UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K

Annual Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the Fiscal Year Ended June 29, 2013
Commission file number 0-4063

G&K SERVICES, INC.

(Exact name of registrant as specified in its charter)

MINNESOTA

41-0449530

(State of incorporation)

(I.R.S. Employer Identification No.)

5995 OPUS PARKWAY

MINNETONKA, MINNESOTA 55343

(Address of principal executive offices)

Registrant's telephone number, including area code (952) 912-5500

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class

Name of Each Exchange on which Registered

Class A Common Stock (par value \$0.50 per share)

The NASDAQ Stock Market LLC

Securities registered pursuant to Section 12(g) of the Act:

None

Indicate by check mark whether the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer (do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of December 29, 2012 (the last business day of the registrant's most recently completed second fiscal quarter), the aggregate market value of the registrant's voting common equity held by non-affiliates was approximately \$639,482,671.

On August 16, 2013, 19,691,280 shares of the registrant's Class A Common Stock were outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

The information required by Part III of this report, to the extent not set forth herein, is incorporated by reference from the registrant's definitive proxy statement relating to the annual meeting of shareholders to be held in November 2013, which definitive proxy statement will be filed with the Securities and Exchange Commission within 120 days after the end of the fiscal year to which this report relates.

PART I

ITEM 1. BUSINESS

G&K Services, Inc., founded in 1902 and headquartered in Minnetonka, Minnesota, is a service-focused market leader of branded uniform and facility services programs. We deliver value to our customers by enhancing their image and brand, and by promoting workplace safety, security and cleanliness. We accomplish this by providing high quality branded work apparel programs, and a variety of facility products and services including floor mats, towels, mops and restroom hygiene products. We have a team of nearly 7,800 employees who operate from approximately 165 locations. These locations serve customers in 93 of the top 100 metropolitan markets across the United States and Canada.

Customers, Products and Services

We serve a diverse base of approximately 170,000 customers. We serve customers in virtually all industries, including automotive, warehousing, distribution, transportation, energy, manufacturing, food processing, pharmaceutical, retail, restaurants, hospitality, government, healthcare and others. We provide service to customers of almost every size, from Fortune 100 companies to small and midsize firms. No single customer represents more than 2.0% of our total revenue. We count over one million people within our customer base who wear G&K work apparel every work day. Our customer focused relationships involve customers renting or directly purchasing uniforms and providing facility products and services to meet a variety of critical needs in the workplace, including:

Image – work apparel helps companies project a professional image through their employees and frame the perception of credibility, knowledge, trust and quality to their customers. Employees in uniform are perceived as trained, competent and dependable.

Organization safety and security – uniforms and work apparel help identify employees working for a particular company or department.

Brand awareness – branded work apparel promotes a company's brand identity and allows employees in uniform to help convey a company's image.

Employee retention – work apparel enhances worker morale and helps build teamwork in addition to providing a tangible employee benefit.

Employee protection – work apparel helps protect employees from difficult environments such as heavy soils, heat, flame or chemicals.

Product protection – work apparel and facility services help protect products against sources of contamination in the food, pharmaceutical, and health care industries.

With a comprehensive understanding of our customers' requirements, we enhance our customers' image and safety by consistently providing superior service and high quality work apparel and facility products and services. Through proprietary tracking systems, a rigorous seven point inspection program, broad product inventories and a distinctive measuring system, we promise our customers that deliveries are complete, on time and in good repair. By utilizing advanced technology and offering simple service agreements, we strive to make certain that billing is simple, accurate and predictable. In addition, we employ communication systems and perform closed-loop customer satisfaction practices to ensure our customers' needs are met promptly.

We utilize a collaborative approach to advise and assist our customers in choosing a work apparel program that best meets their unique brand, image, identity and safety needs. Our comprehensive range of work apparel and uniform rental programs offers flexibility in styles, colors and quantities, and sets service and distribution expectations to customer requirements. We can quickly source and access garments to provide rapid response as customer needs change due to increases, decreases or turnover in their work force. Professional cleaning, finishing, repair, embellishment and replacement of uniforms in use is a normal part of the rental service. Our handling of the details of a work apparel program allows our customers to focus on running their core business and not be concerned with the management time, operating costs and environmental exposures involved in running their own work apparel program or on-premise laundry.

We also offer complete facility services programs that provide a wide range of dust control, maintenance, hand care and hygiene products and services. They include floor mat offerings (traction control, logo, message, scraper, anti-fatigue), towel products (shop, kitchen, bar, bath, dish, continuous roll, microfiber), mop offerings (dust,

microfiber, wet), fender covers, selected linen items and restroom hygiene products. Our regularly scheduled weekly service of these products and services helps our customers maintain a clean, safe and attractive environment within their facilities for their employees and customers.

3

Table of Contents

Our customers also need a wide selection of branded apparel across a variety of jobs. Our comprehensive direct sale uniform programs feature custom design, procurement, efficient distribution and advanced ordering and payment capabilities. We offer a comprehensive selection of the best and hardest working brands in our industry through our uniform and catalog programs. These branded apparel programs can be used for uniform programs, employee rewards and recognition, trade shows and vendor appreciation programs.

For most of our customers, we provide weekly service, with our highly talented service professionals visiting customers' locations. This regular customer contact helps ensure we are meeting our customers' needs, while promoting strong relationships that lead to high customer retention and additional sales opportunities.

Acquisitions

Our industry continues to consolidate as many family-owned, local operators and regional companies have been acquired by larger providers. Historically, we have participated in this consolidation with an acquisition strategy focused on expanding our geographic presence and/or expanding our local market share in order to further leverage our existing production facilities. We remain active in evaluating quality acquisitions that would strengthen our business.

In the second quarter of fiscal 2013, we completed an acquisition in our rental operations business. The acquisition extends our rental operations footprint into five of the top 100 North American markets which we did not previously serve. In addition, we completed one small acquisition in fiscal 2012. We did not complete any acquisitions related to our core rental business in fiscal year 2011. The results of the acquired business have been included in our Consolidated Financial Statements since the date of acquisition. The pro forma effect of these acquisitions, had they been acquired at the beginning of each fiscal year, were not material, either individually or in the aggregate. The total purchase consideration of these transactions was \$18.5 million and \$1.3 million in fiscal 2013 and 2012, respectively. The total purchase price exceeded the estimated fair values of assets acquired and liabilities assumed by \$11.0 million and \$0.7 million in fiscal 2013 and 2012, respectively.

Competition

We believe customers in our industry choose providers based on the consistency of superior customer service received, hence our focus on Service Excellence. The customer-supplier relationship, unique business needs, brand awareness, quality image and improving safety are also key attributes in selecting a uniform provider. In addition, product quality, fit, comfort, price and breadth of products offered are factors in the decision process. We rank among the nation's largest work apparel providers and encounter competition from many companies in the geographic areas we serve. We compete effectively in our core work apparel and facility services business because of our focus on Delivering Uniform Service Excellence.

Manufacturing and Suppliers

We manufactured approximately 50% of the work apparel that we placed into service in fiscal year 2013. These garments are primarily manufactured in the Dominican Republic. Various outside vendors are used to supplement our additional product needs, including garments, floor mats, towels, mops, linens and related products. Although we occasionally experience product shortages, we are not currently aware of any circumstances that would materially limit our ability to obtain raw materials to support the manufacturing process or to obtain garments or other items to meet our customers' needs.

Environmental Matters

Our operations, like those of our competitors, are subject to various federal, state and/or local laws, rules and regulations respecting the environment, including potential discharges into water and air and the generation, handling, storage, transportation and disposal of waste and hazardous substances. We generate certain amounts of waste in connection with our laundry operations, including wastewater, wastewater sludge, waste oil and other residues. In a limited number of instances, certain of these wastes are classified as hazardous under applicable laws, rules and regulations. We continue to make significant investments in properly handling and disposing of these wastes, ensuring compliance with these regulations and operating our business with a keen eye on our environmental stewardship obligations and responsibilities.

We discuss certain legal matters in this Annual Report on Form 10-K under Part I, Item 1A. Risk Factors – Compliance with environmental laws and regulations could result in significant costs that adversely affect our operating results,

Item 3. Legal Proceedings and Item 8. Financial Statements and Supplementary Data in Note 13 entitled "Commitments and Contingencies" of "Notes to Consolidated Financial Statements." Any environmental liability relating to such matters could result in significant expenditures that, if aggregated and assumed to occur within a single fiscal period, could be material to our results of operations or financial position. While it is impossible to ascertain the ultimate legal and financial liability with respect to contingent liabilities, including lawsuits, legal matters, claims and environmental contingencies, based on information currently available and our assessment of the ultimate amount and timing of environmental-related events, we believe that the cost of

Table of Contents

these environmental-related matters will not have a material adverse effect on our results of operations or financial position. While we believe the possibility is remote, there is a potential that we may incur additional losses in excess of established reserves due to the imposition of clean-up obligations, the discovery of alleged contamination or other changes.

Employees

Our U.S. operations had approximately 6,500 employees as of June 29, 2013, which includes approximately 3,600 production employees and 2,900 sales, office, route and management personnel. Unions represent approximately 10% of our U.S. employees. Approximately 7% of our U.S. employees participate in collective bargaining agreements that expire in the next 12 months. Management believes its U.S. employee relations are satisfactory.

Our Canadian operations had approximately 1,300 employees as of June 29, 2013, which includes approximately 700 production employees and 600 sales, office, route and management personnel. Unions represent approximately 65% of our Canadian employees. None of our Canadian employees participate in collective bargaining agreements that expire in the next 12 months. Management believes its Canadian employee relations are satisfactory.

Foreign and Domestic Operations

Financial information relating to foreign and domestic operations is set forth in Note 14, "Segment Information" of the Notes to the Consolidated Financial Statements included in Item 8 of this Form 10-K.

Intellectual Property

We own a portfolio of registered trademarks, trade names and licenses, and certain U.S. and foreign process and manufacturing patents relating to our business. These proprietary properties, in the aggregate, constitute a valuable asset. We do not believe, however, that our business is dependent upon any single proprietary property or any particular group of proprietary properties.

Seasonality and Working Capital

We do not consider our business to be seasonal to any significant extent or subject to any unusual working capital requirements.

Available Information

Our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and any amendments to those reports are available free of charge, as soon as reasonably practicable, after we electronically file such material with, or furnish it to, the Securities and Exchange Commission ("SEC"). These reports are available on our website at <http://www.gkservices.com> and on the SEC's website at <http://www.sec.gov>. Information included on our website is not deemed to be incorporated into this Annual Report on Form 10-K.

ITEM 1A. RISK FACTORS

The statements in this section, as well as statements described elsewhere in this Annual Report on Form 10-K, or in other filings made with the Securities and Exchange Commission, describe risks that could materially and adversely affect our business, financial condition and results of operations and the trading price of our securities. These risks are not the only risks that we face. Our business, financial condition and results of operations could also be materially affected by additional factors that are not presently known to us or that we currently consider to be immaterial to our operations.

In addition, this section sets forth statements which constitute our cautionary statements under the Private Securities Litigation Reform Act of 1995.

