NOTE 1 - ORGANIZATION AND LINE OF BUSINESS

NEWGOLD, Inc. has been in the business of acquiring, exploring, developing, and producing gold properties. Newgold had rights to mine properties in Nevada and Montana. Its primary focus was on the Relief Canyon mine located near Lovelock, Nevada, where it has performed development and exploratory drilling and was in the process of obtaining permits to allow operation of the Relief Canyon Mine. In December 1997, Newgold placed the Relief Canyon Mine on care and maintenance status. From mid-2001 until the beginning of 2003 Newgold was essentially inactive, only continuing with some of the care and maintenance at Relief Canyon, as provided for by a non-affiliate company owned by the Chairman and CEO of Newgold.

Newgold has embarked on a business strategy whereby it will invest in and/or manage gold mining and other mineral producing properties. Currently, Newgold's principal assets include various mineral leases associated with the Relief Canyon mine located near Lovelock, Nevada along with various items of mining equipment located at that site. Newgold's business will be to acquire, explore and, if warranted, develop various mining properties located in the state of Nevada. Newgold plans to carryout comprehensive exploration and development programs on its properties. While Newgold may fund and conduct these activities itself, Newgold's current plan is to outsource most of these activities through the use of various joint venture, royalty or partnership arrangements pursuant to which other companies would agree to finance and carryout the exploration and development programs on Newgold's mining properties. Consequently, Newgold's current plan will not require the hiring of significant amounts of mining employees but will require a smaller group of employees to monitor and/or supervise the mining and exploration activities of other entities in exchange for royalties or other revenue sharing arrangements.

NOTE 2 - GOING CONCERN

These financial statements have been prepared on a going concern basis. However, during the year ended January 31, 2005, Newgold incurred a net loss of \$1,278,140 and had negative cash flows from operations of \$353,201. In addition, Newgold had an accumulated shareholders' deficit of \$4,114,280 at January 31, 2005. Information for the nine months ended October 31, 2005 include a net loss of \$1,594,634; negative cash flows from operations of \$1,042,159 and an accumulated shareholders' deficit of \$3,269,289. Newgold's ability to continue as a going concern is dependent upon its ability to generate profitable operations in the future and/or to obtain the necessary financing to meet its obligations and repay its liabilities arising from normal business operations when they come due. The outcome of these matters cannot be predicted with any certainty at this time. Since inception, Newgold has satisfied its capital needs by issuing equity securities.

Management plans to continue to provide for its capital needs during the year ended January 31, 2006 by issuing equity securities or incurring additional debt financing, with the proceeds to be

used to re-establish mining operations at Relief Canyon as well as improve its working capital position. These financial statements do not include any adjustments to the amounts and classification of assets and liabilities that may be necessary should Newgold be unable to continue as a going concern.

Edgar Filing: NEWGOLD INC - Form 10QSB

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

These financial statements have been prepared in accordance with the rules and regulations of the Securities and Exchange Commission ("SEC"). Certain information and footnotes normally included in financial statements prepared in accordance with generally accepted accounting principles in the United States of America have been condensed or omitted pursuant to these rules and regulations. These consolidated financial statements should be read in conjunction with the consolidated financial statements and the notes thereto included in Newgold's Form 10-KSB, as filed with the SEC for the year ended January 31, 2005.

Cash and Cash Equivalents

For the purpose of the statements of cash flows, Newgold considers all highly liquid investments purchased with original maturities of three months or less to be cash equivalents.

Marketable Securities Available for Sale

Investments in equity securities are classified as available-for-sale. Securities classified as available for sale are marked to market at each period end. Changes in value on such securities are recorded as a component of Other comprehensive income (loss). If declines in value are deemed other than temporary, losses are reflected in Net income (loss).

Deferred Reclamation Costs

In August 2001, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 143, "Accounting for Asset Retirement Obligations," which established a uniform methodology for accounting for estimated reclamation and abandonment costs. The statement was adopted February 1, 2003. The reclamation costs will be allocated to expense over the life of the related assets and will be adjusted for changes resulting from the passage of time and revisions to either the timing or amount of the original present value estimate.

Prior to adoption of SFAS No. 143, estimated future reclamation costs were based principally on legal and regulatory requirements. Such costs related to active mines were accrued and charged over the expected operating lives of the mines using the UOP method based on proven and probable reserves. Future remediation costs for inactive mines were accrued based on management's best estimate at the end of each period of the undiscounted costs expected to be incurred at a site. Such cost estimates included, where applicable, ongoing care, maintenance and monitoring costs. Changes in estimates at inactive mines were reflected in earnings in the period an estimate was revised.

Risks Associated with Gold Mining

The business of gold mining is subject to certain types of risks, including environmental hazards, industrial accidents, and theft. Prior to suspending operations, Newgold carried insurance against certain property damage loss (including business interruption) and comprehensive general liability insurance. While Newgold maintained insurance consistent with industry practice, it is not possible to insure against all risks associated with the mining business, or prudent to assume

Edgar Filing: NEWGOLD INC - Form 10QSB

that insurance will continue to be available at a reasonable cost. Newgold has not obtained environmental liability insurance because such coverage is not considered by management to be cost effective. Newgold currently carries no insurance on any of its properties due to the current status of the mine and Newgold's current financial condition.

