FORM 10-Q
(Mark One)

☒ QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

For the quarterly period ended September 30, 2015

OR
☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

For the transition period from _____ to _____

Commission File Number 001-33166

Allegiant Travel Company

(Exact Name of Registrant as Specified in Its Charter)

Nevada

20-4745737

(State or Other Jurisdiction of Incorporation or
Organization)

(IRS Employer Identification No.)

1201 North Town Center Drive

Las Vegas, Nevada

89144

(Address of Principal Executive Offices)

(Zip Code)

Registrant's Telephone Number, Including Area Code: (702) 851-7300

(Former name, former address and former fiscal year if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Edgar Filing: Allegiant Travel CO - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of “large accelerated filer,” “accelerated filer,” and “smaller reporting company” in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☒ x

Accelerated filer ☐ o

Non-accelerated filer ☐ o

Smaller reporting company ☐ o

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ o No ☒ y

The number of shares of the registrant’s common stock outstanding as of the close of business on October 15, 2015 was 16,838,157.

ALLEGiant TRAVEL COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(in thousands, except share and per share amounts)
(unaudited)

Note 1 — Summary of Significant Accounting Policies

Basis of Presentation

The accompanying unaudited consolidated financial statements include the accounts of Allegiant Travel Company (the "Company") and its majority-owned operating subsidiaries. Investments in affiliates in which the Company's ownership interest ranges from 20 to 50 percent and in which the Company has the ability to exercise significant influence over operating and financial policies are accounted for under the equity method. All intercompany balances and transactions have been eliminated.

These unaudited consolidated financial statements reflect all normal recurring adjustments, which management believes are necessary to present fairly the financial position, results of operations, and cash flows of the Company for the respective periods presented. Certain information and footnote disclosures normally included in the annual consolidated financial statements prepared in accordance with U.S. generally accepted accounting principles ("U.S. GAAP") have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission for Form 10-Q. These unaudited interim consolidated financial statements should be read in conjunction with the audited consolidated financial statements of the Company and notes thereto included in the annual report of the Company on Form 10-K for the year ended December 31, 2014, filed with the Securities and Exchange Commission.

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities, at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

The interim results reflected in the unaudited condensed consolidated financial statements are not necessarily indicative of the results that may be expected for other interim periods, or for the full year.

Reclassifications related to the adoption of ASU 2015-03 have been made to the prior period's financial statements to conform to 2015 classifications. These reclassifications had no effect on the previously reported net income.

Recent Accounting Pronouncements

In May 2014, the FASB issued ASU 2014-09, intended to create a unified model to determine when and how revenue is recognized. The core principle is that a company should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. On July 9, 2015, the FASB decided to defer the effective date by one year, to December 15, 2017, for annual and interim periods beginning after that date. The FASB has also proposed permitting early adoption of the standard, but not before the original effective date of annual periods beginning after December 15, 2016. The Company is evaluating the impact on its financial statements of adopting this new accounting standard and plans to provide additional information regarding its expected financial impact at a later date.

In April 2015, the FASB issued ASU 2015-03, which amends existing guidance and requires the presentation of debt issuance costs on the balance sheet as a reduction of the carrying amount of the related debt liability rather than as a

deferred charge, effective for fiscal years, and interim periods within those years, beginning on or after December 15, 2015. The Company has adopted this change in accounting principle as of September 30, 2015. As such, debt issuance costs previously reflected on the balance sheet in deposits and other assets, are now reflected as a reduction to long-term debt, in the amount of \$4.1 million and \$4.3 million as of September 30, 2015 and December 31, 2014, respectively.

Note 2 — Investment Securities

The Company's investments in marketable securities are classified as available-for-sale and are reported at fair market value with the net unrealized gain or loss reported as a component of accumulated other comprehensive income ("AOCI") in shareholders' equity. Excluded from the following table is the change in fair value attributable to the foreign currency risk being hedged. Refer to Note 6 - Derivative Instruments for additional information related to the Company's foreign currency

hedge. Investment securities are classified as cash equivalents, short-term investments, and long-term investments based on maturity date. Cash equivalents have maturities of three months or less, short-term investments have maturities of greater than three months but equal to or less than one year, and long-term investments are those with a maturity date greater than one year.

Secured Debt

In September 2015, the Company borrowed \$29.0 million secured by two A319 aircraft. The notes bear interest at a floating rate based on LIBOR plus 1.75 percent and will be payable in quarterly installments through September 2020.

In June 2015, the Company borrowed \$26.5 million secured by two A319 aircraft. The notes bear interest at a floating rate based on LIBOR plus 1.70 percent and will be payable in quarterly installments through June 2020.

In March 2015, the Company borrowed \$30.0 million secured by two A319 aircraft. The notes bear interest at a floating rate based on LIBOR plus 1.70 percent, and are payable in quarterly installments through March 2020.

In March 2015, the Company borrowed \$7.5 million secured by the real estate purchased by the Company in October 2014. The note bears a fixed interest rate of 2.86 percent per annum, and provides for a 25-year amortization and a five-year term.

Note 5 — Fair Value Measurements

The Company measures certain financial assets and liabilities at fair value on a recurring basis. Fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. Accounting standards pertaining to fair value measurements establish a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value as follows:

Level 1 - Defined as observable inputs such as quoted prices in active markets for identical assets or liabilities

Level 2 - Defined as inputs other than Level 1 inputs that are either directly or indirectly observable

Level 3 - Defined as unobservable inputs for which little or no market data exists, therefore requiring an entity to develop its own assumptions

The Company uses the market approach valuation technique to determine fair value for investment securities. The assets classified as Level 1 consist of money market funds for which original cost approximates fair value. The assets classified as Level 2 consist of certificates of deposit, commercial paper, municipal debt securities, federal agency debt securities, government debt securities, and corporate debt securities, which are valued using quoted market prices or alternative pricing sources including transactions involving identical or comparable assets and models utilizing market observable inputs. The Company has no investment securities classified as Level 3.

