Chairman's
Letter to Shareholders

[PHOTO OF ROBERT P. BREMNER]

DEAR SHAREHOLDER,

The problems in the U.S. financial system and the slowdown in global economic activity continue to create a very difficult environment for the U.S. economy. The administration, the Federal Reserve System and Congress have initiated a variety of programs directed at restoring liquidity to the financial markets, providing financial support for critical financial institutions and stimulating economic activity. There are encouraging signs that these initiatives are beginning to have a constructive impact. It is not possible to predict whether the actions taken to date will be sufficient to restore more normal conditions in the financial markets or enable the economy to stabilize and set a course toward recovery. However, the speed and scope of the government's actions are very encouraging and, more importantly, reflect a commitment to act decisively to meet the economic challenges we face.

The performance information in the attached report reflects the impact of many forces at work in the equity and fixed-income markets. The comments by the portfolio managers describe the strategies being used to pursue your Fund's long-term investment goals. Parts of the financial markets continue to experience serious dislocations and thorough research and strong investment disciplines have never been more important in identifying risks and opportunities. I hope you will read this information carefully.

Your Board is particularly sensitive to our shareholders' concerns in these uncertain times. We believe that frequent and thorough communication is essential in this regard and encourage you to visit the Nuveen website: www.nuveen.com, for recent developments in all Nuveen funds. We also encourage you to communicate with your financial consultant for answers to your questions and to seek advice on your long-term investment strategy in the current market environment.

Nuveen continues to work on resolving the issues related to the auction rate preferred shares situation, but the unsettled conditions in the credit markets have slowed progress. Nuveen is actively pursuing a number of solutions, all with the goal of providing liquidity for preferred shareholders while preserving the potential benefits of leverage for common shareholders. We appreciate the patience you have shown as we work through the many issues involved.

On behalf of myself and the other members of your Fund's Board, we look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

Nuveen Investments 3

Portfolio Managers' Comments

Nuveen Investments Municipal Closed-End Funds NTC, NFC, NGK, NGO, NMT, NMB, NGX, NOM

Portfolio managers Cathryn Steeves and Scott Romans review economic and municipal market conditions at both the national and state levels, key investment strategies and the twelve-month performance of these eight Nuveen

Funds. Cathryn, who joined Nuveen in 1996, has managed the Connecticut and Massachusetts Funds since 2006. Scott, who has been with Nuveen since 2000, assumed portfolio management responsibility for NOM in 2003.

WHAT FACTORS AFFECTED THE U.S. ECONOMIC AND MUNICIPAL MARKET ENVIRONMENTS DURING THE TWELVE-MONTH PERIOD ENDED MAY 31, 2009?

During this period, downward pressure on the economy continued. In an effort to improve overall economic conditions, the Federal Reserve (Fed) continued to cut interest rates, lowering the fed funds rate from 2.00% June 1, 2008, to a target range of zero to 0.25% in December 2008, its lowest level on record. In March 2009, the Fed announced that, in addition to maintaining the current target rate, it would buy \$300 billion in long-term Treasury securities in an effort to support private credit markets and up to an additional \$750 billion (for a total of \$1.25 trillion) in agency mortgage-backed securities to bolster the housing market. (At its June 2009 meeting, subsequent to the reporting period, the Fed kept the target rate and bond purchase program unchanged.) Additionally, the federal government passed a \$700 billion financial industry rescue package in October 2008, which was followed by a \$787 billion stimulus package approved in February 2009.

The Fed's efforts and the stimulus package were partly in response to the decline in U.S. economic growth, as measured by the U.S. gross domestic product (GDP), a closely watched gauge of economic performance. Since posting an annual growth rate of 2.8% in the second quarter of 2008, the GDP has contracted at annual rates of 0.5% in the third quarter of 2008, 6.3% in the fourth quarter of 2008, and 5.5% in the first quarter of 2009, all of which adds up to the worst recession in 50 years. The ongoing housing slump also continued to trouble the economy, with the average home price falling 18.1% nationally between April 2008 and April 2009, pushing home values to mid-2003 levels. In the labor markets, May 2009 marked the 17th consecutive month of job losses, with a total of 6.0 million jobs lost since the economic recession began in December 2007. The national unemployment rate for May 2009 was 9.4%, its highest point since 1983, up from 5.5% in May 2008. At the same time, inflation remained subdued, as the Consumer Price Index (CPI), reflecting a 27% drop in energy prices, fell 1.3%

#### 4 Nuveen Investments

year-over-year as of May 2009, the largest twelve-month decline since 1950. The core CPI (which excludes food and energy) rose 1.8% over this same period, within the Fed's unofficial objective of 2.0% or lower for this measure.

During this period, the nation's financial institutions and markets—including the municipal bond market—experienced significant turmoil and reductions in demand for many types of securities, which decreased valuations. Stress in the financial and credit markets led to reduced liquidity, increased price volatility for most securities, and a general flight to quality, while reduction in demand resulted in decreased valuations across many types of securities. In

the municipal market, this negative impact was felt across all credit ratings, particularly lower-rated credits, reducing the net asset values of municipal bond funds. In addition, some of the dealer firms that make markets in bonds were unwilling to commit capital to purchase or continue serving as dealers.

Municipal bond prices were further negatively impacted by concerns that a supply overhang (such as, a large backlog of new issues that had been postponed) would cause selling pressure to persist. Additionally, greater price volatility, including wider credit spreads (i.e., lower quality bonds fell in price more than higher quality bonds); greatly reduced liquidity (i.e., the ability to sell bonds at prices close to their carrying values), particularly for lower quality bonds; and a lack of price transparency (i.e., the ability to accurately determine the price at which a bond would likely trade) all weighed down the market for much of this period. For the twelve-month period as a whole, bonds with shorter and intermediate maturities generally outperformed longer maturity bonds, and higher quality bonds tended to outperform lower quality credits.

Market conditions began to show some general signs of improvement in mid-December 2008, and municipal bonds were on an improving trend during the first five months of 2009. Another positive impact was the reduced supply of tax-exempt municipal debt, in part because of the introduction of "Build America" bonds in the final few months of the period. This new class of taxable municipal debt - created as part of the February 2009 economic stimulus package - provides municipal issuers with a 35% annual federal income tax credit on their interest payments. For many borrowers, these bonds provided an attractive alternative to issuing traditional tax-exempt debt. The Build America bond program got off to a quick start and effectively diverted high-grade tax-exempt new-issue supply into the taxable market. Therefore, a combination of lower issuance along with higher demand provided additional support to municipal bond prices.

Over the twelve months ended May 31, 2009, municipal bond issuance nationwide totaled \$410.3 billion, a drop of 12% compared with the twelve-month period ended May 31, 2008. While market conditions during this period impacted the demand for municipal bonds, investors, especially from the retail sector, continued to be attracted by high tax-equivalent yields of the municipal bond market relative to taxable bonds.

Nuveen Investments 5

HOW WERE THE ECONOMIC AND MARKET CONDITIONS IN CONNECTICUT, MASSACHUSETTS, AND MISSOURI DURING THIS PERIOD?

Connecticut's economy continued to be led by manufacturing, financial services and education/health services. Although down from 1980s levels, the defense industry also remained an important factor in the state's economy, with 25% of Connecticut's manufacturing jobs concentrated in that sector. The state ranked ninth in total defense dollars awarded among the 50 states. In 2008, Connecticut's economy contracted at a rate of 0.4%, which ranked the state 40th in the nation in terms of state GDP growth, compared with national average growth of 0.7%. Connecticut's economic contraction was due mainly to declines in manufacturing, finance, construction, and insurance. As of May 2009, the unemployment rate in Connecticut was 8.0%, up from 5.4% in May 2008. In February and March 2009, Moody's and Standard & Poor's (S&P) confirmed their ratings on Connecticut general obligation debt at Aa3 and AA, respectively, with stable outlooks. Fitch continued to rate the state at AA. Issuance of municipal debt in Connecticut during the twelve months ended May 31, 2009, totaled \$6.4 billion, a year-over-year decrease of 10%. According to Moody's, Connecticut's tax-supported debt per capita was the second highest in the nation (following Massachusetts) in 2008.

Massachusetts' economy remained diverse, with growth led by education/health services, financial services and technology. The concentration of colleges and universities in Massachusetts added some employment stability and provided a source of well-educated workers for the commonwealth's service industries. Education-related jobs accounted for approximately 5% of Massachusetts' employment, twice the national average. As of May 2009, the jobless rate in Massachusetts had risen to 8.2%, from 4.9% in May 2008. While many sectors of the commonwealth's economy, especially financial services, have been under pressure during the current recession, Massachusetts has fared better economically than many other states. In February 2009, Moody's and Standard & Poor's (S&P) confirmed their ratings on Massachusetts general obligation debt at Aa2 and AA, respectively, while Fitch continued to rate Massachusetts at AA. Both Moody's and S&P maintained their stable outlooks. For the twelve months ended May 31, 2009, new municipal issuance in Massachusetts totaled \$15.4 billion, a year-over-year increase of 17.4%.

Over the past twelve months, economic growth in Missouri was driven mainly by the government sector, education/health services, and professional and business services, followed by retail trade and manufacturing. While manufacturing as a whole has been contracting for nearly a decade, the decline accelerated as the global recession intensified. In May 2009, the jobless rate in Missouri was 9.0%, up from 5.8% in May 2008. As of May 2009, Moody's and Standard & Poor's (S&P) maintained their ratings on Missouri general obligation debt at Aaa and AAA, respectively, with stable outlooks, reflecting the state's conservative debt and fiscal management practices. During the twelve months ended May 31, 2009, new municipal issuance in Missouri totaled \$5.1 billion, a year-over-year decrease of 18%.

### WHAT KEY STRATEGIES WERE USED TO MANAGE THESE FUNDS DURING THIS PERIOD?

During this period, as the municipal market remained under pressure from price volatility, reduced liquidity and fundamental economic concerns, we continued to focus on carefully monitoring liquidity and on finding bonds that offered relative value while seeking to invest for the long term.

