1. OPERATIONS

Companhia de Saneamento Básico do Estado de São Paulo Sabesp (the Company) is a mixed capital company headquartered in São Paulo, controlled by the São Paulo State Government. The Company is engaged in the provision of basic and environmental sanitation services, and supplies treated water on a bulk basis and provides sewage treatment services to other six municipalities of the Greater São Paulo Metropolitan Area.

In addition to providing basic sanitation services in the State of São Paulo, SABESP may perform these activities in other states and countries, and can operate in drainage, urban cleaning, solid waste handling and energy markets. The Company intends to expand its basic operations and, at the same time, become an environmental solutions company.

The company operates water and sewage services in 366 of municipalities of the State of São Paulo. In most of these municipalities, the operations are based on 30-year concession agreements. In 2007, 174 concessions expired, 86 of which resulted in new agreements and 88 are being negotiated. Therefore, 21 concessions that would expire between 2008 and 2030 were anticipated, totaling 107 new agreements for more 30 years and the remainder are in effect.

From 2008 to 2037, 136 concessions will expire in addition to other 35 with legal relationships with indefinite term for which Law 11445, which regulated the sanitation services in Brazil, determines that the parties can sign an agreement by 2010.

Management believes that all concessions terminated and not yet renewed will result in new contracts or extensions, and does not consider the risk of discontinuity in the provision of municipal water and sewage services. As of March 31, 2008, the book value of property, plant and equipment used in the 88 municipalities under negotiation totals R\$1.79 billion and revenue for the same period total R\$211 million.

In the municipality of Santos, in the Santista lowland, which has a significant population, the Company operates supported by a public authorization deed, a similar situation in other municipalities in that region and in Ribeira valley, where the Company started to operate after the merger of the companies that formed it.

On January 5, 2007, Law 11445 was enacted, establishing the basic sanitation regulatory framework, providing for the nationwide guidelines and basic principles for the provision of such services, such as social control, transparency, the integration authority of sanitation infrastructures, water resources management, and the articulation between industry policies and public policies for urban and regional development, housing, suppression of poverty, promotion

of health and environmental protection, and other related issues. The regulatory framework also aims at efficiently improving quality of living and economic sustainability, allowing for the adoption of gradual and progressive solutions consistent with users' payment ability.

As benefits for the Company, this law:

Clarifies the conditions for transitional services, by amending Article 42 of the Concession Law to determine that the Concession Grantor has to perform evaluations, surveys and payment due compensation before retaking the concession assets, as a condition for the validity of the subsequent municipal actions;

Significantly reduces the possibility of a favorable outcome in legal actions for immediately retaking services, without payment of due compensation;

Aims at improving the attainment of public interests related to the environment and supports state planning of services, without disregarding local peculiarities, taking into consideration the need for the Municipalities to present sanitation plans that are compatible with the hydrographic basin plans;

Imposes the creation of a regulatory agency and the issue of regulations that increase transparency and efficiency in services inspections, as well as in the provision of services itself, safeguarding and converging the different interests of consumers and contractors;

Another important change in the regulatory environment in 2007 was the creation of the São Paulo State Sanitation and Power Regulatory Agency (ARSESP).

The Company's shares have been listed on the Novo Mercado (New Market) segment of the BOVESPA (São Paulo Stock Exchange) since April 2002, and on the New York Stock Exchange (NYSE) as ADRs since May 2002.

2. PRESENTATION OF FINANCIAL STATEMENTS

The interim financial statements have been prepared in accordance with the standards established by the Brazilian Securities Commission (CVM), applicable to the preparation of interim financial statements, including CVM Instruction No. 469/08.

The interim financial statements have been prepared according to principles, practices and criteria consistent with those adopted in the preparation of the financial statements for the year ended December 31, 2007 and should be read together with them, except for the classification of donations received which, beginning January 1, 2008, have been recorded under the caption deferred income according to CVM Instruction No. 469 of May 2, 2008.

Amendment to Brazilian Corporate Law, effective January 2008

On December 28, 2007, Law No. 11638 was enacted, altering, revoking and adding new provisions to the Brazilian Corporate Law, especially with respect to chapter XV. This Law is effective for fiscal years beginning on or after January 1, 2008 and was designed primarily to update the Brazilian Corporate Law, so as to enable the convergence of Brazilian accounting practices with international accounting standards (IFRS) and allow the Brazilian Securities Commission (CVM) to issue new accounting standards and procedures, in conformity with such international accounting standards.

The main changes are summarized as follows:

- Replacement of the statement of changes in financial position by the statement of cash flows.

- Requirement for the presentation of a Statement of Value Added.
- Possibility of maintaining separate accounting records for purposes of complying with tax legislation and reflecting necessary adjustments in order to prepare the financial statements in conformity with Brazilian Corporate Law.
- Creation of the account groups Intangible Assets to permanent assets and valuation adjustments to shareholders equity.
- Standardization of the criteria for measurement and classification of financial instruments, including derivatives.
- Requirement that periodic review and analysis of the recoverability of amounts recorded in property, plant and equipment, and intangible assets.
- Elimination of the possibility to record the premium received on issue of debentures and donations and government investment grants (including tax incentives) directly as capital reserves in shareholders' equity. Tax incentives arising from donations and government investment grants for investments will no longer be classified as capital reserve, becoming part of income for the year. The Company's management may allocate a portion of net income resulting from these incentives to the formation of profit reserve and may be deducted from the calculation basis of the mandatory dividend.
- Requirement to record under the caption property, plant and equipment those rights in tangible assets that are maintained or used in the operations of the Company's business, including those rights received as a result of transactions that transfer the benefits, risks and control of such assets to the Company (e.g., capital lease).
- Modification of the definition of those assets to be recorded under the caption deferred charges.
- Adjustments to present value for assets and liabilities arising from long-term transactions, as well as for significant short-term transactions.

On May 2, 2008, the Brazilian Securities Commission (CVM) issued the Instruction No. 469/08 that provides for the application of Law No. 11638/07. This Instruction permits companies to immediately apply to 2008 interim financial statements all the provision of the new Law or disclose in notes to the interim financial statements of the changes that might have a material impact on the financial statements as of 2008 yearend, by estimating the possible effects on shareholders' equity and the statement of income.

The Company elected to disclose the effects of the new law in notes to the interim financial statements and effectively record in the interim financial statements as of March 31, 2008, those items considered material and mandatory of Instruction No. 469/08. Consequently, the amount of R\$3,100, related to donations received in the first quarter of 2008 was recorded under deferred income until it is definitely regulated.