For those assets classified as Level 2 that are not in active markets, the Company obtains fair value from pricing sources using quoted market prices for identical or comparable instruments, and uses pricing models which include all significant observable inputs; maturity dates, issue dates, settlement dates, benchmark yields, reported trades, broker-dealer quotes, issue spreads, benchmark securities, bids, offers and other market related data. These inputs are observable or can be derived from, or corroborated by, observable market data for substantially the full term of the asset.

The fair value of the Company's derivative instrument is determined using standard valuation models. The significant inputs used in these models are readily available in public markets or can be derived from observable market transactions and therefore have been classified as Level 2. Inputs used in these standard valuation models for derivative instruments include the applicable exchange and interest rates.

Financial instruments measured at fair value on a recurring basis (in thousands):

	As of September 30, 2015	Level 1	Level 2
Cash equivalents			
Money market funds	\$2,826	\$2,826	\$—
Commercial paper	10,349	—	10,349

Total long-term	62,570	—	62,570
Total financial instruments	\$322,730	\$2,826	\$319,904
	As of December 31, 2014	Level 1	Level 2
Cash equivalents			
Money market funds	\$8,377	\$8,377	\$—
Municipal debt securities	101	—	101
Total cash equivalents	8,478	8,377	101
Short-term			
Corporate debt securities	103,961	—	103,961
Municipal debt securities	103,155	—	103,155
Commercial paper	47,940	—	47,940
Certificates of deposit	10,051	—	10,051
Federal agency debt securities	4,710	—	4,710
Total short-term	269,817	—	269,817
Long-term			
Corporate debt securities	30,704	—	30,704
Government debt securities	23,997	—	23,997
Municipal debt securities	2,689	—	2,689
Derivative instruments	1,858	—	1,858
Total long-term	59,248	—	59,248
Total financial instruments	\$337,543	\$8,377	\$329,166

The fair value of the Company's publicly held long-term debt is determined based on inputs that are readily available in public markets or can be derived from information available in publicly quoted markets; therefore, the Company has categorized its publicly held debt as Level 2. The remaining debt agreements are not publicly held. The Company has determined the estimated fair value of these notes to be Level 3, as certain inputs used to determine the fair value of these agreements are unobservable and, therefore, could be sensitive to changes in inputs. The Company utilizes the discounted cash flow method to estimate the fair value of Level 3 debt.

Carrying value and estimated fair value of long-term debt, including current maturities (in thousands):

	As of September 30, 2015		As of December 31, 2014		Hierarchy Level
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value	
Publicly held debt	\$300,000	\$300,750	\$300,000	\$304,875	2
Non-publicly held debt	339,902	319,859	293,099	270,490	3
Total long-term debt	\$639,902	\$620,609	\$593,099	\$575,365	

Due to the short term nature, carrying amounts of cash, cash equivalents, restricted cash, accounts receivable and accounts payable approximate fair value.

Note 6 — Derivative Instruments

In 2014, the Company entered into a foreign currency swap in order to mitigate the foreign currency exchange rate risk associated with the forecasted lease revenue from 12 Airbus A320 series aircraft leased to a European carrier until 2018. The Company uses a cash flow hedge to minimize the variability in cash flows of assets, liabilities and forecasted transactions caused by fluctuations in foreign currency exchange rates. At September 30, 2015, the net change in fair value recorded in AOCI related to the unrealized gain on the hedge was \$0.7 million, when compared to the fair value at December 31, 2014.

At inception, the Company formally designated and documented this financial instrument as a hedge of a specific underlying exposure, the risk management objective, and the strategy for undertaking the hedge transaction. The Company also assessed whether the financial instrument used in the hedging transactions was effective at offsetting changes in either the fair values or cash flows of the related underlying exposures. This assessment is monitored on at least a quarterly basis, and the change in fair market value of any ineffective portion of a financial instrument would be immediately recognized into earnings. For the nine months ended September 30, 2015, the Company realized \$0.6 million in net gains from its cash flow hedge into Other revenue, and as of September 30, 2015, expects \$0.6 million to be reclassified from Other comprehensive income into Other revenue within the next 12 months.

At September 30, 2015, the fair value of the Company's derivative instrument was \$2.5 million and is reported in the Company's consolidated balance sheet within deposits and other assets. Refer to Note 5 - Fair Value Measurements for additional information related to the estimated fair value.

Note 7 — Shareholders' Equity

The Company is authorized by the Board of Directors to acquire its stock through open market purchases under its share repurchase program. As repurchase authority is used, the Board of Directors has, to date, authorized additional expenditures for share repurchases.

Share repurchases consisted of the following during the periods indicated:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Shares repurchased	175,142	223,147	644,603	953,309
Average price per share	\$218.67	\$118.53	\$185.43	\$103.44
Total (in thousands)	\$38,298	\$26,449	\$119,530	\$98,606

During the three months ended September 30, 2015, the Company declared and paid cash dividends of \$0.30 per share, or \$5.1 million. During the nine months ended September 30, 2015, the Company declared and paid cash

dividends of \$0.80 per share, or \$13.7 million.

Note 8 — Earnings per Share

Basic and diluted earnings per share are computed pursuant to the two-class method. Under this method, the Company attributes net income to two classes: common stock and unvested restricted stock. Unvested restricted stock awards granted to

12

employees under the Company's Long-Term Incentive Plan are considered participating securities as they receive non-forfeitable rights to cash dividends at the same rate as common stock.

Diluted net income per share is calculated using the more dilutive of the two methods. Under both methods, the exercise of employee stock options is assumed using the treasury stock method. The assumption of vesting of restricted stock, however, differs:

1. Assume vesting of restricted stock using the treasury stock method.
2. Assume unvested restricted stock awards are not vested, and allocate earnings to common shares and unvested restricted stock awards using the two-class method.

