TEEKAY TANKERS LTD.

(Exact name of Registrant as specified in its charter)

Republic of The Marshall Islands

(Jurisdiction of incorporation or organization)

4th Floor, Belvedere Building, 69 Pitts Bay Road, Hamilton, HM 08, Bermuda

Telephone: (441) 298-2530

(Address and telephone number of principal executive offices)

Mark Cave

4th Floor, Belvedere Building, 69 Pitts Bay Road, Hamilton, HM 08, Bermuda

Telephone: (441) 298-2530

Fax: (441) 292-3931

(Name, Telephone, E-mail and/or Facsimile number and Address of Company Contact Person)

Securities registered, or to be registered, pursuant to Section 12(b) of the Act.

Title of each class	Name of each exchange on which registered
Class A common stock, par value of \$0.01 per share	New York Stock Exchange

Securities registered, or to be registered, pursuant to Section 12(g) of the Act.

None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act.

None

Indicate the number of outstanding shares of each issuer's classes of capital or common stock as of the close of the period covered by the annual report.

71,091,030 shares of Class A common stock, par value of \$0.01 per share.

12,500,000 shares of Class B common stock, par value of \$0.01 per share.

Indicate by check mark whether the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes No

Indicate by check mark if the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark if the registrant (1) has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer Accelerated Filer Non-Accelerated Filer

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP International Financial Reporting Standards as issued Other

by the International Accounting Standards Board

If "Other" has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow:

Item 17 Item 18

Edgar Filing: TEEKAY TANKERS LTD. - Form 20-F

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

PART I

This Annual Report should be read in conjunction with the consolidated financial statements and accompanying notes included in this report.

Unless otherwise indicated, references in this Annual Report to Teekay Tankers Ltd., we, us and our and similar terms refer to Teekay Tankers Ltd. and/or one or more of its subsidiaries, except that those terms, when used in this Annual Report in connection with the common stock described herein, shall mean specifically Teekay Tankers Ltd. References in this Annual Report to Teekay Corporation refer to Teekay Corporation and/or any one or more of its subsidiaries.

In addition to historical information, this Annual Report contains forward-looking statements that involve risks and uncertainties. Such forward-looking statements relate to future events and our operations, objectives, expectations, performance, financial condition and intentions. When used in this Annual Report, the words expect, intend, plan, believe, anticipate, estimate and variations of such words and similar expressions are intended to identify forward-looking statements. Forward-looking statements in this Annual Report include, in particular, statements regarding:

our future financial condition or results of operations and our future revenues and expenses;

tanker market conditions and fundamentals, including the balance of supply and demand in these markets, expected recovery in the current cyclically-low tanker market, and spot tanker charter rates and oil production;

our compliance with, and the effect on our business and operating results of, covenants under our term loans and credit facilities;

future oil prices, production and refinery capacity;

expansion of our business and additions to our fleet;

our expectations about the availability of vessels to purchase, the expected costs and time it may take to construct and deliver newbuildings, or the useful lives of our vessels;

planned capital expenditures and the ability to fund capital expenditures;

future supply of, and demand for, oil;

the ability to leverage Teekay Corporation's relationships and reputation in the shipping industry;

the expected benefits of participation in vessel pooling arrangements;

the effectiveness of our chartering strategy in capturing upside opportunities and reducing downside risks, including our ability to take advantage of the anticipated tanker market recovery;

the ability to maximize the use of vessels, including the redeployment or disposition of vessels no longer under time charters;

our expectation regarding our vessels' ability to perform to specifications and maintain their hire rates;

operating expenses, availability of crew, number of off-hire days, dry-docking requirements and insurance costs;

the expected cost of, and our ability to comply with, governmental regulations and maritime self-regulatory organization standards applicable to our business;

the anticipated impact of future regulatory changes or environmental liabilities;

expenses under service agreements with other affiliates of Teekay Corporation;

the anticipated taxation of our company and of distributions to our stockholders;

our expectations as to any impairment of our vessels;

the expected lifespan of our vessels;

construction and delivery delays in the tanker industry generally;

customers' increasing emphasis on environmental and safety concerns;

anticipated funds for liquidity needs and the sufficiency of cash flows;

our use of interest rate swaps to reduce interest rate exposure;

Table of Contents

the expected effect of off-balance sheet arrangements;

our hedging activities relating to foreign exchange, interest rate and spot market risks;

the ability of counterparties to our derivative contracts to fulfill their contractual obligations;

the vessel values at the time of sale of two 2010-built VLCCs that we took ownership of in consideration for our investment in term loans, our ability to operate or sell the VLCC tankers, and the cash flow and sale proceeds thereof;

our acquisition of 50% of Teekay's conventional tanker commercial management operations and 100% of Teekay's technical management operations, the expected timing of the transaction, and the related effect on our financial condition and results of operations;

our investment in Tanker Investments Limited (TIL), potential benefits to us from this investment, and TIL's proposed vessel acquisitions;

changes in or additions to applicable industry laws and regulations, including Regulation (EU) No 1257/2013, which imposes rules regarding ship recycling and management of hazardous materials on vessels;

our business strategy and other plans and objectives for future operations; and

our ability to pay dividends on our common stock.

Forward-looking statements involve known and unknown risks and are based upon a number of assumptions and estimates that are inherently subject to significant uncertainties and contingencies, many of which are beyond our control. Actual results may differ materially from those expressed or implied by such forward-looking statements. Important factors that could cause actual results to differ materially include, but are not limited to, those factors discussed below in Item 3 – Key Information: Risk Factors and other factors detailed from time to time in other reports we file with or furnish to the U.S. Securities and Exchange Commission (or the *SEC*).

We do not intend to revise any forward-looking statements in order to reflect any change in our expectations or events or circumstances that may subsequently arise. You should carefully review and consider the various disclosures included in this Annual Report and in our other filings made with the SEC that attempt to advise interested parties of the risks and factors that may affect our business, prospects and results of operations.

Item 1. Identity of Directors, Senior Management and Advisors

Not applicable.

Item 2. Offer Statistics and Expected Timetable

Not applicable.

Item 3. Key Information

Selected Financial Data

Set forth below is selected consolidated financial and other data of Teekay Tankers Ltd. and its subsidiaries for fiscal years 2009 through 2013, which have been derived from our consolidated financial statements. The following table should be read together with, and is qualified in its entirety by reference to, Item 5 Operating and Financial Review and Prospects included herein, and the historical financial statements and accompanying notes and the Report of Independent Registered Public Accounting Firm thereon (which is included herein), with respect to the fiscal years 2013, 2012 and 2011.

From time to time we have purchased vessels from Teekay Corporation. During fiscal years 2009 through 2013, we acquired from Teekay Corporation a total of 19 conventional oil tankers of varying size. These acquisitions were deemed to be business acquisitions between entities under common control. Accordingly, we have accounted for these transactions in a manner similar to the pooling of interest method whereby our financial statements prior to the date these vessels were acquired by us are retroactively adjusted to include the results of these acquired vessels. The periods retroactively adjusted include all periods that we and the acquired vessels were both under the common control of Teekay Corporation and had begun operations. As a result, our consolidated statements of income (loss) for the years ended December 31, 2012, 2011, 2010 and 2009 reflect the results of operations of these vessels, referred to herein as the Dropdown Predecessor, as if we had acquired them when each respective vessel began operations under the ownership of Teekay Corporation. Please refer to Item 5 Operating and Financial Review and Prospects: Items You Should Consider When Evaluating Our Results of Operations and Item 18 Financial Statements: Note 1 Summary of Significant Accounting Policies.

Our consolidated financial statements are prepared in accordance with United States generally accepted accounting principles (or *GAAP*).

- (1) Voyage expenses are all expenses unique to a particular voyage, including any bunker fuel expenses, port fees, cargo loading and unloading expenses, canal tolls, agency fees and commissions.

Table of Contents

- (2) Vessel operating expenses include crewing, repairs and maintenance, insurance, stores, lube oils, communication expenses among others. In order to more closely align our presentation to that of many of its peers, the cost of ship management activities of \$5.6 million for year ended December 31, 2013 has been presented in vessel operating expenses. Prior to 2013, we included these amounts in general and administrative expenses. All such costs incurred in comparative periods have been reclassified from general and administrative expenses to vessel operating expenses to conform to the presentation adopted in the current period. The amounts reclassified for the years ended December 31, 2012, 2011, 2010 and 2009 were \$7.0 million and \$8.5 million, \$7.4 million and \$7.0 million, respectively.
- (3) Time-charter hire expense includes vessel operating leases expense incurred to charter-in vessels.
- (4) For the years ended December 31, 2009, 2010, 2011, 2012 and 2013, earnings (loss) per common share is determined by dividing (a) net income (loss) after deducting net income attributable to the Dropdown Predecessor, which is \$nil for 2013, by (b) the weighted average number of shares outstanding during the applicable period.
- (5) Vessels and equipment consists of (a) vessels, at cost less accumulated depreciation, and (b) advances on newbuildings.
- (6) Total debt includes the current and long-term portion of debt, and amounts due to affiliates.
- (7) Consistent with general practice in the shipping industry, we use net revenues (defined as revenues less voyage expenses) as a measure of equating revenues generated from voyage charters to revenues generated from time charters, which assists us in making operating decisions about the deployment of our vessels and their performance. Under time charters the charterer pays the voyage expenses, whereas under voyage charters the ship-owner pays these expenses. Some voyage expenses are fixed, and the remainder can be estimated. If we, as the ship owner, pay the voyage expenses, we typically pass the approximate amount of these expenses on to our customers by charging higher rates under the contract to them. As a result, although revenues from different types of contracts may vary, the net revenues are comparable across the different types of contracts. We principally use net revenues, a non-GAAP financial measure, because it provides more meaningful information to us than revenues, the most directly comparable GAAP financial measure. Net revenues are also widely used by investors and analysts in the shipping industry for comparing financial performance between companies and to industry averages. The following table reconciles net revenues with revenues:

	Years Ended December 31,				
	2009	2010	2011	2012	2013
Revenues	\$ 264,309	\$ 235,053	\$ 203,749	\$ 185,930	\$ 162,410
Interest Income from investment in term loans		5,297	11,323	11,499	7,677
Voyage expenses	(7,503)	(5,301)	(3,449)	(4,618)	(8,337)
Net revenues	\$ 256,806	\$ 235,049	\$ 211,623	\$ 192,811	\$ 161,750

- (8) EBITDA represents earnings before interest, taxes, depreciation and amortization. Adjusted EBITDA represents EBITDA before net loss on sale of vessels, goodwill impairment and realized and unrealized (gains) losses on derivative instruments and share of the above items in non-consolidated joint ventures. Both measures are used as supplemental financial measures by management and by external users of our financial statements, such as investors, as discussed below:

Financial and operating performance. EBITDA and Adjusted EBITDA assist our management and investors by increasing the comparability of our fundamental performance from period to period and against the fundamental performance of other companies in our industry that provide EBITDA or Adjusted EBITDA-based information. This increased comparability is achieved by excluding the potentially disparate effects between periods or companies of interest expense, taxes, depreciation or amortization (or other items in determining Adjusted EBITDA), which items are affected by various and possibly changing financing methods, capital structure and historical cost basis and which items may significantly affect net income between periods. We believe that including EBITDA and Adjusted EBITDA as financial and operating measures benefits investors in (a) selecting between investing in us and other investment alternatives and (b) monitoring our ongoing financial and operational strength and health in assessing whether to continue to hold shares of our Class A common stock.

Liquidity. EBITDA and Adjusted EBITDA allow us to assess the ability of assets to generate cash sufficient to service debt, pay dividends and undertake capital expenditures. By eliminating the cash flow effect resulting from our existing capitalization and other items such as dry-docking expenditures, working capital changes and foreign currency exchange gains and losses, EBITDA and Adjusted EBITDA provide consistent measure of our ability to generate cash over the long term. Management uses this information as a significant factor in determining (a) our proper capitalization (including assessing how much debt to incur and whether changes to the capitalization should be made) and (b) whether to undertake material capital expenditures and how to finance them, all in light of our dividend policy. Use of EBITDA and Adjusted EBITDA as liquidity measures also permits investors to assess the fundamental ability of our business to generate cash sufficient to meet cash needs, including dividends on shares of our Class A common stock.

Neither EBITDA nor Adjusted EBITDA, which are non-GAAP measures, should be considered an alternative to net income, operating income, cash flow from operating activities or any other measure of financial performance or liquidity presented in accordance with GAAP. EBITDA and Adjusted EBITDA exclude some, but not all, items that affect net income and operating income, and these measures may vary among other companies. Therefore, EBITDA and Adjusted EBITDA as presented in this Annual Report may not be comparable to similarly titled measures of other companies.

- (9) Average number of tankers consists of the average number of vessels that were in our possession during a period, including time-chartered in vessels, the joint venture owned vessel and vessels of the Dropdown Predecessor.

Risk Factors

The cyclical nature of the tanker industry may lead to volatile changes in charter rates, and significant fluctuations in the utilization of our vessels, which may adversely affect our earnings.

Historically, the tanker industry has been cyclical, experiencing volatility in profitability due to changes in the supply of and demand for tanker capacity and changes in the supply of and demand for oil and oil products. The cyclical nature of the tanker industry may cause significant increases or decreases in the revenues we earn from our vessels and may also cause significant increases or decreases in the value of our vessels. If the tanker market is depressed, our earnings may decrease. Our exposure to industry business cycles is more acute because of our exposure to the spot tanker market, which is more volatile than the tanker industry generally. Our ability to operate profitably in the spot market and to recharter our other vessels upon the expiration or termination of their charters will depend upon, among other factors, economic conditions in the tanker market.

The factors affecting the supply of and demand for tankers are outside of our control, and the nature, timing and degree of changes in industry conditions are unpredictable.

Key factors that influence the supply of tanker capacity include:

environmental concerns and regulations;

the number of newbuilding deliveries;

the scrapping rate of older vessels;

conversion of tankers to other uses; and

Table of Contents

the number of vessels that are out of service.

Key factors that influence demand for tanker capacity include:

supply of oil and oil products;

demand for oil and oil products;

regional availability of refining capacity;

global and regional economic and political conditions;

the distance oil and oil products are to be moved by sea; and

changes in seaborne and other transportation patterns.

Historically, the tanker markets have been volatile as a result of the many conditions and factors that can affect the price and the supply of, and demand for, tanker capacity. Changes in demand for transportation of oil over longer distances and in the supply of tankers to carry that oil may materially affect our revenues, profitability and cash flows.

Changes in the oil markets could result in decreased demand for our vessels and services.

Demand for our vessels and services in transporting oil depends upon world and regional oil markets. Any decrease in shipments of crude oil in those markets could have a material adverse effect on our business, financial condition and results of operations. Historically, those markets have been volatile as a result of the many conditions and events that affect the price, production and transport of oil, including competition from alternative energy sources. Past slowdowns of the U.S. and world economies have resulted in reduced consumption of oil products and decreased demand for our vessels and services, which reduced vessel earnings. Additional slowdowns could have similar effects on our operating results and may limit our ability to expand our fleet.

Changes in the spot tanker market may result in significant fluctuations in the utilization of our vessels and our profitability.

During 2013 and 2012, we derived approximately 46.3% and 35.1%, respectively, of our net revenues from the vessels operating in the spot tanker market on voyage-charter contracts (which includes vessels operating under charters with an initial term of less than one year). Our vessels operating on voyage-charter contracts consist of conventional crude oil tankers and product carriers operating in the spot tanker market or subject to time charters, or contracts of affreightment priced on a spot-market basis or fixed-rate contracts with a term of less than one year. Part of our conventional Aframax and Suezmax tanker fleets and our large and medium product tanker fleets are among the vessels included in the spot tanker market on voyage-charter contracts. Due to our involvement in the spot-charter market, declining spot rates in a given period generally will result in corresponding declines in our operating results for that period.

The spot-charter market is highly volatile and fluctuates based upon tanker and oil supply and demand. The successful operation of our vessels in the spot-charter market depends upon, among other things, obtaining profitable spot charters and minimizing, to the extent possible, time spent waiting for charters and time spent traveling unladen to pick up cargo. Future spot rates may not be sufficient to enable our vessels trading in the spot tanker market to operate profitably or to provide sufficient cash flow to service our debt obligations.

The operation of a significant number of our tankers in the Gemini Suezmax Pool, Teekay Aframax Pool, Taurus Tankers LR2 Pool and Norient Product Pool could limit our earnings.

As of December 31, 2013, eight of our Suezmax tankers, one of our Aframax tankers and three of our Long Range 2 (or *LR2*) product tankers operated in, and generated revenues to us through participation in, a Suezmax tanker pooling arrangement (the *Gemini Suezmax Pool*), an Aframax tanker revenue sharing arrangement (the *Teekay Aframax Pool*), and an LR2 product tanker pooling arrangement (the *Taurus Tankers LR2 Pool*), respectively, each managed, in whole or in part, by subsidiaries of Teekay Corporation. In addition, two of our Medium Range (or *MR*) product tankers operated in the Norient Product Pool, which is managed by a third party unaffiliated with Teekay Corporation. Pooling arrangements are designed to spread the costs and risks associated with commercial management of vessels and to share the net revenues earned by all of the vessels in the pool. Although the net revenues are apportioned based on the actual earning days each vessel is available and the relative performance capabilities of each vessel as well, a pool may include vessels that do not perform as well in actual operation as our vessels. As a result, our share of the net pool revenues may be less than what we could earn operating our vessels independently. Certain vessels of TIL also participate in some of these pooling arrangements.

The removal of any vessels from the Gemini Suezmax Pool, Teekay Aframax Pool, Taurus Tankers LR2 Pool, Norient Product Pool or any other pooling arrangement may adversely affect our operating results.

Participants in the Gemini Suezmax Pool, including Teekay Corporation and third parties, have each agreed to include in the pool certain qualifying Suezmax-class crude tankers of the pool participants and their respective affiliates, including us, that operate in the spot market or pursuant to time charters of less than one year. We and Teekay Corporation have each committed to include in the Teekay Aframax Pool all of our and its respective Aframax-class crude tankers that are less than 15 years old and employed in the spot market or operate pursuant to time charters of less than 90 days. Participants in the Taurus Tankers LR2 Pool, including third parties, have each agreed to include in the pool certain qualifying LR2 product tankers of the pool participants and their respective affiliates, including us, that operate in the spot market or pursuant to time charters of less than one year. Participants in the Norient Product Pool, including third parties, have each agreed to include in that pool certain qualifying MR product tankers of the pool participants and their respective affiliates, including us, that operate in the spot market or pursuant to time charters of less than one year. If we or Teekay Corporation remove vessels from the Gemini Suezmax Pool, Teekay Aframax Pool, Taurus Tankers LR2 Pool, or Norient Product Pool to operate under longer-term time charters, the benefits to us of the pooling arrangements could diminish. In addition, the European Union is in the process of substantially reforming the way it regulates traditional agreements for maritime services from an antitrust perspective. These changes may impose new restrictions on the way pools are operated or

Table of Contents

may prohibit pooling arrangements altogether. If for any reason our vessels, Teekay Corporation's vessels, or any third party vessels cease to participate in the Gemini Suezmax Pool, Teekay Aframax Pool, Taurus Tankers LR2 Pool, Norient Product Pool or another pooling arrangement, or if the pooling arrangements are significantly restricted, we may not achieve the benefits intended by pool participation and our results of operations could be harmed

Our failure to renew or replace fixed-rate charters could cause us to trade the related vessels in the spot market, which could adversely affect our operating results and make them more volatile.

As of December 31, 2013, a total of 13 of our tankers operated under fixed-rate time-charter contracts, six of which are scheduled to expire in 2014, four in 2015, and three in 2016, respectively. If upon their scheduled expiration or any early termination we are unable to renew or replace fixed-rate charters on favorable terms, if at all, or if we choose not to renew or replace these fixed-rate charters, we may employ the vessels in the volatile spot market. Increasing our exposure to the spot market, particularly during periods of unfavorable market conditions, could harm our results of operations and make them more volatile.

Our vessels operate in the highly competitive international tanker market.

The operation of oil tankers and transportation of crude oil and refined petroleum products are extremely competitive businesses. Competition arises primarily from other tanker owners, including major oil companies and independent tanker companies, some of which have substantially greater financial strength and capital than do we or than does Teekay Corporation. Competition for the transportation of oil and oil products can be intense and depends on price and the location, size, age, condition of the tanker and the acceptability of the tanker and its operators to the charterers. Our competitive position may erode over time.

Our operating results are subject to seasonal fluctuations.

Our tankers operate in markets that have historically exhibited seasonal variations in tanker demand and, therefore, in spot-charter rates. This seasonality may result in quarter-to-quarter volatility in our results of operations. Tanker markets are typically stronger in the winter months as a result of increased oil consumption in the northern hemisphere but weaker in the summer months as a result of lower oil consumption in the northern hemisphere and refinery maintenance. In addition, unpredictable weather patterns during the winter months tend to disrupt vessel scheduling, which historically has increased oil price volatility and oil trading activities in the winter months. As a result, revenues generated by the tankers in our fleet have historically been weaker during the fiscal quarters ended June 30 and September 30, and stronger in our fiscal quarters ended December 31 and March 31.

Future economic downturns, including disruptions in the global credit markets, could adversely affect our ability to grow.

Economic downturns and financial crises in the global markets could produce illiquidity in the capital markets, market volatility, heightened exposure to interest rate and credit risks, and reduced access to capital markets. If global financial markets and economic conditions significantly deteriorate in the future, we may face restricted access to the capital markets or bank lending, which may make it more difficult and costly to fund future growth. Decreased access to such resources could have a material adverse effect on our business, financial condition and results of operations.

Economic downturns may affect our customers' ability to charter our vessels and pay for our services and may adversely affect our business and results of operations.

Economic downturns in the global financial markets may lead to a decline in our customers' operations or ability to pay for our services, which could result in decreased demand for our vessels and services. Our customers' inability to pay could also result in their default on our current contracts and charters. A decline in the amount of services requested by our customers or their default on our contracts with them could have a material adverse effect on our business, financial condition and results of operations.

Exposure to currency exchange rate fluctuations could result in fluctuations in our operating results.

Our primary economic environment is the international shipping market, which utilizes the U.S. Dollar as its functional currency. Consequently, virtually all of our revenues and the majority of our expenses are in U.S. Dollars. However, we incur certain voyage expenses, vessel operating expenses, and general and administrative expenses in foreign currencies, the most significant of which are the Canadian Dollar, Euro and British Pound. This partial mismatch in revenues and expenses could lead to fluctuations in net income due to changes in the value of the U.S. Dollar relative to other currencies.

We may not be able to grow or to manage our growth effectively.

One of our principal strategies is to continue to grow by expanding our operations and adding vessels to our fleet. Our future growth will depend upon a number of factors, some of which are beyond our control. These factors include our ability to:

identify suitable tankers or shipping companies for acquisitions or joint ventures;

integrate successfully any acquired tankers or businesses with our existing operations; and

obtain required financing for our existing and any new operations.

In addition, competition from other companies, many of which have significantly greater financial resources than do we or than does Teekay Corporation, may reduce our acquisition opportunities or cause us to pay higher prices. Our failure to effectively identify, purchase, develop and integrate any tankers or businesses could adversely affect our business, financial condition and results of operations.

Table of Contents

We may not realize expected benefits from acquisitions, and implementing our growth strategy through acquisitions may harm our financial condition and performance.

Any acquisition of a vessel or business may not be profitable at or after the time of acquisition and may not generate cash flows sufficient to justify the investment. In addition, our acquisition growth strategy exposes us to risks that may harm our business, financial condition and operating results, including risks that we may:

fail to realize anticipated benefits, such as new customer relationships, cost-savings or cash flow enhancements;

be unable to hire, train or retain qualified shore and seafaring personnel to manage and operate our growing business and fleet;

decrease our liquidity by using a significant portion of available cash or borrowing capacity to finance acquisitions;

significantly increase our interest expense or financial leverage if we incur additional debt to finance acquisitions;

incur or assume unanticipated liabilities, losses or costs associated with any vessels or businesses acquired; or

incur other significant charges, such as impairment of intangible assets, asset devaluation or restructuring charges.

Unlike newbuildings, existing vessels typically do not carry warranties as to their condition. While we generally inspect existing vessels prior to purchase, such an inspection would normally not provide us with as much knowledge of a vessel's condition as we would possess if it had been built for us and operated by us during its life. Repairs and maintenance costs for existing vessels are difficult to predict and may be substantially higher than for vessels we have operated since they were built. These costs could decrease our cash flows, and liquidity and harm our financial condition and performance.

Over time, the value of our vessels may decline, which could adversely affect our ability to obtain financing or our operating results.

Vessel values for oil tankers can fluctuate substantially over time due to a number of different factors. Vessel values may decline from existing levels, and have declined over the past few years. If the operation of a tanker is not profitable, or if we cannot re-deploy a chartered tanker at attractive rates upon charter termination, rather than continue to incur costs to maintain and finance the vessel, we may seek to dispose of it. Our inability to dispose of the vessel at a fair market value or the disposition of the vessel at a fair market value that is lower than its book value could result in a loss on its sale and adversely affect our results of operations and financial condition. In addition, three of our credit facilities contain loan-to-value financial covenants tied to the value of the vessel that collateralizes

these credit facilities. A significant decline in the market value of these tankers may require us to pledge additional collateral to avoid a default under these credit facilities. We are required to maintain vessel value to outstanding loan principal balance ratios ranging from 105%-120%. At December 31, 2013, we were in compliance with these requirements.

In addition, if we determine at any time that a vessel's future useful life and earnings require us to impair its value on our financial statements, we may need to recognize a significant charge against our earnings. Vessel values have declined significantly in recent years, and have contributed to significant vessel and goodwill impairment charges against our earnings.

Delays in deliveries of any newbuildings could harm our operating results and financial condition.

The delivery of any newbuilding that we may order could be delayed, which would delay our receipt of revenues related to the vessel. The completion and delivery of newbuildings could be delayed because of:

quality or engineering problems;

changes in governmental regulations or maritime self-regulatory organization standards;

work stoppages or other labor disturbances at the shipyard;

bankruptcy or other financial crisis of the shipbuilder;

a backlog of orders at the shipyard;

political or economic disturbances;

weather interference or catastrophic event, such as a major earthquake, tsunami or fire;

requests for changes to the original vessel specifications;

shortages of or delays in the receipt of necessary construction materials, such as steel;

an inability to finance the construction of the vessels; or

an inability to obtain requisite permits or approvals.

If delivery of a vessel is significantly delayed, it could adversely affect our results of operations and financial condition and our ability to pay dividends to our stockholders.

Table of Contents

We will be required to make substantial capital expenditures to expand the size of our fleet. We generally will be required to make significant installment payments for any acquisitions of newbuilding vessels prior to their delivery and generation of revenue. Depending on whether we finance our expenditures through cash from operations or by issuing debt or equity securities, our financial leverage could increase or our stockholders' ownership interest in us could be diluted.

We will be required to make substantial capital expenditures to increase the size of our fleet. We intend to expand our fleet by acquiring tankers from third parties or from Teekay Corporation. Our acquisitions may also include newbuildings. We generally will be required to make installment payments on any newbuildings prior to their delivery. We typically would pay 10% to 20% of the purchase price of a tanker upon signing the purchase contract, even though delivery of the completed vessel will not occur until much later (approximately two to three years from the order). To fund expansion capital expenditures, we may be required to use cash balances or cash from operations, incur borrowings or raise capital through the sale of debt or additional equity securities. Our ability to obtain bank financing or to access the capital markets for future offerings may be limited by our financial condition at the time of any such financing or offering, as well as by adverse market conditions resulting from, among other things, general economic conditions and contingencies and uncertainties that are beyond our control. Our failure to obtain funds for capital expenditures could have a material adverse effect on our business, results of operations and financial. Even if we are successful in obtaining the necessary funds, incurring additional debt may significantly increase our interest expense and financial leverage, which could limit our financial flexibility and ability to pursue other business opportunities. In addition, issuing additional equity securities may result in significant stockholder ownership dilution and would increase the aggregate amount of cash required to pay quarterly dividends.

An increase in operating costs could adversely affect our cash flows and financial condition.

We have entered into a long-term management agreement (or the *Management Agreement*) with Teekay Tankers Management Services Ltd. (our *Manager*), a subsidiary of Teekay Corporation. Under our Management Agreement, we must reimburse our Manager for vessel operating expenses (including crewing, repairs and maintenance, insurance, stores, lube oils and communication expenses). These expenses depend upon a variety of factors, many of which are beyond our or our Manager's control. Some of these costs, primarily relating to insurance and enhanced security measures, have been increasing and may increase in the future. Increases in any of these costs would decrease our earnings and adversely affect our cash flows and financial condition.

Financing agreements containing operating and financial restrictions may restrict our business and financing activities.

The operating and financial restrictions and covenants in our revolving credit facilities, term loans and in any of our future financing agreements could adversely affect our ability to finance future operations or capital needs or to pursue and expand our business activities. For example, these financing arrangements may restrict our ability to:

incur or guarantee indebtedness;

change ownership or structure, including mergers, consolidations, liquidations and dissolutions;

pay dividends;

grant liens on our assets;

sell, transfer, assign or convey assets;

make certain investments; and

enter into a new line of business.

Our ability to comply with covenants and restrictions contained in debt instruments may be affected by events beyond our control, including prevailing economic, financial and industry conditions. If market or other economic conditions deteriorate, we may fail to comply with these covenants. If we breach any of the restrictions, covenants, ratios or tests in the financing agreements, our obligations may become immediately due and payable, and the lenders' commitment, if any, to make further loans may terminate. A default under one financing agreement could also result in foreclosure on any of our vessels and other assets securing related loans, or trigger a default under other financing agreements.

Our substantial debt levels may limit our flexibility in obtaining additional financing, pursuing other business opportunities and paying dividends.

As of December 31, 2013, our long-term debt was approximately \$744.6 million and an additional \$148.2 million was available to us under our revolving credit facilities. We will continue to have the ability to incur additional debt, subject to limitations in our revolving credit facilities. Our level of debt could have important consequences to us, including the following:

our ability to obtain additional financing, if necessary, for working capital, capital expenditures, acquisitions or other purposes may be impaired or such financing may not be available on favorable terms;

we will need a substantial portion of our cash flow to make principal and interest payments on our debt, reducing the funds that would otherwise be available for operations, business opportunities and dividends to our stockholders;

our debt level will make us more vulnerable than our competitors with less debt to competitive pressures or a downturn in our industry or the economy generally; and

our debt level may limit our flexibility in responding to changing business and economic conditions.

Table of Contents

Our ability to service our debt depends upon, among other things, our financial and operating performance, which is affected by prevailing economic conditions and financial, business, regulatory and other factors, many of which are beyond our control. If our operating results are not sufficient to service our current or future indebtedness, we will be forced to take actions such as reducing or delaying our business activities, acquisitions, investments or capital expenditures, selling assets, restructuring or refinancing our debt, or seeking additional equity capital or bankruptcy protection. We may not be able to effect any of these remedies on satisfactory terms, or at all.

Our insurance may be insufficient to cover losses that may occur to our vessels or result from our operations.

The operation of oil tankers is inherently risky. Although we carry hull and machinery (marine and war risks) and protection and indemnity insurance, all risks may not be adequately insured against, and any particular claim may not be paid. In addition, we do not carry insurance on our vessels covering the loss of revenues resulting from vessel off-hire time based on its cost compared to our off-hire experience. Any significant off-hire time of our vessels could harm our business, operating results and financial condition. Any claims covered by insurance would be subject to deductibles, and since it is possible that a large number of claims may be brought, the aggregate amount of these deductibles could be material. Certain of our insurance coverage is maintained through mutual protection and indemnity associations, and as a member of such associations we may be required to make additional payments over and above budgeted premiums if member claims exceed association reserves.

Our Manager may be unable to procure adequate insurance coverage at commercially reasonable rates in the future. For example, more stringent environmental regulations have led to increased costs for, and in the future may result in the lack of availability of, insurance against risks of environmental damage or pollution. A catastrophic oil spill, marine disasters or natural disasters could exceed the insurance coverage, which could harm our business, financial condition and operating results. Any uninsured or underinsured loss could harm our business and financial condition. In addition, the insurance may be voidable by the insurers as a result of certain actions, such as vessels failing to maintain certification with applicable maritime self-regulatory organizations.

Changes in the insurance markets attributable to terrorist attacks may also make certain types of insurance more difficult to obtain. In addition, the insurance that may be available may be significantly more expensive than existing coverage.

Terrorist attacks, piracy, increased hostilities or war could lead to further economic instability, increased costs and disruption of business.

Terrorist attacks, piracy and the current conflicts in the Middle East, and other current and future conflicts, may adversely affect our business, operating results, financial condition, and ability to raise capital and future growth. Continuing hostilities in the Middle East may lead to additional armed conflicts or to further acts of terrorism and civil disturbance in the United States or elsewhere, which may contribute further to economic instability and disruption of oil production and distribution, which could result in reduced demand for our services.

In addition, oil facilities, shipyards, vessels, pipelines, oil fields or other infrastructure could be targets of future terrorist attacks and our vessels could be targets of pirates or hijackers. Any such attacks could lead to, among other things, bodily injury or loss of life, vessel or other property damage, increased vessel operational costs, including insurance costs, and the inability to transport oil to or from certain locations. Terrorist attacks, war, piracy, hijacking or other events beyond our control that adversely affect the distribution, production or transportation of oil to be shipped by us could entitle customers to terminate the charters which would harm our cash flow and business.

Acts of piracy on ocean-going vessels have recently increased in frequency, which could adversely affect our business.

Acts of piracy have historically affected ocean-going vessels trading in regions of the world such as the South China Sea and the Indian Ocean off the coast of Somalia. In recent years, the frequency and severity of piracy incidents has significantly increased, particularly in the Indian Ocean and off the coast of West Africa. If these piracy attacks result in regions in which our vessels are deployed being named on the Joint War Committee Listed Areas, war risk insurance premiums payable for such coverage may increase significantly and such insurance coverage may be more difficult to obtain. In addition, crew costs, including costs which may be incurred to the extent we employ onboard security guards, could increase in such circumstances. We may not be adequately insured to cover losses from these incidents, which could have a material adverse effect on us. In addition, hijacking as a result of an act of piracy against our vessels, or an increase in cost or unavailability of insurance for our vessels, could have a material adverse impact on our business, financial condition and results of operations.

Our substantial operations outside the United States expose us to political, governmental and economic instability, which could harm our operations.

Because our operations are primarily conducted outside of the United States, they may be affected by economic, political and governmental conditions in the countries where we engage in business or where our vessels are registered. Any disruption caused by these factors could harm our business, including by reducing the levels of oil exploration, development and production activities in these areas. We derive some of our revenues from shipping oil from politically unstable regions. Conflicts in these regions have included attacks on ships and other efforts to disrupt shipping. Hostilities or other political instability in regions where we operate or where we may operate could have a material adverse effect on the growth of our business, results of operations and financial condition and ability to make cash distributions. In addition, tariffs, trade embargoes and other economic sanctions by the United States or other countries to which we trade may limit trading activities with those countries, which could also harm our business and ability to make cash distributions. Finally, a government could requisition one or more of our vessels, which is most likely during war or national emergency. Any such requisition would cause a loss of the vessel and could harm our cash flow and financial results.

Past port calls by our vessels, or third-party vessels from which we derived pooling revenues, to countries that are subject to sanctions imposed by the United States and the European Union may impact investors' decisions to invest in our securities.

The United States government has imposed sanctions on Iran, Syria and Sudan. The European Union (or *EU*) has also imposed sanctions on trade with Iran. In the past, conventional oil tankers owned or chartered-in by us, or third-party vessels participating in commercial pooling arrangements from which we derive revenue, made limited port calls to those countries for the loading and discharging of oil products. Those port calls did not violate U.S. or EU sanctions at the time and we intend to maintain our compliance with all U.S. and EU sanctions. In addition, we have no future contracted loadings or discharges in any of those countries and intend not to enter into voyage charter contracts for the

Table of Contents

transport of oil or gas to or from Iran, Syria or Sudan. We believe that our compliance with these sanctions and our lack of any future port calls to those countries does not and will not adversely impact our revenues, because port calls to these countries have never accounted for any material amount of our revenues. However, some investors might decide not to invest in us simply because we have previously called on, or through our participation in pooling arrangements have previously received revenue from calls on, ports in these sanctioned countries. Any such investor reaction could adversely affect the market for our common shares.

Marine transportation is inherently risky, and an incident involving significant loss of product or environmental contamination by any of our vessels could harm our reputation and business.

Vessels and their cargoes are at risk of being damaged or lost because of events such as:

marine disasters;

bad weather or natural disasters;

mechanical or electrical failures;

grounding, capsizing, fire, explosions and collisions;

piracy;

human error; and

war and terrorism.

An accident involving any of our vessels could result in any of the following:

death or injury to persons, loss of property or damage to the environment and natural resources;

delays in the delivery of cargo;

loss of revenues from charters;

liabilities or costs to recover any spilled oil or other petroleum products and to restore the eco-system affected by the spill;

governmental fines, penalties or restrictions on conducting business;

higher insurance rates; and

damage to our reputation and customer relationships generally.

Any of these events could have a material adverse effect on our business, financial condition and operating results.

The shipping industry is subject to substantial environmental and other regulations, which may significantly limit operations and increase expenses.

Our operations are affected by extensive and changing international, national and local environmental protection laws, regulations, treaties and conventions in force in international waters, the jurisdictional waters of the countries in which our vessels operate, as well as the countries of our vessels' registration, including those governing oil spills, discharges to air and water, and the handling and disposal of hazardous substances and wastes. Many of these requirements are designed to reduce the risk of oil spills and other pollution. In addition, we believe that the heightened environmental, quality and security concerns of insurance underwriters, regulators and charterers will lead to additional regulatory requirements, including enhanced risk assessment and security requirements and greater inspection and safety requirements on vessels. We expect to incur substantial expenses in complying with these laws and regulations, including expenses for vessel modifications and changes in operating procedures.

