the investor's behalf by the investor's local agent. If the original investment was registered with the Brazilian Central Bank pursuant to foreign investment regulations, the non-Brazilian investor is also required to amend, if necessary, through its local agent, the electronic certificate of registration to reflect the new ownership.

Table of Contents

The BM&FBOVESPA operates a central clearing system. A holder of our shares may choose, at its discretion, to participate in this system, and all shares that such shareholder elects to be put into the clearing system are deposited in custody with the clearing and settlement chamber of the BM&FBOVESPA (through a Brazilian institution that is duly authorized to operate by the Brazilian Central Bank and maintains a clearing account with the clearing and settlement chamber of the BM&FBOVESPA). Shares subject to the custody of the clearing and settlement chamber of the BM&FBOVESPA are noted as such in our registry of shareholders. Each participating shareholder will, in turn, be registered in the register of the clearing and settlement chamber of the BM&FBOVESPA and will be treated in the same manner as shareholders registered in our books.

Material Contracts

We have not entered into any material contracts, other than those described in this annual report or entered into in the ordinary course of business.

Exchange Controls

There are no restrictions on ownership or voting of our capital stock by individuals or legal entities domiciled outside Brazil. However, the right to convert dividend payments, interest on shareholders' equity payments and proceeds from the sale of our share capital into foreign currency and to remit such amounts outside Brazil is subject to restrictions under foreign investment legislation and foreign exchange regulations, which generally require, among other things, the registration of the relevant investment with the Brazilian Central Bank and the CVM.

Investments in our common shares or preferred shares by (1) a holder not deemed to be domiciled in Brazil for Brazilian tax purposes, (2) a non-Brazilian holder who is registered with the CVM under Resolution No. 2,689, or (3) the depositary, are eligible for registration with the Brazilian Central Bank. This registration (the amount so registered is referred to as registered capital) allows the remittance outside Brazil of foreign currency, converted at the commercial market rate, acquired with the proceeds of distributions on, and amounts realized through, dispositions of our common shares or preferred shares. The registered capital per common share or preferred share purchased in the form of an ADS, or purchased in Brazil and deposited with the depositary in exchange for an ADS, will be equal to its purchase price (stated in U.S. dollars). The registered capital per common share withdrawn upon cancellation of a Common ADS will be the U.S. dollar equivalent of (1) the average price of a common share on the BM&FBOVESPA on the day of withdrawal, or (2) if no preferred shares were traded on that day, the average price on the BM&FBOVESPA in the 15 trading sessions immediately preceding such withdrawal. The registered capital per preferred share withdrawn upon cancellation of a Preferred ADS will be the U.S. dollar equivalent of (1) the average price of a preferred share on the BM&FBOVESPA on the day of withdrawal, or (2) if no preferred shares were traded on that day, the average price on the BM&FBOVESPA in the 15 trading sessions immediately preceding such withdrawal. The U.S. dollar equivalent will be determined on the basis of the average commercial market rates quoted by the Brazilian Central Bank on the relevant dates.

Annex V Regulations

Resolution No. 1,927 of the National Monetary Council, as amended, provides for the issuance of depositary receipts in foreign markets in respect of shares of Brazilian issuers. It restates and amends Annex V to Resolution No. 1,289 of the National Monetary Council, known as the Annex V Regulations. The ADS program was approved under the Annex V Regulations by the Brazilian Central Bank and the CVM prior to the issuance of the ADSs. Accordingly, the proceeds from the sale of ADSs by ADR holders outside Brazil are not subject to Brazilian foreign investment controls, and holders of the ADSs who are not resident in a tax haven jurisdiction are entitled to favorable tax treatment. See *Taxation - Brazilian Tax Considerations*.

We pay dividends and other cash distributions with respect to our common shares and preferred shares in *reais*. We have obtained an electronic certificate of foreign capital registration from the Brazilian Central Bank in the name of the depositary with respect to our ADSs to be maintained by the custodian on behalf of the depositary. Pursuant to this registration, the custodian is able to convert dividends and other distributions with respect to our common shares and preferred shares represented by ADSs into foreign currency and remit the proceeds outside Brazil to the depositary so that the depositary may distribute these proceeds to the holders of record of the ADSs.

Table of Contents

Investors residing outside Brazil may register their investments in our shares as foreign portfolio investments under Resolution No. 2,689 (described below) or as foreign direct investments under Law No. 4,131 (described below). Registration under Resolution No. 2,689 or Law No. 4,131 generally enables non-Brazilian investors to convert dividends, other distributions and sales proceeds received in connection with registered investments into foreign currency and to remit such amounts outside Brazil. Registration under Resolution No. 2,689 affords favorable tax treatment to non-Brazilian portfolio investors who are not resident in a tax haven jurisdiction, which is defined under Brazilian tax laws as a country that does not impose taxes or where the maximum income tax rate is lower than 20% or that restricts the disclosure of shareholder composition or ownership of investments. See Taxation Brazilian Tax Considerations.

In the event that a holder of ADSs exchanges those ADSs for the underlying common shares or preferred shares, the holder must:

sell those shares on the BM&FBOVESPA and rely on the depository's electronic registration for five business days from the date of exchange to obtain and remit U.S. dollars outside Brazil upon the holder's sale of our preferred shares;

convert its investment in those shares into a foreign portfolio investment under Resolution No. 2,689; or

convert its investment in those shares into a direct foreign investment under Law No. 4,131.

The custodian is authorized to update the depository's electronic registration to reflect conversions of ADSs into foreign portfolio investments under Resolution No. 2,689.

If a holder of ADSs elects to convert its ADSs into a foreign direct investment under Law No. 4,131, the conversion will be effected by the Brazilian Central Bank after receipt of an electronic request from the custodian with details of the transaction. If a foreign direct investor under Law No. 4,131 elects to deposit its common shares or preferred shares into the relevant ADR program in exchange for ADSs, such holder will be required to present to the custodian evidence of payment of capital gains taxes. The conversion will be effected by the Brazilian Central Bank after receipt of an electronic request from the custodian with details of the transaction. See Taxation Brazilian Tax Considerations for details of the tax consequences to an investor residing outside Brazil of investing in our common shares or preferred shares in Brazil.

If a holder of ADSs wishes to convert its investment in our shares into either a foreign portfolio investment under Resolution No. 2,689 or a foreign direct investment under Law No. 4,131, it should begin the process of obtaining its own foreign investor registration with the Brazilian Central Bank or with the CVM, as the case may be, in advance of exchanging the ADSs for the underlying common shares or preferred shares. A non-Brazilian holder of common shares or preferred shares may experience delays in obtaining a foreign investor registration, which may delay remittances outside Brazil, which may in turn adversely affect the amount, in U.S. dollars, received by the non-Brazilian holder.

Unless the holder has registered its investment with the Brazilian Central Bank, the holder may not be able to convert the proceeds from the disposition of, or distributions with respect to, such common shares or preferred shares into foreign currency or remit those proceeds outside Brazil. In addition, if the non-Brazilian investor resides in a tax haven jurisdiction or is not an investor registered under Resolution No. 2,689, the investor will be subject to less favorable tax treatment than a holder of ADSs. See Taxation Brazilian Tax Considerations.

Resolution 2,689

All investments made by a non-Brazilian investor under Resolution No. 2,689 are subject to an electronic registration with the Brazilian Central Bank. This registration permits non-Brazilian investors to convert dividend payments, interest on shareholders' equity payments and proceeds from the sale of our share capital into foreign currency and to remit such amounts outside Brazil.

Table of Contents

Under Resolution No. 2,689, non-Brazilian investors registered with the CVM may invest in almost all financial assets and engage in almost all transactions available to Brazilian investors in the Brazilian financial and capital markets without obtaining a separate Brazilian Central Bank registration for each transaction, provided that certain requirements are fulfilled. Under Resolution No. 2,689, the definition of a non-Brazilian investor includes individuals, legal entities, mutual funds and other collective investment entities, domiciled or headquartered outside Brazil.

Pursuant to Resolution No. 2,689, non-Brazilian investors must:

appoint at least one representative in Brazil with powers to take action relating to its investments;

appoint an authorized custodian in Brazil for its investments, which must be a financial institution duly authorized by the Brazilian Central Bank and CVM;

complete the appropriate foreign investor registration forms;

register as a non-Brazilian investor with the CVM;

register its investments with the Brazilian Central Bank; and

obtain a taxpayer identification number from the Brazilian federal tax authorities.

The securities and other financial assets held by a non-Brazilian investor pursuant to Resolution No. 2,689 must be registered or maintained in deposit accounts or under the custody of an entity duly licensed by the Brazilian Central Bank or the CVM or be registered in registration, clearing and custody systems authorized by the Brazilian Central Bank or by the CVM. In addition, the trading of securities held under Resolution No. 2,689 is restricted to transactions carried out on stock exchanges or through organized over-the-counter markets licensed by the CVM.

The offshore transfer or assignment of the securities or other financial assets held by non-Brazilian investors pursuant to Resolution No. 2,689 are prohibited, except for transfers resulting from a corporate reorganization effected abroad by a non-Brazilian investor, or occurring upon the death of an investor by operation of law or will.

Law 4,131

To obtain a certificate of foreign capital registration from the Brazilian Central Bank under Law No. 4,131, a foreign direct investor must:

register as a foreign direct investor with the Brazilian Central Bank;

obtain a taxpayer identification number from the Brazilian tax authorities;

appoint a tax representative in Brazil; and

appoint a representative in Brazil for service of process in respect of suits based on the Brazilian Corporation Law.

Edgar Filing: OI S.A. - Form 20-F

Foreign direct investors under Law No. 4,131 may sell their shares in either private or open market transactions, but these investors will generally be subject to less favorable tax treatment on gains with respect to our common or preferred shares. See [Taxation](#) [Brazilian Tax Considerations](#).

Taxation

The following discussion contains a description of the material Brazilian and U.S. federal income tax consequences of the acquisition, ownership and disposition of our common shares, preferred shares or ADSs. The

Table of Contents

following discussion does not purport to be a comprehensive description of all the tax considerations that may be relevant to a decision to purchase, hold or dispose of our common shares, preferred shares or ADSs. This discussion is based upon the tax laws of Brazil and the United States and regulations under these tax laws as currently in effect, which are subject to change.

Although there is at present no income tax treaty between Brazil and the United States, the tax authorities of the two countries have had discussions that may culminate in such a treaty. No assurance can be given, however, as to whether or when a treaty will enter into force or how it will affect the U.S. holders of our common shares, preferred shares or ADSs.

Prospective purchasers of our common shares, preferred shares or ADSs should consult their own tax advisors as to the tax consequences of the acquisition, ownership and disposition of our common shares, preferred shares or ADSs in their particular circumstances.

Brazilian Tax Considerations

The following discussion contains a description of the material Brazilian tax consequences, subject to the limitations set forth herein, of the acquisition, ownership and disposition of our common shares, preferred shares or ADSs by a holder not deemed to be domiciled in Brazil for purposes of Brazilian taxation, or a Non-Brazilian Holder. This discussion is based on the tax laws of Brazil and regulations thereunder in effect on the date hereof, which are subject to change (possibly with retroactive effect). This discussion does not specifically address all of the Brazilian tax considerations that may be applicable to any particular Non-Brazilian Holder. Therefore, each Non-Brazilian Holder should consult its own tax advisor about the Brazilian tax consequences of an investment in our common shares, preferred shares or ADSs.

Individuals domiciled in Brazil and Brazilian companies are taxed in Brazil on the basis of their worldwide income which includes earnings of Brazilian companies' foreign subsidiaries, branches and affiliates. The earnings of branches of foreign companies and non-Brazilian residents, or nonresidents, in general are taxed in Brazil only on income derived from Brazilian sources.

In addition, the remittances are subject to a Brazilian financial transactions tax, which as of the date of this annual report is 0%, but may be subject to change.

The Normative Instruction 1,397/2013, or NI 1,397/2013, published in the Official Gazette on September 17, 2013, was enacted to regulate the transitional tax regime, or RTT, in force as of January 1, 2008 to adjust, for tax purposes, the net profit calculated under the IFRS rules in accordance with Law 11,638/2007.

According to NI 1,397/2013, for purposes of calculating dividends and interest on net equity, taxpayers must use the accounting books prepared according to the criteria in force on December 31, 2007, and not IFRS. According to such provisions, depending on the tax basis used by the taxpayer, certain dividend distributions may be subject to a 15% withholding tax (or 25% if the taxpayer resides in a tax haven jurisdiction. See Item 10. Additional Information Taxation Brazilian Tax Considerations.

Provisional Measure 627/2013, or PM 627/2013, published in the Official Gazette on November 12, 2013, introduced changes to different tax provisions including, but not limited to payments of dividends and interest on net equity.

According to PM 627/2013, companies electing to be taxed under the new regime on January 1, 2014 as opposed to January 1, 2015 will not be subject to retroactive taxation on dividends distributions effectively made before November 12, 2013, as established by NI 1,397/2013.

As of the date of this annual report, we have not decided whether we will elect to be taxed under the new tax regime as of January 1, 2014, which is pending regulation by the Brazilian tax authorities. PM 627/2013 is an act of the executive government, and will only become ordinary legislation after it is reviewed by Brazil's National Congress, which may make significant changes to the new tax rules set out in PM 627/2013.

Moreover, if PM 627/2013 does not become ordinary legislation within 120 days from publication, plus the time period established for presidential sanction, it will cease to have effect.

Dividends

Dividends paid by a Brazilian corporation, such as Oi, including stock dividends and other dividends paid to a Non-Brazilian Holder of our common shares, preferred shares or ADSs, are currently not subject to income tax withholding in Brazil to the extent that such amounts are related to profits generated after January 1, 1996. Dividends paid from profits generated before January 1, 1996 may be subject to Brazilian income tax withholding at varying rates, according to the tax legislation applicable to each corresponding year.

Interest on Shareholders' Equity

Law No. 9,249, dated December 26, 1995, as amended, allows a Brazilian corporation, such as Oi, to make distributions to shareholders of interest on shareholders' equity, and treat those payments as a deductible expense for purposes of calculating Brazilian corporate income tax, and, since 1998, social contribution on net profit as well, as long as the limits described below are observed. These distributions may be paid in cash. For tax purposes, the deductible amount of this interest is limited to the daily pro rata variation of the TJLP, as determined by the Brazilian Central Bank from time to time, and the amount of the deduction may not exceed the greater of:

50% of net income (after the deduction of social contribution on net profit but before taking into account the provision for corporate income tax and the amounts attributable to shareholders as interest on shareholders' equity) for the period in respect of which the payment is made; and

50% of the sum of retained profits and income reserves as of the date of the beginning of the period in respect of which the payment is made.

Table of Contents

Payment of interest on shareholders' equity to a Non-Brazilian Holder is subject to income tax withholding at the rate of 15%, or 25% if the Non-Brazilian Holder is domiciled in a country or location that is considered to be a tax haven jurisdiction for this purpose. For this purpose, the definition of tax haven encompasses countries and locations (1) that do not impose income tax, (2) that impose income tax at a rate of 20% or less, or (3) that impose restrictions on the disclosure of the ownership of investments, or of the identity of the ultimate beneficiary of earnings that are attributed to non-residents. See Interpretation of the Definition of Tax Haven Jurisdictions.

These payments of interest on shareholders' equity may be included, at their net value, as part of any mandatory dividend. To the extent payment of interest on net equity is so included, Oi is required to distribute to shareholders an additional amount to ensure that the net amount received by them, after payment of the applicable income tax withholding, is at least equal to the mandatory dividend.

Payments of interest on shareholders' equity are decided by Oi's shareholders, at its annual shareholders meeting, on the basis of recommendations of its board of directors. No assurance can be given that our board of directors will not recommend that future distributions of profits should be made by means of interest on shareholders' equity instead of by means of dividends.

Taxation of Gains

Under Law No. 10,833, enacted on December 29, 2003, the gain on the disposition or sale of assets located in Brazil by a Non-Brazilian Holder, whether to another non-Brazilian resident or to a Brazilian resident, may be subject to income tax withholding in Brazil.

With respect to the disposition of our common shares or preferred shares, as they are assets located in Brazil, the Non-Brazilian Holder should be subject to income tax on the gains assessed, following the rules described below, regardless of whether the transactions are conducted in Brazil or with a Brazilian resident.

With respect to our ADSs, although the matter is not entirely clear, arguably the gains realized by a Non-Brazilian Holder upon the disposition of ADSs to another non-Brazilian resident will not be taxed in Brazil, on the basis that ADSs are not assets located in Brazil for the purposes of Law No. 10,833. We cannot assure you, however, that the Brazilian tax authorities or the Brazilian courts will agree with this interpretation. As a result, gains on a disposition of ADSs by a Non-Brazilian Holder to a Brazilian resident, or even to a non-Brazilian resident, in the event that courts determine that ADSs would constitute assets located in Brazil, may be subject to income tax in Brazil according to the rules applicable to our common shares and preferred shares, described above.

As a general rule, gains realized as a result of a disposition of our common shares, preferred shares or ADSs are the positive difference between the amount realized on the transaction and the acquisition cost of our common shares, preferred shares or ADSs.