For the three and nine months ended September 30, 2015, the second method, which assumes unvested awards are not vested, was used in the computation because it was more dilutive than the first method. The following table sets forth the computation of net income per share, on a basic and diluted basis, for the periods indicated (share and dollar amounts in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Basic:				
Net income attributable to Allegiant Travel Company	\$44,458	\$ 14,172	\$ 163,665	\$81,892
Less net income allocated to participating securities	(199) (90) (802) (586
Net income attributable to common stock	\$44,259	\$ 14,082	\$ 162,863	\$81,306
Net income per share, basic	\$2.63	\$0.80	\$9.57	\$4.56
Weighted-average shares outstanding	16,831	17,605	17,010	17,848
Diluted:				
Net income attributable to Allegiant Travel Company	\$44,458	\$ 14,172	\$ 163,665	\$81,892
Less net income allocated to participating securities	(198) —	(800) (584
Net income attributable to common stock	\$44,260	\$ 14,172	\$ 162,865	\$81,308
Net income per share, diluted	\$2.62	\$0.80	\$9.55	\$4.54
Weighted-average shares outstanding	16,831	17,605	17,010	17,848
Dilutive effect of stock options, restricted stock and stock-settled stock appreciation rights	68	99	68	101
Adjusted weighted-average shares outstanding under treasury stock method	16,899	17,704	17,078	17,949
Participating securities excluded under two-class method	(30) N/A	(28) (37
Adjusted weighted-average shares outstanding under two-class method	16,869	N/A	17,050	17,912

For the three and nine months ended September 30, 2015, anti-dilutive shares excluded from the calculation of earnings per share were not material.

Note 9 — Commitments and Contingencies

The Company is subject to certain legal and administrative actions it considers routine to business activities. The Company believes the ultimate outcome of any pending legal or administrative matters will not have a material adverse impact on its financial position, liquidity or results of operations.

As of September 30, 2015, the Company had firm commitments to purchase the following aircraft:

Aircraft Type	Number of Aircraft Under Contract
Airbus A319	10
Airbus A320	5

Future minimum fixed payments for the Company's commitments related to the acquisition of aircraft, airport fees under use and lease agreements, and other operating lease obligations (in thousands):

	As of September 30, 2015
Remaining in 2015	\$77,153
2016	118,556
2017	73,576
2018	2,801
2019	2,709
Thereafter	3,150
Total commitments	\$277,945

Note 10 — Related Party Transactions

The Company previously entered into lease agreements for approximately 70,000 and 10,000 square feet of office space in buildings for which the Company's Chairman and Chief Executive Officer ("CEO"), and an additional member of its Board of Directors, own minority interests as limited partners. For the nine months ended September 30, 2015 and 2014, the Company made rent payments under these leases totaling \$1.1 million and \$2.5 million, respectively. In early 2015, the Company exercised its option to terminate the lease for 70,000 square feet of office space (original expiration in April 2018) which was subsequently challenged by the managing members of that entity. As a result, the Company filed a declaratory judgment action seeking clarification regarding whether the early termination option was properly exercised and the amount owed upon early termination.

Game Plane, LLC, a wholly owned subsidiary of the Company, partnered with Alpine Labs, LLC to produce and distribute game shows filmed on Company flights. The Company's Chairman and CEO owns a 25 percent interest in, and is on the managing board of, Alpine Labs, LLC. For the nine months ended September 30, 2015 and 2014, the Company made payments of \$0.4 million and \$2.5 million, respectively, to Alpine Labs, LLC. No further expenses are expected to be incurred related to this transaction.

For the nine months ended September 30, 2015, the Company made payments totaling \$2.1 million to entities owned or controlled by the Company's Chairman and CEO for the building of corporate training content. The amount paid during the same period in 2014 was nominal. In October 2015, the Company's Board of Directors approved an additional commitment of \$3.5 million to be spent on training content. The project is expected to conclude in 2016.

GMS Racing, LLC competes in the NASCAR Camping World Truck Series and ARCA Racing Series. The Company's Chairman and CEO owns a controlling interest in GMS Racing, LLC. During the nine months ended September 30, 2015, the Company made sponsorship payments in the amount of \$2.3 million. An additional payment of \$0.2 million will be made in fourth quarter 2015, after which no further payments are anticipated. No payments were made to GMS Racing, LLC during the nine months ended September 30, 2014.

In September 2014, as part of its stock repurchase plan, the Company repurchased all of Andrew Levy's (former President, Director, and Chief Operating Officer) unvested shares of restricted stock (23,623 shares at \$124.05) and all of his unexercised stock options (options to purchase 127,512 shares at exercise prices between \$36.97 per share

and \$108.59 per share) for a total payment of approximately \$8.5 million. Also in September 2014, the Company repurchased 200,000 shares of its common stock from its Chairman and CEO at \$126.20 per share, for a total purchase price of \$25.2 million. The repurchase prices of the common stock listed above were based on the average closing market price of the Company's stock over the five trading days prior to each sale date.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis presents factors that had a material effect on our results of operations during the three and nine months ended September 30, 2015 and 2014. Also discussed is our financial position as of September 30, 2015 and December 31, 2014. You should read this discussion in conjunction with our unaudited consolidated financial statements, including the notes thereto, appearing elsewhere in this Form 10-Q and our consolidated financial statements appearing in our annual report on Form 10-K for the year ended December 31, 2014. This discussion and analysis contains forward-looking statements. Please refer to the section entitled "Special Note About Forward-Looking Statements" for a discussion of the uncertainties, risks and assumptions associated with these statements.

Third quarter 2015 results

Results for the period ended:

Notable highlights include:

- total operating revenue increase of \$34.9 million, or 13.2 percent,
- operating margin of 25.7 percent,
- increase in net income of \$30.3 million over third quarter 2014,
- \$2.62 earnings per share (fully diluted),
- selling of 296 routes versus 236 in 2014,
- return of \$38.3 million to shareholders through repurchases and cash dividends of \$5.1 million.

Cost per available seat mile ("CASM") decreased 23.5 percent for the third quarter 2015 when compared to the same period in 2014, which was primarily attributable to a decrease in fuel expense driven by a drop in system average price per gallon. This decrease was offset by an increase in system gallons consumed needed to support a 23.3 percent increase in system capacity.

