Shares of closed-end funds frequently trade at a discount to their net asset value, which may increase the risk of loss. This risk may be greater for investors expecting to sell their Common Shares in a relatively short period of time after completion of this offering. Investors will be acquiring shares at a premium to net asset value, therefore investors in this offering are likely to experience an immediate dilution of their investment.

Investing in the Fund's Common Shares involves certain risks. See "Risks" beginning on page 65 of the Prospectus. You should consider carefully these risks together with all of the other information contained in the Prospectus Supplement and the Prospectus before making a decision to purchase Common Shares.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this Supplement, the Prospectus Supplement or the Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.
