[SK Broadband]

SK Broadband acquired subscriberships of regional cable and other service providers on several different occasions. Such acquisitions were intended to secure a stable subscriber base for its broadband Internet service and, at the same time, increase the service coverage area. Because such acquisitions were conducted on a relatively small scale and involved the purchase of subscriberships, SK Broadband did not believe that such acquisitions rose to the level of purchasing an entire business line from another company or were likely to have a material impact on its business, and therefore decided that such acquisitions did not require resolutions of its shareholders.

[Wireless Business]**A. Industry Characteristics**

The telecommunications services market can be categorized into telecommunications services (such as fixed-line, wireless, leased line and value-added services) and broadcasting and telecommunications convergence services. Pursuant to the Telecommunications Business Act, the telecommunications services market can be further classified into basic telecommunications (fixed-line and wireless telecommunications), special category telecommunications (resale of telecommunications equipment, facilities and services) and value-added telecommunications (internet connection and management, media contents and others). The size of the domestic telecommunications services market is determined based on various factors specific to Korea, including size of population that uses telecommunication services and telecommunications expenditures per capita. While it is possible for Korean telecommunication service providers to provide services abroad through acquisitions or otherwise, foreign telecommunication services markets have their own characteristics depending, among others, on the regulatory environment and demand for telecommunication services.

Table of Contents

The Korean mobile communication market is considered to have reached its maturation stage with more than a 100% penetration rate. However, the Korean mobile communications market continues to improve in the quality of services with the help of advances in network-related technology and the development of highly advanced LTE-A, LTE and 3G smartphones which enable the provision of convergence services for multimedia contents, mobile commerce, telematics, new media and other related services. In addition, through the commercialization of LTE network in July 2011 and LTE-A network in June 2013, B2B businesses, such as the corporate connected workforce business which can directly contribute to an enhancement in productivity, are expected to grow rapidly.

In the first half of 2014, wideband LTE-A service was commercialized and on December 29, 2014, tri-band LTE-A service with a maximum speed of 300 Mbps was also commercialized. Since June 2017, through the commercialization of 5band CA technology, which is considered the final stage of LTE development, we have provided 4.5G service at the speed of 700Mbps to 900Mbps. Such achievements were the building blocks towards the Company's LTE penetration reaching 74.8% as of September 30, 2017.

C. Domestic and Overseas Market Conditions

The Korean mobile communication market includes the entire population of Korea with mobile communication service needs, and almost every Korean is considered a potential user. Sales revenue related to data services is expected to increase due to the increasing popularity of smartphones and high-speed wireless networks. There is also a growing importance to the business-to-business segment, which creates added value by selling and developing various solutions. Seasonal and economic fluctuations have much less impact on the Korean mobile communication market compared to other industries.

Set forth below is the historical market share of the Company.

D. Business Overview and Competitive Strengths

The Company is seeking to transform itself from a telecommunications service provider into a comprehensive ICT service provider. It has continued to innovate the scope of its services and achieved strong growth in subscribers amid fierce competition and rate cuts. As a result, in the third quarter of 2017, the Company recorded Won 4.4 trillion in revenue and Won 392.4 billion in operating income on a consolidated basis and Won 3.2 trillion in revenue and Won 420.7 billion in operating income on a separate basis. In particular, the number of subscribers subscribing to Band Data plans, which was launched in the second quarter of 2015, has continued to steadily increase in 2017, which in turn led to an increase in data usage. The success of Luna, a smartphone launched in September 2015 that was designed to run exclusively on the Company's networks, led to the launch of various other relatively low-priced devices and became an example of successfully targeting a niche market.

Table of Contents

By continuing to be innovative in developing core competencies, the Company has more firmly established its position as the market leader in wireless telecommunications. The competitive environment of the wireless telecommunications industry has become more focused on retention. In the third quarter of 2017, the average monthly churn rate was 1.4%. The number of subscribers (including MVNO subscribers) as of September 30, 2017, was 30.2 million, an increase of approximately 170,000 since June 30, 2017. In particular, the number of smartphone subscribers as of September 30, 2017, was 22.7 million, an increase of approximately 320,000 since December 31, 2016, propelled by 22.6 million LTE subscribers, solidifying the Company's market leadership. In addition, the Company continued to sell products targeted towards second devices such as the T Kids phone Joon and T Outdoor, which the Company believes shows a level of demand that can potentially lead to growth of the lifestyle enhancement platform.

Following the launch of commercial LTE services in July 2011, the Company became the first telecommunications service provider in the world to launch commercial wideband LTE-A services in June 2014. The Company launched tri-band LTE-A services in December 2014 and 5band 4.5G services in June 2017. By launching various high quality services utilizing the LTE-A and wideband LTE networks such as group video conference call services and full high definition mobile IPTV streaming services, the Company plans to provide an innovative user experience, enhance customer satisfaction and increase profitability.

