Alamo Group Inc. and Subsidiaries
Notes to Interim Condensed Consolidated Financial Statements - (Unaudited)
September 30, 2016

1. Basis of Financial Statement Presentation

The accompanying unaudited interim condensed consolidated financial statements of Alamo Group Inc. and its subsidiaries (the "Company") have been prepared in accordance with U.S. generally accepted accounting principles ("GAAP") for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulations S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the periods presented are not necessarily indicative of the results that may be expected for the year ending December 31, 2016. The balance sheet at December 31, 2015 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by U.S. GAAP for complete financial statements. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's annual report on Form 10-K for the year ended December 31, 2015.

In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2014-09, "Revenue from Contracts with Customers" (Topic 606), which supersedes the revenue recognition requirements in Accounting Standards Codification ("ASC") Topic 605, "Revenue Recognition," and most industry-specific guidance. This ASU is based on the principle that revenue is recognized to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The ASU also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments, and assets recognized from costs incurred to obtain or fulfill a contract. This update is effective as of January 1, 2018, with early adoption permitted as of January 1, 2017. This update could impact the timing and amounts of revenue recognized. We are evaluating the effects, if any, that adoption of this guidance will have on our consolidated financial statements and have not yet selected a transition approach to implement the standard.

In July 2015, the FASB issued ASU No. 2015-11, "Simplifying the Measurement of Inventory," as part of its simplification initiative. ASU 2015-11 amends existing guidance for measuring inventories. This amendment will require the Company to measure inventories recorded using the first-in, first-out method at the lower of cost and net realizable value. This amendment does not change the methodology for measuring inventories recorded using the last-in, first-out method. This amendment will be effective prospectively for the Company on January 1, 2017, with early adoption permitted. We are evaluating the effect this guidance will have on our consolidated financial statements.

In February 2016, the FASB issued ASU No. 2016-02, "Leases." This update requires that a lessee recognize in the statement of financial position a liability to make lease payments and a right-of-use asset representing its right to use the underlying asset for the lease term. For leases with a term of 12 months or less, a lessee is permitted to make an accounting policy election by class of underlying asset not to recognize lease assets and lease liabilities. Similar to current guidance, the update continues to differentiate between finance leases and operating leases, however this distinction now primarily relates to differences in the manner of expense recognition over time and in the classification of lease payments in the statement of cash flows. The updated guidance leaves the accounting for leases by lessors largely unchanged from existing GAAP. Early application is permitted. Entities are required to use a modified retrospective adoption, with certain relief provisions, for leases that exist or are entered into after the beginning of the earliest comparative period in the financial statements when adopted. The guidance will become effective for us on January 1, 2019. The impacts that adoption of the ASU is expected to have on our consolidated

financial statements and related disclosures are being evaluated. Additionally, we have not determined the effect of the ASU on our internal control over financial reporting or other changes in business practices and processes.

In March 2016, the FASB issued ASU No. 2016-09, "Compensation-Stock Compensation," to simplify the accounting and reporting for employee share-based payments. This amendment involves several aspects of the accounting for share-based payment transactions, including accounting for income taxes as it pertains to the timing of when excess tax benefits are recognized and to the recognition of excess tax benefits and tax deficiencies in the statements of income, forfeitures, minimum statutory tax withholding requirements, as well as classification of

excess tax benefits and employee taxes paid in the statement of cash flows. This amendment will be effective for annual periods beginning after December 15, 2016, and interim periods within those annual periods, with early adoption permitted. An entity that elects early adoption must adopt all of the amendments in the same period. The amendments provide specific transition and disclosure guidance for each provision. The Company has not yet evaluated the effect the adoption of this ASU will have on its consolidated financial statements.

In June 2016, the FASB issued ASU No. 2016-13, "Financial Instruments - Credit Losses," to improve information on credit losses for financial instruments. The ASU replaces the current incurred loss impairment methodology with a methodology that reflects expected credit losses. The ASU is effective for the Company for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. Early adoption is permitted beginning in fiscal years beginning after December 18, 2018. The Company has not yet evaluated the effect the adoption of this ASU will have on its consolidated financial statements.

In August 2016, the FASB issued ASU No. 2016-15, "Statement of Cash Flows - Classification of Certain Cash Receipts and Cash Payments," to address diversity in practice on certain specific cash flow issues. The ASU is effective for the Company for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Early adoption is permitted. The Company does not expect the adoption to have an effect on the consolidated financial statements.

2. Accounting Policies

There have been no changes or additions to our significant accounting policies described in Note 1 to the Consolidated Financial Statements in the Company's 2015 10-K.

3. Accounts Receivable

Accounts receivable is shown net of sales discounts and the allowance for doubtful accounts.

At September 30, 2016 the Company had \$13,000,000 in reserves for sales discounts compared to \$15,094,000 at December 31, 2015 on products shipped to our customers under various promotional programs. The decrease was primarily due to additional discounts taken on the Company's agricultural products during the pre-season, which runs from August to December of each year and orders are shipped through the second quarter of 2016. The Company reviews the reserve quarterly based on analysis made on each program outstanding at the time.

