

Edgar Filing: NextEra Energy Partners, LP - Form 10-Q

NextEra Energy Partners, LP
Form 10-Q
November 12, 2014

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2014

Commission File Number	Exact name of registrant as specified in its charter, address of principal executive office and registrant's telephone number	IRS Employer Identification Number
001-36518	NEXTERA ENERGY PARTNERS, LP 700 Universe Boulevard Juno Beach, Florida 33408 (561) 694-4000	30-0818558

State or other jurisdiction of incorporation or organization: Delaware

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Securities Exchange Act of 1934.

Large Accelerated Filer Accelerated Filer Non-Accelerated Filer Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Securities Exchange Act of 1934). Yes No

Number of NextEra Energy Partners, LP common units outstanding as of October 31, 2014: 18,690,360

FORWARD-LOOKING STATEMENTS

This report includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Any statements that express, or involve discussions as to, expectations, beliefs, plans, objectives, assumptions, strategies, future events or performance (often, but not always, through the use of words or phrases such as result, are expected to, will continue, is anticipated, aim, believe, will, could, should, would, estimated, may, plan, potential, future, projection, goals, target, outlook, predict and intend or words of similar meaning) are not statements of historical facts and may be forward looking. Forward-looking statements involve estimates, assumptions and uncertainties. Accordingly, any such statements are qualified in their entirety by reference to, and are accompanied by, the following important factors (in addition to any assumptions and other factors referred to specifically in connection with such forward-looking statements) that could have a significant impact on NextEra Energy Partners, LP's (NEP) operations and financial results, and could cause NEP's actual results to differ materially from those contained or implied in forward-looking statements made by or on behalf of NEP in this Form 10-Q, in presentations, on its website, in response to questions or otherwise.

Operational Risks

• NEP has a limited operating history and its projects may not perform as expected.

• NEP's ability to make cash distributions to its unitholders will be affected by wind and solar conditions at its projects.

• Operation and maintenance of energy projects involve significant risks that could result in unplanned power outages or reduced output.

• Some of NEP's projects' and some of NextEra Energy Resources, LLC's (NEER) right of first offer projects' (ROFO Projects) wind turbines are not generating the amount of energy estimated by their manufacturers' original power curves, and the manufacturers may not be able to restore energy capacity at the affected turbines.

• Initially, NEP will depend on certain of the projects in its initial portfolio for a substantial portion of its anticipated cash flows.

• Terrorist or similar attacks could impact NEP's projects or surrounding areas and adversely affect its business.

• NEP's energy production may be substantially below its expectations if a natural disaster or meteorological conditions damage its turbines, solar panels, other equipment or facilities.

• NEP is not able to insure against all potential risks and it may become subject to higher insurance premiums.

• Warranties provided by the suppliers of equipment for NEP's projects may be limited by the ability of a supplier to satisfy its warranty obligations or by the expiration of applicable time or liability limits, which could reduce or void the warranty protections, or the warranties may be insufficient to compensate NEP's losses.

• Supplier concentration at certain of NEP's projects may expose it to significant credit or performance risks.

• NEP relies on interconnection and transmission facilities of third parties to deliver energy from its projects, and if these facilities become unavailable, NEP's projects may not be able to operate or deliver energy.

• NEP's business is subject to liabilities and operating restrictions arising from environmental, health and safety laws and regulations.

• NEP's projects may be adversely affected by legislative changes or a failure to comply with applicable energy regulations.

• As a result of the U.S. Federal Power Act (FPA) and the U.S. Federal Energy Regulatory Commission's (FERC) regulations of transfers of control over public utilities, an investor could be required to obtain FERC approval to acquire common units that would give the investor and its affiliates indirect ownership of 10% or more in NEP's U.S. project entities.

• NEP does not own all of the land on which the projects in its initial portfolio are located and its use and enjoyment of the property may be adversely affected to the extent that there are any lienholders or leaseholders that have rights that are superior to NEP's rights.

• NEP is subject to risks associated with litigation or administrative proceedings that could materially impact its operations, including future proceedings related to projects it subsequently acquires.

The Summerhaven, Conestogo and Bluewater projects are subject to Canadian domestic content requirements under their Feed-in-Tariff (FIT) Contracts.

NEP's cross-border operations require NEP to comply with anti-corruption laws and regulations of the U.S. government and non-U.S. jurisdictions.

NEP is subject to risks associated with its ownership or acquisition of projects that remain under construction, which could result in its inability to complete construction projects on time or at all, and make projects too expensive to complete or cause the return on an investment to be less than expected.

Contract Risks

NEP relies on a limited number of counterparties in its energy sale arrangements and NEP is exposed to the risk that they are unwilling or unable to fulfill their contractual obligations to NEP or that they otherwise terminate their agreements with NEP.

NEP may not be able to extend, renew or replace expiring or terminated agreements, such as its power purchase agreements (PPAs), Renewable Energy Standard Offer Program (RESOP) Contracts and FIT Contracts, at favorable rates or on a long-term basis.

If the energy production by or availability of NEP's U.S. projects is less than expected, they may not be able to satisfy minimum production or availability obligations under NEP's U.S. project entities' PPAs.

Risks Related to NEP's Acquisition Strategy and Future Growth

NEP's growth strategy depends on locating and acquiring interests in additional projects consistent with its business strategy at favorable prices.

NextEra Energy Operating Partners, LP's (NEP OpCo) partnership agreement requires that it distribute its available cash, which could limit its ability to grow and make acquisitions.

Lower prices for other fuel sources reduce the demand for wind and solar energy.

Government regulations providing incentives and subsidies for clean energy could change at any time and such changes may negatively impact NEP's growth strategy.

NEP's growth strategy depends on the acquisition of projects developed by NextEra Energy, Inc. (NEE) and third parties, which face risks related to project siting, financing, construction, permitting, the environment, governmental approvals and the negotiation of project development agreements.

NEP's ability to effectively consummate future acquisitions will also depend on its ability to arrange the required or desired financing for acquisitions.

Acquisitions of existing clean energy projects involve numerous risks.

- Renewable energy procurement is subject to U.S. state and Canadian provincial regulations, with relatively irregular, infrequent and often competitive procurement windows.

While NEP currently owns only wind and solar projects, NEP may acquire other sources of clean energy, including natural gas and nuclear projects, and may expand to include other types of assets including transmission projects, and any future acquisition of non-renewable energy projects, including transmission projects, may present unforeseen challenges and result in a competitive disadvantage relative to NEP's more-established competitors.

NEP faces substantial competition primarily from developers, independent power producers (IPPs), pension and private equity funds for opportunities in North America.

Risks Related to NEP's Financial Activities

Restrictions in NEP OpCo's subsidiaries' revolving credit facility could adversely affect NEP's business, financial condition, results of operations and ability to make cash distributions to its unitholders.

- NEP's cash available for distribution to its unitholders may be reduced as a result of restrictions on its subsidiaries' cash distributions to NEP under the terms of their indebtedness.

NEP's subsidiaries' substantial amount of indebtedness may adversely affect NEP's ability to operate its business and its failure to comply with the terms of its indebtedness could have a material adverse effect on NEP's financial condition.

Currency exchange rate fluctuations may affect NEP's operations.

NEP is exposed to risks inherent in its use of interest rate swaps.

Risks Related to NEP's Relationship with NEE

NEE will exercise substantial influence over NEP and NEP is highly dependent on NEE and its affiliates.

NEP is highly dependent on credit support from NEE and its affiliates;

NEP's subsidiaries may default under contracts or become subject to cash sweeps if credit support is terminated, if NEE or its affiliates fail to honor their obligations under credit support arrangements, or if NEE or another credit support provider ceases to satisfy creditworthiness requirements, and NEP will be required in certain circumstances to reimburse NEE for draws that are made on credit support.

NEER, an indirect wholly-owned subsidiary of NEE, or one of its affiliates will be permitted to borrow funds received by NEP's subsidiaries, including NEP OpCo, as partial consideration for its obligation to provide credit support to NEP, and NEER will use these funds for its own account without paying additional consideration to NEP and is obligated to return these funds only as needed to cover project costs and distributions or as demanded by NEP OpCo. NEP's financial condition and ability to make distributions to its unitholders, as well as its ability to grow distributions in the future, is highly dependent on NEER's performance of its obligations to return a portion of the funds borrowed from NEP's subsidiaries.

NEP may not be able to consummate future acquisitions from NEER.

NextEra Energy Partners GP, Inc. (NEP GP), NEP's general partner, and its affiliates, including NEE, have conflicts of interest with NEP and limited duties to NEP and its unitholders and they may favor their own interests to the detriment of NEP and holders of NEP's common units;

NEE and other affiliates of NEP GP are not restricted in their ability to compete with NEP.

- NEP may be unable to terminate the management services agreement among NEP, NextEra Energy Management Partners, LP (NEE Management), NEP OpCo and NEP GP (Management Services Agreement). If NEE Management terminates the Management Services Agreement, NEER terminates the management services subcontract between NEE Management and NEER (Management Sub-Contract) or either of them defaults in the performance of its obligations thereunder, NEP may be unable to contract with a substitute service provider on similar terms, or at all.
- NEP's arrangements with NEE limit its liability, and NEP has agreed to indemnify NEE against claims that it may face in connection with such arrangements, which may lead NEE to assume greater risks when making decisions relating to NEP than it otherwise would if acting solely for its own account.
- The credit and risk profile of NEP GP and its owner, NEE, could adversely affect NEP's credit ratings and risk profile, which could increase NEP's borrowing costs or hinder NEP's ability to raise capital.

Risks Related to Ownership of NEP's Common Units

• NEP's ability to make distributions to its unitholders depends on the ability of NEP OpCo to make cash distributions to its limited partners.

If NEP incurs material tax liabilities, NEP's distributions to its unitholders may be reduced, without any corresponding reduction in the amount of the IDR Fee as defined in the Management Services Agreement payable to NEE Management under the Management Services Agreement.

• Holders of NEP's common units have limited voting rights and are not entitled to elect its general partner or its directors.

• NEP's partnership agreement restricts the remedies available to holders of its common units for actions taken by its general partner that might otherwise constitute breaches of fiduciary duties.

• NEP's partnership agreement restricts the voting rights of unitholders owning 10% or more of its common units.

• NEP's partnership agreement replaces NEP GP's fiduciary duties to holders of NEP's common units with contractual standards governing its duties.

• Even if holders of NEP's common units are dissatisfied, they cannot initially remove NEP GP, as NEP's general partner, without NEE's consent.

• NEP GP's interest in NEP and the control of NEP GP may be transferred to a third party without unitholder consent.

• The IDR Fee may be transferred to a third party without unitholder consent.

• NEP may issue additional units without unitholder approval, which would dilute unitholder interests.

• Reimbursements and fees owed to NEP GP and its affiliates for services provided to NEP or on NEP's behalf will reduce cash available for distribution to or from NEP OpCo and from NEP to NEP's common unitholders, and the amount and timing of such reimbursements and fees will be determined by NEP GP and there are no limits on the amount that NEP OpCo may be required to pay.

• Discretion in establishing cash reserves by NextEra Energy Operating Partners GP, LLC (NEE Operating GP), the general partner of NEP OpCo, may reduce the amount of cash available for distribution to unitholders.

• While NEP's partnership agreement requires NEP to distribute its available cash, NEP's partnership agreement, including provisions requiring NEP to make cash distributions, may be amended.

• NEP OpCo can borrow money to pay distributions, which would reduce the amount of credit available to operate NEP's business.