The Company has proved that it has superior network quality compared to its competitors according to the Korea Communications Commission quality evaluations. The Company has also proved to be the leader in Korea's top three customer satisfaction indices: according to the National Customer Satisfaction Index, Korean Customer Satisfaction Index and Korean Standard Service Quality Index, the Company has continued to hold the leading position for 20 years, 20 years and 18 years, respectively. The Company received the highest level of evaluation in 2016 by the Korea Commission for Corporate Partnership for the fifth consecutive year and was selected for the commission's Honored Corporation Award, demonstrating the Company's efforts to be fair and law-abiding in its path towards creating a New ICT ecosystem.

SK Telink, a consolidated subsidiary of the Company, expanded its operations to the MVNO business based on its technical expertise and know-how obtained in its international telecommunications business and launched its MVNO service, SK 7Mobile, which is offered at reasonable rates and provides excellent quality. SK Telink is increasing its efforts to develop low-cost distribution channels and create niche markets through targeted marketing towards customers including foreign workers, middle-aged adults and students. An MVNO leases the networks of a mobile network operator (MNO) and provides wireless telecommunication services under its own brand and fee structure, without owning telecommunication networks or frequencies.

Network O&S, a subsidiary of the Company responsible for the operation of the Company's base stations and related transmission and power facilities, offers quality fixed-line and wireless network services to customers, including mobile office products to business customers.

PS&Marketing, a subsidiary of the Company, provides a sales platform for products of the Company and SK Broadband including fixed-line and wireless telecommunication products that address customers' needs for various convergence products. PS&Marketing provides differentiated service to clients through the establishment of new sales channels and product development.

[Fixed-line Business]

A. Industry Characteristics

The Korean fixed-line services industry is marked by a relatively low level of economic sensitivity and high level of market concentration, as the government is highly selective in granting telecommunications business licenses. The competitive landscape of the fixed-line and wireless services markets is dominated by its three leading operators, the Company (including SK Broadband), KT and LG U+. Growing competition within the industry has promoted rapid technological evolution, including the convergence of fixed-line and wireless services, as well as broadcasting and telecommunications. In general, the fixed-line and wireless services markets have been characterized by relatively high profitability, cash flows and financial stability.

Table of Contents

In the backdrop of increasing regulation in the fixed-line industry, competition to provide Giga services has intensified and the growth of high-speed internet subscribers has slowed. It is currently expected that the rate of increase of IPTV subscribers will decrease, among others, due to the conversion to digital broadcasting. In order to differentiate itself from its competitors, the Company believes that it will need to provide customers with high quality media content on its IPTV platform. Additionally, the Company expects increased demand for ultra-high definition broadcasting. Such changing trends of broadcasting consumption present opportunities to incorporate the Company's IoT, cloud and big data technologies into the Company's home platform business to achieve new growth. The Company plans to increase its subscriber base by providing differentiated services and focusing on marketing strategies centered around high value services such as Giga services and ultra-high definition broadcasting services.

* Number of IPTV subscribers as of September 30, 2017 is the average number of IPTV subscribers in the first six months of 2017 based on MSIT announcements on November 9, 2017.

C. Cyclical Nature and Seasonality

High-speed Internet, fixed-line telephone and IPTV services are mature markets that are comparatively less sensitive to cyclical economic changes as such services have become more of a necessity and the market has matured. The telecommunications services market overall is not expected to be particularly affected by economic downturns due to the low income elasticity of demand for telecommunication services.

D. Market Shares

Set forth below is the historical market share of the Company.

Fixed-line telephone (including Voice over Internet Protocol (VoIP)	16.9	16.9	17.1
IPTV	30.6	30.7	30.5

- * Source: MSIT website.
- * With respect to Internet telephone, the market share was calculated based on market shares among the Company, KT and LG U+ and is based on the number of IP phone subscribers.
- * The number of IPTV subscribers was taken from data announced by the MSIT on November 9, 2017, and the number of IPTV subscribers as of September 30, 2017, was calculated using the average number of subscribers for the first six months of 2017.

E. Business Overview and Competitive Strengths

For the nine months ended September 30, 2017, we recorded Won 2,212 billion in revenue, Won 89.3 billion in operating income and Won 10.8 billion in profit for the period for our fixed-line business. Our revenue increased by 1.2% in the third quarter of 2017 to Won 760 billion compared to the same period in 2016, primarily due to an increase in the number of IPTV subscribers and an increase in sales of paid-for contents. We recorded Won 29.8 billion in operating income. While operating income for the third quarter of 2017 decreased compared to the previous quarter due to increases in marketing expense and commission fees, our revenue increased compared to the previous quarter due to the steady growth of revenue from our IPTV business as a result of increases in IPTV subscribers and platform sales, as well as increased sales from our high-speed internet business and our expanded fixed-line network. Without the effect of one-time costs associated with the establishment of Home&Service in the previous quarter, we achieved a net profit for the quarter as well as the nine months ended September 30, 2017. As of September 30, 2017, the number of subscribers to each of our high-speed internet, fixed-line telephones (including VoIP) and IPTV services was 5.40 million, 4.16 million and 4.29 million, respectively.