FORWARD-LOOKING STATEMENTS

The Private Securities Litigation Reform Act of 1995 provides a safe harbor from civil litigation for forward-looking statements. Forward-looking statements may be identified by words such as "estimates," "anticipates," "projects," "plans," "expects," "intends," "believes," "seeks," "could," "should," "may" and "will" or the negative versions thereof and similar expressions and by the context in which they are used. Such statements are based upon our current expectations and speak only as of the date made. These statements are subject to various risks, uncertainties and other factors that could cause actual results to differ from those set forth in or implied by this Annual Report on Form 10-K. Factors that might cause such a difference include, but are not limited to, the possibility of greater than anticipated operating costs, lower sales volumes, the performance and costs of integration of acquisitions or assumption of unknown liabilities in connection with acquisitions, fluctuations in costs of materials and labor, costs and possible

effects of union organizing or other union activities, strikes, loss of key management, uncertainties regarding any existing or newly-discovered expenses and liabilities related to environmental

5

Table of Contents

compliance and remediation, failure to achieve and maintain effective internal controls for financial reporting required by the Sarbanes-Oxley Act of 2002, the initiation or outcome of litigation or governmental investigation, higher than assumed sourcing or distribution costs of products, the disruption of operations from catastrophic events, disruptions in capital markets, the liquidity of counterparties in financial transactions, changes in federal and state tax laws, economic uncertainties and the reactions of competitors in terms of price and service. We undertake no obligation to update any forward-looking statements to reflect events or circumstances arising after the date on which they are made, except as required by law.

Also note that we provide the following cautionary discussion of risks, uncertainties and assumptions relevant to our business. Actual results may differ from certain assumptions we have made causing actual events to vary from expected results. These are factors that, individually or in the aggregate, could cause our actual results to differ materially from expected and historical results. We note these factors for investors as permitted by the Private Securities Litigation Reform Act of 1995. You should understand that it is not possible to predict or identify all such factors. Consequently, you should not consider the following to be a complete discussion of all potential risks or uncertainties.

General economic factors may adversely affect our financial performance.

General economic conditions may adversely affect our financial performance. Continued high levels of unemployment, inflation, tax rates and other changes in tax laws and other economic factors could adversely affect the demand for our products and services. Increases in labor costs, including healthcare and insurance costs, higher material costs for items, such as linens, other textiles and various raw materials, higher fuel and other energy costs, higher interest rates, inflation, higher tax rates and other changes in tax laws and other economic factors could increase our costs of rental and direct sales and selling and administrative expenses and could adversely affect our results of operations. In addition, the costs of recent health care reform legislation are expected to be funded by a variety of taxes and fees. Some of the taxes and fees, as well as certain health care changes required by the reform legislation, are expected to result, directly or indirectly, in increased health care costs for us. It remains difficult to predict the cost impact of health care reform and, at this time, we cannot quantify the impact, if any, that the legislation may have on us due to the changing regulatory environment around this legislation and due to the government's intention to issue future unknown regulatory rules.

Increased competition could adversely affect our financial performance.

We operate in highly competitive industries and compete with national, regional and local providers. Service, product, design, price, quality and convenience to the customer are the primary competitive elements in these industries. If existing or future competitors seek to gain or retain market share by reducing prices, we may be required to lower prices, which could be detrimental to our operating results. Our competitors also generally compete with us for possible acquisitions, which can increase the price for acquisitions and reduce the number of available acquisitions. In addition, our customers and prospects may decide to perform certain services in-house instead of outsourcing such services. These competitive pressures could adversely affect our sales and operating results.

Risks associated with the suppliers from whom our products are sourced, and the cost of those products, could adversely affect our operating results.

The products we sell are sourced from a variety of domestic and international suppliers. Global sourcing of many of these products is an important factor in our financial performance. We endeavor that all of our suppliers comply with applicable laws, including, without limitation, labor and environmental laws. Our ability to secure and maintain qualified suppliers who meet our standards and to access products in a timely and efficient manner can be a significant challenge, especially with respect to suppliers located and goods sourced outside the United States. Political and economic stability in the countries in which foreign suppliers are located, the financial stability of suppliers, failure to meet our supplier standards, labor problems experienced by our suppliers, the availability and cost of raw materials to suppliers, currency exchange rates, transport availability and cost, inflation and other factors relating to the suppliers and the countries in which they are located are beyond our control. In addition, United States and Canadian foreign trade policies, tariffs and other impositions on imported goods, trade sanctions imposed on certain countries, the limitation on the importation of certain types of goods or of goods containing certain materials from other countries and other factors relating to foreign trade are beyond our control. The U.S. Securities and Exchange Commission has

also finalized new disclosure requirements relating to the sourcing of so-called conflict minerals from the Democratic Republic of Congo and certain other adjoining countries as required by the Dodd-Frank Act. Our disclosure will be predicated upon the timely receipt of accurate information from suppliers, who may be unwilling or unable to provide us with the relevant information. As a result, these new requirements could adversely affect our costs, the availability of minerals used in our products and our relationships with customers and suppliers. These and other factors affecting our suppliers and our access to products could adversely affect our operating results.

Table of Contents

Failure to comply with the regulations of the U.S. Occupational Safety and Health Administration and other state and local agencies that oversee safety compliance could adversely affect our results of operations.

The Occupational Safety and Health Act of 1970, as amended, or "OSHA," establishes certain employer responsibilities, including maintenance of a workplace free of recognized hazards likely to cause death or serious injury, compliance with standards promulgated by OSHA and various record keeping, disclosure and procedural requirements. Various OSHA standards apply to our operations. We have incurred, and will continue to incur, capital and operating expenditures and other costs in the ordinary course of our business in complying with OSHA and other state and local laws and regulations. Any failure to comply with these regulations could result in fines by government authorities and payment of damages to private litigants, and could affect our ability to service our customers and adversely affect our results of operations.

Compliance with environmental laws and regulations could result in significant costs that adversely affect our operating results.

Our operating facilities are subject to stringent environmental laws, rules and regulations relating to the protection of the environment and health and safety matters, including those governing the potential discharges of pollutants to the air and water, the management and disposal of hazardous substances and wastes and the clean-up of contaminated sites. The operation of our business entails risks under environmental laws and regulations. We could incur significant costs, including, without limitation, clean-up costs, fines, sanctions and claims by regulators or third parties for property damage and personal injury, as a result of violations or liabilities under these laws and regulations. As a result of violations of these laws and regulations, among other things, we could be required to reduce or cease use of certain equipment and/or limit or stop production at certain facilities. These consequences could have a material adverse effect on our results of operations and financial condition and disrupt customer relationships. We are currently involved in a limited number of legal matters and remedial investigations and actions at various locations related to environmental laws and regulations. While it is impossible to ascertain the ultimate legal and financial liability with respect to contingent liabilities, including lawsuits, legal matters, claims and environmental contingencies, based on information currently available and our assessment of the ultimate amount and timing of environmental-related events, we believe that the cost of these environmental-related matters are not reasonably likely to have a material adverse effect on our results of operations or financial position. It is possible, however, that our future financial position or results of operations for any particular future period could be materially affected by changes in our assumptions or strategies related to these contingencies, the imposition of clean-up obligations, and the discovery of alleged contamination or changes out of our control. In addition, potentially significant expenditures could be required to comply with environmental laws and regulations, including requirements that may be adopted or imposed in the future.

Under environmental laws, an owner or operator of real estate may be required to pay the costs of removing or remediating hazardous materials located on or emanating from property, whether or not the owner or operator knew of or was responsible for the presence of such hazardous materials. We have a number of sites on which we are currently conducting remediation projects. Also, while we regularly engage in environmental due diligence in connection with acquisitions, we can give no assurance that locations that have been acquired or leased have been operated in compliance with environmental laws and regulations during prior periods, nor can we give any assurance that existing remediation projects or future uses or conditions will not make us liable under these laws or expose us to regulatory or third-party actions, including third party suits.

Additionally, we must maintain compliance with various permits and licenses issued to us in connection with our operations, or we must apply for and obtain such permits and licenses. Any failure on our part to maintain such compliance or to apply for and receive such permits and licenses could have a material adverse effect on our ability to continue operations at a particular location. At each reporting period, we assess our operations to determine whether the costs of resolution of legal matters or of investigation and remediation of environmental conditions are probable and can be reasonably estimated, as well as the adequacy of our reserves with respect to such costs. At June 29, 2013, our reserves for environmental matters were approximately \$1.7 million. We cannot guarantee that our reserves with respect to environmental matters will be sufficient or that the costs of resolution of legal matters or of remediation and investigation will not substantially exceed our reserves as new facts, circumstances or estimates arise.

Fluctuations in demand for our products and services may adversely impact our financial results. Continued uncertainty in global economic conditions may pose a risk to the overall economy as consumers and businesses may defer purchases in response to tighter credit and negative financial news. This could negatively impact our customers and consequently have a negative impact on our financial performance. If demand for our products and services fluctuates as a result of economic conditions or otherwise, our revenue and operating margin could be negatively impacted. Important factors that could cause demand for our products and services to fluctuate include:

- changes in business and economic conditions, including downturns in specific industry segments and/or the overall economy;

Table of Contents

- changes in consumer confidence caused by changes in market conditions, including changes in the credit market, expectations for inflation, and energy prices;
- competitive pressures, including pricing pressures, from companies that have competing products and services;
- changes in customer needs;
- changes in our customers' employment levels, which impacts the number of users of our products and services;
- strategic actions taken by our competitors; and
- market acceptance of our products and services.

If our customers' demand for our products and services decreases, our plant and manufacturing capacity could be underutilized, and we may be required to record an impairment of our long-lived assets, including facilities and equipment, as well as intangible assets, which would increase our expenses. A change in demand for our products and services, and changes in our customers' needs, could have a variety of negative effects on our competitive position and our financial results, and, in certain cases, may reduce our revenue, increase our costs, lower our gross margin percentage, or require us to recognize impairments of our assets.

Legal proceedings may adversely affect our financial condition and operating results.

From time to time we are party to various legal claims and proceedings, including relating to employment and regulatory matters. Certain of these claims or proceedings or potential future proceedings, if decided adversely against us or settled by us, may result in a liability that is material to our financial condition and operating results. We discuss current lawsuits and other litigation to which we are party in greater detail under Item 3. Legal Proceedings and Item 8. Financial Statements and Supplementary Data in Note 13 entitled "Commitments and Contingencies" of "Notes to Consolidated Financial Statements."

Risks associated with our acquisition strategy could adversely affect our operating results.

Historically, a portion of our growth has come from acquisitions. We continue to evaluate opportunities for acquiring businesses that may supplement our internal growth. However, there can be no assurance that we will be able to identify and purchase suitable operations. In addition, the success of any acquisition depends in part on our ability to integrate the acquired business. The process of integrating acquired businesses may involve unforeseen difficulties and may require a disproportionate amount of our management's attention and our financial and other resources. Although we conduct due diligence investigations prior to each acquisition, there can be no assurance that we will discover all operational deficiencies or material liabilities of an acquired business for which we may be responsible as a successor owner or operator. The failure to successfully integrate these acquired businesses or to discover such liabilities could adversely affect our operating results.