• Increases in interest rates could adversely impact the price of NEP's common units, NEP's ability to issue equity or incur debt for acquisitions or other purposes and NEP's ability to make cash distributions at intended levels.

• The price of NEP's common units may fluctuate significantly and unitholders could lose all or part of their investment and a market that will provide unitholders with adequate liquidity may not develop.

• The liability of holders of NEP's common units, which represent limited partner interests in NEP, may not be limited if a court finds that unitholder action constitutes control of NEP's business.

• Unitholders may have liability to repay distributions that were wrongfully distributed to them.

• Except in limited circumstances, NEP GP has the power and authority to conduct NEP's business without unitholder approval.

• Contracts between NEP, on the one hand, and NEP GP and its affiliates, on the other hand, will not be the result of arm's-length negotiations.

• Common unitholders will have no right to enforce the obligations of NEP GP and its affiliates under agreements with NEP.

• NEP GP decides whether to retain separate counsel, accountants or others to perform services for NEP.

• The New York Stock Exchange does not require a publicly traded limited partnership like NEP to comply with certain of its corporate governance requirements.

Taxation Risks

• NEP's future tax liability may be greater than expected if NEP does not generate net operating losses (NOLs) sufficient to offset taxable income or if tax authorities challenge certain of its tax positions.

• NEP's ability to utilize its NOLs to offset future income may be limited.

• NEP will not have complete control over its tax decisions.

• A valuation allowance may be required for NEP's deferred tax assets.

• Distributions to unitholders may be taxable as dividends.

9

NEXTERA ENERGY PARTNERS, LP
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
 (unaudited)

The accompanying unaudited condensed consolidated financial statements should be read in conjunction with NEP's combined financial statements for the years ended December 31, 2013 and 2012 contained in NEP's prospectus, which became effective on June 26, 2014 pursuant to Rule 424(b) under the Securities Act with the SEC (Prospectus). In the opinion of NEP management, all adjustments (consisting of normal recurring accruals) considered necessary for fair financial statement presentation have been made. The results of operations for an interim period generally will not give a true indication of results for the year, and the results of operations for the accounting predecessor are not indicative of the actual level of expense that would have been incurred had NEP operated as a publicly-traded company during the period prior to the completion of its initial public offering.

1. ORGANIZATION AND NATURE OF BUSINESS

NEP was formed as a Delaware limited partnership on March 6, 2014 as an indirect wholly-owned subsidiary of NEE, a Florida corporation. NEP was formed to be a growth-oriented limited partnership that would own, operate and acquire clean and contracted generation assets with stable long-term cash flows.

On July 1, 2014, NEP completed its initial public offering by issuing 18,687,500 common units at a price to the public of \$25 per unit (offering). The proceeds from the offering, net of underwriting discounts, commissions and structuring fees, were approximately \$438 million, of which NEP used approximately \$288 million to purchase 12,291,593 common units of NEP OpCo from NextEra Energy Equity Partners, LP (NEE Equity), a limited partnership formed under the laws of the State of Delaware and an indirect wholly-owned subsidiary of NEE, and approximately \$150 million to purchase 6,395,907 NEP OpCo common units from NEP OpCo, which will use that amount for general partnership purposes, including to fund future acquisition opportunities.

NEP OpCo is a limited partnership with general and limited partners. As a result of the offering, NEP has consolidated the results of NEP OpCo and its subsidiaries because of its controlling interest in the general partner of NEP OpCo. NEP owns a 20.1% limited partnership interest in NEP OpCo and NEE Equity owns a noncontrolling 79.9% limited partnership interest in NEP OpCo.

In connection with the offering, NEP acquired the following portfolio of clean, contracted renewable energy assets (initial portfolio):

Project	Commercial Operation Date	Resource	MW	Counterparty	Contract Expiration	Project Financing (Maturity)
Northern Colorado	September 2009	Wind	174.3	Public Service Company of Colorado	2029 (22.5 MW) / 2034 (151.8 MW)	Mountain Prairie (2030)
Elk City	December 2009	Wind	98.9	Public Service Company of Oklahoma	2030	Mountain Prairie (2030)
Perrin Ranch	January 2012	Wind	99.2	Arizona Public Service Company	2037	Canyon Wind (2030)
Moore	February 2012	Solar	20.0	Ontario Power Authority	2032	St. Clair (2031)
Sombra	February 2012	Solar	20.0	Ontario Power Authority	2032	St. Clair (2031)
Conestogo	December 2012	Wind	22.9	Ontario Power Authority	2032	Trillium (2033)

Edgar Filing: NextEra Energy Partners, LP - Form 10-Q

Tuscola Bay	December 2012	Wind	120.0	DTE Electric Company	2032	Canyon Wind (2030)
Summerhaven	August 2013	Wind	124.4	Ontario Power Authority	2033	Trillium (2033)
Genesis	November 2013 (125.0 MW)/ March 2014 (125.0 MW)	Solar	250.0	Pacific Gas & Electric Co.	2039	Genesis (2038)
Bluewater	July 2014	Wind	59.9	Ontario Power Authority	2034	Bluewater (2032)
Total			989.6			

For all periods prior to the offering, the accompanying unaudited condensed consolidated financial statements represent the combination of the assets that NEP acquired and were prepared using NEE's historical basis in the assets and liabilities. For all periods subsequent to the offering, the accompanying unaudited condensed consolidated financial statements represent the consolidated results of NEP.

In October 2014, indirect subsidiaries of NEP OpCo entered into agreements to expand NEP's portfolio through two project acquisitions from NEER that are expected to close in the first quarter of 2015.

The Palo Duro acquisition is for 100% of the membership interests of Palo Duro Wind Project Holdings, LLC, which immediately prior to the Palo Duro closing will own 100% of the Class A membership interests in Palo Duro Wind Energy, LLC, a project company owning the development rights and facilities under construction of an approximately 250 megawatt wind energy generating facility located in Hansford and Ochiltree Counties, Texas (the transaction), for approximately \$227 million, subject to customary working capital and other adjustments. Prior to the Palo Duro transaction, certain tax equity investors will make certain upfront capital

NEXTERA ENERGY PARTNERS, LP

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(unaudited)

contributions and acquire 100% of the Class B membership interests in Palo Duro Wind Energy, LLC. The tax equity investors will also make ongoing deferred contingent capital contributions based on the production and sale of electricity that generates production tax credits under Section 45 of the Internal Revenue Code of 1986, as amended. Immediately following the Palo Duro closing, Palo Duro Wind Project Holdings, LLC will hold 100% of the Class A membership interests in Palo Duro Wind Energy, LLC, and the tax equity investors will hold 100% of the Class B membership interests in Palo Duro Wind Energy, LLC. The transaction is subject to customary closing conditions, consummation of the tax equity financing and the receipt of certain regulatory approvals. The Palo Duro purchaser expects the transaction to close in January 2015, and intends to fund the purchase price through a combination of cash on hand and draws on the existing revolving credit facility.

The Shafter acquisition is for 100% of the membership interests of Shafter Solar, LLC, which owns the development rights and facilities under construction of an approximately 20 megawatt solar generating facility located in Shafter, California for approximately \$64 million, subject to customary working capital and other adjustments. The Shafter purchaser expects the transaction to close in the first quarter of 2015, and intends to fund the purchase price through a combination of cash on hand and draws on the existing revolving credit facility.

2. SUMMARY OF SIGNIFICANT ACCOUNTING AND REPORTING POLICIES

Revenue—Revenue recognized for the three and nine months ended September 30, 2014 and 2013, includes operating revenues from operations located outside of the U.S. This revenue was approximately \$20 million and \$13 million for the three months ended September 30, 2014 and 2013, respectively, and \$61 million and \$31 million for the nine months ended September 30, 2014 and 2013, respectively.

In May 2014, the Financial Accounting Standards Board issued a new accounting standard which provides guidance on the recognition of revenue from contracts with customers and requires additional disclosures about the nature, amount, timing and uncertainty of revenue and cash flows from an entity's contracts with customers. The standard is effective for NEP beginning January 1, 2017. NEP is currently evaluating the effect the adoption of this standard will have, if any, on its financial statements.

Inventories—Spare parts inventories are stated at the lower of weighted average cost or market and are included in other current assets in NEP's condensed consolidated balance sheets. Spare parts inventory was approximately \$6 million and \$4 million as of September 30, 2014 and December 31, 2013, respectively.

Property, Plant and Equipment—net and Construction Work in Progress—Property, plant and equipment consists primarily of development, engineering and construction costs for the renewable energy assets, equipment, land, substations and transmission lines. Property, plant and equipment, excluding land, is recorded at cost and depreciated on a straight-line basis over their estimated useful lives ranging from three to 30 years, commencing on the date the assets are placed in service. Maintenance and repairs of property, plant and equipment are charged to operations and maintenance expense, as incurred.

Convertible Investment Tax Credits (CITCs) of approximately \$595 million and \$445 million as of September 30, 2014 and December 31, 2013, respectively, are recorded as a reduction in property, plant and equipment—net in the condensed consolidated balance sheets and are amortized as a corresponding reduction to depreciation expense over the estimated life of the related asset. As of September 30, 2014, NEP had recorded a CITC receivable of approximately \$24 million associated with the Genesis Solar project which is included in accounts receivable on

NEP's condensed consolidated balance sheets.

Construction work in progress includes construction materials, turbine generators, solar panel assemblies and other equipment, third-party engineering costs, capitalized interest and other costs directly associated with the development and construction of the various projects. Upon commencement of plant operations, costs associated with construction work in progress are transferred to property, plant and equipment—net.

Construction work in progress decreased and property, plant and equipment—net and CITCs increased at September 30, 2014, primarily due to the second unit of the Genesis Solar project and the Bluewater project going into service in March 2014 and July 2014, respectively.

Total net long-lived assets, including construction work in progress, held by operations outside the U.S. amounted to approximately \$724 million and \$626 million, respectively, as of September 30, 2014 and December 31, 2013.

Immaterial Restatement—Subsequent to the issuance of NEP's combined financial statements as of December 31, 2013, it was determined that Income tax expense and Other comprehensive loss for the year ended December 31, 2013 were overstated by approximately \$4 million and \$1 million, respectively, and the Deferred tax liability balance as of December 31, 2013 was overstated by approximately \$5 million. The impact of this error had no impact on cash flows from operating, investing or financing activities. As a result, the prior periods in the accompanying financial statements have been corrected to appropriately reflect these balances in the condensed consolidated statements of income, condensed consolidated statements of comprehensive income, condensed consolidated balance sheets, condensed consolidated statements of cash flows, Note 2, Note 3 and Note 8.

NEXTERA ENERGY PARTNERS, LP
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
 (unaudited)

Noncontrolling Interests—After the completion of NEP's offering, NEP owns a controlling, non-economic general partner interest and a 20.1% limited partner interest in NEP OpCo and NEE Equity owns a noncontrolling 79.9% limited partner interest in NEP OpCo. The following table reflects the changes in NEP's noncontrolling interest balance for the three and nine months ended September 30, 2014:

	Noncontrolling Interest (in millions)
Noncontrolling interest at December 31, 2013 and June 30, 2014	\$—
Contributions from noncontrolling interest, net of returns of capital	171
Comprehensive income attributable to noncontrolling interest	14
Noncontrolling interest at September 30, 2014	\$185

The contributions from NEP's offering primarily reflect the value of the underlying net assets sold to third parties in NEP's offering.