The allowance for doubtful accounts was \$3,380,000 at September 30, 2016 and \$3,484,000 at December 31, 2015.

4. Inventories

Inventories valued at LIFO cost represented 49% and 45% of total inventory at September 30, 2016 and December 31, 2015, respectively. The excess of current cost over LIFO valued inventories was approximately \$8,712,000 at September 30, 2016 and December 31, 2015. An actual valuation of inventory under the LIFO method is made only at the end of each year based on the inventory levels and costs at that time. Accordingly, interim LIFO must necessarily be based, to some extent, on management's estimates at each quarter end. Net inventories consist of the following:

	September 30, December 31,	
(in thousands)	2016	2015
Finished goods	\$ 133,396	\$ 129,995
Work in process	8,788	9,561
Raw materials	12,420	11,202
Total inventory	\$ 154,604	\$ 150,758

Inventory obsolescence reserves were \$7,703,000 at September 30, 2016 and \$9,675,000 at December 31, 2015. The decrease in reserve for obsolescence resulted from the Company's write-off of previously reserved inventory.

5. Rental Equipment

Rental equipment is shown net of accumulated depreciation of \$9,667,000 and \$8,322,000 at September 30, 2016 and December 31, 2015, respectively. The Company recognized depreciation expense of \$1,508,000 and \$2,018,000 for the three months ended September 30, 2016 and September 30, 2015, respectively and \$4,951,000 and \$5,683,000 for the nine months ended September 30, 2016 and September 30, 2015, respectively.

6. Fair Value Measurements

The carrying values of certain financial instruments, including cash and cash equivalents, accounts receivable, accounts payable, and accrued expenses, approximate their fair value because of the short-term nature of these items. The carrying value of our debt approximates the fair value as of September 30, 2016 and December 31, 2015, as the floating rates on our outstanding balances approximate current market rates. This conclusion was made based on Level 2 inputs.

7. Goodwill and Intangible Assets

The following is the summary of changes to the Company's Goodwill for the nine months ended September 30, 2016: (in thousands)

Balance at December 31, 2015	\$75,509
Goodwill acquired	—
Translation adjustments	374
Balance at September 30, 2016	\$75,883

As of September 30, 2016, the Company had \$75,883,000 of goodwill, which represents 12% of total assets.

The following is a summary of the Company's definite and indefinite-lived intangible assets net of the accumulated amortization:

(in thousands)	Estimated Useful Lives	September 30, 2016	December 31, 2015
Definite:			
Trade names and trademarks	25 years	\$ 21,942	\$ 21,878
Customer and dealer relationships	14 years	28,910	28,715
Patents and drawings	3-12 years	1,964	1,893
Total at cost		52,816	52,486
Less accumulated amortization		(7,395)	(5,036)
Total net		45,421	47,450
Indefinite:			
Trade names and trademarks		5,500	5,500
Total Intangible Assets		\$ 50,921	\$ 52,950

The Company recognized amortization expense of \$779,000 and \$776,000 for the three months ending September 30, 2016 and 2015, respectively and \$2,328,000 and \$2,339,000 for the nine months ended September 30, 2016 and 2015, respectively.

As of September 30, 2016, the Company had \$50,921,000 of intangible assets, which represents 8% of total assets.

8. Warranty

Warranty reserve, as a percentage of sales, is generally calculated by looking at the current twelve months' expenses and prorating that amount based on twelve months' sales with a ninety-day to six-month lag period. The Company's historical experience is that an end-user takes approximately 90 days to six months from the receipt of the unit to file a warranty claim. A warranty reserve is established for each different marketing group. Reserve balances are evaluated on a quarterly basis and adjustments made when required.

The current liability warranty reserve balance was \$5,235,000 at September 30, 2016 and \$5,566,000 at December 31, 2015 and is included in Accrued liabilities on the Balance Sheet. The decrease was mainly from the Company's U.S. Operations.

9. Debt

The components of long-term debt are as follows:

(in thousands)	September 30, December 31,	
	2016	2015
Current Maturities:		
Capital lease obligations	\$ —	\$ 17
Other notes payable	1,372	60
	1,372	77
Long-term debt:		
Bank revolving credit facility	134,000	144,000
Capital lease obligations	1	6
Other notes payable	17	—
	134,018	144,006
Total debt	\$ 135,390	\$ 144,083

As of September 30, 2016, \$1,311,000 of the revolver capacity was committed to irrevocable standby letters of credit issued in the ordinary course of business as required by vendors' contracts, resulting in \$114,689,000 in available borrowings. As of September 30, 2016, the Company was in compliance with the covenants under the Agreement.