Table of Contents

In comparison to the previous quarter, net additions of our high-speed internet and IPTV subscribers increased by 75% to 59,000 and 20% to 117,000, respectively, primarily due to the launch of Home&Service, which revitalized our marketing capacity by expanding new distribution channels and strengthening customer retention. In addition, sales from high-end products such as Giga and UHD accounted for more than 25% and 40%, respectively, of our respective subscriber based, contributing to a shift towards a stronger high-tier subscriber base.

Our IPTV business has continued to grow due to increases in the number of subscribers and the average revenue per subscriber, which are key performance indicators. In particular, the number of subscribers of the mobile media platform Oksusu increased by 630,000 to a total of 8.1 million in the third quarter of 2017. We plan to continue to strengthen the competitiveness of our fixed-line and wireless media platforms by launching new products and services while furthering our efforts for contents differentiation by developing original contents and launching major overseas channels.

In our corporate business, revenues for the third quarter of 2017 increased slightly compared to the previous quarter, while the proportion of revenues from our Core & Growth business continues to grow.

SK Telink, a provider of international telecommunications service, has been able to establish itself as a market leader as a result of its affordable pricing, proactive marketing and the quality of its services. It launched a mobile phone-based international calling service under the brand name 00700 in 1998, creating a new niche market within the long-distance telephony market that was otherwise dominated by existing service providers. In 2003, SK Telink was designated a common carrier for international calling services, which allowed the Company to expand its international calling services to fixed-line international calling services. In 2005, SK Telink obtained a license to operate VoIP services and local calling value-added services to develop into a versatile fixed-line telecommunications service provider. SK Telink plans to strategically target the convergence of wireless and fixed-line telecommunications and strengthen its existing business, including international and long-distance calling services, value-added services for local calling and B2B services, and video conference call services while aiming to satisfy the diverse needs of customers by providing quality solutions at reasonable prices.

[Other Business]

A. Industry Characteristics

As the number of smartphones distributed in Korea exceeds 40 million, the growth in various mobile devices has spurred the rise of the service provider with a strong platform business as the leader in the ICT market. It is becoming increasingly important to enhance competitiveness by building a platform with large data capacity to handle the increase in data transmission.

A platform business acts as an intermediary by promoting interactions among various customer groups, thereby generating new values. It is important for a platform business to continually attract subscribers and users and to create an ecosystem with certain lock-in effects. A platform can exist in various forms, including as a technological standard (iOS, Android OS), a subscriber-based service platform (Facebook, Twitter) or a marketplace (Amazon, Onestore). Platform businesses are evolving and expanding globally.

A platform business has strong growth potential due to its connectivity with related services and ease of global expansion. Apple became a world-leading smartphone producer based on its innovative design and the competitive strength of its App Store platform. Google has created a new ecosystem of long-tail advertising by attracting millions of third parties to its advertising platform, as well as showing strong growth in mobile markets with its competitive

platform based on Android OS. It is becoming increasingly important to enhance competitiveness through a database that can register and analyze purchase patterns of customers across all areas and a platform with large data capacity with which to utilize this database and provide differentiated services to customers.

Table of Contents

B. Growth Potential

The scope and value generated by the platform business, including application and content marketplaces and N-screen services, continue to increase as smartphones and tablet computers become more popular and the bandwidth and speed of network infrastructure improve. As the wireless network evolves to LTE, business opportunities for the platform business exist, including multimedia streaming, N-screen service based on cloud technology and high-definition location-based services. Since the platform business realizes profit by connecting with advertisements or commerce sites after building a critical mass of subscribers and traffic, the recent growth in the advertising and commerce markets is expected to present an opportunity for platform businesses. The importance of building a platform with large data capacity that is connected to various digital contents and commerce is expected to increase in the future.

C. Domestic and Overseas Market Conditions

(1) Commerce markets

The Company expects that online/mobile commerce markets will continue to grow due to the growth potential of the Internet shopping population, the strengthening of online business models by off-line operators, and the rapid rise of mobile commerce. Recently, due to the widespread use of smartphones and social media, the commercialization of location-based services and the development of big data technology, online to offline (or, O2O) business, which is a concept of attracting customers to offline stores using online and mobile environments, is being highlighted as a new field in the online commerce market industry as new business models continue to emerge.

(2) Digital contents

The growth of application marketplaces, which started with Apple's App Store, provides the platform business with new opportunities for revenue generation. The competitive paradigm is shifting from a competition among platform operators toward a competition among eco-systems that include application developers as well as platform operators.

D. Business Overview and Competitive Strengths

The Company plans to expand its platform ecosystem in operating its commerce business which includes marketplace and O2O businesses, such as 11th Street, Syrup and OK Cashbag, thereby ultimately increasing its enterprise value.

