MECHEL HAS ATTENDED METAL-EXPO' 2017 INDUSTRIAL EXHIBITION

Moscow, Russia - November 20, 2017 - Mechel PAO (MOEX: MTLR; NYSE: MTL), one of the leading Russian mining and metals companies, reports its facilities' participation in the 23rd International Industrial Exhibition Metal-Expo, which was held at the All-Russia Exhibition Center in Moscow on November 14-17, 2017. Mechel's corporate booth showcased the products of Chelyabinsk Metallurgical Plant, Urals Stampings Plant, Beloretsk Metallurgical Plant, Izhstal and Vyartsilya Metal Products Plant. Over the four days of the exhibition, some 30 employees of Mechel's steel division, including the service and sales company Mechel Service OOO, worked at the booth. Guests were offered full information about various kinds of the Group's products.

"Metal-Expo offers a good opportunity to strengthen our ties with our current clients and attract new ones. During the exposition, several thousand people visited Mechel's booth, and the work was hard. Our managers held dozens of meetings and reached agreements on many contracts," Mechel-Steel Management Company OOO's Chief Executive Officer Andrey Ponomarev noted.

Three of Mechel's enterprises won prestigious awards at Metal-Expo'2017. In the contest of projects on developing and implementing new technologies, equipment and products, Beloretsk Metallurgical Plant won a silver medal for mastering production of steel spring wire tempered in oil. The wire has high plastic and strength properties, which affords its products high elasticity and cyclic life. The wire is used in automobile industry. Chelyabinsk Metallurgical Plant also won a silver medal for its project on producing oversize 50-tonne steel ingots. The plant launched production of these ingots in 2017. Production of oversize ingots requires a powerful steelmaking complex and development and implementation of complicated engineering solutions. Today only a few companies worldwide produce this type of ingot. Izhstal PAO won a silver medal for developing and implementing a new method of smelting stainless nitrogen steel. Products from this type of steel are used in shipbuilding, automobile and oil industries.

Also, several of the Group's corporate media became winners of the Best Corporate Media in the Steelmaking Industry of Russia and the CIS 2017 contest. Southern Kuzbass Coal Company PAO's Miner's Banner newspaper won the Best in Mining Industry nomination, while Mechel Service OOO's Steel Service newspaper was acknowledged the best metal trade corporate electronic media.

Metal-Expo is one of Russia's most popular industrial exhibitions. This year, over 530 companies from 35 countries took part in the expo, with over 30,000 visitors from construction, engineering, fuel and energy, transport, logistics and steel trade industries.