These requirements may affect the resale value or useful lives of our vessels, require a reduction in cargo capacity, ship modifications or operational changes or restrictions, lead to decreased availability of insurance coverage for environmental matters or result in the denial of access to certain jurisdictional waters or ports, or detention in, certain ports. Under local, national and foreign laws, as well as international treaties and conventions, we could incur material liabilities, including cleanup obligations, in the event that there is a release of petroleum or other hazardous substances from our vessels or otherwise in connection with our operations. We could also become subject to personal injury or property damage claims relating to the release of or exposure to hazardous materials associated with our operations. In addition, failure to comply with applicable laws and regulations may result in administrative and civil penalties, criminal sanctions or the suspension or termination of our operations, including, in certain instances, seizure or detention of our vessels. For further information about regulations affecting our business and related requirements on us, please read Item 4 Information on the Company: B. Business Overview Regulations.

Table of Contents

Climate change and greenhouse gas restrictions may adversely impact our operations and markets.

Due to concern over the risk of climate change, a number of countries have adopted, or are considering the adoption of, regulatory frameworks to reduce greenhouse gas emissions. These regulatory measures include, among others, adoption of cap and trade regimes, carbon taxes, increased efficiency standards, and incentives or mandates for renewable energy. Compliance with changes in laws, regulations and obligations relating to climate change could increase our costs related to operating and maintaining our vessels and require us to install new emission controls, acquire allowances or pay taxes related to our greenhouse gas emissions, or administer and manage a greenhouse gas emissions program. Revenue generation and strategic growth opportunities may also be adversely affected.

Adverse effects upon the oil industry relating to climate change may also adversely affect demand for our services. Although we do not expect that demand for oil will lessen dramatically over the short-term, in the long-term climate change may reduce the demand for oil or increased regulation of greenhouse gases may create greater incentives for use of alternative energy sources. Any long-term material adverse effect on the oil industry could have a significant financial and operational adverse impact on our business that we cannot predict with certainty at this time.

Maritime claimants could arrest, or port authorities could detain, our vessels, which could interrupt our cash flow.

Crew members, suppliers of goods and services to a vessel, shippers of cargo and other parties may be entitled to a maritime lien against that vessel for unsatisfied debts, claims or damages. In many jurisdictions, a maritime lienholder may enforce its lien by arresting a vessel through foreclosure proceedings. The arrest or attachment of one or more of our vessels could interrupt our cash flow and require us to pay large sums of funds to have the arrest or attachment lifted. In addition, in some jurisdictions, such as South Africa, under the sister ship theory of liability, a claimant may arrest both the vessel that is subject to the claimant's maritime lien and any associated vessel, which is any vessel owned or controlled by the same owner. Claimants could try to assert sister ship liability against one vessel in our fleet or in the Gemini Suezmax Pool, Teekay Aframax Pool or the Taurus Tankers LR2 Pool and Norient Product Pool for claims relating to another of our ships. In addition, port authorities may seek to detain our vessels in port, which could adversely affect our operating results or relationships with customers.

We depend on Teekay Corporation to assist us in operating our business and competing in our markets, and our business will be harmed if Teekay Corporation fails to assist us.

Pursuant to the terms of the Management Agreement, our Manager provides to us commercial, technical, administrative and strategic services, including vessel maintenance, crewing, purchasing, shipyard supervision, insurance and financial services. Our operational success and ability to execute our growth strategy depend significantly upon the satisfactory performance of these services by our Manager. Our business will be harmed if our Manager fails to perform these services satisfactorily, if it stops providing these services to us or if it terminates the Management Agreement, as it is entitled to do under certain circumstances. The circumstances under which we are able to terminate the Management Agreement are limited and do not include mere dissatisfaction with our Manager's performance. In addition, upon any termination of the Management Agreement, we may lose our ability to benefit from economies of scale in purchasing supplies and other advantages that we believe our relationship with Teekay Corporation provides. Furthermore, the profitable operation of our tankers that participate in tanker pooling arrangements depends largely on the efforts of the pool managers, Teekay Corporation's participation in the pooling arrangements and its reputation and relationships in the shipping industry. Under the pooling arrangements, the earnings and voyage expenses of all of the vessels in pools are aggregated, or pooled, and divided according to an agreed formula. If Teekay Corporation suffers material damage to its reputation or relationships, it may harm our ability to:

maximize revenues of our tankers included in the pooling arrangements;

acquire new tankers or obtain new time charters;

renew existing time charters upon their expiration;

successfully interact with shipyards during periods of shipyard construction constraints;

obtain financing on commercially acceptable terms; or

maintain satisfactory relationships with suppliers and other third parties.

If our ability to do any of the things described above is impaired, it could have a material adverse effect on our business, results of operations and financial condition.

Teekay Corporation and its affiliates may engage in competition with us.

In our articles of incorporation and in a contribution, conveyance and assumption agreement we entered into with Teekay Corporation in connection with our initial public offering, we have renounced business opportunities that may be attractive to both Teekay Corporation and us in favor of Teekay Corporation, which may strengthen Teekay Corporation's ability to compete with us.

The pooling arrangements we participate in are managed, in whole or in part, by Teekay Corporation subsidiaries. When operated in a pool, chartering decisions are made by the pool manager and vessel earnings are based on a formula designed to allocate the pool's earnings to vessel owners based on actual on-hire performance of the vessels they contributed, and attributes of the vessels, rather than amounts actually earned by those vessels. If we, Teekay Corporation or its affiliates terminate the pooling arrangements in which we participate pursuant to the terms thereof or if vessels of Teekay Corporation or us cease operating in the pooling arrangements for any other reason, our tankers may compete with other vessels owned or operated by Teekay Corporation to provide crude oil transportation services. In addition, we may compete with Teekay Corporation in seeking to charter any vessels in our fleet under fixed-rate time charters, whether upon the expiration or early termination of existing time charters or otherwise.

During 2012, we acquired four Suezmax tankers, three Aframax tankers, three LR2 product tankers and three MR product tankers from Teekay Corporation (which we refer to as the 2012 Acquired Business). In connection with the 2012 Acquired Business transaction, Teekay Corporation entered into a non-competition agreement with us in June 2012 that (a) limits Teekay Corporation's ability to expand its direct or indirect fleet of conventional and product tankers and (b) provides us a right of first refusal to acquire existing or newbuilding conventional and product tankers pursuant to opportunities Teekay Corporation develops. However, the non-competition agreement expires on June 15, 2015.

Table of Contents

Teekay Corporation may be unable to attract and retain qualified, skilled employees or crew necessary to operate our business.

Our success depends in large part on Teekay Corporation's ability to attract and retain highly skilled and qualified personnel. In crewing our vessels, we require technically skilled employees with specialized training who can perform physically demanding work. Competition to attract and retain qualified crew members is intense. If crew costs increase and we are not able to increase our rates to compensate for any crew cost increases, our financial condition and results of operations may be adversely affected. Any inability we experience in the future to hire, train and retain a sufficient number of qualified employees could impair our ability to manage, maintain and grow our business.

The superior voting rights of our Class B common stock held by Teekay Corporation limit our Class A common stockholders' ability to influence corporate matters.

Our Class B common stock has five votes per share and our Class A common stock has one vote per share. However, the voting power of the Class B common stock is limited such that the aggregate voting power of all shares of outstanding Class B common stock can at no time exceed 49% of the voting power of our outstanding Class A common stock and Class B common stock, voting together as a single class. As of the date of this Annual Report, Teekay Corporation indirectly owns shares of Class A and Class B common stock representing a majority of the voting power of our outstanding capital stock. Through its ownership of our Class B common stock and of our Manager and other entities that provide services to us, Teekay Corporation has substantial control and influence over our management and affairs and over all matters requiring stockholder approval, including the election of directors and significant corporate transactions. In addition, because of this dual-class common stock structure, Teekay Corporation will continue to be able to control matters submitted to our stockholders for approval even if it comes to own significantly less than 50% of the outstanding shares of our common stock. This voting control limits our Class A common stockholders' ability to influence corporate matters and, as a result, we may take actions that our Class A common stockholders do not view as beneficial.

Our Manager has rights to terminate the Management Agreement and, under certain circumstances, could receive substantial sums in connection with such termination; however, even if our Board of Directors or our stockholders are dissatisfied with our Manager, there are limited circumstances under which we can terminate the Management Agreement.

Our Management Agreement has an initial term through December 31, 2022 and will automatically renew for subsequent five-year terms provided that certain conditions are met. Our Manager has the right to terminate the Management Agreement with 12 months' notice. Our Manager also has the right to terminate the Management Agreement after a dispute resolution process if we have materially breached the Management Agreement. The Management Agreement will terminate upon the sale of all or substantially all of our assets to a third party, our liquidation or after any change of control of our company occurs. If the Management Agreement is terminated as a result of an asset sale, our liquidation or change of control, then our Manager may be paid a termination fee. Any such payment could be substantial.

In addition, our rights to terminate the Management Agreement are limited. Even if we are not satisfied with the Manager's efforts in managing our business, unless our Manager materially breaches the agreement or experiences certain bankruptcy or change of control events, we have only a limited right to terminate the agreement after 10 years and may not be able to terminate the agreement until the end of the initial 15-year term. If we elect to terminate the Management Agreement at either of these points or at the end of any subsequent renewal term, our Manager will receive a termination fee, which may be substantial.

Our Manager could receive a performance fee which is contingent on the results of operations and financial condition.

If Gross Cash Available for Distribution for a given fiscal year exceeds \$3.20 per share of our common stock (subject to adjustment for stock dividends, splits, combinations and similar events, and based on the weighted-average number of shares outstanding for the year) (or the *Incentive Threshold*), our Manager generally will be entitled to payment of a performance fee equal to 20% of all Gross Cash Available for Distribution for such year in excess of the Incentive Threshold. Although the performance fee is payable on an annual basis, we accrue any amounts expected to be payable in respect of the performance fee on a quarterly basis. Gross Cash Available for Distribution represents the distributable cashflows that we generate from operations.

Many seafaring employees are covered by collective bargaining agreements, and the failure to renew those agreements or any future labor agreements may disrupt operations and adversely affect our cash flows.

A significant portion of Teekay Corporation's seafarers that crew our vessels are employed under collective bargaining agreements. Teekay Corporation may become subject to additional labor agreements in the future. Teekay Corporation may suffer labor disruptions if relationships deteriorate with the seafarers or the unions that represent them. The collective bargaining agreements may not prevent labor disruptions, particularly when the agreements are being renegotiated. Salaries are typically renegotiated annually or biannually for seafarers. Although these negotiations have not caused labor disruptions in the past, any labor disruptions could harm our operations and could have a material adverse effect on our business, results of operations and financial condition.

Our executive officers and directors and the executive officers and directors of our Manager have conflicts of interest and limited fiduciary and contractual duties, which may permit them to favor interests of other Teekay Corporation affiliates above our interests and those of our Class A common stockholders.

Conflicts of interest may arise between Teekay Corporation, our Manager and their affiliates, on the one hand, and us and our stockholders, on the other hand. As a result of these conflicts, Teekay Corporation or our Manager may favor their own interests and the interests of their affiliates over our interests and those of our stockholders. These conflicts include, among others, the following situations:

our Chief Executive Officer and Chief Financial Officer and certain of our directors also serve as executive officers or directors of Teekay Corporation or our Manager, and we have limited their fiduciary duties regarding corporate opportunities that may be attractive to both Teekay Corporation and us;

Table of Contents

our Manager advises our Board of Directors about the amount and timing of asset purchases and sales, capital expenditures, borrowings, issuances of additional common stock and cash reserves, each of which can affect our ability to pay dividends to our stockholders and the amount of the performance fee payable to our Manager under the Management Agreement;

our executive officers and those of our Manager do not spend all of their time on matters related to our business; and

our Manager will advise us of costs incurred by it and its affiliates that it believes are reimbursable by us.

The fiduciary duties of certain of our officers and directors may conflict with their duties as officers or directors of Teekay Corporation and its affiliates.

Our officers and directors have fiduciary duties to manage our business in a manner beneficial to us and our stockholders. However, our Chief Executive Officer and Chief Financial Officer also serve as executive officers of Teekay Corporation, and some of our non-independent directors also serve as executive officers or directors of Teekay Corporation, our Manager, the general partner of Teekay LNG Partners L.P. and the general partner of Teekay Offshore Partners L.P. (both of which are controlled by Teekay Corporation), and, as a result, have fiduciary duties to manage the business of Teekay Corporation and its affiliates in a manner beneficial to such entities and their stockholders or partners, as the case may be. Consequently, these officers and directors may encounter situations in which their fiduciary obligations to Teekay Corporation, our Manager, Teekay LNG Partners L.P. or Teekay Offshore Partners L.P., on the one hand, and us, on the other hand, are in conflict. The resolution of these conflicts may not always be in our best interest or that of our stockholders.

Tax Risks

In addition to the following risk factors, you should read Item 4E. Taxation of the Company and Item 10. Additional Information Material U.S. Federal Income Tax Considerations and Non-United States Tax Considerations for a more complete discussion of the expected material U.S. federal and non-U.S. income tax considerations relating to us and the ownership and disposition of our Class A common stock.

U.S. tax authorities could treat us as a passive foreign investment company, which could have adverse U.S. federal income tax consequences to U.S. shareholders.

A non-U.S. entity treated as a corporation for U.S. federal income tax purposes will be treated as a passive foreign investment company (or *PFIC*) for such purposes in any taxable year for which either (a) at least 75% of its gross income consists of passive income, or (b) at least 50% of the average value of the entity's assets is attributable to assets that produce or are held for the production of passive income. For purposes of these tests, passive income includes dividends, interest, gains from the sale or exchange of investment property and rents and royalties other than rents and royalties that are received from unrelated parties in connection with the active conduct of a trade or business. By contrast, income derived from the performance of services does not constitute passive income.

There are legal uncertainties involved in determining whether the income derived from our time-chartering activities constitutes rental income or income derived from the performance of services, including the decision in *Tidewater Inc. v. United States*, 565 F.3d 299 (5th Cir. 2009), which held that income derived from certain time-chartering activities should be treated as rental income rather than services income for purposes of a foreign sales corporation provision of the U.S. Internal Revenue Code of 1986, as amended (or the *Code*). However, the Internal Revenue Service (or *IRS*)

stated in an Action on Decision (AOD 2010-01) that it disagrees with, and will not acquiesce to, the way that the rental versus services framework was applied to the facts in the *Tidewater* decision, and in its discussion stated that the time charters at issue in *Tidewater* would be treated as producing services income for PFIC purposes. The IRS's statement with respect to *Tidewater* cannot be relied upon or otherwise cited as precedent by taxpayers. Consequently, in the absence of any binding legal authority specifically relating to the statutory provisions governing PFICs, there can be no assurance that the IRS or a court would not follow the *Tidewater* decision in interpreting the PFIC provisions of the Code. Nevertheless, based on our current assets and operations, we intend to take the position that we are not now and have never been a PFIC. No assurance can be given, however, that the IRS, or a court of law, will accept our position or that we would not constitute a PFIC for any future taxable year if there were to be changes in our assets, income or operations.

If the IRS were to determine that we are or have been a PFIC for any taxable year, U.S. holders of our common stock will face adverse U.S. federal income tax consequences. Under the PFIC rules, unless those U.S. holders make certain elections available under the Code, such holders would be liable to pay tax at ordinary income tax rates plus interest upon certain distributions and upon any gain from the disposition of our common stock, as if such distribution or gain had been recognized ratably over the U.S. holder's holding period. Please read Item 10: Additional Information-Material U.S. Federal Income Tax Considerations-United States Federal Income Taxation of U.S. Holders-Consequences of Possible PFIC Classification.

We may be subject to taxes, which reduces our cash available for distribution to our shareholders.

We or some of our subsidiaries may be subject to tax in the jurisdictions in which we or our subsidiaries are organized or operate, reducing the amount of our cash available for distribution. In computing our tax obligation in these jurisdictions, we are required to take various tax accounting and reporting positions on matters that are not entirely free from doubt and for which we have not received rulings from the governing authorities. We cannot assure you that upon review of these positions the applicable authorities will agree with our positions. A successful challenge by a tax authority could result in additional tax imposed on us or our subsidiaries in jurisdictions in which operations are conducted. For example, if Teekay Tankers Ltd. was not able to meet the criteria specified by Section 883 of the U.S. Internal Revenue Code, our U.S. source income may become subject to taxation.

Table of Contents

Item 4. Information on the Company

A. History and Development of the Company

We are an international provider of marine transportation to global oil industries. We were formed as a Marshall Islands corporation in October 2007 by Teekay Corporation (NYSE: TK), a leading provider of marine services to the global oil and natural gas industries. We completed our initial public offering on December 18, 2007 with an initial fleet of nine Aframax oil tankers which were transferred to us by Teekay Corporation

Our fleet size has increased from nine owned Aframax tankers in 2007 to 27 owned vessels, one chartered-in vessel and one jointly-owned Very Large Crude Carrier (*or VLCC*) as of December 31, 2013. Our capacity has risen from approximately 980,000 deadweight tonnes (*or dwt*) in 2007 to approximately 3,700,000 dwt as of December 31, 2013. Over the last five years, we have acquired a total of 19 conventional tankers from Teekay Corporation, including eight Suezmax tankers, five Aframax tankers, three Long Range 2 (*or LR2*) product tankers, and three Medium Range (*or MR*) product tankers, and sold three Aframax tankers. From time to time, we also charter-in vessels, typically from third parties as part of our chartering strategy. Please read *Business Strategies* below in this Item. In 2010, we entered into a joint venture with a third party to construct a VLCC newbuilding, which was delivered in June 2013. Most of the acquisitions were financed by a combination of utilizing the net proceeds from public equity offerings, as well as the assumption of existing debt, drawing on our revolving credit facility, and using our available working capital.

In April 2013, we entered into agreements with STX Offshore & Shipbuilding Co. Ltd. (*or STX*) of South Korea to construct four fuel-efficient 113,000 dwt LR2 product tanker newbuildings plus options to order up to an additional 12 vessels. The payment of our first shipyard installment was contingent on us receiving acceptable refund guarantees for the shipyard installment payments. In October and November 2013, we exercised our options to order eight additional LR2 newbuildings, in aggregate, under option agreements relating to the original STX LR2 shipbuilding agreements signed in April 2013. STX did not produce shipbuilding contracts within the specified timeframe of the option declarations and, informed us that there was no prospect of the refund guarantees being provided under any of the firm or option contracts and therefore, is in breach of the option agreements. In December 2013, the newbuilding agreements were terminated by us and in February 2014, the option agreements were terminated. In February 2014, we commenced legal action for damages. Please read Item 18 *Financial Statement: Note 18 Shipbuilding Contracts* and Note 19 *Subsequent Events*.

We are incorporated under the laws of the Republic of The Marshall Islands as Teekay Tankers Ltd. and maintain our principal executive offices at 4th Floor, Belvedere Building, 69 Pitts Bay Road, Hamilton, HM 08, Bermuda. Our telephone number at such address is (441) 298-2530. Our principal operating office is located at Suite 2000, Bentall 5, 550 Burrard Street, Vancouver, British Columbia, Canada, V6C 2K2. Our telephone number at such address is (604) 683-3529.

B. Business Overview

Our business is to own crude oil and product tankers and we employ a chartering strategy that seeks to capture upside opportunities in the spot market while using fixed-rate time charters to reduce downside risks. Teekay Corporation, which formed us in 2007, is a leading provider of marine services to the global oil and natural gas industries and the world's largest operator of medium-sized oil tankers. We believe we benefit from Teekay Corporation's expertise, relationships and reputation as we operate our fleet and pursue growth opportunities. We have acquired all of our current operating fleet from Teekay Corporation at various times since our inception and we anticipate additional opportunities to expand our fleet through acquisitions of tankers from third parties, and additional tankers that Teekay Corporation may offer to us from time to time. These tankers may include crude oil and product tankers.

Since the first quarter of 2013, we have distributed to our shareholders a fixed quarterly dividend of \$0.03 per share (\$0.12 per share annually), which is reviewed from time to time by our Board of Directors. Prior to the first quarter of 2013, we distributed to our shareholders on a quarterly basis, all of our Cash Available for Distribution, subject to any reserves our Board of Directors determined to be required for prudent conduct of our business. For additional information about our dividend policy, please read Item 8 Financial Information: Dividend Policy.

Under the supervision of our executive officers and Board of Directors, our operations are managed by Teekay Tankers Management Services Ltd. (our *Manager*), a subsidiary of Teekay Corporation, that provides to us commercial, technical, administrative and strategic services. We have entered into a long-term agreement with our Manager (the *Management Agreement*) pursuant to which our Manager and its affiliates provide to us technical, administrative and strategic services. Commercial services are provided to us by other wholly or partially owned subsidiaries of Teekay Corporation that manage the Gemini Suezmax Pool, the Teekay Aframax Pool and the Taurus Tankers LR2 Pool. We pay our Manager a market-based fee for these services. In order to provide our Manager with an incentive to improve our operation and financial conditions, we have agreed to pay a performance fee to our Manager under certain circumstances, in addition to the basic fee provided in the Management Agreement. Please read Item 7 Major Shareholders and Related Party Transactions: Related Party Transactions Management Agreement for additional information about the Management Agreement.

We employ our chartering strategy based on the outlook of our Manager for freight rates, oil tanker market conditions and global economic conditions. As of December 31, 2013, we owned 27 vessels, in-chartered one vessel and owned 50% of a VLCC held by our joint venture with Wah Kwong Maritime Transport Holdings Limited. Please refer to Our Fleet table below. We employ our vessels on fixed rate time-charter out contracts and in various pooling arrangements, the majority of which are managed by wholly or partially owned subsidiaries of Teekay Corporation which employ vessels on the spot market. By employing some of our vessels in these pooling arrangements with Teekay, we believe we benefit from Teekay Corporation's expertise in commercial management of oil tankers and economies of scale of a larger fleet, including higher vessel utilization and daily revenues. We also believe that these pooling arrangements limit Teekay Corporation's ability to compete with us in the spot market.

Table of Contents**Our Fleet**

As at December 31, 2013, our fleet consisted of 29 vessels, including one chartered-in vessel and one 50%-owned VLCC. The following table summarizes our fleet as at December 31, 2013:

	Owned Vessels	Chartered-in Vessels	Total
Fixed-rate:			
Suezmax Tankers	2		2
Aframax Tankers ⁽¹⁾	10		10
Medium Range Product Tankers	1		1
VLCC Tankers ⁽²⁾	1		1
Total Fixed-Rate Fleet ⁽³⁾	14		14
Spot-rate:			
Suezmax Tankers	8		8
Aframax Tankers ⁽⁴⁾	1	1	2
Long Range 2 Product Tankers	3		3
Medium Range Product Tankers	2		2
Total Spot Fleet ⁽⁵⁾	14	1	15
Total Teekay Tankers Fleet	28	1	29

- (1) Includes one Aframax tanker on a time-charter out contract, which started in January 2014 and is scheduled to end in January 2015.
- (2) Includes a VLCC that we own through a 50/50 joint venture with Wah Kwong Maritime Transport Holdings Limited (please refer to Note 5 - Investment in Joint Venture included in Item 18 Financial Statements in this Annual Report).
- (3) The number of time-charter out contracts scheduled to expire include six in 2014, four in 2015, and three in 2016, respectively, and one jointly owned VLCC time-charter out contract is scheduled to expire in 2018.
- (4) Includes one Aframax tanker that was time-chartered in until January 2014, with options to extend for up to additional two years. One of the options was exercised by us in January 2014, which extended re-delivery date of the vessel until January 2015.
- (5) As at December 31, 2013, the four pooling arrangements in which we participate, and including vessels owned by other pool members, were comprised of a total of 33 Suezmax tankers, 24 Aframax tankers, 18 LR2 product tankers and 40 MR product tankers.

The following table provides additional information about our owned Suezmax-class oil tankers as of December 31, 2013, all of which are of Marshall Islands registry.

Vessel	Capacity (dwt)	Built	Employment	Daily Rate	Expiration of Charter
--------	-------------------	-------	------------	------------	--------------------------

Everest Spirit	115,000	2004	Time charter	\$ 15,500	Apr 2016
Helga Spirit	115,500	2005	Time charter	\$ 18,000	Aug 2014
Kanata Spirit	113,000	1999	Time charter	\$ 15,150	Jul 2014
Kareela Spirit	113,100	1999	Pool		
Kyeema Spirit	113,300	1999	Time charter	\$ 17,000	Jan 2014
Matterhorn Spirit	114,800	2005	Time charter	\$ 18,000	Oct 2014
Total Capacity	1,254,800				

(1) The Aframax tanker, Erik Spirit, commenced a time-charter out contract in January 2014.

Table of Contents

The following table provides additional information about our owned LR2 product-class oil tankers as of December 31, 2013, all of which are of Marshall Islands registry.

Vessel	Capacity (dwt)	Built	Employment	Daily Rate	Expiration of Charter
Donegal Spirit	105,200	2006	Pool		
Galway Spirit	105,200	2007	Pool		
Limerick Spirit	105,200	2007	Pool		
Total Capacity	315,600				

The following table provides additional information about our owned MR product-class oil tankers as of December 31, 2013, all of which are of Marshall Islands registry.

Vessel	Capacity (dwt)	Built	Employment	Daily Rate	Expiration of Charter
Hugli Spirit ⁽¹⁾	46,900	2005	Time charter	\$ 27,130	Feb 2015
Mahanadi Spirit	46,900	2000	Pool		
Teesta Spirit	47,000	2004	Pool		
Total Capacity	140,800				

(1) The charter rate on the Hugli Spirit includes approximately \$14,000 per day for the additional costs relating to Australian crew versus international crew.

Please read Note 8 - Long-Term Debt included in Item 18 Financial Statements included in this Annual Report for information with respect to major encumbrances against our vessels.

Business Strategies

Our primary business strategies include the following:

Expand our fleet through accretive acquisitions. Since our initial public offering, we have purchased 21 conventional tankers from Teekay Corporation at prices equal to their fair market values. In the future, we anticipate growing our fleet primarily through acquisitions of tankers from third parties and by ordering newbuildings.

Tactically manage our mix of spot and charter contracts. We employ a chartering strategy that seeks to capture upside opportunities in the spot market while using fixed-rate time charters to reduce downside risks. We believe that our Manager's experience operating through cycles in the tanker spot market will assist us in employing this

strategy and seeking to maximize operating results.

Increase cash flow by participating in the pooling arrangements. Through the participation of a significant number of our vessels in the Gemini Suezmax Pool, the Teekay Aframax Pool, the Taurus Tankers LR2 Pool, we believe that we benefit from Teekay Corporation's reputation and the scope of Teekay Corporation's operations. We believe that the cash flow we derive over time from operating some of our vessels in these pooling arrangements exceeds the amount we would otherwise derive by operating these vessels outside of the pooling arrangements due to higher vessel utilization and daily revenues.

Provide superior customer service by maintaining high reliability, safety, environmental and quality standards. We believe that energy companies seek transportation partners that have a reputation for high reliability, safety, environmental and quality standards. We leverage our reputation for operational expertise and customer base to further expand these relationships with consistent delivery of superior customer service through our Manager.

Our Chartering Strategy and Participation in the Gemini Suezmax Pool, Teekay Aframax Pool and Taurus Tankers LR2 Pool

Chartering Strategy. We operate our vessels in both the spot market and under time charters of varying lengths in an effort to maximize cash flow from our vessels based on our Manager's outlook for freight rates, oil tanker market conditions and global economic conditions. As of December 31, 2013, a total of 12 of our vessels and one time-chartered in vessel operated in the spot market through participation in Teekay managed pooling arrangements. Eight of these operated in the Gemini Pool, one of our owned vessels and one time-chartered in vessel operated in the Teekay Aframax Pool, three operated in the Taurus Tankers LR2 Pool. As of December 31, 2013, a total of 13 of our vessels and one jointly-owned vessel operated under fixed-rate time-charter contracts. Our mix of vessels trading in the spot market or subject to fixed-rate time charters will change from time to time. Our Manager also may seek to hedge our spot exposure through the use of freight forward agreements or other financial instruments. Likewise, the managers of the Gemini Suezmax Pool, Teekay Aframax Pool, Taurus Tankers LR2 Pool and Norient Product Pool may, with our approval, enter into fixed-rate time charters for vessels we include in those pooling arrangements, thereby decreasing spot-rate exposure without withdrawing the vessels from the pooling arrangements.

The Gemini Suezmax Pool, the Teekay Aframax Pool, and the Taurus Tankers LR2 Pool. As of December 31, 2013, and including our owned and time-chartered in vessels, the Gemini Suezmax Pool and Teekay Aframax Pool were comprised of 33 Suezmax and 24 Aframax crude tankers, respectively, and the Taurus Tankers LR2 Pool included 18 LR2 product tankers. Under the pooling arrangements, the aggregate revenues generated by the entire applicable pools are distributed to pool members, including us, pursuant to a pre-arranged weighting system based on actual earnings days each vessel is available during the applicable period and each vessel's earnings capability based on its characteristics, speed and bunker consumption. The allocation for each vessel participating in the pool is established based on observations and historical consumption and performance measures of the individual vessel. Payments based on net cash flow applicable to each tanker are made on a monthly basis to pool participants and adjusted at standard intervals determined by each pool based on the weighting system. We have agreed with the respective pool managers and pool participants to include certain of our vessels trading on voyage charters into the pooling arrangements assuming the vessel meets the respective pooling criteria. For example, for our Suezmax tankers that

Table of Contents

are operating on voyage charters with terms less than a year, are included in the Gemini Suezmax pool. Likewise, Aframax tankers on voyage charters with terms of 90 days or less participate in the Teekay Aframax Pool and LR2 vessel with voyage charters of less than 90 days would be included in the Taurus Tankers LR2 Pool. Please read Item 7 Major Shareholders and Related Party Transactions: Related Party Transactions Pooling Arrangements, for additional information about the Gemini Suezmax Pool, the Teekay Aframax Pool, and the Taurus Tankers LR2 Pool.

Voyage Charters. Tankers operating in the spot market typically are chartered for a single voyage, which may last up to several weeks. Spot market revenues may generate increased profit margins during times when tanker rates are increasing, while tankers operating under fixed-rate time charters generally provide more predictable cash flows. Under a typical voyage charter in the spot market, the shipowner is paid on the basis of moving cargo from a loading port to a discharge port. The shipowner is responsible for paying both vessel operating costs and voyage expenses, and the charterer is responsible for any delay at the loading or discharging ports. Voyage expenses are all expenses attributable to a particular voyage, including any bunker fuel expenses, port fees, cargo loading and unloading expenses, canal tolls, agency fees and commissions. Vessel operating expenses are incurred regardless of particular voyage details and include crewing, repairs and maintenance, insurance, stores, lube oils and communication expenses. When the vessel is off hire, or not available for service, the vessel would be unavailable to complete new voyage charters until the off hire was finalized and the vessel became available again for service. In addition, if the vessel is off hire while trading in the Teekay Pool, Taurus Pool, Gemini Pool and Norient Product Pool, the vessel will have those off hire days deducted from its monthly calculation of available days for the purpose of pool distributions. Under a voyage charter, the shipowner is generally required, among other things, to keep the vessel seaworthy, to crew and maintain the vessel and to comply with applicable regulations.

Time Charters. A time charter is a contract for the use of a vessel for a fixed period of time at a specified daily rate. A customer generally selects a time charter if it wants a dedicated vessel for a period of time, and the customer is commercially responsible for the use of the vessel. Under a typical time charter, the shipowner provides crewing and other services related to the vessel's operation, the cost of which is included in the daily rate, while the customer is responsible for substantially all of the voyage expenses. When the vessel is off hire, the customer generally is not required to pay the hire rate and the owner is responsible for all costs. Hire rate refers to the basic payment from the charterer for the use of the vessel. Under our time charters, hire is payable monthly in advance in U.S. Dollars. Hire payments may be reduced, or under some time charters the shipowner must pay liquidated damages, if the vessel does not perform to certain of its specifications, such as if the amount of fuel consumed to power the vessel under normal circumstances exceeds a guaranteed amount. When the vessel is off hire, or not available for service, the charterer generally is not required to pay the hire rate, and the shipowner is responsible for all costs, including the cost of fuel bunkers, unless the charterer is responsible for the circumstances giving rise to the lack of availability. A vessel generally will be deemed to be off hire if there is an occurrence preventing the full working of the vessel.

Time-Charter-in. A time-charter in vessel is one that is contracted from another party for use by us for a fixed period of time at a specified daily rate. We may choose to place the time-chartered in vessel in a pooling arrangement if it meets the standards to participate in a pooling arrangement or to employ it on a fixed rate time-charter out for the same period of time the vessel is chartered-in to us or for shorter depending on the market conditions and the Managers outlook for the market. Under a typical time-charter in, the shipowner provides crewing and other services related to the vessel's operation, the cost of which is included in the daily hire rate. The customer is responsible for substantially all of the voyage-related expenses. When the vessel is off hire the customer generally is not required to pay the hire rate, and the shipowner is responsible for all costs, including the cost of fuel bunkers, unless the charterer is responsible for the circumstances giving rise to the lack of availability. A vessel generally will be deemed to be off hire if there is an occurrence preventing the full working of the vessel.

Industry and Competition

We compete in the Suezmax and Aframax crude oil tanker markets. Our competition in the Aframax (80,000 to 119,999 dwt) and Suezmax (120,000 to 199,999 dwt) markets is also affected by the availability of other size vessels that compete in our markets. Suezmax size vessels and Panamax (55,000 to 79,999 dwt) size vessels can compete for many of the same charters for which our Aframax tankers compete; Aframax size vessels and VLCCs (200,000 to 319,999 dwt) can compete for many of the same charters for which our Suezmax tankers may compete. Because of their large size, VLCCs and Ultra Large Crude Carriers (320,000+ dwt) (or *ULCCs*) rarely compete directly with Aframax tankers, and ULCCs rarely compete with Suezmax tankers for specific charters. However, because VLCCs and ULCCs comprise a substantial portion of the total capacity of the market, movements by such vessels into Suezmax trades and of Suezmax vessels into Aframax trades would heighten the already intense competition.

We also compete in the LR2 and MR product tanker markets. Our competition in the LR2 (80,000 to 119,999 dwt) and MR (40,000 to 59,999 dwt) product tanker markets is affected by the availability of other size vessels that compete in our markets. Long Range 1 (LR1) (60,000-79,999 dwt) size vessels can compete for many of the same charters for which our LR2 tankers compete; LR1 and Handysize (25,000 – 39,999 dwt) vessels can compete for many of the same charters for which our MR tankers may compete.

Seaborne transportation of crude oil and refined petroleum products are provided both by major energy companies (private as well as state-owned) and by independent ship owners. The desire of many major energy companies to outsource all or a portion of their shipping requirements has caused the number of conventional oil tankers owned by energy companies to decrease in the last 20 years. As a result of this trend, independent tanker companies now own or control a large majority of the international tanker fleet.

As of December 31, 2013, other large operators of Aframax tonnage (including newbuildings on order) included Malaysian International Shipping Corporation (approximately 50 Aframax vessels), Sovcomflot (approximately 42 vessels), the Navig8 Pool (approximately 24 vessels), and the Sigma Pool (approximately 28 vessels). Other large operators of Suezmax tonnage (including newbuildings on order) included the Stena Sonangol Pool (approximately 21 vessels), the Blue Fin Pool (approximately 18 vessels), and Sovcomflot (approximately 18 vessels).

As of December 31, 2013, the largest operators of LR2 tonnage (including newbuildings on order) included the Torm LR2 pool (approximately 29 vessels), Ocean Tankers (approximately 14 vessels) and the Sigma Pool (approximately 11 vessels). As of December 31, 2013, the largest operators of MR tonnage (including newbuildings on order) included Scorpio Tankers (approximately 57 vessels), the Torm MR Pool (approximately 43 vessels), the Norient pool (approximately 40 vessels), Stena Bulk (approximately 35 vessels), the Handytankers Pool (approximately 32 vessels), Sovcomflot (approximately 28 vessels) and Diamond S Shipping (approximately 33 vessels).

Table of Contents

Competition in both the crude and product tanker market is primarily based on price, location (for single-voyage or short-term charters), size, age, condition and acceptability of the vessel, oil tanker shipping experience and quality of ship operations, and the size of an operating fleet, with larger fleets allowing for greater vessel substitution, availability and customer service. Aframax and Suezmax tankers are particularly well-suited for short-haul and medium-haul crude oil routes; LR2 tankers are well-suited for long and medium-haul refined product routes while MR tankers are well-suited for short and medium-haul refined product routes.

Historically, the tanker industry has been cyclical, experiencing volatility in profitability due to changes in oil tanker demand and oil tanker supply. The cyclical nature of the tanker industry causes significant increases or decreases in charter rates earned by operators of oil tankers. Because voyage charters occur in short intervals and are priced on a current, or spot, market rate, the spot market is more volatile than time charters and the tanker industry generally. In the past, there have been periods when spot rates declined below the operating cost of the vessels.

Oil Tanker Demand. Demand for oil tankers is a function of several factors, including world oil demand and supply (which affect the amount of crude oil and refined products transported in tankers), and the relative locations of oil production, refining and consumption (which affects the distance over which the oil or refined products are transported).

Oil has been one of the world's primary energy sources for a number of decades. As of February 2014, the International Energy Agency (or *IEA*) estimated that oil consumption will increase from 91.3 million barrels per day (or mb/d) in 2013, to 92.6 mb/d in 2014 driven by increasing consumption in non-OECD countries. A majority of known oil reserves are located in regions far from major consuming regions, which contributes positively toward demand for oil tankers.

The distance over which crude oil or refined petroleum products is transported is determined by seaborne trading and distribution patterns, which are principally influenced by the relative advantages of the various sources of production and locations of consumption. Seaborne trading patterns are also periodically influenced by geopolitical events, such as wars, hostilities and trade embargoes that divert tankers from normal trading patterns, as well as by inter-regional oil trading activity created by oil supply and demand imbalances. Historically, the level of oil exports from the Middle East has had a strong effect on the crude tanker market due to the relatively long distance between this supply source and typical discharge points. Over the past few years, the growing economies of China and India have increased and diversified their oil imports, resulting in an overall increase in transportation distance for crude tankers. Major consumers in Asia have increased their crude import volumes from longer-haul producers, such as those in the Atlantic Basin.