Under Brazilian law, however, income tax rules on such gains can vary depending on the domicile of the Non-Brazilian Holder, the type of registration of the investment by the Non-Brazilian Holder with the Brazilian Central Bank and how the disposition is carried out, as described below.

Gains realized on a disposition of shares carried out on a Brazilian stock exchange (which includes the organized over-the-counter market) are:

exempt from income tax when realized by a Non-Brazilian Holder that (1) has registered its investment in Brazil with the Brazilian Central Bank under the rules of Resolution 2,689 (a 2,689 Holder), and (2) is not a resident in a country or location which is defined as a tax haven jurisdiction for this purposes (as described below); or

subject to income tax at a rate of up to 25% in any other case, including a case of gains assessed by a Non-Brazilian Holder that is not a 2,689 Holder, and is a resident of a country or location defined as a tax haven jurisdiction for this purpose (as described below). In these cases, a withholding income tax of

Table of Contents

0.005% of the sale value will be applicable and can be later offset with the eventual income tax due on the capital gain. This 0.005% withholding income tax is not levied on day trade transactions.

Any gains assessed on a disposition of our common shares or preferred shares that is not carried out on a Brazilian stock exchange are subject to income tax at the rate of 15%, or 25% in the case of a Non-Brazilian Holder which resides in a tax haven jurisdiction according to the definition applicable to this situation. In the case that these gains are related to transactions conducted on the Brazilian non-organized over-the-counter market with intermediation, income tax withholding of 0.005% will also be applicable and can be offset against the eventual income tax due on the capital gain. This 0.005% income tax withholding is not levied in day trade transactions.

In the case of 2,689 Holders, a country or location should only be defined as a tax haven jurisdiction when it (1) does not tax income, or (2) taxes income at a rate of 20% or less. In the case of gains realized by Non-Brazilian Holders other than 2,689 Holders, a country or location should be defined as a tax haven jurisdiction when it (a) does not tax income, (b) taxes income at a rate of 20% or less, or (c) imposes restrictions on the disclosure of shareholding composition, of the ownership of investments, or of the identity of the ultimate beneficiary of earnings that are attributed to non-residents. However, there is doubt as to the application of these criteria by the Brazilian tax authorities. See *Interpretation of the Definition of Tax Haven Jurisdictions*.

In the case of redemption of securities or capital reduction by a Brazilian corporation, such as Oi, the positive difference between the amount effectively received by the Non-Brazilian Holder and the corresponding acquisition cost is treated, for tax purposes, as capital gain derived from sale or exchange of shares not carried out on a Brazilian stock exchange market, and is therefore subject to income tax at the rate of 15% or 25%, as the case may be.

The deposit of our common or preferred shares in exchange for ADSs will be subject to Brazilian income tax if the acquisition cost of the shares is lower than (1) the average price per share on a Brazilian stock exchange on which the greatest number of such shares were sold on the day of deposit, or (2) if no shares were sold on that day, the average price on the Brazilian stock exchange on which the greatest number of shares were sold in the 15 trading sessions immediately preceding such deposit. In such case, the difference between the acquisition cost and the average price of the shares calculated as above will be considered to be a capital gain subject to income tax withholding at the rate of 15% or 25%, as the case may be. In some circumstances, there may be arguments to claim that this taxation is not applicable in the case of a Non-Brazilian Holder that is a 2,689 Holder and is not a resident in a tax haven jurisdiction for this purpose. The availability of these arguments to any specific holder of our common shares or preferred shares will depend on the circumstances of such holder. Prospective holders of our common shares or preferred shares should consult their own tax advisors as to the tax consequences of the deposit of our common shares or preferred shares in exchange for ADSs.

Any exercise of preemptive rights relating to our common shares, preferred shares or ADSs will not be subject to Brazilian taxation. Any gain on the sale or assignment of preemptive rights relating to our common shares or preferred shares, including the sale or assignment carried out by the depositary, on behalf of Non-Brazilian Holders of ADSs, will be subject to Brazilian income taxation according to the same rules applicable to the sale or disposition of our common shares or preferred shares.

As a Non-Brazilian Holder of ADSs, you may cancel your TmarPart ADSs and exchange them for TmarPart shares. Income tax will not be levied on such exchange, as long as the appropriate rules are complied with in connection with the registration of the investment with the Central Bank, and as long as ADSs are not deemed to be assets located in Brazil.

Any gain earned by a Non-Brazilian Holder on the exercise of appraisal rights (which consists of a disposition of Oi shares, in exchange for a cash payment by Oi) will be subject to Brazilian income taxation according to the same rules applicable to the sale or disposition of shares of TmarPart.

Any exercise of preemptive rights relating to the subscription of new TmarPart shares or ADSs, upon a capital increase of TmarPart, will not be subject to Brazilian taxation. Any gain on the sale or assignment of preemptive rights relating to shares of TmarPart, including the sale or assignment carried out by the TmarPart Depositary, on behalf of Non-Brazilian Holders of ADSs, will be subject to Brazilian income taxation according to the same rules applicable to the sale or disposition of shares of TmarPart. The current preferential tax treatment for 2,689 Holders, as described above, may be extinguished in the future.

Interpretation of the Discussion on the Definition of Tax Haven Jurisdictions

Until December 2008, under Brazilian tax laws, a Low Tax Jurisdiction (LTJ) was defined as a country or location that does not impose taxation on income, or imposes the income tax at a rate lower than 20%. There was a list of LTJs enacted by Brazilian tax authorities by means of Normative Ruling n. 188/2002. More recently, some amendments were implemented in connection with the concept of LTJ, via the enactment of Law n. 11,727/08, in force as of January 2009, in order to include in said concept the provision in the sense that the country or location which

imposes restrictions on the disclosure of shareholding composition or the ownership of the investment should also be considered as a LTJ.

Additionally, Law 11,727/08 also created the concept of privileged tax regimes (PTRs), which encompasses the countries and jurisdictions that: (i) do not tax income or tax it at a maximum rate lower than 20%; (ii) grant tax advantages to a non-resident entity or individual (a) without the need to carry out a substantial economic activity in the country or a said territory or (b) conditioned to the non-exercise of a substantial economic activity in the country or a said territory; (iii) do not tax or taxes proceeds generated abroad at a maximum rate lower than 20.0%; or (iv) restricts the ownership disclosure of assets and ownership rights or restricts disclosure about economic transactions carried out.

As a consequence, in 2010, a new list was enacted by Brazilian tax authorities, via Normative Ruling n. 1,037/10 (IN 1,037/10), which includes the countries considered as LTJs and the locations considered as granting privileged tax regimes. Under Section 2 of IN 1,037/10, companies incorporated as LLCs in the US, and companies benefiting out of some holding regimes in Europe, may be considered as granting privileged tax regimes. We highlight that there would be solid legal grounds to sustain that the list should be interpreted as an exhaustive list, so that only the countries and locations listed should be viewed as LTJs and privileged tax regimes, according to their specific qualification. The interpretation of the current Brazilian tax legislation should lead to the conclusion that the concept of PTR should only apply for certain Brazilian tax purposes, such as transfer pricing and thin capitalization. According to this interpretation, the concept of PTR should not be applied in connection with the taxation of dividends, interest on shareholders' equity and gains related to investments made by Non-Brazilian Holders in Brazilian corporations, such as TmarPart. Regulations and non-binding tax rulings issued by Brazilian federal tax authorities seem to confirm this interpretation.

Notwithstanding the above, we recommend that you consult your own tax advisors regarding the consequences of the implementation of Law No. 11,727, Normative Ruling No. 1,037 and of any related Brazilian tax law or regulation concerning Low or Nil Tax Jurisdictions or PTRs.

Tax on Foreign Exchange Transactions (IOF/Exchange Tax)

Brazilian law imposes a Tax on Foreign Exchange Transactions, or IOF/Exchange, on the conversion of reais into foreign currency and on the conversion of foreign currency into reais. The currently applicable rate for most types of foreign exchange transactions is 0.38%. However, other rates apply to specific types of transactions.

In particular, foreign exchange transactions related to inflows of funds to Brazil for investments made by Non-Brazilian Holders on the Brazilian financial and capital markets are currently subject to IOF/Exchange at a zero percent rate.

Foreign exchange transactions related to outflows of funds in connection with investments carried out on the Brazilian financial and capital markets are also subject to the IOF/Exchange at a rate of zero percent.

The IOF/Exchange also levies at a zero percent rate in case of dividends and interest on shareholders' equity paid by a Brazilian corporation, such as TmarPart, to Non-Brazilian Holders.

The Brazilian government is permitted to increase the rate of the IOF/Exchange at any time by up to 25% on the foreign exchange transaction amount. However, any increase in rates will only apply to transactions carried out after such increase in rates enters into force.

Table of Contents

Tax on Transactions Involving Securities (IOF/ Securities Tax)

Brazilian law imposes a Tax on Transactions Involving Bonds and Securities, or IOF/Bonds and Securities, due on transactions involving bonds and securities, including those carried out on a Brazilian stock exchange.

The rate of IOF/Bonds and Securities applicable to most transactions involving shares and ADSs is currently zero, although the Brazilian government may increase such rate at any time up to 1.5% of the transaction amount per day, but only in respect of future transactions.

The transfer (cessão) of shares traded on a Brazilian stock exchange for the issuance of depositary receipts to be traded outside Brazil, such as ADSs, is currently subject to the IOF/Bonds and Securities at a zero percent rate.

Other Brazilian Taxes

There are no Brazilian inheritance, gift or succession taxes applicable to the ownership, transfer or disposition of our common shares, preferred shares or ADSs by a Non-Brazilian Holder except for gift and inheritance taxes levied by some states in Brazil. There are no Brazilian stamp, issue, registration, or similar taxes or duties payable by Non-Brazilian Holders of our common shares, preferred shares or ADSs.

U.S. Federal Income Tax Considerations

The following is a discussion of the material U.S. federal income tax consequences that may be relevant with respect to the acquisition, ownership and disposition of the common shares, preferred shares or ADSs of Oi, which are evidenced by ADRs. This description addresses only the U.S. federal income tax considerations of U.S. Holders (as defined below) that are initial purchasers of the common shares, preferred shares or ADSs of Oi and that will hold such shares or ADSs as capital assets. This description does not address tax considerations applicable to holders that may be subject to special tax rules, such as banks, financial institutions, insurance companies, real estate investment trusts, grantor trusts, regulated investment companies, dealers or traders in securities or currencies, tax-exempt entities, pension funds, persons that received the common shares, preferred shares or ADSs of Oi pursuant to an exercise of employee stock options or rights or otherwise as compensation for the performance of services, persons that will hold the common shares, preferred shares or ADSs of Oi as a position in a straddle or as a part of a hedging, conversion or other risk reduction transaction for U.S. federal income tax purposes, persons that have a functional currency other than the U.S. dollar, persons that will own the common shares, preferred shares or ADSs of Oi through partnerships or other pass through entities, holders subject to the alternative minimum tax, certain former citizens or long-term residents of the United States or holders that own (or are deemed to own) 10% or more (by voting power) of the shares of Oi.

This description does not address any state, local or non-U.S. tax consequences of the acquisition, ownership and disposition of the common shares, preferred shares or ADSs of Oi by U.S. Holders. Moreover, this description does not address the consequences of any U.S. federal tax other than income tax, including but not limited to the U.S. federal estate and gift taxes. This description is based on (1) the Internal Revenue Code of 1986, as amended (the Code), existing and temporary U.S. Treasury Regulations and judicial and administrative interpretations thereof, in each case as in effect and available on the date of this annual report, as well as proposed Treasury Regulations available on the date of this annual report, and (2) in part, on the representations of the depositary and the assumption that each obligation in the deposit agreement and any related agreement will be performed in accordance with its terms. All of the foregoing is subject to change, which change could apply retroactively and could affect the tax consequences described below. Holders should consult their tax advisers to determine the

Table of Contents

particular tax consequences to such holders of the acquisition, ownership and disposition of the common shares, preferred shares or ADSs of Oi, including the applicability and effect of U.S. state, local and non-U.S. tax laws.

As used herein, the term "U.S. Holder" means, for U.S. federal tax purposes, a beneficial owner of common shares, preferred shares or ADSs of Oi that is:

an individual citizen or resident of the United States;

a corporation organized under the laws of the United States, any state thereof or the District of Columbia;

an estate the income of which is subject to U.S. federal income taxation regardless of its source; or

a trust if (1) a court within the United States is able to exercise primary supervision over its administration, and (2) one or more United States persons have the authority to control all of the substantial decisions of such trust.

If a partnership (or any other entity treated as a partnership for U.S. federal income tax purposes) holds the common shares, preferred shares or ADSs of Oi, the tax treatment of a partner in such partnership will generally depend on the status of the partner and the activities of the partnership. A partnership or its partners should consult their tax advisor as to its tax consequences.

Treatment of ADSs

In general, for U.S. federal income tax purposes, a holder of an ADR evidencing an ADS will be treated as the beneficial owner of the common shares or preferred shares of Oi represented by the applicable ADS. The U.S. Treasury Department has expressed concern that depositaries for ADSs, or other intermediaries between the holders of shares of an issuer and the issuer, may be taking actions that are inconsistent with the claiming of U.S. foreign tax credits by U.S. Holders of such receipts or shares. Such actions include, for example, a pre-release of an ADS by a depositary. Accordingly, the analysis regarding the availability of a U.S. foreign tax credit for Brazilian taxes, the sourcing rules described below and the availability of the reduced tax rate for dividends received by certain non-corporate holders, each could be affected by future actions that may be taken by the U.S. Treasury Department.

Taxation of Dividends

Subject to the discussion below under "Passive Foreign Investment Company Rules," in general, the gross amount of a distribution made with respect to a common share, preferred share or ADS of Oi (which for this purpose shall include distributions of interest attributable to shareholders' equity before any reduction for any Brazilian taxes withheld therefrom) will, to the extent made from the current or accumulated earnings and profits of Oi, as determined under U.S. federal income tax principles, constitute a dividend to a U.S. Holder for U.S. federal income tax purposes. Non-corporate U.S. Holders may be taxed on dividends from a qualified foreign corporation at the lower rates applicable to long-term capital gains (i.e., gains with respect to capital assets held for more than one year). A foreign corporation is treated as a qualified foreign corporation with respect to dividends received from that corporation on shares or ADSs that are readily tradable on an established securities market in the United States. U.S. Treasury Department guidance indicates that the ADSs of Oi (which are listed on the NYSE), but not the common or preferred shares of Oi, are readily tradable on an established securities market in the United States. Thus, subject to the discussion below under "Passive Foreign Investment Company Rules," dividends that Oi pays on the ADS, but not on the common shares or preferred shares of Oi, currently meet the conditions required for these reduced tax rates. However, there can be no assurance that the ADSs will be considered readily tradable on an established securities market in later years. Furthermore, a U.S. Holder's eligibility for such preferential rate is subject to certain holding period requirements and the non-existence of certain risk reduction transactions with respect to the ADSs. Such dividends will not be eligible for the dividends received deduction generally allowed to corporate U.S. Holders. Subject to the discussion below under "Passive Foreign Investment Company Rules," if a distribution exceeds the amount of the current and accumulated earnings and profits of Oi, it will be treated as a non-taxable return of capital to the extent of the U.S. Holder's tax basis in the common share, preferred share or ADS of Oi on which it is paid and thereafter as capital gain. Oi does not maintain calculations of the earnings and profits of Oi

Table of Contents

under U.S. federal income tax principles. Therefore, U.S. Holders should expect that distributions by Oi generally will be treated as dividends for U.S. federal income tax purposes.

A dividend paid in reais will be includible in the income of a U.S. Holder at its value in U.S. dollars calculated by reference to the prevailing spot market exchange rate in effect on the day it is received by the U.S. Holder in the case of the common shares or preferred shares of Oi or, in the case of a dividend received in respect of ADSs of Oi, on the date the dividend is received by the depository, whether or not the dividend is converted into U.S. dollars. Assuming the payment is not converted at that time, the U.S. Holder will have a tax basis in reais equal to that U.S. dollar amount, which will be used to measure gain or loss from subsequent changes in exchange rates. Any gain or loss realized by a U.S. Holder that subsequently sells or otherwise disposes of reais, which gain or loss is attributable to currency fluctuations after the date of receipt of the dividend, will be ordinary gain or loss. The amount of any distribution of property other than cash will be the fair market value of such property on the date of distribution.

The gross amount of any dividend paid (which will include any amounts withheld in respect of Brazilian taxes) with respect to a common share, preferred share or ADS of Oi will be subject to U.S. federal income taxation as foreign source dividend income, which may be relevant in calculating a U.S. Holder's foreign tax credit limitation. Subject to limitations under U.S. federal income tax law concerning credits or deductions for foreign taxes and certain exceptions for short-term and hedged positions, any Brazilian withholding tax will be treated as a foreign income tax eligible for credit against a U.S. Holder's U.S. federal income tax liability (or at a U.S. Holder's election, may be deducted in computing taxable income if the U.S. Holder has elected to deduct all foreign income taxes for the taxable year). The limitation on foreign taxes eligible for the U.S. foreign tax credit is calculated separately with respect to specific baskets of income. For this purpose, the dividends should generally constitute passive category income, or in the case of certain U.S. Holders, general category income. The rules with respect to foreign tax credits are complex, and U.S. Holders are urged to consult their own tax advisors regarding the availability of the foreign tax credit under their particular circumstances.