Cash Flows—Following the offering, NEP will present transactions with related parties where it does not directly receive the cash as cash transactions on its condensed consolidated statement of cash flows.

3. INCOME TAXES

For periods ending prior to July 1, 2014, income taxes are calculated using the separate return method for each of the project entities that are structured as corporations or as limited liability companies electing to be taxed as corporations. Income taxes are not included for entities that are structured as flow through entities (partnerships) electing to be taxed as partnerships.

For periods ending after July 1, 2014, taxes are calculated for NEP as a single taxpaying entity for U.S. federal and state income tax purposes (based on its election to be taxed as a corporation). Because NEP OpCo is a limited partnership electing to be taxed as a partnership for U.S. federal and state income tax purposes, NEP has only included its 20.1% proportionate share of U.S. income taxes. The U.S. income taxes on the remaining 79.9% of NEP OpCo earnings were allocated to NEE Equity and are not included in NEP's condensed consolidated financial statements. The Canadian subsidiaries are all Canadian taxpayers subject to Canadian income tax, and therefore all Canadian taxes are included in NEP's condensed consolidated financial statements. NEE Equity's share of Canadian taxes is included in noncontrolling interest on NEP's condensed financial statements.

The effective tax rate for the three months ended September 30, 2014 and 2013 was approximately 8% and (100%), respectively and for the nine months ended September 30, 2014 and 2013, approximately 20% and 56%, respectively. The effective tax rate is affected by recurring items, such as the relative amount of income earned in jurisdictions, the 50% tax basis reduction due to CITCs that are recognized when assets are placed into service, and valuation allowances on deferred tax assets. Additionally, in periods ending after July 1, 2014, the effective tax rate is affected by taxes attributable to the noncontrolling interest, and the taxation of Canadian income in both Canada and the U.S.

A reconciliation of income tax at the U.S. federal statutory rate to income tax expense is as follows:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2014	2013	2014	2013
	(millions)			
Income tax expense at 35% statutory rate	\$9	\$—	\$23	\$6
Increases (reductions) resulting from:				
Taxes attributable to noncontrolling interest	(7) —	(7) —
State income taxes, net of federal tax benefit	—	—	1	1
CITCs ^(a)	—	(5) (12) (15
Valuation allowance ^(a)	—	7	11	20
Effect of flow through entities and foreign tax differential ^(b)	—	(1) (3) (2
Income tax expense	\$2	\$1	\$13	\$10

^(a) The changes in income tax expense resulting from CITCs and valuation allowances are primarily related to the Genesis Solar project.

The Summerhaven and Conestogo project entities, as well as the Trillium entities, are Canadian limited partnerships, the partners of which are not predecessor entities and are therefore not included in the predecessor financial statements. Because of their flow through nature, no income taxes have been provided with regard to these entities for periods ending prior to July 1, 2014. Foreign tax differential is the difference in taxes calculated on Canadian income from Canadian projects (excluding flow through entities for periods ending prior to July 1, 2014) at Canadian statutory rates compared to the U.S. statutory rate.

NEXTERA ENERGY PARTNERS, LP
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
 (unaudited)

4. FAIR VALUE MEASUREMENTS

The fair value of assets and liabilities are determined using either unadjusted quoted prices in active markets (Level 1) or pricing inputs that are observable (Level 2) whenever that information is available and using unobservable inputs (Level 3) to estimate fair value only when relevant observable inputs are not available. NEP uses several different valuation techniques to measure the fair value of assets and liabilities relying primarily on the market approach of using prices and other market information for identical or comparable assets and liabilities for those assets and liabilities that are measured at fair value on a recurring basis. Certain financial instruments may be valued using multiple inputs including discount rates, counterparty credit ratings and credit enhancements. NEP's assessment of the significance of any particular input to the fair value measurement requires judgment and may affect the fair value measurement of its assets and liabilities and the placement of those assets and liabilities within the fair value hierarchy levels. Non-performance risk, including the consideration of a credit valuation adjustment, is also considered in the determination of fair value for all assets and liabilities measured at fair value. All transfers between fair value hierarchy levels occur at the beginning of the period in which the transfer occurred.

Cash Equivalents and Restricted Cash — Cash equivalents and restricted cash consist of short-term, highly liquid investments with original maturities of three months or less. NEP primarily holds these investments in money market funds. The fair value of these funds is calculated using current market prices.

Interest Rate Swaps — NEP estimates the fair value of its derivatives using a discounted cash flows valuation technique based on the net amount of estimated future cash inflows and outflows related to the swap agreements. The primary inputs used in the fair value measurements include the contractual terms of the derivative agreements, current interest rates and credit spreads.

NEP's financial assets and liabilities and other fair value measurements made on a recurring basis by fair value hierarchy level are as follows:

	September 30, 2014			December 31, 2013		
	Level 1	Level 2	Total	Level 1	Level 2	Total
	(millions)					
Assets:						
Cash equivalents	\$ 118	\$—	\$ 118	\$ 27	\$—	\$ 27
Restricted cash	4	—	4	2	—	2
Interest rate swaps	—	8	8	—	14	14
Total assets	\$ 122	\$ 8	\$ 130	\$ 29	\$ 14	\$ 43
Liabilities:						
Interest rate swaps	\$—	\$ 5	\$ 5	\$—	\$—	\$—
Total liabilities	\$—	\$ 5	\$ 5	\$—	\$—	\$—

Fair Value of Financial Instruments Recorded at the Carrying Amount — The carrying amounts of accounts receivable approximate their fair values. The carrying amounts and estimated fair values of other financial instruments, excluding assets and liabilities which are recorded at fair value and disclosed above, are as follows:

	September 30, 2014		December 31, 2013	
	Carrying	Fair	Carrying	Fair

Edgar Filing: NextEra Energy Partners, LP - Form 10-Q

	Value (millions)	Value	Value	Value
Notes receivable ^(a)	\$3	\$3	\$4	\$4
Long-term debt, including current maturities ^(b)	\$1,857	\$1,890	\$1,799	\$1,815

Primarily classified as held to maturity. Fair value approximates carrying amount as they bear interest primarily at (a) variable rates and have short to mid-term maturities (Level 2) and are included in other assets on the condensed consolidated balance sheet.

(b) Fair value is estimated based on the borrowing rates as of each date for similar issues of debt with similar remaining maturities (Level 2).

NEXTERA ENERGY PARTNERS, LP
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
 (unaudited)

5. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITY

NEP recognizes all derivative instruments, when required to be marked to market, on the balance sheet as either assets or liabilities and measures them at fair value each reporting period. In connection with its debt financings in September 2012 and June 2014, NEP entered into interest rate swap agreements to manage interest rate cash flow risk. Under the interest rate swap agreements, NEP pays a fixed rate of interest and receives a floating rate of interest over the term of the agreements without the exchange of the underlying notional amounts. These agreements allow NEP to offset the variability of its floating-rate loan interest cash flows with the variable interest cash flows received from the interest rate swap agreements. The commencement and termination dates of the interest rate swap agreements and the related hedging relationship coincide with the corresponding dates of the underlying variable-rate debt instruments, which mature in 2030 and 2032. As of September 30, 2014 and December 31, 2013, the combined notional amounts of the swap agreements were approximately \$344 million and \$212 million, respectively. In order to apply hedge accounting, the transactions must be designated as hedges and must be highly effective in offsetting the hedged risk. For interest rate swaps, generally NEP assesses a hedging instrument's effectiveness by using non-statistical methods including dollar value comparisons of the change in the fair value of the derivative to the change in the fair value or cash flows of the hedged item. Hedge effectiveness is tested at the inception of the hedge and on at least a quarterly basis throughout the hedge's life. The effective portion of changes in the fair value of derivatives accounted for as cash flow hedges are deferred and recorded as a component of accumulated other comprehensive income (AOCI). The amounts deferred in AOCI are recognized in earnings when the hedged transactions occur. Any amounts excluded from the assessment of hedge effectiveness, as well as the ineffective portion of the gain or loss, is reported in current earnings.

Approximately \$5 million of net losses included in AOCI at September 30, 2014, is expected to be reclassified into interest expense within the next 12 months as interest payments are made. Such amount assumes no change in interest rates. Cash flows from these interest rate swap contracts are reported in cash flows from operating activities in NEP's condensed consolidated statements of cash flows.

The fair values of NEP's derivative instruments designated as cash flow hedging instruments are included in NEP's condensed consolidated balance sheets as follows:

	September 30, 2014		December 31, 2013	
	Assets	Liabilities	Assets	Liabilities
	(millions)			
Interest rate swaps:				
Other non-current assets	\$ 11	\$—	\$ 18	\$—
Other current liabilities	\$—	\$ 5	\$—	\$ 4
Other non-current liabilities	\$(3) \$—	\$—	\$—

Gains (losses) related to NEP's cash flow hedges are recorded in NEP's condensed consolidated financial statements as follows:

Three Months Ended September 30, 2014		Nine Months Ended September 30, 2014	
	2013		2013
(millions)			

Interest rate swaps:

Gains (losses) recognized in other comprehensive income	\$(3)	\$—)	\$(15)	\$12
Losses reclassified from AOCI to net income ^(a)	\$1		\$1		\$3		\$3

(a) Included in interest expense.

6. DEBT

During the second quarter of 2014, a NEP subsidiary issued \$280 million principal amount of 5.60% limited-recourse senior secured amortizing notes maturing in September 2038 related to the Genesis Solar project. The proceeds were used primarily to reimburse NEER for a portion of the costs associated with the construction of the Genesis Solar project, and are included as noncash activity in NEP's condensed consolidated statements of cash flows. The notes are secured by liens on the equity interests in Genesis Solar Funding, LLC and its wholly-owned subsidiary, which indirectly owns the Genesis Solar project.

In June 2014, subsidiaries of NEP also entered into and borrowed C\$170 million (approximately \$157 million dollar equivalent as of the date of the borrowing) under a Canadian limited-recourse senior secured variable rate term loan agreement related to its Bluewater project that matures in 2032. Interest on the loan is based on the applicable Canadian Dealer Offered Rate (CDOR)

NEXTERA ENERGY PARTNERS, LP
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(unaudited)

plus a specified margin and is payable quarterly. Principal on the loan will be payable semi-annually. In connection with the borrowing, Bluewater entered into an interest rate swap to hedge against interest rate movements with respect to substantially all interest payments on the loan. Substantially all of the loan proceeds were used to repay, in part, a loan from a Canadian subsidiary of NEER, and are included as noncash activity in NEP's condensed consolidated statements of cash flows. The loan is secured by liens on the Bluewater project's assets and certain other assets of, and the ownership interest in, the subsidiary which owns the facility.

Both debt agreements contain default and related acceleration provisions relating to the failure to make required payments or to observe other covenants in the loan agreement and related documents, actions by the NEP subsidiaries or by other parties under specified agreements relating to the generating facility or the debt agreements, the termination of certain of such specified agreements and certain bankruptcy-related events.

