**Graph 1: Alternative Local Plans Wireline Telephony**

**In the 4Q07, Brasil Telecom had more than 3.5 million local wireline alternative plan lines, an increase of 24.3% over the 4Q06.** At the close of the year, the share of local alternative plans came to 44.1% of the lines in service as a result of the strategy of approaching the market in an increasingly segmented manner.

Brasil Telecom consolidated its positioning focused on **increasing wireline value**. Promotions for new clients are concentrated in the **Full Bill** plan, which offers unlimited calls at night and on weekends. In this period, the Company also launched **Flat Fee** promotions offering unlimited local calls in locations with low traffic. These features have made the **Full Bill** plan the clients' first choice, reaching over 1.6 million clients in the first year.

For the low-income segment, Brasil Telecom launched a new plan focused on expense control and a single package for fixed and mobile calls, **Total Control**. A pre-paid plan that offers clients three package choices: 50, 100 and 200 minutes.

The Company's strategy to build customer loyalty and retain the base is based on the bundling of several products for high-value clients, such as **Brazil Total** packages, which include intelligent services, broadband and local fixed, national long-distance and mobile telephony.

In December 2007, Brasil Telecom complemented its portfolio with its **Tailor-made Bill** plan, which is specific for the corporate and government markets and allows clients to share contracted minutes with a number of wirelines, adjusting the plan to their needs in a simple and cost-saving manner.

**The conversion of the charging system from pulses to minutes changed the traffic profile significantly as of the 3Q07.** The conversion factors for the basic residential, non-residential and alternative plans averaged 1.7, 1.5 and 4.0 minutes, respectively.

Note that the ongoing increase in the adhesion to alternative plans reduces excess traffic as clients tend to choose plans that are in line with their usage profile.

VC-1 traffic totaled 718.0 million minutes in the 4Q07, 1.5% down on the 4Q06, due to the substitution of wireline by mobile telephony.

Long-distance traffic fell by 3.9% compared to the 4Q06. However, this drop was partially offset by the increase in the number of clients who joined alternative long-distance plans (48.2% up on the 4Q06, reaching 805.900 clients in December 2007) and also by the upturn in VC-2 and VC-3 traffic, due to special services.

In light of the migration of traffic from wireline to mobile lines, Brasil Telecom added specific plans geared towards mobile clients to its portfolio. The Company thus aims to encourage the increase of CSP 14 traffic generated by mobile users, including clients from other operators. Among the plans launched in the 4Q07, it is worth noting 14 in our Mobile , which offers simplified tariffs, with discounts, and the 14 long-distance at local cost promotion, which brings down VC2 and VC3 prices to VC1 levels.

**Graph 2: LD Traffic Share Quarterly Average**

PS: The LD traffic shares hereby presented refer to the traffic originated in Brasil Telecom's wireline network in its area of concession (Region II of the PGO - General Concession Plan).

In the 4Q07, Brasil Telecom maintained its leadership position, **recording an average market share of 84.9% in the intra-regional segment and 90.0% in the intra-sector segment. The company's market share reached 64.0% in the inter-regional segment and increased by 1.2 p.p. in the international segment to 38.6% .**

Mobile telephony operations reached 4,262,700 users, or 238,900 net additions in the quarter. At the close of the 4Q07, BrT Móvel's client base grew by 26.2% over the 4Q06, while the Brazilian market moved up by 21.1% in the same period.

The mobile client base comprised 855,800 post-paid subscribers (20.1% of BrT Móvel's clients) and 3,406,900 prepaid subscribers.

Gross additions totaled 837,200, 50.6% up on the 4Q06. This result reflects the success of the plans and promotions offered by BrT Móvel and the increased point-of-sale capillarity in 2007.

In the 4Q07, the Company maintained promotions to encourage call reception, intra-network (on-net) traffic and usage in periods when the network is idle ( Free calls to other operators , Free calls at night , Free calls from public phones and Free calls on Sundays ). The difference in relation to previous quarters was the standardization of benefits. This allowed simpler communication in advertising campaigns, which also helped boost gross additions over the same period the year before.

**Graph 3: Mobile Network**

**BrT Móvel's market share in Region II was 13.2% at the end of the quarter, 1.1 p.p. up on the 4Q06.** BrT Móvel sustained its position as the third major operator in terms of market share in the Federal District and the states of GO, TO, MT, AC and RO.

According to Anatel, **BrT Móvel's post-paid market share in Region II stood at 13.5% in December.**

At the end of the 4Q07, **BrT Móvel covered 873 localities, accounting for 87% of the Region II population.**

BrT Móvel has maintained its profitable growth strategy, cutting costs and adopting market practices. **Its subscriber acquisition cost (SAC) stood at R\$ 82.7, 32.8%, down on the 4Q06,** confirming the strategy of focusing on base growth without hurting profitability.

