SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934
For the quarterly period ended September 27, 2014
Commission file number 0-4063

G&K SERVICES, INC.
(Exact name of registrant as specified in its charter)

MINNESOTA	41-0449530
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)
5995 OPUS PARKWAY	
MINNETONKA, MINNESOTA 55343	
(Address of principal executive offices and zip code)	
Registrant's telephone number, including area code (952) 912-5500	

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐ Accelerated filer ☐

Non-accelerated filer ☒ (do not check if a smaller reporting company) Smaller reporting company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

Indicate the number of shares outstanding of each of the issuer's classes of common stock as of the latest practicable date.

Common Stock, par value \$0.50 per share, outstanding
October 23, 2014 was 19,928,859 shares

G&K SERVICES, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except per share data)

(Unaudited)

1. Basis of Presentation for Interim Financial Statements

The Condensed Consolidated Financial Statements of G&K Services, Inc. (the "Company" or "G&K") as set forth in this quarterly report have been prepared pursuant to the rules and regulations of the U. S. Securities and Exchange Commission for interim reporting. As permitted under those rules, certain footnotes and other financial information that are normally required by accounting principles generally accepted in the United States can be condensed or omitted. Our accounting policies are described in the Notes to the Consolidated Financial Statements in our Annual Report on Form 10-K for the fiscal year ended June 28, 2014 ("fiscal 2014"). Management is responsible for the unaudited Condensed Consolidated Financial Statements included in this document. The Condensed Consolidated Financial Statements included in this document are unaudited but, in the opinion of management, include all adjustments (consisting of only normal recurring adjustments) necessary for a fair presentation of our financial position as of September 27, 2014, and the results of our operations for the three months ended September 27, 2014 and September 28, 2013 and our cash flows for the three months ended September 27, 2014 and September 28, 2013. The results of operations for the three month periods ended September 27, 2014 and September 28, 2013 are not necessarily indicative of the results to be expected for the full year.

This Quarterly Report on Form 10-Q should be read in conjunction with our Consolidated Financial Statements and notes included in our fiscal 2014 Annual Report on Form 10-K.

2. Contingent Liabilities

Environmental Matters

From time-to-time, we are involved in environmental-related proceedings by certain governmental agencies, which relate primarily to allegedly operating certain facilities in noncompliance with required permits. In addition to these proceedings, in the normal course of our business, we are subject to, among other things, periodic inspections by regulatory agencies, and we are involved in the remediation of various properties. As of September 27, 2014 and June 28, 2014, we had reserves of approximately \$1,000 and \$900, respectively, related to these matters. There was \$205 and \$283 of expense for these matters for the three months ended September 27, 2014 and September 28, 2013, respectively.

Legal Matters

The United States Office of Federal Contract Compliance Programs, or OFCCP, is, as part of routine audits, conducting a review of certain of our employment practices. The OFCCP has issued a Predetermination Notice to one of our facilities and a Notice of Violation to two others. Audits of six other facilities, where the OFCCP may claim there are similar alleged violations, are ongoing. We have been engaged in discussions with the OFCCP and believe that our practices are lawful and without bias. While we cannot predict the ultimate outcome of these matters with certainty and it is possible that we may incur additional losses in excess of established reserves, we believe the possibility of a material adverse effect on our results of operations or financial position is remote.

See Note 13, "Employee Benefit Plans," of the Notes to the Condensed Consolidated Financial Statements for information regarding disputed amounts related to our withdrawal from the Central States Southeast and Southwest Areas Pension Fund.

3. New Accounting Pronouncements

In July 2013, the FASB issued updated guidance to address the presentation of an unrecognized tax benefit when a net operating loss carry-forward, a similar tax loss, or a tax credit carry-forward exists. Specifically, the new guidance requires entities to present an unrecognized tax benefit netted against certain deferred tax assets when specific requirements are met. Our adoption of this guidance in the first quarter of fiscal year 2015 did not have a material impact on our results of operations, financial position or cash flows.

In May 2014, the FASB issued updated guidance to clarify revenue recognition principles. This guidance is intended to improve disclosure requirements and enhance the comparability of revenue recognition practices. Improved disclosures under the amended guidance relate to the nature, amount, timing and uncertainty of revenue that is

recognized from contracts with customers. This guidance will be effective for annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period. We are currently evaluating the impact this new guidance will have on our Consolidated Financial Statements.

Table of Contents

4. Fair Value Measurements

Generally accepted accounting principles (GAAP) defines fair value, establishes a framework for measuring fair value and establishes disclosure requirements about fair value measurements. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. We considered non-performance risk when determining fair value of our derivative financial instruments. The fair value hierarchy prescribed under GAAP contains the following three levels:

Level 1 — unadjusted quoted prices that are available in active markets for the identical assets or liabilities at the measurement date.

Level 2 — other observable inputs available at the measurement date, other than quoted prices included in Level 1, either directly or indirectly, including:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets in non-active markets;
- inputs other than quoted prices that are observable for the asset or liability; and
- inputs that are derived principally from or corroborated by other observable market data.

Level 3 — unobservable inputs that cannot be corroborated by observable market data and reflect the use of significant management judgment. These values are generally determined using pricing models for which the assumptions utilize management's estimates of market participant assumptions.

We do not have any Level 3 assets or liabilities and we have not transferred any items between fair value levels during the first quarter of fiscal years 2014 or 2015.

The following tables summarize the assets and liabilities measured at fair value on a recurring basis as of September 27, 2014 and June 28, 2014:

	As of September 27, 2014		
	Fair Value Measurements Using Inputs Considered as		
	Level 1	Level 2	Total
Other assets:			
Money market mutual funds	\$ 3,787	\$ —	\$ 3,787
Equity and fixed income mutual funds	29,712	—	29,712
Cash surrender value of life insurance policies	—	14,286	14,286
Total assets	\$ 33,499	\$ 14,286	\$ 47,785
Accrued expenses:			
Derivative financial instruments	\$ —	\$ 746	\$ 746
Total liabilities	\$ —	\$ 746	\$ 746
	As of June 28, 2014		
	Fair Value Measurements Using Inputs Considered as		
	Level 1	Level 2	Total
Other assets:			
Money market mutual funds	\$ 3,309	\$ —	\$ 3,309
Equity and fixed income mutual funds	29,358	—	29,358
Cash surrender value of life insurance policies	—	14,287	14,287
Total assets	\$ 32,667	\$ 14,287	\$ 46,954
Accrued expenses:			
Derivative financial instruments	\$ —	\$ 930	\$ 930
Total liabilities	\$ —	\$ 930	\$ 930

The cash surrender value of life insurance policies are primarily investments established to fund the obligations of the Company's non-qualified, non-contributory supplemental executive retirement plan (SERP). The money market, equity and fixed income mutual funds are investments established to fund the obligations of the Company's non-qualified deferred compensation plan.

Table of Contents

The following tables summarize the fair values of assets and liabilities that are recorded at historical cost as of September 27, 2014 and June 28, 2014:

	As of September 27, 2014		
	Fair Value Measurements Using Inputs Considered as		
	Level 1	Level 2	Total
Cash and cash equivalents	\$ 38,677	\$ —	\$ 38,677
Total assets	\$ 38,677	\$ —	\$ 38,677
Current maturities of long-term debt	\$ —	\$ 621	\$ 621
Long-term debt, net of current maturities	\$ —	\$ 266,178	\$ 266,178
Total liabilities	\$ —	\$ 266,799	\$ 266,799

	As of June 28, 2014		
	Fair Value Measurements Using Inputs Considered as		
	Level 1	Level 2	Total
Cash and cash equivalents	\$ 37,118	\$ —	\$ 37,118
Total assets	\$ 37,118	\$ —	\$ 37,118
Current maturities of long-term debt	\$ —	\$ 792	\$ 792
Long-term debt, net of current maturities	—	263,191	263,191
Total liabilities	\$ —	\$ 263,983	\$ 263,983

5. Derivative Financial Instruments

In the ordinary course of business, we are exposed to market risks. We utilize derivative financial instruments to manage interest rate risk and manage the total debt that is subject to variable and fixed interest rates. These interest rate swap contracts modify our exposure to interest rate risk by converting variable rate debt to a fixed rate or by locking in the benchmark interest rate on forecasted issuances of fixed rate debt.