The limited growth in refinery capacity in developed nations, the largest consumers of oil in recent years, and increasing refinery capacity in the Middle East and parts of Asia where capacity surplus supports exports, have also altered traditional trading patterns and contributed to the overall increase in transportation distance for both crude tankers and products tankers.

Oil Tanker Supply. New Aframax, Suezmax, LR2 and MR tankers are generally expected to have a lifespan of approximately 25 to 30 years, based on estimated hull fatigue life. However, U.S. and international regulations require the earlier phase-out of existing vessels that are not double-hulled, regardless of their expected lifespan. As of December 31, 2013, the world Aframax crude tanker fleet consisted of 629 vessels, with an additional 37 Aframax crude oil tanker newbuildings on order for delivery through 2017; the world Suezmax crude tanker fleet consisted of 447 vessels, with an additional 42 Suezmax crude oil tanker newbuildings on order for delivery through 2016; the world LR2 product tanker fleet consisted of 248 vessels, with an additional 64 LR2 product tanker newbuildings on order through 2016; and the world MR product tanker fleet consisted of 1,188 vessels, with an additional 285 MR

product tanker newbuildings on order through 2017. Currently, delivery of a vessel typically occurs within two to three years after ordering.

The supply of oil tankers is primarily a function of new vessel deliveries, vessel scrapping and the conversion or loss of tonnage. The level of newbuilding orders is primarily a function of newbuilding prices in relation to current and prospective charter market conditions. Another factor that affects tanker supply is the available shipyard capacity. The level of vessel scrapping activity is primarily a function of scrapping prices in relation to current and prospective charter market conditions and operating, repair and survey costs. Industry regulations also affect scrapping levels. Please read Regulations below. Demand for drybulk vessel and floating storage off-take units, to which tankers can be converted, strongly affects the number of tanker conversions.

For more than a decade, there has been a significant and ongoing shift toward quality in vessels and operations, as charterers and regulators increasingly focus on safety and protection of the environment. Since 1990, there has been an increasing emphasis on environmental protection through legislation and regulations such as OPA 90, International Maritime Organization (or *IMO*) regulations and protocols, and classification society procedures that demand higher quality tanker construction, maintenance, repair and operations. We believe that operators with proven ability to integrate these required safety regulations into their operations have a competitive advantage.

Safety, Management of Ship Operations and Administration

Safety and environmental compliance are our top operational priorities. Our vessels are operated by our Manager in a manner intended to protect the safety and health of our employees, the general public and the environment. We and our Manager actively seek to manage the risks inherent in our business and are committed to eliminating incidents that threaten the safety and integrity of our vessels, such as groundings, fires, collisions and petroleum spills. In 2007, our Manager introduced a behavior-based safety program called *Safety in Action* to further enhance the safety culture in our fleet. We are also committed to reducing our emissions and waste generation. In 2008, our Manager introduced the Quality Assurance and Training Officers (or *QATO*) Program to conduct rigorous internal audits of our processes and provide our seafarers with onboard training.

Teekay Corporation, through certain of its subsidiaries, provides technical management services for all of our vessels. Teekay Corporation has obtained through Det Norske Veritas (*or DNV*), the Norwegian classification society, approval of its safety management system as in compliance with the International Safety Management Code (*or ISM Code*), and this system has been implemented for all of our vessels. As part of Teekay Corporation's ISM Code compliance, all of the vessels' safety management certificates are maintained through ongoing internal audits performed by Teekay Corporation's certified internal auditors and intermediate audits performed by DNV.

Table of Contents

Our Manager provides, through certain of its subsidiaries, expertise in various functions critical to our operations and access to human resources, financial and other administrative functions. Critical ship management functions that our Manager provides to us through its affiliates include:

vessel maintenance;

crewing;

purchasing;

shipyard supervision;

insurance; and

financial management services.

These functions are supported by onboard and onshore systems for maintenance, inventory, purchasing and budget management.

All vessels are operated by our Manager under a comprehensive and integrated Safety Management System that complies with the ISM Code, the International Standards Organization's (or *ISO*) 9001 for Quality Assurance, ISO 14001 for Environment Management Systems, and Occupational Health and Safety Assessment Series (or OHSAS) 18001 and the new Maritime Labour Convention 2006 (MLC 2006) that became enforceable on August 20, 2013. The management system is certified by DNV. Although certification is valid for five years, compliance with the above mentioned standards is confirmed on a yearly basis by a rigorous auditing procedure that includes both internal audits as well as external verification audits by DNV and certain flag states.

In addition, Teekay Corporation's day-to-day focus on cost control is applied to our operations. Teekay Corporation and two other shipping companies are participants in a purchasing alliance, Teekay Bergesen Worldwide, which leverages the purchasing power of the combined fleets, mainly in such commodity areas as lube oils, paints and other chemicals. Through our Manager, we benefit from this purchasing alliance.

Risk of Loss, Insurance and Risk Management

The operation of any ocean-going vessel carries an inherent risk of catastrophic marine disasters, death or injury of persons and property losses caused by adverse weather conditions, mechanical failures, human error, war, terrorism, piracy and other circumstances or events. In addition, the transportation of crude oil and petroleum products is subject to the risk of spills and to business interruptions due to political circumstances in foreign countries, hostilities, labor strikes and boycotts. The occurrence of any of these events may result in loss of revenues or increased costs.

We carry hull and machinery (marine and war risks) and protection and indemnity insurance coverage to protect against most of the accident-related risks involved in the conduct of our business. Hull and machinery insurance

covers loss of or damage to a vessel due to marine perils such as collision, grounding and weather. Protection and indemnity insurance indemnifies us against other liabilities incurred while operating vessels, including injury to the crew, third parties, cargo loss and pollution. The current maximum amount of our coverage for pollution is \$1 billion per vessel per incident. We also carry insurance policies covering war risks (including piracy and terrorism). None of our vessels are insured against loss of revenues resulting from vessel off-hire time, based on the cost of this insurance compared to our off-hire experience. We believe that current insurance coverage is adequate to protect against most of the accident-related risks involved in the conduct of our business and that we maintain appropriate levels of environmental damage and pollution coverage. However, we cannot guarantee that all covered risks are adequately insured against, that any particular claim will be paid or that we will be able to procure adequate insurance coverage at commercially reasonable rates in the future. More stringent environmental regulations at times in the past have resulted in increased costs for, and may result in the lack of availability of, insurance against the risks of environmental damage or pollution.

We use in our operations Teekay Corporation's thorough risk management program that includes, among other things, risk analysis tools, maintenance and assessment programs, a seafarers competence training program, seafarers workshops and membership in emergency response organizations. We believe we benefit from Teekay Corporation's commitment to safety and environmental protection as certain of its subsidiaries assist us in managing our vessel operations.

Teekay Corporation has achieved certification under the standards reflected in ISO 9001 for quality assurance, ISO 14001 for environment management systems, Occupational Health and Safety Advisory Services 18001, and the IMO's International Management Code for the Safe Operation of Ships and Pollution Prevention on a fully integrated basis.

Flag, Classification, Audits and Inspections

Our vessels are registered with reputable flag states, and the hull and machinery of all of our vessels have been classed by one of the major classification societies and members of the International Association of Classification Societies Ltd (or *IACS*): DNV, Lloyd's Register of Shipping or American Bureau of Shipping.

The applicable classification society certifies that the vessel's design and build conforms to the applicable class rules and meets the requirements of the applicable rules and regulations of the country of registry of the vessel and the international conventions to which that country is a signatory. The classification society also verifies throughout the vessel's life that it continues to be maintained in accordance with those rules. In order to validate this, the vessels are surveyed by the classification society, in accordance to the classification society rules, which in the case of our vessels follows a comprehensive five-year special survey cycle, renewed every fifth year. During each five-year period the vessel undergoes annual and intermediate surveys, the scrutiny and intensity of which is primarily dictated by the age of the vessel. Because our vessels are modern and we have enhanced the resiliency of the underwater coatings of each vessel hull and marked the hull to facilitate underwater inspections by divers, their underwater areas are inspected in a dry dock at five-year intervals. In-water inspection is carried out during the second or third annual inspection (i.e. during an intermediate survey).

Table of Contents

In addition to class surveys, the vessel's flag state also verifies the condition of the vessel during annual flag state inspections, either independently or by additional authorization to class. Also, port state authorities of a vessel's port of call are authorized under international conventions to undertake regular and spot checks of vessels visiting their jurisdiction.

Processes followed onboard are audited by either the flag state or the class society acting on behalf of flag state to ensure that they meet the requirements of the ISM Code DNV typically carries out this task. We also follow an internal process of internal audits undertaken at each office and vessel annually.

We follow a comprehensive inspections scheme supported by our sea staff, shore-based operational and technical specialists and members of our QATO program. We carry out regular inspections, which help us to ensure that:

our vessels and operations adhere to our operating standards;

the structural integrity of the vessel is being maintained;

machinery and equipment is being maintained to give reliable service;

we are optimizing performance in terms of speed and fuel consumption; and

the vessel's appearance supports our brand and meets customer expectations.

Our customers also often carry out vetting inspections under the Ship Inspection Report Program, which is a significant safety initiative introduced by the Oil Companies International Marine Forum to specifically address concerns about sub-standard vessels. The inspection results permit charterers to screen a vessel to ensure that it meets their general and specific risk-based shipping requirements.

We believe that the heightened environmental and quality concerns of insurance underwriters, regulators and charterers will generally lead to greater scrutiny, inspection and safety requirements on all vessels in the oil tanker markets and will accelerate the scrapping or phasing out of older vessels throughout these markets.

Overall we believe that our relatively new, well-maintained and high-quality vessels provide us with a competitive advantage in the current environment of increasing regulation and customer emphasis on quality of service.

Regulations

General

Our business and the operation of our vessels are significantly affected by international conventions and national, state and local laws and regulations in the jurisdictions in which our vessels operate, as well as in the country or countries of their registration. Because these conventions, laws and regulations change frequently, we cannot predict the ultimate cost of compliance or their impact on the resale price or useful life of our vessels. Additional conventions, laws and regulations may be adopted that could limit our ability to do business or increase the cost of our doing

business and that may materially adversely affect our operations. We are required by various governmental and quasi-governmental agencies to obtain permits, licenses and certificates with respect to our operations. Subject to the discussion below and to the fact that the kinds of permits, licenses and certificates required for the operations of the vessels we own will depend on a number of factors, we believe that we will be able to continue to obtain all permits, licenses and certificates material to the conduct of our operations.

International Maritime Organization (or IMO).

The IMO is the United Nations agency for maritime regulation. IMO regulations relating to pollution prevention for oil tankers have been adopted by many of the jurisdictions in which our tanker fleet operates. Under IMO regulations, and subject to limited exceptions, a tanker must be of double-hull construction, be of a mid-deck design with double-side construction or be of another approved design ensuring the same level of protection against oil pollution. All of our tankers are double-hulled.

Many countries, but not the United States, have ratified and follow the liability regime adopted by the IMO and set out in the International Convention on Civil Liability for Oil Pollution Damage, 1969, as amended (or *CLC*). Under this convention, a vessel's registered owner is strictly liable for pollution damage caused in the territorial waters of a contracting state by discharge of persistent oil (e.g. crude oil, fuel oil, heavy diesel oil or lubricating oil), subject to certain defenses. The right to limit liability to specified amounts that are periodically revised is forfeited under the CLC when the spill is caused by the owner's actual fault or when the spill is caused by the owner's intentional or reckless conduct. Vessels trading to contracting states must provide evidence of insurance covering the limited liability of the owner. In jurisdictions where the CLC has not been adopted, various legislative regimes or common law governs, and liability is imposed either on the basis of fault or in a manner similar to the CLC.

IMO regulations also include the International Convention for Safety of Life at Sea (or *SOLAS*), including amendments to SOLAS implementing the International Ship and Port Facility Security Code (or *ISPS*), the ISM Code, the International Convention on Load Lines of 1966. SOLAS provides rules for the construction of and equipment required for commercial vessels and includes regulations for safe operation. Flag states, which have ratified the convention and the treaty generally employ the classification societies, which have incorporated SOLAS requirements into their class rules, to undertake surveys to confirm compliance.

SOLAS and other IMO regulations concerning safety, including those relating to treaties on training of shipboard personnel, lifesaving appliances, radio equipment and the global maritime distress and safety system, are applicable to our operations. Non-compliance with IMO regulations, including SOLAS, the ISM Code, ISPS and other regulations, may subject us to increased liability or penalties, may lead to

Table of Contents

decreases in available insurance coverage for affected vessels and may result in the denial of access to or detention in some ports. For example, the U.S. Coast Guard and European Union authorities have indicated that vessels not in compliance with the ISM Code will be prohibited from trading in U.S. and European Union ports. The ISM Code requires vessel operators to obtain a safety management certification for each vessel they manage, evidencing the shipowner's development and maintenance of an extensive safety management system. Each of the existing vessels in our fleet is currently ISM Code-certified, and we expect to obtain safety management certificates for each newbuilding vessel upon delivery.

Annex VI to the IMO's International Convention for the Prevention of Pollution from Ships (or *Annex VI*) sets limits on sulfur oxide and nitrogen oxide emissions from ship exhausts and prohibits emissions of ozone depleting substances, emissions of volatile compounds from cargo tanks and the incineration of specific substances. Annex VI also includes a world-wide cap on the sulfur content of fuel oil and allows for special areas to be established with more stringent controls on sulfur emissions.

The IMO has issued guidance regarding protecting against acts of piracy off the coast of Somalia. We comply within these guidelines.

In addition, the IMO has proposed (by the adoption in 2004 of the International Convention for the Control and Management of Ships' Ballast Water and Sediments (or the *Ballast Water Convention*)) that all tankers of the size we operate that are built starting in 2012 contain ballast water treatment systems, and that all other similarly sized tankers install treatment systems in order to comply with their first renewal or renewal survey after 2016 in order to comply with the renewal survey required for the International Oil Pollution Prevention certificate. This convention has not yet entered into force, but when it becomes effective, we estimate that the installation of ballast water treatment systems on our tankers may cost between \$2 million and \$3 million per vessel.

European Union (or EU)

Like the IMO, the EU has adopted regulations phasing out single-hull tankers. All of our tankers are double-hulled. On May 17, 2011, the European Commission carried out a number of dawn raids, or unannounced inspections, at the offices of some of the world's largest container line operators starting an antitrust investigation. We were not directly affected by this investigation and believe that we are compliant with antitrust rules. Nevertheless, it is possible that the investigation could be widened and new companies and practices come under scrutiny within the EU.

The EU has also adopted legislation (Directive 2009/16/EC on Port State Control) that: bans from European waters manifestly sub-standard vessels (defined as vessels that have been detained twice by EU port authorities, in the preceding two years creates obligations on the part of EU member port states to inspect minimum percentages of vessels using these ports annually; provides for increased surveillance of vessels posing a high risk to maritime safety or the marine environment; and provides the EU with greater authority and control over classification societies, including the ability to seek to suspend or revoke the authority of negligent societies (Directive 2009/15/EC).

Two new regulations were introduced by the European Commission in September 2010, as part of the implementation of the Port State Control Directive. These came into force on January 1, 2011 and introduce a ranking system (published on a public website and updated daily) displaying shipping companies operating in the EU with the worst safety records. The ranking is judged upon the results of the technical inspections carried out on the vessels owned by a particular shipping company. Those shipping companies that have the most positive safety records are rewarded by subjecting them to fewer inspections, whilst those with the most safety shortcomings or technical failings recorded upon inspection will in turn be subject to a greater frequency of official inspections to their vessels.

The EU has, by way of Directive 2005/35/EC, which has been amended by Directive 2009/123/EC created a legal framework for imposing criminal penalties in the event of discharges of oil and other noxious substances from ships sailing in its waters, irrespective of their flag. This relates to discharges of oil or other noxious substances from vessels. Minor discharges shall not automatically be considered as offences, except where repetition leads to deterioration in the quality of the water. The persons responsible may be subject to criminal penalties if they have acted with intent, recklessly or with serious negligence and the act of inciting, aiding and abetting a person to discharge a polluting substance may also lead to criminal penalties.

The EU has adopted regulations requiring the use of low sulfur fuel. Currently, vessels are required to burn fuel with sulfur content not exceeding 1% (while within EU member states territorial seas, exclusive economic zones and pollution control zones that are included in SO_x Emission Control Areas). Beginning January 1, 2015, vessels are required to burn fuel with sulfur content not exceeding 0.1% while within EU member states territorial seas, exclusive economic zones and pollution control zones that are included in SO_x Emission Control Areas. Other jurisdictions have also adopted regulations requiring the use of low sulfur fuel. The California Air Resources Board (or *CARB*) requires vessels to burn fuel with 0.1% sulfur content or less within 24 nautical miles of California as of January 1, 2014. IMO regulations require that, as of January 1, 2015, all vessels operating within Emissions control Areas (or *ECA*) worldwide must comply with 0.1% sulfur requirements. Currently, the only grade of fuel meeting this low sulfur content requirement is low sulfur marine gas oil (or *LSMGO*). Since July 1, 2010, the applicable sulfur content limits in the North Sea, the Baltic Sea and the English Channel sulfur control areas have been 1.00%. Certain modifications were completed on our Suezmax tankers in order to optimize operation on LSMGO of equipment originally designed to operate on Heavy Fuel Oil (or *HFO*), and to ensure our compliance with the Directive. In addition, LSMGO is more expensive than HFO and this impacts the costs of operations. However, for vessels employed on fixed-term business, all fuel costs, including any increases, are borne by the charterer.

The EU has recently adopted Regulation (EU) No 1257/2013 which imposes rules regarding ship recycling and management of hazardous materials on vessels. The Regulation includes requirements to recycle vessels in an environmentally sound manner at certain approved recycling facilities, so as to minimize the adverse effects of recycling on human health and the environment. The Regulation also contains rules to control and properly manage hazardous materials on vessels and prohibits or restricts the installation or use of certain hazardous materials on vessels. The Regulation aims to ratify the Hong Kong International Convention for the Safe and Environmentally Sound Recycling of Ships adopted by the IMO in 2009 (which has not entered into force). It applies to vessels flying the flag of a Member State. In addition, certain of its provisions also apply to vessels flying the flag of a third country calling at a port or anchorage of a Member State. For example, when calling at a port or anchorage of a Member State, the vessels flying the flag of a third country will be required, amongst other things, to have on board an inventory of hazardous materials which complies with the requirements of the Regulation and to be able to submit to the relevant authorities of that Member State a copy of a statement of compliance issued by the relevant authorities of the country of their flag and verifying the inventory. The Regulation will generally become effective between December 31, 2015 and December 31, 2018, although certain of its provisions are set to become effective on December 31, 2014 and certain others on December 31, 2020.

Table of Contents

United States

The United States has enacted an extensive regulatory and liability regime for the protection and cleanup of the environment from oil spills, including discharges of oil cargoes, bunker fuels or lubricants, primarily through the Oil Pollution Act of 1990 (or *OPA 90*) and the Comprehensive Environmental Response, Compensation and Liability Act (or *CERCLA*). *OPA 90* affects all owners, operators, and bareboat charterers, whose vessels trade to the United States or its territories or possessions or whose vessels operate in United States waters, which include the U.S. territorial sea and 200-mile exclusive economic zone around the United States. *CERCLA* applies to the discharge of hazardous substances rather than oil and imposes strict joint and several liability upon the owners, operators or bareboat charterers of vessels for cleanup costs and damages arising from discharges of hazardous substances. We believe that petroleum products should not be considered hazardous substances under *CERCLA*, but additives to oil or lubricants used on vessels might fall within its scope.

Under *OPA 90*, vessel owners, operators and bareboat charterers are responsible parties and are jointly, severally and strictly liable (unless the oil spill results solely from the act or omission of a third party, an act of God or an act of war and the responsible party reports the incident and reasonably cooperates with the appropriate authorities) for all containment and clean-up costs and other damages arising from discharges or threatened discharges of oil from their vessels. These other damages are defined broadly to include:

natural resources damages and the related assessment costs;

real and personal property damages;

net loss of taxes, royalties, rents, fees and other lost revenues;

lost profits or impairment of earning capacity due to property or natural resources damage;

net cost of public services necessitated by a spill response, such as protection from fire, safety or health hazards; and

loss of subsistence use of natural resources.

OPA 90 limits the liability of responsible parties in an amount it periodically updates. The liability limits do not apply if the incident was proximately caused by violation of applicable U.S. federal safety, construction or operating regulations, including IMO conventions to which the United States is a signatory, or by the responsible party's gross negligence or willful misconduct, or if the responsible party fails or refuses to report the incident or to cooperate and assist in connection with the oil removal activities. Liability under *CERCLA* is also subject to limits unless the incident is caused by gross negligence, willful misconduct, or a violation of certain regulations. We currently maintain for each of our vessel's pollution liability coverage in the maximum coverage amount of \$1 billion per incident. A catastrophic spill could exceed the coverage available, which could harm our business, financial condition and results of operations.

Under OPA 90, with limited exceptions, all newly built or converted tankers delivered after January 1, 1994 and operating in U.S. waters must be double-hulled. All of our tankers are double-hulled.

OPA 90 also requires owners and operators of vessels to establish and maintain with the United States Coast Guard (or *Coast Guard*) evidence of financial responsibility in an amount at least equal to the relevant limitation amount for such vessels under the statute. The Coast Guard has implemented regulations requiring that an owner or operator of a fleet of vessels must demonstrate evidence of financial responsibility in an amount sufficient to cover the vessel in the fleet having the greatest maximum limited liability under OPA 90 and CERCLA. Evidence of financial responsibility may be demonstrated by insurance, surety bond, self-insurance, guaranty or an alternative method subject to approval by the Coast Guard. Under the self-insurance provisions, the shipowner or operator must have a net worth and working capital, measured in assets located in the United States against liabilities located anywhere in the world, that exceeds the applicable amount of financial responsibility. Teekay Corporation has complied with the Coast Guard regulations by obtaining financial guaranties from one of its subsidiaries covering our vessels. If other vessels in our fleet trade into the United States in the future, we expect to obtain guaranties from third-party insurers.

OPA 90 and CERCLA permit individual US states to impose their own liability regimes with regard to oil or hazardous substance pollution incidents occurring within their boundaries and some states have enacted legislation providing for unlimited strict liability for spills. Several coastal states require state-specific evidence of financial responsibility and vessel response plans. We intend to comply with all applicable state regulations in the ports where our vessels call.

Owners or operators of vessels, including tankers, operating in U.S. waters are required to file vessel response plans with the Coast Guard, and their tankers are required to operate in compliance with their Coast Guard approved plans. Such response plans must, among other things:

- address a worst case scenario and identify and ensure, through contract or other approved means, the availability of necessary private response resources to respond to a worst case discharge ;

- describe crew training and drills; and

- identify a qualified individual with full authority to implement removal actions.

We have filed vessel response plans with the Coast Guard and have received its approval of such plans. In addition, we conduct regular oil spill response drills in accordance with the guidelines set out in OPA 90. The Coast Guard has announced it intends to propose similar regulations requiring certain vessels to prepare response plans for the release of hazardous substances.

Table of Contents

OPA 90 and CERCLA do not preclude claimants from seeking damages resulting from the discharge of oil and hazardous substances under other applicable law, including maritime tort law. The application of this doctrine varies by jurisdiction.

The U.S. Clean Water Act also prohibits the discharge of oil or hazardous substances in U.S. navigable waters and imposes strict liability in the form of penalties for unauthorized discharges. The Clean Water Act imposes substantial liability for the costs of removal, remediation and damages and complements the remedies available under OPA 90 and CERCLA discussed above.

Our vessels that discharge certain effluents, including ballast water, in U.S. waters must obtain a Clean Water Act permit from the Environmental Protection Agency (or *EPA*) titled the Vessel General Permit and comply with a range of effluent limitations, best management practices, reporting, inspections and other requirements. The current Vessel General Permit incorporates Coast Guard requirements for ballast water exchange and includes specific technology-based requirements for vessels, and includes an implementation schedule to require vessels to meet the ballast water effluent limitations by the first drydocking after January 1, 2014 or January 1, 2016, depending on the vessel size. Vessels that are constructed after December 1, 2013 are subject to the ballast water numeric effluent limitations immediately upon the effective date of the 2013 Vessel General Permit. Several U.S. states have added specific requirements to the Vessel General Permit and, in some cases, may require vessels to install ballast water treatment technology to meet biological performance standards.

Greenhouse Gas Regulation

In February 2005, the Kyoto Protocol to the United Nations Framework Convention on Climate Change (or the *Kyoto Protocol*) entered into force. Pursuant to the Kyoto Protocol, adopting countries are required to implement national programs to reduce emissions of greenhouse gases. In December 2009, more than 27 nations, including the United States, entered into the Copenhagen Accord. The Copenhagen Accord is non-binding, but is intended to pave the way for a comprehensive, international treaty on climate change. In July 2011 the IMO adopted regulations imposing technical and operational measures for the reduction of greenhouse gas emissions. These new regulations formed a new chapter in Annex VI and became effective on January 1, 2013. The new technical and operational measures include the Energy Efficiency Design Index, which is mandatory for newbuilding vessels, and the Ship Energy Efficiency Management Plan, which is mandatory for all vessels. In addition, the IMO is evaluating various mandatory measures to reduce greenhouse gas emissions from international shipping, which may include market-based instruments or a carbon tax. The EU also has indicated that it intends to propose an expansion of the existing European Union emissions trading scheme to include emissions of greenhouse gases from vessels, and individual countries in the EU may impose additional requirements. In the United States, the EPA issued an endangerment finding regarding greenhouse gases under the Clean Air Act. While this finding in itself does not impose any requirements on our industry, it authorizes the EPA to regulate directly greenhouse gas emissions through a rule-making process. In addition, climate change initiatives are being considered in the United States Congress and by individual states. Any passage of new climate control legislation or other regulatory initiatives by the IMO, EU, the United States or other countries or states where we operate that restrict emissions of greenhouse gases could have a significant financial and operational impact on our business that we cannot predict with certainty at this time.

Vessel Security Regulation

The ISPS code was adopted by the IMO in December 2002 in the wake of heightened concern over worldwide terrorism and became effective on July 1, 2004. The objective of ISPS code is to enhance maritime security by detecting security threats to ships and ports and by requiring the development of security plans and other measures designed to prevent such threats. Each of the existing vessels in our fleet currently complies with the requirements of

ISPS and MTSA.

C. Organizational Structure

As of December 31, 2013, Teekay Corporation (NYSE: TK), through its 100%-owned subsidiary Teekay Holdings Ltd., had a 25.1% economic interest in us through its ownership of 8.5 million of our shares of Class A common stock and 12.5 million shares of our Class B common stock.

Our shares of Class A common stock entitle the holders thereof to one vote per share and our shares of Class B common stock entitle the holders thereof to five votes per share, subject to a 49% aggregate Class B common stock voting power maximum. As such, we are controlled by Teekay Corporation. Teekay Corporation also controls its public subsidiaries Teekay LNG Partners L.P. (NYSE: TGP) and Teekay Offshore Partners L.P. (NYSE: TOO).

Please read Exhibit 8.1 to this Annual Report for a list of our subsidiaries as of December 31, 2013.

D. Property, Plant and Equipment

We believe that our well-maintained and high-quality vessels provide us with a competitive advantage in the current environment of increasing regulation and customer emphasis on quality of service.

Our vessels are regularly inspected by our seafaring staff, who perform much of the necessary routine maintenance. Shore-based operational and technical specialists also inspect our vessels on a regular basis. Upon completion of each inspection, action plans are developed to address any items requiring improvement. All action plans are monitored until they are completed. The objectives of these inspections are to:

ensure adherence to our operating standards;

maintain the structural integrity of the vessel;

maintain machinery and equipment to give full reliability in service;

optimize performance in terms of speed and fuel consumption; and

ensure the vessel's appearance will support our reputation and meet customer expectations.

Table of Contents

Other than our vessels, we do not have any material property.

E. Taxation of the Company

The following discussion is a summary of the principal United States and Marshall Islands tax laws applicable to us. The following discussion of tax matters, as well as the conclusions regarding certain issues of tax law that are reflected in such discussion, are based on current law. No assurance can be given that changes in or interpretation of existing laws will not occur or will not be retroactive or that anticipated future factual matters and circumstances will in fact occur. Our views have no binding effect or official status of any kind, and no assurance can be given that the conclusions discussed below would be sustained if challenged by taxing authorities.

United States Taxation

The following discussion is based upon the provisions of the Internal Revenue Code of 1986, as amended (or the *Code*), legislative history, applicable U.S. Treasury Regulations (or *Treasury Regulations*), judicial authority and administrative interpretations, all as in effect on the date of this Annual Report, and which are subject to change, possibly with retroactive effect, or are subject to different interpretations. Changes in these authorities may cause the tax consequences to vary substantially from the consequences described below.

Taxation as a Corporation. We will be taxed as a corporation for U.S. federal income tax purposes. As such, we will be subject to U.S. federal income tax on our income to the extent it is from U.S. sources or otherwise is effectively connected with the conduct of a trade or business in the United States as discussed below.

Taxation of Operating Income. We expect that substantially all of our gross income will be attributable to the transportation of crude oil and related products. For this purpose, gross income attributable to transportation (or *Transportation Income*) includes income derived from, or in connection with, the use (or hiring or leasing for use) of a vessel to transport cargo, or the performance of services directly related to the use of any vessel to transport cargo, and thus includes both time-charter and bareboat-charter income.

Transportation Income that is attributable to transportation that begins or ends, but that does not both begin and end, in the United States (or *U.S. Source International Transportation Income*) will be considered to be 50% derived from sources within the United States. Transportation Income attributable to transportation that both begins and ends in the United States (or *U.S. Source Domestic Transportation Income*) will be considered to be 100% derived from sources within the United States. Transportation Income attributable to transportation exclusively between non-U.S. destinations will be considered to be 100% derived from sources outside the United States. Transportation Income derived from sources outside the United States generally will not be subject to U.S. federal income tax.

We believe that we have not earned any U.S. Source Domestic Transportation Income, and we expect that we will not earn any such income in future years. However, certain of our activities give rise to U.S. Source International Transportation Income. Unless the exemption from tax under Section 883 of the Code (or the *Section 883 Exemption*) applies, our U.S. Source International Transportation Income generally will be subject to U.S. federal income taxation under either the net basis tax and the branch profits tax or the 4% gross basis tax, all of which are discussed below.

The Section 883 Exemption. In general, the Section 883 Exemption provides that if a non-U.S. corporation satisfies the requirements of Section 883 of the Code and the Treasury Regulations thereunder (or the *Section 883 Regulations*), it will not be subject to the net basis and branch profits taxes or 4% gross basis tax described below on its U.S. Source International Transportation Income. As discussed below, we believe that under our current ownership structure, the Section 883 Exemption will apply and we will not be taxed on our U.S. Source International

Transportation Income. The Section 883 Exemption does not apply to U.S. Source Domestic Transportation Income.

A non-U.S. corporation will qualify for the Section 883 Exemption if, among other things, it is organized in a jurisdiction outside the United States that grants an equivalent exemption from tax to corporations organized in the United States (or an *Equivalent Exemption*), it meets one of three ownership tests described in the Section 883 Regulations (or the *Ownership Test*), and it meets certain substantiation, reporting and other requirements (or the *Substantiation Requirements*).

We are organized under the laws of the Republic of The Marshall Islands. The U.S. Treasury Department has recognized the Republic of The Marshall Islands as a jurisdiction that grants an Equivalent Exemption. We also believe that we will be able to satisfy the Substantiation Requirements necessary to qualify for the Section 883 Exemption. Consequently, our U.S. Source International Transportation Income (including for this purpose, any such income earned by our subsidiaries that have properly elected to be treated as partnerships or disregarded as entities separate from us for U.S. federal income tax purposes) will be exempt from U.S. federal income taxation provided we satisfy the Ownership Test. We believe that we should satisfy the Ownership Test because our stock is primarily and regularly traded on an established securities market in the United States within the meaning of Section 883 of the Code and the Section 883 Regulations. We can give no assurance, however, that changes in the ownership of our stock subsequent to the date of this report will permit us to continue to qualify for the Section 883 exemption.

The Net Basis Tax and Branch Profits Tax. If we earn U.S. Source International Transportation Income and the Section 883 Exemption does not apply, such income may be treated as effectively connected with the conduct of a trade or business in the United States (or *Effectively Connected Income*) if we have a fixed place of business in the United States and substantially all of our U.S. Source International Transportation Income is attributable to regularly scheduled transportation or, in the case of income derived from bareboat charters, is attributable to a fixed place of business in the United States. Based on our current operations, none of our potential U.S. Source International Transportation Income is attributable to regularly scheduled transportation or is derived from bareboat charters attributable to a fixed place of business in the United States. As a result, we do not anticipate that any of our U.S. Source International Transportation Income will be treated as Effectively Connected Income. However, there is no assurance that we will not earn income pursuant to regularly scheduled transportation or bareboat charters attributable to a fixed place of business in the United States in the future, which would result in such income being treated as Effectively Connected Income.

U.S. Source Domestic Transportation Income generally will be treated as Effectively Connected Income. However, we do not anticipate that any of our income has been or will be U.S. Source Domestic Transportation Income.

Table of Contents

Any income we earn that is treated as Effectively Connected Income would be subject to U.S. federal corporate income tax (the highest statutory rate currently is 35%). In addition, if we earn income that is treated as Effectively Connected Income, a 30% branch profits tax imposed under Section 884 of the Code generally would apply to such income, and a branch interest tax could be imposed on certain interest paid or deemed paid by us.

On the sale of a vessel that has produced Effectively Connected Income, we could be subject to the net basis corporate income tax and to the 30% branch profits tax with respect to our gain not in excess of certain prior deductions for depreciation that reduced Effectively Connected Income. Otherwise, we would not be subject to U.S. federal income tax with respect to gain realized on the sale of a vessel, provided the sale is considered to occur outside of the United States under U.S. federal income tax principles.

The 4% Gross Basis Tax. If the Section 883 Exemption does not apply and the net basis tax does not apply, we would be subject to a 4% U.S. federal income tax on the U.S. source portion of our gross U.S. Source International Transportation Income, without benefit of deductions. For 2014, we estimate that the U.S. federal income tax on such U.S. Source International Transportation Income would be approximately \$1.1 million if the Section 883 Exemption and the net basis tax do not apply, based on the amount of U.S. Source International Transportation Income we earned for 2013. The amount of such tax for which we are liable for any year will depend upon the amount of income we earn from voyages into or out of the United States in such year, however, which is not within our complete control.

2. Marshall Islands Taxation

We believe that neither we nor our subsidiaries will be subject to taxation under the laws of the Republic of The Marshall Islands, and that distributions by our subsidiaries to us will not be subject to Marshall Islands taxation.

Item 4A. Unresolved Staff Comments

Not applicable.

Item 5. Operating and Financial Review and Prospects

The following discussion should be read in conjunction with the financial statements and notes thereto appearing elsewhere in this report.

Management's Discussion and Analysis of Financial Condition and Results of Operations

General

Our business is to own oil and product tankers and we employ a chartering strategy that seeks to capture upside opportunities in the tanker spot market while using fixed-rate time charters to reduce downside risks. Historically, the tanker industry has experienced volatility in profitability due to changes in the supply of, and demand for, tanker capacity. Tanker supply and demand are each influenced by several factors beyond our control. We were formed in October 2007 by Teekay Corporation (NYSE: TK) (*Teekay*), a leading provider of marine services to the global oil and gas industries and the world's largest operator of medium-sized oil tankers, and we completed our initial public offering in December 2007.

Through the participation of some of our vessels in pooling arrangements, we expect to benefit from Teekay's reputation and the scope of its operations in increasing our cash flows. Our mix of vessels trading in the spot market or subject to fixed-rate time charters will change from time to time. Teekay currently holds a majority of the voting

power of our common stock, which includes Class A common stock and Class B common stock.

From our initial public offering in December 2007 to December 31, 2012, we distributed to our stockholders on a quarterly basis all of our Cash Available for Distribution, subject to any reserves the Board of Directors determined were required for the prudent conduct of our business. *Cash Available for Distribution* represented net (loss) income, plus depreciation and amortization, unrealized losses from derivatives, non-cash items and any write-offs or other non-recurring items, less unrealized gains from derivatives and net income attributable to the historical results of vessels acquired by us from Teekay, prior to their acquisition by us, for the period when these vessels were owned and operated by Teekay. Commencing in 2013, we changed our dividend policy to distribute to our stockholders a fixed quarterly dividend of \$0.03 per share (\$0.12 per share annually), which is reviewed from time to time by our Board of Directors, rather than distributing all of our Cash Available for Distribution.

Significant Developments in 2013 and 2014

Vessel Disposal

On January 22, 2013, we completed the sale of an Aframax tanker, the *Nassau Spirit*, for \$9.1 million. The vessel was held for sale on our consolidated balance sheet as at December 31, 2012 and its net book value was written down to its sale proceeds net of cash outlays to complete the sale. The vessel was trading in the Teekay Aframax Pool prior to its sale.

Delivery of the Hong Kong Spirit

On July 14, 2013, a newly-built VLCC, the *Hong Kong Spirit*, which is jointly owned by us and our joint-venture partner, Wah Kwong Maritime Transport Holdings Ltd., delivered from the shipyard and subsequently commenced its five-year contract. The vessel will earn a fixed daily rate and an additional amount if the daily rate of any sub-charter exceeds a certain threshold. We are entitled to 50% of the net income or loss earned by the VLCC and we recognize this amount in our consolidated statements of loss.

Table of Contents

Shipbuilding Contracts

In April 2013, we entered into agreements with STX Offshore & Shipbuilding Co. Ltd. (or *STX*) of South Korea to construct four fuel-efficient 113,000 dwt LR2 product tanker newbuildings plus options to order up to an additional 12 vessels. The payment of our first shipyard installment was contingent on us receiving acceptable refund guarantees for the shipyard installment payments. In October and November 2013, we exercised our options to order eight additional LR2 newbuildings, in aggregate, under option agreements relating to the original STX LR2 shipbuilding agreements signed in April 2013. STX did not produce shipbuilding contracts within the specified timeframe of the option declarations and, informed us that there was no prospect of the refund guarantees being provided under any of the firm or option contracts and therefore, is in breach of the option agreements. In December 2013, the newbuilding agreements were terminated by us and in February 2014, the option agreements were terminated. In February 2014, we commenced legal action for damages. Please read Item 18 Financial Statement: Note 18 Shipbuilding Contracts and Note 19 Subsequent Events.