10. Common Stock and Dividends

Dividends declared and paid on a per share basis were as follows:

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
Dividends declared	\$0.09	\$0.08	\$0.27	\$0.24
Dividends paid	\$0.09	\$0.08	\$0.27	\$0.24

On October 3, 2016, the Company announced that its Board of Directors had declared a quarterly cash dividend of \$0.09 per share, which was paid on October 28, 2016, to shareholders of record at the close of business on October 14, 2016.

11. Stock-Based Compensation

The Company's stock-based compensation expense was \$351,000 and \$296,000 for the three months ended September 30, 2016 and 2015, respectively and \$1,075,000 and \$762,000 for the nine months ended September 30, 2016 and 2015, respectively.

12. Earnings Per Share

The following table sets forth the reconciliation from basic to diluted average common shares and the calculations of net income per common share. Net income for basic and diluted calculations do not differ.

(In thousands, except per share)	Three Months		Nine Months	
	Ended		Ended	
	September 30,		September 30,	
	2016	2015	2016	2015
Net Income	\$13,236	\$14,756	\$32,457	\$31,825
Average Common Shares:				
Basic (weighted-average outstanding shares)	11,460	11,380	11,424	11,337
Dilutive potential common shares from stock options	135	116	127	140
Diluted (weighted-average outstanding shares)	11,595	11,496	11,551	11,477
Basic earnings per share	\$1.15	\$1.30	\$2.84	\$2.81
Diluted earnings per share	\$1.14	\$1.28	\$2.81	\$2.77

13. Segment Reporting

At September 30, 2016 the following includes a summary of the unaudited financial information by reporting segment:

(in thousands)	Three Months		Nine Months	
	Ended		Ended	
	September 30,		September 30,	
	2016	2015	2016	2015
Net Sales				
Industrial	\$121,205	\$127,385	\$361,629	\$362,818
Agricultural	56,443	58,919	156,950	160,357
European	39,118	45,310	120,647	131,971
Consolidated	\$216,766	\$231,614	\$639,226	\$655,146

Income from Operations

14. Contingent Matters

Like other manufacturers, the Company is subject to a broad range of federal, state, local and foreign laws and requirements, including those concerning air emissions, discharges into waterways, and the generation, handling, storage, transportation, treatment and disposal of hazardous substances and waste materials, as well as the remediation of contamination associated with releases of hazardous substances at the Company's facilities and off-site disposal locations, workplace safety and equal employment opportunities. These laws and regulations are constantly changing, and it is impossible to predict with accuracy the effect that changes to such laws and regulations may have on the Company in the future. Like other industrial concerns, the Company's manufacturing operations entail the risk of noncompliance, and there can be no assurance that the Company will not incur material costs or other liabilities as a result thereof.

The Company knows that its Indianola, Iowa property is contaminated with chromium which most likely resulted from chrome plating operations which were discontinued before the Company purchased the property. Chlorinated volatile organic compounds have also been detected in water samples on the property, though the source is unknown at this time. The Company voluntarily worked with an environmental consultant and the state of Iowa with respect to these issues and believes it completed its remediation program in June 2006. The work was accomplished within the Company's environmental liability reserve balance. We requested a "no further action" classification from the state. We received a conditional "no further action" letter in January of 2009. When we demonstrate stable or improving conditions below residential standards for a certain period of time by monitoring existing wells, we will request an unconditional "no further action" letter.

Alamo Group Inc. and Bush Hog, Inc. were added as defendants in 2013 to litigation by Deere & Company as plaintiff against Bush Hog, LLC (now Duroc, LLC) and Great Plains Manufacturing Incorporated, in which Deere alleged infringement of a mower-related patent. The jury concluded that not only did the defendants not infringe the patent, but that the patent was invalid as well. The Company expensed \$2,100,000 in legal fees related to this lawsuit in 2013. Deere & Company appealed and requested a new trial. A hearing on the appeal was held on October 8, 2015. On May 26, 2016 the Federal Circuit Court of Appeals affirmed the lower court ruling and validating the jury's finding that the defendants did not infringe the patent, and that the Deere & Company patent was invalid. This matter has been finally adjudicated and is no longer subject to further appeal by Deere & Company or any other parties.

Certain assets of the Company contain asbestos that may have to be remediated over time. The Company believes that any subsequent change in the liability associated with the asbestos removal will not have a material adverse effect on the Company's consolidated financial position or results of operations.

The Company is subject to various other federal, state, and local laws affecting its business, as well as a variety of regulations relating to such matters as working conditions, equal employment opportunities, and product safety. A variety of state laws regulate the Company's contractual relationships with its dealers, some of which impose restrictive standards on the relationship between the Company and its dealers, including events of default, grounds for termination, non-renewal of dealer contracts, and equipment repurchase requirements. The Company believes it is currently in material compliance with all such applicable laws and regulations.