Comprehensive Income

Newgold utilizes SFAS No. 130, "Reporting Comprehensive Income." This statement establishes standards for reporting comprehensive income and its components in a financial statement. Comprehensive income as defined includes all changes in equity (net assets) during a period from non-owner sources. Examples of items to be included in comprehensive income, which are excluded from net income, include foreign currency translation adjustments, minimum pension liability adjustments, and unrealized gains and losses on available-for-sale marketable securities. Comprehensive income is presented in Newgold's financial statements since Newgold did have unrealized gain (loss) during the nine month and three month period ended October 31, 2004 from changes in equity from available-for-sale marketable securities.

Stock-Based Compensation

SFAS No. 123, "Accounting for Stock-Based Compensation," as amended by SFAS No. 148, "Accounting for Stock-Based Compensation - Transition and Disclosure," defines a fair value based method of accounting for stock-based compensation. However, SFAS No. 123 allows an entity to continue to measure compensation cost related to stock and stock options issued to employees using the intrinsic method of accounting prescribed by Accounting Principles Board ("APB") Opinion No. 25, "Accounting for Stock Issued to Employees." Entities electing to remain with the accounting method of APB No. 25 must make pro forma disclosures of net income and earnings per share as if the fair value method of accounting defined in SFAS No. 123 had been applied. Newgold has elected to account for its stock-based compensation to employees using the intrinsic value method under APB No. 25. There were no stock options granted or outstanding for the three months ended October 31, 2005 and 2004.

Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Loss Per Share

Newgold utilizes SFAS No. 128, "Earnings per Share." Basic loss per share is computed by dividing loss available to common shareholders by the weighted-average number of common shares outstanding. Diluted loss per share is computed similar to basic loss per share except that the denominator is increased to include the number of additional common shares that would have been outstanding if the potential common shares had been issued and if the additional common shares were dilutive. Common equivalent shares are excluded from the computation if their effect is anti-dilutive.

The following common stock equivalents were excluded from the calculation of diluted loss per share since their effect would have been anti-dilutive:

Recent Accounting Pronouncements

In March 2005, the FASB issued FASB Interpretation ("FIN") No. 47, "Accounting for Conditional Asset Retirement Obligations". FIN No. 47 clarifies that the term conditional asset retirement obligation as used in FASB Statement No. 143, "Accounting for Asset Retirement Obligations," refers to a legal obligation to perform an asset retirement activity in which the timing and (or) method of settlement are conditional on a future event that may or may not be within the control of the entity. The obligation to perform the asset retirement activity is unconditional even though uncertainty exists about the timing and (or) method of settlement. Uncertainty about the timing and/or method of settlement of a conditional asset retirement obligation should be factored into the measurement of the liability when sufficient information exists. This interpretation also clarifies when an entity would have sufficient information to reasonably estimate the fair value of an asset retirement obligation. FIN No. 47 is effective no later than the end of fiscal years ending after December 15, 2005 (December 31, 2005 for calendar-year companies). Retrospective application of interim financial information is permitted but is not required. Management does not expect adoption of FIN No. 47 to have a material impact on Newgold's financial statements.

In May 2005, the FASB issued Statement of Accounting Standards (SFAS) No. 154, "Accounting Changes and Error Corrections" an amendment to Accounting Principles Bulletin (APB) Opinion No. 20, "Accounting Changes", and SFAS No. 3, "Reporting Accounting Changes in Interim Financial Statements" though SFAS No. 154 carries forward the guidance in APB No. 20 and SFAS No. 3 with respect to accounting for changes in estimates, changes in reporting entity, and the correction of errors. SFAS No. 154 establishes new standards on accounting for changes in accounting principles, whereby all such changes must be accounted for by retrospective application to the financial statements of prior periods unless it is impracticable to do so. SFAS No. 154 is effective for accounting changes and error corrections made in fiscal years beginning after December 15, 2005, with early adoption permitted for changes and corrections made in years beginning after May 2005.

NOTE 4 - MARKETABLE SECURITIES AVAILABLE FOR SALE

At October 31, 2005 and 2004 Newgold held no marketable securities available for sale. In October 2004, the Company sold all of its investment in marketable securities through open market transactions with net proceeds aggregating approximately \$34,100. The Company recorded a loss on sale of securities on the Statements of Operations of \$281,063 and \$281,063 for the three and nine months ended October 31, 2004, respectively.

NOTE 5 - PROPERTY AND EQUIPMENT

Newgold had previously determined that the value of its fixed assets at the Relief Canyon Mine were permanently impaired and wrote off assets with a basis of \$800,000. If Newgold can reestablish mining operations at Relief Canyon it is possible that some of these assets could be utilized in such operations.

11

Edgar Filing: NEWGOLD INC - Form 10QSB

A summary of property, equipment and capitalized costs was as follows:

	Buildings	Machinery & Equipment	Development Costs	Capitalized Interest	Total
Relief Canyon Mine	\$ 215,510	\$ 277,307	\$ 261,742	\$ 45,441	\$ 800,000

All office furniture and equipment has been fully depreciated as of October 31, 2005.