Increases in fuel, energy and commodity costs could adversely affect our results of operations and financial condition. Motor fuel, natural gas, electricity, cotton, polyester and other commodities represent a significant cost within our business. The price of these commodities, which are required to run our vehicles and equipment and manufacture our garments, can be unpredictable and can fluctuate based on events beyond our control, including geopolitical developments, supply and demand for oil and gas, actions by OPEC and other oil and gas producers, war, terrorism and unrest in oil producing countries, regional production patterns, limits on refining capacities, natural disasters and environmental concerns. Increases in the cost of these commodities could adversely affect our results of operations and financial condition.

Failure to preserve positive labor relationships could adversely impact our operations and financial results.

Significant portions of our Canadian labor force are unionized, and a lesser portion of United States employees are unionized. While we believe that our Canadian and U.S. employee relations are satisfactory, we continue to face pressure from labor unions, and could experience pressure similar to those faced by our competitors. If we do encounter pressure from labor unions, any resulting labor unrest could disrupt our business by impairing our ability to produce and deliver our products and services. In addition, significant union representation would require us to negotiate with many of our employees collectively and could adversely affect our results by restricting our ability to maximize the efficiency of our operations.

Inability to attract and retain employees could adversely impact our operations.

Our ability to attract and retain employees is important to our operations. Our ability to expand our operations is in part impacted by our ability to increase our labor force. In the event of a labor shortage, or in the event of a change in prevailing labor and/or immigration laws, we could experience difficulty in delivering our services in a high-quality or timely manner and we could be forced to increase wages in order to attract and retain employees, which would result in higher operating costs.

8

Table of Contents

Loss of our key management or other personnel could adversely impact our business.

Our success is dependent on the skills, experience and efforts of our senior management and other key personnel. If, for any reason, one or more senior executives or key personnel were not to remain active in our company, or if we are unable to attract and retain key personnel, our results of operations could be adversely affected.

Unexpected events could disrupt our operations and adversely affect our operating results.

Unexpected events, including, without limitation, fires at facilities, natural disasters, such as hurricanes and tornados, public health emergencies, war or terrorist activities, unplanned utility outages, supply disruptions, failure of equipment or systems or changes in laws and/or regulations impacting our business, could adversely affect our operating results. These events could result in disruption of customer service, physical damage or temporary closure of one or more key operating facilities, or the temporary disruption of information systems.

Failure to achieve and maintain effective internal controls could adversely affect our business and stock price.

Effective internal controls are necessary for us to provide reliable financial reports. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. While we continue to evaluate our internal controls, we cannot be certain that these measures will ensure that we implement and maintain adequate controls over our financial processes and reporting in the future. If we fail to maintain the adequacy of our internal controls or if we or our independent registered public accounting firm were to discover material weaknesses in our internal controls, we may not be able to ensure that we can conclude on an ongoing basis that we have effective internal control over financial reporting in accordance with Section 404 of the Sarbanes-Oxley Act of 2002. Failure to achieve and maintain an effective internal control environment could cause us to be unable to produce reliable financial reports or prevent fraud. This may cause investors to lose confidence in our reported financial information, which could have a material adverse effect on our stock price.

Failure to execute our business plan could adversely affect our business and stock price.

Successful execution of our business plan is not assured as there are several obstacles to success, including a difficult economic environment, a competitive industry and entries by us into new markets. In addition, there can be no assurance that our efforts, if properly executed, will result in our desired outcome of improved financial performance. The financial condition of multi-employer (union) pension plans in which we participate may have a material adverse effect on our financial performance.

We participate in a number of multi-employer pension plans ("MEPPs"). Also called Taft-Hartley plans, MEPPs are pension plans that are jointly trustee by union and management of member companies and that provide benefits to an employer's unionized work force if the collective bargaining agreement between the employer and union provide for participation in the MEPP. Employers who withdraw from MEPPs remain responsible for their proportionate share of the MEPPs' unfunded vested pension benefits, an amount also known as "withdrawal liability." We have completed our withdrawal from the Central States Southeast and Southwest Areas Pension Fund ("Central States Fund"). Despite having withdrawn from the Central States Fund, we remain responsible for our withdrawal liability amount. The Central States Fund has not yet provided us with a calculation of our withdrawal liability amount and we may disagree with the Central States Fund's calculation. If that is the case, we may be required to engage in arbitration or other proceedings with the Central States Fund to determine the amount of our liability. The amount ultimately determined to be our withdrawal liability amount may be greater than the amount we have already recognized on our financial statements and the increased amount could have a material adverse effect on our financial performance.

If in the future, local union employees vote to decertify their respective union, or the union ratifies a collective bargaining agreement in which we no longer participate in the MEPP, or other employers in the MEPP withdraw or experience financial difficulty, including bankruptcy, our liability under the associated MEPP could increase. That increase could have a material adverse impact on our financial performance and could be greater than estimated. We do not have the ability to predict or influence the timing of votes to decertify a union nor do we have any control over the continued participation or financial stability of other employers in a MEPP.

Fluctuations in Canadian, Dominican Republic and Ireland currencies could have an adverse effect on our results of operations and financial condition.

Certain of our foreign revenues and operating expenses are transacted in local currencies. Therefore, our results of operations and certain receivables and payables are subject to foreign exchange rate fluctuations.

Table of Contents

We may be subject to information technology system failures, network disruptions and breaches in data security. We rely to a large extent upon sophisticated information technology systems and infrastructure. The size and complexity of our computer systems make them potentially vulnerable to breakdown, malicious intrusion and random attack. Likewise, data privacy breaches by employees and others with permitted access to our systems or intrusion by unauthorized persons may pose a risk that sensitive data may be exposed to unauthorized persons or to the public. While we have invested in protection of data and information technology, there can be no assurance that our efforts will prevent breakdowns or breaches in our systems that could adversely affect our business.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

We occupy approximately 165 facilities located primarily in the United States and Canada. These facilities include our processing, branch, garment manufacturing, distribution and administrative support locations. We clean and supply rental items from approximately 50 facilities located in 38 cities in the United States, 9 cities in Canada and one city in Ireland. We own approximately 90% of our processing facilities, which average approximately 44,000 square feet in size.

ITEM 3. LEGAL PROCEEDINGS

We are involved in a variety of legal actions relating to personal injury, employment, environmental and other legal matters arising in the normal course of business, including, without limitation, those described below.

The U.S. Environmental Protection Agency ("U.S. EPA") previously identified certain alleged air, water and waste-related deficiencies with respect to the operations at our facility located in Justice, Illinois. We have responded to the U.S. EPA and will continue to work cooperatively to resolve this matter.

The U.S. Department of Labor's Office of Federal Contract Compliance Programs, or OFCCP, is, as part of its routine audit cycle, reviewing certain of our employment practices. We believe that our employment practices are lawful and nondiscriminatory. We expect that resolution of these violations at this facility will result in the entry by us and the OFCCP into a Conciliation Agreement, pursuant to which, among other things, we will make payments of back wages and, to a lesser extent, interest, to certain current and former employees. The aggregate amount of these payments is expected to be within reserved amounts. We currently have audits at an additional nine facilities where the OFCCP may claim similar violations. Currently, no formal legal proceedings with respect to these matters have been commenced, and, in any event, we do not believe that any resolution of these matters will have a material adverse effect on our results of operations or financial position.

We cannot predict the ultimate outcome of these or other similar matters with certainty and it is possible that we may incur additional losses in excess of established reserves. However, we believe the possibility of a material adverse effect on our results of operations or financial condition is remote.

PART II

ITEM MARKET FOR REGISTRANT'S COMMON STOCK, RELATED STOCKHOLDER MATTERS AND
5. ISSUER PURCHASES OF EQUITY SECURITIES

Our Class A Common Stock is quoted on the Global Select Market of The NASDAQ Stock Market LLC under the symbol "GK." The following table sets forth the high and low reported sale prices for the Class A Common Stock as quoted on the Global Select Market of The NASDAQ Stock Market LLC, for the periods indicated.

	High	Low
Fiscal 2013		
1st Quarter	\$34.17	\$30.08
2nd Quarter	36.71	29.80
3rd Quarter	45.83	33.39
4th Quarter	50.02	42.57
Fiscal 2012		
1st Quarter	\$36.54	\$25.17
2nd Quarter	31.44	24.24
3rd Quarter	34.99	28.95
4th Quarter	38.65	28.38

As of August 16, 2013, we had 746 registered holders of record of our common stock.

We paid dividends of \$15.1 million, \$123.9 million and \$7.1 million in fiscal years 2013, 2012 and 2011, respectively. Dividends per share were \$0.78, \$6.585 and \$0.38 in fiscal years 2013, 2012 and 2011 respectively. The fiscal year 2012 dividend includes a \$6.00 per share special dividend. We anticipate regular dividends in fiscal year 2014 will total \$1.08 per share, or approximately \$21.0 million. Our debt agreements contain a minimum net worth covenant, which could limit the amount of cash dividends.

ISSUER PURCHASE OF EQUITY SECURITIES

As of June 29, 2013, we have a \$175.0 million share repurchase program which was originally authorized by our Board of Directors in May 2007 for \$100.0 million and increased to \$175.0 million in May 2008. At the end of fiscal year 2013, we had approximately \$57.9 million remaining under this authorization. Under the program we did not repurchase any shares in fiscal years 2013, 2012 or 2011. Our debt agreements contain a minimum net worth covenant, which could limit the amount of share repurchases.

EQUITY COMPENSATION PLAN INFORMATION

The following table sets forth certain information as of June 29, 2013 with respect to equity compensation plans under which securities are authorized for issuance:

Plan Category	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights (A)	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights (B)	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column (A))
Equity compensation plans approved by security holders (1):			
Restated Equity Incentive Plan (2010) (2)	1,047,784	(3) \$ 23.71	(4) 803,378
Employee Plans (5)	131,849	32.43	—
1996 Directors' Stock Option Plan	22,000	33.40	—
Total:	1,201,633	\$ 25.01	803,378
Equity compensation plans not approved by security holders:			
None	—	—	—
Total	1,201,633	\$ 25.01	803,378

(1) See Note 10, "Stockholders' Equity" of the Notes to the Consolidated Financial Statements.

Our Restated Equity Incentive Plan (2010) was approved at our November 4, 2010 annual meeting of shareholders.

(2) The outstanding shares listed for this plan include the initial shares authorized under our 2006 Equity Incentive Plan, as well as the additional shares authorized when the restated plan was approved.

(3) Includes 897,784 outstanding options and 150,000 performance based restricted stock awards, which assumes the maximum number of performance share awards that may be earned.

(4) The weighted-average exercise price does not include the performance shares discussed in note 3 above.

(5) Includes our 1998 Stock Option and Compensation Plan.

