- .. Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 7.01 Regulation FD Disclosure.

Heat Biologics, Inc. (the Company), today issued a press release announcing positive data from two patients in its Phase 1 clinical trial of HS-410 in non-muscle invasive bladder cancer (NMIBC), demonstrating substantially increased tumor infiltrating lymphocytes following treatment. The Company's press release is filed as Exhibit 99.1 to this Current Report on Form 8-K.

The information included in this Item 7.01 and in Exhibit 99.1 shall not be deemed filed for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the Exchange Act), or otherwise subject to the liabilities of that Section or incorporated by reference in any filing under the Securities Act of 1933, as amended, or the Exchange Act, except as shall be expressly set forth by specific reference in such a filing.

Item 8.01 Other Events.

The Company today announced positive data from two patients in the Phase 1 portion of its Phase 1/2 clinical trial of HS-410 in NMIBC. More specifically, analysis of tumor-infiltrating lymphocytes in one patient after surgery and induction BCG (*bacillus Calmette-Guerin*) followed by 6 weeks of HS-410 demonstrated an approximately 70-fold increase in CD8 expression (a marker for CD8+ killer T cells) within the tumor, which was not associated with any increase in CD4 expression (a marker for CD4+ helper T cells). When the patient returned at week 21, the trend continued and an approximate 750-fold increase in CD8 was observed, without any increase in CD4 expression. The Company also reported that with respect to a second patient, a non-specific immune infiltrate was noted on week 7 to be slightly increased as compared to baseline, but which consisted of both CD4+ and CD8+ T cells. The second patient returned with recurrent disease at week 13, when the repeat biopsy showed no further increase in the immune infiltrate. The Company is still evaluating many patients from its Phase 1 clinical trial of HS-410 in NMIBC and continuing its ongoing Phase 2 clinical study.

Item 9.01 Financial Statements and Exhibits.

(d) Exhibits.

The following exhibits are being filed as part of this Report.