NOTE 6 - NOTES PAYABLE TO RELATED PARTIES AND INDIVIDUALS

Unsecured notes payable to individuals and related parties consist of the following at October 31, 2005:

Loans from officers:

Convertible note payable \$ 209,251

The note bears interest at 8% per year.

In October 2004, Newgold consolidated the amounts owed to the Chief Executive Officer and the Chief Financial Officer referred to in Note 9 (excluding accrued interest payable) into new convertible notes payable due September 30, 2005. The notes and any interest accrued on the new notes are convertible into common shares of Newgold at a conversion price of \$0.15 per share. On July 31, 2005 the Chief Executive Officer converted his note payable and accrued interest payable on all of his notes payable into 12,326,231 common shares of Newgold. In connection with the loans, warrants to purchase 5,798,140 and 1,395,007 shares of common stock have been issued to the Chief Executive Officer and the Chief Financial Officer, respectively.

Term notes payable \$ 24,844

The notes bear interest at 8% per year.

The notes are due January 31 and October 31, 2006. Newgold is not in default with respect to these loans. In connection with the loans, warrants to purchase 141,540 shares of common stock have been issued. The warrants have been valued using the Black-Scholes option pricing model (see Note 8). The warrants were issued at \$0.15 per share and expire in five years from the date of issuance.

Loan from individual \$ 176,500

The note bears interest at 8% per year.

The note is currently due. Newgold is in default with respect to this loan.

Other non-interest bearing advances 47,039

Total notes payable to individuals and related parties \$ 457,634

Newgold recorded interest expense of \$203,254 and \$930,315 for the three months and nine months ended October 31, 2005 compared to interest expense of \$157,011 and \$256,417 for the three months and nine months ended October 31, 2004.

NOTE 7 - COMMITMENTS AND CONTINGENCIES

Except for the advance royalty and rent payments noted below, Newgold is

Edgar Filing: NEWGOLD INC - Form 10QSB

not obligated under any capital leases or non-cancelable operating lease with initial or remaining lease terms in excess of one year as of October 31, 2005. However, minimum annual royalty payments are required to

12

retain the lease rights to Newgold's properties.

Relief Canyon Mine

Newgold purchased the Relief Canyon Mine from J.D. Welsh Associates ("Welsh") in January 1995. The mine consisted of 39 claims and a lease for access to an additional 800 acres contiguous to the claims. During 1997, Newgold staked an additional 402 claims. Subsequent to January 31, 1998, Newgold reduced the total claims to 50 (approximately 1,000 acres). The annual payment to maintain these claims is \$5,000. As part of the original purchase of Relief Canyon Mine, Welsh assigned the lease from Santa Fe Gold Corporation (Santa Fe) to Newgold. The lease granted Santa Fe the sole right of approval of transfer to any subsequent owner of the Relief Canyon Mine. Santa Fe had accepted lease and minimum royalty payments from Newgold, but has declined to approve the transfer. Due to Welsh's inability to transfer the Santa Fe lease, the original purchase price of \$500,000 for Relief Canyon Mine was reduced by \$50,000 in 1996 to \$450,000.

Subsequent to January 31, 1998, the lease was terminated by Santa Fe. Management believes loss of the Santa Fe lease will have no material adverse affect on the remaining operations of the mine operation or the financial position of Newgold.

During 1996, Repadre Capital Corporation ("Repadre") purchased for \$500,000 a net smelter return royalty (Repadre Royalty). Repadre was to receive a 1.5% royalty from production at each of the Relief Canyon Mine and Mission Mines. In July 1997, an additional \$300,000 was paid by Repadre for an additional 1% royalty from the Relief Canyon Mine. In October, 1997, when the Mission Mine lease was terminated, Repadre exercised its option to transfer the Repadre Royalty solely to the Relief Canyon Mine resulting in a total 4% royalty. The total amount received of \$800,000 has been recorded as deferred revenue in the accompanying financial statements.

Litigation

On February 4, 2000, a complaint was filed against Newgold by Sun G. Wong in the Superior Court of Sacramento County, California (Case No. 00AS00690). In the complaint, Mr. Wong claims that he was held liable as a guarantor of Newgold in a claim brought by Don Christianson in a breach of contract action against Newgold. Despite the fact that Newgold settled the action with Mr. Christianson through the issuance of 350,000 shares of Newgold common stock, Mr. Wong, nevertheless, paid \$60,000 to a third party claiming to hold Mr. Christianson's judgment pursuant to Mr. Wong's guaranty agreement. Similarly, Mr. Wong alleges that he was held liable as a guarantor for a debt of \$200,000 owed by Newgold to Roger Primm with regard to money borrowed by Newgold. Mr. Primm filed suit against Newgold which was settled through the issuance of 300,000 shares of Newgold common stock. Nevertheless, Mr. Wong alleges that he remains liable to a third party claiming to hold Mr. Primm's judgment for up to \$200,000 pursuant to his guaranty of such debt of Mr. Primm.

