SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D. C. 20549

FORM 10-K

(Mark One)

[X]

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934 [FEE REQUIRED]

FOR THE FISCAL YEAR ENDED JUNE 2, 2002

Commission File Number 0-12611

AULT INCORPORATED

(Exact name of registrant as specified in its charter)

MINNESOTA
(State or other jurisdiction of
incorporation or organization)

41-0842932
(IRS Employer Identification Number)

7105 NORTHLAND TERRACE

55428-1028

Registrant's telephone number, including area code: (763) 592-1900
Securities registered pursuant to Section 12(b) of the Act: None
Securities registered pursuant to Section 12(g) of the Act:

Common Stock, No Par Value
(Title of Class)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

YES [X] NO []

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation 8-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendments to this Form 10-K. [X]

The aggregate market value of the voting stock held by non-affiliates of the registrant was approximately \$13,293,000 based upon the closing price of the Company's common stock on the NASDAQ National Market on August 8, 2002, multiplied by the number of outstanding shares of the Company held by persons other than officers, directors and 10% or more shareholders referred to in the "Security Ownership of Principal Shareholders and Management" table referred to under Item 12 herein.

On August 8, 2002, there were outstanding 4,573,110 shares of the Registrant's common stock.

The Form 10-K consists of 51 pages. The Exhibit Index is located on page 49.

1

AULT INCORPORATED

FORM 10-K
FOR THE FISCAL YEAR ENDED JUNE 2, 2002

PART I

ITEM 1. BUSINESS

(a) GENERAL DEVELOPMENT OF BUSINESS

Ault Incorporated (herein Ault or the Company) was incorporated under the laws of the State of Minnesota in 1961. The Company designs, manufactures, and markets external power conversion products and is a leading domestic supplier of such products to original equipment manufacturers (OEMs) of data communications equipment, telecommunications equipment, portable medical equipment, and microcomputers and related peripherals.

On July 16, 2002, the Company purchased a portion of the operating assets of the Power General division of Nidec America Corporation. The Power General division developed, manufactured, and sold high efficiency DC/DC converters and custom power supplies at various power levels up to 1200 watts under the Power General brand name. Pursuant to the Purchase Agreement, the Company paid the Seller \$366,000 in cash and issued \$2,074,000 face amount of the Company's newly-created Series B 7% Convertible Preferred Stock, no par value (the "Preferred Stock"). The Preferred Stock issued to Seller is convertible into 488,000 shares of the Company's Common Stock. The Company has agreed to file a registration statement covering the shares of Common Stock issuable upon conversion of the Preferred Stock with the Securities and Exchange Commission. The Company will maintain Power General's engineering group in Massachusetts and move Power General's manufacturing operations and related functions to Ault's other facilities in North America and Asia.

(b) FINANCIAL INFORMATION ABOUT INDUSTRY SEGMENTS

The Company operates in only one industry segment - the manufacture and sale of power conversion devices.

(c) NARRATIVE DESCRIPTION OF THE BUSINESS

Ault's power conversion products are used to adapt alternating current (AC) to provide a source of power at various levels up to 120 watts for a wide variety of electronic equipment. Most of the Company's products are located outside the equipment they power as wall plug-in or as in-line components and are generally referred to as external power conversion products. A small portion of the Company's products are located inside the equipment they power, when this feature is required by OEM customers, and are generally known as internal power conversion devices. External power conversion products, in contrast to more widely used internal power conversion devices, enable designers of electronic equipment to remove heat and hazardous voltages from the end product thereby allowing the end product to function more safely and effectively. Also, by removing the power conversion feature from inside the end product, the OEM is afforded greater flexibility in designing and styling. These advantages have particular application in the Company's target markets where advances in semiconductor technology have reduced power requirements of many items of equipment to levels supplied by the Company's products, where rapid growth and

Edgar Filing: AULT INC - Form 10-K

strong competition have resulted in competitive pressure to bring new products to market quickly, and where there is increasing emphasis on smaller and portable products that perform increasingly sophisticated functions. Ault's business strategy is to offer OEMs in these markets an expanding line of high quality power conversion products and devices, related design engineering and flexible customer services.

(1) PRODUCTS

Ault's product line includes the four major types of external power conversion products: switching power supplies, linear power supplies, battery chargers and transformers. The Company's power conversion products are capable of providing power at most output levels which OEMs expect from an external device. The

2

Company's design and application engineers work closely with customers to assure that these products are appropriately customized to meet each OEM customer's precise power conversion product requirements.

The following table summarizes the proportion of sales of each of the Company's four major product categories for its last three fiscal years ended June 2, 2002:

SALE OF PRODUCTS BY CATEGORY
AS A PERCENTAGE OF TOTAL SALES

Product Type	Years Ended		
	June 2, 2002	June 3, 2001	May 28, 2000
Switching Power Supplies	48%	39%	41%
Linear Power Supplies	32	41	31
Transformers	11	12	17
Battery Chargers	9	8	11
Total	100%	100%	100%

POWER SUPPLIES. The Company's traditional power supplies provide all power conversion elements for electronic equipment in power outputs ranging from 1 to 120 watts. The recent purchase of certain assets and certain liabilities of Power General Corporation provides power conversion elements up to 1200 watts. These products contain a component level transformer, which reduces the voltage level, as well as other circuitry and components which convert alternating current (AC) to direct current (DC) and, in most cases, maintain voltage within specific limits.