First Priority VLCC Mortgage Loans

In July 2010, we invested in two term loans for a total cost of \$115.6 million which were scheduled to mature in July 2013 (*the Loans*). The Loans are secured by first priority mortgages registered on two 2010-built Very Large Crude Carriers (or *VLCCs*). The borrowers under the Loans have been in default on their interest payment obligations since the first quarter of 2013, and subsequently, in default of the payment of the loan principal since July 2013.

In 2013, we took over the commercial management of the two VLCCs securing our investment in the Loans and negotiated the release of one of the VLCCs from detention in Egypt due to an incident that occurred prior to the transition of vessel management to us. Currently, both vessels are trading in the spot tanker market under our management. In March 2014, we assumed ownership of the two VLCC vessels.

Proposed Transaction with Teekay

In April 2014, the Teekay and Teekay Tankers Boards of Directors agreed for us to purchase from Teekay, 50% of their interest in its conventional tanker commercial operations and 100% of their interest in its technical management operations (or *Teekay Operations*), including direct ownership in three commercially managed tanker pools, which generate income from commercially managing a fleet of 82 vessels and technically managing a fleet of 49 vessels, including vessels owned by us. The agreed purchase price for this acquisition is approximately \$15.6 million, to be paid in Class B common stock of the Company. The transaction is expected to be completed during the second quarter of 2014.

Tanker Investments Ltd.

In January 2014, we and Teekay Corporation jointly created and co-invested \$25 million each in Tanker Investments Ltd. (or *TIL*) for a combined 20% initial ownership in TIL as part of a \$250 million equity private placement by TIL. In addition, Teekay Tankers and Teekay Corporation received stock purchase warrants entitling us and Teekay Corporation to purchase up to 750,000 shares of TIL, each, at a fixed price of \$10 per share. The balance of the privately placed TIL shares were purchased by a group of institutional investors primarily based in the United States, Norway and United Kingdom. In March 2014, TIL issued additional shares and listed its shares on the Oslo Stock Exchange. As of March 31, 2014, our ownership interest in TIL was 6.51%.

TIL will seek to opportunistically acquire, operate, and sell modern second hand tankers to benefit from an expected recovery in the current cyclical low of the tanker market. A portion of the net proceeds from the equity issuances by

TIL was used to acquire five modern Aframax crude oil tankers from third parties and four modern Suezmax crude oil tankers from Teekay. The remaining proceeds will be used to acquire additional tankers and for general corporate purposes.

The TIL fleet will be managed by Teekay Operations.

Our Charters

We generate revenues by charging customers for the transportation of their crude oil using our vessels. Historically, these services generally have been provided under the following basic types of contractual relationships:

Voyage charters participating in pooling arrangements are charters for shorter intervals that are priced on a current or spot market rate then adjusted for pool participation based on predetermined criteria; and

Time charters, whereby vessels are chartered to customers for a fixed period of time at rates that are generally fixed, but may contain a variable component based on inflation, interest rates or current market rates.

Table of Contents

The table below illustrates the primary distinctions among these types of charters and contracts:

	Voyage Charter	Time Charter
Typical contract length	Single voyage	One year or more
Hire rate basis ⁽¹⁾	Varies	Daily
Voyage expenses ⁽²⁾	We pay	Customer pays
Vessel operating expenses ⁽³⁾	We pay	We pay
Off hire ⁽⁴⁾	Customer does not pay	Customer does not pay

- (1) *Hire* rate refers to the basic payment from the charterer for the use of the vessel.
- (2) Voyage expenses are all expenses unique to a particular voyage, including any bunker fuel expenses, port fees, cargo loading and unloading expenses, canal tolls, agency fees and commissions.
- (3) Vessel operating expenses include crewing, repairs and maintenance, insurance, stores, lube oils and communication expenses.
- (4) *Off hire* refers to the time a vessel is not available for service.

Important Financial and Operational Terms and Concepts

We use a variety of financial and operational terms and concepts when analyzing our performance. These include the following:

Revenues. Revenues primarily include revenues from time charters, voyage charters, pool arrangements, and interest income from investment in term loans. Revenues are affected by hire rates and the number of days a vessel operates. Revenues are also affected by the mix of business between time charters, voyage charters and vessels operating in pool arrangements. Hire rates for voyage charters are more volatile, as they are typically tied to prevailing market rates at the time of a voyage.

Voyage Expenses. Voyage expenses are all expenses unique to a particular voyage, including any bunker fuel expenses, port fees, cargo loading and unloading expenses, canal tolls, agency fees and commissions. Voyage expenses are typically paid by the ship owner under voyage charters and the customer under time charters.

Net Revenues. Net revenues represent revenues less voyage expenses. Because the amount of voyage expenses we incur for a particular charter depends upon the type of the charter, we use net revenues to improve the comparability between periods of reported revenues that are generated by the different types of charters and contracts. We principally use net revenues, a non-GAAP financial measure, because it provides more meaningful information to us about the deployment of our vessels and their performance than revenues, the most directly comparable financial measure under United States generally accepted accounting principles (or *GAAP*).

Vessel Operating Expenses. We are responsible for vessel operating expenses, which include crewing, repairs and maintenance, insurance, stores, lube oils and communication expenses. The two largest components of our vessel operating expenses are crew costs and repairs and maintenance. We expect these expenses to increase as our fleet matures and to the extent that it expands.

Income from Vessel Operations. To assist us in evaluating our operations, we analyze the income we receive after deducting operating expenses, but prior to interest expense and income, realized and unrealized gains and losses on derivative instruments and other expenses.

Dry docking. We must periodically dry dock each of our vessels for inspection, repairs and maintenance and any modifications to comply with industry certification or governmental requirements. Generally, we dry dock each of our vessels every two and a half to five years, depending upon the age of the vessel. We capitalize a substantial portion of the costs incurred during dry docking and amortize those costs on a straight-line basis from the completion of a dry docking over the estimated useful life of the dry dock. We expense, as incurred, costs for routine repairs and maintenance performed during dry dockings that do not improve or extend the useful lives of the assets. The number of dry dockings undertaken in a given period and the nature of the work performed determine the level of dry-docking expenditures.

Depreciation and Amortization. Our depreciation and amortization expense typically consists of charges related to the depreciation of the historical cost of our fleet (less an estimated residual value) over the estimated useful lives of our vessels and charges related to the amortization of dry-docking expenditures over the estimated number of years to the next scheduled dry docking.

Time-Charter Equivalent (TCE) Rates. Bulk shipping industry freight rates are commonly measured in the shipping industry at the net revenues level in terms of time-charter equivalent (or TCE) rates, which represent net revenues divided by revenue days. We calculate TCE rates as net revenue per revenue day before related-party pool management fees and pool commissions, and off-hire bunker expenses.

Revenue Days. Revenue days are the total number of calendar days our vessels were in our possession during a period, less the total number of off-hire days during the period associated with major repairs, dry dockings or special or intermediate surveys. Consequently, revenue days represents the total number of days available for the vessel to earn revenue. Idle days, which are days when the vessel is available for the vessel to earn revenue yet is not employed, are included in revenue days. We use revenue days to explain changes in our net revenues between periods.

Average Number of Ships. Historical average number of ships consists of the average number of vessels that were in our possession during a period. We use average number of ships primarily to highlight changes in vessel operating expenses and depreciation and amortization.

Items You Should Consider When Evaluating Our Results

You should consider the following factors when evaluating our historical financial performance and assessing our future prospects:

Our financial results reflect the results of the interests in vessels acquired from Teekay for all periods the vessels were under common control. During 2012, we acquired four Suezmax tankers, three Aframax tankers, three LR2 product tankers and three MR product tankers from Teekay (which we refer to as the *2012 Acquired Business*). The acquisition of these vessels was deemed to be a business acquisition between entities under common control. Accordingly, we have accounted for this transaction in a

Table of Contents

manner similar to the pooling of interests method. Under this method of accounting our financial statements, for periods prior to the date the interests in these vessels were actually acquired by us, are retroactively adjusted to include the results of these acquired vessels. The periods retroactively adjusted include all periods that we and the acquired vessels were both under common control of Teekay and had begun operations. Our statements of loss for the years ended December 31, 2011 and December 31, 2012 include the 2012 Acquired Business for the periods it was under common control of Teekay prior to the acquisition by us. All financial or operational information contained herein for the periods prior to the date the interests in these vessels were actually acquired by us and during which we and the applicable vessels were under common control of Teekay, are retroactively adjusted to include the results of these acquired vessels and are collectively referred to as the *Dropdown Predecessor* .

Our voyage revenues are affected by cyclicity in the tanker markets. The cyclical nature of the tanker industry causes significant increases or decreases in the revenue we earn from our vessels, particularly those we trade in the spot market.

Tanker rates also fluctuate based on seasonal variations in demand. Tanker markets are typically stronger in the winter months as a result of increased oil consumption in the northern hemisphere but weaker in the summer months as a result of lower oil consumption in the northern hemisphere and increased refinery maintenance. In addition, unpredictable weather patterns during the winter months tend to disrupt vessel scheduling, which historically has increased oil price volatility and oil trading activities in the winter months. As a result, revenues generated by our vessels have historically been weaker during the quarters ended June 30 and September 30, and stronger in the quarters ended December 31 and March 31.

Vessel operating and other costs are facing industry-wide cost pressures. The shipping industry continues to experience a global manpower shortage of qualified seafarers in certain sectors due to growth in the world fleet and competition for qualified personnel. In recent years, upward pressure on manning costs has temporarily stabilized and resulted in lower wage increases than have been seen in the past. However this situation will likely not continue in the long term. Going forward, there may be significant increases in crew compensation as vessel and officer supply dynamics continue to change. In addition, factors such as pressure on commodity and raw material prices, as well as changes in regulatory requirements could also contribute to operating expenditure increases. We continue to take action aimed at improving operational efficiencies, and to temper the effect of inflationary and other price escalations, however increases to operational costs are still likely to occur in the future.

The amount and timing of dry dockings of our vessels can significantly affect our revenues between periods. Our vessels are normally off hire when they are being dry docked. Including the Dropdown Predecessor, we had seven vessels dry dock in 2013 and one vessel started dry docking in 2013 and finished in 2014 compared to four vessels dry docked in 2012 and three vessels dry docked in 2011. The total number of off-hire days relating to dry docking during the years ended December 31, 2013, December 31, 2012 and 2011 were 218, 78, and 64, respectively. As a result of the Dropdown Predecessor, the total number of days of off hire relating to dry docking increased by 64 days for the year ended 2011. For our current fleet, there are four vessels scheduled for dry dockings in 2014 and three vessels scheduled for dry dockings in 2015.

Results of Operations

In accordance with GAAP, we report gross revenues in our consolidated statements of loss and include voyage expenses among our operating expenses. However, ship-owners base economic decisions regarding the deployment of their vessels upon anticipated TCE rates, and industry analysts typically measure bulk shipping freight rates in terms of TCE rates. This is because under time-charter contracts the customer usually pays the voyage expenses, while under voyage charters the ship-owner usually pays the voyage expenses, which typically are added to the hire rate at an approximate cost. Accordingly, the discussion of revenue below focuses on net revenues and TCE rates where applicable.

Year Ended December 31, 2013 versus Year Ended December 31, 2012

The following table presents our operating results for the years ended December 31, 2013 and 2012 and compares net revenues, a non-GAAP financial measure, for those periods to revenues, the most directly comparable GAAP financial measure.

(in thousands of U.S. dollars)	Years Ended December 31,	
	2013	2012
Revenues	162,410	185,930
Interest income from investment in term loans	7,677	11,499
Less: voyage expenses	(8,337)	(4,618)
Net revenues	161,750	192,811
Vessel operating expenses	91,667	96,160
Time-charter hire expense	6,174	3,950
Depreciation and amortization	47,833	72,365
General and administrative	12,594	7,985
Vessel impairment and net loss on sale of vessels	71	352,546
Income (loss) from vessel operations	3,411	(340,195)
Interest expense	(10,023)	(20,009)
Interest income	158	50
Realized and unrealized loss on derivative instruments	(1,524)	(7,963)
Equity income (loss) from investment in joint venture	854	(1)
Other expenses - net	(1,014)	(2,063)
Net loss	(8,138)	(370,181)

Table of Contents**Tanker Market**

Crude tanker spot rates reached historical lows for the majority of 2013 before hitting multi-year highs at the end of the fourth quarter of 2013. Demand for crude tankers in the first half of 2013 was dampened by decreased Saudi Arabian production, supply disruptions in Libya, Iranian sanctions, and heavy refinery maintenance. The combined effect of decreased crude demand and a decrease in long-haul OPEC barrels put downward pressure on crude tanker tonne-mile demand through the majority of 2013.

By the end of 2013, the situation was reversed with rates in the large crude tanker segments strengthening by year-end to levels last seen in mid-2008. This increase was primarily due to strong Chinese crude imports, an increase in long-haul movements from the Atlantic basin to Asia, improved demand in the OECD, and seasonal factors. While tanker rates exhibited a rebound to historic highs in the fourth quarter of 2013 due to increased demand and seasonal factors, overall average spot tanker rates for 2013 remained below the long-term average.

In the product tanker sector, earnings were steady during the first half of 2013 giving way to a slightly softer second half of 2013. LR2 spot rates were supported in the middle of 2013 by a combination of increased long-haul naphtha movements into Asia and the emergence of an East-West gasoil arbitrage. However, in the second half of 2013, the East-West gasoil arbitrage was shut intermittently, while the impact of ships switching from dirty to clean trades led to increased vessel supply which put downward pressure on spot tanker rates.

The global tanker fleet grew by a net 9.2 million deadweight tonnes (or *mdwt*), or 1.9%, during 2013. A total of 21.4 mdwt of tankers delivered into the fleet, down from 32.4 mdwt in 2012, while scrapping and removals decreased slightly to 12.8 mdwt from 14.7 mdwt in 2012. Looking ahead to 2014, based on internal forecasts, we estimate that tanker deliveries will total approximately 18.5 mdwt while scrapping is forecast to total approximately 12.5 mdwt. As a result, we estimate net tanker fleet growth of approximately 6.0 mdwt, or 1.2%, in 2014, the lowest level of tanker fleet growth in percentage terms since 2002. Fleet growth during 2014 is expected to be weighted towards the MR and LR2 sectors with negligible or declining growth in the crude Aframax and Suezmax sectors

Global oil demand is expected to grow by 1.2 million barrels per day (or *mb/d*) during 2014 according to the average of forecasts from the International Energy Agency, Energy Information Administration and Organization of Petroleum Exporting Countries (or *OPEC*). This represents the same growth in oil demand growth as 2012, with the non-OECD countries, and China in particular, accounting for the majority of the growth. However, the call on OPEC crude is expected to decline by approximately 0.6 mb/d during 2014, which could have a negative impact on crude tanker tonne-mile demand in 2014.

Fleet and TCE Rates

As at December 31, 2013, we owned 27 double-hulled conventional oil tankers, time-chartered in one Aframax vessel from a third party and owned a 50% interest in one VLCC. The number of vessels we own, as well as our financial and operational results, includes the Dropdown Predecessor in all relevant periods presented. Please read Item 18 Financial Statements: Note 1 Summary of Significant Accounting Policies included in the notes to our consolidated financial statements attached in this Annual Report.

As defined and discussed above, we calculate TCE rates as net revenue per revenue day before related-party pool management fees and pool commissions, and off-hire bunker expenses. The following table outlines the average TCE rates earned by vessels for 2013 and 2012:

	Year Ended December 31, 2013			Year Ended December 31, 2012		
	Net Revenues ⁽¹⁾⁽²⁾ (in thousands)	Revenue Days	Average TCE per Revenue Day	Net Revenues ⁽²⁾⁽³⁾ (in thousands)	Revenue Days	Average TCE per Revenue Day
Voyage-charter contracts - Suezmax	\$ 38,659	2,817	\$ 13,550	\$ 32,983	1,865	\$ 17,688
Voyage-charter contracts - Aframax	\$ 14,472	1,183	\$ 12,063	\$ 19,279	1,583	\$ 12,179
Voyage-charter contracts - LR2 Product	\$ 14,633	1,094	\$ 13,164	\$ 13,568	1,098	\$ 12,357
Voyage-charter contracts - MR Product	\$ 7,474	555	\$ 13,414			
Time-charter contracts - Suezmax	\$ 13,560	680	\$ 19,875	\$ 37,529	1,682	\$ 22,311
Time-charter contracts - Aframax	\$ 57,226	3,314	\$ 17,140	\$ 56,039	3,043	\$ 18,418
Time-charter contracts - MR Product	\$ 16,599	517	\$ 32,008	\$ 28,063	1,092	\$ 25,711
Total	\$ 162,623	10,160	\$ 15,861	\$ 187,461	10,363	\$ 18,091

(1) Excludes a total of \$5.3 million in pool management fees and commissions payable by us to Teekay for commercial management for our vessels and \$3.2 million in off-hire bunker and other expenses.

(2) Excludes interest income from investment in term loan of \$7.7 million and \$11.5 million for 2013 and 2012, respectively.

(3) Excludes a total of \$4.7 million in pool management fees and commissions payable by us to Teekay for commercial management for our vessels and \$1.5 million in off-hire bunker and other expenses.

Net Revenues. Net revenues decreased to \$161.8 million for 2013 from \$192.8 million for 2012, primarily due to:

a net decrease of \$15.2 million resulting from various vessels changing employment between fixed-rate charters and voyage charters;

a decrease of \$11.4 million resulting from lower average realized rates earned by our Suezmax tankers in 2013 compared to 2012;

a decrease of \$3.8 million due to the sale of the *Nassau Spirit* in January 2013;

a decrease of \$3.8 million due to a decrease in interest income earned on our investments in term loans;

Table of Contents

a decrease of \$3.4 million resulting from lower average realized rates earned by our Aframax tankers in 2013 compared to 2012;

a decrease of \$2.3 million due to an increase in pool management fees, pool commissions and off-hire bunker expenses in 2013 compared to 2012; and

a net decrease of \$1.1 million due to more off-hire days in 2013 compared to 2012;
partially offset by

an increase of \$7.0 million resulting from higher average realized rates earned by our MR product tankers in 2013 compared to 2012;

a net increase of \$2.1 million due to the addition of an in-chartered Aframax tanker, partially offset by the redeliveries of three in-chartered Aframax tankers to their owners in March 2012, June 2012 and July 2013;
and

an increase of \$1.1 million resulting from higher average realized rates earned by our LR2 product tankers in 2013 compared to 2012.

Vessel Operating Expenses. Vessel operating expenses decreased to \$91.7 million for 2013 compared to \$96.2 million for 2012 primarily due to the reduction of \$3.9 million due to the sale of the *Nassau Spirit* in January 2013, a decrease of \$0.6 million due to cost reduction initiatives for crew related costs as well as a reduction of \$1.3 million in technical management costs, partially offset by an increase of \$0.7 million due to the timing and extent of planned vessel maintenance and repairs as well as a \$0.6 million increase relating to insurance costs in 2013 compared to 2012.

Depreciation and Amortization. Depreciation and amortization decreased to \$47.8 million for 2013 compared to \$72.4 million for 2012. The decrease in 2013 relates primarily to the vessel write down of seven Suezmax tankers, four Aframax tankers and one product tanker recorded in the fourth quarter of 2012 and the sale of the *Nassau Spirit*. Please see Item 18 Financial Statements: Note 17 Vessel Sales and Impairments included in the notes to our consolidated financial statements attached to this Annual Report.

General and Administrative Expenses. General and administrative expenses increased to \$12.6 million for 2013 compared to \$8.0 million for 2012, primarily due to:

an increase of \$5.3 million in administrative and strategic fees due to the increase in fleet size and increases in management cost allocations for the year ended December 31, 2013;
partially offset by

a decrease of \$0.7 million in corporate expenses such as audit, consulting and legal fees in 2013 as compared to 2012, due in part to the costs related to the acquisition of vessels in 2012.

Vessel Impairments and Net Loss on Sale of Vessels. Vessel impairments and net loss on sale of vessels totaled \$0.1 million for the year ended December 31, 2013 and represented a loss realized on the sale of an Aframax tanker, the *Nassau Spirit*. The vessel was classified as held for sale on the consolidated balance sheet as at December 31, 2012 and was sold in January 2013 for proceeds of \$9.1 million.

Vessel impairments and net loss on sale of vessels totaled \$352.5 million for the year ended December 31, 2012. Indicators of impairment were present in the fourth quarter of 2012 which triggered an impairment test to be conducted on certain of our conventional oil tankers. At the time of the impairment test these indicators of impairment included a negative change in the outlook for the crude tanker market, a delay in the expected timing of a recovery of the crude tanker market, and the expected discrimination impact from more fuel efficient vessels being constructed. As a result of these developments, we recognized impairments on seven Suezmax tankers, four Aframax tankers and one MR product tanker, which in aggregate amounted to \$352.5 million. In December 2012, we entered into an agreement to sell one of the four impaired Aframax tankers, the *Nassau Spirit*. The vessel sale was completed in January 2013 and the vessel was classified as held for sale on the consolidated balance sheet as at December 31, 2012.

Interest Expense. Interest expense decreased to \$10.0 million for 2013 compared to \$20.0 million for 2012, primarily due to:

a decrease of \$7.8 million in interest expense primarily due to interest allocation related to the Dropdown Predecessor during 2012. Long-term debt of the Dropdown Predecessor, bearing interest at 8.5%, was replaced with revolving credit facilities, which had an average outstanding interest rate of approximately 1.3%, and debt levels related to the 2012 Acquired Business were reduced after we acquired it in June 2012; and

a decrease of \$2.2 million due to lower variable interest rates in 2013 compared to 2012.

Realized and unrealized loss on derivative instruments. Realized and unrealized losses on interest rate swaps were \$1.5 million for the year ended December 31, 2013, compared to \$8.0 million for the year ended December 31, 2012. During 2013 and 2012, we had interest rate swap agreements with aggregate average outstanding notional amounts of approximately \$322.9 million and \$291.6 million, respectively, and with average fixed rates of approximately 3.2% and 2.2%, respectively. Short term variable benchmark interest rates during these periods were generally less than 1.0%, and, as a result, we incurred realized losses of \$9.9 million and \$9.6 million, respectively, during 2013 and 2012 under the interest rate swap agreements.

Long-term benchmark interest rates increased in 2013 and 2012, causing us to recognize an unrealized gain of \$8.4 million for the year ended December 31, 2013 and an unrealized gain of \$1.6 million for the prior year. Please see Item 5 - Operating and Financial Review and Prospects Valuation of Derivative Instruments, which explains how our derivative instruments are valued, including the significant factors and uncertainties in determining the estimated fair value and why changes in these factors result in material changes in realized and unrealized gain on derivative instruments from period to period.

Table of Contents

Equity income (loss). We recorded equity income of \$0.9 million in the year ended December 31, 2013, compared to \$nil in the prior year. This income represents our 50% share of the income earned by the joint venture, jointly controlled by us and Wah Kwong Maritime Transport Holdings Ltd., from the operation of the VLCC from its delivery date of June 14, 2013.

Other expenses. Other expenses were \$1.0 million in 2013, compared to \$2.1 million in 2012. The decrease in other expenses is primarily related to a decrease in our estimate of freight tax expenses due to decreased number of voyages to certain freight tax jurisdictions and a change in the foreign exchange for the year ended December 31, 2013 as compared to the prior year.

Net Loss. As a result of the foregoing factors, we recorded a net loss of \$8.1 million for 2013, compared to \$370.2 million for 2012.

Year Ended December 31, 2012 versus Year Ended December 31, 2011

The following table presents our operating results for 2012 and 2011 and compares net revenues, a non-GAAP financial measure, for those periods to revenues, the most directly comparable GAAP financial measure.

	Years Ended December 31,	
	2012	2011
(in thousands of U.S. dollars)		
Revenues	185,930	203,749
Interest income from investment in term loans	11,499	11,323
Less: voyage expenses	(4,618)	(3,449)
Net revenues	192,811	211,623
Vessel operating expenses	96,160	92,543
Time-charter hire expense	3,950	4,046
Depreciation and amortization	72,365	74,482
General and administrative	7,985	7,671
Vessel impairment and net loss on sale of vessels	352,546	58,034
Goodwill impairment charge		19,294
Loss from vessel operations	(340,195)	(44,447)
Interest expense	(20,009)	(40,539)
Interest income	50	71
Realized and unrealized gain (loss) on derivative instruments	(7,963)	(27,783)
Other expenses - net	(2,064)	(377)
Net loss	(370,181)	(113,075)

Fleet and TCE Rates

As at December 31, 2012, we owned 28 double-hulled conventional oil tankers, time-chartered in one Aframax vessel from a third party and owned a 50% interest in one VLCC newbuilding scheduled to deliver during the second quarter of 2013. The number of vessels we own, as well as our financial and operational results, includes the Dropdown Predecessor in all relevant periods presented. Please read Item 18 Financial Statements: Note 1 Summary of Significant Accounting Policies included in the notes to our consolidated financial statements attached in this Report.

As defined and discussed above, we calculate TCE rates as net revenue per revenue day before related-party pool management fees and pool commissions, and off-hire bunker expenses. The following table outlines the average TCE rates earned by vessels for 2012 and 2011:

	Year Ended December 31, 2012			Year Ended December 31, 2011		
	Net Revenues ⁽¹⁾⁽²⁾ (in thousands)	Revenue Days	Average TCE per Revenue Day	Net Revenues ⁽²⁾⁽³⁾ (in thousands)	Revenue Days	Average TCE per Revenue Day
Voyage-charter contracts						
Suezmax	\$ 32,983	1,865	\$ 17,688	\$ 21,035	1,456	\$ 14,447
Voyage-charter contracts						
Aframax	\$ 19,279	1,583	\$ 12,179	\$ 17,254	1,343	\$ 12,850
Voyage-charter contracts LR2						
Product	\$ 13,568	1,098	\$ 12,357	\$ 13,074	1,026	\$ 12,745
Time-charter contracts Suezmax	\$ 37,529	1,682	\$ 22,311	\$ 53,362	2,186	\$ 24,414
Time-charter contracts Aframax	\$ 56,039	3,043	\$ 18,418	\$ 72,793	3,271	\$ 22,256
Time-charter contracts MR						
Product	\$ 28,063	1,092	\$ 25,711	\$ 27,887	1,090	\$ 25,594
Total	\$ 187,461	10,363	\$ 18,091	\$ 205,405	10,372	\$ 19,806

(1) Excludes a total of \$4.7 million in pool management fees and commissions payable by us to Teekay for commercial management for our vessels and \$1.5 million in off-hire bunker and other expenses.

(2) Excludes interest income from investment in term loan of \$11.5 million and \$11.3 million for 2012 and 2011, respectively.

(3) Excludes a total of \$3.7 million in pool management fees and commissions payable by us to Teekay for commercial management for our vessels and \$1.4 million in off-hire bunker and other expenses.

Table of Contents

Net Revenues. Net revenues decreased to \$192.8 million for 2012 from \$211.6 million for 2011, primarily due to a net decrease of \$32.3 million relating to lower fixed-rate time-charter revenues partially offset by a net increase of \$14.4 million in overall spot-rate revenues and \$1.2 million of lower voyage expenses. The details of the changes are discussed further below.

The net decrease of \$32.3 million in fixed-rate time-charter revenues is attributable to the following:

a net decrease of \$22.5 million from various vessels changing employment between fixed-rate charters and voyage charters and vice versa; and

a net decrease of \$10.4 million relating to our fixed-rate tankers which had existing time-charter agreements expire during the year and were re-chartered at lower average fixed-rates.

The net increase of \$14.4 million in spot-rate revenues is attributable to the following:

net increases of \$11.7 million as a result of having, on average, more Suezmax tankers trading in pooling arrangements in 2012 compared to 2011 despite having four spot-traded Suezmax tankers complete their scheduled drydockings in 2012. In addition, average Suezmax spot rates realized in 2012 were higher than in 2011;

a net increase of \$1.8 million as a result of having, on average, more Aframax tankers days in operations as we had more time-chartered in vessels from external parties in 2012 compared to 2011. This yielded \$3.3 million in additional net voyage revenue which was partially offset by a \$1.5 million decrease in the average spot Aframax rates in 2012 compared to 2011; and

a net increase of \$0.8 million resulting from more revenue days for our three LR2 product tankers in 2012 compared to 2011 as all three vessels completed their scheduled drydocking in 2011.

Vessel Operating Expenses. Vessel operating expenses increased to \$96.2 million for 2012 compared to \$92.5 million for 2011 primarily due to an increase of \$3.7 million relating to higher unplanned repairs and maintenance expenses across the fleet in 2012 compared to 2011.

Depreciation and Amortization. Depreciation and amortization decreased to \$72.4 million for 2012 compared to \$74.5 million for 2011. The decrease in 2012 relates primarily to the asset impairment charge in the third quarter of 2011 for the three medium range product tankers owned by the Dropdown Predecessor.

General and Administrative Expenses. General and administrative expenses increased to \$8.0 million for 2012 compared to \$7.7 million for 2011, primarily due to higher strategic and administrative expenses incurred in 2012 as compared to 2011.

Vessel Impairments and Net Loss on Sale of Vessels. Vessel impairments and net loss on sale of vessels totaled \$352.5 million for 2012. Indicators of impairment were present in the fourth quarter of 2012 which triggered an impairment test to be conducted on certain of our conventional oil tankers. At the time of the impairment test these indicators of

impairment included a negative change in the outlook for the crude tanker market, a delay in the expected timing of a recovery of the crude tanker market, and the expected discrimination impact from more fuel efficient vessels being constructed. As a result of these developments, we recognized impairments on seven Suezmax tankers, four Aframax tankers and one medium-range product tanker, which in aggregate amounted to \$352.5 million. In December 2012, we entered into an agreement to sell one of the four impaired Aframax tankers. As the vessel sale was not completed until January 2013, the vessel was classified as held for sale on the consolidated balance sheet as at December 31, 2012.

Vessel impairments and net loss on sale of vessels was \$58.0 million for 2011. We recognized impairments on three medium-range product tankers built in 2000, 2004 and 2005. The indicators of impairment related to these vessels included a change in the operating plans for certain of these vessels, escalating dry dock costs, a continued decline in the fair market value of vessels, and a general decline in the future outlook for shipping and the global economy. The charges recorded in 2011 were attributable to the vessels which belonged to the Dropdown Predecessor during the same period in 2011.

Goodwill Impairment Charge. Goodwill impairment charges for the years ended December 31, 2012 and 2011 were nil and \$19.3 million, respectively. We performed goodwill impairment analyses on the conventional tanker fleet in 2011 and concluded the carrying value of the goodwill, all relating to the Suezmax reporting unit, exceeded its fair value. As a result, a goodwill impairment charge of \$19.3 million was recognized in our 2011 consolidated statement of loss, of which \$6.0 million of this charge was related to Suezmax vessels owned by the Dropdown Predecessor. The fair value of the Suezmax reporting unit was determined using the present value of the expected future cash flows discounted at a rate equivalent to a market participant's weighted-average cost of capital. The estimates and assumptions regarding expected cash flows and the appropriate discount rates are in part based upon existing contracts, estimated future tanker market rates, historical experience, financial forecasts and industry trends and conditions.

Interest Expense. Interest expense decreased to \$20.0 million for 2012 compared to \$40.5 million for 2011, primarily due to:

a decrease of \$22.1 million in interest expense attributable to the Dropdown Predecessor during 2012 compared to 2011 as the Dropdown Predecessor effectively replaced long-term debt bearing interest at 8.5% with revolving credit facilities, which had an average outstanding interest rate of approximately 1%, and as debt levels related to the 2012 Acquired Business were reduced since the acquisition date; partially offset by

an increase of \$1.1 million due to higher average debt balances outstanding and higher interest rates in 2012 compared to 2011.

Realized and unrealized loss on derivative instruments. Realized and unrealized losses on interest rate swaps was \$8.0 million for the year ended December 31, 2012 compared to \$27.8 million for the year ended December 31, 2011. During 2012 and 2011, we had interest rate swap agreements with aggregate average outstanding notional amounts of approximately \$291.6 million and \$415.0 million, respectively, and with average fixed rates of approximately 2.2% and 2.8%, respectively, as one of our interest rate swaps expired during the year.

Table of Contents

Short term variable benchmark interest rates during these periods were generally less than 1.0% and, as such, we incurred realized losses of \$9.6 million and \$39.0 million (which includes the impact of a \$31.1 million interest rate swap settlement payment made by the Dropdown Predecessor concurrently with a reset of the fixed rate on an interest rate swap from 5.07% to 2.51% in January 2011), respectively, during 2012 and 2011 under the interest rate swap agreements.

Long-term benchmark interest rates increased in 2012 and 2011, causing us to recognize an unrealized gain of \$1.6 million for the year ended December 31, 2012, compared to an unrealized gain of \$11.2 million (which includes the impact from a \$31.1 million interest rate swap settlement payment described above) for the same period last year. Please see Item 5 - Operating and Financial Review and Prospects - Valuation of Derivative Instruments, which explains how our derivative instruments are valued, including the significant factors and uncertainties in determining the estimated fair value and why changes in these factors result in material changes in realized and unrealized (loss) gain on derivative instruments from period to period.

Other expenses. Other expenses increased to \$2.1 million in 2012, compared to \$0.4 million in 2011. The increase in other expenses is primarily related to an increase in our estimate of freight tax expenses as a result of some of our fleet engaging in more voyages in freight tax jurisdictions such as Nigeria and Turkey.

Net Loss. As a result of the foregoing factors, we recorded a net loss of \$370.2 million for 2012, compared to \$113.1 million for 2011.

Liquidity and Capital Resources***Liquidity and Cash Needs***

Our primary sources of liquidity are cash and cash equivalents, cash flows provided by our operations, our undrawn credit facilities, proceeds from the sale of vessels, and capital raised through financing transactions. As at December 31, 2013, our total cash and cash equivalents was \$25.6 million, compared to \$26.3 million at December 31, 2012. Our total liquidity, including cash, cash equivalents and undrawn credit facilities, was \$173.8 million as at December 31, 2013, compared to \$327.3 million as at December 31, 2012. We believe that our working capital is sufficient for our present requirements.

Our short-term liquidity requirements include the payment of operating expenses, dry-docking expenditures, debt servicing costs, dividends on our shares of common stock, scheduled repayments of long-term debt, as well as funding our other working capital requirements. Our short-term charters and spot market tanker operations contribute to the volatility of our net operating cash flow, and thus our ability to generate sufficient cash flows to meet our short-term liquidity needs. Historically, the tanker industry has been cyclical, experiencing volatility in profitability and asset values resulting from changes in the supply of, and demand for, vessel capacity. In addition, tanker spot markets historically have exhibited seasonal variations in charter rates. Tanker spot markets are typically stronger in the winter months as a result of increased oil consumption in the northern hemisphere and unpredictable weather patterns that tend to disrupt vessel scheduling. Through December 31, 2012, we distributed the majority of our cash flow to shareholders through a full payout dividend policy, subject to certain reserves determined by our Board of Directors. Our Board of Directors modified our dividend policy, and commencing in the first quarter of 2013, we now pay a fixed quarterly dividend of \$0.03 per share on our common shares, which amount is reviewed from time to time by our Board of Directors.

Our long-term capital needs are primarily for capital expenditures and debt repayment. Generally, we expect that our long-term sources of funds will be cash balances, long-term bank borrowings and other debt or equity financings. We

expect that we will rely upon external financing sources, including bank borrowings and the issuance of debt and equity securities, to fund acquisitions and expansion capital expenditures, including opportunities we may pursue to purchase additional vessels from Teekay or third parties.

Our primary revolving credit facility is repayable in full November 2017. As of December 31, 2013, the facility had an outstanding balance of \$509.0 million. Immediately preceding its maturity in November 2017, the maximum amount available under the facility is \$349.4 million. Our ability to refinance any amounts outstanding under this facility on maturity in November 2017 will likely depend on the recovery of the tanker market. If the tanker market does not recover as expected, we may need to raise additional liquidity through issuance of common shares, preferred shares or bonds, or a combination thereof. Alternatively, we may renegotiate our primary revolving credit facility to extend repayment of the facility. This may result in an increase in the rate of interest we pay on amounts borrowed under the facility. In addition, our liquidity requirements in 2017 may impact the types of investments we make prior to this date.

Our revolving credit facilities and term loans are described in Item 18 Financial Statements: Note 8 - Long-Term Debt to our consolidated financial statements included in this Annual Report. Our revolving credit facilities and term loans contain covenants and other restrictions we believe are typical of debt financing collateralized by vessels, including those that restrict the relevant subsidiaries from incurring or guaranteeing additional indebtedness, making certain negative pledges or granting certain liens, and selling, transferring, assigning or conveying assets. In the future, some of the covenants and restrictions in our financing agreements could restrict the use of cash generated by ship-owning subsidiaries in a manner that could adversely affect our ability to pay dividends on our common stock. However, we do not currently expect that these covenants will have such an effect. Our revolving credit facilities and term loans require us to maintain financial covenants. Should we not meet these financial covenants, the lender may declare our obligations under the agreements immediately due and payable and terminate any further loan commitments, which would significantly affect our short-term liquidity requirements. As at December 31, 2013, we and Teekay were in compliance with all covenants relating to our revolving credit facilities and term loans.

We are exposed to market risk from changes in interest rates, foreign currency fluctuations and spot market rates. We use interest rate swaps to manage interest rate risk. We do not use this financial instrument for trading or speculative purposes.

Passage of any climate control legislation or other regulatory initiatives that restrict emissions of greenhouse gases could have a significant financial and operational impact on our business, which we cannot predict with certainty at this time. Such regulatory measures could increase our costs related to operating and maintaining our vessels and require us to install new emission controls, acquire allowances or pay taxes related to our greenhouse gas emissions, or administer and manage a greenhouse gas emissions program. In addition, increased regulation of greenhouse gases may, in the long term, lead to reduced demand for oil and reduced demand for our services.