Table of Contents

STOCKHOLDER RETURN PERFORMANCE GRAPH

The following graph shows a five-year comparison of the cumulative total return on \$100 invested in our Common Stock, the Standard and Poor's ("S&P") Smallcap 600 Index and a Peer Group in the uniform services industry, consisting of Cintas Corporation and UniFirst Corporation. G&K Services is included in the S&P Smallcap 600 Index and, as a result, we believe it is a better comparison than the S&P 500 Index previously included.

The graph illustrates the cumulative values at the end of each succeeding fiscal year resulting from the change in the stock price, assuming a reinvestment of dividends.

We utilize a 52-53 week fiscal year ending on the Saturday nearest June 30. Fiscal year 2010 was a 53 week year; all other fiscal years were 52 week years. Fiscal 2009 includes a \$126.7 million pre-tax non-cash impairment charge primarily related to goodwill. Fiscal 2012 includes a pre-tax charge of \$24.0 million associated with withdrawing from a multi-employer pension plan (see Note 12, "Employee Benefit Plans" of the Notes to the Consolidated Financial Statements for further information). Fiscal year 2013 includes net pre-tax charges of \$8.2 million related to restructuring and impairment charges and an increase in our estimated liability associated with the exit of a multi-employer pension plan, offset by the benefit of the change in estimated merchandise amortization lives. See Note 1, "Summary of Significant Accounting Policies" and Note 9, "Restructuring and Impairment Charges" of the Notes to the Consolidated Financial Statements for further information.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with the Consolidated Financial Statements and related notes thereto which are included herein. We utilize a 52-53 week fiscal year ending on the Saturday nearest June 30. Fiscal years 2013, 2012 and 2011 were 52 week years.

Overview

G&K Services, Inc., founded in 1902 and headquartered in Minnetonka, Minnesota, is a service-focused market leader of branded uniform and facility services programs. We deliver value to our customers by enhancing their image and brand, and by promoting workplace safety, security and cleanliness. We accomplish this by providing high quality branded work apparel programs, and a variety of facility products and services including floor mats, towels, mops and restroom hygiene products.

From fiscal year 2010 through fiscal year 2012, we made broad-based improvements to our business, by pursuing a strategy which included four key elements: focusing on customer satisfaction; improving day-to-day execution; increasing our focus on cost management; and addressing underperforming locations and assets. Executing this strategy has led to significant improvements in our financial results. We have delivered positive organic revenue growth, expanded operating margins and produced strong cash flows.

In fiscal year 2013, we modified our strategy, building on the improvements made in the past. Our approach has four parts:

1. Keep our customer promise
2. Improve how we target customers
3. Drive operational excellence
4. Strengthen our high performing team

To measure the progress of our strategy, in fiscal year 2010, we established two primary long-term financial objectives, which were achieving operating income margin of 10% and return on invested capital (ROIC) of 10%. We define ROIC as adjusted net operating income after tax, divided by the sum of total debt less cash plus stockholders'

equity. In the second quarter of fiscal year 2013, we achieved the first of these two targets by achieving a 10% operating margin. As of the fourth quarter of fiscal year 2013, our ROIC expanded to 9.2%. Given we had reached one of the long-term goals and we are close to achieving

Table of Contents

the second goal, we recently announced new long-term financial goals. Our new goal is called the "12+ Plan" and includes achieving 12% operating margin, 12% ROIC and a GDP+ revenue growth rate, within a two to four year time frame. We are also focused on maximizing free cash flow, which we define as net cash provided by operating activities less investments in property, plant and equipment.

Our industry continues to consolidate as many family-owned, local operators and regional companies have been acquired by larger providers. Historically, we have participated in this consolidation with an acquisition strategy focused on expanding our geographic presence and/or expanding our local market share in order to further leverage our existing production facilities. We remain active in evaluating quality acquisitions that would strengthen our business. During fiscal year 2013, we made one acquisition. The proforma effect of this acquisition, had it been acquired at the beginning of the fiscal year was not material. The total purchase consideration was \$18.5 million. The total purchase price exceeded the fair value of assets acquired and liabilities assumed by \$11.0 million.

In fiscal years 2011 and 2012, our results were adversely impacted by rising prices for commodities, especially cotton, polyester and crude oil. This contributed to a significant increase in merchandise costs. As expected, merchandise costs as a percentage of rental revenue began to gradually moderate throughout fiscal year 2013 after peaking in the first quarter.

We periodically adjust our operations to serve our customers in the most efficient and cost effective manner. As part of these adjustments, we may realign our workforce, close production or branch facilities or divest operations. We are continuously assessing our business and making adjustments as necessary.

Critical Accounting Policies

The discussion of the financial condition and results of operations are based upon the Consolidated Financial Statements, which have been prepared in conformity with United States generally accepted accounting principles (GAAP). As such, management is required to make certain estimates, judgments and assumptions that are believed to be reasonable based on the information available. These estimates and assumptions affect the reported amount of assets and liabilities, revenues and expenses, and disclosure of contingent assets and liabilities at the date of the financial statements. Actual results may differ from these estimates under different assumptions or conditions.

Critical accounting policies are defined as the most important and pervasive accounting policies used, areas most sensitive to material changes from external factors and those that are reflective of significant judgments and uncertainties. See Note 1, "Summary of Significant Accounting Policies" of the Notes to the Consolidated Financial Statements for additional discussion of the application of these and other accounting policies.

Revenue Recognition and Allowance for Doubtful Accounts

Our rental operations business is largely based on written service agreements whereby we agree to pick-up soiled merchandise, launder and then deliver clean uniforms and other related products. The service agreements generally provide for weekly billing upon completion of the laundering process and delivery to the customer. Accordingly, we recognize revenue from rental operations in the period in which the services are provided. Revenue from rental operations also includes billings to customers for lost or damaged uniforms and replacement fees for non-personalized merchandise that is lost or damaged. Direct sale revenue is recognized in the period in which the product is shipped. Total revenues do not include sales tax as we consider ourselves a pass-through conduit for collecting and remitting sales tax.

During the fourth quarter of fiscal year 2010, we changed our business practices regarding the replacement of certain lost or damaged in-service towel and linen inventory. Transactions entered into prior to the fourth quarter of 2010 included the potential for future adjustments to our customer billings, including, in some cases, refunds for a number of items, including actual experience of lost or damaged goods. For these transactions, we did not meet all of the requirements for revenue recognition at the time of our initial billing because our fees were not fixed or determinable and collectability was not reasonably assured, as evidenced by subsequent adjustments, including refunds in certain cases. As a result, we deferred the revenue for these transactions until such time as we could determine that the fees were no longer subject to adjustment or refund and were fixed and determinable and collectability was reasonably assured.

Beginning in the fourth quarter of 2010, our invoicing for lost and damaged in-service towel and linen inventory (replacement fees) is no longer subject to adjustment or refund. For these transactions, revenue is recognized at the time of billing when service performance and delivery of the in service inventory to the customer occurs because the fee is fixed and determinable and collectability is reasonably assured.

As a result of the change described above, we began to immediately recognize revenue related to all new invoicing for lost and damaged in service towel and linen inventory. In addition, during the three month periods ended July 3, 2010, October 2, 2010

Table of Contents

and January 1, 2011, we continued to recognize and earn revenue (legacy revenue) associated with the refundable fees that had been collected prior to the change in business practices. As a result, we had a dual, non-recurring revenue stream occurring in these periods. As of January 1, 2011, all deferred revenue previously recorded prior to the change in business practices had either been earned or refunded to the customers. For fiscal year 2011, the effect of this change in business practice increased revenue and income from operations by \$5.9 million, net income by \$3.7 million and basic and diluted earnings per common share by \$0.20. There were no comparable amounts recognized in fiscal years 2012 or 2013.

Estimates are used in determining the collectability of accounts receivable. Management analyzes specific accounts receivable and historical bad debt experience, customer credit worthiness, current economic trends and the age of outstanding balances when evaluating the adequacy of the allowance for doubtful accounts. Significant management judgments and estimates are used in connection with establishing the allowance in any accounting period. We generally write-off uncollectible accounts receivable after all avenues of collection have been exhausted.

Inventories

Inventories consist of new goods and rental merchandise in service. New goods are stated at the lower of first-in, first-out (FIFO) cost or market, net of any reserve for obsolete or excess inventory. Merchandise placed in service to support our rental operations is amortized into cost of rental operations over the estimated useful lives of the underlying inventory items, primarily on a straight-line basis, which results in a matching of the cost of the merchandise with the weekly rental revenue generated by the merchandise. Estimated lives of rental merchandise in service range from six months to four years. In establishing estimated lives for merchandise in service, management considers historical experience and the intended use of the merchandise.

We review the estimated useful lives of our in-service inventory assets on a periodic basis or when trends in our business indicate that the useful lives for certain products might have changed. During the fourth quarter of fiscal year 2013, we completed an analysis of certain in-service inventory assets which resulted in the estimated useful lives for these assets being extended to better reflect the estimated periods in which the assets will remain in service. The effect of the change in estimate increased income from operations by \$2.6 million, net income by \$1.7 million and basic and diluted earnings per common share by \$0.09 in fiscal year 2013. In addition, based on historical purchase levels, the change is expected to increase income from operations, net income and basic and diluted earnings per common share in fiscal year 2014 by \$6.4 million, \$3.9 million and \$0.20, respectively. The effect on years after 2014 is not expected to be material.

We estimate our reserves for inventory obsolescence by examining our inventory to determine if there are indicators that carrying values exceed the net realizable value. Significant factors that could indicate the need for additional inventory write-downs include the age of the inventory, anticipated demand for our products, historical inventory usage, revenue trends and current economic conditions. We believe that adequate reserves for inventory obsolescence have been made in the Consolidated Financial Statements; however, in the future, product lines and customer requirements may change, which could result in an increase in obsolete inventory reserves or additional inventory impairments.

During the fourth quarter of fiscal year 2013, we recorded additional inventory reserves of \$3.6 million as a result of the restructuring of our Direct Sale business, and an evaluation of the recoverability of certain inventory. See Note 9, "Restructuring and Impairment Charges" of the Notes to the Consolidated Financial Statements for additional details.

Environmental Costs

We accrue various environmental related costs, which consist primarily of estimated clean-up costs, fines and penalties, when it is probable that we have incurred a liability and the amount can be reasonably estimated. When a single amount cannot be reasonably estimated but the cost can be estimated within a range, we accrue the minimum estimated amount. This accrued amount reflects our assumptions regarding the nature of the remedy and the outcome of discussions with regulatory agencies. Changes in the estimates on which the accruals are based, including unanticipated government enforcement actions or changes in environmental regulations, could result in higher or lower costs. Accordingly, as investigations and other actions proceed, it is likely that adjustments in our accruals will be necessary to reflect new information. The amounts of any such adjustments could have a material adverse effect on our results of operations or cash flows in a given period. We cannot predict the ultimate outcome of any of these

matters with certainty and it is possible that we may incur additional losses in excess of established reserves. However, we believe the possibility of a material adverse effect on our results of operations or financial position is remote.

Accruals for environmental liabilities are included in the "Accrued expenses - Other" line item in the Consolidated Balance Sheets. Environmental costs are capitalized if they extend the life of the related property, increase its capacity and/or mitigate or prevent future contamination. The cost of operating and maintaining environmental control equipment is charged to expense in the period incurred.