In view of the relatively volatile market situation over the past twelve months, we believed that it was important to focus on managing and preserving liquidity. As part of this effort, we monitored the types of credits and bond structures that were attractive to the retail market and took advantage of strong bids to sell bonds into relatively consistent retail demand. In the Connecticut and Massachusetts Funds, these tended to be shorter maturity securities, while NOM generally sold bonds with intermediate maturities. Overall, our objective was to position the Funds somewhat more defensively by retaining slightly more cash than usual in order to improve the Funds' liquidity profiles and have the capital we needed to reinvest at opportune times.

On the whole, our investment activity during this volatile period was somewhat limited. In addition, we believed that the Funds were already appropriately structured in line with our long-term perspectives on credit and the yield curve. As events unfolded, we sought to capitalize on the environment by watching for attractive opportunities, many of which were created by market conditions, to reallocate some cash into new purchases. Overall, our strategies were selective and conservative, as we continued to take a bottom-up approach to discovering undervalued sectors and individual credits with the potential to perform well over the long term. This was true in both the new issuance and secondary markets, where we were able to purchase bonds, especially lower-rated issues, at discounted prices as the result of selling by some municipal market

participants, particularly during the last part of 2008. In general, our emphasis was on purchasing bonds with longer maturities to take advantage of the spreads offered by the extremely steep yield curve. In addition to the selling mentioned previously, cash for new purchases was provided by bond calls in the Connecticut Funds, while the majority of NOM's purchases were financed by reinvesting the proceeds from matured and called bonds.

In NGX, which must invest at least 80% of its net assets in a portfolio of insured municipal bonds, our investment activity was further limited by reduced supply as the number of suitable insurers and issues continued to decline. Insured securities comprised 18% of new supply in 2008, compared with 47% in 2007 and 12.4% in the first five months of 2009 versus 25.5% for the same period in 2008.

We continued to use inverse floating rate securities(1) in all eight Funds. We employ inverse floaters for a variety of reasons, including duration(2) management, income enhancement and as a form of leverage. As of May 31, 2009, all of the Funds continued to hold positions in inverse floaters.

- (1) An inverse floating rate security, also known as inverse floaters is a financial instrument designed to pay long-term tax-exempt interest at a rate that varies inversely with a short-term tax-exempt interest rate index. For the Nuveen Funds, the index typically used is the Securities Industry and Financial Markets (SIFM) Municipal Swap Index (previously referred to as the Bond Market Association Index or BMA). Inverse floaters, including those inverse floating rate securities in which the Funds invested during the reporting period, are further defined within the Notes to Financial Statements and Glossary of Terms Used in this Report sections of this report.
- (2) Duration is a measure of a bond's price sensitivity as interest rates change, with longer duration bonds displaying more sensitivity to these changes than bonds with shorter durations.

Nuveen Investments 7

### HOW DID THE FUNDS PERFORM?

Individual results for these Nuveen Funds, as well as relevant index and peer group information, are presented in the accompanying table.

AVERAGE ANNUAL TOTAL RETURNS ON COMMON SHARE NET ASSET VALUE FOR PERIODS ENDED 5/31/09

	1-YEAR	5-YEAR	10-YEAR
Connecticut Funds			
NTC	0.45%	4.04%	5.17%
NFC	1.50%	4.85%	N/A
NGK	2.52%	4.70%	N/A
NGO	0.89%	4.23%	N/A
Massachusetts Funds			
NMT	-1.36%	3.77%	4.65%
NMB	-0.70%	3.94%	N/A
Missouri Fund			
NOM	-2.92%	2.81%	4.46%
Lipper Other States Municipal Debt Funds Average(3)	-0.60%	3.80%	4.66%

Barclays Capital Municipal Bond Index(4)	3.57%	4.41%	4.95%
Standard & Poor's (S&P) National Municipal Bond Index(5)	2.02%	4.21%	4.81%
Insured Massachusetts Fund NGX	2.00%	4.72%	N/A
Lipper Single State Insured Municipal Debt Funds Average(6)	-2.21%	3.76%	4.87%
Barclays Capital Insured Municipal Bond Index(4)	3.71%	4.44%	5.09%
Standard & Poor's (S&P) National Insured Municipal Bond Index(5)	2.07%	4.18%	4.97%

For the twelve months ended May 31, 2009, the total returns on common share net asset value (NAV) for all four of the Connecticut Funds exceeded the average return for the Lipper Other States Municipal Debt Funds Average, NMB performed in line with this Lipper group, while NMT and NOM lagged the average. All of the non-insured Funds underperformed the unleveraged Barclays Capital Municipal Bond Index. For the same period, NGX outperformed the Lipper Single State Insured Municipal Debt Funds Average, and underperformed the Barclays Capital Insured Municipal Bond Index. The comparative benchmarks and averages shown in the accompanying table include bonds from states in addition to Connecticut, Massachusetts and Missouri, which may make direct comparisons between the Funds and these benchmarks less meaningful.

Key management factors that influenced the Funds' returns during this period included duration and yield curve positioning, credit exposure and sector allocations, and individual security selection. In addition, the use of leverage was an important factor affecting

Past performance is not predictive of future results. Current performance may be higher or lower than the data shown. Returns do not reflect the deduction of taxes that shareholders may have to pay on Fund distributions or upon the sale of Fund shares.

For additional information, see the individual Performance Overview for your Fund in this report.

- (3) The Lipper Other States Municipal Debt Funds Average is calculated using the returns of all closed-end funds in this category for each period as follows: 1-year, 46 funds; 5-year, 46 funds; and 10-year, 18 funds. Fund and Lipper returns assume reinvestment of dividends.
- (4) The Barclays Capital (formerly Lehman Brothers) Municipal Bond Index is an unleveraged, unmanaged national index comprising a broad range of investment-grade municipal bonds, while the Barclays Capital (formerly Lehman Brothers) Insured Municipal Bond Index is an unleveraged, unmanaged national index containing a broad range of insured municipal bonds.

  Results for the Barclays Capital indexes do not reflect any expenses.
- (5) The Standard & Poor's (S&P) National Municipal Bond Index is an unleveraged, market value-weighted index designed to measure the performance of the investment-grade U.S. municipal bond market, while the S&P National Insured Municipal Bond Index is an unleveraged, market value-weighted index designed to measure the performance of the insured segment of the U.S. municipal bond market.

- (6) The Lipper Single-State Insured Municipal Debt Funds Average is calculated using the returns of all closed-end funds in this category for each period as follows: 1-year, 44 funds; 5-year, 44 funds; and 10-year, 24 funds. Fund and Lipper returns assume reinvestment of dividends.
- 8 Nuveen Investments

the Funds' performances over this period. The impact of leverage is discussed in more detail on page 10.

Over the course of this twelve-month period, the municipal bond yield curve remained steep. Bonds in the Barclays Capital Municipal Bond Index with maturities of approximately two to twelve years, especially those maturing in four to eight years, benefited the most from the interest rate environment. Because they were less sensitive to interest rate changes, these bonds generally outperformed credits with longer maturities, with bonds having the longest maturities (22 years and longer) posting a loss for the period. For the most part, duration and yield curve positioning were neutral for performance in the Connecticut and Massachusetts Funds during this period. These Funds were generally underexposed to the shorter maturity categories, more heavily weighted in the intermediate part of the yield curve, and underweighted in the longer part of the curve. In NOM, a healthy overexposure to bonds with intermediate maturities made duration positioning modestly positive for this Fund's return.

While duration was an important factor impacting performance during this period, it was generally outweighed in significance by credit quality and sector allocations. Given the difficult economic environment and the disruptions in the financial markets, risk-averse investors put a priority on quality investments and bonds with higher credit quality exposure typically performed very well over the past twelve months. Bonds rated BBB or below and non-rated bonds generally posted poorer returns. On the whole, the Connecticut Funds benefited from their overweightings in AAA rated bonds, predominately in the higher education sector. However, NMT, NMB and NOM were negatively impacted by their overexposures to lower-rated and non-rated bonds, and NMB was additionally impacted by its exposure to the sub-investment grade category (bonds rated BB and lower). The insured NGX, which can invest up to 20% of its assets in uninsured investment-grade quality securities, held approximately 2% of its portfolio in bonds rated BBB or non-rated bonds judged to be of investment-grade quality as of May 31, 2009. Overall, the Fund benefited from its comparatively higher credit quality.

As mentioned earlier, all of these Funds used inverse floating rate securities. During this period, the impact of inverse floaters on performance varied, with inverse floaters based on higher credit quality bonds outperforming those that used lower-quality credits. All of these inverse floaters benefited the Funds by helping to support their income streams.

Pre-refunded(7) bonds, which are backed by U.S. Treasury securities, were one of the top performing segments of the municipal bond market, due primarily to their shorter effective maturities, higher credit quality and perceived safety. NFC, NGK, NGO, NGX and NOM were all overweighted in pre-refunded bonds relative to the market, with NGX having the highest allocation. Additional sectors of the market that generally made positive contributions to the Funds' returns included general obligation and other tax-supported bonds, water and sewer, education, and housing credits.

Holdings that generally detracted from the Funds' performances included industrial development revenue (IDR) and health care bonds. All of the Funds except NGX were negatively impacted by their exposure to IDRs, while the three Massachusetts Funds also were comparatively overweight in health care. NOM had

relatively heavy allocations to the transportation sector, which underperformed the municipal market as a whole for

(7) Pre-refundings, also known as advance refundings or refinancings, occur when an issuer sells new bonds and uses the proceeds to fund principal and interest payments of older existing bonds. This process often results in lower borrowing costs for bond issuers.

Nuveen Investments 9

the period, and to the "other revenue" category, including tax increment financing (TIF) districts, which did not perform well. Zero coupon bonds also performed poorly, as did lower-rated tobacco bonds.

Individual security selection was also a factor in the Funds' performances during this period, In particular, the Fund's were impacted to varying degrees by the downgrades of municipal bond issuers and the subsequent impact on the returns and values of insured bonds.