Table of Contents**Cash Flows**

The following table summarizes our sources and uses of cash for the periods presented:

(in thousands of U.S. dollars)	Year Ended December 31,		
	2013	2012	2011
Net cash flow from operating activities	6,202	27,542	24,020
Net cash flow (used in) from financing activities	(1,097)	(13,905)	(16,006)
Net cash flow used in investing activities	(5,800)	(5,862)	(4,337)

Operating Cash Flows

Changes in net cash flow from operating activities primarily reflect fluctuations in spot tanker rates, change in interest rates, fluctuations in working capital balances, the timing and the amount of dry-docking expenditures, repairs and maintenance activities, and vessel additions and dispositions. Our exposure to the spot tanker market has contributed significantly to historical fluctuations in operating cash flows as a result of highly cyclical spot tanker rates and more recently as a result of the reduction in global oil demand that was caused by a slow-down in global economic activity.

Net cash flow from operating activities decreased to \$6.2 million in 2013, compared to \$27.5 million in 2012, primarily as a result of the following:

a net decrease of \$23.5 million resulting from lower average realized TCE rates our vessels earned for the year ended December 31, 2013 compared to the prior year;

a net decrease of \$10.6 million resulting from higher voyage expenses, time-charter hire expenses and general and administrative expenses for the year ended December 31, 2013 compared to the prior year;

a decrease of \$3.8 million in interest income on the term loans, secured by the two VLCCs. The borrowers under the Loans have been in default on their interest payment obligations since the first quarter of 2013, and subsequently, in default of the repayment of the loan principal since the loan maturity date in July 2013. Please read Item 18 Financial Statements: Note 4 Investment in Term Loans included in this Report; and

a net decrease of \$12.2 million due to completing seven dry dockings in 2013 compared to four in 2012; partially offset by:

a net increase of \$13.2 million due to changes in non-cash working capital relating to our vessel operations;

a net increase of \$10.0 million due to lower interest expenses on our debt for the year ended December 31, 2013 compared to the prior year as a result of replacing long-term debt of the Dropdown Predecessor,

bearing interest rate at 8.5% with revolving credit facilities, which had an average outstanding interest rate of approximately 1.3% in 2013;

a net increase of \$4.5 million resulting from lower operating expenses incurred for the year ended December 31, 2013 compared to the prior year; and

an increase of \$0.9 million due to equity income earned from our investment in the High Q joint venture. Net cash flow from operating activities increased to \$27.5 million in 2012, compared to \$24.0 million in 2011, primarily as a result of the following:

an increase of \$29.5 million due primarily to an interest rate swap settlement payment made by the Dropdown Predecessor that occurred concurrently with a reset of the fixed interest rate on an interest rate swap from 5.07% to 2.51% during the year ended 2011; and

an increase of \$22.1 million due to lower interest expense allocations relating to the Dropdown Predecessor for the year ended 2011;
partially offset by:

a net decrease of \$19.0 million resulting from lower average realized TCE rates our vessels earned for the year ended December 31, 2012 compared to the same period in 2011;

a net decrease of \$6.4 million resulting from higher operating and other expenses incurred for the year ended December 31, 2012 compared to the prior year; and

a net decrease of \$19.0 million due to changes in non-cash working capital relating to our vessel operations;
and

a net decrease of \$3.8 million due to completing four dry dockings in 2012 compared to three in 2011.

Table of Contents

Financing Cash Flows

Net cash outflow from financing activities decreased to \$1.1 million in 2013, compared to \$13.9 million in 2012, as a result of the following:

a net increase in financing cash flows of \$50.2 million as a result of net borrowing, repayments, and prepayments on our credit facilities. For the year ended December 31, 2013 compared to the 2012, we borrowed \$26.9 million more from our revolving credit facilities; repaid \$11.7 million more in scheduled debt repayments; and decreased our prepayments of long term debt by \$35.0 million;

an increase in financing cash flows of \$22.2 million as a result of lower dividend payments for the year ended December 31, 2013 compared to the prior year; and

a net decrease of \$6.2 million in cash outflow resulting from the net financing activities of the Dropdown Predecessor;
partially offset by:

a decrease of \$65.8 million in cash received from public offerings for the year ended December 31, 2013 compared to the prior year. There were no public offerings in the year ended December 31, 2013. In the prior year, we issued 17.3 million shares at \$4.00 per share for net proceeds of \$65.8 million.

Net cash outflow from financing activities decreased to \$13.9 million in 2012, compared to \$16.0 million in 2011, as a result of the following:

a net decrease of \$41.3 million in cash received from public offerings for the year ended December 31, 2012 compared to the prior year. In February 2012, we issued 17.3 million shares at \$4.00 per share for net proceeds of \$65.8 million compared to net proceeds of \$107.1 million in February 2011 when we issued 9.9 million shares at \$11.33 per share; and

a net decrease of \$39.5 million in cash used for financing activities resulting from the net financing activities of the Dropdown Predecessor;
partially offset by:

a net increase of \$63.8 million as a result of net borrowing, repayments, and prepayments on our credit facilities. For the year ended December 31, 2012 compared to the 2011, we borrowed \$17.2 million more from our revolving credit facilities; repaid \$11.7 million more in scheduled debt repayments as a result of the new debt acquired as part of the 2012 Acquired Business that occurred in June 2012; and decreased our prepayments of long term debt by \$58.3 million; and

an increase of \$19.1 million as a result of lower dividend payments for the year ended December 31, 2012 compared to the prior year;

Investing Cash Flows

Net cash used in investing activities for the year ended December 31, 2013 decreased to \$5.8 million in 2012, compared to \$5.9 million in the prior year, as a result of the following:

a decrease in cash used for investing activities by \$9.1 million in 2013 as a result of proceeds received from the sale of one Aframax tanker, the Nassau Spirit, sold in January of 2013; and

a decrease in cash used for investing activities by \$0.6 million due to a reduction in expenditures for vessel and equipment for the year ended December 31, 2013 compared to the prior year; partially offset by:

an net increase in cash used for investing activities by \$9.1 million due to the additional funding, required to negotiate the release from detention in Egypt of one of the VLCCs securing our investment in term loans as well as to fund operating expenditures related to the VLCCs currently trading under our management in the spot tanker market; and

an increase of \$0.5 million primarily as a result of our funding to our 50/50 joint venture to meet shipyard obligations for the construction of a VLCC newbuilding, which was completed in June of 2013.

Net cash used in investing activities for the year ended December 31, 2012 increased by \$1.5 million compared to the same period in 2011 primarily as a result of our funding of \$3.3 million to our 50/50 joint venture to meet shipyard obligations for the construction of a VLCC newbuilding, which was partially offset by a \$1.8 million reduction in expenditures for vessel and equipment for the year ended 2012 compared to the same period in 2011.

Please read Item 18 Financial Statements: Note 4 Investment in Term Loans and Note 5 - Investment in Joint Venture for specific details on our investment in term loans and 50/50 joint venture activities included in the notes to our consolidated financial statements attached in this Annual Report.

Table of Contents**Commitments and Contingencies**

The following table summarizes our long-term contractual obligations as at December 31, 2013:

(in millions of U.S. dollars)	Total	2014	2015 and 2016	2017 and 2018	Beyond 2018
U.S. Dollar-Denominated Obligations					
Long-term debt ⁽¹⁾	744.6	25.2	191.7	527.7	
Chartered-in vessels (operating leases) ⁽²⁾	4.6	4.4	0.2		
Total	749.2	29.6	191.9	527.7	

- (1) Excludes all expected interest payments of \$8.0 million (2014), \$13.3 million (2015 and 2016), \$4.4 million (2017 and 2018) and \$1.2 million (beyond 2018). Expected interest payments are based on the existing interest rates for fixed-rate loans that range from 4.06% to 4.9% and existing interest rates for variable-rate loans at LIBOR plus margins that range from 0.3% to 1.0% at December 31, 2013. The expected interest payments do not reflect the effect of related interest rate swaps that we have used to hedge certain of our floating-rate debt.
- (2) Excludes payments required if we execute all options to extend the terms of one in-chartered lease. If we exercise all options to extend the terms of the in-chartered lease, we would expect total payments of \$4.4 million (2014), \$4.4 million (2015), \$4.7 million (2016) and 0.2 million (2017).

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements that have, or are reasonably likely to have, a current or future material effect on our financial condition, results of operations, liquidity, capital expenditures or capital resources.

Critical Accounting Estimates

We prepare our financial statements in accordance with GAAP, which requires us to make estimates in the application of our accounting policies based on our best assumptions, judgments and opinions. On a regular basis, management reviews the accounting policies, assumptions, estimates and judgments to ensure that our consolidated financial statements are presented fairly and in accordance with GAAP. However, because future events and their effects cannot be determined with certainty, actual results could differ from our assumptions and estimates, and such differences could be material. Accounting estimates and assumptions discussed in this section are those that we consider to be the most critical to an understanding of our financial statements because they inherently involve significant judgments and uncertainties. For a further description of our material accounting policies, please read Item 18 Financial Statements: Note 1 Summary of Significant Accounting Policies to our consolidated financial statements included in this Annual Report.

Revenue Recognition

Description. We recognize voyage revenue using the proportionate performance method. Under this method, voyages may be calculated on either a load-to-load or discharge-to-discharge basis. This means that voyage revenues are recognized ratably either from the beginning of when product is loaded for one voyage to when it is loaded for the

next voyage, or from when product is discharged (unloaded) at the end of one voyage to when it is discharged after the next voyage.

Judgments and Uncertainties. In applying the proportionate performance method, we believe that in most cases the discharge-to-discharge basis of calculating voyages more accurately reflects voyage results than the load-to-load basis. At the time of cargo discharge, we generally have information about the next load port and expected discharge port, but at the time of loading we are typically less certain what the next load port will be. We use this method of revenue recognition for all spot voyages. However we do not begin recognizing revenue for any of our vessels until a charter has been agreed to by the customer and us, even if the vessel has discharged its cargo and is sailing to the anticipated load port on its next voyage.

Effect if Actual Results Differ from Assumptions. If actual results are not consistent with our estimates in applying the proportionate performance method, our revenues could be overstated or understated for any given period by the amount of such difference.

Vessel Lives and Impairment

Description. As each vessel in our operating fleet was acquired from Teekay, these acquisitions were deemed to be business acquisitions between entities under common control. Accordingly, the carrying value of each of our vessels represents Teekay's carrying value at the date we acquired the vessel, less subsequent depreciation and impairment charges. We depreciate the original cost, less an estimated residual value, of our vessels on a straight-line basis over each vessel's estimated useful life. The carrying values of our vessels may not represent their market value at any point in time because the market prices of second-hand vessels tend to fluctuate with changes in charter rates and the cost of newbuildings. Both charter rates and newbuilding costs tend to be cyclical in nature.

We review vessels and equipment for impairment whenever events or circumstances indicate the carrying value of an asset, including the carrying value of the charter contract, if any, under which the vessel is employed, may not be recoverable. This occurs when the asset's carrying value is greater than the future undiscounted cash flows the asset is expected to generate over its remaining useful life. If the estimated future undiscounted cash flows of an asset exceed the asset's carrying value, no impairment is recognized even though the fair value of the asset may be lower than its carrying value. If the estimated future undiscounted cash flows of an asset are less than the asset's carrying value and the fair value of the asset is less than its carrying value, the asset is written down to its fair value. Fair value is calculated as the net present value of estimated future cash flows, which, in certain circumstances, will approximate the estimated market value of the vessel. For a vessel under charter, the discounted cash flows from that vessel may exceed its market value, as market values may assume the vessel is not employed on an existing charter.

The following table presents the aggregate market values and carrying values of our vessels that we have determined have a market value that is less than their carrying value as of February 1, 2014. While the market values of these vessels are below their carrying values, no impairment has been recognized on any of these vessels in 2013 as the estimated future undiscounted cash flows relating to such vessels are greater than their carrying values.

Table of Contents

We consider the vessels reflected in the following table to be at a higher risk of future impairment. This table is disaggregated for vessels which have estimated future undiscounted cash flows that are marginally or significantly greater than their respective carrying values. Vessels with estimated future cash flows significantly greater than their respective carrying values would not necessarily represent vessels that would likely be impaired in the next twelve months. The recognition of an impairment in the future for those vessels may primarily depend upon our deciding to dispose of the vessel instead of continuing to operate it. In deciding whether to dispose of a vessel, we determine whether it is economically preferable to sell the vessel or continue to operate it. This assessment includes an estimation of the net proceeds expected to be received if the vessel is sold in its existing condition compared to the present value of the vessel's estimated future revenue, net of operating costs. Such estimates are based on the charter market outlook and estimated operating costs, given a vessel's type, condition and age. In addition, we typically do not dispose of a vessel that is servicing an existing customer contract. The recognition of an impairment in the future may be more likely for vessels that have estimated future undiscounted cash only marginally greater than their respective carrying values.

Aframax, Suezmax and Product Tankers		Market	Carrying
(in thousands of USD, except number of vessels)	# Vessels	Values (1)	Values
Conventional Tankers ⁽²⁾	2	\$ 43,800	\$ 66,049
Conventional Tankers ⁽³⁾	16	\$ 473,000	\$ 603,740
Total	18	\$ 516,800	\$ 669,789

- (1) Market values are determined using reference to second-hand market comparables. Since vessel values can be volatile, our estimates of market value may not be indicative of either the current or future prices we could obtain if we sold any of the vessels.
- (2) Undiscounted cash flows are marginally greater than the carrying values.
- (3) Undiscounted cash flows are significantly greater than the carrying values.

Judgments and Uncertainties. Depreciation is calculated using an estimated useful life of 25 years for conventional crude oil and product tankers, commencing at the date the vessel was originally delivered from the shipyard. However, the actual life of a vessel may be different than the estimated useful life, with a shorter actual useful life resulting in an increase in quarterly depreciation and potentially resulting in an impairment loss. The estimated useful life of our vessels takes into account design life, commercial considerations and regulatory restrictions. Our estimates of future cash flows involve assumptions about future charter rates, vessel utilization, operating expenses, dry-docking expenditures, vessel residual values and the remaining estimated life of our vessels. Our estimated charter rates are based on rates under existing vessel contracts and market rates at which we expect we can re-charter our vessels. Our estimates of vessel utilization, including estimated off-hire time, are based on historical experience and our projections of the number of future conventional tanker voyages. Our estimates of operating expenses and dry-docking expenditures are based on historical operating and dry-docking costs and our expectations of future inflation and operating requirements. Vessel residual values are a product of a vessel's lightweight tonnage and an estimated scrap rate. The remaining estimated lives of our vessels used in our estimates of future cash flows are consistent with those used in the calculations of depreciation.

In our experience, certain assumptions relating to our estimates of future cash flows are more predictable by their nature, including estimated revenue under existing contract terms, on-going operating costs and remaining vessel life. Certain assumptions relating to our estimates of future cash flows require more discretion and are inherently less predictable, such as future charter rates beyond the firm period of existing contracts and vessel residual values, due to

factors such as the volatility in vessel charter rates and vessel values. We believe that the assumptions used to estimate future cash flows of our vessels are reasonable at the time they are made. We can make no assurances, however, as to whether our estimates of future cash flows, particularly future vessel charter rates or vessel values, will be accurate.

Effect if Actual Results Differ from Assumptions. If we conclude that a vessel or equipment is impaired, we recognize a loss in an amount equal to the excess of the carrying value of the asset over its fair value at the date of impairment. The written-down amount becomes the new lower cost basis and will result in a lower annual depreciation expense than for periods before the vessel impairment.

Dry docking

Description. We capitalize a substantial portion of the costs we incur during dry docking and amortize those costs on a straight-line basis from the completion of a dry docking to the estimated date of completion of the next dry docking. We immediately expense costs for routine repairs and maintenance performed during dry docking that do not improve or extend the useful lives of the assets.

Judgments and Uncertainties. Amortization of capitalized dry-docking expenditure requires us to estimate the period of the next dry docking. While we typically dry dock each vessel every 2.5 to 5 years, we may dry dock the vessels at an earlier date. The actual life of a vessel may be different, with a shorter life resulting in an increase in the quarterly depreciation and potentially resulting in an impairment loss. The estimates and assumptions regarding expected cash flows require considerable judgment and are based upon existing contracts, historical experience, financial forecasts and industry trends and conditions. We are not aware of any indicators of impairments nor any regulatory changes or environmental liabilities that we anticipate will have a material impact on our current or future operations.

Effect if Actual Results Differ from Assumptions. If we change our estimate of the next dry dock date we will adjust our annual amortization of dry-docking expenditures. If we consider a vessel or equipment to be impaired, we recognize a loss in an amount equal to the excess of the carrying value of the asset over its fair market value. The new lower cost basis will result in a lower annual depreciation expense than before the vessel impairment.

Table of Contents

Valuation of Derivative Instruments

Description. Our risk management policies permit the use of derivative financial instruments to manage interest rate risk. Changes in fair value of derivative financial instruments that are not designated as cash flow hedges for accounting purposes are recognized in earnings in the consolidated statement of loss.

Judgments and Uncertainties. The fair value of our derivative instruments and the change in fair value of our derivative instruments from period to period result from our use of interest rate swap agreements. The fair value of our derivative instruments is the estimated amount that we would receive or pay to terminate the agreements in an arm's length transaction under normal business conditions at the reporting date, taking into account current interest rates and the current credit worthiness of ourselves and the swap counterparties. The estimated amount for interest rate swap agreements is the present value of estimated future cash flows, being equal to the difference between the benchmark interest rate and the fixed rate in the interest rate swap agreement, multiplied by the notional principal amount of the interest rate swap agreement at each interest reset date.

The fair value of our interest rate swap agreements at the end of each period is most significantly impacted by the interest rate implied by the benchmark interest rate yield curve, including its relative steepness. Interest rates have experienced significant volatility in recent years in both the short and long term. While the fair value of our interest rate swap agreements is typically more sensitive to changes in short-term rates, significant changes in the long-term benchmark interest rate also materially impact our interest rate swap agreements.

The fair value of our interest rate swap agreements is also impacted by changes in our specific credit risk included in the discount factor. We discount our interest rate swap agreements with reference to the credit default swap spreads of global industrial companies with a similar credit rating and by considering any underlying collateral. The process of determining credit worthiness requires significant judgment in determining which source of credit risk information most closely matches our risk profile.

The benchmark interest rate yield curve and our specific credit risk are expected to vary over the life of the interest rate swap agreements. The larger the notional amount of the interest rate swap agreements outstanding and the longer the remaining duration of the interest rate swap agreements, the larger the impact of any variability in these factors will be on the fair value of our interest rate swaps. We economically hedge the interest rate exposure on a significant amount of our long-term debt and for long durations. As such, we have historically experienced, and we expect to continue to experience, material variations in the period-to-period fair value of our derivative instruments.

Effect if Actual Results Differ from Assumptions. Although we measure the fair value of our derivative instruments utilizing the inputs and assumptions described above, if we were to terminate the agreements at the reporting date, the amount we would pay or receive to terminate the derivative instruments may differ from our estimate of fair value. If the estimated fair value differs from the actual termination amount, an adjustment to the carrying amount of the applicable derivative asset or liability would be recognized in earnings for the current period. Such adjustments could be material. See Item 18 Financial Statements: Note 9 Derivative Instruments for the effects on the change in fair value of our derivative instruments on our consolidated statements of loss.

Item 6. Directors, Senior Management and Employees

Our Board of Directors and executive officers oversee and supervise our operations. Subject to this oversight and supervision, our operations are managed generally by our Manager.

Our Chief Executive Officer, Bruce Chan, and our Chief Financial Officer, Vincent Lok, allocate their time between managing our business and affairs directly as such officers, and indirectly as officers of our Manager, and the business and affairs of Teekay Corporation, for which they also serve as the President of Teekay Tanker Services division, and Executive Vice President and Chief Financial Officer, respectively. The amount of time Messrs. Chan and Lok allocate among our business and the businesses of Teekay Corporation, our Manager and other subsidiaries of Teekay Corporation varies from time to time depending on various circumstances and needs of the businesses, such as the relative levels of strategic activities of the businesses.

Our officers and individuals providing services to us or our subsidiaries may face a conflict regarding the allocation of their time between our business and the other business interests of Teekay Corporation or its affiliates. We intend to seek to cause our officers to devote as much time to the management of our business and affairs as is necessary for the proper conduct thereof.

Please also read Item 7 Major Shareholders and Related Party Transactions: Related Party Transactions.

Directors and Executive Officers of Teekay Tankers Ltd.

The following table provides information about the directors and executive officers of Teekay Tankers Ltd. Directors are elected for one-year terms. The business address of each of our directors and officers listed below is c/o 4th Floor, Belvedere Building, 69 Pitts Bay Road, Hamilton, HM 08 Bermuda. Ages of the directors and executive officers are as of December 31, 2013.

Table of Contents

Name	Age	Position
C. Sean Day	64	Chairman of the Board of Directors ⁽¹⁾
Arthur Bensler	56	Chairman of the Board of Directors ⁽²⁾
Bruce Chan	41	Chief Executive Officer and Director ⁽³⁾
Vincent Lok	45	Chief Financial Officer
Richard J.F. Bronks	48	Director ⁽⁴⁾
Peter Evensen	55	Director ⁽¹⁾
William Lawes	70	Director ⁽⁴⁾
Bjorn Moller	56	Director
Richard T. du Moulin	67	Director ⁽⁴⁾

(1) Resigned effective June 12, 2013.

(2) Effective June 12, 2013.

(3) In January 2014, Mr. Chan has tendered his resignation as Chief Executive Officer and Director effective June 20, 2014.

(4) Member of Audit Committee, Conflicts Committee, and Nominating and Governance Committee.

Certain biographical information about each of these individuals is set forth below.

C. Sean Day served as Chairman of the Board of Teekay Tankers Ltd. until his resignation from the Board in June 2013. He also serves as Chairman of our Manager. Mr. Day has served as Chairman of the Board for Teekay Corporation since September 1999. He also serves as Chairman of Teekay GP L.L.C. (the general partner of Teekay LNG Partners L.P., a publicly held partnership controlled by Teekay Corporation) and Teekay Offshore GP L.L.C. (the general partner of Teekay Offshore Partners L.P., a publicly held partnership controlled by Teekay Corporation). From 1989 to 1999, Mr. Day was President and Chief Executive Officer of Navios Corporation, a large bulk shipping company based in Stamford, Connecticut. Prior to that, Mr. Day held a number of senior management positions in the shipping and finance industry. He is currently serving as a Director of Kirby Corporation, and as Chairman of Compass Diversified Holdings. Mr. Day is engaged as a consultant to Kattagat Limited, the parent company of Teekay Corporation's largest shareholder, to oversee its investments, including that in the Teekay group of companies.

Arthur Bensler joined the Board of Directors as Chairman on June 12, 2013. He has also served as Corporate Secretary since October, 2007. Mr. Bensler is Executive Vice President and General Counsel of Teekay Corporation (NYSE:TK) and President of Teekay Shipping (Canada) Ltd. He has more than 15 years of experience in the shipping industry, joining Teekay Corporation in 1998 as General Counsel. He was promoted to the position of Vice President and General Counsel in 2002, became the Corporate Secretary of Teekay Corporation in 2003 and was further promoted to Executive Vice President and General Counsel in 2006. In addition to his roles with the Company he serves as Assistant Corporate Secretary of Teekay Offshore GP L.L.C., the general partner of Teekay Offshore Partners L.P. (NYSE:TOO), and Teekay GP L.L.C., the general partner of Teekay LNG Partners L.P. (NYSE:TGP). Mr. Bensler served as Committee Director of the Britannia Steamship Insurance Association Limited from January 2005 to April 2010 and has served as a Committee Director of The Standard Club Ltd., a mutual insurance association, since November 2010, where he is also a member of the Nominating & Governance Committee and the Strategy Committee.

Bruce Chan joined the Board of Directors on June 12, 2013 and became Chief Executive Officer of Teekay Tankers Ltd. in April, 2011, having joined Teekay in 1995 and appointed as President, Teekay Tanker Services (TTS) in April 2008. As Chief Executive Officer of Teekay Tankers Ltd. and President of TTS, Mr. Chan leads a global network of commercial offices in Asia, Europe and North America, with the responsibility of marketing Teekay's fleet of conventional tankers. Prior to his most recent appointments, Mr. Chan was already a member of Teekay Corporation's

Senior Leadership Team, serving as Executive Vice President of Corporate Resources, responsible for Human Resources, Corporate Communications & Marketing, Corporate Services, and Information Technology. Since joining the company in 1995, he has held senior roles in Teekay's Finance and Strategic Development groups, including managing several of the company's strategic acquisitions. He has also previously served as Director, Strategic Development in TTS. Prior to joining Teekay, he was a Chartered Accountant with Ernst & Young. Mr. Chan also holds a MBA and is a Chartered Financial Analyst. Mr. Chan has tendered his resignation from his roles with Teekay Corporation and Teekay Tankers Ltd. effective June 20, 2014.

Vincent Lok has served as Chief Financial Officer of Teekay Tankers since October 2007. Mr. Lok has served as Teekay Corporation's Executive Vice President and Chief Financial Officer since July 2007. He has held a number of finance and accounting positions with Teekay Corporation, including Controller from 1997 until his promotions to the positions of Vice President, Finance in March 2002 and Senior Vice President and Treasurer in February 2004. He was subsequently appointed Senior Vice President and Chief Financial Officer in November 2006. Mr. Lok also serves as the Chief Financial Officer of our Manager. Prior to joining Teekay Corporation, Mr. Lok worked as a Chartered Accountant with Deloitte & Touche LLP. Mr. Lok is also a Chartered Financial Analyst.

Richard J.F. Bronks joined the Board of Directors of Teekay Tankers in January 2008. Mr. Bronks retired from Goldman Sachs in 2007, where he held a number of positions during his career. From 2004 until March 2007, Mr. Bronks was responsible for building Goldman Sachs' equity, bond and loan financing business in emerging markets, including Central and Eastern Europe, Russia, the Former Soviet Union, the Middle East, Turkey and Africa. From 1999 to 2004, Mr. Bronks served as a co-head of Goldman's global commodity business, engaged in the trading of commodities and commodity derivatives, and the shipping and storage of physical commodities. From 1993 to 1999, Mr. Bronks served as a member of Goldman's oil derivatives business in London and New York. Prior to joining Goldman Sachs, Mr. Bronks was employed by BP Oil International, in both its oil derivatives business and its crude oil trading business.

Table of Contents

Peter Evensen was appointed Executive Vice President and a Director of Teekay Tankers Ltd. in October 2007. On March 31, 2011 he resigned from the position of Executive Vice President of Teekay Tankers Ltd. but remained a Director of the company until June 2013. On April 1, 2011, Mr. Evensen became President and Chief Executive Officer of Teekay Corporation and also became a member of its Board of Directors. He also serves as Chief Executive Officer, Chief Financial Officer and Director of Teekay GP L.L.C. and Teekay Offshore GP L.L.C. He joined Teekay Corporation in May 2003 as Senior Vice President, Treasurer and Chief Financial Officer. He was appointed Executive Vice President of Teekay Corporation in 2006. Mr. Evensen has over 25 years of experience in banking and shipping finance. Prior to joining Teekay Corporation, Mr. Evensen was Managing Director and Head of Global Shipping at J.P. Morgan Securities Inc., and worked in other senior positions for its predecessor firms. His international industry experience includes positions in New York, London and Oslo.

William Lawes joined the Board of Directors of Teekay Tankers in January 2008. Mr. Lawes also joined the Board of Tanker Investments Ltd. in January 2014. Mr. Lawes served as a Managing Director and a member of the Europe, Africa and Middle East Regional Senior Management Board of JPMorgan Chase and its predecessor banks based in London from 1987 until 2002. His functional responsibility was Chief Credit and Counterparty Risk Officer for the region. Prior to joining JPMorgan Chase, he was Global Head of Shipping Finance at Grindlays Bank. Mr. Lawes is qualified as a member of the Institute of Chartered Accountants of Scotland. Since March 2005, Mr. Lawes has served as a Director and Chairman of the Audit Committee of Diana Shipping Inc., a global provider of shipping transportation services. Prior to his retirement in 2010, Mr. Lawes was a trustee and Chairman of the Finance and Audit Committee of Care International UK, a global humanitarian charity, for 12 years.

Bjorn Moller served as Teekay Tankers Chief Executive Officer from October 2007 until March, 2011. Contemporaneously, Mr. Moller also served as the President and Chief Executive Officer of Teekay Corporation from April 1998 until March, 2011. He also served as Vice Chairman and Director of Teekay GP L.L.C. from when it was formed in November 2004, and Vice Chairman and Director of Teekay Offshore GP L.L.C. from when it was formed in August 2006, in each case until March, 2011. Mr. Moller continues to serve as a Director of Teekay Tankers Ltd. and Teekay Corporation. Mr. Moller has over 30 years of experience in the shipping industry, and served as Chairman of the International Tanker Owners Pollution Federation from 2006 to 2013. He served in senior management positions with Teekay Corporation for more than 20 years, and led Teekay's overall operations from January 1997, following his promotion to the position of Chief Operating Officer. Prior to that, Mr. Moller headed Teekay Corporation's global chartering operations and business development activities.

Richard T. du Moulin joined the Board of Directors of Teekay Tankers in December 2007. Mr. du Moulin is currently the President of Intrepid Shipping LLC, a position he has held since he founded Intrepid Shipping in 2002. From 1998 to 2002, Mr. du Moulin served as Chairman and Chief Executive Officer of Marine Transport Corporation. Mr. du Moulin is a member of the Board of Trustees and Chairman of the Seamen's Church Institute of New York and New Jersey. Mr. du Moulin currently serves as a Director of Tidewater Inc. and is on the Board of Globe Wireless LLC. Mr. du Moulin served as Chairman of Intertanko, the leading trade organization for the tanker industry, from 1996 to 1999.

Directors and Executive Officers of Our Manager

The following table provides information about the directors and executive officers of our Manager. As discussed below in Item 7, our Manager, Teekay's wholly owned subsidiary Teekay Tankers Management Services Ltd., provides to us commercial, technical, administrative and strategic services pursuant to the Management Agreement. Our Manager was formed, and its directors and executive officers were appointed, in October 2007. Ages of these individuals are as of December 31, 2013.

Name	Age	Position
C. Sean Day	64	Chairman of the Board of Directors ⁽¹⁾
Bruce Chan	41	Chief Executive Officer and Director ⁽²⁾
Vincent Lok	45	Chief Financial Officer
Peter Evensen	55	Director ⁽¹⁾
Arthur Bensler	56	Chairman of the Board of Directors ⁽³⁾

(1) Resigned effective June 12, 2013.

(2) Mr. Chan has tendered his resignation as Chief Executive Officer and Director effective June 20, 2014.

(3) Effective June 12, 2013.

As noted above, the directors and executive officers of our Manager also serve as directors or executive officers of us. The business experience of these individuals is described above.

Compensation of Directors and Senior Management

Executive Compensation

Our executive officers are employees of Teekay Corporation or other subsidiaries thereof, and their compensation (other than any awards under our long-term incentive plan described below) is set and paid by Teekay Corporation or its subsidiaries, and we reimburse Teekay Corporation for time spent by our executive officers on our management matters. This reimbursement is a component of the management fee we pay our Manager, pursuant to the Management Agreement. The aggregate amount of such reimbursement for the year ended December 31, 2013 was \$1.4 million (2012: \$1.1 million; and 2011: \$0.7 million).

Table of Contents**Compensation of Directors**

Officers of us or Teekay Corporation who serve as our directors do not receive additional compensation for their service as directors. Each of our non-management directors receives compensation for attending meetings of the Board of Directors, as well as committee meetings. Non-employee directors (excluding the Chairman) receive an annual cash fee of \$50,000 and an annual award of fully vested shares of Class A common stock with a value of approximately \$70,000. A non-employee Chairman would receive an annual cash fee of \$82,500 and an annual award of fully vested shares of Class A common stock with a value of approximately \$82,500. For 2013, Mr. Sean Day, a non-employee director, served as the Chairman of the Board from January 2013 to June 2013 and received the full amount of the additional retainer paid in shares of Class A common stock, but only received the portion of the cash retainer that corresponded to the portion of the year during which he held this position. In addition, members of the Audit Committee each receive a committee cash fee of \$7,500 per year, and the chair of the Audit Committee receives a fee of \$12,500 for serving in that role. Members of the Conflicts Committee each receive a committee fee of \$7,500 per year, and the chair of the Conflicts Committee receives a fee of \$12,500 for serving in that role. The chair of the Nominating and Governance Committee receives a fee of \$5,000 for serving in that role. In addition, each director is reimbursed for out-of-pocket expenses in connection with attending meetings of the Board of Directors and committees. Each director is fully indemnified by us for actions associated with being a director to the extent permitted under Marshall Islands law.

During 2013, our five non-employee directors received an aggregate of \$301,250 in cash fees for their services as directors (2012: \$342,500; 2011: \$313,333). In addition, during 2013, we awarded an aggregate of 142,157 (2012: 82,573; and 2011: 30,596) Class A common shares to non-employee directors.

Long-Term Incentive Program

We have adopted the Teekay Tankers Ltd. 2007 Long-Term Incentive Plan in which our and our affiliates' employees, directors and consultants are eligible to participate. The plan provides for the award of restricted stock, restricted stock units, stock options, stock appreciation rights and other stock or cash-based awards. To date, we have satisfied all awards under the plan through open market purchases and deliveries to the grantees, rather than issuing shares from authorized capital. During 2013, we awarded a total of 142,157 shares to non-employee directors under the plan. As at December 31, 2013, we had 1,000,000 shares of our Class A common stock reserved for delivery pursuant to awards granted under the plan.

In addition, in the year ended December 31, 2013, we granted 411,629 restricted stock units to certain employees of Teekay's subsidiaries that provide services to us. Each restricted stock unit is equal in value to one share of our common shares plus reinvested distributions from the grant date to the vesting date. Upon vesting, the value of the restricted stock unit awards is paid to each recipient in the form of shares of Class A common stock. We intend to satisfy these grants by issuing shares from authorized capital. Please read Item 18 Financial Statements: Note 12 Capital Stock.

Board Practices

Our Board of Directors (or the *Board*) currently consists of six members. Directors are appointed to serve for a one-year term and until their successors are appointed or until they resign or are removed.

There are no service contracts between us and any of our directors providing for benefits upon termination of their employment or service.

The Board has determined that each of our directors, other than Bruce Chan, our Chief Executive Officer, who also serves as President of the Teekay Tanker Services division of Teekay Corporation, Bjorn Moller, our previous Chief Executive Officer, and Arthur Bensler, the Executive Vice President and General Counsel of Teekay Corporation, has no material relationship with Teekay Tankers (either directly or as a partner, shareholder or officer of an organization that has a relationship with Teekay Tankers) and is independent within the meaning of Teekay Tankers' director independence standards, which reflect the NYSE director independence standards, as currently in effect and as they may be changed from time to time.

NYSE does not require a company like ours, which is a foreign private issuer and of which more than 50% of the voting power is held by another company, to have a majority of independent directors on the Board of Directors or to establish compensation or nominating/corporate governance committees composed of independent directors.

The Board has adopted our Corporate Governance Guidelines that address, among other things, director qualification standards, director functions and responsibilities, director access to management, director compensation and management succession. This document is available under the "About Us" Corporate Governance section of our website (www.teekaytankers.com).

The Board has the following three committees: Audit Committee, Conflicts Committee, and Nominating and Governance Committee. The membership of these committees as of December 31, 2013 and the function of each of the committees are described below. Each of the committees, other than the Nominating and Governance Committee, is currently comprised of independent members and operates under a written charter adopted by the Board. All of the committee charters are available under "Other Information" Corporate Governance in the Investor Centre of our Web site at www.teekaytankers.com. During 2013, the Board held seven meetings and all directors were in attendance. Committee members attended all meetings except for one Board member at one meeting. Committee members attended all meetings except for one committee meetings where two committee members were absent.

Our Audit Committee is composed entirely of directors who satisfy applicable NYSE and SEC audit committee independence standards. Our Audit Committee is comprised of William Lawes (Chair), Richard J.F. Bronks and Richard du Moulin. All members of the committee are financially literate and the Board has determined that Mr. Lawes qualifies as an audit committee financial expert.

The Audit Committee assists the Board in fulfilling its responsibilities for general oversight of:

the integrity of our financial statements;

our compliance with legal and regulatory requirements;

the independent auditors' qualifications and independence; and

the performance of our internal audit function and independent auditors.

Table of Contents

Our Conflicts Committee is composed entirely of directors who satisfy the heightened NYSE and SEC independence standards applicable to Audit Committee membership. The Conflicts Committee is comprised of Richard du Moulin (Chair), Richard J.F. Bronks and William Lawes. The Conflicts Committee reviews matters that the Board refers to the committee for consideration and which constitute (a) matters the Board believes may involve conflicts of interest between (i) us and (ii) our controlling stockholder Teekay Corporation or its affiliates (other than us) or (b) material related-party transactions, including transactions between us and our or Teekay Corporation's officers or directors or their affiliates. The Board is not obligated to seek approval of the Conflicts Committee on any matter, and may determine the resolution of any conflict of interest itself.

Our Nominating and Governance Committee is comprised of Richard J.F. Bronks (Chair), Richard du Moulin and William Lawes.

The Nominating and Governance Committee:

identifies individuals qualified to become Board members;

selects and recommends to the Board director and committee member candidates;

maintain oversight of the operation and effectiveness of the Board of Directors and the corporate governance of the Company;

develops, updates and recommends to the Board corporate governance principles and policies applicable to us, monitors compliance with these principles and policies and recommends to the Board appropriate changes; and

monitors compliance with such principles and policies;

discharges responsibilities of the Board relating to the Board's compensation; and

oversees the evaluation of the Board and its committees.

Crewing and Staff

Our Manager provides us with all of our staff other than our Chief Executive Officer and Chief Financial Officer. Our executive officers have the authority to hire additional staff as they deem necessary.

As of December 31, 2013, approximately 1,000 seagoing staff served on our vessels. The majority of our subsidiaries employ seagoing staff directly and certain subsidiaries of Teekay Corporation employ the crews for one of our vessels. These crews serve on the vessels pursuant to service agreements between our Manager, acting on our behalf, and those subsidiaries.