Table of Contents

For additional information see Note 13, "Commitments and Contingencies" of the Notes to the Consolidated Financial Statements.

Goodwill and Intangible Assets

The cost of acquisitions in excess of the fair value of the underlying net assets is recorded as goodwill.

Non-competition agreements that limit the seller from competing with us for a fixed period of time and acquired customer contracts are stated at cost less accumulated amortization and are amortized over the terms of the respective agreements or estimated average life of an account, which ranges from five to twenty years.

We test goodwill for impairment in the fourth quarter of each fiscal year or upon the occurrence of events or changes in circumstances that indicate that the asset might be impaired. We have determined that the reporting units for our goodwill impairment review are our operating segments, or components of an operating segment, that constitute a business for which discrete financial information is available, and for which segment management regularly reviews the operating results. Based on this analysis, we have identified three reporting units within our operating segments as of the fiscal year 2013 testing date. Our reporting units are U.S. Rental operations, Canadian Rental operations and Direct Sales operations. The associated goodwill balances were \$270.3 million, \$64.1 million and \$0, respectively, at June 29, 2013. There have been no changes to our reporting units or in the allocation of goodwill to each respective reporting unit in fiscal years 2013, 2012 or 2011.

The goodwill impairment test is performed using a two-step process. In the first step, we determine the estimated fair value of each reporting unit and compare it to the carrying value of the reporting unit, including goodwill. If the fair value of the reporting unit exceeds the carrying value of the net assets assigned to that unit, goodwill is not considered impaired and we are not required to perform further testing. If the carrying value of the net assets assigned to the reporting unit exceeds the fair value of the reporting unit, then we must perform the second step of the impairment test in order to determine the implied fair value of the reporting unit's goodwill. In the second step, we determine the implied fair value of the reporting unit's goodwill which is determined by allocating the fair value of the reporting unit in a manner similar to a purchase price allocation. The implied fair value is compared to the carrying amount and if the carrying amount of the reporting unit's goodwill exceeds the implied fair value of its goodwill, an impairment loss is recognized for the excess.

We used a market valuation approach to determine the fair value of each reporting unit for our annual impairment test in the fourth quarter of fiscal 2013, 2012 and 2011. The results of this test indicated that the estimated fair value exceeded the carrying value of our goodwill by more than 50% for our U.S. Rental and Canadian Rental reporting units for all fiscal years and therefore no impairment existed. All goodwill associated with our Direct Sales reporting unit had been previously impaired and written off.

Long-lived assets, including definite-lived intangible assets, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Recoverability is measured by comparison of the carrying amount of the asset to the future undiscounted cash flows the asset is expected to generate. If the asset is considered to be impaired, the amount of any impairment is measured as the difference between the carrying value and the fair value of the impaired asset. During the fourth quarter of fiscal year 2013, we recorded an impairment loss related to customer contracts totaling \$1.6 million. See Note 9, "Restructuring and Impairment Charges" of the Notes to the Consolidated Financial Statements for details on the impairment. There were no impairment charges for intangible assets in fiscal years 2012 or 2011.

Future events could cause management to conclude that impairment indicators exist and that goodwill and other intangibles associated with acquired businesses are impaired. Any resulting impairment loss could have a material impact on our financial condition and results of operations.

As of June 29, 2013, cumulative goodwill impairment losses total \$107.0 million. Of this amount, \$100.0 million was associated with our U.S. Rental operations and \$7.0 million was related to our Direct Sales operations.

Insurance

We carry large deductible insurance policies for certain obligations related to health, workers' compensation, auto and general liability programs. These deductibles range from \$0.4 million to \$0.8 million. Estimates are used in determining the potential liability associated with reported claims and for losses that have occurred, but have not been reported. Management estimates generally consider historical claims experience, escalating medical cost trends,

expected timing of claim payments and actuarial analyses provided by third parties. Changes in the cost of medical care, our ability to settle claims and the present value estimates and judgments used by management could have a material impact on the amount and timing of expense for any period.

Table of Contents

Income Taxes

Provisions for federal, state, and foreign income taxes are calculated based on reported pre-tax earnings and current tax law. Significant judgment is required in determining income tax provisions and evaluating tax positions. We periodically assess our liabilities and contingencies for all periods that are currently open to examination or have not been effectively settled based on the most current available information. If it is not more likely than not that our tax position will be sustained, we record our best estimate of the resulting tax liability and any applicable interest and penalties in the Consolidated Financial Statements.

Deferred tax assets and liabilities are recorded for temporary differences between the tax basis of assets and liabilities and their reported amounts in the financial statements, using statutory rates in effect for the year in which the differences are expected to reverse. We present the tax effects of these deferred tax assets and liabilities separately for each major tax jurisdiction. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the results of operations in the period that the changes are enacted. We record valuation allowances to reduce deferred tax assets when it is more likely than not that some portion of the asset may not be realized. We evaluate our deferred tax assets and liabilities on a periodic basis. We believe that we have adequately provided for our future income tax obligations based upon current facts, circumstances and tax law.

Results of Operations

The percentage relationships to revenues of certain income and expense items for the three fiscal years ended June 29, 2013, June 30, 2012 and July 2, 2011, and the percentage changes in these income and expense items between years are presented in the following table:

	Percentage of Revenues			Percentage Change			
	Years Ended			FY 2013 vs.	FY 2012 vs.		
	Fiscal 2013	Fiscal 2012	Fiscal 2011	FY 2012	FY 2011		
Revenues:							
Rental operations	91.8	% 91.4	% 91.7	% 4.8	% 4.6		%
Direct sales	8.2	8.6	8.3	(0.3) 9.0		
Total revenues	100.0	100.0	100.0	4.3	5.0		
Operating expenses:							
Cost of rental operations	67.5	69.1	68.0	2.4	6.4		
Cost of direct sales	79.4	77.5	74.1	2.1	14.1

Net income	5.1	% 2.8	% 4.0	% 93.5	% (27.2)%	

Fiscal Year 2013 Compared to Fiscal Year 2012

Fiscal Years. Our fiscal year ends on the Saturday closest to June 30. As a result, we will periodically have a fiscal year that consists of 53 weeks. Fiscal years 2013 and 2012 both had 52 weeks.

Revenues. Total revenues in fiscal year 2013 increased 4.3% to \$907.7 million from \$869.9 million in fiscal year 2012.

Rental revenue increased \$38.0 million in fiscal year 2013, a 4.8% increase from fiscal year 2012. The increase in rental revenue was primarily driven by organic growth. Our organic rental growth rate was 4.2% compared to 5.5% in the prior fiscal year. The decline in the rental organic growth rate from the prior year was primarily due to slight decreases in new account sales and the number of uniform wearers at existing customers, offset by continued improved execution related to merchandise recovery billings and uniform preparation services. The impact of

acquisitions added approximately 0.8% to our rental operations growth rate. Our organic rental growth rate is calculated using rental revenue, adjusted to exclude the impact of foreign currency exchange rate changes, divestitures, acquisitions and the previously noted modification of our revenue

Table of Contents

recognition policy compared to prior-period results. We believe that the organic rental revenue reflects the growth of our existing rental business and is, therefore, useful in analyzing our financial condition and results of operations. Direct sale revenue was \$74.5 million in fiscal year 2013, a 0.3% decrease from \$74.7 million in fiscal year 2012. The decrease resulted from a decline in uniform purchases by existing customers in our program business, the loss of one large customer and lower catalog sales, partially offset by several large new accounts. The organic direct sale growth rate was a negative 0.3% in fiscal year 2013 compared to 9.1% in fiscal year 2012.

Cost of Rental. Cost of rental operations, which includes merchandise, production and delivery expenses, increased 2.4% to \$562.7 million in fiscal year 2013 from \$549.6 million in fiscal year 2012. As a percentage of rental revenue, our gross margin from rental sales improved to 32.5% in fiscal year 2013 from 30.9% in the prior fiscal year. Cost of rental was favorably impacted by \$2.6 million or 0.3% of rental revenue due to the change in the estimated useful lives for certain in-service assets, as discussed in Note 1, "Summary of Significant Accounting Policies - Inventories" of the Notes to the Consolidated Financial Statements. Excluding this benefit, gross margin from rental sales was 32.1% and represented an improvement of 1.2%. This improvement was primarily due to continued improvements in production and delivery productivity, the favorable impact of fixed costs absorbed over a higher revenue base, lower depreciation expense and lower natural gas, motor fuel and health insurance costs. These favorable variances were partially offset by a continued and expected increase in merchandise costs.

Cost of Direct Sales. Cost of direct sales increased to \$59.2 million in fiscal year 2013 from \$57.9 million in fiscal year 2012. Gross margin from direct sales decreased in fiscal year 2013 to 20.6% from 22.5% in fiscal year 2012. Cost of direct sales included a \$3.6 million restructuring and impairment charge as discussed in Note 9, "Restructuring and Impairment Charges" of the Notes to the Consolidated Financial Statements, which represented 4.8% of direct sales revenue. Excluding these charges, gross margin from direct sales was 25.5% and represented an increase of 3.0%. This improvement was due to lower product costs, improved distribution productivity, lower freight costs and improved pricing discipline.

Pension Withdrawal and Associated Expenses. As discussed in Note 12, "Employee Benefit Plans" of the Notes to the Consolidated Financial Statements, we recorded a charge of \$24.0 million related to a withdrawal from a multi-employer pension plan in fiscal year 2012.

Selling and Administrative. Selling and administrative expenses increased to \$207.8 million in fiscal year 2013 from \$196.1 million in fiscal year 2012. As a percentage of total revenues, selling and administrative expenses increased to 22.9% in fiscal year 2013 from 22.5% in fiscal year 2012. The increase was primarily driven by restructuring and impairment charges, as discussed in Note 9, "Restructuring and Impairment Charges" of the Notes to the Consolidated Financial Statements. The restructuring costs included in selling and administrative expenses totaled \$6.2 million or 0.7% of revenue. Excluding these restructuring and impairment charges, selling and administrative costs were 22.2% of total revenue and represented a decrease of 0.3% from fiscal year 2012. This decrease was due to effective cost control as we leveraged fixed costs over a higher revenue base, a decrease in depreciation and amortization expense, lower sales expenses and lower group health insurance costs. These improvements were partially offset by higher incentive compensation and bad debt expense.

Income from Operations. The following is a summary of each operating segment's income from operations (in thousands):

	For the Fiscal Years		
	2013	2012	Change
United States	\$60,173	\$26,157	\$34,016
Canada	17,861	16,114	1,747
Total	\$78,034	\$42,271	\$35,763

The increase in consolidated income from operations in fiscal year 2013 compared to fiscal year 2012 was primarily due to additional income from increased revenue, improved production and delivery productivity, lower depreciation and amortization expense, lower energy costs, lower selling expenses, improved direct sale margins and the absence of a \$24.0 million charge related to the withdrawal from a multi-employer pension plan (MEPP), as discussed in Note 12, "Employee Benefit Plans" of the Notes to the Consolidated Financial Statements, as compared to the prior year. These improvements were offset by the restructuring and impairment charges noted above. In addition, income from

operations benefited from the change in estimated useful lives for certain in-service inventory assets noted above, which favorably impacted both the United States and Canada segments. Significant changes within the operating segments are described below.