IMPACT OF THE FUNDS' CAPITAL STRUCTURES AND LEVERAGE STRATEGIES ON PERFORMANCE

In this unusual and volatile investment environment, another factor impacting the returns of these Funds relative to the comparative indexes was the Funds' use of financial leverage. The Funds use leverage because their managers believe that, over time, leveraging provides opportunities for additional income and total returns for common shareholders. However, use of leverage also can expose common shareholders to additional risk—especially when market conditions are unfavorable. For example, as the prices of securities held by a Fund decline, the negative impact of these valuation changes on common share net asset value and common shareholder total return is magnified by the use of leverage. During this period, leverage had a mixed impact on the total return performance of these Funds. Generally, leverage was a negative factor in the fall of 2008 and a positive factor in the spring of 2009.

#### RECENT DEVELOPMENTS REGARDING BOND INSURANCE COMPANIES

As mentioned previously, NGX must invest at least 80% of its net assets in a portfolio of insured municipal bonds. At the time this report was prepared, there were no bond insurers rated AAA by all three of the major rating agencies (Moody's Investor Service, S&P and Fitch) and at least one rating agency has placed each insurer on "negative credit watch," "credit watch evolving," "credit outlook developing," or "rating withdrawn," which may presage one or more rating reductions in the future. At the end of this reporting period, most insured bonds were being valued according to their fundamentals as if they were uninsured. On the whole, the holdings of NGX continued to be well diversified, and it is important to note that municipal bonds historically have had a very low rate of default.

#### RECENT DEVELOPMENTS IN THE AUCTION RATE PREFERRED SECURITIES MARKETS

As noted in the last shareholder report, beginning in February 2008, more shares were submitted for sale in the regularly scheduled auctions for the auction rate preferred shares issued by these Funds than there were offers to buy. This meant that these auctions "failed to clear," and that many, or all, of the Funds' auction rate preferred shareholders who wanted to sell their shares in these auctions were unable to do so. This decline in liquidity in auction rate preferred shares did not lower the credit quality

10 Nuveen Investments

of these shares, and auction rate preferred shareholders unable to sell their shares received distributions at the "maximum rate" applicable to failed auctions, as calculated in accordance with the pre-established terms of the auction rate preferred shares.

These developments generally have not affected the portfolio management or investment policies of these Funds. However, one continuing implication for common shareholders of these auction failures is that the Funds' cost of leverage will likely be higher, at least temporarily, than it otherwise would have been had the auctions continued to be successful. As a result, the Funds' future common share earnings may be lower than they otherwise might have been.

As noted in the last shareholder report, the Funds' Board of Trustees authorized a plan to use tender option bonds (TOBs), also known as floating rate securities, to refinance a portion of the Funds' outstanding auction rate preferred shares. The amount of TOBs that a Fund may use varies according to the composition of each Fund's portfolio. Some Funds have a greater ability to use TOBs than others. As of May 31, 2009, the amount of auction rate preferred securities redeemed and/or noticed for redemption, at par, by the Funds are as shown in the accompanying table.

	AUCT	ION RATE	
	PREFERRE	D SHARES	% OF ORIGINAL
	REDEEME	D AND/OR	AUCTION RATE
FUND	NOTICED FOR RE	DEMPTION	PREFERRED SHARES
NTC	\$ 4	,850,000	12.7%
NFC	\$ 2	,250,000	11.5%
NGK	\$ 2	,050,000	11.7%
NGO	\$ 3	,725,000	11.6%
NMB	\$	750,000	5.0%

While the Funds' Board of Trustees and management continue to work to resolve this situation, the Funds cannot provide any assurance on when the remaining outstanding auction rate preferred shares might be redeemed.

As of May 31, 2009, sixty-eight Nuveen closed-end municipal funds have redeemed and/or noticed for redemption, at par, a portion of their outstanding auction rate preferred shares. These redemptions bring the total amount of Nuveen's municipal closed-end funds' auction rate preferred share redemptions to approximately \$2.1 billion of the original \$11 billion outstanding.

For up-to-date information, please visit the Nuveen CEF Auction Rate Preferred Resource Center at:

http://www.nuveen.com/ResourceCenter/AuctionRatePreferred.aspx.

Nuveen Investments 11

Common Share Dividend and Share Price Information

During the twelve-month reporting period ended May 31, 2009, NMT had three monthly dividend increases, NTC, NGO, NMB and NGX each had two increases, NFC and NGK each had one increase, and NOM's dividend remained stable throughout the reporting period.

Due to normal portfolio activity, common shareholders of the following Funds received capital gains and net ordinary income distributions at the end of

December 2008 as follows:

				SHORT-TERM CAPI	TAL GAINS
	LONG-TERM	CAPITAI	L GAINS	AND/OR ORDINA	RY INCOME
FUND		(PER	SHARE)	(P	ER SHARE)
NTC		\$	0.0083	\$	0.0664
NFC		\$	0.0422	\$	0.0637
NGK		\$	0.0362	\$	0.0884
NMT		\$	0.0230	\$	0.0184

All of the Funds in this report seek to pay stable dividends at rates that reflect each Fund's past results and projected future performance. During certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's NAV. Conversely, if a Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of May 31, 2009, all of the Funds in this report had positive UNII balances for both tax and financial statement purposes.

#### 12 Nuveen Investments

#### COMMON SHARE REPURCHASES AND SHARE PRICE INFORMATION

The Funds' Board of Trustees approved an open-market share repurchase program on July 30, 2008, under which each Fund may repurchase an aggregate of up to 10% of its outstanding common shares. Since the inception of this program, the Funds have not repurchased any of their outstanding common shares.

As of May 31, 2009, the Funds' common share prices were trading at premiums or discounts to their common share NAVs as shown in the accompanying table.

FUND		TWELVE-MONTH AVERAGE +PREMIUM/-DISCOUNT
NTC	-1.77%	- 8.41%
NFC	-2.34%	- 3.02%
NGK	+0.14%	- 4.27%
NGO	-3.91%	- 8.14%
NMT	-0.08%	- 8.51%
NMB	+2.29%	+ 0.77%
NGX	-5.12%	- 1.76%
NOM	+3.70%	+ 4.06%

- (1) The percentages shown in the foregoing chart may reflect the ratings on certain bonds whose insurer has experienced downgrades as of the end of the reporting period. Please see the Portfolio Managers' Commentary for an expanded discussion of the affect on the Fund of changes to the ratings of certain bonds in the portfolio resulting from changes to the ratings of the underlying insurers both during the period and after period end.
- (2) At least 80% of the Fund's net assets are invested in municipal securities that guarantee the timely payment of principal and interest. See Notes to Financial Statements, Footnote 1 Insurance, for more information.
- (3) Taxable-Equivalent Yield represents the yield that must be earned on a fully taxable investment in order to equal the yield of the Fund on an after-tax basis. It is based on a combined federal and state income tax rate of 31.8%. When comparing this Fund to investments that generate qualified dividend income, the Taxable-Equivalent Yield is lower.

(1) Taxable-Equivalent Yield represents the yield that must be earned on a fully taxable investment in order to equal the yield of the Fund on an after-tax basis. It is based on a combined federal and state income tax rate of 32.3%. When comparing this Fund to investments that generate qualified dividend income, the Taxable-Equivalent Yield is lower.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM
THE BOARD OF TRUSTEES AND SHAREHOLDERS

```
NUVEEN CONNECTICUT PREMIUM INCOME MUNICIPAL FUND

NUVEEN CONNECTICUT DIVIDEND ADVANTAGE MUNICIPAL FUND 2

NUVEEN CONNECTICUT DIVIDEND ADVANTAGE MUNICIPAL FUND 3

NUVEEN MASSACHUSETTS PREMIUM INCOME MUNICIPAL FUND

NUVEEN MASSACHUSETTS DIVIDEND ADVANTAGE MUNICIPAL FUND

NUVEEN INSURED MASSACHUSETTS TAX-FREE ADVANTAGE MUNICIPAL FUND

NUVEEN MISSOURI PREMIUM INCOME MUNICIPAL FUND
```

We have audited the accompanying statements of assets and liabilities, including the portfolios of investments, of Nuveen Connecticut Premium Income Municipal Fund, Nuveen Connecticut Dividend Advantage Municipal Fund, Nuveen Connecticut Dividend Advantage Municipal Fund 2, Nuveen Connecticut Dividend Advantage Municipal Fund 3, Nuveen Massachusetts Premium Income Municipal Fund, Nuveen Massachusetts Dividend Advantage Municipal Fund, Nuveen Insured Massachusetts Tax-Free Advantage Municipal Fund and Nuveen Missouri Premium Income Municipal Fund (the Funds) as of May 31, 2009, and the related statements of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Funds' management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Funds' internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Funds' internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of May 31, 2009, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial positions of Nuveen Connecticut Premium Income Municipal Fund, Nuveen Connecticut Dividend Advantage Municipal Fund, Nuveen Connecticut Dividend Advantage Municipal Fund 2, Nuveen Connecticut Dividend Advantage Municipal Fund 3, Nuveen Massachusetts Premium Income Municipal Fund, Nuveen Massachusetts Dividend Advantage Municipal Fund, Nuveen Insured Massachusetts Tax-Free Advantage Municipal Fund and Nuveen Missouri Premium Income Municipal Fund at May 31, 2009, the results of their operations for the year then ended, the changes in their net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended in conformity with US generally accepted accounting principles.

		Preferred Shares, at Liquidation Value - (45.9)% (5)	
		Net Assets Applicable to Common Shares - 100%	
			=======

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.
- (2) Optional Call Provisions (not covered by the report of independent registered public accounting firm): Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.
- (3) Ratings (not covered by the report of independent registered public accounting firm): Using the higher of Standard & Poor's Group ("Standard & Poor's") or Moody's Investor Service, Inc. ("Moody's") rating. Ratings below BBB by Standard & Poor's or Baa by Moody's are considered to be below investment grade.
- (4) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities which ensure the timely payment of principal and interest. Such investments are normally considered to be equivalent to AAA rated securities.
- (5) Preferred Shares, at Liquidation Value as a percentage of Total Investments is 30.5%.
- N/R Not rated.
- (ETM) Escrowed to maturity.
- (UB) Underlying bond of an inverse floating rate trust reflected as a financing transaction pursuant to the provisions of SFAS No. 140. See Notes to Financial Statements, Footnote 1 Inverse Floating Rate Securities for more information.

