FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2016

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File No.: 001-37703

IZEA, INC.
(Exact name of registrant as specified in its charter)

Nevada 37-1530765
(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification No.)

480 N. Orlando Avenue, Suite 200 32789
Winter Park, FL
(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code: (407) 674-6911

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Edgar Filing: IZEA, Inc. - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

APPLICABLE ONLY TO CORPORATE REGISTRANTS

As of August 8, 2016, there were 5,450,005 shares of our common stock outstanding.

IZEA, Inc.

Notes to the Unaudited Consolidated Financial Statements

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Unaudited Interim Financial Information

The accompanying consolidated balance sheet as of June 30, 2016, the consolidated statements of operations for the three and six months ended June 30, 2016 and 2015, the consolidated statement of stockholders' equity for the six months ended June 30, 2016 and the consolidated statements of cash flows for the six months ended June 30, 2016 and 2015 are unaudited but include all adjustments that are, in the opinion of management, necessary for a fair presentation of our financial position at such dates and our results of operations and cash flows for the periods then ended in conformity with U.S. generally accepted accounting principles ("U.S. GAAP"). The consolidated balance sheet as of December 31, 2015 has been derived from the audited consolidated financial statements at that date but, in accordance with the rules and regulations of the Securities and Exchange Commission ("SEC"), does not include all of the information and notes required by U.S. GAAP for complete financial statements. Operating results for the three and six months ended June 30, 2016 are not necessarily indicative of results that may be expected for the entire fiscal year. These unaudited consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto for the fiscal year ended December 31, 2015 included in the Company's Annual Report on Form 10-K filed with the SEC on March 30, 2016.

Nature of Business

IZEA, Inc. (together with its wholly-owned subsidiaries, "we," "us," "our" or the "Company") was founded in February 2006 under the name PayPerPost, Inc. and became a public company incorporated in the state of Nevada in May 2011. On March 9, 2016, the Company formed IZEA Canada, Inc., a wholly-owned subsidiary incorporated in Ontario, Canada to operate as a sales office for its Canadian customers beginning in the second half of 2016. On April 5, 2016, the Company filed Articles of Merger with the Secretary of State of Nevada to effect the merger of its wholly-owned, non-operating subsidiary, IZEA Innovations, Inc., a Delaware corporation originally incorporated on September 19, 2006, into the parent operations of IZEA, Inc., a Nevada corporation. The Company is headquartered near Orlando, Florida with additional offices in Chicago, Los Angeles, Mountain View and Toronto, and a sales presence in New York, Detroit and Boston.

The Company operates online marketplaces that facilitate transactions between brands and influential content creators. These creators are compensated by IZEA for producing and distributing unique content such as long-form text, videos, photos and status updates on behalf of brands through websites, blogs and social media channels. Brands receive influential consumer content and engaging, shareable stories that drive awareness. These marketplaces are powered by the IZEA Exchange ("IZEAx"). The Company's technology enables transactions to be completed at scale through the management of content workflow, creator search and targeting, bidding, analytics and payment processing. IZEAx is designed to provide a unified ecosystem that enables the creation of multiple types of content including blog posts, status updates, videos and photos through a wide variety of social channels including blogs, Twitter, Facebook, Instagram and Tumblr, among others.

Reverse Stock Split

On January 6, 2016, the Company filed a Certificate of Amendment with the Secretary of State of Nevada to effect a reverse stock split of the issued and outstanding shares of its common stock at a ratio of one share for every 20 shares outstanding prior to the effective date of the reverse stock split. All current and historical information contained herein related to the share and per share information for the Company's common stock or stock equivalents reflects the 1-for-20 reverse stock split of the Company's outstanding shares of common stock that became market effective on January 11, 2016. There was no change in the number of the Company's authorized shares of common stock.

Principles of Consolidation

The consolidated financial statements include the accounts of IZEA, Inc. and its wholly-owned subsidiaries, Ebyline and IZEA Canada, Inc. All significant intercompany balances and transactions have been eliminated in consolidation.

The consolidated financial statements were prepared using the acquisition method of accounting with IZEA considered the accounting acquirer of Ebyline. Under the acquisition method of accounting, the purchase price is allocated to the underlying Ebyline tangible and intangible assets acquired and liabilities assumed based on their respective fair market values with any excess purchase price allocated to goodwill.

Cash and Cash Equivalents

For purposes of the statement of cash flows, the Company considers all highly liquid debt instruments purchased with a maturity of three months or less to be cash equivalents.

IZEA, Inc.

Notes to the Unaudited Consolidated Financial Statements

Accounts Receivable and Concentration of Credit Risk

Accounts receivable are customer obligations due under normal trade terms. Uncollectibility of accounts receivable is not significant since most customers are bound by contract and are required to fund the Company for all the costs of an “opportunity,” defined as an order created by a marketer for a creator to write about the marketer’s product. If a portion of the account balance is deemed uncollectible, the Company will either write-off the amount owed or provide a reserve based on the uncollectible portion of the account. Management determines the collectibility of accounts by regularly evaluating individual customer receivables and considering a customer’s financial condition, credit history and current economic conditions. The Company had a reserve of \$244,000 and \$139,000 for doubtful accounts as of June 30, 2016 and December 31, 2015, respectively. Management believes that this estimate is reasonable, but there can be no assurance that the estimate will not change as a result of a change in economic conditions or business conditions within the industry, the individual customers or the Company. Any adjustments to this account are reflected in the consolidated statements of operations as a general and administrative expense. Bad debt expense was less than 1% of revenue for the three and six months ended June 30, 2016 and 2015.

Concentrations of credit risk with respect to accounts receivable are typically limited because a large number of geographically diverse customers make up the Company’s customer base, thus spreading the trade credit risk. The Company also controls credit risk through credit approvals, credit limits and monitoring procedures. The Company performs credit evaluations of its customers but generally does not require collateral to support accounts receivable. At June 30, 2016, the Company had no customers which accounted for more than 10% of total accounts receivable in the aggregate. At December 31, 2015, the Company had one customer which accounted for 13% of total accounts receivable in the aggregate. The Company had no customers that accounted for more than 10% of its revenue during the three months ended June 30, 2016 and one customer that accounted for 17% of its revenue during the three months ended June 30, 2015. The Company had one customer that accounted for 11% of its revenue during the six months ended June 30, 2016 and one customer that accounted for 14% of its revenue during the six months ended June 30, 2015.

Property and Equipment

Property and equipment are recorded at cost, or if acquired in a business combination, at the acquisition date fair value. Depreciation and amortization is computed using the straight-line method over the estimated useful lives of the assets as follows:

Computer Equipment	3 years
Software Costs	3 years
Office Equipment	3 - 10 years
Furniture and Fixtures	5 - 10 years

Leasehold improvements are depreciated over the shorter of the term of the lease or the estimated useful lives of the improvements. Property and equipment under capital leases are depreciated over their estimated useful lives. Expenditures for repairs and maintenance are charged to expense as incurred. Expenditures for betterments and major improvements are capitalized and depreciated over the remaining useful lives of the assets. The carrying amounts of assets sold or retired and the related accumulated depreciation are eliminated in the year of disposal, with resulting gains or losses included in general and administrative expense. Depreciation expense on property and equipment recorded in general and administrative expense in the accompanying consolidated statements of operations was \$64,637 and \$49,517 for the three months ended June 30, 2016 and 2015, respectively and \$125,232 and \$96,536 for the six months ended June 30, 2016 and 2015, respectively.

Software Development Costs

In accordance with ASC 350-40, Internal Use Software and ASC 985-730, Computer Software Research and Development, research phase costs related to internal use software should be expensed as incurred and development

phase costs including direct materials and services, payroll and benefits and interest costs may be capitalized. The Company amortizes software development costs equally over 5 years upon initial launch of the software or additional features. Amortization expense on software development costs recorded in general and administrative expense in the accompanying consolidated statements of operations was \$44,549 and \$28,444 for the three months ended June 30, 2016 and 2015, respectively and \$84,428 and \$56,888 for the six months ended June 30, 2016 and 2015, respectively.

As of June 30, 2016, future estimated amortization expense related to software development costs over the next five years is set forth in the following schedule:

6

IZEA, Inc.

Notes to the Unaudited Consolidated Financial Statements

Year ending December 31:	Software Amortization Expense
2016	\$ 103,150
2017	234,906
2018	234,906
2019	149,574
2020	112,723
Thereafter	47,329
	\$ 882,588

Intangible Assets

The Company acquired the majority of its intangible assets through its acquisition of Ebyline on January 30, 2015. The Company is amortizing the identifiable intangible assets over a period of 12 to 60 months. Management reviews long-lived assets, including property and equipment, software development costs and other intangible assets, for impairment whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. If an evaluation is required, the estimated future undiscounted cash flows associated with the asset are compared with the asset's carrying amount to determine if there has been an impairment, which is calculated as the difference between the fair value of an asset and its carrying value. Estimates of future undiscounted cash flows are based on expected growth rates for the business, anticipated future economic conditions and estimates of residual values. Fair values take into consideration management estimates of risk-adjusted discount rates, which are believed to be consistent with assumptions that marketplace participants would use in their estimates of fair value. For the three and six months ended June 30, 2016 and 2015, there were no impairment charges associated with the Company's long-lived assets.

The Company is amortizing the identifiable intangible assets over a weighted average period of 3 years. Amortization expense recorded in general and administrative expense in the accompanying consolidated statements of operations was \$189,991 and \$148,250 for the three months ended June 30, 2016 and 2015, respectively and \$385,814 and \$247,083 for the six months ended June 30, 2016 and 2015, respectively.

As of June 30, 2016, future estimated amortization expense related to identifiable intangible assets over the next five years is set forth in the following schedule:

Year ending December 31:	Amortization Expense
2016	\$ 379,980
2017	759,961
2018	148,849
2019	93,294
2020	38,293
Total	\$ 1,420,377

Goodwill

Goodwill represents the excess of the purchase consideration of an acquired business over the fair value of the underlying net tangible and intangible assets. The Company has goodwill that has been recorded in connection with its acquisition of Ebyline. Goodwill is not amortized, but instead it is tested for impairment at least annually. In the event that management determines that the value of goodwill has become impaired, the Company will record a charge for the amount of impairment during the fiscal quarter in which the determination is made.

The Company performs its annual impairment tests of goodwill during the fourth quarter of each year, or more frequently, if certain indicators are present. Goodwill is required to be tested for impairment at the reporting unit level. A reporting unit is an operating segment or one level below the operating segment level, which is referred to as a component. Management identifies its reporting units by assessing whether components (i) have discrete financial information available; (ii) engage in business activities; and (iii) whether a segment manager regularly reviews the component's operating results. Net assets and goodwill of acquired businesses are allocated to the reporting unit associated with the acquired business based on the anticipated organizational structure of the combined entities. If two or more components are deemed economically similar, those components are aggregated into one reporting

IZEA, Inc.

Notes to the Unaudited Consolidated Financial Statements

unit when performing the annual goodwill impairment review. The Company has determined that prior to and after the acquisition of Ebyline, it had and continues to have one reporting unit.

Revenue Recognition

The Company derives its revenue from three sources: revenue from a marketer when it pays for a social media publisher or influencer such as a blogger or tweeter ("creators") to share sponsored content with their social network audience ("Sponsored Revenue"), revenue when a publisher or company purchases custom branded content for its own use, as well as third party content marketing and native advertising efforts ("Content Revenue") and revenue derived from various service and license fees charged to users of the Company's platforms ("Service Fee Revenue").

For managed customers, the Company enters into an agreement to provide services that may require multiple deliverables in the form of (a) sponsored social items, such as blogs, tweets, photos or videos shared through social network offerings that provide awareness or advertising buzz regarding the marketer's brand; (b) media advertisements, such as click-through advertisements appearing in websites and social media channels; and (c) original content items, such as a research or news article, informational material or videos that a publisher or brand can use. The Company may provide one type or a combination of all types of these deliverables including a management fee on a statement of work for a lump sum fee. These deliverables are to be provided over a stated period that may range from one day to one year. Each of these items are considered delivered once the content is live through a public or social network or content has been delivered to the customer for their own use. Revenue is accounted for separately on each of the deliverables in the time frames set forth below. The statement of work typically provides for a cancellation fee if the agreement is canceled by the customer prior to completion of services. Payment terms are typically 30 days from the invoice date. If the Company is unable to provide a portion of the services, it may agree with the customer to provide a different type of service or to provide a credit for the value of those services that may be applied to the existing order or used for future services.