19

Table of Contents

United States. Income from operations increased \$34.0 million to \$60.2 million in fiscal year 2013 from \$26.2 million in fiscal year 2012. The increase was primarily driven by the fiscal year 2012 charge associated with the withdrawal from a MEPP noted above, as well as additional income from increased revenue, improved production and delivery productivity, lower depreciation and amortization expense, lower health insurance costs and lower selling expenses in fiscal year 2013 compared to fiscal year 2012. These improvements were partially offset by higher merchandise costs in the current year and the restructuring and impairment charges noted above. Merchandise costs were favorably impacted by approximately \$2.3 million due to the change in the estimated useful lives for certain in-service assets.

Canada. Income from operations increased approximately \$1.7 million to \$17.9 million in fiscal year 2013 from \$16.1 million in fiscal year 2012. The increase was primarily driven by additional income from increased revenue, improved production productivity, lower selling expenses and improved direct sale margins. These improvements were partially offset by higher merchandise costs in the current year. Merchandise costs were favorably impacted by approximately \$0.3 million due to the change in the estimated useful lives for certain in-service assets.

Interest Expense. Interest expense was \$4.9 million in fiscal year 2013 as compared to \$6.1 million in fiscal year 2012. The decreased interest expense was due to lower average interest rates, the maturity of certain interest rate swaps agreements and a reduction in the amortization of debt closing costs resulting from the renewal of our unsecured revolving credit facility in fiscal year 2012. These decreases were partially offset by higher average debt balances, which were primarily driven by the declaration of the special dividend in April 2012.

Provision for Income Taxes. Our effective tax rate for fiscal year 2013 increased to 36.1% from 33.3% in fiscal year 2012. The current year tax rate is lower than our statutory rate, including state income taxes, primarily due to the decrease in reserves for uncertain tax positions due to the settlement of certain federal income tax examinations and expiration of certain tax statutes, as discussed in Note 11, "Income Taxes" of the Notes to the Consolidated Financial Statements. The prior year tax rate was lower than our statutory rate, including state income taxes, primarily due to a \$1.4 million benefit related to the final disposition of a subsidiary, the decrease in tax reserves for uncertain tax positions due to the expiration of certain tax statutes, and lower pretax income, offset by additional reserves established for uncertain tax positions.

Fiscal Year 2012 Compared to Fiscal Year 2011

Fiscal Years. Our fiscal year ends on the Saturday closest to June 30. As a result, we will periodically have a fiscal year that consists of 53 weeks. Fiscal years 2012 and 2011 both had 52 weeks.

Revenues. Total revenues in fiscal year 2012 increased 5.0% to \$869.9 million from \$828.9 million in fiscal year 2011.

As previously disclosed, fiscal year 2011 included additional revenue of \$5.9 million related to the change in our business practices and the resulting modification of our revenue recognition policy related to certain replacement fees. Excluding this item, total revenue in fiscal year 2012 increased \$46.9 million or 5.7%.

Rental revenue increased \$34.9 million in fiscal year 2012, a 4.6% increase from fiscal year 2011. Excluding the impact of the change in our business practices and the resulting modification of our revenue recognition policy noted above, rental revenue increased \$40.8 million or 5.4%. The increase in rental revenue was primarily driven by continued improvement in our organic growth rate, partially offset by a \$0.6 million unfavorable impact of foreign currency translation rates. Our organic rental growth rate was 5.5% compared to 0.75% in the prior fiscal year. The improvement in the rental organic growth rate was driven by virtually all components of organic growth, including continued strong new account sales, pricing, customer retention and customer employment levels.

Direct sale revenue was \$74.7 million in fiscal year 2012, a 9.0% increase from \$68.6 million in fiscal year 2011. The increase resulted primarily from an increase in catalog sales and the launch of a large new customer in our program business, offset by reductions in several other large program accounts. The organic direct sale growth rate was 9.1% in fiscal year 2012 compared to 11.5% in fiscal year 2011.

Cost of Rental. Cost of rental operations, which includes merchandise, production and delivery expenses, increased 6.4% to \$549.6 million in fiscal year 2012 from \$516.6 million in fiscal year 2011. As a percentage of rental revenue, our gross margin from rental sales decreased to 30.9% in fiscal 2012 from 32.0% in the prior fiscal year. The 110 basis point decrease from the prior year includes 50 basis points associated with the change in revenue recognized for replacement fees previously discussed. The remaining reduction in rental gross margin was primarily the result of

significantly higher merchandise costs related to increased cotton and other raw material costs, increased merchandise requirements to support new account growth and new customer additions, and a mix shift to higher cost specialty garments. In addition, we experienced an increase in gasoline costs and group health insurance costs. These items were partially offset by the favorable impact of fixed costs absorbed over a

20

Table of Contents

higher revenue base, improved production and delivery productivity, lower workers compensation costs and lower natural gas costs.

Cost of Direct Sales. Cost of direct sales increased to \$57.9 million in fiscal year 2012 from \$50.8 million in fiscal year 2011. Gross margin from direct sales decreased in fiscal year 2012 to 22.5% from 25.9% in fiscal year 2011. The decrease was primarily due to higher product costs, an increased mix of lower margin business in the current year, competitive pricing, increased product launch costs and higher freight and distribution costs.

Pension Withdrawal and Associated Expenses. As discussed in Note 12, "Employee Benefit Plans" of the Notes to the Consolidated Financial Statements, we recorded a charge of \$24.0 million related to a withdrawal from a multi-employer pension plan in fiscal year 2012.

Selling and Administrative. Selling and administrative expenses remained flat at \$196.1 million in fiscal year 2012. As a percentage of total revenues, selling and administrative expenses decreased to 22.5% in fiscal year 2012 from 23.7% in fiscal year 2011. The decrease is primarily related to effective cost control as we leveraged costs over a higher revenue base, a decrease in depreciation expense associated with certain assets becoming fully depreciated and lower selling costs. These items were partially offset by \$2.1 million of additional share-based compensation expense associated with an equitable adjustment to stock options resulting from our special dividend (see Note 10, "Stockholders' Equity" of the Notes to the Consolidated Financial Statements for additional information) and costs associated with continued restructuring of several businesses.

Income from Operations. The following is a summary of each operating segment's income from operations (in thousands):

	For the Fiscal Years		
	2012	2011	Change
United States	\$26,157	\$51,709	\$(25,552)
Canada	16,114	13,666	2,448
Total	\$42,271	\$65,375	\$(23,104)

The decrease in consolidated income from operations in fiscal year 2012 compared to fiscal year 2011 was primarily due to a \$24.0 million charge related to the withdrawal from a multi-employer pension plan (MEPP), as discussed in Note 12, "Employee Benefit Plans" of the Notes to the Consolidated Financial Statements. In addition, fiscal year 2011 included a previously disclosed \$5.9 million benefit from a change in our business practices regarding the replacement of certain lost or damaged in-service towel and linen inventory, as discussed in Note 1, "Summary of Significant Accounting Policies - Revenue Recognition," of the Notes to the Consolidated Financial Statements that did not recur in fiscal year 2012. Significant changes within the operating segments are also described below.

United States. Income from operations decreased approximately \$25.6 million to \$26.2 million in fiscal year 2012 from \$51.7 million in fiscal year 2011. The decrease was primarily driven by the fiscal year 2012 charge associated with the withdrawal from a MEPP noted above as well as the absence of the benefit in fiscal year 2012 from the change in business practices regarding the replacement of certain lost or damaged in-service towel and linen inventory noted above that occurred in fiscal year 2011. These unfavorable fiscal year 2012 variances were offset by increased revenue, improved production and delivery productivity, lower depreciation and amortization expense and lower selling expenses in fiscal year 2012 compared to fiscal year 2011.

Canada. Income from operations increased \$2.4 million to \$16.1 million in fiscal year 2012 from \$13.7 million in fiscal year 2011. The increase in fiscal year 2012 was primarily driven by increased revenue and improved production and delivery productivity compared to fiscal year 2011. These favorable fiscal year 2012 variances were offset by the absence of the benefit in fiscal year 2012 from the change in business practices regarding the replacement of certain lost or damaged in-service towel and linen inventory noted above that occurred in fiscal year 2011.

Interest Expense. Interest expense was \$6.1 million in fiscal year 2012 as compared to \$10.2 million in fiscal year 2011. The decrease in interest expense is the result of both lower average debt balances and lower average interest rates during fiscal year 2012 compared to fiscal year 2011. The lower average interest rates were driven by both the expiration of several interest rate swap agreements and the renewal of our revolver at a lower rate.

Provision for Income Taxes. Our effective tax rate for fiscal year 2012 decreased to 33.3% from 39.9% in fiscal year 2011. The tax rate in fiscal year 2012 was lower than our statutory rate, including state income taxes, primarily due to

a \$1.4 million benefit related to the final disposition of a subsidiary, the decrease in tax reserves for uncertain tax positions due to the expiration of certain tax statutes, offset by additional reserves established for uncertain tax positions. The tax rate in fiscal year

21

Table of Contents

2011 was higher than our statutory tax rate primarily due to the write-off of deferred tax assets associated with equity compensation, offset by the decrease in tax reserves for uncertain tax positions due to the expirations of certain tax statutes.

Liquidity, Capital Resources and Financial Condition

Financial Condition. Our financial condition is strong. In assessing our financial condition, we consider factors such as working capital, cash flows provided by operations, capital expenditures, and debt service obligations. We continue to fund our operations through a combination of cash flow from operations and debt financing. We believe we have sufficient access to capital markets to fund our operations. During fiscal year 2013, we reported record annual cash flow from operations of \$112.1 million.

Our primary sources of cash are net cash flows from operations and borrowings under our debt arrangements. Primary uses of cash are capital expenditures, dividends, acquisitions, working capital needs, payments on indebtedness and general corporate purposes.

Working capital at June 29, 2013 was \$178.1 million, a \$5.1 million decrease from \$183.2 million at June 30, 2012. The decrease in working capital was primarily due to a decrease in new goods inventory and an increase in accrued liabilities, partially offset by an increase in cash. As of June 29, 2013, all of our outstanding long-term debt had fixed maturities exceeding two years. As a result, excess cash generated from operations has resulted in an increase in our cash balance. Approximately \$25.3 million of our available cash was held in our Canadian subsidiaries. None of this amount was considered to be permanently reinvested and therefore could be repatriated without significant tax consequences.

Operating Activities. Net cash provided by operating activities was \$112.1 million, \$73.0 million and \$67.0 million in fiscal years 2013, 2012 and 2011, respectively. Cash provided by operations in fiscal year 2013 increased primarily due to higher net income and improvements in working capital, especially lower investments in inventory, partially offset by higher tax payments. Cash provided by operations in fiscal year 2012 increased primarily due to increased net income (excluding the impact of the primarily non-cash pension withdrawal charge) and a decrease in the growth in inventory spending to support our revenue increase.