Treatment of Preferred Stock

Section 305 of the Code provides special rules for the tax treatment of preferred stock. According to the U.S. Treasury Regulations under that section, the term preferred stock generally refers to stock which enjoys certain limited rights and privileges (generally associated with specified dividend and liquidation priorities) but does not participate in corporate growth to any significant extent. While Oi's preferred shares have some preferences over its common shares, the preferred shares are not fixed as to dividend payments or liquidation value. Consequently, although the matter is not entirely clear, because the determination is highly factual in nature, it is more likely than not that the preferred shares of Oi will be treated as common stock within the meaning of section 305 of the Code. If the preferred shares are treated as common stock for purposes of section 305 of the Code, distributions to U.S. Holders of additional shares of such common stock or preemptive rights relating to such common stock with respect to their preferred shares or ADSs that are made as part of a pro rata distribution to all shareholders in most instances will not be subject to U.S. federal income tax. On the other hand, if the preferred shares are treated as preferred stock within the meaning of section 305 of the Code, and if a U.S. Holder receives a distribution of additional shares or preemptive rights as described in the preceding sentence, such distributions (including amounts withheld in respect of any Brazilian taxes), as discussed more fully below, will be treated as dividends to the same extent and in the same manner as distributions payable in cash. In that event, the amount of such distribution (and the basis of the new shares or preemptive rights so received) will equal the fair market value of the shares or preemptive rights on the date of distribution.

Sale, Exchange or Other Disposition of the Common Shares, Preferred Shares or ADSs of Oi

A deposit or withdrawal of common shares or preferred shares by a U.S. Holder in exchange for the ADS that represent such shares will not result in the realization of gain or loss for U.S. federal income tax purposes. Subject to the discussion below under Passive Foreign Investment Company Rules, a U.S. Holder generally will recognize capital gain or loss upon a sale, exchange or other disposition of a common share, preferred share or ADS of Oi held by the U.S. Holder or the depository, as the case may be, in an amount equal to the difference between the U.S. Holder's adjusted basis in its common shares, preferred shares or ADSs of Oi (determined in U.S. dollars) and the U.S. dollar amount realized on the sale,

Table of Contents

exchange or other disposition. If a Brazilian tax is withheld on the sale, exchange or other disposition of a share, the amount realized by a U.S. Holder will include the gross amount of the proceeds of that sale, exchange or other disposition before deduction of the Brazilian tax. In the case of a non-corporate U.S. Holder, the maximum marginal U.S. federal income tax rate applicable to capital gain generally will be lower than the maximum marginal U.S. federal income tax rate applicable to ordinary income (other than, as discussed above, certain dividends) if such holder's holding period for such common share, preferred share or ADS of Oi exceeds one year (i.e., such gain is a long-term capital gain). Capital gain, if any, realized by a U.S. Holder on the sale or exchange of a common share, preferred share or ADS of Oi generally will be treated as U.S. source income for U.S. foreign tax credit purposes. Consequently, in the case of a disposition or deposit of a common share, preferred share or ADS of Oi that is subject to Brazilian tax, the U.S. Holder may not be able to use the foreign tax credit for that Brazilian tax unless it can apply the credit against U.S. tax payable on other income from foreign sources in the appropriate income category, or, alternatively, it may take a deduction for the Brazilian tax if it elects to deduct all of its foreign income taxes. The deductibility of capital losses is subject to limitations under the Code.

The initial tax basis of a U.S. Holder's common shares, preferred shares or ADSs of Oi will be the U.S. dollar value of the reais-denominated purchase price determined on the date of purchase. If the common shares, preferred shares or ADSs of Oi are treated as traded on an established securities market, a cash basis U.S. Holder, or, if it elects, an accrual basis U.S. Holder, will determine the dollar value of the cost of such common shares, preferred shares or ADSs by translating the amount paid at the spot rate of exchange on the settlement date of the purchase. The conversion of U.S. dollars to reais and the immediate use of that currency to purchase common shares, preferred shares or ADSs generally will not result in taxable gain or loss for a U.S. Holder.

With respect to the sale or exchange of common shares, preferred shares or ADSs of Oi, the amount realized generally will be the U.S. dollar value of the payment received determined on the date of disposition. If the common shares, preferred shares or ADSs of Oi are treated as traded on an established securities market, a cash basis taxpayer, or, if it elects, an accrual basis taxpayer, will determine the U.S. dollar value of the amount realized by translating the amount received at the spot rate of exchange on the settlement date of the sale.

Passive Foreign Investment Company Rules

A Non-U.S. corporation will be classified as a passive foreign investment company, or a PFIC, for U.S. federal income tax purposes in any taxable year in which, after applying certain look-through rules, either (1) at least 75 percent of its gross income is passive income, or (2) at least 50 percent of the average value of its gross assets is attributable to assets that produce passive income or is held for the production of passive income. Passive income for this purpose generally includes dividends, interest, royalties, rents and gains from commodities and securities transactions. For purposes of the PFIC asset test, the aggregate fair market value of the assets of a publicly traded foreign corporation generally is treated as being equal to the sum of the aggregate value of the outstanding stock and the total amount of the liabilities of such corporation (the Market Capitalization).

Based on certain estimates of the gross income and gross assets of Oi, the nature of its business, the size of its investment in certain subsidiaries, and its anticipated Market Capitalization, Oi believes that it will not be classified as a PFIC for its taxable year ended December 31, 2013. Oi's status in future years will depend on its assets and activities in those years. Oi has no reason to believe that its assets or activities will change in a manner that would cause it to be classified as a PFIC for the taxable year ending December 31, 2014 or any future year, but there can be no assurance that Oi will not be considered a PFIC for any taxable year because its status will depend on its assets and activities in those years, as well as its actual Market Capitalization as determined at the end of each calendar quarter. Moreover, Oi has not obtained an opinion from counsel regarding the PFIC status of Oi for any taxable period. If Oi is or becomes a PFIC (except as discussed below), any excess distribution (generally a distribution in excess of 125% of the average distribution over a three-year period or shorter holding period for Oi's common shares or preferred shares) and realized gain will be treated as ordinary income and will be subject to tax as if (1) the excess distribution or gain had been realized ratably over the U.S. Holder's holding period, (2) the amount deemed realized in each year had been subject to tax in each such year at the highest marginal rate for such year (other than income allocated to the current period or any taxable period before Oi became a PFIC, which would be subject to tax at the U.S. Holder's regular ordinary income rate for the current year and would not be subject to the interest charge discussed below), and (3) the interest charge generally applicable to underpayments of tax had been

Table of Contents

imposed on the taxes deemed to have been payable in those years. U.S. Holders should consult their own tax advisors regarding the tax consequences that would arise if Oi were treated as a PFIC.

If Oi were a PFIC, a U.S. Holder of the common shares, preferred shares or ADSs of Oi may be able to make certain elections that may alleviate certain of the tax consequences referred to above. Where a company that is a PFIC meets certain reporting requirements, a U.S. Holder can avoid certain adverse PFIC consequences described above by making a qualified electing fund, or QEF, election to be taxed currently on its proportionate share of the PFIC's ordinary income and net capital gains. However, Oi does not intend to comply with the necessary accounting and record keeping requirements that would allow a U.S. Holder to make a QEF election with respect to Oi.

If the common shares, preferred shares or ADSs of Oi are regularly traded on a qualified exchange, a U.S. Holder may make a mark-to-market election with respect to the common shares, preferred shares or ADSs of Oi, as the case may be. If a U.S. Holder makes the mark-to-market election, for each year in which Oi is a PFIC, the holder will generally include as ordinary income the excess, if any, of the fair market value of the common shares, preferred shares, or ADSs of Oi, as the case may be, at the end of the taxable year over their adjusted tax basis, and will be permitted an ordinary loss in respect of the excess, if any, of the adjusted tax basis of the common shares, preferred shares or ADSs of Oi, over their fair market value at the end of the taxable year (but only to the extent of the net amount of previously included income as a result of the mark-to-market election). If a U.S. Holder makes the election, the holder's tax basis in the common shares, preferred shares or ADSs of Oi, as the case may be, will be adjusted to reflect the amount of any such income or loss. Any gain recognized on the sale or other disposition of the common shares, preferred shares or ADSs of Oi will be treated as ordinary income. The common shares, preferred shares and ADSs of Oi will be considered marketable stock if they are traded on a qualified exchange, other than in de minimis quantities, on at least 15 days during each calendar quarter. The NYSE is a qualified exchange and the BM&FBOVESPA may constitute a qualified exchange for this purpose provided the BM&FBOVESPA meets certain trading volume, listing, financial disclosure, surveillance and other requirements set forth in applicable U.S. Treasury Regulations. However, Oi cannot be certain that the common shares, preferred shares or ADSs of Oi will continue to trade on the BM&FBOVESPA or the NYSE, respectively, or that the common shares, preferred shares or ADSs of Oi will be traded on at least 15 days in each calendar quarter in other than de minimis quantities. U.S. Holders should be aware, however, that if Oi were determined to be a PFIC, the interest charge regime described above could be applied to indirect distributions or gains deemed to be attributable to U.S. Holders in respect of any of its subsidiaries that also may be determined to be a PFIC, and the mark-to-market election generally would not be effective for such subsidiaries. Each U.S. Holder should consult its own tax advisor to determine whether a mark-to-market election is available and the consequences of making an election if Oi were characterized as a PFIC.

If a U.S. Holder owns common shares, preferred shares, or ADSs of Oi during any year in which Oi was a PFIC, such U.S. Holder generally must file IRS Form 8621 with respect to Oi, generally with the U.S. Holder's federal income tax return for that year.

Other Brazilian Taxes

Any Brazilian IOF/Exchange Tax or IOF/Bonds and Securities Tax (as discussed under *Brazilian Tax Considerations* above) may not be treated as a creditable foreign tax for U.S. federal income tax purposes, although a U.S. Holder may be entitled to deduct such taxes if it elects to deduct all of its foreign income taxes. U.S. Holders should consult their tax advisors regarding the U.S. federal income tax consequences of these taxes.

3.8% Medicare Tax On Net Investment Income

Certain U.S. Holders who are individuals, estates or trusts may be required to pay an additional 3.8% tax on, among other things, dividends and capital gains from the sale or other disposition of common shares, preferred shares, or ADSs of Oi.

Information Reporting and Backup Withholding

In general, information reporting will apply to dividends in respect of the common shares, preferred shares, or ADSs of Oi and the proceeds from the sale, exchange or redemption of the common shares, preferred shares, or

Table of Contents

ADSs of Oi that are paid to a U.S. Holder within the United States (and in certain cases, outside the United States) by a U.S. payor or U.S. middleman, unless such U.S. Holder is an exempt recipient such as a corporation. A backup withholding tax may apply to such payments if a U.S. Holder fails to provide a taxpayer identification number or certification of other exempt status or fail to report in full dividend and interest income.

Any amounts withheld under the backup withholding rules will be allowed as a refund or a credit against a U.S. Holder's U.S. federal income tax liability provided the required information is furnished to the Internal Revenue Service in a timely manner.

Certain U.S. Holders who are individuals are required to report information relating to an interest in the common shares, preferred shares, or ADSs of Oi, subject to certain exceptions (including an exception for common shares, preferred shares, or ADSs of Oi held in accounts maintained by U.S. financial institutions). U.S. Holders are urged to consult their tax advisors regarding their information reporting obligations, if any, with respect to their acquisition, ownership and disposition of common shares, preferred shares, or ADSs of Oi.

Documents on Display

Statements contained in this annual report regarding the contents of any contract or other document filed as an exhibit to this annual report summarize their material terms, but are not necessarily complete, and each of these statements is qualified in all respects by reference to the full text of such contract or other document.

We are subject to the periodic reporting and other informational requirements of the Exchange Act applicable to a foreign private issuer. Accordingly, we are required to file with or furnish to the SEC reports and other information, including annual reports on Form 20-F and reports on Form 6-K.

As a foreign private issuer, we are exempt under the Exchange Act from, among other things, the rules prescribing the furnishing and content of proxy statements, and members of our board of directors and board of executive officers and our principal shareholders are exempt from reporting and short-swing profit recovery provisions contained in section 16 of the Exchange Act. In addition, as a foreign private issuer, we will not be required under the Exchange Act to file periodic reports and financial statements with the SEC as frequently or as promptly as U.S. companies whose securities are registered under the Exchange Act.

You may inspect and copy reports and other information that we file with or furnish to the SEC at the SEC's Public Reference Room located at 100 F Street, N.E., Washington, D.C. 20549. Copies of these materials may be obtained by mail from the SEC's Public Reference Room at prescribed rates. The public may obtain information on the operation of the SEC's Public Reference Room by calling the SEC in the United States at 1-800-SEC-0330. In addition, the SEC maintains an internet website at www.sec.gov from which you can electronically access these materials.

We also file financial statements and other periodic reports with the CVM, which are available for investor inspection at the CVM's offices located at Rua Sete de Setembro, 111, 2nd floor, Rio de Janeiro, RJ, and Rua Cincinato Braga, 340, 2nd, 3rd and 4th floors, São Paulo, SP. The telephone numbers of the CVM in Rio de Janeiro and São Paulo are +55-21-3554-8686 and +55-11-2146-2000, respectively.

Copies of our annual report on Form 20-F and documents referred to in this annual report and our by-laws are available for inspection upon request at our headquarters at Rua do Lavradio, 71, 2 andar - Centro, CEP 20.230-070 Rio de Janeiro, RJ, Brazil. Our filings are also available to the public through the internet at our website at www.oi.com.br/ir. The information included on our website or that might be accessed through our website is not included in this annual report and is not incorporated into this annual report by reference.

ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risks related to changes in exchange rates and interest rates. The principal market for our products and services is Brazil, and substantially all of our revenues are denominated in *reals*.

Table of Contents

Exchange Rate Risk

We are exposed to foreign exchange risk because a significant portion of our equipment costs, such as costs relating to switching centers and software used for upgrading network capacity, are primarily denominated in foreign currencies or linked to foreign currencies, primarily the U.S. dollar. In 2013, approximately 31% of our capital expenditures were U.S. dollar-denominated or linked to the U.S. dollar. A hypothetical, instantaneous 10.0% depreciation of the *real* against the U.S. dollar as of December 31, 2012 would have resulted in an increase of R\$291 million in the cost of our capital expenditures in 2013, assuming that we would have incurred all of these capital expenditures notwithstanding the adverse change in the exchange rates.

Our financing cost and the amount of financial liabilities that we record are also exposed to exchange rate risk. As of December 31, 2013, R\$14,948 million, or 41.1%, of our total consolidated indebtedness was denominated in foreign currency. At December 31, 2013, we protected 99.6% of our indebtedness affected by exchange rate variation against significant variations in exchange rates (primarily U.S. dollars and euros) by using foreign currency swaps, non-deliverable forwards and foreign currency investments. The aggregate amount of our hedge position, including our U.S. dollar and euro cash positions, was US\$6,436 million as of December 31, 2013. The maturity of our swap contracts is coupled to the maturity of debt that is hedged by these swap contracts. Our swap contracts and non-deliverable forwards cover our exchange rate risks until February 2016. As of December 31, 2013, the fair value of our swap contracts and non-deliverable forwards was a receivable for the company, in the amount of R\$1,507 million. As of December 31, 2013, the aggregate notional principal amount of our swap contracts and non-deliverable forwards was approximately US\$9,333 million, which mature in one to eight years.

In 2013, we experienced losses on foreign currency and monetary restatement due to the depreciation of the *real* against foreign currencies of R\$926 million, including results recorded on our exchange rate hedges (non-deliverable forwards, swaps and foreign currency investments). As we were almost 100% hedged, the potential additional losses on foreign currency and monetary restatement during 2014 that would result from a hypothetical, instantaneous 10.0% depreciation of the *real* against the U.S. dollar and the euro as of December 31, 2013 would be approximately R\$13 million after giving effect to our results under our exchange rate swaps, assuming that the amount and composition of our debt instruments were unchanged. The potential increase in our total consolidated debt obligations that would result from a hypothetical, instantaneous 10.0% depreciation of the *real* against the U.S. dollar and the euro as of December 31, 2013 would be approximately R\$53 million, considering the net impact of the increase in our debt obligations and the decrease in our swap position. For further information about our swap agreements, see note 3 to our consolidated financial statements.

Interest Rate Risk

We are exposed to interest rate risk because a significant portion of our indebtedness bears interest at floating rates. As of December 31, 2013, our total outstanding indebtedness was R\$36,383 million, of which R\$23,011 million, or 63.2%, bore interest at floating rates, including R\$19,167 million of *real*-denominated indebtedness that bore interest at rates based on the CDI rate, TJLP rate or IPCA rate, and R\$3,843 million of foreign currency-denominated indebtedness that bore interest at rates based on LIBOR. As of December 31, 2013, we had interest rate swap agreements under which 76.6% of our consolidated indebtedness exposed to LIBOR, which represents 10.6% of our total indebtedness, was converted into CDI rates, matching the interest rate index of our investments. As of December 31, 2013, we did not have any outstanding derivative agreements to limit our exposure to variations in the CDI rate, TJLP rate or IPCA rate.