(1) Commerce business

11th Street, an online marketplace, has continued its growth through effective marketing and customer satisfaction. Despite its later entry into the online commerce market (launched in 2008) which was already divided between Auction and G-Market, it is leading the domestic e-commerce market. Furthermore, 11th Street has established itself as the domestic market leader in mobile commerce, following its successful entry into and rapid growth in this market. Growth plans involving overseas joint ventures based on 11th Street's business expertise have resulted in the successful launch of an open online commerce market in Turkey in partnership with Doğuş Group in March 2013. In Indonesia, an open market service was launched in March 2014 through collaboration with PT XL Axiata Tbk, a wireless telecommunications company in Indonesia. In October 2014, SK Planet and Celcom Axiata Berhad, which is a leading telecommunications service provider in Malaysia, established a joint venture, Celcom Planet, and launched

online commerce services tailored to the Malaysian market in April 2015. 11th Street is not only actively engaged in operating such business in Malaysia, but has also launched its service in Thailand in February 2017.

Syrup is a consumer-oriented commerce service with the goal of minimizing its customers' time and efforts while maximizing the economic benefits by providing information about coupons and events based on time, place and occasion. To achieve this goal, Syrup combines location-based services, such as geo-fencing, a virtual perimeter technology using a global positioning system (or, GPS) and Bluetooth Low Energy (or, BLE), with big data analysis of consumption patterns. Syrup's business partners can benefit from cost-effective marketing through Syrup by utilizing statistics and analysis regarding consumers' frequency of visits, preferred products, and consumption patterns.

OK Cashbag is a point-based loyalty marketing program which has grown to become a global top-tier loyalty marketing program since its inception in 1999. Customers have access to increased benefits through accumulation of loyalty reward points and partner companies use OK Cashbag as a marketing resource. As Korea's largest loyalty mileage program, OK Cashbag maintains a leading position in the industry. The Company is continuing to develop its service in light of market conditions and customers' needs to enhance its customers' perception of point value and is reviewing and pursuing various plans to develop OK Cashbag into a service that goes beyond a mileage program that leverages the key competitiveness of OK Cashbag such as its platform and partnership network.

(2) Location-based services

T-Map Navigation provides map, local information, real-time traffic information and navigation services. T-Map Navigation is one of the leading location-based service platforms in Korea. By entering the Online to Offline service area with T map Taxi, T map Public Transportation and others, the Company is expanding its mobile platform foundation that connects day to day life. The Company has continued to secure subscribers by differentiating its product T map x NUGU as a unique artificial intelligence driving assistant. The Company has also focused on providing effective info-tainment platforms to commercial vehicle businesses as well as providing localized content, including region-specific information and advertisements. The Company plans to further develop the T-Map Navigation platform by initiating open application programming interface-based services, providing services to more diverse types of devices and providing local area-based services.

(3) Digital contents

Onestore, an application platform launched in 2016 through a joint venture between SK Telecom, KT, LG U+ and Naver's app store, launched Onestore 2.0, which showcases the particular benefits of the application platform. The Company intends to further develop Onestore into a personalized gateway and mobile playground through enhanced product and brand competitiveness, expansion of the scope of serviceable devices, reinforcement of digital content offerings and enhancement of search services, among other things.

(4) Social networking services (SNS) and Internet portal services

The Company's instant messenger service, Nate-On, had a market share of 16.1% in the instant messenger market in Korea with 2.5 million net users during the month of September 2017. Nate, the Company's Internet search portal service, realized a page-view market share of 4.0% as of September 30, 2017. (Source: Korean Click, based on fixed-line access)

(3) Policies for Allowance for Doubtful Accounts

The Company establishes allowances for doubtful accounts based on the likelihood of recoverability of trade and other receivables based on their aging at the end of the period and past customer default experience for the past two years. With respect to trade receivables relating to wireless telecommunications services, the Company considers the likelihood of recovery based on past customer default experience and the length of default in connection with the type of default (e.g., whether the customer's service has been terminated or is continued). For such trade receivables that have been overdue for more than two years after the customer's service has been terminated, the Company records an allowance of 100% of such receivables. For such trade receivables that have been overdue for less than two years after the customer's service has been terminated or relates to a customer that is continuing his service, the Company records an allowance of a certain percentage of such receivable. Consistent with customary practice, the Company writes off trade and other receivables for which the prescription period has passed or that are determined to be impossible or economically too costly to collect, including receivables that are less than Won 200,000 and more than six months overdue and receivables that have been determined to be the subject of identity theft.

Independent Auditors' Review Report

Based on a report originally issued in Korean

To The Board of Directors and Shareholders

SK Telecom Co., Ltd.:

Reviewed financial statements

We have reviewed the accompanying condensed separate interim financial statements of SK Telecom Co., Ltd. (the Company), which comprise the condensed separate statement of financial position as of September 30, 2017, the related condensed separate statements of income and comprehensive income for the three and nine-month periods ended September 30, 2017 and 2016, the condensed separate statements of changes in equity and cash flows for the nine-month periods ended September 30, 2017 and 2016, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's responsibility

Management is responsible for the preparation and fair presentation of these condensed separate interim financial statements in accordance with Korean International Financial Reporting Standards (K-IFRS) No.1034, *Interim Financial Reporting*, and for such internal controls as management determines necessary to enable the preparation of condensed separate interim financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to issue a report on these condensed separate interim financial statements based on our reviews.