Beyond fuel, our operating expenses are typically influenced by changes in capacity. In response to lower fuel costs, we grew capacity, which provided more ASMs over which to spread costs. Despite an overall increase in non-fuel operating expenses, CASM, excluding fuel decreased 11.3 percent compared to 2014. On a total expense basis, station expense increased as our system departures increased. Salary and benefits expense increased, reflecting growth in the number of full-time equivalent employees needed to support flying, as well as a significant increase in our bonus accrual, which is directly tied to our operating income.

As of September 30, 2015, we had \$385.6 million in unrestricted cash and investment securities, down from \$416.8 million as of December 31, 2014. For the nine months ended September 30, 2015, we deployed cash of \$173.9 million for capital expenditures, returned \$121.1 million to shareholders through share repurchases, and paid \$57.4 million in dividends. These cash outlays were offset by \$267.6 million in cash flows from operations, as well as raising debt of \$93.0 million during the year.

Aircraft

The following table sets forth the aircraft owned and operated by us as of:

	September 30, 2015	December 31, 2014	September 30, 2014
MD83/88	51	53	53
B757-200	6	6	6
A319 (1)	7	4	3
A320	10	7	7
Total	74	70	69

(1) Excludes 12 aircraft on lease to a European carrier until 2018.

Airbus Aircraft

In August 2015, we entered into a forward purchase agreement for one Airbus A320 series aircraft. We expect to take delivery of this aircraft in the fourth quarter 2015.

In April 2015, we purchased and took delivery of three Airbus A320 series aircraft, two of which are expected to enter our operating fleet in the fourth quarter 2015. One of these aircraft was included in our operating fleet as of the date of this report.

In February 2015, we entered into forward purchase agreements for eight Airbus A320 series aircraft. We took delivery of three aircraft in the third quarter 2015; the remaining deliveries are expected from fourth quarter 2015 through 2017.

In January 2015, we entered into a forward purchase agreement for four Airbus A320 series aircraft. We expect to take delivery of these aircraft in 2017.

Fleet Plan

The following table provides the number of operating aircraft expected to be in service, based on planned retirements and existing aircraft purchase agreements, at the end of the year indicated:

	December 31, 2015	December 31, 2016
MD-80	51	46
B757-200	5	4
A319	10	17
A320	15	16
Total	81	83

Network

As of September 30, 2015, we were selling 296 routes, including 25 routes with service to begin in the fourth quarter 2015 and first quarter 2016. This represents a more than 25 percent increase over the same period in 2014. The following illustrates the number of destinations and under-served cities, and routes operated as of the dates indicated (includes cities served seasonally):

	September 30, 2015	December 31, 2014	September 30, 2014
Leisure destinations	17	13	13
Under-served cities	87	83	83
Total cities	104	96	96

Total routes	271	233	231
--------------	-----	-----	-----

Trends and Uncertainties

Fuel costs, in the long-term, remain uncertain and fuel cost volatility could materially affect our future operating costs.

16

Of our 271 routes as of September 30, 2015, new markets (cities added within the last year) accounted for 79 percent of the quarter over quarter ASM growth, and over half of our network is now flying to East Coast markets. We have also announced service on 17 new routes and two new cities; San Antonio, TX and Kansas City, MO, each starting in November 2015. We continue expansion to and from medium-sized markets such as the above new cities, which have performed well and have not attracted significant competition to date.

In response to low fuel prices, a large portion of our growth in the third quarter is attributable to added off-peak flying (Tuesdays, Wednesdays and Saturdays), putting pressure on unit revenues but having a positive effect on profitability. We expect to continue adding off-peak flying as long as it remains accretive to earnings. We achieved a 23.3 percent increase in system capacity (ASMs) during the quarter, with an 8.3 percent increase in average number of aircraft in service along with a 14.0 percent increase in average block hours per aircraft per day.

We have two employee groups which have voted for union representation: pilots and flight attendants. These employees make up approximately 51 percent of our total employee base. Any labor actions following an inability to reach collective bargaining agreements with these employee groups could materially impact our operations during the continuance of any such activity.

RESULTS OF OPERATIONS

Comparison of three months ended September 30, 2015 to three months ended September 30, 2014

Operating Revenue

Scheduled service revenue. Scheduled service revenue for the third quarter 2015 increased by \$3.1 million, or 1.9 percent, compared with 2014. This was primarily driven by a 22.8 percent increase in scheduled service passengers attributable to a 28.1 percent increase in scheduled service departures, offset by a 17.1 percent decrease in scheduled service average base fare. In particular, our growth in off-peak flying has significantly increased capacity and, in-turn, put pressure on unit revenues. Base fares have been impacted by increased government mandated taxes and implementation of the credit card fee reimbursement charge, both of which have contributed to the decrease in per-passenger scheduled service revenue for third quarter 2015 when compared to the same period in 2014.

Ancillary air-related charges. Ancillary air-related charges for the third quarter 2015 increased \$30.4 million, or 39.3 percent, compared with 2014 due mostly to the increase in scheduled service passengers. Additionally, optimization efforts related to ancillary products and fees drove a 13.4 percent increase in average ancillary air-related fare per passenger. In particular, an increase in our customer convenience fee and effective yield management of other existing products have contributed to growth in this area.

Ancillary third party products. Ancillary third party products revenue in the third quarter 2015 increased \$1.8 million, or 22.8 percent, over the same period in 2014. This was primarily attributable to the increase in scheduled service passengers, which drove a 53.8 percent increase in rental car days purchased, mostly serving our East Coast destinations. The increase in rental car revenue was offset by the effect of a 17.0 percent decrease in hotel room night production.

