**Item 8.01 Other Events.**

On June 9, 2016, Agios Pharmaceuticals, Inc. ( the Company ) issued a press release announcing the first data from its ongoing phase 1 integrated single ascending dose and multiple ascending dose trial evaluating AG-519 in healthy adult volunteers. AG-519 is the Company s potent, oral activator of wild-type and mutant pyruvate kinase-R ( PKR ) enzymes. On June 11, 2016, the Company issued a press release announcing initial data from DRIVE PK, the Company s ongoing global phase 2, open-label safety and efficacy trial evaluating AG-348, the Company s novel, first-in-class, oral PKR activator, in adult transfusion-independent patients with pyruvate kinase deficiency.

The Company presented both data at the 21<sup>st</sup> Congress of the European Hematology Association in Copenhagen, Denmark on June 11, 2016. The full text of the press releases issued in connection with these announcements are attached as Exhibit 99.1 and Exhibit 99.2 to this Current Report on Form 8-K and are incorporated herein by reference.

In addition, on June 11, 2016, the Company updated one of its 2016 expected milestones for its AG-120 program. As a result of the Company recently obtaining global rights to AG-120 and the IDH1 program, the Company now expects to initiate a global, registration-enabling Phase 3 study of AG-120 in frontline acute myeloid leukemia patients with an IDH1 mutation in the first half of 2017, as opposed to prior guidance of a trial initiation in the second half of 2016.