For derivative financial instruments that are designated and qualify as cash flow hedges, the effective portion of the change in fair value on the derivative financial instrument is reported as a component of "Accumulated other comprehensive income" and reclassified into the "Interest expense" line item in the Condensed Consolidated Statements of Operations in the same period as the expenses from the cash flows of the interest expense is recognized. Cash payments or receipts are included in "Net cash provided by operating activities" in the Condensed Consolidated Statements of Cash Flows in the same period as the cash is settled. We perform an assessment at the inception of the hedge and on a quarterly basis thereafter, to determine whether our derivatives are highly effective in offsetting changes in the value of the hedged items. Any change in the fair value resulting from hedge ineffectiveness is immediately recognized as income or expense.

We do not have any derivative financial instruments that have been designated as either a fair value hedge, a hedge of a net investment in a foreign operation, or that are held for trading or speculative purposes. Cash flows associated with derivative financial instruments are classified in the same category as the cash flows hedged in the Condensed Consolidated Statements of Cash Flows.

Approximately 44% of our outstanding variable rate debt had its interest payments modified using interest rate swap contracts at September 27, 2014.

As of September 27, 2014 and June 28, 2014, we had \$746 and \$930, respectively, of liabilities on interest rate swap contracts that are classified as "Accrued expenses and other current liabilities" in the Condensed Consolidated Balance Sheets. Of the \$1,132 net gain deferred in accumulated other comprehensive income as of September 27, 2014, a \$202 loss is expected to be reclassified to interest expense in the next 12 months.

As of September 27, 2014 and June 28, 2014, all derivative financial instruments were designated as hedging instruments.

As of September 27, 2014, we had interest rate swap contracts to pay fixed rates of interest and to receive variable rates of interest based on the three-month London Interbank Offered Rate ("LIBOR"), all of which mature in the next 12 months. The average rate on the \$75,000 of interest rate swap contracts was 1.25% as of September 27, 2014. These interest rate swap contracts are highly effective cash flow hedges and accordingly, gains or losses on any

ineffectiveness were not material to any period.

10

Table of Contents

6. Income Taxes

Our effective tax rate decreased to 34.7% in the three months ended September 27, 2014 from 38.1% in the three months ended September 28, 2013. The current period tax rate is lower than the prior year period due to the expiration of certain tax statutes in the current quarter.

7. Earnings Per Share

Accounting Standards Codification (ASC) 260-10-45, Participating Securities and the Two-Class Method ("ASC 260-10-45"), addresses whether awards granted in unvested share-based payment transactions that contain non-forfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and therefore are included in computing earnings per share under the two-class method. Participating securities are securities that may participate in dividends with common stock and the two-class method is an earnings allocation formula that treats a participating security as having rights to earnings that would otherwise have been available to common shareholders. Under the two-class method, earnings for the period are allocated between common shareholders and other shareholders, based on their respective rights to receive dividends. Certain restricted stock awards granted under our Equity Plans are considered participating securities as these awards receive non-forfeitable dividends at the same rate as common stock.

The computations of our basic and diluted earnings per share are set forth below:

	Three Months Ended	
	September 27, 2014	September 28, 2013
Net income from continuing operations	\$16,368	\$13,610
Less: Income allocable to participating securities	(233)	(181)
Net income from continuing operations available to common stockholders	\$16,135	\$13,429
Net income from discontinued operations	—	211
Net income available to common stockholders	\$16,135	\$13,640
Basic earnings per share (shares in thousands):		
Weighted average shares outstanding, basic	19,628	19,429
Basic earnings per common share:		
From continuing operations	\$0.82	\$0.69
From discontinued operations	\$—	\$0.01
Basic earnings per share	\$0.82	\$0.70
Diluted earnings per share (shares in thousands):		
Weighted average shares outstanding, basic	19,628	19,429
Weighted average effect of non-vested restricted stock grants and assumed exercise of stock options	371	407
Weighted average shares outstanding, diluted	19,999	19,836
Diluted earnings per common share:		
From continuing operations	\$0.81	\$0.68
From discontinued operations	\$—	\$0.01
Diluted earnings per share	\$0.81	\$0.69

We excluded potential common shares related to our outstanding equity compensation grants of 246,000 and 94,000 for the three months ended September 27, 2014 and September 28, 2013, respectively, from the computation of diluted earnings per share. Inclusion of these shares would have been anti-dilutive.

Table of Contents

8. Inventory and Merchandise In Service

The components of inventory as of September 27, 2014 and June 28, 2014 are as follows:

	September 27, 2014	June 28, 2014
Raw Materials	\$8,612	\$7,952
Work in Process	1,209	1,279
Finished Goods	28,682	29,192
Total Inventory	\$38,503	\$38,423

We review the estimated useful lives of our merchandise in service assets on a periodic basis or when trends in our business indicate that the useful lives for certain products might have changed. During the fourth quarter of fiscal year 2013, we completed an analysis of certain merchandise in service assets which resulted in the estimated useful lives for these assets being extended to better reflect the estimated periods in which the assets will remain in service. The effect of the change in estimate increased income from operations by \$2,273, net income by \$1,435 and basic and diluted earnings per common share by \$0.07 for the three months ended September 28, 2013, respectively. The effect of the change in estimate is not material for the three months ended September 27, 2014.

9. Goodwill

Goodwill by segment is as follows:

	United States	Canada	Total
Balance as of June 28, 2014	\$270,045	\$63,169	\$333,214
Foreign currency translation and other	—	(2,581)	(2,581)
Balance as of September 27, 2014	\$270,045	\$60,588	\$330,633

10. Long-Term Debt

Long-term debt as of September 27, 2014 and June 28, 2014 consists of the following:

	September 27, 2014	June 28, 2014
Borrowings under \$250M Revolver	\$69,000	\$65,925
Borrowings under \$75M Variable Rate Notes	75,000	75,000
Borrowings under \$50M A/R Line	25,075	25,075
Borrowings under \$100M Fixed Rate Notes	100,000	100,000
Capital leases and other	678	1,022
	269,753	267,022
Less current maturities	(621)	(792)
Total long-term debt	\$269,132	\$266,230

We have a \$250,000, unsecured revolving credit facility with a syndicate of banks, which expires on March 7, 2017. Borrowings in U.S. dollars under this credit facility generally bear interest at the adjusted London Interbank Offered Rate ("LIBOR") for specified interest periods plus a margin, which can range from 1.00% to 2.00%, depending on our consolidated leverage ratio.

As of September 27, 2014, there was \$69,000 outstanding under this facility. The unused portion of the revolver may be used for general corporate purposes, acquisitions, share repurchases, dividends, working capital needs and to provide up to \$50,000 in letters of credit. As of September 27, 2014, letters of credit outstanding under this facility totaled \$636 and primarily related to our property and casualty insurance programs. No amounts have been drawn upon these letters of credit. As of September 27, 2014, there is a fee of 0.20% of the unused daily balance of this facility.

