Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock, \$0.01 par value per share	The NASDAQ Stock Market LLC (NASDAQ Global Select Market)

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes [X] No []

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.
Yes [] No [X]

Edgar Filing: CERNER CORP /MO/ - Form 10-K

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

As of July 4, 2015, the aggregate market value of the registrant's common stock held by non-affiliates of the registrant was \$21.0 billion based on the closing sale price as reported on the NASDAQ Global Select Market. Shares of common stock held by each executive officer, director and holder of 10% or more of the outstanding common stock have been excluded in that such persons may be deemed to be affiliates. This determination of affiliate status for purposes of this calculation is not intended as a conclusive determination of affiliate status for other purposes.

Indicate the number of shares outstanding of the issuer's classes of common stock, as of the latest practicable date.

Class	Outstanding at February 12, 2016

Item 1. Business

Overview

Cerner Corporation started doing business as a Missouri Corporation in 1980, and it was merged into a Delaware corporation in 1986. Unless the context otherwise requires, references in this report to “Cerner,” the “Company,” “we,” “us” or “our” mean Cerner Corporation and its subsidiaries.

Our corporate world headquarters is located in a Company-owned office park in North Kansas City, Missouri, with our principal place of business located at 2800 Rockcreek Parkway, North Kansas City, Missouri 64117. Our telephone number is 816.201.1024. Our Web site, which we use to communicate important business information, can be accessed at: www.cerner.com. We make our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and all amendments to those reports available free of charge on or through this Web site as soon as reasonably practicable after such material is electronically filed with or furnished to the Securities and Exchange Commission (SEC). We do not intend for information contained in our website to be part of this annual report on Form 10-K.

Cerner is a leading supplier of health care information technology (HCIT). Our mission is to contribute to the improvement of health care delivery and the health of communities. We offer a wide range of intelligent solutions and services that support the clinical, financial and operational needs of organizations of all sizes. We have systems in more than 20,000 facilities worldwide, including hospitals, physician practices, laboratories, ambulatory centers, behavioral health centers, cardiac facilities, radiology clinics, surgery centers, extended care facilities, retail pharmacies, and employer sites.

Cerner solutions are offered on the unified Cerner Millennium[®] architecture and on the HealtheIntent[™] cloud-based platform. Cerner Millennium is a person-centric computing framework, which includes integrated clinical, financial and management information systems. This architecture allows providers to securely access an individual’s electronic health record (EHR) at the point of care, and it organizes and proactively delivers information to meet the specific needs of physicians, nurses, laboratory technicians, pharmacists, front- and back-office professionals and consumers. Our HealtheIntent platform is a cloud-based platform designed to scale at a population level while facilitating health and care at a person and provider level. On the HealtheIntent platform, we offer EHR-agnostic solutions that help health care systems aggregate, transform and reconcile data across the continuum of care, manage the health of populations they serve, improve outcomes and lower costs.

On February 2, 2015, Cerner acquired substantially all of the assets, and assumed certain liabilities of Siemens AG's health information technology business unit, Siemens Health Services (now referred to as "Cerner Health Services"). Cerner Health Services offers a portfolio of enterprise-level clinical and financial health care information technology solutions, as well as departmental, connectivity, population health, and care coordination solutions globally. Solutions are offered on the Soarian[®], Invision[®], and i.s.h.med[®] platforms, among others.

We offer a broad range of services, including implementation and training, remote hosting, operational management services, revenue cycle services, support and maintenance, health care data analysis, clinical process optimization, transaction processing, employer health centers, employee wellness programs and third party administrator (TPA) services for employer-based health plans.

In addition to software and services, we offer a wide range of complementary hardware and devices, both directly from Cerner and as a reseller for third parties.

Table of Contents

The following table presents our consolidated revenues by major solutions and services and by segment, as a percentage of total revenues:

	For the Years Ended			
	2015	2014	2013	
Revenues by Solutions & Services				
System sales	29	% 28	% 29	%
Support and maintenance	22	% 21	% 23	%
Services	47	% 48	% 46	%
Reimbursed travel	2	% 3	% 2	%
	100	% 100	% 100	%

Domestic	88	% 89	% 88	%
Global	12	% 11	% 12	%
	100	% 100	% 100	%

Health Care and Health Care IT Industry

There are several trends in health care that we believe create a favorable environment for Cerner. One is the unsustainable rate of growth in health care spending. In 2014, U.S. health care spending increased 5.5 percent to \$3.0 trillion, representing 17.7 percent of the Gross Domestic Product (GDP). The Centers for Medicare and Medicaid Services (CMS) estimates U.S. health care spending in 2015 at \$3.2 trillion, or 18.0 percent of GDP, and projects it to be 19.6 percent of GDP by 2024. We believe health care IT is one of few remaining levers that can change this trajectory. Further, health care providers continue to operate in an environment that includes what we call ‘raining measures and mandates’. Examples of these include:

- Health Information Technology for Economic and Clinical Health (HITECH) provisions within the American Recovery and Reinvestment Act (ARRA) that offer incentives for health care organizations to modernize operations through “Meaningful Use” of HCIT and penalizes for non-compliance;
- Value-Based Purchasing programs that link reimbursement to quality, clinical process, patient experience, and outcomes;
- Increasing requirements to report quality metrics; and
- Readmission reduction programs that penalize hospitals for unnecessary readmissions.

Collectively, these measures and mandates are driving providers to focus on delivering higher quality care at a lower cost, and we believe HCIT is a key lever that can help providers accomplish this goal. They also represent a shift away from traditional fee-for-service (FFS) reimbursement models to models more aligned with quality, outcomes, and efficiency. The largest signal of this shift occurred in January of 2015 when the U.S. Department of Health & Human Services laid out a plan to shift 50% of Medicare payments to value-based payment models by the end of 2018, and to tie 90% of the remaining traditional FFS payments to quality measures. We believe that tying payment to health outcomes is going to produce some major shifts in the way health care is provided in the next decade, and we expect a much greater focus on patient engagement, wellness and prevention. As health care providers become accountable for proactively managing the health of the populations they serve, we expect them to need ongoing investment in sophisticated information technology solutions that will enable them to predict when intervention is needed so they can improve outcomes and lower the cost of providing care.

The increasingly complex and more clinical outcomes-based reimbursement environment is also contributing to a heightened demand for revenue cycle solutions and services and a desire for these solutions and services to be closely

aligned with clinical solutions. We believe this trend is positive for Cerner because our Cerner Millennium revenue cycle solutions and services are integrated with our clinical solutions, creating a clinically driven revenue cycle solution that has had significant adoption in recent years.

Over the past several years, we have seen a shift in the U.S. marketplace towards a preference for a single platform across inpatient and ambulatory settings. The number of physicians employed by hospitals has increased as hospitals have acquired physician groups, and health systems are recognizing the benefit of having a single patient record at the hospital and the physician office. We are benefiting from this trend due to our unified Cerner Millennium platform that spans multiple venues and significant enhancements we have made to our physician solutions in recent years.

Table of Contents

While health care providers are showing a preference for a single platform across multiple venues, there is also an increased push for interoperability across disparate systems to address the reality that no patient's record will only have information from a single health care IT system. We believe our health information should be shareable and accessible among our primary care physicians, specialists, and hospital physicians. In recent years, a great deal of money has been spent on health care IT for the purpose of creating a digital health care system. And while that has largely occurred, the day-to-day lack of interoperability across health care organizations and platforms limits the benefits to individuals and reduces the return on the investments made to digitize the health system.

As a result, Cerner has led or been a key participant in nearly every major industry effort to advance interoperability and system openness. One example is Cerner's role as a founding member of the CommonWell Health Alliance, an open, not-for-profit industry consortium that brought health care IT firms together for the purpose of enabling safe nationwide interoperability. We believe CommonWell complements federal policy by providing a solution for identity management, record location and consent management. The vision of CommonWell is for a patient to be able to visit a new doctor, give their consent, and, within moments, have his or her lifetime record available from all the prior places he or she has visited.

CommonWell members represent about 70% of the acute care market and about 25% of the ambulatory market. CommonWell membership also spans a diverse range of clinical care settings beyond acute and ambulatory, including health IT market leaders in imaging, perinatal, emergency department, laboratory, retail pharmacy, oncology, care management, patient portal, post-acute care, and state and federal government agencies. As of the end of 2015, more than 1,200 provider sites across 49 states have gone live with CommonWell Services and have already generated nearly 30 million queries. There are an additional 6,000 sites that have committed to CommonWell Services.

Outside the United States, we believe Cerner's growth opportunities are good, as most countries are also dealing with health care expenditures growing faster than their economies, which is leading to a focus on controlling costs while also improving quality of care.

Cerner Vision and Growth Strategy

For over three decades, Cerner has been continuously building intelligent solutions for the health care industry. Together with our clients, we are creating a future where the health care system works to improve the well-being of individuals and communities. Our vision has always guided our large investments in research and development (R&D), which have created strong levels of organic growth throughout our history. Our proven ability to innovate has led to what we believe to be industry-leading architectures and an unmatched breadth and depth of solutions and services. The strength of our solutions and services has led to our ability to gain market share in recent years, which has contributed to our growth. We believe we are positioned to continue gaining share in coming years as regulatory requirements and industry shifts continue to pressure health care providers to improve quality while lowering costs, which will require having more sophisticated information technology than many of our competitors provide.

In addition to growth by gaining market share, we believe we have a significant opportunity to grow revenues by expanding our solution footprint with existing clients. There is opportunity to expand penetration of our core solutions, such as EHRs and computerized physician order entry, and increase penetration of our broad range of complementary solutions that can be offered into our existing client base. Examples include women's health, anesthesiology, imaging, clinical process optimization, critical care, health care devices, device connectivity, emergency department, revenue cycle and surgery.

We also have an opportunity to grow by expanding penetration of services we offer that are targeted at capturing a larger percentage of our clients' existing IT spending. These services leverage our proven operational capabilities and the success of our CernerWorksSM managed services business, where we have demonstrated the ability to improve our

clients' service levels at a cost that is at or below amounts they were previously spending. One of these services is Cerner ITWorksSM, a suite of solutions and services that improves the ability of hospital IT departments to meet their organization's needs while also creating a closer alignment between Cerner and our clients. A second example is Cerner RevWorksSM, which includes solutions and services to help health care organizations improve their revenue cycle functions.

We have made progress over the past several years at reducing the total cost of our solutions, which expands our end market opportunities by allowing us to offer lower-cost, higher-value solutions and services to smaller community hospitals, critical access hospitals and physician practices. For example, our CommunityWorksTM offering leverages a shared instance of the Cerner Millennium platform across multiple clients, which decreases the total cost for these clients.

Table of Contents

We also expect to drive growth over the course of the next decade through initiatives outside the core HCIT market. For example, we offer clinic, pharmacy, wellness and third-party administrator services directly to employers. These offerings have been shaped by what we have learned from changes we have implemented at Cerner. We have removed our third-party administrator and become self-administered, launched an on-site clinic and pharmacy, incorporated biometric measurements for our population, realigned the economic incentives for associates in our health plan, and implemented a data-driven wellness management program. These changes have had a positive impact on the health of our associates while also keeping our health care costs below industry averages.

As discussed below, another opportunity for future growth, and a significant area of investment for Cerner, is leveraging the vast amounts of data being created as the health care industry is digitized and using this data to help providers and employers manage the health of populations.

Population Health

Population Health Management involves a shift from solely automating health systems to managing a person's health. Getting there requires complete, accurate patient data and meaningfully using that data to engage individuals, exchange information between providers and ultimately drive better outcomes at a lower cost. This shift will shape the future of health care and enable a system driven by accountability, transparency and value.

Cerner's approach to population health is to enable organizations to:

- **KNOW** what is happening and predict what will happen within their population through solutions for data exchange, longitudinal record, enterprise data warehouse, analytics and quality and regulatory reporting;
- **ENGAGE** providers and patients in health and care delivery through personal health portals and solutions for care management, home care, long-term care, and retail pharmacy; and
- **MANAGE** health and improve care with capacity and workforce management, clinical research, predictive modeling, health registries, and contract and network management.

These solutions are enabled by Cerner's HealtheIntent platform, which is a multi-purpose, programmable platform designed to scale at a population level while facilitating health and care at a person and provider level. This cloud-based platform enables organizations to aggregate, transform and reconcile data across the continuum of care, and helps improve outcomes and lower costs.

HealtheIntent is scalable, secure and can be accessed anywhere, anytime. It is able to receive data from any EHR, existing HCIT system and other data sources, such as pharmacy benefits managers or insurance claims. HealtheIntent collects data from multiple, disparate sources in near real-time, providing clarity to millions of data points in an actionable and programmable workflow. It enables organizations to identify, score and predict the risks of individual patients, allowing them to match the right care programs to the right individuals. The EHR-agnostic nature of our HealtheIntent platform allows us to offer our solutions to the entire marketplace, not just existing Cerner clients.

We have created a series of initial solutions on the HealtheIntent platform, including the following solutions that are generally available or scheduled to be released in the next year:

- **Longitudinal Record** - provides clinicians and the patient a view of their consolidated clinical record, gathered and normalized from multiple sources.
- **Registries** - identifies and automatically segments patients by disease, guides interventions according to clinical best practice, provides visibility to quality measures for provider's population, produces client-defined performance scorecards, and tracks their health and their interventions according to clinical best practice.
- **Analytics** - allows the integrated data to be analyzed for the purpose of population health management and research.
-

Provider Performance Management - creates visibility for providers on their performance against key clinical and operation metrics and can be aligned with payment models that incentivize high quality and efficient care.

Patient/Member Engagement - an enhanced patient portal complemented by engagement services to help health care organizations create more meaningful interactions and engagement with the members they serve, and provides the ability to target individuals at risk of becoming chronically ill.

Care Management - provides a person-centric approach of proactive surveillance, coordination and facilitation of health services across the care continuum to achieve optimal health status, quality and costs.

Population Health Programs - leverages evidence-based guidelines and the contextual information within HealthIntent to provide identification, prediction and management of a condition at the population, provider and person level and facilitates a personalized plan of care for each member.

Table of Contents

Contract Network Management - for managing provider networks, modeling to inform payer negotiations, determining appropriate business models, and managing contract performance in near real-time.

In summary, we believe our comprehensive architectural approach to population health is differentiated in the marketplace. We expect population health to be a large contributor to our long-term growth as health care continues to evolve towards a model that incents keeping people healthy.

Software Development

We commit significant resources to developing new health information system solutions and services. As of the end of 2015, approximately 5,900 associates were engaged in research and development activities. Total expenditures for the development and enhancement of our software solutions were approximately \$685 million, \$467 million and \$419 million during the 2015, 2014 and 2013 fiscal years, respectively. These figures include both capitalized and non-capitalized portions and exclude amounts amortized for financial reporting purposes.

As discussed above, continued investment in R&D remains a core element of our strategy. This will include ongoing enhancement of our core solutions and development of new solutions and services.

Intellectual Property

We have developed a broad portfolio of intellectual property rights to protect the proprietary interests in our solutions, services and brands. Our solutions embody valuable trade secrets preserved through a variety of technical and legal measures and constitute works of authorship protected by copyrights in the U.S. and globally. We have registered or applied to register certain trademarks and service marks in a number of countries with particular emphasis on the Cerner branding elements. We continue to develop our patent portfolio and own more than 300 issued patents with hundreds of patent applications pending. We do not consider any of our businesses to be dependent upon any one patent, copyright, trademark, or trade secret, or any family or families of the same.

Our solutions and services incorporate or rely on intellectual property licensed from third parties. Certain technologies licensed to Cerner are also important for internal use in running our business and supporting our clients. Although replacing any existing licenses could be inconvenient, based on our experiences, existing contractual relationships, and the incentives of our technology suppliers, we believe that Cerner will continue to obtain these technologies or suitable alternatives for commercially reasonable prices and on commercially reasonable terms.

Sales and Marketing

The markets for Cerner HCIT solutions, health care devices and services include integrated delivery networks, physician groups and networks, managed care organizations, hospitals, medical centers, free-standing reference laboratories, home health agencies, blood banks, imaging centers, pharmacies, pharmaceutical manufacturers, employers, governments and public health organizations. The majority of our sales are clinical and revenue cycle solutions and services to hospitals and health systems, but our solutions and services are highly scalable and sold to organizations ranging from physician practices, to community hospitals, to complex integrated delivery networks, to local, regional and national government agencies. Sales to large health systems typically take approximately nine to 18 months, while the sales cycle is often shorter when selling to smaller hospitals and physician practices.

Our executive marketing management is located at our Innovation Campus in Kansas City, Missouri, while our client representatives are deployed across the United States and globally. In addition to the United States, through our subsidiaries, we have sales associates and/or offices giving us a presence in more than 25 countries.

We support our sales force with technical personnel who perform demonstrations of Cerner solutions and services and assist clients in determining the proper hardware and software configurations. Our primary direct marketing strategy is to generate sales contacts from our existing client base and through presentations at industry seminars and tradeshow. We market the PowerWorks® solutions, offered on a subscription basis, directly to the physician practice market using

lead generation activities and through existing acute care clients that are looking to extend Cerner solutions to affiliated physicians. We attend a number of major tradeshows each year and sponsor executive user conferences, which feature industry experts who address the HCIT needs of large health care organizations.

Client Services

Substantially all of Cerner's clients that buy software solutions also enter into software support agreements with us for maintenance and support of their Cerner systems. In addition to immediate software support in the event of problems, these agreements allow clients to access new releases of the Cerner solutions covered by support agreements. Each client has

5

Table of Contents

24-hour access to the applicable client support teams, including those located at our world headquarters in North Kansas City, Missouri, our Continuous Campus in Kansas City, Kansas, our campus in Malvern, Pennsylvania, and our global support organizations in Germany, England and Ireland.

Most clients who buy hardware through Cerner also enter into hardware maintenance agreements with us. These arrangements normally provide for a fixed monthly fee for specified services. In the majority of cases, we utilize subcontractors to meet our hardware maintenance obligations. We also offer a set of managed services that include remote hosting, operational management services and disaster recovery.

Backlog

At the end of 2015, we had a revenue backlog of \$14.2 billion, which compares to \$10.6 billion at the end of 2014. Such backlog represents contracted revenue that has not yet been recognized. We estimate that approximately 27 percent of the backlog at the end of 2015 will be recognized as revenue during 2016.

Competition

The market for HCIT solutions, devices and services is intensely competitive, rapidly evolving and subject to rapid technological change. Our principal competitors in the health care solutions and services market each offer a suite of software solutions that compete with many of our software solutions and services. These competitors include, but are not limited to:

Allscripts Healthcare Solutions, Inc.	Healthland, Inc.
Computer Programs and Systems, Inc.	McKesson Corporation
Epic Systems Corporation	MEDHOST, Inc.
GE Healthcare Technologies	Medical Information Technology, Inc.

Other competitors focus on only a portion of the market that we address. For example, we deem the following competitors, which offer HCIT services that compete directly with some of our service offerings, as principal competitors in the HCIT services space:

Clinovations, Inc.	Impact Advisors
Dell, Inc. (Dell)	S&P Consultants
Encore Health Resources, LLC	The Advisory Board Company (Advisory Board)
IBM Corporation (IBM)	Xerox Corporation, Ltd.

We view the following competitors that offer solutions to the ambulatory market, but do not currently have a significant presence in the broader health systems and independent hospital market, as principal competitors in this market:

AmazingCharts.com, Inc.	Practice Fusion, Inc.
athenahealth, Inc. (athenahealth)	Quality Systems, Inc.
eClinicalWorks, LLC	SRSsoft
e-MDs, Inc.	Vitera Healthcare Solutions
Netsmart Technologies	

Cerner partners with third parties as a reseller of devices and markets its own competing proprietary health care devices. We view our principal competitors in the health care device market to include, without limitation:

CapsuleTech, Inc.	PerfectServe, Inc.
Becton, Dickinson and Company	Qualcomm, Inc.
Connexall Company, Ltd.	Siemens AG
Nanthealth, LLC	Vocera Communication, Inc.
Omniceil, Inc.	

