ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Fiscal Year Ended October 3, 2009
OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from ____ to ____
Commission File Number 001-10684

International Game Technology

Nevada
(State of Incorporation)

88-0173041
(I.R.S. Employer Identification No.)

9295 Prototype Drive, Reno, Nevada 89521
(Address of principal executive offices)

Registrant's telephone number, including area code: (775) 448-7777
Registrant's website: www.IGT.com

Securities registered pursuant to Section 12(b) of the Act:

| Title of Each Class | Name of Each Exchange on Which Registered |
|-------------------------------------|---|
| Common Stock, Par Value \$.00015625 | New York Stock Exchange |

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well known seasoned issuer (as defined in Rule 405 of the Securities Act).
Yes No

Indicate by check mark if registrant is not required to file reports pursuant to Section 13 or 15(d) of Securities Exchange Act of 1934
Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.
Yes No

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-K

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K:

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act:

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of voting stock held by non-affiliates of the registrant on April 3, 2009: \$3.4 billion.

The number of shares outstanding of each of the registrant's classes of common stock, as of November 30, 2009:
297.0 million shares of common stock at \$.00015625 par value.

DOCUMENTS INCORPORATED BY REFERENCE:

Portions of our Proxy Statement relating to the 2010 annual shareholders meeting are incorporated by reference in Part III. Such Proxy Statement will be filed with the Securities and Exchange Commission not later than 120 days after the conclusion of the registrant's fiscal year ended October 3, 2009.

FORWARD LOOKING STATEMENTS

This report contains statements that do not relate to historical or current facts, but are “forward looking” statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements relate to analyses and other information based on forecasts of future results and estimates of amounts not yet determinable. These statements may also relate to future events or trends, our future prospects and proposed new products, services, developments, or business strategies, among other things. These statements can generally (although not always) be identified by their use of terms and phrases such as anticipate, believe, could, would, estimate, expect, intend, may, plan, predict, project, pursue, will, continue, and other similar terms and phrases, as well as the use of the future tense.

Examples of forward looking statements in this report include, but are not limited to, the following categories of expectations about:

- ♠ our ability to introduce new products and their impact on replacement demand
- ♠ the timing, features, benefits, and expected success of new product introductions
- ♠ growth of our business through technology and intellectual property (IP) acquisition
 - ♠ our leadership position in the market
- ♠ the advantages offered to customers by our anticipated products and product features
 - ♠ gaming growth, expansion, and new market opportunities
 - ♠ fluctuations in future gross margins and tax rates
 - ♠ increasing product sales or machine placements
- ♠ legislative or regulatory developments and related market opportunities
- ♠ available capital resources to fund future operating requirements, capital expenditures, payment obligations, and share repurchases
 - ♠ the timing and amount of future share repurchases and dividends
 - ♠ losses from off-balance sheet arrangements
 - ♠ financial returns to shareholders related to management of our costs

Actual results could differ materially from those expressed or implied in our forward looking statements. Our future financial condition and results of operations, as well as any forward looking statements, are subject to change and to inherent known and unknown risks and uncertainties. See Item 1A, Risk Factors, in this report for a discussion of these and other risks and uncertainties. You should not assume at any point in the future that the forward looking statements in this report are still valid. We do not intend, and undertake no obligation, to update our forward looking statements to reflect future events or circumstances.

PART I

Item 1. Business

GENERAL

International Game Technology is a global gaming company specializing in the design, manufacture, and marketing of electronic gaming equipment and systems products. As a leading supplier of gaming products to the world, we maintain a wide array of entertainment-inspired gaming product lines and target gaming markets in all legal jurisdictions worldwide. IGT is committed to providing quality gaming products at competitive prices, designed to help the operator realize superior value and performance by serving players better.

Unless the context indicates otherwise, International Game Technology, IGT, we, our, or the Company refers to International Game Technology and its consolidated entities. Italicized text in this document with an attached superscript trademark or copyright notation indicates trademarks of IGT or its licensors. For more information about our trademark and copyright ownership, please visit our website at www.IGT.com.

International Game Technology was incorporated in Nevada in December 1980 to acquire the gaming licensee and operating entity, IGT, and to facilitate our initial public offering. Principally serving the US gaming markets when founded, we expanded into jurisdictions outside the US in 1986. In addition to our main US production facilities in Nevada, we manufacture gaming products in the UK and through third-party manufacturers in Japan and China.

We currently maintain sales offices in various gaming jurisdictions around the world. In addition to our operations in the US and Canada, we have operating centers in the following international locations:

| | |
|------------------------|-----------------------------|
| ^a Argentina | ^a Mexico |
| Australia/New | |
| ^a Zealand | ^a Netherlands |
| ^a China | ^a Singapore |
| ^a Japan | ^a South Africa |
| ^a Macau | ^a United Kingdom |

Our fiscal year is reported on a 52/53-week period that ends on the Saturday nearest to September 30 each year. Similarly, our quarters end on the Saturday nearest to the last day of the quarter end month. For simplicity, this report presents all fiscal periods using the calendar month end as outlined in the table below. The results of operations for fiscal 2009 include 53 weeks versus 52 weeks in fiscal 2008 and 2007.

| Fiscal Year End | |
|-----------------------|-----------------------|
| Actual | Presented as |
| October 3, 2009 | September 30, 2009 |
| September 27, 2008 | September 30, 2008 |
| September 29, 2007 | September 30, 2007 |

BUSINESS SEGMENTS

We derive our revenues from the distribution of electronic gaming equipment, systems, services and licensing. Operating results reviewed by our chief decision maker encompass all revenue sources within each geographical customer region. We currently view our business in two operating segments, each incorporating all types of revenues.

♠ North America consists of our operations in the US and Canada, comprising 77% of consolidated revenues in fiscal 2009, 76% in 2008, and 77% in 2007.

♠ International encompasses our efforts in all other jurisdictions worldwide, comprising 23% of consolidated revenues in fiscal 2009, 24% in 2008, and 23% in 2007.

We measure segment profit on the basis of operating income. Certain income and expenses related to company-wide initiatives are managed at the corporate level and not allocated to an operating segment. Other segment and financial information contained in BUSINESS SEGMENT RESULTS of our MDA and Note 21 of our Consolidated Financial Statements is incorporated here by this reference.

Table of Contents

REVENUE STREAMS

We have two revenue streams within each business segment -- gaming operations and product sales.

Gaming Operations

Recurring revenues are generated in Gaming Operations by providing our customers with proprietary gaming equipment, systems and services, and comprised 56% of consolidated revenues in fiscal 2009, 53% in 2008, and 52% in 2007.

Our pricing arrangements are largely variable where casinos pay service fees to IGT based on a percentage of amounts wagered or net win. Fixed fee pricing arrangements are typically based on a daily or monthly fee. A portion of the WAP service fees paid to IGT are used for the funding and administration of progressive jackpots. The cost of funding progressive jackpots is subject to interest rate volatility as further described in Note 1 of our Consolidated Financial Statements and the MDA—CRITICAL ACCOUNTING ESTIMATES.

Gaming operations revenues are affected by variations in the number and type of machines in service, levels of player wagers, and pricing arrangement terms. Levels of play are dependent on game popularity, casino seasonality trends, economic conditions, and other player preferences. Seasonal trends generally show higher play levels in the spring and summer months and lower in the fall and winter months. We monitor the productive life cycles of our gaming operations machines and systematically replace units experiencing declining play levels with newer games.

The IGT installed base of gaming devices recorded on our balance sheet as part of our property, plant and equipment includes both variable fee and fixed fee machines. Casino owned units are machines we have sold that also provide a recurring royalty fee. In addition to the units reflected in the table below, gaming operations revenues include recurring fees for internet gaming, content, and other gaming equipment rentals and leasing.

Gaming Operations Machines at September 30,

Table of Contents

Product Sales

We include the sales of gaming equipment, systems, services, licensing, and component parts in Product Sales, which comprised 44% of consolidated revenues in 2009, 47% in 2008, and 48% in 2007. As our gaming products become more systems-centric in nature, we anticipate a growing portion of sales from non-machine products. Non-machine revenues (including systems, licensing fees, parts, and conversions, as well as other miscellaneous royalty fees and services) collectively comprised 37% of product sales in fiscal 2009, 33% in 2008, and 30% in 2007.

Product Sales Composition

STRATEGIC BUSINESS ARRANGEMENTS

As part of our ongoing efforts to create shareholder value, we complement our internal resources through strategic alliances, investments, and business acquisitions that:

- ♠ offer opportunities to diversify our geographic reach
- ♠ expand our product lines and customer base
- ♠ leverage our technological and manufacturing infrastructure to increase our rates of return

During the last five years, we completed a number of small business acquisitions, including Cyberview in fiscal 2008 and WagerWorks in fiscal 2005, which provided additional opportunities to expand the distribution of our content across new channels and mediums. Strategic investments over the last five years included: CLS to participate in the development of gaming products for the China lottery market; WDG for access to a portfolio of gaming application concepts; and DigiDeal to expedite access to electronic table games markets.

During the fourth quarter of fiscal 2009, we evaluated many aspects of our business in conjunction with an assessment of the company's long-term strategic goals. The process included an appraisal of certain strategic investments to determine management's intent and ability to utilize these assets in the execution of our business strategy going forward. Additional information about our most recent acquisitions and affiliate investments is contained in OVERVIEW and CONSOLIDATED OPERATING RESULTS of our MDA and Notes 3 and 7 of our Consolidated Financial Statements.

Table of Contents

PRODUCTS

We provide a broad range of electronic gaming equipment and systems, as well as licensing, services, and component parts that may be sold or placed under recurring revenue arrangements. Most of our electronic gaming equipment is increasingly driven by its software components.

Gaming Equipment

We offer our customers a wide variety of video and physical reel slot machines that may be tailored to meet specific needs. Customers can choose from an extensive library of games combined with several new machine cabinet models designed to maximize functionality, flexibility, and player comfort. Additionally, IGT's AVP® machines are designed to support server-based gaming networks. Machine configurations vary by jurisdiction and may include:

- ♠ Stand-alone casino-style slot machines that determine the game play outcome at the machine, known as Class III in tribal jurisdictions
- ♠ WAP jackpot systems with linked machines across several casinos
- ♠ CDS machines connected to a central server that determines the game outcome, encompassing VLT's used primarily in government-sponsored applications and electronic or video bingo machines known as Class II in tribal jurisdictions

We also offer multi-player community-style configurations with a common display, especially useful in jurisdictions where live table games are not allowed. Our electronic table games include live dealer hosted configurations with digital cards and live chips or virtual chips/electronic credits, as well as a fully virtual platform that can be approved as a slot game, providing table-like gaming for slot only or limited table jurisdictions.

Our international gaming machines also include AWP games in Europe and pachisuro machines in Japan. These games generally incorporate lower payouts with features that allow players to exercise an element of skill and strategy.

Systems

IGT systems products include applications for casino management, CRM, and server-based player management. Our casino management solutions include integrated modules for machine accounting, patron management, cage and table accounting, ticket-in/ticket-out, bonusing (jackpots and promotions), and table game automation. Our CRM solution features integrated marketing and business intelligence modules that provide analytical, predictive, and management tools for maximizing casino operational effectiveness. Our server-based solutions are designed to enable casino operators to increase profits by enhancing the players' experience and lowering operating costs.

Table of Contents

PRODUCT DEVELOPMENT

The vision behind IGT product development is to serve players better by using the power of networked gaming, information technology, game design, and services to maximize the potential for operator profitability. The foundation of our business model is built on the creation and delivery of game content through integrated casino systems solutions to machine platforms. Our product innovation reflects the anticipation of consumer needs, as well as customer feedback and market trends.

We support our product development efforts through a considerable emphasis and investment in R&D of future technology, which we believe enables IGT to maintain a leadership position in the industry. We dedicate more than 1,600 employees worldwide to product development in various disciplines from hardware, software, and firmware engineering to game design, video, multimedia, graphics, and sound. Our investment in R&D totaled \$211.8 million in fiscal 2009, \$223.0 million in 2008, and \$202.2 million in 2007.

Our primary development facilities are located in Nevada, and we have several design centers strategically located worldwide, allowing us to respond to unique market needs and local player preferences. IGT global design centers provide local community presence, customized products, and regional production where beneficial or required. During fiscal 2009, we opened additional development facilities in Beijing, China.

During fiscal 2009, we completed a re-evaluation of our thick (processing at the machine) and thin (processing at the server) game development processes in an effort to reduce time and cost to market. These efforts will include rationalizing and improving our development platforms and processes worldwide, in order to enable higher quality content delivery through more efficient and uniform technologies.

Our fiscal 2009 R&D activities are described below under the following categories:

- ^a Games
- ^a Systems
- ^a Platforms
- ^a Intellectual Property

Table of Contents

Games

We combine elements of math, play mechanics, sound, art, and technological advancements with our library of entertainment licenses and patented intellectual properties to provide gaming products with a high degree of player appeal. We continue to expand our game libraries, emphasizing development of game content to address changing consumer preferences and other market trends. Strategically, we are renewing our focus on what we believe we do well. For many years, IGT has been an industry leader in gaming content across a truly global footprint and content is what has traditionally distinguished us from the competition.

Our games are created primarily by employee designers, engineers, and artists, augmented by third-party developers. We develop video reel and poker games, as well as enhancements for our classic spinning reel games, such as multi-line, multi-coin configurations. We build on our traditional game development with unique customization for video lottery, CDS, Class II, and international markets. We also continuously upgrade and optimize our proprietary flagship themes, such as Wheel of Fortune® and Megabucks®, with game refreshers and innovative features to enhance play.

In today's gaming market we face highly capable competitors, demanding gaming patrons, and increasing game complexity. Such a market requires constant enhancements, innovations, and improvements to the quality of our game content across all of our product platforms, particularly in video slots. Excellent content drives sales, increases replacement cycle opportunities, and grows our installed base.

To that end, during fiscal 2009, we implemented specific efforts to enhance our content offerings. We restructured our strategic product efforts into a more focused vertical product management structure, dedicated to developing and deploying game content, along with the most effective use of our pool of game design resources and IP portfolio. We also implemented a consumer research group designed to aggregate and analyze patron level data in order to provide the R&D process with real time market information, making the patron the focus of our development efforts.

Fiscal 2009 highlights

Our new family of MLD® (REELdepth® Multi-Layer Display®) machines, featuring the visual effect of true depth animation sequences without 3-D glasses, grew steadily and was deployed at nearly 500 properties at September 30, 2009. MLD® machines enable players to choose spinning reel, video slots or video poker all in one machine, as well as allowing server-based game download and configuration functionality for operators. We released three of the world's first MLD® exclusive games, with game play only possible through MLD® technology; Magic Butterfly™, 7's Storm™, and Glitter and Gold™. At the end of fiscal 2009, we rebranded the innovative technologies of MLD®, AVP® and Multi-Game into a complete solution now known as IGT DynamiX™.

IGT's innovative MultiPLAY video slot, featuring innovation exclusive to IGT, was approved in more than 38 jurisdictions including Nevada, California, and Oklahoma. MultiPLAY allows players to choose to play up to four video slot games on the same machine, at the same time, and each game spins independently allowing a clear understanding of the game outcome. Four MultiPLAY games were released and our market tests indicate appeal to a wide range of players, with performance two to three times house/zone averages across North America.

Winner's choice Multi-Game capability was launched on our IGT DynamiX™ machines. This technology enables operators to select their own video or spinning slot multi-games, ranging from any math model and experience. Our game performance testing indicated well above house/zone averages across North America for these units.

In our MegaJackpots® gaming operations line, we continued game releases with highly popular brands, including Wheel of Fortune® MLP™, Star Wars™ MLP™, Indiana Jones™ MLD®, Jokers Wild™ MLP™ with MLD® and Jeopardy!®

MLP™. We prepared for the expected Spring 2010 launch of our MegaJackpot® Center Stage series, providing a strong line up of game content utilizing a wide variety of brands and game play, including the innovative MultiPLAY format. Sex and the City™ MultiPLAY was released in October 2009. Upcoming releases include Amazing Race™ MLP™ Group Play and Quest for the Lost City™ with Discovery Play game features, which offer players new episodes or advancement to different play levels creating anticipation for what will come next.

7

Table of Contents

Our M-P Series™ interactive, multi-player suite of electronic table games arranged in virtual pits continued moving forward with increased placements in domestic markets. With virtual cards and chips, these products provide floor layout flexibility, increased game security, very little staffing requirements, increased hands-per-hour, and decreased operating costs, along with the addition of table game options for slot-only jurisdictions.

Systems

Gaming continues to become increasingly systems based, as operators increasingly expect network functionality to manage game performance and adapt to player preferences. As we develop and integrate gaming systems, we recognize networks have the power to dramatically change the delivery of game content and improve the usefulness of our products to the casino operators and players alike.

Our ongoing server-based gaming development continues to focus on a comprehensive enterprise-wide network systems solution designed to provide operators with tools for more effective casino floor management and new ways to engage and interact with players. In addition our sbX™ system has been packaged for smaller scale implementations in “hybrid” floor environments, consisting of a combination of new G2S GSA protocol and legacy Advantage® networks.

During fiscal 2009, we moved beyond development and testing into the commercialization and sales phase, with the introduction of slot bank level applications and solutions. Our sbX™ Tier One package is a smaller scale bank level solution designed with the flexibility of server-based technology that can accommodate up to 100 AVP® games. Tier One offers operator access to available IGT themes via a standard game library with applications for AVP® Video, Video Poker and MLD®. Tier One is designed for easy implementation providing operators with an incremental step towards full enterprise-wide sbX™.

The IGT Global Technology and Interoperability Center continued to facilitate testing by third-party manufacturers and strategic partners of GSA protocol product interface integration, compatibility, and performance. The center is actively testing our sbX™ system and its interaction with other vendor systems, as we continue to engineer new applications and demonstrate the security, efficiency, and innovative casino player marketing features this technology can provide. This collaborative approach ensures rigorous testing is conducted in a true-to-life environment with full-scale systems.

Progress continued with our Nevada field trial of sbX™ at Monte Carlo Resort & Casino. This hybrid floor is putting interoperability to the test with a network combining G2S and classic Advantage® working together seamlessly. At September 30, 2009, this field trial connected 120 machines from IGT, Bally, Konami, WMS and Aristocrat. These important milestones reflect our vision as innovators in gaming systems.

With PGIC assets acquired in January 2009, we added IGT Casinolink® to our suite of systems products. IGT Casinolink® offers a casino management solution ideal for international markets and multi-site operations. The system links together multiple gaming sites and centrally manages the daily casino operating procedures. This gives our customers the flexibility to achieve company-wide goals while enabling individual properties to maintain operational independence.

We continue developing products that integrate the power of the open network with server-based gaming applications, such as dynamic remote game management, casino transactional systems, business intelligence, and other interactive CRM capabilities. We believe the integration of sbX™ with Advantage®, Casinolink® and our customer relationship and business intelligence applications will provide the tools necessary to help operators optimize their gaming operations, increase marketing productivity, and analyze customer preferences. We will also maintain development efforts to support and enhance our legacy gaming systems for casino management, such as Advantage®, CRM,

Ticket-in/Ticket-out, CDS, and WAP.

Platforms

Platforms are the means by which players interact with the games, and we support several in order to maximize our game distribution reach. The challenge of platform development is in determining how to effectively use a wide range of technologies to satisfy evolving global markets with the best features, cost points, and delivery dates. The goal is to ensure that our content can be deployed through a number of different channels, including traditional gaming platforms, as well as wireless networks and the internet.

8

Table of Contents

During fiscal 2009, we continued development for delivery through third-party platforms, interactive digital TV, cell phones, the internet, and other mobile gaming outlets, as well as through network technology for remote game management and downloading. We also further expanded our Remote Game Server to facilitate further deployment of our game content to internet platforms. In online applications development, we deployed IGT's Cleopatra® slot game in non-wagering format for the iPhone™ and iPod® touch.

We continued successful deployment of several new diversified cabinet models initially released in fiscal 2008. The new models were designed with input from ergonomic and industrial design experts to create a product that is flexible, functional and holds the greatest player appeal. All new AVP® cabinets are sbX™ ready with supporting GSA open communication standards and video capabilities for the service window. Designed to support the next generation of video games, our AVP® models provide improved graphic capabilities, such as MLD® virtual 3-D animation with vivid colors, MultiPLAY, enhanced stereo and surround sound, and expanded storage capacity allowing for complex bonus features.

As we transition to AVP® as our standard development platform worldwide, we also continue support for the following platforms:

- ^a Game King® video platform using the 80960 processor
- ^a S2000® and Reel Touch® 80960 spinning reel platform
- ^a Blue Chip platform used in Australia and New Zealand
- ♠ Barcrest Triple 7, Horizon, Horizon Plus, and MPU AWP platforms sold in the UK
- ♠ Pachisuro platform used in Japan

Intellectual Property

We consider our intellectual property portfolio of patents, trademarks, copyrights, and other licensed rights to be a significant asset to our business. We currently own or license over 2,700 patents and hold over 3,100 filed and registered trademarks worldwide. Our capitalized patents have a weighted average remaining useful life of 7 years and our licensed arrangements have various expiration dates through 2020, frequently with options to extend.

We seek to protect our investment in R&D and the distinct features of our products by perfecting and maintaining our IP rights. We obtain patent protection covering many of our products and have a significant number of US and foreign patent applications pending. Our portfolio is widely diversified, comprised of both domestic and foreign patents related to a variety of gaming equipment and systems products, including game designs, bonus and secondary game features, and device components.

We market most of our products under trademarks and copyrights that provide product recognition and promote widespread acceptance. We seek protection for our copyrights and trademarks in the US and various foreign countries, where applicable. Certain intellectual property litigation is described in Note 16 of our Consolidated Financial Statements.

Table of Contents

SALES AND MARKETING REGIONS

We market our products and services in legalized gaming jurisdictions around the world. While our most significant jurisdictions are in North America, we anticipate international jurisdictions will continue to grow in significance to our business. We promote our products through a worldwide network of sales associates. We use third-party distributors and agents in certain markets under arrangements that generally specify no minimum purchase and require specified performance standards be maintained. We also offer equipment contract financing for qualified customers and development financing loans to select customers for new or expanding gaming facilities.

Our overall marketing strategy places the “Customer First”. We have over 50 customer service centers worldwide to respond effectively to customer needs. In addition, we maintain a Global Support Hotline Center staffed by experienced engineering personnel to resolve technical issues. We also provide access to product information and 24-hour customer service through our website, and offer customers a variety of training to ensure success using our products to their full potential.

North America

Gaming in the US and Canada continues to grow in popularity with the opening of new tribal and traditional casinos and the introduction of gaming machines into new gaming venues such as racetracks (also known as racinos) and bingo parlors. The legalization and growth of gaming in new jurisdictions is being driven by state and local governments seeking to generate new revenue to support public programs and services. We estimate the installed base of legal gaming devices in North America increased to over 943,000 machines during fiscal 2009.

Opportunities for additional sales or placements of IGT products in North America are directly impacted by the machine replacement cycle, legalization of gaming in new jurisdictions, and the opening or expansion of new properties. Legislative action and the passage of voter referendums have provided new opportunities for growth in jurisdictions throughout the country, including Illinois, Ohio, Kansas, Maryland, Pennsylvania, Florida and Washington. We continually monitor ongoing political developments as they relate to potential gaming legalization or further expansion in states such as Kentucky, Massachusetts, New Hampshire, Alabama, North Carolina and Texas.

Table of Contents

International

Our international strategy capitalizes on our North America experience, while customizing products for unique local preferences and regulatory requirements. Our international operations service:

- ♣ casinos in Asia, Europe, Latin America, and Africa
- ♣ clubs and casinos in Australia and New Zealand
- ♣ AWP facilities in the UK and continental Europe
- ♣ pachisuro parlors in Japan

Our international gaming operations installed base has grown substantially since we expanded into Mexico in fiscal 2005. Our online gaming provided from Alderney in the British Channel Islands continues to provide additional growth opportunities. We anticipate expansion into Italy in the second half of fiscal 2010 and believe further international opportunities will develop as support grows for legalized gambling as a means of promoting tourism revenues.

OPERATIONAL OVERVIEW

Manufacturing and Suppliers

In addition to our main production facility in Reno, Nevada, we manufacture in the UK and through third-party manufacturers in Japan and China. International casino and club gaming devices are fabricated, whole or in kit form, at our Reno facility. Our manufacturing operations primarily involve the configuration and assembly of electronic components, cables, harnesses, video monitors, and prefabricated parts purchased from outside sources. We also operate facilities for cabinet manufacturing, silkscreen, and digital design.

We use a variety of raw materials to manufacture our gaming devices including metals, wood, plastics, glass, electronic components, and LCD screens. We have a broad base of material suppliers and utilize multi-sourcing practices to ensure component availability. We believe the availability of materials used to manufacture our products is adequate and we are not substantially dependent on any single supplier.

We currently devote more than 800,000 square feet in our Reno facility and more than 290,000 square feet in Las Vegas to product development, manufacturing, warehousing, shipping, and receiving. Maintaining our commitment to quality, we renewed our ISO 9001.2000 Quality Management System certification at all of our manufacturing facilities during fiscal 2009. ISO standards represent an international consensus with respect to the design, manufacture, and use of practices intended to ensure ongoing customer satisfaction with consistent delivery of products and services.

We generally carry a significant amount of inventory related to the breadth of our product lines. We reasonably expect to fill our order backlog within the next fiscal year. Backlog totaled approximately \$331.2 million at October 31, 2009 and \$351.2 million at October 31, 2008.

Regulatory Compliance

IGT is dedicated to regulatory compliance worldwide in order to ensure that our products meet requirements in each gaming jurisdiction and that we obtain the necessary approvals and licenses. We conduct business in most

jurisdictions where gaming is legal and hold licenses where required.

Employees

As of September 30, 2009, we employed 5,100 individuals worldwide, consisting of 4,000 in North America and 1,100 internationally. In response to reduced demand, we have been conducting an ongoing company-wide strategic review of our costs and organizational structure for opportunities to maximize efficiency and align our expenses with our current and long-term business outlook. As a result of restructuring efforts during fiscal 2009, we reduced our global workforce by approximately 16% from September 30, 2008 levels through a combination of voluntary and involuntary separation arrangements. For discussion of related restructuring costs, see MDA—OVERVIEW and MDA—CONSOLIDATED OPERATING RESULTS.