Availability of credit under this facility requires that we maintain compliance with certain covenants.

Table of Contents

The covenants under this agreement are the most restrictive when compared to our other credit facilities. The following table illustrates compliance with regard to the material covenants required by the terms of this facility as of September 27, 2014:

	Required	Actual
Maximum Leverage Ratio (Debt/EBITDA)	3.50	2.12
Minimum Interest Coverage Ratio (EBITDA/Interest Expense)	3.00	21.34
Minimum Net Worth	\$358,999	\$378,300

Our maximum leverage ratio and minimum interest coverage ratio covenants are calculated by adding back certain non-cash charges, as defined in our debt agreement.

Borrowings outstanding as of September 27, 2014 under this facility bear interest at a weighted average effective rate of 1.38%.

On April 12, 2013, we amended this facility to remove the minimum net worth covenant. However, this change is not effective until the earlier of June 30, 2015 or the date of full repayment of our outstanding \$75,000 variable rate unsecured private placement notes. On March 31, 2014, we amended the facility to reduce the minimum net worth covenant to be consistent with the calculation for the \$75,000 variable rate unsecured private placement notes.

We have \$75,000 of variable rate unsecured private placement notes bearing interest at 0.60% over LIBOR and are scheduled to mature on June 30, 2015. The notes do not require principal payments until maturity. Interest payments are reset and paid on a quarterly basis. As of September 27, 2014, the outstanding balance of the notes was \$75,000 at an effective interest rate of 0.83%. We currently plan to repay these notes on their maturity date using borrowings from our \$250M Revolver, which matures on March 7, 2017, so we continue to classify the \$75,000 as long-term debt in the Condensed Consolidated Balance Sheets.

We maintain a \$50,000 accounts receivable securitization facility, which expires on September 27, 2016. Under the terms of the facility, we pay interest at a rate per annum equal to LIBOR plus a margin of 0.75%. The facility is subject to customary fees, including a rate per annum equal to 0.80%, for the issuance of letters of credit and 0.26% for any unused portion of the facility. As is customary with transactions of this nature, our eligible accounts receivable are sold to a consolidated subsidiary. As of September 27, 2014, there was \$25,075 outstanding under this securitization facility and there were \$24,925 of letters of credit outstanding, primarily related to our property and casualty insurance programs. Borrowings outstanding as of September 27, 2014 under this facility bear interest at an average effective interest rate of 0.90%.

We have \$100,000 of fixed rate unsecured senior notes with \$50,000 of the notes bearing interest at a fixed interest rate of 3.73% per annum maturing April 15, 2023 and \$50,000 of the notes bearing interest at a fixed interest rate of 3.88% per annum maturing April 15, 2025. Interest on the notes is payable semiannually. As of September 27, 2014, the outstanding balance of the notes was \$100,000 at an effective rate of 3.81%.

See Note 5, "Derivative Financial Instruments," of the Notes to the Condensed Consolidated Financial Statements for details of our interest rate swap and hedging activities related to our outstanding debt.

Table of Contents

11. Other Assets and Other Noncurrent Liabilities

Other assets as of September 27, 2014 and June 28, 2014 included the following:

	September 27, 2014	June 28, 2014
Executive deferred compensation plan assets	\$33,499	\$32,667
Cash surrender value of life insurance policies	14,286	14,287
Customer contracts and non-competition agreements, net	5,905	6,448
Other assets	10,424	10,603
Less portion classified as current assets	(2,492)	(2,177)
Total other assets	\$61,622	\$61,828

Customer contracts and non-competition agreements are as follows:

	September 27, 2014	June 28, 2014
Customer contracts and non-competition agreements	\$21,375	\$23,838
Accumulated amortization	(15,470)	(17,390)
Net	\$5,905	\$6,448

The customer contracts include the combined value of the written service agreements and the related customer relationship. Customer contracts are amortized over a weighted average life of approximately 11 years.

Amortization expense was \$563 and \$772 for the three months ended September 27, 2014 and September 28, 2013, respectively. Estimated amortization expense for each of the next five fiscal years based on the intangible assets as of September 27, 2014 is as follows:

2015 remaining	\$1,376
2016	1,391
2017	1,192
2018	410
2019	176
2020	164

Other noncurrent liabilities as of September 27, 2014 and June 28, 2014 included the following:

	September 27, 2014	June 28, 2014
Multi-employer pension withdrawal liability	\$28,068	\$28,516
Pension plan liability	15,078	15,422
Executive deferred compensation plan liability	30,860	30,584
Supplemental executive retirement plan liability	16,765	16,814
Accrued income taxes	11,277	12,043
Workers' compensation liability	14,544	14,837
Other liabilities	3,931	3,477
Total other noncurrent liabilities	\$120,523	\$121,693

12. Share-Based Compensation

We grant share-based awards, primarily consisting of restricted stock and options to purchase our common stock. Stock options are granted to employees and directors for a fixed number of shares with an exercise price equal to the fair value of the shares at the date of grant. Share-based compensation is recognized in the Condensed Consolidated Statements of Operations on a straight-line basis over the requisite service period. The amortization of share-based compensation reflects estimated forfeitures adjusted for actual forfeiture experience. As share-based compensation expense is recognized, a deferred tax asset is recorded that represents an estimate of the future tax deduction from the exercise of stock options or release of restrictions on the restricted stock. At the time share-based awards are exercised, canceled, expire or restrictions lapse, we recognize adjustments to income tax expense or additional paid-in capital. Total compensation expense related to share-based awards was \$1,773 and \$1,851 for the three months ended September 27,

Table of Contents

2014 and September 28, 2013, respectively. The number of options exercised and restricted stock vested since June 28, 2014, was 136,000 shares.

On August 23, 2012, our Chief Executive Officer was granted a performance based restricted stock award (the "Performance Award"). The Performance Award has both a financial performance component and a service component. The Performance Award has a target level of 100,000 restricted shares, a maximum award of 150,000 restricted shares and a minimum award of 50,000 restricted shares, subject to attainment of financial performance goals and service conditions.

13. Employee Benefit Plans

Defined Benefit Pension Plan

On December 31, 2006, we froze our pension and SERP plans for all participants.

The components of net periodic pension cost for these plans for the three months ended September 27, 2014 and September 28, 2013 are as follows:

	Pension Plan		SERP	
	Three Months Ended		Three Months Ended	
	September 27, 2014	September 28, 2013	September 27, 2014	September 28, 2013
Interest cost	\$1,012	\$992	\$185	\$189
Expected return on assets	(1,226)	(1,159)	—	—
Amortization of net loss	504	409	98	36
Net periodic pension cost	\$290	\$242	\$283	\$225

During the first quarter of fiscal year 2015, we contributed approximately \$145 to the pension plan.

Multi-Employer Pension Plans

Historically, we participated in a number of union sponsored, collectively bargained multi-employer pension plans ("MEPPs"). We record the required cash contributions to the MEPPs as an expense in the period incurred and a liability is recognized for any contributions due and unpaid, consistent with the accounting for defined contribution plans. In addition, we are responsible for our proportional share of any unfunded vested benefits related to the MEPPs. Employer's accounting for MEPPs (ASC 715-80) provides that a withdrawal liability should be recorded if circumstances that give rise to an obligation become probable and estimable. The amount of the withdrawal liability recorded is based on the best information available and is subject to change based on revised MEPP information received periodically from the union sponsors and other factors.