Table of Contents

We view our principal competitors in the health care revenue cycle and transaction services market to include, without limitation:

3M Company	Emdeon Corporation
Accretive Health, Inc.	Experian plc
athenahealth	MedAssets, Inc.
Conifer Health Solutions	Optum, Inc. (Optum)
Dell	Quadramed Corporation
Deloitte Consulting, LLP	SSI Group, Inc.

We view our competitors in the population health market to range from small niche competitors, to large health insurance companies including, without limitation:

ActiveHealth Management	IBM
Advisory Board	Influence Health, Inc.
Aetna, Inc.	MedeAnalytics, Inc.
athenahealth	Optum
Evolent Health, LLC	WellCentive, Inc.
Health Catalyst	

In addition, we expect that major software information systems companies, large information technology consulting service providers and system integrators, start-up companies, managed care companies, healthcare insurance companies, accountable care organizations and others specializing in the health care industry may offer competitive software solutions, devices or services. The pace of change in the HCIT market is rapid and there are frequent new software solutions, devices or services introductions, enhancements and evolving industry standards and requirements. We believe that the principal competitive factors in this market include the breadth and quality of solution and service offerings, the stability of the solution provider, the features and capabilities of the information systems and devices, the ongoing support for the systems and devices and the potential for enhancements and future compatible software solutions and devices.

Number of Employees (Associates)

At the end of 2015, we employed approximately 22,200 associates worldwide.

Operating Segments

Information about our operating segments, which are geographically based, may be found in Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations” below and in Note (18) to the consolidated financial statements.

Executive Officers of the Registrant

The following table sets forth the names, ages, positions and certain other information regarding the Company’s executive officers as of February 12, 2016. Officers are elected annually and serve at the discretion of the Board of Directors.

Name	Age	Positions
Neal L. Patterson	66	Chairman of the Board of Directors and Chief Executive Officer
Clifford W. Illig	65	Vice Chairman of the Board of Directors
Zane M. Burke	50	President
Marc G. Naughton	60	Executive Vice President and Chief Financial Officer

Michael R. Nill	51	Executive Vice President and Chief Operating Officer
Randy D. Sims	55	Senior Vice President, Chief Legal Officer and Secretary
Jeffrey A. Townsend	52	Executive Vice President and Chief of Staff
Julia M. Wilson	53	Executive Vice President and Chief People Officer

Table of Contents

Neal L. Patterson, co-founder of the Company, has been Chairman of the Board of Directors and Chief Executive Officer of the Company for more than five years. Mr. Patterson served as President of the Company from July 2010 to September 2013, which position he also held from March of 1999 until August of 1999.

Clifford W. Illig, co-founder of the Company, has been a Director of the Company for more than five years. He previously served as Chief Operating Officer of the Company until October 1998 and as President of the Company until March of 1999. Mr. Illig was appointed Vice Chairman of the Board of Directors in March of 1999.

Zane M. Burke joined the Company in September 1996. Since that time, he has held a variety of client-facing sales, implementation and support roles, including Corporate Controller and Vice President of Finance. He was promoted to President of the Company's West region in 2002 and Senior Vice President of National Alignment in 2006. He was further promoted to Executive Vice President - Client Organization in July 2011 and to President of the Company in September 2013.

Marc G. Naughton joined the Company in November 1992 as Manager of Taxes. In November 1995 he was named Chief Financial Officer and in February 1996 he was promoted to Vice President. He was promoted to Senior Vice President in March 2002 and promoted to Executive Vice President in March 2010.

Michael R. Nill joined the Company in November 1996. Since that time he has held several positions in the Technology, Intellectual Property and CernerWorks Client Hosting Organizations. He was promoted to Vice President in January 2000, promoted to Senior Vice President in April 2006 and promoted to Executive Vice President and named Chief Engineering Officer in February 2009. Mr. Nill was appointed Chief Operating Officer in May 2011.

Randy D. Sims joined the Company in March 1997 as Vice President and Chief Legal Officer and was promoted to Senior Vice President in March 2011. Prior to joining the Company, Mr. Sims worked at Farmland Industries, Inc. for three years where he last served as Associate General Counsel. Prior to Farmland, Mr. Sims was in-house legal counsel at The Marley Company for seven years, holding the position of Assistant General Counsel when he left to join Farmland.

Jeffrey A. Townsend joined the Company in June 1985. Since that time he has held several positions in the Intellectual Property Organization and was promoted to Vice President in February 1997. He was appointed Chief Engineering Officer in March 1998, promoted to Senior Vice President in March 2001, named Chief of Staff in July 2003 and promoted to Executive Vice President in March 2005.

Julia M. Wilson first joined the Company in July 1990. Since that time, she has held several positions in the Functional Group Organization. She was promoted to Vice President and Chief People Officer in August 2003, to Senior Vice President in March 2007 and to Executive Vice President in March 2013.

Table of Contents

Item 1A. Risk Factors

Risks Related to our Business

We may incur substantial costs related to product-related liabilities. Many of our software solutions, health care devices or services (including life sciences/research services) are intended for use in collecting, storing and displaying clinical and health care-related information used in the diagnosis and treatment of patients and in related health care settings such as admissions, billing, etc. We attempt to limit by contract our liability; however, the limitations of liability set forth in the contracts may not be enforceable or may not otherwise protect us from liability for damages. We may also be subject to claims that are not covered by contract. Although we maintain liability insurance coverage, there can be no assurance that such coverage will cover any particular claim that has been brought or that may be brought in the future, that such coverage will prove to be adequate or that such coverage will continue to remain available on acceptable terms, if at all. A successful material claim or series of claims brought against us, if uninsured or under-insured, could materially harm our business, results of operations and financial condition. Product-related claims, even if not successful, could damage our reputation, cause us to lose existing clients, limit our ability to obtain new clients, divert management's attention from operations, result in significant revenue loss, create potential liabilities for our clients and us and increase insurance and other operational costs.

We may be subject to claims for system errors and warranties. Our software solutions and health care devices are very complex and may contain design, coding or other errors, especially when first introduced. It is not uncommon for HCIT providers to discover errors in software solutions and/or health care devices after their introduction to the market. Similarly, the installation of our software solutions and health care devices is very complex and errors in the implementation and configuration of our systems can occur. Our software solutions and health care devices are intended for use in collecting, storing, and displaying clinical and health care-related information used in the diagnosis and treatment of patients and in related health care settings such as admissions, billing, etc. Therefore, users of our software solutions and health care devices have a greater sensitivity to errors than the market for software products and devices generally. Our client agreements typically provide warranties concerning material errors and other matters. If a client's Cerner software solution or health care devices fail to meet these warranties or leads to faulty clinical decisions or injury to patients, it could 1) constitute a material breach under the client agreement, allowing the client to terminate the agreement and possibly obtain a refund or damages or both, or require us to incur additional expense in order to make the software solution or health care device meet these criteria or 2) subject us to claims or litigation by our clients or clinicians or directly by the patient. Additionally, such failures could damage our reputation and could negatively affect future sales. Our client agreements generally limit our liability arising from such claims but such limits may not be enforceable in certain jurisdictions or circumstances. Although we maintain liability insurance coverage, there can be no assurance that such coverage will cover any particular claim that has been brought or that may be brought in the future, that such coverage will prove to be adequate or that such coverage will continue to remain available on acceptable terms, if at all. A successful material claim or series of claims brought against us, if uninsured or under-insured, could materially harm our business, results of operations and financial condition.

We may experience interruptions at our data centers or client support facilities, which could interrupt clients' access to their data, exposing us to significant costs and reputational harm. Our business relies on the secure electronic transmission, data center storage and hosting of sensitive information, including protected health information, personally identifiable information, financial information and other sensitive information relating to our clients, company and workforce. We perform data center and/or hosting services for certain clients, including the storage of critical patient and administrative data and support services through various client support facilities. If any of these systems are interrupted, damaged or breached by an unforeseen event or actions of a Cerner associate or contractor or a third party or fail for any extended period of time, it could have a material adverse impact on our results of operations. Complete failure of all local public power and backup generators; impairment of all telecommunications lines; a concerted denial of service attack; a significant system, network or data breach; damage, injury or impairment

(environmental, accidental or intentional) to the buildings, the equipment inside the buildings housing our data centers, the personnel operating such facilities or the client data contained therein; or errors by the personnel trained to operate such facilities could cause a disruption in operations and negatively impact clients who depend on us for data center and system support services. We offer our clients disaster recovery services for additional fees to protect clients from isolated data center failures, leveraging our multiple data center facilities, however only a small percentage of our hosted clients choose to contract for these services. Additionally, Cerner's core systems are disaster tolerant as we have implemented redundancy across physically diverse data centers. Any interruption in operations at our data centers and/or client support facilities could damage our reputation, cause us to lose existing clients, hurt our ability to obtain new clients, result in significant revenue loss, create potential liabilities for our clients and us and increase insurance and other operating costs.

Table of Contents

If our IT security is breached, we could be subject to increased expenses, exposure to legal claims and regulatory actions, and clients could be deterred from using our solutions and services. We are in the information technology business, and our products and services store, retrieve, manipulate and manage our clients' information and data (and that of their patients), as well as our own data. We believe we have a reputation for secure and reliable solution offerings and related services, and we have invested a great deal of time and resources in protecting the security, confidentiality, integrity and availability of our solutions, services and the internal and external data that we manage. At times, we encounter attempts by third parties to identify and exploit solution and service vulnerabilities, penetrate or bypass our security measures, and gain unauthorized access to our or our clients', partners' and suppliers' software, hardware and cloud offerings, networks and systems, any of which could lead to the compromise of personal information or the confidential information or data of Cerner, our clients or their patients.

High-profile security breaches at other companies have increased in recent years, and security industry experts and government officials have warned about the risks of hackers and cyber-attacks targeting information technology products and businesses. Although this is an industry-wide problem that affects other software and hardware companies, we may be targeted by computer hackers because we are a prominent health care IT company. These risks will increase as we continue to grow our cloud offerings and store and process increasingly large amounts of data, including personal health information, and our clients' confidential information and data, and host or manage parts of our clients' businesses in cloud-based IT environments.

If a cyber-attack or other security incident described above were to allow unauthorized access to or modification of our clients' or suppliers' data, our own data or our IT systems, or if our solutions or services are perceived as having security vulnerabilities, we could suffer significant damage to our brand and reputation. This in turn could lead to fewer clients using our solutions and services and result in reduced revenue and earnings. The costs we would incur to address and fix these security incidents would increase our expenses. These types of security incidents could also lead to lawsuits, regulatory investigations and claims and increased legal liability, including in some cases contractual costs related to notification and fraud monitoring of impacted persons.

Our proprietary technology may be subject to claims for infringement or misappropriation of intellectual property rights of others, or may be infringed or misappropriated by others. We rely upon a combination of license agreements, confidentiality policies and procedures, confidentiality provisions in employment agreements, confidentiality agreements with third parties and technical security measures to maintain the confidentiality, exclusivity and trade secrecy of our proprietary information. We also rely on trademark and copyright laws to protect our intellectual property rights in the U.S. and abroad. We continue to develop our patent portfolio of U.S. and global patents, but these patents do not provide comprehensive protection for the wide range of solutions, devices and services we offer. Despite our protective measures and intellectual property rights, we may not be able to adequately protect against theft, copying, reverse-engineering, misappropriation, infringement or unauthorized use or disclosure of our intellectual property, which could have an adverse effect on our competitive position.

In addition, we are routinely involved in intellectual property infringement or misappropriation claims, and we expect this activity to continue or even increase as the number of competitors, patents and patent enforcement organizations in the HCIT market increases, the functionality of our software solutions and services expands, the use of open-source software increases and we enter new geographies and new market segments. These claims, even if unmeritorious, are expensive to defend and are often incapable of prompt resolution. If we become liable to third parties for infringing or misappropriating their intellectual property rights, we could be required to pay a substantial damage award, develop alternative technology, obtain a license or cease using, selling, offering for sale, licensing, importing, implementing or supporting the applicable solutions, devices and services.

We may become subject to legal proceedings that could have a material adverse impact on our business, results of operations and financial condition. From time to time and in the ordinary course of our business, we and certain of our

subsidiaries may become involved in various legal proceedings. All such legal proceedings are inherently unpredictable and, regardless of the merits of the claims, litigation may be expensive, time-consuming and disruptive to our operations and distracting to management. If resolved against us, such legal proceedings could result in excessive verdicts, injunctive relief or other equitable relief that may affect how we operate our business. Similarly, if we settle such legal proceedings, it may affect how we operate our business. Future court decisions, alternative dispute resolution awards, business expansion or legislative activity may increase our exposure to litigation and regulatory investigations. In some cases, substantial non-economic remedies or punitive damages may be sought. Although we maintain liability insurance coverage, there can be no assurance that such coverage will cover any particular verdict, judgment or settlement that may be entered against us, that such coverage will prove to be adequate or that such coverage will continue to remain available on acceptable terms, if at

Table of Contents

all. If we incur liability that exceeds our insurance coverage or that is not within the scope of the coverage in legal proceedings brought against us, it could have a material adverse effect on our business, results of operations and financial condition.

We are subject to risks associated with our global operations. We market, sell and service our solutions, devices and services globally. We have established offices around the world, including in the Americas, Europe, the Middle East and the Asia Pacific region. Our acquisition of the Cerner Health Services business increased our assets and operations within Europe and, accordingly, our exposure to economic conditions in Europe. We plan to continue to expand our non-U.S. operations and enter new global markets. This expansion will require significant management attention and financial resources to develop successful direct and indirect non-U.S. sales and support channels. Our business is generally transacted in the local functional currency. In some countries, our success will depend in part on our ability to form relationships with local partners. There is a risk that we may sometimes choose the wrong partner. For these and other reasons, we may not be able to maintain or increase non-U.S. market demand for our solutions, devices and services.

Non-U.S. operations are subject to inherent risks, and our business, results of operations and financial condition, including our revenue growth and profitability, could be adversely affected by a variety of uncontrollable and changing factors. These include, but are not limited to:

- Greater difficulty in collecting accounts receivable and longer collection periods;
- Difficulties and costs of staffing and managing non-U.S. operations;
- The impact of global economic conditions;
- Effects of sovereign debt conditions, including budgetary constraints;
- Unfavorable or volatile foreign currency exchange rates;
- Legal compliance costs or business risks associated with our global operations where: i) local laws and customs differ from, or are more stringent than those in the U.S., such as those relating to privacy or security breaches or ii) risk is heightened with respect to laws prohibiting improper payments and bribery, including without limitation the U.S. Foreign Corrupt Practices Act, the U.K. Anti-Bribery Act and similar laws and regulations in foreign jurisdictions;
- Certification, licensing or regulatory requirements;
- Unexpected changes in regulatory requirements;
- Changes to or reduced protection of intellectual property rights in some countries;
- Potentially adverse tax consequences as a result of changes in tax laws or otherwise, and difficulties associated with repatriating cash generated or held abroad in a tax-efficient manner;
- Different or additional functionality requirements or preferences;
- Trade protection measures;
- Export control regulations;
- Health service provider or government spending patterns;
- Natural disasters, war or terrorist acts;
- Labor disruptions that may occur in a country;
- Poor selection of a partner in a country; or
- Political unrest which may impact sales or threaten the safety of associates or our continued presence in these countries and the related potential impact on global stability.

Fluctuations in foreign currency exchange rates could materially affect our financial results. Our consolidated financial statements are presented in U.S. dollars. In general, the functional currency of our subsidiaries is the local currency. For each subsidiary, assets and liabilities denominated in foreign currencies are translated into U.S. dollars at the exchange rates in effect at the balance sheet dates and revenues and expenses are translated at the average exchange rates prevailing during the month of the transaction. Therefore, increases or decreases in the value of the U.S. dollar against other major currencies affect our revenues, net earnings and the value of balance sheet items

denominated in foreign currencies. Future fluctuations in foreign currency exchange rates, particularly the strengthening of the U.S. dollar against major currencies, could materially affect our financial results.

We are subject to tax legislation in numerous countries; tax legislation initiatives or challenges to our tax positions could adversely affect our business, results of operations and financial condition. We are a global corporation with a presence in more than 25 countries. As such, we are subject to tax laws, regulations and policies of the U.S. federal, state and local governments and of comparable taxing authorities in other country jurisdictions. From time to time, various legislative

Table of Contents

initiatives may be proposed that could adversely affect our tax positions and/or our tax liabilities. There can be no assurance that our effective tax rate, tax payments, tax credits or incentives will not be adversely affected by these initiatives. In addition, U.S. federal, state and local, as well as other countries' tax laws and regulations are extremely complex and subject to varying interpretations. There can be no assurance that our tax positions will not be challenged by relevant tax authorities or that we would be successful in any such challenge, which could result in additional taxation, penalties and interest payments.

Our success depends upon the recruitment and retention of key personnel. To remain competitive in our industries, we must attract, motivate and retain highly skilled managerial, sales, marketing, consulting and technical personnel, including executives, consultants, programmers and systems architects skilled in the HCIT, health care devices, health care transactions, population health management, revenue cycle and life sciences industries and the technical environments in which our solutions, devices and services are offered. Competition for such personnel in our industries is intense in both the U.S. and abroad. Our failure to attract additional qualified personnel to meet our needs could have a material adverse effect on our prospects for long-term growth. In addition, we invest significant time and expense in training our associates, which increases their value to clients and competitors who may seek to recruit them and increases the cost of replacing them. Our success is dependent to a significant degree on the continued contributions of key management, sales, marketing, consulting and technical personnel. The unexpected loss of key personnel could have a material adverse impact on our business, results of operations and financial condition, and could potentially inhibit development and delivery of our solutions, devices and services and market share advances.

We depend on third party suppliers and our revenue and operating earnings could suffer if we fail to manage suppliers properly. We license or purchase intellectual property and technology (such as software, hardware and content) from third parties, including some competitors, and incorporate such third party software, hardware or content into, or sell or license it in conjunction with, our solutions, devices and services. We depend on some of the third party software, hardware or content in the operation and delivery of our solutions, devices and services. For instance, we currently depend on Microsoft Oracle and IBM technologies for portions of the operational capabilities of our Millennium solutions. Our remote hosting and cloud services businesses also rely on a limited number of suppliers for certain functions of these businesses, such as Oracle database technologies, CITRIX technologies and Cisco networking technologies. Additionally, we rely on EMC, Hewlett Packard, NetApp, IBM and others for our hardware technology platforms.

Most of our third party software license support contracts expire within one to five years, can be renewed only by mutual consent and may be terminated if we breach the terms of the license and fail to cure the breach within a specified period of time. Most of these third party software licenses are non-exclusive; therefore, our competitors may obtain the right to use any of the technology covered by these licenses and use the technology to compete directly with us.

If any of our third party suppliers were to change product offerings, cease actively supporting the technologies, fail to update and enhance the technologies to keep pace with changing industry standards, encounter technical difficulties in the continuing development of these technologies, significantly increase prices, terminate our licenses or supply contracts, suffer significant capacity or supply chain constraints or suffer significant disruptions, we would need to seek alternative suppliers and incur additional internal or external development costs to ensure continued performance of our solutions, devices and services. Such alternatives may not be available on attractive terms, or may not be as widely accepted or as effective as the intellectual property or technology provided by our existing suppliers. If the cost of licensing, purchasing or maintaining our third party intellectual property or technology significantly increases, our operating earnings could significantly decrease. In addition, interruption in functionality of our solutions, devices or services as a result of changes in third party suppliers could adversely affect our commitments to clients, future sales of solutions, devices and services, and negatively affect our revenue and operating earnings.