On July 1, 2014, NEP OpCo and its direct subsidiaries (Loan Parties) entered into a \$250 million variable rate, senior secured revolving credit facility that expires in July 2019. The revolving credit facility includes borrowing capacity for letters of credit and incremental commitments to increase the revolving credit facility to up to \$1 billion in the aggregate, subject to certain conditions. Borrowings under the revolving credit facility can be used by the Loan Parties to fund working capital and expansion projects, to make acquisitions and for general business purposes. Loans outstanding in U.S. dollars under the revolving credit facility will bear interest at either (i) a base rate, which will be the higher of (x) the federal funds rate plus 0.50%, (y) the administrative agent's prime rate or (z) the one-month London Interbank Offered Rate (LIBOR) plus 1.0%, in each case, plus an applicable margin; or (ii) one-, two-, three- or six-month LIBOR plus an applicable margin. Loans outstanding in Canadian dollars will bear interest at either (i) a Canadian prime rate, which will be the higher of (x) the Canadian prime rate of a Canadian branch of the administrative agent and (y) the one-month CDOR plus 1.0%, in each case, plus an applicable margin; or (ii) one-, two-, three- or six-month CDOR plus an applicable margin. The revolving credit facility will be subject to a facility fee ranging from 0.375% to 0.50% per annum depending on NEP OpCo's leverage ratio (as defined in the revolving credit facility). The revolving credit facility is secured by liens on certain of the assets of NEP OpCo, and certain other assets of, and the ownership interest in, one of its direct subsidiaries. The revolving credit facility contains default and related acceleration provisions relating to the failure to make required payments or to observe other covenants in the revolving credit facility and related documents. Additionally, NEP OpCo and one of its direct subsidiaries are required to comply with certain financial covenants on a quarterly basis and NEP OpCo's ability to pay cash distributions is subject to certain other restrictions. All borrowings under the revolving credit facility are guaranteed by NEP OpCo and NEP, and must be repaid by the end of the revolving credit term. As of November 11, 2014, no amounts have been drawn under the revolving credit facility.

7. INTANGIBLE LIABILITIES

NEP's intangible liabilities are the result of a 2012 acquisition that resulted in the St. Clair project assuming liabilities for the acquired RESOP Contracts. The acquired value represents the fair value of the RESOP Contracts, which were out-of-the-money contracts, at the acquisition date. The recorded intangible liabilities are amortized to operating revenues over the term of the RESOP Contracts through February 2032, according to the cash flow benefits or detriments associated with the contracts as determined at acquisition. The liabilities as of September 30, 2014 and December 31, 2013 were approximately \$8 million and are included in other non-current liabilities in the accompanying condensed consolidated balance sheets. NEP recorded less than \$1 million of amortization for the three months and nine months ended September 30, 2014 and 2013. Estimated amortization over the next five years is approximately \$1 million in each year.

9. RELATED PARTY TRANSACTIONS

Each project entered into operations and maintenance (O&M) and administrative services agreements with subsidiaries of NEER whereby the projects pay a certain annual fee plus actual costs incurred in connection with O&M and administrative services performed under these agreements. NEP's O&M expenses for the three months ended September 30, 2014 and 2013 include approximately \$1 million and less than \$1 million, respectively, and approximately \$3 million and \$1 million for the nine months ended September 30, 2014 and 2013, respectively,

related to such services. Additionally, Northern Colorado Wind Energy, LLC pays an affiliate for transmission services. NEP's transmission expense for the three and nine months ended September 30, 2014 and 2013 represents the fees paid for these services.

Management Services Agreement (MSA) - Effective July 1, 2014, subsidiaries of NEP entered into a MSA with indirect wholly owned subsidiaries of NEE, under which operational, management and administrative services are provided to NEP, including managing NEP's day to day affairs and providing individuals to act as NEP GP's executive officers and directors, in addition to those services that are provided under the existing O&M agreements and administrative services agreements described above between NEER subsidiaries and NEP subsidiaries. NEP OpCo will pay NEE an annual management fee equal to the greater of 1% of NEP OpCo's EBITDA for the most recently ended fiscal year and \$4 million (as adjusted for inflation beginning in 2016), which will be paid in quarterly installments of \$1 million with an additional payment each January to the extent 1% of NEP OpCo's annual EBITDA for the preceding fiscal year exceeds \$4 million (as adjusted for inflation beginning in 2016). NEP OpCo will also make certain payments

NEXTERA ENERGY PARTNERS, LP
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(unaudited)

to NEE based on the achievement by NEP OpCo of certain target quarterly distribution levels to its unitholders (incentive distribution rights, or IDRs). NEP's O&M expenses for the three and nine months ended September 30, 2014 include \$1 million related to payments made under the MSA. There was no expense for the three and nine months ended September 30, 2013 related to the MSA.

Cash Sweep and Credit Support Agreement - Effective July 1, 2014, NEP OpCo entered into a cash sweep and credit support agreement with NEER, under which NEER and certain of its subsidiaries may provide credit support in the form of letters of credit and guarantees to satisfy NEP's subsidiaries' contractual obligations. NEP OpCo will pay NEER an annual credit support fee based on the level and cost of the credit support provided, payable in quarterly installments. NEP's interest expense for the three and nine months ended September 30, 2014 includes less than \$1 million each related to payments made under the cash sweep and credit support agreement. There was no expense for the three and nine months ended September 30, 2013 related to the credit support agreement.

In addition, under this agreement, NEER and certain of its subsidiaries may withdraw funds received by NEP or its subsidiaries, including NEP OpCo, and hold those funds in accounts belonging to NEER or its subsidiaries to the extent the funds are not required to pay project costs or otherwise required to be maintained by NEP's subsidiaries. NEER and its subsidiaries may keep the funds until the financing agreements permit distributions to be made, or, in the case of NEP OpCo, until such funds are required to make distributions or to pay expenses or other operating costs or NEP OpCo otherwise demands the return of such funds. If NEER fails to return withdrawn funds when required by NEP's subsidiaries' financings, the lenders will be entitled to draw on credit support provided by NEER in the amount of such withdrawn funds. If NEER or one of its affiliates realizes any earnings on the withdrawn funds prior to the return of such funds, it will be permitted to retain those earnings. The cash sweep amounts held in accounts belonging to NEER or its subsidiaries as of September 30, 2014 and 2013, were approximately \$182 million and \$0, respectively, and are included in due from related parties in NEP's condensed consolidated balance sheets.

10. COMMITMENTS AND CONTINGENCIES

Land Use Commitments — The project owners are parties to various agreements that provide for payments to landowners for the right to use the land upon which the projects are located. These leases and easements can typically be renewed by the project owners for various periods. The annual fees range from minimum rent payments varying by lease to maximum rent payments of a certain percentage of gross revenues, varying by lease. Total lease expense was approximately \$3 million and \$2 million for the three months ended September 30, 2014 and 2013, respectively, and approximately \$8 million and \$6 million for the nine months ended September 30, 2014 and 2013, respectively, and is classified as operations and maintenance expenses in NEP's accompanying condensed consolidated statements of operations and comprehensive income (loss).

The Genesis Solar project's land lease includes a right-of-way lease/grant that provides for payments to the U.S. Bureau of Land Management (BLM) for the right to use the public lands upon which the project is located. The lease may be renewed at expiration at the Genesis Solar project's option and will be subject to the regulations existing at the time of renewal. As required by the terms of this lease, the Genesis Solar project obtained a surety bond in favor of BLM for approximately \$23 million. The surety bond will remain in effect until the BLM is satisfied that there is no outstanding liability on the bond or satisfactory replacement bond coverage is obtained.

As the base rent and the MW capacity fee payable to the BLM are both based on fair value, these payments are considered contingent rent and, therefore, expense is recognized as incurred.

The total minimum rental commitments at September 30, 2014 under these land use agreements are as follows:

Year Ending December 31,	Land Use Commitments (millions)
2014 (Remaining)	\$ 1
2015	4
2016	4
2017	4
2018	4
Thereafter	112
Total minimum land use payments	\$ 129

Development, Engineering and Construction Commitments — At September 30, 2014, Bluewater had several open engineering, procurement and construction contracts related to the procurement of materials and services. Those contracts have varying payment terms and some include performance obligations that allow Bluewater to receive liquidated damages if the contractor does not

NEXTERA ENERGY PARTNERS, LP
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Concluded)
 (unaudited)

perform. During the three months ended September 30, 2014, Bluewater purchased \$10 million under these contracts, which costs have been capitalized in construction work in progress. As of September 30, 2014, Bluewater has remaining commitments under these contracts of less than \$1 million.

Letter of Credit Facility — The Genesis Solar project entered into a letter of credit (LOC) facility (LOC facility), under which the LOC lender may issue standby letters of credit not to exceed approximately \$83 million, with a maturity date of August 15, 2017.

The purpose and amounts of letters of credit outstanding as of September 30, 2014 are as follows:

LOC Facility Purpose	Amount (millions)	Outstanding Dates
PPA security	\$25	9/9/2011 - Maturity
Large generator interconnection agreement obligations	12	9/23/2011 - Maturity
O&M reserve	10	12/2/2013 - Maturity
Debt service reserve	35	8/8/2014 - Maturity
Total	\$82	

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This discussion should be read in conjunction with the Notes to Condensed Consolidated Financial Statements (Notes) contained herein and Management's Discussion and Analysis of Financial Condition and Results of Operations (Management's Discussion) included in NEP's Prospectus. The unaudited condensed consolidated financial statements herein should be read in conjunction with NEP's combined financial statements for the years ended December 31, 2013 and 2012 contained in NEP's Prospectus. In the opinion of NEP management, all adjustments (consisting of normal recurring accruals) considered necessary for fair financial statement presentation have been made. The results of operations for an interim period generally will not give a true indication of results for the year, and the results of operations for the accounting predecessor are not indicative of the actual level of expense that would have been incurred had NEP operated as a publicly-traded company during the period prior to the completion of the offering.

Following NEP's offering, NEP has consolidated the results of NEP OpCo and its subsidiaries through its controlling interest in the general partner of NEP OpCo. NEP owns a 20.1% limited partnership interest in NEP OpCo and NEE Equity owns a noncontrolling 79.9% limited partnership interest in NEP OpCo. NEP's financial results are shown on a consolidated basis with financial results attributable to NEE Equity reflected in noncontrolling interest.

The discussion and analysis below has been organized as follows:

- overview, including a description of NEP's business and significant factors and trends that are important to understanding the results of operations and financial condition for the three and nine months ended September 30, 2014;

- results of operations, including an explanation of significant differences between the periods in the specific line items of the condensed consolidated statement of operations;

- liquidity and capital resources, addressing NEP's liquidity position, sources and uses of cash, capital resources and requirements, commitments and off-balance sheet arrangements;

- critical accounting policies, which are most important to both the portrayal of NEP's financial condition and results of operations, and which require management's most difficult, subjective or complex judgments; and

- quantitative and qualitative disclosures about market risk.

Overview

Company Description

NEP is a growth-oriented limited partnership formed by NEE to own, operate and acquire contracted clean energy projects with stable, long-term cash flows through NEP's limited partner interest in NEP OpCo. NEP owns a controlling, non-economic general partner interest and a 20.1% limited partner interest in NEP OpCo. NEP owns a portfolio of clean, contracted renewable assets consisting of ten wind and solar projects.

NEP intends to take advantage of favorable trends in the North American energy industry, including the ongoing trend of clean energy projects replacing aging or uneconomic projects, demand by utilities for renewable energy to meet state renewable portfolio standards (RPS) and the improving competitiveness of clean energy relative to other fuels. NEP plans to focus on high-quality, long-lived projects operating under long-term contracts with creditworthy counterparties that are expected to produce stable long-term cash flows. NEP believes its cash flow profile,

geographic and technological diversity, cost-efficient business model and relationship with NEE will provide NEP with a significant competitive advantage and will enable NEP to execute its growth strategy.