Table of Contents

COMPETITION AND PRODUCT DEMAND

A number of factors drive demand for both our and our competitors' gaming products. Our competitors range from small, localized companies to large, multi-national corporations in every jurisdiction in which we conduct business. Our most significant competitors include Aristocrat Leisure Limited, Bally Technologies, Inc., and WMS Industries, Inc.

We believe replacement sales are driven by customer strategies to upgrade casino floors with newer games and technologies that combine higher yields with cost savings, convenience, and other benefits. New or emerging technology that provides operators with a favorable return on investment has the ability to accelerate a machine replacement cycle. This technology may come in the form of new machine cabinets with more processing power or new game features that increase player appeal and/or operator profits.

New or expanding casinos generate new product demand and stimulate replacement demand at neighboring casinos that upgrade their games and machines in order to remain competitive. New jurisdictions establishing legalized gaming also create product demand and have contributed to significant growth in the overall installed base of gaming devices during the past few decades.

The market for gaming devices and systems is highly competitive, constantly evolving, and subject to rapid technological change. We compete in both domestic and international markets, endeavoring to create products with superior functionality and features, using innovative architecture and technologies, resulting in a high degree of customer acceptance and player preference. We also strive to maintain an edge in our quality of support and efficient product implementation.

We believe IGT has competitive advantage resulting from broad alliances and a long history with customers, financial strength to aggressively invest in R&D, and an extensive collection of intellectual properties. Further, the breadth of our gaming products and diversity of our innovative game library contribute to our competitive advantage. Our historically high levels of customer service and support, extensive and well-established infrastructure of sales and manufacturing, worldwide recognition, and geographic diversity are competitive assets. We believe our reputation for consistently delivering and supporting quality products will encourage operators to select our products and enable us to maintain our market position.

AVAILABLE INFORMATION

IGT's principal corporate executive offices are located at: 9295 Prototype Drive
Reno, Nevada 89521
(775) IGT-7777

All reporting information filed with or furnished to the SEC is available free of charge through the Investor Relations link on our website at www.IGT.com as soon as reasonably practicable after we electronically file or furnish such information to the SEC. Our corporate governance guidelines and charters for our Audit, Compensation, and Nominating and Corporate Governance Committees are also available on our website. This information will be mailed in print form free of charge to any shareholder upon request.

GOVERNMENT GAMING REGULATION

We operate in most legal casino gaming jurisdictions worldwide, as well as in a significant number of legalized lottery jurisdictions. The manufacture and distribution of gaming equipment, systems, and services, as well as the operation of casinos, is subject to regulation by a variety of local and federal agencies, with the majority of oversight provided

by individual state gaming control boards.

While the regulatory requirements vary from jurisdiction to jurisdiction, most require:

- ♠ licenses and/or permits
- ♠ findings of suitability for the company, as well as individual officers, directors, major stockholders, and key employees

Table of Contents

- ♣ documentation of qualification, including evidence of financial stability
- ♣ specific approvals for gaming equipment manufacturers and distributors

Our operating entities and key personnel have obtained or applied for all required government licenses, permits, registrations, findings of suitability, and approvals necessary to manufacture and distribute gaming products in all jurisdictions where we do business. Although many regulations at each level are similar or overlapping, we must satisfy all conditions individually for each jurisdiction.

Laws of the various gaming regulatory agencies serve to protect the public and ensure that gaming related activity is conducted honestly, competitively, and free of corruption. Regulatory oversight additionally ensures that the local authorities receive the appropriate amount of gaming tax revenues. As such, our financial systems and reporting functions must demonstrate high levels of detail and integrity.

Certain regulators not only govern the activities within their jurisdiction, but also oversee activities that occur in other jurisdictions to ensure that we comply with local standards on a worldwide basis. As a Nevada corporation, state regulatory authorities require us to maintain Nevada standards for all operations worldwide. Violations of laws in one jurisdiction could result in disciplinary action in other jurisdictions. A more detailed description of the regulations to which we are subject is provided in Exhibit 99 of this Annual Report on Form 10-K, incorporated herein by reference.

The nature of the industry and our worldwide operations make this process very time consuming and require extensive resources. We employ additional community staff members and legal resources familiar with local customs in certain jurisdictions to assist in keeping us compliant with applicable regulations worldwide. Through this process, we seek to assure both regulators and investors that all our operations maintain the highest levels of integrity and avoid any appearance of impropriety. We have never been denied a gaming related license, nor have our licenses ever been suspended or revoked.

Responsible Gaming

RG is the industry's response to problem gambling, and fiscal 2009 marked the 12th year of IGT's Responsible Gaming Program. Corporate social responsibility has taken on a new dimension since the inception of our program. Gaming jurisdictions can suffer negative consequences due to lack of attention to the issue of problem gambling. As markets expand internationally, so must understanding of social protections and responsible gaming in different cultures. IGT works closely with new gaming jurisdictions to develop sound responsible gaming policies and guidelines to help ensure programs remain viable for the long term.

As a technology provider to the gaming industry, our approach to RG differs only slightly from that of the gaming operator, but the objectives are the same:

- ♣ raise awareness of RG as a positive approach to problem gambling
- ♣ collaborate with the problem gambling community, others in the industry, our customers, and public policy makers in developing RG practices and programs
 - ♣ educate our employees
 - ♣ support research and treatment

Our experience has taught us that corporate social responsibility must be a cornerstone of any sound gaming program and is vital to sustaining our industry. We support our commitment to RG with funding for numerous federal, state, and local organizations, conferences, and events, including:

- ♠ National Center for Responsible Gaming
- ♠ National Council on Problem Gambling
- ♠ National Problem Gambling Helpline
 - ♠ Problem Gambling Center
- ♠ Responsible Gaming Education Week
- ♠ Problem Gambling Awareness Week

Table of Contents

Item 1A. Risk Factors

Our business is vulnerable to changing economic conditions and current unfavorable economic conditions have negatively impacted and could continue to negatively impact the play levels of our participation games, our product sales, and our ability to collect outstanding receivables from our customers.

Existing unfavorable general economic conditions reduce disposable income of casino patrons and result in fewer patrons visiting casinos. This decline in disposable income likely results in reduced play levels on our participation games, causing our cash flows and revenues from a large share of our recurring revenue products to decline. Current unfavorable economic conditions have also resulted in a tightening in the credit markets, decreased liquidity in many financial markets, and resulted in significant volatility in the credit and equity markets.

A decline in the relative health of the gaming industry and the difficulty or inability of our customers to obtain adequate levels of capital to finance their ongoing operations reduces their resources available to purchase our products and services, which adversely affects our revenues. If we experience a significant unexpected decrease in demand for our products, we could also be required to increase our inventory obsolescence charges.

Furthermore, the extended economic downturn has impacted and could continue to impact the ability of our customers to make timely payments to us. We have, and may continue, to incur additional provisions for bad debt related to credit concerns on certain receivables.

A decline in and/or sustained low interest rates causes an increase in our jackpot expense which could limit or reduce our future profits.

Changes in prime and/or treasury and agency interest rates during a given period cause fluctuations in jackpot expense largely due to the revaluation of future winner liabilities. When rates increase, jackpot liabilities are reduced as it costs less to fund the liability. However, when interest rates decline or remain low the value of the liability (and related jackpot expense) increases because the cost to fund the liability increases. Our results may continue to be negatively impacted by continuing low interest rates or further declines in interest rates, resulting in increased jackpot expense and a reduction of our investment income, which could limit or reduce our future profits.

Our outstanding Debentures and Notes subject us to additional risks.

Our Debentures issued in December 2006 and our Notes issued in May 2009 contain a net settlement feature, which entitles holders to receive cash up to \$1,000 per Debenture or Note and shares for any excess conversion value as determined by the respective governing indentures. Consequently, if a significant number of Debentures or Notes are converted or redeemed, we would be required to make significant cash payments to the holders who convert or redeem the Debentures or Notes.

In connection with the offering of the Notes, we entered into additional separate transactions for note hedges and warrant transactions. In connection with these transactions, the hedge counterparties and/or their respective affiliates may enter into various derivative transactions with respect to our common stock and may enter into or unwind various derivative transactions and/or purchase or sell our common stock in secondary market transactions prior to maturity of the Notes. These activities could have the effect of increasing or preventing a decline in, or having a negative effect on, the value of our common stock and could have the effect of increasing or preventing a decline in the value of our common stock during any conversion reference period related to a conversion of the Notes. The warrant transactions could separately have a dilutive effect from the issuance of our common stock pursuant to the warrants.

Table of Contents

On November 12, 2009, we gave holders of the Debentures notice of this put right, which will terminate on December 14, 2009. Given current market conditions and the recent trading price of our stock, we expect Debenture holders will exercise their right to require IGT to redeem the Debentures on December 15, 2009. We plan to incur additional borrowings under our credit facility to pay the Debentures put to us in December 2009.

Our outstanding domestic credit facility subjects us to financial covenants which may limit our flexibility.

Our Domestic Credit Facility subjects us to a number of financial covenants, including a minimum ratio of EBITDA to interest expense minus interest on jackpot liabilities and a maximum ratio of debt to EBITDA. Our failure or inability to comply with these covenants will cause an event of default that, if not cured, could cause the entire outstanding borrowings under our Domestic Credit Facility and bonds to become immediately due and payable. In addition, our interest rate under the Domestic Credit Facility can vary based on our public credit rating or our debt to capitalization ratio. Each of these measures may be adversely impacted by unfavorable economic conditions. The Domestic Credit Facility also includes restrictions that may limit our flexibility in planning for, or reacting to, changes in our business and the industry.

Slow growth in the establishment of new gaming jurisdictions or the number of new casinos and declines in the rate of replacement of existing gaming machines could limit or reduce our future profits.

Demand for our products is driven substantially by the establishment of new gaming jurisdictions, the addition of new casinos or expansion of existing casinos within existing gaming jurisdictions and the replacement of existing gaming machines. The establishment or expansion of gaming in any jurisdiction typically requires a public referendum or other legislative action. As a result, gaming continues to be the subject of public debate, and there are numerous active organizations that oppose gaming. Opposition to gaming could result in restrictions on or even prohibitions of gaming operations or the expansion of operations in any jurisdiction.

In addition, the construction of new casinos or expansion of existing casinos fluctuates with demand, general economic conditions and the availability of financing. The rate of gaming growth in North America has diminished and machine replacements are at historically low levels. Slow growth in the establishment of new gaming jurisdictions or delays in the opening of new or expanded casinos and continued declines in, or low levels of demand for, machine replacements could reduce the demand for our products and our future profits.

Demand for our products and the level of play of our products could be adversely affected by changes in player and operator preferences.

As a supplier of gaming machines, we must offer themes and products that appeal to gaming operators and players. If we are unable to anticipate or react timely to any significant changes in player preferences, such as a negative change in the trend of acceptance of our newest systems innovations or jackpot fatigue (declining play levels on smaller jackpots), the demand for our gaming products and the level of play of our gaming products could decline. Further, our products could suffer a loss of floor space to table games and operators may reduce revenue sharing arrangements, each of which would harm our sales and financial results. In addition, general changes in consumer behavior, such as reduced travel activity or redirection of entertainment dollars to other venues, could result in reduced demand and reduced play levels for our gaming products.

Table of Contents

Our ability to operate in our existing markets or expand into new jurisdictions could be adversely affected by changing regulations or problems with obtaining or maintaining needed licenses or approvals.

We operate only in jurisdictions where gaming is legal. The gaming industry is subject to extensive governmental regulation by US federal, state and local governments, as well as tribal officials or organizations and foreign governments. While the regulatory requirements vary by jurisdiction, most require:

- ♣ licenses and/or permits
- ♣ findings of suitability
- ♣ documentation of qualifications, including evidence of financial stability
- ♣ other required approvals for companies who manufacture or distribute gaming equipment and services
- ♣ individual suitability of officers, directors, major stockholders and key employees

Any delays in obtaining or difficulty in maintaining regulatory approvals needed for expansion within existing markets or into new jurisdictions can negatively affect our opportunities for growth. Further, changes in existing gaming regulations may hinder or prevent us from continuing to operate in those jurisdictions where we currently do business, which would harm our operating results. In particular, the enactment of unfavorable legislation or government efforts affecting or directed at manufacturers or gaming operators, such as referendums to increase gaming taxes or requirements to use local distributors, would likely have a negative impact on our operations.

Our success in the competitive gaming industry depends in large part on our ability to develop and manage frequent introductions of innovative products.

The gaming industry is intensely competitive, and many of our competitors have substantial resources and specialize in the development and marketing of their products. Increased competition has negatively impacted, and may continue to negatively impact, our results. Because the gaming industry is characterized by dynamic customer demand and rapid technological advances, we must continually introduce and successfully market new themes and technologies in order to remain competitive and effectively stimulate customer demand. Our customers will accept a new product only if it is likely to increase operator profits more than competitors' products. There is no certainty that our new products will attain this market acceptance or that our competitors will not more effectively anticipate or respond to changing customer preferences. In addition, any delays by us in introducing new products on schedule could negatively impact our operating results by providing an opportunity for our competitors to introduce new products and gain market share ahead of us. For example, our business and results could be adversely affected if we experience delays or problems in our planned introduction of sbX™ gaming management systems, or if we do not gain market acceptance for these systems.

New products require regulatory approval and may be subject to complex and dynamic revenue recognition standards, which could materially affect our financial results.

As we introduce new products and transactions become increasingly complex, additional analysis and judgment is required to account for and recognize revenues in accordance with generally accepted accounting principles. Transactions may include multiple element arrangements and/or software components and applicable accounting principles or regulatory product approval delays could change the timing of revenue recognition and could adversely affect our financial results for any given period. Fluctuations may occur in our deferred revenues and reflect our continued shift toward more multiple element contracts that include systems and software.

Investments and development financing loans could adversely impact liquidity or cause us to incur loan losses or record a charge to earnings if our investments become impaired.

We invest in and/or provide financing for expansion or construction of gaming locations and other business purposes, including locations abroad. Such investment and financing activities subject us to increased credit risk in certain regions, which could be exacerbated by current unfavorable economic conditions or other political or economic instability in those regions. We monitor our investments and financing activities to assess impairment on a quarterly basis.

We have in the past and may in the future incur losses on these types of investments and loans. For example, as a result of significant adverse changes in the expected financial performance of LVGI, we recorded impairment of \$13.3 million during the fourth quarter of fiscal 2009 related to our investment in LVGI. Our results of operations, liquidity or financial position may be negatively impacted if we are unable to collect on loans or derive benefit from our investments.

Table of Contents

Our gaming machines and online operations may experience losses due to fraudulent activities.

We incorporate security features into the design of our gaming machines and other systems, including those responsible for our online operations, which are designed to prevent us and our patrons from being defrauded. However, there can be no guarantee that such security features will continue to be effective in the future. If our security systems fail to prevent fraud, our operating results could be adversely affected. Additionally, if third parties breach our security systems and defraud our patrons, the public may lose confidence in our gaming machines and operations.

We may be unable to protect our IP.

A significant portion of our revenues is generated from products using certain IP rights and our operating results would be negatively impacted if we are unsuccessful in protecting these rights from infringement. In addition, some of our most popular games and features are based on trademarks, patents and other IP licensed from third parties. The continued success of these games may depend upon our ability to retain or expand these licenses with reasonable terms. We also depend on trade secret law to protect certain proprietary knowledge and have entered into confidentiality agreements with those of our employees who have access to this information. However, there can be no guarantees that our employees will not breach these agreements, and if these agreements are breached it is unlikely that the remedies available to us will be sufficient to compensate us for the damages suffered.

We may be subject to claims of IP infringement or invalidity and adverse outcomes of litigation could unfavorably affect our operating results.

Periodically, we receive notification from others claiming that we are infringing upon their patent, trademark or other IP rights. Regardless of their merit, such claims may cause us to incur significant costs. Responding to these claims could also require us to stop selling or to redesign our products, to pay significant amounts in damages or to enter into agreements to pay significant licensing fees or royalties. Additionally, if any of these claims prove successful, it could limit our ability to bring new products to market in the future. Our assessment of current IP litigation could change in light of the discovery of facts not presently known to us or determinations by judges, juries or others that do not accord with our evaluation of the possible liability or outcome of such litigation.

Business combinations and investments in intellectual properties or affiliates present risk, and we may not be able to realize the financial and strategic goals that were contemplated at the time of the transaction, which could materially affect our financial results.

We have invested in strategic business combinations and acquisitions of important technologies and IP that we believe will expand our geographic reach, product lines, and/or customer base. We may encounter difficulties in the assimilation of acquired operations, technologies and/or products, or an acquisition may prove to be less valuable than the price we paid. Any of these events or circumstances may require us to record substantial impairment charges on goodwill and other intangible assets, resulting in a negative impact on our operating results.

Moreover, as we continue the process of evaluating our business in conjunction with an assessment of the company's long-term strategic goals, we will also further evaluate past and potential investments to determine if and how they will fit into our organizational structure going forward. If an event or change occurs in affiliate relationships or agreements associated with business combinations, we may be required to reassess cash flows, recoverability, useful lives, and fair value measurements, which may result in material impairment charges.

Failure to attract, retain and motivate key employees may adversely affect our ability to compete.

Our success depends largely on recruiting and retaining talented employees. The market for qualified executives and highly skilled, technical workers is intensely competitive. The loss of key employees or an inability to hire a sufficient number of technical staff could limit our ability to develop successful products and cause delays in getting new products to market.

Table of Contents

Current environmental laws and regulations, or those enacted in the future, could result in additional liabilities and costs.

The manufacturing of our products may require the use of materials that are subject to a variety of environmental, health and safety laws and regulations. Compliance with these laws could increase our costs and impact the availability of components required to manufacture our products. Violation of these laws may subject us to significant fines, penalties or disposal costs, which could negatively impact our results of operations, financial position or cash flows.

The risks related to operations outside of traditional US law could negatively affect our results.

We operate in many countries outside of the US and in tribal jurisdictions with sovereign immunity which subjects us to certain inherent risks including:

- ♣ political or economic instability
- ♣ additional costs of compliance
- ♣ tariffs and other trade barriers
- ♣ fluctuations in foreign exchange rates outside the US
- ♣ adverse changes in the creditworthiness of parties with whom we have significant receivables or forward currency exchange contracts

Table of Contents

Item 1B. Unresolved Staff Comments

None

Item 2. Properties

We expect our current properties will be adequate for our near-term business needs.

North America

Our corporate offices are located in Reno, Nevada, where we own a 1.2 million square foot facility, which houses our largest manufacturing warehouse, along with cabinet production, silkscreen, engineering, sales, and corporate administrative functions. This facility supports production for all North America and International markets, except Japan and the UK. We also lease 147,000 square feet of additional warehousing facilities in Reno under agreements expiring through June 2013.

In Las Vegas, Nevada, we own a 618,000 square foot facility that houses our largest sales and service force, as well as warehousing and administrative functions. We also lease approximately 25,000 square feet of additional administration facilities in Las Vegas under agreements expiring through January 2013. Additionally, we leased approximately 369,000 square feet of warehousing, sales, and service facilities throughout the US and Canada under leases expiring through January 2016.

International

In the UK, we own a 149,000 square foot facility and lease 49,000 square feet under agreements expiring through June 2016, which support manufacturing, sales, and administrative functions. In Australia and New Zealand, we own two facilities with an aggregate of 15,000 square feet and lease 125,000 square feet under agreements expiring through December 2011, used for subassembly, sales, and administration. All other international facilities total 284,000 square feet under leases expiring through June 2013.

Item 3. Legal Proceedings

IGT has been named in and has brought lawsuits in the normal course of business. We do not expect the outcome of these suits to have a material adverse effect on our financial position or results of operations. A description of certain of these matters is contained in Note 16 of our Consolidated Financial Statements and is incorporated herein by this reference.

Item 4. Submission of Matters to a Vote of Security Holders

(a) IGT held a special meeting of stockholders on September 30, 2009.

(b) The stockholders approved a stock option exchange program allowing eligible employees to elect to exchange outstanding stock options for a lesser number of stock options with a lower exercise price. The eligible participants excluded, among others, our board members, executive officers, other senior officers designated by our compensation committee, and employees based outside of the US. Options held by eligible employees with exercise prices greater than the approximate 52-week intraday-high price of our common stock, as reported on the New York Stock Exchange, measured as of the start of the exchange program, were eligible to be surrendered for replacement options.

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-K

A total of 216,146,202 shares voted on the stock option exchange program, with 186,611,839 shares for, 29,312,809 shares against, 221,554 shares abstained, and no broker non-votes.

| Cash and short-term investment securities (4) | \$ 247.4 | \$ 374.4 | \$ 400.7 | \$ 589.1 | \$ 688.1 |
| Working capital (6) | 609.2 | 733.4 | 595.5 | 129.1 | 219.6 |
| Total assets | 4,388.2 | 4,557.4 | 4,167.5 | 3,902.7 | 3,864.4 |
| Credit facilities and indebtedness (5) | 2,174.8 | 2,263.1 | 1,508.6 | 832.4 | 811.0 |
| Total jackpot liabilities | 588.1 | 650.7 | 643.1 | 546.7 | 705.8 |
| Non-current liabilities | 2,796.4 | 2,911.7 | 2,023.3 | 614.1 | 741.1 |
| Stockholders' equity (6) | 967.3 | 909.0 | 1,452.7 | 2,042.0 | 1,905.7 |

- (1) Fiscal 2009 included a loss of \$78.0 million (\$49.2 million after tax or \$0.17 per diluted share) associated with our WDG IP restructuring and \$35.0 million of employee restructuring charges (\$22.0 million after tax or \$0.07 per diluted share).

- (2) Fiscal 2009 included \$273.5 million net cash provided from new debt refinancing.
- (3) Capital spending increases relate to additional investments in gaming operations equipment, as well as spending for our new Las Vegas campus construction and Reno facilities expansion in fiscal 2005, 2006 and 2007.
 - (4) Cash and investment securities include restricted amounts.
- (5) Fiscal 2006 and 2005 included \$611.1 million and \$602.2 million, respectively, of convertible debentures classified in current liabilities due to holders' conversion rights.
- (6) Reduced shareholders' equity in fiscal 2008 and 2007 were primarily due to treasury share repurchases.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW

The following MDA is intended to enhance the reader's understanding of our operations and current business environment. MDA is provided as a supplement to, and should be read in conjunction with, our Item 1, Business, and Item 8, Financial Statements and Supplementary Data.

International Game Technology is a global company specializing in the design, manufacture, and marketing of electronic gaming equipment and systems products. We are a leading supplier of gaming products to the world with annual revenues exceeding \$2.1 billion. We provide a diverse offering of quality products and services at competitive prices, designed to increase the potential for operator profits by enhancing the gaming player experience.

We manage operations in two geographic segments, North America and International, with certain unallocated company-wide income and expenses managed at the corporate level. See BUSINESS SEGMENT RESULTS below and Note 21 of our Consolidated Financial Statements for additional segment information and financial results.

We are currently operating in a challenging global business environment. The combination of economic uncertainty, lower replacement demand, limited opportunities from new or expanding markets, and improved competition has negatively impacted our results. Our customers continue to report subdued casino play levels largely attributed to the extended economic slowdown that has driven lower casino visitation trends over the last eighteen months. This not only adversely affects our gaming operations revenues, with nearly 85% dependent on play levels, but it also constrains casino capital spending which affects our for-sale product demand.

Our gaming operations revenue yields stabilized during the second half of fiscal 2009, which we view as a positive leading indicator for economic recovery and improved play levels. Our installed base continues to provide steady recurring cash flows and we anticipate increased revenue yields as economic conditions improve.

Our new AVP® sbX™-enabled models, released in late fiscal 2008, continue to receive broad acceptance and comprised 86% of our North America sales in fiscal 2009. Customer appeal has also been positive on our innovative MLD® machines that provide flexibility between video slots and 3-D reel replication, with over 4,000 MLD® units shipped in fiscal 2009. While we are encouraged by incremental improvement in operator sentiment, we remain cautious about the overall market environment, as well as predicting the timing and scale of a rebound in the replacement cycle.

Strategically, we are renewing our focus on what we believe we do well. For many years, IGT has been an industry leader in gaming content across a global footprint and content is what has traditionally distinguished us from the competition. In today's gaming market we face highly capable competitors, demanding gaming patrons, and increasing game complexity. Such a market requires constant enhancements, innovations, and improvements to the quality of game content across all product platforms, particularly in video slots. Excellent content drives product sales, increases our opportunities in the replacement cycle, and grows our installed base.

During the latter half of fiscal 2009 we implemented specific efforts to enhance our content offerings, expedite delivery to market, and improve the effectiveness of our R&D efforts. We restructured our strategic product efforts into a more focused vertical product management structure dedicated to developing and deploying game content using our pool of game design resources and IP portfolio. We believe this new vertical structure will allow us to better manage the economic contribution from the various product types and drive accountability to those tasked with delivering product to the market. Additionally, during fiscal 2009, we implemented a consumer research group designed to aggregate and analyze patron level data in order to provide the R&D process with real time market

information, making the patron the focus of our development efforts.

Table of Contents

We remain focused on strategic long-term initiatives that we believe will maintain our status as a leading provider of innovative gaming products and provide multiple platforms for delivery of our content. We released our sbX™ Tier One package for sale with several customer installations in the latter part of fiscal 2009. Tier One provides slot operators with an incremental step towards full enterprise-wide sbX™. It is designed for easy implementation on a smaller-scale slot-bank level basis, accommodating up to 100 games and providing operators with access to a standard library of available IGT game themes for AVP® Video, Video Poker and MLD®.

Additionally, in July 2009, we began a first-of-its-kind sbX™ field trial installation with sbX™ Media Manager and introducing the sbX™ Service Window. The Service Window represents a shift away from secondary displays and provides a more powerful mechanism for delivering compelling applications to the game screen that will enhance the player experience. We remain on target to begin venue wide installation in the first half of fiscal 2010 and expect to realize a growing benefit from sbX™ technology as we differentiate IGT gaming products with new ways to engage and interact with players.

We are dependent, in part, on new market opportunities to generate growth. Legislative actions and the passage of voter referendums are providing new and expanding opportunities in Illinois, Ohio, Kansas, Maryland, Pennsylvania, Florida and Washington. The market potential is estimated at up to 40,000 machines in Illinois and up to 17,500 machines in Ohio. Development projects in Maryland, Kansas, and Pennsylvania received approval and licensing in fiscal 2009, and openings are planned over the next two years. State legislatures in Kentucky, Massachusetts, New Hampshire, Alabama, North Carolina and Texas continue to consider gaming as a way to provide tax revenues in support of public programs. Future gaming expansion is also anticipated in international markets, especially Southeast Asia and Italy. Although the extent and timing is uncertain, we believe new market opportunities will grow as the economy improves and new jurisdictions consider gaming tax revenues as a means to address budget shortfalls.