We conducted our reviews in accordance with the Review Standards for Quarterly and Semiannual Financial Statements established by the Securities and Futures Commission of the Republic of Korea. A review of interim financial statements consists principally of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Korean Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our reviews, nothing has come to our attention that causes us to believe that the accompanying condensed separate interim financial statements referred to above are not prepared fairly, in all material respects, in accordance with K-IFRS No.1034, *Interim Financial Reporting*.

Other matters

The separate statement of financial position of the Company as of December 31, 2016, and the related separate statements of income, comprehensive income, changes in equity and cash flows for the year then ended, which are not accompanying this report, were audited by us in accordance with Korean Standards on Auditing and our report thereon, dated February 22, 2017, expressed an unqualified opinion. The accompanying condensed separate statement of financial position of the Company as of December 31, 2016, presented for comparative purposes, is consistent, in all material respects, with the audited separate financial statements from which it has been derived.

The procedures and practices utilized in the Republic of Korea to review such condensed separate interim financial statements may differ from those generally accepted and applied in other countries.

2. Basis of Preparation

(1) Statement of compliance

These condensed separate interim financial statements were prepared in accordance with K-IFRS No. 1034, *Interim Financial Reporting*, as part of the period covered by the Company s K-IFRS annual financial statements. Selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in financial position and performance of the Company since December 31, 2016. These condensed separate interim financial statements do not include all of the disclosures required for full annual financial statements.

These condensed interim financial statements are separate interim financial statements prepared in accordance with K-IFRS No.1027, *Separate Financial Statements*, presented by a parent, an investor with joint control of, of significant influence over, an investee, in which the investments are accounted for at cost.

(2) Use of estimates and judgments

1) Critical judgments, assumptions and estimation uncertainties

The preparation of the condensed separate interim financial statements in conformity with K-IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

In preparing these condensed separate interim financial statements, the significant judgments made by management in applying the Company's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the financial statements as of and for the year ended December 31, 2016.

2) Fair value measurement

A number of the Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities. The Company has an established control framework with respect to the measurement of fair values. This includes a valuation team that has overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values, and reports directly to the finance executive.

The valuation team regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services, is used to measure fair values, then the valuation team assesses the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of K-IFRS, including the level in the fair value hierarchy in which such valuations should be classified.

When measuring the fair value of an asset or a liability, the Company uses market observable data as far as possible. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement. The Company recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Information about assumptions used for fair value measurements is included in Note 24.

3. Significant Accounting Policies

The significant accounting policies applied by the Company in these condensed separate interim financial statements are the same as those applied by the Company in its separate financial statements as of and for the year ended December 31, 2016. In addition, the following new standards are effective for annual periods beginning after January 1, 2017 and earlier application is permitted; however, the Company has not early adopted the following new standards in preparing these condensed separate interim financial statements.

(1) K-IFRS No. 1109, *Financial Instruments*

The Company currently plans to apply K-IFRS No.1109 in the period beginning on January 1, 2018 and to assess the financial impact on its financial statements resulting from the adoption of K-IFRS No. 1109 by December 31, 2017. The assessment results will be disclosed in its annual financial statements for the year ending December 31, 2017. As of September 30, 2017, there have been no material changes related to the Company's plan for the adoption of K-IFRS No. 1109 which was disclosed in the Company's separate financial statements as of December 31, 2016.

(2) K-IFRS No. 1115, *Revenue from Contracts with Customers*

The Company currently plans to apply K-IFRS No.1115 in the period beginning on January 1, 2018. The Company is in the process of designing, implementing and enhancing its accounting system and related controls based on the understanding of the revenue stream of the Company with the assistance of external information technology and accounting specialists. The Company is assessing the impact of the adoption of K-IFRS No. 1115 on its separate financial statements plans to complete the assessment by December 31, 2017. The assessment results will be disclosed in its annual financial statements for the year ending December 31, 2017. As of September 30, 2017, there have been no material changes related to the Company's plan for the adoption of K-IFRS No. 1115 which was disclosed in the Company's separate financial statements as of December 31, 2016.

24. Financial Risk Management

(1) Financial risk management

The Company is exposed to credit risk, liquidity risk and market risk. Market risk is the risk related to the changes in market prices, such as foreign exchange rates, interest rates and equity prices. The Company implements a risk management system to monitor and manage these specific risks.

The Company's financial assets consist of cash and cash equivalents, financial instruments, available-for-sale financial assets, and accounts receivable - trade and other. Financial liabilities consist of accounts payable - trade and other, borrowings, and debentures.

1) Market risk

(i) Currency risk

The Company is exposed to currency risk mainly on exchange fluctuations on forecasted transactions and recognized assets and liabilities which are denominated in a currency other than the functional currency of the Company.