* SWITCHING POWER SUPPLIES. The Company believes the market for switching power supplies is generally the fastest growing segment of the overall external power conversion product market. Switching power supplies use switching transistors to convert power from AC to DC and are more energy efficient and considerably smaller and lighter in weight than linear units with comparable power outputs. For power requirements exceeding 12 watts, switching power supplies are generally more cost effective. The Company currently manufactures these products up to 120 watts of power. The applications in which these products are currently used include

Edgar Filing: AULT INC - Form 10-K

telecommunication products, data communication products, modems, computers and computer peripherals, medical equipment, microprocessor controlled systems, security systems, automatic teller terminals, test equipment, multiplexers, digital cameras and point of sale equipment.

The Company's switching power supply products include a family of universal input power supplies, which provide output power from input power sources ranging from 90 to 265 volts AC. This family of power supplies can be used in virtually any country for applications such as local area networks (LANs), printer and fiber optic links. The Company also designs universal input switching power supplies specifically for medical markets. The Company believes it offers the widest range of external switching power supply products currently available for medical applications.

The Company designs and manufactures switching power supplies principally for external applications, but also designs and manufactures these products for internal power when such action enhances customer relations.

- * LINEAR POWER SUPPLIES. Linear power supplies are larger and generally less expensive than switching power supplies because their design is based on technology employing steel laminations with windings of copper wire rather than switching transistors. Linear power supplies tend to be used when the wattage output required is relatively low. Ault manufactures linear power supplies that provide up to 11 watts of regulated power and 35 watts of unregulated power. The Company's linear power supplies are used in a

3

variety of applications including modems, telecommunications products, local area networks, microprocessor controlled systems, test equipment and multiplexers.

- * TRANSFORMERS. The Company manufactures a wide variety of wall plug-in transformers as part of its full range of power conversion products. Transformers are used primarily in applications where OEMs desire to remove heat, electromagnetic interference and weight from electronic equipment, while incorporating the rest of the power conversion system within the product. These products reduce AC voltage from approximately 110 volts (230 volts in some countries) down to lower voltage that range from 5 to 60 volts AC. The Company's product line also includes highly customized transformers that operate within stringent power output tolerances, features that are not offered by most of the Company's competitors. The Company's transformers are utilized in a broad spectrum of applications including modems, telephone sets, multimedia products and scanners.
- * BATTERY CHARGERS. Ault has been an innovator in battery charging technology since the early 1980s. Ault specializes in providing custom designed, advanced solutions for manufacturers of portable and battery powered equipment. Applications for the Company's battery chargers include medical devices, mobile telecom devices, notebook computers, global positioning equipment and radio frequency communications products.

The Company's products serve the entire range of widely used battery chemistries such as nickel cadmium, sealed lead acid, gel cell and nickel-metal hydride. In addition, the Company has developed battery chargers for the particular requirements of emerging battery chemistries such as zinc air, lithium ion and lithium polymer. The Company is

Edgar Filing: AULT INC - Form 10-K

committed to supporting these new emerging chemistries and to developing battery charger products to be introduced as these new battery chemistries become commercially accepted.

The Company sells primarily "smart" battery chargers as distinguished from trickle chargers. Smart charger products use integrated circuits to control various charging characteristics while allowing for fast charge time and extended battery life. Trickle charging is typically used for slow (8 to 10 hours) charging and/or standby battery maintenance.

The Company believes that the demand for high quality battery chargers will continue to increase to accommodate the growing sophistication of portable electronic equipment.

- * HIGH-EFFICIENCY DC/DC CONVERTERS. During fiscal 2002, Ault expanded its product offering to include high-efficiency DC/DC converters. The Company made this decision in response to customer requests for "on-the-board" power solutions in order to fulfill the "total solution" approach to power conversion products OEMs qualify as preferred vendors. In addition, many OEMs use distributed power architecture in the design of their latest systems or devices. High-efficiency DC/DC converters are excellent components for distributed architecture because they provide outstanding performance in a small footprint. Ault's current offering focuses on the isolated single output quarter-bricks, dual output quarter-bricks and single output half-bricks.
- * MOBILE PRODUCTS. In late fiscal 2002, the Company made another product expansion decision - to develop a line of mobile products for business travelers and key service industries. The product focus is on auto adapters in single and dual output with a primary sales emphasis on laptop OEMs and value-added resellers (VARs). The Company anticipates nearly 65% of the market to be business travel and service applications in the insurance, trucking and delivery industries. The remainder of the applications will be emergency fire and medical services (20%); military and government (10%); and a small amount of miscellaneous uses (5%). The first product is scheduled for release in the first quarter of fiscal 2003.