Central States Southeast and Southwest Areas Pension Fund

Beginning in fiscal year 2012, we commenced negotiations to discontinue our participation in the Central States Southeast and Southwest Areas Pension Fund ("Central States Fund"). We were ultimately successful and withdrew our participation in the Central States Fund in stages as various union contracts expired. Specifically, we partially withdrew from the Central States Fund in calendar year 2012. We finalized our withdrawal in calendar year 2013, which resulted in the union sending us updated information related to our withdrawal liability.

On September 19, 2013 we received two demands for payment of withdrawal liability, or payment demands, from the Central States Fund relating to our partial and complete withdrawals. The payment demands calculate the aggregate withdrawal liability to be \$56,000 payable over 20 years, or \$35,100 on an estimated discounted present value basis. We do not agree with the Central States Fund's payment demands and are vigorously contesting this matter. Most importantly, we believe that, in calculating our withdrawal amount, the Central States Fund has not given us appropriate credit for our partial withdrawal payments as required by applicable law and regulations. Previously, we filed our Request for Review with the Central States Fund, to which we received no response. We subsequently filed our arbitration demand. As part of these arbitration proceedings, we are likewise contesting the payment demands. We cannot offer any assurance that we will be successful, and ultimate resolution of this matter may have a material adverse effect on our results of operations in the period of resolution, however it is not expected to have a material effect on our financial condition or liquidity because any increase in payments would be spread over a 20 year period. Separately, based on information received, as of September 28, 2013, we updated our previously recorded estimated withdrawal liability, using the same methodology previously used by us. Specifically, we assumed aggregate

payments of \$34,500 over 20 years, using a discount rate of 5.25%, resulting in an estimated discounted present value of \$23,500. This amount represents our best estimate of our aggregate withdrawal liability as of September 27, 2014. We consider this

Table of Contents

appropriate based on our interpretation of the plan document and the related statutory requirements. As a result, in addition to \$113 of accretion expense related to the previously recorded liability, we recorded an additional discounted estimated withdrawal liability of \$1,687 in the three months ended September 28, 2013. Moving forward, we do not anticipate that our estimated discounted withdrawal liability will change, except, depending on the outcome, in connection with resolution of the payment demands received from the Central States Fund and reductions in the outstanding withdrawal liability as payments are made. In addition, except in the case of a mass withdrawal or failure of the Central States Plan, we are no longer subject to fluctuations in the unfunded status of the plan caused by such things as investment returns, discount or mortality rates and various other assumptions. During the three months ended September 27, 2014 and September 28, 2013, we made total payments related to our withdrawal liability of \$700 and \$0, respectively, to the Central States Fund.

Other United States MEPPs

In the third quarter of fiscal year 2014, we began negotiations to withdraw from four other MEPPs, for which we had not previously recorded any withdrawal liabilities. Based on progress in the negotiations and our intentions, we determined that it was probable that we would withdraw from the plans. Accordingly, we recorded a pretax charge of \$8,167 in the third quarter of fiscal year 2014. This charge included the estimated actuarial value of the total withdrawal liability, incentives for union participants and other related costs that have been and will be incurred. The amount of the withdrawal liability recorded is based on the best information available and is subject to change based on revised information received periodically from the union sponsors and other factors. As of September 27, 2014, we had concluded negotiations with all but one of the union locals and are in the process of finalizing our withdrawal from three of the four remaining MEPPs. We expect to finalize withdrawal from the remaining MEPP later in fiscal year 2015. Upon conclusion of negotiations and exit from these plans, we will no longer participate in any United States MEPPs.

While we have reached agreement to exit from three of these MEPPs to date, we have received a formal demand notice from only one of the funds. As such, our estimated withdrawal liability was based on previous information received from the funds. The ultimate amount of the withdrawal assessed by the MEPPs is impacted by a number of factors, including, among other things, investment returns, benefit levels, interest rates and financial difficulty of other participating employers in the plans. We recently became aware that the National Retirement Fund, one of the MEPPs we have withdrawn from, changed certain assumptions, which may have increased the underfunded liability of the plan. Given the complexities in determining our withdrawal liability, and the lack of information available to us, we are unable to estimate the impact, if any, this may have on our withdrawal liability. However, it is reasonably possible it may have a material impact on our results of operations. If the ultimate assessment includes a material change with which we disagree, we intend to contest the assessment using all available means.

14. Segment Information

We have two operating segments, United States (includes our Dominican Republic operations) and Canada, which have been identified as components of our organization that are reviewed by our Chief Executive Officer to determine resource allocation and evaluate performance. Each operating segment derives revenues from the branded uniform and facility services programs. During the three months ended September 27, 2014, and for the same period of the prior fiscal year, no single customer's transactions accounted for more than 2.0% of our total revenues. Substantially all of our customers are in the United States and Canada.

We evaluate performance based on income from operations. Financial information by segment for the three month periods ended September 27, 2014 and September 28, 2013 is as follows:

For the Three Months Ended	United States	Canada	Elimination	Total
September 27, 2014				
Revenues	\$ 194,397	\$ 35,845	\$ —	\$ 230,242
Income from continuing operations	22,806	4,044	—	26,850
Total assets	867,757	164,244	(109,830)	922,171
Depreciation and amortization expense	6,895	996	—	7,891
September 28, 2013				

Edgar Filing: G&K SERVICES INC - Form 10-Q

Revenues	\$ 184,202	\$ 36,021	\$—	\$ 220,223
Income from continuing operations	20,640	2,929	—	23,569
Total assets	842,207	164,095	(98,060) 908,242
Depreciation and amortization expense	6,529	1,102	—	7,631

Table of Contents

15. Share Repurchase

As of September 27, 2014, we have a \$175,000 share repurchase program which was originally authorized by our Board of Directors in May 2007 for \$100,000 and increased to \$175,000 in May 2008. Under this repurchase program, we repurchased 65,200 shares in open market transactions totaling \$3,641 for the three months ended September 27, 2014 and 40,219 shares totaling \$2,183 for the three months ended September 28, 2013. As of September 27, 2014, we had \$42,523 remaining under this authorization.

16. Other Comprehensive Income

Changes in accumulated other comprehensive income, net of tax, for the three months ended September 27, 2014 and September 28, 2013 were as follows:

	Three Months Ended September 27, 2014			
	Foreign currency translation adjustment	Pension benefit liabilities	Derivative financial instruments	Total
Accumulated other comprehensive income (loss) at June 28, 2014	\$22,682	\$(19,748)	\$ 1,053	\$3,987
Other comprehensive loss before reclassifications	(5,388)	—	(5)	(5,393)
Reclassifications from net accumulated other comprehensive income	—	381	85	466
Net current period other comprehensive income (loss)	(5,388)	381	80	(4,927)
Accumulated other comprehensive income (loss) at September 27, 2014	\$17,294	\$(19,367)	\$ 1,133	\$(940)
	Three Months Ended September 28, 2013			
	Foreign currency translation adjustment	Pension benefit liabilities	Derivative financial instruments	Total
Accumulated other comprehensive income (loss) as of June 29, 2013	\$24,093	\$(15,650)	\$ 946	\$9,389
Other comprehensive income (loss) before reclassifications	2,684	—	(109)	2,575
Reclassifications from net accumulated other comprehensive income	—	283	81	364
Net current period other comprehensive income (loss)	2,684	283	(28)	2,939
Accumulated other comprehensive income (loss) at September 28, 2013	\$26,777	\$(15,367)	\$ 918	\$12,328

Amounts reclassified from accumulated other comprehensive income for the three months ended September 27, 2014 and September 28, 2013 were as follows:

	Three Months Ended	
	September 27, 2014	September 28, 2013
Losses on derivative financial instruments:		
Interest rate swap contracts	\$138	\$129 (a)
Tax benefit	(53)	(48)
Total, net of tax	85	81
Pension benefit liabilities:		
Amortization of net loss	609	453 (b)
Tax benefit	(228)	(170)
Total, net of tax	381	283
Total amounts reclassified, net of tax	\$466	\$364

(a) Included in interest expense.