15. Retirement Benefit Plans

Defined Benefit Plan

The following tables present the components of net periodic benefit cost (gains are denoted with parentheses and losses are not):

(in thousands)	Nine Months Ended September 30, 2016		
	Hourly Employees' Pension Plan	Hourly Employees' Retirement Plan	Total
Service cost	\$ 6	\$ 3	\$ 9
Interest cost	300	666	966
Expected return on plan assets	(486)	(898)	(1,384)
Amortization of net loss	213	330	543
Net periodic benefit cost	\$ 33	\$ 101	\$ 134

(in thousands)	Nine Months Ended September 30, 2015		
	Hourly Employees' Pension Plan	Hourly Employees' Retirement Plan	Total
Service cost	\$ 6	\$ 3	\$ 9
Interest cost	303	651	954
Expected return on plan assets	(495)	(921)	(1,416)
Amortization of net loss	186	300	486
Net periodic benefit cost	\$ —	\$ 33	\$ 33

The Company amortizes annual pension expense evenly over four quarters. Pension expense was \$45,000 and \$11,000 the three months ended September 30, 2016 and September 30, 2015, respectively. Pension expense for the nine months ended September 30, 2016 was \$134,000 and \$33,000 for the nine months ending September 30, 2015. The Company is not required to contribute to the pension plans for the 2016 plan year but may do so.

On April 6, 2016 we notified all participants in the Gradall Company Hourly Employees' Pension Plan of our decision to terminate the plan. Participants in the plan will not lose any benefits but will be given a choice between obtaining certain continued annuity benefits that match the benefits offered under the plan or receiving an immediate one-time lump sum payment in total settlement of benefits. We currently anticipate that we will be able to meet all legal requirements to effectuate a proper termination of the plan on or before December 31, 2016.

Supplemental Retirement Plan

In May of 2015, the Board amended the SERP to allow the Board to modify the retirement benefit percentage either higher or lower than 20%. In May of 2016, the Board added additional highly compensated employees to the plan. As of September 30, 2016, the current retirement benefit (as defined in the plan) for the participants ranges from 10% to 20%.

The net period expense for the three months ended September 30, 2016 and 2015 was \$148,000 and \$150,000, respectively and \$443,000 and \$450,000 for the nine months ended September 30, 2016 and 2015, respectively.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following tables set forth, for the periods indicated, certain financial data:

As a Percent of Net Sales	Three Months Ended September 30,		Nine Months Ended September 30,	
	2016	2015	2016	2015
Industrial	55.9 %	55.0 %	56.6 %	55.4 %
Agricultural	26.0 %	25.4 %	24.5 %	24.5 %
European	18.1 %	19.6 %	18.9 %	20.1 %
Total sales, net	100.0 %	100.0 %	100.0 %	100.0 %

Cost Trends and Profit Margin, as Percentages of Net Sales	Three Months Ended September 30,		Nine Months Ended September 30,	
	2016	2015	2016	2015
Gross profit	25.2 %	24.8 %	24.6 %	23.5 %
Income from operations	9.7 %	10.2 %	8.7 %	8.0 %
Income before income taxes	9.1 %	9.9 %	8.0 %	7.5 %
Net income	6.1 %	6.4 %	5.1 %	4.9 %

Overview

This report contains forward-looking statements that are based on Alamo Group's current expectations. Actual results in future periods may differ materially from those expressed or implied because of a number of risks and uncertainties which are discussed below and in the Forward-Looking Information section.

For the first nine months of 2016, the Company's net income was up approximately 2.0% when compared to the same period in 2015. This increase was primarily the result of continued improvement in production efficiencies, lower material costs and control of operating expenses. Negatively influencing both our sales and profits was the effect of the currency translation rates on our non-U.S. results. Alamo's Industrial Division saw less than a 1.0% decrease in sales for the first nine months of 2016 as sales of mowing, excavator, sweeping equipment and to a lesser extent, snow removal products outperformed the same period in 2015, while sales of vacuum trucks declined during the first nine months of 2016 compared to the same period in 2015. Agricultural sales were down in the first nine months of 2016 by 2.1% compared to the first nine months of 2015 as soft market conditions continue to affect the agricultural market. European sales for the first nine months of 2016 were down in U.S. dollars by 8.6% compared to the same period in 2015. Consolidated income from operations was up 6.2% in the first nine months of 2016 as compared to the same period in 2015. The Company's backlog was \$137 million at the end of the first nine months of 2016, which was down 21.5% versus the backlog of \$175 million at the end of the first nine months of 2015. The decrease in the Company's backlog was primarily attributable to softness in the Industrial Division's vacuum truck orders from non-governmental end users, weak markets in the Agricultural Division and challenging economic conditions and unfavorable foreign currency translation affecting new orders in the European Division, and to a lesser extent, high prior year backlogs of

initial orders related to new product introductions.