Sponsored Revenue is recognized and considered earned after a marketer's sponsored content is posted through IZEAx and shared through a creator's social network for a requisite period of time. The requisite period ranges from 3 days for a tweet to 30 days for a blog, video or other form of content. Management fees related to Sponsored Revenue from advertising campaigns managed by the Company are recognized ratably over the term of the campaign which may range from a few days to several months. Content Revenue is recognized when the content is delivered to and accepted by the customer. Service Fee Revenue is generated when fees are charged to customers primarily related to subscription fees for different levels of service within a platform, licensing fees for white-label use of IZEAx, early cash-out fees if a creator wishes to take proceeds earned for services from their account when the account balance is below certain minimum balance thresholds and inactivity fees for dormant accounts. Service Fee Revenue is recognized immediately when the service is performed or at the time an account becomes dormant or is cashed out. Service Fee Revenue for subscription or licensing fees is recognized straight-line over the term of service. Self-service marketers must prepay for services by placing a deposit in their account with the Company. The deposits are typically paid by the marketer via credit card. Marketers who use the Company to manage their social advertising campaigns or content requests may prepay for services or request credit terms. Payments received or billings in advance of services are recorded as unearned revenue until earned as described above.

All of the Company's revenue is generated through the rendering of services and is recognized under the general guidelines of SAB Topic 13 A.1 which states that revenue will be recognized when it is realized or realizable and earned. The Company considers its revenue as generally realized or realizable and earned once (i) persuasive evidence of an arrangement exists, (ii) services have been rendered, (iii) the price to the marketer or customer is fixed (required to be paid at a set amount that is not subject to refund or adjustment) and determinable, and (iv) collectibility is reasonably assured. The Company records revenue on the gross amount earned since it generally is the primary obligor in the arrangement, takes on credit risk, establishes the pricing and determines the service specifications.

Advertising Costs

Advertising costs are charged to expense as they are incurred, including payments to content creators to promote the Company. Advertising expense charged to operations for the three months ended June 30, 2016 and 2015 were approximately \$106,000 and \$94,000, respectively. Advertising expense charged to operations for the six months ended June 30, 2016 and 2015 were approximately \$217,000 and \$212,000, respectively. Advertising costs are included in sales and marketing expense in the accompanying consolidated statements of operations.

Deferred Rent

The Company's operating leases for its office facilities contain rent abatements and predetermined fixed increases of the base rental rate during the lease term. The Company accounts for rental expense on a straight-line basis over the lease term. The

IZEA, Inc.

Notes to the Unaudited Consolidated Financial Statements

Company records the difference between the straight-line expense and the actual amounts paid under the lease as deferred rent in the accompanying consolidated balance sheets.

Income Taxes

The Company has not recorded federal income tax expense due to the generation of net operating losses. Deferred income taxes are accounted for using the balance sheet approach which requires recognition of deferred tax assets and liabilities for the expected future consequences of temporary differences between the financial reporting basis and the tax basis of assets and liabilities. A valuation allowance is provided when it is more likely than not that a deferred tax asset will not be realized. The Company incurs minimal state franchise tax in two states which is included in general and administrative expenses in the consolidated statements of operations.

The Company identifies and evaluates uncertain tax positions, if any, and recognizes the impact of uncertain tax positions for which there is a less than more-likely-than-not probability of the position being upheld when reviewed by the relevant taxing authority. Such positions are deemed to be unrecognized tax benefits and a corresponding liability is established on the balance sheet. The Company has not recognized a liability for uncertain tax positions. If there were an unrecognized tax benefit, the Company would recognize interest accrued related to unrecognized tax benefits in interest expense and penalties in operating expenses. The Company's tax years subject to examination by the Internal Revenue Service are 2012, 2013 and 2014.

Derivative Financial Instruments

Derivative financial instruments are defined as financial instruments or other contracts that contain a notional amount and one or more underlying factors (e.g., interest rate, security price or other variable), require no initial net investment and permit net settlement. Derivative financial instruments may be free-standing or embedded in other financial instruments. Further, derivative financial instruments are initially, and subsequently, measured at fair value and recorded as liabilities or, in rare instances, assets. The Company accounts for derivative instruments in accordance with ASC 815, Derivatives and Hedging ("ASC 815"), which requires additional disclosures about the Company's objectives and strategies for using derivative instruments, how the derivative instruments and related hedged items are accounted for, and how the derivative instruments and related hedging items affect the financial statements. The Company does not use derivative instruments to hedge exposures to cash flow, market or foreign currency risk. Terms of equity instruments are reviewed to determine whether or not they contain embedded derivative instruments that are required under ASC 815 to be accounted for separately from the host contract, and recorded on the balance sheet at fair value. The fair value of derivative liabilities, if any, is required to be revalued at each reporting date, with corresponding changes in fair value recorded in current period operating results. Pursuant to ASC 815, an evaluation of specifically identified conditions is made to determine whether the fair value of warrants issued is required to be classified as equity or as a derivative liability.

Fair Value of Financial Instruments

The Company's financial instruments are recorded at fair value. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The valuation techniques are based on observable and unobservable inputs. Observable inputs reflect readily obtainable data from independent sources, while unobservable inputs reflect certain market assumptions. There are three levels of inputs that may be used to measure fair value:

- Level 1 – Valuation based on quoted market prices in active markets for identical assets and liabilities.
- Level 2 – Valuation based on quoted market prices for similar assets and liabilities in active markets.
- Level 3 – Valuation based on unobservable inputs that are supported by little or no market activity, therefore requiring management's best estimate of what market participants would use as fair value.

Fair value estimates discussed herein are based upon certain market assumptions and pertinent information available to management. The Company does not have any Level 1 or 2 financial assets or liabilities. The Company's Level 3 financial liabilities measured at fair value consisted of its acquisition cost liability (see Note 2) and a warrant liability (see Note 3) as of June 30, 2016. Significant unobservable inputs used in the fair value measurement of the warrants include the estimated term and risk-adjusted interest rates. In developing our credit risk assumption used in the fair value of warrants, consideration was made of publicly available bond rates and US Treasury Yields. However, since the Company does not have a formal credit-standing, management estimated its standing among various reported levels and grades for use in the model. During all periods, management estimated that the Company's standing was in the speculative to high-risk grades (BB- to CCC in the Standard and Poor's Rating). Significant increases or decreases in the estimated remaining period to exercise or the risk-adjusted interest rate could result in a significantly lower or higher fair value measurement.

IZEA, Inc.

Notes to the Unaudited Consolidated Financial Statements

The respective carrying value of certain on-balance-sheet financial instruments approximated their fair values due to the short-term nature of these instruments. These financial instruments include cash and cash equivalents, accounts receivable, accounts payable, unearned revenue and accrued expenses. Unless otherwise disclosed, the fair value of the Company's capital lease obligations approximate their carrying value based upon current rates available to the Company.

Stock-Based Compensation

Stock-based compensation cost related to stock options granted under the 2011 Equity Incentive Plan and 2011 B Equity Incentive Plan (together, the "2011 Equity Incentive Plans") (see Note 5) is measured at the grant date, based on the fair value of the award, and is recognized as a straight-lined expense over the employee's requisite service period. The Company estimates the fair value of each option award on the date of grant using a Black-Scholes option-pricing model that uses the assumptions noted in the table below. The Company estimates the fair value of its common stock using the closing stock price of its common stock on the date of the option award. The Company estimates the volatility of its common stock at the date of grant based on the volatility of comparable peer companies that are publicly traded and have had a longer trading history than itself. The Company determines the expected life based on historical experience with similar awards, giving consideration to the contractual terms, vesting schedules and post-vesting forfeitures. The Company uses the risk-free interest rate on the implied yield currently available on U.S. Treasury issues with an equivalent remaining term approximately equal to the expected life of the award. The Company has never paid any cash dividends on its common stock and does not anticipate paying any cash dividends in the foreseeable future. The Company used the following assumptions for options granted under the 2011 Equity Incentive Plans during the three and six months ended June 30, 2016 and 2015:

	Three Months		Six Months	
	Ended	Ended	Ended	Ended
2011 Equity Incentive Plans Assumptions	June 30, 2016	June 30, 2015	June 30, 2016	June 30, 2015
Expected term	6 years	6 years	6 years	6 years
Weighted average volatility	52.39%	55.17%	52.54%	57.06%
Weighted average risk free interest rate	1.42%	1.58%	1.52%	1.53%
Expected dividends	—	—	—	—

The Company estimates forfeitures when recognizing compensation expense and this estimate of forfeitures is adjusted over the requisite service period based on the extent to which actual forfeitures differ, or are expected to differ, from such estimates. Changes in estimated forfeitures are recognized through a cumulative catch-up adjustment, which is recognized in the period of change, and a revised amount of unamortized compensation expense to be recognized in future periods. Average expected forfeiture rates were 13.99% and 8.14% during the three months ended June 30, 2016 and 2015, respectively. Average expected forfeiture rates were 12.20% and 11.68% during the six months ended June 30, 2016 and 2015, respectively.

Non-Employee Stock-Based Payments

The Company's accounting policy for equity instruments issued to consultants and vendors in exchange for goods and services follows the provisions of ASC 505, "Equity-Based Payments to Non-Employees." The measurement date for the fair value of the equity instruments issued is determined at the earlier of (i) the date at which a commitment for performance by the consultant or vendor is reached or (ii) the date at which the consultant or vendor's performance is complete. The fair value of equity instruments issued to consultants that vest immediately is expensed when issued. The fair value of equity instruments issued to consultants that have future vesting and are subject to forfeiture if performance does not occur is recognized as expense over the vesting period. Fair values for the unvested portion of issued instruments are adjusted each reporting period. The change in fair value is recorded to additional paid-in capital. Stock-based payments related to non-employees is accounted for based on the fair value of the related stock or

the fair value of the services, whichever is more readily determinable.

Segment Information

The Company does not identify separate operating segments for management reporting purposes. The results of consolidated operations are the basis on which management evaluates operations and makes business decisions.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

IZEA, Inc.

Notes to the Unaudited Consolidated Financial Statements

Recent Accounting Pronouncements

There are new accounting pronouncements issued by the Financial Accounting Standards Board ("FASB") which are not yet effective.

In May 2014, the FASB issued Accounting Standards Update No. 2014-09, Revenue from Contracts with Customers (ASU 2014-09), which supersedes nearly all existing revenue recognition guidance under U.S. GAAP. The core principle of ASU 2014-09 is to recognize revenues when promised goods or services are transferred to customers in an amount that reflects the consideration to which an entity expects to be entitled for those goods or services. ASU 2014-09 defines a five step process to achieve this core principle and, in doing so, more judgment and estimates may be required within the revenue recognition process than are required under existing U.S. GAAP. The standard is effective for annual periods beginning after December 15, 2017, and interim periods therein, using either of the following transition methods: (i) a full retrospective approach reflecting the application of the standard in each prior reporting period with the option to elect certain practical expedients, or (ii) a retrospective approach with the cumulative effect of initially adopting ASU 2014-09 recognized at the date of adoption (which includes additional footnote disclosures). The Company is currently evaluating the impact of the adoption of ASU 2014-09 on its consolidated financial statements and has not yet determined the method by which it will adopt the standard in the first quarter of 2018.

In March 2016, the FASB issued ASU 2016-08, "Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net)." The amendments in this ASU are intended to improve the operability and understandability of the implementation guidance on principal versus agent considerations by amending certain existing illustrative examples and adding additional illustrative examples to assist in the application of the guidance. The effective date and transition of these amendments is the same as the effective date and transition of ASU 2014-09 stated above.