Teekay Corporation and its affiliates regard attracting and retaining motivated seagoing personnel as a top priority. Teekay Corporation has entered into a Collective Bargaining Agreement with the Philippine Seafarers Union, an affiliate of the International Transport Workers Federation (or *ITF*), and a Special Agreement with ITF London, which covers substantially all of the officers and seamen that operate our vessels. We believe that Teekay Corporation's relationships with these labor unions are good.

We believe that Teekay Corporation's commitment to training is fundamental to the development of the highest caliber of seafarers for marine operations. Teekay Corporation's cadet training approach is designed to balance academic learning with hands-on training at sea. Teekay Corporation has relationships with training institutions in Australia, Canada, Croatia, India, Latvia, Norway, the Philippines, South Africa and the United Kingdom. After receiving formal instruction at one of these institutions, a cadet's training continues onboard vessels. Teekay Corporation also has a career development plan that was devised to ensure a continuous flow of qualified officers who are trained on its vessels and familiarized with its operational standards, systems and policies. We believe that high-quality crewing and training policies will play an increasingly important role in distinguishing larger independent shipping companies that have in-house or affiliate capabilities from smaller companies that must rely on outside ship managers and crewing agents on the basis of customer service and safety.

Share Ownership

The following table sets forth certain information regarding beneficial ownership, as of December 31, 2013, of our Class A common stock by our directors and executive officers as a group. None of these persons beneficially owns any of our Class B common stock. The information is not necessarily indicative of beneficial ownership for any other purpose. Under SEC rules a person or entity beneficially owns any shares that the person or entity (a) has or shares voting or investment power or (b) has the right to acquire as of March 1, 2014 (60 days after December 31, 2013) through the exercise of any stock option or other right. Unless otherwise indicated, each person has sole voting and investment power (or shares such powers with his or her spouse) with respect to the shares set forth in the following table. Information for all persons listed below is based on information delivered to us.

Table of Contents

Identity of Person or Group	Percent of Total Class A and Class B		
	Percent of Class A		Common Stock Owned ⁽¹⁾
	Class A Common Stock	Common Stock Owned	
All directors and executive officers as a group (7 persons) ⁽¹⁾	369,285	0.5%	0.4%

(1) Excludes shares of Class A and Class B common stock beneficially owned by Teekay Corporation. Please read Item 7 - Major Shareholders and Related Party Transactions for more detail.

Item 7. Major Shareholders and Related Party Transactions**A. Major Shareholders**

The following table sets forth information regarding the beneficial ownership, as of February 28, 2014, of our Class A and Class B common stock by each entity or group we know to beneficially own more than 5% of the outstanding shares of our Class A common stock or our Class B common stock. Information for certain holders is based on their latest filings with the SEC or information delivered to us. The number of shares beneficially owned by each entity or group is determined under SEC rules and the information is not necessarily indicative of beneficial ownership for any other purpose. Under SEC rules a person or entity beneficially owns any shares as to which the person or entity has or shares voting or investment power. In addition, an entity or group beneficially owns any shares that the entity or group has the right to acquire as of June 30, 2014 (60 days after April 1, 2014) through the exercise of any stock option or other right. Unless otherwise indicated, each entity or group listed below has sole voting and investment power with respect to the shares set forth in the following table.

Identity of Person or Group	Percent of		Percent of		Percent of Total Class A and Class B Common Stock Owned
	Class A Common Stock	Class A Common Stock Owned	Class B Common Stock	Class B Common Stock Owned	
Teekay Corporation ⁽¹⁾	8,476,530	11.9%	12,500,000	100.0%	25.1%
T. Rowe Price Associates, Inc., T. Rowe Price Small-Cap Values Fund, Inc., as a group ⁽²⁾	7,904,870	11.1%		0.0%	9.5%

(1) The voting power represented by shares beneficially owned by Teekay Corporation is 6.3% for Class A common stock, 46.9% for Class B common stock and 53.1% for total Class A and Class B common stock.

(2) According to the Schedule 13G filed with the SEC on March 10, 2014, T. Rowe Price Associates, Inc. has sole voting power as to 2,020,070 of the shares, T. Rowe Price Small-Cap Value Fund, Inc. has sole voting power as to 5,020,000 of the shares, and T. Rowe Price Associates, Inc. has sole dispositive power as to all of the shares. The voting power represented by shares beneficially owned by T. Rowe Price Associates, Inc. and T. Rowe Price Small-Cap Value Fund, Inc., as a group, is 11.1% for Class A common stock and 9.5% for total Class A and Class B common stock.

Our Class B common stock entitles the holder thereof to five votes per share, subject to a 49% aggregate Class B common stock voting power maximum, while our Class A common stock entitles the holder thereof to one vote per share. Except as otherwise provided by the Marshall Islands Business Corporations Act, holders of shares of our Class A common stock and Class B common stock vote together as a single class on all matters submitted to a vote of stockholders, including the election of directors. Teekay Corporation currently controls all of our outstanding Class B common stock and 8,476,530 shares of our Class A common stock. Because of our dual-class structure, Teekay Corporation may continue to control all matters submitted to our stockholders for approval even if it and its affiliates come to own significantly less than 50% of our outstanding shares of capital stock. Shares of our Class B common stock will convert into shares of our Class A common stock on a one-for-one basis upon certain transfers thereof or if the aggregate number of outstanding shares of Class A common stock and Class B common stock beneficially owned by Teekay Corporation and its affiliates falls below 15% of the aggregate number of outstanding shares of our common stock.

We are controlled by Teekay Corporation. We are not aware of any arrangements, the operation of which may at a subsequent date result in a change in control of us.

B. Related Party Transactions

Relationship with Teekay Corporation

Control

Through its ownership of our capital stock, Teekay Corporation controls us. Please read [Major Shareholders](#) above.

Business Opportunities

Under a contribution, conveyance and assumption agreement entered into in connection with our initial public offering in December 2007, Teekay Corporation and we agreed that Teekay Corporation and its other affiliates may pursue any Business Opportunity (as defined below) of which it, they or we become aware. Business Opportunities may include, among other things, opportunities to charter-out, charter-in or acquire oil tankers or to acquire tanker businesses.

Pursuant to the contribution, conveyance and assumption agreement, we agreed that:

Teekay Corporation and its other affiliates may engage (and will have no duty to refrain from engaging) in the same or similar activities or lines of business as us, and that we will not be deemed to have an interest or expectancy in any business opportunity, transaction or other matter (each a Business Opportunity) in which Teekay Corporation or any of its other affiliates engages or seeks to engage merely because we engage in the same or similar activities or lines of business as that related to such Business Opportunity;

Table of Contents

if Teekay Corporation or any of its other affiliates (whether through our Manager, any of Teekay Corporation's or any of its other affiliates' officers or directors who are also officers or directors of us, or otherwise) acquires knowledge of a potential Business Opportunity that may be deemed to constitute a corporate opportunity of both Teekay Corporation and us, then (i) neither Teekay Corporation, our Manager nor any of such officers or directors will have any duty to communicate or offer such Business Opportunity to us and (ii) Teekay Corporation may pursue or acquire such Business Opportunity for itself or direct such Business Opportunity to another person or entity; and

any Business Opportunity of which our Manager or any person who is an officer or director of Teekay Corporation (or any of its other affiliates) and of us becomes aware shall be a Business Opportunity of Teekay Corporation.

If Teekay Corporation or its other affiliates no longer beneficially own shares representing at least 20% of the total voting power of our outstanding capital stock, and no person who is an officer or director of us is also an officer or director of Teekay Corporation or its other affiliates, then the business opportunity provisions of the contribution, conveyance and assumption agreement will terminate.

Our articles of incorporation also renounce in favor of Teekay Corporation business opportunities that may be attractive to both Teekay Corporation and us. This provision likewise effectively limits the fiduciary duties we or our stockholders otherwise may be owed regarding these business opportunities by our directors and officers who also serve as directors or officers of Teekay Corporation or its other affiliates.

Non-competition Agreement

In connection with our acquisition from Teekay Corporation of 13 vessels in June 2012 as part of the 2012 Acquired Business transaction, we entered into a non-competition agreement with Teekay Corporation. The following discussion describes certain provisions of the agreement.

Non-competition. Under the non-competition agreement, Teekay Corporation has agreed that neither it nor any of its controlled affiliates other than us will own or operate conventional oil or product tankers until June 15, 2015. However, this restriction does not prevent Teekay Corporation or any of its controlled affiliates from, among other things:

- (a) owning, operating or chartering any conventional oil or product tankers that Teekay Corporation and its controlled subsidiaries owned or chartered-in as of June 15, 2012 (or any replacement tankers upon any actual or constructive loss of such vessels);
- (b) providing ship management services relating to conventional oil or product tankers; or
- (c) acquiring up to a 9.9 percent interest in any publicly traded company that owns, operates or charters conventional oil or product tankers; acquiring up to a 50 percent interest in any company that engages no more than the lesser of 20 percent of its assets or \$100 million in the business of owning, operating or chartering conventional oil or product tankers; or owning any interests in us, Teekay Offshore Partners L.P. or Teekay LNG Partners L.P.

Right of First Refusal. The non-competition agreement also provides us with a right of first refusal to acquire existing or newbuilding conventional and product tankers pursuant to opportunities Teekay Corporation develops prior to June 15, 2015. The non-competition agreement generally provides that Teekay Corporation must offer us such acquisition opportunities at their fair market value, for existing tankers, or the fully built-up cost, for newbuildings, and the price may include an allocation of design and development costs for any newbuildings constructed using an energy efficient design developed by Teekay Corporation.

Please see Item 8 Financial Information: Material Contracts below.

Teekay Tankers Executive Officers and Certain of its Directors

C. Sean Day, who served as the Chairman of our Board of Directors until his resignation effective June 12, 2013, is also the Chairman of Teekay Corporation, Teekay Offshore GP L.L.C. (the general partner of Teekay Offshore Partners L.P., a publicly held partnership controlled by Teekay Corporation), Teekay GP L.L.C. (the general partner of Teekay LNG Partners L.P., a publicly held partnership controlled by Teekay Corporation) and our Manager, which is a subsidiary of Teekay Corporation and that provides to us pursuant to the Management Agreement substantially all services necessary to support our business. Please read Management Agreement below.

Bjorn Moller, our former Chief Executive Officer and one of our Directors, is also a director of Teekay Corporation and was the Chief Executive Officer of Teekay Corporation until his retirement on March 31, 2011. He was also a director of each of Teekay Offshore GP L.L.C. and Teekay GP L.L.C. until March 31, 2011.

Bruce Chan, who currently serves as our Chief Executive Officer and one of our Directors, is also the President of Teekay Tanker Services, the strategic business unit of Teekay Corporation that manages the conventional crude oil and product tanker fleets within the Teekay Group. Mr. Chan has tendered his resignation from all these position effective June 20, 2014.

Vincent Lok, our Chief Financial Officer, is also the Chief Financial Officer of our Manager and the Executive Vice President and Chief Financial Officer of Teekay Corporation.

Peter Evensen, our former Executive Vice President and who served as one of our Directors until his resignation effective June 12, 2013, is also the Chief Executive Officer and a Director of Teekay Corporation. He is also the Chief Executive Officer, Chief Financial Officer and a director of each of Teekay Offshore GP L.L.C. and Teekay GP L.L.C. He is also a director of our Manager.

Arthur Bensler, our Chairman of the Board, is also Executive Vice President and General Counsel of Teekay Corporation and President of Teekay Shipping (Canada) Ltd. In addition, Mr. Bensler also serves as Assistant Corporate Secretary of Teekay Offshore GP L.L.C., general partner of Teekay Offshore Partners L.P. and Teekay GP L.L.C. and general partner of Teekay LNG Partners L.P.

Table of Contents

Because our executive officers are employees of Teekay Corporation or other of its subsidiaries, their compensation (other than any awards under our long-term incentive plan) is set and paid by Teekay Corporation or such other applicable subsidiaries. Pursuant to an agreement with Teekay Corporation, we have agreed to reimburse Teekay Corporation or its applicable subsidiaries for time spent by our executive officers on our management matters.

Registration Rights Agreement

In connection with our initial public offering, we entered into a registration rights agreement with Teekay Corporation pursuant to which we granted Teekay Corporation and its affiliates certain registration rights with respect to shares of our Class A and Class B common stock owned by them. Pursuant to the agreement, Teekay Corporation has the right, subject to certain terms and conditions, to require us, on up to three separate occasions, to register under the U.S. Securities Act of 1933 shares of Class A common stock, including Class A common stock issuable upon conversion of Class B common stock, held by Teekay Corporation and its affiliates for offer and sale to the public (including by way of underwritten public offering) and incidental or piggyback rights permitting participation in certain registrations of our common stock.

Management Agreement

In connection with our initial public offering in December 2007, we entered into the long-term Management Agreement with our Manager, Teekay Tankers Management Services Ltd., a subsidiary of Teekay Corporation. Pursuant to the Management Agreement, the Manager provides the following types of services to us: commercial (primarily vessel chartering), technical (primarily vessel maintenance and crewing), administrative (primarily accounting, legal and financial) and strategic (primarily advising on acquisitions, strategic planning and general management of the business).

Our Manager has agreed to use its best efforts to provide these services upon our request in a commercially reasonable manner and may provide these services directly to us or subcontract for certain of these services with other entities, primarily other Teekay Corporation subsidiaries. Under the Management Agreement, our Manager remains responsible for any subcontracted services. We will indemnify our Manager for any losses it incurs in connection with providing services to us, excluding losses caused by the recklessness, gross negligence or willful misconduct of our Manager or its employees or agents, for which losses our Manager will indemnify us.

Compensation of the Manager

Management Fee. In return for services under the Management Agreement, we pay our Manager a management fee based on the following components:

Commercial services fee. We pay a fee to our Manager for commercial services it provides to us currently equal to 1.25% of the gross revenue attributable to the vessels, on time charter, our Manager commercially manages for us (excluding vessels participating in the Gemini Suezmax Pool, Teekay Aframax Pool or the Taurus Tankers LR2 Pool). We paid commercial service fees of \$1.1 million for 2013, and \$1.1 million for 2012.

Technical services fee. We pay a fee to our Manager for technical services fees, and we paid technical services fees of \$5.6 million for 2013, and \$7 million for 2012 including the technical management fees of

\$2.6 million attributable to Dropdown Predecessor.

Administrative and strategic services fees. We pay fees to our Manager for administrative and strategic services that reimburse our Manager for its related direct and indirect expenses in providing such services and which includes a profit margin. The amount of the profit margin is based on the most recent transfer pricing study performed by an independent, nationally recognized accounting firm with respect to similar administrative and strategic services. The transfer pricing study is updated at least annually. We paid administrative and strategic services fees of \$10.8 million for 2013, and \$5.5 million for 2012.

Performance Fee. In order to provide our Manager with an incentive to improve the results of our operations and financial condition, the Management Agreement also provides for payment to our Manager of a performance fee in certain circumstances, in addition to the basic fees described above. Our Manager generally is entitled to payment of a performance fee equal to 20% of the Gross Cash Available for Distribution (as defined in the Management Agreement) for a given fiscal year exceeds \$3.20 per share of our common stock (subject to adjustment for stock dividends, splits, combinations and similar events, and based on the weighted-average number of shares outstanding for the year) (or the *Incentive Threshold*).

Since January 1, 2008, we have maintained an internal account (or the *Cumulative Dividend Account*) that reflects, on an aggregate basis, the amount by which our dividends for a fiscal year are greater or less than the \$2.65 per share annual incentive baseline (subject to adjustments for stock dividends, splits, combinations and similar events, and based on the weighted-average number of shares outstanding for the fiscal year). The Cumulative Dividend Account is intended to ensure that our stockholders receive an equivalent of at least \$2.65 per share in annualized dividends before any performance fee is paid. If Gross Cash Available for Distribution per share exceeds the Incentive Threshold in respect of a particular fiscal year, we will only pay our Manager a performance fee if the Cumulative Dividend Account is zero or positive; if there is a deficit in the Cumulative Dividend Account, the performance fee may be reduced. Following the end of each five-year period, commencing January 1, 2013, the Cumulative Dividend Account balance will be reset to zero. We paid no performance fees to our Manager in 2013, 2012 or 2011.

Term and Termination Rights. Subject to certain termination rights, the initial term of the Management Agreement will expire on December 31, 2022. If not terminated, the Management Agreement will automatically renew for a five-year period and thereafter be extended in additional five-year increments if we do not provide notice of termination in the fourth quarter of the year immediately preceding the end of the respective term.

Table of Contents

We may terminate the Management Agreement in certain circumstances, including, among others, if:

our Manager materially breaches the Management Agreement (and the matter is unresolved after a 90-day dispute resolution period) or experiences certain bankruptcy events or experiences a change of control to which we do not consent;

we provide notice in the fourth quarter of 2016 after two-thirds of our Board of Directors elects to terminate the Management Agreement, which termination would be effective on December 31, 2017; or

we provide notice in the fourth quarter of 2021, which termination would be effective on December 31, 2022. If the Management Agreement extends pursuant to its terms as described above, we can elect to exercise this optional termination right in the fourth quarter of the year immediately preceding the end of the respective term.

If we elect to terminate the Management Agreement under either of the last two bullet points described above, our Manager will receive a payment (the *Termination Payment*) in an amount equal to the aggregate performance fees payable for the immediately preceding five fiscal years. Any Termination Payment will be paid to our Manager in four quarterly installments over the course of the fiscal year following termination.

Our Manager may terminate the Management Agreement prior to the end of its term under either of the following two circumstances:

after December 18, 2012 with 12 months' notice. At our option, our Manager will continue to provide technical services to us for up to an additional two-year period from termination, provided that our Manager or its affiliates continue in the business of providing such services to third parties for similar types of vessels; or

if we materially breach the agreement and the matter is unresolved after a 90-day dispute resolution period. If our Manager elects to terminate the Management Agreement under the second circumstance described above, our Manager will receive the Termination Payment, payable in four quarterly installments over the course of the first year following termination.

The Management Agreement will terminate automatically and immediately if we experience any of certain changes of control. Upon any such termination, we will be required to pay our Manager the Termination Payment in a single installment.

Pooling Agreements

Gemini Suezmax Pool

Teekay Corporation and certain third party vessel owners and operators are parties to a revenue sharing pool agreement (the *Gemini Pooling Agreement*) pursuant to which these pool participants have each agreed to procure to

include in the pool certain qualifying Suezmax-class crude tankers of the pool participants and their respective affiliates, including us, that operate in the spot market or pursuant to time charters of less than one year. The Gemini Suezmax Pool is jointly and equally owned by Teekay Corporation and two third parties.

As of December 31, 2013, the Gemini Suezmax Pool consisted of 33 Suezmax tankers, including eight of our vessels. A participating Suezmax tanker will no longer participate in the Gemini Suezmax Pool if it becomes subject to a time charter with a term exceeding one year, unless otherwise agreed by all pool participants. In addition, vessels no longer participate in the pool if they suffer an actual or constructive total loss or if they are sold to or become controlled by a person who is not an affiliate of a party to the Gemini Pooling Agreement.

Vessel owners remain responsible for the technical management of their vessels in the Gemini Suezmax Pool, and our Manager provides these technical services with respect our vessels pursuant to the Management Agreement.

Allocation of Gemini Pool Earnings. The Gemini Pool provides a revenue sharing mechanism whereby aggregate revenues and related expenses of the pool are distributed to pool participants based on an allocation formula. Revenues generated by vessels operating in the Gemini Pool less voyage expenses (such as fuel and port charges) incurred by these vessels and other applicable expenses are pooled and allocated according to a specified weighting system that recognizes each vessel's earnings capability based on its characteristics, speed and bunker consumption, as well as actual on-hire performance. The allocation for each vessel participating in the pool is established based on observations and historical consumption and performance measures of the individual vessel. Payments based on net cash flow applicable to each tanker are made on a monthly basis to pool participants and adjusted every six months based on the weighting system.

Commercial Management Fee and Working Capital Payments. Gemini Tankers, a jointly owned company by Teekay Corporation and two other parties, provides commercial services to pool participants and otherwise administers the pool in exchange for a fee currently equal to \$325 per vessel per day (which increased from \$275 per vessel per day commencing July 1, 2012) plus 1.25% of the gross revenues attributable to the participant's vessels.

Effective February 1, 2012, vessels entering the Gemini Suezmax Pool are required to have approximately 3,000 metric tons of bunker fuel on board. Any difference between this amount and the actual quantity on board is added to or subtracted from a working capital contribution requirement, with valuation of bunker fuel based on the last invoiced price prior to joining the pool. Working capital in aggregate of \$2.0 million is required, subject to the bunker fuel adjustment described above and to a \$300,000 minimum adjusted working capital amount. If a vessel has less than 2,000 metric tons of bunker fuel on board, it may be refused entry to the pool until such time as the bunker fuel quantities meet the required limits. Working capital advances are returned when a vessel no longer participates in the pool, less any set-offs for outstanding liabilities or contingencies and taking into account the differences in bunker fuel values at the time of withdrawal compared to when the vessel entered into the pool. Please read Note 14(e) to our consolidated financial statements included in this Annual Report.

Term and Termination. There is no specific expiration date for the Gemini Pooling Agreement. However, the pool may be wound up upon unanimous agreement of all participants or upon 90 days advance notice by Gemini Tankers. A pool participant may withdraw from the Gemini Pool upon at least 30 days' notice and shall cease to participate in the Gemini Pool if, among other things, it materially breaches the Gemini Pooling Agreement and fails to resolve the breach within a specified cure period or experiences certain bankruptcy events.

Table of Contents**Teekay Aframax Pool**

We entered into a revenue sharing pool agreement (the *Teekay Pooling Agreement*) with Teekay Corporation and Teekay Chartering Limited, a subsidiary of Teekay Corporation. Pursuant to the Teekay Pooling Agreement, we and Teekay Corporation have agreed to include in the Teekay Aframax Pool all of our and its respective Aframax-class oil tankers that are employed in the spot market or operate pursuant to time charters of less than 90 days. As of December 31, 2013, the Teekay Aframax Pool consisted of 24 Aframax tankers which included one of our owned Aframax tankers and one chartered-in tanker. Any Aframax tanker that becomes subject to a time charter with a term of at least 90 days or becomes subject to enforcement action under a ship-mortgage foreclosure or similar proceeding will no longer participate in the Teekay Aframax Pool, unless otherwise agreed by Teekay Corporation and us. In addition, vessels will no longer participate in the pool if they suffer an actual or constructive total loss or if they are sold to or become controlled by a third party who is not a party to the Teekay Pooling Agreement.

Under the Teekay Pooling Agreement, Teekay Chartering Limited commercially manages the Teekay Aframax Pool by providing chartering and marketing services for all participating tankers. We remain responsible for the technical management of our vessels in the Teekay Aframax Pool, and our Manager provides these technical services to us pursuant to the Management Agreement.

Allocation of Teekay Pool Earnings. The Teekay Aframax Pool provides a revenue sharing mechanism whereby aggregate revenues and related expenses of the pool are distributed to pool participants based on an allocation formula. Revenues generated by vessels operating in the Teekay Aframax Pool less voyage expenses (such as fuel and port charges) incurred by these vessels and other applicable expenses are pooled and allocated according to a specified weighting system that recognizes each vessel's earnings capability based on its characteristics, speed and bunker consumption, as well as actual on-hire performance. The allocation for each vessel participating in the pool is established based on observations and historical consumption and performance measures of the individual vessel. Payments based on net cash flow applicable to each tanker are made on a monthly basis to pool participants and adjusted every six months based on the weighting system.

Commercial Management Fee and Working Capital Payments. Teekay Chartering Limited provides commercial services to us and otherwise administers the pool in exchange for a fee currently equal to \$350 per vessel per day plus 1.25% of the gross revenues attributable to the participant's vessels. The amount of the daily per vessel fee is adjusted every three years by agreement between Teekay Chartering Limited and us or, if needed, by arbitration.

Upon delivery of each of our vessels to the Teekay Aframax Pool, we are required to advance to Teekay Chartering Limited \$250,000 for working capital purposes. We may be required to advance additional working capital funds from time to time. Working capital advances will be returned to us when a vessel no longer participates in the pool, less any set-offs for outstanding liabilities or contingencies. Please read Note 14(e) to our consolidated financial statements included in this Annual Report.

Term and Termination Rights. Subject to certain termination rights, the initial term of the Teekay Pooling Agreement expires on December 31, 2022. If not terminated, the Teekay Pooling Agreement will automatically renew for a five-year period and thereafter be extended in additional five-year increments unless we provide a notice of termination in the fourth quarter of the year immediately preceding the end of the respective term.

We may also terminate the Teekay Pooling Agreement in certain other circumstances, including, among others, if:

Teekay Chartering Limited or Teekay Corporation materially breaches the Teekay Pooling Agreement (and the matter is unresolved after a 90-day dispute resolution period) or experiences certain bankruptcy events or if Teekay Chartering Limited experiences a change of control to which we do not consent; or

the Management Agreement terminates for any reason.

Either Teekay Chartering Limited or Teekay Corporation may terminate the Teekay Pooling Agreement prior to the end of its term under any of the following circumstances:

after December 18, 2012 with 12 months' notice;

if we materially breach the Teekay Pooling Agreement and the matter is unresolved after a 90-day dispute resolution period; or

if the Management Agreement terminates for any reason.

Taurus Tankers LR2 Pool

Teekay Corporation and certain third party vessel owners and operators are parties to a revenue sharing pool agreement (the *Taurus Pooling Agreement*) pursuant to which these pool participants have each agreed to include in the pool certain qualifying Long Range 2 (LR2)-class product tankers of the pool participants and their respective affiliates, including us, that operate in the spot market or pursuant to time charters of less than 180 days unless otherwise agreed by all pool participants. The Taurus Tankers LR2 Pool is owned by Taurus Tankers Ltd., a wholly-owned subsidiary of Teekay Corporation.

As of December 31, 2013, the Taurus Pool consisted of 18 tankers, including three of our vessels. A participating LR2 product tanker will no longer participate in the Taurus Pool if it becomes subject to a time charter with a term exceeding 180 days, unless otherwise agreed by all pool participants. In addition, vessels will no longer participate in the pool if they suffer an actual or constructive total loss or if they are sold to or become controlled by a person who is not an affiliate of a party to the Taurus Pooling Agreement.

Vessel owners remain responsible for the technical management of their vessels in the Taurus Pool, and our Manager provides these technical services with respect to our vessels pursuant to the Management Agreement.

Table of Contents

Allocation of Taurus Pool Earnings. The Taurus Pool provides a revenue sharing mechanism whereby aggregate revenues and related expenses of the pool are distributed to pool participants based on an allocation formula. Revenues generated by vessels operating in the Taurus Pool less voyage expenses (such as fuel and port charges) incurred by these vessels and other applicable expenses are pooled and allocated according to a specified weighting system that recognizes each vessel's earnings capability based on its characteristics, speed and bunker consumption, and actual on-hire performance. The allocation for each vessel participating in the pool is established based on observations and historical consumption and performance measures of the individual vessel. Payments based on net cash flow applicable to each tanker are made on a monthly basis to pool participants and adjusted at regular intervals throughout the year based on the weighting system.

Commercial Management Fee and Working Capital Payments. Taurus Tankers provides commercial services to pool participants and otherwise administers the pool in exchange for a fee currently equal to \$275 per vessel per day plus 1.25% of the gross revenues attributable to the participant's vessels.

Upon delivery of each of our vessels to the Taurus Pool, we are required to advance \$250,000 for working capital purposes, plus approximately 2,000 metric tonnes of bunkers. We may be required to advance additional working capital funds from time to time. Working capital advances will be returned to us when a vessel no longer participates in the pool, less any set-offs for outstanding liabilities or contingencies. Please read Note 14(e) to our consolidated financial statements included in this Annual Report.

Term and Termination. There is no specific expiration date for the Taurus Pooling Agreement. However, the pool may be wound up upon unanimous agreement of all participants or upon 180 days advance notice by Taurus Tankers. A pool participant may withdraw from the Taurus Pool upon at least 90 days' notice and shall cease to participate in the Taurus Pool if, among other things, it materially breaches the Taurus Pooling Agreement and fails to resolve the breach within a specified cure period or experiences certain bankruptcy events.

Item 8. Financial Information

Consolidated Financial Statements and Notes

Please see Item 18 below for additional information required to be disclosed under this Item.

Legal Proceedings

From time to time we have been, and we expect to continue to be, subject to legal proceedings and claims in the ordinary course of our business, principally personal injury and property casualty claims. Such claims, even if lacking merit, could result in the expenditure of significant financial and managerial resources. We are not aware of any legal proceedings or claims that we believe will have, individually or in the aggregate, a material adverse effect on our financial condition or results of operations.

Dividend Policy

Prior to the first quarter of 2013, we paid a variable quarterly cash dividend equal to our Cash Available for Distribution each quarter, subject to any reserves determined by our Board of Directors. Dividends were paid equally on a per-share basis between our Class A common stock and our Class B common stock. Cash Available for Distribution represented net income (loss), plus depreciation and amortization, unrealized losses from derivatives, non-cash items and any write-offs or other non-recurring items, less unrealized gains from derivatives and net income attributed to the historical results of vessels acquired by us from Teekay Corporation, prior to their acquisition by us,

for the period these vessels were owned and operated by Teekay Corporation. On February 21, 2013, we announced that our Board of Directors elected to move to a fixed quarterly cash dividend of \$0.03 per share, which commenced in the quarter ended March 31, 2013. Subject to financial results and determination by the Board of Directors, we currently intend to continue to declare and pay a regular fixed quarterly dividend in such amount per share on our Class A common stock and our Class B common stock.

The timing and amount of dividends, if any, will depend, among other things, on our results of operations, financial condition, cash requirements, the requirements of Marshall Islands law, restrictions in financing agreements and other factors deemed relevant by our Board of Directors.

Significant Changes

Please read Item 5 Operating and Financial Review and Prospects: Management's Discussion and Analysis of Financial Condition and Results of Operations Significant Developments in 2013 and 2014.

Item 9. The Offer and Listing

Our Class A common stock is listed on the New York Stock Exchange (or *NYSE*) under the symbol *TNK*. The following table sets forth the high and low prices for our Class A common stock on the NYSE for each of the periods indicated.

Table of Contents

Years Ended	Dec. 31, 2013	Dec. 31, 2012	Dec. 31, 2011	Dec. 31, 2010	Dec. 31, 2009
High	\$ 4.02	\$ 6.33	\$ 12.99	\$ 13.96	\$ 14.55
Low	\$ 2.38	\$ 2.38	\$ 3.36	\$ 8.50	\$ 7.59

Quarters Ended	Mar. 31, 2014	Dec. 31, 2013	Sept. 30, 2013	Jun. 30, 2013	Mar. 31, 2013	Dec. 31, 2012	Sept. 30, 2012	Jun. 30, 2012	Mar. 31, 2012
High	\$ 5.08	\$ 4.02	\$ 3.09	\$ 3.06	\$ 3.43	\$ 3.94	\$ 4.58	\$ 6.33	\$ 12.99

Item 10. Additional Information**Articles of Incorporation and Bylaws**

Our Amended and Restated Articles of Incorporation and Amended and Restated Bylaws have been filed as Exhibits 3.1 and 3.2, respectively, to Amendment No. 1 to our Registration Statement on Form F-1 (File No. 333-147798), filed with the SEC on December 11, 2007, and are hereby incorporated by reference into this Annual Report.

The rights, preferences and restrictions attaching to each class of our capital stock are described in the section entitled Description of Capital Stock of our Rule 424(b) prospectus (File No. 333-147798), filed with the SEC on December 13, 2007, and hereby incorporated by reference into this Annual Report.

There are no limitations on the rights to own securities, including the rights of non-resident or foreign shareholders to hold or exercise voting rights on the securities imposed by the laws of the Republic of The Marshall Islands or by our Articles of Incorporation or Bylaws.

Material Contracts

The following is a summary of each material contract, other than material contracts entered into in the ordinary course of business, to which we or any of our subsidiaries is a party, for the two years immediately preceding the date of this Annual Report, each of which is included in the list of exhibits in Item 19:

- a) Purchase Agreement dated June 15, 2012 between Teekay Corporation and Teekay Tankers Ltd. For the sale and purchase of the entire membership interests in Godavari Spirit L.L.C., Axel Spirit L.L.C., Mahanadi Spirit L.L.C., Teesta Spirit L.L.C., Hugli Spirit L.L.C., Americas Spirit L.L.C., Australia Spirit L.L.C., Pinnacle Spirit L.L.C., Donegal Spirit L.L.C., Galway Spirit L.L.C., Limerick Spirit L.L.C., Summit Spirit L.L.C., and Zenith Spirit L.L.C.
- b)

Non-competition Agreement dated June 15, 2012 between Teekay Corporation and Teekay Tankers Ltd. Please read Item 7 Major Shareholders and Related Party Transaction: B. Related Party Transactions for a discussion on the agreement.

Exchange Controls and Other Limitations Affecting Security Holders

We are not aware of any governmental laws, decrees or regulations, including foreign exchange controls, in the Republic of The Marshall Islands that restrict the export or import of capital or that affect the remittance of dividends, interest or other payments to non-resident holders of our securities.

We are not aware of any limitations on the right of non-resident or foreign owners to hold or vote our securities imposed by the laws of the Republic of The Marshall Islands or our Articles of Incorporation and Bylaws.

Material U.S. Federal Income Tax Considerations

The following is a discussion of certain material U.S. federal income tax considerations that may be relevant to stockholders. This discussion is based upon the provisions of the Internal Revenue Code of 1986, as amended (or the *Code*), legislative history, applicable U.S. Treasury Regulations (or *Treasury Regulations*), judicial authority and administrative interpretations, all as in effect on the date of this Annual Report, and which are subject to change, possibly with retroactive effect, or are subject to different interpretations. Changes in these authorities may cause the tax consequences to vary substantially from the consequences described below. Unless the context otherwise requires, references in this section to we, our or us are references to Teekay Tankers Ltd.

This discussion is limited to stockholders who hold their common stock as a capital asset for tax purposes. This discussion does not address all tax considerations that may be important to a particular stockholder in light of the stockholder's circumstances, or to certain categories of stockholders that may be subject to special tax rules, such as:

Table of Contents

dealers in securities or currencies,

traders in securities that have elected the mark-to-market method of accounting for their securities,

persons whose functional currency is not the U.S. dollar,

persons holding our common stock as part of a hedge, straddle, conversion or other synthetic security or integrated transaction,

certain U.S. expatriates,

financial institutions,

insurance companies,

persons subject to the alternative minimum tax,

persons that actually or under applicable constructive ownership rules own 10% or more of our common stock; and

entities that are tax-exempt for U.S. federal income tax purposes.

If a partnership (including any entity or arrangement treated as a partnership for U.S. federal income tax purposes) holds our common stock, the tax treatment of a partner generally will depend upon the status of the partner and the activities of the partnership. If you are a partner in a partnership holding our common stock, you should consult your own tax advisor about the U.S. federal income tax consequences of owning and disposing of the common stock.

This discussion does not address any U.S. estate tax considerations or tax considerations arising under the laws of any state, local or non-U.S. jurisdiction. Each stockholder is urged to consult its own tax advisor regarding the U.S. federal, state, local and other tax consequences of the ownership or disposition of our common stock.

United States Federal Income Taxation of U.S. Holders

As used herein, the term U.S. Holder means a beneficial owner of our common stock that is, for U.S. federal income tax purposes: (i) a U.S. citizen or U.S. resident alien (or a *U.S. Individual Holder*), (ii) a corporation or other entity taxable as a corporation, that was created or organized in or under the laws of the United States, any state thereof or the District of Columbia, (iii) an estate whose income is subject to U.S. federal income taxation regardless of its source, or (iv) a trust that either is subject to the supervision of a court within the United States and has one or more U.S. persons with authority to control all of its substantial decisions or has a valid election in effect under applicable Treasury Regulations to be treated as a U.S. person.

Distributions

Subject to the discussion of passive foreign investment companies (or *PFICs*) below, any distributions made by us with respect to our common stock to a U.S. Holder generally will constitute dividends, which may be taxable as ordinary income or qualified dividend income as described in more detail below, to the extent of our current and accumulated earnings and profits, as determined under U.S. federal income tax principles. Distributions in excess of our earnings and profits will be treated first as a nontaxable return of capital to the extent of the U.S. Holder's tax basis in its common stock and thereafter as capital gain, which will be either long term or short term capital gain depending upon whether the U.S. Holder has held the shares for more than one year. U.S. Holders that are corporations for U.S. federal income tax purposes generally will not be entitled to claim a dividends received deduction with respect to any distributions they receive from us. For purposes of computing allowable foreign tax credits for U.S. federal income tax purposes, dividends paid with respect to our common stock generally will be treated as foreign source income and generally will be treated as passive category income.

Dividends paid on our common stock to a U.S. Holder who is an individual, trust or estate (or a *Non-Corporate U.S. Holder*) will be treated as qualified dividend income that is taxable to such Non-Corporate U.S. Holder at preferential capital gain tax rates provided that: (i) our common stock is readily tradable on an established securities market in the United States (such as the New York Stock Exchange on which our common stock is traded); (ii) we are not classified as a PFIC for the taxable year during which the dividend is paid or the immediately preceding taxable year (we intend to take the position that we are not now and have never been classified as a PFIC, as discussed below); (iii) the Non-Corporate U.S. Holder has owned the common stock for more than 60 days in the 121-day period beginning 60 days before the date on which the common stock becomes ex-dividend; (iv) the Non-Corporate U.S. Holder is not under an obligation to make related payments with respect to positions in substantially similar or related property; and (v) certain other conditions are met. There is no assurance that any dividends paid on our common stock will be eligible for these preferential rates in the hands of a Non-Corporate U.S. Holder. Any dividends paid on our common stock not eligible for these preferential rates will be taxed as ordinary income to a Non-Corporate U.S. Holder.

Special rules may apply to any extraordinary dividend paid by us. An extraordinary dividend is, generally, a dividend with respect to a share of common stock if the amount of the dividend is equal to or in excess of 10% of a common stockholder's adjusted basis (or fair market value in certain circumstances) in such common stock. In addition, extraordinary dividends include dividends received within a one year period that, in the aggregate, equal or exceed 20% of a shareholder's adjusted tax basis. If we pay an extraordinary dividend on our common stock that is treated as qualified dividend income, then any loss derived by a Non-Corporate U.S. Holder from the sale or exchange of such common stock will be treated as long term capital loss to the extent of such dividend.