Edgar Filing: NextEra Energy Partners, LP - Form 10-Q

The following table sets forth the projects in NEP's initial portfolio and their respective commercial operation date, nameplate capacity, energy sale counterparty, contract expiration and the name and maturity date of project financing agreements:

Project	Commercial Operation Date	Resource	MW	Counterparty	Contract Expiration	Project Financing (Maturity)
Northern Colorado	September 2009	Wind	174.3	Public Service Company of Colorado	2029 (22.5 MW) / 2034 (151.8 MW)	Mountain Prairie (2030)
Elk City	December 2009	Wind	98.9	Public Service Company of Oklahoma	2030	Mountain Prairie (2030)
Perrin Ranch	January 2012	Wind	99.2	Arizona Public Service Company	2037	Canyon Wind (2030)
Moore	February 2012	Solar	20.0	Ontario Power Authority	2032	St. Clair (2031)
Sombra	February 2012	Solar	20.0	Ontario Power Authority	2032	St. Clair (2031)
Conestogo	December 2012	Wind	22.9	Ontario Power Authority	2032	Trillium (2033)
Tuscola Bay	December 2012	Wind	120.0	DTE Electric Company	2032	Canyon Wind (2030)
Summerhaven	August 2013	Wind	124.4	Ontario Power Authority	2033	Trillium (2033)
Genesis	November 2013 (125.0 MW) / March 2014 (125.0 MW)	Solar	250.0	Pacific Gas & Electric Co.	2039	Genesis (2038)
Bluewater	July 2014	Wind	59.9	Ontario Power Authority	2034	Bluewater (2032)
Total			989.6			

In October 2014, indirect subsidiaries of NEP OpCo entered into agreements to expand NEP's portfolio through two project acquisitions from NEER that are expected to close in the first quarter of 2015. See Note 1.

Significant Factors and Trends Affecting NEP's Business

NEP's results of operations and its ability to grow its business over time could be impacted by a number of factors and trends that affect NEP's industry generally, its initial portfolio and other projects it may acquire in the future. These factors and trends include government incentives in the U.S. and Canada and the increasing competitiveness of renewable energy.

Government Incentives

Government incentives in the U.S. and Canada have the effect of making the development of clean energy projects more competitive by providing credits for a portion of the development costs or by providing favorable contract prices. A loss or reduction in such incentives could decrease the attractiveness of clean energy projects to developers, including NEE, which could reduce NEP's future acquisition opportunities. Such a loss or reduction could also reduce NEP's willingness to pursue or develop certain clean energy projects due to higher operating costs or decreased revenues under its PPAs, RESOP Contracts and FIT Contracts.

U.S. federal, state and local governments and utilities have established various incentives to support the development of renewable energy. These incentives include accelerated tax depreciation, production tax credits (PTCs), investment

tax credits (ITCs), cash grants and RPS programs.

Wind and solar projects qualify for the U.S. federal Modified Accelerated Cost Recovery System depreciation schedule. This schedule allows a taxpayer to recognize the depreciation of tangible property on a five-year basis even though the useful life of such property is generally greater than five years.

The PTC is a U.S. federal incentive that provides a U.S. federal income tax credit on a cents per kilowatt-hour (kWh) basis for all qualifying energy produced by a qualifying U.S. wind project during the first ten years after the project commences commercial operations. The PTC is no longer available for new wind projects unless they were “under construction” by the end of 2013 and the developer uses “continuous efforts” towards commencing commercial operations. Under Internal Revenue Service (IRS) guidance, projects which were under construction by the end of 2013 and have commenced commercial operations by the end of 2015 will be deemed to have used continuous efforts. The expiration of the PTC has not impacted and will not impact any of the projects in NEP's initial portfolio as none of the projects elected to receive PTCs.

The ITCs and CITCs are U.S. federal incentives that are available after a project commences commercial operations and provide an income tax credit or cash grant for between 10% and 30% of eligible installed costs. A solar project must have begun construction by the end of 2011 and have commenced commercial operations on or before December 31, 2016 in order to qualify for the CITC. Alternatively, a solar project must commence commercial operations on or before December 31, 2016 to qualify for the 30% ITC. A solar project that commences commercial operations after December 31, 2016, may qualify for an ITC equal to 10% of eligible installed costs.

NEE has applied for and received CITCs for Tuscola Bay, Perrin Ranch, Elk City, Northern Colorado and the Genesis Solar project. CITCs are treated as a 15% reduction (i.e., one half of the grant amount) to the tax basis of the property, plant and equipment and reduce the related depreciation over the useful life of the project.

RPS are state regulatory programs created by state legislatures to encourage the development of renewable energy. They typically require utilities to produce or procure a certain percentage of their energy needs from renewable energy. According to the DOE, twenty-nine states and the District of Columbia currently have an RPS in place and eight other states have non-binding goals supporting renewable energy. Most states with mandatory RPS programs typically set a target between 10% and 30% of total energy capacity, while other states set a MW target to achieve their RPS goals. Additionally, several states have pending legislation to adopt new RPS programs. NEP expects RPS programs to continue to increase demand by utilities for renewable energy in order to meet state RPS requirements.

Canada. Canada is a world leader in the production and use of clean energy as a percentage of its total energy needs. While a majority of Canada's energy is produced by hydro energy, non-hydro renewable energy is providing an increasing proportion of energy generation each year. Government incentives at the provincial level continue to drive the growth of renewable energy in Canada. Provincial governments have been supportive of renewable energy in general, and wind energy in particular, through renewable energy targets and incentive plans.

Ontario has been a leader in supporting the development of renewable energy in Canada. Ontario's Long-Term Energy Plan, released in December 2013 by the Ontario Ministry of Energy, suggests that by 2021, 10.7 gigawatts of non-hydro renewable energy will be online in the province.

Increasing Competitiveness of Renewable Energy

Renewable energy technology and installation costs have improved meaningfully in recent years. Wind technology has improved as a result of taller towers, longer blades and more efficient energy conversion equipment, which allow wind projects to more efficiently capture wind resource and produce more energy. Over the last ten years technology improvements have decreased the cost of wind energy in the U.S. between 24% and 39% depending on wind speed, according to International Energy Agency estimates. Solar technology is also improving as solar cell efficiencies improve and installation costs decline. Since the start of 2010, the total average installed cost of utility-scale solar has declined over 50%, according to Bloomberg New Energy Finance.

Impact of increasingly stringent environmental rules and regulations on coal-fired generation

Traditional coal-fired plants emit greenhouse gases and other pollutants. The U.S. Environmental Protection Agency (EPA) is responsible for implementing rules and regulations to protect the environment, including rules and regulations that limit emissions of greenhouse gases and other pollutants from coal-fired plants. A number of new EPA rules are emerging that are expected to impact many coal-fired plants in the U.S. While there is some uncertainty as to the timing, requirements and compliance dates that will ultimately be imposed by these rules, NEP expects that the owners of some of the smaller, older or less efficient coal-fired plants will choose to decommission these facilities rather than make the significant financial investments in these plants that will be necessary to comply with environmental rules and regulations. In addition, a continuation of lower natural gas prices will put additional pressure on these plants.

Significant Factors Affecting Results of Operations and Financial Condition

Significant factors that could affect NEP's results of operations and financial condition are:

- wind and solar resource levels, weather conditions and the operational performance of NEP's initial portfolio;

• timing of commencement of commercial operations of NEP's initial portfolio;
• financings; and
• O&M expenses.

Wind and Solar Resource, Weather Conditions and the Performance of NEP's Initial Portfolio

Wind and solar resource levels, weather conditions and the performance of NEP's initial portfolio represent significant factors that could affect its operating results because these variables impact energy sales.

Energy produced from NEP's initial portfolio depends primarily on wind and solar resource levels, weather conditions at each project and the related impact of each on the performance of the projects. NEP's energy production estimates are based on internal and third-party long-term meteorological information, which includes data collected from equipment located at the project in some cases, wind and solar data from other sources and equipment power curve estimates.

NEP's wind analysis evaluates wind speed and prevailing direction, atmospheric conditions, wake and seasonal variations for each project. NEP's solar analysis evaluates solar irradiance levels and prevailing direction, atmospheric conditions, and seasonal variations for each project. The result of these analyses is a probabilistic assessment of a project's energy production, which is expressed through "P levels." A P level is the amount of annual energy production that a particular project or group of projects will

meet or exceed P% of the time. For example, an annual P50 production level of 100 megawatt hours (MWh) means that a particular project or group of projects is expected to produce at least 100 MWh per year in 50 out of every 100 years. Similarly, an annual P95 production level of 100 MWh means that a particular project or group of projects is expected to produce at least 100 MWh per year in 95 out of 100 years.

NEP's revenue forecasts are based on resource variability of wind around a P50 production level measured on an annual basis. A P50 production level is used as the foundation for NEP's financial forecast. NEP uses P75, P90 and P95 production levels measured on an annual basis as sensitivities or potential variability of output relative to its financial forecast and expectations. In addition, NEP typically uses a P90 production level to determine the appropriate amount of indebtedness for each project.

As stated above, P50, P75, P90 and P95 variability analysis is measured on an annual basis. Relative variability increases as the measurement period shortens, so it is likely that NEP will experience increased variability on a monthly or quarterly basis than on an annual basis. Therefore, the monthly and quarterly cash flow and payout ratios are likely to reflect more variability when compared to the annual cash flow and payout ratios. NEP also expects seasonal variability to occur. NEP expects to use cash reserves and NEP OpCo's revolving credit facility to help manage short-term production and cash flow variability and the related impact on cash available for distribution to its unitholders.

The variability of output of a portfolio of projects is less than the average of the individual variability of the projects. This is referred to as the "portfolio effect." The larger and more diverse the portfolio, the lower the expected variability. NEP's initial portfolio is large enough and diverse enough to produce a meaningful reduction in overall variability, as demonstrated in the following chart:

	P95 ^(a)	P90 ^(a)	P75 ^(a)
No portfolio effect	84%	87%	93%
Portfolio effect	88%	91%	95%

(a) As a percentage of P50.

As shown in the table above, the portfolio effect results in a reduction in the production variability in NEP's initial portfolio.

NEP and its project lenders use annual energy production forecasts, including probability analysis, to evaluate the ability of a project to make debt service payments and to determine the nature and size of project-level debt and liquidity features, such as debt service reserves or letter of credit facilities. To date, none of the projects in NEP's initial portfolio has been restricted from making distributions under the terms of the project-level financing agreements.

Financings

NEP intends to use a portion of its cash flows for interest and principal payments on borrowings under various financing arrangements. Interest expense reflects periodic interest on project-level debt of the initial portfolio and interest on borrowings, if any, under NEP OpCo's revolving credit facility. Changes in interest rates could impact the amount of interest due under these financings, to the extent the interest expense is not hedged under a swap agreement.

Principal payments under existing project financings are due on a semi-annual basis. The following table shows certain characteristics of NEP's various project financings:

Edgar Filing: NextEra Energy Partners, LP - Form 10-Q

Project Financing	Principal Payments	Maturity	Principal Amount Outstanding as of September 30, 2014 (in millions)	Principal payments for Twelve Months Ended September 30, 2015 (U.S. dollars in millions)	Principal Payable Thereafter ^(a)
Mountain Prairie	June and December	2030	\$284	\$8	\$276
St. Clair	February and August	2031	CAD 157	7	133
Canyon	March and September	2030	\$211	12	199
Trillium	February and August	2033	CAD 309	8	268
Genesis	February and August	2038	\$515	37	478
Genesis	March and September	2038	\$280	—	280
Bluewater	June and December	2032	CAD 170	4	147
Total				\$76	\$1,781

^(a) The amortization of project financings is principally related to the length of the applicable PPA, FIT Contract or RESOP Contract.