Third party products consist of revenue from the sale of hotel rooms, ground transportation (rental cars and hotel shuttle products), attraction and show tickets, and fees we receive from other merchants selling products through our website. The following table details the calculation of ancillary revenue from third party products for the periods indicated:

(in thousands except room nights and rental car days)	Three Months Ended September 30,		Percentage	
	2015	2014	Change	%
Gross ancillary revenue - third party products	\$31,319	\$27,451	14.1	
Cost of goods sold	(21,148)	(18,948)	11.6	

Edgar Filing: Allegiant Travel CO - Form 10-Q

Transaction costs (a)	(281)	(452)	(37.8)
Ancillary revenue - third party products	\$9,890		\$8,051		22.8	
As percent of gross ancillary revenue - third party	31.6	%	29.3	%	2.3 pp	
Hotel room nights	103,750		125,048		(17.0)
Rental car days	305,750		198,794		53.8	%
(a) Includes payment expenses and travel agency commissions.						

Fixed fee contract revenue. Fixed fee contract revenue for the third quarter 2015 decreased 5.3 percent from 2014, as certain charter activity shifted to the fourth quarter 2015.

Other revenue. Other revenue for the third quarter 2015 decreased slightly compared with 2014, due mostly to foreign currency exchange rates from aircraft lease revenue related to 12 Airbus A320 series aircraft currently on lease to a European carrier.

Operating Expenses

We primarily evaluate our expense management by comparing our costs per passenger and per ASM across different periods, which enables us to assess trends in each expense category. The following table presents operating expense per passenger for the indicated periods. The table also presents operating expense per passenger, excluding fuel, a statistic which provides management and investors the ability to measure and monitor our cost performance absent fuel price volatility. Both the cost and availability of fuel are subject to many economic and political factors beyond our control.

	Three Months Ended September 30,		Percentage
	2015	2014	Change
Aircraft fuel	\$28.20	\$48.10	(41.4)%
Salary and benefits	24.36	26.43	(7.8)
Station operations	10.93	10.68	2.3
Maintenance and repairs	10.48	11.44	(8.4)
Sales and marketing	1.67	3.96	(57.8)
Aircraft lease rentals	0.29	0.79	(63.3)
Depreciation and amortization	10.06	11.24	(10.5)
Other	6.08	7.12	(14.6)
Operating expense per passenger	\$92.07	\$119.76	(23.1)%
Operating expense per passenger, excluding fuel	\$63.87	\$71.66	(10.9)%

The following table presents unit costs, defined as Operating CASM, for the indicated periods. The table also presents Operating CASM, excluding fuel, which represents operating expenses, less aircraft fuel expense, divided by ASMs. As on a per passenger basis, excluding fuel on a per ASM basis provides management and investors the ability to measure and monitor our cost performance absent fuel price volatility.

	Three Months Ended September 30,		Percentage
	2015	2014	Change
Aircraft fuel	2.63	¢ 4.50	¢ (41.6)%
Salary and benefits	2.27	2.47	(8.1)
Station operations	1.02	1.00	2.0
Maintenance and repairs	0.98	1.07	(8.4)
Sales and marketing	0.16	0.37	(56.8)
Aircraft lease rentals	0.03	0.07	(57.1)
Depreciation and amortization	0.94	1.05	(10.5)
Other	0.55	0.68	(19.1)
Operating expense per ASM (CASM)	8.58	¢ 11.21	¢ (23.5)%
CASM, excluding fuel	5.95	¢ 6.71	¢ (11.3)%

Aircraft fuel expense. Aircraft fuel expense decreased \$26.6 million, or 28.0 percent, for the third quarter 2015 compared to 2014. The decrease was primarily the result of a 41.3 percent decrease in system average fuel cost per gallon, which was offset by a 22.7 percent increase in system fuel gallons consumed resulting from a 23.3 percent increase in total system capacity. As we add additional Airbus aircraft, which are more fuel efficient than our MD-80 aircraft, we anticipate our fuel efficiency will continue to improve. Airbus aircraft flew 31.7 percent of scheduled

service ASMs in the third quarter 2015, compared to 20.8 percent in the same quarter 2014.

Salary and benefits expense. Excluding a one-time expense of \$7.3 million related to the departure of our former President and COO in September 2014, salary and benefits expense increased \$14.2 million, or 31.6 percent, for the third quarter 2015 when compared to the same period last year. The increase is primarily attributable to a 14.6 percent increase in the number of full-time equivalent employees ("FTEs") needed to support an 8.3 percent increase in average number of aircraft in service as well as network growth. In addition, a year over year increase in profitability drove a \$3.9 million increase in our bonus accrual, and a favorable increase in our stock price led to a \$3.7 million increase in stock compensation expense.

Station operations expense. Station operations expense for the third quarter 2015 increased 25.6 percent, which was slightly outpaced by a 27.4 percent increase in system departures, compared with the same period in 2014. Station expense per departure decreased 1.4 percent compared to last year.

Maintenance and repairs expense. Maintenance and repairs expense for the third quarter 2015 increased \$2.8 million, or 12.4 percent, compared to the same period in 2014. Our average number of aircraft in service increased and we had three additional aircraft heavy maintenance events in third quarter 2015.

Sales and marketing expense. Sales and marketing expense for the third quarter 2015 decreased \$3.8 million compared to the same period in 2014, primarily due to a reduction in credit card fees paid by us. We implemented a credit card fee reimbursement charge, at zero margin, in the fourth quarter 2014, which is applied as a reduction to this expense.

Aircraft lease rentals expense. Aircraft lease rental expense for the third quarter 2015 decreased \$0.9 million compared to the same period in 2014, as we flew fewer sub-service flights in the current quarter. We do not currently lease aircraft.

Depreciation and amortization expense. Depreciation and amortization expense for the third quarter 2015 increased \$2.2 million, or 9.8 percent, compared to 2014 due mainly to an 8.3 percent increase in the average number of operating aircraft (all Airbus aircraft). Additionally, our Airbus aircraft will continue to comprise a larger percentage of total depreciation expense as more are added to revenue service and as our MD-80 fleet is nearing full depreciation. This trend will continue to be favorable going forward as we will soon operate fully depreciated MD-80 aircraft.