We may encounter difficulties in successfully completing the integration of our Cerner Health Services business into our business or fail to realize the anticipated benefits of the acquisition of the Cerner Health Services business. The integration of two independent businesses is a complex, costly and time-consuming process and involves numerous risks, including difficulties in the assimilation of operations, services, solutions and personnel, the diversion of management's attention from other business concerns, the expansion into markets in which we have little or no direct prior experience, and the potential inability to maintain the goodwill of existing clients. Potential difficulties that we may encounter as part of the integration process, which may preclude us from fully realizing the anticipated benefits of the acquisition, including the anticipated synergies, growth opportunities and cost savings, include, among other factors:

- managing a larger company;

12

Table of Contents

the possibility of faulty assumptions underlying expectations regarding the integration process, including known and unknown liabilities in the legacy Cerner Health Services business or arising out of the integration, or assumptions around client retention;

- integrating two business cultures;
- creating uniform standards, controls, procedures, policies and information systems and minimizing the costs associated with such matters;
- integrating information systems, purchasing, accounting, finance, legal, sales, billing, payroll and regulatory compliance functions;
- preserving client, supplier, research and development, distribution, marketing, promotion and other important relationships;
- commercializing "go forward" solutions under development and increasing revenues from existing marketed solutions;
- combining the sales force territories and competencies associated with the sale of solutions and services presently sold or provided by legacy Cerner or the Cerner Health Services business;
- integrating personnel from different businesses while maintaining focus on providing consistent, high-quality solutions and client support and attracting prospective clients;
- integrating complex technologies and solutions from different businesses in a manner that is seamless to clients; and
- performance shortfalls as a result of the diversion of management's attention to the integration of the Cerner Health Services business.

If our management is unable to successfully integrate the Cerner Health Services business in a manner that permits us to achieve the cost savings and operating synergies anticipated to result from the Cerner Health Services acquisition, such anticipated benefits may not be realized fully or at all or may take longer to realize than expected. The significant diversion of our management's attention away from the ongoing businesses, and any difficulties encountered in the transition and integration process, could adversely affect our financial results. Moreover, the failure to achieve the anticipated benefits of the Cerner Health Services acquisition could result in material increases in costs or material decreases in the amount of expected revenues. Any of the above difficulties could adversely affect our ability to maintain relationships with clients, partners, suppliers and associates or our ability to achieve the anticipated benefits of the Cerner Health Services acquisition, or could reduce our earnings or otherwise adversely affect our business, results of operations and financial condition.

We intend to continue strategic business acquisitions and other combinations, which are subject to inherent risks. In order to expand our solutions, device offerings and services and grow our market and client base, we may continue to seek and complete strategic business acquisitions and other combinations that we believe are complementary to our business. Acquisitions have inherent risks which may have a material adverse effect on our business, results of operations, financial condition or prospects, including, but not limited to: 1) failure to successfully integrate the business and financial operations, services, intellectual property, solutions or personnel of an acquired business and to maintain uniform standard controls, policies and procedures; 2) diversion of our management's attention from other business concerns; 3) entry into markets in which we have little or no direct prior experience; 4) failure to achieve projected synergies and performance targets; 5) loss of clients or key personnel; 6) incurrence of debt or assumption of known and unknown liabilities; 7) write-off of software development costs, goodwill, client lists and amortization of expenses related to intangible assets; 8) dilutive issuances of equity securities; and, 9) accounting deficiencies that could arise in connection with, or as a result of, the acquisition of an acquired company, including issues related to internal control over financial reporting and the time and cost associated with remedying such deficiencies. If we fail to successfully integrate acquired businesses or fail to implement our business strategies with respect to these acquisitions, we may not be able to achieve projected results or support the amount of consideration paid for such acquired businesses.

We could suffer losses due to asset impairment charges. We assess our goodwill for impairment during the second quarter every year and on an interim date should events or changes in circumstances indicate the carrying value of goodwill may not be recoverable in accordance with provisions of Accounting Standards Codification Topic 350, Intangibles – Goodwill and Other. Declines in business performance or other factors could cause the fair value of a reporting unit to be revised downward and could result in a non-cash impairment charge. This could negatively affect our reported net earnings.

Volatility and disruption resulting from global economic or market conditions could negatively affect our business, results of operations and financial condition. Our business, results of operations, financial condition and outlook may be impacted by the health of the global economy. Volatility and disruption in global capital and credit markets may lead to slowdowns or declines in client spending which could adversely affect our business and financial performance. Our business and financial performance, including new business bookings and collection of our accounts receivable, may be adversely affected by current and future economic conditions (including a reduction in the availability of credit, higher energy costs,

Table of Contents

rising interest rates, financial market volatility and lower than expected economic growth) that cause a slowdown or decline in client spending. Reduced purchases by our clients or changes in payment terms could adversely affect our revenue growth and cause a decrease in our cash flow from operations. Bankruptcies or similar events affecting clients may cause us to incur bad debt expense at levels higher than historically experienced. Further, volatility and disruption in global financial markets may also limit our ability to access the capital markets at a time when we would like, or need, to raise capital, which could have an impact on our ability to react to changing economic and business conditions. Accordingly, if global financial and economic volatility continues or worsens, our business, results of operations and financial condition could be materially and adversely affected.

If we are unable to manage our growth in the new markets in which we offer solutions, health care devices or services, our business, results of operations and financial condition could suffer. Our future financial results will depend in part on our ability to profitably manage our business in the new markets that we enter. Over the past several years, we have engaged in the identification of, and competition for, growth and expansion opportunities in the areas of analytics, revenue cycle and population health. In order to achieve those initiatives, we will need to, among other things, recruit, train, retain and effectively manage associates, manage changing business conditions and implement and improve our technical, administrative, financial control and reporting systems for offerings in those areas. Difficulties in managing future growth in new markets could have a material adverse impact on our business, results of operations and financial condition.

We will continue to incur significant expenses in connection with the integration of the Cerner Health Services business into Cerner. As we work to integrate the business, we expect to continue to incur significant expenses relating to the integration of personnel, geographically diverse operations, information technology systems, accounting systems, clients, and strategic partners of each business and the implementation of consistent standards, policies, and procedures, and we may be subject to material write downs in assets and charges to earnings. The integration process will be long-term and will continue to create significant expenses.

Our work with government clients exposes us to additional risks inherent in the government contracting environment. Our clients include national, provincial, state and local governmental entities. Our government work carries various risks inherent in the government contracting process. These risks include, but are not limited to, the following:

Government entities, particularly in the U.S., often reserve the right to audit our contracts and conduct inquiries and investigations of our business practices with respect to government contracts. U.S. government agencies conduct reviews and investigations and make inquiries regarding our systems in connection with our performance and business practices with respect to our government contracts. Negative findings from audits, investigations or inquiries could affect our future sales and profitability by preventing us, by operation of law or in practice, from receiving new government contracts for some period of time.

If a government client discovers improper or illegal activities in the course of audits or investigations, we may become subject to various civil and criminal penalties, including those under the civil U.S. False Claims Act, and administrative sanctions, which may include termination of contracts, forfeiture of profits, suspension of payments, fines and suspensions or debarment from doing business with other agencies of that government. The inherent limitations of internal controls may not prevent or detect all improper or illegal activities.

U.S. government contracting regulations impose strict compliance and disclosure obligations. Disclosure is required if certain company personnel have knowledge of “credible evidence” of a violation of federal criminal laws involving fraud, conflict of interest, bribery or improper gratuity, a violation of the civil U.S. False Claims Act or receipt of a significant overpayment from the government. Failure to make required disclosures could be a basis for suspension and/or debarment from federal government contracting in addition to breach of the specific contract and could also impact contracting beyond the U.S. federal level. Reported matters also could lead to audits or investigations and

other civil, criminal or administrative sanctions.

Government contracts are subject to heightened reputational and contractual risks compared to contracts with commercial clients. For example, government contracts and the proceedings surrounding them are often subject to more extensive scrutiny and publicity. Negative publicity, including allegations of improper or illegal activity, poor contract performance, deficiencies in services or other deliverables, or information security breaches, regardless of accuracy, may adversely affect our reputation.

Terms and conditions of government contracts also tend to be more onerous and are often more difficult to negotiate.

Table of Contents

Government entities typically fund projects through appropriated monies. While these projects are often planned and executed as multi-year projects, government entities usually reserve the right to change the scope of or terminate these projects for lack of approved funding and/or at their convenience. Changes in government or political developments, including budget deficits, shortfalls or uncertainties, government spending reductions (e.g., Congressional sequestration of funds under the Budget Control Act of 2011) or other debt constraints, such as those recently experienced in the U.S. and Europe, could result in our projects being reduced in price or scope or terminated altogether, which also could limit our recovery of incurred costs, reimbursable expenses and profits on work completed prior to the termination. Furthermore, if insufficient funding is appropriated to the government entity to cover termination costs, we may not be able to fully recover our investments.

The occurrences or conditions described above could affect not only our business with the particular government entities involved, but also our business with other entities of the same or other governmental bodies or with certain commercial clients, and could have a material adverse effect on our business, results of operations and financial condition.

There are risks associated with our outstanding and future indebtedness. We have customary restrictive covenants in our current debt agreements, which may limit our flexibility to operate our business. These covenants include limitations on priority debt, liens, mergers, asset dispositions, and transactions with affiliates, and require us to maintain certain leverage and interest coverage ratios. Failure to comply with these covenants could result in an event of default that, if not cured or waived, could result in reduced liquidity for the Company and could have a material adverse effect on our business, results of operations and financial condition. Additionally, our ability to pay interest and repay the principal for our indebtedness is dependent upon our ability to manage our business operations, generate sufficient cash flows to service such debt and the other factors discussed in this section. There can be no assurance that we will be able to manage any of these risks successfully.

Risks Related to the Health Care Information Technology, Health Care Device, Health Care Transaction, Revenue Cycle Management and Population Health Management Industries

The health care industry is subject to changing political, economic and regulatory influences, which could impact the purchasing practices and operations of our clients and increase our costs to deliver compliant solutions and services. For example, the Health Insurance Portability and Accountability Act of 1996 (as modified by The Health Information Technology for Economic and Clinical Health Act (HITECH) provisions of the American Recovery and Reinvestment Act of 2009) (collectively, HIPAA) continues to have a direct impact on the health care industry by requiring national provider identifiers and standardized transactions/code sets, operating rules and necessary security and privacy measures in order to ensure the appropriate level of privacy of protected health information. These regulatory factors affect the purchasing practices and operation of health care organizations.

Many health care providers are consolidating to create integrated health care delivery systems with greater market power. These providers may try to use their market power to negotiate price reductions for our solutions, health care devices and services. As the health care industry consolidates, our client base could be eroded, competition for clients could become more intense and the importance of landing new client relationships becomes greater.

The Patient Protection and Affordable Care Act, which was amended by the Health Care and Education Reconciliation Act of 2010, became law in 2010. This comprehensive health care reform legislation included provisions to control health care costs, improve health care quality, and expand access to affordable health insurance. Together with ongoing statutory and budgetary policy developments at a federal level, this health care reform legislation could include changes in Medicare and Medicaid payment policies and other health care delivery administrative reforms that could potentially negatively impact our business and the business of our clients. Because not all the administrative rules implementing health care reform under the legislation have been finalized, and because

of ongoing federal fiscal budgetary pressures yet to be resolved for federal health programs, the full impact of the health care reform legislation and of further statutory actions to reform healthcare payment on our business is unknown, but there can be no assurances that health care reform legislation will not adversely impact either our operational results or the manner in which we operate our business. Health care industry participants may respond by reducing their investments or postponing investment decisions, including investments in our devices, solutions and services.

The health care industry is highly regulated, and thus, we are subject to a number of laws, regulations and industry initiatives, non-compliance with certain of which could materially adversely affect our operations or otherwise adversely affect our business, results of operations and financial condition. As a participant in the health care industry, our operations and relationships, and those of our clients, are regulated by a number of U.S. federal, state, local and foreign governmental entities. The impact of these regulations on us is direct, to the extent that we are ourselves subject to these

15

Table of Contents

laws and regulations, and is also indirect, both in terms of the level of government reimbursement available to our clients and because, in a number of situations, even though we may not be directly regulated by specific health care laws and regulations, our solutions, devices and services must be capable of being used by our clients in a way that complies with those laws and regulations. There is a significant and wide-ranging number of regulations both within the U.S. and abroad, such as regulations in the areas of health care fraud, e-prescribing, claims processing and transmission, health care devices, the security and privacy of patient data and interoperability standards, that may be directly or indirectly applicable to our operations and relationships or the business practices of our clients. Specific risks include, but are not limited to, the following:

Health Care Fraud. U.S. federal and state governments continue to enhance regulation of and increase their scrutiny over practices involving health care fraud, waste and abuse perpetuated by health care providers and professionals whose services are reimbursed by Medicare, Medicaid and other government health care programs. Our health care provider clients, as well as our provision of products and services to government entities, subject our business to laws and regulations on fraud and abuse which, among other things, prohibit the direct or indirect payment or receipt of any remuneration for patient referrals, or arranging for or recommending referrals or other business paid for in whole or in part by these federal or state health care programs. U.S. federal enforcement personnel have substantial funding, powers and remedies to pursue suspected or perceived fraud and abuse. The effect of this government regulation on our clients is difficult to predict. Many of the regulations applicable to our clients and that may be applicable to us, including those relating to marketing incentives offered in connection with health care device sales, are vague or indefinite and have not been interpreted by the courts. They may be interpreted or applied by a prosecutorial, regulatory or judicial authority in a manner that could broaden their applicability to us or require our clients to make changes in their operations or the way in which they deal with us. If such laws and regulations are determined to be applicable to us and if we fail to comply with any applicable laws and regulations, we could be subject to civil and criminal penalties, sanctions or other liability, including exclusion from government health programs, which could have a material adverse effect on our business, results of operations and financial condition. Even an unsuccessful challenge by a regulatory or prosecutorial authority of our activities could result in adverse publicity, could require a costly response from us and could adversely affect our business, results of operations and financial condition.

Preparation, Transmission and Submission of Medical Claims for Reimbursement. Our solutions are capable of electronically transmitting claims for services and items rendered by a physician to many patients' payers for approval and reimbursement. We also provide revenue cycle management services to our clients that include the coding, preparation and submission of claims for medical service to payers for reimbursement. Such claims are governed by U.S. federal and state laws. U.S. federal law provides civil liability to any persons that knowingly submit, or cause to be submitted, a claim to a payer, including Medicare, Medicaid and private health plans, seeking payment for any services or items that overbills or bills for services or items that have not been provided to the patient. U.S. federal law may also impose criminal penalties for intentionally submitting such false claims. We have policies and procedures in place that we believe result in the accurate and complete preparation, transmission, submission and collection of claims, provided that the information given to us by our clients is also accurate and complete. The HIPAA security, privacy and transaction standards, as discussed below, also have a potentially significant effect on our claims preparation, transmission and submission services, since those services must be structured and provided in a way that supports our clients' HIPAA compliance obligations. In connection with these laws, we may be subjected to U.S. federal or state government investigations and possible penalties may be imposed upon us; false claims actions may have to be defended; private payers may file claims against us; and we may be excluded from Medicare, Medicaid or other government-funded health care programs. Any investigation or proceeding related to these laws, even if unwarranted or without merit, may have a material adverse effect on our business, results of operations and financial condition.

Implementation of ICD-10 Coding for Medical Coding. The Centers for Medicare & Medicaid Services (CMS) mandated that all providers, payers, clearinghouses and billing services implement the use of new patient codes for

medical coding, referred to as ICD-10 codes on and after October 1, 2015. This mandate substantially increased the number of medical billing codes by which providers will seek reimbursement, increasing the complexity of submitting claims for reimbursement. Claims submitted for services performed after October 1, 2015 must use ICD-10 codes or they may not be paid. Our efforts to provide services and solutions that enable our clients to comply with the ICD-10 mandate could be time consuming and expensive. In addition, due to the effort and expense of complying with the ICD-10 mandate, our clients may postpone or cancel decisions to purchase our solutions and services. Either of the foregoing could have a material adverse effect on our business, results of operations and financial condition.

Regulation of Health Care Devices. The U.S. Food and Drug Administration (FDA) has determined that certain of our solutions are medical devices that are actively regulated under the Federal Food, Drug and Cosmetic Act (Act) and amendments to the Act. Other countries have similar regulations in place related to medical devices, that now or may in the future apply to certain of our solutions. If other of our solutions are deemed to be actively regulated medical devices by the FDA or similar regulatory agencies in countries where we do business, we could be subject to extensive requirements governing pre- and

Table of Contents

post-marketing activities including pre-market notification clearance. Complying with these medical device regulations on a global perspective is time consuming and expensive and could be subject to unanticipated and significant delays. Further, it is possible that these regulatory agencies may become more active in regulating software and devices that are used in health care. If we are unable to obtain the required regulatory approvals for any such solutions or health care devices, our short and long term business plans for these solutions or health care devices could be delayed or canceled.

There have been eight FDA inspections at various Cerner sites since 2003. Inspections conducted at our World Headquarters and Innovations Campus in 2010 resulted in the issuance of an FDA Form 483 observation to which we responded promptly. The FDA has taken no further action with respect to the Form 483 observation that was issued in 2010. The remaining FDA inspections, including inspections at our world headquarters in 2006, 2007 and 2014, resulted in no issuance of a Form 483. We remain subject to periodic FDA inspections and we could be required to undertake additional actions to comply with the Act and any other applicable regulatory requirements. Our failure to comply with the Act and any other applicable regulatory requirements could have a material adverse effect on our ability to continue to manufacture, distribute and deliver our solutions, services and devices. The FDA has many enforcement tools including recalls, product corrections, seizures, injunctions, refusal to grant pre-market clearance of products, civil fines and criminal prosecutions. Any of the foregoing could have a material adverse effect on our business, results of operations and financial condition.

Security and Privacy of Patient Information. U.S. federal, state and local and foreign laws regulate the confidentiality of personal information, how that information may be used, and the circumstances under which such information may be released. These regulations govern both the disclosure and use of confidential personal and patient medical record information and require the users of such information to implement specified security and privacy measures. U.S. regulations currently in place governing electronic health data transmissions continue to evolve and are often unclear and difficult to apply. Laws in non-U.S. jurisdictions may have similar or even stricter requirements related to the treatment of personal or patient information.

In the U.S., HIPAA regulations require national standards for some types of electronic health information transactions and the data elements used in those transactions to ensure the integrity, security and confidentiality of health information and standards to protect the privacy of individually identifiable health information. Covered entities under HIPAA, which include health care organizations such as our clients, our employer clinic business model and our claims processing, transmission and submission services, are required to comply with the privacy standards, the transaction regulations and the security regulations. Moreover, the HITECH provisions of ARRA, and associated regulatory requirements, extend many of the HIPAA obligations, formerly imposed only upon covered entities, to business associates as well. As a business associate of our clients who are covered entities, we were in most instances already contractually required to ensure compliance with the HIPAA regulations as they pertain to handling of covered client data. However, the extension of these HIPAA obligations to business associates by law has created additional liability risks related to the privacy and security of individually identifiable health information.

Evolving HIPAA and HITECH-related laws or regulations in the U.S. and data privacy and security laws or regulations in non-U.S. jurisdictions could restrict the ability of our clients to obtain, use or disseminate patient information. This could adversely affect demand for our solutions if they are not re-designed in a timely manner in order to meet the requirements of any new interpretations or regulations that seek to protect the privacy and security of patient data or enable our clients to execute new or modified health care transactions. We may need to expend additional capital, software development and other resources to modify our solutions and devices to address these evolving data security and privacy issues. Furthermore, our failure to maintain confidentiality of sensitive personal information in accordance with the applicable regulatory requirements could damage our reputation and expose us to claims, fines and penalties.