**DATA**

**Graph 4: ADSL Users**

In the 4Q07, **Brasil Telecom added 44.600 ADSL users to its base, which totaled 1,567,800 at the close of the quarter**, up by 19.0% over the 4Q06. **ADSL (ADSL/LIS) penetration came to 19.5% in the 4Q07, versus 15.7% in the 4Q06.** Moving on with the expansion of the broadband network, Brasil Telecom reached 80% of the municipalities with **ADSL coverage**, the highest percentage among large operators.

Another important front of innovation is the pursuit of alternative solutions for broadband access in places difficult to serve through physical means. The Brasil Telecom group is thus testing Wi-Max technology, in pre-commercial phase, in the cities of Curitiba and Porto Alegre (Wi-Max – Worldwide Interoperability for Microwave Access Wireless broadband access with international interoperability standard).

Brasil Telecom also maintains a partnership with Sky and in 2007, in order to reinforce the mobile Internet access portfolio, it launched a new offer for clients who use laptops. With 4 options of flexible and converging packages, Brasil Telecom integrates wireline, mobile phone, broadband, long-distance products into the same solution.

## Internet Service Providers

Internet Group, Brasil Telecom's Internet unit comprising the activities of iG, iBest and BrTurbo, is Brazil's second largest broadband provider, with 1.4 million clients. Including value-added service clients, paying clients total 2.1 million. Internet Group also has 4 million dial-up clients and is the 3<sup>rd</sup> largest national portal in terms of audience, with more than 11.2 million residential unique visitors every month (source: IBOPE - Dec/07).

Internet Group reached 1.4 million broadband clients at the close of 4Q07, 0.8% up on the 3Q07 and 26.3% up on the 4Q06. Considering iG and BrTurbo subscribers, the group maintained its market leadership in Region II.

In addition to broadband users, Internet Group value-added service paying clients grew by 11.8% over the 3Q07 and 129.4% over the same period the year before, reaching 0.7 million clients at the close of the year. This upturn was led mainly by products geared at residential clients. The main highlights were: Educa, a content product focused on family education, with university entrance exam tips and online tutor,; Resolve, a 24/7 telephone technical support,; and Protege, an online anti-virus for PCs,.

iG and iBest also have 4 million dial-up clients. The traffic in minutes came to 9.7 billion in the 4Q07. The Internet Group maintained its position as market leader in Region II with 2.5 billion minutes in the same period.

**Brasil Telecom** s gross revenue reached **R\$4,130.2 million in the 4Q07**, 3.2% higher than in the 4Q06. The increased participation of data communication and mobile telephony services underlines the success of the company s revenue diversification strategy.

**Local service gross revenue totaled R\$1,659.3million in the 4Q07**, 3.7% down on the 4Q06. The quarter's highlights were: the 3.2% increase in gross revenue from subscription fees due to the migration of clients to alternative plans and tariff increases of 2.14% for local services and 3.29% for VCs. The increase in subscription revenue was offset by the decline of 23.3% in the gross revenue from local traffic and 0.6% in the gross revenue from VC-1 calls.

**Gross revenue from public telephony stood at R\$137.8 million**, in line with the 4Q06.

**Gross revenue from long-distance services came to R\$743.5 million**, 3.1% up on the 4Q06, chiefly fueled by the increase in VC-2, VC-3 traffic and the tariff increase of 2.14% in long-distance services and 3.29% in VCs.

**Interconnection revenue amounted to R\$107.8 million**, 5.4% down on the R\$ 113.9 recorded in the 4Q06 chiefly due to lower traffic and the 20% reduction in TU-RL as of January 1, 2007.

**Wireline ARPU (excluding data communications) reached R\$ 82.2**, 6.1% up on the 4Q06, reflecting the company's strategy of curbing the decline in wireline revenue. **Including data communications**, ARPU stood at R\$ 103.4, 9.8% higher than in the 4Q06, thanks to growing ADSL user penetration.

#### **Graph 5: Data Communication and Mobile Telephony Revenue**

**Gross revenue from data communications and other services totaled R\$ 735.3 million**, 18.1% up on the 4Q06 chiefly due to the increase of 19.0% in the ADSL client base.

**ADSL ARPU amounted to R\$ 72.1**, 0.8% up on the R\$ 71.5 recorded in the 4Q06.

**Consolidated mobile telephony gross revenue moved up 19.9% year-on-year** due to the expansion of the client base and the launch of new service plans.

**Consolidated mobile telephony gross revenue stood at R\$ 542.9 million**, R\$ 468.1 million of which from services and R\$74.8 million from the sale of handsets and accessories.

**Mobile telephony ARPU amounted to R\$ 34.6** : post-paid user ARPU came to R\$55.8 and prepaid user ARPU stood at R\$29.1.

**Brasil Telecom's consolidated net revenue totaled R\$ 2,876.1 million**, 4.9% higher than the R\$ 2,741.0 million recorded in the 4Q06.