On December 29, 2000, the superior court entered a default judgment against Newgold in the amount of \$400,553 with regard to the Christianson judgment and an additional \$212,500 in regard to the Primm judgment against Mr. Wong. Newgold believes that Mr. Wong was not obligated to pay any sums pursuant to his guarantees with regard to the Christianson and Primm

Edgar Filing: NEWGOLD INC - Form 10QSB

judgments against Newgold and, as a result, Mr. Wong should not have any recourse against Newgold for reimbursement. Should Mr. Wong seek to assert these judgments against Newgold, Newgold cannot predict the outcome of any such action or the amount of expenses that would be ultimately incurred in defending any such claims. Newgold is currently negotiating a settlement with Mr. Wong; however there is no assurance that an acceptable settlement will be consummated.

13

Newgold is involved in various other claims and legal actions arising in the ordinary course of business. In the opinion of management, the ultimate dispositions of these matters will not have a material adverse effect on Newgold's financial position, results of operations or liquidity.

NOTE 8 - SHAREHOLDERS' DEFICIT

Common Stock

In March 2005 a Special Meeting of Shareholders of Newgold was held for the purpose of amending the Articles of Incorporation to affect an increase in the authorized shares of common stock issuable to 250,000,000 shares. At the meeting the proposal was approved by the shareholders, with a total of 31,392,611 shares voting in favor of the amendment, 411,711 voting against the amendment and 10,207 shares abstained from voting.

In February 2005 Newgold issued 500,000 shares of common stock at a price of \$0.15 per share to an investor for total proceeds of \$75,000. Additionally, 500,000 warrants to purchase common stock at a price of \$0.30 per share were issued to the investor. The warrants expire three years from the date of issuance.

In April 2005 Newgold issued 2,000,000 shares of common stock at a price of \$0.25 per share to investors for total proceeds of \$500,000. Additionally, 1,000,000 warrants to purchase common stock at a price of \$0.50 per share were issued to the investors. The warrants expire three years from the date of issuance.

In July 2005 Newgold issued 12,326,231 shares of common stock at a price of \$0.15 per share to the Chief Executive Officer according to the terms of existing notes payable to the officer. The issuance resulted in the repayment of principal and interest totaling \$1,848,935.

Warrants

Newgold has issued common stock warrants to officers of Newgold as part of certain financing transactions (see Note 6). Newgold has also issued warrants as part of the issuance of common stock (see this Note 8).

The fair market value of warrants issued during the nine months ended October 31, 2005 in conjunction with the issuance of common stock was determined to be \$310,256 and was calculated under the Black-Scholes option pricing model with the following assumptions used:

Expected life	3 years
Risk free interest rate	3.77% - 4.01%
Volatility	199.8% - 266.1%
Expected dividend yield	None

The fair value of \$294,566 warrants has been recorded as part of the issuance of the common stock resulting in no impact on Newgold's results of operations. The fair value of \$15,690 warrants has been recorded as a debit

Edgar Filing: NEWGOLD INC - Form 10QSB

to operating expense for services rendered and a credit to additional paid in capital.

The following table presents warrant activity from January 31, 2005 through October 31, 2005:

14

	Number of Shares	Weighted- Average Exercise Price
	-----	-----
Outstanding, January 31, 2005	11,724,583	\$ 0.16
Granted	1,650,000	\$ 0.43
	-----	-----
Outstanding, October 31, 2005	13,374,583	\$ 0.19
	=====	=====
Exercisable, October 31, 2005	13,374,583	\$ 0.19
	=====	=====

NOTE 9 - RELATED PARTY TRANSACTIONS

Loans from officers

During the quarter ended October 31, 2005 the Chief Executive Officer and Chairman of Newgold loaned the Company \$5,000. As of October 31, 2005 the net principal balance owing to him was \$24,844 and accrued interest payable was \$32,413. See Note 6.

During prior periods, the Chief Financial Officer and Secretary of Newgold loaned Newgold an aggregate of \$209,251. As of October 31, 2005 the net principal balance owing to him was \$209,251 and accrued interest payable was \$18,414. See Note 6.

Accrued Payroll and Expenses Owed to Officers

As of October 31, 2005 Newgold owed the Chief Executive Officer and Chairman of Newgold \$30,000 for back wages.

As of October 31, 2005 Newgold owed the Chief Financial Officer and Secretary of Newgold \$120,167 for back wages and \$7,000 for accrued expenses.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATIONS

CAUTION ABOUT FORWARD-LOOKING STATEMENTS

This Form 10-QSB includes "forward-looking" statements about future financial results, future business changes and other events that haven't yet occurred. For example, statements like Newgold "expects," "anticipates" or "believes" are forward-looking statements. Investors should be aware that actual results may differ materially from Newgold's expressed expectations because of risks and uncertainties about the future. Newgold does not undertake to update the information in this Form 10-QSB if any forward-looking statement later turns out to be inaccurate. Details about risks affecting various aspects of Newgold's business are discussed throughout this Form 10-QSB and should be considered carefully.

PLAN OF OPERATION FOR THE NEXT TWELVE MONTHS

Certain key factors that have affected our financial and operating results in the past will affect our future financial and operating results. These include, but are not limited to the following:

- o Gold prices, and to a lesser extent, silver prices;
- o Current gold deposits under our control at the Relief Canyon Mine are estimated by us (based on past exploration by Newgold and work done by others).