In April 2016, the FASB issued ASU No. 2016-10, Revenue from Contracts with Customers: Identifying Performance Obligations and Licensing ("ASU 2016-10"). ASU 2016-10 is intended to reduce the cost and complexity of applying the guidance in the FASB's new revenue standard on identifying performance obligations, and is also intended to improve the operability and understandability of the licensing implementation guidance. The effective date for ASU 2016-10 is the same as for ASU 2014-09 stated above.

In February 2016, the FASB issued Accounting Standards Update No. 2016-02, Leases. The new standard establishes a right-of-use (ROU) model that requires a lessee to record a ROU asset and a lease liability on the balance sheet for all leases with terms longer than 12 months. Leases will be classified as either finance or operating, with classification affecting the pattern of expense recognition in the income statement. The new standard is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. A modified retrospective transition approach is required for lessees for capital and operating leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements, with certain practical expedients available. The Company is currently evaluating the impact of the adoption of ASU 2016-02 on its consolidated financial statements.

In June 2016, the FASB issued Accounting Standards Update 2016-13, Financial Instruments - Credit Losses: Measurement of Credit Losses on Financial Instruments. ASU 2016-13 removes the thresholds that companies apply to measure credit losses on financial instruments measured at amortized cost, such as loans, receivables, and held-to-maturity debt securities. Under current U.S. GAAP, companies generally recognize credit losses when it is probable that the loss has been incurred. The revised guidance will remove all current recognition thresholds and will require companies to recognize an allowance for lifetime expected credit losses. Credit losses will be immediately recognized through net income; the amount recognized will be based on the current estimate of contractual cash flows not expected to be collected over the financial asset's contractual term. ASU 2016-13 also amends the credit loss

measurement guidance for available-for-sale debt securities. For public business entities, ASU 2016-13 is effective for financial statements issued for fiscal years and for interim periods within those fiscal years beginning after December 15, 2019. Companies will be required to apply the changes through a cumulative-effect adjustment to their retained earnings as of the beginning of the first reporting period in which the guidance is effective. The Company is currently evaluating the impact that this ASU will have on its consolidated financial statements.

NOTE 2. PURCHASE OF EBYLINE, INC.

On January 30, 2015, the Company purchased all of the outstanding shares of capital stock of Ebyline, Inc. (“Ebyline”) pursuant to the terms of a Stock Purchase Agreement, dated as of January 27, 2015, by and among IZEA, Ebyline and the stockholders of Ebyline for a maximum purchase price to be paid over the next three years of \$8,850,000. Based in Los Angeles, California, Ebyline operates an online marketplace that enables publishers to access a network of over 15,000 content creators ranging from

IZEA, Inc.

Notes to the Unaudited Consolidated Financial Statements

writers to illustrators in 84 countries. Over 2,000 fully vetted individuals in the Ebyline network have professional journalism credentials with backgrounds at well-known media outlets. Ebyline's proprietary workflow is utilized by leading media organizations to obtain the content they need from professional content creators. In addition to publishers, Ebyline is leveraged by brands to produce custom branded content for use on their owned and operated sites, as well as third party content marketing and native advertising efforts.

Purchase Price and Acquisition Costs Payable

	Estimated Gross Purchase Consideration 1/30/2015	Initial Present and Fair Value 1/30/2015	Remaining Present and Fair Value 6/30/2016
Cash paid at closing	\$ 1,200,000	\$ 1,200,000	\$ —
Guaranteed purchase price (a)	2,127,064	1,982,639	911,904
Contingent performance payments (b)	2,210,000	1,834,300	—
Acquisition costs to be paid by Ebyline shareholders (c)	—	—	—
Total estimated consideration	\$ 5,537,064	\$ 5,016,939	\$ 911,904
Current portion of acquisition costs payable			911,904
Long term portion of acquisition costs payable			—
Total acquisition costs payable			\$ 911,904

The Stock Purchase Agreement required a \$1,200,000 cash payment at closing, a \$250,000 stock payment on July 30, 2015 and a cash or stock payment of up to an additional \$1,900,000 (subject to proportional reduction in the event Ebyline's final 2014 revenue was below \$8,000,000). Ebyline's final gross revenue for 2014 was \$7,903,429. As such, the additional amount owed became \$1,877,064 to be paid in two equal installments of \$938,532 on January 30, 2016 and January 30, 2017. This guaranteed purchase price consideration was discounted to present value using our borrowing rate of prime plus 2% (5.25%). Interest expense imputed on the acquisition costs (a) payable in the accompanying consolidated statements of operations was \$11,412 and \$28,651 for the three months ended June 30, 2016 and 2015, respectively. Interest expense imputed on the acquisition costs payable in the accompanying consolidated statements of operations was \$26,725 and \$43,789 for the six months ended June 30, 2016 and 2015, respectively. Per the Stock Purchase Agreement, the Company issued 31,821 shares of its common stock valued at \$250,000 to satisfy a portion of the guaranteed purchase price payment obligation on July 30, 2015. On January 29, 2016, the Company issued 114,398 shares of common stock valued at \$848,832 to satisfy the annual installment payment of \$938,532 less \$89,700 in closing related expenses (see item (c) below).

(b) Total contingent performance payments up to \$5,500,000 are to be paid based on Ebyline meeting certain revenue targets. The performance payments are to be made only if Ebyline achieves at least 90% of Content Revenue targets of \$17,000,000 in 2015, \$27,000,000 in 2016 and \$32,000,000 in 2017. The fair value of the \$5,500,000 of contingent performance payments was calculated using a Monte-Carlo simulation to simulate revenue over the next three years. Since the contingent consideration has an option like structure, a risk-neutral framework is considered appropriate for the valuation. The Company started with a risk-adjusted measure of forecasted revenue (using a risk-adjusted discount rate of 8.5%) and assumed it will follow geometric brownian motion to simulate the revenue at future dates. Once the initial revenue was estimated based off of projections made during the acquisition, payout was calculated for each year and present valued to incorporate the credit risk associated with these payments. The Company's initial value conclusion was based on the average payment from 100,000 simulation trials. The volatility used for the simulation was 35%. The Monte Carlo simulation resulted in a calculated fair value of contingent performance payments of \$2,210,000 on January 30, 2015. Because the contingent performance

payments are subject to a 17% reduction related to the continued employment of certain key employees, ASC 805-10-55-25 indicates that a portion of these payments be treated as potential compensation to be accrued over the term rather than allocated to the purchase price. Therefore, the Company reduced its overall purchase price consideration by \$357,700 and recorded the initial present value of the contingent performance payments at \$1,834,300. Based on actual results for 2015 and current projections for Content Revenue for 2016-2017, the Content Revenue for every year is expected to be below 90% of the required Content Revenues targets. Therefore, the Company reduced the fair value of contingent performance payments to zero by the end of 2015. The gain as a result of the decrease in the estimated fair value of

IZEA, Inc.

Notes to the Unaudited Consolidated Financial Statements

contingent performance payments was recorded as a reduction of general and administrative expense in the Company's consolidated statement of operations during the year ended December 31, 2015.

According to the stock purchase agreement, \$89,700 in closing related expenses paid by Ebyline during the (c) acquisition process are to be paid by the selling shareholders. These costs were deducted from the guaranteed payment on January 30, 2016.

Purchase Price Allocation

The final allocation of the purchase price as of January 30, 2015 is summarized as follows:

	Final Purchase Price Allocation
Current assets	\$738,279
Property and equipment	27,194
Identifiable intangible assets	2,370,000
Goodwill	2,468,289
Security deposits	18,553
Current liabilities	(605,376)
Total estimated consideration	\$5,016,939

There are many synergies between the business operations of Ebyline and IZEA including a database of creators that can provide content and advertising and synergies between our online marketplaces that appeal to customers on both sides. The Ebyline operations are included in the consolidated financial statements beginning on the date of acquisition of January 30, 2015. The Ebyline operations contributed revenue of \$4,837,103 and gross profit of \$1,058,525 in the consolidated statement of operations for the six months ended June 30, 2016 and revenue of \$3,531,005 and gross profit of \$381,394 in the consolidated statement of operations during the five months from January 31, 2015 through June 30, 2015.

The following unaudited pro forma summary presents consolidated information of IZEA, Inc. as if the business combination with Ebyline had occurred on January 1, 2014:

	Proforma Six Months Ended 6/30/2015
Pro-Forma Revenue	\$9,473,350
Pro-Forma Cost of Sales	6,008,997
Pro-Forma Gross Profit	3,464,353
Pro-Forma Net Loss	(6,346,368)

IZEA did not have any material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. The pro forma revenue and earnings calculations have been calculated after applying the Company's accounting policies on revenue recognition and adjusting the results to reflect the additional depreciation and amortization that would have been charged assuming the fair value adjustments to property and equipment and intangible assets had been applied from January 1, 2014. The Company incurred \$87,906 in acquisition-related costs which are included in general and administrative expense on the Company's consolidated statement of operations for the six months ended June 30, 2015. These costs are reflected in pro forma earnings for the six months ended June 30, 2015.

NOTE 3. DERIVATIVE FINANCIAL INSTRUMENTS

The Company evaluates its warrants or other contracts to determine if those contracts or embedded components of those contracts qualify as derivatives to be separately accounted for in accordance with paragraph 810-10-05-4 and 815-40-25 of the FASB Accounting Standards Codification. The result of this accounting treatment is that the fair value of the derivative is marked-to-market each balance sheet date and recorded as a liability. In the event that the fair value is recorded as a liability, the change in fair value is recorded in the consolidated statement of operations as other income or expense. Upon registration of the shares,

13

changes in price-based anti-dilution adjustments, conversion or exercise, as applicable, of a derivative instrument, the instrument is marked to fair value at the date of the occurrence of the event and then that fair value is reclassified to equity.

The classification of derivative instruments, including whether such instruments should be recorded as liabilities or as equity, is re-assessed at the end of each reporting period. Instruments that are initially classified as equity that become subject to reclassification are reclassified to a liability at the fair value of the instrument on the reclassification date. Derivative instrument liabilities will be classified in the balance sheet as current or non-current based on whether or not net-cash settlement of the derivative instrument is expected within 12 months after the balance sheet date.

The following table summarizes the Company's activity and fair value calculations of its derivative warrants for the year ended December 31, 2015 and six months ended June 30, 2016:

	Linked Common Shares to Derivative Warrants	Warrant Liability
Balance, December 31, 2014	1,795,564	\$ 3,203,465
Exercise of warrants for common stock	(1,392,832)	(5,348,408)
Loss on exchange of warrants	—	1,197,821
Reclassification of fair value of 2014 Private Placement warrants to equity	(396,536)	(1,181,638)
Change in fair value of derivatives	—	2,133,820
Balance, December 31, 2015	6,196	5,060
Expiration of warrants	(680)	—
Change in fair value of derivatives	—	(3,729)
Balance, June 30, 2016	5,516	\$ 1,331

During the three months ended June 30, 2016 and 2015, the Company recorded a gain of \$877 and \$250,507, respectively, due to the change in the fair value of its warrant liability. During the six months ended June 30, 2016 and 2015, the Company recorded a gain of \$3,729 and a loss of \$2,255,444, respectively, due to the change in the fair value of its warrant liability.

The Company's warrants were valued on the applicable dates using a Binomial Lattice Option Valuation Technique ("Binomial"). Significant inputs into this technique as of December 31, 2015 and June 30, 2016 were as follows:

Binomial Assumptions	December 31, June 30,	
	2015	2016
Fair market value of asset ⁽¹⁾	\$7.66	\$7.62
Exercise price	\$25.00	\$25.00
Term ⁽²⁾	1.7 years	1.2 years
Implied expected life ⁽³⁾	1.7 years	1.2 years
Volatility range of inputs ⁽⁴⁾	83.00%	70.09%
Equivalent volatility ⁽³⁾	83.00%	70.09%
Risk-free interest rate range of inputs ⁽⁵⁾	1.06%	0.45%

Equivalent risk-free interest rate ⁽³⁾ 1.06% 0.45%

(1) The fair market value of the asset was determined by using the Company's closing stock price as reflected in the OTCQB for the period ended December 31, 2015 and the Nasdaq Capital Market for the period ended June 30, 2016.