We continue to take a prudent and cautious approach to our capital deployment in order to preserve maximum flexibility. During fiscal 2009, we successfully refinanced our debt to maintain sufficient liquidity with extended and staggered maturities. See further discussion about our debt refinancing contained in LIQUIDITY AND CAPITAL RESOURCES later in this MDA and in Note 13 of our Consolidated Financial Statements. We continue to focus on reinvesting in our business through our gaming operations installed base, as well as strategic investments in affiliates and alliances to expand our geographic reach, product lines, and customer base.

In response to reduced demand, in fiscal 2009 we initiated an ongoing company-wide strategic review of our costs and organizational structure to identify opportunities to maximize efficiency and realign expenses with the current and long-term business outlook. Through September 30, 2009, we reduced our global workforce by approximately 16% from September 30, 2008 levels, through a combination of voluntary and involuntary separation arrangements. Fiscal 2009 restructuring charges of \$35.0 million included severance and one-time termination costs, reduced by stock compensation forfeitures.

Our fiscal 2009 cost rationalization efforts were executed through workforce reductions and other non-wage cost controls. We estimate the full benefit of these initiatives will be realized throughout fiscal 2010, resulting in approximately \$135.0 million of annual cost savings compared to fiscal 2008 fourth quarter spending levels. A portion of the savings is offset by costs added from our PGIC acquisition completed in January 2009.

As we continue the process of evaluating our business in conjunction with assessment of the company's long-term strategic goals, we may also further evaluate past and potential investments to determine if and how they fit into our organizational structure going forward. Changes in our intended relationship, as well as changes in market conditions or operating results, related to our affiliates or subsidiaries may cause us to reassess cash flows, recoverability, useful lives, and fair value measurements that may result in material losses or impairment charges.

Table of Contents

RECENTLY ISSUED ACCOUNTING STANDARDS

Revenue Arrangements With Multiple Deliverables and Software Elements

In October 2009, the FASB issued new revenue recognition guidance for software and multi-element arrangements. Tangible products containing both software and nonsoftware components that function together to deliver a tangible product's essential functionality will no longer be subject to software revenue accounting. This new guidance also changes the methods for allocating revenues among multiple deliverables to allow for the use of estimated selling prices. We elected to early adopt this new guidance prospectively for new or materially modified arrangements as of the beginning of fiscal 2010. We continue to evaluate the extent to which this new guidance will impact the timing of our revenues and expect many of IGT products, such as machines, will no longer be accounted for as software, allowing for revenue recognition earlier in certain bundled arrangements.

Convertible Debt Instruments

In May 2008, new accounting guidance was issued requiring the separation of liability (debt) and equity (conversion option) components for convertible debt instruments that may settle in cash upon conversion. This change is effective for our first quarter of fiscal 2010 and requires retrospective application for all periods presented. We estimate the impact of this new accounting for fiscal years 2009 and 2010 will increase annual non-cash interest expense approximately \$30.0 million, reducing diluted EPS approximately \$0.07, related to our Debentures and Notes. See Note 13 of our Consolidated Financial Statements for additional information about our Debentures and Notes.

See Note 1 of our Consolidated Financial Statements for additional information about recently issued accounting standards that may impact our financial statements upon adoption.

CRITICAL ACCOUNTING ESTIMATES

Our consolidated financial statements were prepared in conformity with accounting principles generally accepted in the US. Accordingly, we are required to make estimates incorporating judgments and assumptions we believe are reasonable based on our historical experience, contract terms, trends in our company and the industry as a whole, as well as information available from other outside sources. Our estimates affect amounts recorded in the financial statements and actual results may differ from initial estimates.

We consider the following accounting estimates to be the most critical to fully understand and evaluate our reported financial results. They require us to make subjective or complex judgments about matters that are inherently uncertain or variable. Senior management discussed the development, selection and disclosure of the following accounting estimates, considered most sensitive to changes from external factors, with the Audit Committee of our Board of Directors.

Revenue Recognition

We receive revenues from the distribution of electronic gaming equipment and network systems, as well as licensing and services. Revenues are recognized when all of the following have been satisfied:

- ♣ persuasive evidence of an arrangement exists
- ♣ the price to the customer is fixed and determinable
- ♣ delivery has occurred and any acceptance terms have been fulfilled

♠ no significant contractual obligations remain

♠ collection is reasonably assured

Determining whether these requirements have been met may require us to make assumptions and exercise judgment that could significantly impact the timing and amount of revenue reported each period. In addition, we may enter into arrangements which include multiple elements or deliverables, such as gaming devices bundled with software systems and services. In such cases additional judgments and estimates are necessary to ensure the appropriate amounts of revenue are recorded in a given period. These judgments relate primarily to the allocation of revenues based on VSOE or third-party evidence of each element's fair value, and may affect the amounts and timing of revenue recorded. If we are unable to establish VSOE for undelivered elements, we may be required to defer all or a portion of the revenues from certain arrangements.

Table of Contents

The application of our revenue recognition policies and changes in our assumptions or judgments affect the timing and amounts of our revenues and costs. Deferred revenue increased to \$122.0 million at September 30, 2009 from \$62.1 million at September 30, 2008, primarily due to an increasing number of multiple element contracts with bundled machines and software. Complex systems and/or multiple element contracts may take several months to complete and deferred revenue may increase as our products evolve toward a more software systems-centric environment. Additionally, see discussion above under RECENTLY ISSUED ACCOUNTING STANDARDS—Revenue Arrangements With Multiple Deliverables and Software Elements for information about how our revenue accounting will change in the first quarter of fiscal 2010.

Goodwill, Other Intangible Assets, Royalties, and Affiliate Investments

Impairment testing for goodwill, other intangibles, affiliate investments and royalties requires judgment, including the identification of reporting units, allocation of related goodwill, assignment of corporate shared assets and liabilities to reporting units, estimated cash flows, and determinations of fair value. While we believe our estimates of future revenues and cash flows are reasonable, different assumptions could materially affect the assessment of useful lives, recoverability and fair value. If actual cash flows fall below initial forecasts, we may need to record additional amortization and/or impairment charges.

Goodwill

We measure and test goodwill for impairment at least annually, or more often if there are indicators of impairment. The fair value of the reporting unit is first compared to its carrying amount including goodwill. If the fair value of the reporting unit is greater than its carrying amount, goodwill is not considered impaired. In the event that the fair value of the reporting unit is less than its carrying value, the amount of the impairment loss will be measured by comparing the implied fair value of goodwill to its carrying amount. If the carrying amount of goodwill exceeds its implied fair value, an impairment loss is recognized equal to that excess.

Our two reporting units, North America and International, were determined on the basis of customer regions and in accordance with accounting guidance on reporting units. Components below our North America and International business segments were evaluated to have similar economic characteristics and therefore aggregated. In determining the fair value of our reporting units, we apply the income approach using the DCF (discounted cash flows) method. We then compare the implied valuation multiples (such as enterprise value to revenue, EBITDA and EBIT) of comparable gaming companies under the market approach to validate the reasonableness of our DCF results.

Our DCF analysis is based on the present value of two components: the sum of our five-year projected cash flows and a terminal value assuming a long-term growth rate. The cash flow estimates are prepared based on our business plans for each reporting unit, considering historical results and anticipated future performance based on our expectations regarding product introductions and market opportunities. The discount rates used to determine the present value of future cash flows were derived from the weighted average cost of capital of a group of comparable companies with consideration for the size and specific risks of each IGT reporting unit. The discount rates used for each reporting unit were 11% for our fiscal 2008 test and ranged from 12% to 13% for our 2009 test.

Our goodwill totaled \$1.2 billion at September 30, 2009 and 2008. Our fiscal 2009 annual goodwill impairment test indicated the fair value of each reporting unit was significantly in excess of its carrying value. Inherent in such fair value determinations are significant judgments and estimates, including assumptions about our future revenues, profitability, cash flows, and long-term growth rates, as well as our operational plans and interpretation of current economic indicators and market valuations.

Changes in our assumptions used from the fiscal 2008 test to the fiscal 2009 test included updated five-year forecasts with reduced and delayed growth, lower long-term growth rates, and higher discount rates. Fair value for each reporting unit decreased from fiscal 2008, 53% for North America and 47% for International. The excess of fair value over carrying value for each reporting unit at the 2009 testing date ranged from \$3.1 billion for North America to \$1.2 billion for International. We believe our long-term growth projections remain fundamentally sound and expect the fair value of each reporting unit will remain significantly in excess of its carrying value.

Table of Contents

If our assumptions do not prove correct or economic conditions affecting future operations change, our goodwill could become impaired and result in a material adverse effect on our results of operations and financial position. To illustrate the sensitivity of the fair value calculations on our goodwill impairment test, we modified our 2009 test assumptions to create a hypothetical 50% decrease to the fair values of each reporting unit. The resulting hypothetical excess of fair value over carrying value would range from approximately \$1.3 billion for North America to \$0.3 billion for International, and we would therefore have no impairment.

Other Intangibles

Our portfolio of other intangibles substantially consists of finite-lived patents, contracts, trademarks, developed technology, reacquired rights and customer relationships. We regularly monitor events or changes in circumstances that indicate the carrying value of these intangibles may not be recoverable or require a revision to the estimated remaining useful life. Our other intangibles totaled \$259.2 million at September 30, 2009 and \$248.9 million at September 30, 2008.

If an event or change occurs, we estimate cash flows directly associated with the use of the intangible to test recoverability and remaining useful lives based on the forecasted utilization of the asset and expected product revenues. In developing estimated cash flows, we incorporate assumptions regarding changes in legal factors, related industry climate, regulatory actions, contractual factors, operational performance and the company's strategic business plans, as well as the effects of obsolescence, demand, competition, and other market conditions. When the carrying amount exceeds the undiscounted cash flows expected to result from the use and eventual disposition of a finite-lived intangible asset or asset group, we then compare the carrying amount to its current fair value. We estimate the fair value using prices for similar assets, if available, or more typically using a DCF model. We recognize an impairment loss if the carrying amount is not recoverable and exceeds its fair value.

Royalties

We also regularly evaluate the estimated future benefit of prepaid and deferred royalties to determine amounts unlikely to be realized from forecasted sales or placements of our games. The carrying value of our prepaid and deferred royalties totaled \$101.5 million at September 30, 2009 and \$195.5 million at September 30, 2008.

Affiliate investments

Our affiliate investments consist of strategic alliances with other gaming technology companies. We regularly monitor events or changes in circumstances that indicate the carrying value of these affiliate investments may be impaired. Future adverse changes in market conditions or operating results of these affiliates could result in losses or an inability to recover part or all of our investment, requiring us to record impairment.

In the fourth quarter of fiscal 2009, we restructured our relationship with WDG and based on our future business outlook pertaining to the use of WDG IP rights we recorded a loss of \$78.0 million. Additionally, we recorded a loss of \$13.3 million related to our affiliate investment in LVGI resulting from significant adverse changes in LVGI's expected financial performance together with an evaluation of our long term gaming systems strategy. See Note 3 of our Consolidated Financial Statements for additional information about our affiliate investments.

Jackpot Liabilities and Expenses

A portion of our gaming operations recurring revenue arrangements incorporates IGT paid WAP jackpots for which we recognize corresponding jackpot liabilities and expense. Changes in our estimated amounts for jackpot liabilities and associated jackpot expense are attributable to regular analysis and evaluation of the following factors:

- ♠ variations in slot play (i.e. jackpot life cycles and slot play patterns)
 - ♠ volume (i.e. number of WAP units in service and coin-in per unit)
 - ♠ interest rate movements
 - ♠ the size of base jackpots (i.e. initial amount of the progressive jackpots displayed to players)
-

Table of Contents

Interest rates applicable to jackpot funding vary by jurisdiction and are impacted by market forces, as well as winner elections to receive a lump sum payment in lieu of periodic annual payments. Current and noncurrent portions of jackpot liabilities, as well as jackpot expense, may also be impacted by changes in our estimates and assumptions regarding the expected number of future winners who may elect a lump sum payout.

Changes in prime and/or treasury and agency interest rates during a given period cause fluctuations in our jackpot expense largely due to the revaluation of future winner liabilities. The value of the liability (and related jackpot expense) increases when rates decline because it increases the cost to fund the liability. Conversely, when rates increase, jackpot liabilities are reduced as it costs less to fund the liability. Our results may be materially affected by significant changes in interest rates such as the 200 bps decline in the prime rate during the second quarter of fiscal 2008.

Our jackpot liabilities decreased to \$588.1 million at September 30, 2009 compared to \$650.7 million at September 30, 2008. Consolidated jackpot expense totaled \$129.3 million for fiscal 2009, \$160.0 for fiscal 2008, and \$164.7 million in fiscal 2007. The decline in jackpot expense for fiscal 2009 resulted from decreased WAP units in our installed base, lower play levels, and variations in slot play, partially offset by unfavorable interest rate movements.

BUSINESS SEGMENT RESULTS, later in this MDA, provides additional details regarding the fluctuation in jackpot expense. Note 1 of our Consolidated Financial Statements summarizes our accounting policies related to jackpot liabilities and expense.

Inventory and Gaming Operations Equipment

The determination of obsolete or excess inventory requires us to estimate the future demand for our products within specific time horizons, generally one year or less. If we experience a significant unexpected decrease in demand for our products or a higher occurrence of inventory obsolescence because of changes in technology or customer requirements, we would recognize additional obsolescence charges. Inventory management remains an area of focus as we balance the need to maintain strategic inventory levels to ensure competitive lead times versus the risk of inventory obsolescence because of rapidly changing technology and customer requirements. The decrease in inventories to \$157.8 million at September 30, 2009 from \$218.3 million at September 30, 2008, was primarily related to the prior year build-up in support of the release of newer platforms and cabinets.

We are also required to estimate salvage values and useful lives for our gaming operations equipment. Trends in market demand and technological obsolescence may require us to record additional asset charges which would negatively impact gross profit.

Income Taxes

We conduct business globally and are subject to income taxes in US federal, state, local, and foreign jurisdictions. Determination of the appropriate amount and classification of income taxes depends on several factors, including estimates of the timing and probability of realization of deferred income taxes, reserves for uncertain tax positions, and income tax payment timing.

We record deferred tax assets and liabilities based on temporary differences between the financial reporting and tax bases of assets and liabilities, applying enacted tax rates expected to be in effect for the year in which the differences are expected to reverse. The ability to realize the deferred tax assets is evaluated through the forecasting of taxable income in each jurisdiction, using historical and projected future operating results, the reversal of existing temporary differences, and the availability of tax planning strategies. Net deferred tax assets totaled \$310.1 million at September 30, 2009 and \$251.3 million at September 30, 2008.

Valuation allowances are recorded to reduce deferred tax assets when it is more likely than not that a tax benefit will not be realized. Changes in tax laws, enacted tax rates, geographic mix, or estimated annual taxable income could change our valuation of deferred tax assets and liabilities, which in turn impacts our tax provision. We carefully monitor many factors, including the impact of current economic conditions, in our valuation of deferred tax assets. During fiscal 2009, we recorded additional valuation allowances of \$19.5 million, primarily related to foreign deferred tax assets and investment write-downs. At September 30, 2009, our total valuation allowance of \$37.1 million related to investment write-downs, acquisition related net operating losses, and foreign deferred assets not expected to be fully realized because we cannot conclude that it is more likely than not that we will earn income of the specific character required to utilize these assets before they expire.

Table of Contents

In the ordinary course of business, there are many transactions and calculations for which the ultimate tax determination is uncertain. At the beginning of fiscal 2008, we adopted new accounting guidance which required the recognition of uncertain tax positions taken or expected to be taken in a tax return, when it is “more likely than not” to be sustained upon examination. This assessment further presumes that tax authorities evaluate the technical merits of transactions individually with full knowledge of all facts and circumstances surrounding the issue. The amount recognized in the financial statements is the largest benefit that we believe is more than 50% likely of being realized upon settlement. Changes in facts or information as well as the expiration of statutes of limitations and/or settlements with tax jurisdictions may result in material adjustments to these estimates in the future.

Our income tax provision will be impacted to the extent the final outcome of these tax positions differs from the amount recorded. At September 30, 2009, our net unrecognized tax benefits totaled \$67.8 million, of which \$46.5 million would impact the effective tax rate if recognized. At September 30, 2008, our net unrecognized tax benefits totaled \$87.5 million, of which \$53.4 million would impact the effective tax rate if recognized.

Our tax provision for fiscal 2009 was reduced by significant non-recurring discrete items, partially offset by investment write-downs and foreign deferred tax assets not expected to be fully realized. Our effective tax rate is dependent upon forecasts of future taxable income, the geographic composition of worldwide earnings, and the tax regulations governing each jurisdiction. We carefully monitor many factors including the impact of current economic conditions, as discussed above under “Goodwill, Other Intangible Assets, Royalties, and Affiliate Investments” and adjust the effective tax rate as required. Although our effective tax rate may continue to be volatile due to changes in uncertain tax positions, we anticipate our fiscal 2010 effective tax rate will trend towards a more historical range of 39% to 40%. See Notes 1 and 17 for additional information about our income taxes.

Fiscal 2009 vs Fiscal 2008

Consolidated net income declined in fiscal 2009 primarily due to reduced volumes, largely attributable to the impact of the extended economic downturn on casino play levels and capital spending, as well as more intense competition. Additionally, fiscal 2009 results were adversely impacted by charges resulting from management's reassessment of long-term goals and other cost rationalization efforts, including a non-cash loss of \$78.0 million (\$49.2 million after tax or \$0.17 per diluted share) associated with our WDG IP transaction and workforce restructuring costs of \$35.0 million (\$22.0 million after tax or \$0.7 per diluted share). Fiscal 2008 also included a number of significant items affecting comparability noted below under the subheading "Fiscal 2008 vs Fiscal 2007."

Increased interest expense related to debt refinancing, additional bad debt provisions, and unfavorable changes in foreign exchange rates further burdened fiscal 2009 earnings. Unfavorable changes in foreign exchange rates accounted for approximately \$73.8 million of the decrease in fiscal 2009 revenues.

Although fiscal 2009 included an extra week due to our 52/53-week accounting year, the benefit to gaming operations was more than offset by increased operating expenses.

Consolidated Gaming Operations

Revenues and gross profit from gaming operations declined primarily due to lower play levels and continued shifts in our installed base mix toward lower-yielding non-WAP machines. Non-WAP units generally provide lower revenues and gross profit because they carry a lower pricing structure and generate lower average play levels. At the same time, non-WAP units provide higher gross margin because there is no associated jackpot expense. Growth in our International installed base partially offset declines in North America, reflecting strength in our geographic diversity.

Jackpot expense decreased \$35.0 million in fiscal 2009 primarily due to fewer WAP units and decreased play levels, partially offset by unfavorable interest rate changes. Interest rate movement increased jackpot expense by \$2.2 million in fiscal 2009 compared to the prior year. See MDA—CRITICAL ACCOUNTING ESTIMATES—Jackpot Liabilities and Expenses for additional information about factors affecting jackpot expense.

Table of Contents

The extra week during fiscal 2009 contributed approximately \$22.4 million in gaming operations revenues and \$11.5 million in gross profit.

Consolidated Product Sales

Revenues and gross profit for product sales declined from the prior year primarily due to lower unit volume across most markets, largely attributed to fewer new openings and weakness in replacement demand. International markets were further impacted by unfavorable changes in foreign exchange rates. Gross margin was negatively impacted by reduced volume efficiencies, as well as higher systems upgrade costs and fewer new systems installations. Consolidated product sales margins fluctuate depending on the geographic mix and types of products sold.

Deferred revenue increased \$59.9 million during fiscal 2009 to \$122.0 million at September 30, 2009, primarily as a result of multi-element contracts with systems software and machines bundled together. We expect to recognize most of the deferred revenue balance during fiscal 2010. During fiscal 2009, we shipped 5,000 units for which revenues were deferred and recognized revenues for 2,400 units previously shipped, for a net growth of 2,600 units in our deferred revenue balance.

“Equivalent units recognized” (as presented in the table above) include units previously shipped for which revenues were recognized during the period and exclude units shipped during the period for which revenue was deferred. When machine revenues are prorated over the life of an associated systems lease, equivalent units recognized was determined based on the proportionate revenues recognized for the period. “Units shipped” represent all units shipped to customers during the period and include units shipped for which revenues were deferred.

Fiscal 2008 vs Fiscal 2007

Net income decreased in fiscal 2008, predominately due to lower gaming operations play levels amid unfavorable economic conditions and weakness in North America replacement sales demand. Comparability was also significantly affected by:

- ♣ write-downs of investments in unconsolidated affiliates totaling \$28.6 million (\$0.10 per diluted share)
- ♣ interest rate declines which increased jackpot expense \$25.3 million (\$15.4 million after tax or \$0.05 per diluted share)
- ♣ fiscal 2007 gains totaling \$22.8 million from hurricane insurance settlements and an airplane sale (\$14.3 million after tax or \$0.04 per diluted share)

Favorable foreign currency exchange increased revenue by approximately \$43.9 million during fiscal 2008 compared to fiscal 2007.

Consolidated Gaming Operations

Revenues declined primarily due to lower play levels in North America and a growing mix of lower-yielding non-WAP units in our installed base. International revenue and gross profit improvements partially offset declines in North America reflecting the geographic expansion of our gaming operations.

Fiscal 2008 gross profit and margin comparability was adversely affected by unfavorable interest rate impacts on jackpot expense and technological obsolescence charges of \$10.4 million related to the transition toward new products, as well as a prior year gain of \$5.0 million from hurricane property insurance.

Fiscal 2008 jackpot expense was negatively impacted by \$25.3 million due to declining interest rates, with the most significant impact resulting from the 200 bps decline in the prime rate during the second quarter. The additional cost due to interest rates was more than offset by reduced play levels, fewer WAP units, and variations in slot play, for a net decrease to jackpot expense of \$4.7 million compared to fiscal 2007. See MDA—CRITICAL ACCOUNTING ESTIMATES—Jackpot Liabilities and Expenses for additional details regarding the factors affecting jackpot expense.

Table of Contents

Consolidated Product Sales

Fiscal 2008 product sales revenues and gross profit declined primarily due to fewer machine shipments across most markets. Gross margin improvements were due to a favorable product and jurisdictional mix, including a greater contribution from non-machine sales. During fiscal 2008, we shipped 2,100 additional units for which revenues were deferred.

Operating Expenses

| (In millions) | 2009 | 2008 | 2007 | Favorable (Unfavorable) | | | |
|-------------------------------------|----------|----------|----------|-------------------------|------|------------|-------|
| | | | | 09 vs 08 | | 08 vs 07 | |
| Selling, general and administrative | \$ 425.1 | \$ 458.5 | \$ 397.9 | \$ 33.4 | 7 % | \$ (60.6) | -15 % |
| Research and development | 211.8 | 223.0 | 202.2 | 11.2 | 5 % | (20.8) | -10 % |
| Depreciation and amortization | 80.4 | 76.7 | 80.4 | (3.7) | -5 % | 3.7 | 5 % |
| Restructuring charges | 35.0 | 1.6 | - | (33.4) | * | (1.6) | * |
| Loss on other assets | 78.0 | - | - | (78.0) | * | - | * |
| Total | \$ 830.3 | \$ 759.8 | \$ 680.5 | \$ (70.5) | -9 % | \$ (79.3) | -12 % |
| Percent of revenues | 39 % | 30 % | 26 % | | | | |

Fiscal 2009 vs Fiscal 2008

The positive impact of our cost reduction initiatives is becoming more evident in reduced operating expenses. Excluding restructuring charges and loss on other assets associated with our WDG IP, operating expenses decreased \$42.5 million or 6% in fiscal 2009 from fiscal 2008. See Note 2 and 3 of our Consolidated Financial Statements for additional information about restructuring and WDG IP.

Our fiscal 2009 cost rationalization efforts were executed through workforce reduction and other non-wage cost controls. We reduced our global workforce by approximately 16% during fiscal 2009 from September 30, 2008 levels, through a combination of voluntary and involuntary separation arrangements. Restructuring charges included cash severance and one-time termination costs, reduced by stock compensation forfeitures. See Note 2 of our Consolidated Financial Statements for additional information about our remaining restructuring plan liability.

Decreases in staffing costs, professional fees, advertising, supplies, and travel were partially offset by higher bad debt provisions, up \$24.9 million during fiscal 2009 due to certain specific customer credit concerns amidst the economic downturn. Additionally, the extra week of operations added \$12.6 million and the impact of foreign currency exchange reduced operating costs by approximately \$22.8 million during fiscal 2009 compared to fiscal 2008.

Fiscal 2008 vs Fiscal 2007

SG&A and R&D increased in fiscal 2008 attributable to:

- ♣ additional bad debt provisions of \$15.0 million related to credit concerns on certain receivables
- ♣ increased staffing cost of \$27.1 million

- ♠ higher legal and compliance fees of \$9.9 million
- ♠ changes in foreign currency exchange of approximately \$8.4 million
- ♠ prior year gains of \$12.0 million from Gulf Coast hurricane business interruption insurance settlement and \$5.8 million from the sale of a company airplane

R&D increased in fiscal 2008 primarily due to added focus on technologies, especially server-based gaming initiatives.

| Other | (102.0) | (71.5) | (46.3) | (30.5) | -43 % | (25.2) | -54 % |
| Other | (15.9) | (35.8) | 0.1 | 19.9 | 56 % | (35.9) | * |
| Total other income (expense) | \$ (83.3) | \$ (68.5) | \$ 4.5 | \$ (14.8) | -22 % | \$ (73.0) | * |
| Income tax provision | \$ 89.0 | \$ 248.3 | \$ 296.6 | \$ 159.3 | | \$ 48.3 | |
| Effective tax rate | 37.4 % | 42.0 % | 36.9 % | 4.6 | | (5.1) | |

Fiscal 2009 vs Fiscal 2008

The unfavorable variance in fiscal 2009 total other income (expense) was primarily due to higher interest expense, partially offset by reduced investment write-downs. Higher interest costs were primarily due to higher rates on refinancing completed in June 2009 and included non-recurring refinancing charges of \$4.4 million. The extra week in fiscal 2009 also contributed to higher interest expense. See Note 13 of our Consolidated Financial Statements for additional information about our outstanding debt.