In Europe, we are subject to European Union (“EU”) data protection legislation, including the 1995 EU Directive on Data Protection, which requires member states to impose minimum restrictions on the collection and use of personal data that, in some respects, are more stringent, and impose more significant burdens on subject businesses, than current privacy standards in the U.S. The EU directives establish several obligations that organizations must follow with respect to use of personal data, including a prohibition on the transfer of personal information from the EU to other countries whose laws do not protect personal data to an adequate level of privacy or security. In addition to this EU-wide legislation, certain member states have adopted more stringent data protection standards. Cerner had addressed these requirements by certification to the U.S. - EU and U.S. - Switzerland Safe Harbor Frameworks prior to such Frameworks being invalidated in October 2015 by the European Court of Justice. Although negotiations between the U.S. and the EU to establish a successor to the Safe Harbor Framework are underway, the outcome of those negotiations are uncertain. In the interim, we are pursuing alternative methods of compliance, but those methods may be subject to scrutiny by data protection authorities in European member states. On December 15, 2015, the European Parliament and the Council of the European Union (Council) reached a political

Table of Contents

agreement on the future EU data protection legal framework. Subject to formal adoption by the European Parliament in 2016, the General Data Protection Regulation (GDPR) will replace the 1995 Data Protection Directive. Although the final text of the GDPR has not yet been released, and minor modifications remain possible, it is expected that the regulation will have significant impacts on how businesses can collect and process the personal data of EU individuals. The GDPR is expected to become effective sometime in 2018, two years after its final adoption in 2016. The costs of compliance with, and other burdens imposed by, such laws, regulations and policies, or modifications thereto, that are applicable to us may limit the use and adoption of our solutions and could have a material adverse impact on our business, results of operations and financial condition.

Applicable statutes and regulations have granted broad enforcement powers to regulatory agencies to investigate and enforce our compliance with these privacy and security laws and regulations. Governmental enforcement personnel, particularly in the EU, have substantial funding, powers and remedies to pursue suspected or perceived violations. If we fail to comply with any applicable laws or regulations, we could be subject to civil penalties, sanctions or other liability. Enforcement investigations, even if meritless, could have a negative impact on our reputation, cause us to lose existing clients or limit our ability to attract new clients.

Interoperability Standards. Our clients are concerned with and often require that our software solutions and health care devices be interoperable with other third party HCIT suppliers. Market forces or governmental/regulatory authorities could create software interoperability standards that would apply to our solutions, health care devices or solutions, and if our software solutions, health care devices or services are not consistent with those standards, we could be forced to incur substantial additional development costs to conform. The Office of the National Coordinator for Health Information Technology (ONC) has developed a comprehensive set of criteria for the functionality, interoperability and security of various software modules in the HCIT industry. ONC, however, continues to modify and refine those standards. Achieving certification is becoming a competitive requirement, resulting in increased software development and administrative expense to conform to these requirements.

ARRA Meaningful Use Program. Various U.S. federal and state and non-U.S. government agencies are also developing standards for the use of information technology that could become mandatory in connection with health care services that are paid for by these agencies. For example, ARRA requires “meaningful use of certified electronic health record technology” by health care providers in order to receive stimulus funds from the U.S. federal government. Regulations have been issued that identify standards and implementation specifications and establish the certification standards for qualifying electronic health record technology. Nevertheless, these standards and specifications are subject to interpretation by the entities designated to certify such technology. While a combination of our solutions have been certified as meeting the Stage 1 and Stage 2 standards for certified health record technology, the regulatory standards to achieve certification continue to evolve, and we will face requirements in late 2016 and early 2017 to certify to the criteria edition applicable to Stage 3. We may incur increased development costs and delays in delivering solutions as we need to update our software, devices or health care devices to be in compliance with these varying and evolving standards. In addition, delays in interpreting these standards may result in postponement or cancellation of our clients’ decisions to purchase our solutions or health care devices. If our software solutions, devices or health care devices are not compliant with these evolving standards, our market position and sales could be impaired and we may have to invest significantly in changes to our software solutions, devices or health care devices. Further, we bear potential financial risks where we have entered into agreements with clients to warrant their ability to meet future stage meaningful use certification requirements. While a client’s ability to meet future stage meaningful use attestation requirements may be dependent on such client’s ability to adopt, rollout and attain sufficient use of our certified solutions on a timely basis, we may face risks that come from issues in full adoption of our certified solutions, which in turn could lead to a client missing its attestation targets. These risks are enhanced when we are under agreements to provide application management services to our clients that place responsibilities on us for application configuration and implementation as a prerequisite to or impactful to meaningful use attainment ordinarily borne by the client in other circumstances.

We operate in intensely competitive and dynamic industries, and our ability to successfully compete and continue to grow our business depends on our ability to respond quickly to market changes and changing technologies and to bring competitive new solutions, devices, features and services to market in a timely fashion. The market for health care information systems, health care solutions and services to the health care industry is intensely competitive, dynamically evolving and subject to rapid technological and innovative changes. Development of new proprietary technology or services is complex, entails significant time and expense and may not be successful. We cannot guarantee that we will be able to introduce new solutions, devices or services on schedule, or at all, nor can we guarantee that such solutions, devices or services will achieve market acceptance. Moreover, we cannot guarantee that errors will not be found in our new solution releases, devices or services before or after commercial release, which could result in solution, device or service delivery

Table of Contents

redevelopment costs, harm to our reputation, lost sales, license terminations or renegotiations, product liability claims, diversion of resources to remedy errors and loss of, or delay in, market acceptance.

Certain of our competitors have greater financial, technical, product development, marketing or other resources than us and some of our competitors offer software solutions, devices or services that we do not offer. Our principal existing competitors are set forth above under Part I, Item 1 "Competition".

In addition, we expect that major software information systems companies, large information technology consulting service providers and system integrators, start-up companies and others specializing in the health care industry may offer competitive software solutions, devices or services. As we continue to develop new health care devices and services to address areas such as analytics, transaction services, HCIT and device integration, revenue cycle and population health management, we expect to face new competitors, and these competitors may have more experience in these markets and/or more established relationships with prospective clients. We face strong competition and often face downward price pressure, which could adversely affect our results of operations or liquidity. Additionally, the pace of change in the health care information systems market is rapid and there are frequent new software solution introductions, software solution enhancements, device introductions, device enhancements and evolving industry standards and requirements. There are a limited number of hospitals and other health care providers in the U.S. market and in recent years, the health care industry has been subject to increasing consolidation. If we are unable to recognize the impact of industry consolidation, falling costs and technological advancements in a timely manner, or we are too inflexible to rapidly adjust our business models, our prospects and financial results could be negatively affected materially.

Risks Related to Our Common Stock

Our quarterly operating results may vary, which could adversely affect our stock price. Our quarterly operating results have varied in the past and may continue to vary in future periods, including variations from guidance, expectations or historical results or trends. Quarterly operating results may vary for a number of reasons including demand for our solutions, devices and services, the financial condition of our current and potential clients, our long sales cycle, potentially long installation and implementation cycles for larger, more complex systems, accounting policy changes and other factors described in this section and elsewhere in this report. As a result of health care industry trends and the market for our solutions, a large percentage of our revenues are generated by the sale and installation of larger, more complex and higher-priced systems. The sales process for these systems is lengthy and involves a significant technical evaluation and commitment of capital and other resources by the client. Sales may be subject to delays due to changes in clients' internal budgets, procedures for approving large capital expenditures, competing needs for other capital expenditures, additions or amendments to U.S. federal, state or local regulations, availability of personnel resources or by actions taken by competitors. Delays in the expected sale, installation or implementation of these large systems may have a significant negative impact on our anticipated quarterly revenues and consequently our earnings, since a significant percentage of our expenses are relatively fixed.

Revenue recognized in any quarter may depend upon our or our clients' abilities to meet project milestones. Delays in meeting these milestone conditions or modification of the project plan could result in a shift of revenue recognition from one quarter to another and could have a material adverse effect on results of operations for a particular quarter.

Our revenues from system sales historically have been lower in the first quarter of the year and greater in the fourth quarter of the year, primarily as a result of clients' year-end efforts to make final capital expenditures for the then-current year.

Our sales forecasts may vary from actual sales in a particular quarter. We use a "pipeline" system, a common industry practice, to forecast sales and trends in our business. Our sales associates monitor the status of all sales opportunities,

such as the date when they estimate that a client will make a purchase decision and the potential dollar amount of the sale. These estimates are aggregated periodically to generate a sales pipeline. We compare this pipeline at various points in time to evaluate trends in our business. This analysis provides guidance in business planning and forecasting, but these pipeline estimates are by their nature speculative. Our pipeline estimates are not necessarily reliable predictors of revenues in a particular quarter or over a longer period of time, partially because of changes in the pipeline and in conversion rates of the pipeline into contracts that can be very difficult to estimate. A negative variation in the expected conversion rate or timing of the pipeline into contracts, or in the pipeline itself, could cause our plan or forecast to be inaccurate and thereby adversely affect business results. For example, a slowdown in information technology spending, adverse economic conditions, new U.S. federal, state or local regulations related to our industry or a variety of other factors can cause purchasing decisions to be delayed, reduced in amount or cancelled, which would reduce the overall pipeline conversion rate in a particular period of time. Because a substantial portion of our contracts are completed in the latter part of a quarter, we may not be able to

Table of Contents

adjust our cost structure quickly enough in response to a revenue shortfall resulting from a decrease in our pipeline conversion rate in any given fiscal quarter.

The trading price of our common stock may be volatile. The market for our common stock may experience significant price and volume fluctuations in response to a number of factors including actual or anticipated variations in operating results, articles or rumors about our performance or solutions, devices or services, announcements of technological innovations or new services or products by our competitors or us, changes in expectations of future financial performance or estimates of securities analysts, governmental regulatory action, health care reform measures, client relationship developments, economic conditions and changes occurring in the securities markets in general and other factors, many of which are beyond our control. For instance, our quarterly operating results have varied in the past and may continue to vary in future periods, due to a number of reasons including, but not limited to, demand for our solutions, devices and services, the financial condition of our current and potential clients, our long sales cycle, potentially long installation and implementation cycles for larger, more complex and higher-priced systems, key management changes, accounting policy changes and other factors described herein. As a matter of policy, we do not generally comment on our stock price or rumors.

Furthermore, the stock market in general, and the markets for software, health care devices, other health care solutions and services and information technology companies in particular, have experienced extreme volatility that often has been unrelated to the operating performance of particular companies. These broad market and industry fluctuations may adversely affect the trading price of our common stock, regardless of actual operating performance.

Our Directors have authority to issue preferred stock and our corporate governance documents contain anti-takeover provisions. Our Board of Directors has the authority to issue up to 1,000,000 shares of preferred stock and to determine the preferences, rights and privileges of those shares without any further vote or action by the shareholders. The rights of the holders of common stock may be harmed by rights granted to the holders of any preferred stock that may be issued in the future and issuances of preferred stock could be used to delay or hinder a change of control of the Company.

In addition, some provisions of our Certificate of Incorporation and Bylaws could make it more difficult for a potential acquirer to acquire a majority of our outstanding voting stock or otherwise effect a change of control of the Company. These include provisions that provide for a classified board of directors, require advance notice of stockholder proposals at stockholder meetings, prohibit shareholders from taking action by written consent and restrict the ability of shareholders to call special meetings. We are also subject to provisions of Delaware law that prohibit us from engaging in any business combination with any interested shareholder for a period of three years from the date the person became an interested shareholder, unless certain conditions are met, which could have the effect of delaying or preventing a change of control.

Cautions about Forward-looking Statements

Statements made in this report, the Annual Report to Shareholders of which this report is made a part, other reports and proxy statements filed with the Securities and Exchange Commission (SEC), communications to shareholders, press releases and oral statements made by representatives of the Company that are not historical in nature, or that state the Company's or management's intentions, hopes, beliefs, expectations, plans, goals or predictions of future events or performance, may constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act). Forward-looking statements can often be identified by the use of forward-looking terminology, such as "could," "should," "will," "intended," "continue," "believe," "may," "expect," "hope," "anticipate," "goal," "forecast," "plan," "guidance," "opportunity," "prospects" or "estimate" or the negative of these words, variations thereof or similar expressions. Forward-looking statements are not guarantees of future performance or results. They

involve risks, uncertainties and assumptions. It is important to note that any such performance and actual results, financial condition or business, could differ materially from those expressed in such forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those discussed in this Item 1A. Risk Factors and elsewhere herein or in other reports filed with the SEC. Other unforeseen factors not identified herein could also have such an effect. Any forward-looking statements made in this report speak only as of the date of this report. Except as required by law, we undertake no obligation to update or revise forward-looking statements to reflect changed assumptions, the occurrence of unanticipated events or changes in future operating results, financial condition or business over time.

Item 2. Properties

Our properties consist mainly of owned and leased office and data center facilities.

Our corporate world headquarters is located in a Company-owned office park (the Headquarters Campus) in North Kansas City, Missouri. The Headquarters Campus and two other nearby locations, collectively contain approximately 2.22 million gross square feet of useable space situated on 278 acres of land. The Headquarters Campus and the nearby properties primarily house office space, but also include space for other business needs, such as our Health Clinic and our Headquarters Campus data centers.

Company-owned office space, known as the Innovation Campus, houses associates from our intellectual property organization and consists of 830,000 gross square feet of useable space located in Kansas City, Missouri.

Owned office space known as the Continuous Campus, houses associates who manage and support our clients' IT systems and consists of 650,000 gross square feet of useable space located in Kansas City, Kansas.

In connection with our acquisition of Siemens Health Services on February 2, 2015, we acquired approximately 110 acres of property in Malvern, Pennsylvania. This property includes approximately 675,000 gross square feet of office space, and a 100,000 square foot data center.

Our Cerner-operated data center facilities, which are used to provide remote hosting, disaster recovery and other services to our clients, are located at the Headquarters Campus and newly purchased office space in Lee's Summit, Missouri, known as the Lee's Summit Tech Center. The Lee's Summit Tech Center consists of 550,000 gross square feet and houses data center space and certain third-party tenants in a multi-tenant office building.

We have purchased approximately 286 acres of land located in Kansas City, Missouri. This property, known as the Trails Campus, was acquired as a site for future office space development to further accommodate our anticipated growth. Construction on the Trails Campus began in November 2014. The first two phases of the project are expected to include approximately 985,000 gross square feet of office and warehouse space, and are expected to be complete in the second quarter of 2017.

As of the end of 2015, we leased additional domestic office space in the following locations:

Brooklyn, New York	Durham, North Carolina	New York, New York
Burlington, Vermont	Franklin, Tennessee	North Kansas City, Missouri
Carlsbad, California	Garden Grove, California	Rochester, Minnesota
Columbia, Missouri	Kansas City, Missouri	Salt Lake City, Utah
Costa Mesa, California	Mason, Ohio	Tempe, Arizona
Culver City, California	Minneapolis, Minnesota	Waltham, Massachusetts
Denver, Colorado	Nevada, Missouri	Yardley, Pennsylvania
Downington, Pennsylvania	New Concord, Ohio	

Table of Contents

Globally, we also leased office space in the following locations:

Abu Dhabi, United Arab Emirates	Gmund, Austria	Oviedo, Spain
Augsburg, Germany	Gothenburg, Sweden	Paris, France
Bangalore, India	Hamburg, Germany	Perth, Australia
Berlin, Germany	Idstein, Germany	Peterborough, Ontario, Canada
Brasov, Romania	Kolkata, India	Riyadh, Saudi Arabia
Brisbane, Australia	Kosice, Slovakia	Sao Paulo, Brazil
Cairo, Egypt	Kuala Lumpur, Malaysia	Singapore
Doha, Qatar	Lisbon, Portugal	St. Wolfgang, Germany
Dubai, United Arab Emirates	London, England	Sydney, Australia
Dublin, Ireland	Madrid, Spain	The Hague, Netherlands
Erlangen, Germany	Malmö, Sweden	Toronto, Ontario, Canada
Essen, Germany	Melbourne, Australia	Upplands Vasby, Sweden
Frankfurt, Germany	Murcia, Spain	Vienna, Austria
Getafe, Spain	Oslo, Norway	

Item 3. Legal Proceedings

We are not a party to and none of our property is subject to any material pending legal proceedings, other than ordinary routine litigation incidental to our business.

Item 4. Mine Safety Disclosures

Not applicable

Table of Contents

Part II

Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our common stock trades on the NASDAQ Global Select MarketSM under the symbol CERN. The following table sets forth the high, low and last sales prices for the fiscal quarters of 2015 and 2014 as reported by the NASDAQ Global Select Market.

	2015			2014		
	High	Low	Last	High	Low	Last
First Quarter	\$74.83	\$63.19	\$72.77	\$63.07	\$51.65	\$56.15
Second Quarter	75.72	65.67	68.48	56.94	48.39	51.27
Third Quarter	75.00	57.42	61.34	60.07	50.30	58.66
Fourth Quarter	68.31	55.82	60.17	66.45	55.75	65.03

At February 12, 2016, there were approximately 960 owners of record. To date, we have paid no cash dividends and we do not intend to pay cash dividends in the foreseeable future. We believe it is in the shareholders' best interest for us to reinvest funds in the operation of the business.

The following table provides information with respect to Common Stock purchases by the Company during the fourth fiscal quarter of 2015:

Period	Total Number of Shares Purchased (a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Announced Plans or Programs (b)	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Plans or Programs (b)
October 4, 2015 - October 31, 2015	—	—	—	\$ 145,000,000
November 1, 2015 - November 28, 2015	2,481,853	\$58.40	2,481,853	—
November 29, 2015 - January 2, 2016	8,868	59.94	—	—
Total	2,490,721	\$58.41	2,481,853	

(a) Of the 2,490,721 shares of common stock, par value \$0.01 per share, presented on the table above, 8,868 were originally granted to employees as restricted stock pursuant to our 2011 Omnibus Equity Incentive Plan (the Omnibus Plan). The Omnibus Plan allows for the withholding of shares to satisfy minimum tax obligations due upon the vesting of restricted stock. Pursuant to the Omnibus Plan, the shares reflected above were relinquished by employees in exchange for our agreement to pay U.S. federal and state withholding obligations resulting from the vesting of the Company's restricted stock.

(b) As announced on September 8, 2015, our Board of Directors authorized a new share repurchase program for an aggregate purchase of up to \$245 million of our common stock, excluding transaction costs. During 2015, the Company repurchased 4.1 million shares for total consideration of \$245 million pursuant to a Rule 10b5-1 plan. As of January 2, 2016, the program was complete.

See Part III, Item 12 for information relating to securities authorized for issuance under our equity compensation plans.

Earnings per share:					
Basic	1.57	1.54	1.16	1.16	0.91
Diluted	1.54	1.50	1.13	1.13	0.88
Weighted average shares outstanding:					
Basic	343,178	342,150	343,636	341,861	337,267
Diluted	350,908	350,386	352,281	351,394	347,734
Balance Sheet Data:					
Working capital	\$1,049,967	\$1,714,471	\$1,121,276	\$1,210,394	\$1,063,593
Total assets	5,561,984	4,530,565	4,098,364	3,704,468	3,000,358
Long-term debt and capital lease obligations, excl. current installments	563,353	62,868	111,717	136,557	86,821
Shareholders' equity	3,870,384	3,565,968	3,167,664	2,833,650	2,310,681

(1) Includes share-based compensation expense. The impact of this expense is as follows:

(In thousands, except share data)	2015	2014	2013	2012	2011
Total share-based compensation expense	\$74,926	\$62,965	\$48,954	\$38,112	\$29,479
Amount of related income tax benefit	(23,435)	(22,101)	(18,607)	(14,578)	(11,256)
Net impact on earnings	\$51,491	\$40,864	\$30,347	\$23,534	\$18,223
Decrease to diluted earnings per share	\$0.15	\$0.12	\$0.09	\$0.07	\$0.05

Includes pre-tax charges for amortization of acquisition-related intangibles of \$79 million and acquisition costs and (2) related adjustments of \$46 million, both associated with our acquisition and integration of the Cerner Health Services business, as well as costs related to our voluntary separation plan of \$46 million.

(3) Includes \$16 million of pre-tax acquisition costs and related adjustments associated with our acquisition of the Cerner Health Services business.

(4) Includes a pre-tax settlement charge of \$106 million, as further described in Note 10 of the notes to consolidated financial statements.