We invest our excess liquidity (R\$3,931 million as of December 31, 2013) mainly in (1) certificates of deposit issued by financial institutions with AAA and AA ratings from international rating agencies, (2) in short-term instruments denominated in *reais* that generally pay interest at overnight interest rates based on the CDI rate which partially mitigates our exposure to Brazilian interest rate risk, and (3) in investment funds created by top Brazilian asset managers exclusively for us. The fund managers of the investment funds created for us are responsible for managing our funds, subject to the direction of our senior management and board of directors. Currently, these funds are comprised mainly of government bonds and other low-risk financial instruments linked to the CDI rate.

The potential additional interest expense during 2014 that would result from a hypothetical, instantaneous and unfavorable change of 100 basis points in the interest rates on January 1, 2014 would be approximately R\$199

Table of Contents

million after giving effect to our results under our interest rate swaps, considering the impact in our debt obligations, but excluding the additional interest income that we would receive on our financial investments. This sensitivity analysis is based on the assumption of an unfavorable 100 basis points movement of the interest rates applicable to each homogeneous category of financial liabilities and sustained over a period of one year. A homogeneous category is defined according to the currency in which financial assets and liabilities are denominated and assumes the same interest rate movement within each homogeneous category (*e.g.*, *reais*). As a result, our interest rate risk sensitivity model may overstate the impact of interest rate fluctuation for such financial instruments, as consistently unfavorable movements of all interest rates are unlikely.

Hedging Policy

We employ financial risk management strategies using cross-currency swaps, interest rate swaps, series swaps and non-deliverable forwards. Our financial risk management strategy is designed to protect us against devaluation of the *real* against foreign currencies and increases in foreign currency interest rates, according to our foreign-currency exposure in connection with our financings. We do not enter into derivatives transactions for speculative or any other purposes.

ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES

The depositary collects its fees for the delivery and surrender of ADSs directly from investors depositing shares or surrendering ADSs or from intermediaries acting for them. The depositary also collects fees for making distributions to investors by deducting those fees from the amounts distributed or by selling a portion of distributable property to pay the fees. The depositary may collect its annual fee for depositary services by deductions from cash distributions or by directly billing investors or by charging the book-entry system accounts of participants acting for them. The depositary may generally refuse to provide fee-attracting services until its fees for those services are paid.

Persons depositing or withdrawing shares must pay:

US\$5.00 (or less) per 100 ADSs (or portion of 100 ADSs) for the issuance of ADSs, including issuances resulting from a distribution of shares or rights or other property;

US\$5.00 (or less) per 100 ADSs (or portion of 100 ADSs) for the cancellation of ADSs for the purpose of withdrawal, including in the event of the termination of the deposit agreement;

US\$0.02 (or less) per ADS (or portion thereof) for any cash distribution;

US\$0.02 (or less) per ADS (or portion thereof) per calendar year for depositary services;

in the event of distributions of securities (other than our Class A preferred shares), a fee equivalent to the fee for the execution and delivery of ADRs referred to above, which would have been charged, as a result of the deposit of such securities (treating such securities as Class A Preferred Shares for the purposes of this fee);

registration or transfer fees for the transfer and registration of shares on our share register to or from the name of the depositary or its agent when you deposit or withdraw shares;

expenses of the depositary for (1) cable, telex and facsimile transmissions (when expressly provided in the deposit agreement), and (2) converting foreign currency to U.S. dollars;

Edgar Filing: OI S.A. - Form 20-F

taxes and other governmental charges the depositary or the custodian have to pay on any ADS or share underlying an ADS, for example, stock transfer taxes, stamp duty or withholding taxes, as necessary; and

any charges incurred by the depositary or its agents for servicing the deposited securities, as necessary.

Table of Contents

Subject to certain terms and conditions, the depositary has agreed to reimburse us for certain expenses it incurs that are related to establishment and maintenance expenses of the ADS program, including the standard out-of-pocket maintenance costs for the ADRs, which consist of the expenses of postage and envelopes for mailing annual and interim financial reports, printing and distributing dividend checks, electronic filing of U.S. Federal tax information, mailing required tax forms, stationery, postage, facsimile, and telephone calls. There are limits on the amount of expenses for which the depositary will reimburse us, but the amount of reimbursement available to us is not necessarily tied to the amount of fees the depositary collects from investors.

During the year ended December 31, 2013, we received US\$5.5 million in fees and reimbursements from the depositary of our ADSs.

ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES

Not applicable.

ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS

Not applicable.

ITEM 15. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Our chief executive officer, or CEO, and our chief financial officer, or CFO, are responsible for establishing and maintaining our disclosure controls and procedures. These controls and procedures were designed to ensure that information that we are required to disclose in the reports that we file under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the applicable rules and forms of the SEC, and that it is accumulated and communicated to our management, including our CEO and CFO, as appropriate to allow timely decisions regarding required disclosure. We performed an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures as of December 31, 2013 under the supervision of our CEO and our CFO. Based on our evaluation, our CEO and our CFO concluded that our disclosure controls and procedures were effective at a reasonable assurance level as of December 31, 2013.

Management's Annual Report on Internal Control over Financial Reporting and Report of Independent Registered Public Accounting Firm

Our management is responsible for establishing and maintaining adequate internal controls over financial reporting.

Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with applicable generally accepted accounting principles. Our internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with applicable generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors, and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of our assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of our CEO and our CFO, our management conducted an assessment of our internal control over financial reporting as of December 31, 2013 based on the criteria established in Internal Control Integrated Framework (1992) issued by COSO.

As a result of the assessment described above, our management concluded that as of December 31, 2013, we did maintain effective internal control over financial reporting based on the criteria established in Internal Control Integrated Framework (1992) issued by COSO.

Table of Contents

Our independent registered public accounting firm, KPMG Auditores Independentes, has issued an audit report on the effectiveness of our internal control over financial reporting. That report is included elsewhere in this annual report.

Changes in Internal Control over Financial Reporting

There were no changes in our internal controls over financial reporting that occurred during the year ended December 31, 2013 that materially affected or could materially affect our internal control over financial reporting.

ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT

Our fiscal council currently includes an audit committee financial expert within the meaning of this Item 16A. Our fiscal council has determined that Sidnei Nunes is our fiscal council financial expert. Mr. Nunes's biographical information is included in Item 6. Directors, Senior Management and Employees. Mr. Nunes is independent, as that term is defined in Rule 303A.02 of the New York Stock Exchange's Listed Company Manual.

ITEM 16B. CODE OF ETHICS

We have adopted a code of ethics that applies to members of our board of directors, fiscal council and board of executive officers, as well as to our other employees. On April 25, 2012, we amended and restated our code of ethics to:

prohibit violations of domestic or foreign anti-bribery or anti-corruption laws, such as the US Foreign Corrupt Practices Act, including the solicitation or offer of bribes to any governmental entity or public leader for the purpose of obtaining or retaining business for or with Oi or for the benefit of the adherent or third parties;

provide that managers may be jointly responsible for code of ethics violations of their subordinates if they fail to act in light of such violations;

require that commercial transactions between employees take place outside the company's premises;

increase from R\$100 to R\$200 the amount above which gifts must be immediately returned to its donor; and

require that the persons to which our code of ethics is applicable accept its contents and detail the procedures for acknowledging such acceptance.

A copy of our code of ethics may be found on our website at www.oi.com.br/ir. The information included on our website or that might be accessed through our website is not included in this annual report and is not incorporated into this annual report by reference.

ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Audit and Non-Audit Fees

The following table sets forth the fees billed to us by our independent registered public accounting firm, KPMG Auditores Independentes, during the fiscal years ended December 31, 2013 and 2012.

Table of Contents

	Year ended December 31,	
	2013	2012
	(in millions of reais)	
Audit fees (1)	R\$ 5.1	R\$ 4.0
Audit-related fees	1.1	
Tax fees		
All other fees		
Total fees	R\$ 6.2	R\$ 4.0

- (1) Audit fees consist of the aggregate fees billed by KPMG Auditores Independentes in connection with the audits of our annual financial statements, interim reviews of our quarterly financial information, issuance of comfort letters, review of financial statements and review of documents filed with the CVM and the SEC.

Pre-Approval Policies and Procedures

Our fiscal council and board of directors have approved an Audit and Non-Audit Services Pre-Approval Policy that sets forth the procedures and the conditions pursuant to which services proposed to be performed by our independent auditors may be pre-approved. This policy is designed to (1) provide both general pre-approval of certain types of services through the use of an annually established schedule setting forth the types of services that have already been pre-approved for a certain year and, with respect to services not included in an annual schedule, special pre-approval of services on a case-by-case basis by our fiscal council and our board of directors, and (2) assess compliance with the pre-approval policies and procedures. Our management periodically reports to our fiscal council the nature and scope of audit and non-audit services rendered by our independent auditors and is also required to report to our fiscal council any breach of this policy of which our management is aware.

ITEM 16D. EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES

We are relying on the general exemption from the listing standards relating to audit committees contained in Rule 10A-3(c)(3) under the Exchange Act for the following reasons:

we are a foreign private issuer that has a fiscal council, which is a board of auditors (or similar body) established and selected pursuant to and as expressly permitted under Brazilian law;

Brazilian law requires our fiscal council to be separate from our board of directors;

members of our fiscal council are not elected by our management, and none of our executive officers is a member of our fiscal council;

Brazilian law provides standards for the independence of our fiscal council from our management;

our fiscal council, in accordance with its charter, makes recommendations to our board of directors regarding the appointment, retention and oversight of the work of any registered public accounting firm engaged (including, the intermediation of disagreements between our management and our independent auditors regarding financial reporting) for the purpose of preparing or issuing an audit report or performing other audit, review or attest services for our company, as Brazilian law requires that our board of directors appoint, retain and oversee the work of our independent public accountants;

Edgar Filing: OI S.A. - Form 20-F

our fiscal council (1) has implemented procedures for receiving, retaining and addressing complaints regarding accounting, internal control and auditing matters, including the submission of confidential, anonymous complaints from employees regarding questionable accounting or auditing, and (2) has authority to engage independent counsel and other advisors as it determines necessary to carry out its duties; and

our company compensates our independent auditors and any outside advisors hired by our fiscal council and provides funding for ordinary administrative expenses incurred by the fiscal council in the course of its duties.

Table of Contents

We, however, do not believe that our reliance on this general exemption will materially adversely affect the ability of our fiscal council to act independently and to satisfy the other requirements of the listing standards relating to audit committees contained in Rule 10A-3 under the Exchange Act.

ITEM 16E. PURCHASES OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASERS

Not Applicable.

ITEM 16F. CHANGE IN REGISTRANT'S CERTIFYING ACCOUNTANT

Not Applicable.

ITEM 16G. CORPORATE GOVERNANCE

On November 4, 2003, the SEC approved the final corporate governance rules established by the NYSE. According to these rules, foreign private issuers that are listed on the NYSE, such as Oi, are subject to a more limited set of corporate governance requirements than those imposed on U.S. domestic issuers. As a foreign private issuer, Oi must comply with the following four requirements imposed by the NYSE:

Oi must satisfy the audit committee requirements of Rule 10A-3 under the Exchange Act;

Oi's Chief Executive Officer must promptly notify the NYSE in writing if any executive officer of Oi becomes aware of any material non-compliance with any of the applicable NYSE corporate governance rules;

Oi must provide a brief description of any significant ways in which Oi's corporate governance practices differ from those required to be followed by U.S. domestic issuers under the NYSE corporate governance rules; and

Oi must submit an executed written affirmation annually to the NYSE and an interim written affirmation to the NYSE each time a change occurs to Oi's board of directors or any committees of Oi's board of directors that are subject to section 303A, in each case in the form specified by the NYSE.

Significant Differences

The significant differences between Oi's corporate governance practices and the NYSE's corporate governance standards are mainly due to the differences between the U.S. and Brazilian legal systems. Oi must comply with the corporate governance standards set forth under the Brazilian Corporation Law, the rules of the CVM and the applicable rules of the BM&FBOVESPA, as well as those set forth in Oi's by-laws.

The significant differences between Oi's corporate governance practices and the NYSE's corporate governance standards are set forth below.

Independence of Directors and Independence Tests

In general, the NYSE corporate governance standards require listed companies to have a majority of independent directors and set forth the principals by which a listed company can determine whether a director is independent. However, under the NYSE corporate governance standards, a listed company (whether U.S. or foreign) of which more than 50% of the voting power is held by another company (a controlled company), need not comply with the following NYSE corporate governance standards:

a controlled company need not have a majority of independent directors;

Table of Contents

a controlled company need not have a nominating/corporate governance committee composed of independent directors with a charter that complies with the NYSE corporate governance rules; and

a controlled company need not have a compensation committee composed of independent directors with a charter that complies with the NYSE corporate governance rules.

Because a majority of the voting power of Oi's capital stock is directly controlled by TmarPart, Oi is a controlled company, and would therefore not be required to have a majority of independent directors if it were a U.S. domestic issuer.

Although Brazilian Corporation Law and Oi's by-laws establish rules in relation to certain qualification requirements of its directors, neither Brazilian Corporation Law nor Oi's by-laws require that Oi have a majority of independent directors nor require Oi's board of directors or management to test the independence of Oi's directors before such directors are appointed.

Executive Sessions

The NYSE corporate governance standards require non-management directors of a listed company to meet at regularly scheduled executive sessions without management.

According to the Brazilian Corporation Law, up to 1/3 of the members of Oi's board of directors can be elected to management positions. The remaining non-management directors are not expressly empowered to serve as a check on Oi's management, and there is no requirement that those directors meet regularly without management. Notwithstanding the foregoing, Oi's board of directors consists entirely of non-management directors; therefore Oi believes it would be in compliance with this NYSE corporate governance standard.

Nominating/Corporate Governance and Compensation Committees

The NYSE corporate governance standards require that a listed company have a nomination/corporate governance committee and a compensation committee, each composed entirely of independent directors and each with a written charter that addresses certain duties. However, as a controlled company, Oi would not be required to comply with these requirements if it were a U.S. domestic company.

Oi is not required under Brazilian law to have, and accordingly does not have, a nominating/corporate governance committee. Oi believes that, pursuant to its by-laws, the role of a nominating committee is generally performed by Oi's board of directors and the role of the corporate governance committee is generally performed by either its board of directors or its senior management.

Oi is not required under Brazilian law to have, and accordingly does not have, a compensation committee of its board of directors. Under Brazilian Corporation Law, Oi's shareholders establish the aggregate compensation of its directors and executive officers, including benefits and allowances, at a general shareholder's meeting based on the recommendation of Oi's board of directors.

Audit Committee and Audit Committee Additional Requirements

The NYSE corporate governance standards require that a listed company have an audit committee with a written charter that addresses certain specified duties and that is composed of at least three members, all of whom satisfy the independence requirements of Rule 10A-3 under the Exchange Act and section 303A.02 of the NYSE's Listed Company Manual.

As a foreign private issuer that qualifies for the general exemption from the listing standards relating to audit committees set forth in section 10A-3(c)(3) under the Exchange Act, Oi is not subject to the independence requirements of the NYSE corporate governance standards. See Item 16D. Exemptions from the Listing Standards for Audit Committees.

Table of Contents

Shareholder Approval of Equity Compensation Plans

The NYSE corporate governance standards require that shareholders of a listed company must be given the opportunity to vote on all equity compensation plans and material revisions thereto, subject to certain exceptions.

Under Brazilian Corporation Law, shareholder pre-approval is required for the adoption and revision of any equity compensation plans, but this decision may be delegated to the board of directors.

Corporate Governance Guidelines

The NYSE corporate governance standards require that a listed company must adopt and disclose corporate governance guidelines that address certain minimum specified standards which include: (1) director qualification standards; (2) director responsibilities; (3) director access to management and independent advisors; (4) director compensation; (5) director orientation and continuing education; (6) management succession; and (7) annual performance evaluation of the board of directors.

Oi must comply with certain corporate governance standards set forth under Brazilian Corporation Law, CVM rules and the applicable rules of the BM&FBOVESPA for Level 1 companies. See Item 9. The Offer and Listing Regulation of Brazilian Securities Markets and Item 9. The Offer and Listing Trading on the BM&FBOVESPA BM&FBOVESPA Corporate Governance Standards. The Level 1 rules do not require Oi to adopt and disclose corporate governance guidelines covering the matters set forth in the NYSE's corporate governance standards. However, certain provisions of Brazilian Corporation Law that are applicable to Oi address certain aspects of director qualifications standards and director responsibilities.

Code of Business Conduct and Ethics

The NYSE corporate governance standards require that a listed company must adopt and disclose a code of business conduct and ethics for directors, officers and employees and promptly disclose any waivers of the code for directors or officers. Each code of business conduct and ethics should address the following items: conflicts of interest; corporate opportunities; confidentiality; fair dealing; protection and proper use of company assets; compliance with laws, rules and regulations (including insider trading laws); and encouraging the reporting of any illegal or unethical behavior.