Affiliate investment write-downs included \$13.3 million for LVGI and \$2.1 million for PGIC during fiscal 2009 and \$21.4 million for CLS and \$7.2 million for PGIC during fiscal 2008. Affiliate write-downs were driven by the economic downturn, as well as a reassessment of our future business outlook. See Note 3 of our Consolidated Financial Statements for additional information about these investments and related write-downs.

WAP interest income and expense is related to annuity-based jackpot winner liabilities and accretes at approximately the same rate. WAP interest income also includes earnings on restricted cash and investments held for future winners. WAP interest is declining primarily due to fewer winners electing annuity based payments.

Our tax rate for fiscal 2009 was reduced by significant favorable discrete items, partially offset by the negative impact of a valuation allowance established against foreign deferred tax assets not likely to be realized. These tax items are further described in Note 17 of our Consolidated Financial Statements. While changes in uncertain tax positions may continue to cause volatility in future effective tax rates, our fiscal 2010 effective tax rate is expected to fall between 39% and 40% (inclusive of discrete items).

Fiscal 2008 vs Fiscal 2007

The unfavorable change in total other income (expense) in fiscal 2008 was primarily attributable to:

- ◆ \$28.6 million related to write-downs of our investments in CLS and PGIC
- ◆ higher interest expense resulting from increased borrowings under our revolving credit facility

- ♠ reduced interest income due to lower investment balances and interest rates

Our tax rate increased in fiscal 2008 largely due to the effect of non-deductible investment write-downs, as well as increased accruals for uncertain tax positions related to the adoption of new accounting rules. The fiscal 2008 tax rate also increased due to changes in the geographical mix of taxable income. See Note 17 of our Consolidated Financial Statements for additional information about our income taxes.

| Operating margin | 20 % | 32 % | 38 % | (12) pp | -38 % | (6) pp | -16 % |

Fiscal 2009 vs Fiscal 2008

Reduced fiscal 2009 operating results for North America reflected continued suppressed demand from our customers and their patrons, partially offset by expense savings achieved through recent cost rationalization initiatives. Fiscal 2009 operating results were also negatively impacted by the \$78.0 million loss on our WDG IP transaction, restructuring charges, and increased bad debt provisions related to increased customer credit risk associated with the economic downturn.

North America Gaming Operations

Gaming operations revenues and gross profit declined from the prior year due to lower play levels and a lower installed base increasingly comprised of fewer WAP units. Depressed casino play levels continue to have a significant adverse affect on gaming operations with 86% of our installed base composed of variable fee units where pricing is based on a percentage of play. Lower play levels also drove current fiscal year gross profit and margin decline, partially offset by lower depreciation, service labor, and gaming taxes.

The extra week of North America operations in fiscal 2009 contributed approximately \$19.1 million in revenues and \$9.8 million in gross profit.

North America Product Sales

Fiscal 2009 product sales revenues and gross profit decreased on lower unit volume and fewer non-machine sales, partially offset by a favorable mix of higher priced MLD models. Gross margin declined in fiscal 2009 primarily due to reduced volume efficiencies, as well as higher systems upgrade costs and fewer new systems installations. Low replacement demand continued to adversely affect product sales. We shipped 26,400 units in fiscal 2009, of which 41% were replacement units, compared to 37,100 units shipped in fiscal 2008, of which 44% were replacement units.

Table of Contents

Fiscal 2008 vs Fiscal 2007

North America operating results during fiscal 2008 were unfavorably affected by lower gaming operations play levels and interest rate declines in the midst of the economic downturn, as well as continued softness in replacement demand. Operating income was also down compared to fiscal 2007 due to higher operating expenses.

North America Gaming Operations

Gaming operations revenues and gross profit declined in fiscal 2008 due to lower play levels, as well as the shift in our installed base toward lower-yielding non-WAP units. Declines in our installed base from reductions in Florida and California Class II markets, as they transitioned to Class III for-sale games, were partially offset by increases in Alabama. As approximately 85% of our installed base was comprised of variable fee units with pricing based on a percentage of play, our gaming operations revenues were significantly impacted by the economic downturn.

Gaming operations gross profit and margin also declined due to the negative impact of lower interest rates on our jackpot costs, technological obsolescence charges of \$5.3 million, and the prior year gain of \$5.0 million from hurricane property insurance.

North America Product Sales

Product sales revenues and gross profit were down compared to fiscal 2007 primarily due to fewer units on low replacement demand, partially offset by higher IP royalties. Machine revenues reflected an increase in the mix of our premium-priced AVP®, which partially offset lower unit volume. The decline in gross margin is primarily attributable to the increased share of AVP® machines which provide higher gross profit, but lower margins.

The decline in unit shipments was mainly attributable to low replacement demand. The economic conditions in North America exacerbated the slump in demand as declining gaming revenues caused gaming operators to defer capital spending on replacement machines, as well as new or expanded properties. We shipped 37,100 units in fiscal 2008, with 44% replacement units, versus 43,000 in fiscal 2007, with 52% replacement units.

| Operating margin | 22 % | 26 % | 27 % | (4) pp | -15 % | (1) pp | -4 % |

Fiscal 2009 vs Fiscal 2008

International operating results declined for fiscal 2009 primarily due to lower sales volumes, partially offset by gaming operations growth. International revenue decreases were most notable in Europe, Japan, and South America, in large part due to the effects of the global economic downturn. Changes in foreign exchange rates were unfavorable to international revenues by approximately \$66.2 million in fiscal 2009. International operating results were also negatively impacted by increased workforce restructuring charges during the current year.

International Gaming Operations

Improved gaming operations revenues and gross profit for the current year were driven by installed base growth, most significant in the UK, partially offset by unfavorable foreign exchange rate changes. The current year included increased Japan rentals and significant conversions from fixed to variable pricing arrangements. The extra week during fiscal 2009 contributed approximately \$3.3 million in revenues and \$1.7 million in gross profit. Current year gross profit and margin also improved with lower depreciation and obsolescence.

International Product Sales

Product sales revenues, gross profit and gross margin decreased in fiscal 2009 primarily due to lower unit volume across most regions, unfavorable changes in foreign exchange rates, and reduced volume efficiencies, partially offset by higher non-machine contributions.

Fiscal 2008 vs Fiscal 2007

International operating results were relatively flat during fiscal 2008. Favorable foreign currency exchange, continued growth in gaming operations and a favorable mix of product sales offset declines in Japan and the UK. Fiscal 2008 revenues benefited \$34.4 million from favorable foreign currency exchange rates. Total gross margin increased as improvements in product sales outweighed gaming operations declines. Operating income for fiscal 2008 included higher operating expenses, primarily bad debt provisions.

Table of Contents

International Gaming Operations

Improvements in gaming operations revenues and gross profit during fiscal 2008 were mainly due to increased internet gaming and other non-installed base revenues, including leased equipment, casino-owned units and Japan rentals. Improved performance in Latin America and a higher average installed base also contributed to increased revenues. Installed base growth was mainly from the UK and included 800 units from the fiscal 2008 acquisition of Cyberview.

Fiscal 2008 gaming operations gross profit and margins were negatively impacted by \$5.1 million in technological obsolescence charges. Gross margin was also down due to the additional contribution from new, lower-margin internet gaming products, Japan rentals, and a shift to lower-margin units in the UK.

International Product Sales

Product sales revenues were down during fiscal 2008 due to fewer units, primarily in Japan. Product sales gross profit improvements were realized in fiscal 2008 as our higher-priced, higher-margin jurisdictions more than offset declines from the lower-priced, lower-margin markets of Japan and the UK. Additionally, non-machine sales increased compared to fiscal 2007, with improved parts and systems sales. Margin improvement was attributed mainly to a favorable mix of non-machine sales, as well as fewer low margin units sold in Japan.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

Sources of Liquidity

At September 30, 2009, our principal sources of liquidity were cash and equivalents (including restricted cash), cash from operations, and \$1.7 billion available on our credit facilities worldwide. During fiscal 2009, we refinanced our debt as discussed below under "Credit Facilities and Indebtedness." Other potential sources of capital include, but are not limited to, the issuance of public or private placement debt, bank credit facilities and the issuance of equity or convertible debt securities. Based on past performance and current expectations, we believe the combination of these resources will satisfy our needs for working capital, jackpot liabilities, capital expenditures, debt service, and other liquidity requirements associated with our existing operations into the foreseeable future.

Restricted cash and investments, as well as jackpot annuity investments, are available only for funding jackpot winner payments. Unrestricted cash and equivalents decreased \$119.7 million to \$146.7 million at September 30, 2009. Working capital decreased to \$609.2 million at September 30, 2009 from \$733.4 million at September 30, 2008, primarily due to reduced inventory and receivables.

Additionally, we held ARS of \$21.6 million par at September 30, 2009 that have no active market. We also held ARS put rights entitling us to sell our ARS at par plus accrued interest during the exercise period from June 30, 2010 through July 2, 2012. There has been no interruption in ARS interest receipts and we expect to fully realize the par value without significant loss. See Note 8 and Note 20 of our Consolidated Financial Statements for additional information about our ARS.

Cash Flows Summary

| | 2009 | 2008 | 2007 | Favorable (Unfavorable) | |
|---------------------------|------------|----------|-----------|----------------------------|------------|
| | | | | 09 vs 08 | 08 vs 07 |
| (In millions) | | | | | |
| Operations | \$547.9 | \$486.5 | \$821.5 | \$61.4 | \$(335.0) |
| Investing | (288.4) | (365.7) | (296.7) | 77.3 | (69.0) |
| Financing | (381.2) | (115.2) | (556.5) | (266.0) | 441.3 |
| Effects of exchange rates | 2.0 | (0.5) | (1.6) | 2.5 | 1.1 |
| Net Change | \$(119.7) | \$5.1 | \$(33.3) | \$(124.8) | \$38.4 |

Operating Cash Flows

Despite lower earnings operating cash flows increased during fiscal 2009 compared to fiscal 2008, primarily due to prior year additional prepayments to secure long-term licensing rights, as well as additional cash provided from net changes in operating assets and liabilities. Additional cash provided from inventories and receivables was partially offset by increased cash used in jackpot liabilities and taxes. Added payments for restructuring of \$33.3 million were offset by savings from cost rationalization efforts.

The net change in operating receivables resulted in operating cash flows of \$8.1 million since the end of fiscal 2008. Excluding notes and contracts, average days sales outstanding for the trailing twelve months at September 30, 2009 decreased to 58 days from 63 days in fiscal 2008 on lower revenues and receivables. The decrease in inventory resulted in \$55.6 million of operating cash flows during fiscal 2009. Inventory turns for the trailing twelve months at September 30, 2009 improved to 3.0 versus 2.5 at September 30, 2008 due to reduced inventory levels.

Fiscal 2008 operating cash flows declined from fiscal 2007 primarily due to lower earnings, increased inventories, additional prepayments of \$80.0 million to secure long-term licensing rights, and increased receivables.

Cash flows related to jackpot liabilities fluctuate based on the timing of jackpots and winner payments, volume of play, and market variations in applicable interest rates as described in Note 1 of our Consolidated Financial Statements.

Table of Contents

Investing Cash Flows

The decrease in cash used for investing during fiscal 2009 versus 2008 was primarily due to decreased restricted cash requirements, lower business acquisitions and affiliate investments, and reduced capital expenditures, partially offset by increased net development financing.

Higher cash used for investing activities during fiscal 2008 compared to 2007 was due to increased restricted cash, and lower proceeds from the sale of investment securities, partially offset by lower capital expenditures. Investments in unconsolidated affiliates and business acquisitions totaled \$110.3 million in fiscal 2008, including Cyberview and M-2-1 in the UK, PGIC and WDG, versus \$142.8 million in fiscal 2007, including CLS, Digideal, and VCAT. See Note 3 and Note 7 of our Consolidated Financial Statements for additional information about affiliate investments and acquisitions.

Capital Expenditures

| | 2009 | 2008 | 2007 | Increase (Decrease) | |
|-------------------------------|---------|---------|---------|---------------------|-----------|
| | | | | 09 vs 08 | 08 vs 07 |
| (In millions) | | | | | |
| Property, plant and equipment | \$37.7 | \$92.5 | \$134.1 | \$(54.8) | \$(41.6) |
| Gaming operations equipment | 180.8 | 190.6 | 194.4 | (9.8) | (3.8) |
| Intellectual property | 38.9 | 15.1 | 15.8 | 23.8 | (0.7) |
| Total capital expenditures | \$257.4 | \$298.2 | \$344.3 | \$(40.8) | \$(46.1) |

Higher capital expenditures for property, plant and equipment during fiscal 2008 and 2007 was attributed to our Las Vegas campus construction and fiscal 2007 also included the purchase of a corporate airplane. Increased intellectual property expenditures in the current year included \$20.0 million associated with restructuring our WDG IP rights.

Financing Cash Flows

The increase in cash used for financing in fiscal 2009 was primarily due to refinancing activities, partially offset by the absence of share repurchases. The reduction in cash used for financing during fiscal 2008 compared to fiscal 2007 was primarily due to less cash used for share repurchases, as well as greater net debt proceeds with increased line of credit borrowings on our senior credit facility.

Credit Facilities and Indebtedness

In May and June 2009, we refinanced our debt to extend maturities and diversify financing sources. We amended and restated our domestic credit facility and issued convertible and fixed rate securities discussed in more detail below and in Note 13 of our Consolidated Financial Statements. We were in compliance with all debt covenants at September 30, 2009.

Revolving Credit Facilities

At September 30, 2009, \$1.7 billion was available on our credit facilities worldwide. In June 2009, we amended and restated our domestic credit facility, reducing the total commitment to \$1.8 billion and extending the maturity on \$1.5 billion to June 2012, with \$0.3 billion remaining due in December 2010. The extended commitments bear interest at LIBOR plus 260 bps with a facility fee of 65 bps versus LIBOR plus 37.5 bps with a facility fee of 12.5 bps on the non-extended portion. Rates and fees are based on our public debt ratings or debt to capitalization ratio. Half of amounts outstanding in December 2010 will convert to term loans due in six quarterly installments.

Our amended domestic credit facility subjects us to a number of financial covenants, and our ability to comply with these covenants may be adversely impacted by an extended economic downturn. The financial covenants include a minimum interest coverage ratio (ICR) of 3.00 and a maximum total leverage ratio (TLR) of 3.75, which reduces to 3.5 on April 1, 2010 and 3.25 on April 1, 2011. At September 30, 2009, our ICR was 8.2 and our TLR was 3.0.

38

Table of Contents

The amended facility includes the following covenants (all terms as defined per the amended facility):

♣ a minimum ratio of adjusted EBITDA to interest expense (interest coverage ratio)

♣ a maximum ratio of Total Debt to adjusted EBITDA (total leverage ratio)

♣ certain restrictions on our ability to:

§ incur or guaranty additional debt, or enter into swap agreements

§ incur liens

§ merge with or acquire other companies, liquidate or dissolve

§ sell, transfer, lease or dispose of substantially all assets

§ change the nature of our business

§ declare or make cash dividends or distributions or pay cash for the purchase, redemption, retirement, defeasance, acquisition, cancellation or termination of our capital stock or equity interests or any return of capital to shareholders, provided that we may, as long as no continuing default has occurred, pay dividends of up to the lesser of \$0.06 per common share per fiscal quarter or \$25 million in any fiscal quarter.

2.6% Convertible Debentures

Our outstanding Debentures pay interest semiannually in June and December. The Debentures are general unsecured obligations of IGT, ranking equal with all existing and future unsecured and unsubordinated obligations. The Debentures rank junior to all existing and future subsidiary liabilities, including trade payables. Holders have the right to require IGT to redeem the Debentures for cash at 100% of their principal amount plus accrued and unpaid interest, if any, on December 15, 2009, 2011, 2016, 2021, 2026, and 2031.

On November 12, 2009, we gave holders of the Debentures notice of this put right, which will terminate on December 14, 2009. Given current market conditions and the recent trading price of our common stock, we expect outstanding Debenture holders will exercise this put right. At September 30, 2009, \$707.0 million par of Debentures were outstanding after repurchases of \$193.0 million during fiscal 2009.

The Debentures were not classified as current liabilities at September 30, 2009, because we had the intent and ability to refinance with our noncurrent domestic credit facility. We expect to incur incremental interest costs on additional credit facility borrowings used to fund Debentures redeemed in December 2009. However, the rates were not significantly different as of September 30, 2009.

3.25% Convertible Notes

On May 11, 2009, we issued \$850.0 million aggregate principal amount of Notes, in a private placement for net proceeds of \$822.5 million, after deferred offering costs of approximately \$27.5 million which will be amortized to interest expense over the Note term. We will pay interest at 3.25% on the Notes, semiannually on May 1 and November 1 of each year, beginning November 1, 2009. Proceeds from the Notes (net of amounts used for the separate note hedge transactions and funds provided by the separate warrant transactions described below) were used to reduce outstanding borrowings under our revolving domestic credit facility.

The Notes are general unsecured obligations of IGT, ranking equal with all existing and future unsecured and non-subordinated obligations of IGT. The Notes rank junior to all existing and future liabilities, including trade payables, of our subsidiaries. The Notes mature on May 1, 2014, unless repurchased earlier by IGT or converted. The Notes are not redeemable at IGT's option before maturity, except in certain circumstances relating to applicable gaming authority regulations. The terms of the Notes may, in certain circumstances, require us to grant a lien on equity interests if certain downgrades by rating agencies occur.

Each \$1,000 Note is initially convertible into 50.0808 shares of IGT common stock, representing a conversion price of \$19.97 per share. Upon conversion, for each \$1,000 Note, a holder will receive cash up to the aggregate principal amount of each Note and shares of our common stock for any conversion value in excess of the principal amount as determined per the indenture. The conversion rate is adjustable upon the occurrence of certain events as defined in the indenture.

Table of Contents

Note Hedges

In connection with the Notes, we paid an aggregate amount of \$177.3 million to certain initial Note purchasers or their affiliates (counterparties) for separate convertible note hedges. The hedges reduce the potential dilution related to conversion of the Notes if the market value of our common stock, as measured under the Notes, at the time of the hedge exercise is greater than the Note conversion price. The note hedges were separate transactions apart from the Notes or warrants described below and were recorded as an adjustment to stockholders' equity, net of deferred tax assets of \$65.5 million. Note holders have no rights with respect to the note hedges.

The note hedges cover, subject to anti-dilution and certain other customary adjustments substantially identical to those in the Notes, approximately 42.6 million shares of common stock at a strike price of \$19.97, which corresponds to the initial conversion price of the Notes. The note hedges are exercisable at each conversion date of the Notes and expire upon the earlier of the last day the Notes remain outstanding or the second scheduled trading day immediately preceding May 1, 2014.

Warrants

Additionally, we sold warrants to acquire approximately 42.6 million shares of common stock, subject to anti-dilution and certain other customary adjustments, at a strike price of \$30.14 per share, to the counterparties for an aggregate amount of \$66.8 million. The warrants were separate transactions apart from the Notes or note hedges and accounted for as an adjustment to stockholders' equity. Note holders have no rights with respect to the warrants.

If the volume weighted average share price of our common stock, as measured under the warrants, exceeds the strike price of the warrants, the warrants will have a dilutive effect on our earnings per share. The warrants expire over a series of dates with the final expiration date set to occur in November 2014.

7.5% Bonds

On June 15, 2009, we issued \$500.0 million aggregate principal amount of 7.5% Bonds due 2019, for net proceeds of \$493.3 million after a discount of \$2.7 million and deferred offering costs of approximately \$4.0 million. Interest is payable semiannually on June 15 and December 15, beginning December 15, 2009. We intend to use the net proceeds from the Bonds to fund the redemption of a portion of our Debentures expected to be put to us in December 2009. Until the Debentures can be redeemed, we temporarily repaid outstanding credit facility amounts and intend to re-borrow to fund the redemptions.

The Bonds are general unsecured obligations of IGT, ranking equal with all existing and future unsecured and non-subordinated obligations. The Bonds rank junior to all existing and future liabilities, including trade payables, of our subsidiaries. The Bonds mature June 15, 2019, unless IGT redeems them earlier by paying the holders 100% of the principal amount plus a make-whole redemption premium as described further in the indenture.

In conjunction with issuing the Bonds in June 2009, we entered into \$250.0 million notional value of interest rate swaps maturing on June 15, 2019, which effectively exchange 7.5% fixed interest payments for variable rate interest payments at one-month LIBOR plus 342 bps reset on the 15th of each month. Amounts receivable/payable under the swaps will be net settled semiannually on June 15 and December 15. The interest rate swaps are designated fair value hedges against changes in the fair value of a portion of the Bonds.

The Bonds contain covenants which may, in certain circumstances:

- ♠ restrict our ability to incur additional debt

- ♠ limit our ability to enter into sale and leaseback transactions
- ♠ restrict our ability to sell, transfer, lease or dispose of substantially all assets
- ♠ require us to grant a lien on equity interests if certain downgrades by rating agencies occur

Table of Contents

Shelf Registration

In March 2009, we filed a shelf registration statement with the SEC that allows us to issue debt securities, in one or more series, from time to time in amounts, at prices and on terms determined at the time of offering. The Bonds were issued under this registration statement.

Share Repurchases

We have repurchased IGT common stock to return value to shareholders and reduce outstanding share dilution. We used open market or privately negotiated transactions, such as accelerated share repurchases and structured share repurchases, or Rule 10b5-1 trading plans, depending on market conditions and other factors to achieve timing, cost, and volume objectives.

| Years ended September 30, (In millions) | 2009 | 2008 | 2007 |
|--|------|---------|-----------|
| Shares | - | 25.5 | 28.2 |
| Aggregate cost | \$- | \$779.7 | \$1,118.5 |

Our remaining repurchase authorization totaled 7.7 million shares and we have no current plans to make additional share repurchases. Our amended credit facility restricts us from repurchasing shares except within certain specified formulas set forth in the amended facility.

Financial Condition

| September 30, (In millions) | 2009 | 2008 | Increase (Decrease) |
|--------------------------------|-----------|-----------|------------------------|
| Assets | \$4,388.2 | \$4,557.4 | \$(169.2) |
| Liabilities | 3,420.9 | 3,648.4 | (227.5) |
| Stockholders' equity | 967.3 | 909.0 | 58.3 |

The decrease in total assets was primarily due to reduced cash, inventories and affiliate investments, partially offset by increased deferred offering costs related to debt refinancing. Liabilities decreased with lower accrued liabilities and debt. Stockholders' equity increased with earnings, partially offset by note hedge and warrant transactions.

Table of Contents

Contractual Obligations and Commercial Commitments

The following table summarizes expected effects on future liquidity and cash flows from our minimum contractual obligations and commercial commitments as of September 30, 2009.

| (In millions) | Total | Payments due by fiscal years | | | |
|-------------------------------------|------------------|------------------------------|-----------------|------------------|------------------------|
| | | 2010 | 2011 to 2012 | 2013 to 2014 | 2015 and thereafter |
| Debt (1) | \$2,162.3 | \$712.3 | \$100.0 | \$850.0 | \$500.0 |
| Interest and fees on debt (1) | 536.5 | 82.8 | 155.3 | 123.4 | 175.0 |
| Letters of credit (1) | 3.6 | 3.6 | - | - | - |
| Jackpot winner payments (2) | 754.6 | 155.5 | 142.7 | 117.2 | 339.2 |
| Licenses, royalties & IP rights (3) | 14.0 | 9.2 | 3.6 | 0.6 | 0.6 |
| Operating leases (4) | 40.2 | 14.9 | 18.8 | 5.7 | 0.8 |
| Open purchase orders | 86.3 | 86.3 | - | - | - |
| CLS Joint Ventures (5) | 13.3 | 4.9 | 8.4 | - | - |
| Acquisition commitments (6) | 5.0 | 4.4 | 0.6 | - | - |
| Unfunded loans (7) | 17.7 | 17.7 | - | - | - |
| Totals | \$3,633.5 | \$1,091.6 | \$429.4 | \$1,096.9 | \$1,015.6 |

- (1) Domestic credit facility interest resets periodically and was estimated using current rates. Letters of credit were issued under our credit facility to insure our payment to certain vendors and governmental agencies. Given current market conditions and recent trading prices for our common stock, we expect Debenture holders to exercise their put right in December 2009. See the MDA—Credit Facilities discussion earlier and Note 13 of our Consolidated Financial Statements for additional debt information.
- (2) Winner payments represent amounts due previous and future WAP jackpot winners. The timing and amount of future winner payments were estimated based on historical patterns of winners' lump sum payment elections and discount rates effective at September 30, 2009. We maintain cash and investments at sufficient levels to fund jackpot liabilities for winner payments. See Notes 1 and 14 of our Consolidated Financial Statements for additional information about jackpot liabilities.
- (3) Unconditional amounts were recorded as liabilities at September 30, 2009. Amounts contingent on future game sales or placements are excluded.
- (4) See Note 15 of our Consolidated Financial Statements for additional information regarding operating leases.
- (5) See Note 3 of our Consolidated Financial Statements for additional information about our unconditional commitment to contribute capital to CLS joint ventures.
- (6) See Note 7 of our Consolidated Financial Statements for additional information about contingent earn-out consideration related to the acquisition of M-2-1.
- (7) See Note 1 of our Consolidated Financial Statements for additional information regarding loans yet to fund under development financing arrangements.

Liabilities related to unrecognized tax benefits of \$114.3 million were excluded from the table above, as we cannot reasonably estimate the timing of cash settlements with taxing authorities. We do not expect the total amount of our

unrecognized tax benefits to change significantly during the next twelve months. See Note 17 of our Consolidated Financial Statements related to unrecognized tax benefits.

Contingent severance payment obligations to certain executives were also excluded from the table above.

Table of Contents

Arrangements with Off-Balance Sheet Risks

In the normal course of business, we are a party to financial instruments with off-balance sheet risk, such as performance bonds, guarantees and product warranties not reflected in our balance sheet. We may provide indemnifications of varying scope and terms to customers, vendors, lessors, business partners and other parties with respect to certain matters, including but not limited to, losses arising:

- ♣ out of our breach of agreements with those parties
- ♣ from services to be provided by us
- ♣ from IP infringement claims made by third parties

Additionally, we have agreements with our directors and certain officers that require us, among other things, to indemnify them against certain liabilities that may arise by reason of their status or service as directors or officers. We have also agreed to indemnify certain former officers and directors of acquired companies. We maintain director and officer insurance, which may cover our liabilities arising from these indemnification obligations in certain circumstances.