Table of Contents

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following Management Discussion and Analysis (MD&A) is intended to help the reader understand our results of operations and financial condition. This MD&A is provided as a supplement to, and should be read in conjunction with, our financial statements and the accompanying notes to the financial statements (Notes).

Our fiscal year ends on the Saturday closest to December 31. Fiscal years 2015 and 2013 each consisted of 52 weeks and ended on January 2, 2016 and December 28, 2013, respectively. Fiscal year 2014 consisted of 53 weeks and ended on January 3, 2015. The additional week in fiscal 2014 impacts the results of operations discussion below. All references to years in this MD&A represent fiscal years unless otherwise noted.

Management Overview

Our revenues are primarily derived by selling, implementing and supporting software solutions, clinical content, hardware, devices and services that give health care providers secure access to clinical, administrative and financial data in real or near-real time, helping them to improve quality, safety and efficiency in the delivery of health care.

Our fundamental strategic focus is the creation of organic growth by investing in research and development (R&D) to create solutions and services for the health care industry. This strategy has driven strong growth over the long-term, as reflected in five- and ten-year compound annual revenue growth rates of 14% or more. This growth has also created an important strategic footprint in health care, with Cerner® solutions in more than 20,000 facilities worldwide, including hospitals, physician practices, laboratories, ambulatory centers, behavioral health centers, cardiac facilities, radiology clinics, surgery centers, extended care facilities, retail pharmacies, and employer sites. Selling additional solutions back into this client base is an important element of our future revenue growth. We are also focused on driving growth through market share expansion by strategically aligning with health care providers that have not yet selected a supplier and by displacing competitors in health care settings that are looking to replace their current supplier. We may also supplement organic growth with acquisitions.

We expect to drive growth through solutions and services that reflect our ongoing ability to innovate and expand our reach into health care. Examples of these include our CareAware® health care device architecture and devices, Cerner ITWorks services, revenue cycle solutions and services, and population health solutions and services. Finally, we believe there is significant opportunity for growth outside of the United States, with many non-U.S. markets focused on health care information technology as part of their strategy to improve the quality and lower the cost of health care.

Beyond our strategy for driving revenue growth, we are also focused on earnings growth. Similar to our history of growing revenue, our net earnings have increased at compound annual rates of 17% or more over the most recent five- and ten-year periods. We expect to drive continued earnings growth through ongoing revenue growth coupled with margin expansion, which we expect to achieve through efficiencies in our implementation and operational processes and by leveraging R&D investments and controlling general and administrative expenses.

We are also focused on continuing to deliver strong levels of cash flow, which we expect to do by continuing to grow earnings and prudently managing capital expenditures.

Siemens Health Services

On February 2, 2015, we acquired substantially all of the assets, and assumed certain liabilities of Siemens AG's health information technology business unit, Siemens Health Services, as further described in Note (2) of the notes to consolidated financial statements. The acquired business (now referred to as "Cerner Health Services") offers a portfolio of enterprise-level clinical and financial health care information technology solutions, as well as

departmental, connectivity, population health, and care coordination solutions globally. Solutions are offered on the Soarian, Invision, and i.s.h.med platforms, among others. Cerner Health Services also offers a range of complementary services including support, hosting, managed services, implementation services, and strategic consulting.

We believe the acquisition enhances our organic growth opportunities as it provides us a larger base into which we can sell our combined portfolio of solutions and services. The acquisition also augments our non-U.S. footprint and growth opportunities, increases our scale for R&D investment, and adds over 5,000 highly-skilled associates that will enhance our capabilities.

Table of Contents

The addition of this business has a significant impact on the comparability of our 2015 consolidated financial statements in relation to the comparative periods presented herein.

Results Overview

The Company delivered strong levels of bookings, revenues, earnings and operating cash flows in 2015.

New business bookings revenue in 2015, which reflects the value of executed contracts for software, hardware, professional services and managed services, was \$5.4 billion, which is an increase of 28% compared to \$4.3 billion in 2014.

Revenues for 2015 increased 30% to \$4.4 billion compared to \$3.4 billion in 2014. Our fiscal year 2015 revenues include approximately \$930 million attributable to the acquired Cerner Health Services business. The remaining year-over-year increase in revenue reflects ongoing demand for Cerner's core solutions and services driven by our clients' needs to keep up with regulatory requirements; contributions from Cerner ITWorks and revenue cycle solutions and services; and attaining new clients.

Our 2015 net earnings were \$539 million compared to \$525 million in 2014. Diluted earnings per share were \$1.54 in 2015 compared to \$1.50 in 2014. Disclosure of the earnings contribution from the Cerner Health Services business is not practicable, as we have already integrated operations in many areas. The overall increase in net earnings and diluted earnings per share was primarily a result of increased revenues, partially offset by elevated operating expenses, which included costs associated with the acquisition and integration of the Cerner Health Services business, and our voluntary separation plan, as discussed further below.

The 2015 and 2014 net earnings and diluted earnings per share reflect the impact of stock-based compensation expense. The effect of these expenses reduced the 2015 net earnings and diluted earnings per share by \$51 million and \$0.15, respectively, and the 2014 net earnings and diluted earnings per share by \$41 million and \$0.12, respectively.

The 2015 net earnings and diluted earnings per share also reflect the impact of amortization of acquisition-related intangibles and acquisition costs and related adjustments, both associated with our acquisition and integration of the Cerner Health Services business, as well as costs related to the voluntary separation plan, as further described in Note (1) of the notes to consolidated financial statements. Amortization of acquisition-related intangibles related to the Cerner Health Services business reduced 2015 net earnings and diluted earnings per share by \$54 million and \$0.15, respectively. Acquisition costs and related adjustments related to the Cerner Health Services business reduced 2015 net earnings and diluted earnings per share by \$31 million and \$0.09, respectively. Costs related to the voluntary separation plan reduced net earnings and diluted earnings per share by \$31 million and \$0.09, respectively.

The 2014 net earnings and diluted earnings per share also reflect the impact of acquisition costs and related adjustments associated with our acquisition of the Cerner Health Services business, which reduced net earnings and diluted earnings per share by \$10 million and \$0.03, respectively.

We had cash collections of receivables of \$4.4 billion in 2015 compared to \$3.5 billion in 2014. Days sales outstanding was 80 days for the 2015 fourth quarter compared to 85 days for the 2015 third quarter and 66 days for the 2014 fourth quarter. Operating cash flows for 2015 were strong at \$948 million compared to \$847 million in 2014.

Health Care Information Technology Market Outlook

We have provided an assessment of the health care information technology market under "Health Care and Health Care IT Industry" in Part I, Item 1 "Business," which is incorporated herein by reference.

Revenues & Backlog

Revenues increased 30% to \$4.4 billion in 2015, as compared to \$3.4 billion in 2014.

System sales, which include revenues from the sale of licensed software (including perpetual license sales and software as a service), technology resale (hardware, devices, and sublicensed software), deployment period licensed software upgrade rights, installation fees, transaction processing and subscriptions, increased 36% to \$1.3 billion in 2015 from \$946 million in 2014. The increase in system sales was primarily driven by contributions from the Cerner Health Services business.

Support and maintenance revenues increased 35% to \$976 million in 2015 compared to \$725 million in 2014. This increase was primarily attributable to contributions from the Cerner Health Services business.

Services revenue, which includes professional services, excluding installation, and managed services, increased 28% to \$2.1 billion in 2015 from \$1.6 billion in 2014. This increase was driven by contributions from the Cerner Health Services business.

Revenue backlog, which reflects contracted revenue that has not yet been recognized as revenue, increased 34% to \$14.2 billion in 2015 compared to \$10.6 billion in 2014. This increase was driven by growth in new business bookings during the past four quarters, including continued strong levels of managed services, Cerner ITWorks and Cerner

revenue cycle services bookings that typically have longer contract terms, coupled with contributions from the Cerner Health Services business.

27

Table of Contents

Costs of Revenue

Cost of revenues as a percentage of total revenues was 17% in 2015 compared to 18% in 2014. The lower cost of revenues as a percent of revenue was primarily driven by a lower mix of technology resale, which carries a higher cost of revenue.

Cost of revenues includes the cost of reimbursed travel expense, sales commissions, third party consulting services and subscription content and computer hardware, devices and sublicensed software purchased from manufacturers for delivery to clients. It also includes the cost of hardware maintenance and sublicensed software support subcontracted to the manufacturers. Such costs, as a percent of revenues, typically have varied as the mix of revenue (software, hardware, devices, maintenance, support, services and reimbursed travel) carrying different margin rates changes from period to period. Cost of revenues does not include the costs of our client service personnel who are responsible for delivering our service offerings. Such costs are included in sales and client service expense.

Operating Expenses

Total operating expenses increased 42% to \$2.9 billion in 2015, compared with \$2.0 billion in 2014.

Sales and client service expenses as a percent of total revenues were 42% in 2015, compared to 41% in 2014. These expenses increased 32% to \$1.8 billion in 2015, from \$1.4 billion in 2014. Sales and client service expenses include salaries and benefits of sales, marketing, support, and services personnel, depreciation and other expenses associated with our managed service business, communications expenses, unreimbursed travel expenses, expense for share-based payments, and trade show and advertising costs. The increase was primarily driven by the addition of the Cerner Health Services business.

Software development expenses as a percent of revenue were 12% in 2015 and 2014. Expenditures for software development reflect ongoing development and enhancement of the Cerner Millennium and HealthIntent platforms, with a focus on supporting key initiatives to enhance physician experience, revenue cycle and population health solutions. Software development expenses in 2015 also include expenditures related to Cerner Health Services solutions. A summary of our total software development expense in 2015 and 2014 is as follows:

(In thousands)	For the Years Ended	
	2015	2014
Software development costs	\$685,260	\$467,158
Capitalized software costs	(262,177)	(175,262)
Capitalized costs related to share-based payments	(2,479)	(2,538)
Amortization of capitalized software costs	119,195	103,447
Total software development expense	\$539,799	\$392,805

General and administrative expenses as a percent of total revenues were 10% in 2015, compared to 7% in 2014. These expenses increased 81% to \$423 million in 2015, from \$233 million in 2014. General and administrative expenses include salaries and benefits for corporate, financial and administrative staffs, utilities, communications expenses, professional fees, depreciation and amortization, transaction gains or losses on foreign currency, expense for share-based payments, acquisition costs and related adjustments. The increase in general and administrative expenses was primarily driven by the addition of the Cerner Health Services business. General and administrative expenses in 2015 and 2014 include acquisition costs and related adjustments associated with our Cerner Health Services business of \$46 million and \$16 million, respectively. General and administrative expenses in 2015 also include \$46 million of costs associated with our voluntary separation plan. We expect acquisition costs and related adjustments to significantly decline in future periods. At the end of 2015, our voluntary separation plan was complete. Refer to Note (1) of the notes to consolidated financial statements for further detail regarding the voluntary separation plan. Amortization of acquisition-related intangibles increased 579% to \$92 million in 2015, from \$13 million in 2014. Amortization of acquisition-related intangibles includes the amortization of customer relationships, acquired technology, trade names, and non-compete agreements recorded in connection with our business acquisitions. The

increase in amortization of acquisition-related intangibles was driven by the acquisition of the Cerner Health Services business in the first quarter of 2015. Refer to Note (2) of the notes to consolidated financial statements for further detail regarding intangible assets recorded in connection with our acquisition of the Cerner Health Services business.

Table of Contents

Non-Operating Items

Other income was less than \$1 million in 2015 compared to \$11 million in 2014. This decline is primarily due to increased interest expense as a result of the issuance of Senior Notes in January 2015, as further discussed in Note (9) of the notes to consolidated financial statements. Interest income also declined in 2015 due to lower average investment balances throughout the year. Refer to Note (11) of the notes to consolidated financial statements for further detail on the composition of other income.

Our effective tax rate was 31% in 2015 compared to 32% in 2014. The rates include net favorable permanent differences recognized in both periods. Refer to Note (12) of the notes to consolidated financial statements for further information regarding our effective tax rate.

The research and development credit expired on December 31, 2013, but in the fourth quarter of 2014, was retroactively reinstated from January 1, 2014 to December 31, 2014. We recognized the research and development tax credit related to 2014 in the fourth quarter of 2014. In the fourth quarter of 2015, the research and development credit was made permanent for amounts paid or incurred after December 31, 2014. We recognized the research and development tax credit related to 2015 in the fourth quarter of 2015.

Operations by Segment

We have two operating segments: Domestic and Global. The Domestic segment includes revenue contributions and expenditures associated with business activity in the United States. The Global segment includes revenue contributions and expenditures linked to business activity in Aruba, Australia, Austria, Belgium, Brazil, Canada, Cayman Islands, Chile, Denmark, Egypt, England, Finland, France, Germany, Guam, India, Ireland, Luxembourg, Malaysia, Mexico, Netherlands, Norway, Portugal, Qatar, Romania, Saudi Arabia, Singapore, Slovakia, Spain, Sweden, Switzerland and the United Arab Emirates. Refer to Note (18) of the notes to consolidated financial statements for further information regarding our reportable segments.

The following table presents a summary of our operating segment information for the years ended 2015 and 2014:

(In thousands)	2015	% of Revenue	2014	% of Revenue	% Change
Domestic Segment					
Revenues	\$3,904,454	100%	\$3,021,790	100%	29%
Costs of revenue	651,826	17%	542,210	18%	20%

Total costs and expenses	2,229,420	57%	1,705,623	56%	31%
Domestic operating earnings	1,675,034	43%	1,316,167	44%	27%
Global Segment					
Revenues	520,813	100%	380,913	100%	37%
Costs of revenue	98,955	19%	62,167	16%	59%
Operating expenses	233,047	45%	182,965	48%	27%
Total costs and expenses	332,002	64%	245,132	64%	35%
Global operating earnings	188,811	36%	135,781	36%	39%
Other, net	(1,082,709)		(688,864)		57%

Consolidated operating earnings	\$781,136	\$763,084	2%
Domestic Segment			

Revenues increased 29% to \$3.9 billion in 2015 from \$3.0 billion in 2014. This increase was primarily driven by contributions from the Cerner Health Services business.

Cost of revenues was 17% of revenues in 2015 compared to 18% in 2014. The lower cost of revenues as a percent of revenue was primarily driven by a lower mix of technology resale, which carries a higher cost of revenue.

Table of Contents

Operating expenses were 40% of revenues in 2015 compared to 39% in 2014. The slight increase as a percent of revenues was primarily driven by the addition of the Cerner Health Services business.

Global Segment

Revenues increased 37% to \$521 million in 2015 from \$381 million in 2014. This increase was driven by contributions from the Cerner Health Services business.

Cost of revenues was 19% of revenues in 2015 compared to 16% of revenues in 2014. The higher cost of revenues in 2015 was primarily driven by a higher amount of third party resources utilized for support and services.

Operating expenses increased 27% to \$233 million in 2015 from \$183 million in 2014, due primarily to the addition of the Cerner Health Services business.

Other, net

Operating results not attributed to an operating segment include expenses, such as software development, general and administrative expenses, acquisition costs and related adjustments, share-based compensation expense, and certain amortization and depreciation. These expenses increased 57% to \$1.1 billion in 2015 from \$689 million in 2014. This increase is primarily due to the addition of corporate and development personnel from our acquisition of the Cerner Health Services business. Additionally, 2015 includes amortization of acquisition-related intangibles associated with our Cerner Health Services business, acquisition costs and related adjustments, and costs related to our voluntary separation plan of \$79 million, \$46 million, and \$46 million, respectively. Our 2014 fiscal year includes acquisition costs and related adjustments of \$16 million.

Table of Contents

Revenues & Backlog

Revenues increased 17% to \$3.4 billion in 2014, as compared to \$2.9 billion in 2013.

System sales increased 12% to \$946 million in 2014 from \$848 million in 2013. The increase in system sales was primarily driven by strong growth in software and subscriptions of \$65 million and \$23 million, respectively. Support and maintenance revenues increased 9% to \$725 million in 2014 compared to \$662 million in 2013. This increase was attributable to continued success at selling Cerner Millennium applications and implementing them at client sites.

Services revenue increased 23% to \$1.6 billion in 2014 from \$1.3 billion in 2013. This increase was driven by growth in CernerWorks managed services of \$70 million as a result of continued demand for our hosting services and a \$241 million increase in professional services due to increased implementation and consulting activities.

Revenue backlog increased 19% to \$10.6 billion in 2014 compared to \$8.9 billion in 2013. This increase was driven by growth in new business bookings during the past four quarters, including continued strong levels of managed services, Cerner ITWorks and Cerner revenue cycle services bookings that typically have longer contract terms.

Costs of Revenue

Cost of revenues as a percentage of total revenues was 18% of total revenues in both 2014 and 2013.

Operating Expenses

Total operating expenses increased 12% to \$2.0 billion in 2014, compared with \$1.8 billion in 2013.

Sales and client service expenses as a percent of total revenues were 41% in 2014, compared to 40% in 2013. These expenses increased 19% to \$1.4 billion in 2014, from \$1.2 billion in 2013. The increase as a percent of revenue reflects a higher mix of services during the period that was driven by strong services revenue growth.

Software development expenses as a percent of revenue were 12% in 2014 and 2013. Expenditures for software development reflect ongoing development and enhancement of the Cerner Millennium and HealtheIntent platforms, with a focus on supporting key initiatives to enhance physician experience, revenue cycle, and population health solutions. A summary of our total software development expense in 2014 and 2013 is as follows:

(In thousands)	For the Years Ended	
	2014	2013
Software development costs	\$467,158	\$418,747
Capitalized software costs	(175,262)	(172,211)
Capitalized costs related to share-based payments	(2,538)	(2,438)
Amortization of capitalized software costs	103,447	94,688
Total software development expense	\$392,805	\$338,786

General and administrative expenses as a percent of total revenues were 7% in 2014, compared to 10% in 2013. These expenses decreased 21% to \$233 million in 2014 from \$295 million in 2013. The 2013 amount includes a \$106 million settlement charge, as further described in Note (10) of our notes to consolidated financial statements. The decrease of \$62 million was primarily driven by the 2013 settlement charge, offset by \$16 million of acquisition costs related to the acquisition of Siemens Health Services and a \$15 million increase in corporate personnel costs, as we increased such personnel to support our overall revenue growth.

Amortization of acquisition-related intangibles was approximately \$13 million in both 2014 and 2013.

Non-Operating Items

Other income was \$11 million in 2014 and \$12 million in 2013. Refer to Note (11) of the notes to consolidated financial statements for further detail on the composition of other income.

Table of Contents

Our effective tax rate was 32% in both 2014 and 2013. The rates include net favorable permanent differences recognized in both periods. Refer to Note (12) of the notes to consolidated financial statements for further information regarding our effective tax rate.

Operations by Segment

Other, net	(688,864)		(687,587)		—%
Consolidated operating earnings	\$763,084		\$576,012		32%

Domestic Segment

Revenues increased 18% to \$3.0 billion in 2014 from \$2.6 billion in the same period in 2013. This increase was driven by growth across most of our business.

Cost of revenues was 18% of revenues in both 2014 and 2013.

Operating expenses increased 19% to \$1.2 billion in 2014, from \$977 million in 2013, due primarily to an increase in personnel expenses.

Global Segment

Revenues increased 6% to \$381 million in 2014 from \$361 million in 2013. This increase was primarily driven by increases in managed services and professional services of \$11 million and \$13 million, respectively, partially offset by a decline in software revenues of \$7 million.

Cost of revenues was 16% of revenues in 2014 and 2013.

Operating expenses increased 18% to \$183 million in 2014 from \$155 million in 2013, due primarily to increases in personnel expense and bad debt expense of \$14 million and \$7 million, respectively.

Other, net

These expenses were \$689 million in 2014 compared to \$688 million in 2013. The 2013 amount includes a \$106 million settlement charge, as further described in Note (10) of our notes to consolidated financial statements. The 2013 settlement charge was offset primarily by increases in personnel expenses and acquisition costs of \$57 million and \$16 million, respectively, in 2014.