(2) The term is the contractual remaining term, allocated among twelve equal intervals for purposes of calculating other inputs, such as volatility and risk-free rate.

(3) The implied expected life, and equivalent volatility and risk-free interest rate amounts are derived from the binomial.

(4) The Company does not have a market trading history upon which to base its forward-looking volatility.

Accordingly, the Company selected peer companies that provided a reasonable basis upon which to calculate volatility for each of the intervals described in (2), above.

(5) The risk-free rates used for inputs represent the yields on zero coupon U.S. Government Securities with periods to maturity consistent with the intervals described in (2), above.

NOTE 4. COMMITMENTS & CONTINGENCIES

Litigation

From time to time, the Company may become involved in various lawsuits and legal proceedings that arise in the ordinary course of business. Litigation is, however, subject to inherent uncertainties, and an adverse result in these or other matters may harm the Company's business. The Company is currently not aware of any legal proceedings or claims that it believes would or could have, individually or in the aggregate, a material adverse effect on its operations or financial position.

NOTE 5. STOCKHOLDERS' EQUITY

Authorized Shares

The Company has 200,000,000 authorized shares of common stock and 10,000,000 authorized shares of preferred stock, each with a par value of \$0.0001 per share.

Reverse Stock Split

On January 6, 2016, the Company filed a Certificate of Amendment with the Secretary of State of Nevada to effect a reverse stock split of the issued and outstanding shares of its common stock at a ratio of one share for every 20 shares outstanding prior to the effective date of the reverse stock split. All current and historical information contained herein related to the share and per share information for the Company's common stock or stock equivalents reflects the 1-for-20 reverse stock split of the Company's outstanding shares of common stock that became market effective on January 11, 2016. There was no change in the number of the Company's authorized shares of common stock.

Nasdaq Uplisting

On January 25, 2016, the Company filed a registration statement on Form 8-A to register its securities pursuant to Section 12(b) of the Exchange Act. Thereafter, on January 26, 2016, the Company's shares of common stock commenced trading on the Nasdaq Capital Market under the symbol IZEA. Prior thereto, the Company's common stock was quoted on the OTCQB marketplace under the same symbol.

Stock Issued for Purchases

On January 29, 2016, we issued 114,398 shares of common stock valued at \$848,832 to the former Ebyline stockholders as settlement of our annual installment payment of \$938,532 less \$89,700 in closing related expenses owed as part of our January 2015 Stock Purchase Agreement.

Stock Issued for Services

The Company issued 4,055 shares of restricted common stock valued at \$6,250 to each of its five independent directors for their service as directors of the Company during the first quarter of 2016. On May 16, 2016, the Company issued each of its five independent directors 3,261 shares of restricted common stock valued at \$18,750 for their service as directors of the Company for the period of April 2016 through December 2016. The stock vests in equal increments of approximately 362 shares per month. Total shares issued during the six months ended June 30, 2016 were 20,360 at a total initial value of \$125,000.

On April 11, 2016, we issued 749 shares of restricted common stock valued at \$4,794 to four employees as a contest award.

The following table contains summarized information about nonvested restricted stock outstanding during the six months ended June 30, 2016:

15

Restricted Stock	Common Shares	Weighted Average Grant Date Fair Value	Weighted Average Remaining Years to Vest
Nonvested at December 31, 2015	—	\$ —	
Granted	21,109	6.15	
Vested	(10,234)	7.08	
Forfeited	—	—	
Nonvested at June 30, 2016	10,875	\$ 7.62	0.5

Total expense recognized for stock-based payments for services during the three months ended June 30, 2016 and 2015 was \$41,220 and \$26,041, respectively, all of which is included in general and administrative expense in the consolidated statements of operations. Total expense recognized for stock-based payments for services during the six months ended June 30, 2016 and 2015 was \$72,470 and \$53,491, respectively. The fair value of the services is based on the value of the Company's common stock over the term of service. The Company recognized a gain of \$25,544 as a change in the fair value of derivatives during the three and six months ended June 30, 2016, based on the change between the Company's stock price upon issuance and the Company's stock price upon the date of vesting. Estimated future compensation related to nonvested restricted awards of \$82,867 is expected to be recognized over the remaining individual vesting periods of up to six months. The fair value of the nonvested, but issued, restricted stock as of June 30, 2016 is \$82,867, included in prepaid expenses in the accompanying consolidated balance sheets.

Warrant Transactions

On January 22, 2015, the Company issued a warrant to purchase 5,000 shares of its common stock to an investor relations consultant. The warrant was fully vested on the date of issuance, has an exercise price of \$10.20 per share and expires on January 22, 2020. The fair value of the warrant upon issuance was \$7,700 and the Company received \$100 as compensation for the warrant. The fair value of the warrant issuance was recorded as an increase in additional paid-in capital in the Company's consolidated balance sheet and the net \$7,600 compensation expense was recorded in general and administrative expense during the six months ended June 30, 2015.

Stock Options

In May 2011, the Board of Directors adopted the 2011 Equity Incentive Plan of IZEA, Inc. (the "May 2011 Plan"). The May 2011 Plan allows the Company to grant options to purchase up to 1,000,000 shares as an incentive for its employees and consultants. As of June 30, 2016, the Company had 98,774 shares of common stock available for future grants under the May 2011 Plan.

On August 22, 2011, the Company adopted the 2011 B Equity Incentive Plan (the "August 2011 Plan") reserving for issuance an aggregate of 4,375 shares of common stock under the August 2011 Plan. As of June 30, 2016, the Company had no shares of common stock available for future grants under the August 2011 Plan.

Under both the May 2011 Plan and the August 2011 Plan (together, the "2011 Equity Incentive Plans"), the Board of Directors determines the exercise price to be paid for the shares, the period within which each option may be exercised, and the terms and conditions of each option. The exercise price of the incentive and non-qualified stock options may not be less than 100% of the fair market value per share of the Company's common stock on the grant date. If an individual owns stock representing more than 10% of the outstanding shares, the price of each share of an incentive stock option must be equal to or exceed 110% of fair market value. Unless otherwise determined by the Board of Directors at the time of grant, the right to purchase shares covered by any options under the 2011 Equity Incentive Plans typically vest on a straight-line basis over the requisite service period as follows: 25% of options shall vest one year from the date of grant and the remaining options shall vest monthly, in equal increments over the

following three years. The term of the options is up to ten years. The Company issues new shares to the optionee for any stock awards or options exercised pursuant to its equity incentive plans.

A summary of option activity under the 2011 Equity Incentive Plans for the year ended December 31, 2015 and six months ended June 30, 2016, is presented below:

16

Options Outstanding	Common Shares	Weighted Average Exercise Price	Weighted Average Remaining Life (Years)
Outstanding at December 31, 2014	595,786	\$ 9.20	6.5
Granted	277,059	7.43	
Exercised	—	—	
Forfeited	(42,246)	7.70	
Outstanding at December 31, 2015	830,599	\$ 8.65	6.8
Granted	76,917	6.84	
Exercised	—	—	
Forfeited	(18,345)	11.08	
Outstanding at June 30, 2016	889,171	\$ 8.45	6.5
Exercisable at June 30, 2016	463,109	\$ 9.76	5.8

During the three and six months ended June 30, 2016 and 2015, no options were exercised. The fair value of our common stock on June 30, 2016 was \$7.62 per share. The intrinsic value on outstanding options as of June 30, 2016 was \$1,149,482. The intrinsic value on exercisable options as of June 30, 2016 was \$784,073.

A summary of the nonvested stock option activity under the 2011 Equity Incentive Plans for the year ended December 31, 2015 and six months ended June 30, 2016, is presented below:

Nonvested Options	Common Shares	Weighted Average Grant Date Fair Value	Weighted Average Remaining Years to Vest
Nonvested at December 31, 2014	372,092	\$ 4.00	3.0
Granted	277,059	3.84	
Vested	(147,759)	4.32	
Forfeited	(39,466)	3.44	
Nonvested at December 31, 2015	461,926	\$ 3.84	2.8
Granted	76,917	3.44	
Vested	(95,864)	4.24	
Forfeited	(16,917)	4.08	
Nonvested at June 30, 2016	426,062	\$ 3.68	2.8

Stock-based compensation cost related to stock options granted under the 2011 Equity Incentive Plans is measured at the grant date, based on the fair value of the award, and is recognized as an expense over the employee's requisite service period. The Company estimates the fair value of each option award on the date of grant using a Black-Scholes option-pricing model that uses the assumptions stated in Note 1. Total stock-based compensation expense recognized on awards outstanding during the three months ended June 30, 2016 and 2015 was \$200,354 and \$180,413, respectively. Total stock-based compensation expense recognized on awards outstanding during the six months ended June 30, 2016 and 2015 was \$405,326 and \$322,744, respectively. Stock-based compensation expense was recorded as \$24,247 to sales and marketing and \$176,107 to general and administrative expense in the Company's consolidated statement of operations during the three months ended June 30, 2016 and \$44,515 to sales and marketing and \$360,811 to general and administrative expense in the Company's consolidated statement of operations during the six months ended June 30, 2016. Stock-based compensation expense was recorded as \$180,413 and \$322,744 to general and administrative expense in the Company's consolidated statement of operations during the three and six months

ended June 30, 2015. Future compensation related to nonvested awards expected to vest of \$1,369,348 is estimated to be recognized over the weighted-average vesting period of approximately three years.

Employee Stock Purchase Plan

On April 16, 2014, stockholders holding a majority of the Company's outstanding shares of common stock, upon previous recommendation and approval of the Board of Directors, adopted the IZEA, Inc. 2014 Employee Stock Purchase Plan (the "ESPP") and reserved 75,000 shares of the Company's common stock for issuance thereunder. Any employee regularly employed by the

Company for 90 days or more on a full-time or part-time basis (20 hours or more per week on a regular schedule) is eligible to participate in the ESPP. The ESPP operates in successive six month offering periods commencing at the beginning of each fiscal year half. Each eligible employee who elects to participate may purchase up to 10% of their annual compensation in common stock not to exceed \$21,250 annually or 1,000 shares per offering period. The purchase price will be the lower of (i) 85% of the fair market value of a share of common stock on the first trading day of the offering period or (ii) 85% of the fair market value of a share of common stock on the last trading day of the offering period. The ESPP will continue until January 1, 2024, unless otherwise terminated by the Board. Employees paid \$34,587 to purchase 5,340 shares of common stock during the six months ended June 30, 2016. As of June 30, 2016, the Company had 55,875 remaining shares of common stock available for future grants under the ESPP.

NOTE 6. EARNINGS (LOSS) PER COMMON SHARE

Basic earnings (loss) per common share is computed by dividing the net income or loss by the basic weighted-average number of shares of common stock outstanding during each period presented. Diluted earnings per share is computed by dividing the net income or loss by the total of the basic weighted-average number of shares of common stock outstanding plus the additional dilutive securities that could be exercised or converted into common shares during each period presented less the amount of shares that could be repurchased using the proceeds from the exercises.

	Three Months Ended		Six Months Ended	
	June 30,	June 30,	June 30,	June 30,
	2016	2015	2016	2015
Net loss	\$(1,626,345)	\$(1,985,291)	\$(4,218,965)	\$(6,256,203)
Weighted average shares outstanding - basic and diluted	5,350,128	2,885,721	5,320,962	2,885,305
Basic and diluted loss per common share	\$(0.30) \$(0.69) \$(0.79) \$(2.17

The Company excluded the following weighted average items from the above computation of diluted loss per common share as their effect would be anti-dilutive:

	Three Months Ended		Six Months Ended	
	June 30,	June 30,	June 30,	June 30,
	2016	2015	2016	2015
Stock options	876,285	723,602	859,040	683,387
Warrants	557,849	2,702,137	546,251	2,701,530
Restricted stock units	—	88,125	—	86,778
Total excluded shares	1,434,134	3,513,864	1,405,291	3,471,695

NOTE 7. SUBSEQUENT EVENTS

No material events have occurred after June 30, 2016 that require recognition or disclosure in the financial statements except as follows:

Effective July 31, 2016, the Company purchased all of the outstanding shares of capital stock of ZenContent, Inc., pursuant to the terms of a Stock Purchase Agreement, dated as of July 31, 2016, by and among IZEA, ZenContent and the stockholders of ZenContent.