In addition to the issue of CVM Instruction No. 469/08, the Company considers that even though most of the provisions amended by the new Law still depend on regulation to be issued by CVM, the material issues that might change the presentation of the financial statements are already being adopted or disclosed, and refer to the segregation of the group Intangible assets in permanent assets, the disclosure of the statements of cash flows (as disclosed in note 18) and value added (disclosed in the annual financial statements), and measurement at market value of the financial instruments, disclosed comparatively to their carrying amount in note 15.

(i) Water and sewage services

The Company provides water supply and sewage collection services to São Paulo State Government and other companies related to São Paulo State Government, under usual market terms and conditions, except for the settlement of receivables, which may be realized in the conditions mentioned in items (iii) and (iv).

(ii) Reimbursement of additional retirement and pension benefits paid

Refers to amounts that supplement retirement and pension benefits paid by the Company to former employees from state-owned companies that merged to form the Company. The amounts involved have to be reimbursed to the Company by São Paulo State Government in its capacity of main debtor pursuant to State Law No. 200/74. As of March 31, 2008 and December 31, 2007, 2,613 and 2,635 retired employees, respectively, received additional retirement benefits and for the quarters ended March 31, 2008 and December 31, 2007, the Company paid R\$24,466 and R\$32,373, respectively. There were 143 active employees as of March 31, 2008 who will be entitled to these benefits as a result to their retirement in comparison to 144 as of December 31, 2007.

(iii) Gesp Agreement

Entered into on December 11, 2001 between the Company, the São Paulo State Government (through the State Finance Department) and the Water and Electric Energy Department (DAEE), with the intermediation of the Water Resources, Sanitation and Construction Works Department, in which the State acknowledges that, under Law No. 200/74 it is accountable for the benefits arising from additional retirement and pension benefits and recognizes the existence of debts arising from bills related to the provision of water supply and sewage services. Total agreement amounted to R\$678,830, at historical value, R\$320,623 of which refers to additional retirement and pension benefits in the period between March 1986 and November 2001, and R\$358,207 arising from the provision of water supply and sewage collection services, billed in and past due since 1985 until December 1, 2001.

In view of the strategic importance of the Taiaçupeba, Jundiá, Biritiba, Paraitinga and Ponte Nova reservoirs for guaranteeing and maintaining the Upper Tietê water volume, the Water and Electric Energy Department (DAEE) intends to transfer these assets to the Company as partial amortization, by assigning a receivable in the amount owed by the State. The appraisal of the reservoirs was approved by the Company's Board of Directors and indicates the amount of R\$300,880 (base date June 2002), as mentioned in the related report. However, there is a civil class action at the São Paulo State Appeals Court involving the transfer of these reservoirs. The Company's legal counsel evaluate the risk of loss from this lawsuit as probable, which would hinder the transfer of the related reservoirs as a partial amortization of the balance receivable.

The balances of water supply and sewage collection services were included in the First and Second amendments as described below (iv) and (v). The balances related to the reimbursement of additional retirement and pension benefits were included in the Commitment Agreement between São Paulo State and Sabesp, as described below (vi).

(iv) First Amendment to the Gesp Agreement

On March 22, 2004, the Company and the State Government amended the terms of the original Gesp Agreement, (1) consolidating and recognizing the amounts due by the State Government for water supply and sewage collection services provided, monetarily adjusted until February 2004; (2) formally authorizing the offset of amounts due by the State Government with interest on capital declared by the Company and any other debit existing with the State Government as of December 31, 2003, monetarily adjusted until February 2004; and (3) defining the payment conditions of the remaining liabilities of the State Government for the receipt of the water supply and sewage collection services.

Pursuant to the Amendment, the State Government recognized the amounts due to the Company for water supply and sewage collection services provided until February 2004 in the amount of R\$581,779, including monetary adjustment based on the TR at the end of each year until February 2004. The Company recognized amounts payable to the State Government related to interest on capital in the amount of R\$518,732, including (1) amounts declared related to years prior to 2003 (R\$126,967), (2) monetary adjustment of these amounts based on the annual variation of the Consumer Price Index (IPC/Fipe) until February 2004 (R\$31,098); and (3) amounts declared and due related to 2003 (R\$360,667).

The Company and the State Government agreed on the mutual offset of R\$404,889 (monetarily adjusted until February 2004). As of November 30, 2007, the remaining balance of this agreement was R\$133,709, which was subject to the Second Amendment to the Gesp Agreement (v).

The Amendment to the Gesp Agreement does not provide for amounts due by the State Government related to the additional retirement and pension plan benefits paid on behalf of the State Government by the Company, which are subject to the Commitment Agreement described below (vi).

(v) Second Amendment to the Gesp Agreement

On December 28, 2007, the Company and the State Government, through the Finance Department, signed the second amendment to the terms of the original Gesp Agreement, (1) agreeing upon the payment in installments of the remaining balance of the First Amendment, amounting to R\$133,709, to be paid in 60 monthly and consecutive installments of the same amount, the first of which falling due on January 2, 2008. The amount of the installments will be monetarily adjusted in accordance with the variation of the IPCA -IBGE, plus interest of 0.5% per month. The balance of this agreement, the installments of which have been monthly paid, includes the amount of R\$46,244, which the State does not recognize as due. SABESP's understanding differs from that of the State regarding this amount and does admit the review of these previously agreed-upon amounts without the supported and unequivocal demonstration of the lack of relation between the amounts presented by SABESP and the services effectively provided. For this reason the Company understands that the recognition of an allowance for losses regarding these amounts is not necessary (pursuant to item VII, of the Recitals, of the Second Amendment to the Recognition Instrument, Payment Commitment and Other Covenants between the State of São Paulo and SABESP) (2) with respect to the accounts past due and unpaid in the period between March 2004 and October 2007, arising from the provision of water supply and sewage collection services in the amount of R\$256,608, R\$235,407 was received and R\$21,201, is pending confirmation of receipt. These amounts are being jointly analyzed by SABESP and the representatives of the many State departments. To date, differences regarding the debtor but not the amount of the debt have been identified. In the event of the reclassification of the entity responsible for paying the account, SABESP will transfer the charge to the respective Entity. The Company did not recognize an allowance for losses in this amount as it understands that the differences are substantially related to the identification of the debtor. (3) The interest on capital due by SABESP to the State, related to the period between March 2004 and December 2006, in the amount of R\$400,823, adjusted from June 2007 to November 2007, based on the Selic (Central Bank overnight rate), was paid in the period between January and March 2008. (4) The State and SABESP agreed to resume immediately the compliance with their mutual obligations under new assumptions: (a) implementation of an electronic account management system to facilitate and speed up the monitoring of payment processes and budget management procedures; (b) structuring of the Rational Water Use Program (PURA) to rationalize the consumption of water and the amount of the water and sewage bills under the responsibility of the State; (c) establishment, by the State, of criteria for budgeting so as to avoid the reallocation of amounts to a specific water and sewage accounts as from 2008; (d) possibility of registering state bodies and entities in a delinquency system or reference file; (e) possibility of interrupting water supply to state bodies and entities in the case of nonpayment of water and sewage bills.