Our properties now include 78 unpatented mining claims contained in about 1000 acres.

Our operating plan is to place our mining claims into profitable production during fiscal 2007, and use the net proceeds from these operations to fund ongoing exploration and development of our property holdings. Through the use of joint ventures, royalties, arrangements and partnerships, we intend to progressively enlarge the scope and scale of the mining and processing operations, thereby increasing both our annual revenues and ultimately our net profits. Our objective is to achieve annual growth rates in revenue and net profits for the foreseeable future;

- o We expect to make capital expenditures in calendar years 2006 and 2007 of between \$2.5 million and \$4 million, including costs related to the resumption of mine operations and production at the Relief Canyon mine.
- o Due to the strengthening of the gold market, and consistent with our exploration growth strategy, we expect exploration, research and development expenditures in 2006 and 2007 will total between \$500,000 and \$1 million.
- o Additional funding or the utilization of other venture partners will be required for mining operations, exploration, research, development and operating expenses. In the past we have been dependent on the funding from the private placement of our securities as well as loans from

Edgar Filing: NEWGOLD INC - Form 10QSB

related parties as the sole sources of capital to fund operations.

16

RESULTS OF OPERATION

Newgold resumed business operations after having been inactive from July 2001 until February 2003. Consequently, because we are in the process of reinstating our business and mining operations, the results of operations for the last two fiscal years will likely not be indicative of Newgold's current and future operations. The current management discussion and analysis should be read from the context of Newgold's recent resumption of its mining business.

Operating Results for the Fiscal Quarters Ended October 31, 2005 and 2004

Although Newgold commenced efforts to re-establish its mining business early in fiscal year 2004, no mining operations have commenced and no revenues have been recognized during the quarters ended October 31, 2005 and 2004, respectively. Newgold hopes to be able to commence generating revenues from mining operations during the 2007 fiscal year. Newgold has granted a 4% net smelting return royalty to a third party related to the Relief Canyon mining property which has been recorded as an \$800,000 deferred option income.

During the quarter ended October 31, 2005 Newgold spent \$19,821 on reclamation and maintenance expenses related to the Relief Canyon mining property. Reclamation and maintenance expenses expended during the same quarter ended October 31, 2004 were \$5,000. These expenses relate primarily to maintenance and retention costs required to maintain Newgold's mining claims. Newgold incurred operating expenses of \$120,227 during the quarter ended October 31, 2005. Of this amount, \$93,500 reflects officer compensation and related payroll taxes during the quarter and \$15,000 reflect fees for outside professional services. A large portion of the outside professional services reflects legal and accounting work pertaining to Newgold's annual and quarterly reporting on Form 10-KSB and Form 10-QSB occurring in fiscal year 2006. During the quarter ended October 31, 2004 Newgold incurred operating expenses of \$78,561 of which \$55,000 represents officer compensation and related payroll taxes, \$8,440 reflecting payroll tax penalties and \$13,500 reflect fees for outside professional services. It is anticipated that both mining costs and operating expenses will increase significantly as Newgold resumes its mining operations and exploration program.

Newgold incurred interest expense of \$203,254 during the quarter ended October 31, 2005 which compares to interest expenses of \$157,011 incurred during the same quarter ended October 31, 2004. The increase in additional interest expense was primarily due to the increase in accretion of warrants issued in October 2004 as a debt discount.

In October 2004, Newgold liquidated its investment in marketable securities through open market transactions. Net proceeds totaled approximately \$34,100. This resulted in a loss on sale of \$281,063. There were no sales of marketable securities for the comparable period in fiscal 2006.

Newgold's total net loss for the quarter ended October 31, 2005 decreased to \$343,302 compared

to a net loss of \$521,635 incurred for the same quarter ended October 31, 2004. The larger net loss in the third quarter of fiscal 2005 reflects the loss on sale of marketable securities referred to above.

Operating Results for the Nine Months Ended October 31, 2005 and 2004

During the nine months ended October 31, 2005 Newgold spent \$159,521 on reclamation and maintenance expenses related to the Relief Canyon mining property. Reclamation and maintenance expenses expended during the nine months ended October 31, 2004 were \$15,000. These expenses relate primarily to maintenance and retention costs required to maintain Newgold's mining claims. Newgold incurred operating expenses of \$504,798 during the nine months ended October 31, 2005. Of this amount, \$280,501 reflects officer compensation and related payroll taxes during the period and \$120,938 reflect fees for outside professional services. A large portion of the outside professional services reflects legal and accounting work pertaining to Newgold's annual and quarterly reporting on Form 10-KSB and Form 10-QSB for fiscal years 2005 and 2006. During the nine months ended October 31, 2004 Newgold incurred operating expenses of \$231,343 of which \$165,000 represents officer compensation and \$24,945 reflected payroll tax penalties. It is anticipated that both mining costs and operating expenses will increase significantly as Newgold resumes its mining operations and exploration program.

Newgold incurred interest expense of \$930,315 during the nine months ended October 31, 2005 which compares to interest expenses of \$256,417 incurred during the nine months ended October 31, 2004. The increase in additional interest expense was primarily due to \$777,645 representing the increase in accretion of warrants issued in October 2004 as a debt discount.