The aggregate consideration at closing for the acquisition of ZenContent consisted of (a) a cash payment of \$400,000 and (b) the issuance of 86,207 shares of the Company's common stock valued at \$600,000 (using the 30 trading-day volume-weighted average closing price of the Company's common stock of \$6.96 per share as of July 29, 2016). The aggregate consideration also consists of (i) three equal annual installment payments totaling \$1,000,000, commencing 12 months following the closing, subject to a customary closing date working capital adjustment, and (ii) contingent

performance payments of up to an aggregate of \$2,500,000 over the three 12-month periods following the closing, based upon ZenContent achieving certain minimum revenue thresholds. ZenContent revenues exceeded \$2.0 million in 2015. ZenContent is required to meet minimum revenues of \$2.5 million, \$3.5 million and \$4.5 million in the first, second and third, respective 12-month periods following the closing in order to receive any portion of the contingent performance payments. Of these payments, 33% of each such annual installment or contingent

IZEA, Inc.

Notes to the Unaudited Consolidated Financial Statements

performance payment will be in the form of cash and the remainder of such payment will be in the form of either cash or additional shares of the Company's common stock at then average stock prices (determined at the Company's option). These payments are also subject to downward adjustment if the Company's employment of Brianna DeMike, ZenContent's co-founder and head of Business Operations and Product, is terminated by the Company for cause or by Ms. DeMike without good reason. In order to comply with NASDAQ Market Rules, in no event will the Company be obligated to issue such number of shares equal to or more than 19.9% of its outstanding shares of common stock, determined prior to the closing.

Based in Mountain View, California, ZenContent offers a content marketing technology platform that creates high volume original content for businesses. ZenContent services a strong base of Fortune 500 e-commerce customers, amongst others. ZenContent customers have access to its network of more than 5,000 content creators for large-scale asset production. ZenContent's proprietary tools ingest full product databases, source creators and provide quality assurance for content projects, making product listings friendlier for consumers and more indexable for search. Outside of e-commerce, ZenContent also works with leading online publishers for the production of articles and text updates, including a real-time application programming interface that enables production of assets for rapid publishing of news stories and augmentation of consumer content. Online publishers use ZenContent's technology to quickly respond to questions submitted by website users, as well as to expand the universe of content available to their readers.

The ZenContent acquisition broadens the Company's content client base with higher margin e-commerce companies and online publishers. Due to the recent closing date, the Company is still in the process of completing its acquisition-date fair value calculations in order to properly account for the value of the total consideration transferred, the acquisition date fair values of assets acquired and liabilities assumed in the acquisition, along with the residual goodwill that will be recognized for the excess purchase price over the over the fair value of the underlying assets acquired and liabilities assumed.

ITEM 2 – MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Special Note Regarding Forward-Looking Information

The following discussion and analysis is provided to increase the understanding of, and should be read in conjunction with, our consolidated financial statements and related notes included elsewhere in this report. Historical results and percentage relationships among any amounts in these financial statements are not necessarily indicative of trends in operating results for any future period. This report contains “forward-looking statements.” The statements, which are not historical facts contained in this report, including this Management’s Discussion and Analysis of Financial Condition and Results of Operations, and notes to our consolidated financial statements, particularly those that utilize terminology such as “may,” “would,” “could,” “should,” “should,” “expects,” “anticipates,” “estimates,” “believes,” “intends,” comparable terminology are forward-looking statements. Such statements are based on currently available operating, financial and competitive information, and are subject to various risks and uncertainties. Future events and our actual results may differ materially from the results reflected in these forward-looking statements. Factors that might cause such a difference include, but are not limited to, our ability to raise additional funding, our ability to maintain and grow our business, variability of operating results, our ability to maintain and enhance our brand, our development and introduction of new products and services, the successful integration of acquired companies, technologies and assets into our portfolio of software and services, marketing and other business development initiatives, competition in the industry, general government regulation, economic conditions, dependence on key personnel, the ability to attract, hire and retain personnel who possess the technical skills and experience necessary to meet the service requirements of our clients, our ability to protect our intellectual property, the potential liability with respect to actions taken by our existing and past employees, risks associated with international sales, and other risks described herein and in our other filings with the SEC.

All forward-looking statements in this document are based on our current expectations, intentions and beliefs using information currently available to us as of the date of this report, and we assume no obligation to update any forward-looking statements, except as required by law. Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the actual results to differ materially from any future results, performance or achievements expressed or implied by such forward-looking statements.

Company History

IZEA was founded in February 2006 under the name PayPerPost, Inc. and became a public company incorporated in the state of Nevada in May 2011. We are headquartered near Orlando, Florida with additional offices in Chicago, Los Angeles Mountain View and Toronto and a sales presence in New York, Detroit and Boston.

Company Overview

IZEA operates online marketplaces that facilitate transactions between brands and influential content creators. Our creators range from leading bloggers and social media personalities to A-list celebrities and professional journalists. These creators are compensated by IZEA for producing and distributing unique content such as long-form text, videos, photos and status updates on behalf of brands through websites, blogs and social media channels. Brands receive influential consumer content and engaging, shareable stories that drive awareness.

We help power the creator economy, allowing everyone from college students and stay at home moms to celebrities the opportunity to monetize their content, creativity and influence. Marketers benefit from buzz, traffic, awareness and sales, and creators earn cash compensation in exchange for their work and promotion.

Our online marketplaces are powered by the IZEA Exchange (“IZEAx”). Our technology enables transactions to be completed at scale through the management of content workflow, creator search and targeting, bidding, analytics and payment processing. IZEAx is designed to provide a unified ecosystem that enables the creation of multiple types of content including blog posts, status updates, videos and photos through a wide variety of social channels including blogs, Twitter, Facebook, Instagram and Tumblr, among others.

We derive revenue from three sources: revenue from a marketer when it pays for a social media publisher or influencer such as a blogger or tweeter to share sponsored content with their social network audience ("Sponsored Revenue"), revenue when a publisher or company purchases custom branded content for its own use, as well as third party content marketing and native advertising efforts ("Content Revenue") and revenue derived from various service and license fees charged to users of our platforms ("Service Fee Revenue").

Non-GAAP Financial Measures

To supplement our consolidated financial statements presented in accordance with generally accepted accounting principles in the United States ("GAAP"), we consider certain financial measures that are not prepared in accordance with GAAP, including Adjusted EBITDA. These non-GAAP financial measures are not based on any standardized methodology prescribed by GAAP. These non-GAAP financial measures should not be considered in isolation from, or as a substitute for, financial information prepared in accordance with GAAP.

We believe that Adjusted EBITDA provides useful information to investors as it excludes transactions not related to the core cash operating business activities including non-cash transactions. We believe that excluding these transactions allows investors to meaningfully trend and analyze the performance of our core cash operations. All companies do not calculate EBITDA in the same manner, and Adjusted EBITDA as presented by IZEA may not be comparable to EBITDA presented by other companies. IZEA defines Adjusted EBITDA as earnings or loss before interest, taxes, depreciation and amortization, non-cash stock related compensation, gain or loss on asset disposals or impairment, changes in contingent acquisition costs, and all other income and expense items such as loss on exchanges and changes in fair value of derivatives, if applicable.

Table of Contents

Revenues

The following table breaks down our approximate revenue, cost of sales and gross profit by revenue stream for the three months ended June 30, 2016 and 2015:

	(Unaudited)			
	Three Months Ended			
	June 30,	June 30,	June 30,	June 30,
	2016	2016	2015	2015
Revenue & % of Total				
Sponsored Revenue	\$4,481,000	65 %	\$2,408,000	52 %
Content Revenue	2,339,000	34 %	2,155,000	47 %
Service Fees & Other Revenue	94,000	1 %	65,000	1 %
Total Revenue	\$6,914,000	100 %	\$4,628,000	100 %
Cost of Sales & % of Total				
Sponsored COS	\$1,647,000	48 %	\$1,001,000	34 %
Content COS	1,772,000	52 %	1,917,000	66 %
Service Fees & Other COS	—	— %	—	— %
Total Cost of Sales	\$3,419,000	100 %	\$2,918,000	100 %
Gross Profit & Profit %				
Sponsored Revenue	\$2,834,000	63 %	\$1,407,000	58 %
Content Revenue	567,000	24 %	238,000	11 %
Service Fees & Other Revenue	94,000	100 %	65,000	100 %
Total Profit	\$3,495,000	51 %	\$1,710,000	37 %

Revenues for the three months ended June 30, 2016 increased by \$2,285,947, or 49%, compared to the same period in 2015. Sponsored Revenue increased \$2,073,000, Content Revenue increased \$184,000 and Service Fee Revenue increased \$29,000 during the three months ended June 30, 2016 compared to the same period in 2015. Sponsored Revenue increased primarily due to our larger sales force, concentrated sales efforts toward larger IZEA managed campaigns rather than smaller marketer self-service campaigns and generating repeat business from existing customers. Content Revenue increased due to the same reasons as Sponsored Revenue. Service Fee Revenue increased in the three months ended June 30, 2016 due to more licensing fees generated from the white-label partners in IZEAx.

Our net bookings of \$6.8 million for the three months ended June 30, 2016 were 10% higher than the net bookings of \$6.2 million for the three months ended June 30, 2015. Net bookings is a measure of sales orders minus any cancellations or refunds in a given period. Management uses net bookings as a leading indicator of future revenue recognition as revenue is recognized on average within 120 days of booking, though larger contracts may be recognized over twelve months from the original booking date. We experienced higher bookings as a result of the Ebyline acquisition, new customers, larger IZEA managed campaigns and an increase in repeat clients. These bookings are expected to continue to translate into higher revenue in 2016 as compared to 2015.

Cost of Sales and Gross Profit

Our cost of sales is comprised primarily of amounts paid to our content creators to provide content or advertising services through the pushing of sponsored content through a blog post, tweet, click or action.

Cost of sales for the three months ended June 30, 2016 increased by \$501,027, or 17%, compared to the same period in 2015. Cost of sales increased primarily due to the increase in our sales, but it was tempered by the improved

margins on our managed services.

Gross profit for the three months ended June 30, 2016 increased by \$1,784,920, or 104%, compared to the same period in 2015. Our gross profit as a percentage of revenue increased from 37% for the three months ended June 30, 2015 to 51% for

22

Table of Contents

the same period in 2016. Sponsored Revenue gross margin was 63% and Content Revenue gross margin was 24% for the three months ended June 30, 2016.

The gross profit increase was primarily attributable to increased use of our managed services versus self-service content and sponsored social offerings. Prior to being acquired by IZEA, Ebyline generated Content Revenue primarily from newspaper and traditional publishers through their workflow platform on a self-service basis at a 7% to 9% profit. After the acquisition, these customers still produce a significant amount of revenue, but we are increasing the sales of Content Revenue to customers on a managed basis and expect to see continued improvement in the Content Revenue margins. The mix of sales between our higher margin Sponsored Revenue and our lower margin Content Revenue (particularly the self-service workflow portion of this revenue) has a significant effect on our overall gross profit percentage.

For the three months ended June 30, 2016, managed services were 32% of Content Revenue compared to 12% for the three months ended June 30, 2015. Additionally, the margins on the managed portion of Content Revenue increased by 23 percentage points for the three months ended June 30, 2016 as we incorporated our standard pricing guidelines into new bookings that were closed in fourth quarter of fiscal 2015.

Operating Expenses

Operating expenses consist of general and administrative expenses and sales and marketing expenses. Total operating expenses for the three months ended June 30, 2016 increased by \$1,226,531, or 31%, compared to the same period in 2015. The increase was primarily attributable to increased personnel costs and additional overhead resulting from increased personnel.