See accompanying notes to financial statements.

\$		Total Investments (cost \$89,136,791) - 146.9%	
_===		Floating Rate Obligations - (9.8)%	
		Other Assets Less Liabilities - 10.6%	
		Preferred Shares, at Liquidation Value - (47.7)% (5)	
		Net Assets Applicable to Common Shares - 100%	

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.
- (2) Optional Call Provisions (not covered by the report of independent registered public accounting firm): Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.
- (3) Ratings (not covered by the report of independent registered public accounting firm): Using the higher of Standard & Poor's Group ("Standard & Poor's") or Moody's Investor Service, Inc. ("Moody's") rating. Ratings below BBB by Standard & Poor's or Baa by Moody's are considered to be below investment grade.
- (4) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities which ensure the timely payment of principal and interest. Such investments are normally considered to be equivalent to AAA rated securities.
- (5) Preferred Shares, at Liquidation Value as a percentage of Total Investments is 32.5%.
- N/R Not rated.
- (ETM) Escrowed to maturity.
- (UB) Underlying bond of an inverse floating rate trust reflected as a financing transaction pursuant to the provisions of SFAS No. 140. See Notes to Financial Statements, Footnote 1 Inverse Floating Rate Securities for more information.

See accompanying notes to financial statements.

		Preferred Shares, at Liquidation Value - (54.3)% (5)	
		Net Assets Applicable to Common Shares - 100%	
			:=======

At least 80% of the Fund's net assets are invested in municipal securities that guarantee the timely payment of principal and interest. See Notes to Financial Statements, Footnote 1 - Insurance, for more information.

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.
- (2) Optional Call Provisions (not covered by the report of independent registered public accounting firm): Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.
- (3) Ratings (not covered by the report of independent registered public

accounting firm): Using the higher of Standard & Poor's Group ("Standard & Poor's") or Moody's Investor Service, Inc. ("Moody's") rating. Ratings below BBB by Standard & Poor's or Baa by Moody's are considered to be below investment grade.

The Portfolio of Investments may reflect the ratings on certain bonds whose insurer has experienced downgrades as of the end of the reporting period. Please see the Portfolio Managers' Commentary for an expanded discussion of the affect on the Fund of changes to the ratings of certain bonds in the portfolio resulting from changes to the ratings of the underlying insurers both during the period and after period end.

- Backed by an escrow or trust containing sufficient U.S. Government or U.S. (4)Government agency securities which ensure the timely payment of principal and interest. Such investments are normally considered to be equivalent to AAA rated securities.
- Preferred Shares, at Liquidation Value as a percentage of Total Investments is 35.1%.
- N/R Not rated.
- (ETM) Escrowed to maturity.
- (UB) Underlying bond of an inverse floating rate trust reflected as a financing transaction pursuant to the provisions of SFAS No. 140. See Notes to Financial Statements, Footnote 1 - Inverse Floating Rate Securities for more information.

See accompanying notes to financial statements.

### | Notes to FINANCIAL STATEMENTS

#### 1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The state funds covered in this report and their corresponding Common share stock exchange symbols are Nuveen Connecticut Premium Income Municipal Fund (NTC), Nuveen Connecticut Dividend Advantage Municipal Fund (NFC), Nuveen Connecticut Dividend Advantage Municipal Fund 2 (NGK), Nuveen Connecticut Dividend Advantage Municipal Fund 3 (NGO), Nuveen Massachusetts Premium Income Municipal Fund (NMT), Nuveen Massachusetts Dividend Advantage Municipal Fund (NMB), Nuveen Insured Massachusetts Tax-Free Advantage Municipal Fund (NGX) and Nuveen Missouri Premium Income Municipal Fund (NOM) (collectively, the "Funds"). Common shares of Connecticut Premium Income (NTC) and Massachusetts Premium Income (NMT) are traded on the New York Stock Exchange while Common shares of Connecticut Dividend Advantage (NFC), Connecticut Dividend Advantage 2 (NGK), Connecticut Dividend Advantage 3 (NGO), Massachusetts Dividend Advantage (NMB), Insured Massachusetts Tax-Free Advantage (NGX) and Missouri Premium Income (NOM) are traded on the NYSE Amex (formerly, American Stock Exchange). The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end management investment companies.

Each Fund seeks to provide current income exempt from both regular federal and

designated state income taxes, and in the case of Insured Massachusetts Tax-Free Advantage (NGX) the alternative minimum tax applicable to individuals, by investing primarily in a portfolio of municipal obligations issued by state and local government authorities within a single state or certain U.S. territories.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with US generally accepted accounting principles.

#### Investment Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Trustees. Prices of forward swap contracts are also provided by an independent pricing service approved by each Fund's Board of Trustees. Futures contracts are valued using the closing settlement price, or, in the absence of such a price, at the mean of the bid and asked prices. When market price quotes are not readily available (which is usually the case for municipal securities), the pricing service or, in the absence of a pricing service for a particular investment or derivative instrument, the Board of Trustees of the Fund, or its designee, may establish fair value using a wide variety of market data including yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor's credit characteristics considered relevant. Temporary investments in securities that have variable rate and demand features qualifying them as short-term investments are valued at amortized cost, which approximates value.

#### Investment Transactions

Investment transactions are recorded on a trade date basis. Realized gains and losses from transactions are determined on the specific identification method. Investments purchased on a when-issued/delayed delivery basis may have extended settlement periods. Any investments so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued/delayed delivery purchase commitments. At May 31, 2009, there were no such outstanding purchase commitments in any of the Funds.

### Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis. Investment income also includes paydown gains and losses, if any.

#### 74 Nuveen Investments

#### Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to distribute substantially all of its net investment income and net capital gains to shareholders and to otherwise comply with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and designated state income taxes, and in the case of Insured Massachusetts Tax-Free Advantage (NGX) the alternative minimum tax applicable to individuals, to retain such tax-exempt status when distributed to shareholders of the Funds. Net realized capital gains

and ordinary income distributions paid by the Funds are subject to federal taxation.

For all open tax years and all major taxing jurisdictions, management of the Funds has concluded that there are no significant uncertain tax positions that would require recognition in the financial statements. Open tax years are those that are open for examination by taxing authorities (i.e., generally the last four tax year ends and the interim tax period since then). Furthermore, management of the Funds is also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

Dividends and Distributions to Common Shareholders

Dividends from tax-exempt net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders at least annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to Common shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from US generally accepted accounting principles.

#### Preferred Shares

The Funds have issued and outstanding Preferred shares, \$25,000 stated value per share, as a means of effecting financial leverage. Each Fund's Preferred shares are issued in one Series. The dividend rate paid by the Funds on each Series is determined every seven days, pursuant to a dutch auction process overseen by the auction agent, and is payable at the end of each rate period. As of May 31, 2009, the number of Preferred shares outstanding (excluding Preferred shares noticed for redemption) for each Fund is as follows:

	CONNECTICUT	CONNECTICUT	CONNECTICUT	CONNECTICUT

Series	F				

Beginning in February 2008, more shares for sale were submitted in the regularly

scheduled auctions for the Preferred shares issued by the Funds than there were offers to buy. This meant that these auctions "failed to clear," and that many Preferred shareholders who wanted to sell their shares in these auctions were unable to do so. Preferred shareholders unable to sell their shares received distributions at the "maximum rate" applicable to failed auctions as calculated in accordance with the pre-established terms of the Preferred shares.

These developments have generally not affected the portfolio management or investment policies of the Funds. However, one implication of these auction failures for Common shareholders is that the Funds' cost of leverage will likely be higher, at least temporarily, than it otherwise would have been had the auctions continued to be successful. As a result, the Funds' future

Nuveen Investments 75

Preferred shares redeemed and/or noticed for redemption, at liquidation value	\$	\$ 750,(	000 \$		\$

\_\_\_\_\_\_

Effective May 1, 2009, auction participation fees with respect to auctions that have failed have been reduced from 25 bps (annualized) to 15 bps (annualized). All auction participants have signed new agreements incorporating this change.

#### Insurance

Under normal circumstances, Insured Massachusetts Tax-Free Advantage (NGX) will invest at least 80% of its net assets (as defined in Footnote 7 - Management Fees and Other Transactions with Affiliates) in municipal securities that are covered by insurance guaranteeing the timely payment of principal and interest. For purposes of this 80% test, insurers must have a claims paying ability rated at least "A" at the time of purchase by at least one independent rating agency.

In addition, the Fund will invest at least 80% of its net assets in municipal securities that are rated at least "AA" at the time of purchase (based on the higher of the rating of the insurer, if any, or the underlying security) by at least one independent rating agency, or are unrated but judged to be of similar credit quality by Nuveen Asset Management (the "Adviser"), a wholly-owned subsidiary of Nuveen, or municipal bonds backed by an escrow or trust account containing sufficient U.S. government or U.S. government agency securities or U.S. Treasury-issued State and Local Government Series securities to ensure timely payment of principal and interest. The Fund may also invest up to 20% of its net assets in municipal securities rated below "AA" (based on the higher rating of the insurer, if any, or the underlying bond) or are unrated but judged to be of comparable quality by the Adviser.

Each insured municipal security is covered by Original Issue Insurance, Secondary Market Insurance or Portfolio Insurance. Such insurance does not guarantee the market value of the municipal securities or the value of the Fund's Common shares. Original Issue Insurance and Secondary Market Insurance remain in effect as long as the municipal securities covered thereby remain outstanding and the insurer remains in business, regardless of whether the Fund ultimately disposes of such municipal securities. Consequently, the market value of the municipal securities covered by Original Issue Insurance or Secondary Market Insurance may reflect value attributable to the insurance. Portfolio Insurance, in contrast, is effective only while the municipal securities are held by the Fund. Accordingly, neither the prices used in determining the market value of the underlying municipal securities nor the Common share net asset value of the Fund include value, if any, attributable to the Portfolio Insurance. Each policy of the Portfolio Insurance does, however, give the Fund the right to obtain permanent insurance with respect to the municipal security covered by the Portfolio Insurance policy at the time of its sale.