Table of Contents

Liquidity and Capital Resources

Our liquidity is influenced by many factors, including the amount and timing of our revenues, our cash collections from our clients and the amount we invest in software development, acquisitions and capital expenditures.

Our principal sources of liquidity are our cash, cash equivalents, which primarily consist of money market funds and time deposits with original maturities of less than 90 days, and short-term investments. At the end of 2015, we had cash and cash equivalents of \$402 million and short-term investments of \$111 million, as compared to cash and cash equivalents of \$635 million and short-term investments of \$786 million at the end of 2014. We utilized a large amount of cash and investments to fund the acquisition of the Cerner Health Services business in February 2015.

The non-U.S. subsidiaries for which we have elected to indefinitely reinvest earnings outside the U.S. held approximately 35% of our aggregate cash, cash equivalents and short-term investments at January 2, 2016. As part of our current business strategy, we plan to indefinitely reinvest the earnings of these foreign operations; however, should the earnings of these foreign operations be repatriated, we would accrue and pay tax on such earnings, which may be material.

We maintain a \$100 million multi-year revolving credit facility, which expires in October 2020. The facility provides an unsecured revolving line of credit for working capital purposes, which includes a letter of credit facility. We have the ability to increase the maximum capacity to \$200 million at any time during the facility's term, subject to lender participation. As of the end of 2015, we had no outstanding borrowings under this facility; however, we had \$16 million of outstanding letters of credit, which reduced our available borrowing capacity to \$84 million. Refer to Note (9) of the notes to consolidated financial statements for additional information regarding our credit facility.

We believe that our present cash position, together with cash generated from operations, short-term investments and, if necessary, our available line of credit, will be sufficient to meet anticipated cash requirements during 2016.

The following table summarizes our cash flows in 2015, 2014 and 2013:

(In thousands)	For the Years Ended		
	2015	2014	2013
Cash flows from operating activities	\$947,526	\$847,027	\$695,865
Cash flows from investing activities	(1,405,943)	(284,567)	(688,429)
Cash flows from financing activities	236,249	(120,324)	(119,389)
Effect of exchange rate changes on cash	(10,913)	(9,310)	(2,790)
Total change in cash and cash equivalents	(233,081)	432,826	(114,743)
Cash and cash equivalents at beginning of period	635,203	202,377	317,120
Cash and cash equivalents at end of period	\$402,122	\$635,203	\$202,377
Free cash flow (non-GAAP)	\$320,738	\$392,643	\$168,339

Cash from Operating Activities

(In thousands)	For the Years Ended		
	2015	2014	2013
Cash collections from clients	\$4,419,650	\$3,480,591	\$3,050,633
Cash paid to employees and suppliers and other	(3,340,551)	(2,483,559)	(2,172,418)
Cash paid for interest	(13,164)	(5,682)	(6,973)
Cash paid for taxes, net of refunds	(118,409)	(144,323)	(175,377)
Total cash from operations	\$947,526	\$847,027	\$695,865

Cash flow from operations increased \$100 million in 2015 compared to 2014, due primarily to an increase in cash impacting earnings. Operating cash flows in 2015 include payments in connection with our voluntary separation program and acquisition and related costs associated with our acquisition of the Cerner Health Services business of \$46 million and \$46 million, respectively. Operating cash flows in 2014 included payments in connection with our acquisition of the Cerner Health Services business of \$16 million. Disclosure of the operating cash flow contribution from the Cerner Health Services business is not

Table of Contents

practicable, as we have already integrated operations in many areas. Cash flow from operations increased \$151 million in 2014 compared to 2013, due primarily to 2013 including a payment related to the previously mentioned settlement charge, along with an increase in 2014 of cash impacting earnings. During 2015, 2014 and 2013, we received total client cash collections of \$4.4 billion, \$3.5 billion and \$3.1 billion, respectively. Days sales outstanding was 80 days in the fourth quarter of 2015, compared to 85 days for the 2015 third quarter and 66 days for the 2014 fourth quarter. Revenues provided under support and maintenance agreements represent recurring cash flows. We expect these revenues to continue to grow as the base of installed systems grows.

Cash from Investing Activities

(In thousands)	For the Years Ended		
	2015	2014	2013
Capital purchases	\$(362,132)	\$(276,584)	\$(352,877)
Capitalized software development costs	(264,656)	(177,800)	(174,649)
Sales and maturities of investments, net of purchases	720,406	190,810	(36,221)
Acquisition of businesses, net of cash acquired	(1,478,129)	(7,476)	(67,877)
Purchases of other intangibles	(21,432)	(13,517)	(56,805)
Total cash flows from investing activities	\$(1,405,943)	\$(284,567)	\$(688,429)

Cash flows from investing activities consist primarily of capital spending, short-term investment, and acquisition activities.

Our capital spending in 2015 was driven by capitalized equipment purchases primarily to support growth in our CernerWorks managed services business, investments in a cloud infrastructure to support cloud-based solutions, building and improvement purchases to support our facilities requirements and capitalized spending to support our ongoing software development initiatives. Total capital spending is expected to increase in 2016 in excess of \$100 million, primarily driven by an increase in spending on our Trails Campus and ongoing investments in growth initiatives.

Short-term investment activity historically consists of the investment of cash generated by our business in excess of what is necessary to fund operations. The 2014 activity is impacted by a change in investment mix, whereas we invested more heavily in cash equivalents versus short-term and long-term investments, as we prepared to fund our acquisition of the Cerner Health Services business in February 2015. The increase in net cash from investments in 2015 is due to the use of proceeds from additional investment sales and maturities to partially fund our acquisition of the Cerner Health Services business. We expect 2016 to reflect net purchases of investments, as we expect strong levels of cash flow.

During 2015, we paid cash to acquire the Cerner Health Services business and the Lee's Summit Tech Center of \$1.39 billion and \$85 million, respectively. In 2014, we acquired 100% of the outstanding membership interests of InterMedHx, LLC for \$7 million. In 2013, we acquired the net assets of Kaufman & Keen, LLC (doing business as PureWellness) and 100% of the outstanding stock of Labotix Corporation for an aggregate of \$68 million, net of cash acquired. We expect to continue seeking and completing strategic business acquisitions that are complementary to our business. Refer to Note (2) of the notes to consolidated financial statements for additional information regarding our business acquisitions.

Cash from Financing Activities

(In thousands)	For the Years Ended		
	2015	2014	2013
Long-term debt issuance	\$500,000	\$—	\$—
Repayment of long-term debt and capital lease obligations	(14,325)	(14,930)	(24,700)
Cash from option exercises (including excess tax benefits)	107,434	71,411	71,330
Treasury stock purchases	(345,057)	(217,082)	(170,042)

34

Table of Contents

In January 2015, we issued \$500 million in aggregate principal amount of Senior Notes. Proceeds from the Senior Notes are available for general corporate purposes. Refer to Note (9) of the notes to condensed consolidated financial statements for additional information regarding the Senior Notes.

Cash inflows from stock option exercises are dependent on a number of factors, including the price of our common stock, grant activity under our stock option and equity plans, and overall market volatility. We expect cash inflows from stock option exercises to continue in 2016 based on the number of exercisable options at the end of 2015 and our current stock price.

During 2015, 2014 and 2013, we purchased 5.7 million shares of our common stock for total consideration of \$345 million, 4.1 million shares of our common stock for total consideration of \$217 million, and 3.6 million shares of our common stock for total consideration of \$170 million, respectively. At the end of 2015, all repurchase programs were complete. Refer to Note (14) of the notes to consolidated financial statements for further information regarding our share repurchase programs.

During 2015, we paid an aggregate of \$11 million of contingent consideration related to our acquisitions of InterMedHx, LLC and Kaufman & Keen, LLC (doing business as PureWellness). In 2014, we paid \$11 million of the contingent consideration related to our acquisition of PureWellness. We expect additional contingent consideration payments in 2016 related to our acquisitions of the Lee's Summit Tech Center and InterMedHx. Refer to Note (2) of the notes to consolidated financial statements for additional information regarding our contingent consideration arrangements.

In January 2014 we received \$48 million of cash grants from the Kansas Department of Commerce for project costs in connection with the construction of our Continuous Campus. Refer to Note (16) of the notes to consolidated financial statements for additional information.

Free Cash Flow

(In thousands)	For the Years Ended		
	2015	2014	2013
Cash flows from operating activities (GAAP)	\$947,526	\$847,027	\$695,865
Capital purchases	(362,132)	(276,584)	(352,877)
Capitalized software development costs	(264,656)	(177,800)	(174,649)
Free cash flow (non-GAAP)	\$320,738	\$392,643	\$168,339

Free cash flow decreased \$72 million in 2015, compared to 2014. This decrease is due to higher levels of both capital spending to support our growth initiatives and facilities requirements, and capitalized spending to support our ongoing software development initiatives, partially offset by an increase in cash flows from operations. Free cash flow increased \$224 million in 2014, compared to 2013. This increase is largely due to an increase in cash flows from operations combined with a decrease in capital purchases, primarily due to the completion of construction on our Continuous Campus. Free cash flow for 2013 also includes a payment related to the settlement charge, described in Note (10) of our notes to consolidated financial statements. We believe our free cash flow levels reflect continued strength in our earnings. Free cash flow is a non-GAAP financial measure used by management along with GAAP results to analyze our earnings quality and overall cash generation of the business. We define free cash flow as cash flows from operations reduced by capital purchases and capitalized software development costs. The table above sets forth a reconciliation of free cash flow to cash flows from operating activities, which we believe to be the GAAP financial measure most directly comparable to free cash flow. The presentation of free cash flow is not meant to be considered in isolation, nor as a substitute for, or superior to, GAAP results, and investors should be aware that non-GAAP measures have inherent limitations and should be read only in conjunction with our consolidated financial statements prepared in accordance with GAAP. Free cash flow may also be different from similar non-GAAP financial measures used by other companies and may not be comparable to similarly titled captions of other companies due to potential inconsistencies in the method of calculation. We believe free cash flow is important to

enable investors to better understand and evaluate our ongoing operating results and allows for greater transparency in the review of our overall financial, operational and economic performance, because free cash flow takes into account the capital expenditures necessary to operate our business.

Table of Contents

Contractual Obligations, Commitments and Off Balance Sheet Arrangements

The following table represents a summary of our contractual obligations and commercial commitments at the end of 2015, except short-term purchase order commitments arising in the ordinary course of business.

(In thousands)	Payments Due by Period						Total
	2016	2017	2018	2019	2020	2021 and thereafter	
Balance sheet obligations ^(a) :							
Long-term debt obligations	\$—	\$2,500	\$—	\$—	\$1,100	\$509,850	\$513,450
Interest on long-term debt obligations	15,588	16,099	16,474	16,714	16,892	46,391	128,158
Capital lease obligations	41,797	23,035	14,225	10,016	3,343	—	92,416
Interest on capital lease obligations	2,248	1,236	654	254	27	—	4,419
Other obligations:							
Operating lease obligations	26,436	25,076	20,290	15,390	9,757	15,875	112,824
Purchase obligations	77,610	57,981	24,454	9,601	3,927	6,000	179,573
Total	\$163,679	\$125,927	\$76,097	\$51,975	\$35,046	\$578,116	\$1,030,840

(a) At the end of 2015, liabilities for unrecognized tax benefits were \$5 million.

We have no off balance sheet arrangements as defined in Regulation S-K. The effects of inflation on our business during 2015, 2014 and 2013 were not significant.

Recent Accounting Pronouncements

Refer to Note (1) of the notes to consolidated financial statements for information regarding recently issued accounting pronouncements.

Critical Accounting Policies

We believe that there are several accounting policies that are critical to understanding our historical and future performance, as these policies affect the reported amount of revenue and other significant areas involving our judgments and estimates. These significant accounting policies relate to revenue recognition, software development, potential impairments of goodwill, and income taxes. These accounting policies and our procedures related to these accounting policies are described in detail below and under specific areas within this MD&A. In addition, Note (1) to the consolidated financial statements expands upon discussion of our accounting policies.

Revenue Recognition

We recognize revenue within our multiple element arrangements, including software and software-related services, using the residual method. Key factors in our revenue recognition model are our assessments that implementation services are not essential to the functionality of our software, we can establish vendor specific objective evidence (VSOE) of fair value for any undelivered elements, and the length of time it takes for us to achieve the delivery and implementation milestones for our licensed software. If our business model were to change such that implementation services are deemed to be essential to the functionality of our software, the period of time over which our licensed software revenue would be recognized would lengthen. If VSOE of fair value cannot be established for both the implementation services and the support services, the entire arrangement fee is recognized ratably over the period

during which the implementation services are expected to be performed or the support period, whichever is longer, beginning with delivery of the software, provided that all other revenue recognition criteria are met.

We also recognize revenue for certain projects in which services are deemed essential to the functionality of the software using the percentage of completion method. Our revenue recognition is dependent upon our ability to reliably estimate the direct labor hours to complete a project which generally can span several years. We utilize our historical project experience and detailed planning process as a basis for our future estimates to complete current projects. Significant delays in completion of the projects, unforeseen cost increases or penalties could result in significant reductions to revenue and margins on these contracts. The actual project results can be significantly different from the estimated results. When adjustments are identified

Table of Contents

near or at the end of a project, the full impact of the change in estimate is recognized in that period. This can result in a material impact on our results for a single reporting period.

Software Development Costs

Costs incurred internally in creating computer software solutions and enhancements to those solutions are expensed until completion of a detailed program design, which is when we determine that technological feasibility has been established. Thereafter, all software development costs are capitalized until such time as the software solutions and enhancements are available for general release, and the capitalized costs subsequently are reported at the lower of amortized cost or net realizable value.

Net realizable value is computed as the estimated gross future revenues from each software solution less the amount of estimated future costs of completing and disposing of that product. Because the development of projected net future revenues related to our software solutions used in our net realizable value computation is based on estimates, a significant reduction in our future revenues could impact the recovery of our capitalized software development costs. If we missed our estimates of net future revenues by 10%, the amount of our capitalized software development costs would not be impaired.

Capitalized costs are amortized based on current and expected net future revenue for each software solution with minimum annual amortization equal to the straight-line amortization over the estimated economic life of the software solution. We are amortizing capitalized costs over five years. The five-year period over which capitalized software development costs are amortized is an estimate based upon our forecast of a reasonable useful life for the capitalized costs. Historically, use of our software programs by our clients has exceeded five years and is capable of being used a decade or more.

We expect that major software information systems companies, large information technology consulting service providers and systems integrators and others specializing in the health care industry may offer competitive products or services. The pace of change in the HCIT market is rapid and there are frequent new product introductions, product enhancements and evolving industry standards and requirements. As a result, the capitalized software solutions may become less valuable or obsolete and could be subject to impairment.

Goodwill

Goodwill is not amortized but is evaluated for impairment annually or whenever there is an impairment indicator. All goodwill is assigned to a reporting unit, where it is subject to an annual impairment assessment. We assess goodwill for impairment in the second quarter of each fiscal year and evaluate impairment indicators at each quarter end. We assessed our goodwill for impairment as of the second quarters of 2015 and 2014 and concluded that goodwill was not impaired. The assessments consisted of a qualitative analysis in accordance with Accounting Standards Update 2011-08, Testing for Goodwill Impairment. A key consideration in conducting those analyses was the significant growth in both the revenues and operating earnings of our reporting units since our last quantitative assessment. Our last quantitative assessment was performed in 2011, in which the fair values of each of our reporting units exceeded their carrying amounts by a significant margin. We used a discounted cash flow analysis utilizing Level 3 inputs, to determine the fair value of the reporting units in 2011. Goodwill amounted to \$799 million and \$321 million at the end of 2015 and 2014, respectively. If future anticipated cash flows from our reporting units that recognized goodwill do not materialize as expected, our goodwill could be impaired, which could result in significant charges to earnings.

Income Taxes

We make a number of assumptions and estimates in determining the appropriate amount of expense to record for income taxes. These assumptions and estimates consider the taxing jurisdictions in which we operate as well as current tax regulations. Accruals are established for estimates of tax effects for certain transactions, business structures and future projected profitability of our businesses based on our interpretation of existing facts and circumstances. If

these assumptions and estimates were to change as a result of new evidence or changes in circumstances, the change in estimate could result in a material adjustment to the consolidated financial statements.

We have discussed the development and selection of these critical accounting estimates with the Audit Committee of our Board of Directors and the Audit Committee has reviewed our disclosure contained herein.

Table of Contents

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

We are exposed to interest rate risk, primarily changes in LIBOR, related to our Series 2015-C Notes issued in January 2015. As of January 2, 2016, the interest rate for the current interest period on our Series 2015-C Notes was 1.36%, based on the three-month floating LIBOR rate. Based on our balance of \$75 million of Series 2015-C Notes as of January 2, 2016, an increase in interest rates of 1.0% would cause a corresponding increase in our annual interest expense of less than \$1 million.

We have global operations, and as a result, we are exposed to market risk related to foreign currency exchange rate fluctuations. Foreign currency fluctuations through January 2, 2016 have not had a material impact on our financial position or operating results. We currently do not use currency hedging instruments, though we actively monitor our exposure to foreign currency fluctuations and may use hedging transactions in the future if management deems it appropriate. We believe most of our global operations are naturally hedged for foreign currency risk as our foreign subsidiaries invoice their clients and satisfy their obligations primarily in their local currencies. There can be no guarantee that the impact of foreign currency fluctuations in the future will not have a material impact on our financial position or operating results.

Item 8. Financial Statements and Supplementary Data

The Financial Statements and Notes required by this Item are submitted as a separate part of this report. See Note (19) to the Consolidated Financial Statements for supplementary financial information.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

N/A

Item 9A. Controls and Procedures

a) Evaluation of Disclosure Controls and Procedures.

The Company's Chief Executive Officer (CEO) and Chief Financial Officer (CFO) have evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in the Exchange Act Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this Annual Report (the Evaluation Date). They have concluded that, as of the Evaluation Date and based on the evaluation of these controls and procedures required by paragraph (b) of Exchange Act Rule 13a-15 or 15d-15, these disclosure controls and procedures were effective to ensure that material information relating to the Company and its consolidated subsidiaries would be made known to them by others within those entities and would be disclosed on a timely basis. The CEO and CFO have concluded that the Company's disclosure controls and procedures are designed, and are effective, to give reasonable assurance that the information required to be disclosed by the Company in reports that it files under the Exchange Act is recorded, processed, summarized and reported within the time period specified in the rules and forms of the SEC. They have also concluded that the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed in the reports that are filed or submitted under the Exchange Act are accumulated and communicated to the Company's management to allow timely decisions regarding required disclosure.

b) Management's Report on Internal Control over Financial Reporting.

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934, as amended). The Company's

management assessed the effectiveness of the Company's internal control over financial reporting as of January 2, 2016. In making this assessment, the Company's management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in its Internal Control-Integrated Framework (2013). The Company's management has concluded that, as of January 2, 2016, the Company's internal control over financial reporting is effective based on these criteria. The Company's independent registered public accounting firm that audited the consolidated financial statements included in this annual report has issued an audit report on the effectiveness of the Company's internal control over financial reporting, which is included herein under "Report of Independent Registered Public Accounting Firm".

Table of Contents

c)Changes in Internal Control over Financial Reporting.

On February 2, 2015, we acquired Siemens Health Services, as further described in Note (2) of the notes to consolidated financial statements. We continue to integrate policies, processes, people, technology and operations for our combined operations, and we will continue to evaluate the impact of any related changes to internal control over financial reporting during the next fiscal year. Except for any changes in internal controls related to the integration of the Siemens Health Services business into Cerner, there were no other changes in the Company's internal controls over financial reporting during the year ended January 2, 2016, that have materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

d)Limitations on Controls.

The Company's management, including its CEO and CFO, have concluded that our disclosure controls and procedures and internal control over financial reporting are designed to provide reasonable assurance of achieving their objectives and are effective at that reasonable assurance level. However, the Company's management can provide no assurance that our disclosure controls and procedures or our internal control over financial reporting can prevent all errors and all fraud under all circumstances. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been or will be detected. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

* Indicates a management contract or compensatory plan or arrangement required to be identified by Part IV, Item 15(a)(3).