Management understands that all amounts due by the State Government are receivable and does not expect to incur in losses on such accounts receivable.

(vi) Commitment Agreement entered into by the State of São Paulo and Sabesp

On March 26, 2008, the State of São Paulo, through the Finance Department and the Sanitation and Energy Department, and Sabesp entered into a Commitment Agreement for the settlement of outstanding debts related to the reimbursement of pension benefits.

Even though the State acknowledges its debts related to the pension benefits, the State disagrees with the criteria adopted by SABESP to grant and pay the benefits, based on the legal opinions issued by the State Attorney General, which restrict State actions and prevent the voluntary reimbursement of all amounts paid by Sabesp.

From Sabesp's standpoint, the criteria adopted in the past to grant and pay pension benefits were correct, as they were based on specific State authorizations or then effective legal opinions.

The prolongation of the disputes between the State and SABESP is the main reason why the parties did not manage until now to fully implement the provisions of the São Paulo State Government Agreement signed in 2001, described in note 4 (iii).

Based on preliminary information gathered, under the calculation and eligibility criteria agreed by the State, Sabesp estimated, up to de first quarter of 2008, a Indisputable Reimbursement of approximately R\$987 million, which comprises monetary adjustment based on the IPCA (Extended Consumer Price Index) (R\$642.3 million in notional amounts). The amount paid by SABESP up to de first quarter of 2008 was R\$1,503.5 million, adjusted based on the IPCA (R\$938 million in notional amounts).

The parties agree that this discrepancy should not represent an obstacle to the implementation of the commitments made in the São Paulo State Government Agreement Nota 4 (iii) regarding the Indisputable Reimbursement.

Fipecafi is validating the Indisputable Reimbursement and the Controversial Amount, estimated by Sabesp, as well as other firms to perform a new evaluation of the Reservoirs that might be transferred to SABESP as amortization of the reimbursement payable by the State. The amount of the Indisputable Reimbursement shall be added of the monthly variation of the IPCA from the month of each disbursement made by Sabesp to the month the determination work is completed.

Once the amount of the Indisputable Reimbursement is determined and validated by the parties, and the new evaluation of the reservoirs is concluded, the State shall initiate the 30-day period for payment of the Indisputable Reimbursement, as provided for by the São Paulo State Government Agreement, in 114 monthly, consecutive installments, including the annual IPCA variation, plus interest of 6% per year.

The State confirms it is willing to assume the responsibility for the processing and direct payment of the benefits if Sabesp succeeds in reversing the court decision that requires the Company to keep paying the pension benefits, under the current terms and conditions. While the current court decision is not overruled, the State shall transfer to Sabesp the cash required to pay the indisputable amount of the monthly due benefits.

Sabesp shall not waive the receivables from the State to which the Company considers itself to be legally entitled. Accordingly, it will take all possible actions to resolve the issue at all technical and court levels. Should this dispute persist, the Company will take all the necessary actions to protect the Company s interests.

Based on preliminary calculation, considering the reimbursement of the Indisputable Amount by the São Paulo State Government, estimated at approximately R\$987.0 million, representing 66% of the amount paid by SABESP and considering, among other aspects, the need to recognize an actuarial liability to reflect the right to benefits that will be paid in the future, the estimated impact on the Company s results of income as of March31, 2008 would be approximately R\$526 million (R\$513 million approximately December 31, 2007).

No amounts were accrued for loss or the benefits that will be paid in the future as the likelihood of receiving the outstanding amounts and resolving the existing disputed favorably to the Company is highly probable. This expectation is based, in addition to an internal analysis by the Company s staff, on an outside legal opinion, which concludes, after carefully analyzing the matter, that the likelihood of a favorable outcome in a possible recourse action filed by the Company is highly probable. According to this opinion, the circumstances under which the payment of the benefits was made imposes to the São Paulo State Government the duty of reimbursing the Company, since the Company, as the employer, was merely a co-obligator. The analysis of the main disputes allow us to conclude that the criteria adopted by the Company in the past to grant and pay the benefits are reasonable, as they were built based on specific guidance of the São Paulo State Government.

Approximately 80% of the billing from November 2007 to March 2008 has already been paid by the State Government. The remaining amount is being analyzed and will be received as soon as the state bodies conclude the checking.

(b) Cash and cash equivalents

The Company's cash and temporary cash investments with financial institutions controlled by the State Government amounted to R\$334,718 and R\$421,630 as of March 31, 2008 and December 31, 2007, respectively. The financial income arising from these temporary cash investments totaled R\$9,740 and R\$9,378 in the periods ended March 31, 2008 and 2007, respectively. The Company must, pursuant to a State Decree, invest its surplus resources with financial institutions controlled by the State Government.

(c) Agreement for the use of reservoirs

In its operations, the Company uses the Guarapiranga and Billings reservoirs and part of some reservoirs of the Upper Alto, which are owned by the Water and Electric Energy Department (DAEE); should these reservoirs not be available for use to the Company, there could be the need to collect water in more distant places. The Company does not pay any fee for the use of these reservoirs but it is responsible for their maintenance and operating costs.

(d) Agreements with lower tariffs with State and Municipal Government Entities that joined the Rational Water Use Program (PURA).

The Company has signed agreements with government entities related to the State Government and municipalities where it operates involving approximately 7,100 real estates that are benefited from a reduction of 25% in the tariff of water supply and sewage collection services. These agreements provide for the implementation of the rational water use program, which takes into consideration the reduction in the consumption of water.

(e) Guarantees

The State Government grants guarantees for some loans and financing of the Company and does not charge any fees with respect to such guarantees.

(f) Related-party transactions

Management is making efforts to maintain the State's payments with respect to transactions with related parties in non-default on a permanent basis.

5. INDEMNITIES RECEIVABLE

Indemnities receivable are a noncurrent asset that represents amounts receivable from the Municipalities of Diadema and Mauá as an indemnity for their unilateral termination of the concessions for water supply and sewage collection services of the Company in 1995. As of March 31, 2008 and December 31, 2007, this asset amounted to R\$148,794.