#### Inverse Floating Rate Securities

Each Fund is authorized to invest in inverse floating rate securities. An inverse floating rate security is created by depositing a municipal bond, typically with a fixed interest rate, into a special purpose trust created by a broker-dealer. In turn, this trust (a) issues floating rate certificates, in face amounts equal to some fraction of the deposited bond's par amount or market value, that typically pay short-term tax-exempt interest rates to third parties, and (b) issues to a long-term investor (such as one of the Funds)

### 76 Nuveen Investments

an inverse floating rate certificate (sometimes referred to as an "inverse floater") that represents all remaining or residual interest in the trust. The income received by the inverse floater holder varies inversely with the short-term rate paid to the floating rate certificates' holders, and in most circumstances the inverse floater holder bears substantially all of the underlying bond's downside investment risk and also benefits disproportionately from any potential appreciation of the underlying bond's value. The price of an inverse floating rate security will be more volatile than that of the underlying bond because the interest rate is dependent on not only the fixed coupon rate of the underlying bond but also on the short-term interest paid on the floating rate certificates, and because the inverse floating rate security essentially bears the risk of loss of the greater face value of the underlying bond.

A Fund may purchase an inverse floating rate security in a secondary market transaction without first owning the underlying bond (referred to as an "externally-deposited inverse floater"), or instead by first selling a fixed-rate bond to a broker-dealer for deposit into the special purpose trust and receiving in turn the residual interest in the trust (referred to as a

"self-deposited inverse floater"). The inverse floater held by a Fund gives the Fund the right (a) to cause the holders of the floating rate certificates to tender their notes at par, and (b) to have the broker transfer the fixed-rate bond held by the trust to the Fund, thereby collapsing the trust. An investment in an externally-deposited inverse floater is identified in the Portfolio of Investments as "(IF) - Inverse floating rate investment." An investment in a self-deposited inverse floater is accounted for as a financing transaction in accordance with Statement of Financial Accounting Standards No. 140 (SFAS No. 140) "Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities." In such instances, a fixed-rate bond deposited into a special purpose trust is identified in the Portfolio of Investments as "(UB) - Underlying bond of an inverse floating rate trust," with the Fund accounting for the short-term floating rate certificates issued by the trust as "Floating rate obligations" on the Statement of Assets and Liabilities. In addition, the Fund reflects in "Investment Income" the entire earnings of the underlying bond and the related interest paid to the holders of the short-term floating rate certificates is recognized as "Interest expense on floating rate obligations" on the Statement of Operations.

During the fiscal year ended May 31, 2009, each Fund invested in externally-deposited inverse floaters and/or self-deposited inverse floaters.

Each Fund may also enter into shortfall and forbearance agreements (sometimes referred to as a "recourse trust" or "credit recovery swap") (such agreements referred to herein as "Recourse Trusts") with a broker-dealer by which a Fund agrees to reimburse the broker-dealer, in certain circumstances, for the difference between the liquidation value of the fixed-rate bond held by the trust and the liquidation value of the floating rate certificates issued by the trust plus any shortfalls in interest cash flows. Under these agreements, a Fund's potential exposure to losses related to or on inverse floaters may increase beyond the value of a Fund's inverse floater investments as a Fund may potentially be liable to fulfill all amounts owed to holders of the floating rate certificates. At period end, any such shortfall is recognized as "Unrealized depreciation on Recourse Trusts" on the Statement of Assets and Liabilities.

At May 31, 2009, the Funds were not invested in externally-deposited Recourse Trusts.

#### Swap Contracts

Each Fund is authorized to enter into swap contracts consistent with their investment objectives and policies to reduce, increase or otherwise alter its risk profile or to alter its portfolio characteristics (i.e. duration, yield curve positioning and credit quality).

Each Fund is subject to interest rate risk in the normal course of pursuing its investment objectives. Forward interest rate swap transactions are intended to help the Fund manage its overall interest rate sensitivity, either shorter or longer, generally to more closely align the Fund's interest rate sensitivity with that of the broader municipal market. Forward interest rate swap transactions involve each Fund's agreement with a counterparty to pay, in the future, a fixed or variable rate payment in exchange for the counterparty paying the Fund a variable or fixed rate payment, the accruals for which would begin at a specified date in the future (the "effective date"). The amount of the payment obligation is based on the notional amount of the forward swap contract and the termination date of the swap (which is akin to a bond's maturity). The value of the Fund's swap commitment would increase or decrease based primarily on the extent to which long-term interest rates for bonds having a maturity of the swap's termination date increases or decreases. The Funds may terminate a swap contract prior to the effective date, at which point a realized gain or loss is recognized. When a forward swap is terminated, it ordinarily does not involve

the delivery of securities or other underlying assets or principal, but rather is settled in cash on a net basis. Each Fund intends, but is not obligated, to terminate its forward swaps before the effective date.

The average notional amounts during the fiscal year ended May 31, 2009, were as follows:

	 PREMIUM INCOME (NTC)		DIVIDEND DVANTAGE (NFC)		IVIDEND NTAGE 2 (NGK)	ADV

Forward swap contract average notional balance	\$ 290,000	\$ 180,000	\$ 

Refer to Footnote 3 - Derivative Instruments and Hedging Activities for further details on forward swap contract activity.

#### Futures Contracts

Each Fund is subject to interest rate risk in the normal course of pursuing its investment objectives and is authorized to invest in futures contracts in order to gain exposure to, or hedge against changes in interest rates. Upon entering into a futures contract, a Fund is required to deposit with the broker an amount of cash or liquid securities equal to a specified percentage of the contract amount. This is known as the "initial margin." Subsequent payments ("variation margin") are made or received by a Fund each day, depending on the daily fluctuation of the value of the contract.

#### 78 Nuveen Investments

During the period the futures contract is open, changes in the value of the contract are recognized as an unrealized gain or loss by "marking-to-market" on a daily basis to reflect the changes in market value of the contract. When the contract is closed or expired, a Fund records a realized gain or loss equal to the difference between the value of the contract on the closing date and value of the contract when originally entered into. Cash held by the broker to cover initial margin requirements on open futures contracts, if any, is recognized on the Statement of Assets and Liabilities. Additionally, the Statement of Assets and Liabilities reflects a receivable or payable for the variation margin, when applicable.

The average number of futures contracts outstanding during the fiscal year ended

\_\_\_\_\_\_

CONNECTICUT CONNECTICUT CONNECTICUT CONNEC

\* Although the Fund invested in futures contracts during the current fiscal year, the average number of contracts is calculated based on the outstanding contracts at the beginning of the fiscal year and at the end of each fiscal quarter within the current fiscal year. The Fund did not hold futures contracts at the beginning of the fiscal year or at the end of any fiscal quarter during the current fiscal year.

Risks of investments in futures contracts include the possible adverse movement of the securities or indices underlying the contracts, the possibility that there may not be a liquid secondary market for the contracts and/or that a change in the value of the contract may not correlate with a change in the value of the underlying securities or indices.

Refer to Footnote 3 - Derivative Instruments and Hedging Activities for further details on futures contract activity.

Market and Counterparty Credit Risk

Average number of futures contracts outstanding

In the normal course of business each Fund may invest in financial instruments and enter into financial transactions where risk of potential loss exists due to changes in the market (market risk) or failure of the other party to the transaction to perform (counterparty credit risk). The potential loss could exceed the value of the financial assets recorded on the financial statements. Financial assets, which potentially expose each Fund to counterparty credit risk, consist principally of cash due from counterparties on forward, option and swap transactions. The extent of each Fund's exposure to counterparty credit risk in respect to these financial assets approximates their carrying value as recorded on the Statement of Assets and Liabilities. Futures contracts expose a Fund to minimal counterparty credit risk as they are exchange traded and the exchange's clearinghouse, which is counterparty to all exchange traded futures, guarantees the futures contracts against default.

Each Fund helps manage counterparty credit risk by entering into agreements only with counterparties the Adviser believes have the financial resources to honor their obligations and by having the Adviser monitor the financial stability of

the counterparties. Additionally, counterparties may be required to pledge collateral daily (based on the daily valuation of the financial asset) on behalf of each Fund with a value approximately equal to the amount of any unrealized gain above a pre-determined threshold.

Reciprocally, when each Fund has an unrealized loss, the Funds have instructed the custodian to pledge assets of the Funds as collateral with a value approximately equal to the amount of the unrealized loss above a pre-determined threshold. Collateral pledges are monitored and subsequently adjusted if and when the valuations fluctuate, either up or down, by at least the predetermined threshold amount.

#### Zero Coupon Securities

Each Fund is authorized to invest in zero coupon securities. A zero coupon security does not pay a regular interest coupon to its holders during the life of the security. Tax-exempt income to the holder of the security comes from accretion of the difference between the original purchase price of the security at issuance and the par value of the security at maturity and is effectively paid at maturity. Such securities are included in the Portfolios of Investments with a 0.000% coupon rate in their description. The market prices of zero coupon securities generally are more volatile than the market prices of securities that pay interest periodically.

#### Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by net credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments. Credits for cash balances may be offset by charges for any days on which a Fund overdraws its account at the custodian bank.

Nuveen Investments 79

### | Notes to FINANCIAL STATEMENTS (continued)

### Indemnifications

Under the Funds' organizational documents, their Officers and Trustees are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the Funds enter into contracts that provide general indemnifications to other parties. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

### Use of Estimates

The preparation of financial statements in conformity with US generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

#### 2. FAIR VALUE MEASUREMENTS

During the current fiscal period, the Funds adopted the provisions of Statement of Financial Accounting Standards No. 157 (SFAS No. 157) "Fair Value

Measurements." SFAS No. 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosure about fair value measurements. In determining the value of each Fund's investments various inputs are used. These inputs are summarized in the three broad levels listed below:

- Level 1 Quoted prices in active markets for identical securities.
- Level 3 Significant unobservable inputs (including management's assumptions in determining the fair value of investments).