(b) Included in the computation of net periodic pension cost, which is included in cost of rental and direct sale and selling and administrative. This amount includes a pension plan which is not included in the net periodic pension cost

in Note 13 because it is individually immaterial. See Note 13 for details regarding the pension plans.

Table of Contents

17. Discontinued Operations

Discontinued operations include the operating results and other adjustments related to our Direct Sale Program business ("Program Business") and Ireland business ("Ireland Business"), both of which had previously been included in our United States operating segment. We previously concluded that both the Program Business and Ireland Business met the requirements to be presented as discontinued operations. Accordingly, the results of these operations have been reclassified to discontinued operations for all periods presented on the Condensed Consolidated Statements of Operations. Summarized financial information for discontinued operations is shown below:

	Three Months Ended	
	September 27, 2014	September 28, 2013
Rental and direct sale revenue from discontinued operations	\$—	\$ 9,070
Income before income taxes	—	361
Income, net of tax	—	211
Loss on sale and other adjustments, net of tax	—	—
Net income from discontinued operations	\$—	\$ 211

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Unaudited)

Overview

G&K Services, Inc., founded in 1902 and headquartered in Minnetonka, Minnesota, is a service-focused market leader of branded uniform and facility services programs. We deliver value to our customers by enhancing their image and brand, and by promoting workplace safety, security and cleanliness. We accomplish this by providing high quality branded work apparel programs, and a variety of facility products and services, including floor mats, towels, mops and restroom hygiene products.

Beginning in fiscal year 2010, we made broad-based improvements to our business, by pursuing a strategy which included four key elements: focusing on customer satisfaction; improving day-to-day execution; increasing our focus on cost management; and addressing underperforming locations and assets. Executing this strategy has led to significant improvements in our financial results, including positive organic revenue growth, expanded operating margins and strong cash flows.

We continue to drive this same strategy in fiscal year 2015. Our approach has four parts:

1. Keep our customer promise
2. Improve how we target customers
3. Drive operational excellence
4. Strengthen our high performing team

To measure the progress of our strategy, we established long-term financial goals called the "12+ Plan," which includes achieving 12% operating margin, 12% ROIC, plus an added focus on revenue growth, within a two to four year time frame. We are also focused on maximizing free cash flow, which we define as net cash provided by operating activities less investments in property, plant and equipment.

Our industry continues to consolidate as many family-owned, local operators and regional companies have been acquired by larger providers. We have participated in this consolidation with an acquisition strategy focused on expanding our geographic presence and/or expanding our local market share in order to further leverage our existing production facilities. We remain active in evaluating quality acquisitions that would strengthen our business.

Our operating results are affected by the volatility in commodities, especially cotton, polyester, crude oil and foreign currency exchange rates, which may contribute to significant changes in merchandise and energy costs.

We periodically adjust our operations to serve our customers in the most efficient and cost effective manner. As part of these adjustments, we may realign our workforce, close production or branch facilities or divest operations. We are continuously assessing our business and making adjustments as necessary.

In the second quarter of fiscal 2014, we divested our Ireland Business and in the third quarter of fiscal year 2014, we sold our Program Business. These divestitures have been reflected as Discontinued Operations in our Condensed Consolidated Statements of Operations. See Note 17, "Discontinued Operations," of the Notes to the Condensed Consolidated Financial Statements for additional information.

Critical Accounting Policies

Our significant accounting policies are described in Note 1, "Summary of Significant Accounting Policies" of the Notes to the Consolidated Financial Statements in our Annual Report on Form 10-K for the fiscal year ended June 28, 2014. The accounting policies used in preparing our interim fiscal year 2015 Condensed Consolidated Financial Statements are the same as those described in our Annual Report.

The discussion of the financial condition and results of operations are based upon the Condensed Consolidated Financial Statements, which have been prepared in conformity with United States generally accepted accounting principles (GAAP). As such, management is required to make certain estimates, judgments and assumptions that are believed to be reasonable based on the information available. These estimates and assumptions affect the reported amount of assets and liabilities, revenues and expenses, and disclosure of contingent assets and liabilities at the date of the financial statements. Actual results may differ from these estimates under different assumptions or conditions.

Table of Contents

Critical accounting policies are defined as the most important and pervasive accounting policies used, areas most sensitive to material changes from external factors and those that are reflective of significant judgments and estimates. We believe our critical accounting policies are those related to:

Revenue recognition

Employee benefit plans

Income taxes

Share based payments

Derivative financial instruments

Goodwill and intangible assets

Inventory and merchandise in service

Inventory and Merchandise In Service

We review the estimated useful lives of our merchandise in service assets on a periodic basis or when trends in our business indicate that the useful lives for certain products might have changed. During the fourth quarter of fiscal year 2013, we completed an analysis of certain merchandise in service assets which resulted in the estimated useful lives for these assets being extended to better reflect the estimated periods in which the assets will remain in service. The effect of the change in estimate increased income from operations by \$2.3 million, net income by \$1.4 million and basic and diluted earnings per common share by \$0.07 for the three months ended September 28, 2013. The effect of the change in estimate is not material for the three months ended September 27, 2014.

Results of Operations

The percentage relationships to revenues of certain income and expense items for the three month periods ended September 27, 2014 and September 28, 2013, and the percentage changes in these income and expense items between periods are presented in the following table:

	Three Months Ended		Percentage Change	
	September 27, 2014	September 28, 2013	Three Months FY 2015 vs. FY 2014	
Rental and direct sale revenue	100.0	% 100.0	% 4.5	%
Cost of rental and direct sale revenue	65.8	65.6	4.8	
Gross margin	34.2	34.4	4.1	
Pension withdrawal and associated expenses	—	0.8	(100.0)
Selling and administrative	22.6	22.9	2.9	
Income from continuing operations	11.7	10.7	13.9	
Interest expense	0.8	0.7	13.5	
Income from continuing operations before income taxes	10.9	10.0	13.9	
Provision for income taxes	3.8	3.8	3.7	
Net income from continuing operations	7.1	6.2	20.3	
Net income from discontinued operations	—	0.1		
Net income	7.1	% 6.3	% 18.4	%

Three months ended September 27, 2014 compared to three months ended September 28, 2013

Rental and Direct Sale Revenue. Total revenue in the first quarter of fiscal 2015 increased \$10.0 million or 4.5% to \$230.2 million from \$220.2 million in the first quarter of fiscal 2014. Our organic growth rate was 5.4% compared to 3.6% in the same period of the prior fiscal year. The 5.4% organic growth rate in the current year was driven by new account sales, improved customer retention, pricing and an increase in direct sales revenue. The positive organic rental growth was offset by the negative impact of foreign currency translation rates. Our organic growth rate is calculated using rental and direct sale revenue, adjusted to exclude the impact of foreign currency exchange rate changes, divestitures and acquisitions. We believe that the organic revenue reflects the growth of our existing business and is, therefore, useful in analyzing our financial condition and results of operations.