Newgold's total net loss for the nine months ended October 31, 2005 increased to \$1,594,634 compared to a net loss of \$783,823 incurred for the nine months ended October 31, 2004. The larger net loss in the current fiscal year reflects the substantial increase in operating expenses (\$504,798) and interest expense (\$930,315) as well as the continuing lack of revenues recognized during the first nine months of fiscal year 2006.

LIQUIDITY AND CAPITAL RESOURCES

Newgold has incurred significant operating losses during the last two fiscal years and during the nine months ended October 31, 2005 which has resulted in an accumulated deficit of \$17,979,937 as of October 31, 2005. At October 31, 2005, Newgold had cash and other current assets of \$3,421 compared to \$33,983 at October 31, 2004 and a net working capital deficit of \$2,983,235. During the quarter ended October 31, 2005, Newgold's President loaned the Company \$5,000 in order to fund operating expenses. Since the resumption of its business in February 2003, Newgold has been dependent on borrowed or invested funds in order to finance its ongoing operations. As of October 31, 2005, Newgold had outstanding notes payable in the gross principal amount of \$457,634 which reflects a decrease of \$1,399,128 compared to notes payable in the gross principal amount of \$1,856,762, (net balance of \$663,642 after \$1,193,120 of note payable discount) as of October 31, 2004.

As of October 31, 2005, we were in default on a promissory note due to an unrelated party in the principal amount \$176,500.

In the quarter ended April 30, 2005 Newgold raised a total of \$575,000 through the sale of 2,500,000 shares of its restricted stock.

In the quarter ended July 31, 2005 Newgold issued 12,326,231 shares of common stock at a price of \$0.15 per share to its Chief Executive Officer according to the terms of existing notes payable to the officer. The issuance resulted in the repayment of principal of \$1,402,742 and interest of \$446,193 totaling \$1,848,935.

By attempting to resume mining operations, Newgold will require approximately \$2.5 million to \$4 million in additional working capital above the current working capital deficiency to bring the mine into full production. It is Newgold's intention to pursue several possible funding opportunities including the sale of additional securities, entering into joint venture arrangements, or the incurring of additional debt.

Due to Newgold's continuing losses from its business operations, the independent auditor's report dated April 15, 2005, includes a "going concern" explanation relating to the fact that Newgold's continuation is dependent upon obtaining additional working capital either through significantly increasing revenues or through outside financing. As of October 31, 2005, Newgold's principal commitments included its obligation to pay ongoing maintenance fees on its 78 unpatented mining claims.

Management of Newgold believes that it will need to raise additional capital to continue to develop, promote and conduct its mining operations. Due to Newgold's limited cash flow, operating losses and limited assets, it is unlikely that Newgold could obtain financing through commercial or banking sources. Consequently, Newgold is dependent on continuous cash infusions from its major stockholders or other outside sources in order to fund its current operations. To date, Newgold's President has paid a substantial portion of Newgold's expenses since restarting its business in February 2003. Although Newgold believes that these creditors and investors will continue to fund Newgold's expenses based upon their significant debt or equity interest in Newgold, there is no assurance that such investors will continue to pay Newgold's expenses. If adequate funds are not otherwise available, through public or private financing as well as borrowing from other sources, Newgold would not be able to establish or sustain its mining operations.

Off-Balance Sheet Arrangements

During the fiscal quarter ended October 31, 2005, Newgold did not engage in any off-balance sheet arrangements as defined in Item 303(c) of the SEC's Regulation S-B.

FACTORS AFFECTING FUTURE OPERATING RESULTS

Newgold had been relatively inactive until February 2003. Consequently, it is only recently reactivating its business operations and has generated no revenues, other than dividend income, since its inception. As a result, Newgold has only a limited operating history upon which to evaluate its future potential performance. Newgold's prospects must be considered in light of

the risks and difficulties encountered by new companies which have not yet established their business operations.

Newgold will need additional funds to finance its mining and exploration activities as well as fund its current operations. It currently has limited cash reserves and a working capital deficit and is unable to fund its operations from revenues. Consequently, its ability to meet its obligations in the ordinary course of business is dependent upon its ability to raise additional financing through public or private equity financings, establish increasing cash flow from operations, enter into joint ventures or other arrangements with corporate sources, or secure other sources of financing to fund operations.

The audit report of Newgold's independent auditors includes a "going concern" qualification. In the auditor's opinion, Newgold's limited operating history and the accumulated shareholders' deficit as of January 31, 2005, raise substantial doubt about its ability to continue as a going concern. See Note 2 of the Notes to Financial Statements for the nine months ended October 31, 2005.

The price of gold has experienced an increase in value over the past three years, generally reflecting among other things declining interest rates in the United States; worldwide instability due to terrorism; and a global economic slump. Any significant drop in the price of gold may have a materially adverse affect on the results of Newgold's operations unless it is able to offset such a price drop by substantially increased production.