The inputs or methodology used for valuing securities are not an indication of the risk associated with investing in those securities. The following is a summary of each Fund's fair value measurements as of May 31, 2009:

CONNECTICUT PREMIUM INCOME (NTC)	LEVEL 1	LEVEL 2	LEVEL 3		TC

				:========

#### 3. Derivative Instruments and Hedging Activities

During the current fiscal period, the Funds adopted the provisions of Statement of Financial Accounting Standards No. 161 (SFAS No. 161) "Disclosures about Derivative Instruments and Hedging Activities." This standard is intended to enhance financial statement disclosures for derivative instruments and hedging activities and enable investors to better understand: a) how and why a fund uses derivative instruments; b) how derivative instruments are accounted for; and c) how derivative instruments affect a fund's financial position, results of operations and cash flows, if any. The Funds record derivative instruments at fair value with changes in fair value recognized on the Statement of Operations. Even though the Funds' investments in derivatives may represent economic hedges, they are considered to be non-hedge transactions for SFAS No. 161 disclosure purposes. For additional information on the derivative instruments in which each Fund was invested during and at the end of the reporting period, refer to the Portfolio of Investments, Financial Statements and Footnote 1 - General Information and Significant Accounting Policies.

The following tables present the amount of net realized gain (loss) and net change in unrealized appreciation (depreciation) recognized for the fiscal year ended May 31, 2009, on derivative instruments, as well as the primary risk exposure associated with each. The following Funds held derivative instruments during the fiscal year ended May 31, 2009. None of the Funds had outstanding

#### 6. INCOME TAX INFORMATION

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to timing differences in recognizing taxable market discount, timing differences in recognizing certain gains and losses on investment transactions and the treatment of investments in inverse floating rate transactions subject to SFAS No. 140, if any. To the extent that differences arise that are permanent in nature, such amounts are reclassified within the capital accounts on the Statement of Assets and Liabilities presented in the annual report, based on their federal tax basis treatment; temporary differences do not require reclassification. Temporary and permanent differences do not impact the net asset values of the Funds.

At May 31, 2009, the cost of investments was as follows:

The following Funds have elected to defer net realized losses from investments incurred from November 1, 2008 through May 31, 2009, the Funds' tax year end, ("post-October losses") in accordance with federal income tax regulations. Post-October losses are treated as having arisen on the first day of the following fiscal year:

	]	NECTICUT DIVIDEND ANTAGE 2 (NGK)	CONNECTICUT DIVIDEND ADVANTAGE 3 (NGO)	MASSACHUSETTS PREMIUM INCOME (NMT)	MAS	SSACHUSETTS DIVIDEND ADVANTAGE (NMB)
Post-October capital losses	\$	10 <b>,</b> 861	\$ 15,027	\$ 20,890	\$	10,497

#### 7. MANAGEMENT FEES AND OTHER TRANSACTIONS WITH AFFILIATES

Each Fund's management fee is separated into two components - a complex-level component, based on the aggregate amount of all fund assets managed by the Adviser, and a specific fund-level component, based only on the amount of assets within each individual Fund. This pricing structure enables Nuveen fund shareholders to benefit from growth in the assets within each individual fund as well as from growth in the amount of complex-wide assets managed by the Adviser.

CONNECETORE DEPARTM INCOME (NEC)

The annual fund-level fee, payable monthly, for each Fund is based upon the average daily net assets of each Fund as follows:

	CONNECTICUT PREMIUM INCOME (NTC)
	MASSACHUSETTS PREMIUM INCOME (NMT)
	MISSOURI PREMIUM INCOME (NOM)
AVERAGE DAILY NET ASSETS (1)	FUND-LEVEL FEE RATE
For the first \$125 million	.4500%
For the next \$125 million	.4375
For the next \$250 million	.4250
For the next \$500 million	.4125
For the next \$1 billion	.4000
For the next \$3 billion	.3875
For net assets over \$5 billion	.3750
	CONNECTICUT DIVIDEND ADVANTAGE (NFC)
	CONNECTICUT DIVIDEND ADVANTAGE 2 (NGK)
	CONNECTICUT DIVIDEND ADVANTAGE 3 (NGO)
	MASSACHUSETTS DIVIDEND ADVANTAGE (NMB)
	INSURED MASSACHUSETTS TAX-FREE ADVANTAGE (NGX)
AVERAGE DAILY NET ASSETS (1)	FUND-LEVEL FEE RATE
For the first \$125 million	.4500%
For the next \$125 million	.4375
	. 1373
For the next \$250 million	.4250
For the next \$250 million For the next \$500 million	
•	.4250
For the next \$500 million	.4250 .4125

The annual complex-level fee, payable monthly, which is additive to the fund-level fee, for all Nuveen sponsored funds in the U.S., is based on the aggregate amount of total fund net assets managed as stated in the following table. As of May 31, 2009, the complex-level fee rate was .1982%.

86 Nuveen Investments

The complex-level fee schedule is as follows:

COMPLEX-LEVEL	EFFECTIVE RATE AT
NET ASSET BREAKPOINT LEVEL (1)	BREAKPOINT LEVEL
¢55 h:11:	20000
\$55 billion	.2000%
\$56 billion	.1996
\$57 billion	.1989

(1) The complex-level fee component of the management fee for the funds is calculated based upon the aggregate daily managed net assets of all Nuveen funds, with such daily managed net assets defined separately for each fund in its management agreement, but excluding assets attributable to investments in other Nuveen funds. For the complex-level and fund-level fee components, daily managed net assets, for funds that use financial leverage, includes assets managed by the Adviser that are attributable to such financial leverage. For these purposes, financial leverage includes the funds' use of preferred stock and borrowings and investments in the residual interest certificates (also called inverse floating rate securities) in tender option bond (TOB) trusts, including the portion of assets held by the TOB trust that has been effectively financed by the trust's issuance of floating rate securities, subject to an agreement by the Adviser to limit the amount of such assets for determining managed net assets in certain circumstances.

The management fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. The Funds pay no compensation directly to those of its Trustees who are affiliated with the Adviser or to its Officers, all of whom receive remuneration for their services to the Funds from the Adviser or its affiliates. The Board of Trustees has adopted a deferred compensation plan for independent Trustees that enables Trustees to elect to defer receipt of all or a portion of the annual compensation they are entitled to receive from certain Nuveen advised funds. Under the plan, deferred amounts are treated as though equal dollar amounts had been invested in shares of select Nuveen advised funds.

For the first ten years of Connecticut Dividend Advantage's (NFC) and Massachusetts Dividend Advantage's (NMB) operations, the Adviser has agreed to reimburse the Funds, as a percentage of average daily net assets, for fees and expenses in the amounts and for the time periods set forth below:

YEAR ENDING JANUARY 31,		YEAR ENDING JANUARY 31,			
2001*	.30%	2007	.25%		
2002	.30	2008	.20

Nuveen Investments 87

### | Notes to FINANCIAL STATEMENTS (continued)

The Adviser has not agreed to reimburse Connecticut Dividend Advantage 2 (NGK) for any portion of its fees and expenses beyond March 31, 2012.

For the first eight years of Connecticut Dividend Advantage 3's (NGO) operations, the Adviser has agreed to reimburse the Fund, as a percentage of average daily net assets, for fees and expenses in the amounts and for the time periods set forth below:

YEAR ENDING SEPTEMBER 30,		YEAR ENDING SEPTEMBER 30,			
2002*	.32%	2007	.32%		
2003	.32	2008	.24		
2004	.32	2009	.16		
2005	.32	2010	.08		
2006	.32				

<sup>\*</sup> From the commencement of operations.

The Adviser has not agreed to reimburse Connecticut Dividend Advantage 3 (NGO) for any portion of its fees and expenses beyond September 30, 2010.

For the first eight years of Insured Massachusetts Tax-Free Advantage's (NGX) operations, the Adviser has agreed to reimburse the Fund, as a percentage of average daily net assets, for fees and expenses in the amounts and for the time periods set forth below:

YEAR ENDING NOVEMBER 30,		YEAR ENDING NOVEMBER 30,			
2002*	.32%	2007	.32%		
2003	.32	2008	.24		
2004	.32	2009	.16		
2005	.32	2010	.08		
2006	.32				

<sup>\*</sup> From the commencement of operations.

The Adviser has not agreed to reimburse Insured Massachusetts Tax-Free Advantage (NGX) for any portion of its fees and expenses beyond November 30, 2010.

#### 8. NEW ACCOUNTING PRONOUNCEMENTS

Financial Accounting Standards Board Staff Position No. 157-4 (FSP No. 157-4)

During April 2009, the Financial Accounting Standards Board issued FSP No. 157-4, "Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly." FSP No. 157-4 provides additional guidance for estimating fair value in accordance with SFAS No. 157, "Fair Value Measurements," when the volume and level of activity for the asset or liability have significantly decreased. FSP No. 157-4 also requires additional disaggregation of the current SFAS No. 157 required disclosures. FSP No. 157-4 is effective for interim and annual reporting periods ending after June 15, 2009, and shall be applied prospectively. At this time, management is evaluating the implications of FSP No. 157-4 and the impact it will have on the financial statement disclosures.

Financial Accounting Standards Board Statement of Financial Accounting Standards No. 166 (SFAS No. 166)

During June 2009, the Financial Accounting Standards Board issued SFAS No. 166, "Accounting for Transfers of Financial Assets —an amendment of SFAS No. 140." The objective of SFAS No. 166 is to improve the relevance, representational faithfulness, and comparability of the information that a reporting entity provides in its financial statements about a transfer of financial assets; the effects of a transfer on its financial position, financial performance, and cash flows; and a transferor's continuing involvement, if any, in transferred financial assets.