General and administrative expenses consist primarily of administrative and engineering personnel costs, general operating costs, public company costs, including non-cash stock compensation, facilities costs, insurance, depreciation, professional fees, and investor relations costs. General and administrative expense for the three months ended June 30, 2016 increased by \$360,366, or 17%, compared to the same period in 2015. The increase was primarily attributable to a \$379,000 increase in personnel costs and an \$84,000 increase in variable costs related to personnel such as software and subscription costs, communication, travel and supply costs. These costs increased as a result of an increase of 44% in the average number of our administrative and engineering personnel compared to the prior year period average along with increased costs for those personnel. Increased personnel costs are expected to continue in 2016 due to planned growth in the total number of administrative and engineering personnel needed to handle our growing organization. The increase in general and administrative expenses is also attributable to a \$73,000 increase in depreciation and amortization expense as a result of the amortization of software development costs for IZEA Exchange (IZEAx) and the Ebyline intangible assets acquired; a \$17,000 increase in contractor expense for outsourced engineering projects; and a \$16,000 increase in rent for our facilities and an additional office in Canada. Legal fees decreased by \$216,000 from the prior year period due to the settlement of our patent litigation in August 2015 that is not recurring in 2016.

Sales and marketing expenses consist primarily of personnel costs related to employees and consultants who support sales and marketing efforts, promotional and advertising costs and trade show expenses. Sales and marketing expenses for the three months ended June 30, 2016 increased by \$866,165 or 50%, compared to the same period in 2015. The increase was primarily attributable to a \$636,000 increase in personnel costs and a \$66,000 increase in variable costs related to personnel such as software and subscription costs, communication, travel and supply costs. These increases are the result of a 20% increase in the number of our sales and marketing personnel since the prior year along with a \$62,000 increase in commission expense as a result of the increase in customer bookings. Sales and marketing expenses also increased \$41,000 in contractor expenses and \$106,000 as a result of increased trade show activity and advertising.

Other Income (Expense)

Other income (expense) consists primarily of interest expense, loss on exchange of warrants and the change in the fair value of derivatives.

Interest expense during the three months ended June 30, 2016 decreased by \$24,982 to \$11,411 compared to the same period in 2015 primarily due to lower imputed interest on the acquisition costs payable.

In prior years, we entered into financing transactions that gave rise to derivative liabilities. These financial instruments are carried at fair value in our financial statements. Changes in the fair value of derivative financial instruments are required to be recorded in other income (expense) in the period of change. We recorded a gain of \$26,421 and \$250,507 resulting from the increase or decrease in the fair value of certain warrants and stock during the three months ended June 30,

Table of Contents

2016 and 2015, respectively. We have no control over the amount of change in the fair value of our derivative instruments as this is a factor based on fluctuating interest rates and stock prices and other market conditions outside of our control. Due to the large exercise of warrants in August 2015, we have less remaining warrants requiring valuation during the year, resulting in lower fluctuations in fair values than amounts recorded during 2015. As of June 30, 2016, we have warrants to purchase 5,516 shares that are required to be fair valued each period. When the price of our stock decreases, it causes the fair value of our warrant liability in our consolidated balance sheets to decrease creating a gain from the change in fair value in our consolidated statement of operations. Alternatively, when the price of our stock increases, it causes the fair value of our warrant liability to increase causing a loss from the change in fair value.

Net Loss

Net loss for the three months ended June 30, 2016 was \$1,626,345, which decreased from a net loss of \$1,985,291 for the same period in 2015. The reduction in net loss was primarily the result of the increased revenue and profit margins partially offset by the increase in operating expenses and reduced gain from the change in the fair value of derivative financial instruments as discussed above.

Results of Operations for the Six Months Ended June 30, 2016 Compared to the Six Months Ended June 30, 2015

	(Unaudited)			
	Six Months Ended			
	June 30,	June 30,	\$ Change	%
	2016	2015		Change

Non-GAAP Financial Measures

To supplement our consolidated financial statements presented in accordance with generally accepted accounting principles in the United States ("GAAP"), we consider certain financial measures that are not prepared in accordance with GAAP, including Adjusted EBITDA. These non-GAAP financial measures are not based on any standardized methodology prescribed by GAAP. These non-GAAP financial measures should not be considered in isolation from, or as a substitute for, financial information prepared in accordance with GAAP.

We believe that Adjusted EBITDA provides useful information to investors as it excludes transactions not related to the core cash operating business activities including non-cash transactions. We believe that excluding these transactions allows investors to meaningfully trend and analyze the performance of our core cash operations. All

companies do not calculate EBITDA in the same manner, and Adjusted EBITDA as presented by IZEA may not be comparable to EBITDA presented by other companies. IZEA defines Adjusted EBITDA as earnings or loss before interest, taxes, depreciation and amortization, non-cash stock related compensation, gain or loss on asset disposals or impairment, changes in contingent acquisition costs, and all other income and expense items such as loss on exchanges and changes in fair value of derivatives, if applicable.

Table of Contents

Reconciliation of Net Loss to Adjusted EBITDA: (Unaudited)

Revenues

The following table breaks down our approximate revenue, cost of sales and gross profit by revenue stream for the six months ended June 30, 2016 and 2015:

	(Unaudited)			
	Six Months Ended			
	June 30,	June 30,	June 30,	June 30,
	2016	2016	2015	2015
Revenue & % of Total				
Sponsored Revenue	\$7,376,000	60 %	\$5,143,000	59 %
Content Revenue	4,827,000	39 %	3,520,000	40 %
Service Fees & Other Revenue	177,000	1 %	100,000	1 %
Total Revenue	\$12,380,000	100 %	\$8,763,000	100 %
Cost of Sales & % of Total				
Sponsored COS	\$2,741,000	42 %	\$2,209,000	41 %
Content COS	3,779,000	58 %	3,150,000	59 %
Service Fees & Other COS	—	— %	—	— %
Total Cost of Sales	\$6,520,000	100 %	\$5,359,000	100 %
Gross Profit & Profit %				
Sponsored Revenue	\$4,635,000	63 %	\$2,934,000	57 %
Content Revenue	1,048,000	22 %	370,000	11 %
Service Fees & Other Revenue	177,000	100 %	100,000	100 %
Total Profit	\$5,860,000	47 %	\$3,404,000	39 %

Revenues for the six months ended June 30, 2016 increased by \$3,616,403, or 41%, compared to the same period in 2015. Sponsored Revenue increased \$2,233,000, Content Revenue increased \$1,307,000 and Service Fee Revenue increased \$77,000 during the six months ended June 30, 2016 compared to the same period in 2015. Sponsored Revenue increased primarily due to our larger sales force, concentrated sales efforts toward larger IZEA managed campaigns rather than smaller marketer self-service campaigns and generating repeat business from existing customers. Content Revenue increased due to the same reasons as Sponsored Revenue and also because there were six full months of revenue reported in 2016 compared to only five months in 2015 as a result of the Ebyline acquisition on January 30, 2015. Service Fee Revenue increased in the six months ended June 30, 2016 due to more licensing fees generated from the white-label partners in IZEAx.

Our net bookings of \$14.3 million for the six months ended June 30, 2016 were 36% higher than the net bookings of \$10.5 million for the six months ended June 30, 2015. Net bookings is a measure of sales orders minus any cancellations or refunds in a given period. Management uses net bookings as a leading indicator of future revenue recognition as revenue is recognized on average within 120 days of booking, though larger contracts may be recognized over twelve months from the

25

Table of Contents

original booking date. We experienced higher bookings as a result of the Ebyline acquisition, new customers, larger IZEA managed campaigns and an increase in repeat clients. These bookings are expected to continue to translate into higher revenue in 2016 as compared to 2015.

Cost of Sales and Gross Profit

Our cost of sales is comprised primarily of amounts paid to our content creators to provide content or advertising services through the pushing of sponsored content through a blog post, tweet, click or action.

Cost of sales for the six months ended June 30, 2016 increased by \$1,160,905, or 22%, compared to the same period in 2015. Cost of sales increased primarily due to the increase in our sales, but it was tempered by the improved margins on our managed services.

Gross profit for the six months ended June 30, 2016 increased by \$2,455,498, or 72%, compared to the same period in 2015. Our gross profit as a percentage of revenue increased from 39% for the six months ended June 30, 2015 to 47% for the same period in 2016. Sponsored Revenue gross margin was 63% and Content Revenue gross margin was 22% for the six months ended June 30, 2016.

The gross profit increase was primarily attributable to increased use of our managed services versus self-service content and sponsored social offerings. Prior to being acquired by IZEA, Ebyline generated Content Revenue primarily from newspaper and traditional publishers through their workflow platform on a self-service basis at a 7% to 9% profit. After the acquisition, these customers still produce a significant amount of revenue, but we are increasing the sales of Content Revenue to customers on a managed basis and expect to see continued improvement in the Content Revenue margins. The mix of sales between our higher margin Sponsored Revenue and our lower margin Content Revenue (particularly the self-service workflow portion of this revenue) has a significant effect on our overall gross profit percentage.

For the six months ended June 30, 2016, managed services were 32% of Content Revenue compared to 11% for the six months ended June 30, 2015. Additionally, the margins on the managed portion of Content Revenue increased by sixteen percentage points for the six months ended June 30, 2016 as we incorporated our standard pricing guidelines into new bookings that were closed in fourth quarter of fiscal 2015.

Operating Expenses

Operating expenses consist of general and administrative expenses and sales and marketing expenses. Total operating expenses for the six months ended June 30, 2016 increased by \$2,724,194, or 37%, compared to the same period in 2015. The increase was primarily attributable to increased personnel costs and additional overhead resulting from increased personnel.

General and administrative expenses consist primarily of administrative and engineering personnel costs, general operating costs, public company costs, including non-cash stock compensation, facilities costs, insurance, depreciation, professional fees, and investor relations costs. General and administrative expense for the six months ended June 30, 2016 increased by \$1,079,853, or 27%, compared to the same period in 2015. The increase was primarily attributable to a \$732,000 increase in personnel costs, a \$134,000 increase in variable costs related to personnel such as software and subscription costs, communication, travel and supply costs. These costs increased as a result of an increase in the average number of our administrative and engineering personnel by 41% since the prior year period along with increased costs for those personnel. Increased personnel costs are expected to continue in 2016 due to planned growth in the total number of administrative and engineering personnel needed to handle our growing organization. The increase in general and administrative expenses is also attributable to a \$195,000 increase in

depreciation and amortization expense as a result of the amortization of software development costs for IZEA Exchange (IZEAx) and the Ebyline intangible assets acquired; a \$105,000 increase in bad debt expense to establish a general reserve for doubtful accounts; a \$125,000 increase in contractor expense for outsourced engineering and finance projects; a \$38,000 increase in stock compensation; and a \$46,000 increase in rent for our facilities and an additional office in Canada. Legal fees decreased by \$292,000 from the prior year period due to the settlement of our patent litigation in August 2015 that is not recurring in 2016.

Sales and marketing expenses consist primarily of personnel costs related to employees and consultants who support sales and marketing efforts, promotional and advertising costs and trade show expenses. Sales and marketing expenses for the six months ended June 30, 2016 increased by \$1,644,341 or 49%, compared to the same period in 2015. The increase was primarily attributable to a \$1,287,000 increase in personnel costs and a \$194,000 increase in variable costs related to personnel such as software and subscription costs, communication, travel and supply costs. These increases are the result of a 20% increase in the number of our sales and marketing personnel since the prior year along with a \$202,000 increase in commission expe

Table of Contents

nse as a result of the increase in customer bookings. Travel costs included in the variable costs increased by 46% as a result of increased training and corporate events during the first half of 2016. Sales and marketing expenses also increased \$93,000 in contractor expenses and \$119,000 as a result of increased trade show activity and advertising.

Other Income (Expense)

Other income (expense) consists primarily of interest expense, loss on exchange of warrants and the change in the fair value of derivatives.

Interest expense during the six months ended June 30, 2016 decreased by \$22,413 to \$32,750 compared to the same period in 2015 primarily due to lower imputed interest on the acquisition costs payable.