Expenses

NEP's O&M expenses are expected to increase by approximately \$4 million per year as a result of becoming a publicly-traded limited partnership. This increase will be due, in part, to increased third-party accounting services, filing reports with the SEC, independent auditor fees, investor relations activities, directors' fees, compensation and expenses, directors' and officers' insurance, stock exchange listing fees, registrar and transfer agent fees and other expenses. NEP OpCo will reimburse NEP for such expenses. During the three months ended September 30, 2014, NEP's financial statements reflect the impact of these increased expenses, which affect, and will continue to affect, the comparability of NEP's accounting predecessor's historical financial statements for periods prior to the completion of the offering.

NEP OpCo's O&M expenses, including the impact of the recently announced acquisitions of Palo Duro and Shafter discussed above, are expected to increase by approximately \$6 million per year as a result of the annual management fee equal to the greater of 1% of NEP OpCo's EBITDA (net income plus interest expense, income tax expense, depreciation and amortization less certain non-cash, non-recurring items) or \$4 million (as adjusted for inflation beginning in 2016), and the \$2 million annual credit support fee, which will be paid by NEP OpCo in quarterly installments. NEP's financial statements for the three and nine months ended September 30, 2014 reflect, and for subsequent periods will reflect, the impact of this increased expense, which affects the comparability of its accounting predecessor's historical financial statements for periods prior to the completion of the offering.

O&M expenses related to the initial portfolio are expected to remain relatively stable from year to year. However, O&M expenses are likely to be higher for the year ending December 31, 2014, as compared to historical periods due to the timing of commencement of commercial operations at a number of the projects in the initial portfolio, which will affect the comparability of NEP's accounting predecessor's historical financial statements for periods prior to the completion of the offering. NEP's O&M expenses are likely to increase as it acquires new projects.

Results of Operations

Three Months Ended September 30, 2014, Compared to Three Months Ended September 30, 2013

Operating Revenues

Operating revenues primarily consist of income from the sale of energy under NEP's PPAs, RESOP Contracts and FIT Contracts. Operating revenues increased \$61 million during the three months ended September 30, 2014, as compared to the three months ended September 30, 2013, primarily due to the commencement of commercial operations at Summerhaven in August 2013, Genesis Unit 1 in November 2013, Genesis Unit 2 in March 2014 and Bluewater in July 2014.

	Three Months Ended September 30,		
	2014	2013	
	(dollars in millions)		
Operating revenues	\$89	\$28	
Generation	541 GWh	(a) 283 GWh	(a)

(a) gigawatt hours

Operating Expenses

Operations and Maintenance

O&M expenses include interconnection costs, labor expenses, turbine servicing costs, lease royalty payments, property taxes, insurance, materials, supplies, shared services and administrative expenses attributable to NEP's projects, and costs and expenses under administrative services agreements (ASAs) and O&M agreements. O&M expenses also include the cost of maintaining and replacing certain parts for the projects in the initial portfolio to maintain, over the long-term, operating income or operating capacity. O&M expense increased \$7 million for the three months ended September 30, 2014, as compared to the three months ended September 30, 2013, primarily due to the commencement of commercial operations at Summerhaven in August 2013, Genesis Unit 1 in November 2013, Genesis Unit 2 in March 2014 and Bluewater in July 2014.

Depreciation and Amortization

Depreciation and amortization expense reflects costs associated with depreciation and amortization of NEP's assets, based on consistent depreciable asset lives and depreciation methodologies. For all of the U.S. projects, NEP elected to receive CITCs, which are recorded as a reduction in property, plant and equipment, net on the condensed consolidated balance sheets and are amortized as a reduction to depreciation and amortization expense over the estimated life of the related property. Depreciation expense also includes a provision for wind and solar facility dismantlement, interim asset removal costs and accretion related to asset retirement obligations.

Depreciation and amortization increased \$10 million during the three months ended September 30, 2014, as compared to the three months ended September 30, 2013, primarily due to the commencement of commercial operations at Summerhaven in August 2013, Genesis Unit 1 in November 2013, Genesis Unit 2 in March 2014 and Bluewater in July 2014.

Other Income (Deductions)

Interest Expense

Interest expense primarily consists of interest under project financings, partially offset by interest capitalization on qualified expenditures. Interest expense increased \$16 million during the three months ended September 30, 2014, as compared to the three months ended September 30, 2013, primarily due to entering into a financing (Trillium) for the Conestogo and Summerhaven Projects for approximately CAD 315 million in December 2013, \$88 million of incremental borrowings under the Genesis Solar project bank loan and a new financing of \$280 million for the Genesis Solar project in June 2014, as well as lower capitalized interest associated with the conclusion of construction of Genesis Unit 1 in November 2013 and Genesis Unit 2 in March 2014.

Income Taxes

For periods ended prior to July 1, 2014, income taxes are calculated on the predecessor method using the separate return method for each of the project entities structured as limited liability companies or corporations. Income taxes are not included for entities that are structured as flow through entities (partnerships).

Effective July 1, 2014, NEP recognized the effects of the initial public offering and for periods ended after July 1, 2014, reflected income taxes on the successor method where taxes are calculated for NEP as a single taxpaying corporation for U.S federal and state income tax purposes. Because NEP OpCo is a limited partnership electing to be taxed as a partnership, NEP only recognizes

in income its 20.1% proportionate share of U.S. income taxes related to both the US and Canadian projects, allocated by NEP OpCo. The Canadian subsidiaries are all Canadian taxpayers, and therefore, NEP recognizes in income all of the Canadian taxes.

For periods ended after July 1, 2014, income tax expense includes 20.1% of U.S. taxes and 100% of Canadian taxes. Net income or loss attributable to noncontrolling interest includes no U.S. taxes and 79.9% of Canadian taxes. Net income attributable to NEP includes 20.1% of U.S. and Canadian taxes.

Statement of Operations	Tax Allocation	
	U.S.	Canadian
Net income attributable to noncontrolling interest	0.0%	79.9%
Net income attributable to NEP	20.1%	20.1%
Total income taxes allocated to NEP	20.1%	(a) 100.0%

NEP only recognizes its share of U.S. income taxes in its condensed consolidated financial statements. U.S. (a) income taxes related to non-controlling interest are not reflected in NEP's condensed consolidated financial statements.

For the three months ended September 30, 2014, NEP recorded income tax expense of \$2 million, resulting in an effective tax rate of 8%. The tax expense is comprised of income tax of \$9 million at the statutory rate of 35% offset by \$7 million of taxes attributable to noncontrolling interest.

For the three months ended September 30, 2013, NEP recorded income tax expense of \$1 million resulting in an effective tax rate of (100%). The tax expense was largely driven by valuation allowances against deferred tax assets, partially offset by CITC benefit, both at Genesis.

Due to the transition from predecessor to successor method of accounting for income taxes, comparing current period results to the same period in the prior year does not provide meaningful information.

Nine Months Ended September 30, 2014, Compared to Nine Months Ended September 30, 2013

Operating Revenues

Operating revenues primarily consist of income from the sale of energy under NEP's PPAs, RESOP Contracts and FIT Contracts. Operating revenues increased approximately \$141 million during the nine months ended September 30, 2014, as compared to the nine months ended September 30, 2013, primarily due to the commencement of commercial operations at Summerhaven in August 2013, Genesis Unit 1 in November 2013, Genesis Unit 2 in March 2014 and Bluewater in July 2014.

	Nine Months Ended September 30,	
	2014	2013
	(dollars in millions)	
Operating revenues	\$235	\$94
Generation	2,025 GWh	1,300 GWh

Operating Expenses

Operations and Maintenance

O&M expenses include interconnection costs, labor expenses, turbine servicing costs, lease royalty payments, property taxes, insurance, materials, supplies, shared services and administrative expenses attributable to NEP's projects, and costs and expenses under ASAs and O&M agreements. O&M expenses also include the cost of maintaining and replacing certain parts for the projects to maintain, over the long-term, operating income or operating capacity. O&M expenses increased approximately \$20 million for the nine months ended September 30, 2014, as compared to the nine months ended September 30, 2013, primarily due to the commencement of commercial operations at Summerhaven in August 2013, Genesis Unit 1 in November 2013, Genesis Unit 2 in March 2014 and Bluewater in July 2014. In addition, O&M expenses increased approximately \$3 million due to costs associated with the formation of certain entities, which were funded by NEER through an equity contribution.

Depreciation and Amortization

Depreciation and amortization expense reflects costs associated with depreciation and amortization of NEP's assets, based on consistent depreciable asset lives and depreciation methodologies. For all of NEP's U.S. projects, CITCs were elected, which are recorded as a reduction in property, plant and equipment—net on the condensed consolidated balance sheets and are amortized

as a reduction to depreciation and amortization expense over the estimated life of the related property. Depreciation expense also includes a provision for wind and solar facility dismantlement, interim asset removal costs and accretion related to asset retirement obligations. Depreciation and amortization increased approximately \$29 million during the nine months ended September 30, 2014, as compared to the nine months ended September 30, 2013, primarily due to the commencement of commercial operations at Summerhaven in August 2013, Genesis Unit 1 in November 2013, Genesis Unit 2 in March 2014 and Bluewater in July 2014.

Other Income (Deductions)

Interest Expense

Interest expense primarily consists of interest accrued under the project financings, partially offset by interest capitalization on qualified expenditures. Interest expense increased approximately \$38 million during the nine months ended September 30, 2014, as compared to the nine months ended September 30, 2013, primarily due to entering into a financing (Trillium) for the Conestogo and Summerhaven Projects for approximately CAD 315 million in December 2013, \$88 million of incremental borrowings under Genesis' bank loan and a new financing of \$280 million for the Genesis Solar project in June 2014, as well as lower capitalized interest associated with the conclusion of construction of Genesis Unit 1 in November 2013 and Genesis Unit 2 in March 2014.

Gain on Settlement of Contingent Consideration of Project Acquisition

Gain on settlement of contingent consideration of project acquisition for the nine months ended September 30, 2013 of \$5 million resulted primarily from a change in estimated contingent consideration related to the acquisition of the Moore and Sombra projects. There was no similar adjustment during the nine months ended September 30, 2014.

Income Taxes

Income tax reflected for the nine months ended September 30, 2014, is \$13 million resulting in an effective tax rate of 20%, and includes the sum of \$11 million calculated using the predecessor method related to periods prior to the initial public offering and \$2 million calculated using the successor method for periods subsequent to the initial public offering. The drivers of the tax expense are the following: income tax of \$23 million at the statutory rate of 35% offset by \$7 million of taxes attributable to noncontrolling interest; \$11 million valuation allowance on deferred tax assets of Genesis, offset by \$12 million tax benefit from CITC of Genesis; state income taxes of \$1 million and a tax benefit from flow through entities in the predecessor financial statements of \$3 million.

Income tax for the nine months ended September 30, 2013, is \$10 million, resulting in an effective tax rate of 56%. The drivers of the tax expense are the following: income tax of \$6 million at the statutory rate of 35%; \$20 million valuation allowance on deferred tax assets of Genesis, offset by \$15 million tax benefit from CITC of Genesis; state income taxes of \$1 million and a tax benefit from flow through entities in the predecessor financial statements of \$2 million.

Due to the transition from predecessor to successor method of accounting for income taxes, comparing current period results to the same period in the prior year does not provide meaningful information.