#### 88 Nuveen Investments

SFAS No. 166 is effective as of the beginning of each reporting entity's first annual reporting period that begins after November 15, 2009, for interim periods within that first annual reporting period and for interim and annual reporting periods thereafter. Earlier application is prohibited. The recognition and measurement provisions of SFAS No. 166 must be applied to transfers occurring on or after the effective date. Additionally, the disclosure provisions of SFAS No. 166 should be applied to transfers that occurred both before and after the effective date of SFAS No. 166. At this time, management is evaluating the implications of SFAS No. 166 and the impact it will have on the financial statement amounts and disclosures, if any.

#### 9. SUBSEQUENT EVENTS

Distributions to Common Shareholders

The Funds declared Common share dividend distributions from their tax-exempt net investment income which were paid on July 1, 2009, to shareholders of record on June 15, 2009, as follows:

<sup>\*</sup> Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market

price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

Total Return Based on Common Share Net Asset Value is the combination of changes in Common share net asset value, reinvested dividend income at net asset value and reinvested capital gains distributions at net asset value, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending net asset value. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its net asset value), and therefore may be different from the price used in the calculation. Total returns are not annualized.

- After custodian fee credit and expense reimbursement, where applicable.
- The amounts shown are based on Common share equivalents.
- Ratios do not reflect the effect of dividend payments to Preferred shareholders; income ratios reflect income earned on assets attributable to Preferred shares.
- Interest expense arises from the application of SFAS No. 140 to certain inverse floating rate transactions entered into by the Fund as more fully described in Footnote 1 - Inverse Floating Rate Securities.

See accompanying notes to financial statements.

\* Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

Total Return Based on Common Share Net Asset Value is the combination of changes in Common share net asset value, reinvested dividend income at net asset value and reinvested capital gains distributions at net asset value, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending net asset value. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its net asset value), and therefore may be different from the price used in the calculation. Total returns are not annualized.

- \*\* After custodian fee credit and expense reimbursement, where applicable.
- \*\*\* Rounds to less than \$.01 per share.
- + The amounts shown are based on Common share equivalents.
- ++ Ratios do not reflect the effect of dividend payments to Preferred

shareholders; income ratios reflect income earned on assets attributable to Preferred shares.

(a) Interest expense arises from the application of SFAS No. 140 to certain inverse floating rate transactions entered into by the Fund as more fully described in Footnote 1 - Inverse Floating Rate Securities.

#### Board Members & Officers

The management of the Funds, including general supervision of the duties performed for the Funds by the Adviser, is the responsibility of the Board Members of the Funds. The number of board members of the Fund is currently set at nine. None of the board members who are not "interested" persons of the Funds (referred to herein as "independent board members") has ever been a director or employee of, or consultant to, Nuveen or its affiliates. The names and business addresses of the board members and officers of the Funds, their principal occupations and other affiliations during the past five years, the number of portfolios each oversees and other directorships they hold are set forth below.

- Board Members serve three year terms, except for two board members who are elected by the holders of Preferred Shares. The Board of Trustees is divided into three classes, Class I, Class II, and Class III, with each being elected to serve until the third succeeding annual shareholders' meeting subsequent to its election or thereafter in each case when its respective successors are duly elected or appointed, except two board members are elected by the holders of Preferred Shares to serve until the next annual shareholders' meeting subsequent to its election or thereafter in each case when its respective successors are duly elected or appointed. The first year elected or appointed represents the year in which the board member was first elected or appointed to any fund in the Nuveen Complex.
- Mr. Amboian is an interested trustee because of his position with Nuveen (2) Investments, Inc. and certain of its subsidiaries, which are affiliates of the Nuveen Funds.
- (3) Nuveen Advisory Corp. and Nuveen Institutional Advisory Corp. were reorganized into Nuveen Asset Management, effective January 1, 2005.
- Officers serve one year terms through July of each year. The year first elected or appointed represents the year in which the Officer was first elected or appointed to any fund in the Nuveen Complex.

102 Nuveen Investments

Annual Investment Management Agreement Approval Process

The Investment Company Act of 1940, as amended (the "1940 Act"), provides, in

substance, that each investment advisory agreement between a fund and its investment adviser will continue in effect from year to year only if its continuance is approved at least annually by the fund's board members, including by a vote of a majority of the board members who are not parties to the advisory agreement or "interested persons" of any parties (the "Independent Board Members"), cast in person at a meeting called for the purpose of considering such approval. In connection with such approvals, the fund's board members must request and evaluate, and the investment adviser is required to furnish, such information as may be reasonably necessary to evaluate the terms of the advisory agreement. Accordingly, at a meeting held on May 27-29, 2009 (the "May Meeting"), the Boards of Trustees or Directors (as the case may be) (each a "Board" and each Trustee or Director, a "Board Member") of the Funds, including a majority of the Independent Board Members, considered and approved the continuation of the advisory agreements (each an "Advisory Agreement") between each Fund and Nuveen Asset Management ("NAM") for an additional one-year period. In preparation for their considerations at the May Meeting, the Board also held a separate meeting on April 21-22, 2009 (the "April Meeting"). Accordingly, the factors considered and determinations made regarding the renewals by the Independent Board Members include those made at the April Meeting.

In addition, in evaluating the Advisory Agreements, the Independent Board Members reviewed a broad range of information relating to the Funds and NAM, including absolute performance, fee and expense information for the Funds as well as comparative performance, fee and expense information for a comparable peer group of funds, the performance information of recognized and/or customized benchmarks (as applicable) of the Funds, the profitability of Nuveen for its advisory activities (which includes its wholly owned subsidiaries other than Winslow Capital Management, Inc. ("Winslow Capital") which was recently acquired in December 2008), and other information regarding the organization, personnel, and services provided by NAM. The Independent Board Members also met quarterly as well as at other times as the need arose during the year and took into account the information provided at such meetings and the knowledge gained therefrom. Prior to approving the renewal of the Advisory Agreements, the Independent Board Members reviewed the foregoing information with their independent legal counsel and with management, reviewed materials from independent legal counsel describing applicable law and their duties in reviewing advisory contracts, and met with independent legal counsel in private sessions without management present. The Independent Board Members considered the legal advice provided by independent legal counsel and relied upon their knowledge of NAM, its services and the Funds resulting from their meetings and other interactions throughout the year and their own business judgment in determining the factors to be considered in evaluating the

Nuveen Investments 103

Annual Investment Management Agreement Approval Process (continued)

Advisory Agreements. Each Board Member may have accorded different weight to the various factors in reaching his or her conclusions with respect to a Fund's Advisory Agreement. The Independent Board Members did not identify any single factor as all-important or controlling. The Independent Board Members' considerations were instead based on a comprehensive consideration of all the information presented. The principal factors considered by the Board and its conclusions are described below.

### A. NATURE, EXTENT AND QUALITY OF SERVICES

In considering renewal of the Advisory Agreements, the Independent Board Members considered the nature, extent and quality of NAM's services, including advisory services and administrative services. The Independent Board Members reviewed

materials outlining, among other things, NAM's organization and business; the types of services that NAM or its affiliates provide and are expected to provide to the Funds; the performance record of the applicable Fund (as described in further detail below); and any initiatives Nuveen had taken for the applicable fund product line.

In reviewing the services provided and the initiatives undertaken during the past year, the Independent Board Members recognized the severe market turmoil experienced in the capital markets during recent periods, including sustained periods of high volatility, credit disruption and government intervention. The Independent Board Members considered NAM's efforts, expertise and other actions taken to address matters as they arose that impacted the Funds. The Independent Board Members recognized the role of the Investment Services group which, among other things, monitors the various positions throughout the Nuveen fund complex to identify and address any systematic risks. In addition, the Capital Markets Committee of NAM provides a multi-departmental venue for developing new policies to mitigate any risks. The Independent Board Members further recognized NAM's continuous review of the Funds' investment strategies and mandates in seeking to continue to refine and improve the investment process for the Funds, particularly in light of market conditions. With respect to closed-end funds that issued auction rate preferred shares ("ARPs") or that otherwise utilize leverage, the Independent Board Members noted, in particular, NAM's efforts in refinancing the preferred shares of such funds frozen by the collapse of the auction rate market and managing leverage during a period of rapid market declines, particularly for the non-equity funds. Such efforts included negotiating and maintaining the availability of bank loan facilities and other sources of credit used for investment purposes or to satisfy liquidity needs, liquidating portfolio securities during difficult times to meet leverage ratios, and seeking alternative forms of debt and other leverage that may over time reduce financing costs associated with ARPs and enable the funds that have issued ARPs to restore liquidity to ARPs holders. The Independent Board Members also noted Nuveen's continued commitment and efforts to keep investors and financial advisers informed as to its progress with the ARPs through, among other things, conference calls, emails, press releases, information posted on its website, and telephone calls and in-person meetings with financial advisers. In addition to the foregoing, the Independent Board Members also noted the additional services that NAM or its affiliates provide to closed-end funds, including, in particular, Nuveen's continued commitment to supporting the secondary market for the common shares of its closed-

104 Nuveen Investments

end funds through a variety of programs designed to raise investor and analyst awareness and understanding of closed-end funds. These efforts include maintaining an investor relations program to timely provide information and education to financial advisers and investors; providing advertising and marketing for the closed-end funds; maintaining websites; and providing educational seminars.

As part of their review, the Independent Board Members also evaluated the background, experience and track record of NAM's investment personnel. In this regard, the Independent Board Members considered any changes in the personnel, and the impact on the level of services provided to the Funds, if any. The Independent Board Members also reviewed information regarding portfolio manager compensation arrangements to evaluate NAM's ability to attract and retain high quality investment personnel, preserve stability, and reward performance but not provide an incentive for taking undue risks.

In addition to advisory services, the Independent Board Members considered the quality of administrative services provided by NAM and its affiliates including

product management, fund administration, oversight of service providers, shareholder services, administration of Board relations, regulatory and portfolio compliance and legal support. Given the importance of compliance, the Independent Board Members considered NAM's compliance program, including the report of the chief compliance officer regarding the Funds' compliance policies and procedures.

Based on their review, the Independent Board Members found that, overall, the nature, extent and quality of services provided (and expected to be provided) to the respective Funds under the Advisory Agreements were satisfactory.