Other expense. Other expense for the third quarter 2015 increased 5.0 percent compared to 2014, due primarily to increased flight crew training needed to support our growing operating fleet.

Other (Income) Expense

Other expense for the third quarter 2015 decreased 8.3 percent compared to the same period in 2014, due mainly to lower variable rate interest in the current year.

Income Tax Expense

Our effective income tax rate increased to 37.1 percent for the three months ended September 30, 2015, up from 35.8 percent for the same period of 2014, mostly due to additional foreign taxes, net of foreign tax credits.

Comparison of nine months ended September 30, 2015 to nine months ended September 30, 2014

Operating Revenue

Scheduled service revenue. Scheduled service revenue for the nine months ended September 30, 2015 decreased \$2.7 million compared with 2014. The decrease was primarily the result of a 13.8 percent decrease in scheduled service average base fare, offset by a 15.4 percent increase in scheduled service passengers attributable to a 19.1 percent increase in scheduled service departures. Our growth in off-peak flying has significantly increased capacity and, in-turn, put pressure on unit revenues. Base fares have been impacted by increased government mandated taxes and implementation of the credit card fee reimbursement charge, both of which have contributed to the decrease in

per-passenger scheduled service revenue for the nine months ended September 30, 2015 when compared to the same period in 2014.

Ancillary air-related charges. Ancillary air-related charges for the nine months ended September 30, 2015 increased \$77.6 million, or 31.2 percent, compared with 2014. This was primarily due to the increase in scheduled service passengers as well as our optimization efforts related to ancillary products and fees, driving a 13.7 percent increase in average ancillary air-related fare per passenger. Namely, our increased customer convenience fee and effective yield management of other existing products have contributed to growth in this area.

Ancillary third party products. Ancillary third party products revenue for the nine months ended September 30, 2015 increased \$3.3 million, or 11.7 percent, over the same period in 2014. This increase was due to the increase in scheduled service passengers, which drove a 29.6 percent increase in rental car days sold, mostly serving our East Coast destinations. This was offset by the effect of a 10.5 percent decrease in hotel room night production.

The following table details the calculation of ancillary revenue from third party products for the periods indicated:

	Nine Months Ended September 30,		Percentage	
(in thousands except room nights and rental car days)	2015	2014	Change	
Gross ancillary revenue - third party products	\$104,612	\$95,552	9.5	%
Cost of goods sold	(71,798)	(65,783)	9.1	
Transaction costs (a)	(1,151)	(1,431)	(19.6))
Ancillary revenue - third party products	\$31,663	\$28,338	11.7	
As percent of gross ancillary revenue - third party	30.3	% 29.7	% 0.6 pp	
Hotel room nights	362,592	405,293	(10.5))
Rental car days	939,888	725,138	29.6	%
(a) Includes payment expenses and travel agency commissions.				

Fixed fee contract revenue. Fixed fee contract revenue for the nine months ended September 30, 2015 increased \$1.5 million compared with 2014, mostly due to first quarter 2015 NCAA March Madness flights in which we did not participate during 2014 due to pilot availability.

Other revenue. Other revenue for the nine months ended September 30, 2015 increased \$13.5 million compared with 2014, primarily from aircraft lease revenue related to 12 Airbus A320 series aircraft currently on lease to a European carrier, for which revenue was not generated until June 2014.

Operating Expenses

The following table presents operating expense per passenger for the indicated periods:

	Nine Months Ended September 30,		Percentage	
	2015	2014	Change	
Aircraft fuel	\$30.39	\$49.82	(39.0))%
Salary and benefits	23.97	23.57	1.7	
Station operations	10.47	10.25	2.1	
Maintenance and repairs	9.87	10.44	(5.5))
Sales and marketing	2.37	3.60	(34.2))
Aircraft lease rentals	0.29	2.08	(86.1))
Depreciation and amortization	10.31	9.75	5.7	
Other	6.64	6.12	8.5	
Operating expense per passenger	\$94.31	\$115.63	(18.4))%
Operating expense per passenger, excluding fuel	\$63.92	\$65.81	(2.9))%

The following table presents unit costs, defined as Operating CASM, for the indicated periods:

	Nine Months Ended September 30,		Percentage	
	2015	2014	Change	
Aircraft fuel	2.78	¢ 4.55	¢ (38.9)%
Salary and benefits	2.19	2.15	1.9

Operating expense per ASM (CASM)	8.62	¢ 10.55	¢ (18.3)%
CASM, excluding fuel	5.84	¢ 6.00	¢ (2.7)%

Aircraft fuel expense. Aircraft fuel expense decreased \$91.3 million, or 29.6 percent, for the nine months ended September 30, 2015 compared to the same period in 2014. The decrease was primarily due to a 38.6 percent decrease in system average fuel cost per gallon, offset by a 14.7 percent increase in system fuel gallons consumed resulting from a 15.3 percent increase in total system capacity. As we add additional Airbus aircraft, which are more fuel efficient than our MD-80 aircraft, we anticipate our fuel efficiency will continue to improve. Airbus aircraft flew 29.4 percent of scheduled service ASMs during the nine months ended September 30, 2015, compared to 19.9 percent for the same period in 2014.

Salary and benefits expense. Excluding a one-time expense of \$7.3 million related to the departure of our former President and COO in September 2014, salary and benefits expense increased \$32.6 million, or 23.5 percent for the nine months ended September 30, 2015 compared to the same period in 2014. The increase is attributable to a 14.6 percent increase in the number of FTEs associated with a 7.1 percent increase in average number of aircraft in service, as well as overall company growth. Our increased profitability also led to a \$10.9 million increase in our bonus accrual, and a significant increase in our stock price resulted in a \$4.0 million increase in stock compensation expense. Station operations expense. Station operations expense for the nine months ended September 30, 2015 increased \$11.3 million, or 17.8 percent, compared to the same period in 2014, which was slightly outpaced by a 19.2 percent increase in system departures. Station expense per departure decreased 1.1 percent compared to last year.