The Company believes that its markets for the remainder of 2016 will remain soft and could be negatively affected by a variety of factors such as a continued weakness in the overall economy, sovereign debt issues, credit availability, changes in currency exchange rates, increased levels of government regulations; ongoing weakness in the agricultural sector; changes in farm incomes due to commodity prices or governmental aid programs; adverse situations that could affect our customers such as animal disease epidemics, extreme weather conditions; repercussions from the proposed exit by the U.K. from the European Union (Brexit); budget constraints or revenue

shortfalls in governmental entities and changes in our customers' buying habits due to lack of confidence in the economic outlook.

Results of Operations

Three Months Ended September 30, 2016 vs. Three Months Ended September 30, 2015

Net sales for the third quarter of 2016 were \$216,766,000, a decrease of \$14,848,000, or 6.4% compared to \$231,614,000 for the third quarter of 2015. The decrease was mainly attributable to weak demand for vacuum trucks, soft agricultural markets, continued weakness in the European economy and currency translation effects all of which continued to negatively impact our sales. Sales in the Industrial Division were down 4.9% as increased sales of sweepers, mowing equipment and snow removal equipment failed to offset decreased sales of vacuum trucks due to soft non-governmental demand. Sales in the Agricultural Division were down 4.2% during the quarter as continued weakness in the agricultural market and low commodity prices impacted this Division. European sales were down 13.7% as currency translation rates negatively affected the sales of U.K. and European products.

Net Industrial sales decreased during the third quarter by \$6,180,000 or 4.9% to \$121,205,000 for 2016 compared to \$127,385,000 during the same period in 2015. The decrease was due to softness in the vacuum trucks market to non-governmental end users. Increases in sweepers, excavators, mowing equipment and to a lesser extent, snow removal equipment were not enough to offset the lower vacuum truck sales.

Net Agricultural sales were \$56,443,000 in the third quarter of 2016 compared to \$58,919,000 for the same period in 2015, a decrease of \$2,476,000 or 4.2%. Weak agricultural market conditions and low commodity prices continued to negatively affect farm income which limited farmers' ability to purchase new equipment.

Net European sales for the third quarter of 2016 were \$39,118,000, a decrease of \$6,192,000 or 13.7% compared to \$45,310,000 during the third quarter of 2015. Just over half of the decrease resulted from changes in currency translation rates which had a negative impact during the quarter. Industrial sales in France were up compared to the third quarter of 2015 as a result of increased sales of Rivard vacuum trucks while sales in the French agricultural markets reflected a slight increase. U.K. sales were down in the third quarter of 2016 compared to the third quarter of 2015 as demand for mowing products were impacted by the uncertainty surrounding the recent Brexit vote in the U.K. and continued softness in agricultural markets we serve.

Gross profit for the third quarter of 2016 was \$54,711,000 (25.2% of net sales) compared to \$57,509,000 (24.8% of net sales) during the same period in 2015, a decrease of \$2,798,000. The decrease in gross profit during the third quarter of 2016 was due to the lower sales volume from all three divisions partially offset by continuous improvement in production efficiencies, as well as lower material costs, which helped drive up margin percent for the quarter. Negatively impacting the gross profit and margin percent during the third quarter of 2015 was \$209,000 in higher cost of goods sold related to the step-up in fair value of inventory in the Specialized business units.

Selling, general and administrative expenses ("SG&A") were \$33,699,000 (15.5% of net sales) during the third quarter of 2016 compared to \$33,939,000 (14.7% of net sales) during the same period of 2015, a decrease of \$240,000 which relates to a non recurring system conversion in the amount of \$341,000 recognized in 2015.

Interest expense was \$1,405,000 for the third quarter of 2016 compared to \$1,671,000 during the same period in 2015, a decrease of \$266,000. The decrease in 2016 came from lower debt levels during the third quarter of 2016 compared to the third quarter of 2015.

Edgar Filing: ALAMO GROUP INC - Form 10-Q

Other income (expense), net was \$127,000 of income for the third quarter of 2016 compared to \$895,000 of income during the same period in 2015. The income in 2016 and 2015 were primarily the result of changes in exchange rates.

Provision for income taxes was \$6,541,000 (33.1%) in the third quarter of 2016 compared to \$8,065,000 (35.3%) during the same period in 2015. The decrease in taxes is from lower taxable income in the third quarter of

2016. The lower effective tax rate in 2016 is primarily related to a lower portion of our taxable income being generated in jurisdictions with higher tax rates.

The Company's net income after tax was \$13,236,000 or \$1.14 per share on a diluted basis for the third quarter of 2016 compared to \$14,756,000 or \$1.28 per share on a diluted basis for the third quarter of 2015. The decrease of \$1,520,000 resulted from the factors described above.

Nine Months Ended September 30, 2016 vs. Nine Months Ended September 30, 2015

Net sales for the first nine months of 2016 were \$639,226,000, a decrease of \$15,920,000 or 2.4% compared to \$655,146,000 for the first nine months of 2015. Just over half of the decrease was from currency translation effects. In the Industrial Division, excavators, sweepers, mowing equipment and to a lesser extent, snow removal products were up in the first nine months of 2016 compared to the first nine months of 2015, however sales of vacuum trucks specifically to non-governmental end users were down due to soft market conditions. Agricultural Division sales were down 2.1% for the first nine months of 2016 due to a continued weak agricultural market compared to the same period in 2015. Sales in the European Division were down 8.6% as sales of products manufactured in the U.K. were negatively affected by soft market conditions and currency translation rates which the Company believed was due, in part, to the uncertainty created by the recent Brexit vote in the U.K.