Due to these concession agreements, the Company invested in the construction of water and sewage systems in those municipalities in order to meet its concession service commitments. For the unilateral termination of the Diadema and Mauá concessions, the municipalities assumed the responsibility of supplying water and sewage services in those regions. At that time, the Company reclassified the balances of property, plant and equipment related to the assets used in those municipalities to noncurrent assets (indemnities receivable) and recorded non-indemnifiable costs to reflect the assets by their estimated recoverable amounts, contractually agreed as indemnity by the Company with the proper authorities. The net book value of property, plant and equipment relating to the Municipality of Diadema, written off in December 1996, amounted to R\$75,231, and the indemnity balance and other receivables from the municipality amounted to R\$62,876 as of March 31, 2008 and December 31, 2007. The net book value of property, plant and equipment relating to the Municipality of Mauá, written off in December in 1999, amounted to R\$103,763, and the indemnity balance totaled R\$85,918 as of March 31, 2008 and December 31, 2007.

The Company's rights to recover these amounts are challenged by the municipalities and no amount has been received to date.

Sabesp filed lawsuits to collect the amounts due by the municipalities. With respect to Diadema, the decision of the lower court judge was unfavorable to Sabesp, which filed an appeal in November 2000. On December 1, 2005, Sabesp's appeal to have the agreement entered into with the municipality of Diadema declared valid was partially accepted. On October 11, 2006, the municipality administration office filed special and extraordinary appeals and on November 21, 2006 the decision that allowed the Company to present its reply to said appeals was published. Sabesp presented its reply on December 6, 2006. The appeals were rejected by the Chief Justice on March 27, 2007 and the municipal administration office filed new interlocutory appeals against this decision. The interlocutory appeal filed to the Federal Supreme Court (STF) was accepted but only for the purposes of determining the sentence for the extraordinary appeal that had been rejected. On December 26, 2007, the decision that accepted the execution of the Companhia de Saneamento the Diadema Saned was rendered, ordering this company to be summoned to pay the full amount of the debt within 15 days under the penalty of fine. Currently, the Company awaits the effect of this decision, as said decision was published on January 31, 2008 and Saned filed an Interlocutory Appeal against it but, on February 28, 2008, the Reporting Judge, sustained the decision and awaits for information on the lower court decision in order to analyze the motion for suspension.

With respect to Mauá, a lower court decision dated February 23, 2005 demanded this Municipality to pay the amount of R\$153.2 million as a compensation for loss of profits. This decision was appealed by Mauá on April 15, 2005 and is pending a new decision by the Court Decision. On July 4, 2006, the decision was converted in diligence consisting of an expert clarification on the amount of the indemnity for loss of profits. The clarification was provided on December 18, 2007 and the expert confirmed the amount of the loss of profits determined by the lower court. After the exposures by the parties, the court records were sent for conclusion of the Reporting Justice, who will set a date for the judgment of the appeal.

Based on the opinion of its legal counsel, Management continues to state that the Company is entitled to receive the amounts related to the indemnity and continues to monitor the status of the lawsuits.

Property, plant and equipment in use represents the assets involved in the provision of water supply and sewage collection services. Under the assets arising from contracts negotiated based on economic and financial reports and program contracts, SABESP is both the owner and the manager.

(a) Depreciation

Depreciation is calculated based on the following annual rates:

Buildings 4%, interceptors and networks 2%, machinery and equipment 10%, water meters 10%, vehicles 20%, computer equipment 20%, building connectors 5%, office furniture 10% and other items 10%.

(b) Write-offs of property, plant and equipment

In the first quarter of 2008, the Company wrote off property, plant and equipment items in the amount of R\$3,236 (R\$1,960 in the first quarter of 2007), related to items in use, due to obsolescence, theft and sale.

(c) Capitalization of interest and financial charges

The Company capitalized interest and monetary adjustment, including exchange variation, in property, plant and equipment in the amount of R\$12,826 in the first quarter of 2008 (first quarter of 2007 - R\$(2,671)), and during this period these assets were presented as construction in progress.

(d) Construction in progress

The estimated disbursements beginning in the first quarter of 2008 until 2013, related to already contracted investments, total approximately R\$1,798 million.

(e) Expropriations

As a result of the construction of priority projects related to water and sewage systems, the Company was required to expropriate or establish rights of way in third-parties properties according to prevailing legislation. The owners of these properties will be compensated either amicably or through courts. The estimated disbursements to be made beginning the first quarter of 2008, without an estimated date, is approximately R\$472 million. The assets to be received as a result of these negotiations will be recorded as property, plant and equipment after the transaction is completed. In the first quarter of 2008, the amount related to expropriations was R\$1,452 (R\$437 in the first quarter of 2007).

(f) Assets offered as guarantee

As of March 31, 2008, the Company had assets in the amount of R\$249,034 offered as guarantee to the request for the PAES (tax debt refinancing program) (note 10).

The three properties of the Company in the amount of R\$60,539, which were offered as guarantee for a financing from the International Bank for Reconstruction and Development (IBRD) and the settlement of which took place in April 2007, are awaiting release by the Federal Government.

(g) Nonoperating assets

The Company had, as of March 31, 2008 and December 31, 2007, free lease assets in the amount of R\$26,479 mainly related to land located near operating areas.

(h) Revaluation

Property, plant and equipment items were revalued in 1990 and 1991 and are depreciated at annual rates that correspond to their remaining useful lives determined in the related reports, which, as general rule, fall into the periods of the rates presented above.

As allowed by CVM Instruction No. 197/93, the Company failed to recognize a provision for the deferred tax effect on the appreciation arising from the revaluation of property, plant and equipment in 1990 and 1991. Should income and social contribution taxes be recognized on the revaluation reserve, the unrealized amount as of March 31, 2008 would total R\$393,251 (R\$422,966 through March 31, 2007). The amount of R\$21,685 was realized in the period from January to March 2008 (R\$21,843 from January to March 2007).

(i) Fully depreciated assets

As of March 31, 2008 and December 31, 2007, the book value of the fully depreciated assets that are still in use is R\$763,182 and R\$606,142, respectively.

a) Concessions

In the period between 1999 and 2006, the negotiations for new concessions were conducted on the basis of the economic and financial results of the transaction, determined in an appraisal report issued by independent experts.

The amount determined in the respective contract, after the transaction is closed with the municipal authorities, with payment through Company shares (through December 2000) or in cash, is recorded in this account and amortized over the period of the related concession (mostly 30 years). As of March 31, 2008 and December 31, 2007 there were no amounts pending related to these payments to the municipalities.

The net amount shown relates to concessions with the following municipalities:

Total	630,329	(125,964)	504,365	507,789

The amortization of intangible assets is performed during the effective period of the concession agreements of the related municipalities.