In prior years, we entered into financing transactions that gave rise to derivative liabilities. These financial instruments are carried at fair value in our financial statements. Changes in the fair value of derivative financial instruments are required to be recorded in other income (expense) in the period of change. We recorded a gain of \$29,273 and a loss of \$2,255,444 resulting from the increase or decrease in the fair value of certain warrants and stock during the six months ended June 30, 2016 and 2015, respectively. Due to the large exercise of warrants in August 2015 resulting in less remaining warrants requiring valuation in the future, we believe that these fluctuations will significantly decrease in future periods and will be substantially different from the amounts recorded during 2015.

Net Loss

Net loss for the six months ended June 30, 2016 was \$4,218,965, which decreased from a net loss of \$6,256,203 for the same period in 2015. The reduction in net loss was primarily the result of the increased revenue and profit margins along with a reduced loss from the change in the fair value of derivative financial instruments partially offset by the increase in operating expenses as discussed above.

Liquidity and Capital Resources

We had cash and cash equivalents of \$8,015,684 as of June 30, 2016 as compared to \$11,608,452 as of December 31, 2015, a decrease of \$3,592,768 primarily as a result of funding our operating losses. We have incurred significant net losses and negative cash flow from operations since our inception which has resulted in a total accumulated deficit of \$38,468,486 as of June 30, 2016. To date, we have financed our operations through internally generated revenue from operations and the sale and exercise of our equity securities.

Cash used for operating activities was \$3,313,299 during the six months ended June 30, 2016 and was primarily a result of our loss from operations during the period of \$4,217,241. Cash used for investing activities was \$285,044 during the six months ended June 30, 2016 due primarily to purchases of computer and office equipment for our expanding staff and development of our proprietary software. Cash provided by financing activities was \$5,575 during the six months ended June 30, 2016 and was the result of proceeds from the exercise of options offset by expenses on the issuance of shares and principal payments on our capital lease obligations.

On January 30, 2015, we purchased all of the outstanding shares of capital stock of Ebyline. The aggregate consideration payable by us was to be an amount up to \$8,850,000, including a cash payment at closing of \$1,200,000, a stock issuance valued at \$250,000 paid on July 30, 2015, \$1,877,064 in two equal installments of \$938,532 on the first and second anniversaries of the closing, and up to \$5,500,000 in contingent performance payments, subject to Ebyline meeting certain revenue targets for each of the three years ending December 31, 2015, 2016 and 2017. The \$1,877,064 in annual payments and the \$5,500,000 in contingent performance payments may be made in cash or

common stock, at our option. The performance payments are to be made only if Ebyline achieves at least 90% of Content Revenue targets of \$17,000,000 in 2015, \$27,000,000 in 2016 and \$32,000,000 in 2017. If Ebyline achieves at least 90%, but less than 100% of the Content Revenue targets, the performance payments owed of \$1,800,000, \$1,800,000 and \$1,900,000 for each of the three years ending December 31, 2015, 2016 and 2017, respectively, will be subject to adjustment. Anything below 90% of the Content Revenue targets will not be eligible for any performance payment.

Content Revenue was \$7,978,000 from February-December 2015 after our acquisition and it was \$708,000 in January 2015 prior to our acquisition. Additionally, there were approximately \$26,000 in subscription fees for Ebyline platform services during 2015 resulting in total Content Revenue of \$8,712,000 or 51% of the 2015 Content Revenue Target. Based on the actual results for 2015 and our current projections for 2016-2017, we do not believe that these targets will be met within

Table of Contents

each of the respective years. As a result, we do not believe that we will be required to make any of the \$5,500,000 in contingent performance payments and we currently expect that the total consideration to be paid for the Ebyline acquisition will be \$3,327,064.

On January 29, 2016, we issued 114,398 shares of common stock valued at \$848,832 to the former Ebyline stockholders as settlement of our annual installment payment of \$938,532 less \$89,700 in closing related expenses owed as part of the Stock Purchase Agreement.

On April 13, 2015, we expanded our secured credit facility agreement with Bridge Bank, N.A. of San Jose, California. Pursuant to this agreement, we may submit requests for funding up to 80% of our eligible accounts receivable up to a maximum credit limit of \$5 million. This agreement is secured by our accounts receivable and substantially all of our other assets. The agreement renews annually and requires us to pay an annual facility fee of \$20,000 (0.4% of the credit limit) and an annual due diligence fee of \$1,000. Interest accrues on the advances at the rate of prime plus 2% per annum. The default rate of interest is prime plus 7%. As of June 30, 2016, we had no advances outstanding under this agreement.

On July 31, 2016, we purchased all of the outstanding shares of capital stock of ZenContent, Inc., pursuant to the terms of a Stock Purchase Agreement, dated as of July 31, 2016, by and among IZEA, ZenContent and the stockholders of ZenContent. Upon closing we (a) paid a cash payment of \$400,000 and (b) issued 86,207 shares of our common stock valued at \$600,000 (using the 30 trading-day volume-weighted average closing price of the Company's common stock of \$6.96 per share as of July 29, 2016). The agreement also requires (i) three equal annual installment payments totaling \$1,000,000, commencing 12 months following the closing and (ii) contingent performance payments of up to an aggregate of \$2,500,000 over the three 12-month periods following the closing, based upon ZenContent achieving certain minimum revenue thresholds. Of these payments, 33% of each such annual installment or contingent performance payment will be in the form of cash and the remainder of such payment will be in the form of either cash or additional shares of our common stock (determined at our option).

We believe that with our current cash and our available credit line with Bridge Bank, we will have sufficient cash reserves available to cover expenses for longer than the future twelve months. Given the volatility in U.S. equity markets and our normal working capital fluctuations, we may seek to raise additional capital at any time to supplement our operating cash flows to the extent we can do so on competitive market terms. In such event, an equity financing may dilute the ownership interests of our common stockholders.

Off-Balance Sheet Arrangements

We do not engage in any activities involving variable interest entities or off-balance sheet arrangements.

Critical Accounting Policies and Use of Estimates

The preparation of the accompanying financial statements and related disclosures in conformity with U.S. GAAP requires us to make judgments, assumptions and estimates that affect the amounts reported in the accompanying financial statements and the accompanying notes. The preparation of these financial statements requires managements to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. When making these estimates and assumptions, we consider our historical experience, our knowledge of economic and market factors and various other factors that we believe to be reasonable under the circumstances. Actual results could differ from these estimates. The following critical accounting policies are significantly affected by judgments, assumptions and estimates used in the preparation of the financial statements.

Accounts receivable are customer obligations due under normal trade terms. Uncollectibility of accounts receivable is not significant since most customers are bound by contract and are required to fund us for all the costs of an “opportunity,” defined as an order created by a marketer for a creator to write about the marketer’s product. If a portion of the account balance is deemed uncollectible, we will either write-off the amount owed or provide a reserve based on the uncollectible portion of the account. Management determines the collectibility of accounts by regularly evaluating individual customer receivables and considering a customer’s financial condition, credit history and current economic conditions. We have a reserve of \$244,000 for doubtful accounts as of June 30, 2016. We believe that this estimate is reasonable, but there can be no assurance that the estimate will not change as a result of a change in economic conditions or business conditions within the industry, the individual customers or our company. Any adjustments to this account are reflected in the consolidated statements of

Table of Contents

operations as a general and administrative expense. Bad debt expense was less than 1% of revenue for the three and six months ended June 30, 2016 and 2015.

Throughout 2013 and the first quarter of 2014, we developed our new web-based advertising exchange platform, IZEAx. This platform is being utilized both internally and externally to facilitate native advertising campaigns on a greater scale. We began adding features and additional functionality to this platform again in 2015 and will continue throughout 2016. These new features will enable our platform to facilitate the contracting, workflow and delivery of direct content. In accordance with ASC 350-40, Internal Use Software and ASC 985-730, Computer Software Research and Development, research phase costs should be expensed as incurred and development phase costs including direct materials and services, payroll and benefits and interest costs may be capitalized. As a result, we have capitalized \$1,174,530 in direct materials, consulting, payroll and benefit costs to software development costs in the consolidated balance sheet as of June 30, 2016. We estimate the useful life of our software to be 5 years, consistent with the amount of time our legacy platforms were in-service, and we are amortizing the software development costs over this period.

We derive revenue from three sources: revenue from a marketer when it pays for a social media publisher or influencer such as a blogger or tweeter ("creators") to share sponsored content with their social network audience ("Sponsored Revenue"), revenue when a publisher or company purchases custom branded content for its own use, as well as third party content marketing and native advertising efforts ("Content Revenue") and revenue derived from various service and license fees charged to users of our platforms ("Service Fee Revenue").

For our managed customers, we enter into an agreement to provide services that may require multiple deliverables in the form of (a) sponsored social items, such as blogs, tweets, photos or videos shared through social network offerings that provide awareness or advertising buzz regarding the marketer's brand; (b) media advertisements, such as click-through advertisements appearing in websites and social media channels and (c) original content items, such as a research or news article, informational material or videos that a publisher or brand can use. We may provide one type or a combination of all types of these deliverables including a management fee on a statement of work for a lump sum fee. These deliverables are to be provided over a stated period that may range from one day to one year. Each of these items are considered delivered once the content is live through a public or social network or content has been delivered to the customer for their own use. Revenue is accounted for separately on each of the deliverables in the time frames set forth below. The statement of work typically provides for a cancellation fee if the agreement is canceled by the customer prior to our completion of services. Payment terms are typically 30 days from the invoice date. If we are unable to provide a portion of the services, we may agree with the customer to provide a different type of service or to provide a credit for the value of those services that may be applied to the existing order or used for future services.

Sponsored Revenue is recognized and considered earned after a marketer's sponsored content is posted through IZEAx and shared through a creator's social network for a requisite period of time. The requisite period ranges from 3 days for a tweet to 30 days for a blog, video or other form of content. Management fees related to Sponsored Revenue from advertising campaigns managed by us are recognized ratably over the term of the campaign which may range from a few days to several months. Content Revenue is recognized when the content is delivered to and accepted by the customer. Service Fee Revenue is generated when fees are charged to customers primarily related to subscription fees for different levels of service within a platform, licensing fees for white-label use of IZEAx, early cash-out fees if a creator wishes to take proceeds earned for services from their account when the account balance is below certain minimum balance thresholds and inactivity fees for dormant accounts. Service Fee Revenue is recognized immediately when the service is performed or at the time an account becomes dormant or is cashed out. Service Fee Revenue for subscription or licensing fees is recognized straight-line over the term of service. Self-service marketers must prepay for services by placing a deposit in their account with the Company. The deposits are typically paid by the marketer via credit card. Marketers who use us to manage their social advertising campaigns or content requests

may prepay for services or request credit terms. Payments received or billings in advance of services are recorded as unearned revenue until earned as described above.

All of our revenue is generated through the rendering of services and is recognized under the general guidelines of SAB Topic 13 A.1 which states that revenue will be recognized when it is realized or realizable and earned. We consider our revenue as generally realized or realizable and earned once (i) persuasive evidence of an arrangement exists, (ii) services have been rendered, (iii) the price to the marketer or customer is fixed (required to be paid at a set amount that is not subject to refund or adjustment) and determinable, and (iv) collectibility is reasonably assured. We record revenue on the gross amount earned since we generally are the primary obligor in the arrangement, take on credit risk, establish the pricing and determine the service specifications.

Stock-based compensation is measured at the grant date, based on the fair value of the award, and is recognized as an expense over the employee's requisite service period. We estimate the fair value of each stock option as of the date of grant

Table of Contents

using the Black-Scholes pricing model. Options typically vest ratably over four years with one-fourth of options vesting one year from the date of grant and the remaining options vesting monthly, in equal increments over the remaining three-year period and generally have five or ten-year contract lives. We estimate the fair value of our common stock using the closing stock price of our common stock on the date of the option award. We estimate the volatility of our common stock at the date of grant based on the volatility of comparable peer companies that are publicly traded and have had a longer trading history than us. We determine the expected life based on historical experience with similar awards, giving consideration to the contractual terms, vesting schedules and post-vesting forfeitures. We use the risk-free interest rate on the implied yield currently available on U.S. Treasury issues with an equivalent remaining term approximately equal to the expected life of the award. We have never paid any cash dividends on our common stock and do not anticipate paying any cash dividends in the foreseeable future. We estimate forfeitures when recognizing compensation expense and this estimate of forfeitures is adjusted over the requisite service period based on the extent to which actual forfeitures differ, or are expected to differ, from such estimates. Changes in estimated forfeitures are recognized through a cumulative catch-up adjustment, which is recognized in the period of change, and a revised amount of unamortized compensation expense to be recognized in future periods.