Newgold's disclosures of its mineral resources are only estimates. Newgold has no proven or probable reserves and has no ability to currently measure or prove its reserves other than estimating such reserves relying on information produced in the 1990's and thus may be unable to actually recover the quantity of gold anticipated. Newgold can only estimate a potential mineral resource which is a subjective process which depends in part on the quality of available data and the assumptions used and judgments made in interpreting such data. There is significant uncertainty in any resource estimate such that the actual deposits encountered or reserves validated and the economic viability of mining the deposits may differ materially from Newgold's estimates.

Gold exploration is highly speculative in nature. Success in exploration is dependent upon a number of factors including, but not limited to, quality of management, quality and availability of geological expertise and availability of exploration capital. Due to these and other factors, no assurance can be given that Newgold's exploration programs will result in the discovery of new mineral reserves or resources.

Newgold's mining property rights consist of 78 mill site and unpatented mining claims. The validity of unpatented mining claims is often uncertain and is always subject to contest. Unpatented mining claims are generally considered subject to greater title risk than patented mining claims, or real property interests that are owned in fee simple. If title to a particular property is successfully challenged, Newgold may not be able to retain its royalty interests on

that property, which could reduce its future revenues.

Mining is subject to extensive regulation by state and federal regulatory authorities. State and federal statutes regulate environmental quality, safety, exploration procedures, reclamation, employees' health and safety, use of explosives, air quality standards, pollution of stream and fresh water sources, noxious odors, noise, dust, and other environmental protection controls as well as the rights of adjoining property owners. Newgold believes that, it is currently operating in compliance with all known safety and environmental standards and regulations applicable to its Nevada property. Currently, Newgold is only permitted to carry on designated mining activities until it posts a reclamation bond and the mining property is brought into compliance with the requirements of the Nevada Department of Environmental Protection ("NDEP"). While current negotiations with the NDEP are ongoing, permitting Newgold's mining property for full exploration and mining activities is expected to take 4 to 12 months. However, there can be no assurance that permits will be granted or that future changes in federal or Nevada laws, regulations or interpretations thereof will not have a material adverse affect on Newgold's ability to resume and sustain mining operations.

The business of gold mining is subject to certain types of risks, including environmental hazards, industrial accidents, and theft. Prior to suspending operations, Newgold carried insurance against certain property damage loss (including business interruption) and comprehensive general liability insurance. Since resuming operations in February 2003, Newgold has not carried insurance on any of its properties due to the current status of the mine and Newgold's current financial condition. Even if Newgold eventually obtains insurance consistent with industry practice, it is not possible to insure against all risks associated with the mining business, or prudent to assume that insurance will continue to be available at a reasonable cost. Newgold has not obtained environmental liability insurance because such coverage is not considered by management to be cost effective.

Newgold is substantially dependent upon the continued services of A. Scott Dockter, its President. Newgold has no employment agreement with Mr. Dockter, nor is there either key person life insurance or disability insurance on Mr. Dockter. While Mr. Dockter expects to spend the majority of his time assisting Newgold, there can be no assurance that Mr. Dockter's services will remain available to Newgold. If Mr. Dockter's services are not available to Newgold, Newgold will be materially and adversely affected. However, Mr. Dockter has been a significant shareholder of Newgold since its inception and considers his investment of time and money in Newgold of significant personal value.

CRITICAL ACCOUNTING POLICIES

Newgold's discussion and analysis of its financial conditions and results of operations are based upon its financial statements, which have been prepared in accordance with generally accepted accounting principles in the United States. The preparation of financial statements requires management to make estimates and disclosures on the date of the financial statements. On an

on-going basis, Newgold evaluates its estimates, including, but not limited to, those related to revenue recognition. Newgold uses authoritative pronouncements, historical experience and other assumptions as the basis for making judgments. Actual results could differ from those estimates. Newgold believes that the following critical accounting policies affect its more significant judgments and estimates in the preparation of its financial statements.

Valuation of long-lived assets

Long-lived assets, consisting primarily of property and equipment, patents and trademarks, and goodwill, comprise a significant portion of Newgold's total assets. Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that their carrying values may not be recoverable. Recoverability of assets is measured by a comparison of the carrying value of an asset to the future net cash flows expected to be generated by those assets. The cash flow projections are based on historical experience, management's view of growth rates within the industry, and the anticipated future economic environment.

Factors Newgold considers important that could trigger a review for impairment include the following:

- (a) significant underperformance relative to expected historical or projected future operating results,
- (b) significant changes in the manner of its use of the acquired assets or the strategy of its overall business, and
- (c) significant negative industry or economic trends.

When Newgold determines that the carrying value of long-lived assets and related goodwill and enterprise-level goodwill may not be recoverable based upon the existence of one or more of the above indicators of impairment, it measures any impairment based on a projected discounted cash flow method using a discount rate determined by its management to be commensurate with the risk inherent in its current business model.

Deferred Reclamation Costs

In August 2001, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 143, "Accounting for Asset Retirement Obligations," which established a uniform methodology for accounting for estimated reclamation and abandonment costs. The statement was adopted February 1, 2003. The reclamation costs will be allocated to expense over the life of the related assets and will be adjusted for changes resulting from the passage of time and revisions to either the timing or amount of the original present value estimate.