In the first quarter of 2008 and 2007, amortization expenses related to concession intangible rights were R\$5,323 and R\$5,083, respectively.

b) Program contracts

Upon renewal of certain program contracts, the Company assumed commitments to financially participate in social and environmental sanitation actions. These commitments are being amortized according to the effective period of the program contract. The amounts refer to the following municipalities:

Mar 2008

Municipality	Amount	Accumulated amortization	Net
Alfredo Marcondes	70	-	70
Bento de Abreu	50	-	50

Valentim Gentil	140	(1)	139
Total	58,708	(998)	57,710

The amortization is performed during the effective period of the program contracts (mostly 30 years).

In the first quarter of 2008, amortization expenses related to the program contracts total R\$998.

The amounts not yet disbursed related to program contracts are recorded under the caption program contract commitments in current liabilities, R\$29,033, and noncurrent liabilities, R\$16,940.

10. TAX DEBT REFINANCING PROGRAM (PAES)

The Company applied for enrollment in PAES on July 15, 2003, in accordance with Law No. 10684 of May 30, 2003, and included in its application the debts related to COFINS and PASEP which were involved in a legal action challenging application of Law 9718/98, and the outstanding balance under the Tax Recovery Program (REFIS). The total amount included in PAES was R\$316,953.

The debit is being paid in 120 months and the amount paid in the 1st quarter of 2008 was R\$9,993 (R\$10,938 in the 4th quarter of 2007) and R\$2,593 was accrued in the 1st quarter of 2008 (R\$3,305 in the 1st quarter of 2007).

The assets offered as guarantee in REFIS, in the amount of R\$249,034, are still guaranteeing the amounts in the PAES program.

11. SOCIAL SECURITY LIABILITIES

The Company sponsors Fundação Sabesp de Seguridade Social - Sabesprev, an entity established in August 1990 with the main purpose of managing the pension plan and the welfare program to Sabesp's employees.

(a) Pension plan benefits:

The monthly contributions to the pension fund - defined benefit correspond to 2.0% by the Company and 2.30% by the participants.

Participants' contributions above refer to the average contributions, as the discount amount ranges from 1% to 8.5% depending on the salary bracket.

In order to meet the provisions of CVM Resolution No. 371 of December 13, 2000, the amounts of the pension and retirement benefits granted or to be granted, to which employees are entitled after retirement, are presented below.

As of December 31, 2007, based on the report of the independent actuary, Sabesp had a net actuarial liability of R\$365,234 representing the difference between the present value of the Company's obligations to the participating employees, retired employees, and pensioners, and the value of the related assets.

The actuarial liability as of March 31, 2008, in the amount of R\$378,630 (December 2007 - R\$365,234), is accounted for in noncurrent liabilities.

The estimated expense for 2008 is R\$67,129, of which the amount of R\$13,396 was recognized in the period from January to March 2008 (R\$10,764 in the period from January to March 2007), as shown below:

(b) Welfare plan

The welfare plan, which consists of optional, free choice, health plans are also sponsored by Sabesp and the participants, as follows for the period:

Company: 7.20%, on average, of payroll;

Participating employees: 3.21% of base salary and premiums, equivalent to 2.30% of gross payroll, on average.

12. PROFIT SHARING

In the quarter ended March 31, 2008 R\$12,838 was accrued, which is recorded under payroll and related charges, in current liabilities, related to the period from January to December 2008, based on the attainment of goals set during negotiations between the Company and entities representing the employees.

Management, based on a jointly analysis with its legal counsel, recognized a reserves at amount considered sufficient to cover probable losses. The amounts related to lawsuits in sentence execution stage, recorded in current liabilities, under the caption Reserves , of R\$247,816 (December 2007 R\$290,172), is net of escrow deposits in the amount of R\$28,131 (December 2007 R\$29,805), and the amounts recorded in noncurrent liabilities, under the caption Reserves , of R\$700,709 (December 2007 R\$655,084), is net of escrow deposits in the amount of R\$5,914.

(i) Approximately 1,170 lawsuits were filed by commercial customers, which claim that their tariffs should be equal to the tariffs of another consumer category, and therefore claim the refund of the amounts collected by Sabesp. The Company was granted both favorable and unfavorable final decisions at several courts, and recognized a reserve when the likelihood of loss is considered probable.

(ii) Suppliers claims include lawsuits filed by some building companies alleging an underpayment of monetary adjustments, withholding of amounts related to the understatement of official inflation rates after the Real economic plan, and the economic and financial imbalance of the agreements. These lawsuits are in progress at different courts and a reserve is recognized when the likelihood of loss is considered probable.

(iii) Other civil lawsuits refer mainly to indemnity claims for property damage, pain and suffering, and loss of profits allegedly caused to third parties, filed at different court levels, duly accrued when classified as probable losses.

(iv) Tax lawsuits - the reserve for tax contingencies refers mainly to issues related to tax collections challenged due to differences in the interpretation of legislation by the Company's legal counsel, duly accrued when classified as probable losses.

(v) Labor lawsuits - the Company is a party to labor lawsuits, involving issues such as overtime, health hazard premium and hazardous duty premium, prior notice, change of function, salary equalization, and other. Part of the amount involved is in provisional or final execution at various court levels, and thus is classified as of probable loss and accordingly a reserve was recognized.

(vi) Environmental lawsuits - the refer to several administrative proceedings and lawsuits filed by government entities, including Companhia de Tecnologia de Saneamento Ambiental - Cetesb and the São Paulo State Public Prosecution Office for the imposition of fines for environmental damages allegedly caused by the Company. The amounts recognized in reserves do not always represent the final amount to be disbursed as indemnity of alleged damages, in view of the current stage in which the such lawsuits are and Management's incapability to reasonably estimate the amounts of future disbursements.

Lawsuits with possible likelihood of loss

The Company is a party to lawsuits and administrative proceedings related to environmental, tax, civil and labor lawsuits, which are considered by its legal counsel as possible losses, and are not recorded in books. The amount attributed to these lawsuits and proceedings is approximately R\$1,997,800 as of March 31, 2008 (December 2007 R\$1,943,100).

14. SHAREHOLDERS EQUITY

(a) Authorized capital

The Company is authorized to increase capital up to R\$4,100,000, based on a Board of Directors' resolution, after submission to the Supervisory Board's.

Reverse stock split

The Shareholders' Meeting held on April 30, 2007 approved the proposal for reverse stock split. The shares were grouped at the ratio of 125-for-1 and since June 4, 2007 are traded in Brazilian reais per share. Capital started to be represented by 227,836,623 registered common shares, without par value, and SABESP's capital remains unchanged.

Concurrently with the reverse stock split, the American Deposit Receipts (ADRs) started to be traded at the ratio of 1 ADR for each to 2 shares.