Table of Contents

Cost of Rental and Direct Sale Revenue. Cost of rental and direct sale revenue, which includes merchandise, production, delivery and cost of direct sale expenses, increased 4.8% to \$151.5 million in the first quarter of fiscal 2015 from \$144.5 million in the same period of fiscal 2014. Excluding the \$2.3 million benefit from the change in merchandise lives recorded in the prior year, gross margin improved 90 basis points in the current year. This improvement was primarily due to continued productivity improvements in our laundry operations, the favorable impact of fixed costs absorbed over a higher revenue base and higher gross margins from direct sales. These favorable items were partially offset by higher merchandise expense resulting from strong new account sales and higher employee health care expenses.

Pension withdrawal and associated expenses. As discussed in Note 13, "Employee Benefit Plans," of the Notes to the Condensed Consolidated Financial Statements, we recorded a charge of \$1.7 million in the first quarter of fiscal year 2014 associated with an increase to our MEPP withdrawal liability.

Selling and Administrative. Selling and administrative expenses increased 2.9% to \$51.9 million in the first quarter of fiscal 2015 from \$50.5 million in the same period of fiscal 2014. As a percentage of total revenues, selling and administrative expenses decreased to 22.6% in the first quarter of fiscal 2015 from 22.9% in the first quarter of fiscal 2014. The decrease as a percentage of revenue was primarily due to effective cost control as we leveraged our fixed costs over a higher revenue base, partially offset by higher bad debt expense.

Income from Operations. The following is a summary of each operating segment's income from operations (in thousands):

	Three Months Ended		
	September 27, 2014	September 28, 2013	Change
United States	\$22,806	\$ 20,640	\$2,166
Canada	4,044	2,929	1,115
Total	\$26,850	\$ 23,569	\$3,281

United States. Income from operations increased \$2.2 million to \$22.8 million in the first quarter of fiscal 2015 from \$20.6 million in the same period of fiscal 2014. The prior year operating income included expense of \$1.7 million related to an increase in our MEPP liability and a \$1.9 million benefit from the change in merchandise lives previously reported. Excluding these items, income from operations increased \$2.4 million. The increase was primarily driven by additional income from increased revenue, improved productivity in our laundry operations, the favorable impact of fixed costs absorbed over a higher revenue base and higher gross margins from direct sales. These favorable items were partially offset by higher merchandise expense, higher employee health care expenses and increased bad debt expense.

Canada. Income from operations increased \$1.1 million in the first quarter of fiscal 2015 compared to the same period of fiscal 2014. The prior year operating income included a \$0.4 million benefit from the change in merchandise lives previously reported. Excluding this item, income from operations increased \$1.5 million. The increase was primarily driven by additional income from increased revenue, improved production and delivery productivity, lower vehicle maintenance costs and higher gross margins from direct sales. These favorable items were partially offset by a decrease in the Canadian foreign exchange rate and higher selling expenses.

Interest Expense. Interest expense was \$1.8 million in the first quarter of fiscal 2015, an increase from the \$1.6 million reported in the same period of fiscal 2014. The increased interest expense was due to higher average debt balances resulting from the payment of the special dividend in the fourth quarter of fiscal 2014, partially offset by lower average interest rates.

Provision for Income Taxes. Our effective tax rate decreased to 34.7% in the first quarter of fiscal 2015 from 38.1% in the same period of fiscal 2014. The decrease in the effective tax rate was driven primarily by the release of tax contingency reserves in the current year as a result of the expiration of certain tax statutes of limitations.

Discontinued Operations. In the second quarter of fiscal 2014, we divested our Ireland Business and in the third quarter of fiscal year 2014, we sold our Program Business. These businesses have been reflected as discontinued operations in our Condensed Consolidated Statements of Operations. The operating income on these businesses for

the prior period was \$0.4 million and has been reclassified from continuing operations to discontinued operations. See Note 17, "Discontinued Operations," of the Notes to the Condensed Consolidated Financial Statements for additional information.

Liquidity, Capital Resources and Financial Condition

Our primary sources of cash are net cash flows from operations, borrowings under our debt arrangements and proceeds from the net issuance of common stock under stock option plans. Primary uses of cash are working capital needs, capital expenditures, acquisitions, dividends and general corporate purposes.

Table of Contents

Working capital at September 27, 2014 was \$191.1 million, an \$8.3 million increase from \$182.8 million at June 28, 2014. The increase in working capital is primarily due to an increase in merchandise in service to support our revenue growth and the payment of annual incentive compensation expense.

Operating Activities. Net cash provided by operating activities increased \$20.3 million to \$21.8 million in the first three months of fiscal 2015 from \$1.5 million in the same period of fiscal 2014. The increase was primarily due to decreased federal income tax payments, higher net income and lower working capital requirements in the current quarter.

Investing Activities. Net cash used for investing activities was \$12.5 million in the first three months of fiscal 2015 compared to \$6.4 million in the same period of fiscal 2014. The increase was primarily due to increased capital expenditures related to certain information technology projects and expanding our plant capacity.

Financing Activities. Cash used by financing activities was \$6.2 million in the first three months of fiscal 2015 compared to cash provided by financing activities of \$1.4 million in the same period of fiscal 2014. The change was primarily due to a decrease in borrowings under our revolving credit facility, an increase in our quarterly dividend from \$0.27 to \$0.31, an increase in the repurchase of our common stock and a decrease in the proceeds from exercise of employee stock options.

We have a \$250.0 million, unsecured revolving credit facility with a syndicate of banks, which expires on March 7, 2017. Borrowings in U.S. dollars under this credit facility generally bear interest at the adjusted London Interbank Offered Rate ("LIBOR") for specified interest periods plus a margin, which can range from 1.00% to 2.00%, depending on our consolidated leverage ratio.

As of September 27, 2014, there was \$69.0 million outstanding under the revolving credit facility. The unused portion of the revolver may be used for general corporate purposes, acquisitions, share repurchases, dividends, working capital needs and to provide up to \$50.0 million in letters of credit. As of September 27, 2014, letters of credit outstanding under this facility totaled \$0.6 million and primarily related to our property and casualty insurance programs. No amounts have been drawn upon these letters of credit. As of September 27, 2014, there is a fee of 0.20% of the unused daily balance on this facility.

Availability of credit under this facility requires that we maintain compliance with certain covenants.

The covenants under this agreement are the most restrictive when compared to our other credit facilities. The following table illustrates compliance with regard to the material covenants required by the terms of this facility as of September 27, 2014:

	Required	Actual
Maximum Leverage Ratio (Debt/EBITDA)	3.50	2.12
Minimum Interest Coverage Ratio (EBITDA/Interest Expense)	3.00	21.34
Minimum Net Worth	\$359.0	\$378.3

Our maximum leverage ratio and minimum interest coverage ratio covenants are calculated by adding back certain non-cash charges, as defined in our debt agreement.

Borrowings outstanding as of September 27, 2014 under this facility bear interest at a weighted average effective rate of 1.38%.

On April 12, 2013, we amended this facility to remove the minimum net worth covenant. However, this change is not effective until the earlier of June 30, 2015 or the date of full repayment of our outstanding \$75.0 million variable rate unsecured private placement notes. On March 31, 2014, we amended the facility to reduce the minimum net worth covenant to be consistent with the calculation for the \$75.0 million variable rate unsecured private placement notes until those notes are repaid in full.

We have \$75.0 million of variable rate unsecured private placement notes bearing interest at 0.60% over LIBOR and are scheduled to mature on June 30, 2015. The notes do not require principal payments until maturity. Interest payments are reset and paid on a quarterly basis. As of September 27, 2014, the outstanding balance of the notes was \$75.0 million at an effective rate of 0.83%. We currently plan to repay the notes on their maturity date using borrowings from our \$250M Revolver, which matures on March 7, 2017, so we continue to classify the \$75.0 million as long-term debt in the Condensed Consolidated Balance Sheets.