LIQUIDITY AND CAPITAL RESOURCES

NEP's business requires substantial capital to fund:

- current O&M costs;

- debt service payments;
- distributions to holders of common units;
- maintenance and expansion capital expenditures and other investments;
- unforeseen events; and
- other business expenses.

Prior to the completion of the offering and for the three months ended September 30, 2014, NEP's operations largely relied on, and for subsequent periods are expected to continue to largely rely on, internally generated cash flow. NEP expects to satisfy its future capital requirements through a combination of cash on hand, cash flow from operations, borrowings under existing and anticipated future financing arrangements. These sources of funds are expected to be adequate to provide for NEP's short-term and long-term liquidity and capital needs. However, NEP is subject to business and operational risks that could adversely affect its cash flow. A material decrease in cash flows would likely produce a corresponding adverse effect on NEP's borrowing capacity.

As a normal part of its business, depending on market conditions, NEP expects from time to time to consider opportunities to repay, redeem, repurchase or refinance its indebtedness. In addition, NEP expects from time to time to consider potential investments in new acquisitions. These events may cause NEP to seek additional debt or equity financing, which may not be available on acceptable terms or at all. Debt financing, if available, could impose additional cash payment obligations, additional covenants and operating restrictions.

NEP OpCo has agreed to allow NEER or one of its affiliates to withdraw funds received by its subsidiaries, including NEP OpCo, and to hold those funds in accounts of NEER or one of its affiliates to the extent the funds are not required to pay project costs or otherwise required to be maintained by NEP's subsidiaries, until the financing agreements permit distributions to be made, or, in the case of NEP OpCo, until such funds are required to make distributions or to pay expenses or other operating costs. If NEER fails to return withdrawn funds when required by NEP's subsidiaries' financings, the lenders will be entitled to draw on credit support provided by NEER in the amount of such withdrawn funds. In addition, NEP OpCo will have a claim for any funds that NEER fails to return:

- when required by its subsidiaries' financings;
- when its subsidiaries' financings otherwise permit distributions to be made to NEP OpCo;
- when funds are required to be returned to NEP OpCo; or
- when otherwise demanded by NEP OpCo.

If NEER or one of its affiliates realizes any earnings on the withdrawn funds prior to the return of such funds, it will be permitted to retain those earnings.

Liquidity Position

At September 30, 2014 and December 31, 2013, NEP's liquidity position was approximately \$369 million and \$63 million, respectively. The table below provides the components of NEP's liquidity position as of September 30, 2014 and December 31, 2013:

	September 30, 2014 (millions)	December 31, 2013
Cash and cash equivalents	\$118	\$27
Revolving credit facility	250	—
Letter of credit facilities - Genesis	83	83
Less letters of credit	(82) (47
Total ^(a)	\$369	\$63

Excludes restricted cash of approximately \$4 million and \$2 million at September 30, 2014 and December 31, (a)2013, respectively. The restricted cash at September 30, 2014 includes CITC cash for use in mandatory debt repayments as required by the Genesis financing agreement.

Management believes that NEP's liquidity position and cash flows from operations will be adequate to finance O&M, capital expenditures, distributions to its unitholders and liquidity commitments. Management continues to regularly monitor NEP's financing needs consistent with prudent balance sheet management.

Financing Arrangements

Revolving Credit Facility

In connection with the offering, on July 1, 2014, the Loan Parties entered into a \$250 million revolving credit facility. For a discussion of the terms of the revolving credit facility, see Note 6.

Project Financings

Projects in the initial portfolio are subject to project financings that contain certain financial covenants and distribution tests, including debt service coverage ratios. In general, these project financings contain representations,

warranties and covenants that are customary for these types of financings, including limitations on investments and restricted payments. Generally, NEP's project financings provide for interest payable at a fixed interest rate. However, two of NEP's project financings accrue interest at variable rates based on the LIBOR and one project accrues interest at a variable rate based upon the three-month CDOR. Several interest rate swaps were entered into for two of these financings to hedge against interest rate movements with respect to interest payments on the loan. Under the project financings, each project will be permitted to pay distributions out of available cash on a semi-annual basis so long as certain conditions are satisfied, including that reserves are funded with cash or credit support, no default or event of default under the applicable financings has occurred and is continuing at the time of such distribution or would result therefrom, and each project is otherwise in compliance with the project financing's covenants and the applicable minimum debt service coverage ratio is satisfied. The minimum debt service coverage ratio that must be satisfied under all of NEP's project financings is 1.20:1.00. At September 30, 2014, each of the applicable NEP subsidiaries was in compliance with all covenants under its project financings and its debt service coverage ratios equaled or exceeded 1.20:1.00 in all periods subsequent to obtaining each financing.

Contractual Obligations

NEP's contractual obligations as of September 30, 2014 were as follows:

	2014 (millions)	2015	2016	2017	2018	Thereafter	Total
Contractual Obligations							
Long-term debt, including interest ^(a)	\$ 19	\$ 171	\$ 174	\$ 172	\$ 159	\$ 2,237	\$ 2,932
Asset retirement activities ^(b)	—	—	—	—	—	102	102
Land lease payments ^(c)	1	4	4	4	4	112	129
Total	\$ 20	\$ 175	\$ 178	\$ 176	\$ 163	\$ 2,451	\$ 3,163

(a) Includes principal, interest and interest rate swaps. Variable rate interest was computed using September 30, 2014 rates.

(b) Represents expected cash payments adjusted for inflation for estimated costs to perform asset retirement activities.

(c) Represents various agreements that provide for payments to landowners for the right to use the land upon which the projects are located.

Capital Expenditures

Annual capital spending plans are developed based on projected requirements by the projects. Capital expenditures primarily represent the estimated cost of acquisitions or capital improvements, including construction expenditures that are expected to increase over the long-term, NEP OpCo's operating income or operating capacity. Capital expenditures for projects that have already commenced commercial operations are generally not significant because most expenditures relate to repairs and maintenance and are expensed when incurred. For the nine months ended September 30, 2014 and 2013, NEP had capital expenditures of approximately \$186 million and \$656 million, respectively. At September 30, 2014, estimated capital expenditures for the remainder of 2014 are approximately \$25 million, primarily for the completion of construction of the Bluewater facility, which funding was provided by NEER. There are no significant planned capital expenditures for 2016 through 2018. These estimates are subject to continuing review and adjustment and actual capital expenditures may vary significantly from these estimates.

Cash Distributions to Unitholders

NEP's partnership agreement requires it to distribute available cash quarterly. Generally, available cash is all cash on hand at the date of determination in respect of such quarter (including any expected distributions from NEP OpCo), less the amount of cash reserves established by NEP's general partner. NEP currently expects that cash reserves would be established solely to provide for the payment of income taxes payable by NEP, if any. Cash flow is generated from distributions NEP receives from NEP OpCo each quarter and, during the purchase price adjustment period, from NEE Equity, which payments will be funded solely by any distributions NEE Equity receives from NEP OpCo with respect to such quarter. Although NEP currently expects that cash reserves would be established solely to provide for the payment of any of NEP's income taxes as described above, NEP expects NEP OpCo to establish cash reserves prior to making distributions to NEP to pay costs and expenses of NEP's subsidiaries, in addition to NEP's expenses, as well as any debt service requirements and future capital expenditures. During the purchase price adjustment period, should NEP OpCo not make a quarterly distribution in an amount at least equal to the minimum quarterly distribution of \$0.1875 per common unit, the purchase price will be reduced by the difference for such quarter and NEE Equity will pay NEP a purchase price adjustment equal to such shortfall, provided that NEE Equity will not be required to pay a purchase price adjustment in any quarter in excess of the distribution actually received by NEP OpCo.

Edgar Filing: NextEra Energy Partners, LP - Form 10-Q

NEP OpCo will distribute all of its available cash (as defined in NEP OpCo's partnership agreement) to its unitholders, including NEP, each quarter. The majority of such available cash will be derived from the operations of the projects. The cash available for distribution is likely to fluctuate from quarter to quarter, and in some cases significantly, as a result of the performance of the projects, seasonality, maintenance and outage schedules and other factors.

Cash Flows

Nine Months Ended September 30, 2014, Compared to Nine Months Ended September 30, 2013

The following table reflects the changes in cash flows for the comparative periods:

Nine Months Ended September 30,	2014	2013	Change
	(millions)		
Net cash provided by operating activities	\$ 122	\$ 58	\$ 64
Net cash provided by (used in) investing activities	\$(240)	\$(287)	\$ 47
Net cash provided by (used in) financing activities	\$ 211	\$ 225	\$(14)

Net Cash Provided by Operating Activities

Changes in net cash provided by operating activities were driven by higher cash flows from projects that commenced commercial operations after September 2013. These projects included Summerhaven, Genesis Unit 1, Genesis Unit 2 and Bluewater.

Net Cash Provided by (Used in) Investing Activities

Changes in net cash provided by (used in) investing activities were driven by decreased capital expenditures related to construction activities, proceeds received in 2014 for CITCs, cash used in 2014 to acquire membership interest in subsidiary and changes in restricted cash balances related to the timing of construction payments, primarily for the Genesis Solar project.

	2014	2013
Nine Months Ended September 30,	(millions)	
Capital expenditures	\$(110) \$(536
Proceeds from CITCs	306	—
Payments to related parties under cash sweep agreement—net	(143) —
Acquisition of membership interest in subsidiary	(288) —
Changes in restricted cash	(5) 245
Other	—	4
Net cash provided by (used in) investing activities	\$(240) \$(287

Net Cash Provided by (Used in) Financing Activities

Changes in net cash provided by (used in) financing activities were primarily driven by the initial public offering proceeds and the retirement of long-term debt mainly associated with the Genesis Solar project's mandatory debt repayment with CITC proceeds.

	2014	2013
Nine Months Ended September 30,	(millions)	
Member contributions – net	\$126	\$188
Initial public offering proceeds	438	—
Issuances (retirements) of long-term debt – net	(352) 42
Other	(1) (5
Net cash provided by (used in) financing activities	\$211	\$225

Critical Accounting Policies and Estimates

NEP's significant accounting policies are described in Note 2 to the unaudited condensed consolidated financial statements, which were prepared under generally accepted accounting principles. Critical accounting policies are those that NEP believes are both most important to its financial condition and results of operations, and require complex, subjective judgments, often as a result of the need to make estimates and assumptions about the effect of matters that are inherently uncertain. Judgments and uncertainties affecting the application of those policies may result in materially different amounts being reported under different conditions or using different assumptions. The following policies are those considered to be the most critical in understanding the judgments that are involved in preparing the condensed consolidated financial statements.

Income Taxes

The U.S. project entities presented in these financial statements were historically included in the consolidated federal income tax return of NEE. Income taxes as presented herein attribute current and deferred income taxes to the U.S. project entities in a manner that is systematic, rational and consistent with the asset and liability method prescribed by Accounting Standards Codification Topic (ASC) 740, "Accounting for Income Taxes." Accordingly, with regard to periods prior to July 1, 2014, the U.S. project entities' income tax provisions are prepared under the separate return method. The separate return method applies ASC 740 to the stand-alone financial statements of each member of the consolidated group as if the group member were a separate taxpayer and a stand-alone enterprise. Accordingly, the sum of the amounts allocated to the U.S. project entities' provisions may not equal the income taxes that would have resulted from a consolidated filing of these entities.