(b) Subscribed and paid-up capital

Subscribed and paid-up capital is represented by 227,836,623 registered common shares, without par value, held as follows:

<i>Shareholders</i>	Mar 2008		Dec 2007

(*) Each ADR is equal to 2 shares

(c) Payment to shareholders

Shareholders are entitled to a minimum mandatory dividend of 25% of the adjusted net income, calculated according to the Brazilian corporate law.

Interest on capital declared in 2007, in the amount of R\$300,744, will be paid in up to 60 days after the Annual Shareholders Meeting, held on April 29, 2008, net of withholding income tax.

(d) Capital reserve

Capital reserve includes tax incentives and donations recorded through December 31, 2007 received from government entities and private institutions.

(e) Revaluation reserve

As provided for by CVM Instruction No. 197/03, the Company decided not to record income and social contribution taxes on the revaluation reserve of property, plant and equipment items recognized in 1991.

The reserve is being realized as a contra entry to the caption retained earnings, on the same proportion as the depreciation and write-off of the respective assets.

(g) Reserve for investments

Comprised specifically of internal funds for expansion of water supply and sewage service systems.

At the Shareholders' Meeting held on April 29, 2008, Management proposed the capitalization of part of the profit reserve in the amount of R\$2,800,000, as this reserve exceeded capital. The proposed was approved and after the capitalization of the profit reserve, capital will be R\$6,203,688.

15. FINANCIAL INSTRUMENTS

In accordance with CVM Instruction No. 235/95, the Company estimated the market value of their financial instruments, using available market information and appropriate estimation methodologies. However, considerable judgment is required to interpret market data and to develop the estimates of market value. Accordingly, the estimates presented are not necessarily indicative of the amounts that could be realized in a current market exchange. The use of different market assumptions and/or valuation methodologies may have a material effect on the estimated market values.

The carrying amounts and the market values of the Company's financial instruments as of March 31, 2008 are as follows:

	Carrying amount	Market value	Unrealized gains (losses)
Temporary cash investments (i)	332,490	332,490	-
Loans and financing: (ii)	(5,691,620)	(5,710,110)	(18,490)

	(5,359,130)	(5,377,620)	(18,490)

(a) Valuation of financial instruments

As of March 31, 2008, the main financial instruments, as well as their valuation criteria, are described below:

(i) Temporary cash investments The market value of these assets approximates the amounts stated in the Company's balance sheets.

(ii) Loans and financing Liability financial instruments are divided into two groups:

a. Market debts Debts incurred to obtain funds in the market to cover possible cash requirements of the Company. The financial instruments composing this group are debentures, bonds and FIDC (Receivables Investment Funds), placed in the financial market through book building or similar procedures, in which yield rates demanded by investors are defined at the time of negotiation.

The market value measurement criteria adopted by the Company for these financial instruments was the UP (unit price) average-deviation method used in the last negotiations, in 2008, carried out in the secondary market in relation to the average UP in the curve.

The information necessary for this measurement was extracted from the following sources: SND Sistema Nacional de Debêntures (National Debenture System), BovespaFix and Bloomberg.

b. Institutional debts Debts incurred for the purpose of financing a project related to SABESP's corporate purpose: water supply and sewage works.

This financing has long-term features, at specific interest rates defined by development agencies (Caixa Econômica Federal, National Bank for Economic and Social Development, Fehidro), and multilateral agencies (IADB, IBRD, JBIC), which prevents us from measuring this financing at market value.

(b) Exchange rate risk

This risk arises from the possibility that the Company may incur in losses due to exchange rate fluctuations, which would increase the liability balances of foreign currency-denominated loans and financing obtained in the market and the related financial expenses. The Company does not have hedge or swap contracts to hedge against this risk, in view of the amounts, costs involved and opportunities. However, when possible, it makes advance purchases of foreign currencies and obtains funding in local currency, as a way to protect itself against exchange rate fluctuations.

A significant portion of the Company's financial debt was linked to the US dollar and to Yen, in the total amount of R\$1,289,898 (note 8). The table below summarizes the Company's exposure to the exchange rate as of March 31, 2008.

	In thousands	
	US\$	Japanese Yen
Loans and financing	679,694	4,341,649

(c) Interest rate risk

This risk arises from the possibility that the Company may incur losses due to interest rate fluctuations and indices that increase their interest expenses on loans and financing. The Company has not entered into any derivative contract to hedge against this risk; however, it continually monitors market interest rates, in order to evaluate the possible need to replace its debt. As of March 31, 2008, the Company had R\$1,002,382 in loans and financing which were obtained at variable interest rates (CDI and TJLP).

Another risk faced by the Company is the lack of correlation between the monetary adjustment indices of its debt and those of its receivables. Water supply and sewage treatment tariffs do not necessarily follow the increases in the interest rates affecting the Company's debt.

(d) Credit risk

Credit risk is mitigated by selling to a geographically dispersed customer base.

18. AGREEMENT WITH THE MUNICIPALITY OF SÃO PAULO

On November 14, 2007, the Company and the Municipality of Paulo (the Parties) entered into an Agreement to establish the conditions that ensure the stability in the provision of water supply and sewage, and environmental utility

services in the city of São Paulo, the main provisions of which are as follows:

1. the Parties made the commitment to take basic sanitation and environmental actions, complementary to the actions of the Municipality of São Paulo, by investing in the deployment and continuity of programs such as: Programa Córrego Limpo (Clean River Program) and Programa de Uso Racional da Água - PURA

(Rational Water Use Program), the purpose of which is to ensure a decrease in water consumption by City government units, ensuring water supply to and the quality of living of the population;

2. starting November 14, 2007, Agreement date, all the amounts paid by the Municipality of São Paulo to SABESP, referring to consumption by City departments, agencies, and foundations, net of taxes, will be used in basic sanitation and environmental actions in the municipality;

3. the Municipality made the commitment to resume the payment of consumption bills issued by SABESP, starting November 14, 2007, date of this Agreement's execution;

4. the Parties shall complete, within 90 days, the projects required to determine the outstanding amounts and prepare the drafts of the Bill to obtain the approval of the City Council to the Cooperation Agreement and Metropolitan Program Contract, to ensure the stable provision by SABESP of water supply and sewage services in the municipality, through associated management of the assumed utility services, jointly by the Municipality and the State of São Paulo, pursuant to the general basic sanitation service principles laid down in State Law 11445/2007 and related State legislation;

5. the Parties and the State shall conclude, within 90 days after the execution of the Agreement, the terms and conditions of the Cooperation Agreement and Metropolitan Program Contract, to ensure the stable provision by SABESP of water supply and sewage services in the municipality;

6. the approval of Municipal Authorization Law is an essential condition both for signing the Cooperation Agreement, to be signed by the Municipality and the State of São Paulo, and the Metropolitan Program Contract, to be signed by the Municipality and SABESP;

7. after the Bill is submitted to the City Council, the Parties will enter into an instrument from settlement of outstanding debts. A discount in the amount of R\$120 million on the City's debts will be granted, under contract. These debts will be paid free of financial charges arising from interest, fines and monetary adjustment, and part of the debts shall be paid by December 2008 and the rest under Municipal Interdepartmental Administrative Rule 01/2005, in seven annual installments;

8. the Parties shall require the termination of the collection lawsuits filed by Sabesp, where Sabesp shall pay the court fees, and each Party shall pay the lawyers' fees, in an estimated amount of R\$1.9 million.

The First Amendment to the Agreement with the Municipality of São Paulo was entered into on February 11, 2008. The Parties decided to extend the agreement for a period equal to the original period, so that the Parties may conclude the required understandings to settle the outstanding debts and prepare the drafts of the Cooperation Agreement, the Metropolitan Contract Program, and the Authorization Bill.

The stages already in progress are the conclusion of the drafts of said instruments, sending the Bill to the City Council, concluding the required understandings to settle the outstanding debts, and jointly defining the sanitation and environmental actions to be taken.

The parties are about to execute the Second Amendment to the Agreement, extending the term for an equal period and providing for automatic renewals, for equal periods, should the parties do not express otherwise.

In 1Q08, net operating revenue totaled R\$1.5 billion, a 5.2% increase as compared to 1Q07. Costs and expenses, in the amount of R\$915.9 million increased 2.1% as compared to 1Q07. EBITDA went from R\$721.4 million in 1Q07 to R\$774.3 million in 1Q08, up 7.3%, as a result of a higher increase in revenue than in expenses.

EBITDA increased 10.0% to R\$ 624.2 million in 1Q08, from R\$ 567.3 million in 1Q07.

2. Increase in gross operating revenue

In 1Q08, gross operating revenue increased R\$75.4 million, or 4.8%, from R\$1,583.2 million in 1Q07 to R\$1,658.6 million in 1Q08. The main drivers of this increase were as follows:

- Tariff adjustments of 4.1% since September 2007 and
- 1.3% increase in the water and sewage billed volume, of which 0.7% in retail and 6.7% in bulk sales, even though the impact on revenue of the latter is not proportional.

3. Billed volume

4. Costs, and administrative and selling expenses

In 1Q08, the cost of sales and services, and administrative and selling expenses increased R\$18.6 million, or 2.1% . On the other hand, the share of costs and expenses in net revenue decreased to 59.5% in 1Q08 from 61.3% in 1Q07.

4.1. Salaries and payroll charges

In 1Q08 there was a R\$18.1 million or 6.0% increase in salaries and payroll charges to R\$319.0 million, from R\$300.9 million, due to the following factors:

Salary increase of 3.37% (IPC-FIPE, consumer price index released by the Institute for Economic Research), since May 2007;

2% increase in payroll, as competence-based compensation since June 2007;

Increase of R\$2.6 million in accrued social security dues, due to the change in the discount rate used in the actuarial calculation to 6.59% in 2008 from 8% in 2007.

The Company expanded services and increased the number of connections by employee, from 689 in 1Q07 to 714 in 1Q08.

4.2. General supplies

In 1Q08 there was a increase of R\$1.3 million or 4.0%, from R\$32.1 million in 1Q07 to R\$30.8 million in 1Q08, mainly due to the following: maintenance of household connections, with a R\$0.5 million decrease, and systems maintenance, which decreased R\$0.7 million.

4.3. Treatment supplies

Expenses on chemicals in 1Q08 were R\$4.5 million or 12.7% higher than in 1Q07, from R\$35.5 million in 1Q07 to R\$40.0 million in 1Q08.

The lower volume of water produced, due to the developments in the Loss Reduction Program, partly offset the increased use of chemicals due to a drop in quality in sourced water.

4.4. Outside services

In 1Q08, outside services increased R\$1.7 million or 1.3%, from R\$126.7 million to R\$128.4 million. The drivers of this result were as follows:

- Reading and bill delivery services in amount of R\$2.4 million, as result of the expansion of the TACE (external commercial service technical) and increase in the number of connections;
- R\$2.2 million increase in surveillance due to the increase in the area under distance electronic monitoring;
- Preventive and corrective maintenance of the water and sewage treatment systems in the amount of R\$2.0 million;
- These increases were virtually offset by R\$4.9 million for the allocation of expenses, related to the software licenses.

4.5. Electricity

Posted a decrease of R\$4.7 million or 4.0% to R\$118.2 million in 1Q07 to R\$113.5 million in 1Q08.

This result is linked to a 10.0% reduction in the tariff in the captive market, which is responsible for 77.0% of expenses on electricity and reduction in consumption of electricity by 1.1% in 1Q08 as compare to 1Q07.

	Share %	Average Price Chg. %	Weighted Average (%)
Free Market	23.0	13.0	3.0
Captive Market	77.0	(10.0)	(7.7)
			(4.7)

4.6. General expenses

In 1Q08 there was an increase of R\$23.6 million or 52.7%, to R\$68.4 million from R\$44.8 million, due to:

- New provisions arising from lawsuits filed by customers and expenses on environmental compensations, resulting in an increase on R\$21.9 million, and
- Payment for the use of water of the Piracicaba, Capivari, Jundiaí, Jaguari, Atibaia and Paraíba do Sul rivers hydrographic basins, which increased to R\$1.5 million.

4.7. Tax expenses

In 1Q08 there was a R\$0.5 million or 5.7% decrease, arising from R\$6.3 million reduction for the end of the CPMF (tax on banking transactions). This reduction was partly offset by the payment of IPTU (municipal real estate tax) to the City of São Paulo, in the amount of R\$5.3 million, due to the revocation of the exemption.

4.8. Write-off of receivables

Write-off of receivables in 1Q08 decreased R\$18.8 million or 24.6%, from R\$76.3 million to R\$57.5 million, mainly due to the recovery of credits arising from settlements entered into with the Cities of Barueri, São Vicente, Cajamar and Bragança Paulista.

5. Financial income and expenses**5.1. Financial expenses**

In 1T08, financial expenses increased R\$5.4 million, or 3.2%, as described below:

	R\$ million			
	1Q07	1Q08	Change	%
Financial expenses				
Interest and charges on domestic loans and financing	118.2	102.1	(16.1)	(13.6)
Interest and charges on foreign loans and financing	18.3	15.5	(2.8)	(15.3)
Interest on court-ordered indemnities, net of reserve	27.0	39.2	12.2	45.2
Other financial expenses	5.0	17.1	12.1	242.0
Total financial expenses	168.5	173.9	5.4	3.2
Financial income	23.4	35.4	12.0	51.3
Financial expenses, net of income	145.1	138.5	(6.6)	(4.5)

Loans and financing in the domestic market were impacted by the following factors:

Decrease of R\$16.1 million in the interest amount paid related to the settlement of 2nd and 5th series debentures in March 2007 and the 1st and 6th series debentures in September 2007.

As for foreign market financing, we highlight the following:

R\$2.8 million decrease in interest, due to the repayment of loans to the IADB, (January, June, July and December 2007) and the IBRD (in April 2007);

In 1Q08 there was an increase in interest on court ordered indemnities of R\$12.2 million, to R\$39.2 million in 1Q08 from R\$27.0 million in 1Q07. The item other financial expenses posted an increase of R\$12.1 million, mainly due to the payment of interest on capital, related to the period March 2004 to December 2006, in the amount of R\$7.8 million, as set forth in the second amendment of the GESP (São Paulo State Government) Agreement.

5.2. Financial income

Financial income increased by R\$12.0 million to R\$35.4 million from R\$23.4 million, mainly due to the higher number of payment in installments agreements entered into with customer in 1Q08 as compared to 1Q07.

6. Interest and monetary variation losses and gains

6.1. Monetary variation losses

	<i>R\$ million</i>			
	1Q07	1Q08	Change	%
Monetary variation on loans and financing	11.9	3.8	(8.1)	(68.1)
Exchange variation on loans and financing	(46.9)	11.5	58.4	(124.5)
Other monetary variations	10.7	24.7	14.0	130.8
Monetary variation losses	(24.3)	40.0	64.3	(264.6)

The net effect of monetary variation losses totaled R\$40.0 million in 1T08 against a gain of R\$24.3 million in 1Q07. This change is due to:

- A decrease in exchange gains due to lower appreciation of the Brazilian real (1.3%) in relation to the US dollar in 1Q08, as compared to the appreciation in 1Q07 (4.1%), despite a 6.0% depreciation of the Brazilian real in relation to the currency basket in 1Q08 against a 0.43% depreciation in 1Q07, generating a net change of R\$58.4 million;
- Decrease in monetary adjustments of R\$8.1 million in the agreement with Banco do Brasil, mainly due to a lower change in the TR (a managed prime rate), 0.17% in 1Q08 against 0.48% in the previous period; as well as a reduction in the debit balance due to the payment of installments falling due in the period;
- Increase of R\$14.0 million in other monetary variations mainly due to:
 - ◆ Higher variation of the IGPM (general market price index), 2.38% in 1Q08 against 1.11% in the previous period, with a R\$12.7 million increase in monetary variation on debentures;
 - ◆ Monetary adjustment of a court ordered indemnity, which increase by R\$1.2 million.

6.2. Monetary variation gains

Monetary variation gains increased by R\$6.7 million or 65.0% to R\$17.0 million in 1Q08 from R\$10.3 million in 1Q07, mainly due to payment in installment agreements entered into with customers.

7. Nonoperating income (expenses)

Increased by R\$12.0 million, from an expense of R\$1.0 million to an income of R\$11.0 million in 1Q08, arising from the following factors:

7.1. Nonoperating income

Nonoperating income increased by R\$14.9 million, from R\$1.3 million to R\$16.2 million in 1Q08, mainly due to the sale of surplus electric power in the amount of R\$8.9 million, and expiration of amounts reimbursable to customers in the amount of R\$1.3 million.

7.2. Nonoperating expenses

Decrease by R\$1.4 million or 70.0% as compared to the same period last year, related to the write-off of discontinued construction works and projects due to obsolescence.

8. Operational Indicators

The table below shows the continuous expansion in services provided by the Company.

17.01 SPECIAL REVIEW REPORT

(Convenience Translation into English from the Original Previously Issued in Portuguese)

INDEPENDENT ACCOUNTANTS REVIEW REPORT

To the Shareholders, Board of Directors and Management of
Companhia de Saneamento Básico do Estado de São Paulo - SABESP
São Paulo - SP

1. We have performed a review of the accounting information contained in the accompanying interim financial statements of Companhia de Saneamento Básico do Estado de São Paulo - SABESP (the Company), for the quarter ended March 31, 2008, consisting of the balance sheet, the statements of income and cash flows, the performance report and the notes to the interim financial statements, all expressed in Brazilian reais and prepared under the responsibility of the Company's management.

2. Our review was conducted in accordance with specific standards established by the Brazilian

Institute of Independent Auditors (IBRACON), together with the Federal Accounting Council (CFC), and consisted, principally, of: (a) inquiries of and discussions with certain officials of the Company who have responsibility for accounting, financial and operating matters about the criteria adopted in the preparation of the interim financial statements; and (b) review of the information and subsequent events that had, or might have had, material effects on the financial position and results of operations of the Company.

3. Based on our review, we are not aware of any material modifications that should be made to the accounting information contained in the interim financial statements referred to in paragraph 1 for them to be in conformity with standards established by the Brazilian Securities Commission (CVM), specifically applicable to the preparation of interim financial statements, including CVM Instruction No. 469, of May 2, 2008.

4. As mentioned in note 4, the Company is negotiating with the São Paulo State Government the reimbursement of the amounts for supplementary retirement and pension paid by the Company.

5. As mentioned in note 18, on November 14, 2007, the Company entered into an agreement with the São Paulo Municipal Government, seeking stability in the provision of services in the Municipality of São Paulo and establishment of sanitation and environmental actions supplementary to the actions taken by the Municipality.

6. As mentioned in note 2, on December 28, 2007 Law No. 11,638 was enacted, altering, revoking and adding new provisions to Law No. 6,404/76 (Brazilian Corporate Law). This Law is effective for fiscal years beginning on or after January 1, 2008 and introduced changes in Brazilian accounting practices. Although this Law has already become effective, some changes introduced by it are subject to regulation by regulatory agencies before being applied by companies. Accordingly, during this transition phase, CVM, through Instruction No. 469/08, has permitted companies not to apply all the provisions of Law No. 11,638/07 in the preparation of the interim financial statements. Thus, the interim financial statements for the quarter ended March 31, 2008 have been prepared in conformity with specific instructions of CVM and do not include all changes in accounting practices introduced by Law No. 11,638/07.

7. The accompanying interim financial statements have been translated into English for the convenience of readers outside Brazil.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