It is not possible to determine the maximum potential obligations under these indemnification undertakings due to the unique facts and circumstances involved in each particular agreement. Such indemnification undertakings may not be subject to maximum loss clauses. Historically, we have not incurred material costs related to indemnification obligations.

We do not expect any material losses to result from these arrangements, and we are not dependent on off-balance sheet financing arrangements to fund our operations. See Note 16 of our Consolidated Financial Statements for additional information about our off-balance sheet arrangements.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

We use derivative financial instruments to manage certain foreign currency exchange and interest rate risk. The primary business objective of our hedging program, as defined in our corporate risk management policy, is to minimize the impact of transaction, remeasurement, and specified economic exposures to our net income and earnings per share. We enter into derivative financial instruments with high-credit quality counterparties and diversify our positions among such counterparties to reduce our exposure to credit losses. We are not party to leveraged derivatives and do not hold or issue financial instruments for speculative purposes.

Foreign Currency Risk

We routinely use forward exchange contracts to minimize our market risk exposure related to our monetary assets and liabilities denominated in nonfunctional foreign currencies. The primary business objective of our economic hedging program is to minimize the impact to earnings from changes in foreign exchange rates. These hedging instruments are subject to fluctuations in value that are generally offset by the value of the underlying exposures being hedged. Counterparties to our agreements are major commercial banks.

We also hedge significant investments denominated in foreign currency with forward exchange contracts to protect the US dollar value of our investment. In addition, from time to time, we may enter into forward exchange contracts to establish with certainty the US dollar amount of future firm commitments denominated in a foreign currency.

Hedging

The notional amount of forward contracts hedging our net foreign currency exposure related to our monetary assets and liabilities denominated in nonfunctional currency totaled \$74.8 million at September 30, 2009 and \$93.3 million at September 30, 2008. A 10% adverse change in foreign exchange rates upon which these foreign exchange contracts are based would result in exchange gains and losses. Generally, contract gain or loss should be offset by gain or loss on the underlying monetary exposures.

43

Table of Contents

Translation

As currency rates change, translation of our foreign currency functional operations into US dollars affects year-over-year equity comparability. We do not generally hedge translation risk because cash flows from our international operations are typically reinvested locally. Currency exchange rates with the most significant impact to our translation include the British pound, Australian dollar, Japanese yen, Euro, South African rand, and Canadian dollar. Disregarding that rates can move in opposite directions resulting in offsetting gains and losses, we estimate a 10% change in exchange rates overall would have impacted our reported equity by approximately \$24.7 million at September 30, 2009 and \$24.4 million at September 30, 2008.

Interest Rate Risk

Costs to fund jackpot liabilities

Fluctuations in prime, treasury and agency rates due to changes in market and other economic conditions directly impact our cost to fund jackpots and corresponding gaming operations gross profit. If interest rates decline, jackpot cost increases and gross profit decreases. We estimate a hypothetical decline of 100 bps in applicable interest rates would have reduced our gross profit by approximately \$14.5 million in fiscal 2009 and \$14.4 million in 2008. We do not manage this exposure with derivative financial instruments.

Domestic Credit Facility

Fluctuations in LIBOR directly impact interest costs related to our domestic credit facility. We estimate a hypothetical increase of 100 bps in LIBOR would have increased our interest expense for fiscal 2009 by approximately \$11.2 million and \$8.0 million in fiscal 2008. We do not manage this exposure with derivative financial instruments. See Note 13 of our Consolidated Financial Statements for additional information about our domestic credit facility.

Debentures and Notes

The fair value of our Debentures and Notes are affected by changes in the price of IGT stock and changes in interest rates. The fair value of convertible instruments generally increases and decreases directionally with like movements in stock price and increases with stock price volatility. The fair value of fixed rate instruments increase as interest rates fall and decreases as interest rates rise. As we do not record our debt at fair value, changes in interest or stock price have no material effect on our financial position, cash flows or results of operations.

Our Debentures carrying value totaled \$707.0 million with an estimated fair value of \$706.2 million at September 30, 2009 and \$900.0 million with a fair value of \$846.0 million at September 30, 2008. Our Notes carrying value totaled \$850.0 million with a fair value of \$1.1 billion at September 30, 2009. See Note 13 of our Consolidated Financial Statements for additional information about our Debentures and Notes.

Bonds and Related Swaps

We use interest rate swap derivatives to diversify our debt portfolio between fixed and variable rate instruments. The amount and term of each swap is matched with all or a portion of outstanding principal and remaining term of a specific obligation. Our swaps exchange fixed rates for variable rates without an exchange of the notional amount upon which they are based.

At September 30, 2009, the carrying value of our Bonds totaled \$512.5 million with a fair value of \$553.3 million, and the fair value of the interest rate swaps totaled \$14.8 million. The swaps reduced our effective interest rate on the

portion of the bonds hedged during the year ended September 30, 2009. See Notes 13 and 19 of our Consolidated Financial Statements for additional information about our Bonds and related swaps.

Investments in CLS

The value of our CLS investments is affected by changes in the Hong Kong dollar exchange rate and the trading price of CLS stock. The carrying value and fair value of our equity investment in CLS stock was \$15.7 million at September 30, 2009 versus \$12.2 million at September 30, 2008.

Table of Contents

Our CLS convertible note investment is subject to interest rate risk and CLS stock price volatility. The CLS note carrying value and fair value was \$78.4 million at September 30, 2009 versus \$72.4 million at September 30, 2008. We are using 5-year forward contracts to mitigate foreign currency risk on approximately 70% of the note. See Note 3 of our Consolidated Financial Statements for additional information about our CLS investments.

Item 8. Financial Statements and Supplementary Data

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Stockholders and Board of Directors
International Game Technology
Reno, Nevada:

We have audited the accompanying consolidated balance sheets of International Game Technology and subsidiaries (the “Company”) as of September 30, 2009 and 2008, and the related consolidated statements of income, stockholders’ equity and comprehensive income, and cash flows for each of the three years in the period ended September 30, 2009. We have also audited the Company’s internal control over financial reporting as of September 30, 2009, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company’s management is responsible for these financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on these financial statements and an opinion on the Company’s internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audit of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company’s internal control over financial reporting is a process designed by, or under the supervision of, the company’s principal executive and principal financial officers, or persons performing similar functions, and effected by the company’s board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of September 30, 2009 and 2008, and the results of their operations and their cash flows for each of the three years in the period ended September 30, 2009, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of September 30, 2009, based on the criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

As discussed in Note 17 to the financial statements, the Company adopted accounting guidance relating to accounting for uncertainty in income taxes during the first quarter of fiscal 2008.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

Basis of Presentation and Consolidation

Our consolidated financial statements include the accounts of International Game Technology, including all majority-owned or controlled subsidiaries and VIEs for which we are the primary beneficiary. All appropriate inter-company accounts and transactions are eliminated. We prepare our consolidated financial statements in accordance with SEC and US GAAP requirements and include all adjustments of a normal recurring nature that are necessary to fairly present our consolidated results of operations, financial position, and cash flows for all periods presented. This annual report on Form 10-K includes subsequent events evaluated for potential recognition and disclosure through the date of financial statement issuance on December 2, 2009.

Our fiscal year is reported on a 52/53-week period that ends on the Saturday nearest to September 30 each year. Similarly, our quarters end on the Saturday nearest to the last day of the quarter end month. For simplicity, this report presents all fiscal periods using the calendar month end as outlined in the table below. The results of operations for fiscal 2009 include 53 weeks versus 52 weeks in fiscal 2008 and 2007.

| Fiscal Year End | |
|-----------------------|-----------------------|
| Actual | Presented as |
| October 3, 2009 | September 30, 2009 |
| September 27, 2008 | September 30, 2008 |
| September 29, 2007 | September 30, 2007 |

Use of Estimates

Our consolidated financial statements are prepared in conformity with US GAAP. Accordingly, we are required to make estimates, judgments, and assumptions that we believe are reasonable based on our historical experience, contract terms, observance of known trends in our company and the industry as a whole, and information available from other outside sources. Our estimates affect reported amounts of assets, liabilities, revenues, expenses, and related disclosure of contingent assets and liabilities. Our most significant estimates include revenue recognition, goodwill, other intangible assets, prepaid and deferred royalties, jackpot liabilities, inventory obsolescence, income taxes, share-based compensation, and bad debt. We evaluate our estimates on a regular basis and actual results may differ from initial estimates.

Revenue Recognition

We recognize revenues when all of the following have been satisfied:

- ♠ persuasive evidence of an arrangement exists
- ♠ the price to the customer is fixed and determinable
- ♠ delivery has occurred and any acceptance terms have been fulfilled

♠ no significant contractual obligations remain

♠ collection is reasonably assured

Revenues are reported net of incentive rebates, discounts, sales taxes, and other taxes of a similar nature. Amounts billed prior to completing the earnings process are deferred until revenue recognition criteria are met.

Gaming Operations

Gaming operations revenues are generated from providing customers with our proprietary electronic gaming equipment and related network systems, licensing, and services under a variety of recurring revenue arrangements, including WAP, CDS, stand-alone participation and flat fee, equipment leasing and rental, and online gaming solutions.

52

Table of Contents

WAP systems consist of linked slot machines located in multiple casino properties, connecting to an IGT central computer system. WAP games differ from stand-alone units in that a progressive jackpot increases with every wager until a player wins the top award combination. Casinos with IGT WAP machines pay a percentage of the coin-in (amounts wagered) for IGT services related to the design, assembly, installation, operation, maintenance, and marketing of the WAP systems, as well as funding and administration of the progressive jackpot.

Revenues from CDS, stand-alone and other equipment leasing or rentals are recognized based on a percentage of the net win or on a fixed daily/monthly fee or rental basis. Online gaming solutions encompass online casino gaming software and content licensing, as well as back office operational support services. All online gaming solutions are provided under revenue sharing arrangements based on net gaming revenues.

Product Sales

Our product sales revenues are generated from the sale of electronic gaming equipment and network systems, as well as licensing, services, and component parts. Certain of our products are deemed software-related for accounting purposes and revenue is recognized in accordance with software accounting guidance. Time-based licensing and maintenance fees are typically recognized ratably over the term of the agreement.

Our credit sales terms are predominately 90 days or less. We also grant extended payment terms under contracts of sale secured by the related equipment sold, and these contracts are typically paid within their terms.

Multiple Element Arrangements

The majority of our multiple element contracts are for some combination of machines, network systems, license fees, maintenance, training, and other services. The contracts separately state pricing for each deliverable based on our standard price list and VSOE is determined by the price charged for each deliverable when it is sold separately. VSOE for maintenance agreements is determined based on the annual renewal rates. The terms of performance, cancellation, termination, or refunds in our multiple element contracts are similar to those for an individual stand-alone deliverable.

Revenues for each deliverable are recognized when the revenue recognition criteria for that element has been met. If we are unable to establish VSOE for any undelivered element, revenue is generally deferred until all elements have been delivered or until VSOE can be determined. If we do not have VSOE for a delivered element, the VSOE of the undelivered elements is deferred, and the remaining portion is allocated to the delivered elements and recognized as revenue under the residual method. When machines are sold in combination with a leased system on which the machines depend for essential functionality, machine revenues are recognized ratably over the system lease contract term.

Table of Contents

Deferred Revenue

Deferred revenue consists of amounts received or billed after product is delivered or services are rendered, but prior to meeting all of the requirements for revenue recognition. Complex systems and/or multiple element contracts may take several months to complete and our deferred revenues may increase as our products evolve toward a more systems-centric environment. Deferred revenue balances below were primarily related to product sales and included in other liabilities.

| September 30, | 2009 | 2008 |
|---------------|---------|--------|
| Current | \$101.7 | \$60.9 |
| Non-current | 20.3 | 1.2 |
| Total | \$122.0 | \$62.1 |

Jackpot Accounting

Jackpot Liabilities and Expense

We incur and accrue jackpot liabilities with every wager on a device connected to an IGT WAP system. A portion of the casino fees paid to IGT is used for the funding and administration of WAP jackpot payments. Jackpot expense (included in Cost of Gaming Operations) represents the estimated cost to fund jackpots and is subject to changes in the discount or interest rates used to present value WAP jackpot liabilities due future winners.

Our WAP jackpots are generally payable in equal annual installments over 20 to 26 years or immediately in the case of instant win systems. Winners may elect to receive a lump sum payment for the present value of the jackpot discounted at applicable interest rates in lieu of periodic annual installments. Discount rates eligible for use in the lump sum payment calculation vary by jurisdiction and are impacted by market forces and other economic conditions.

Jackpot liabilities are comprised of payments due previous winners, as well as amounts due future winners of WAP jackpots not yet won. Previous winner liabilities for periodic payments are carried at the accreted cost of jackpot annuity investments in qualifying US government or agency securities used to fund future periodic payments. Liabilities due future winners are revalued and recorded at the present value of the amount carried on WAP meters for jackpots not yet won.

We estimate the present value of jackpot liabilities due future winners using current market prime, treasury, or agency rates weighted with historical lump sum payout election ratios. The most recent historical patterns indicate that approximately 85% of winners will elect the lump sum payment option. Additionally, we estimate current liabilities for jackpots not yet won based on historical experience with winner payment elections, in conjunction with the theoretical projected number of jackpots.

Restricted Cash and Investments

We are required by gaming regulations to maintain sufficient reserves in restricted accounts to be used for the purpose of funding payments to progressive jackpot winners. Restricted amounts are based primarily on the jackpot meters displayed to slot players and vary by jurisdiction. Compliance with restricted cash and investments requirements is reported to the gaming authorities in various jurisdictions.

Jackpot Annuity Investments

These investments represent discounted qualifying US treasury or agency securities purchased and held to maturity to fund annual jackpot payments due previous winners. We have both the intent and ability to hold these investments to maturity. Accordingly, these investments are stated at cost, plus interest accreted over the term of the security. Certain jurisdictions require regulatory approval for liquidation of these annuity investments.

Table of Contents

WAP Systems Interest (included in Other Income/Expense)

Interest income accretion on jackpot annuity investments used to fund periodic payments is offset by interest expense accretion on related jackpot liabilities for payments due previous winners. The interest income and expense accrete at approximately the same rate and vary depending on the amount of jackpots won and the number of winners electing periodic payments. WAP systems annuity interest accretion totaled \$27.5 million in fiscal 2009, \$28.6 million in 2008, and \$31.3 million in 2007.

We also hold a significant amount of cash and short-term investments related to our WAP operations on which we earn interest income.

Share-based Compensation

We adopted fair value recognition of all share-based compensation at the beginning of fiscal 2006, using the modified prospective transition. Prior to fiscal 2006, share-based compensation was recognized under the intrinsic value method, which resulted in compensation expense recorded only for restricted stock awards and modified or acquired unvested options. See Note 6.

Share-based compensation is measured at fair value on the grant date reduced for estimated forfeitures. We use historical data and projections to estimate expected employee behaviors related to option exercises and forfeitures. We expense share-based compensation over the applicable vesting period using the straight-line method for service-based awards and the accelerated method for performance-based awards. Compensation for share-based awards granted prior to the beginning of fiscal 2006 was recognized under the accelerated method.

The fair value of restricted share awards is based on the market price of IGT stock on the grant date. We estimate the fair value of each stock option award on the grant date using the Black-Scholes valuation model. Option valuation models require the input of highly subjective assumptions, and changes in assumptions used can materially affect the fair value estimate. Expected volatility and dividends are based on implied and historical IGT stock factors. Expected term represents the estimated weighted average time between grant and employee exercise. Risk free rate is based on US Treasury rates appropriate for the expected term.

Advertising Costs

Advertising costs are expensed as incurred and totaled \$16.1 million in fiscal 2009, \$22.3 million in 2008, and \$19.9 million in 2007.

Research and Development

Our products reach technological feasibility shortly before the products are released and therefore R&D costs are generally expensed as incurred. Employee related costs associated with product development are included in R&D costs. Certain R&D performed for specific customers is charged to cost of product sales when the related sale is recorded.

Income Taxes

Our provision for income taxes is based on estimated effective annual income tax rates. The provision differs from income taxes currently payable because certain items of income and expense are recognized in different periods for financial statement purposes than for tax return purposes. We reduce deferred tax assets by a valuation allowance when it is more likely than not that some or all of the deferred tax assets will not be realized. Net current and

non-current deferred tax assets or liabilities are determined separately for federal, state, and foreign jurisdictions.

Accrued income taxes are reduced by the tax benefits from employee stock options exercised. We receive an income tax benefit on the difference between the market price of the stock issued at the time of exercise and the option price. Our provision for income taxes includes interest, penalties and reserves for uncertain tax positions.

Table of Contents

At the beginning of fiscal 2008, we adopted new accounting guidance related to accounting for uncertainty in income taxes which required the recognition of uncertain tax positions taken or expected to be taken in a tax return, when it is “more likely than not” to be sustained upon examination. This assessment further presumes that tax authorities evaluate the technical merits of transactions individually with full knowledge of all facts and circumstances surrounding the issue.

A recognized tax position is recorded in the financial statements at the largest amount of benefit that has a greater than 50% likelihood of being realized upon settlement. Changes in judgment resulting in subsequent recognition, de-recognition, or adjusted measurement of a tax position taken in a prior annual period, including any related interest and penalties, are recognized as discrete items during the period in which the change occurs. See Note 17.

Earnings Per Share

We compute EPS using the weighted average number of common and potential shares outstanding. See Note 18.

Cash and Equivalents

Cash and equivalents consist primarily of deposits held at major banks and other marketable securities with original maturities of 90 days or less. The majority of our cash equivalents are in 100% US Treasury-backed money market funds.

Investment Securities

Available-for-sale securities are reported at fair value, with unrealized gains and losses recorded in accumulated other comprehensive income (loss). Trading securities are reported at fair value, with unrealized gains or losses recognized in earnings. See Notes 8 and 20.

Receivables

Equipment Financing Contracts

We grant extended payment terms to qualifying customers under contracts of sale. These contracts are generally for terms of one to five years, secured by the related equipment sold, with interest recognized at prevailing rates.

Facility Notes

We provide development financing loans to select customers for new or expanding gaming facilities, generally under terms of one to seven years with interest recognized at prevailing rates. Certain agreements may also include provisions for the facility to reserve a percentage of its floor space for the placement of IGT proprietary games, which may be reduced if the machines do not meet certain performance standards. These agreements may call for IGT to receive a portion of the net win on these proprietary games as repayment for some or all of the amounts financed.

Allowance for Doubtful Accounts

We maintain an allowance for doubtful accounts related to trade receivables, as well as notes and contracts receivable, where collection has been deemed a high risk. We analyze historical customer collection trends, concentrations, creditworthiness, and changes in terms, as well as current economic trends when evaluating the adequacy of our allowance for doubtful accounts.

Inventories

Inventories are stated at the lower of cost (first-in, first-out method) or market value. We regularly assess inventory quantities for excess and obsolescence primarily based on forecasted product demand.

56

Table of Contents

Property, Plant and Equipment

We depreciate property, plant and equipment down to salvage value using the straight-line method. Maintenance and repairs are expensed as incurred and improvements are capitalized. Depreciation and asset charges related to gaming operations equipment are recorded to cost of gaming operations. Proceeds from gaming operations equipment sold are reflected in investing cash flows.

Goodwill and Other Intangible Assets

We amortize our finite lived intangible assets to reflect the pattern in which the economic benefits of the assets will be consumed based on projected usage and revenues over one to 18 years. When the pattern of economic benefit is undeterminable, we amortize using the straight-line method. We consider certain factors when assigning useful lives such as legal, regulatory, and contractual provisions, as well as the effects of obsolescence, demand, competition, and other economic factors.

We measure and test goodwill and other intangible assets not subject to amortization for impairment at least annually or more often if there are indicators of impairment. We regularly evaluate our portfolio of finite-lived intangibles to determine if changes or circumstances indicate the carrying values may not be recoverable or a change in remaining useful life is needed. Indicators that could trigger an impairment review include changes in legal and regulatory factors, market conditions, and operational performance. Impairment is measured as the difference between the carrying amount and the fair value of the assets and recognized as a component of income from operations.

Other Assets

Other assets are comprised of deferred licensing rights and other expenses, investments in unconsolidated affiliates, uncertain tax positions, and refundable deposits.

Deferred Licensing Rights

We pay royalty and license fees for the use of third-party trade names, celebrity likenesses, content, and other IP rights. We classify licensing rights and deferred fees as current and non-current assets and amortize costs based on the estimated period of expected consumption related to forecasted distribution schedules. If a pattern cannot be reliably determined, we use the straight-line method over the contract life. We also contract with certain parties for IP rights where future payments are contingent upon revenues generated.

Prepaid fees deemed unrealizable after the related product is released for distribution are charged to cost of product sales or gaming operations. Prepaid fees deemed unlikely to be realized before the related product is released are charged to R&D.

Investments in Unconsolidated Affiliates

We apply the equity method of accounting for investments in unconsolidated affiliates when we exercise significant influence, but do not control the financial and operating decisions. Equity earnings of our unconsolidated affiliates are included in operating income because they are integral to our business operations. Equity method earnings not material to our financial statements are presented as a component of SG&A.

Strategic investments in unconsolidated affiliates are presented in other non-current assets, separate from investment securities held for a return. Equity investments in unconsolidated affiliates not accounted for under the equity method and restricted for more than one year are recorded under the cost method. All other investments in unconsolidated

affiliates not accounted for under the equity method are available-for-sale securities carried at fair value. Unrealized holding gains or losses are recorded in other comprehensive income, except those hedged with designated fair value foreign currency derivatives are recognized in other income (expense). See Note 3.

Table of Contents

Derivatives

We use derivative financial instruments to manage certain foreign currency exchange and interest rate risk. We enter into derivative financial instruments with high-credit quality counterparties and diversify our positions among such counterparties to reduce our exposure to credit losses.

We recognize derivative financial instruments as either assets or liabilities at fair value. Accounting for changes in the fair value of derivatives depends on the intended use and resulting designation. We are not party to leveraged derivatives and do not hold or issue financial instruments for speculative purposes. We record derivative financial instruments on a net basis with counterparties for which a master netting arrangement has been executed. Derivative gains and losses are generally recognized in other income (expense). See Note 19.

Foreign Currency Hedging

We routinely use derivative financial instruments to minimize our market risk exposure related to our monetary assets and liabilities denominated in nonfunctional foreign currencies. The primary business objective of our hedging program is to minimize the impact to earnings from changes in foreign exchange rates. These hedging instruments are subject to fluctuations in value that are generally offset by the value of the underlying exposures being hedged. Counterparties to our agreements are major commercial banks. These forward exchange contracts are not designated hedges and gains or losses are recognized in other income (expense).

We hedge significant investments denominated in foreign currency with forward exchange contracts to protect the US dollar value of our investment. These forward exchange contracts are designated fair value hedges. These derivative gains or losses are recorded in other income (expense) together with the offsetting gains or losses on the change in the investment's fair value attributable to the changes in foreign currency rates. Time value is excluded from effectiveness testing.

Interest Rate Management

We use interest rate swap derivatives to diversify our debt portfolio between fixed and variable rate instruments. The amount and term of each swap is matched with all or a portion of outstanding principal and remaining term of a specific obligation. Our swaps exchange fixed rates for variable rates without an exchange of the notional amount upon which they are based.

These swaps are designated fair value hedges because they protect us against changes in the fair value of a portion of our fixed rate borrowings due to interest rate movements. We recognize the gains or losses from the changes in fair value of the swaps, as well as the offsetting change in the fair value of the hedged designated portion of long-term debt, in other income (expense). Ineffectiveness, if any, is also recorded in other income (expense). Amounts receivable or payable under the swaps are net settled and recorded as a net receivable or payable with corresponding adjustments to interest expense.

Negotiated Share Repurchase Transactions

As part of our capital deployment activities, we have used share repurchases to return capital to our shareholders and to reduce outstanding share count dilution. We may use open market and negotiated share repurchase transactions to achieve our timing, cost, and volume objectives.

Our ASR (accelerated share repurchase) transactions allowed us to purchase a targeted number of shares immediately with the final purchase price of those shares determined by their average market price over a fixed measurement

period. The ASR intends to combine the immediate share retirement benefits of a tender offer with the market impact and pricing benefits of a disciplined daily open market share repurchase program. The ASR also guaranteed repurchase of a large number of shares while limiting our price risk through the use of a floor and cap feature. The result of this transaction was reflected in the treasury stock component of shareholders equity.

In accordance with accounting guidance for an accelerated share repurchase program, we accounted for the ASR transactions as an immediate reduction of outstanding shares for basic and diluted earnings per share. Additionally, our ASR contracts qualified for equity classification in accordance with accounting guidance for derivative financial instruments indexed to, and potentially settled in, a company's own stock, because settlement was based on our stock price and we were not required to deliver additional shares or pay additional cash upon settlement.

Table of Contents

Other Liabilities

Other liabilities are primarily comprised of uncertain tax positions, deferred revenue, customer deposits, accrued expenses, deferred compensation, and minority interest.

Foreign Currency Translation

The functional currency of certain IGT international subsidiaries is the local currency. For those subsidiaries, we translate assets and liabilities at exchange rates in effect at the balance sheet date, and income and expense accounts at average exchange rates during the year. Resulting currency translation adjustments are recorded directly to accumulated other comprehensive income within stockholders' equity. Gains and losses resulting from transactions in non-functional currencies are recorded in income. For subsidiaries whose functional currency is the US dollar, gains and losses on non-US dollar denominated assets and liabilities are recorded in income.

Fair Value Measurements

At the beginning of fiscal 2009, we adopted new fair value accounting guidance which refined the definition of fair value, established a framework for measuring fair value, and permitted the election of fair value measurement with unrealized gains and losses on designated items recognized in earnings at each subsequent period for certain financial assets and liabilities. We elected to apply the new fair value definition and framework for non-financial assets and liabilities at the beginning of fiscal 2010.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (exit price), in the principal or most advantageous market, in an orderly transaction between market participants, on the measurement date. Assets and liabilities carried at fair value are classified and disclosed in one of the following three categories:

- ◆ Level 1 - Quoted market prices in active markets for identical instruments

- ◆ Level 2 - Quoted market prices for similar instruments, using observable market based inputs or unobservable inputs corroborated by market data

- ◆ Level 3 - Unobservable inputs using our own assumptions when observable inputs are unavailable

Certain financial instruments recorded at fair value are described in more detail in Note 20, along with valuation methods and assumptions used to estimate fair value when quoted market prices are not available. Changes in assumptions or valuation methods could affect fair value estimates.