Monetary assets and liabilities denominated in foreign currencies as of September 30, 2017 are as follows:

(In millions of won, thousands of foreign currencies)

	Assets		Liabilities	
	Foreign currencies	Won translation	Foreign currencies	Won translation

(1) Financial risk management, Continued

1) Market risk, Continued

(i) Currency risk, Continued

In addition, the Company has entered into cross currency swaps to hedge against currency risk related to foreign currency borrowings and debentures.

As of September 30, 2017, a hypothetical change in exchange rates by 10% would have increased (reduced) the Company's income before income taxes as follows:

<i>(In millions of won)</i>	If increased by 10%	If decreased by 10%
USD	4,811	(4,811)
EUR	3,807	(3,807)
JPY	17	(17)
Others	60	(60)
	8,695	(8,695)

(ii) Equity price risk

The Company has listed and non-listed equity securities for its liquidity management and operating purpose. As of September 30, 2017, available-for-sale equity instruments measured at fair value amount to 595,685 million.

(iii) Interest rate risk

The interest rate risk of the Company arises from borrowings and debentures. Since the Company's interest bearing assets are mostly fixed-interest bearing assets, the Company's revenue and operating cash flows are not influenced by

the changes in market interest rates.

The Company performs various analysis of interest rate risk to reduce interest rate risk and to optimize its financing. To minimize risks arising from changes in interest rates, the Company takes various measures such as refinancing, renewal, alternative financing and hedging.

As of September 30, 2017, floating-rate debentures amount to 344,010 million and the Company has entered into interest rate swaps to hedge interest rate risk related to floating-rate debentures. Therefore, income before income taxes for the nine-month period ended September 30, 2017 would not have been affected by the changes in interest rates of floating-rate borrowings and debentures.

	3,914,918	3,909,429

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet his/her contractual obligations.

To manage credit risk, the Company evaluates the credit worthiness of each customer or counterparty considering the party's financial information, its own trading records and other factors. Based on such information, the Company establishes credit limits for each customer or counterparty.

The Company establishes an allowance for doubtful accounts that represents its estimate of incurred losses in respect of trade and other receivables. The main components of this allowance are a specific loss component that relates to individually significant exposures, and a collective loss component established for groups of similar assets in respect of losses that have been incurred but not yet identified. The collective loss allowance is determined based on historical data of payment statistics for similar financial assets. Also, the Company's credit risk can arise from transactions with financial institutions related to its cash and cash equivalents, financial instruments and derivatives. To minimize such risk, the Company has a policy to deal only with financial institutions with high credit ratings. The amount of maximum exposure to credit risk of the Company is the carrying amount of financial assets as of September 30, 2017.

3) Liquidity risk

The Company's approach to managing liquidity is to ensure that it will always maintain sufficient cash and cash equivalents balances and have enough liquidity through various committed credit lines. The Company maintains enough liquidity within credit lines through active operating activities.

Contractual maturities of financial liabilities as of September 30, 2017 are as follows:

(2) Capital management

The Company manages its capital to ensure that it will be able to continue as a business while maximizing the return to shareholders through the optimization of its debt and equity structure. The overall strategy of the Company is the same as that of the Company as of and for the year ended December 31, 2016.

The Company monitors its debt-equity ratio as a capital management indicator. This ratio is calculated as total liabilities divided by total equity both from the financial statements.

Debt-equity ratio as of September 30, 2017 and December 31, 2016 are as follows:

(3) Fair value, Continued

Fair value of the financial instruments that are traded in an active market (available-for-sale financial assets, financial liabilities at fair value through profit or loss, etc.) is measured based on the bid price at the end of the reporting date.

The Company uses various valuation methods for determination of fair value of financial instruments that are not traded in an active market. Fair value of available-for-sale securities is determined using the market approach methods and financial assets through profit or loss are measured using the option pricing model. In addition, derivative financial contracts and long-term liabilities are measured using the discounted present value methods. Inputs used to such valuation methods include swap rate, interest rate, and risk premium, and the Company performs valuation using the inputs which are consistent with natures of assets and liabilities measured.

Interest rates used by the Company for the fair value measurement as of September 30, 2017 are as follows:

	Interest rate
Derivative instruments	1.22 ~ 1.89%
Borrowings and debentures	2.28 ~ 2.36%
Long-term payables - other	2.00 ~ 2.44%

Independent Auditors' Review Report

Based on a report originally issued in Korean

To The Board of Directors and Shareholders

SK Telecom Co., Ltd.:

Reviewed financial statements

We have reviewed the accompanying condensed consolidated interim financial statements of SK Telecom Co., Ltd. and its subsidiaries (the Group), which comprise the condensed consolidated statement of financial position as of September 30, 2017, the related condensed consolidated statements of income and comprehensive income for the three and nine-month periods ended September 30, 2017 and 2016, the condensed consolidated statements of changes in equity and cash flows for the nine-month periods ended September 30, 2017 and 2016, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's responsibility

Management is responsible for the preparation and fair presentation of these condensed consolidated interim financial statements in accordance with Korean International Financial Reporting Standards (K-IFRS) No.1034, *Interim Financial Reporting*, and for such internal controls as management determines necessary to enable the preparation of condensed consolidated interim financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to issue a report on these condensed consolidated interim financial statements based on our reviews.