#### B. THE INVESTMENT PERFORMANCE OF THE FUNDS AND NAM

The Board considered the investment performance of each Fund, including the Fund's historic performance as well as its performance compared to funds with similar investment objectives (the "Performance Peer Group") based on data provided by an independent provider of mutual fund data as well as recognized and/or customized benchmarks (as applicable). The Independent Board Members reviewed performance information including, among other things, total return information compared with the Fund's Performance Peer Group and recognized and/or customized benchmarks (as applicable) for the quarter-, one-, three- and five-year periods (as applicable) ending December 31, 2008 and for the same periods (as applicable) ending March 31, 2009. The Independent Board Members also reviewed performance information of the Funds managed by NAM in the aggregate ranked by peer group and the performance of such Funds, in the aggregate, relative to their benchmark. This information supplemented the Fund performance information provided to the Board at each of its quarterly meetings.

In comparing a Fund's performance with that of its Performance Peer Group, the Independent Board Members took into account that the closest Performance Peer Group in certain instances may not adequately reflect the respective fund's investment objectives and strategies thereby hindering a meaningful comparison of the fund's performance with that of the Performance Peer Group. The Independent Board Members further considered the performance of the Funds in the context of the volatile

Nuveen Investments 105

Annual Investment Management Agreement Approval Process (continued)

market conditions during the past year, and their impact on various asset classes and the portfolio management of the Funds.

Based on their review and factoring in the severity of market turmoil in 2008, the Independent Board Members determined that each Fund's investment performance over time had been satisfactory.

### C. FEES, EXPENSES AND PROFITABILITY

### 1. FEES AND EXPENSES

The Board evaluated the management fees and expenses of each Fund reviewing, among other things, such Fund's gross management fees, net management fees and total expense ratios (before and after expense reimbursements and/or waivers) in absolute terms as well as compared to the fee and expenses of a comparable universe of unaffiliated funds based on data provided by an independent fund data provider (the "Peer Universe") and in certain cases, to a more focused subset of funds in the Peer Universe (the "Peer Group").

The Independent Board Members further reviewed data regarding the construction of the applicable Peer Universe and Peer Group. In reviewing the comparisons of fee and expense information, the Independent Board Members took into account that in certain instances various factors such as the asset level of the Fund relative to peers, the size and particular composition of the Peer Universe or Peer Group, the investment objectives of the peers, expense anomalies, changes in the funds comprising the Peer Universe or Peer Group from year to year, levels of reimbursement and the timing of information used may impact the comparative data, thereby limiting the ability to make a meaningful comparison. In addition, the Independent Board Members considered, among other things, the differences in the use and type of leverage compared to the peers. The Independent Board Members also considered the differences in the states reflected in the respective Peer Group. In reviewing the fee schedule for a Fund, the Independent Board Members also considered the fund-level and complex-wide breakpoint schedules (described in further detail below) and any fee waivers and reimbursements provided by Nuveen (applicable, in particular, for certain closed-end funds launched since 1999).

Based on their review of the fee and expense information provided, the Independent Board Members determined that each Fund's management fees and net total expense ratio were reasonable in light of the nature, extent and quality of services provided to the Fund.

#### 2. COMPARISONS WITH THE FEES OF OTHER CLIENTS

The Independent Board Members further reviewed information regarding the nature of services and fee rates offered by NAM to other clients. Such other clients include NAM's municipal separately managed accounts. In evaluating the comparisons of fees, the Independent Board Members noted that the fee rates charged to the Funds and other clients vary, among other things, because of the different services involved and the additional regulatory and compliance requirements associated with registered investment companies, such as the Funds. Accordingly, the

#### 106 Nuveen Investments

Independent Board Members considered the differences in the product types, including, but not limited to, the services provided, the structure and operations, product distribution and costs thereof, portfolio investment policies, investor profiles, account sizes and regulatory requirements. The Independent Board Members noted, in particular, that the range of services provided to the Funds (as discussed above) is much more extensive than that provided to separately managed accounts. Given the inherent differences in the products, particularly the extensive services provided to the Funds, the Independent Board Members believe such facts justify the different levels of fees.

#### 3. PROFITABILITY OF NUVEEN

In conjunction with its review of fees, the Independent Board Members also considered the profitability of Nuveen for its advisory activities (which incorporated Nuveen's wholly-owned affiliated sub-advisers other than Winslow Capital) and its financial condition. The Independent Board Members reviewed the revenues and expenses of Nuveen's advisory activities for the last two years, the allocation methodology used in preparing the profitability data and an analysis of the key drivers behind the changes in revenues and expenses that impacted profitability in 2008. In addition, the Independent Board Members reviewed information regarding the financial results of Nuveen for 2008 based on its Form 8-K filed on March 31, 2009.

The Independent Board Members noted this information supplemented the profitability information requested and received during the year to help keep them apprised of developments affecting profitability (such as changes in fee waivers and expense reimbursement commitments). In this regard, the Independent Board Members noted that they had also appointed an Independent Board Member as a point person to review and keep them apprised of changes to the profitability analysis and/or methodologies during the year. The Independent Board Members also considered Nuveen's revenues for advisory activities, expenses, and profit margin compared to that of various unaffiliated management firms with similar amounts of assets under management and relatively comparable asset composition prepared by Nuveen.

In reviewing profitability, the Independent Board Members recognized the subjective nature of determining profitability which may be affected by numerous factors including the allocation of expenses. Further, the Independent Board Members recognized the difficulties in making comparisons as the profitability of other advisers generally is not publicly available and the profitability information that is available for certain advisers or management firms may not be representative of the industry and may be affected by, among other things, the adviser's particular business mix, capital costs, types of funds managed and expense allocations. Notwithstanding the foregoing, the Independent Board Members reviewed Nuveen's methodology and assumptions for allocating expenses across product lines to determine profitability. In reviewing profitability, the Independent Board Members recognized Nuveen's investment in its fund business.

Based on its review, the Independent Board Members concluded that Nuveen's level of profitability for its advisory activities was reasonable in light of the services provided.

Nuveen Investments 107

Annual Investment Management Agreement Approval Process (continued)

In evaluating the reasonableness of the compensation, the Independent Board Members also considered other amounts paid to NAM by the Funds as well as any indirect benefits (such as soft dollar arrangements, if any) NAM and its affiliates receive, or are expected to receive, that are directly attributable to the management of the Funds, if any. See Section E below for additional information on indirect benefits NAM may receive as a result of its relationship with the Funds. Based on their review of the overall fee arrangements of each Fund, the Independent Board Members determined that the advisory fees and expenses of the respective Fund were reasonable.

### D. ECONOMIES OF SCALE AND WHETHER FEE LEVELS REFLECT THESE ECONOMIES OF SCALE

With respect to economies of scale, the Independent Board Members have recognized the potential benefits resulting from the costs of a fund being spread over a larger asset base, although economies of scale are difficult to measure and predict with precision, particularly on a fund-by-fund basis. One method to help ensure the shareholders share in these benefits is to include breakpoints in the advisory fee schedule. Generally, management fees for funds in the Nuveen complex are comprised of a fund-level component and a complex-level component, subject to certain exceptions. Accordingly, the Independent Board Members reviewed and considered the applicable fund-level breakpoints in the advisory fee schedules that reduce advisory fees as asset levels increase. In this regard, the Independent Board Members noted that

although closed-end funds may from time-to-time make additional share offerings, the growth of their assets will occur primarily through the appreciation of such funds' investment portfolio. While economies of scale result when costs can be spread over a larger asset base, the Independent Board Members recognized that the asset levels generally declined in 2008 due to, among other things, the market downturn. Accordingly, for Funds with a reduction in assets under management, advisory fee levels may have increased as breakpoints in the fee schedule were no longer surpassed.

In addition to fund-level advisory fee breakpoints, the Board also considered the Funds' complex-wide fee arrangement. Pursuant to the complex-wide fee arrangement, the fees of the funds in the Nuveen complex generally are reduced as the assets in the fund complex reach certain levels. The complex-wide fee arrangement seeks to provide the benefits of economies of scale to fund shareholders when total fund complex assets increase, even if assets of a particular fund are unchanged or have decreased. The approach reflects the notion that some of Nuveen's costs are attributable to services provided to all its funds in the complex and therefore all funds benefit if these costs are spread over a larger asset base. Generally, the complex-wide pricing reduces Nuveen's revenue because total complex fund assets have consistently grown in prior years. As noted, however, total fund assets declined in 2008 resulting in a smaller downward adjustment of revenues due to complex-wide pricing compared to the prior year.

#### 108 Nuveen Investments

Based on their review, the Independent Board Members concluded that the breakpoint schedules and complex-wide fee arrangement were acceptable and reflect economies of scale to be shared with shareholders when assets under management increase.

### E. INDIRECT BENEFITS

In evaluating fees, the Independent Board Members received and considered information regarding potential "fall out" or ancillary benefits NAM or its affiliates may receive as a result of its relationship with each Fund. In this regard, the Independent Board Members considered revenues received by affiliates of NAM for serving as agent at Nuveen's trading desk.

In addition to the above, the Independent Board Members considered whether NAM received any benefits from soft dollar arrangements whereby a portion of the commissions paid by a Fund for brokerage may be used to acquire research that may be useful to NAM in managing the assets of the Funds and other clients. The Independent Board Members noted that NAM does not currently have any soft dollar arrangements; however, to the extent certain bona fide agency transactions that occur on markets that traditionally trade on a principal basis and riskless principal transactions are considered as generating "commissions," NAM intends to comply with the applicable safe harbor provisions.

Based on their review, the Independent Board Members concluded that any indirect benefits received by NAM as a result of its relationship with the Funds were reasonable and within acceptable parameters.

### F. OTHER CONSIDERATIONS

The Independent Board Members did not identify any single factor discussed previously as all-important or controlling. The Board Members, including the Independent Board Members, unanimously concluded that the terms of the Advisory Agreements are fair and reasonable, that NAM's fees are reasonable in light of the services