Hurricane Damage Insurance Recoveries

In March 2007, we negotiated a final insurance settlement of \$18.0 million related to 2005 US Gulf Coast hurricane damages which destroyed or temporarily shut down our gaming operations machines. As a result, we received a \$13.0 million final payment, net of \$5.0 million previously advanced, and recorded insurance gains of \$5.0 million, net of \$1.0 million previously accrued, for property damages in cost of gaming operations, and \$12.0 million for business interruption in SG&A.

Recently Issued Accounting Standards

Revenue Arrangements With Multiple Deliverables and Software Elements

In October 2009, the FASB issued two ASUs providing new revenue recognition guidance with respect to revenue arrangements that include software elements and multiple deliverables. Under the new guidance, tangible products, containing both software and nonsoftware components that function together to deliver a tangible product's essential functionality, will not be subject to software revenue accounting. This new guidance also establishes a new hierarchy for allocating revenues among multiple deliverables in a multi-element arrangement. In order of preference, revenues will be allocated based on VSOE, third-party evidence, or estimated selling price.

Table of Contents

Additional disclosures will be required to describe the effects of adoption, including changes in how arrangement consideration is allocated or in the pattern and timing of revenue recognition. This new guidance is effective for fiscal years beginning on or after June 15, 2010, and we have elected to early adopt prospectively for new or materially modified arrangements entered into on or after the beginning of our first quarter in fiscal 2010. We continue to evaluate the extent to which this new guidance will impact the timing of our revenues and expect many of IGT's products, such as machines, will no longer be accounted for as software, allowing for revenue recognition earlier in certain bundled arrangements.

Consolidation of Variable Interest Entities

In June 2009, the FASB issued new guidance which requires us to reassess our primary beneficiary position for all VIE arrangements based on qualitative factors on an on-going basis. This guidance is effective for our first quarter of fiscal 2011 and must be adopted through a cumulative-effect adjustment (with a retrospective option). We continue to evaluate the extent to which this will impact our results of operations, financial position, or cash flows.

Accounting Standards Codification

In June 2009, new accounting guidance was issued which established the FASB Accounting Standards Codification as the single source of authoritative US GAAP. Adoption of this guidance during our quarter ended September 30, 2009 changed the way we reference accounting standards and did not have a material impact on our financial statements.

Subsequent Events

In May 2009, new accounting guidance was issued which established principles and requirements for reporting events or transactions occurring after the balance sheet date. The guidance requires us to disclose the date through which subsequent events have been evaluated and whether it is the date the financial statements were issued. It also requires an entity to consider pro forma financial information disclosures if an unrecognized subsequent event is significant and to reissue financial statements filed with the SEC or other regulatory agencies if failure to do so could make the financial statements misleading. Adoption of this new guidance for our quarter ended June 30, 2009 did not have a material impact on our financial statements.

Other-Than-Temporary Impairments

In June 2009, we adopted new accounting guidance issued in April 2009 requiring us to determine and recognize impairment on a debt security if we intend to sell or it is more likely than not that we will be required to sell the security before recovery. If we do not expect to recover the entire amortized cost of the security, impairment related to credit loss is recognized in earnings and impairment related to other factors is recognized in other comprehensive income.

This guidance also requires interim and annual disclosures by major security types of the amortized cost basis, as well as methods and significant inputs used to measure credit losses, along with a tabular roll forward schedule if a portion of the impairment is recognized in earnings. Adoption of this new guidance did not have a material impact on our financial statements

Participating Securities in Share-Based Payment Transactions

In June 2008, new guidance was issued for determining whether instruments granted in share-based payment transactions are participating securities, mandating that unvested share-based payment awards containing non-forfeitable rights to dividends or dividend equivalents are participating securities and should be included in our

computation of EPS using the two-class method. This change is effective for our first quarter of fiscal 2010 and requires retrospective application for all periods presented. We estimate our revised computation will incorporate unvested restricted stock awards as participating securities and reduce our annual diluted EPS up to \$0.01 per share.

Table of Contents

Convertible Debt Instruments

In May 2008, new guidance was issued requiring the separation of liability (debt) and equity (conversion option) components for convertible debt instruments that may settle in cash upon conversion. The implied value of the debt component equals that of a similar liability reflecting a borrowing rate for nonconvertible debt. The equity component is the residual difference between the proceeds and the implied value of the debt component.

This change is effective for our first quarter of fiscal 2010 and requires retrospective application for all periods presented. We estimate the impact of this new accounting for fiscal years 2009 and 2010 will increase annual non-cash interest expense approximately \$30.0 million, reducing diluted EPS approximately \$0.07, related to our Debentures and Notes.

Derivative Instruments and Hedging Activities

In January 2009, we adopted new accounting guidance issued in March 2008 to require additional qualitative and quantitative disclosures about how and why we use derivative instruments and hedging activities, including the accounting methods used and the impact on our financial statements. See Note 19.

Business Combinations and Noncontrolling Interests

In December 2007, new accounting guidance was issued revising the method of accounting for a number of aspects of business combinations and noncontrolling interests (i.e. minority interests), such that more assets and liabilities will be measured at fair value as of the acquisition date. Certain contingent consideration liabilities will require remeasurement at fair value in each subsequent reporting period. Noncontrolling interests will initially be measured at fair value and classified as a separate component of equity.

Acquisition related costs, such as fees for attorneys, accountants, and investment bankers, will be expensed as incurred and no longer be capitalized as part of the business purchase price. For all acquisitions, regardless of the consummation date, deferred tax assets and uncertain tax position adjustments occurring after the measurement period will be recorded as a component of income tax expense, rather than adjusted through goodwill. This change is effective for our first quarter in fiscal 2010 and requires retrospective application for all prior comparative financial statements presented (e.g. reclassification of noncontrolling interests to appear in equity).

Fair Value Measurements

In September 2006, new accounting guidance was issued which refined the definition of fair value, established a framework for measuring fair value, and expanded disclosures about fair value measurements. We adopted this guidance for financial assets and liabilities effective October 1, 2008 and will apply this guidance for non-financial assets and liabilities beginning October 1, 2009.

In February 2007, additional accounting guidance was issued permitting the election of fair value measurement for many financial instruments and certain other items, with unrealized gains and losses on designated items recognized in earnings at each subsequent period. This guidance also established presentation and disclosure requirements for similar types of assets and liabilities measured at fair value. We adopted this new guidance effective October 1, 2008 and elected the fair value option for our ARS put rights obtained in November 2008. See Note 8.

In June 2009, we adopted new accounting guidance issued in April 2009 to require quarterly fair value disclosures of financial instruments (previously required only annually) and further expanded disclosures about the methods and significant assumptions used to estimate fair value.

Table of Contents

Adoption of this new guidance did not have a material impact on our financial statements. See Note 20 for additional information regarding our fair value measurements.

2. Restructuring

In response to reduced demand, we have been conducting an ongoing company-wide strategic review of our costs and organizational structure to maximize efficiency and align expenses with the current and long-term business outlook. During fiscal 2009, we reduced our global workforce by approximately 16% from September 30, 2008 levels through a combination of voluntary and involuntary separation arrangements.

Resulting restructuring charges for the year ended September 30, 2009 totaled \$35.0 million, net of \$3.4 million in forfeited stock compensation. The remaining accrued costs are expected to be paid over the next several quarters.

Accrued restructuring costs as of and for the year ended September 30, 2009

| | |
|-------------------------|---------|
| (In millions) | |
| Severance and benefits | \$35.0 |
| Lease termination costs | 2.2 |
| Other costs | 1.2 |
| Total accrued costs | 38.4 |
| Cash paid | (33.3) |
| Remaining accrued costs | \$5.1 |

3. Variable Interest Entities and Investments in Unconsolidated Affiliates

Variable Interest Entities

As the primary beneficiary, we consolidate our VIE WAP trusts in Iowa and New Jersey. The trusts are primarily responsible for administering jackpot payments to winners. The consolidation of these VIE trusts primarily increases jackpot liabilities and related assets, as well as interest income and equivalent offsetting interest expense. In conjunction with regulatory changes, the Iowa Trust was dissolved with its remaining assets and liabilities transferred to IGT in December 2008. Consolidated VIE trust assets and equivalent liabilities totaled \$91.3 million at September 30, 2009 and \$108.2 million at September 30, 2008.

Investments in Unconsolidated Affiliates

Las Vegas Gaming International

In October 2008, we entered into a strategic business arrangement with LVGI, an innovator in gaming software applications and hardware, whereby LVGI agreed to create applications for IGT's server-based gaming systems, and IGT agreed to purchase certain shares in LVGI. We advanced \$1.5 million in July 2008 and paid \$10.3 million in October 2008 to LVGI for a total investment of \$11.8 million to receive 4.7 million shares of LVGI convertible perpetual cumulative preferred stock and warrants to purchase an additional 1.5 million common shares. In February 2009, we advanced \$1.5 million with LVGI as a refundable deposit against a second potential investment.

As LVGI is not a publicly traded company and the preferred stock did not meet all the characteristics of in-substance common stock, this investment was accounted for under the cost method. The warrants were not accounted for separately as they did not qualify as freestanding derivatives. In late August 2009, LVGI publicly stated that it lacked

the funding to satisfy its current obligations or sustain expected working capital requirements for its current fiscal year and further, is unable to make cash flow forecasts based on reasonably objective assumptions. As a result of significant adverse changes in the expected financial performance of LVGI, together with an evaluation of our long-term gaming systems strategy, we determined our investment was fully impaired at September 30, 2009 and recorded \$13.3 million of other-than-temporary impairment.

Table of Contents

Progressive Gaming International Corp.

In August 2008, we invested \$15.0 million in a Note and Warrant Purchase Agreement with PGIC, a casino management systems provider focused on smaller casinos. The initial investment of \$15.0 million was allocated to three components of the agreement based on their respective fair values: convertible notes of \$6.6 million, embedded derivatives of \$7.5 million and stock warrants of \$0.9 million.

The fair value of our investment in PGIC's senior subordinated convertible notes, including accrued interest, was \$6.3 million in January 2009 when it was attributed to consideration paid for certain PGIC assets acquired. See Note 7. PGIC subsequently filed a petition for relief under Chapter 7 of the US Bankruptcy Code. The investment carrying value was reduced to zero concurrent with the asset acquisition.

Previous to the asset acquisition, the notes were accounted for as available-for-sale securities with the discount amortized to interest income. The notes' conversion option, contingent interest feature, and change of control put, were accounted for separately as a single, bundled, compound embedded derivative. The warrants were also accounted for separately as freestanding derivatives.

We recorded a loss of \$0.9 million on the notes investment during fiscal 2009. The embedded derivatives and warrants had a combined fair value of zero at September 30, 2009, after recording losses of \$1.2 million during fiscal 2009 and \$7.2 million in 2008.

China LotSynergy Holdings, Ltd.

Stock

In May 2007, we entered into strategic business arrangements with CLS, a company involved in the development of the China lottery market and other related activities. As part of this arrangement, we invested \$33.6 million, including transaction costs, for approximately 5% of the outstanding ordinary shares of CLS, a public company listed on the Growth Enterprise Market of the Hong Kong Exchange.

At September 30, 2009, our CLS stock investment was accounted for as an available-for-sale security with adjusted cost basis, fair value, and unrealized gain/loss reflected in the aggregate available-for-sale table below. We changed from the previous accounting for this investment under the cost method during the third quarter of fiscal 2009 as the selling restriction was within one year of expiration.

At September 30, 2008, the fair value of the stock investment was \$12.2 million, and we recorded an other-than-temporary loss of \$21.4 million because it had been in a loss position for several months and local business conditions surrounding new regulations were uncertain.

Convertible Notes Receivable

Additionally in May 2007, we invested \$72.0 million, including transaction costs, in a 4% zero-coupon unsecured convertible note of CLS due May 31, 2015, which becomes partially or wholly convertible after three years at a split-adjusted initial conversion price of HK\$0.96 per share. CLS may call the note for redemption in full at accreted value under certain circumstances on or after May 31, 2012. IGT may require CLS to repay a portion of or the entire note at accreted value on May 31, 2012.

This note is accounted for as an available-for-sale security with adjusted cost basis, fair value, and unrealized gain/loss reflected in the aggregate available-for-sale table below. The unrealized loss recorded in other comprehensive income

at September 30, 2008 was considered temporary because CLS had sufficient cash to satisfy the obligation. We determined that no feature met the definition of a derivative requiring bifurcation at September 30, 2009. See Note 19 about related foreign currency derivatives.

IGT simultaneously entered into a cooperative agreement to provide technical support, assistance, and consulting services to CLS and exclusively explore opportunities for providing products and services in connection with the China Welfare Lottery. IGT is restricted from selling or transferring any of its shares in CLS or the convertible note for three years, after which either party may terminate exclusivity provisions and IGT may sell or transfer its shares in CLS or the convertible note.

Table of Contents

Joint Ventures

In September 2007, we established a 50/50 joint venture, IGT Synergy Holding Ltd., to explore opportunities in connection with the China Welfare Lottery; and in September 2009, we formed Asiatic Group Ltd. for Bingo and Electronic Lottery Games, also a 50/50 joint venture. As of September 30, 2009, we had funded \$1.2 million of a \$14.5 million unconditional commitment to contribute capital to CLS joint ventures over the next two years. We account for these joint ventures under the equity method and recognized losses of \$0.3 million in fiscal 2009 and \$0.1 million in 2008.

Walker Digital Gaming, LLC

In February 2006, IGT paid \$56.0 million for a 10% equity interest in WDG, formerly known as Casino IP Holdings, LLC, a VIE formed with our involvement to hold, develop, and license WDG IP identified for gambling use. In January 2008, we invested \$14.0 million in WDG for an additional 2% equity interest and committed to fund a \$60.0 million royalty advance in annual \$15.0 million installments. This relationship was designed to facilitate development, introduction, and integration of WDG gaming application concepts into IGT product lines.

We determined IGT was not the primary beneficiary of the WDG VIE because IGT did not provide more than half of the total equity or financial support and accounted for this investment under the equity method. There were no other terms of the arrangement, explicit or implicit, that could have required IGT to provide additional financial support. We recognized losses from this unconsolidated affiliate, largely comprised of intangible asset amortization, of \$5.2 million in fiscal 2009, \$5.8 million in 2008, and \$5.3 million 2007.

In August 2009, we paid \$20.0 million to WDG in connection with an agreement to extinguish the royalty commitment, eliminate future IGT royalty obligations, relinquish our WDG equity ownership, and restructure IP rights and ownership. This new agreement supersedes and terminates all other previous IP license agreements between WDG and IGT. We paid an additional \$5.0 million in October 2009 upon the finalization of certain third-party IP license arrangements. This new agreement triggered a VIE reconsideration event and we determined that IGT no longer holds any variable interest in WDG.

As a result of this exchange and related evaluation of the future business outlook pertaining to the use of these IP rights, in the fourth quarter of fiscal 2009 we recorded a loss of \$78.0 million. The equity investment, deferred royalties and related accrued commitment were eliminated and we recorded patent additions in intangible assets of \$24.8 million of patents (\$20.0 million in cash and \$4.8 million of other assets). See Note 12.

Interest of \$1.9 million was capitalized during fiscal 2008 related to the completion of our Las Vegas facility construction.

Table of Contents

6. Employee Benefit Plans

We have established a variety of employee benefit programs to attract, retain and motivate employees.

Cash Incentives

Our profit sharing and 401(k) plan was adopted for US employees. IGT matches 100% of an employee's contributions up to \$750 per year. Participants immediately vest in their contributions and IGT's matching contributions. Additionally, IGT may contribute a portion of profits to eligible employees, which vest over a six-year period. Cash sharing is distributed semi-annually to all eligible employees and management bonuses are paid annually to selected employees.

Our non-qualified deferred compensation plan, implemented in September 1999, provides an unfunded incentive compensation arrangement for eligible management and highly compensated employees. Participants may elect to defer up to 50% of their annual earnings with a minimum deferral of \$2,000. Distributions can be paid out as short-term payments or at retirement. Retirement benefits can be paid out as a lump sum or in annual installments over a term of up to 15 years.

Benefits accrued for these plans totaled \$38.8 million in fiscal 2009, \$75.1 million in 2008, and \$93.6 million in 2007.

Share-based Compensation

The amount, frequency, and terms of share-based awards may vary based on competitive practices, company operating results, and government regulations. New IGT shares are issued upon option exercises or restricted share grants.

IGT restricted share awards are earned over the employee's service (vesting) period, and hold no further restrictions upon vesting. Performance-based awards vest based on achievement of specific financial and operational goals as established in advance by the Compensation Committee. Unrecognized costs related to all share-based awards outstanding at September 30, 2009 totaled \$63.1 million and are expected to be recognized over a weighted average period of 1.7 years.

Stock Incentive Plan (SIP)

Under the IGT SIP, eligible employees and non-employee directors may be granted non-qualified and incentive stock options, restricted shares or stock appreciation rights. SIP grants may vest based on time of service or performance. Stock options are generally granted at an exercise price equal to the market price on the date of grant, with a 10-year contractual term. SIP grants generally vest over 3-5 years in ratable annual increments. At September 30, 2009, 24.0 million shares were available for grant under the IGT SIP and restricted shares granted count as four shares against this allowance.

Stock Options Exchanged

On November 4, 2009, IGT granted 2.7 million employee stock options with an exercise price of \$18.60 per share in exchange for the 5.3 million underwater employee stock options surrendered in a share holder approved exchange offer that expired on November 3, 2009. The newly granted options have a six-year contractual term and will vest ratably over two years.

Table of Contents

Stock options activity as of and for the year ended September 30, 2009

| | Shares (thousands) | Exercise Price (per share) | Weighted Average Remaining Contractual Term (years) | Aggregate Intrinsic Value (millions) |
|----------------------------------|-----------------------|----------------------------------|---|---|
| Outstanding at beginning of year | 16,780 | \$32.06 | | |

| Vested and expected to vest | 17,902 | \$26.94 | 6.4 | \$47.2 |
| Exercisable at end of period | 9,988 | \$30.58 | 4.7 | \$6.6 |

Restricted shares activity as of and for the year ended September 30, 2009

| | Shares (thousands) | Weighted Average Grant Date Fair Value (per share) | Remaining Vesting Period (years) | Aggregate Intrinsic Value (millions) |
|----------------------------------|-----------------------|--|---|---|
| Outstanding at beginning of year | 1,663 | \$35.72 | | |
| Granted | 1,171 | 10.71 | | |
| Vested | (524) | 34.58 | | |
| Forfeited | (310) | 27.45 | | |
| Outstanding at end of period | 2,000 | \$22.60 | 2.4 | \$39.9 |
| Expected to vest | 1,890 | \$21.74 | 2.4 | \$37.7 |

Employee Stock Purchase Plan

Under the IGT qualified employee stock purchase plan, eligible employees are granted an option with a 12-month term to purchase a limited number of shares, exercisable the last day in February each year. Eligible employees may participate in this plan through payroll deductions up to certain limits. The option price is equal to 85% of the market price of our stock on the grant date or exercise date, whichever is less. Approximately 671,000 shares were issued in February 2009 under this plan. Based on enrollment through September 30, 2009, we expect to issue approximately 1.2 million shares in February 2010 under this plan. At September 30, 2009, 1.9 million shares were available for future grants.

Additionally, eligible UK employees may enroll annually in the Barcrest Savings Related Share Option Scheme established in January 1999. Employees must elect to vest over three, five, or seven years and the option price is equal to 80% of the market price of our stock on the grant date. No shares were issued during fiscal 2009 under this plan and approximately 600,000 shares were available for grant at September 30, 2009. Based on enrollment through September 30, 2009, we expect to issue approximately 207,000 shares under this plan over the next seven years.

7. Business Acquisitions

Progressive Gaming International Corp.

In January 2009, we acquired certain operating assets of PGIC. The purchase consideration totaled \$23.6 million, including \$17.3 million in cash and \$6.3 million of fair value from our note investment with accrued interest. See Note 3. Certain global assets and operations of PGIC were integrated with respective IGT offices serving Europe, Asia, Australia, Latin America, Canada, and the US. We believe this purchase will provide IGT with additional market opportunities using the PGIC technology to augment our current systems product offerings and increase our systems installed base.

We allocated the purchase consideration to:

- ♣ tangible assets of \$13.5 million, including cash of \$1.8 million
- ♣ identifiable intangible assets of \$15.3 million
- ♣ in-process R&D of \$0.8 million with no future alternative use, immediately charged to R&D
- ♣ liabilities of \$6.0 million

Cyberview Technology, Inc.

In July 2008, we paid approximately \$88.6 million for substantially all of the assets of Cyberview, a group of companies, that develop, produce, and implement innovative, integrated gaming systems solutions. The purchase price included a separate license agreement providing rights to certain additional Cyberview patents. We anticipate this purchase will enable more immediate access to licensed betting office and video lottery markets in Europe, as well as further strengthen our IP portfolio and enhance our server-based initiatives.

68

Table of Contents

We allocated the purchase price to:

- ♣ tangible assets of \$30.8 million, including cash of \$16.5 million
 - ♣ identifiable intangible assets of \$31.5 million
- ♣ goodwill of \$35.8 million, which may be deductible for tax purposes
 - ♣ liabilities of \$9.5 million

Million-2-1

In June 2008, we completed the acquisition of M-2-1, a mobile gaming company based in Manchester, UK, for approximately \$10.3 million. Additionally, we committed to pay earn-out consideration up to a maximum of £7.5 million, payable through fiscal 2011 contingent upon M-2-1 meeting certain financial targets. If paid, a portion will be recorded as additional purchase consideration and a portion as compensation expense ratably over the service period through June 2011. At September 30, 2009, financial targets were thus far not met and the remaining commitment totaled approximately \$5.0 million. In addition to gaining access to M-2-1's IP, we anticipate this business combination will enable us to establish new markets and channels for IGT's game content.

We allocated the purchase price to:

- ♣ tangible assets of \$1.6 million, including cash of \$0.8 million
 - ♣ identifiable intangible assets of \$7.2 million
- ♣ goodwill of \$6.4 million, which is not deductible for tax purposes
 - ♣ liabilities of \$4.9 million

DigiDeal Corporation

In June 2007, we invested \$31.2 million in voting convertible preferred and common stock of DigiDeal, a Spokane, Washington gaming technology firm. We acquired a 58% controlling interest and DigiDeal's results were consolidated in our financial statements beginning June 22, 2007. In addition to gaining access to DigiDeal's IP portfolio, we plan to work jointly in expanding game content and electronic table game products. Additional five-year agreements provide IGT exclusive manufacturing and distribution rights, as well as a fixed-price option to purchase all remaining outstanding shares.

We allocated the aggregate purchase price to:

- ♣ tangible assets of \$14.9 million, including cash of \$12.4 million
 - ♣ identifiable intangible assets of \$9.0 million
- ♣ in-process R&D of \$0.5 million with no future alternative use, immediately charged to R&D expense
 - ♣ goodwill of \$11.1 million, not deductible for tax purposes

♠ liabilities of \$4.3 million

During the second quarter of fiscal 2008, we increased our investment in DigiDeal by approximately 5% for \$3.0 million, with an allocation of \$2.2 million to goodwill and \$0.4 million to identifiable intangible assets.

8. Investment Securities

Our portfolio of investment securities was comprised entirely of \$21.6 million (par) of ARS and related put rights held at September 30, 2009 and 2008. ARS are fixed rate debt securities with underlying long-term maturities, designed to reset to market rates when traded through a modified Dutch auction process at predetermined short-term intervals, typically 7, 28, or 35 days. These debt securities actively traded at par previous to auctions failures which began in February 2008.

69

Table of Contents

Our ARS consist of AAA rated issuances, collateralized by student loans guaranteed by the US government under the Federal Family Education Loan Program. The issuers additionally provide certain credit enhancements, such as over-collateralization, reserve accounts, insurance, and excess spread, to further secure the value of the debt. The issuers provide a third-party guarantee, such that if a student loan defaults, the guarantor is obligated to pay the issuer 100% of the outstanding principal and interest. The guarantor is then able to submit a claim to the Federal Department of Education which guarantees payment of 97-100% of the outstanding amounts to the guarantor.

With global credit and capital market uncertainties, investment banks and brokers were unwilling to purchase ARS when investor demand fell short and auctions for student loan ARS began failing in February 2008. The effect of a failed auction is that holders cannot sell the securities at auction and the interest rates generally reset to a maximum auction interest rate. Our ARS lack liquidity because of the failed auctions, but we continue to receive interest payments and have no reason to believe the underlying assets are at risk of default.

In November 2008, we accepted ARS put rights offered by our broker, UBS Securities LLC, entitling us to sell our ARS through appropriate UBS entities at par plus accrued interest during the exercise period from June 30, 2010 through July 2, 2012. The put rights are a separate freestanding instrument accounted for separately from the ARS. Upon acceptance of the put rights, we reclassified our ARS from “available-for-sale” to “trading” and elected to carry the put at fair value. We believe this election more accurately reflects the economic relationship between the put and the underlying ARS and future changes in the respective fair values will largely offset.