Maintenance and repairs expense. Maintenance and repairs expense for the nine months ended September 30, 2015 increased \$5.9 million, or 9.1 percent, compared with the same period in 2014. Our average number of aircraft in service increased and we had two additional aircraft heavy maintenance events in 2015 compared to 2014.

Sales and marketing expense. Sales and marketing expense for the nine months ended September 30, 2015 decreased \$5.4 million, or 24.1 percent, compared to the same period in 2014, largely due to a reduction in credit card fees paid by us. We implemented a credit card fee reimbursement charge, at zero margin, in December 2014, which is applied as a reduction to this expense.

Aircraft lease rentals expense. Aircraft lease rentals expense for the nine months ended September 30, 2015 decreased \$10.8 million compared to the same period in 2014. This decrease was primarily due to a significant reduction in sub-service flights needed because pilot availability stabilized in 2015. We do not currently lease aircraft.

Depreciation and amortization expense. Depreciation and amortization expense for the nine months ended September 30, 2015 increased \$13.2 million, or 21.9 percent, compared to the same period in 2014. This change is due to a 7.1 percent increase in the average number of operating aircraft, as well as depreciation taken on 12 purchased aircraft leased to a European carrier since June 2014, which are non-ASM producing. Additionally, our Airbus aircraft will continue to comprise a larger percentage of total depreciation expense as more are added to revenue service and as our MD-80 fleet is nearing full depreciation. This trend will continue to be favorable going forward as we will soon operate fully depreciated MD-80 aircraft.

Other expense. Other expense for the nine months ended September 30, 2015 increased \$9.6 million, or 25.3 percent, compared to 2014. This is primarily due to increased crew training events in 2015, as well as expenses incurred to support improvement and development of technology projects.

Other (Income) Expense

Other expense for the nine months ended September 30, 2015 increased \$6.4 million compared to the same period in 2014. The increase is due to interest expense on additional borrowings, primarily driven by the issuance of \$300.0 million of senior unsecured notes in June 2014.

Income Tax Expense

Our effective income tax rate was 36.7 percent for the nine months ended September 30, 2015, down slightly from 37.0 percent for the same period in 2014.

Comparative Consolidated Operating Statistics

The following tables set forth our operating statistics for the periods indicated:

	Three Months Ended September 30,		Percent
	2015	2014	Change*
Operating statistics (unaudited):			
Total system statistics:			
Passengers	2,420,819	1,971,917	22.8
Revenue passenger miles (RPMs) (thousands)	2,235,683	1,867,660	19.7
Available seat miles (ASMs) (thousands)	2,597,658	2,106,214	23.3

LIQUIDITY AND CAPITAL RESOURCES

Current liquidity

Cash, restricted cash and investment securities (short-term and long-term) decreased from \$428.8 million at December 31, 2014 to \$398.8 million at September 30, 2015. Restricted cash represents escrowed funds under fixed fee contracts and cash collateral against letters of credit required by hotel properties for guaranteed room availability, airports and certain other parties. Investment securities represent highly liquid marketable securities which are available-for-sale. Under our fixed fee flying contracts, we require our customers to prepay for flights to be provided by us. The prepayments are escrowed until the flight is completed and are recorded as restricted cash with a corresponding amount as air traffic liability. Our restricted cash balance increased from \$12.0 million at December 31, 2014 to \$13.2 million at September 30, 2015.

As of September 30, 2015, our unrestricted cash and investment securities balance (including short-term and long-term investments) was \$385.6 million.

During 2015, our primary source of funds was \$267.6 million generated by operations, as well as \$93.0 million of financing proceeds. Our operating cash flows and recent borrowings have allowed us to return value to shareholders and invest in the growth of our fleet, information technology infrastructure and development, and maintain our cash position, while meeting short-term obligations. Our future capital needs are primarily for the acquisition of additional aircraft, including our existing Airbus A320 series aircraft purchase agreements. We believe we have more than adequate liquidity resources through our operating cash flows, borrowings, and cash balances, to meet our future contractual obligations. We continue to consider raising funds through debt financing on an opportunistic basis.

In addition to our recurring quarterly cash dividend, we plan to continue repurchasing our stock in the open market and consider special cash dividends, subject to availability of cash resources and compliance with our debt covenants. As of September 30, 2015, we had \$61.7 million of remaining authority under our stock repurchase plan. There is no expiration date for the program.

Debt

Our long-term debt obligations increased from \$588.8 million as of December 31, 2014 to \$635.8 million as of September 30, 2015.

Sources and Uses of Cash

Operating Activities. During the nine months ended September 30, 2015, our operating activities provided \$267.6 million of cash compared to \$195.2 million during the same period of 2014. Operating cash inflows are primarily derived from providing air transportation to customers, for which the majority of tickets are purchased prior to the day travel occurs. Net cash provided by operations during the nine months ended September 30, 2015 increased compared to the same period of 2014 mostly due to increased net income, after adjusting for an increase of \$13.2 million in depreciation and amortization expense over the prior period.

Investing Activities. Cash used in investing activities was \$153.0 million for the nine months ended September 30, 2015 compared to \$269.0 million for the same period in 2014. During the nine months ended September 30, 2015 and 2014, our primary use of cash was for the purchase of property and equipment of \$173.9 million and \$188.1 million, respectively. These capital expenditures were offset by proceeds from the maturities of investment securities, net of purchases, of \$20.2 million and \$81.6 million for the nine months ended September 30, 2015 and 2014, respectively. **Financing Activities.** Cash used in financing activities for the nine months ended September 30, 2015 was \$125.6 million compared to \$62.3 million of cash provided by financing activities for the same period in 2014. During the nine months ended September 30, 2015, we paid cash dividends of \$57.4 million and repurchased common stock for \$121.1 million. These were offset by \$46.6 million of proceeds from the issuance of debt, net of principal payments.