Investing Activities. Net cash used for investing activities was \$54.1 million, \$35.1 million and \$20.7 million in fiscal years 2013, 2012 and 2011, respectively. The increase in fiscal year 2013 over fiscal year 2012 was primarily due to a business acquisition in the second quarter of fiscal year 2013. The increase in fiscal year 2012 over fiscal year 2011 was primarily due to a new plant site to support our growth and a new plant efficiency tracking tool.

Financing Activities. Net cash used for financing activities was \$38.0 million, \$40.7 million and \$32.3 million in fiscal years 2013, 2012 and 2011, respectively. Cash used for financing activities in fiscal year 2013 was primarily for repayments on our revolving credit facility due to strong cash flow and payment of dividends, offset by the issuance of \$100.0 million private placement notes and proceeds from the issuance of common stock under stock option plans. Cash used for financing activities in fiscal year 2012 was primarily for the payment of dividends, including our special dividend of \$6.00 per share. This was offset by borrowing under our revolving credit facility. Cash used for financing activities in fiscal year 2011 was primarily for repayment of debt and payment of dividends. We paid dividends of \$15.1 million, \$123.9 million and \$7.1 million in fiscal years 2013, 2012 and 2011, respectively. Dividends per share were \$0.78, \$6.585 and \$0.38 in fiscal years 2013, 2012 and 2011, respectively. The dividends per share in fiscal year 2012 included regular quarterly dividends of \$0.585 and a special dividend of \$6.00. We anticipate regular dividends in fiscal year 2014 will total \$1.08 per share, totaling approximately \$21.0 million.

Capital Structure. Total debt was \$175.0 million at June 29, 2013, a decrease of \$43.2 million from the prior year balance of \$218.2 million. The decrease in debt was driven primarily by strong cash flow and the issuance of common stock under stock option plans. The ratio of debt to capitalization (total debt divided by the sum of the stockholders' equity plus total debt) decreased to 27.3% at June 29, 2013, from 35.1% at June 30, 2012.

We believe that we will be able to fund all currently anticipated cash requirements for fiscal year 2014, including scheduled debt repayments, new investments in the business, dividend payments, and possible business acquisitions, from operating cash flow and our revolving credit facility.

We have a \$250.0 million, five-year unsecured revolving credit facility ("250M Revolver") with a syndicate of banks, which expires on March 7, 2017. Borrowings in U.S. dollars under this credit facility generally bear interest at

adjusted LIBOR for specified interest periods plus a margin, which can range from 1.00% to 2.00%, depending on our consolidated leverage ratio. Additionally, we have access to a swingline facility under this line of credit as well as alternative base rate borrowings that are priced based on an agreed upon baseline rate plus a spread determined by the same consolidated leverage ratio.

Table of Contents

As of June 29, 2013, there were no borrowings outstanding under this facility. The unused portion of this facility may be used for general corporate purposes, acquisitions, share repurchases, dividends, working capital needs and to provide up to \$50.0 million in letters of credit. As of June 29, 2013, letters of credit outstanding under this facility totaled \$0.6 million and primarily related to our property and casualty insurance programs. No amounts have been drawn upon these letters of credit. We pay a fee on the unused daily balance of this facility based on a leverage ratio calculated on a quarterly basis. At June 29, 2013 this fee was 0.20% of the unused daily balance.

Availability of credit under this facility requires that we maintain compliance with certain covenants.

The covenants under this agreement are the most restrictive when compared to our other credit facilities. The following table illustrates compliance with the material covenants required by the terms of this facility as of June 29, 2013:

	Required	Actual
Maximum Leverage Ratio (Debt/EBITDA)	3.50	1.60
Minimum Interest Coverage Ratio (EBITDA/Interest Expense)	3.00	25.91
Minimum Net Worth	\$377.8	\$467.0

Our maximum leverage ratio and minimum interest coverage ratio covenants are calculated by adding back certain non-cash charges, as defined in our debt agreement.

On April 12, 2013, we amended this facility to remove the minimum net worth covenant. However, this change is not effective until the earlier of June 30, 2015 or the date of full repayment of the \$75.0 million variable rate unsecured private placement notes.

We have \$75.0 million of variable rate unsecured private placement notes ("75M Variable Rate Notes") bearing interest at 0.60% over LIBOR and are scheduled to mature on June 30, 2015. The notes do not require principal payments until maturity. Interest payments are reset and paid on a quarterly basis. As of June 29, 2013, the outstanding balance of the notes was \$75.0 million at an all-in rate of 0.88%. As mentioned above, we have a minimum net worth covenant, which could limit the amount of dividends and share repurchases in any given period. We maintain a \$50.0 million accounts receivable securitization facility ("50M A/R Line"), which expires on September 27, 2013. Under the terms of the facility, we pay interest at a rate per annum equal to a margin of 0.76%, plus LIBOR. The facility is subject to customary fees for the issuance of letters of credit and any unused portion of the facility. As is customary with transactions of this nature, our eligible accounts receivable are sold to a consolidated subsidiary. As of June 29, 2013, there were no borrowings outstanding under this securitization facility and there were \$26.2 million of letters of credit outstanding, primarily related to our property and casualty insurance programs. On April 15, 2013, we issued \$100.0 million of fixed rate unsecured senior notes ("100M Fixed Rate Notes") through a private placement transaction. We issued \$50.0 million of the notes with a fixed interest rate of 3.73% per annum maturing April 15, 2023 and \$50.0 million of the notes with a fixed interest rate of 3.88% per annum maturing on April 15, 2025. Interest on the notes is payable semiannually. As of June 29, 2013, the outstanding balance of the notes was \$100.0 million at an all-in rate of 3.81%.

The unsecured senior notes contain customary covenants, including, without limitation, covenants limiting priority indebtedness and liens. There is also a make-whole provision, as well as restrictions on mergers, consolidations, sales of assets and transactions with affiliates.

The proceeds were used to refinance existing floating rate debt under our unsecured revolving credit facility and accounts receivable securitization facility.

See Note 6, "Derivative Financial Instruments" of the Notes to the Consolidated Financial Statements for details of our interest rate swap and hedging activities related to our outstanding debt.

The credit facilities, loan agreements, fixed rate notes and variable rate notes contain various restrictive covenants that, among other matters, require us to maintain a minimum stockholders' equity and a maximum leverage ratio. These debt arrangements also contain customary representations, warranties, covenants and indemnifications. At June 29, 2013, we were in compliance with all debt covenants and we believe only a material adverse change in our financial performance and condition could result in a potential event of default under the covenants associated with this facility. In the unlikely situation that an event of default would be imminent, we believe that we would be able to successfully negotiate amended covenants or obtain waivers; however, certain financial concessions might be

required. Our results of operations and financial condition could be adversely affected if amended covenants or waivers on acceptable terms could not be successfully negotiated.

Table of Contents

Cash Obligations. Under various agreements, we are obligated to make future cash payments in fixed amounts. These include payments under the revolving credit facility, capital lease obligations and rent payments required under operating leases with initial or remaining terms in excess of one year.

The following table summarizes our cash payment obligations as of June 29, 2013 for the next five fiscal years and thereafter (in thousands):

	Less than one year	One to three years	Three to five years	After five years	Total
\$250M Revolver	\$—	\$—	\$—	\$—	\$—
\$50M A/R Line	—	—	—	—	—
\$75M Variable Rate Notes	—	75,000	—	—	75,000
\$100M Fixed Rate Notes	—	—	—	100,000	100,000
Other debt arrangements, including capital leases	18	—	—	—	18
Operating leases	27,814	39,037	21,514	16,806	105,171
Multi-employer pension payments (including interest)	2,405	5,758	4,125	21,412	33,700
Retirement benefit payments	2,903	6,310	7,395	24,020	40,628
Estimated interest payments related to credit facilities	5,812	9,880	8,710	22,684	47,086
Total contractual cash obligations	\$38,952	\$135,985	\$41,744	\$184,922	\$401,603

We calculated the estimated interest payments related to credit facilities by using the total debt balance outstanding as of June 29, 2013, and applying the interest rates in effect at that time to future periods.

As of June 29, 2013, we have entered into certain interest rate swap agreements whereby we have limited our exposure to future interest rate increases. See Note 6, "Derivative Financial Instruments" of the Notes to the Consolidated Financial Statements for further discussion.

At June 29, 2013, we had approximately \$273.1 million of available capacity under our revolving and accounts receivable credit facilities. However, borrowings would be limited to \$239.3 million due to debt covenant limitations. Our revolving credit facility contributes \$215.5 million of liquidity and our accounts receivable securitization facility contributes \$23.8 million. We anticipate that our cash flows from operations and available capacity under our credit facilities will be sufficient to satisfy our cash commitments and capital requirements for fiscal year 2014. We may utilize borrowings under the revolving credit facility to supplement our cash requirements from time to time. We estimate that capital expenditures in fiscal year 2014 will be approximately \$40.0-\$45.0 million.

Off Balance Sheet Arrangements

At June 29, 2013, we had \$26.8 million of stand-by letters of credit that were issued and outstanding, primarily in connection with our property and casualty insurance programs. No amounts have been drawn upon these letters of credit. In addition, we have outstanding operating leases with contractual obligations totaling \$105.2 million related to facility, equipment and vehicle leases. We do not utilize special purpose entities to facilitate off-balance sheet financing arrangements.

Pension Obligations

Effective January 1, 2007, we froze our defined benefit pension plan and related supplemental executive retirement plan. Future growth in benefits will not occur beyond this date. We anticipate making cash contributions of approximately \$2.0 million in fiscal year 2014.

The calculation of pension expense and the corresponding liability requires the use of a number of critical assumptions, including the expected long-term rate of return on plan assets and the assumed discount rate. Changes in these assumptions can result in different expense and liability amounts, and future actual experience can differ from these assumptions. Pension expense increases as the expected rate of return on pension plan assets decreases. We estimated that the pension plan assets will generate a long-term rate of return of 7.25%, 7.50% and 7.75% at June 29, 2013, June 30, 2012 and July 2, 2011, respectively. These rates were developed by evaluating input from our outside actuary and reference to historical performance and long-term inflation assumptions. The expected long-term rate of

return on plan assets at June 29, 2013 is based on an allocation of equity and fixed income securities. As part of our assessment of the expected return on plan assets, we considered historical asset performance, and concluded that a reduction to our long term rate to 7.25% was appropriate. Decreasing the expected long-term rate of return by 0.50% (from 7.25% to 6.75%) would increase our estimated 2014 pension expense by approximately

Table of Contents

\$0.3 million. Pension liability and future pension expense increase as the discount rate is reduced. We discounted future pension obligations using a rate of 5.25%, 4.30% and 5.70% at June 29, 2013, June 30, 2012 and July 2, 2011, respectively. Our independent actuary determines the discount rate by creating a yield curve based on high quality bonds. Decreasing the discount rate by 0.50% (from 5.25% to 4.75%) would increase our accumulated benefit obligation at June 29, 2013 by approximately \$6.4 million and increase the estimated fiscal year 2014 pension expense by approximately \$0.6 million.

Future changes in the expected return on plan asset, assumed discount rates and various other factors related to the participants in our pension plan will impact our future pension expense and liabilities. We cannot predict with certainty what these factors will be in the future.

Multi-Employer Pension Plans

We participate in a number of union sponsored, collectively bargained multi-employer pension plans ("MEPPs"). We record the required cash contributions to the MEPPs as an expense in the period incurred and a liability is recognized for any contributions due and unpaid, consistent with the accounting for defined contribution plans. In addition, we are responsible for our proportional share of any unfunded vested benefits related to the MEPPs. However, under applicable accounting rules, we are not required to record a liability until we withdraw from the plan or when it becomes probable that a withdrawal will occur.

Central States MEPP -

In the third quarter of fiscal year 2012, we concluded negotiations with a union to discontinue our participation in the Central States Southeast and Southwest Areas Pension Fund ("Central States MEPP") for two locations and also closed two redundant branch facilities that participated in the Central States MEPP. During fiscal year 2013, we successfully concluded negotiations to discontinue participation at the remaining three locations and have submitted a formal notice of withdrawal from the plan. As a result of these actions, we have completely discontinued our participation in the Central States MEPP.

Employer's accounting for MEPPs (ASC 715-80) provides that a withdrawal liability should be recorded if circumstances that give rise to an obligation become probable and estimable. As a result of the actions noted above, in the third quarter of fiscal year 2012, we recorded a pre-tax charge of \$24.0 million. This charge included the discounted actuarial value of the total estimated withdrawal liability, incentives for union participants and other related costs that had been incurred. We expect to pay the withdrawal liability over a period of 20 years. In the fourth quarter of fiscal year 2013, we completed our negotiation with the final location and we received updated information related to our withdrawal liability. As a result, we recorded an additional withdrawal liability of \$1.0 million. The amount of the withdrawal liability recorded is based on the best information available and is subject to change based on revised information received periodically from the union sponsors and other factors. These potential changes could have a material impact on our results of operations and financial condition.

Other MEPPs -

In fiscal year 2011, local union members at two locations voted to decertify their respective unions. The decertification resulted in a partial withdrawal from the associated MEPP and we recorded a charge of \$1.0 million. As of June 29, 2013, we continue to participate in several other MEPPs, for which we have not recorded a withdrawal liability. Based upon the most recent plan data available from the trustees managing these MEPPs, our share of the undiscounted, unfunded vested benefits for these MEPPs is estimated to be \$4.0 million to \$5.5 million. A partial or full withdrawal from a MEPP may be triggered by circumstances beyond our control. As evidenced by the negotiations above, we could also trigger the liability by successfully negotiating with a union to discontinue participation in the MEPP. If a future withdrawal from the plan occurs, we will record our estimated discounted share of any unfunded vested benefits in the period in which the withdrawal occurs.

The ultimate amount of the withdrawal liability assessed by the MEPPs is impacted by a number of factors, including, among other things, investment returns, benefit levels, interest rates, financial difficulty of other participating employers in the plan and our continued participation with other employers in the MEPPs, each of which could impact the ultimate withdrawal liability.

Impact of Inflation

In general, we believe that our results of operations are not significantly affected by moderate changes in the inflation rate. Historically, we have been able to manage the impacts of more significant changes in inflation rates through our customer relationships and a continued focus on operational productivity improvements. Our customer agreements generally provide for price increases consistent with the rate of inflation.

Table of Contents

Significant increases in energy costs, specifically natural gas and gasoline, and other commodities, can materially affect our results of operations and financial condition. Currently, energy costs represent approximately 4.0% of our total revenue.

Restructuring and Impairment Charges

In the fourth quarter of fiscal year 2013, we closed one of our rental facilities and restructured our direct sale business. The rental facility had become redundant as a result of the acquisition we made earlier in the fiscal year. In addition, we made the decision to transition our GKdirect Catalog business to a third-party catalog offering and outsource the fulfillment operations. This change resulted in the discontinuance of certain product offerings and the establishment of \$1.4 million of lower of cost or market reserves to reduce the carrying amount of inventory to its estimated net realizable value. In addition, we incurred charges for equipment write-downs and severance related to the closure of the distribution center. Also, as part of our annual fourth quarter impairment test and recent changes in our GKdirect Program business, we identified certain impairment indicators that required us to perform an assessment of the recoverability of the long-lived assets related to the business. As part of this assessment, we determined that the carrying value of certain long-lived assets exceeded their fair values. The estimated fair values were determined using a discounted cash flow approach. This analysis resulted in the impairment of certain long-lived assets, including computer software, customer contracts and other property and equipment. Finally, the changes to our GKdirect Program business noted above resulted in an evaluation of the recoverability of related inventory. As part of this evaluation we established \$2.2 million of additional reserves to reduce inventory to its net realizable value based on our updated business plan.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risks. Market risk is the potential loss arising from adverse changes in interest rates, energy prices and foreign currency exchange rates. We do not enter into derivative or other financial instruments for speculative purposes.

Interest Rate Risk

We are subject to market risk exposure related to changes in interest rates. We use financial instruments such as interest rate swap agreements, to manage interest rate risk on our variable rate debt. Under these arrangements, we agree to exchange, at specified intervals, the difference between fixed and floating interest amounts, calculated by reference to an agreed upon notional principal amount. Interest rate swap agreements are entered into for periods consistent with related underlying exposures and do not constitute positions independent of those exposures. The estimated exposure considers the mitigating effects of interest rate swap agreements outstanding at June 29, 2013 on the change in the cost of variable rate debt. The current fair market value of all outstanding contracts at June 29, 2013 was an unrealized loss of \$1.1 million.

As of June 29, 2013, all of our outstanding debt is either at a fixed rate or a variable rate that has been modified with interest rate swap agreements. As a result, we believe forecasted interest expense would not change as a result of changes in interest rates.

For additional information regarding our debt see Note 4, "Long-Term Debt" of the Notes to the Consolidated Financial Statements as well as the Liquidity, Capital Resources and Financial Condition section of Management's Discussion and Analysis of Financial Condition and Results of Operations.

Energy Cost Risk

We are subject to market risk exposure related to changes in energy costs. To manage this risk, from time to time we have used derivative financial instruments to mitigate the impact of gasoline and diesel cost volatility on our future financial results. As of June 29, 2013, we have no outstanding derivative financial instruments related to gasoline and diesel fuel.

We performed an analysis to measure the sensitivity of our energy costs to changes in the prices of unleaded gasoline and diesel fuel. The analysis used gasoline and diesel prices at June 29, 2013 and forecasted purchases over the next twelve months. For each one percentage point increase or decrease in gasoline and diesel prices under these assumptions, our gasoline and diesel costs would change by approximately \$0.2 million.

Production costs at our plants are also subject to fluctuations in natural gas costs. To reduce our exposure to changes in natural gas prices, we utilize natural gas supply contracts in the normal course of business. These contracts meet the

definition of "normal purchase" and, therefore, are not considered derivative instruments for accounting purposes.

26

Table of Contents

Foreign Currency Exchange Risk

Our only material foreign subsidiaries are located in Canada. The assets and liabilities of these subsidiaries are denominated in the Canadian dollar and, as such, are translated into U.S. dollars at the exchange rate in effect at the balance sheet date. Results of operations are translated using the average exchange rates throughout the period. The effect of exchange rate fluctuations on translation of assets and liabilities are recorded as a component of stockholders' equity and are included in the "Accumulated other comprehensive income" line item of the Consolidated Balance Sheets. Gains and losses from foreign currency transactions are included in results of operations.

ITEM 8. FINANCIAL STATEMENTS AND
SUPPLEMENTARY DATA

Following is a summary of the results of operations for each of the quarters within the fiscal years ended June 29, 2013 and June 30, 2012. All amounts are in thousands, except per share data.

Our fiscal year ends on the Saturday nearest June 30, and consists of 52-53 weeks. Fiscal years 2013 and 2012 were 52 week years. The third quarter of fiscal 2012 includes a pre-tax charge of \$24,004 associated with withdrawing from a multi-employer pension plan (see Note 12, "Employee Benefit Plans" of the Notes to the Consolidated Financial Statements for further information). The fourth quarter of fiscal 2013 includes net pre-tax charges of \$8,228 related to restructuring and impairment charges and an increase in our estimated liability associated with the exit of a multi-employer pension plan, offset by the benefit of the change in estimated merchandise amortization lives. See Note 1, "Summary of Significant Accounting Policies" and Note 9, "Restructuring and Impairment Charges" of the Notes to the Consolidated Financial Statements for further information.

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting for G&K Services, Inc. ("the Company") as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934. Our internal control over financial reporting was designed under the supervision of the Company's principal executive officer, principal financial officer, principal accounting officer and other members of management, and effected by the Company's Board of Directors, to provide reasonable assurance regarding the reliability of financial reporting and the preparation and presentation of financial statements for external purposes in accordance with generally accepted accounting principles in the United States.

Our management completed an assessment of the Company's internal control over financial reporting. This assessment was based on the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") in Internal Control-Integrated Framework. Based on this assessment, management has concluded that our internal control over financial reporting was effective as of June 29, 2013.

Ernst & Young LLP, the Company's independent registered public accounting firm that audited the consolidated financial statements and schedule and the effectiveness of the Company's internal control over financial reporting, has issued an unqualified attestation report on the Company's effectiveness of internal control over financial reporting, as stated in their report which is included herein.

Any internal control system over financial reporting, no matter how well conceived and operated, has inherent limitations. As a result, even those systems determined to be effective can provide only reasonable, not absolute, assurance that the control objectives over the reliability of financial reporting and preparation and presentation of financial statements for external purposes in accordance with generally accepted accounting principles in the United States are met.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders

G&K Services, Inc. and Subsidiaries

We have audited the accompanying consolidated balance sheets of G&K Services, Inc. and Subsidiaries (the Company) as of June 29, 2013 and June 30, 2012, and the related consolidated statements of operations, comprehensive income, shareholders' equity, and cash flows for each of the three years in the period ended June 29, 2013. Our audits also included the financial statement schedule listed in the Index at Item 15 (a). These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of G&K Services, Inc. and Subsidiaries at June 29, 2013 and June 30, 2012, and the consolidated results of its operations and its cash flows for each of the three years in the period ended June 29, 2013, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of June 29, 2013, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated August 23, 2013, expressed an unqualified opinion thereon.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders

G&K Services, Inc. and Subsidiaries

We have audited G&K Services, Inc. and Subsidiaries' (the Company) internal control over financial reporting as of June 29, 2013, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). The Company's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, G&K Services, Inc. and Subsidiaries maintained, in all material respects, effective internal control over financial reporting as of June 29, 2013, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of the Company as of June 29, 2013 and June 30, 2012, and the related consolidated statements of operations, comprehensive income, shareholders' equity, and cash flows for each of the three years in the period ended June 29, 2013, and our report dated August 23, 2013 expressed an unqualified opinion thereon.