PLEASE NOTE: Pursuant to the rules and regulations of the Securities and Exchange Commission, we have filed or incorporated by reference the agreements referenced above as exhibits to this annual report on Form 10-K. The agreements have been filed to provide investors with information regarding their respective terms. The agreements are not intended to provide any other factual information about the Company or its business or operations. In particular, the assertions embodied in any representations, warranties and covenants contained in the agreements may be subject to qualifications with respect to knowledge and materiality different from those applicable to investors and may be qualified by information in confidential disclosure schedules not included with the exhibits. These disclosure schedules may contain information that modifies, qualifies and creates exceptions to the representations, warranties and covenants set forth in the agreements. Moreover, certain representations, warranties and covenants in the agreements may have been used for the purpose of allocating risk between the parties, rather than establishing matters as facts. In addition, information concerning the subject matter of the representations, warranties and covenants may have changed after the date of the respective agreement, which subsequent information may or may not be fully

reflected in the Company's public disclosures. Accordingly, investors should not rely on the representations, warranties and covenants in the agreements as characterizations of the actual state of facts about the Company or its business or operations on the date hereof.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
Cerner Corporation:

We have audited Cerner Corporation and subsidiaries' internal control over financial reporting as of January 2, 2016, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Cerner Corporation and subsidiaries' management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on Cerner Corporation and subsidiaries' internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Cerner Corporation and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of January 2, 2016, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Cerner Corporation and subsidiaries as of January 2, 2016 and January 3, 2015, and the related consolidated statements of operations, comprehensive income, cash flows, and changes in shareholders' equity for each of the years in the three-year period ended January 2, 2016, and our report dated February 17, 2016 expressed an unqualified opinion on those consolidated financial statements.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders

Cerner Corporation:

We have audited the accompanying consolidated balance sheets of Cerner Corporation and subsidiaries as of January 2, 2016 and January 3, 2015, and the related consolidated statements of operations, comprehensive income, cash flows, and changes in shareholders' equity for each of the years in the three-year period ended January 2, 2016. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Cerner Corporation and subsidiaries as of January 2, 2016 and January 3, 2015, and the results of their operations and their cash flows for each of the years in the three-year period ended January 2, 2016, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Cerner Corporation and subsidiaries' internal control over financial reporting as of January 2, 2016, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 17, 2016 expressed an unqualified opinion on the effectiveness of Cerner Corporation and subsidiaries' internal control over financial reporting.

CERNER CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(1) Basis of Presentation, Nature of Operations and Summary of Significant Accounting Policies

Basis of Presentation

The consolidated financial statements include all the accounts of Cerner Corporation (Cerner, the Company, we, us or our) and its subsidiaries. All significant intercompany transactions have been eliminated in consolidation.

The consolidated financial statements were prepared using accounting principles generally accepted in the United States. These principles require us to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities and the reported amounts of revenues and expenses. Actual results could differ from those estimates.

Our fiscal year ends on the Saturday closest to December 31. Fiscal years 2015 and 2013 each consisted of 52 weeks and ended on January 2, 2016 and December 28, 2013, respectively. Fiscal year 2014 consisted of 53 weeks and ended on January 3, 2015. All references to years in these notes to consolidated financial statements represent fiscal years unless otherwise noted.

Nature of Operations

We design, develop, market, install, host and support health care information technology, health care devices, hardware and content solutions for health care organizations and consumers. We also provide a wide range of value-added services, including implementation and training, remote hosting, operational management services, revenue cycle services, support and maintenance, health care data analysis, clinical process optimization, transaction processing, employer health centers, employee wellness programs and third party administrator services for employer-based health plans.

Factors Impacting Comparability of Financial Statements

Siemens Health Services

On February 2, 2015, we acquired Siemens Health Services, as further described in Note (2). The addition of the Siemens Health Services business has a significant impact on the comparability of our consolidated financial statements as of and for the year ended January 2, 2016, in relation to the comparative periods presented herein.

52/53 Week Periods

Our 2014 fiscal year included 53 weeks, as discussed above. This additional week impacts the comparability of our consolidated financial statements as of and for the year ended January 3, 2015, in relation to the comparative periods presented herein.

Amortization of Acquisition-related Intangibles

Amortization of acquisition-related intangibles includes the amortization of customer relationships, acquired technology, trade names, and non-compete agreements recorded in connection with our business acquisitions. Historically, such amounts were included in general and administrative expense in our consolidated statements of operations. Effective for our second quarter of 2015, amortization of acquisition-related intangibles is presented on a

separate line within our consolidated statements of operations. While this reporting change did not impact our consolidated results, prior period reclassifications have been made to conform to the current period presentation.

Acquisition Transactions within our Consolidated Statements of Cash Flows

Historically, the fair value of tangible assets acquired and liabilities assumed in business acquisitions were presented on a net basis within our consolidated statements of cash flows. Effective for our first quarter of 2015, the fair value of tangible assets acquired and the fair value of liabilities assumed are presented separately. While this reporting change did not impact our consolidated results, prior period reclassifications have been made to conform to the current period presentation.

Table of Contents

Voluntary Separation Plan

In the first quarter of 2015, the Company adopted a voluntary separation plan ("VSP") for eligible associates. Generally, the VSP was available to U.S. associates who met a minimum level of combined age and tenure, excluding, among others, our executive officers. Associates who elected to participate in the VSP receive financial benefits commensurate with their tenure and position, along with vacation payout and medical benefits.

We account for voluntary separation benefits in accordance with the provisions of Accounting Standards Codification (ASC) Topic 712, Compensation-Nonretirement Postemployment Benefits. Voluntary separation benefits are recorded to expense when the associates irrevocably accept the offer and the amount of the termination liability is reasonably estimable. The irrevocable acceptance period for most associates electing to participate in the VSP ended in May 2015. During 2015, we recorded pre-tax charges for the VSP of \$46 million, which is included in general and administrative expense in our consolidated statements of operations. At the end of 2015, this program was complete.

Supplemental Disclosures of Cash Flow Information

(In thousands)	For the Years Ended		
	2015	2014	2013
Cash paid during the year for:			
Interest (including amounts capitalized of \$7,106, \$1,583, and \$2,281, respectively)	\$13,164	\$5,682	\$6,973
Income taxes, net of refunds	118,409	144,323	175,377

Summary of Significant Accounting Policies

(a) Revenue Recognition - We recognize software related revenue in accordance with the provisions of ASC 985-605, Software – Revenue Recognition and non-software related revenue in accordance with ASC 605, Revenue Recognition. In general, revenue is recognized when all of the following criteria have been met:

- Persuasive evidence of an arrangement exists;
- Delivery has occurred or services have been rendered;
- Our fee is fixed or determinable; and
- Collection of the revenue is reasonably assured.

The following are our major components of revenue:

- System sales – includes the licensing of computer software, software as a service, deployment period upgrades, installation, content subscriptions, transaction processing and the sale of computer hardware and sublicensed software;
- Support, maintenance and service – includes software support and hardware maintenance, remote hosting and managed services, training, consulting and implementation services; and
- Reimbursed travel – includes reimbursable out-of-pocket expenses (primarily travel) incurred in connection with our client service activities.

We provide for several models of procurement of our information systems and related services. The predominant model involves multiple deliverables and includes a perpetual software license agreement, project-related implementation and consulting services, software support and either hosting services or computer hardware and sublicensed software, which requires that we allocate revenue to each of these elements.

Allocation of Revenue to Multiple Element Arrangements

For multiple element arrangements that contain software and non-software elements, we allocate revenue to software and software-related elements as a group and any non-software element separately. After the arrangement consideration has been allocated to the non-software elements, revenue is recognized when the basic revenue recognition criteria are met for each element. For the group of software and software-related elements, revenue is recognized under the guidance applicable to software transactions.

Table of Contents

Since we do not have vendor specific objective evidence (VSOE) of fair value on software licenses within our multiple element arrangements, we recognize revenue on our software and software-related elements using the residual method. Under the residual method, license revenue is recognized in a multiple-element arrangement when vendor-specific objective evidence of fair value exists for all of the undelivered elements in the arrangement, when software is delivered, installed and all other conditions to revenue recognition are met. We allocate revenue to each undelivered element in a multiple-element arrangement based on the element's respective fair value, with the fair value determined by the price charged when that element is sold separately. Specifically, we determine the fair value of the software support, hardware maintenance, sublicensed software support, remote hosting, subscriptions and software as a service portions of the arrangement based on the substantive renewal price for these services charged to clients; professional services (including training and consulting) portion of the arrangement, based on hourly rates which we charge for these services when sold apart from a software license; and sublicensed software based on its price when sold separately from the software. The residual amount of the fee after allocating revenue to the fair value of the undelivered elements is attributed to the licenses for software solutions. If evidence of the fair value cannot be established for the undelivered elements of a license agreement using VSOE, the entire amount of revenue under the arrangement is deferred until these elements have been delivered or VSOE of fair value can be established.

We also enter into arrangements that include multiple non-software deliverables. For each element in a multiple element arrangement that does not contain software-related elements to be accounted for as a separate unit of accounting, the following must be met: the delivered products or services have value to the client on a stand-alone basis; and for an arrangement that includes a general right of return relative to the delivered products or services, delivery or performance of the undelivered product or service is considered probable and is substantially controlled by the Company. We allocate the arrangement consideration to each element based on the selling price hierarchy of VSOE of fair value, if it exists, or third-party evidence (TPE) of selling price. If neither VSOE nor TPE are available, we use estimated selling price. After the arrangement consideration has been allocated to the elements, we account for each respective element in the arrangement as described below.

For certain arrangements, revenue for software, implementation services and, in certain cases, support services for which VSOE of fair value cannot be established are accounted for as a single unit of accounting. If VSOE of fair value cannot be established for both the implementation services and the support services, the entire arrangement fee is recognized ratably over the period during which the implementation services are expected to be performed or the support period, whichever is longer, beginning with delivery of the software, provided that all other revenue recognition criteria are met. The revenue recognized from single units of accounting are typically allocated and classified as system sales and support, maintenance and services. In cases where VSOE cannot be established, revenue is classified based on contract value.

Revenue Recognition Policies for Each Element

We provide implementation and consulting services. These services vary depending on the scope and complexity of the engagement. Examples of such services may include database consulting, system configuration, project management, testing assistance, network consulting, post conversion review and application management services. Except for limited arrangements where our software requires significant modifications or customization, implementation and consulting services generally are not deemed to be essential to the functionality of the software and, thus, do not impact the timing of the software license recognition. However, if software license fees are tied to implementation milestones, then the portion of the software license fee tied to implementation milestones is deferred until the related milestone is accomplished and related fees become due and payable and non-forfeitable. Implementation fees, for which VSOE of fair value can be determined, are recognized over the service period, which may extend from nine months to several years for multi-phased projects.

Remote hosting and managed services are marketed under long-term arrangements generally over periods of five to 10 years. These services are typically provided to clients that have acquired a perpetual license for licensed software and have contracted with us to host the software in our data center. Under these arrangements, the client generally has the contractual right to take possession of the licensed software at any time during the hosting period without significant penalty and it is feasible for the client to either run the software on its own equipment or contract with another party unrelated to us to host the software. Additionally, these services are not deemed to be essential to the functionality of the licensed software or other elements of the arrangement. As such, in situations for which we have VSOE of fair value for the undelivered items, we allocate the residual portion of the arrangement fee to the software and recognize it once the client has the ability to take possession of the software. The remaining fees in these arrangements, as well as the fees for arrangements where the client does not have the contractual right or the ability to take possession of the software at any time or for situations in which VSOE of fair value does not exist for undelivered elements, are generally recognized ratably over the hosting service period.

Table of Contents

We also offer our solutions on a software as a service model, providing time-based licenses for our software solutions available within an environment that we manage from our data centers. The data centers provide system and administrative support as well as processing services. Revenue on these services is combined and recognized on a monthly basis over the term of the contract. We capitalize related pre-contract direct set-up costs consisting of third party costs and direct software installation and implementation costs associated with the initial set up of a software as a service client. These costs are amortized over the term of the arrangement.

Software support fees are marketed under annual and multi-year arrangements and are recognized as revenue ratably over the contractual support term. Hardware and sublicensed software maintenance revenues are recognized ratably over the contractual maintenance term.

Subscription and content fees are generally marketed under annual and multi-year agreements and are recognized ratably over the contractual terms.

Hardware and sublicensed software sales are generally recognized when title and risk of loss have transferred to the client.

The sale of equipment under sales-type leases is recorded as system sales revenue at the inception of the lease. Sales-type leases also produce financing income, which is included in system sales revenue and is recognized at consistent rates of return over the lease term.

Where we have contractually agreed to develop new or customized software code for a client, we utilize percentage-of-completion accounting, labor-hours method.

Revenue generally is recognized net of any taxes collected from clients and subsequently remitted to governmental authorities.

Payment Arrangements

Our payment arrangements with clients typically include an initial payment due upon contract signing and date-based licensed software payment terms and payments based upon delivery for services, hardware and sublicensed software. Revenue recognition on support payments received in advance of the services being performed are deferred and classified as either current or long term deferred revenue depending on whether the revenue will be earned within one year.

We have periodically provided long-term financing options to creditworthy clients through third party financing institutions and have directly provided extended payment terms to clients from contract date. These extended payment term arrangements typically provide for date based payments over periods ranging from 12 months up to seven years. As a significant portion of the fee is due beyond one year, we have analyzed our history with these types of arrangements and have concluded that we have a standard business practice of using extended payment term arrangements and a long history of successfully collecting under the original payment terms for arrangements with similar clients, product offerings, and economics without granting concessions. Accordingly, in these situations, we consider the fee to be fixed and determinable in these extended payment term arrangements and, thus, the timing of revenue is not impacted by the existence of extended payments.

Some of these payment streams have been assigned on a non-recourse basis to third party financing institutions. We account for the assignment of these receivables as sales of financial assets. Provided all revenue recognition criteria have been met, we recognize revenue for these arrangements under our normal revenue recognition criteria, and if appropriate, net of any payment discounts from financing transactions.

(b) Cash Equivalents - Cash equivalents consist of short-term marketable securities with original maturities less than 90 days.

(c) Investments – Our short-term investments are primarily invested in time deposits, commercial paper, government and corporate bonds, with maturities of less than one year. Our long-term investments are primarily invested in government and corporate bonds with maturities of less than two years. All of our investments, other than a small portion accounted for under the cost and equity methods, are classified as available-for-sale.

Available-for-sale securities are recorded at fair value with the unrealized gains and losses reflected in accumulated other comprehensive loss until realized. Realized gains and losses from the sale of available-for-sale securities, if any, are determined on a specific identification basis.

Table of Contents

We regularly review investment securities for impairment based on both quantitative and qualitative criteria that include the extent to which cost exceeds fair value, the duration of any market decline, and the financial health of and specific prospects for the issuer. Unrealized losses that are other than temporary are recognized in earnings.

Premiums are amortized and discounts are accreted over the life of the security as adjustments to interest income for our investments. Interest income is recognized when earned.

Refer to Note (3) and Note (4) for further description of these assets and their fair value.

(d) Concentrations - The majority of our cash and cash equivalents are held at three major financial institutions. The majority of our cash equivalents consist of money market funds. Deposits held with banks may exceed the amount of insurance provided on such deposits. Generally these deposits may be redeemed upon demand.

As of the end of 2015, we had a significant concentration of receivables owed to us by Fujitsu Services Limited, which are currently in dispute. Refer to Note (5) for additional information.

(e) Inventory - Inventory consists primarily of computer hardware and sublicensed software, held for resale. Inventory is recorded at the lower of cost (first-in, first-out) or net realizable value.

(f) Property and Equipment - We account for property and equipment in accordance with ASC 360, Property, Plant, and Equipment. Property, equipment and leasehold improvements are stated at cost. Depreciation of property and equipment is computed using the straight-line method over periods of one to 50 years. Amortization of leasehold improvements is computed using a straight-line method over the shorter of the lease terms or the useful lives, which range from periods of one to 15 years.

(g) Software Development Costs - Software development costs are accounted for in accordance with ASC 985-20, Costs of Software to be Sold, Leased or Marketed. Software development costs incurred internally in creating computer software products are expensed until technological feasibility has been established upon completion of a detailed program design. Thereafter, all software development costs incurred through the software's general release date are capitalized and subsequently reported at the lower of amortized cost or net realizable value. Capitalized costs are amortized based on current and expected future revenue for each software solution with minimum annual amortization equal to the straight-line amortization over the estimated economic life of the solution. We amortize capitalized software development costs over five years.

(h) Goodwill - We account for goodwill under the provisions of ASC 350, Intangibles – Goodwill and Other. Goodwill is not amortized but is evaluated for impairment annually or whenever there is an impairment indicator. All goodwill is assigned to a reporting unit, where it is subject to an annual impairment assessment. Based on these evaluations, there was no impairment of goodwill in 2015, 2014 or 2013. Refer to Note (7) for more information on goodwill and other intangible assets.

(i) Intangible Assets - We account for intangible assets in accordance with ASC 350, Intangibles – Goodwill and Other. Amortization of finite-lived intangible assets is computed using the straight-line method over periods of three to 30 years.

(j) Income Taxes - Income taxes are accounted for in accordance with ASC 740, Income Taxes. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. Refer to Note (12) for additional information regarding

income taxes.

(k) Earnings per Common Share - Basic earnings per share (EPS) excludes dilution and is computed, in accordance with ASC 260, Earnings Per Share, by dividing income available to common shareholders by the weighted-average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared in our earnings. Refer to Note (13) for additional details of our earnings per share computations.

(l) Accounting for Share-based Payments - We recognize all share-based payments to associates, directors and consultants, including grants of stock options, restricted stock and performance shares, in the financial statements as compensation cost based on their fair value on the date of grant, in accordance with ASC 718, Compensation-Stock

58

Table of Contents

Compensation. This compensation cost is recognized over the vesting period on a straight-line basis for the fair value of awards that actually vest. Refer to Note (14) for a detailed discussion of share-based payments.

(m) Foreign Currency - In accordance with ASC 830, Foreign Currency Matters, assets and liabilities of non-U.S. subsidiaries whose functional currency is the local currency are translated into U.S. dollars at exchange rates prevailing at the balance sheet date. Revenues and expenses are translated at average exchange rates during the year. The net exchange differences resulting from these translations are reported in accumulated other comprehensive loss. Gains and losses resulting from foreign currency transactions are included in the consolidated statements of operations.

(n) Collaborative Arrangements - In accordance with ASC 808, Collaborative Arrangements, third party costs incurred and revenues generated by arrangements involving joint operating activities of two or more parties that are each actively involved and exposed to risks and rewards of the activities are classified in the consolidated statements of operations on a gross basis only if we are determined to be the principal participant in the arrangement. Otherwise, third party revenues and costs generated by collaborative arrangements are presented on a net basis. Payments between participants are recorded and classified based on the nature of the payments.

(o) Recently Issued Accounting Pronouncements

Revenue Recognition. In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. ASU 2014-09 will replace most existing revenue recognition guidance in U.S. GAAP. The new standard is effective for the Company in the first quarter of 2018, with early adoption permitted in the first quarter of 2017. The standard permits the use of either the retrospective or cumulative effect transition method. At this time, we have not selected a transition method, nor have we determined if we will adopt early. We are currently evaluating the effect that ASU 2014-09 will have on our consolidated financial statements and related disclosures.

Debt Issuance Costs. In April 2015, the FASB issued ASU 2015-03, Interest - Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs, which requires that debt issuance costs be presented in the balance sheet as a direct deduction from the carrying value of the debt liability. ASU 2015-03 is effective for the Company in the first quarter of 2016, with early adoption permitted, and retrospective application required. The Company adopted the standard early, effective in the first quarter of 2015. The adoption of ASU 2015-03 did not have a material impact on our consolidated financial statements. Refer to Note (9) for further information regarding debt issuance costs.