Prior to adoption of SFAS No. 143, estimated future reclamation costs were based principally on legal and regulatory requirements. Such costs related to active mines were accrued and charged

over the expected operating lives of the mines using the UOP method based on proven and probable reserves. Future remediation costs for inactive mines were accrued based on management's best estimate at the end of each period of the undiscounted costs expected to be incurred at a site. Such cost estimates included, where applicable, ongoing care, maintenance and monitoring costs. Changes in estimates at inactive mines were reflected in earnings in the period an estimate was revised.

Exploration Costs

Exploration costs are expensed as incurred. All costs related to property acquisitions are capitalized.

Mine Development Costs

Mine development costs consist of all costs associated with bringing mines into production, to develop new ore bodies and to develop mine areas substantially in advance of current production. The decision to develop a mine is based on assessment of the commercial viability of the property and the availability of financing. Once the decision to proceed to development is made, development and other expenditures relating to the project will be deferred and carried at cost with the intention that these will be depleted by charges against earnings from future mining operations. No depreciation will be charged against the property until commercial production commences. After a mine has been brought into commercial production, any additional work on that property will be expensed as incurred, except for large development programs, which will be deferred and depleted.

Reclamation Costs

Reclamation costs and related accrued liabilities, which are based on Newgold's interpretation of current environmental and regulatory requirements, are accrued and expensed, upon determination.

Based on current environmental regulations and known reclamation requirements, management has included its best estimates of these obligations in its reclamation accruals. However, it is reasonably possible that Newgold's best estimates of its ultimate reclamation liabilities could change as a result of changes in regulations or cost estimates.

Recent Accounting Pronouncements

In March 2005, the FASB issued FASB Interpretation ("FIN") No. 47, "Accounting for Conditional Asset Retirement Obligations". FIN No. 47 clarifies that the term conditional asset retirement obligation as used in FASB Statement No. 143, "Accounting for Asset Retirement Obligations," refers to a legal obligation to perform an asset retirement activity in which the timing and (or) method of settlement are conditional on a future event that may or may not be within the control of the entity. The obligation to perform the asset retirement activity is unconditional even though uncertainty exists about the timing and (or) method of settlement. Uncertainty about the timing and/or method of settlement of a conditional asset retirement

Edgar Filing: NEWGOLD INC - Form 10QSB

obligation should be factored into the measurement of the liability when sufficient information exists. This interpretation also clarifies when an entity would have sufficient information to reasonably estimate the fair value of an asset retirement obligation. FIN No. 47 is effective no later than the end of fiscal years ending after December 15, 2005 (December 31, 2005 for calendar-year companies). Retrospective application of interim financial information is permitted but is not required. Management does not expect adoption of FIN No. 47 to have a material impact on Newgold's financial statements.

In May 2005, the FASB issued Statement of Accounting Standards (SFAS) No. 154, "Accounting Changes and Error Corrections" an amendment to Accounting Principles Bulletin (APB) Opinion No. 20, "Accounting Changes", and SFAS No. 3, "Reporting Accounting Changes in Interim Financial Statements" though SFAS No. 154 carries forward the guidance in APB No. 20 and SFAS No. 3 with respect to accounting for changes in estimates, changes in reporting entity, and the correction of errors. SFAS No. 154 establishes new standards on accounting for changes in accounting principles, whereby all such changes must be accounted for by retrospective application to the financial statements of prior periods unless it is impracticable to do so. SFAS No. 154 is effective for accounting changes and error corrections made in fiscal years beginning after December 15, 2005, with early adoption permitted for changes and corrections made in years beginning after May 2005.

ITEM 3. CONTROLS AND PROCEDURES

Newgold carried out an evaluation, under the supervision and with the participation of Newgold's management, including Newgold's President and Chief Executive Officer along with Newgold's Chief Financial Officer, of the effectiveness of the design and operation of Newgold's disclosure controls and procedures pursuant to Exchange Act Rule 13a-14 as of the end of the period covered by this report. Based upon that evaluation, Newgold's President and Chief Executive Officer along with Newgold's Chief Financial Officer concluded that Newgold's disclosure controls and procedures are effective to ensure the information required to be disclosed by Newgold in reports filed or submitted under the Exchange Act were timely recorded, processed and reported within the time periods specified in the Securities and Exchange Commission rules and forms.

There have been no significant changes in Newgold's internal controls over financial reporting or in other factors which occurred during the last quarter covered by this report, which could materially affect or are reasonably likely to materially affect Newgold's internal controls over financial reporting.

Edgar Filing: NEWGOLD INC - Form 10QSB

PART II - OTHER INFORMATION

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

SALES OF UNREGISTERED SECURITIES DURING THE QUARTER

During the quarter ended October 31, 2005, Newgold did not issue any securities without registration under the Securities Act of 1933 ("1933 Act").

Prior issuances of Newgold's common stock during fiscal years 2006, 2005 and 2004 have been reported in Newgold's prior filings with the Securities and Exchange Commission.

ITEM 6. EXHIBITS

- 31.1 Certification of CEO pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 31.2 Certification of CFO pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 32. Certification by CEO and CFO pursuant to Section 906 of the Sarbanes- Oxley Act of 2002

Edgar Filing: NEWGOLD INC - Form 10QSB

In accordance with the requirements of the Securities Exchange Act of 1934, the Registrant has caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