4

(2) MARKETS AND CUSTOMERS

The Company's marketing efforts are directed primarily toward OEMs producing non-consumer electronic equipment for broadband modems, wireless and wire line telecommunications product, personal information appliances, computer peripherals, medical applications, as well as industrial and retail data acquisition. These markets are characterized by trends toward smaller, portable products capable of performing increasingly sophisticated functions, as well as intense competitive pressure to rapidly introduce new products and product enhancements. Based on its expertise in customizing a broad range of products to meet customer requirements, the Company believes it is well positioned to serve the needs of its OEM customers as they respond to these trends and competitive factors.

Historically, the most significant market for the Company's products has been OEMs of telecommunications/data communications equipment (broadband

Edgar Filing: AULT INC - Form 10-K

modems, wireless and wire line); in fiscal 2002 sales in this market represented approximately 36% of net sales. The Company's products power cable and ADSL modems, network termination equipment (devices which interface between telephone network and the customer's PBX or other telephone system), line conditioning equipment (devices which prepare telephone lines for the transmission of computer generated data), and various items of equipment ancillary to business telephones, including speaker phones, automatic dialers, caller identification units and alpha numeric displays, low to medium speed PC modems and multiplexers (equipment which enables the simultaneous transmission of multiple channels of information over the same telephone line).

Over the past several years the telecommunications/data communications market has grown at a rapid rate and the Company has devoted significant portions of its product development efforts toward introduction of new product families for applications in this combined market.

During fiscal year 2002, however, the telecommunications industry was hit particularly hard by the economic downturn. While the Company did not lose any OEM customers, all of them experienced severe setbacks in revenue generation, employee resources and the execution of new designs/projects. A couple of telecommunications segments, however, did remain active: wireless and networking. There are emerging applications such as broadband wireless routers and wireless Ethernet devices that require cost-effective switching power supplies in the 12-32-watt range. The Company's latest offering of standard product has proven to be strong sellers because they meet the power requirements for many of the leading edge, high-tech designs.

In fiscal 2002 approximately 18% of the Company's net sales were to OEMs of computers and computer peripherals such as digitizers, printers, plotters, portable terminals, point of sale scanners and optical character readers, LAN hardware and multimedia speakers for computer applications.

Approximately 26% of net sales in fiscal 2002 were to OEMs of portable medical equipment such as infusion pumps, patient monitoring systems, apnea monitors, and portable terminals for patient history input diagnostics.

The balance of approximately 20% of the Company's net sales in fiscal 2002 was to OEMs of various industrial equipment, including digital cameras, flat panel displays and mine safety devices, as well military/aerospace applications such as secure-line telephones.

(3) DESIGN ENGINEERING AND PRODUCT DEVELOPMENT

Design engineering teams at the Company's facilities in the United States, Peoples Republic of China and South Korea are responsible for developing new power conversion products and customizing existing products to meet customer needs. The Company also utilizes the significant engineering resources of its Asian subcontractors for the development of products targeted for subcontract manufacturing. The Company's product development activities are divided equally between developing products to satisfy customer needs and new products based upon anticipated customer needs and market trends. New product development opportunities are evaluated based

Edgar Filing: AULT INC - Form 10-K

upon criteria such as global market potential, return on investment and technological advantages. The Company believes that its collaborative efforts with customers, combined with its forward-looking concern for power technology and market trends, have enabled it to gain a reputation as a leading innovator in the development of new external power conversion products.

(4) SALES AND DISTRIBUTION

The Company markets its products primarily in the U.S. and Canada through a network of 15 manufacturer representatives employing approximately 125 salespersons, each of whom represents, in addition to Ault's products, several different but complementary product lines of other manufacturers. The Company also sells through four national distributor organizations, which employ over 1,000 salespersons, and twelve regional distributors, which employ over 100 salespersons. The Company selects representatives based upon their industry knowledge as well as account expertise with products that are synergistic with the Company's products. Individual salespersons are trained, mentored and technically assisted by the Company's application engineers and other sales administration staff. Any reduction in the efforts of these manufacturer representatives or distributors could adversely affect the Company's business and operating results.

The Company begins the sales process by identifying a potential customer or market; researching the target or potential customer's total business, product and strategic needs; and then preparing a total solution proposal that includes engineering, product development, safety agency approvals, logistics and project development processes, coordinating pilot runs and assisting OEMs with their product introductions.

The Company focuses its selling efforts primarily on OEMs in the U.S. and Canada. However, many of the larger OEM customers of the Company manufacture and sell their products globally. As a result, the Company has extended its presence to markets throughout the world. The Company's sales in the Pacific Rim are primarily to customers in South Korea, China and Australia.

The Company markets its products in Europe through a network of distributors who are managed through the Company's European sales office.

6

(5) SAFETY AGENCY CERTIFICATION

The power conversion system is potentially the most hazardous element in most electronic equipment because the power supply modifies standard power to a level appropriate for such equipment. Virtually all of the Company's customers require that the power conversion products supplied by the Company meet or exceed established international safety and quality standards, since many of the Company's products are used in conjunction with equipment that is distributed through the world. In response to these customer requirements, the vast majority of the Company's products are designed and manufactured in accordance with certification requirements of many safety agencies, including Underwriters Laboratories Incorporated (UL) in the United States; the Canadian Standards Association (CSA) in Canada; Technischer Uberwachungs-Verein (TUV) in Germany; the British Approval Board for Telecommunication (BABT) in the United Kingdom; the

Edgar Filing: AULT INC - Form 10-K

International Electrotechnical Committee (IEC), a European standards organization and (CE) a standard for the European Community. In addition, some of the Company's products have also received Japanese Ministry of International Trade and Industry (MITI) approval. For certain safety applications, the Company's products conform to FCC Class B requirements, which regulate the levels of electronic magnetic interference that may be emitted by electronic equipment. Unlike most of its competitors, the Company is a certified test laboratory for UL, CSA and TUV and is able to conduct most certification tests at its plant in Minneapolis. This procedure reduces the time required to obtain safety certifications.