Certain Non-Corporate U.S. Holders are subject to a 3.8% tax on certain investment income, including dividends. Non-Corporate U.S. Holders should consult their tax advisors regarding the effect, if any, of this tax on their ownership of our common stock.

Table of Contents*Sale, Exchange or Other Disposition of Common Stock*

Subject to the discussion of PFICs below, a U.S. Holder generally will recognize taxable gain or loss upon a sale, exchange or other disposition of our common stock in an amount equal to the difference between the amount realized by the U.S. Holder from such sale, exchange or other disposition and the U.S. Holder's tax basis in such stock. Subject to the discussion of extraordinary dividends above, such gain or loss generally will be treated as (a) long term capital gain or loss if the U.S. Holder's holding period is greater than one year at the time of the sale, exchange or other disposition, or short term capital gain or loss otherwise and (b) U.S. source gain or loss, as applicable, for foreign tax credit purposes. Non-Corporate U.S. Holders may be eligible for preferential rates of U.S. federal income tax in respect of long-term capital gains. A U.S. Holder's ability to deduct capital losses is subject to certain limitations.

Certain Non-Corporate U.S. Holders are subject to a 3.8% tax on certain investment income, including capital gains from the sale or other disposition of stock. Non-Corporate U.S. Holders should consult their tax advisors regarding the effect, if any, of this tax on their disposition of our common stock.

Consequences of Possible PFIC Classification

A non-U.S. entity treated as a corporation for U.S. federal income tax purposes will be a PFIC in any taxable year in which, after taking into account the income and assets of the corporation and certain subsidiaries pursuant to a look-through rule, either: (i) at least 75% of its gross income is passive income; or (ii) at least 50% of the average value of its assets is attributable to assets that produce or are held for the production of passive income. For purposes of these tests, passive income includes dividends, interest, gains from the sale or exchange of investment property and rents and royalties other than rents and royalties that are received from unrelated parties in connection with the active conduct of a trade or business. By contrast, income derived from the performance of services does not constitute passive income.

There are legal uncertainties involved in determining whether the income derived from our time-chartering activities constitutes rental income or income derived from the performance of services, including legal uncertainties arising from the decision in *Tidewater Inc. v. United States*, 565 F.3d 299 (5th Cir. 2009), which held that income derived from certain time-chartering activities should be treated as rental income rather than services income for purposes of a foreign sales corporation provision of the Code. However, the Internal Revenue Service (or IRS) stated in an Action on Decision (AOD 2010-01) that it disagrees with, and will not acquiesce to, the way that the rental versus services framework was applied to the facts in the *Tidewater* decision, and in its discussion stated that the time charters at issue in *Tidewater* would be treated as producing services income for PFIC purposes. The IRS's statement with respect to *Tidewater* cannot be relied upon or otherwise cited as precedent by taxpayers. Consequently, in the absence of any binding legal authority specifically relating to the statutory provisions governing PFICs, there can be no assurance that the IRS or a court would not follow the *Tidewater* decision in interpreting the PFIC provisions of the Code. Nevertheless, based on our and our subsidiaries' current assets and operations, we intend to take the position that we are not now and have never been a PFIC. No assurance can be given, however, that the IRS, or a court of law, will accept our position or that we would not constitute a PFIC for any future taxable year if there were to be changes in our or our subsidiaries' assets, income or operations.

As discussed more fully below, if we were to be treated as a PFIC for any taxable year, a U.S. Holder would be subject to different taxation rules depending on whether the U.S. Holder makes a timely and effective election to treat us as a Qualified Electing Fund (a QEF election). As an alternative to making a QEF election, a U.S. Holder should be able to make a mark-to-market election with respect to our common stock, as discussed below.

Taxation of U.S. Holders Making a Timely QEF Election. If a U.S. Holder makes a timely QEF election (an *Electing Holder*), the Electing Holder must report each taxable year for U.S. federal income tax purposes the Electing Holder's pro rata share of our ordinary earnings and net capital gain, if any, for each taxable year for which we are a PFIC that ends with or within the Electing Holder's taxable year, regardless of whether or not the Electing Holder received distributions from us in that year. Such income inclusions would not be eligible for the preferential tax rates applicable to qualified dividend income. The Electing Holder's adjusted tax basis in our common stock will be increased to reflect taxed but undistributed earnings and profits. Distributions of earnings and profits that were previously taxed will result in a corresponding reduction in the Electing Holder's adjusted tax basis in our common stock and will not be taxed again once distributed. An Electing Holder generally will recognize capital gain or loss on the sale, exchange or other disposition of our common stock. A U.S. Holder makes a QEF election with respect to any year that we are a PFIC by filing IRS Form 8621 with the U.S. Holder's timely filed U.S. federal income tax return (including extensions).

If a U.S. Holder has not made a timely QEF election with respect to the first year in the U.S. Holder's holding period of our common stock during which we qualified as a PFIC, the U.S. Holder may be treated as having made a timely QEF election by filing a QEF election with the U.S. Holder's timely filed U.S. federal income tax return (including extensions) and, under the rules of Section 1291 of the Code, a deemed sale election to include in income as an excess distribution (described below) the amount of any gain that the U.S. Holder would otherwise recognize if the U.S. Holder sold the U.S. Holder's common stock on the qualification date. The qualification date is the first day of our taxable year in which we qualified as a qualified electing fund with respect to such U.S. Holder. In addition to the above rules, under very limited circumstances, a U.S. Holder may make a retroactive QEF election if the U.S. Holder failed to file the QEF election documents in a timely manner. If a U.S. Holder makes a timely QEF election for one of our taxable years, but did not make such election with respect to the first year in the U.S. Holder's holding period of our common stock during which we qualified as a PFIC and the U.S. Holder did not make the deemed sale election described above, the U.S. Holder also will be subject to the more adverse rules described below.

A U.S. Holder's QEF election will not be effective unless we annually provide the U.S. Holder with certain information concerning our income and gain, calculated in accordance with the Code, to be included with the U.S. Holder's U.S. federal income tax return. We have not provided our U.S. Holders with such information in prior taxable years and do not intend to provide such information in the current taxable year. Accordingly, U.S. Holders will not be able to make an effective QEF election at this time. If, contrary to our expectations, we determine that we are or will be a PFIC for any taxable year, we will provide U.S. Holders with the information necessary to make an effective QEF election with respect to our common stock.

Taxation of U.S. Holders Making a Mark to Market Election. If we were to be treated as a PFIC for any taxable year and, as we anticipate, our stock were treated as marketable stock, then, as an alternative to making a QEF election, a U.S. Holder would be allowed to make a mark to market election with respect to our common stock, provided the U.S. Holder completes and files IRS Form 8621 in accordance with the relevant instructions and related Treasury Regulations. If that election is made for the first year a U.S. Holder holds or is deemed to hold our common stock and for which we are a PFIC, the U.S. Holder generally would include as ordinary income in each taxable year that we are a

Table of Contents

PFIC the excess, if any, of the fair market value of the U.S. Holder's common stock at the end of the taxable year over the U.S. Holder's adjusted tax basis in the common stock. The U.S. Holder also would be permitted an ordinary loss in respect of the excess, if any, of the U.S. Holder's adjusted tax basis in the common stock over the fair market value thereof at the end of the taxable year that we are a PFIC, but only to the extent of the net amount previously included in income as a result of the mark-to-market election. A U.S. Holder's tax basis in our common stock would be adjusted to reflect any such income or loss recognized. Gain recognized on the sale, exchange or other disposition of our common stock in taxable years that we are a PFIC would be treated as ordinary income, and any loss recognized on the sale, exchange or other disposition of our common stock in taxable years that we are a PFIC would be treated as ordinary loss to the extent that such loss does not exceed the net mark-to-market gains previously included in income by the U.S. Holder. Because the mark-to-market election only applies to marketable stock, however, it would not apply to a U.S. Holder's indirect interest in any of our subsidiaries that were also determined to be PFICs.

If a U.S. Holder makes a mark-to-market election for one of our taxable years and we were a PFIC for a prior taxable year during which such U.S. Holder held our common stock and for which (i) we were not a QEF with respect to such U.S. Holder and (ii) such U.S. Holder did not make a timely mark-to-market election, such U.S. Holder would also be subject to the more adverse rules described below in the first taxable year for which the mark-to-market election is in effect and also to the extent the fair market value of the U.S. Holder's common stock exceeds the U.S. Holder's adjusted tax basis in the common stock at the end of the first taxable year for which the mark-to-market election is in effect.

Taxation of U.S. Holders Not Making a Timely QEF or Mark-to-Market Election. If we were to be treated as a PFIC for any taxable year, a U.S. Holder who does not make either a QEF election or a mark-to-market election for that year (a *Non-Electing Holder*) would be subject to special rules resulting in increased tax liability with respect to (1) any excess distribution (i.e., the portion of any distributions received by the Non-Electing Holder on our common stock in a taxable year in excess of 125% of the average annual distributions received by the Non-Electing Holder in the three preceding taxable years, or, if shorter, the Non-Electing Holder's holding period for our common stock), and (2) any gain realized on the sale, exchange or other disposition of our common stock. Under these special rules:

the excess distribution or gain would be allocated ratably over the Non-Electing Holder's aggregate holding period for our common stock;

the amount allocated to the current taxable year and any taxable year prior to the taxable year we were first treated as a PFIC with respect to the Non-Electing Holder would be taxed as ordinary income in the current taxable year;

the amount allocated to each of the other taxable years would be subject to U.S. federal income tax at the highest rate of tax in effect for the applicable class of taxpayer for that year; and

an interest charge for the deemed deferral benefit would be imposed with respect to the resulting tax attributable to each such other taxable year.

Additionally, for each year during which a U.S. Holder owns shares, we are a PFIC, and the total value of all PFIC stock that such U.S. Holder directly or indirectly owns exceeds certain thresholds, such U.S. Holder will be required to file IRS Form 8621 with its annual U.S. federal income tax return to report its ownership of our common stock. In

addition, if a Non Electing Holder who is an individual dies while owning our common stock, such Non-Electing Holder's successor generally would not receive a step up in tax basis with respect to such common stock.

U.S. Holders are urged to consult their own tax advisors regarding the PFIC rules, including the PFIC annual reporting requirements, as well as the applicability, availability and advisability of, and procedure for, making QEF, Mark-to-Market Elections and other available elections with respect to us, and the U.S. federal income tax consequences of making such elections.

Consequences of Possible Controlled Foreign Corporation Classification

If CFC Shareholders (generally, U.S. Holders who each own, directly, indirectly or constructively, 10% or more of the total combined voting power of our outstanding shares entitled to vote) own directly, indirectly or constructively more than 50% of either the total combined voting power of our outstanding shares entitled to vote or the total value of all of our outstanding shares, we generally would be treated as a controlled foreign corporation (or a CFC).

CFC Shareholders are treated as receiving current distributions of their respective share of certain income of the CFC without regard to any actual distributions and are subject to other burdensome U.S. federal income tax and administrative requirements but generally are not also subject to the requirements generally applicable to shareholders of a PFIC. In addition, a person who is or has been a CFC Shareholder may recognize ordinary income on the disposition of shares of the CFC. Although we do not believe we are or will become a CFC, U.S. persons owning a substantial interest in us should consider the potential implications of being treated as a CFC Shareholder in the event we become a CFC in the future.

The U.S. federal income tax consequences to U.S. Holders who are not CFC Shareholders would not change in the event we become a CFC in the future.

U.S. Return Disclosure Requirements for U.S. Individual Holders

U.S. Individual Holders who hold certain specified foreign financial assets, including stock in a foreign corporation that is not held in an account maintained by a financial institution with an aggregate values in excess of \$50,000 on the last day of a taxable year, or \$75,000 at any time during that taxable year, may be required to report such assets on IRS Form 8938 with their U.S. federal income tax return for that taxable year. This reporting requirement does not apply to U.S. Individual Holders who report their ownership of our shares under the PFIC annual reporting rules described above. Penalties apply for failure to properly complete and file IRS Form 8938. Investors are encouraged to consult with their own tax advisor regarding the possible application of this disclosure requirement.

Table of Contents

United States Federal Income Taxation of Non-U.S. Holders

A beneficial owner of our common stock (other than a partnership, including any entity or arrangement treated as a partnership for U.S. federal income tax purposes) that is not a U.S. Holder is a Non U.S. Holder.

Distributions

In general, a Non U.S. Holder will not be subject to U.S. federal income tax on distributions received from us with respect to our common stock unless the distributions are effectively connected with the Non-U.S. Holder's conduct of a trade or business within the United States (and, if required by an applicable income tax treaty, are attributable to a permanent establishment that the Non-U.S. Holder maintains in the United States). If a Non U.S. Holder is engaged in a U.S. trade or business and the distributions are deemed to be effectively connected to that trade or business, the Non-U.S. Holder generally will be subject to U.S. federal income tax on those distributions in the same manner as if it were a U.S. Holder.

Sale, Exchange or Other Disposition of Common Stock

In general, a Non-U.S. Holder is not subject to U.S. federal income tax on any gain resulting from the disposition of our common stock unless (a) such gain is effectively connected with the Non-U.S. Holder's conduct of a trade or business in the United States (and, if required by an applicable income tax treaty, is attributable to a permanent establishment that the Non-U.S. Holder maintains in the United States) or (b) the Non-U.S. Holder is an individual who is present in the United States for 183 days or more during the taxable year in which such disposition occurs and meets certain other requirements. If a Non-U.S. Holder is engaged in a U.S. trade or business and the disposition of our common stock is deemed to be effectively connected to that trade or business, the Non-U.S. Holder generally will be subject to U.S. federal income tax on the resulting gain in the same manner as if it were a U.S. Holder.

Information Reporting and Backup Withholding

In general, payments of distributions with respect to, or the proceeds of a disposition of, our common stock to a Non Corporate U.S. Holder will be subject to information reporting requirements. These payments to a Non Corporate U.S. Holder also may be subject to backup withholding if the Non Corporate U.S. Holder:

fails to timely provide an accurate taxpayer identification number;

is notified by the IRS that the it has failed to report all interest or distributions required to be shown on its U.S. federal income tax returns; or

in certain circumstances, fails to comply with applicable certification requirements.

Non U.S. Holders may be required to establish their exemption from information reporting and backup withholding on payments made to them within the United States, or through a U.S. payor, by certifying their status on IRS Form W 8BEN, W 8ECI or W 8IMY, as applicable.

Backup withholding is not an additional tax. Rather, a stockholder generally may obtain a credit for any amount withheld against its liability for U.S. federal income tax (and a refund of any amounts withheld in excess of such

liability) by accurately completing and timely filing a U.S. federal income tax return with the IRS.

Non-United States Tax Considerations

Marshall Islands Tax Considerations

Because we and our subsidiaries do not, and we do not expect that we or any of our subsidiaries will, conduct business or operations in the Republic of The Marshall Islands, and because all documentation related to the offering was executed outside of the Republic of The Marshall Islands, under current Marshall Islands law, holders of shares of our common stock will not be subject to Marshall Islands taxation or withholding on distributions. In addition, holders of shares of our common stock will not be subject to Marshall Islands stamp, capital gains or other taxes on the purchase, ownership or disposition of shares of Class A common stock, and will not be required by the Republic of The Marshall Islands to file a tax return relating to the Class A common stock. This paragraph is applicable only to persons who do not reside in, maintain offices in or engage in business in the Republic of The Marshall Islands.

Documents on Display

Documents concerning us that are referred to herein may be inspected at our principal executive headquarters at 4th Floor, Belvedere Building, 69 Pitts Bay Road, Hamilton, HM 08 Bermuda. Those documents electronically filed via the SEC's Electronic Data Gathering, Analysis, and Retrieval (or *EDGAR*) system may also be obtained from the SEC's website at www.sec.gov, free of charge, or from the Public Reference Section of the SEC at 100F Street, N.E., Washington, D.C. 20549, at prescribed rates. Further information on the operation of the SEC public reference rooms may be obtained by calling the SEC at 1-800-SEC-0330.

Item 11. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to market risk from foreign currency fluctuations, changes in interest rates and changes in spot tanker market rates. We have not used foreign currency forward contracts to manage foreign currency fluctuation, but we may do so in the future. We use interest rate swaps to manage interest rate risks. We do not use these financial instruments for trading or speculative purposes.

Table of Contents**Foreign Currency Fluctuation Risk**

Our primary economic environment is the international shipping market. Transactions in this market generally utilize the U.S. Dollars. Consequently, virtually all our revenues and the majority of our operating costs are in U.S. Dollars. We incur certain voyage expenses, vessel operating expenses, dry-docking expenditures and general and administrative expenses in foreign currencies, the most significant of which are Euro and British Pound. We did not enter into forward contracts as a hedge against changes in certain foreign exchange rates during 2013, 2012 or 2011.

Interest Rate Risk

We are exposed to the impact of interest rate changes primarily through our floating-rate borrowings that require us to make interest payments based on LIBOR. Significant increases in interest rates could adversely affect operating margins, results of operations and our ability to service our debt. From time to time, we use interest rate swaps to reduce our exposure to market risk from changes in interest rates. The principal objective of these contracts is to minimize the risks and costs associated with our floating-rate debt.

We are exposed to credit loss in the event of non-performance by the counterparties to the interest rate swap agreements. In order to minimize counterparty risk, we only enter into derivative transactions with counterparties that are rated A- or better by Standard & Poor's or A3 or better by Moody's at the time of the transactions. In addition, to the extent possible and practical, interest rate swaps are entered into with different counterparties to reduce concentration risk.

The table below provides information about financial instruments as at December 31, 2013, that are sensitive to changes in interest rates. For long-term debt, the table presents principal cash flows and related weighted-average interest rates by expected maturity dates. For interest rate swaps, the table presents notional amounts and weighted-average interest rates by expected contractual maturity dates.

	2014	2015	2016	2017	2018	Thereafter	Total	Fair Value Asset / (Liability)	Rate ⁽¹⁾
(in millions of U.S. dollars, except percentages)									
Long-term debt:									
Variable rate ⁽²⁾	15.4	73.8	98.3	407.3	45.1	58.0	697.9	(632.1)	0.86%
Fixed rate	9.8	9.8	9.8	8.0	8.0	1.3	46.7	(47.8)	4.79%
Interest Rate Swaps:									
U.S. Dollar-denominated interest rate swap ^{(2) (3)}			200.0				200.0	(9.5)	2.61%
U.S. Dollar-denominated interest rate swap ^{(2) (3)}				100.0			100.0	(15.8)	5.55%

(1) Rate refers to the weighted-average effective interest rate for our long-term as at December 31, 2013, including the margin we pay on our variable-rate and fixed-rate debt. The fixed rate we pay under our interest rate swap agreements, as shown above, excludes the margin we pay on our variable-rate debt.

(2) Interest payments on U.S. Dollar-denominated debt and interest rate swaps are based on LIBOR.

(3) The average variable rate paid to us under our interest rate swaps are set quarterly at the three-month LIBOR.

Spot Tanker Market Rate Risk

The cyclical nature of the tanker industry causes significant increases or decreases in the revenue that we earn from our vessels, particularly those that trade in the spot tanker market. From time to time we may use freight forward agreements as a hedge to protect against changes in spot tanker market rates. Freight forward agreements involve contracts to provide a fixed number of theoretical voyages along a specified route at a contracted charter rate. Freight forward agreements settle in cash based on the difference between the contracted charter rate and the average rate of an identified index. As at March 1, 2014, we had not entered into any freight forward agreements, although we may do so in the future.

Table of Contents

Item 15. Controls and Procedures

We maintain disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities and Exchange Act of 1934, as amended (or the *Exchange Act*)) that are designed to ensure that (i) information required to be disclosed in our reports that are filed or submitted under the Exchange Act, are recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and (ii) information required to be disclosed by us in the reports we file or submit under the Exchange Act is accumulated and communicated to our management, including the principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

We conducted an evaluation of our disclosure controls and procedures under the supervision and with the participation of the Chief Executive Officer and Chief Financial Officer. Based on the evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective as of December 31, 2013.

During 2013, there were no changes in our internal controls that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

The Chief Executive Officer and Chief Financial Officer do not expect that our disclosure controls or internal controls will prevent all error and all fraud. Although our disclosure controls and procedures were designed to provide reasonable assurance of achieving their objectives, a control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within us have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls also is based partly on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining for us adequate internal controls over financial reporting.

Our internal controls were designed to provide reasonable assurance as to the reliability of our financial reporting and the preparation and presentation of the consolidated financial statements for external purposes in accordance with accounting principles generally accepted in the United States. Our internal controls over financial reporting include those policies and procedures that: (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of the financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made in accordance with authorizations of management and our directors; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements.

We conducted an evaluation of the effectiveness of our internal control over financial reporting based upon the framework in Internal Control – Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission. This evaluation included review of the documentation of controls, evaluation of the design

effectiveness of controls, testing of the operating effectiveness of controls and a conclusion on this evaluation.

Because of its inherent limitations, internal controls over financial reporting may not prevent or detect misstatements even when determined to be effective and can only provide reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies and procedures may deteriorate. Based on the evaluation, management determined that internal controls over financial reporting were effective as of December 31, 2013.

Our independent auditors, KPMG LLP, an independent registered public accounting firm, has audited the accompanying consolidated financial statements and our internal control over financial reporting. Their attestation report on the effectiveness of our internal control over financial reporting can be found on page F-2 of this Annual Report.

During 2013, there were no changes in our internal controls that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 16A. Audit Committee Financial Expert

The Board of Directors has determined that director and Chair of the Audit Committee, William Lawes, qualifies as an audit committee financial expert and is independent under applicable NYSE and SEC standards.

Table of Contents**Item 16B. Code of Ethics**

We have adopted a Standards of Business Conduct Policy for all our employees and directors. This document is available under About Us Corporate Governance from the Home Page of our web site (www.teekaytankers.com). We also intend to disclose, under About Us Corporate Governance in the About Us section of our web site, any waivers to or amendments of our Standards of Business Conduct Policy for the benefit of our directors and executive officers.

Item 16C. Principal Accountant Fees and Services

Our principal accountant for 2013 and 2012 was KPMG LLP, Chartered Accountants. The following table shows the fees we paid or accrued for audit services provided by KPMG LLP.

Fees (in thousands of U.S. dollars)	2013	2012
Audit Fees ⁽¹⁾	225	359

(1) Audit fees represent fees for professional services provided in connection with the audit of our consolidated financial statements, review of our quarterly consolidated financial statements, as well as other professional services in connection with the review of our regulatory filings.

No fees for tax or other services were provided to the Company by the auditors during the terms of their appointment in 2013 and 2012.

The Audit Committee of our Board of Directors has the authority to pre-approve permissible audit-related and non-audit services not prohibited by law to be performed by our independent auditors and any associated fees. Engagements for proposed services either may be separately pre-approved by the Audit Committee or entered into pursuant to detailed pre-approval policies and procedures established by the Audit Committee, as long as the Audit Committee is informed on a timely basis of any engagement entered into on that basis. The Audit Committee separately pre-approved all engagements and fees paid to our principal accountants in 2013.

Item 16D. Exemptions from the Listing Standards for Audit Committees

Not applicable.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders

Teekay Tankers Ltd.

We have audited the accompanying consolidated balance sheets of Teekay Tankers Ltd. and subsidiaries (the Company) as of December 31, 2013 and 2012, and the related consolidated statements of loss, cash flows, and changes in equity for each of the years in the three-year period ended December 31, 2013. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2013 and 2012, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2013, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control-Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) and our report dated April 30, 2014 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders

Teekay Tankers Ltd.

We have audited Teekay Tankers Ltd.'s (the Company) internal control over financial reporting as of December 31, 2013, based on the criteria established in Internal Control - Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting in the accompanying Form 20-F. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013 based on the criteria established in Internal Control - Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of the Company as at December 31, 2013 and 2012, and the related consolidated statements of loss, cash flows, and changes in equity for each of the years in the three-year period ended December 31, 2013, and our report dated April 30, 2014, expressed an unqualified opinion on those consolidated financial statements.

TEEKAY TANKERS LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(all tabular amounts stated in thousands of U.S. dollars, other than share or per share data)

1. Summary of Significant Accounting Policies

Nature of operations

The Company (as defined below) is engaged in the international marine transportation of crude oil and refined petroleum products through the operation of its oil and product tankers. The Company's revenues are earned in international markets.

Basis of presentation and consolidation principles

During October 2007, Teekay Corporation (*Teekay*) formed Teekay Tankers Ltd., a Marshall Islands corporation (together with its wholly owned subsidiaries and the Dropdown Predecessor, as described below, collectively the *Company*), to acquire from Teekay a fleet of nine double-hull Aframax-class oil tankers in connection with the Company's initial public offering (or *IPO*).

The consolidated financial statements reflect the financial position, results of operations and cash flows of Teekay Tankers Ltd., its wholly-owned subsidiaries and the Dropdown Predecessor. The consolidated financial statements have been prepared in conformity with United States generally accepted accounting principles (*GAAP*) and all significant intercompany balances and transactions have been eliminated upon consolidation.

Dropdown Predecessor

The Company accounts for the acquisition of interests in vessels from Teekay as a transfer of a business between entities under common control. The method of accounting for such transfers is similar to the pooling of interests method of accounting. Under this method, the carrying amount of net assets recognized in the balance sheets of each combining entity are carried forward to the balance sheet of the combined entity, and no other assets or liabilities are recognized as a result of the combination. The proceeds paid by the Company over or under Teekay's historical cost in the acquired vessels are accounted for as a return of capital to or contribution of capital from Teekay. In addition, transfers of net assets between entities under common control are accounted for as if the transfer occurred from the date that the Company and the acquired vessels were both under the common control of Teekay and had begun operations. As a result, the Company's financial statements prior to the date the interests in these vessels were actually acquired by the Company are retroactively adjusted to reflect these vessels and their related operations and cash flows (referred to herein, collectively, as the *Dropdown Predecessor*) during the periods under common control of Teekay.

During June 2012, the Company acquired from Teekay seven conventional oil tankers and six product tankers and related time-charter contracts, debt facilities and an interest rate swap, for an aggregate price of approximately \$454.2 million, including the assumption of outstanding debt of approximately \$428.1 million (or the *2012 Acquired Business*). Ten of the vessels were acquired on June 15, 2012 and the remaining three were acquired on June 26, 2012. As consideration for this acquisition, the Company issued to Teekay 4.5 million Class A common shares and made a cash payment of \$1.1 million to Teekay. The 4.5 million Class A common shares had an approximate value of \$25.0 million, or \$5.60 per share, when the purchase price was agreed to between the parties and a value of \$18.3 million, or

\$4.11 per share, on the acquisition closing date. The purchase price, for accounting purposes, is based upon the value of the Class A common shares on the acquisition closing date. Consequently, common stock and additional paid in capital and accumulated deficit are both \$6.7 million lower than if the value of the shares had remained unchanged from when the purchase price was agreed to between the parties. In addition, the Company reimbursed Teekay for \$8.4 million of working capital it assumed from Teekay in connection with the 2012 Acquired Business. Teekay has granted the Company a right of first refusal on certain conventional tanker opportunities developed by Teekay prior to June 15, 2015. Teekay prepaid \$106.9 million of long term debt of the 2012 Acquired Business on the date of acquisition. The acquisition of the 2012 Acquired Business was accounted for as a reorganization between entities under common control. As a result, the Company's consolidated statements of loss, cash flows and changes in equity for the years ended December 31, 2012 and 2011 reflect the 2012 Acquired Business as if the Company had acquired the 2012 Acquired Business when the 13 vessels began their respective operations under the ownership of Teekay. All 13 vessels began operations prior to the periods covered by these consolidated financial statements and, consequently, are reflected in all periods presented.

The effect of adjusting the Company's financial statements to account for these common control exchanges decreased the Company's net income for the years ended December 31, 2012 and 2011 by \$9.2 million and \$104.0 million, respectively. The adjustments for the Dropdown Predecessor increased the Company's revenues for the years ended December 31, 2012 and 2011 by \$42.2 million and \$94.1 million, respectively.

In the preparation of these consolidated financial statements, general and administrative expenses, cost of ship management services and interest expense of the Dropdown Predecessor were not identifiable as relating solely to the each specific vessel. General and administrative expenses (consisting primarily of salaries, share-based compensation, and other employee-related costs, office rent, legal and professional fees, and travel and entertainment) were allocated based on the Dropdown Predecessor's proportionate share of Teekay's total ship-operating (calendar) days for the period presented. During the year ended December 31, 2012, \$2.6 million of ship management services costs were attributable to the Dropdown Predecessor. During the year ended December 31, 2011, \$5.4 million of ship management services costs and \$2.1 million of general and administrative expenses were attributable to the Dropdown Predecessor, respectively. In addition, the Dropdown Predecessor includes debt of Teekay which has been recorded on a pushed-down basis in the amount of \$108.7 million as at December 31, 2012. This debt was assumed by Teekay concurrently with the dropdown. Interest expense includes the allocation of interest to the Dropdown Predecessor from Teekay based upon the weighted-average outstanding balance of the push-down debt and the weighted-average interest rate outstanding on Teekay's loan facilities that were used to finance these loans. During the years ended December 31, 2012 and 2011, \$11.7 million and \$36.4 million of interest expense, respectively, was attributable to the Dropdown Predecessor. Management believes these allocations reasonably present the interest expense and the general and administrative expenses of the Dropdown Predecessor.

Table of Contents

TEEKAY TANKERS LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(all tabular amounts stated in thousands of U.S. dollars, other than share or per share data)

Use of estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates. In addition, estimates have been made when allocating expenses from Teekay to the Dropdown Predecessor and such estimates may not be reflective of what actual results would have been if the Dropdown Predecessor had operated independently.

Currency translation

The Company's functional currency is the U.S. Dollar. Transactions involving other currencies during the year are converted into U.S. Dollars using the exchange rates in effect at the time of the transactions. At the balance sheet date, monetary assets and liabilities that are denominated in currencies other than the U.S. Dollar are translated to reflect the year-end exchange rates. Resulting gains or losses are reflected in other expenses in the accompanying consolidated statements of loss.

Operating revenues and expenses

The Company recognizes revenues from time charters daily over the term of the charter as the applicable vessel operates under the charter. The Company does not recognize revenues during days that the vessel is off hire. When the time charter contains a profit-sharing agreement, the Company recognizes the profit-sharing or contingent revenues when the contingency is resolved. All revenues from voyage charters are recognized on a proportionate performance method. The Company uses a discharge-to-discharge basis in determining proportionate performance for all spot voyages. The Company does not begin recognizing revenue until a charter has been agreed to by the customer and the Company, even if the vessel has discharged its cargo and is sailing to the anticipated load port on its next voyage. The consolidated balance sheets reflect the deferred portion of revenues and expenses, which will be earned in subsequent periods.

Voyage expenses are all expenses unique to a particular voyage, including bunker fuel expenses, port fees, cargo loading and unloading expenses, canal tolls, agency fees and commissions. The Company, as shipowner, pays voyage expenses under voyage charters, its customers pay voyage expenses under time charters. Vessel operating expenses include crewing, repairs and maintenance, insurance, stores, lube oils and communication expenses. The Company pays vessel operating expenses under both voyage and time charters and for vessels which earn net pool revenue, as described below. Voyage expenses and vessel operating expenses are recognized when incurred.

Revenues and voyage expenses of the vessels operating in pool arrangements are pooled and the resulting net pool revenues, calculated on a time charter equivalent basis, are allocated to the pool participants according to an agreed formula. The agreed formula used to allocate net pool revenues varies between pools; however, the formula generally allocates revenues to pool participants on the basis of the number of days a vessel operates in the pool with weighting adjustments made to reflect vessels' differing capacities and performance capabilities. The same revenue and expense

recognition principles stated above are applied in determining the net pool revenues of the pool. The pools are responsible for paying voyage expenses and distribute net pool revenues to the participants. The Company accounts for the net allocation from the pool as revenues and amounts due from the pool are included in pool receivables from affiliates, net.

Share-based compensation

The Company grants restricted stock units as incentive-based compensation to certain employees of Teekay who support the operations of the Company. The Company measures the cost of such awards using the grant date fair value of the award and recognizes that cost, net of estimated forfeitures, over the requisite service period, which generally equals the vesting period. For stock-based compensation awards subject to graded vesting, the Company calculates the value for the award as if it is a single award with one expected life and amortizes the calculated expense for the entire award on a straight-line basis over the vesting period of the award. The Company also grants restricted stock awards as incentive-based compensation to non-management directors, which are expensed immediately (see Note 12).

Cash and cash equivalents

The Company classifies all highly liquid investments with an original maturity date of three months or less as cash and cash equivalents.

Accounts receivable, allowance for doubtful accounts and investment in term loans and other loan receivables

Accounts receivable are recorded at the invoiced amount and do not bear interest. The allowance for doubtful accounts is the Company's best estimate of the amount of probable credit losses in existing accounts receivable. The Company determines the allowance based on historical write-off experience and customer economic data. The Company reviews the allowance for doubtful accounts regularly and past due balances are reviewed for collectability. Account balances are charged off against the allowance when the Company believes that the receivable will not be recovered. There are no significant amounts recorded as allowance for doubtful accounts as at December 31, 2013, 2012 and 2011.

The Company's investment in term loans and loan to joint venture are recorded at cost. The premium paid over the outstanding principal amount was amortized to interest income over the term of the loan using the effective interest rate method. The Company analyzes its loans for collectability during each reporting period. A loan provision is recorded, based on current information and events, if it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. Factors the Company considers in determining that a loan provision is required, among other things, an assessment of the financial condition of the debtor, payment history of the debtor, general economic conditions, the credit rating of the debtor (when available), any information provided by the debtor regarding their ability to repay the loan, and the fair value of the underlying collateral. When a loan provision is recorded, the Company measures the amount of the provision based on the present value of expected future cash flows discounted at the loan's effective interest rate and recognizes the resulting provision in the statement of income. The carrying value of the loans is adjusted each subsequent period to reflect any changes in the present value of the expected future cash flows, which may result in increases or decreases to the loan provision.

Table of Contents**TEEKAY TANKERS LTD.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

(all tabular amounts stated in thousands of U.S. dollars, other than share or per share data)

The following table contains a summary of the Company's financing receivables by type and the method by which the Company monitors the credit quality of its financing receivables on a quarterly basis.

Class of Financing Receivable	Credit Quality Indicator	Grade	December 31, 2012	
			\$	\$
Investment in term loans and interest receivable	Collateral	Non-performing ⁽¹⁾	136,061	119,385
Loan to joint venture	Other internal metrics	Performing	9,830	9,830
			145,891	129,215

- (1) The borrowers under the Loans have been in default on their interest payment obligations since the first quarter of 2013, and subsequently, in default of the repayment of the loan principal from the loan maturity date in July 2013. On March 21, 2014, the Company took ownership of the vessels held as collateral in satisfaction of the loans and accrued interest (see Note 4).

Investment in joint venture

The Company's investment in a joint venture relates to a 50% interest in a VLCC newbuilding and is accounted for using the equity method of accounting. Under the equity method of accounting, investments are stated at initial cost and are adjusted for subsequent additional investments and the Company's proportionate share of earnings or losses and distributions. The Company evaluates its investment in joint venture for impairment when events or circumstances indicate that the carrying value of such investment may have experienced an other-than-temporary decline in value below its carrying value. If the estimated fair value is less than the carrying value, the carrying value is written down to its estimated fair value and the resulting impairment is recorded in the Company's statement of income. The Company's maximum exposure to loss is the amount it has invested in its joint venture.

Vessels and equipment

All pre-delivery costs incurred during the construction of newbuildings, including interest, supervision and technical costs, are capitalized. The acquisition cost and all costs incurred to restore used vessels purchased by the Company to the standard required to properly service the Company's customers are capitalized.

Depreciation is calculated on a straight-line basis over a vessel's estimated useful life, less an estimated residual value. Depreciation is calculated using an estimated useful life of 25 years, or a shorter period if regulations prevent the

Company from operating the vessels for 25 years. Depreciation of vessels and equipment (including depreciation attributable to the Dropdown Predecessor and excluding amortization of dry-docking costs) for the years ended December 31, 2013, 2012 and 2011 totaled \$39.2 million, \$63.4 million, and \$65.8 million, respectively.

Vessel capital modifications include the addition of new equipment or can encompass various modifications to the vessel which are aimed at improving or increasing the operational efficiency and functionality of the asset. This type of expenditure is capitalized and depreciated over the estimated useful life of the modification. Expenditures covering recurring routine repairs or maintenance are expensed as incurred.

Generally, the Company dry docks each vessel every two and a half to five years. The Company capitalizes a substantial portion of the costs incurred during dry docking and amortizes those costs on a straight-line basis over its estimated useful life, which typically is from the completion of a dry docking or intermediate survey to the estimated completion of the next dry docking. The Company includes in capitalized dry docking those costs incurred as part of the dry dock to meet classification and regulatory requirements. The Company expenses costs related to routine repairs and maintenance performed during dry docking that do not improve or extend the useful lives of the assets. When significant dry-docking expenditures occur prior to the expiration of the original amortization period, the remaining unamortized balance of the original dry-docking cost is expensed in the month of the subsequent dry docking.

The following table summarizes the change in the Company's capitalized dry docking costs, from January 1, 2011 to December 31, 2013:

	Year Ended December 31,		
	2013	2012	2011
	\$	\$	\$
Balance as at January 1,	18,672	20,945	26,406

Vessel sales/held for sale (<i>note 17</i>)		(317)	
Balance as at December 31,	29,269	18,672	20,945

Vessels and equipment that are held and used are assessed for impairment when events or circumstances indicate the carrying amount of the asset may not be recoverable. If the asset's net carrying value exceeds the net undiscounted cash flows expected to be generated over its remaining useful life, the carrying amount of the asset is reduced to its estimated fair value. Estimated fair value is determined based on discounted cash flows or appraised values. In cases where an active second hand sale and purchase market does not exist, the Company uses a discounted cash flow approach to estimate the fair value of an impaired vessel. In cases where an active second hand sale and purchase market exists, an appraised value is generally the amount the Company would expect to receive if it were to sell the vessel. Such appraisal is normally completed by the Company.