We maintain a \$50.0 million accounts receivable securitization facility, which expires on September 27, 2016. Under the terms of the facility, we pay interest at a rate per annum equal to a margin of LIBOR plus 0.75%. The facility is subject to customary fees, including a rate per annum equal to 0.80%, for the issuance of letters of credit and 0.26% for any unused portion of the facility. As is customary with transactions of this nature, our eligible accounts receivable are sold to a consolidated subsidiary. As of September 27, 2014, there was \$25.1 million outstanding under this securitization facility and there were \$24.9 million of letters of credit outstanding, primarily related to our property and casualty insurance programs. Borrowings outstanding as of September 27, 2014 under this facility bear interest at an average effective interest rate of 0.90%.

We have \$100.0 million of fixed rate unsecured senior notes with \$50.0 million of the notes bearing interest at a fixed interest rate of 3.73% per annum maturing April 15, 2023 and \$50.0 million of the notes bearing interest at a fixed interest rate of

Table of Contents

3.88% per annum maturing April 15, 2025. Interest on the notes is payable semiannually. As of September 27, 2014, the outstanding balance of the notes was \$100.0 million at an effective rate of 3.81%.

See Note 5, "Derivative Financial Instruments," of the Notes to the Condensed Consolidated Financial Statements for details of our interest rate swap and hedging activities related to our outstanding debt.

Cash Obligations. Under various agreements, we are obligated to make future cash payments in fixed amounts. These include payments under the revolving credit facility, capital lease obligations and rent payments required under operating leases with initial or remaining terms in excess of one year.

At September 27, 2014, we had approximately \$180.4 million of available capacity under our revolving and accounts receivable credit facilities, of which our revolving credit facility contributes all of the liquidity. We anticipate that our cash flows from operations and our available capacity under our credit facilities will be sufficient to satisfy our cash commitments and capital requirements for fiscal 2015. We may utilize borrowings under the revolving credit facility to supplement our cash requirements from time to time. We estimate that capital expenditures in fiscal 2015 will be approximately \$50.0 million.

Off Balance Sheet Arrangements

At September 27, 2014, we had approximately \$25.5 million of stand-by letters of credit that were issued and outstanding, primarily in connection with our property and casualty insurance programs. No amounts have been drawn upon these letters of credit.

Pension Obligations

Pension expense is recognized on an accrual basis over the employees' approximate service periods. Pension expense is generally independent of funding decisions or requirements. We recognized expense for our defined benefit pension plan of \$0.3 million and \$0.2 million in the first quarter of fiscal 2015 and fiscal 2014, respectively. At June 28, 2014, the fair value of our pension plan assets totaled \$76.0 million.

Effective January 1, 2007, we froze our defined benefit pension plan and related supplemental executive retirement plan for all participants. Future growth in benefits has not occurred beyond this date.

Multi-Employer Pension Plans

Historically, we participated in a number of union sponsored, collectively bargained multi-employer pension plans ("MEPPs"). We record the required cash contributions to the MEPPs as an expense in the period incurred and a liability is recognized for any contributions due and unpaid, consistent with the accounting for defined contribution plans. In addition, we are responsible for our proportional share of any unfunded vested benefits related to the MEPPs. Employer's accounting for MEPPs (ASC 715-80) provides that a withdrawal liability should be recorded if circumstances that give rise to an obligation become probable and estimable. The amount of the withdrawal liability recorded is based on the best information available and is subject to change based on revised MEPP information received periodically from the union sponsors and other factors.

Central States Southeast and Southwest Areas Pension Fund

Beginning in fiscal year 2012, we commenced negotiations to discontinue our participation in the Central States Fund. We were ultimately successful and withdrew our participation in the Central States Fund in stages as various union contracts expired. Specifically, we partially withdrew from the Central States Fund in calendar year 2012. We finalized our withdrawal in calendar year 2013, which resulted in the union sending us updated information related to our withdrawal liability.

On September 19, 2013 we received two demands for payment of withdrawal liability, or payment demands, from the Central States Fund relating to our partial and complete withdrawals. The payment demands calculate the aggregate withdrawal liability to be \$56.0 million payable over 20 years, or \$35.1 million on an estimated discounted present value basis. We do not agree with the Central States Fund's payment demands and are vigorously contesting this matter. Most importantly, we believe that, in calculating our withdrawal amount, the Central States Fund has not given us appropriate credit for our partial withdrawal payments as required by applicable law and regulations. Previously, we filed our Request for Review with the Central States Fund, to which we received no response. We subsequently filed our arbitration demand. As part of these arbitration proceedings, we are likewise contesting the payment demands. We cannot offer any assurance that we will be successful, and ultimate resolution of this matter may have a material adverse effect on our results of operations in the period of resolution, however it is not expected to have a

material effect on our financial condition or liquidity because any increase in payments would be spread over a 20 year period.

Table of Contents

Separately, based on information received, as of September 28, 2013, we updated our previously recorded estimated withdrawal liability, using the same methodology previously used by us. Specifically, we assumed aggregate payments of \$34.5 million over 20 years, using a discount rate of 5.25%, resulting in an estimated discounted present value of \$23.5 million. This amount represents our best estimate of our aggregate withdrawal liability as of September 27, 2014. We consider this appropriate based on our interpretation of the plan document and the related statutory requirements. As a result, in addition to \$0.1 million of accretion expense related to the previously recorded liability, we recorded an additional discounted estimated withdrawal liability of \$1.7 million in the three months ended September 28, 2013.

Moving forward, we do not anticipate that our estimated discounted withdrawal liability will change, except, depending on the outcome, in connection with resolution of the payment demands received from the Central States Fund and reductions in the outstanding withdrawal liability as payments are made. In addition, except in the case of a mass withdrawal or failure of the Central States Plan, we are no longer subject to fluctuations in the unfunded status of the plan caused by such things as investment returns, discount or mortality rates and various other assumptions. During the three months ended September 27, 2014 and September 28, 2013, we made total payments related to our withdrawal liability of \$0.7 million and \$0, respectively, to the Central States Fund.

Other United States MEPPs

In the third quarter of fiscal year 2014, we began negotiations to withdraw from four other MEPPs, for which we had not previously recorded any withdrawal liabilities. Based on progress in the negotiations and our intentions, we determined that it was probable that we would withdraw from the plans. Accordingly, we recorded a pretax charge of \$8.2 million in the third quarter of fiscal year 2014. This charge included the estimated actuarial value of the total withdrawal liability, incentives for union participants and other related costs that have been and will be incurred. The amount of the withdrawal liability recorded is based on the best information available and is subject to change based on revised information received periodically from the union sponsors and other factors. However, any potential changes are not expected to have a material impact on our results of operation or financial condition. As of September 27, 2014, we had concluded negotiations with all but 1 of the union locals and are in the process of finalizing our withdrawal from three of the four remaining MEPPs. We expect to finalize withdrawal from the remaining MEPP later in fiscal year 2015. Upon conclusion of negotiations and exit from these plans, we will no longer participate in any United States MEPPs.

While we have reached agreement to exit from three of these MEPPs to date, we have received a formal demand notice from only one of the funds. As such, our estimated withdrawal liability was based on previous information received from the funds. The ultimate amount of the withdrawal assessed by the MEPPs is impacted by a number of factors, including, among other things, investment returns, benefit levels, interest rates and financial difficulty of other participating employers in the plans. We recently became aware that the National Retirement Fund, one of the MEPPs we have withdrawn from, changed certain assumptions, which may have increased the underfunded liability of the plan. Given the complexities in determining our withdrawal liability, and the lack of information available to us, we are unable to estimate the impact, if any, this may have on our withdrawal liability. However, it is reasonably possible it may have a material impact on our results of operations. If the ultimate assessment includes a material change with which we disagree, we intend to contest the assessment using all available means.