Although the adoption of a code of ethics is not required by Brazilian law, Oi has adopted a code of ethics applicable to its directors, officers and employees, which addresses each of the items listed above. See Item 16B. Code of Ethics.

MANAGEMENT'S REPORT ON INTERNAL CONTROLS OVER FINANCIAL REPORTING

Management's Annual Report on Internal Control over Financial Reporting and Report of Independent Registered Public Accounting Firm

Our management is responsible for establishing and maintaining adequate internal controls over financial reporting.

Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with applicable generally accepted accounting principles. Our internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with applicable generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors, and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of our assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of our CEO and CFO, our management conducted an assessment of our internal control over financial reporting as of December 31, 2013 based on the criteria established in Internal Control Integrated Framework (1992) issued by COSO.

As a result of the assessment described above, our management concluded that as of December 31, 2013, we did maintain effective internal control over financial reporting based on the criteria established in Internal Control Integrated Framework (1992) issued by COSO.

Our independent registered public accounting firm, KPMG Auditores Independentes, has issued an audit report on the effectiveness of our internal control over financial reporting. That report is included in this annual report on Form 20-F.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Report of Independent Registered Public Accounting Firm on Internal Control over Financial Reporting

To the Board of Directors and Shareholders of

Oi S.A.

Rio de Janeiro RJ

We have audited Oi S.A.'s (the Company) internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control – Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Oi S.A.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with the accounting practices adopted in Brazil (BR GAAP), along with a reconciliation of net income and equity from BR GAAP to accounting principles generally accepted in the United States of America (US GAAP). A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with BR GAAP along with a reconciliation of net income and equity from BR GAAP to US GAAP and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Oi S.A. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on the criteria established in Internal Control – Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Oi S.A. and subsidiaries as of December 31, 2013 and 2012, and the related

consolidated statements of income, comprehensive income, changes in shareholders' equity, cash flows and value added for each of the years in the two-year period ended December 31, 2013, and our report dated March 10, 2014, expressed an unqualified opinion on those consolidated financial statements.

Report of Independent Registered Public Accounting Firm on Consolidated Financial Statements

To the Board of Directors and Shareholders of

Oi S.A.

Rio de Janeiro RJ

We have audited the accompanying consolidated balance sheets of Oi S.A. and subsidiaries (the Company) as of December 31, 2013 and 2012, and the related consolidated statements of income, comprehensive income, changes in shareholders' equity, cash flows and value added for each of the years in the two-year period ended December 31, 2013. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Oi S.A. and subsidiaries as of December 31, 2013 and 2012, and the results of their operations, their cash flows and their value added for each of the years in the two-year period ended December 31, 2013, in conformity with the accounting practices adopted in Brazil.

The accounting practices adopted in Brazil vary, in certain significant respects, from accounting principles generally accepted in the United States of America. Information relating to the nature and effect of such differences is presented in Note 31 to the consolidated financial statements.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control - Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 10, 2014, expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM ON CONSOLIDATED FINANCIAL STATEMENTS

To the Board of Directors and Shareholders of

Oi S.A. (previously known as Brasil Telecom S.A.)

Rio de Janeiro RJ

We have audited the accompanying consolidated statements of income, changes in equity, cash flows and value added for the year ended December 31, 2011. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the results of their operations and their cash flows for the year ended December 31, 2011, in conformity with accounting practices adopted in Brazil.

As mentioned in note 1 to the consolidated financial statements, the shareholders of the Company, Tele Norte Leste Participações S.A. (former parent company of Telemar Norte Leste S.A.), Telemar Norte Leste S.A. (former parent company of Coari Participações S.A.) and Coari Participações S.A. (former parent company of the Company) approved at the extraordinary shareholders' meetings held on February 27, 2012 the corporate reorganization that consisted of the partial split-off of Telemar Norte Leste S.A. with the merger of the split-off portion by Coari Participações S.A. followed by the merger of Telemar Norte Leste S.A. shares by Coari Participações S.A. and the mergers of Coari Participações S.A. and Tele Norte Leste Participações S.A. with and into the Company and whose corporate name was changed to Oi S.A.

Accounting practices adopted in Brazil vary in certain significant respects from accounting principles generally accepted in the United States of America. Information relating to the nature and effect of such differences is presented in Note 31 to the consolidated financial statements.

Oi S.A. and Subsidiaries

Notes to the Financial Statements

for the Years Ended December 31, 2013, 2012 and 2011

(Amounts in thousands of Brazilian reais, unless otherwise stated)

1. GENERAL INFORMATION

Oi S.A. (Company or Oi), is a Switched Fixed-line Telephony Services (STFC) concessionaire, operating since July 1998 in Region II of the General Concession Plan (PGO), which covers the Brazilian states of Acre, Rondônia, Mato Grosso, Mato Grosso do Sul, Tocantins, Goiás, Paraná, Santa Catarina and Rio Grande do Sul, and the Federal District, in the provision of STFC as a local and intraregional long-distance carrier. Since January 2004, the Company also provides domestic and international long-distance services in all Regions and local services outside Region II started to be provided in January 2005. These services are provided under concessions granted by Agência Nacional de Telecomunicações - ANATEL (National Telecommunications Agency), the regulator of the Brazilian telecommunications industry.

The Company is headquartered in Brazil, in the city of Rio de Janeiro, at Rua do Lavradio, 71 2º andar.

The Company also holds: (i) through its wholly-owned subsidiary Telemar Norte Leste S.A. (TMAR) a concession to provide fixed telephone services in Region I and nationwide International Long-distance services; (ii) through its indirect subsidiary TNL PCS S.A. (TNL PCS) a license to provide mobile telephony services in Regions I and III; (iii) through its indirect subsidiary Oi Móvel S.A. (Oi Móvel) a license to provide mobile telephony services in Region II.

The local and nationwide STFC long-distance concession agreements entered into by the Company and its subsidiary TMAR with the ANATEL are effective until December 31, 2025. These concession agreements provide for reviews on a five-year basis and in general have a higher degree of intervention in the management of the business than the licenses to provide private services, and also include several consumer protection provisions, as perceived by the regulator.

The terms of the licensing agreements are disclosed in Note 16.

The Company is registered with the Brazilian Securities and Exchange Commission (CVM) and the U.S. Securities and Exchange Commission (SEC). Its shares are traded on the São Paulo Mercantile and Stock Exchange (BM&FBOVESPA) and its American Depositary Receipts (ADRs) are traded on the New York Stock Exchange (NYSE).

The Company s financial statements were analyzed and approved by the Board of Directors, and authorized for issuance at the meeting held on March 10, 2014.

The interests held in Company subsidiaries, less treasury shares, are as follows:

Amendment of Company Bylaws

The Company's Extraordinary Shareholders Meeting held on November 7, 2012 approved the amendment to the Company's Bylaws to adapt them to the new rules BM&FBOVESPA's (São Paulo Stock Exchange) Level 1 of Corporate Governance Listing Regulations to allow the Company to enter said corporate governance level.

Corporate Reorganizations in 2012**Corporate Reorganization of the Oi Group undertaken in February 2012**

The shareholders of the Oi companies (Tele Norte Leste Participações S.A. (TNL), TMAR, Coari Participações S.A. (Coari) and Oi) approved at the shareholders meetings held on February 27 2012 the corporate reorganization that

consisted of the partial split-off of TMAR with the merger of the split-off portion by Coari followed by the merger of TMAR shares by Coari and the mergers of Coari and TNL with and into Oi, the company that now concentrates all the shareholdings in Oi companies and is the only Oi company listed in a stock exchange, and whose corporate name was changed to Oi S.A. at the time of the same shareholders' meetings.

As a result, 395,585,453 new common shares and 798,480,405 new preferred shares of Oi S.A. (former Brasil Telecom S.A.) were issued, and its subscribed, fully paid-in capital increased to R\$6,816,468, represented by 599,008,629 common shares and 1,198,077,775 preferred shares, all registered and without par value.

The simplified organization chart below shows the corporate structure before and after the corporate reorganization:

F-17

Table of Contents

Oi S.A. and Subsidiaries

Notes to the Financial Statements

for the Years Ended December 31, 2013, 2012 and 2011

(Amounts in thousands of Brazilian reais, unless otherwise stated)

The purpose of the corporate reorganization was to definitely simplify the corporate structure and the corporate governance of the Oi companies, resulting in the creation of value for the shareholders by, but not limited to:

simplify the corporate structure, which previously included three publicly-held companies with seven different classes of publicly traded shares, by consolidating our shareholder bases in one public company with two classes of shares that will be traded in Brazil and abroad;

reduce operational, administrative and financial costs following the consolidation of the general management of the Oi companies, the simplification of their capital structure, and the improvement of their ability to attract investments and access the capital markets;

align the interests of the shareholders of TNL, TMAR and Oi;

enhance the liquidity of the shares issued by Oi; and

eliminate the costs of separate listings of the shares of TNL, TMAR and Oi, as well as costs arising from separately complying with the public disclosure requirements applicable to TNL, TMAR and Oi.

Table of Contents**Oi S.A. and Subsidiaries****Notes to the Financial Statements****for the Years Ended December 31, 2013, 2012 and 2011****(Amounts in thousands of Brazilian reais, unless otherwise stated)**

Oi's Extraordinary Shareholders Meeting (ESM) held on February 27, 2012 also approved the Oi redeemable bonus preferred shares proposal attributed exclusively to BrT shareholders prior to the merger, totaling R\$1.5 billion. The base date of the bonuses payable to shareholders whose shares are traded on the BM&FBOVESPA and shareholders whose shares are traded on the NYSE was March 29, 2012 (deadline to exercise withdrawal rights). Accordingly, beginning March 30, 2012, these shares were traded ex-bonus on the stock exchange. On April 9, 2012, the redemption amount of the redeemable shares was paid proportionally to the each shareholder's interest in share capital social and on the same date the reimbursement amount was paid to any withdrawing TNL and TMAR shareholders, which totaled R\$2.0 billion. The amount of the redeemed shares above was deducted from the calculation of the approved share exchange ratios.

The table below shows the exchange ratios resulting from the mergers of TNL and Coari with and into Oi:

Original share/Replacement share	Exchange ratio
TNLP3 / BRTO3	2.3122
TNLP4 / BRTO4	2.1428
TNLP4 / BRTO3	1.8581
TMAR3 / BRTO3	5.1149
TMAR5 and TMAR6/BRTO4	4.4537
TMAR5 and TMAR6/BRTO3	3.8620

The common and preferred shares of Oi S.A. started to be traded, under their new tick code OIBR3 and OIBR4, respectively, on April 9, 2012.

In addition to the relevant corporate approvals, the corporate reorganization was approved by the ANATEL on October 27, 2011. Additionally, the shares to be issued by Oi S.A. in this context were registered with the SEC, and we obtained the consent of Oi companies' creditors to implement the corporate reorganization, where applicable.

The impacts of all stages of the corporate reorganization were prospectively accounted for based on the book net assets of each company. The resulting increase in its consolidated financial statements amounts to R\$4,146,035.

As a result of the corporate reorganization, the balance sheet and profit and loss balances of the Company and its consolidated financial statements have been affected as from the date the transaction was approved, on February 27, 2012, and with respect to profit or loss as from February 28, 2012, when it started to include the balances and transactions arising from the operations of TMAR and its subsidiaries.

Corporate Reorganization of the iG Group undertaken in October 2012

On October 24, 2012, our Board of Directors approved the corporate reorganization of the iG Group's subsidiaries by undertaking the following steps: (i) BrTI capital increase, by the Company, amounting to R\$51,828, paid in by transferring our stake in NTPA (99.99%), iG Participações (iG Part) (0.16%), and iG Brasil (13.64%); (ii) BrTI capital reduction, amounting to R\$48,807, by transferring the investment held in BrT Multimídia to the Company, and (iii) mergers of iG Part

Other mergers undertaken in 2012

During October, November, and December 2012, several mergers were undertaken involving Oi Group holdings and dormant companies to streamline the corporate structure. The equity of the merged companies was valued at their carrying amounts.

- i. Merger of Vant with and into BrT Multimídia on October 30, 2012;
- ii. merger of TNL.Net, TNL Trading, TNL Exchange, and JINT with and into BrTI on November 1, 2012;
- iii. merger of Tomboa, Tete, and Carpi with and into TMAR on November 30, 2012;
- iv. merger of Blackpool with and into Oi Internet on December 1, 2012; and
- v. merger of TNCP (wholly-owned subsidiary) with and into TMAR on December 31, 2012.

2013 Corporate Reorganization

On January 31, 2013, as a sequence to the Corporate Reorganization, the Board of Directors authorized the Company to increase the capital of its wholly-owned subsidiary TMAR through the transfer of investments, other assets, and intercompany debentures.

The purpose of this reorganization is to streamline the corporate structure, reduce intragroup debt, and obtain operating synergy gains.

GlobeNet

As disclosed in the material fact notice published on July 15, 2013, the Company entered into an agreement with BTG Pactual YS Empreendimentos e Participações S.A. under which it agrees to transfer all its stake in subsidiary BrT CS, subject to certain, contractually provided for adjustments. BrT CS, wholly-owned subsidiary of the GlobeNet group, controls part of the Oi Group's fixed telephony/data through the provision of integrated data services with fiber optics

connection points in the United States, Bermuda, Venezuela, and Brazil. It is part of the scope of the underwater optical fiber cable system transfer transaction and the supply of capacity by GlobeNet to the Company and its subsidiaries.

This transaction was subject to the compliance of certain conditions precedent laid down in the agreement, including the necessary approval of the regulators and competent protection agencies in the different jurisdictions where GlobeNet operates, pursuant to the relevant legal terms and conditions.

As disclosed in the material fact notice published on December 23, 2013, the Company announced the completion of the transaction, where the Company transfers its entire equity interests in GlobeNet to BTG Pactual YS Empreendimentos e Participações S.A. The financial settlement of the transaction, amounting to R\$1,779 million, was made in January 2014.

Table of Contents

Notes to the Financial Statements

for the Years Ended December 31, 2013, 2012 and 2011

(Amounts in thousands of Brazilian reais, unless otherwise stated)

The gain on the sale of GlobeNet, amounting to R\$ 1,497 million was recognized in other operating income, less related transaction costs.

2. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies detailed below have been consistently applied in all fiscal years presented in this Consolidated financial statements, and have been consistently applied both by the Company and its subsidiaries.

(a) Reporting basis

The financial statements have been prepared based on the historic cost, except for certain financial instruments measured at their fair values, as described in the accounting policies in (b) below.

The preparation of financial statements requires the use of certain critical accounting estimates and the exercise of judgment by the Company's management in the application of the Group's accounting policies. Those areas that involve a higher degree of judgment or complexity or areas where assumptions and estimates are significant are disclosed in note (c) below.

Consolidated Financial Statements

The Company's consolidated financial statements have been prepared in accordance with accounting practices adopted in Brazil (Brazilian GAAP), which comply with those prescribed by Brazilian corporate law, the technical pronouncements, interpretations and orientations issued by the Accounting Pronouncements Committee (Comitê de Pronunciamentos Contábeis - CPC) and specific standards established by the Brazilian Securities Commission (CVM).

(b) Adoption of new accounting policies

In presenting in the comparative financial statements for the year ended December 31, 2012 we made adjustments to retrospectively present the effects of adopting CPC 33 (R1) and CPC 19 (R2), effective beginning January 1, 2013. In accordance with paragraph 40 of CPC 26(R2), the Company is not presenting a third balance sheet, as at the beginning of the prior period because the retrospective application of these standards would not have a material impact on the balance sheet as at January 1, 2012.

The adjustments made to the presentation of the financial statements for the year ended December 31, 2012 as shown in the tables below:

F-22

Cash flows from financing activities	974,449		974,449

(i) Employee benefits

CPC 33 (R1) excludes the possibility of using the corridor method to recognize the actuarial gains and losses of the defined benefit plans.

Beginning on the adoption of the new pronouncement, actuarial gains and losses are fully recognized in equity (other comprehensive income). These amounts do not go through income or loss and remain in other comprehensive income.

(ii) Joint ventures

CPC 19 (R2) eliminates the possibility of opting for the proportionate consolidation of joint ventures. Beginning on the adoption of the new pronouncement, joint ventures are valued exclusively by the equity method of accounting. The Company holds interests in the joint ventures Paggo Soluções e Meios de Pagamento S.A. and Companhia AIX de Participações.

(c) Significant accounting policies

Consolidation criteria of subsidiaries by the full consolidation method

Full consolidation was prepared in accordance with accounting practices adopted in Brazil, which comply with those prescribed by Brazilian corporate law, the technical pronouncements, interpretations and orientations issued by the Accounting Pronouncements Committee (Comité de Pronunciamentos Contábeis - CPC) and specific standards established by the Brazilian Securities

Commission (CVM) and incorporates the financial statements of the Company's direct and indirect subsidiaries. The main consolidation procedures are as follows:

the balances of assets, liabilities, income and expenses, according to their accounting nature, are added up;

intragroup assets and liabilities and material income and expenses are eliminated;

investments and related interests in the equity of subsidiaries are eliminated;

non-controlling interest in equity and profit or loss for the year are separately stated; and

exclusive investment funds (Note 9) are consolidated.