(6) INNOVATIVE TEAM APPROACH

The Company uses a team-based organizational structure consisting of six teams. The Company's customer base is divided into five geographical regions with a specific Ault team assigned to manage the needs of customers in each region. A sixth team, Ault Express, manages the requirements of customers who have orders below minimum annual levels. Each team is headed by a coordinator selected by Ault's President. The teams consist of people from all areas of the business, including salespersons from manufacturer representative organizations and national distributors as well as the Company's own production personnel, engineers, technicians, administrative personnel and others. Guided by a written statement of corporate values, these teams are charged with responsibility for all aspects of the customer relationship, including sales, manufacturing, design engineering and other support functions with a view to achieving continuous improvements in customer service. The Company believes that its innovative implementation of this team-based organizational structure provides competitive advantages by increasing communication with customers as well as facilitating responsiveness to the needs of the Company's diverse worldwide customer base. In 1996, Ault received recognition for its innovative approach from the trade publication of the American Manufacturing Association.

(7) COMPETITION

The Company competes primarily with various manufacturers of external power conversion products. The industry is highly fragmented, with manufacturers generally focusing their marketing on specific segments. The Company has experienced strong competition from Taiwanese-based manufacturers principally on price. Many of these competitors have a smaller presence in the external conversion market than the Company, although several are engaged in more than one business and have significantly greater financial resources.

No single company dominates the overall external power conversion product market, and the Company's competitors vary depending upon the particular power conversion product category. The companies with which Ault competes most directly in each of its major product categories are: Leader Electronics, Inc. and Golden Pacific Electronics, Inc. for transformers; Dee Van Enterprise Co., Ltd. and Friwo EMC, Inc. for linear power supplies; Potrans Electrical Corp., Ltd. and Phihong Enterprise Co., Ltd. for switching power supplies; and Engineering Design Sales, Inc. and Xenotronics Company for battery chargers.

The Company competes on the basis of the quality and performance of its products, the breadth of its product line, customer service, dependability in meeting delivery schedules, design engineering services, and price. The Company believes it is currently one of a small number of companies that design, manufacture and obtain

certifying agency approvals for the full range of external power conversion devices, which OEMs consider in designing their electronic product.

The Company provides a total solution approach to the OEM's entire external power conversion product needs through its commitment to reliable partnerships and its delivery of high quality products supported by solution-oriented design engineering. The presence of Ault Korea and Ault China and the arrangements with subcontract manufacturers in China and Thailand allow the Company to compete effectively when price is the primary consideration.

Internal power conversion products continue to be used for most electronic equipment, and as a result the Company experiences competition from numerous OEMs and independent suppliers offering internal products. With the trend toward lower power requirements in portable electronic equipment and with the increasing availability of smaller, competitively priced internal switching power supplies, certain customers of the Company may choose to return to internal power supplies in place of the external power conversion products they currently purchase. In response to this issue, the Company stresses the several advantages of external power conversion products, which generally can be obtained with only a relatively small increase in unit cost.

The Company competes with a broad range of manufacturers in the DC/DC converter market. The industry is fragmented, with manufactures concentrating their sales and marketing on specific customer requirements in specific markets. The Company's primary competitors are Synqor, DI/DT, Ericsson, Artesyn, and Galaxy. In the past 12 months, all of the key players in the DC/DC market have introduced models in the isolated, high-efficiency quarter-brick and half-brick models. The largest single market segment for the sale of these high-efficiency models is the telecommunication industry and since this segment has suffered severely in the down economy, there has been little business generated for these products. To date, no single competitor dominates the DC/DC market in terms of market share.

The estimated size of the mobile products market in North America is \$50-\$65 million. The major competitors, Targus, Lind and Mobility, specialize in this market segment. These three companies dominate the market with combined revenues of approximately \$47 million. The rest of the market includes smaller companies with limited sales to a handful of key customers.

(8) MANUFACTURING AND SOURCES OF SUPPLY

The Company's manufacturing operations consist of assembly and integration of electronic components to meet product specifications and design requirements for a variety of power conversion applications. Manufacturing is currently conducted at the Company's facilities in Minneapolis, Minnesota; Seoul, South Korea; Xianghe, China; Shanghai, China and at four locations in China and Thailand using subcontract manufacturers. Ault typically manufactures prototypes and low volume products at its facility in Minneapolis, Minnesota.

Electronic components and raw material used in the Company's products are

Edgar Filing: AULT INC - Form 10-K

generally available from a large number of suppliers, although from time to time shortages of particular items are experienced.