Net Industrial sales decreased during the first nine months by \$1,189,000 or 0.3% to \$361,629,000 for 2016 compared to \$362,818,000 during the same period in 2015. The decrease came from lower vacuum trucks sales to non-governmental end users. Increased sales from sweeper, excavator, mowing equipment and snow removal equipment product lines were not enough to offset the decline in sales of vacuum truck products.

Net Agricultural sales were \$156,950,000 during the first nine months of 2016 compared to \$160,357,000 for the same period in 2015, a decrease of \$3,407,000 or 2.1%. The decrease in sales for the first nine months of 2016 compared to the first nine months of 2015 was from the continued softness in the overall agricultural market.

Net European sales for the first nine months of 2016 were \$120,647,000, a decrease of \$11,324,000 or 8.6% compared to \$131,971,000 during the same period of 2015. Over half of the decrease in 2016 was due to the negative affect from currency translation rates. The European Division continued to be faced with challenging market conditions in the U.K. Rivard vacuum equipment and the French agricultural products had increased sales compared to the first nine months of 2015 from improvements in operational execution.

Gross profit for the first nine months of 2016 was \$157,166,000 (24.6% of net sales) compared to \$153,711,000 (23.5% of net sales) during the same period in 2015, an increase of \$3,455,000. Despite lower sales volume, the gross profit increase was due to continuous improvement in production efficiencies as well as lower material costs. Negatively affecting both the gross profit and margin percent during the first nine months of 2015 was \$2,740,000 in higher cost of goods sold related to the step-up in fair value of inventory in the Specialized business units.

SG&A were \$101,824,000 (15.9% of net sales) during the first nine months of 2016 compared to \$101,578,000 (15.5% of net sales) during the same period of 2015, an increase of \$246,000. The increase in SG&A for the first nine months of 2016 was primarily the result of increased sales commissions and marketing promotion expenses during the first quarter of 2016.

Interest expense was \$4,334,000 for the first nine months of 2016 compared to \$5,142,000 during the same period in 2015, a decrease of \$808,000. The decrease in 2016 came from the Company's efforts to reduce our borrowings which resulted in lower interest costs.

Other income (expense), net was \$(253,000) of expense during the first nine months of 2016 compared to \$2,243,000 of income in the first nine months of 2015. The expense in 2016 and income in 2015 were primarily the result of changes in exchange rates.

Provision for income taxes was \$18,459,000 (36.3%) in the first nine months of 2016 compared to \$17,529,000 (35.5%) during the same period in 2015. The increased effective tax rate in 2016 is primarily due to a higher portion of our taxable income being generated in jurisdictions with higher tax rates as well as losses incurred in certain foreign jurisdictions that did not result in a tax benefit.

The Company's net income after tax was \$32,457,000 or \$2.81 per share on a diluted basis for the first nine months of 2016 compared to \$31,825,000 or \$2.77 per share on a diluted basis for the first nine months of 2015. The increase of \$632,000 resulted from the factors described above.

Liquidity and Capital Resources

In addition to normal operating expenses, the Company has ongoing cash requirements which are necessary to operate the Company's business, including inventory purchases and capital expenditures. The Company's inventory and accounts payable levels typically build in the first half of the year and in the fourth quarter in anticipation of the spring and fall selling seasons. Accounts receivable historically build in the first and fourth quarters of each year as a result of fall preseason sales programs and out of season sales, particularly in our Agricultural Division. Preseason sales, primarily in the Agricultural Division, help level the Company's production during the off season.

As of September 30, 2016, the Company had working capital of \$308,102,000 which represents an increase of \$30,240,000 from working capital of \$277,862,000 at December 31, 2015.

Capital expenditures were \$7,201,000 for the first nine months of 2016, compared to \$7,030,000 during the first nine months of 2015. The Company expects to fund future expenditures from operating cash flows or through its revolving credit facility, described below.

Net cash used by financing activities was \$10,523,000 and \$15,659,000 during the nine month periods ended September 30, 2016 and September 30, 2015, respectively. The decrease in net cash used by financing activities in 2016 resulted from a decrease in net repayments under our bank credit facility due to seasonal funding of operations.

The Company had \$52,314,000 in cash and cash equivalents held by its foreign subsidiaries as of September 30, 2016. The majority of these funds are at our U.K. and Canadian subsidiaries and would not be available for use in the United States without incurring US federal and state tax consequences. The Company plans to use these funds for capital expenditures or acquisitions outside the United States.