At September 30, 2009, the ARS and put were classified as trading and presented in current assets as our ability to exercise the put right was within one year. At September 30, 2008, the ARS were classified as available-for-sale in non-current assets. See Note 20 for fair value information. In addition to gains of \$0.2 million on other investment securities sold in fiscal 2008, we recorded the following changes in fair value related to the ARS and put:

- ♣ net loss of \$0.3 million (\$3.9 million ARS loss and \$3.6 million put gain) during fiscal 2009
- ♣ temporary ARS impairment of \$2.0 million during fiscal 2008 (in other comprehensive income)

9. Jackpot Annuity Investments

Information about the carrying value, fair value and unrealized gains and losses of our jackpot investments are presented in Note 20. As of September 30, 2009, these securities mature through 2034, with accreted interest, as follows:

| Within 1 year (In millions) | 2-5 years | 6-10 years | Thereafter | Total |
|-----------------------------------|-----------|------------|------------|----------|
| \$ 67.4 | \$ 240.8 | \$ 195.2 | \$ 128.2 | \$ 631.6 |

Table of Contents

10. Receivables

Our notes and contracts receivable are presented net of unearned interest income and deferred loan fees totaling \$13.2 million at September 30, 2009 and \$6.6 million at September 30, 2008, and net of allowances for doubtful accounts below.

| September 30, (In millions) | 2009 | 2008 | 2007 |
|---|---------|---------|---------|
| Allowance for doubtful accounts: | | | |
| Beginning balance | \$19.1 | \$20.9 | \$18.2 |
| Provisions | 17.0 | 5.2 | 4.0 |
| Write-offs, net of recoveries | (12.7) | (7.0) | (1.3) |
| Ending balance | \$23.4 | \$19.1 | \$20.9 |
| Allowance for doubtful notes and contracts: | | | |
| Beginning balance | \$16.3 | \$25.1 | \$39.0 |
| Provisions | 16.9 | 3.8 | (10.0) |
| Write-offs, net of recoveries | - | (12.6) | (3.9) |
| Ending balance | \$33.2 | \$16.3 | \$25.1 |
| Current | \$22.6 | \$10.1 | \$12.5 |
| Non-current | \$10.6 | \$6.2 | \$12.6 |

Estimated future collections below, as of September 30, 2009, are net of allowances for notes of \$19.0 million and contracts of \$14.2 million:

| (In millions) | 2010 | 2011 | 2012 | 2013 | 2014 | Thereafter | Total |
|---------------|---------|---------|--------|--------|--------|------------|---------|
| Notes | \$38.3 | \$29.6 | \$21.0 | \$20.3 | \$18.0 | \$64.3 | \$191.5 |
| Contracts | 116.5 | 72.2 | 12.3 | 5.6 | 5.5 | 0.6 | 212.7 |
| | \$154.8 | \$101.8 | \$33.3 | \$25.9 | \$23.5 | \$64.9 | \$404.2 |

11. Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist principally of cash and equivalents, investments, and receivables. We place short-term investments in high credit quality financial institutions and in short-duration high-quality securities. With the exception of US Government and Agency securities, our short-term investment policy limits the amount of credit exposure in any one financial institution, industry group, or type of investment. Cash on deposit may be in excess of Federal Deposit Insurance Corporation limits.

Our receivables are concentrated in the following legalized gaming regions at September 30, 2009:

| North America | | International | |
|-----------------------------------|-----|-----------------------------------|-----|
| Nevada | 10% | Argentina | 22% |
| Alabama | 9 | Other Latin America | 7 |
| Oklahoma | 6 | Europe | 6 |
| Pennsylvania | 5 | Other (less than 5% individually) | 8 |
| Other (less than 5% individually) | 27 | | 43% |

57%

Our unfunded development financing loans totaled \$17.7 million at September 30, 2009.

| Foreign currency | - | (7.4) | (7.4) |
| Ending balance | \$1,042.8 | \$108.7 | \$1,151.5 |

Other Intangibles

Patent additions in the following tables include capitalized legal costs, as well as \$24.8 million related to our WDG exchange (see Note 3). Purchase consideration for the reacquired rights was comprised of \$10.6 million cash and \$2.8 million of receivables settled in connection with an Atlantic City distributorship. Business combination additions include purchase price valuation adjustments during the first year subsequent to acquisition.

| Additions for the year ended September 30, 2009 (In millions, except life) | Business Combinations | Other Additions | Weighted Average Life (Years) |

72

Table of Contents

Aggregate amortization expense totaled \$51.2 million in fiscal 2009, \$45.1 million in 2008, and \$49.1 million in 2007.

| | 2010 | 2011 | 2012 | 2013 | 2014 |
|--------------------------------------|--------|--------|--------|--------|--------|
| (In millions) | | | | | |
| Estimated future annual amortization | \$47.3 | \$43.1 | \$37.3 | \$34.2 | \$30.7 |

13. Credit Facilities and Indebtedness

| Outstanding balance September 30, (In millions) | 2009 | 2008 |
|--|-----------|-----------|
| Domestic revolving credit facility | \$100.0 | \$1,345.0 |
| Foreign revolving credit facilities | 5.3 | 15.0 |
| Debentures | 707.0 | 900.0 |
| Notes | 850.0 | - |
| Installment purchase contract | - | 3.1 |
| Bonds | 500.0 | - |
| Total notes payable | 2,162.3 | 2,263.1 |
| Discount | (2.6) | - |
| Swap fair value adjustment | 15.1 | - |
| Total notes payable, net | \$2,174.8 | \$2,263.1 |

The table below reflects our expected future principal payments as of September 30, 2009. The Debentures were included with 2010 payments as we expect holders will exercise the December 2009 put right.

| | 2010 | 2011 | 2012 | 2013 | 2014 | Thereafter | Total |
|--------------------|---------|--------|--------|------|---------|------------|-----------|
| (in millions) | | | | | | | |
| Principal payments | \$712.3 | \$15.6 | \$84.4 | \$- | \$850.0 | \$500.0 | \$2,162.3 |

We were in compliance with all applicable debt covenants at September 30, 2009.

Domestic Revolving Credit Facility

In June 2009, our \$2.5 billion credit facility was amended and restated providing for a reduced revolving credit line of \$2.1 billion, extending the maturity on \$1.7 billion to June 8, 2012 and leaving \$0.4 billion with the non-extended maturity of December 19, 2010. Upon the subsequent issuance of Bonds described below, the amended facility was further reduced by \$0.3 billion to a total commitment of \$1.8 billion, with \$1.5 billion extended and \$0.3 billion non-extended.

Interest under the amended facility is paid at least quarterly with rates and facility fees based on our public debt ratings or debt to capitalization ratio. Initially, extended commitments bear interest at LIBOR plus 260 bps with a facility fee of 65 bps and non-extended commitments bear interest at LIBOR plus 37.5 bps with a facility fee of 12.5 bps. At September 30, 2009, \$100.0 million was drawn on the amended facility (\$84.4 million extended and \$15.6 million non-extended), \$1.7 billion was available, and \$3.6 million was reserved for letters of credit. The outstanding amount carried a 2.74% weighted average interest rate.

Half of amounts outstanding at December 19, 2010 will convert to term loans due in six installments. The first five installments, equal to 1.25% of the converted principal, are due March 31, June 30, September 30, December 31, 2011

and March 31, 2012, and the final installment for the remaining outstanding principal is due on June 8, 2012.

IGT was required to repay \$780.0 million outstanding under the original facility and immediately re-borrow it under the terms of the amended facility. Non-recurring charges of \$4.4 million for associated breakage fees on the early repayments and deferred offering costs related to the commitment reduction were recorded in third quarter interest expense. Capitalized debt issuance costs of approximately \$35.4 million will be amortized to interest expense over the amended facility term.

Table of Contents

Obligations under the amended facility are generally unsecured, except that in the event of certain declines in our debt ratings (as described in the amended facility), we will grant a lien on 100% and 66% of the equity interests of our direct and wholly-owned domestic and foreign subsidiaries, respectively, pursuant to the terms of a Pledge and Security Agreement. The Notes, Bonds or similar securities issued by IGT and certain interest rate hedges provided by lenders or their affiliates under the amended facility are permitted to share in any collateral granted. Any lien granted will be released if we satisfy the minimum debt rating requirements (as described in the amended facility) for at least three consecutive calendar months.

The amended facility includes the following covenants (all terms as defined per the amended facility):

- ♣ a minimum ratio of adjusted EBITDA to interest expense (interest coverage ratio)

- ♣ a maximum ratio of Total Debt to adjusted EBITDA (total leverage ratio)

- ♣ certain restrictions on our ability to:

- § incur or guaranty additional debt, or enter into swap agreements

- § incur liens

- § merge with or acquire other companies, liquidate or dissolve

- § sell, transfer, lease or dispose of substantially all assets

- § change the nature of our business

- § declare or make cash dividends or distributions or pay cash for the purchase, redemption, retirement, defeasance, acquisition, cancellation or termination of our capital stock or equity interests or any return of capital to shareholders, provided that we may, as long as no continuing default has occurred, pay dividends of up to the lesser of \$0.06 per common share per fiscal quarter or \$25 million in any fiscal quarter.

The amended facility specifies a number of events of default (some of which are subject to applicable grace or cure periods), including failure to make timely principal and interest payments or satisfy the covenants. Upon the occurrence of an event of default under the credit facility, the lenders may cease making loans, terminate the commitments, and declare all amounts outstanding to be immediately due and payable.

All features of the amended facility were evaluated for embedded derivatives and we determined no embedded features require bifurcation.

Foreign Revolving Credit Facilities

Our foreign credit facilities at September 30, 2009 totaled \$58.6 million, of which \$5.3 million was outstanding with a weighted average interest rate of 1.38%. These subsidiary credit facilities renew annually and are guaranteed by the parent company, International Game Technology.

2.6% Convertible Debentures

We issued \$900.0 million principal amount of 2.6% Senior Convertible Debentures due December 15, 2036 in a private placement on December 20, 2006. Interest is due semiannually on June 15 and December 15. The Debentures

are general unsecured obligations of IGT, ranking equal with all existing and future unsecured and unsubordinated obligations. The Debentures rank junior to all existing and future subsidiary liabilities, including trade payables.

Table of Contents

At September 30, 2009, \$707.0 million par of Debentures were outstanding after repurchases of \$193.0 million for gains of \$6.5 million during fiscal 2009. No Debentures were repurchased subsequent to September 30, 2009 through November 30, 2009.

IGT may redeem some or all of the Debentures for cash on or after December 20, 2009, at 100% of their principal amount plus accrued and unpaid interest, if any, up to the redemption date. If IGT redeems the Debentures, holders will be notified at least 15 days, but not more than 60 days, prior to the redemption date. Holders have the right to require IGT to redeem the Debentures for cash at 100% of their principal amount plus accrued and unpaid interest, if any, on December 15, 2009, 2011, 2016, 2021, 2026 and 2031.

On November 12, 2009, we gave Debenture holders notice of the December 2009 put right, which we expect holders to exercise given current maker conditions and the recent trading prices of our common stock. At September 30, 2009, the Debentures were not classified as current liabilities because we had the intent and ability to refinance with our noncurrent domestic credit facility.

We may also pay contingent interest for the period commencing December 20, 2009 through June 14, 2010 and any six-month period thereafter, if the average trading price (as defined in the indenture) per \$1,000 Debenture for the five trading day measurement period ending on the third trading day immediately preceding the first day of the interest period equals 120% or more of an equal principal amount of Debentures. The amount of contingent interest will equal 0.25% per annum of the average trading price per \$1,000 Debenture during the five trading day measurement period used to determine whether contingent interest must be paid.

Under certain circumstances, each \$1,000 Debenture may be converted at an initial conversion rate of 16.1875 shares of IGT Common Stock, representing a stock price of \$61.78 or a 35% conversion premium over the market price at issuance. Upon conversion, for each \$1,000 Debenture, a holder will receive cash up to \$1,000, plus accrued and unpaid interest, if any, and shares for any conversion value determined in a manner set forth in the indenture. The conversion rate is adjustable upon the occurrence of certain events as defined in the indenture.

The Debentures are convertible under any of the following circumstances:

- ♣ during any fiscal quarter ending after March 31, 2007 if the closing price of our common stock is more than 130% of the conversion price during the measurement period of the preceding fiscal quarter
 - ♣ if the Debentures are called for redemption
 - ♣ if specified corporate transactions occur
 - ♣ during the last three months prior to maturity

The market price condition for convertibility has not yet been met.

We evaluated all features of the Debentures for embedded derivatives and determined the contingent interest feature represents an embedded derivative requiring bifurcation. No derivative liability was recorded at September 30, 2009 and September 30, 2008 because the fair value was nominal. Changes in fair value are adjusted through interest expense.

3.25% Convertible Notes

On May 11, 2009, we issued \$850.0 million aggregate principal amount of Notes, in a private placement for net proceeds of \$822.5 million, after deferred offering costs of approximately \$27.5 million, which will be amortized to interest expense over the Note term. We will pay interest at 3.25% on the Notes, semiannually on May 1 and November 1, beginning November 1, 2009. Proceeds from the Notes (net of amounts used for the separate note hedge transactions and funds provided by the separate warrant transactions described below) were used to reduce outstanding borrowings under our revolving domestic credit facility.

The Notes are general unsecured obligations of IGT, ranking equal with all existing and future unsecured and unsubordinated obligations. The Notes rank junior to all existing and future subsidiary liabilities, including trade payables. The Notes mature on May 1, 2014, unless repurchased earlier by IGT or converted. The Notes are not redeemable at IGT's option before maturity, except in certain circumstances relating to applicable gaming authority regulations. The terms of the Notes may, in certain circumstances, require us to grant a lien on equity interests if certain downgrades by rating agencies occur.

Table of Contents

Each \$1,000 Note is initially convertible into 50.0808 shares of IGT Common Stock, representing a conversion price of \$19.97 per share. Upon conversion, a holder will receive cash up to the aggregate principal amount of each Note and shares of our common stock for any conversion value in excess of the principal amount as determined per the indenture. The conversion rate is adjustable upon the occurrence of certain events as defined in the indenture.

The Notes are convertible under any of the following circumstances:

- ♣ during any fiscal quarter ending after September 30, 2009 (and only during such fiscal quarter), if the closing price of our common stock for at least 20 trading days in the last 30 trading day period of the immediately preceding fiscal quarter is more than 130% of the conversion price on the last trading day of the preceding fiscal quarter
- ♣ if specified corporate transactions occur as described further in the indenture
- ♣ at any time on or after February 1, 2014 until the close of business on the second scheduled trading day immediately preceding May 1, 2014

Holders who convert their Notes in connection with a make-whole adjustment event, as defined in the indenture, may be entitled to a premium increase in the conversion rate. Upon the occurrence of a fundamental change, as defined in the indenture, such as certain mergers and acquisitions of our common stock or liquidation, holders have the option to require IGT to repurchase their Notes at a purchase price equal to 100% of the principal, plus accrued and unpaid interest.

Note Hedges

In connection with the Notes, we paid an aggregate amount of \$177.3 million to certain initial Note purchasers or their affiliates (counterparties) for separate convertible note hedges. The hedges reduce the potential dilution related to conversion of the Notes if the market value of our common stock, as measured under the Notes, at the time of the hedge exercise is greater than the Note conversion price. The note hedges were separate transactions apart from the Notes or warrants described below and were recorded as an adjustment to stockholders' equity, net of deferred tax assets of \$65.5 million. Note holders have no rights with respect to the note hedges.

The note hedges cover, subject to anti-dilution and certain other customary adjustments substantially identical to those in the Notes, approximately 42.6 million shares of our common stock at a strike price of \$19.97, which corresponds to the initial conversion price of the Notes. The note hedges are exercisable at each conversion date of the Notes and expire upon the earlier of the last day the Notes remain outstanding or the second scheduled trading day immediately preceding May 1, 2014.

Warrants

Additionally, we sold warrants to acquire approximately 42.6 million shares of common stock, subject to anti-dilution and certain other customary adjustments, at a strike price of \$30.14 per share, to the counterparties for an aggregate amount of \$66.8 million. The warrants were separate transactions apart from the Notes or note hedges and accounted for as an adjustment to stockholders' equity. Note holders have no rights with respect to the warrants.

If the volume weighted average share price of our common stock, as measured under the warrants, exceeds the strike price of the warrants, the warrants will have a dilutive effect on our earnings per share. The warrants expire over a series of dates with the final expiration date set to occur in November 2014.

7.5% Bonds

On June 15, 2009, we issued \$500.0 million aggregate principal amount of 7.5% Bonds due 2019, under our March 2009 shelf registration statement and June 11, 2009 prospectus supplement, to certain underwriters pursuant to an underwriting agreement dated June 10, 2009. We received net proceeds of \$493.3 million after a discount of \$2.7 million and deferred offering costs of approximately \$4.0 million, both of which will be amortized to interest expense over the Bond term.

Table of Contents

Interest is payable semiannually on June 15 and December 15, beginning December 15, 2009. We intend to use the net proceeds from the Bonds to fund the redemption of a portion of our Debentures expected to be put to us in December 2009. Until the Debentures can be redeemed, we temporarily repaid outstanding credit facility amounts and intend to re-borrow to fund the redemptions.

The Bonds are general unsecured obligations of IGT, ranking equal with all existing and future unsecured and unsubordinated obligations. The Bonds rank junior to all existing and future liabilities, including trade payables, of our subsidiaries. The Bonds mature on June 15, 2019, unless IGT redeems them earlier by paying the holders 100% of the principal amount plus a make-whole redemption premium as described further in the indenture.

The Bonds contain covenants which may, in certain circumstances:

- ♣ restrict our ability to incur additional debt
- ♣ limit our ability to enter into sale and leaseback transactions
- ♣ restrict our ability to sell, transfer, lease or dispose of substantially all assets
- ♣ require us to grant a lien on equity interests if certain downgrades by rating agencies occur

The Bonds specify a number of events of default (some of which are subject to applicable grace or cure periods), including the failure to make timely principal and interest payments or satisfy the covenants. Upon the occurrence of an event of default under the Bonds, the outstanding amounts may become immediately due and payable.

We evaluated all features of the Bonds and determined the Change of Control/Downgrade Put (described further in the indenture) represents an embedded derivative requiring bifurcation. The value of this derivative was nominal at September 30, 2009 and no related derivative asset or liability was recorded. Any future derivative value will be adjusted through other income (expense) for changes in fair value.

Interest Rate Swap

In conjunction with our Bonds issued in June 2009, we entered into \$250.0 million notional value of interest rate swaps maturing on June 15, 2019, which effectively exchange 7.5% fixed interest payments for variable rate interest payments at one-month LIBOR plus 342 bps reset on the 15th of each month. Net amounts receivable or payable under the swaps will be settled semiannually on June 15 and December 15. See Note 19 for derivative values.

Shelf Registration

In March 2009, we filed a shelf registration statement with the SEC which allows us to issue debt securities, in one or more series, from time to time in amounts, at prices and on terms determined at the time of offering. The Bonds were issued under this registration statement.

Redeemed 1.75% Zero-Coupon Senior Convertible Debentures

On December 26, 2006, we called all of our outstanding 1.75% Debentures for redemption, giving holders the right to convert before January 10, 2007 for aggregate consideration comprised of shares and cash under the terms of the applicable indentures. The call resulted in payments to holders of \$612.7 million, as well as non-cash increases to additional paid-in-capital of \$1.2 million for 7.3 million shares issued and \$47.5 million for related deferred tax liabilities during fiscal 2007.

Table of Contents

14. Jackpot Liabilities

| September 30, (In millions) | 2009 | 2008 |
|--------------------------------|----------|----------|
| Payments due previous winners | \$636.6 | \$682.8 |
| Payments due future winners | 118.0 | 153.6 |
| Unamortized discounts | (166.5) | (185.7) |
| Total jackpot liabilities | \$588.1 | \$650.7 |

| Future jackpot payments due (In millions) | 2010 | 2011 | 2012 | 2013 | 2014 | Thereafter | Total |
|---|--------|--------|--------|--------|--------|------------|---------|
| Previous winners | \$72.2 | \$64.9 | \$62.6 | \$58.9 | \$54.4 | \$ 323.6 | \$636.6 |
| Future winners | 83.3 | 14.1 | 1.1 | 2.8 | 1.1 | 15.6 | 118.0 |

See Note 20 for fair value information.

15. Operating Lease Commitments

We lease certain of our facilities and equipment under various agreements with expiration dates through January 2016. Certain facility leases provide that we pay certain other operating expenses applicable to the leased property, including utilities, maintenance, property taxes, and liability and property damage insurance. For leased properties no longer in use, we have accrued lease payments, net of anticipated sublease receipts. Rent and lease expense totaled \$13.6 million for fiscal 2009, \$16.2 million for fiscal 2008, and \$14.7 million for fiscal 2007.

Future minimum payments due under non-cancelable operating leases at September 30, 2009

| (In millions) | 2010 | 2011 | 2012 | 2013 | 2014 | Thereafter | Total |

| Operating leases | \$14.9 | \$11.8 | \$7.0 | \$3.8 | \$1.9 | \$ 0.8 | \$40.2 |

16. Contingencies

Litigation

IGT has been named in and has brought lawsuits in the normal course of business. We do not expect the outcome of these suits, including the lawsuits described below, to have a material adverse effect on our financial position or results of operations.

Bally

2004 Federal District Court of Nevada

On December 7, 2004, IGT filed a complaint in US District Court for the District of Nevada, alleging that defendants Alliance Gaming Corp., Bally Gaming Int'l, Inc., and Bally Gaming, Inc. infringed six US patents held by IGT: US Patent Nos. 6,827,646; 5,848,932; 5,788,573; 5,722,891; 6,712,698; and 6,722,985. On January 21, 2005, defendants filed an answer denying the allegations in the complaint and raising various affirmative defenses to IGT's asserted claims. Defendants also asserted fourteen counterclaims against IGT, including counterclaims for a declaratory judgment of non-infringement, invalidity, and unenforceability of the asserted patents, and for antitrust violations and

intentional interference with prospective business advantage. IGT has successfully moved for partial summary judgment on defendants' counterclaims for intentional interference with prospective business advantage and defendants' antitrust allegations related to the gaming machine market. IGT denies the remaining allegations. On May 9, 2007, the Court issued an order construing disputed terms of the asserted patent claims. On October 16, 2008, the Court issued summary judgment rulings finding certain of IGT's patents, including patents that IGT believes cover bonus wheel gaming machines, invalid as obvious. The rulings also found that Bally was not infringing certain patents asserted by IGT. Bally's antitrust and unfair competition counterclaims remain pending. On November 7, 2008, the Court issued an order staying the proceedings and certifying the summary judgment and claim construction rulings for immediate appeal. On December 1, 2008, IGT appealed the rulings to the US Court of Appeals for the Federal Circuit. On January 8, 2009, Bally moved to dismiss the appeal on jurisdictional grounds. On February 2, 2009, the Federal Circuit denied the Bally motion without prejudice to the parties raising jurisdictional issues in their merits briefs. On October 22, 2009, the Federal Circuit affirmed the District Court's summary judgment rulings. A trial on Bally's antitrust and unfair competition counterclaims has not yet been scheduled.

Table of Contents

Certain of the patents and associated technology subject to this ruling are intangible assets which had a net carrying value of \$54.6 million at September 30, 2009. As this court ruling triggered us to evaluate these intangible assets for recoverability, we evaluated undiscounted cash flows from product lines directly attributable to the applicable asset group. We determined that the carrying value is fully recoverable and the remaining useful life of seven years is appropriate.

2006 Federal District Court of Delaware

On April 28, 2006, IGT filed a complaint in US District Court for the District of Delaware, alleging that defendants Bally Technologies, Inc., Bally Gaming Int'l, Inc., and Bally Gaming, Inc. infringed nine US patents held by IGT: US Patent Nos. RE 38,812; RE 37,885; 6,832,958; 6,319,125; 6,244,958; 6,431,983; 6,607,441; 6,565,434; and 6,620,046. The complaint alleges that the "BALLY POWER BONUSING™" technology infringes one or more of the claims of the asserted IGT patents. The lawsuit seeks monetary damages and an injunction. On June 30, 2006, defendants filed an answer denying the allegations in the complaint and raising various affirmative defenses to IGT's asserted claims. Defendants also asserted twelve counterclaims against IGT, including counterclaims for a declaratory judgment of non-infringement, invalidity, and unenforceability of the asserted patents, antitrust violations, unfair competition, and intentional interference with prospective business advantage. IGT denies these allegations. Pursuant to stipulation of the parties, all claims and counterclaims except those relating to US Patent Nos. RE 37,885 ("the '885 patent"), RE 38,812 ("the '812 patent"), and 6,431,983 have been dismissed. All proceedings relating to Bally's antitrust, unfair competition, and intentional interference counterclaims have been stayed. On April 28, 2009, the court issued a summary judgment ruling finding the '885 and '812 patents valid. The court also ruled that Bally's "Power Rewards" and "ACSC Power Winners" products infringe certain claims of the '885 and '812 patents. The court granted Bally's motion for summary judgment that Bally's "SDS Power Winners" does not infringe the '885 patent and "Power Bank" and "Power Promotions" do not infringe the '983 patent. The court denied Bally's motion for summary judgment that the '983 patent is invalid. The parties have agreed that Bally's counterclaim for a declaratory judgment on invalidity of the '983 patent will be dismissed without prejudice. IGT's motion for a permanent injunction against Bally's infringing products is pending. A trial to determine the amount of damages incurred by IGT, and related matters, as a result of Bally's infringement has not yet been scheduled.

2006 Federal District Court of Nevada

On September 5, 2006, Bally Gaming, Inc. filed a complaint in US District Court for the District of Nevada alleging that IGT is infringing US Patent No. 7,100,916, entitled "Indicator Wheel System." The products named in the complaint are IGT's gaming machines with "wheel" features, including, without limitation, Wheel of Fortune®, Wheel of Gold®, The Addams Family™, American Bandstand®, The Apprentice™, Dilbert's™ Wheelbert™, Drew Carey Great Balls of Cash™, Elvira®, I Dream of Jeannie®, I Love Lucy™, Indiana Jones™: Raiders of the Lost Ark™, M*A*S*H™, Megabucks® with Morgan Fairchild, Regis On the Town™, Sinatra™ and The Twilight Zone® gaming machines. The lawsuit seeks unspecified monetary damages and an injunction. On October 6, 2006, IGT filed an answer and counterclaims denying infringement and seeking a declaration that the patent is invalid and non-infringed. On September 9, 2008, the Court granted IGT's motion for summary judgment of invalidity and final judgment in IGT's favor was entered on October 3, 2008. Bally appealed the decision to the US Court of Appeals for the Federal Circuit. On October 22, 2009, the Federal Circuit affirmed the District Court's summary judgment ruling.

Aristocrat

2005 Federal District Court of Nevada

On June 30, 2005, Aristocrat Technologies Australia PTY Ltd. filed a patent infringement lawsuit against IGT. The complaint was served on IGT on December 13, 2005. Aristocrat alleged that IGT willfully infringed US Patent No.

6,093,102. Aristocrat alleged that the patent covered its Reel Power® video slot technology and IGT's Multiway® video slot games. The lawsuit sought unspecified damages and an injunction. On January 13, 2006, Aristocrat filed a First Amended Complaint adding Aristocrat Technologies, Inc. as a plaintiff. On April 20, 2007, the US District Court for the District of Nevada issued an order granting summary judgment in favor of IGT declaring the Aristocrat patent invalid. Summary judgment was entered in favor of IGT on April 23, 2007. Aristocrat appealed the decision to the US Court of Appeals for the Federal Circuit. The Federal Circuit affirmed the judgment in IGT's favor on March 28, 2008. Aristocrat requested a rehearing en banc, which was denied. Aristocrat filed a petition for certiorari in the United States Supreme Court, which was denied. This case is now concluded.