Quality and reliability are emphasized in both the design and manufacture of the Company's products. This emphasis is reflected in the ISO 9001 certification of the Company's Minneapolis facility in 1991 and of its South Korea facility in 1998. The Company tests 100% of its finished products against its own and the customers' specifications, and then ships the products in custom-engineered protective packaging to minimize any damage during shipment.

The Company has subcontract manufacturing arrangements with two business partners in Thailand and two in China. The Company does not have long-term commitments with its subcontractors and the subcontractors build product for the Company pursuant to individual purchase orders. The Company selects its subcontract manufacturers based upon their ability to manufacture high quality products, the sufficiency of their engineering capabilities to support products being manufactured; and their ability to meet required delivery times.

8

(9) SIGNIFICANT CUSTOMERS: BACKLOG

The Company sells its products to over 400 customers and it is the Company's objective to maintain a diversified customer base and to avoid, where practicable, dependence upon a single customer. In fiscal 2002, 2001, and 2000 no customers accounted for more than 10% of sales.

The Company's order backlog at June 2, 2002 totaled \$8,365,000 compared to \$10,792,000 at June 3, 2001. The order backlog represents sales for approximately ten weeks and reflects the posture of many OEMs to limit their contractual commitments to the best lead-times of their suppliers. This requires the Company to place greater reliability on its ability to forecast customer needs and requirements for on-time shipment of products.

The Company enters into buying commitments and other scheduling agreements with certain customers. For its larger customers, these agreements allow for order increases and decreases within scheduled limits and include cancellation charges for completed and in-process products and procured materials. Most products are shipped within 4 to 10 weeks of an order.

(10) WARRANTIES

The Company provides up to a three-year parts and labor warranty against defects in materials or workmanship on all of its products. Servicing and repairs are conducted at the Company's manufacturing facilities in Minneapolis and South Korea. The Company's warranty expenses have not been significant.

(11) PATENTS

The Company holds no significant patents.

(12) SEASONALITY

In the past net sales of the Company have reflected a certain degree of seasonality. The Company's first quarter falls during the summer months and during the first quarter of fiscal 2000, the Company recorded levels

Edgar Filing: AULT INC - Form 10-K

of sales which were generally lower than sales that were recorded for the succeeding periods, although this pattern was not repeated in fiscal 2001 or fiscal 2002. Fiscal 2001 and fiscal 2002 did not have the typical lower sales in the first quarter due to the economic slowdown, which began in the fourth quarter of fiscal 2001. The Company attributes this seasonality to the buying patterns of its customers, the timing of industry trade shows where new products are introduced and to other factors. The Company believes that similar seasonality trends as experienced in fiscal 2000 are expected in the future.

9

(13) EMPLOYEES

As of July 31, 2002, the Company employed approximately 603 full-time employees at its facilities as follows:

	South Korea	China	US	Total
Manufacturing	90	299	32	421
Engineering	20	14	8	42
Marketing	7	8	13	28
General and Administrative	20	49	43	112
	---	---	---	---
Total	137	370	96	603

None of the Company's employees are represented by a labor organization and the Company has never experienced a work stoppage or interruption due to a labor dispute. Management believes that its relations with its employees are good.

(14) EXECUTIVE OFFICERS OF THE REGISTRANT

Certain information with respect to the executive officers of the Company is set forth:

Name	Age	Position	Officer
Frederick M. Green	59	President and Chief Executive Officer and Director	1980
Donald L. Henry	46	Vice President, Treasurer, Chief Financial Officer and Assistant Secretary (Previously 11 years with Abbott Laboratories, most recently: Controller Fermentation Operations, Controller Corporate Plant engineering, Financial Planning and Analysis Manager)	1999
Xiaodong Wang	44	Vice President - Asia Pacific (Previously 2 years with XD Company as CEO and President and 7 years with Simplot Company most recently: General Manager of China Operations, International Project Manager)	2000

(15) RISK FACTORS

The following risk factors are relevant to an understanding of the business matters discussed herein:

- * THE ELECTRONIC EQUIPMENT MARKET IS CHARACTERIZED BY RAPIDLY CHANGING TECHNOLOGY AND SHORTER PRODUCT LIFE CYCLES. The Company's future success will continue to depend upon its ability to enhance its current products and to develop new products that keep pace with technological developments and respond to changes in customer requirements. Any failure by the Company to respond adequately to technological changes and customer requirements or any significant delay in new product introductions could have a material adverse effect on the Company's business and results of operations. In addition, there can be no assurance that new products to be developed by the Company will achieve market acceptance. See "Business-Design Engineering and Product Development."
- * PRICE COMPETITION IN THE MARKETS IN WHICH THE COMPANY COMPETES IS INTENSE, AND COULD RESULT IN A DECLINE IN GROSS MARGIN, WHICH IN TURN COULD ADVERSELY IMPACT THE COMPANY'S PROFITABILITY. The Company's financial results are subject to fluctuation due to various factors, including general business

10

cycles in the Company's markets, the mix of products sold, the stage of each product in its life cycle and the rate and cost of development of new products. In addition, component and material costs, the timing of orders from and shipments of products to customers and deferral or cancellation of orders from major customers could adversely affect financial results.