The Company maintains an unsecured revolving credit facility with certain lenders under its Amended and Restated Revolving Credit Agreement ("the Agreement"). The aggregate commitments from lenders under the Agreement is \$250,000,000 and, subject to certain conditions, the Company has the option to request an increase in aggregate commitments of up to an additional \$50,000,000. The Agreement requires the Company to maintain various financial covenants including a minimum earnings before interest and tax to interest expense ratio, a maximum leverage ratio and a minimum asset coverage ratio. The Agreement also contains various covenants relating to limitations on indebtedness, limitations on investments and acquisitions, limitations on sale of properties and limitations on liens and capital expenditures. The Agreement also contains other customary covenants, representations and events of defaults. The termination date of the Agreement is May 12, 2019. As of September 30, 2016, \$134,000,000 was outstanding under the Agreement. On September 30, 2016, \$1,311,000 of the revolver capacity was committed to irrevocable standby letters of credit issued in the ordinary course of business as required by vendors' contracts resulting in \$114,689,000 in available borrowings. As of September 30, 2016, the Company was in compliance with the covenants under the Agreement.

Management believes the Agreement and the Company's ability to internally generate funds from operations should be sufficient to meet the Company's cash requirements for the foreseeable future. However, the challenges affecting the banking industry and credit markets in general could potentially cause changes to credit availability, which creates a level of uncertainty.

Critical Accounting Estimates

Management's Discussion and Analysis of Financial Condition and Results of Operations are based upon our Consolidated Financial Statements, which have been prepared in accordance with GAAP. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. Management bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Critical Accounting Policies

An accounting policy is deemed to be critical if it requires an accounting estimate to be made based on assumptions about matters that are highly uncertain at the time the estimate is made, and if different estimates that reasonably could have been used, or changes in the accounting estimates that are reasonably likely to occur periodically, could materially impact the financial statements. Management believes that of the Company's significant accounting policies, which are set forth in Note 1 of the Notes to Consolidated Financial Statements in the Company's Annual Report on Form 10-K for the year ended December 31, 2015 (the "2015 Form 10-K"), the policies relating to the business combinations, allowance for doubtful accounts, sales discounts, inventories-obsolete and slow moving, warranty, and goodwill and other intangible assets involved a higher degree of judgment and complexity. There have been no material changes to the nature of estimates, assumptions and levels of subjectivity and judgment related to critical accounting estimates disclosed in Item 7 "Management's Discussion and Analysis of Financial Condition and Results of Operations" of the Company's 2015 Form 10-K.

Off-Balance Sheet Arrangements

There are currently no off-balance sheet arrangements that have or are currently likely to have a current or future material effect on our financial condition.

Forward-Looking Information

Part I of this Quarterly Report on Form 10-Q and the "Management's Discussion and Analysis of Financial Condition and Results of Operations" included in Item II of this Quarterly Report contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. In addition, forward-looking statements may be made orally or in press releases, conferences, reports or otherwise, in the future by or on behalf of the Company.

Statements that are not historical are forward-looking. When used by or on behalf of the Company, the words "estimate," "believe," "intend", "will", "would", "should", "could" and similar expressions generally identify forward-looking statements made by or on behalf of the Company.

Forward-looking statements involve risks and uncertainties. These uncertainties include factors that affect all businesses operating in a global market, as well as matters specific to the Company and the markets it serves. Particular risks and uncertainties facing the Company include changes in market conditions; ongoing weakness in the agricultural sector; a strong U.S. dollar; increased competition; decreases in the prices of agricultural commodities, which could affect our customers' income levels; repercussions from the exit by the U.K. from the European Union; budget constraints or income shortfalls which could affect the purchases of our type of equipment by governmental customers; credit availability for both the Company and its customers, adverse weather conditions such as droughts,

floods, snowstorms, etc. which can affect buying patterns of the Company's customers and related contractors; the price and availability of critical raw materials, particularly steel and steel products; energy cost; increased cost of new governmental regulations which effect corporations; the potential effects on the buying habits of our customers due to animal disease outbreaks such as mad cow and other epidemics; the Company's ability to develop and manufacture new and existing products profitably; market acceptance of new and existing products; the Company's ability to maintain good relations with its employees; the Company's ability to successfully complete acquisitions and operate acquired businesses or assets; and the ability to hire and retain quality employees.

In addition, the Company is subject to risks and uncertainties facing the industry in general, including changes in business and political conditions and the economy in general in both domestic and international markets; weather conditions affecting demand; slower growth in the Company's markets; financial market changes including increases in interest rates and fluctuations in foreign exchange rates; actions of competitors; the inability of the Company's suppliers, customers, creditors, public utility providers and financial service organizations to deliver or provide their products or services to the Company; seasonal factors in the Company's industry; litigation; government actions including budget levels, regulations and legislation, primarily relating to the environment, commerce, infrastructure spending, health and safety; and availability of materials.