Table of Contents

2006 Northern Federal District Court of California

On June 12, 2006, Aristocrat Technologies Australia PTY Ltd. and Aristocrat Technologies, Inc. filed a patent infringement lawsuit against IGT. Aristocrat alleged that IGT willfully infringed US Patent No. 7,056,215, which issued on June 6, 2006. On December 15, 2006, Aristocrat filed an amended complaint, adding allegations that IGT willfully infringed US Patent No. 7,108,603, which issued on September 19, 2006. The IGT products named in the original and amended complaints were the Fort Knox® mystery progressive slot machines. On June 13, 2007, the US District Court for the Northern District of California entered an order granting summary judgment in favor of IGT declaring both patents invalid. The US Court of Appeals for the Federal Circuit reversed this decision on September 22, 2008. IGT's request for a rehearing was denied on November 17, 2008. This case has recommenced in the District Court. Discovery is ongoing.

Brochu v. Loto Quebec

Loto Quebec commenced an action in warranty against VLC, Inc., a wholly-owned subsidiary of IGT, and another manufacturer of video lottery machines in October 2003, in the Superior Court of the Province of Quebec, District of Quebec, seeking indemnification for any damages that may be awarded against Loto Quebec in a class action suit, also filed in the Superior Court of the Province of Quebec. The class action claim against Loto Quebec, to which neither IGT nor any of its affiliates are parties, was filed by Jean Brochu on behalf of himself and a class of other persons who allegedly developed pathological behaviors through the play of video lottery machines made available by Loto Quebec in taverns and other public locations. In this action, the plaintiff seeks to recover on behalf of the class damages of approximately CAD\$578.7 million, representing CAD\$4,863 per class member, and CAD\$119.0 million in punitive damages. Loto Quebec filed its Plea in Defense in the main action in February 2006. On August 1, 2008, Loto Quebec filed a discontinuance of the action in warranty against VLC. Notwithstanding the discontinuance, Loto Quebec may still pursue the claims it asserted, or could have asserted, in the action in warranty through arbitration against VLC. The trial of the class action against Loto Quebec commenced on September 15, 2008 and is ongoing.

Shareholder Actions

Securities Class Action

On July 30, 2009, International Brotherhood of Electrical Workers Local 697 filed a putative securities fraud class action in the US District Court for the District of Nevada, alleging causes of action under Sections 10(b) and 20(a) of the Securities Exchange Act against IGT and certain of its officers, one of whom is a director. The complaint alleges that between November 1, 2007 and October 30, 2008, the defendants inflated IGT's stock price through a series of materially false and misleading statements or omissions regarding IGT's business, operations, and prospects. Plaintiff's counsel issued a press release on July 30, 2009, announcing the lawsuit's pendency, the claims asserted, the purported class period, and the right of any class member to seek lead plaintiff status. This press release initiated the 60-day statutory period for shareholders to file a motion to seek lead-plaintiff status.

Derivative Actions

Between August 20, 2009 and September 17, 2009, the Company was nominally sued in a series of derivative lawsuits filed in the US District Court for the District of Nevada, captioned Fosbre v. Matthews et al., Case No. 3:09-cv-00467; Calamore v. Matthews et al., Case No. 3:09-cv-00489-ECR-VPC; Israni v. Bittman, et al., Case No. 3:09-cv-00536; and Aronson v. Matthews et al., Case No. 3:09-cv-00542-RCJ-VPC. Plaintiffs purportedly brought their respective actions on behalf of the Company. The complaints assert claims against various current and former officers and directors of the Company, for breaches of fiduciary duties, unjust enrichment, abuse of control, gross mismanagement, waste of corporate assets, and contribution and indemnification. The complaints seek an unspecified amount of

damages and allege similar facts as the securities class action lawsuit. The complaints additionally allege that certain individual defendants engaged in insider trading and that the director defendants improperly handled Thomas J. Matthews' resignation as Chief Executive Officer of the Company. The parties have filed a stipulation to consolidate the actions. Defendants need not respond until a consolidated amended complaint is filed.

80

Table of Contents

On September 30, 2009, the Company was nominally sued in a derivative lawsuit filed in the Second Judicial District Court of the State of Nevada, County of Washoe. Plaintiff purportedly filed the action on behalf of the Company. The lawsuit, captioned Kurz et al. v. Hart et al., Case No. cv-0-9-02982, asserts claims against various current and former officers and directors for breach of fiduciary duties and unjust enrichment. The complaint generally makes the same allegations as the federal derivative complaints and seeks an unspecified amount of damages. The parties have stipulated to stay this action pending the above-mentioned federal derivative actions.

In a letter dated October 7, 2009 to the Company's Board of Directors, a shareholder made factual allegations similar to those set forth in the above derivative and securities class actions and demanded that the Board investigate, address and remedy the harm allegedly inflicted on IGT. In particular, the letter alleges that certain officers and directors grossly mismanaged the Company by overspending in the area of research and development of server-based game technology despite a looming recession to which the Company was particularly vulnerable; by making or allowing false and misleading statements regarding the Company's growth prospects and earnings guidance; and by wasting corporate assets by causing the Company to repurchase Company stock at inflated prices. The letter asserts that this alleged conduct resulted in breaches of fiduciary duties and violations of Section 10(b) of the Exchange Act and SEC Rule 10b-5.

ERISA Actions

On October 2, 2009, two putative class action lawsuits were filed on behalf of participants in the Company's employee pension plans, naming as defendants the Company, the IGT Profit Sharing Plan Committee, and several current and former officers and directors. The complaints (which seek unspecified damages) allege breaches of fiduciary duty under the Employee Retirement Income Security Act, 29 U.S.C §§ 1109 and 1132. The complaints allege similar facts as the securities class action lawsuit. The complaints further allege that the defendants breached fiduciary duties to Plan Participants by failing to disclose material facts to Plan Participants, failing to exercise their fiduciary duties solely in the interest of the Participants, failing to properly manage Plan assets, failing to diversify Plan assets, and permitting Participants to elect to invest in Company stock. The actions, filed in the US District Court for the District of Nevada, are captioned Carr et al. v. International Game Technology et al., Case No. 3:09-cv-00584, and Jordan et al. v. International Game Technology et al., Case No. 3:09-cv-00585. On October 9, 2009, the Jordan plaintiffs moved for consolidation of the two actions, which motion is currently pending. Defendants have not yet been served in the action.

Environmental Matters

CCSC, a casino operation sold by IGT in April 2003, is located in an area that has been designated by the EPA as an active Superfund site because of contamination from historic mining activity in the area. In order for Anchor Coin, an entity IGT acquired in December 2001, to develop the CCSC site, it voluntarily entered into an administrative order of consent with the EPA to conduct soil removal and analysis (a requirement imposed on similarly situated property developers within the region) in conjunction with re-routing mine drainage. The work and obligations contemplated by the agreement were completed by Anchor in June 1998, and the EPA subsequently issued a termination of the order.

The EPA, together with other property developers excluding CCSC, continues remediation activities at the site. While we believe our remediation obligations are complete, it is possible that additional contamination may be identified and we could be obligated to participate in remediation efforts. Under accounting guidance for environmental remediation liabilities, we determined the incurrence of additional remediation costs is neither probable nor reasonably estimable and no liability has been recorded.

OSHA / Wrongful Termination Matter

On July 8, 2004, two former employees filed a complaint with the US Department of Labor, OSHA alleging retaliatory termination in violation of the Sarbanes-Oxley Act of 2002. The former employees allege that they were terminated in retaliation for questioning whether Anchor and its executives failed to properly disclose information allegedly affecting the value of Anchor's patents in connection with IGT's acquisition of Anchor in December 2001. The former employees also allege that the acquired patents were overvalued on the financial statements of IGT. Outside counsel, retained by an independent committee of our Board of Directors, reviewed the allegations and found them to be entirely without merit.

Table of Contents

On November 10, 2004, the employees withdrew their complaint filed with OSHA and filed a notice of intent to file a complaint in federal court. On December 1, 2004, a complaint was filed under seal in the US District Court for the District of Nevada, based on the same facts set forth above regarding their OSHA complaint. IGT filed a motion for summary judgment as to all claims in plaintiffs' complaint. On June 14, 2007, the US District Court for the District of Nevada entered an order granting summary judgment in favor of IGT as to plaintiffs' Sarbanes-Oxley whistle-blower claims and dismissed their state law claims without prejudice. Plaintiffs' motion for reconsideration of the District Court's decision was denied. Plaintiffs appealed to the US Court of Appeals for the Ninth Circuit. Oral argument was heard on March 12, 2009, and on August 3 2009, the Ninth Circuit reversed the District Court's decision. IGT's motion for summary judgment on plaintiff's state law claims was argued on October 22, 2009 and a decision is pending. Trial has been scheduled to begin on June 1, 2010.

In conjunction with the Anchor acquisition purchase price allocation as of December 31, 2001, IGT used the relief of royalty valuation methodology to estimate the fair value of the patents at \$164.4 million. The carrying value of the patents at September 30, 2009 totaled \$54.6 million, with a remaining life of approximately seven years.

Arrangements with Off-Balance Sheet Risks

In the normal course of business, we are party to financial instruments with off-balance sheet risk, such as performance bonds and guarantees not reflected in our balance sheet. We do not expect any material losses to result from these arrangements and are not dependent on off-balance sheet financing arrangements to fund our operations.

Performance Bonds

Performance bonds outstanding related to gaming operations totaled \$5.7 million at September 30, 2009. We are liable to reimburse the bond issuer in the event of exercise due to nonperformance.

Letters of Credit

Outstanding letters of credit issued under our line of credit to ensure payment to certain vendors and governmental agencies totaled \$3.6 million at September 30, 2009.

IGT Licensor Arrangements

Our sales agreements that include software and IP licensing arrangements may provide a clause whereby IGT indemnifies the third-party licensee against liability and damages (including legal defense costs) arising from any claims of patent, copyright, trademark, or trade secret infringement. Should such a claim occur, we could be required to make payments to the licensee for any liabilities or damages incurred. Historically, we have not incurred any significant costs due to infringement claims. As we consider the likelihood of incurring future costs to be remote, no liability has been recorded.

Product Warranties

The majority of our products are generally covered by a warranty for periods ranging from 90 days to one year. We estimate accrued warranty costs in the table below based on historical trends in product failure rates and expected costs to provide warranty services.

| Years ended September 30, (In millions) | 2009 | 2008 | 2007 |

Table of Contents

Self-Insurance

We are self-insured for various levels of workers' compensation, directors' and officers' liability, and electronic errors and omissions liability, as well as employee medical, dental, prescription drug, and disability coverage. We purchase stop loss coverage to protect against unexpected claims. Accrued insurance claims and reserves include estimated settlements for known claims, and actuarial estimates for claims incurred but not reported.

State and Federal Taxes

We are subject to sales, use, income, gaming and other tax audits and administrative proceedings in various US federal, state, local, and foreign jurisdictions. While we believe we have properly reported our tax liabilities in each jurisdiction, we can give no assurance that taxing authorities will not propose adjustments that increase our tax liabilities.

84

Table of Contents

Net operating loss carry forwards totaled \$38.7 million for the US and \$54.2 million for foreign countries at September 30, 2009 and expire in tax years 2012 through 2029.

Our valuation allowance is based on our assessment that it is more likely than not that certain deferred tax assets will not be realized in the foreseeable future. The valuation allowance increased by \$19.5 million in fiscal 2009, primarily due to foreign deferred tax assets and investment write-downs not expected to be fully realized. At September 30, 2008, our valuation allowance related to investment write-downs and acquisition related net operating losses.

At September 30, 2009, we had not provided for US deferred income taxes or foreign withholding taxes on \$132.5 million in unrecognized temporary differences related to the basis of our investments in foreign subsidiaries expected to be permanently reinvested in operations outside the US. In calculating the unrecognized temporary differences related to the basis in our investments in foreign subsidiaries, we use tax earnings and profits because we believe that, based on the information available, it represents the best approximation of the unrecognized tax liability. Determination of the amount of any unrecognized deferred income tax liability on these undistributed earnings is not practicable.

Unrecognized Tax Benefits

At the beginning of fiscal 2008, we adopted new accounting guidance which required the recognition of uncertain tax positions taken or expected to be taken in a tax return, when it is “more likely than not” to be sustained upon examination. This assessment further presumes that tax authorities evaluate the technical merits of transactions individually with full knowledge of all facts and circumstances surrounding the issue. The adoption of this new guidance, as of the beginning of fiscal 2008, increased our unrecognized tax benefits and related interest and penalties \$89.9 million, increased deferred tax assets \$55.4 million, and decreased retained earnings \$34.5 million.

Aggregate changes in the balance of unrecognized tax benefits

| Years ended September 30, (In millions) | 2009 | 2008 |
|--|---------|---------|
| Balance at beginning of year | \$87.5 | \$92.2 |
| Increases related to prior year tax positions | 1.9 | 8.9 |
| Decreases related to prior year tax positions | (27.8) | (0.1) |
| Increases related to current year tax positions | 13.8 | 5.0 |
| Decreases related to current year tax positions | (4.2) | (18.5) |
| Reductions for settlements with taxing authorities | (3.4) | - |
| Balance at year end | \$67.8 | \$87.5 |

The amount of unrecognized tax benefits which would impact our effective tax rate totaled \$46.5 million at September 30, 2009 and \$53.4 million at September 30, 2008. Our unrecognized tax benefits decreased \$19.7 million during fiscal 2009, primarily due to an IRS settlement and a tax accounting method change approved by the IRS, partially offset by current year additions. We do not believe our total unrecognized tax benefits will change significantly during the next twelve months.

Interest and penalties related to unrecognized tax benefits are included in our income tax provision. During fiscal 2009, we recognized a \$2.9 million benefit for the reversal of interest and penalties related to the IRS settlement and the accounting method change described above. In fiscal 2008, we recognized \$11.8 million of interest and penalties related to uncertain tax positions. Accrued interest and penalties related to uncertain tax positions totaled \$46.5 million at September 30, 2009 and \$51.3 million at September 30, 2008.

Table of Contents

Balance Sheet Classification of Unrecognized Tax Benefits, including accrued interest and penalties

| September 30, (In millions) | 2009 | 2008 |
|---|---------|---------|
| Other accrued liabilities | \$- | \$27.8 |
| Other liabilities (non-current) | 138.8 | 134.4 |
| Other current assets | - | (2.0) |
| Other non-current assets | (24.5) | (21.4) |
| Net liabilities for uncertain tax positions | \$114.3 | \$138.8 |

We file income tax returns in the US federal, various state, local and foreign jurisdictions. During 2009, the IRS closed its examination of our tax returns for fiscal 2000 and 2001. In connection with the settlement of our fiscal 2000 and 2001 examinations, we paid the IRS approximately \$18.2 million, including interest of \$6.0 million. In general, we are no longer subject to any significant US federal, state, local or foreign income tax examination by tax authorities for years before fiscal 2002.

During fiscal 2009, the IRS began an audit of our US federal income tax returns for fiscal 2002 through 2005. We are also subject to examination in state and foreign jurisdictions for the same years. We believe we have recorded all appropriate provisions for outstanding issues for all jurisdictions and open years. However, we can give no assurance that taxing authorities will not propose adjustments that increase our tax liabilities.

18. Earnings Per Share

| Years Ended September 30, (In millions, except per share amounts) | 2009 | 2008 | 2007 |
|---|---------|---------|---------|
| Net income | \$149.0 | \$342.5 | \$508.2 |
| Basic weighted average shares outstanding | 293.8 | 308.0 | 330.1 |
| Dilutive effect of stock awards | 0.7 | 2.4 | 4.1 |
| Dilutive effect of Debentures | - | - | 1.9 |
| Diluted weighted average shares outstanding | 294.5 | 310.4 | 336.1 |
| Basic earnings per share | \$0.51 | \$1.11 | \$1.54 |
| Diluted earnings per share | \$0.51 | \$1.10 | \$1.51 |
| Weighted average antidilutive stock award shares excluded from diluted EPS | 15.9 | 5.7 | 3.2 |

Our Notes and warrants were excluded from diluted shares outstanding for the year ended September 30, 2009, because the conversion price and exercise price exceeded the average market price of our common stock. The convertible notes will result in additional EPS dilution when our stock price exceeds the note conversion price of \$19.97 per share and further dilution when the stock price exceeds the warrant strike price of \$30.14 per share. The treasury stock method used to calculate diluted weighted average shares outstanding excludes potential reduction in shares related to the purchased note hedges because it is anti-dilutive. See Note 13.

Stock Options Exchanged

On November 4, 2009, IGT granted 2.7 million employee stock options in exchange for the 5.3 million underwater employee stock options surrendered in a share holder approved exchange offer that expired on November 3, 2009.

Table of Contents

Negotiated Share Repurchase Transactions

On September 6, 2007, we acquired 4.2 million shares through an ASR for an aggregate cost of \$175.0 million or \$41.28 per share subject to a future purchase price adjustment based on our weighted average stock price through October 3, 2007, subject to a specified collar. On September 7, 2006, we acquired 3.7 million shares through a similar ASR for an initial payment of \$150.0 million or \$40.97 per share, subject to a future purchase price adjustment based on our weighted average stock price through November 3, 2006, subject to a specified collar. We settled both transactions with no additional cash or shares delivered by either party because our weighted average stock price was above the initial cap price.

19. Derivatives

Our derivative accounting policies are described in Note 1.

Foreign Currency Hedging

We hedge our net foreign currency exposure related to monetary assets and liabilities denominated in nonfunctional currency. The notional amount of foreign currency contracts hedging this exposure totaled \$24.9 million at September 30, 2009 and \$43.4 million at September 30, 2008.

During the third quarter of fiscal 2007, we executed 5-year forward contracts designated as a fair value hedge to protect a portion of the US dollar value of our Hong Kong dollar investment in the CLS convertible note (see Note 3). The notional amount of foreign currency contracts hedging this exposure totaled \$49.9 million at September 30, 2009 and 2008. There was no ineffectiveness in fiscal 2009.

Interest Rate Management

In conjunction with our Bonds issued in June 2009 (see Note 13), we entered into \$250.0 million notional value of interest rate swaps, which effectively exchange 7.5% fixed interest payments for variable rate interest payments at one-month LIBOR plus 342 bps reset on the 15th of each month. Net amounts receivable or payable under the swaps will be settled semiannually on June 15 and December 15. The interest rate swaps are designated fair value hedges against changes in the fair value of a portion of our Bonds. Our assessment determined that the interest rate swap is highly effective.

20. Fair Value Measurements

Financial Assets (Liabilities) Carried at Fair Value

| September 30, 2009 (In millions) | Fair Value | Level 1 | Level 2 | Level 3 |
|--|------------|---------|---------|---------|
| Investments in unconsolidated affiliates | \$94.1 | \$15.7 | \$- | \$78.4 |
| Investments in ARS and put rights | 21.3 | - | - | 21.3 |
| Derivative assets | 15.0 | - | 15.0 | - |
| Derivative liabilities | (16.0) | - | (16.0) | - |

Reconciliation of Items Carried at Fair Value Using Significant Unobservable Inputs (Level 3)

| Year Ended September 30, 2009 (In millions) | Investments in Unconsolidated Affiliates | Investments in ARS and Put Rights |
|--|--|---|
| Beginning balance | \$ 80.4 | \$19.6 |
| Total gain (loss): | | |
| Included in other income (expense) - other | (1.7) | (0.3) |
| Included in other comprehensive income | 2.8 | 2.0 |
| Purchases, issuances, accretion, settlements | (3.1) | - |
| Ending balance | \$ 78.4 | \$21.3 |
| Net change in unrealized gain (loss) included in earnings related to instruments still held | \$ - | \$(0.3) |

Valuation Techniques and Balance Sheet Presentation

Investments in unconsolidated affiliates carried at fair value are estimated using quoted market prices when available or discounted cash flow models incorporating market participant assumptions, including credit quality and market interest rates and/or a Black Scholes formula and lattice models with certain assumptions, such as stock price and volatility. These investments are presented as a component of other assets. See Note 3.

Investments in ARS are valued using discounted cash flows, with certain assumptions related to lack of liquidity and observable market transactions. The put rights are valued based on the difference between the ARS par and fair value, discounted for the broker's non-performance risk and the time remaining until the exercise period. The ARS and related put rights are presented as a component of other assets. See Note 8.

Derivative assets and liabilities are valued using quoted forward pricing from bank counterparties and LIBOR credit default swap rates for non-performance risk, and approximate the net settlement amount if the contracts were settled at the reporting date. These are presented primarily as components of other assets, other liabilities, and notes payable. See Note 19.

Table of Contents

Financial Assets (Liabilities) Not Carried at Fair Value

(In millions)

| | Carrying Amount | Fair Value | Unrealized Gain | Unrealized Loss |
|----------------------------------|--------------------|------------|--------------------|--------------------|
| 2009 | | | | |
| Jackpot investments | \$464.1 | \$518.0 | \$54.1 | \$(0.2) |
| Notes & contracts receivable | 404.2 | 413.8 | 9.6 | - |
| Jackpot liabilities | (588.1) | (595.5) | - | (7.4) |
| Credit facilities & indebtedness | (2,159.7) | (2,435.0) | - | (275.3) |
| 2008 | | | | |
| Jackpot investments | \$490.9 | \$537.0 | \$46.4 | \$(0.3) |
| Notes & contracts receivable | 241.7 | 241.7 | - | - |
| Jackpot liabilities | (650.7) | (696.7) | - | (46.0) |
| Credit facilities & indebtedness | (2,263.1) | (2,209.1) | 54.0 | - |

Valuation Techniques and Balance Sheet Presentation

Cash and equivalents, accounts receivable, accounts payable, and other accrued liabilities are not presented in the table above as the carrying value approximates fair value.

Jackpot investments are valued based on quoted market prices.

Notes and contracts receivable are valued using discounted cash flows incorporating expected payments and current market interest rates relative to the credit risk of each customer.

Jackpot liabilities are valued using discounted cash flow models incorporating estimated funding rates, future payment timing, and IGT's nonperformance credit risk.

Credit facilities and indebtedness are valued at quoted market prices or dealer quotes for the identical liability when traded as an asset in an active market when available. Otherwise, the fair value is determined using discounted cash flow models of expected payments on outstanding borrowings at current borrowing rates. The swap fair value adjustment presented as a component of notes payable is excluded from the credit facilities amounts not carried at fair value in the table above.

21. Business Segments

We view our business in the following two operating segments based on customer regions:

- ♣ North America includes our operations in the US and Canada
- ♣ International encompasses our efforts in all other jurisdictions worldwide

Canada revenues included in our North America segment totaled \$44.3 million in fiscal 2009, \$53.3 million in 2008, and \$101.1 million in 2007.

Certain income and expenses related to company-wide initiatives are managed at the corporate level and not allocated to any operating segment. We do not recognize inter-company revenues or expenses upon the transfer of gaming

products between operating segments. Segment accounting policies are consistent with those of our consolidated financial statements and segment profit is measured on the basis of operating income.

Our business segments are designed to allocate resources within a framework of management responsibility. Operating costs from one segment may benefit other segments. Realignment of our business development and administrative functions resulted in segment allocation changes and prior period operating income and income before tax have been recast accordingly.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures designed to provide reasonable assurance that information required to be disclosed in our reports filed under the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported within the time periods specified by the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our CEO and CFO, as appropriate, to allow for timely decisions regarding required disclosure. We recognize that any controls and procedures, no matter how well designed and operated, can only provide reasonable assurance of achieving desired control objectives. Judgment is required when designing and evaluating the cost-benefit relationship of potential controls and procedures.

As of the end of the period covered by this report, with the supervision and participation of management, including our CEO and CFO, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures. Based on this evaluation, our CEO and CFO have concluded that, as of the end of such period, our disclosure controls and procedures were effective at the reasonable assurance level.

Internal Control over Financial Reporting

Management's Report on Internal Control Over Financial Reporting

Internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) refers to the process designed by, or under the supervision of, our CEO and CFO, and effected by our board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Management is responsible for establishing and maintaining adequate internal control over our financial reporting.

We have evaluated the effectiveness of our internal control over financial reporting as of September 30, 2009.

This evaluation was performed using the Internal Control - Integrated Framework developed by the Committee of Sponsoring Organizations of the Treadway Commission. Based on such evaluation, management has concluded that, as of such date, our internal control over financial reporting was effective. The attestation report issued by Deloitte & Touche LLP on our internal control over financial reporting is included in the audit opinion in Part II, Item 8 of this report.

Changes in Internal Control Over Financial Reporting

As a part of our normal operations, we update our internal controls as necessary to accommodate any modifications to our business processes or accounting procedures. No change occurred during the most recent fiscal quarter that materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

None

Table of Contents

PART III

The information required by Items 10, 11, 12, 13, and 14, except as provided below, is incorporated by reference from the Proxy Statement to be filed with the SEC within 120 days of the end of the fiscal year covered by this report.

Item 10. Directors, Executive Officers and Corporate Governance

We have adopted the “Code of Ethics for Principal Executive Officer and Senior Financial Officers of International Game Technology” (Finance Code of Ethics), a code of ethics that applies to our Principal Executive Officer, Principal Financial Officer, Principal Accounting Officer or Controller, or any persons performing similar functions (together, the “Covered Officers”). The Finance Code of Ethics is publicly available on our website. If we make any substantive amendments to the Finance Code of Ethics or grant any waiver, including any implicit waiver, from a provision of the code to any of the Covered Officers, we will disclose the nature of such amendment or waiver on our website.

Item 11. Executive Compensation

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Equity compensation plans approved and not approved by shareholders as of September 30, 2009:

| Plan category (In millions, except per share amounts) | Number of securities to be issued upon exercise of outstanding options, warrants and rights | Weighted average exercise price of outstanding options warrants and rights | Number of securities remaining available for future issuance under equity compensation plans |
|---|---|--|--|
| Equity compensation plans approved by shareholders (1) | 20.0 | \$24.19 | 25.9 |
| Equity compensation plans not approved by shareholders(2) | 0.2 | \$10.43 | 0.6 |
| Total | 20.2 | \$24.05 | 26.5 |

(1) Includes shares under the International Game Technology Stock Incentive Plan and Qualified Employee Stock Purchase Plan. ESPP shares are not included in securities to be issued until exercised each year in February.

(2) Includes shares available under the Barcrest Savings Related Share Option Scheme, a broad-based UK employee stock purchase program established in January 1999 to satisfy certain UK tax requirements. This program is generally intended to provide UK employees the same benefits available under the US Employee Stock Purchase Plan. Shareholder approval was not required for this plan.