We conducted our reviews in accordance with the Review Standards for Quarterly and Semiannual Financial Statements established by the Securities and Futures Commission of the Republic of Korea. A review of interim financial statements consists principally of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Korean Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our reviews, nothing has come to our attention that causes us to believe that the accompanying condensed consolidated interim financial statements referred to above are not prepared fairly, in all material respects, in accordance with K-IFRS No.1034, *Interim Financial Reporting*.

Other matters

The consolidated statement of financial position of the Group as of December 31, 2016, and the related consolidated statements of income, comprehensive income, changes in equity and cash flows for the year then ended, which are not accompanying this report, were audited by us in accordance with Korean Standards on Auditing and our report thereon, dated February 22, 2017, expressed an unqualified opinion. The accompanying condensed consolidated statement of financial position of the Group as of December 31, 2016, presented for comparative purposes, is consistent, in all material respects, with the audited consolidated financial statements from which it has been derived.

The procedures and practices utilized in the Republic of Korea to review such condensed consolidated interim financial statements may differ from those generally accepted and applied in other countries.

Notes to the Condensed Consolidated Interim Financial Statements

For the nine-month periods ended September 30, 2017 and 2016

2. Basis of Preparation

(1) Statement of compliance

The condensed consolidated interim financial statements have been prepared in accordance with Korean International Financial Reporting Standards (K-IFRS), as prescribed in the Act on External Audits of Stock Companies.

These condensed consolidated interim financial statements were prepared in accordance with K-IFRS No. 1034, *Interim Financial Reporting*, as part of the period covered by the Group's K-IFRS annual financial statements. Selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in financial position and performance of the Group since December 31, 2016. These condensed consolidated interim financial statements do not include all of the disclosures required for full annual financial statements.

(2) Use of estimates and judgments

1) Critical judgments, assumptions and estimation uncertainties

The preparation of the condensed consolidated interim financial statements in conformity with K-IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

In preparing these condensed consolidated interim financial statements, the significant judgments made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements as of and for the year ended December 31, 2016.

2) Fair value measurement

A number of the Group's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities. The Group has established policies and processes with respect to the measurement of fair values. This includes a valuation team that has overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values, and reports directly to the finance executives.

The valuation team regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services, is used to measure fair values, then the valuation team assesses the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of K-IFRS, including the level in the fair value hierarchy in which such valuations should be classified.

When measuring the fair value of an asset or a liability, the Group uses market observable data as far as possible. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement. The Group recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Information about assumptions used for fair value measurements is included in Note 27.

3. Significant Accounting Policies

The significant accounting policies applied by the Group in these condensed consolidated interim financial statements are the same as those applied by the Group in its consolidated financial statements as of and for the year ended December 31, 2016. In addition, the following new standards are effective for annual periods beginning after January 1, 2017 and earlier application is permitted; however, the Group has not early adopted the following new standards in preparing these condensed consolidated interim financial statements.

(1) K-IFRS No. 1109, *Financial Instruments*

The Group currently plans to apply K-IFRS No.1109 in the period beginning on January 1, 2018 and to assess the financial impact on its consolidated financial statements resulting from the adoption of K-IFRS No. 1109 by December 31, 2017. The assessment results will be disclosed in its annual consolidated financial statements for the year ending December 31, 2017. As of September 30, 2017, there have been no material changes related to the Group's plan for the adoption of K-IFRS No. 1109 which was disclosed in the Group's consolidated financial statements as of December 31, 2016.

(2) K-IFRS No. 1115, *Revenue from Contracts with Customers*

The Group currently plans to apply K-IFRS No.1115 in the period beginning on January 1, 2018. The Group is in the process of designing, implementing and enhancing its accounting system and related controls based on the understanding of the revenue stream of the Group with the assistance of external information technology and accounting specialists. The Group is assessing the impact of the adoption of K-IFRS No. 1115 on its consolidated financial statements plans to complete the assessment by December 31, 2017. The assessment results will be disclosed in its annual financial statements for the year ending December 31, 2017. As of September 30, 2017, there have been no material changes related to the Group's plan for the adoption of K-IFRS No. 1115 which was disclosed in the Group's consolidated financial statements as of December 31, 2016.

4. Operating Segments

The Group's operating segments have been identified to be each business unit, by which the Group provides independent services and merchandise. The Group's reportable segments are cellular services, which include cellular voice service, wireless data service and wireless internet services; fixed-line telecommunication services, which include telephone services, internet services, and leased line services; e-commerce services, which include online commerce services; and all other businesses, which include the Group's internet portal services and other immaterial operations, each of which does not meet the quantitative threshold to be considered as a reportable segment and are presented collectively as others. From the annual period ended December 31, 2016, the Group separately reported information about the e-commerce services operating segment as a reportable segment due to the significance of its reported segment results. Segment information for the nine-month period ended September 30, 2016 has been recasted to separately present e-commerce services segment information which was previously included in other segment.