Litigation

We are involved in a variety of legal actions relating to personal injury, employment, environmental and other legal matters that arise in the normal course of business. In addition, we are party to certain additional legal matters described in "Part II Item 1. Legal Proceedings" of this report.

Cautionary Statements Regarding Forward-Looking Statements

The Private Securities Litigation Reform Act of 1995 provides a safe harbor from civil litigation for forward-looking statements. Forward-looking statements may be identified by words such as "estimates," "anticipates," "projects," "plans," "expects," "intends," "believes," "seeks," "could," "should," "may" and "will" or the negative versions thereof and similar expressions and by the context in which they are used. Such statements are based upon our current expectations and speak only as of the date made. These statements are subject to various risks, uncertainties and other factors that could cause actual results to differ from those set forth in or implied by this Annual Report on Form 10-K.

Factors that might cause such a difference include, but are not limited to, the possibility of greater than anticipated operating costs, lower sales volumes, the performance and costs of integration of acquisitions or assumption of unknown liabilities in connection with acquisitions, fluctuations in costs of materials and labor, costs and possible effects of union organizing or other union activities, strikes, loss of key management, uncertainties regarding any existing or newly-discovered expenses and liabilities related to environmental compliance and remediation, failure to achieve and maintain effective internal controls for financial reporting required by the Sarbanes-Oxley Act of 2002, the initiation or outcome of arbitrations, litigation or governmental investigations, higher than assumed sourcing or distribution costs of products, the disruption of operations from catastrophic events, disruptions in capital

Table of Contents

markets, the liquidity of counterparties in financial transactions, changes in federal and state tax laws, economic uncertainties and the reactions of competitors in terms of price and service. We undertake no obligation to update any forward-looking statements to reflect events or circumstances arising after the date on which they are made, except as required by law. Additional information concerning potential factors that could affect future financial results is included in our Annual Report on Form 10-K for the fiscal year ended June 28, 2014.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

Interest Rate Risk

We are subject to market risk exposure related to changes in interest rates. We use financial instruments such as interest rate swap agreements to manage interest rate risk on our variable rate debt. Under these arrangements, we agree to exchange, at specified intervals, the difference between fixed and floating interest amounts, calculated by reference to an agreed upon notional principal amount. Interest rate swap agreements are entered into for periods consistent with related underlying exposures and do not constitute positions independent of those exposures. The estimated exposure considers the mitigating effects of interest rate swap agreements outstanding at September 27, 2014 on the change in the cost of variable rate debt. The current fair market value of all outstanding contracts at September 27, 2014 was an unrealized loss of \$0.7 million.

A sensitivity analysis was performed to measure our interest rate risk over a one-year period to changes in market interest rates for forecasted variable rate debt that was not modified by interest rate swaps. As of September 27, 2014, this debt amount was \$87.9 million. The two scenarios include measuring the sensitivity to interest expense with an immediate 50 basis point change in market interest rates and the impact of a 50 basis point change distributed evenly throughout the year. Based on the forecasted average variable rate debt level, the forecasted annual expense for our variable rate debt is \$1.3 million. The scenario with an immediate 50 basis point change would increase or decrease forecasted interest by \$0.4 million or 32.6%. The scenario that distributes the 50 basis point change would increase or decrease interest expense by \$0.3 million or 20.6%.

Energy Cost Risk

We are subject to market risk exposure related to changes in energy costs. To manage this risk, from time to time we have utilized derivative financial instruments to mitigate the impact of motor fuel cost volatility on our future financial results. As of September 27, 2014, we have no outstanding derivative financial instruments related to motor fuels. We performed an analysis to measure the sensitivity of our energy costs to changes in the prices of motor fuels. The analysis used motor fuel prices at September 27, 2014 and forecasted purchases over the next 12 months. For each one percentage point increase or decrease in motor fuel prices under these assumptions, our motor fuel costs would change by approximately \$0.2 million.

Production costs at our plants are also subject to fluctuations in natural gas costs. To reduce our exposure to changes in natural gas prices, we utilize natural gas supply contracts in the normal course of business. These contracts meet the definition of "normal purchase" and, therefore, are not considered derivative instruments for accounting purposes.

Foreign Currency Exchange Risk

Our only material foreign subsidiaries are located in Canada. The assets and liabilities of these subsidiaries are denominated in the Canadian dollar and, as such, are translated into U.S. dollars at the exchange rate in effect at the balance sheet date. Results of operations are translated using the average exchange rates throughout the period. The effect of exchange rate fluctuations on translation of assets and liabilities are recorded as a component of stockholders' equity and are included in the "Accumulated other comprehensive income" line item of the Condensed Consolidated Balance Sheets. Gains and losses from foreign currency transactions are included in results of operations.

ITEM 4. CONTROLS AND PROCEDURES

Under the supervision and with the participation of our management, including our chief executive officer and chief financial officer, we conducted an evaluation of our disclosure controls and procedures, as such term is defined under Rule 13a-15(e) or Rule 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended, as of the end of the period covered by this Form 10-Q. Based on their evaluation, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures are effective.

There have been no changes in our internal controls over financial reporting that occurred during the period covered by this Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal control over

financial reporting.

Table of Contents

PART II

OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are involved in a variety of legal actions relating to personal injury, employment, environmental and other legal matters arising in the normal course of business, including, without limitation, those described below.

The United States Office of Federal Contract Compliance Programs, or OFCCP, is, as part of routine audits, conducting a review of certain of our employment practices. The OFCCP has issued a Predetermination Notice to one of our facilities and a Notice of Violation to two others. Audits of six other facilities, where the OFCCP may claim there are similar alleged violations, are ongoing. We have been engaged in discussions with the OFCCP and believe that our practices are lawful and without bias. While we cannot predict the ultimate outcome of these matters with certainty and it is possible that we may incur additional losses in excess of established reserves, we believe the possibility of a material adverse effect on our results of operations or financial position is remote.

See Note 13, "Employee Benefit Plans," of the Notes to the Condensed Consolidated Financial Statements for information on our arbitration related to our withdrawal from the Central States Plan.

ITEM 1A. RISK FACTORS

In addition to the other information set forth in this Quarterly Report on Form 10-Q, you should carefully consider the factors discussed in Part I, "Item 1A. Risk Factors" in our Annual Report on Form 10-K for the year ended June 28, 2014, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently believe are immaterial could have a material adverse effect on our business, financial condition and/or operating results.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The table below sets forth information regarding repurchases we made of our common stock during the periods indicated.

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan	Maximum Dollar Value of Shares that May Yet Be Purchased Under the Plan
June 29, 2014 - August 2, 2014	—	\$—	—	\$46,164,397
August 3, 2014 - August 30, 2014	21,500	\$55.13	21,500	\$44,979,112
August 31, 2014 - September 27, 2014	43,700	\$56.20	43,700	\$42,523,386
Total	65,200	\$55.84	65,200	\$42,523,386

As of September 27, 2014, we have a \$175.0 million share repurchase program which was originally authorized by our Board of Directors in May 2007 for \$100.0 million and increased to \$175.0 million in May 2008. Under this repurchase program, we repurchased 65,200 shares in open market transactions totaling \$3.6 million for the three months ended September 27, 2014 and 40,219 shares totaling \$2.2 million for the three months ended September 28, 2013. As of September 27, 2014, we had \$42.5 million remaining under this authorization.