The following table shows the number of options granted under our 2011 Equity Incentive Plans and the assumptions used to determine the fair value of those options during the year ended December 31, 2015 and six months ended June 30, 2016:

2011 Equity Incentive Plans - Options Granted

Period Ended	Total Options Granted	Weighted Average Exercise Price	Weighted Average Expected Term	Weighted Average Volatility	Weighted Average Risk Free Interest Rate	Weighted Average Grant Date Fair Value
December 31, 2015	277,059	\$7.43	6.0 years	55.47%	1.65%	\$3.84
June 30, 2016	76,917	\$6.84	6.0 years	52.54%	1.52%	\$3.44

There were outstanding options to purchase 889,171 shares with a weighted average exercise price of \$8.45 per share, of which options to purchase 463,109 shares were exercisable with a weighted average exercise price of \$9.76 per share as of June 30, 2016. The intrinsic value on outstanding options as of June 30, 2016 was \$1,149,482. The intrinsic value on exercisable options as of June 30, 2016 was \$784,073.

We account for derivative instruments in accordance with ASC 815, Derivatives and Hedging, which requires additional disclosures about our objectives and strategies for using derivative instruments, how the derivative instruments and related hedged items are accounted for, and how the derivative instruments and related hedging items affect the financial statements. We do not use derivative instruments to hedge exposures to cash flow, market or foreign currency risk. Terms of equity instruments are reviewed to determine whether or not they contain embedded derivative instruments that are required under ASC 815 to be accounted for separately from the host contract, and recorded on the balance sheet at fair value. The fair value of derivative liabilities, if any, is required to be revalued at each reporting date, with corresponding changes in fair value recorded in current period operating results. Pursuant to ASC 815, an evaluation of specifically identified conditions is made to determine whether the fair value of warrants issued is required to be classified as equity or as a derivative liability.

Recent Accounting Pronouncements

There are new accounting pronouncements issued by the Financial Accounting Standards Board ("FASB") which are not yet effective.

In May 2014, the FASB issued Accounting Standards Update No. 2014-09, Revenue from Contracts with Customers (ASU 2014-09), which supersedes nearly all existing revenue recognition guidance under U.S. GAAP. The core principle of ASU 2014-09 is to recognize revenues when promised goods or services are transferred to customers in an amount that reflects the consideration to which an entity expects to be entitled for those goods or services. ASU 2014-09 defines a five step process to achieve this core principle and, in doing so, more judgment and estimates may be required within the revenue recognition process than are required under existing U.S. GAAP. The standard is effective for annual periods beginning after December 15, 2017, and interim periods therein, using either of the following transition methods: (i) a full retrospective approach reflecting the application of the standard in each prior reporting period with the option to elect certain practical expedients, or (ii) a retrospective approach with the cumulative effect of initially adopting ASU 2014-09 recognized at the date of adoption (which includes additional footnote disclosures). We are currently evaluating the impact of the adoption of ASU 2014-09 on our consolidated financial statements and have not yet determined the method by which we will adopt the standard in the first quarter of 2018.

Table of Contents

In March 2016, the FASB issued ASU 2016-08, "Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net)." The amendments in this ASU are intended to improve the operability and understandability of the implementation guidance on principal versus agent considerations by amending certain existing illustrative examples and adding additional illustrative examples to assist in the application of the guidance. The effective date and transition of these amendments is the same as the effective date and transition of ASU 2014-09 stated above.

In April 2016, the FASB issued ASU No. 2016-10, Revenue from Contracts with Customers: Identifying Performance Obligations and Licensing ("ASU 2016-10"). ASU 2016-10 is intended to reduce the cost and complexity of applying the guidance in the FASB's new revenue standard on identifying performance obligations, and is also intended to improve the operability and understandability of the licensing implementation guidance. The effective date for ASU 2016-10 is the same as for ASU 2014-09 stated above.

In February 2016, the FASB issued Accounting Standards Update No. 2016-02, Leases. The new standard establishes a right-of-use (ROU) model that requires a lessee to record a ROU asset and a lease liability on the balance sheet for all leases with terms longer than 12 months. Leases will be classified as either finance or operating, with classification affecting the pattern of expense recognition in the income statement. The new standard is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. A modified retrospective transition approach is required for lessees for capital and operating leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements, with certain practical expedients available. We are currently evaluating the impact of the adoption of ASU 2016-02 on our consolidated financial statements.

In June 2016, the FASB issued Accounting Standards Update 2016-13, Financial Instruments - Credit Losses: Measurement of Credit Losses on Financial Instruments. ASU 2016-13 removes the thresholds that companies apply to measure credit losses on financial instruments measured at amortized cost, such as loans, receivables, and held-to-maturity debt securities. Under current U.S. GAAP, companies generally recognize credit losses when it is probable that the loss has been incurred. The revised guidance will remove all current recognition thresholds and will require companies to recognize an allowance for lifetime expected credit losses. Credit losses will be immediately recognized through net income; the amount recognized will be based on the current estimate of contractual cash flows not expected to be collected over the financial asset's contractual term. ASU 2016-13 also amends the credit loss measurement guidance for available-for-sale debt securities. For public business entities, ASU 2016-13 is effective for financial statements issued for fiscal years and for interim periods within those fiscal years beginning after December 15, 2019. Companies will be required to apply the changes through a cumulative-effect adjustment to their retained earnings as of the beginning of the first reporting period in which the guidance is effective. We are currently evaluating the impact that this ASU will have on its consolidated financial statements.

ITEM 3 – QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Not applicable to smaller reporting companies.

ITEM 4 – CONTROLS AND PROCEDURES

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures

designed to ensure that information required to be disclosed by us in the reports that we file under the Exchange Act is accumulated and communicated to our management, including our principal executive and financial officer, as appropriate to allow timely decisions regarding required disclosures.

In designing and evaluating the disclosure controls and procedures, our management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and our management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Furthermore, controls and procedures could be circumvented by the individual acts of some persons, by collusion or two or more people or by management override of the control. Misstatements due to error or fraud may occur and not be detected on a timely basis.

Evaluation of Disclosure Controls and Procedures

In connection with the preparation of this quarterly report on Form 10-Q for the period ended June 30, 2016, an evaluation was performed under the supervision and with the participation of the Company's management including our Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO") to determine the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of June 30, 2016. Based on this evaluation, our management concluded that our disclosure controls and procedures were effective as of June 30, 2016 to provide reasonable assurance that the information required to be disclosed by us in reports or submitted under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the rules and forms of the SEC and that such information is accumulated and communicated to management, including the Company's CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act). Internal control over financial reporting is a process designed by, or under the supervision of, our principal executive officer and principal financial officer and effected by our Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. Internal control over financial reporting includes policies and procedures that:

Table of Contents

- (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the Company's transactions;
- (ii) provide reasonable assurance that transactions are recorded as necessary for the preparation of our financial statements in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures are made only in accordance with authorizations of our management and directors; and
- (iii) provide reasonable assurance regarding prevention or timely detection of any unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect financial statement misstatements. Also, projections of any evaluation of internal control effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

There were no changes in our internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) that occurred during the quarter ended June 30, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 1 – LEGAL PROCEEDINGS

From time to time, we may become involved in various lawsuits and legal proceedings that arise in the ordinary course of business. Litigation is, however, subject to inherent uncertainties, and an adverse result in these or other matters may arise from time to time that may harm our business. We are currently not aware of any legal proceedings or claims that we believe would or could have, individually or in the aggregate, a material adverse effect on us.

ITEM 1A – RISK FACTORS

In addition to the information set forth under Item 1A of Part I to our Annual Report on Form 10-K for the year ended December 31, 2015, the information set forth at the beginning of Management's Discussion and Analysis entitled "Special Note Regarding Forward-Looking Information" and updates noted below, investors should consider that there are numerous and varied risks, known and unknown, that may prevent us from achieving our goals. If any of these risks actually occur, our business, financial condition or results of operation may be materially and adversely affected. In such case, the trading price of our common stock could decline and investors could lose all or part of their investment.

Risks Related to our Business and Industry

We have a history of losses, expect future losses and cannot assure you that we will achieve profitability.

We have incurred significant net losses and negative cash flow from operations since our inception which has resulted in a total accumulated deficit of \$38,468,486 as of June 30, 2016. For the six months ended June 30, 2016, we had a net loss of \$4,218,965, including a \$4,217,241 loss from operations and we expect a net loss for the remainder of this fiscal year. Although our revenue has increased since inception, we have not achieved profitability and cannot be certain that we will be able to sustain these growth rates or realize sufficient revenue to achieve profitability. If we achieve profitability, we may not be able to sustain it.

If we fail to retain existing customers or add new customers, our revenue and business will be harmed.

We depend on our ability to attract and retain customers that are prepared to offer products or services on compelling terms through IZEAx. Additionally, we rely on customers who purchase direct content from our creators in our platforms. We must continue to attract and retain customers in order to increase revenue and achieve profitability. We have one customer that accounted for 11% of our revenue during the six months ended June 30, 2016. If customers do not find our marketing and promotional services effective, they are not satisfied with content they receive, or they do not believe that utilizing our platforms provides them with a long-term increase in value, revenue or profit, they may stop using our platforms or managed services. In addition, we may experience attrition in our customers in the ordinary course of business resulting from several factors, including losses to competitors, mergers, closures or bankruptcies. If we are unable to attract new customers in numbers sufficient to grow our business, or if too many customers are unwilling to offer products or services with compelling terms to our creators through our platforms or if too many large customers seek extended payment terms, our operating results will be adversely affected.

Risks Relating to our Common Stock

Exercise of stock options, warrants and other securities will dilute your percentage of ownership and could cause our stock price to fall.

As of August 8, 2016, we had 5,450,005 shares of common stock issued, outstanding stock options to purchase 902,034 shares of common stock at an average exercise price of \$8.42 per share, and outstanding warrants to purchase 557,421 shares of common stock at an average exercise price of \$8.59 per share.

We also have reserved shares to issue stock options, restricted stock or other awards to purchase or receive up to 85,911 shares of common stock under our May 2011 Equity Incentive Plan and 55,875 shares of common stock under our 2014 Employee Stock Purchase Plan. In the future, we may grant additional stock options, restricted stock units, warrants and convertible securities. The exercise, conversion or exchange of stock options, restricted stock units, warrants or convertible securities will dilute the percentage ownership of our other stockholders. Sales of a substantial number of shares of our

Table of Contents

common stock could cause the price of our common stock to fall and could impair our ability to raise capital by selling additional securities.

ITEM 2 – UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

On April 11, 2016, we issued 749 shares of common stock valued at \$4,794 to four employees as a contest award.

On July 31, 2016, we purchased of all of the outstanding shares of capital stock of ZenContent, Inc., pursuant to the terms of a Stock Purchase Agreement, dated as of July 31, 2016, by and among IZEA, ZenContent and the stockholders of ZenContent. Upon closing we (a) paid a cash payment of \$400,000 and (b) issued 86,207 shares of our common stock valued at \$600,000 (using the 30 trading-day volume-weighted average closing price of the Company's common stock of \$6.96 per share as of July 29, 2016). The securities to be offered in the acquisition have not been registered under the Securities Act of 1933, as amended, and may not be offered or sold in the United States absent registration or an applicable exemption from registration requirements.

The foregoing issuances of shares were made in reliance upon the exemption from registration provided by Section 4(a)(2) of the Securities Act of 1933, as amended.