During the same period in 2014, our primary use of cash was the payment of cash dividends of \$41.8 million and repurchase of common stock for \$129.3 million. These uses were more than offset by \$229.7 million of proceeds from the issuance of debt, net of principal payments, which included \$300.0 million from the closing of our high yield bond in June 2014.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

A description of our critical accounting policies is included in Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2014. There has been no material change to these policies during the nine months ended September 30, 2015.

SPECIAL NOTE ABOUT FORWARD-LOOKING STATEMENTS

We have made forward-looking statements in this quarterly report on Form 10-Q, and in this section entitled “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” that are based on our management’s beliefs and assumptions and on information currently available to our management. Forward-looking statements include information concerning our possible or assumed future results of operations, business strategies, fleet plan, financing plans, competitive position, industry environment, potential growth opportunities, future service to be provided and the effects of future regulation and competition. Forward-looking statements include all statements that are not historical facts and can be identified by the use of forward-looking terminology such as the words “believe,” “expect,” “anticipate,” “intend,” “plan,” “estimate,” “project” or similar expressions.

Forward-looking statements involve risks, uncertainties and assumptions. Actual results may differ materially from those expressed in the forward-looking statements. Important risk factors that could cause our results to differ materially from those expressed in the forward-looking statements may be found in our periodic reports filed with the Securities and Exchange Commission at www.sec.gov. These risk factors include, without limitation, volatility of fuel costs, labor issues, the ability to obtain regulatory approvals as needed, the effect of economic conditions on leisure travel, debt balances, debt covenants, terrorist attacks, risks inherent to airlines, demand for air services to our leisure destinations from the markets served by us, our dependence on our leisure destination markets, the competitive environment, an accident involving, or problems with, our aircraft, our reliance on our automated systems, our reliance on third parties who provide facilities or services to us, the possible loss of key personnel, economic and other conditions in markets in which we operate, aging aircraft and other governmental regulation, increases in maintenance costs and cyclical and seasonal fluctuations in our operating results.

Any forward-looking statements are based on information available to us today and we undertake no obligation to update publicly any forward-looking statements, whether as a result of future events, new information or otherwise.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

We are subject to certain market risks, including commodity prices (specifically aircraft fuel). The adverse effects of changes in these markets could pose potential losses as discussed below. The sensitivity analysis provided does not consider the effects that such adverse changes may have on overall economic activity, nor does it consider additional actions we may take to mitigate our exposure to such changes. Actual results may differ.

Aircraft Fuel. Our results of operations can be significantly impacted by changes in the price and availability of aircraft fuel. Aircraft fuel expense represented 32.2 percent of our operating expenses for the nine months ended September 30, 2015. Increases in fuel prices, or a shortage of supply, could have a material impact on our operations and operating results. Based on our fuel consumption for the three and nine months ended September 30, 2015, a hypothetical ten percent increase in the average price per gallon of fuel would have increased fuel expense by approximately \$6.8 million and \$21.8 million, respectively.

Interest Rates. We have market risk associated with changing interest rates due to the short-term nature of our cash and investment securities, which totaled \$78.5 million in cash and cash equivalents and \$247.0 million in short-term investments at September 30, 2015. We invest available cash in government and corporate debt securities, investment grade commercial paper, and other highly rated financial instruments. Because of the short-term nature of these

investments, the returns earned closely parallel short-term floating interest rates. A hypothetical 100 basis point change in interest rates for the three and nine months ended September 30, 2015 would have affected interest income from cash and investment securities by \$0.7 million and \$2.6 million, respectively.

As of September 30, 2015, we had \$291.4 million, including current maturities, of variable-rate debt. A hypothetical 100 basis point change in market interest rates for the three and nine ended September 30, 2015 would not have had a material effect on the fair value of our variable-rate debt instruments, or materially impacted our earnings or cash flow associated with this debt.

As of September 30, 2015, we had \$344.4 million, including current maturities, of fixed-rate debt, which had a fair value of \$344.0 million. At December 31, 2014, we had \$343.6 million, including current maturities, of fixed-rate debt, which had a fair value of \$347.6 million.

See Item 7A "Quantitative and Qualitative Disclosures About Market Risk" in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, for further information about market risk.

Item 4. Controls and Procedures.

(a) Evaluation of disclosure controls and procedures. As of the end of the period covered by this report, under the supervision and with the participation of our management, including our chief executive officer ("CEO") and chief financial officer ("CFO"), we evaluated the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended, or the "Exchange Act"). Based on this evaluation, our management, including our CEO and CFO, has concluded that our disclosure controls and procedures are designed, and are effective, to give reasonable assurance that the information we are required to disclose is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Based upon this evaluation, the CEO and CFO concluded that our disclosure controls and procedures are effective in providing reasonable assurance that information required to be disclosed in our reports filed with or submitted to the SEC under the Exchange Act is accumulated and communicated to management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosure.

(b) Changes in internal controls. There were no changes in our internal control over financial reporting that occurred during the quarter ending September 30, 2015, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

We are subject to certain other legal and administrative actions we consider routine to our business activities. We believe the ultimate outcome of any pending legal or administrative matters will not have a material adverse impact on our financial position, liquidity or results of operations.

Item 1A. Risk Factors

We have evaluated our risk factors and determined there are no changes to the risk factors set forth in Part I, Item 1A in the Form 10-K since we filed our Annual Report on Form 10-K on February 26, 2015.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Our Repurchases of Equity Securities

The following table reflects the repurchases of our common stock during the third quarter 2015:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet be Purchased Under the Plans or Programs (in thousands) (1)
July 2015 (2)	165	\$ 205.00	—	
August 2015	118,942	223.01	118,942	
September 2015	56,200	209.48	56,200	
Total	175,307	\$ 218.66	175,142	\$61,702

(1) Represents the remaining dollar amount of open market purchases of our common stock which has been authorized by the Board of Directors under a share repurchase program.

(2) Total number of shares purchased during the quarter from employees who vested a portion of their restricted stock grants. These stock repurchases were made at the election of each employee pursuant to an offer to repurchase by us. In each case, the shares repurchased constituted the portion of vested shares necessary to satisfy income tax withholding requirements.