The Company wishes to caution readers not to place undue reliance on any forward-looking statements and to recognize that the statements are not predictions of actual future results. Actual results could differ materially from those anticipated in the forward-looking statements and from historical results, due to the risks and uncertainties described above, as well as others not now anticipated. The foregoing statements are not exclusive and further information concerning the Company and its businesses, including factors that could potentially materially affect the Company's financial results, may emerge from time to time. It is not possible for management to predict all risk factors or to assess the impact of such risk factors on the Company's businesses.

Item 3. Quantitative and Qualitative Disclosures About Market Risks

The Company is exposed to various market risks. Market risks are the potential losses arising from adverse changes in market prices and rates. The Company does not enter into derivative or other financial instruments for trading or speculative purposes.

Foreign Currency Risk

International Sales

A portion of the Company's operations consists of manufacturing and sales activities in international jurisdictions. The Company primarily manufactures its products in the U.S., U.K., France, Canada, Brazil and Australia. The Company sells its products primarily in the functional currency within the markets where the products are produced, but certain sales from the Company's U.K. and Canadian operations are denominated in other foreign currencies. As a result, the Company's financials, specifically the value of its foreign assets, could be affected by factors such as changes in foreign currency exchange rates or weak economic conditions in the other markets in which the subsidiaries of the Company distribute their products.

To mitigate the short-term effect of changes in currency exchange rates on the Company's functional currency-based sales, the Company's U.K. subsidiaries regularly enter into foreign exchange forward contracts to hedge approximately 90% of its future net foreign currency collections over a period of six months. As of September 30, 2016, the Company had \$1,725,000 outstanding in forward exchange contracts related to accounts receivable. A 15% fluctuation in exchange rates for these currencies would change the fair value of these contracts by approximately \$259,000. However, since these contracts hedge foreign currency denominated transactions, any change in the fair value of the contracts should be offset by changes in the underlying value of the transaction being hedged.

Exposure to Exchange Rates

The Company translates the assets and liabilities of foreign-owned subsidiaries at rates in effect at the balance sheet date. Revenues and expenses are translated at average rates in effect during the reporting period. Translation adjustments are included in accumulated other comprehensive income within the statement of stockholders' equity. The total foreign currency translation adjustment for the current quarter decreased stockholders' equity by \$1,702,000.

The Company's earnings are affected by fluctuations in the value of the U.S. dollar as compared to foreign currencies, predominately in European countries, as a result of the sales of its products in international markets. Forward currency contracts are used to hedge against the earnings effects of such fluctuations. The result of a uniform 10% strengthening in the value of the dollar relative to the currencies in which the Company's sales are denominated would result in a decrease in gross profit of \$4,306,000 for the nine month period ending September 30, 2016.

Comparatively, the result of a uniform 10% strengthening in the value of the dollar relative to the currencies in which the Company's sales are denominated would have resulted in a decrease in gross profit of

approximately \$4,120,000 for the nine month period ended September 30, 2015. This calculation assumes that each exchange rate would change in the same direction relative to the U.S. dollar. In addition to the direct effects of changes in exchange rates, which include a changed dollar value of the resulting sales, changes in exchange rates may also affect the volume of sales or the foreign currency sales price as competitors' products become more or less attractive. The Company's sensitivity analysis of the effects of changes in foreign currency exchange rates does not factor in a potential change in sales levels or local currency prices.

Interest Rate Risk

The Company's long-term debt bears interest at variable rates. Accordingly, the Company's net income is affected by changes in interest rates. Assuming the current level of borrowings at variable rates and a two percentage point change for the third quarter 2016 average interest rate under these borrowings, the Company's interest expense would have changed by approximately \$670,000. In the event of an adverse change in interest rates, management could take actions to mitigate its exposure. However, due to the uncertainty of the actions that would be taken and their possible effects this analysis assumes no such actions. Further this analysis does not consider the effects of the change in the level of overall economic activity that could exist in such an environment.

Item 4. Controls and Procedures

Disclosure Controls and Procedures.

An evaluation was carried out under the supervision and with the participation of Alamo's management, including our President and Chief Executive Officer, Executive Vice President and Chief Financial Officer (Principal Financial Officer) and Vice-President and Corporate Controller, (Principal Accounting Officer), of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based upon the evaluation, the President and Chief Executive Officer, Executive Vice President and Chief Financial Officer (Principal Financial Officer) and Vice-President, Corporate Controller, (Principal Accounting Officer) concluded that the Company's design and operation of these disclosure controls and procedures were effective at the end of the period covered by this report.

Changes in internal control over financial reporting

There has been no change in our internal control over financial reporting that occurred during our last fiscal year that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. - Legal Proceedings

For a description of legal proceedings, see Note 14 Contingent Matters to our interim condensed consolidated financial statements.

Item 1A. - Risk Factors

There have not been any material changes from the risk factors previously disclosed in the 2015 Form 10-K for the year ended December 31, 2015 and our Quarterly Report on Form 10-Q for the quarter ended June 30, 2016.