Table of Contents

TEEKAY TANKERS LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(all tabular amounts stated in thousands of U.S. dollars, other than share or per share data)

Debt issuance costs

Debt issuance costs, including fees, commissions and legal expenses, are capitalized and presented as other non-current assets. Debt issuance costs of revolving credit facilities and term loans are amortized using the effective interest rate method over the term of the relevant loan. Amortization of debt issuance costs is included in interest expense.

Income taxes

The Company recognizes the tax benefits from uncertain tax positions only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the Company's financial statements from such positions are measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement.

Excluding freight taxes, the Company has incurred no income taxes for the years ended December 31, 2013, 2012 and 2011. The Company believes that it and its subsidiaries are not subject to taxation under the laws of the Republic of The Marshall Islands and qualify for the Section 883 exemption under U.S. federal income tax purposes.

Ship management fees

In order to more closely align the Company's presentation to that of many of its peers, the cost of ship management activities of \$5.6 million for year ended December 31, 2013 has been presented in vessel operating expenses. Prior to 2013, the Company included these amounts in general and administrative expenses. All such costs incurred in comparative periods have been reclassified from general and administrative expenses to vessel operating expenses to conform to the presentation adopted in the current period. The amounts reclassified for the years ended December 31, 2012 and 2011 were \$7.0 million and \$8.5 million, respectively (see Note 13b).

Derivative instruments

All derivative instruments are initially recorded at fair value as either assets or liabilities in the accompanying consolidated balance sheets and subsequently remeasured to fair value each quarter, regardless of the purpose or intent for holding the derivative. The method of recognizing the resulting gains or losses are dependent on whether the derivative contracts are designed to hedge a specific risk and whether the contracts qualify for hedge accounting. The Company does not apply hedge accounting to its derivative instruments, except for certain types of interest rate swaps that it may enter into in the future.

When a derivative is designated as a cash flow hedge, the Company formally documents the relationship between the derivative and the hedged item. This documentation includes the strategy and risk management objective for undertaking the hedge and the method that will be used to assess the effectiveness of the hedge. Any hedge ineffectiveness is recognized immediately in earnings, as are any gains and losses on the derivative that are excluded

from the assessment of hedge effectiveness. The Company does not apply hedge accounting if it is determined that the hedge was not effective or will no longer be effective, the derivative was sold or exercised, or the hedged item was sold, repaid or no longer possible of occurring.

For derivative financial instruments designated and qualifying as cash flow hedges, changes in the fair value of the effective portion of the derivative financial instruments are initially recorded as a component of accumulated other comprehensive income in total equity. In the periods when the hedged items affect earnings, the associated fair value changes on the hedging derivatives are transferred from total equity to the corresponding earnings line item in the consolidated statements of loss. The ineffective portion of the change in fair value of the derivative financial instruments is immediately recognized in earnings in the consolidated statements of loss. If a cash flow hedge is terminated and the originally hedged item is still considered possible of occurring, the gains and losses initially recognized in total equity remain there until the hedged item impacts earnings, at which point they are transferred to the corresponding earnings line item in the consolidated statements of loss. If the hedged items are no longer possible of occurring, amounts recognized in total equity are immediately transferred to the earnings item in the consolidated statements of loss.

For derivative financial instruments that are not designated or that do not qualify as hedges under Financial Accounting Standards Board (or *FASB*) *ASC 815, Derivatives and Hedging*, the changes in the fair value of the derivative financial instruments are recognized in earnings. Gains and losses from the Company's non-designated interest rate swaps are recorded in realized and unrealized loss on derivative instruments in the Company's consolidated statements of loss.

Table of Contents**TEEKAY TANKERS LTD.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

(all tabular amounts stated in thousands of U.S. dollars, other than share or per share data)

Loss per share

Loss per share is determined by dividing (a) net loss of the Company after (adding) deducting the amount of net (loss) income attributable to the Dropdown Predecessor by (b) the weighted-average number of shares outstanding during the applicable period. The calculation of weighted-average number of shares includes the total Class A and total Class B shares outstanding during the applicable period.

2. Public Offerings

The following table summarizes the issuances of common shares over the three years ending December 31, 2013:

Date	Number of Common Shares Issued	Offering Price (Per Share)	Gross Proceeds	Net Proceeds	Teekay's Ownership After the Offering	Use of Proceeds
February 2011	9,890,000	\$ 11.33	112,054	107,105	26.0%	Prepayment of revolving credit facilities
February 2012	17,250,000	\$ 4.00	69,000	65,771	20.4%	Prepayment of revolving credit facilities
June 2012	4,464,286 ⁽¹⁾	\$ 4.11	18,348	18,348	24.6%	Acquisition of conventional tankers

- (1) Represents unregistered shares Class A common stock issued to Teekay as partial consideration for the Company's acquisition of the 2012 Acquired Business, which had an approximate value of \$25.0 million when the purchase price was agreed between the two parties. Proportion of the voting power held by Teekay Corporation at December 31, 2013 was 53.1%. Please refer to Item 7 Major Shareholders and Related Parties.

3. Business Operations
Significant Customers

The following table presents consolidated revenues and percentage of consolidated revenues for customers that accounted for more than 10% of the Company's consolidated revenues for its sole operating segment during the periods presented. Revenues from customers attributable to the Dropdown Predecessor are included in the table.

Year Ended December 31,

	2013	2012	2011
Statoil ASA	\$33.7 million	\$27.3 million	\$23.7 million
ConocoPhillips	\$18.1 million	\$31.8 million	\$33.1 million
Hyundai Merchant Marine Co. Ltd.	(1)	(1)	\$22.5 million

(1) Less than 10% of the consolidated revenues

Concentration of Credit Risk

There is a concentration of credit risk with respect to the total amounts due from affiliates and pool receivables from affiliates with 83% of the total amounts being due from affiliates of Teekay as at December 31, 2013 (see Note 13e). The Company also relies on Teekay Chartering Ltd., a wholly-owned subsidiary of Teekay, to actively manage and administer all voyage-related functions for vessels on time charter contracts, and trading in the Teekay Aframax Pool (a vessel pooling arrangement of Aframax tankers), the Gemini Suezmax Pool (a vessel pooling arrangement of Suezmax tankers), and the Taurus Tankers LR2 Pool (a vessel pooling arrangement of product tankers).

There is a concentration of credit risk with respect to the investment in term loans where the Company could potentially be exposed to a loss in the event the value of the collateral is insufficient to recover any outstanding principal and interest (see Note 4).

4. Investment in Term Loans

In July 2010, the Company invested in two term loans for a total cost of \$115.6 million (or *the Loans*) which were scheduled to mature in July 2013. The Loans are secured by first priority mortgages registered on two 2010-built Very Large Crude Carriers (or *VLCCs*). The Loans had an annual interest rate of 9% per annum and include a repayment premium feature that was to provide a total investment yield of approximately 10% per annum.

The borrowers under the Loans have been in default on their interest payment obligations since the first quarter of 2013, and subsequently, in default of the repayment of the loan principal from the loan maturity date in July 2013. As of December 31, 2013, the VLCC vessels that collateralize the Loans are trading in the spot tanker market under the Company's management.

As at December 31, 2013 and December 31, 2012, the repayment premium included in the investment in term loans balance was \$3.4 million and \$2.7 million, respectively. As at December 31, 2013 and December 31, 2012, accrued and unpaid interest, including a portion of default interest, was \$8.6 million and \$1.6 million, respectively. Such amounts are presented in investment in term loans on the consolidated balance sheets as at December 31, 2013 and December 31, 2012. Interest income in respect of the Loans is included in revenues in the consolidated statements of loss. As of December 31, 2013, \$5.9 million of interest income due under the Loans, including default interest, had not been recognized based on the Company's current estimates of amounts recoverable from future operating cash flows of the vessels and the net proceeds from the sale of the two VLCCs. During March 2014, the Company assumed ownership of the two VLCC vessels that collateralized the Loans.

5. Investment in Joint Venture

The Company has a joint venture arrangement with Wah Kwong Maritime Transport Holdings Limited (or *Wah Kwong*). The Company has a 50% economic interest in the joint venture, which is jointly controlled by the Company and Wah Kwong. A VLCC, the *Hong Kong Spirit*, owned by the joint venture was delivered on June 14, 2013 and commenced its five-year time-charter-out contract shortly thereafter, where it earns a fixed daily rate and an additional amount if the daily rate of any sub-charter earned exceeds a certain threshold. The Company's share of the joint

venture's net income for the year ended December 31, 2013 was \$0.9 million.

Table of Contents**TEEKAY TANKERS LTD.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****(all tabular amounts stated in thousands of U.S. dollars, other than share or per share data)**

In March 2012, the joint venture entered into a \$68.6 million loan with a financial institution. The loan is secured by a first-priority mortgage on the VLCC and 50% of the outstanding loan balance is guaranteed by the Company. The loan is repayable in 32 quarterly installments of \$1.4 million each commencing three months after the initial post-delivery drawdown date and a balloon payment of \$22.6 million at its maturity in June 2021. As of December 31, 2013 the loan had an outstanding balance of \$64.7 million (December 31, 2012 \$nil). In June 2013, the joint venture entered into an interest rate swap agreement with a notional amount of \$68.6 million, declining \$1.4 million every three months until its maturity in June 2018. The interest rate swap exchanges a receipt of floating interest based on 3-months LIBOR for a payment of a fixed rate of 1.47% every three months.

As at December 31, 2013, the carrying value of the Company's investment in the joint venture was \$8.4 million and the Company had also advanced an additional \$9.8 million to the joint venture in the form of a non-interest bearing and unsecured loan.

6. Goodwill

During the year ended December 31, 2011, the conventional tanker market continued to experience an oversupply of vessels relative to tanker demand. Consequently, the Company performed a vessel and goodwill impairment analysis on the conventional tanker fleet (see Note 17). The Company concluded that the carrying value of the goodwill, all relating to the Suezmax reporting unit, exceeded its fair value. As a result, a goodwill impairment charge of \$19.3 million was recognized in the Company's consolidated statements of loss for the year ended December 31, 2011, of which \$6.0 million was attributable to the Dropdown Predecessor. The fair value of this reporting unit was determined using the present value of the expected future cash flows discounted at a rate equivalent to a market participant's weighted-average cost of capital. The estimates and assumptions regarding expected future cash flows and the appropriate discount rates were, in part, based upon existing contracts, estimated future tanker market rates, historical experience, financial forecasts and industry trends and conditions.

7. Accrued Liabilities

	December 31,	
	2013	2012
Voyage and vessel	10,692	8,750
Corporate accruals	528	130
Interest	3,999	4,078
Payroll and benefits to related parties	5,850	4,924
Total	21,069	17,882

8. Long-Term Debt

	December 31,	
	2013	2012
Revolving Credit Facilities due through 2018	580,593	555,472
Term Loans due through 2021	164,041	180,229
	744,634	735,701
Current portion	(25,246)	(25,246)
Total	719,388	710,455

As at December 31, 2013, the Company had three revolving credit facilities (or the *Revolvers*), which, as at such date provided for aggregate borrowings of up to \$728.8 million, of which \$148.2 million was undrawn. Interest payments are based on LIBOR plus margins, which at December 31, 2013, ranged between 0.45% and 0.60% (December 31, 2012: 0.45% and 0.60%). The total amount available under the Revolvers reduces by \$94.0 million (2014), \$120.9 million (2015), \$89.1 million (2016), \$395.9 million (2017) and \$28.9 million thereafter. The Revolvers are collateralized by 21 of the Company's vessels, together with other related security. One of the Revolvers requires that the Company's applicable subsidiary maintain a minimum hull coverage ratio of 105% of the total outstanding balance for the facility period. As at December 31, 2013, this ratio was 114.3%. The vessel value used in this ratio is an appraised value prepared by the Company based on second-hand sale and purchase market data. A further delay in the recovery of the tanker market could negatively affect the ratio. In addition, one of the Revolvers requires the Company and certain of its subsidiaries to maintain a minimum liquidity (cash, cash equivalents and undrawn committed revolving credit lines with at least six months to maturity) of \$35.0 million and at least 5.0% of the Company's total debt. The remaining two Revolvers are guaranteed by Teekay and contain covenants that require Teekay to maintain the greater of free cash (cash and cash equivalents) of at least \$100.0 million and an aggregate of free cash and undrawn committed revolving credit lines with at least six months to maturity of at least 7.5% of Teekay's total consolidated debt which has recourse to Teekay. As at December 31, 2013, the Company and Teekay were in compliance with all their covenants in respect of the Revolvers.

As at December 31, 2013, the Company had three term loans outstanding, which totaled \$164.0 million (December 31, 2012 - \$180.2 million). Interest payments on the term loans are based on a combination of fixed and variable rates where fixed rates range from 4.06% to 4.90% and variable rates are based on LIBOR plus a margin. At December 31, 2013, the margins ranged from 0.30% to 1.0% (December 31, 2012 -0.30% to 1.0%). The term loan repayments are made in quarterly or semi-annual payments and two of the term loans have balloon or bullet repayments due at maturity in 2019 and 2021. The term loans are collateralized by first-priority mortgages on six of the Company's vessels, together with certain other related security. Two of the term loans require that the Company's subsidiaries maintain a minimum hull coverage ratio of 115% and 120%, respectively, of the total outstanding balance for the facility period. As at December 31, 2013 the loan to value ratios

Table of Contents**TEEKAY TANKERS LTD.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****(all tabular amounts stated in thousands of U.S. dollars, other than share or per share data)**

ranged from 146.7% to 388.9%. The vessel values used in these ratios are appraised values prepared by the Company based on second hand sale and purchase market data. A further delay in the recovery of the tanker market could negatively affect the ratios. The term loans are guaranteed by Teekay and contain covenants that require Teekay to maintain the greater of free cash (cash and cash equivalents) of at least \$100.0 million and an aggregate of free cash and undrawn committed revolving credit lines with at least six months to maturity of at least 7.5% of Teekay's total consolidated debt which has recourse to Teekay. As at December 31, 2013, the Company and Teekay were in compliance with all their covenants in respect of these term loans.

The weighted-average effective interest rate on the Company's long-term debt as at December 31, 2013 was 1.1% (December 31, 2012 1.2%). This rate does not reflect the effect of the Company's interest rate swap agreements (see Note 9).

The aggregate annual long-term principal repayments required to be made by the Company under the Revolvers and term loans subsequent to December 31, 2013 are \$25.2 million (2014), \$83.6 million (2015), \$108.1 million (2016), \$415.3 million (2017), \$53.1 million (2018) and \$59.3 million (thereafter).

9. Derivative Instruments

The Company uses derivatives in accordance with its overall risk management policies. The Company enters into interest rate swap agreements which exchange a receipt of floating interest for a payment of fixed interest to reduce the Company's exposure to interest rate variability on its outstanding floating-rate debt. The Company has not designated, for accounting purposes, its interest rate swaps as cash flow hedges of its U.S. Dollar denominated LIBOR borrowings.

Realized and unrealized (gains) losses relating to the Company's interest rate swaps have been reported in realized and unrealized (loss) gain on the consolidated statements of loss. During the year ended December 31, 2013, the Company recognized a net realized loss of \$9.9 million and an unrealized gain of \$8.4 million, relating to its interest rate swaps. During the year ended December 31, 2012, the Company recognized a net realized loss of \$9.6 million and an unrealized gain of \$1.6 million relating to its interest rate swaps. During year ended December 31, 2011, the Company recognized a net realized loss of \$39.0 million and an unrealized loss of \$11.2 million, relating to its interest rate swaps, where a substantial majority of the realized loss and unrealized gain was due to amendments to the fixed interest rate of an interest rate swap that was acquired as part of the 2012 Acquired Business.

The following summarizes the Company's derivative positions as at December 31, 2013:

Interest Rate Index	Principal Amount	Fair Value /	Remaining Term (years)	Fixed Interest Rate
----------------------------	-------------------------	---------------------	-------------------------------	----------------------------

		\$	Carrying Amount of Asset (Liability) \$		(%) ⁽¹⁾
LIBOR-Based Debt:					
U.S. Dollar-denominated interest rate swap ⁽¹⁾	USD LIBOR 3M	200,000	(9,505)	2.8	2.61
U.S. Dollar-denominated interest rate swap ⁽¹⁾	USD LIBOR 3M	100,000	(15,763)	3.8	5.55

(1) Excludes the margin the Company pays on its variable-rate debt, which as of December 31, 2013 ranged from 0.3% to 1.0%.

The Company is potentially exposed to credit loss in the event of non-performance by the counterparty to the interest rate swap agreements in the event that the fair value results in an asset being recorded. In order to minimize counterparty risk, the Company only enters into derivative transactions with counterparties that are rated A- or better by Standard & Poor's or A3 or better by Moody's at the time transactions are entered into.

10. Other Long-Term Liabilities

The Company recognizes freight tax expenses in other expenses in its consolidated statements of loss. The Company does not presently anticipate its uncertain tax positions will significantly increase or decrease in the next 12 months; however, actual developments could differ from those currently expected.

The following is a roll-forward of the Company's freight tax expenses which are recorded in other long-term liabilities, from January 1, 2011 to December 31, 2013:

	Year Ended December 31,		
	2013	2012	2011
Balance at January 1,	4,757	5,449	5,073
Freight tax expense (recovery)	594	(692)	376
Balance at December 31,	5,351	4,757	5,449

The remainder of the amounts recorded in other expenses relate to foreign exchange gains and losses.

Table of Contents

TEEKAY TANKERS LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(all tabular amounts stated in thousands of U.S. dollars, other than share or per share data)

11. Fair Value Measurements

The following methods and assumptions were used to estimate the fair value of each class of financial instrument:

Cash and cash equivalents The fair value of the Company's cash and cash equivalents approximates its carrying amounts reported in the consolidated balance sheets.

Vessels and equipment and vessels held for sale The Company's vessels and equipment and vessel held for sale were written down to their estimated fair values using internally appraised values based on second hand sale and purchase market data in 2012 (see Note 17).

Investment in term loans and interest receivable The fair value of the Company's investment in term loans and interest receivable is estimated using a discounted cash flow analysis, based on current rates currently available for debt with similar terms and remaining maturities. In addition, the value of the collateral and an assessment of the credit worthiness of the borrower is taken into account when determining the fair value.

Long-term debt The fair values of the Company's fixed-rate and variable-rate long-term debt is based on quoted market prices or estimated using discounted cash flow analyses, based on rates currently available for debt with similar terms and remaining maturities and the current credit worthiness of the Company.

Derivative instruments The fair value of the Company's interest rate swap agreements are the estimated amounts that the Company would receive or pay to terminate the agreements at the reporting date, taking into account current interest rates, and if the swap is not collateralized, the current credit worthiness of either the Company or the swap counterparties. The estimated amount is the present value of future cash flows. The inputs used to determine the future cash flows include the fixed interest rate of the swaps and market interest rates. Given the current volatility in the credit markets, it is reasonably possible that the amounts recorded as derivative assets and liabilities could vary by material amounts in the near term.

The Company categorizes its fair value estimates using a fair value hierarchy based on the inputs used to measure fair value. The fair value hierarchy has three levels based on the reliability of the inputs used to determine fair value as follows:

Level 1. Observable inputs such as quoted prices in active markets;

Level 2. Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and

Level 3. Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

The following table includes the estimated fair value, carrying value and categorization using the fair value hierarchy of those assets and liabilities that are measured at their estimated fair value on a recurring and non-recurring basis, as

well as certain financial instruments that are not measured at fair value.

	Fair Value Hierarchy Level	December 31, 2013		December 31, 2012	
		Carrying Amount		Carrying Amount	
		Asset/ (Liability) \$	Fair Value Asset/ (Liability) \$	Asset/ (Liability) \$	Fair Value Asset/ (Liability) \$
Recurring:					
Cash and cash equivalents	Level 1	25,646	25,646	26,341	26,341
Derivative instruments					
Interest rate swap agreements (note 9)	Level 2	(25,268)	(25,268)	(33,631)	(33,631)
Non-recurring:					
Vessels and equipment (note 17)	Level 2			252,068	252,068
Vessel held for sale (note 17)	Level 2			9,114	9,114
Other					
Investment in term loans and interest receivable	Level 3	136,061	134,857	119,385	117,784
Loan to joint venture	Note (1)	9,830	Note (1)	9,830	Note (1)
Long-term debt, including current portion	Level 2	(744,634)	(679,910)	(735,701)	(648,724)

- (1) The Company's loan to the joint venture, together with the Company's equity investment in the joint venture, form the aggregate carrying value of the Company's interest in an entity accounted for by the equity method in these consolidated financial statements. The fair value of the individual components of such aggregate interest is not determinable.

12. Capital Stock

The authorized capital stock of Teekay Tankers Ltd. is 100,000,000 shares of preferred stock, with a par value of \$0.01 per share, 200,000,000 shares of Class A common stock, with a par value of \$0.01 per share, and 100,000,000 shares of Class B common stock, with a par value of \$0.01 per share. The shares of Class A common stock entitle the holder to one vote per share while the shares of Class B common stock entitle the holder to five votes per share, subject to a 49% aggregate Class B common stock voting power maximum. As at December 31, 2013 and 2012, the Company had 71.1 million shares of Class A common stock, 12.5 million shares of Class B common stock and no shares of Preferred Stock issued and outstanding.

Table of Contents

TEEKAY TANKERS LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(all tabular amounts stated in thousands of U.S. dollars, other than share or per share data)

Commencing in 2013, the Company adopted a fixed dividend policy. The annual dividend was set at an amount of \$0.12 per share, payable quarterly. Subject to preferences that may apply to any shares of preferred stock outstanding at the time, the holders of Class A common stock and Class B common stock are entitled to share equally in any dividends that the Board of Directors declares from time to time out of funds legally available for dividends.

Upon the Company's liquidation, dissolution or winding-up, the holders of Class A common stock and Class B common stock shall be entitled to share equally in all assets remaining after the payment of any liabilities and the liquidation preferences on any outstanding preferred stock. Shares of the Company's Class A common stock are not convertible into any other shares of the Company's capital stock. Each share of Class B common stock is convertible at any time at the option of the holder thereof into one share of Class A common stock. Upon any transfer of shares of Class B common stock to a holder other than Teekay Corporation (or any of its affiliates or any successor to Teekay Corporation's business or to all or substantially all of its assets), such shares of Class B common stock shall automatically convert into Class A common stock upon such transfer. In addition, all shares of Class B common stock will automatically convert into shares of Class A common stock if the aggregate number of outstanding shares of Class A common stock and Class B common stock beneficially owned by Teekay Corporation and its affiliates falls below 15% of the aggregate number of outstanding shares of common stock. All such conversions will be effected on a one-for-one basis.

As at December 31, 2013 and December 31, 2012, the Company had reserved under its 2007 Long-Term Incentive Plan a total of 1,000,000 shares of Class A common stock for issuance pursuant to awards to be granted. For the years ended December 31, 2013, 2012 and 2011, 142,157 shares, 82,573 shares and 30,596 shares of Class A common stock have been granted and delivered to non-management Directors as part of the Directors' annual compensation, respectively. These Class A common shares were purchased on the open market rather than issuing shares from authorized capital. The granting of such stock has been included in general and administrative expenses in the amounts of \$0.4 million, \$0.4 million and \$0.3 million for the years ended December 31, 2013, 2012, and 2011, respectively.

The Company also grants restricted stock units as incentive-based compensation under the Teekay Tankers Ltd. 2007 Long-Term Incentive Plan to certain employees of Teekay Corporation's subsidiaries that provide services to the Company. The Company measures the cost of such awards using the grant date fair value of the award and recognizes that cost, net of estimated forfeitures, over the requisite service period. The requisite service period consists of the period from the grant date of the award to the earlier of the date of vesting or the date the recipient becomes eligible for retirement. For stock-based compensation awards subject to graded vesting, the Company calculates the value for the award as if it was one single award with one expected life and amortizes the calculated expense for the entire award on a straight-line basis over the requisite service period. The compensation cost of the Company's stock-based compensation awards is reflected in general and administrative in the Company's consolidated statements of loss.

During March 2013, the Company granted 411,629 restricted stock units with a grant date fair value of \$1.0 million to certain employees of Teekay's subsidiaries, which provide services to the Company, based on the Company's closing share price on the grant date. Each restricted stock unit is equal in value to one share of the Company's common shares

plus reinvested distributions from the grant date to the vesting date. The restricted stock units vest equally over three years from the grant date. Any portion of a restricted stock unit award that is not vested on the date of a recipient's termination of service is cancelled, unless their termination arises as a result of the recipient's retirement and, in this case, the restricted stock unit award will continue to vest in accordance with the vesting schedule. Upon vesting, the value of the restricted stock unit awards is paid to each recipient in the form of shares of Class A common stock. For the year ended December 31, 2013, the Company recorded expenses of \$0.7 million related to the restricted stock units.

13. Related Party Transactions

Dropdown Acquisitions

- a. During June 2012, the Company acquired from Teekay a fleet of 13 double-hull conventional oil and product tankers and related time-charter contracts, debt facilities and other assets and rights, for an aggregate purchase price of approximately \$454.2 million (see *Note 1*).

Management Fee Related and Other

- b. The Company charters two vessels to Teekay. In addition, Teekay and its wholly owned subsidiary and the Company's manager, Teekay Tankers Management Services Ltd. (*the Manager*), provide commercial, technical, strategic and administrative services to the Company. In addition, certain of the Company's vessels participate in pooling arrangements that, with the exception of an MR pool, are managed by entities owned in whole or in part by subsidiaries of Teekay (collectively the *Pool Managers*). Such related party transactions were as follows:

Interest expense - Dropdown Predecessor ^(note 1)		11,660	36,354

- (i) The Company has chartered-out the *Pinnacle Spirit* and *Summit Spirit* to Teekay under fixed-rate time-charter contracts, which expire in 2014.
- (ii) The Company's share of the Pool Managers' fees which are reflected as a reduction to net pool revenues from affiliates on the Company's consolidated statements of loss.
- (iii) The Manager's commercial management fees for vessels on time-charter out contracts, which are reflected in voyage expenses on the Company's consolidated statements of loss.
- (iv) The cost of ship management services provided by the Manager of \$5.6 million, \$7.0 million and \$8.5 million for the years ended December 31, 2013, 2012 and 2011, respectively, have been presented as vessel operating expenses (see Note 1). The amount reclassified from general and administrative to vessel operating expenses to conform to the presentation adopted in the current year was \$4.4 million for the Company's own fleet and \$2.6 million attributable to the Dropdown Predecessor, respectively, for the year ended December 31, 2012. The amount reclassified from general and administrative to vessel operating expenses was \$3.1 million for the Company's own fleet and \$5.4 million attributable to the Dropdown Predecessor, respectively, for the year ended December 31, 2011.
- (v) The Manager's strategic and administrative service fees.

- c. The Manager and other subsidiaries of Teekay collect revenues and remit payments for expenses incurred by the Company's vessels. Such amounts, which are presented on the consolidated balance sheets in due from affiliates or due to affiliates, are without interest or stated terms of repayment. In addition, \$5.8 million and \$4.9 million were payable to the Manager as at December 31, 2013 and December 31, 2012, respectively, for reimbursement of the Manager's crewing and manning costs to operate the Company's vessels and such amounts are included in accrued liabilities on the consolidated balance sheets. The amounts owing from the Pool

Managers, which are reflected in the consolidated balance sheets as pool receivables from affiliates, are without interest and are repayable upon the terms contained within the applicable pool agreement. In addition, the Company had advanced \$20.3 million and \$16.6 million as at December 31, 2013 and December 31, 2012, respectively, to the Pool Managers for working capital purposes. The Company may be required to advance additional working capital funds from time to time. Working capital advances will be returned to the Company when a vessel no longer participates in the applicable pool, less any set-offs for outstanding liabilities or contingencies. These activities, which are reflected in the consolidated balance sheets as due from affiliates, are without interest or stated terms of repayment.

- d. The Company's executive officers are employees of Teekay or subsidiaries thereof, and their compensation (other than any awards under the Company's long-term incentive plan described in *Note 12*) is set and paid by Teekay or such other subsidiaries. The Company reimburses Teekay for time spent by its executive officers on the Company's management matters through the strategic portion of the management fee. The strategic management fee reimbursements, included in the management fee described above, for the years ended December 31, 2013, 2012 and 2011 were \$5.8 million, \$2.9 million and \$1.7 million, respectively.

The management agreement provides for payment to the Manager of a performance fee in certain circumstances. If Gross Cash Available for Distribution for a given fiscal year exceeds \$3.20 per share of the Company's weighted average outstanding common stock (or the *Incentive Threshold*), the Company is generally required to pay a performance fee equal to 20% of all Gross Cash Available for Distribution for such year in excess of the Incentive Threshold. The Company did not incur any performance fees for the years ended December 31, 2013, 2012 and 2011. *Cash Available for Distribution* represents net (loss) income plus depreciation and amortization, unrealized losses from derivatives, non-cash items and any write-offs or other non-recurring items, less unrealized gains from derivatives and net income attributable to the historical results of vessels acquired by the Company from Teekay Corporation, prior to their acquisition by us, for the period when these vessels were owned and operated by Teekay Corporation. *Gross Cash Available for Distribution* represents Cash Available for Distribution without giving effect to any deductions for performance fees and reduced by the amount of any reserves the Company's Board of Directors may establish during the applicable fiscal period that have not already reduced the Cash Available for Distribution.

- e. Pursuant to certain pooling arrangements (see Note 3), the Pool Managers provide certain commercial services to the pool participants and administer the pools in exchange for a fee currently equal to 1.25% of the gross revenues attributable to each pool participant's vessels and a fixed amount per vessel per day which ranges from \$275 to \$350. Voyage revenues and voyage expenses of the Company's vessels operating in these pool arrangements are pooled with the voyage revenues and voyage expenses of other pool participants. The resulting net pool revenues, calculated on a time-charter equivalent basis, are allocated to the pool participants according to an agreed formula. The Company accounts for the net allocation from the pools as net pool revenues from affiliates on the consolidated statements of income. The pool receivable from affiliates as at December 31, 2013 and December 31, 2012 were \$10.8 million and \$9.1 million, respectively.

Table of Contents**TEEKAY TANKERS LTD.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****(all tabular amounts stated in thousands of U.S. dollars, other than share or per share data)****14. Operating Leases****Charters-in**

As at December 31, 2013, minimum commitments to be incurred by the Company under vessel operating leases by which the Company charters-in vessels will be approximately \$4.4 million (2014) and \$0.2 million (2015). The Company recognizes the expense from these charters, which is included in time-charter hire expense, on a straight-line basis over the firm period of the charters.

Charters-out

As at December 31, 2013, 13 of the Company's vessels operated under fixed-rate time charter contracts with the Company's customers, of which six contracts are scheduled to expire in 2014, four contracts are scheduled to expire in 2015 and three time-charter contracts are scheduled to expire in 2016. As at December 31, 2013, minimum scheduled future revenues to be received by the Company under time charters then in place were approximately \$113.3 million, comprised of \$72.4 million (2014), \$32.7 million (2015) and \$8.2 million (2016). The carrying amount of the vessels employed on operating leases at December 31, 2013, was \$431.1 million (2012 - \$455.9 million). The cost and accumulated depreciation of the vessels employed on operating leases as at December 31, 2013 were \$598.1 million (2012- \$645.6 million) and \$167.0 million (2012 - \$189.7 million), respectively.

The minimum scheduled future revenues should not be construed to reflect total charter hire revenues for any of the years. Minimum scheduled future revenues do not include revenue generated from new contracts entered into after December 31, 2013, revenue from unexercised option periods of contracts that existed on December 31, 2013, or variable or contingent revenues. In addition, minimum scheduled future revenues presented above have been reduced by estimated off-hire time for period maintenance. The amounts may vary given unscheduled future events such as vessel maintenance.

15. Supplemental Cash Flow Information

- a. The changes in non-cash working capital items related to operating activities for the years ended December 31, 2013, 2012, and 2011 are as follows:

	Year Ended December 31,		
	2013	2012	2011
Accounts receivable and interest receivable	(9,150)	(3,317)	(808)
Pool receivables from affiliates	(1,664)	(4,741)	6,697
Due from affiliates	(3,204)	(12,177)	(253)

Edgar Filing: TEEKAY TANKERS LTD. - Form 20-F

Prepaid expenses and other current assets	(647)	(3,147)	(1,409)
Accounts payable and accrued liabilities	2,092	2,337	(1,788)
Due to affiliates	7,731	(1,204)	(842)
Deferred revenue	(1,603)	855	(2,692)
Other	(141)	1,600	262
	(6,586)	(19,794)	(833)

- b. Cash interest paid for the year ended December 31, 2013 was \$18.9 million. Cash interest paid (including interest paid by the Dropdown Predecessor) during the years ended December 31, 2012, and 2011 totalled \$29.3 million and \$79.1 million, respectively, including realized losses of \$1.8 million and \$32.9 million, respectively on the interest rate swaps agreements relating to the 2012 Acquired Business.
- c. Increases and decreases in the amount of debt allocated to Dropdown Predecessor from Teekay have been treated as non-cash transactions in the Company's statement of cash flows. Such repayments (drawdowns) for the years ended December 31, 2012 and 2011 were \$108.7 million, \$(82.3) million, respectively.

TEEKAY TANKERS LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(all tabular amounts stated in thousands of U.S. dollars, other than share or per share data)

16. Earnings Per Share

The net loss available for common stockholders and loss per common share presented in the table below excludes the results of operations of the Dropdown Predecessor (see *Note 1*).

	Year Ended December 31,		
	2013	2012	2011
Net loss	(8,138)	(370,181)	(113,075)
Net loss attributable to the Dropdown Predecessor	(note 1)	9,163	104,010
Net loss available for common stockholders	(8,138)	(361,018)	(9,065)
Weighted-average number of common shares	83,591,030	79,539,605	60,770,525
Common shares and common share equivalents outstanding at the end of year	83,591,030	83,591,030	61,876,744
Loss per common share:			
- Basic and diluted	(0.10)	(4.54)	(0.15)

17. Vessel Sales and Impairments

The Company's consolidated statement of loss for the year ended December 31, 2012 includes a \$352.5 million write down of seven Suezmax tankers (\$305.6 million), four Aframax tankers (\$44.5 million), and one product tanker (\$2.4 million). The Company's consolidated statement of loss for the year ended December 31, 2011 includes a \$58.0 million write down on three of the Dropdown Predecessor's product tankers. When comparing the seven Suezmax tankers to each other and when comparing the four Aframax tankers to each other, the vessels have a similar age, a similar carrying value and are all being employed in the spot market or on short term time-charters. The primary factors that caused the write downs were a negative change in the outlook for the crude tanker market, a delay in the expected timing of a recovery of the crude tanker market as well as the expected discrimination impact from more fuel efficient vessels being constructed. One of the four Aframax tankers was held for sale at December 31, 2012 and was subsequently sold in January 2013. All of the vessels were written down to their estimated fair values, using an internally appraised value based on second hand sale and purchase market data.

18. Shipbuilding Contracts

On April 8, 2013, the Company entered into agreements with STX Offshore & Shipbuilding Co., Ltd. (or *STX*) of South Korea to construct four, fuel-efficient 113,000 dead-weight tonne Long Range 2 (or *LR2*) product tanker newbuildings plus options to order up to an additional 12 vessels. The payment of the Company's first shipyard installment was contingent on the Company receiving acceptable refund guarantees for the shipyard installment payments. In May 2013, STX commenced a voluntary financial restructuring with its lenders, and as a result, STX's refund guarantee applications were temporarily suspended. In October and November 2013, the Company exercised its options to order eight additional LR2 newbuildings, in aggregate, under option agreements relating to the original STX LR2 shipbuilding agreements signed in April 2013. STX did not produce shipbuilding contracts within the specified timeframe of the option declarations and, informed the Company that there was no prospect of the refund guarantees being provided under any of the firm or option agreements and therefore, is in breach of the option agreements. In December 2013, the newbuilding agreements were terminated by the Company.

At December 31, 2013, the Company was evaluating its alternatives, including taking legal action for damages (see note 19).

19. Subsequent Events

- a. In January 2014, the Chief Executive Officer and Director of the Company announced his intention to resign from his positions with the Company and with the Company's Manager effective June 20, 2014.
- b. In January 2014, the Company and Teekay formed Tanker Investments Limited (or *TIL*). The Company purchased 2.5 million shares of common stock for \$25.0 million, representing a 10% interest in TIL, as a part of a \$250 million equity private placement by TIL. In addition, the Company received a stock purchase warrants entitling it to purchase up to 750,000 shares of common stock of TIL at a fixed price of \$10 per share. The stock purchase warrants expire on January 23, 2019. For purposes of vesting, the stock purchase warrants are divided into four equally sized tranches. Each tranche will vest and become exercisable when and if the fair market value of a share of the Common Stock equals or exceeds \$12.50, \$15.00, \$17.50 and \$20.00, respectively for such tranche for any ten consecutive trading days. The Company also received one Series A-2 Preferred share, which entitles the holder to elect one Board member of TIL. The Series A-2 Preferred share does not give the holder a right any dividends or distributions of TIL. In March 2014, TIL issued additional common shares and listed its shares on the Oslo Stock Exchange. As of March 31, 2014, Company's ownership interest in TIL was 6.51%. TIL will seek to opportunistically acquire, operate and sell modern second hand tankers to benefit from an expected recovery in the current cyclical low of the tanker market. A portion of the net proceeds from the equity issuances by TIL was used to acquire four modern Suezmax crude oil tankers from Teekay and five modern Aframax tankers from third parties. The remaining proceeds will be used to acquire additional tankers and for general corporate purposes.
- c. In April 2014, the Company and Teekay, agreed for the Company to purchase from Teekay a 50% interest in its conventional tanker commercial operations and 100% interest in its technical management operations, including the direct ownership in three commercially managed tanker pools, which generate fee income from commercially managing a fleet of 82 vessels and technically managing a fleet of 42 vessels, including vessels owned by the Company. The agreed purchase price for this acquisition is approximately \$15.6 million to be payable in Class B common shares of the Company. The transaction is expected to be completed during the second quarter of 2014.

- d. In February 2014, the eight LR2 newbuilding option agreements with STX were terminated by the Company, and the Company commenced legal action for damages.