Foreign currency translation

Functional and presentation currency

The Company and its subsidiaries operate mainly as telecommunications industry operators in Brazil, respectively, and engage in activities typical of this industry (see Note 1), and the Brazilian real (R\$) is the currency used in their transactions.

To define its functional currency, management considered the currency that influences:

the sales prices of its goods and services;

the costs of services and sales;

the cash flows arising from receipts from customers and payments to suppliers;

interest, investments and financing.

Consequently, the functional currency of the Company and its subsidiaries is the Brazilian real (R\$), the same currency used in the presentation of these financial statements.

Transactions and balances

Foreign currency-denominated transactions are translated into the functional currency using the exchange rate prevailing on the transaction date. The foreign exchange differences resulting on translation is recognized in the income statement.

Group companies

The Company holds investments in companies with registered head office abroad, none of which uses a functional currency other than the Brazilian real (R\$).

Table of Contents

Oi S.A. and Subsidiaries

Notes to the Financial Statements

for the Years Ended December 31, 2013, 2012 and 2011

(Amounts in thousands of Brazilian reais, unless otherwise stated)

The Company has a subsidiary in Venezuela whose economy is considered a hyperinflationary economy.

The Company's management analyzed the effect of hyperinflation of the consolidated financial statements and concluded that the impact of inflation adjustment for the period is immaterial as this subsidiary's equity (base for the hyperinflationary effects) as at December 31, 2013, is R\$20,739 (2012 equity deficiency of R\$2,563).

Non-monetary items indexed to a foreign currency

The Company and its subsidiaries do not have non-monetary items indexed to a foreign currency (other than the functional and presentation currency) as foreign subsidiaries are an extension of the operations of their Brazilian parent.

Segment information

Reporting on operating segments is consistent with the internal report provided to the chief operating decision maker of the Company, its management. All operating results are regularly reviewed by the entity's chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance.

Segment results that are reported to the management include items directly attributable to the segment and those that can be allocated on a reasonable basis.

Capital expenditures by segment are the total costs incurred during the period to acquire property, plant and equipment and intangible assets other than goodwill.

Business combinations

The Company elected to adopt the exemption from the remeasurement of business combinations undertaken before the date of transition to CPCs January 1, 2009 pursuant to CPC 37. The excess amounts paid, therefore, are measured and classified using their original bases. The Company depreciates amounts recognized based on the appreciation of the acquired assets, according to the useful lives of the underlying assets, and tests such assets to determine any asset impairment losses when there is evidence of impairment; on the other hand, the Company tests for impairment amounts based on future earnings (goodwill) on an annual basis.

Cash and cash equivalents

Comprise cash and imprest cash fund, banks, and highly liquid short-term investments (usually maturing within less than three months), immediately convertible into a known cash amount, and subject to an immaterial risk of change in value, which are stated at fair value at the end of the reporting period and which do not exceed their market value, and whose classification is determined as shown below.

Cash investments

F-27

Table of Contents

Oi S.A. and Subsidiaries

Notes to the Financial Statements

for the Years Ended December 31, 2013, 2012 and 2011

(Amounts in thousands of Brazilian reais, unless otherwise stated)

Classified according to their purpose as: (i) held for trading securities; (ii) held to maturity; and (iii) available for sale.

Trading securities are measured at fair value and their effects are recognized in profit or loss. Held-to-maturity investments are measured at cost plus income earned, less the allowance for adjustment to probable recoverable amount, when applicable, and its effects are recognized in profit or loss. Available-for-sale investments are measured at fair value and their effects are recognized in valuation adjustments to equity, when applicable.

Accounts receivable

Receivables from telecommunications services provide are stated at the tariff or service amount on the date they are provided and do not differ from their fair values.

These receivables also include receivables from services provided and not billed by the end of the reporting period and receivables related to handset, SIM cards, and accessories. The allowance for doubtful accounts estimate is recognized in an amount considered sufficient to cover possible losses on the realization of these receivables. The allowance for doubtful accounts estimate is prepared based on a history of default.

Inventories

Inventories are segregated and classified as described below:

Maintenance material inventories classified in current assets in accordance with the period in which they will be used are stated at average cost, not exceeding replacement cost.

Inventories for expansion, classified in property, plant and equipment, are stated at average cost and are used to expand the telephone plant.

Inventories of merchandise for resale classified in current assets are stated at average cost and are basically represented by handsets and accessories. Adjustments to net realizable value are recognized for handsets and accessories purchased for amounts that exceed their sales prices. Impairment losses are recognized for obsolete inventories.

Available-for-sale financial asset

Available-for-sale financial assets as non-derivative financial assets that are designated as available for sale or that are not classified as (a) loans and receivables, (b) held-to-maturity investments, or (c) financial assets at fair value through profit or loss. The Company initially records available-for-sale financial assets at their fair value plus any cost of cost directly attributable to the transaction. After their initial recognition, they are measured at fair value and any changes, other than impairment losses and foreign currency differences on translating available-for-sale debt instruments, are recognized in other comprehensive income and presented as part of equity. When an investment is derecognized, the gains or losses accumulated in other comprehensive income.

Table of Contents

Oi S.A. and Subsidiaries

Notes to the Financial Statements

for the Years Ended December 31, 2013, 2012 and 2011

(Amounts in thousands of Brazilian reais, unless otherwise stated)

Investments

Financial information on associated companies and joint ventures is recognized by the equity method. Other investments are carried at cost, less an allowance for write-down to realizable value, when applicable.

Property, plant and equipment

Property, plant and equipment are stated at cost of purchase or construction, less accumulated depreciation. Historical costs include expenses directly attributable to the acquisition of assets. They also include certain costs on facilities, when it is probable that the future economic benefits related to such costs will flow into the Company, and asset dismantlement, removal and restoration costs. The borrowings and financing costs directly attributable to the purchase, construction or production of a qualifying asset are capitalized in the initial cost of such asset. Qualifying assets are those that necessarily require a significant time to be ready for use.

Subsequent costs are added to the carrying amount as appropriate, when, and only when, these assets generate future economic benefits and can be reliably measured. The residual balance of the replaced asset is written off. Maintenance and repair costs are recorded in profit or loss for the period when they are incurred, and they are capitalized when, and only when, they clearly represent an increase in installed capacity or the useful lives of assets.

Assets under finance leases are recorded in property, plant and equipment at the lower of fair value or the present value of the minimum lease payments, from the initial date of the agreement.

Depreciation is calculated on a straight-line basis, based on the estimated useful lives of the assets, which are annually reviewed by the Company.

Intangible assets

Separately acquired intangible assets with finite useful lives are carried at cost less accumulated amortization and impairment losses. Amortization is recognized on a straight-line basis over their estimated useful lives. The estimated useful life and amortization method are reviewed at the end of each annual reporting period, and the effect of any changes in estimates is accounted for on a prospective basis. Intangible assets with indefinite useful lives are carried at cost less accumulated impairment losses.

Software licenses purchased are capitalized based on the costs incurred to purchase the software and make it ready for use.

Software maintenance costs are recognized as expenses when incurred. The development costs that are directly attributable to the project and the tests of identifiable and exclusive software, controlled by the Company, are recognized as intangible assets when the following criteria are met:

Completing the software so that it will be available for use is technically feasible.

Management has the intention to complete the software and use or sell it.

It can be demonstrated that the software will generate probable future economic benefits.

There are adequate technical, financial and other resources available to complete the development and to use or sell the software.

The expenditure attributable to the software during its development can be measure reliably. Directly attributable costs that are capitalized as part of software include the costs on the employees allocated to software development and an adequate portion of the applicable direct expenditure. Costs also include borrowings costs incurred during the software development period.

Other development expenditure that does not meet these criteria is recognized as expenses, when incurred. Development costs previously recognized as expenses are not recognized as assets in a subsequent period.

Impairment of long-lived assets

Assets are tested for impairment annually or whenever events or changes in circumstances indicate that the carrying amount of an asset or group of assets might be impaired. Long-lived assets may be identified as assets that have indefinite useful lives and assets subject to depreciation and amortization (property, plant and equipment and intangible assets). Impairment losses, if any, are recognized in the amount by which the carrying amount of an asset exceeds its recoverable value. Recoverable value is the higher of fair value less cost to sell and the value in use. In order to be tested for impairment, assets are grouped into the smallest identifiable group for which there are cash-generating units (CGUs), and projections are made based on discounted cash flows, supported by expectations on the Company's operations.

The CGUs are the Company's operating segments as they are the smallest separable cash-generating units.

Net Present Value (NPV) projections for the CGUs are prepared taking into consideration the following assumptions:

Entity-specific inputs: evidence of obsolescence or damage, discontinuation plans, performance reports, etc.;

External sources of inputs: market prices of the assets, technologic environment, market environment, economic environment, regulatory environment, legal environment, interest rates, return rates on investments, market value of Company shares, etc.

Said projections support the recovery of assets with indefinite useful lives. Additionally, Company tests did not show any evidences of impairment that would result in the realization of projections for assets with finite useful lives.

Notes to the Financial Statements

for the Years Ended December 31, 2013, 2012 and 2011

(Amounts in thousands of Brazilian reais, unless otherwise stated)

Discount to present value

The Company values its financial assets and financial liabilities to identify instances of applicability of the discount to present value. Leased assets are discounted to present value.

Generally, when applicable, the discount rate used is the average return rate on investments for financial assets or interest charged on Company borrowings for financial liabilities. The balancing item is the asset or liability that has originated the financial instrument, when applicable, and the deemed borrowing costs are allocated to the Company's profits over the transaction term.

The Company believes that none of the assets and liabilities as at December 31, 2013 and 2012 is subject to the discount to present value, in view of the following factors: (i) their nature; (ii) short-term realization of certain balances and transactions; (iii) absence of monetary assets and monetary liabilities with observable or unobservable embedded interest. Financial instruments measured at the amortized costs are adjusted for inflation using relevant contractual indices.

Impairment of financial assets

The Company assesses at the yearend whether there is objective evidence that financial assets or a group of financial assets is impaired. A financial asset or group of financial assets is considered impaired when there is objective evidence, as a result of one or more events that occurred after the initial recognition of the asset, that its recoverable amount has been reduced and when the estimated future cash flows have been impacted.

In the case of equity investments classified as available for sale, a significant or prolonged decline in their fair value below cost is also objective evidence of impairment.

Borrowings and financing

Carried at amortized cost, plus inflation adjustment or foreign exchange differences and interest incurred through the end of the reporting period.

Transaction costs incurred are measured at amortized cost and recognized in liabilities, as a reduction to the balance of borrowings and financing, and are expensed over the relevant agreement term.

Derivative financial instruments

Derivative financial instruments are contracted to mitigate exposure to market risks arising from changes in exchange rates on foreign currency-denominated debts and short-term investments held abroad, and also from changes in the floating rates of debt.

Derivatives are initially recognized at cost at the inception of the derivative contract and are subsequently measured at fair value. Changes in the fair value of any of these derivatives are recorded directly in the income statement.

(Amounts in thousands of Brazilian reais, unless otherwise stated)

Financial liabilities and equity instruments

Debt or equity instruments issued the Company and its subsidiaries are classified as financial liabilities or equity instruments, according to the contractual substance of the transaction.

Beginning February 27, 2012, the Company started to adopt hedge accounting for its derivative financial instruments, which had been adopted by subsidiary TMAR since January 1, 2011. The purpose of this practice is to reduce the volatility of the gains or losses recognized due to changes in the fair values of these derivative financial instruments. Derivative financial instruments that qualify for hedge accounting are submitted to periodic prospective and retrospective effectiveness tests using the dollar offset method.

Derivative instruments contracted and designated for hedge accounting are formally identified through initial designation documentation prepared in accordance with the requirements of CPC 38. Derivative financial instruments classified as cash flows hedges were designated for hedge accounting.

The effective portion, as defined in CPC 38, is recognized in an equity line item called Other comprehensive income , net of taxes, and is reclassified to financial income (expenses) using the effective rate. The ineffective portion, measured after the quarterly effectiveness tests, is recognized in financial income (expenses) in the same period it occurs.

Changes in the fair values of derivative financial instruments that are not designated for purposes of hedge accounting are accounted as financial income or expenses in the income statement for the period they occur.

The hedge relationship expires and the designation is removed when:

- (i) The derivative contract is exercised, terminated or settled, or if the Company or its subsidiary TMAR voluntarily removes the designation, according to the criteria set out in CPC 38. If the hedged item continues to exist, the balances accumulated in other comprehensive income related to the changes in the fair value of the derivative are allocated to profit or loss for the period in which the hedged interest expenses and foreign exchange fluctuations are allocated.
- (ii) The debt is prepaid or extinguished. In this case, the balance accumulated in other comprehensive income is immediately allocated to financial income or expenses in profit or loss for the period their designation is

terminated.

The required information on derivative financial instruments and the effects recognized by the Company and its subsidiary TMAR for the year ended December 31, 2013 are described in Note 3.

Provisions

The amount recognized as provision is the best estimate of the disbursement required to settle the present obligation at the end of the reporting period, based on the opinion of the management and its in-house and external legal counsel, and the amounts are recognized based on the cost of the expected outcome of ongoing lawsuits.

Table of Contents

Oi S.A. and Subsidiaries

Notes to the Financial Statements

for the Years Ended December 31, 2013, 2012 and 2011

(Amounts in thousands of Brazilian reais, unless otherwise stated)

The increase in the obligation as a result of the passage of time is recognized as financial expenses.

Employee benefits

Pension plans: private pension plans and other postretirement benefits sponsored by the Company and its subsidiaries for the benefit of their employees are managed by two foundations. Contributions are determined based on actuarial calculations, when applicable, and charged to profit or loss on the accrual basis.

The Company and its subsidiaries have defined benefit and defined contribution plans.

In the defined contribution plan, the sponsor makes fixed contributions to a fund managed by a separate entity. The contributions are recognized as employee benefit expenses as incurred. The sponsor does not have the legal or constructive obligation of making additional contributions, in the event the fund lacks sufficient assets to pay all employees the benefits related to the services provided in the current year and prior years.

The defined benefit is annually calculated by independent actuaries, who use the projected unit credit method. The present value of the defined benefit is determined by discounting the estimated future cash outflows, using the projected inflation rate plus long-term interest. The obligation recognized in the balance sheet as regards the defined benefit pension plans presenting a deficit, corresponds to the present value of the benefits defined at the balance sheet date, less the fair value of the plan's assets.

The actuarial gains and losses resulting from the changes in the actuarial valuations of the pension plans, whose actuarial obligations or actuarial assets are recorded by the Company, are fully recognized in other comprehensive income, in equity (Note 24).

The asset recognized in balance sheet corresponds to the present value of available economic benefits, consisting of refunds or reductions in future contributions to the plan.

Employee profit sharing: the accrual includes the employee profit sharing plan is accounted for on the accrual basis and involves all eligible employees, proportionately to the period of time worked in the year, according to the Plan's rules. The amount, which is paid by April of the year subsequent to the year profit sharing is accrued, is determined based on the target program established with the employees' unions, under a specific collective bargaining agreement.

Revenue recognition

Revenues correspond basically to the amount of the payments received or receivable from sales of services in the regular course of the Company's and its subsidiaries' activities.

Revenue is recognized when it can be reliably measured, it is probable that future economic benefits will be transferred to the Company, the transaction costs incurred can be measured, the

Table of Contents

Oi S.A. and Subsidiaries

Notes to the Financial Statements

for the Years Ended December 31, 2013, 2012 and 2011

(Amounts in thousands of Brazilian reais, unless otherwise stated)

risks and rewards have been substantially transferred to the buyer, and certain specific criteria of each of the Company's activities have been met.

Service revenue is recognized when services are provided. Local and long distance calls are charged based on time measurement according to the legislation in effect. The services charged based on monthly fixed amounts are calculated and recorded on a straight-line basis. Prepaid services are recognized as unearned revenues and recognized in revenue as services are used by customers.

Revenue from sales of handsets and accessories is recognized when these items are delivered and accepted by the customers. Discounts on services provided and sales of cell phones and accessories are taken into consideration in the recognition of the related revenue. Revenues involving transactions with multiple elements are identified in relation to each one of their components and the recognition criteria are applied on an individual basis. Revenue is not recognized when there is significant uncertainty as to its realization.

Revenue from sales of payphone cards Public Use Telephony (TUP) is recognized when the credits are effectively consumed by the customers.

Customer loyalty program (Oi Pontos)

The subsidiaries Oi Móvel and TNL PCS implemented a customer loyalty program (Oi Pontos), under which mobile telephony customers accumulate points related to the amounts paid for mobile telephony, fixed telephony, internet and pay TV services, which can be exchanged for mobile telephony service packages, handset discounts, events available at Oi experiences and/or transferred to the Multiplus Fidelidade Program (partner of said subsidiaries) to be exchanged for several other awards of this program, such as air tickets, fuel in gas stations, etc.