Consolidation. In February 2015, the FASB issued ASU 2015-02, Consolidation (Topic 810): Amendments to the Consolidation Analysis, which provides guidance when evaluating whether to consolidate certain legal entities. The updated guidance modifies evaluation criteria of limited partnerships and similar legal entities, eliminates the presumption that a general partner should consolidate a limited partnership, and affects the consolidation analysis of reporting entities that are involved with variable interest entities, particularly those that have fee arrangements and related party relationships. ASU 2015-02 is effective for the Company in the first quarter of 2016, with early adoption permitted. We do not expect the adoption of ASU 2015-02 to have a material impact on our consolidated financial statements and related disclosures.

Measurement-Period Adjustments. In September 2015, the FASB issued ASU 2015-16, Business Combinations (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments, which eliminates the requirement to retrospectively adjust the financial statements for measurement-period adjustments that occur in periods after a business combination is consummated. An acquirer now must recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined. ASU 2015-16 is effective for the Company in the first quarter of 2016, with early adoption permitted. The Company adopted the standard early, effective in the third quarter of 2015. The adoption of ASU 2015-16 did not have a material impact on our consolidated financial statements.

Deferred Income Taxes. In November 2015, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2015-17, Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes, which requires all deferred income tax assets and liabilities to be classified as noncurrent in our consolidated balance sheets. ASU 2015-17 is effective for the Company in the first quarter of 2017, with early adoption permitted, and either prospective or retrospective application accepted. The Company adopted the standard early, in the fourth quarter of 2015, and elected prospective application, which is reflected in our consolidated balance sheet for the year ended January 2, 2016. Prior periods have not been retrospectively adjusted. The adoption of ASU 2015-17 did not have a material impact on our consolidated financial statements.

Financial Instruments. In January 2016, the FASB issued ASU 2016-01, Financial Instruments - Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities, which addresses certain aspects of recognition,

Table of Contents

measurement, presentation, and disclosure of financial instruments. ASU 2016-01 is effective for the Company in the first quarter of 2018, with early adoption permitted. We are currently evaluating the effect that ASU 2016-01 will have on our consolidated financial statements and related disclosures.

(2) Business Acquisitions

Siemens Health Services

On February 2, 2015, we acquired substantially all of the assets, and assumed certain liabilities of Siemens Health Services, the health information technology business unit of Siemens AG ("Siemens"), a stock corporation established under the laws of Germany, and its affiliates. Siemens Health Services offered a portfolio of enterprise-level clinical and financial health care information technology solutions, as well as departmental, connectivity, population health, and care coordination solutions globally. Solutions were offered on the Soarian, Invision, and i.s.h.med platforms, among others. Siemens Health Services also offered a range of complementary services, including support, hosting, managed services, implementation services, and strategic consulting.

We believe the acquisition enhances our organic growth opportunities as it provides us a larger base into which we can sell our combined portfolio of solutions and services. The acquisition also augments our non-U.S. footprint and growth opportunities, increases our ability and scale for R&D investment, and adds over 5,000 highly-skilled associates that will enhance our capabilities. These factors, combined with the synergies and economies of scale expected from combining the operations of Cerner and Siemens Health Services, are the basis for acquisition and comprise the resulting goodwill recorded.

Consideration for the acquisition was \$1.39 billion of cash, consisting of the \$1.3 billion agreed upon purchase price plus working capital and certain other adjustments under the Master Sale and Purchase Agreement ("MSPA") dated August 5, 2014, as amended.

We incurred pre-tax costs of \$22 million and \$16 million in 2015 and 2014, respectively, in connection with our acquisition of Siemens Health Services, which are included in general and administrative expense in our consolidated statements of operations.

The acquisition of Siemens Health Services is being treated as a purchase in accordance with ASC Topic 805, Business Combinations, which requires allocation of the purchase price to the estimated fair values of the assets acquired and liabilities assumed in the transaction. Our allocation of purchase price is based on management's judgment after evaluating several factors, including a preliminary valuation assessment. The allocation of purchase price is preliminary and subject to changes, which could be significant, as appraisals of tangible and intangible assets are finalized, and additional information becomes available.

Table of Contents

The preliminary allocation of purchase price is as follows:

(in thousands)	Allocation Amount	Estimated Weighted Average Useful Life
Receivables, net of allowances of \$34,159	\$232,432	
Other current assets	55,392	
Property and equipment	158,288	20 years
Goodwill	485,387	
Intangible assets:		
Customer relationships	396,000	10 years
Existing technologies	201,990	5 years
Trade names	39,990	8 years
Total intangible assets	637,980	
Other non-current assets	513	
Accounts payable	(42,327)	
Deferred revenue (current)	(102,320)	
Other current liabilities	(17,286)	
Deferred revenue (non-current)	(14,930)	
 Total purchase price	 \$1,393,129	

The intangible assets in the table above are being amortized on a straight-line basis over their estimated useful lives, with such amortization included in amortization of acquisition-related intangibles in our consolidated statements of operations.

The fair value measurements of tangible and intangible assets and liabilities were based on significant inputs not observable in the market and thus represent Level 3 measurements within the fair value measurement hierarchy. Level 3 inputs included, among others, discount rates that we estimated would be used by a market participant in valuing these assets and liabilities, projections of revenues and cash flows, client attrition rates, royalty rates, and market comparables.

Property and equipment was valued primarily using the sales comparison method, a form of the market approach, in which the value is derived by evaluating the market prices of assets with comparable features such as size, location, condition and age. Our analysis included multiple property categories, including land, buildings, and personal property and included assumptions for market prices of comparable assets, and physical and economic obsolescence, among others.

Customer relationship intangible assets were valued using the excess earnings method, a form of the income approach, in which the value is derived by estimation of the after-tax cash flows specifically attributable to the customer relationships. Our analysis consisted of two customer categories, order backlog and existing customer relationships and included assumptions for projections of revenues and expenses, contributory asset charges, discount rates, and a tax amortization benefit, among others.

Existing technology and trade name intangible assets were valued using the relief from royalty method, a form of the income approach, in which the value is derived by estimation of the after-tax royalty savings attributable to owning the assets. Assumptions in these analyses included projections of revenues, royalty rates representing costs avoided due to ownership of the assets, discount rates, and a tax amortization benefit.

Deferred revenue was valued using an income approach, in which the value was derived by estimation of the fulfillment cost, plus a normal profit margin (which excludes any selling margin), for performance obligations assumed in the acquisition. Assumptions included estimations of costs incurred to fulfill the obligations, profit margins a market participant would expect to receive, and a discount rate.

The goodwill of \$485 million was allocated among our Domestic and Global operating segments, and is expected to be deductible for tax purposes. Refer to Note (7) for additional information on goodwill.

Table of Contents

Our consolidated statements of operations include revenues of approximately \$930 million attributable to the acquired business (now referred to as "Cerner Health Services") since the February 2, 2015 acquisition date. Disclosure of the earnings contribution from the Cerner Health Services business is not practicable, as we have already integrated operations in many areas.

The following table provides unaudited pro forma results of operations for the years ended January 2, 2016 and January 3, 2015, as if the acquisition had been completed on the first day of our 2014 fiscal year.

(In thousands, except per share data)	For the Years Ended	
	2015	2014
Pro forma revenues	\$4,518,947	\$4,549,387
Pro forma net earnings	546,027	463,344
Pro forma diluted earnings per share	1.56	1.32

These pro forma results are based on estimates and assumptions, which we believe are reasonable. They are not the results that would have been realized had we been a combined company during the periods presented, nor are they indicative of our consolidated results of operations in future periods. The pro forma results for the 2015 year include pre-tax adjustments for amortization of intangible assets, fair value adjustments for deferred revenue, and the elimination of acquisition costs of \$7 million, \$6 million and \$22 million, respectively. Pro forma results for the 2014 year include pre-tax adjustments for amortization of intangible assets, fair value adjustments for deferred revenue, and elimination of acquisition costs of \$86 million, \$52 million, and \$16 million respectively.

Lee's Summit Tech Center

On December 17, 2015, we purchased real estate interests, in-place tenant leases, and certain other assets associated with the property commonly referred to as the Summit Technology Campus, located in Lee's Summit, Missouri. The acquired property (now referred to as the "Lee's Summit Tech Center") consists of a 550,000 square foot multi-tenant office building. We expect to utilize this space to support our data center and office space needs. Consideration for the Lee's Summit Tech Center is expected to total \$86 million, consisting of \$85 million of up-front cash plus contingent consideration not to exceed \$1 million.

The acquisition of the Lee's Summit Tech Center is being treated as a purchase in accordance with ASC Topic 805. The preliminary allocation of purchase price resulted in the allocation of \$86 million to property and equipment, net in our consolidated balance sheets. This preliminary allocation of purchase price is based on management's judgment after evaluating several factors, including an appraisal of the acquired real estate. Such allocation is subject to changes, as intangible assets and obligations associated with the in-place tenant leases are evaluated and additional information becomes available; however, we do not expect material changes. No goodwill is expected to result from the transaction. We expect the in-place tenant leases to have a de minimis impact on our consolidated financial statements.

InterMedHx

On April 1, 2014, we purchased 100% of the outstanding membership interests of InterMedHx, LLC (InterMedHx). InterMedHx was a provider of health technology solutions in the areas of preventive care, patient administration, and medication history. We believe the addition of InterMedHx solutions provides additional capabilities in the market.

Consideration for the acquisition of InterMedHx is expected to total \$19 million, consisting of up-front cash plus contingent consideration, which is payable at a percentage of the revenue contribution from InterMedHx solutions and

services. We valued the contingent consideration at \$12 million based on projections of revenue over the assessment period. During 2015, we paid \$2 million to satisfy a portion of this contingent consideration obligation.

The allocation of purchase price to the estimated fair value of the identified tangible and intangible assets acquired and liabilities assumed resulted in goodwill of \$17 million and \$4 million in intangible assets related to the value of existing technologies. The goodwill was allocated to our Domestic operating segment and is expected to be deductible for tax purposes. Identifiable intangible assets are being amortized over a period of five years.

Table of Contents

The operating results of InterMedHx were combined with our operating results subsequent to the purchase date of April 1, 2014. Pro-forma results of operations have not been presented because the effect of this acquisition was not material to our results.

PureWellness

On March 4, 2013, we purchased the net assets of Kaufman & Keen, LLC (doing business as PureWellness). PureWellness was a health and wellness company that developed solutions for the administration and management of wellness programs, and to enable plan member engagement strategies. Our acquisition of PureWellness further expands what we believe to be a robust offering of solutions to manage and improve the health of populations.

Consideration for the acquisition of PureWellness was \$69 million consisting of up-front cash plus contingent consideration, which was payable upon the achievement of certain revenue milestones from PureWellness solutions and services during the period commencing on August 1, 2013 and ending April 30, 2015. During 2015 and 2014, we paid \$10 million and \$11 million, respectively, to satisfy all contingent consideration obligations.

The allocation of the purchase price to the estimated fair value of the identified tangible and intangible assets acquired and liabilities assumed resulted in goodwill of \$49 million and \$20 million in intangible assets, of which \$10 million and \$10 million was related to the value of established customer relationships and existing technologies, respectively. The goodwill was allocated to our Domestic operating segment and is expected to be deductible for tax purposes. Identifiable intangible assets are being amortized over a weighted-average period of seven years.

The operating results of PureWellness were combined with our operating results subsequent to the purchase date of March 4, 2013.

Labotix

On March 18, 2013, we purchased 100% of the outstanding stock of Labotix Corporation (together with its wholly owned subsidiary Labotix Automation, Inc., Labotix). Labotix was a developer of laboratory automation solutions for clinical laboratories. We believe the combination of Cerner Millennium, Cerner Copath, and Labotix allows us to offer a comprehensive set of capabilities to support high volume laboratory testing.

Consideration for the acquisition of Labotix was \$18 million, which was paid in cash. The allocation of purchase price to the estimated fair value of the identified tangible and intangible assets acquired and liabilities assumed resulted in goodwill of \$12 million and \$5 million in intangible assets related to the value of existing technologies. The goodwill was allocated to our Domestic operating segment and is not expected to be deductible for tax purposes. Identifiable intangible assets are being amortized over a period of five years.

The operating results of Labotix were combined with our operating results subsequent to the purchase date of March 18, 2013.

(3) Investments

Available-for-sale investments at the end of 2015 were as follows:

(In thousands)	Adjusted Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Cash equivalents:				
Money market funds	\$126,752	\$—	\$—	\$126,752
Time deposits	5,677	—	—	5,677
Government and corporate bonds	73	—	—	73
Total cash equivalents	132,502	—	—	132,502
Short-term investments:				
Time deposits	30,989	—	—	30,989
Commercial paper	1,500	—	(2) 1,498
Government and corporate bonds	78,655	20	(103) 78,572
Total short-term investments	111,144	20	(105) 111,059
Long-term investments:				
Government and corporate bonds	156,527	14	(569) 155,972
Total available-for-sale investments	\$400,173	\$34	\$(674) \$399,533

Available-for-sale investments at the end of 2014 were as follows:

(In thousands)	Adjusted Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Cash equivalents:				
Money market funds	\$189,137	\$—	\$—	\$189,137
Time deposits	9,989	—	—	9,989
Commercial Paper	115,638	—	—	115,638
Total cash equivalents	314,764	—	—	314,764
Short-term investments:				
Time deposits	52,830	—	(1) 52,829
Commercial paper	435,555	1	(12) 435,544
Government and corporate bonds	297,311	69	(90) 297,290
Total short-term investments	785,696	70	(103) 785,663
Long-term investments:				
Government and corporate bonds	219,439	26	(500) 218,965
Total available-for-sale investments	\$1,319,899	\$96	\$(603) \$1,319,392

Investments reported under the cost method of accounting as of January 2, 2016 and January 3, 2015 were \$16 million and \$9 million, respectively. Investments reported under the equity method of accounting as of January 2, 2016 and January 3, 2015 were \$1 million and \$4 million, respectively.

We sold available-for-sale investments for proceeds of \$293 million and \$698 million in 2015 and 2014, respectively, resulting in insignificant gains or losses in each period.

Table of Contents

(4) Fair Value Measurements

We determine fair value measurements used in our consolidated financial statements based upon the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value hierarchy distinguishes between (1) market participant assumptions developed based on market data obtained from independent sources (observable inputs) and (2) an entity's own assumptions about market participant assumptions developed based on the best information available in the circumstances (unobservable inputs). The fair value hierarchy consists of three broad levels, which gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described below:

Level 1 – Valuations based on quoted prices in active markets for identical assets or liabilities that the entity has the ability to access.

Level 2 – Valuations based on quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or other inputs that are observable or can be corroborated by observable data for substantially the full term of the assets or liabilities.

Level 3 – Valuations based on inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The following table details our financial assets measured and recorded at fair value on a recurring basis at the end of 2015:

(In thousands)

Description	Balance Sheet Classification	Fair Value Measurements Using		
		Level 1	Level 2	Level 3
Money market funds	Cash equivalents	\$126,752	\$—	\$—
Time deposits	Cash equivalents	—	5,677	—
Government and corporate bonds	Cash equivalents	—	73	—
Time deposits	Short-term investments	—	30,989	—
Commercial paper	Short-term investments	—	1,498	—
Government and corporate bonds	Short-term investments	—	78,572	—
Government and corporate bonds	Long-term investments	—	155,972	—

The following table details our financial assets measured and recorded at fair value on a recurring basis at the end of 2014:

(In thousands)

Description	Balance Sheet Classification	Fair Value Measurements Using		
		Level 1	Level 2	Level 3
Money market funds	Cash equivalents	\$189,137	\$—	\$—
Time deposits	Cash equivalents	—	9,989	—
Commercial paper	Cash equivalents	—	115,638	—
Time deposits	Short-term investments	—	52,829	—
Commercial paper	Short-term investments	—	435,544	—
Government and corporate bonds	Short-term investments	—	297,290	—
Government and corporate bonds	Long-term investments	—	218,965	—

We estimate the fair value of our long-term, fixed rate debt using a Level 3 discounted cash flow analysis based on current borrowing rates for debt with similar maturities. We estimate the fair value of our long-term, variable rate debt using a Level 3 discounted cash flow analysis based on LIBOR rate forward curves. The fair value of our long-term debt, including current maturities, at the end of 2015 and 2014 was approximately \$505 million and \$15 million, respectively. The carrying amount of such debt at the end of 2015 and 2014 was \$500 million and \$14 million, respectively.

Table of Contents

(5) Receivables

Receivables consist of accounts receivable and the current portion of amounts due under sales-type leases. Accounts receivable primarily represent recorded revenues that have been billed. Billings and other consideration received on contracts in excess of related revenues recognized are recorded as deferred revenue. Substantially all receivables are derived from sales and related support and maintenance and professional services of our clinical, administrative and financial information systems and solutions to health care providers.

We perform ongoing credit evaluations of our clients and generally do not require collateral from our clients. We provide an allowance for estimated uncollectible accounts based on specific identification, historical experience and our judgment.

A summary of net receivables is as follows:

(In thousands)	2015	2014
Gross accounts receivable	\$1,043,069	\$641,160
Less: Allowance for doubtful accounts	48,119	25,531
Accounts receivable, net of allowance	994,950	615,629
Current portion of lease receivables	39,134	57,149
Total receivables, net	\$1,034,084	\$672,778

A reconciliation of the beginning and ending amount of our allowance for doubtful accounts is as follows:

(in thousands)	2015	2014	2013
Allowance for doubtful accounts - beginning balance	\$25,531	\$36,286	\$33,230
Additions charged to costs and expenses	2,317	5,274	6,954
Additions through acquisitions	34,159	—	489
Deductions ^(a)	(13,888)	(16,029)	(4,387)
Allowance for doubtful accounts - ending balance	\$48,119	\$25,531	\$36,286

^(a) Deductions in 2014 include a \$14 million reclassification to other non-current assets.

Lease receivables represent our net investment in sales-type leases resulting from the sale of certain health care devices to our clients. The components of our net investment in sales-type leases are as follows:

(In thousands)	2015	2014
Minimum lease payments receivable	\$101,968	\$125,906
Less: Unearned income	5,593	6,089
Total lease receivables	96,375	119,817
Less: Long-term receivables included in other assets	57,241	62,668
Current portion of lease receivables	\$39,134	\$57,149

Table of Contents

Future minimum lease payments to be received under existing sales-type leases for the next five years are as follows:
(In thousands)

2016	\$42,083
2017	28,242
2018	15,985
2019	11,269
2020	4,389

During the second quarter of 2008, Fujitsu Services Limited's (Fujitsu) contract as the prime contractor in the National Health Service (NHS) initiative to automate clinical processes and digitize medical records in the Southern region of England was terminated by the NHS. This had the effect of automatically terminating our subcontract for the project. We continue to be in dispute with Fujitsu regarding Fujitsu's obligation to pay the amounts comprised of accounts receivable and contracts receivable related to that subcontract, and we are working with Fujitsu to resolve these issues based on processes provided for in the contract. Part of that process requires final resolution of disputes between Fujitsu and the NHS regarding the contract termination. As of January 2, 2016, it remains unlikely that our matter with Fujitsu will be resolved in the next 12 months. Therefore, these receivables have been classified as long-term and represent less than the majority of other long-term assets at the end of 2015 and 2014. While the ultimate collectability of the receivables pursuant to this process is uncertain, we believe that we have valid and equitable grounds for recovery of such amounts and that collection of recorded amounts is probable. Nevertheless, it is reasonably possible that our estimates regarding collectability of such amounts might materially change in the near term, considering that we do not have complete knowledge of the status of the proceedings between Fujitsu and NHS and their effect on our claim.

During 2015 and 2014, we received total client cash collections of \$4.4 billion and \$3.5 billion, respectively.

(6) Property and Equipment

A summary of property, equipment and leasehold improvements stated at cost, less accumulated depreciation and amortization, is as follows:

(In thousands)