- * THE COMPANY'S RELIANCE ON SUCH OUTSIDE CONTRACTORS REDUCES ITS CONTROL OVER QUALITY AND DELIVERY SCHEDULES. The Company currently depends on third parties located in foreign countries for a significant portion of the manufacture and assembly of certain of its products. While the Company takes an active role in overseeing quality control with its third party manufacturers, the failure by one or more of these subcontractors to deliver quality products or to deliver products in a timely manner could have a material adverse effect on the Company's operations. In addition, the Company's third-party manufacturing arrangements are short-term in nature and could be terminated with little or no notice. If this happened, the Company would be compelled to seek alternative sources to manufacture certain of its products. There can be no assurance that any such attempts by the Company would result in suitable arrangements with new third-party manufacturers. See "Manufacturing and Sources of Supply."
- * THE COMPANY'S SUCCESS DEPENDS IN PART UPON THE CONTINUED SERVICES OF MANY OF ITS HIGHLY SKILLED PERSONNEL INVOLVED IN MANAGEMENT, ENGINEERING AND SALES, AND UPON ITS ABILITY TO ATTRACT AND RETAIN

Edgar Filing: AULT INC - Form 10-K

ADDITIONAL HIGHLY QUALIFIED EMPLOYEES. The loss of service of any of these key personnel could have a material adverse effect on the Company. The Company does not have key-person life insurance on any of its employees. In addition, the Company's future success will depend on the ability of its officers and key employees to manage growth successfully and to attract, retain, motivate and effectively utilize the team approach to manage its employees. If the Company's management is unable to manage growth effectively, the Company's business and results of operations could be adversely affected.

- * WHILE WE ACTIVELY TRAIN AND TECHNICALLY ASSIST THE INDIVIDUAL SALES REPRESENTATIVES REPRESENTING OUR PRODUCTS, A REDUCTION IN THE SALES EFFORTS BY OUR CURRENT MANUFACTURER REPRESENTATIVES AND DISTRIBUTORS OR TERMINATION OF THEIR RELATIONSHIPS WITH US COULD ADVERSELY AFFECT OUR SALES AND OPERATING. The Company markets and sells our products primarily through independent manufacturer representatives and distributors that are not under our direct control. We employ a limited number of internal sales personnel.
- * TO SATISFY CUSTOMER DEMAND AND TO OBTAIN GREATER PURCHASING DISCOUNTS, WE CARRY INCREASED INVENTORY LEVELS OF CERTAIN PRODUCTS. Our financial results may be adversely affected when our inventory exceeds the demand for those products. Our gross margin can be adversely affected by increases in costs of raw materials. There can be no assurance that raw material cost increases or the cost of carrying increased finished goods inventory will not have a material adverse effect on our financial results.
- * A PROLONGED REDUCTION IN DEMAND FOR OUR PRODUCTS WILL CONTINUE TO IMPACT OUR FINANCIAL SUCCESS. In fiscal year 2002, our sales declined in large part due to a substantial downturn in sales to the telecommunications and data communications markets. A continuation of this weakness in the telecommunications and data communications markets may have the effect of further reducing our revenue.
- * INTEGRATION OF POWER GENERAL INTO OUR EXISTING BUSINESS QUICKLY AND AT REASONABLE COST WILL DETERMINE THE SUCCESS OF THE ACQUISITION THAT TOOK PLACE ON JULY 16, 2002. In connection with the integration of a new product line, we must adapt our facilities and assign qualified personnel to manufacture and market the new products, along with our existing products, on a competitive basis. We also must monitor and control costs of our expanding operations. We may not take the measures described above when necessary or we may not execute them properly or they may prove ineffective. If we are not able to successfully manage the integration of the Power General Assets into our existing business, our business and financial results will suffer.

- * CIVIL UNREST, LABOR DISRUPTIONS, OR ACTS OF AGGRESSION COULD IMPEDE OUR ABILITY TO OPERATE IN OUR FOREIGN LOCATIONS AND WOULD HAVE A MATERIAL ADVERSE EFFECT ON OUR FUTURE BUSINESS AND CONSEQUENTLY, OUR OPERATING RESULTS. Manufacturing occurs at our facilities in South Korea and China and through manufacturing relationships in the People's Republic of China ("China") and Thailand. While this Pacific Rim manufacturing strategy enables us to compete worldwide against other suppliers of external power conversion products, it also involves risks. Our manufacturing operations in South Korea,

Edgar Filing: AULT INC - Form 10-K

China and Thailand have not been affected by labor disruptions, civil unrest or political instability, the risk of civil unrest and political instability is present in each of these countries.

(d) FINANCIAL INFORMATION ABOUT FOREIGN AND DOMESTIC OPERATIONS AND EXPORT SALES

Export sales by Ault's U.S. operations in fiscal year 2002 represented 20.4% of the Company's gross sales, most of which were to OEMs in Europe and Canada. All other revenues were derived from sales in the U.S. For other financial information about foreign and domestic operations and export sales including the amount of export sales for the last 3 years, refer to "Note 9 - Segment Information and Foreign Operations" under NOTES TO CONSOLIDATED FINANCIAL STATEMENTS.