**Personnel costs and expenses came to R\$182.1 million, 17.0% up on the 4Q06.** This increase was chiefly due to the internalization of the call center in the 4Q07. At the end of the quarter, the BrT group had 16,769 employees, 5,287 of which in the wireline, data and Internet provider segments, 616 in BrT Móvel and 10,866 in the call center.

Brasil Telecom has call centers installed in the cities of Florianópolis (SC), Campo Grande (MS), Curitiba (PR) and Goiânia (GO), with a total capacity of 5,400 workstations, offering different customer care channels to its clients.

**Third-party costs and expenses**, excluding interconnection, advertising and marketing, **totaled R\$ 583.2 million**, in line with the 4Q06. In 2007 the expenses were R\$2,268.3 million, 1.6% higher than 2006, out of which R\$250.7 million were related to call center expenses.

**The ratio between losses on accounts receivable and gross revenue reached 2.0%**, totaling R\$83.8 million, 0.4 p.p. down on the 2.4% recorded in the 4Q06. Losses on accounts receivable declined as a result of the improved phone collection performance.

**Provisions for contingencies stood at R\$ 214.2 million**, R\$ 61.4 million up on the 4Q06, chiefly due to the reassessment of tax, civil and labor contingencies.

**Material costs and expenses came to R\$108.3 million**, down by 11.8% on the 4Q06, due to the reduction in handset costs.

**Depreciation and amortization costs totaled R\$ 586.1 million**, 18.4% down on the 4Q06 due to fully depreciated items.

**Other operating costs and expenses stood at R\$ 123.6 million**, 98.1% higher than in the 4Q06. This increase was driven by non-recurring items in the 4Q07, as demonstrated below:

Brasil Telecom's financial result was an expense of R\$ 120.9 million, versus an expense of R\$ 145.1 million in the 4Q06. Excluding the effect of interest on equity, both in the 4Q06 and the 4Q07, the financial result recorded a negative variation of R\$54.7 million chiefly due to higher financial expenses in local currency, due to the booking of tax provisions in the 4Q07.

**NON-OPERATING RESULT**

The R\$66.6 million reduction in non-operating results from the 4Q06 to the 4Q07 refers basically to the increase in expenses of R\$36.5 million from the write-off of non-operating assets and of R\$26.6 million with tax benefits.

**NET INCOME**

Brasil Telecom recorded 4Q07 net income of R\$ 205.6 million, equivalent to R\$ 0.5673 per share. Net earnings per ADR stood at US\$ 2.8365. In the 4Q06, net income stood at R\$ 267.8 million, equivalent to R\$ 0.7388 per 1,000 shares or US\$ 1.7277 per ADR.

**INTEREST ON EQUITY AND DIVIDENDS**

At the end of the fiscal year 2007, the credit of interest on equity, net of income tax withheld at source, shall be added to dividends and will be subject to approval at the Ordinary General Shareholders' Meeting.

**At the end of 2007, Brasil Telecom's consolidated gross debt totaled R\$ 4,383.4 million**, 18.5% lower than in the same period the year before chiefly due to the amortization of debentures in the amount of R\$ 500 million in April 2007 and the appreciation of the Brazilian Real, which reduced the debt denominated in foreign currency. **In December, 88.7% of total debt was long-term.**

Consolidated net debt came to R\$ 489.9 million, 62.7% down on December 2006.

At the end of 2007, the debt linked to the exchange rate variation, excluding hedge adjustments, totaled R\$ 731.6 million, R\$ 395.0 million in US Dollars, R\$ 94.7 million in currency basket and R\$ 241.9 million in Japanese Yen. On December 31, 2007, 80.6% of the debt linked to the exchange rate variation was hedged, leading to a total exposure of only 73.6% .

## GLOSSARY

**ADSL:** Asymmetrical Digital Subscriber Line. System that allows broadband signal transmission through metallic telephone cables. It is the most common DSL technology, which represents a midway transition to fully optical networks.

**ARPU:** Average Revenue per User, an indicator used in the telecom industry.

**CAPEX:** Capital Expenditure. The investments made by a company.

**EBITDA:** Earnings before Interest, Tax, Depreciation and Amortization.

**GSM:** Global System for Mobile communications. GSM is the world's most widely used mobile telephony technology and allows users to move around freely and easily with their handsets. The price of GSM handsets is also more attractive, the network is safer and there are constant technological advances.

**IoE (Interest on Equity):** Shareholder remuneration option, calculated on shareholders' equity and limited, for tax purposes, to the variation in the long-term interest rate (TJLP). The tax benefit is due to the reduction in the calculation base used for income tax and social contribution tax on net income, given that interest on equity represents a deductible expense in the calculation of these taxes. IoE payments are subject to withholding tax at 15%. Interest on equity may be paid as part of statutory dividends, net of withholding tax.

**LIS:** Lines in Service. All the lines in a network that are effectively being used.

**SAC:** Subscriber Acquisition Cost, the average amount spent by a company to acquire a new subscriber.

**TUP: Public Phones.**

**Financial Leverage Ratio:** Net Debt / EBITDA