The Canadian project entities have not been included in the consolidated U.S. tax filing of NEE, as they are excluded from the U.S. federal income tax group. The Moore and Sombra project entities, as well as St. Clair and Varna (owner of Bluewater), were Canadian corporations that filed separate Canadian income tax returns and taxes have been provided herein on that basis. The Summerhaven and Conestogo project entities, as well as the Trillium entities, are Canadian limited partnerships from which virtually

all of the tax attributes flow through to the owner, a Canadian corporation, which is not a predecessor entity. None of the income nor any tax attributes of the flow through entities flow through to a U.S. taxpayer and are not reflected in any U.S. tax return. Because of their flow-through nature, no income taxes have been provided with regard to these entities for periods prior to July 1, 2014.

As of July 1, 2014, the date of the completion of the offering, NEP is no longer part of NEE's consolidated federal income tax filing group. NEE will file separate income tax returns for U.S. federal and state income tax purposes that will include its share of flow through income from NEP OpCo, and all of the underlying project companies, both U.S. and Canadian.

Taxes for the three months ended September 30, 2014 reflect the tax filing position of NEP as a separate taxpayer and include its share of taxes on the income flowing through from NEP OpCo. Canadian taxes on Canadian projects continue to be reflected in NEP's condensed consolidated financial statements. Taxes for the nine months ended September 30, 2014 reflect a combination of six months of taxes on the predecessor basis of accounting and three months of taxes on the separate filing basis.

Deferred income taxes arise from temporary differences between the tax and financial statement recognition of revenue and expense. In evaluating NEP's ability to recover its deferred tax assets individually by entity and by taxing jurisdiction, NEP considers all available positive and negative evidence, including scheduled reversals of deferred tax liabilities, projected future taxable income, tax planning strategies and recent financial operations. In projecting future taxable income, NEP begins with historical results and incorporates assumptions including the amount of future state, federal and foreign pretax operating income, the reversal of temporary differences and the implementation of feasible and prudent tax planning strategies. These assumptions require significant judgment about the forecasts of future taxable income and are consistent with the plans and estimates NEP is using to manage the underlying businesses. In evaluating the objective evidence that historical results provide, NEP generally considers three years of cumulative operating income (loss).

ASC 740 provides that a tax benefit from an uncertain tax position will be recognized when it is more likely than not that the position will be sustained upon examination, including resolutions of any related appeals or litigation processes, based on the technical merits. ASC 740 also provides guidance on measurement, derecognition, classification, interest and penalties, accounting in interim periods, and disclosure and transition. There are no material uncertain tax positions recognized in the financial statements.

NEP recognizes tax liabilities in accordance with ASC 740 and adjusts these liabilities when its judgment changes as a result of the evaluation of new information not previously available. Because of the complexity of some of these uncertainties, the ultimate resolution may result in a payment that is materially different from NEP's current estimate of the tax liabilities. These differences will be reflected as increases or decreases to income tax expense in the period in which they are determined.

Impairment of Long-Lived Assets

NEP evaluates long-lived assets for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable.

An impairment loss is required to be recognized if the carrying value of the asset exceeds the undiscounted future net cash flows associated with the asset. The impairment loss to be recognized is the amount by which the carrying value of the long-lived asset exceeds the asset's fair value. In most instances, the fair value is determined by discounting estimated future cash flows using an appropriate interest rate.

The amount of future net cash flows, the timing of such cash flows and the determination of an appropriate interest rate all involve estimates and judgments about future events. In particular, the aggregate amount of cash flows determines whether an impairment exists, and the timing of the cash flows is critical in determining fair value for the purposes of determining the impairment loss to be recognized. Because each assessment is based on the facts and circumstances associated with each long-lived asset, the effects of changes in assumptions cannot be generalized.

Quantitative and Qualitative Disclosures about Market Risk

NEP is exposed to several market risks in its normal business activities. Market risk is the potential loss that may result from market changes associated with its business. The types of market risks include interest rate and counterparty credit risks.

Interest Rate Risk

NEP is exposed to risk resulting from changes in interest rates associated with current and future issuances of debt. The debt of some of its subsidiaries accrues interest at fixed rates and the debt of some of its other subsidiaries accrues interest at variable rates. NEP manages interest rate exposure by monitoring current interest rates, entering into interest rate swap contracts and using a combination of fixed rate and variable rate debt. Interest rate swaps are used to mitigate or adjust interest rate exposure when appropriate based upon market conditions or when required by financing agreements.

NEP has long-term debt instruments that subject it to the risk of loss associated with movements in market interest rates. As of September 30, 2014, less than 10% of the long-term debt, including current maturities, was exposed to such risk as the balance was either financially hedged or comprised of fixed rate debt. As of September 30, 2014, the estimated fair value of NEP's debt

was approximately \$1.9 billion and the carrying value of the debt was \$1.9 billion. Based upon a hypothetical 10% decline in interest rates, which is a reasonable near-term market change, the fair value of NEP's long-term debt would increase by approximately \$36 million.

Counterparty Credit Risk

Risks surrounding counterparty performance and credit risk could ultimately impact the amount and timing of expected cash flows. Credit risk relates to the risk of loss resulting from non-performance or non-payment by counterparties under the terms of their contractual obligations. NEP intends to monitor and manage credit risk through credit policies that include a credit approval process and the use of credit mitigation measures such as prepayment arrangements in certain circumstances. NEP also seeks to mitigate counterparty risk by having a diversified portfolio of counterparties. In addition, the projects in NEP's initial portfolio are fully contracted to creditworthy counterparties with a capacity-weighted average Moody's Investor Service, Inc. credit rating of A2 under long-term contracts that will have a capacity-weighted average remaining contract term of approximately 21 years as of September 30, 2014.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

See Management's Discussion - Quantitative and Qualitative Disclosures About Market Risk.

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

As of September 30, 2014, NEP had performed an evaluation, under the supervision and with the participation of its management, including the chief executive officer and chief financial officer of NEP GP, the general partner of NEP, of the effectiveness of the design and operation of NEP's disclosure controls and procedures (as defined in the Securities Exchange Act of 1934 Rules 13a-15 (e) and 15d-15(e)). Based upon that evaluation, the chief executive officer and the chief financial officer of NEP GP concluded that NEP's disclosure controls and procedures are not effective at a reasonable assurance level to ensure that information required to be disclosed in reports that are filed or submitted under the Securities Exchange Act of 1934 are recorded, processed, summarized and reported within time periods specified in SEC rules and forms, as of September 30, 2014. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only a reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of a company's annual or interim financial statements will not be prevented or detected on a timely basis.

Management determined that NEP did not maintain effective internal controls over the accounting for income taxes. NEP identified deficiencies with the valuation of deferred income tax accounts, which resulted in a material weakness in internal control over financial reporting. Specifically, NEP did not effectively determine and monitor its valuation allowances on deferred income tax assets and the accuracy of its deferred income taxes, all non-cash activities. This deficiency resulted in an immaterial misstatement of income tax expense and deferred income taxes in the December 31, 2013 financial statements as filed in the Prospectus. Additionally, this deficiency could have resulted in a material misstatement of income tax expense within the annual and interim consolidated financial statements that would not have been prevented or detected, and accordingly, this internal control deficiency constitutes a material weakness as of September 30, 2014. NEP is taking steps to remediate the material weakness, including the development of enhanced oversight and review procedures, organizational changes and adding

additional personnel with income tax accounting experience. Management believes the additional control procedures and organizational changes, when implemented and validated, will be sufficient to remediate this material weakness.

(b) Changes in Internal Control Over Financial Reporting

This report does not include management's assessment regarding changes in internal control over financial reporting due to a transition period established by rules of the SEC for newly public companies.

PART II - OTHER INFORMATION

Item 1A. Risk Factors

Information regarding risk factors appears in Part II, Item 1A. Risk Factors in NEP's Quarterly Report on Form 10-Q for the quarter ended June 30, 2014 (second quarter 2014 Form 10-Q). The factors discussed in NEP's second quarter 2014 Form 10-Q, as well as other information set forth in this report, which could materially adversely affect NEP's business, financial condition, results of operations, cash available for distribution and prospects should be carefully considered. The risks described in the second quarter 2014 Form 10-Q are not the only risks facing NEP. Additional risks and uncertainties not currently known to NEP, or that are currently deemed to be immaterial, also may materially adversely affect NEP's business, financial condition, results of operations, cash available for distribution and prospects.

Item 6. Exhibits

Exhibit Number	Description
3.1*	First Amended and Restated Agreement of Limited Partnership of NextEra Energy Partners, LP, dated as of July 1, 2014 (filed as Exhibit 3.1 to Form 8 K dated July 1, 2014, File No. 1-36518)
3.2*	First Amended and Restated Agreement of Limited Partnership of NextEra Energy Operating Partners, LP, dated as of July 1, 2014 (filed as Exhibit 3.2 to Form 8 K dated July 1, 2014, File No. 1-36518)
10.1*	Management Services Agreement by and among NextEra Energy Partners, LP, NextEra Energy Operating Partners GP, LLC, NextEra Energy Operating Partners, LP, and NextEra Energy Management Partners, LP, dated as of July 1, 2014 (filed as Exhibit 10.1 to Form 8 K dated July 1, 2014, File No. 1-36518)
10.2*	Right of First Offer Agreement by and among NextEra Energy Partners, LP, NextEra Energy Operating Partners, LP and NextEra Energy Resources, LLC, dated as of July 1, 2014 (filed as Exhibit 10.2 to Form 8 K dated July 1, 2014, File No. 1-36518)
10.3*	Purchase Agreement by and between NextEra Energy Equity Partners, LP and NextEra Energy Partners, LP, dated as of July 1, 2014 (filed as Exhibit 10.3 to Form 8 K dated July 1, 2014, File No. 1-36518)
10.4*	Equity Purchase Agreement by and between NextEra Energy Operating Partners, LP and NextEra Energy Partners, LP, dated as of July 1, 2014 (filed as Exhibit 10.4 to Form 8 K dated July 1, 2014, File No. 1-36518)
10.5*	Exchange Agreement by and among NextEra Energy Equity Partners, LP, NextEra Energy Operating Partners, LP, NextEra Energy Partners GP, Inc. and NextEra Energy Partners, LP dated as of July 1, 2014 (filed as Exhibit 10.5 to Form 8 K dated July 1, 2014, File No. 1-36518)
10.6*	Registration Rights Agreement by and between NextEra Energy Partners, LP and NextEra Energy, Inc., dated as of July 1, 2014 (filed as Exhibit 10.6 to Form 8 K dated July 1, 2014, File No. 1-36518)
10.7*	Revolving Credit Agreement by and between NextEra Energy Canada Partners Holdings, ULC, NextEra Energy US Partners Holdings, LLC, NextEra Energy Operating Partners, LP, Bank of America, N.A., as administrative agent and collateral agent, Bank of America, N.A. (Canada Branch), as Canadian agent for the lenders and the lenders party thereto, dated as of July 1, 2014 (filed as Exhibit 10.7 to Form 8 K dated July 1, 2014, File No. 1-36518)
10.8*	NextEra Energy Partners, LP 2014 Long-Term Incentive Plan (filed as Exhibit 10.8 to Form 8 K dated July 1, 2014, File No. 1-36518)
10.9*	Cash Sweep and Credit Support Agreement by and between NextEra Energy Operating Partners, LP and NextEra Energy Resources, LLC, dated as of July 1, 2014 (filed as Exhibit 10.9 to Form 8 K dated July 1, 2014, File No. 1-36518)