ITEM 2. PROPERTIES

The Company owns and occupies its headquarters and U.S. manufacturing facility in Brooklyn Park, a suburb of Minneapolis, Minnesota and is approximately 65,000 square feet in size.

Ault Korea Corporation owns and occupies a 54,000 square foot facility in Suwon City in the province of Kyungki-Do, Korea.

Ault China Corporation owns and occupies a 40,000 square foot facility in the Province of Xianghe in China. The land use rights expire in the year 2050.

Ault Shanghai Corporation occupies a 9,000 square foot leased facility in Shanghai, China.

Management considers all of the Company's properties to be well maintained and current manufacturing arrangements, including subcontract arrangements in China and Thailand, are believed to be adequate for manufacturing requirements.

ITEM 3. LEGAL PROCEEDINGS

No material litigation or other claims are presently pending against the Company.

12

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

Not applicable.

PART II.

ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY AND RELATED STOCKHOLDER MATTERS

Edgar Filing: AULT INC - Form 10-K

(a) Market Information

Ault common shares are traded on the NASDAQ market under the symbol AULT. The following table presents the range of closing bid prices for the Company's common stock on the NASDAQ Market for fiscal 2002 and 2001.

Quarter	Fiscal 2002 -----		
	\$ High	\$ Low	\$ High
1st	6.110	5.050	7.375
2nd	5.338	3.500	9.250
3rd	4.700	3.660	7.906
4th	5.050	4.000	6.500

(b) Holders

As of August 8, 2002 there were 290 shareholders of record for the Company's common stock. This number of record stockholders does not include beneficial owners of common stock whose shares are held of record by Depository Trust under the name CEDE & Co.

(c) Dividends

Ault has not paid cash dividends on its common shares, and the present policy of its Board of Directors is to retain any earnings for use in the business. The Board of Directors does not anticipate paying cash dividends on its common shares in the foreseeable future.

ITEM 6. SELECTED FINANCIAL SUMMARY

(Amounts in Thousands, Except Per Share Data)

	June 2, 2002	June 3, 2001 (1)	YEARS ENDED May 28, 2000 (2)
Net sales	\$ 41,032	\$ 85,692	\$ 67,913
Gross profit	7,944	18,657	16,236
Operating expenses	11,968	15,228	13,001

Edgar Filing: AULT INC - Form 10-K

Operating income (loss)	(4,024)	3,429	3,235
Non operating income (expense)	(234)	172	(311)
Income (loss) before income taxes	(4,258)	3,601	2,924
Income taxes (benefit)	(694)	1,355	1,061
Cumulative effect of accounting change, net of tax		(50)	
Net income (loss)	\$ (3,564)	\$ 2,196	\$ 1,863
Net income (loss) per share:			
Basic	\$ (0.78)	\$ 0.49	\$ 0.42
Diluted	(0.78)	0.47	0.40
Total assets	\$ 36,697	\$ 43,457	\$ 46,256
Property, plant and equipment net	\$ 12,442	\$ 12,576	\$ 10,537
Working capital	14,084	17,840	17,708
Long-term debt, less current maturities	2,754	3,035	3,657
Stockholders' equity	24,753	28,129	25,805

- (1) The 2001 results include a non-cash, pre-tax cumulative effect of accounting change related to the adoption of Staff Accounting Bulletin No. 101 of \$77 expense (\$50 after tax, or \$0.01 per share).
- (2) The 2000 results include a gain on the disposition of the Korean facility of \$1,525.

14

(3) ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITIONS AND RESULTS OF OPERATIONS

CRITICAL ACCOUNTING POLICIES

The discussion and analysis of our financial condition and results of operations are based on our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amount of assets and liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities at the date of our financial statements. Actual results may differ from these estimates under different assumptions or conditions.

Critical accounting policies are defined as those that involve significant judgments and uncertainties and potentially result in materially different results under different assumptions and conditions. Application of these policies is particularly important to the portrayal of our financial condition and results of operations. We believe the accounting policies described below meet these characteristics. Our significant accounting policies are more fully described in the notes to the consolidated financial statements included in our annual report on Form 10-K.

INVENTORY VALUATION - Inventory is written down for estimated surplus and discontinued inventory items. The amount of the write-down is determined by analyzing historical and projected sales information, plans for discontinued products and other factors. Changes in sales volumes due to unexpected economic

Edgar Filing: AULT INC - Form 10-K

or competitive conditions are among the factors that would result in materially different amounts for this item.

ALLOWANCE FOR DOUBTFUL ACCOUNTS - An allowance is established for estimated uncollectible accounts receivable. The required allowance is determined by reviewing customer accounts and making estimates of amounts that may be uncollectible. Factors considered in determining the amount of the reserve include the age of the receivable, the financial condition of the customer, general business, economic and political conditions, and other relevant facts and circumstances. Unexpected changes in the aforementioned factors would result in materially different amounts for this item.