The Company accounts for the points awarded under the program as a separately identifiable component of the sales transaction in which they are granted. The fair value of the consideration received or receivable in respect of the initial sale is allocated between the award credits and the other components of the sale. The consideration allocated to the points is measured by reference to their fair value, i.e., the amount for which the award credits could be sold separately. This amount is deferred and the related revenue is recognized when, and only when, the points are redeemed or transferred to partner programs. Revenue recognition is based on the number of points that have been redeemed in exchange for awards relative to the total number expected to be redeemed. This program began its effective operations in the first quarter of 2011 and its balance is recognized in liabilities, in line item Unearned revenues .

Expense recognition

Expenses are recognized on the accrual basis, considering their relation with revenue realization. Prepaid expenses attributable to future years are deferred over the related periods.

Financial income and expenses

F-34

Table of Contents

Oi S.A. and Subsidiaries

Notes to the Financial Statements

for the Years Ended December 31, 2013, 2012 and 2011

(Amounts in thousands of Brazilian reais, unless otherwise stated)

Financial income is recognized on the accrual basis and comprises interest on receivables settled after due date, gains on short-term investments and gains on derivative instruments. Financial expenses represent interest effectively incurred and other charges on borrowings, financing, derivative contracts, and other financial transactions.

Current and deferred income tax and social contribution on profit

Income tax and social contribution on profit are recorded on the accrual basis. Said taxes attributed to temporary differences and tax loss carryforwards are recorded in assets or liabilities, as applicable, only under the assumption of future realization or payment. The Company prepares technical studies that consider the future generation of taxable income, according to management expectations, considering the continuity of the companies as going concerns. The Company writes down the carrying amount of deferred tax assets when it is not longer probable that sufficient taxable income will be available to allow the utilization of the whole or part of the deferred tax assets.

Any write-down to deferred tax assets is reversed when it is probable that sufficient taxable income will be available. The technical studies are updated annually, approved by the Board of Directors and reviewed by the Supervisory Board, and the tax credits are adjusted based on the results of these reviews. Deferred tax assets and liabilities are measured using the tax rates applicable for the period in which the liability is expected to be settled or the asset is expected to be realized, based on the tax rates set forth in the tax law prevailing at the end of each reporting period, or when new legislation has been substantially approved. The measurement of deferred tax assets and liabilities reflects the tax consequences that would follow from the manner in which the Company expects, at the end of each reporting period, to recover or settle the carrying amount of these assets and liabilities.

Government grants and government assistance

Government grants are initially recognized as deferred revenue at fair value when there is reasonable assurance that they will be received and that the Company will comply with the conditions attaching to them. Government grants received as compensation for Company's expenses incurred are recognized as income on a systematic basis in the same periods when such expenses are recognized, and grants received as compensation for the cost on an asset are recognized as income on a systematic basis over the useful life of the asset.

Earnings per share

Basic earnings per share are calculated using profit for the period attributable to the owners of the Company and noncontrolling interests and the weighted average number of common and preferred shares outstanding in the period. Diluted earnings per share are calculated using said weighted average number of outstanding shares adjusted by potentially dilutive convertible instruments in the reporting periods, pursuant to CPC 41.

Statements of value added

The Company prepared the individual and consolidated statements of value added (DVA) as required by CPC 09 Statements of Value Added, which are presented as an integral part of the

F-35

Table of Contents

Oi S.A. and Subsidiaries

Notes to the Financial Statements

for the Years Ended December 31, 2013, 2012 and 2011

(Amounts in thousands of Brazilian reais, unless otherwise stated)

financial statements in accordance with the accounting practices adopted in Brazil applicable to publicly-traded companies.

Statements of cash flows

The statement of cash flows is prepared in accordance with CPC03 (R2), under the indirect method. The Company classifies in line item Cash and cash equivalents the balances amounts immediately convertible into cash and highly-liquid investments (usually with maturities of less than three months) subject to an immaterial risk of change in value.

Cash flows are classified in the statements of cash flows, depending of their nature, as (i) operating activities; (ii) investing activities; and (iii) financing activities. Cash flows arising from operating activities basically comprise trade receivables, trade payables, personnel expenses, financial charges, and losses on lawsuits. Cash flows arising from investing activities basically comprise the acquisition and disposal of investments, escrow deposits and withdrawals, and cash payments and cash receipts from the purchase and sale of property, plant and equipment, intangibles and other long-term assets. Cash flows arising from financing activities basically comprise cash payments and cash proceeds related to borrowings and financing, loans, derivatives, and dividends and interest on capital.

(d) Critical estimates and accounting judgments

In preparing the financial statements, the Company's management uses estimates and assumptions based on historical experience and other factors, including expected future events, which are considered reasonable and relevant. The use of estimates and assumptions frequently requires judgments related to matters that are uncertain with respect to the outcomes of transactions and the amount of assets and liabilities. Actual results of operations and the financial position may differ from these estimates. The estimates that represent a significant risk of causing material adjustments to the carrying amounts of assets and liabilities are as follows:

Revenue recognition and trade receivables

The Company's revenue recognition policy is significant as it is a material component of operating results. Pricing undertaken by management, collection ability, and the right to receive certain network usage revenue are based on judgment related to the nature of the tariff collected for the services provided, the price of certain products, and the right to collect this revenue. If changes in conditions cause management to conclude that such criteria are not met in certain operations, the amount of trade receivables might be affected. In addition, the Company depends on guidelines to measure certain revenue set by the ANATEL (Brazilian telecommunications industry regulator).

Allowance for doubtful accounts

The allowance for doubtful accounts is set to recognize probable losses on receivables, as described in Note 2, taking into account the actions taken to restrict the provision of services to and collect default customers.

F-36

Table of Contents

Oi S.A. and Subsidiaries

Notes to the Financial Statements

for the Years Ended December 31, 2013, 2012 and 2011

(Amounts in thousands of Brazilian reais, unless otherwise stated)

The Company's management includes government entities, corporate customers, and other providers of telecommunications services in the base to calculate the allowance. There are cases of agreements with certain customers to collect past-due receivables, including agreements that allow customers to settle their debts in installments. The actual amounts not received may be different from the allowance recognized, and additional accruals might be required.

Depreciation and amortization of assets with finite useful lives

Property, plant and equipment items and intangible assets with finite useful lives are depreciated and amortized, respectively, on a straight-line basis, over the useful life of the related asset. The depreciation and amortization rates of the most significant assets are shown in Notes 15 and 16, respectively.

The useful lives of certain assets may vary as they are used in the fixed-line or mobile telephony segments. The Company reviews the useful lives of assets on annual basis.

Impairment of long-lived assets

The Company tests property, plant and equipment items and intangible assets for impairment either in light of decisions to discontinue activities where such assets are used or when there are evidences that the future operating revenue will not be sufficient to assure their realization.

Assets with finite useful lives are tested for impairment whenever events or changes in circumstances indicate that the asset might be impaired. The Company tests assets with indefinite useful lives (goodwill) for impairment annually in accordance with the accounting policy described in note 2 (b).

The recoverable amounts of assets are determined by comparing the calculations of their value in use and their sales prices. These calculations require the use of judgments and assumptions. The determination of fair values and discounted future operating cash flows requires that the Company makes certain assumptions and estimates with respect to projected cash inflows and cash outflows related to future revenue, costs and expenses. These assumptions and estimates may be influenced by different external and internal factors, such as economic trends, industry trends and interest rates, changes in business strategies, and changes in the type of services and products sold by the Company to the market. The use of different assumptions can significantly change our financial statements.

Provisions

The Company recognizes provisions for losses in labor, tax and civil lawsuits, as administrative proceedings, as presented in Note 22. The recognition of a provision for contingent liabilities is based on the assessment of the risk of loss made for each proceeding, which includes assessing available evidences recent decisions and statistical assumptions, and reflects a reasonable estimate as assessed by management, the General Counsel, and the outside legal counsel. It is possible that the assumptions used to estimate the provision for contingent liabilities change, which can, therefore, result in changes in future provisions for contingent liabilities.

Table of Contents**Oi S.A. and Subsidiaries****Notes to the Financial Statements****for the Years Ended December 31, 2013, 2012 and 2011****(Amounts in thousands of Brazilian reais, unless otherwise stated)****Derivative instruments**

Derivative financial instruments are recognized at fair value based on future cash flow estimates associated to each instrument contracted. The estimates presented may not necessarily be indicative of the amounts that could be obtained in the current market. The use of different assumptions to measure the fair value could have a material effect on the amounts obtained and not necessarily be indicative of the cash amounts that the Company would receive or to settle such transactions.

Deferred income tax and social contribution

The Company recognizes and settles taxes on income based on the results of operations determined in accordance with the Brazilian corporate law, taking into consideration the provisions of the tax law, which are materially different from the amounts calculated for CPC purposes. Pursuant to CPC 32, the Company recognizes deferred tax assets and liabilities based on the differences between the carrying amounts and the taxable bases of the assets and liabilities.

The Company regularly tests deferred tax assets for impairment and recognizes an allowance for impairment losses when it is probable that these assets may not be realized, based on the history of taxable income, the projection of future taxable income, and the time estimated for the reversal of existing temporary differences. These calculations require the use of estimates and assumptions. The use of different estimates and assumptions could result in the recognition of an allowance for impairment losses for the entire or a significant portion of the deferred tax assets.

Employee benefits

The actuarial valuation is based on assumptions and estimates related to interest rates, return on investments, inflation rates for future periods, mortality indices, and an employment level projection related the pension fund benefit liabilities. The accuracy of these assumptions and estimates will determine the creation of sufficient reserves for the costs of accumulated pensions and healthcare plans, and the amount to be disbursed annually on pension benefits. These assumptions and estimates are subject to significant fluctuations due to different internal and external factors, such as economic trends, social indicators, and our capacity to create new jobs and retain our employees. All assumptions are reviewed at the end of the reporting period. If these assumptions and estimates are not accurate, there may be the need to revise the reserves for pension benefits, which could significantly impact Company results.

3. FINANCIAL INSTRUMENTS AND RISK ANALYSIS**3.1. Overview**

F-39

Table of Contents**Oi S.A. and Subsidiaries****Notes to the Financial Statements****for the Years Ended December 31, 2013, 2012 and 2011****(Amounts in thousands of Brazilian reais, unless otherwise stated)**

Tax refinancing program (iv)	Amortized cost	1,085,099	1,085,099
------------------------------	----------------	-----------	-----------

(i) The balances of trade receivables and trade payables have near terms and, therefore, they are not adjusted to fair value.

(ii) Corresponds to a 10% stake in PT Portugal Telecom.

Management considers that (i) TMAR's 10% stake in PT's capital and (ii) its two (2) representatives appointed on April 6, 2011 to PT's Board of Directors do not grant it a significant influence on the financial, operating, and strategic policies of PT. Accordingly, this investment was recognized as an available-for-sale financial asset, as required by CPC 38 and CPC 39.

In the year ended December 31, 2013, TMAR recognized an appreciation of PT shares' fair value and the impact was R\$8,387, or R\$5,535 net of taxes.

(iii) A significant portion of this balance consists of loans and financing granted by the BNDES, export credit agencies, and other related parties, which correspond to exclusive markets and, therefore, their fair values is similar to their carrying amounts.

(iv) There is no market for licenses and concessions payable and the tax refinancing program, and, therefore, they are not adjusted to fair value.

3.2. Fair value of financial instruments

The Company and its subsidiaries have measured their financial assets and financial liabilities at their market or actual realizable values (fair value) using available market inputs and valuation techniques appropriate for each situation. The interpretation of market inputs for the selection of such techniques requires considerable judgment and the preparation of estimates to obtain an amount considered appropriate for each situation. Accordingly, the estimates presented may not necessarily be indicative of the amounts that could be obtained in an active market. The use of different assumptions for the calculation of the fair value may have a material impact on the amounts obtained.

(a) Derivative instruments

The method used for calculation of the fair value of derivative financial instruments was the future cash flows associated to each instrument contracted, discounted at market rates prevailing at December 31, 2013.

(b) Non-derivative financial instruments measured at fair value

The fair value of securities traded in active markets is equivalent to the amount of the last closing quotation available at the end of the reporting period, multiplied by the number of outstanding securities.

F-40

Table of Contents**Oi S.A. and Subsidiaries****Notes to the Financial Statements****for the Years Ended December 31, 2013, 2012 and 2011****(Amounts in thousands of Brazilian reais, unless otherwise stated)**

For the remaining contracts, the Company carries out an analysis comparing the current contractual terms and conditions with the terms and conditions effective for the contract when they were originated. When terms and conditions are dissimilar, fair value is calculated by discounting future cash flows at the market rates prevailing at the end of the period, and when similar, fair value is similar to the carrying amount on the reporting date.

(c) Fair value measurement hierarchy

CPC 46 defines fair value as the price for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties, in an arm's length transaction on measurement date. The standard clarifies that the fair value must be based on the assumptions that market participants would consider in pricing an asset or a liability, and establishes a hierarchy that prioritizes the information used to build such assumptions. The fair value measurement hierarchy attaches more importance to available market inputs (i.e., observable data) and a less weight to inputs based on data without transparency (i.e., unobservable data). Additionally, the standard requires that an entity consider all nonperformance risk aspects, including the entity's credit, when measuring the fair value of a liability.

CPC 40 establishes a three-level hierarchy to measure and disclose fair value. The classification of an instrument in the fair value measurement hierarchy is based on the lowest level of input significant for its measurement. We present below a description of the three-level hierarchy:

Level 1 inputs consist of (unadjusted) prices quoted in active markets for identical assets or liabilities to which the entity has access on measurement date;

Level 2 inputs are different from prices quoted in active markets used in level 1 and consist of directly or indirectly observable inputs for the asset or liability. Level 2 inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical assets or liabilities in markets that are not active; or inputs that are observable for the asset or liability or that can support the observed market inputs by correlation or otherwise for substantially the entire asset or liability.

Level 3 inputs used to measure an asset or liability are not based on observable market variables. These inputs represent management's best estimates and are generally measured using pricing models, discounted cash flows, or similar methodologies that require significant judgment or estimate.

There were no transfers between levels and/or allocations to Level 3 between December 31, 2013 and December 31, 2012.

	Fair value measurement hierarchy	Fair value 2013	Fair value 2012
Assets			
Cash equivalents	Level 2	2,118,646	4,061,344
Cash investments	Level 2	591,639	2,489,599
Derivative instruments	Level 2	2,073,179	989,099
Available-for-sale financial asset	Level 1	914,216	905,829
Liabilities			

F-41

Table of Contents**Oi S.A. and Subsidiaries****Notes to the Financial Statements****for the Years Ended December 31, 2013, 2012 and 2011****(Amounts in thousands of Brazilian reais, unless otherwise stated)**

Derivative instruments	Level 2	566,651	514,297
------------------------	---------	---------	---------

3.3. Measurement of financial assets and financial liabilities at amortized cost

We concluded that the discount to present value of financial assets and financial liabilities under the amortized cost method does not apply, based on the valuation made for this purpose, for the following main reasons:

Accounts receivables: near-term maturity of bills.

Trade payables, dividends and interests on capital: all obligations are due to be settled in the short term.

Borrowings and financing: all transactions are adjusted for inflation based on contractual indices.

Licenses and concessions payable and the tax refinancing program: all obligations arising from licenses are adjusted for inflation based on contractual indices.

3.4. Financial risk management

The Company's and its subsidiaries' activities expose them to several financial risks, such as: market risk (including currency fluctuation risk, interest rate risk on fair value, interest rate risk on cash flows, and price risk), credit risk, and liquidity risk. The Company and its subsidiaries use derivative financial instruments to protect them against certain exposures to these risks.

Risk management is carried out by the Company's treasury officer, in accordance with the policies approved by management.

The Hedging and Cash Investments Policies, approved by the Board of Directors, document the management of exposures to market risk factors generated by the financial transactions of the Oi Group companies.

Under the Hedging Policy, market risks are identified based on the features of financial transactions contracted and to be contracted during the year. Several scenarios are then simulated for each of the risk factors using statistical models, used as basis to measure the impacts the on Group's financial income (expenses). Based on this analysis, the Executive Committee annually agrees with the Board of Directors the Risk Guideline to be followed in each financial

year. The Risk Guideline is equivalent to the worst expected impact of financial income (expenses) on the Group's net income, with 95% of level of confidence. To ensure a proper risk management, according to the Risk Guideline, the treasury can contract hedging instruments, including derivative transactions such as swaps and currency forwards. The Company and its subsidiaries do not use derivative financial instruments for other purposes.

With the approval of the Policies, a Financial Risk Management Committee that meets monthly was created, currently consisting of the CEO, the CFO, the Executive Planning Officer, the Development

and New Business Management Officer, the Tax Officer, the General Controller, and the Treasury Officer, and the Internal Audit Officer as observer.

According to their nature, financial instruments may involve known or unknown risks, and it is important to assess to the best judgment the potential of these risks.

3.4.1. Market Risk

(a) Foreign exchange risk

Financial assets

Foreign currency-denominated cash equivalents and cash investments are basically maintained in securities issued by financial institutions abroad similar to Bank Certificates of Deposit trade in Brazil (time deposits).