27. Financial Risk Management

(1) Financial risk management

The Group is exposed to credit risk, liquidity risk and market risk. Market risk is the risk related to the changes in market prices, such as foreign exchange rates, interest rates and equity prices. The Group implements a risk management system to monitor and manage these specific risks.

The Group's financial assets consist of cash and cash equivalents, financial instruments, available-for-sale financial assets, and accounts receivable - trade and other. Financial liabilities consist of accounts payable - trade and other, borrowings, and debentures.

1) Market risk

(i) Currency risk

The Group incurs exchange position due to revenue and expenses from its foreign operations. Major foreign currencies where the currency risk occur are USD, JPY and EUR. The Group determines the currency risk management policy after considering the nature of business and the presence of methods that mitigate the currency risk for each Group entities. Currency risk occurs on forecasted transactions and recognized assets and liabilities which are denominated in a currency other than the functional currency of each Group entity. The Group manages currency risk arising from business transactions by using currency forwards, etc.

(1) Financial risk management, Continued

1) Market risk, Continued

(iii) Interest rate risk

The interest rate risk of the Group arises from borrowings and debentures. Since the Group's interest bearing assets are mostly fixed-interest bearing assets, the Group's revenue and operating cash flows are not influenced by the changes in market interest rates.

The Group performs various analysis of interest rate risk to reduce interest rate risk and to optimize its financing. To minimize risks arising from changes in interest rates, the Group takes various measures such as refinancing, renewal, alternative financing and hedging.

As of September 30, 2017, the floating-rate borrowings and debentures of the Group are 183,100 million and 344,010 million, respectively, and the Group has entered into interest rate swap agreements for some of floating-rate borrowings and debentures to hedge interest rate risk.

If the interest rate increases (decreases) 1% with all other variables held constant, income before income taxes for the nine-month period ended September 30, 2017, would change by 714 million due to the interest expense on floating-rate borrowings that are exposed to interest rate risk.

2) Credit risk

The maximum credit exposure as of September 30, 2017 and December 31, 2016 are as follows:

(In millions of won)

	September 30, 2017	December 31, 2016
Cash and cash equivalents	1,447,018	1,505,082
Financial instruments	625,499	469,705

Derivative financial assets	114,950	214,770
	6,008,654	6,158,872

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet his/her contractual obligations.

To manage credit risk, the Group evaluates the credit worthiness of each customer or counterparty considering the party's financial information, its own trading records and other factors. Based on such information, the Group establishes credit limits for each customer or counterparty.

(1) Financial risk management, Continued

2) Credit risk, Continued

The Group establishes an allowance for doubtful accounts that represents its estimate of incurred losses in respect of trade and other receivables. The main components of this allowance are a specific loss component that relates to individually significant exposures, and a collective loss component established for groups of similar assets in respect of losses that have been incurred but not yet identified. The collective loss allowance is determined based on historical data of payment statistics for similar financial assets. Also, the Group's credit risk can arise from transactions with financial institutions related to its cash and cash equivalents, financial instruments and derivatives. To minimize such risk, the Group has a policy to deal only with financial institutions with high credit ratings. The amount of maximum exposure to credit risk of the Group is the carrying amount of financial assets as of September 30, 2017.

3) Liquidity risk

The Group's approach to managing liquidity is to ensure that it will always maintain sufficient cash and cash equivalents balances and have enough liquidity through various committed credit lines. The Group maintains enough liquidity within credit lines through active operating activities.

Contractual maturities of financial liabilities as of September 30, 2017 are as follows:

(In millions of won)

	Carrying amount	Contractual cash flows	Less than 1 year	1 - 5 years	More than 5 years
Accounts payable - trade	257,105	257,105	257,105

(3) Fair value, Continued

The Group uses various valuation methods for determination of fair value of financial instruments that are not traded in an active market. Fair value of available-for-sale securities is determined using the market approach methods and financial assets through profit or loss are measured using the option pricing model. In addition, derivative financial contracts and long-term liabilities are measured using the discounted present value methods. Inputs used to such valuation methods include swap rate, interest rate, and risk premium, and the Group performs valuation using the inputs which are consistent with natures of assets and liabilities measured.

Interest rates used by the Group for the fair value measurement as of September 30, 2017 are as follows:

	Interest rate
Derivative instruments	1.22 ~ 1.89%
Borrowings and debentures	2.20 ~ 2.36%
Long-term payables - other	2.00 ~ 2.44%

- 3) There have been no transfers between Level 2 to Level 1 for the nine-month period ended September 30, 2017 and changes of financial assets classified as Level 3 for the nine-month period ended September 30, 2017 are as follows:
