**Item 8.01 Other Events.**

On January 4, 2011, Cytokinetics, Incorporated issued a press release announcing that the company has opened enrollment in a Phase IIa "Evidence of Effect" (EoE) clinical trial of CK-2017357 in patients with generalized myasthenia gravis (MG). CK-2017357 is a fast skeletal muscle troponin activator and is the lead drug candidate that has emerged from the company's skeletal muscle contractility program. CK-2017357 selectively activates the fast skeletal muscle troponin complex and increases its sensitivity to calcium, which increases skeletal muscle force in response to neuronal input and also delays the onset and reduces the degree of muscle fatigue. In July 2010, Cytokinetics was awarded a grant in the amount of \$2.8 million by the National Institute of Neurological Disorders and Stroke to support research and development of CK-2017357 in MG.

A copy of the press release is filed as Exhibit 99.1 to this Current Report on Form 8-K, and is incorporated herein by reference.

**Item 9.01 Financial Statements and Exhibits.**

(d) Exhibits.

The following Exhibit is filed as part of this Current Report on Form 8-K:

Exhibit No. Description

-----  
99.1 Press Release, dated January 4, 2011.