The risk associated to these assets arises from the possible exchange rate fluctuations that may reduce the balance of these assets when translated into Brazilian reais. The Company's and its subsidiaries' assets subject to this risk represent approximately 13.25% (6.71% at December 31, 2012) of our total cash and cash equivalents and cash investments.

Additionally, subsidiary TMAR has an available-for-sale financial asset related to the investment in Portugal Telecom's shares.

Financial liabilities

The Company and its subsidiaries have foreign currency-denominated or foreign currency-indexed borrowings and financing. The risk associated with these liabilities is related to the possibility of fluctuations in foreign exchange rates that could increase the balance of such liabilities. The Company's and subsidiaries' borrowings and financing exposed to this risk represent approximately 41.1% (39.1% at December 31, 2012) of total liabilities from borrowings and financing, less the currency hedging transactions contracted. In order to minimize this type of risk, we enter into foreign exchange hedges with financial institutions. Out of the consolidated foreign currency-denominated debt, 99.6% (97% at December 31, 2012) is protected by exchange swaps, currency forwards, and cash investments in foreign currency. The unrealized gains or losses on hedging transactions are measured at fair value, as described in (a) above.

These financial assets and liabilities are presented in the balance sheet as follows:

	2013		2012	
	Carrying amount	Fair value	Carrying amount	Fair value
Financial assets				
Cash equivalents	369,292	369,292	449,791	449,791
Cash investments	30,334	30,334	13,246	13,246
Available-for-sale financial asset	914,216	914,216	905,829	905,829
Derivative instruments (Note 19)	1,954,915	1,954,915	780,622	780,622

F-43

Table of Contents**Oi S.A. and Subsidiaries****Notes to the Financial Statements****for the Years Ended December 31, 2013, 2012 and 2011****(Amounts in thousands of Brazilian reais, unless otherwise stated)****Financial liabilities**

Borrowings and financing	14,566,437	14,566,437	12,848,763	12,848,763
Derivative instruments (Note 19)	369,464	369,464	369,166	369,166

Derivative instruments are summarized as follows:

	Derivatives designated for hedge accounting		
	Maturity	Fair value	
		Amounts (payable)/receivable	
		2013	2012
Cross currency swap contracts US\$/R\$	1.5 - 8.3	865,664	469,935
Cross currency swap contracts US\$/Fixed rate	6.8	420,215	74,484

	Derivatives not designated for hedge accounting		
	Maturity	Fair value	
		Amounts (payable)/receivable	
		2013	2012
Cross currency swap contracts US\$/R\$	0.8 - 2.1	21,649	(4,254)
Cross currency swap contracts R\$/US\$	2.1	(31,969)	(18,571)
US\$/R\$ NDFs	< 1 year	177,140	(106,416)
EUR/R\$ NDFs	< 1 year	132,752	(3,721)

The main foreign currency hedge transactions contracted with financial institutions to minimize the foreign exchange risk are as follows:

Cross currency swap contracts (plain vanilla)

US\$/R\$: Refer to foreign exchange swaps to protect its US dollar-denominated debt payments. Under these contracts, the asset position is in US dollars plus a fixed interest rate or in US LIBOR plus a fixed interest rate, and the liability position a percentage of interbank deposit rate (CDI) or a fixed rate in real. The main risk of loss in the asset position of these instruments is the US dollar exchange rate fluctuation; however, such losses would be fully offset by the US dollar-denominated debt maturities.

R\$/US\$: Refer to foreign exchange swaps to reverse swap contracts. Under these contracts, the asset position is in US dollar plus a fixed rate and the liability position is a percentage of CDI. The main risk of loss in the liability position

of these instruments is the US dollar exchange rate fluctuation; however, such possible losses would be fully offset by the maturities of the reversed US dollar-denominated swaps.

Non-deliverable forwards (NDFs)

US\$/R\$: Refer to future US dollar sales transactions using NDFs to protect against a depreciation of the Brazilian real in relation to the US dollar. The main strategy for these contracts is to set the foreign exchange rate for the contract period at a fixed amount, thus mitigating the risk of adverse fluctuations on US dollar-denominated debt. In order to extend the hedging period, we can roll over

Table of Contents**Oi S.A. and Subsidiaries****Notes to the Financial Statements****for the Years Ended December 31, 2013, 2012 and 2011****(Amounts in thousands of Brazilian reais, unless otherwise stated)**

these instruments by selling US dollars for the period equivalent to the short-term NDF in the portfolio and simultaneously purchase US dollars for longer positions.

Euro/R\$: Refer to future Euro dollar sales transactions using NDFs to protect against a depreciation of the Brazilian real in relation to the US dollar. The main strategy for these contracts is to set the foreign exchange rate for the contract period at a fixed amount, thus mitigating the risk of adverse fluctuations on Euro-denominated debt. In order to extend the hedging period, we can roll over these instruments by selling Euro for the period equivalent to the short-term NDF in the portfolio and simultaneously purchase Euro for longer positions.

As at December 31, 2013 and 2012, the amounts shown below were recorded as gain or loss on derivatives (see note 7):

	2013	2012	2011
Gain/(loss) on currency swaps	676,490	458,774	(2,434)
Currency forwards	478,152	467,041	(46,817)
Total	1,154,642	925,815	(49,251)

We recognized the changes in other comprehensive income the changes below, referring to foreign currency hedges designated for hedge accounting treatment:

Table of changes in hedge accounting effects in other comprehensive income

Balance in 2011	
Corporate reorganization:	
Gain on designated hedges	119,907
Deferred taxes on hedge accounting	(40,768)
Share of subsidiary's hedge accounting	15,307
Deferred taxes on share of subsidiary's hedge accounting	(5,204)
Loss on designated hedges	47,872
Transfer on ineffective portion to profit or loss	1,055
Amortization of hedges to profit or loss at effective rate	9,990

Deferred taxes on hedge accounting	(20,032)
Balance in 2012	128,127
Loss on designated hedges	(126,511)
Transfer on ineffective portion to profit or loss	(16,611)
Amortization of hedges to profit or loss at effective rate	36,072
Deferred taxes on hedge accounting	36,397
Balance in 2013	57,474

(a.1) Foreign exchange risk sensitivity analysis

As at December 31, 2013, management estimated the depreciation scenarios of the Brazilian real in relation to other currencies at yearend. The rates used for the probable scenario were the rates prevailing at the end of December 2013. The probable rates were then depreciated by 25% and 50% and used as benchmark for the possible and remote scenarios, respectively.

Description	2013	Rate Depreciation
-------------	------	----------------------

F-45

Table of Contents**Oi S.A. and Subsidiaries****Notes to the Financial Statements****for the Years Ended December 31, 2013, 2012 and 2011****(Amounts in thousands of Brazilian reais, unless otherwise stated)**

<i>Probable scenario</i>		
US dollar	2.3426	0%
Euro	3.2265	0%
<i>Possible scenario</i>		
US dollar	2.9283	25%
Euro	4.0331	25%
<i>Remote scenario</i>		
US dollar	3.5139	50%
Euro	4.8398	50%

As at December 31, 2013, management estimated the outflow for the payment of interest and principal of its debt pegged to exchange rates based on the interest rates prevailing at the end of this annual reporting period and the exchange rates above.

The impacts of foreign exchange exposure, in the sensitivity scenarios estimated by the Company, are shown in the table below:

Description	Individual risk	2013		
		<i>Probable scenario</i>	<i>Possible scenario</i>	<i>Remote scenario</i>
US dollar debt	Dollar appreciation	12,522,529	15,653,161	18,783,794
Derivative financial (net position - US\$)	Dollar depreciation	(12,262,210)	(15,327,763)	(18,393,315)
US dollar cash	Dollar depreciation	(399,223)	(499,029)	(598,835)

Euro cash	Euro depreciation	(403)	(504)	(605)
Total pegged to exchange rate		(128,841)	(161,053)	(193,262)

(b) Interest rate risk

Financial assets

Cash equivalents and cash investments in local currency are substantially maintained in financial investment funds exclusively managed for the Company and its subsidiaries, and investments in private securities issued by prime financial institutions.

The interest rate risk linked to these assets arises from the possibility of decreases in these rates and consequent decrease in the return on these assets.

Financial liabilities

The Company and its subsidiaries have borrowings and financing subject to floating interest rates, based on the Long-term Interest Rate (TJLP) or the CDI, in the case of real-denominated debt, and on the LIBOR, in the case of U.S. dollar-denominated debt.

Table of Contents**Oi S.A. and Subsidiaries****Notes to the Financial Statements****for the Years Ended December 31, 2013, 2012 and 2011****(Amounts in thousands of Brazilian reais, unless otherwise stated)**

As at December 31, 2013, approximately 63.2% (65.4% at December 31, 2012) of the incurred debt, less adjustment for derivative transactions, was subject to floating interest rates. After the derivative transactions, approximately 76.0% (70.3% at December 31, 2012) of the consolidated debt was subject to floating interest rates. The most material exposure of Company's and its subsidiaries' debt after the hedging transactions is to CDI. Therefore, a continued increase in this interest rate would have an adverse impact on future interest payments and hedging adjustments. However, as the Company's and its subsidiaries' cash is invested mainly in securities pegged to the CDI fluctuation, the net exposure to CDI of current liabilities does not constitute a material risk for the Company and its subsidiaries.

We continuously monitor these market rates to assess the possible contracting of instruments to hedge against the risk of fluctuation of these rates.

These assets and liabilities are presented in the balance sheet as follows:

	2013		2012	
	Carrying amount	Market value	Carrying amount	Market value
Financial assets				
Cash equivalents	1,749,354	1,749,354	3,611,553	3,611,553
Cash investments	561,305	561,305	2,476,353	2,476,353
Derivative instruments	118,264	118,264	208,477	208,477
Financial liabilities				
Borrowings and financing	19,115,168	19,115,168	18,470,697	18,470,697
Derivative instruments	197,187	197,187	145,132	145,132

The amounts of contracted derivatives to hedge against floating interest rates on outstanding debt are summarized below:

	Derivatives designated for hedge accounting		
	Maturity	Fair value	
		Amounts (payable)/receivable	
		2013	2012
Fixed rate/DI swaps	6.8	(53,625)	41,189
US\$ LIBOR/US\$ fixed rate swaps	1.5	(4,066)	(6,779)

Derivatives not designated for hedge accounting			
Fair value			
Amounts (payable)/receivable			
	Maturity	2013	2012
CDI + spread/CDI swaps			388
Fixed rate/DI swaps	6.8		57,446
US\$ LIBOR/US\$ fixed rate swaps	2.1 - 8.1	(133,417)	(138,353)
US\$ fixed rate/US\$ LIBOR swaps	8.1	112,185	109,454

F-47

Table of Contents**Oi S.A. and Subsidiaries****Notes to the Financial Statements****for the Years Ended December 31, 2013, 2012 and 2011****(Amounts in thousands of Brazilian reais, unless otherwise stated)**

The main hedging transactions contracted with financial institutions to minimize the interest rate risk are as follows:

Interest rate swaps

US\$ LIBOR/US\$ fixed rate: Refer to interest rate swaps to protect debt payments pegged to US dollar floating rates from exchange fluctuation. Under these contracts, the asset position in US dollar LIBOR and the liability position is a fixed rate. The risk of loss in the asset position of these instruments is, therefore, the fluctuation of the US dollar LIBOR; however, such possible losses would be fully offset by maturities of US dollar-denominated debt pegged to LIBOR.

US\$ fixed rate/US\$ LIBOR: Refers to the interest rate swap transaction that changes US dollar-denominated debt payments from fixed rate to floating rate. Under this contract, the asset position is a US dollar fixed rate and a LIBOR liability position to reduce the cost of the backing debt, as part of the Company's onerous liability management strategy.

CDI + spread/CDI: Refer to interest rate swaps to protect payments of Brazilian-real denominated debentures pegged to CDI plus spread. Under such contract, the asset position is in CDI plus spread and a liability position is a percentage of CDI.

R\$ fixed rate/CDI: Refer to interest rate swaps to convert a foreign exchange swap liability position at a fixed rate into R\$ to a liability subject to a DI percentage. This transaction is intended to swap the exchange peg of a certain dollar-denominated debt to a floating DI position, cancelling the debt's current fixed rate position.

As at December 31, 2013 and 2012, the amounts shown below were recorded as gain or loss on derivative instruments: (see Note 7)

	2013	2012
Gain/(loss) on interest rate swap	3,878	16,206
Total	3,878	16,206

We recognized in other comprehensive income the changes below, referring to interest rate hedges designated for hedge accounting treatment:

**Table of changes in hedge accounting effects in other comprehensive
income**

Amortization of hedges to profit or loss at effective rate	(24,075)
Deferred taxes on hedge accounting	35,381
Balance in 2013	(56,624)

(b.1) Interest rate fluctuation risk sensitivity analysis

Management believes that the most significant risk related to interest rate fluctuations arises from its liabilities pegged to the TJLP, the USD LIBOR, and mainly the CDI. This risk is associated to an increase in those rates.

As at December 31, 2013, management estimated the fluctuation scenarios of the rates DI, TJLP, and USD LIBOR. The rates used for the probable scenario were the rates prevailing at the end of the reporting period. These rates have been stressed by 25 and 50 percent, and used as benchmark for the possible and remote scenarios. Note that the TJLP has remained stable since July 2009 at 6% per year. This rate dropped to 5.5% in July 2012 and to 5.0% per year in December de 2012, and remained at 5.0% per year until December 2013.

2013								
Probable scenario			Possible scenario			Remote scenario		
CDI	TJLP	6M USD LIBOR	CDI	TJLP	6M USD LIBOR	CDI	TJLP	6M USD LIBOR
9.77%	5.00%	0.3480%	12.21%	6.25%	0.4350%	14.66%	7.50%	0.5220%

As at December 31, 2013, management estimated the future outflows for the payment of interest and principal of its debt pegged to CDI, TJLP, and US\$ LIBOR based on the interest rates above. The outflows for repayment of Oi Group related party debt were not considered.

Such sensitivity analysis considers payment outflows in future dates. Thus, the aggregate of the amounts for each scenario is not equivalent to the fair values, or even the present values of these liabilities. The fair values of these liabilities, should the Company's credit risk remain unchanged, would not be impacted in the event of fluctuations in interest rates, as the interest rates used to estimate future cash outflows would be the same rates that discount such flows to present value.

The impacts of exposure to interest rates, in the sensitivity scenarios estimated by the Company, are shown in the table below:

Transaction	2013			
	Individual risk	<i>Probable scenario</i>	<i>Possible scenario</i>	<i>Remote scenario</i>
CDI pegged debt	CDI increase	3,686,311	4,446,480	5,201,680
Derivative financial (net position - CDI)	CDI increase	3,866,455	4,745,402	5,615,088
TJLP pegged debts	TJLP increase	1,490,033	1,699,028	1,951,555
US LIBOR pegged debts	US LIBOR increase	201,243	205,857	210,469

F-49

Table of Contents**Oi S.A. and Subsidiaries****Notes to the Financial Statements****for the Years Ended December 31, 2013, 2012 and 2011****(Amounts in thousands of Brazilian reais, unless otherwise stated)**

Derivative financial (net position - LIBOR)	US LIBOR increase	(121,897)	(125,652)	(129,408)
Total pegged to interest rates		9,122,145	10,971,115	12,849,384

3.4.2. Credit risk

The concentration of credit risk associated to trade receivables is immaterial due to the diversification of the portfolio. Doubtful receivables are adequately covered by an allowance for doubtful accounts.

Transactions with financial institutions (cash investments and borrowings and financing) are made with prime entities, avoiding the concentration risk. The credit risk of financial investments is assessed by setting caps for investment in the counterparts, taking into consideration the ratings released by the main international risk rating agencies for each one of such counterparts. As at December 31, 2013, approximately 98.6% of the consolidated cash investments were made with counterparties with a AAA, AA or sovereign risk rating.

3.4.3. Liquidity risk

The liquidity risk also arises from the possibility of the Company being unable to discharge its liabilities on maturity dates and obtain cash due to market liquidity restrictions.

Management uses its resources mainly to fund capital expenditures incurred on the expansion and upgrading of the network, invest in new businesses, pay dividends, and refinance its debt.

Conditions are met with internally generated cash flows, short- and long-term debt, and third party financing. These sources of funds, coupled with the Company's solid financial position, will continue to ensure the compliance with established capital requirements.

The Oi Group has two revolving credit facilities that increases short-term liquidity and increases the cash management efficiency, and is consistent with its capital cost reduction strategic focus. The revolving credit facilities were contracted in November 2011 and December 2012 with syndicates consisting of several global banks.

The following are the contractual maturities of the financial liabilities, including estimated interest payments, where applicable:

	Less than a year	One to three year	Four to five years	Over five years	Total
At December 31, 2013					
Borrowings and financing, and derivative instruments (i)	3,750,326	16,423,096	4,358,303	8,370,961	32,902,686
Debentures (i)	2,825,095	5,363,004	4,554,704	2,015,733	14,758,536
Trade payables (ii)	1,694,200