LIQUIDITY AND CAPITAL RESOURCES

The following table summarizes the Company's working capital position at June 2, 2002, and at June 3, 2001:

	June 2, 2002	June 3, 2001
	-----	-----
	(\$000)	(\$000)
Working capital	14,084	17,840
Cash and cash equivalents	4,775	3,723
Unutilized bank credit facilities	4,975	4,767
Cash provided by operations	3,559	1,953

CURRENT WORKING CAPITAL POSITION

At June 2, 2002, the Company had current assets of \$22,840,000 and current liabilities of \$8,756,000 representing working capital of \$14,084,000 and a current ratio of 2.6. This represents a decrease in working capital from \$17,840,000 at June 3, 2001. The Company relies on its credit facilities and cash flows from operations as sources of working capital to support normal growth in revenue, capital expenditures and attainment of profit goals. The Company has not committed to any capital expenditures as of June 2, 2002.

CASH AND INVESTMENTS: At June 2, 2002, the Company had cash and securities totaling \$4,775,000, up from \$3,723,000 at June 3, 2001. This increase in cash was principally due to cash flows generated from operations.

15

CREDIT FACILITIES: The Company maintains credit facilities with US Bank and with Korea Exchange Bank. See Note 3, under NOTES TO CONSOLIDATED FINANCIAL STATEMENTS.

The credit arrangement with US Bank includes:

- (a) A revolving credit facility of \$4.0 million, secured by company assets. At June 2, 2002, there were no borrowings against this facility.
- (b) At June 2, 2002, borrowings totaling \$149,000 were outstanding on one term loan.

The South Korean credit facility is approximately \$3.86 million of which borrowings at June 2, 2002 totaled \$2,889,636.

Edgar Filing: AULT INC - Form 10-K

CASH FLOWS FOR FISCAL 2002

OPERATIONS: Operations provided \$3,559,000 of cash during fiscal 2002 due principally to the following activities:

- (a) The loss net of depreciation of \$972,000, amortization of \$100,000, inventory write off of \$999,000, and bad debt reserve of \$1,416,000, in total used cash of \$77,000.
- (b) Decreases in trade receivables due to the decreased net sales provided \$3,322,000 of cash.
- (c) Decreases in inventories net of obsolescence write-downs provided \$3,227,000 of cash. The decreases are due to the decreased net sales.
- (d) Decreases in accrued expenses and accounts payable used \$3,087,000 of cash from liabilities associated with purchases of material to support customer orders.

INVESTING ACTIVITIES: Investing activities used net cash of \$839,000 mainly relating to the completion of the new manufacturing/office facility in Korea.

FINANCING ACTIVITIES: Financing activities used net cash of \$1,674,000, comprised of:

- (a) Payments of the Korean line of credit used \$1,211,000 of cash.
- (b) Payments of long-term debt used \$585,000 of cash.
- (c) Proceeds from stock options exercised provided \$122,000 of cash.

EFFECT OF FOREIGN CURRENCY EXCHANGE RATE FLUCTUATIONS: The effect of translating the Korean financial statements, which were prepared in Won, to U.S. dollars, increased cash by approximately \$6,000 during the year. The effect of translating the Chinese financial statements, which were prepared in Yuan to U.S. dollars, had minimal effect on cash for the year.

SUMMARY: The Company's cash and working capital positions are sound and, together with its credit facilities, are adequate to support the Company's strategies for fiscal 2003.

CASH FLOWS FOR FISCAL 2001

OPERATIONS: Operations provided \$1,953,000 of cash during fiscal 2001 due principally to the following activities:

- (a) Net income, depreciation, and amortization increased cash by \$3,287,000.
- (b) Decreases in trade receivables mainly due to the decreased net sales in the fourth quarter of fiscal 2001 provided \$3,523,000 of cash.
- (c) Decreases in inventories provided \$818,000 of cash. The decreases are due to the decreased net sales in the fourth quarter of fiscal 2001.
- (d) Decreases in accrued expenses and accounts payable used \$5,862,000 of cash from liabilities associated with purchases of material to support customer orders.

INVESTING ACTIVITIES: Investing activities used net cash of \$2,607,000 relating principally to the construction of the new manufacturing/office facility in Korea.

FINANCING ACTIVITIES: Financing activities provided net cash of \$2,033,000, comprised principally of borrowings in connection with the construction of the new manufacturing/office facility in Korea.

Edgar Filing: AULT INC - Form 10-K

16

EFFECT OF FOREIGN CURRENCY EXCHANGE RATE FLUCTUATIONS: The effect of translating the Korean financial statements, which were prepared in Won, to U.S. dollars, adversely affected cash by approximately \$74,000 during the year. The effect of translating the Chinese financial statements, which were prepared in Yuan to U.S. dollars, had minimal effect on cash for the year.

RESULTS OF OPERATIONS

FISCAL YEAR ENDED JUNE 2, 2002

\$000	Fiscal 2002	Fiscal 2001	Increase / (Decrease)	
			Amount	Percent
Net Sales	\$41,032	\$85,692	\$(44,660)	(52)%
Operating Income (Loss)	(4,024)	3,429	(7,453)	(217)%

Net sales were \$41,032,000 for fiscal 2002, down 52% from \$85,692,000 for fiscal 2001. The decrease was due to significantly lower power supply shipments to major OEMs of telecommunication/data communication equipment of \$40,071,000 and computer and computer peripheral equipment of \$9,752,000 primarily due to the economic slowdown. The decrease was partially offset by an increase in shipments to the medical markets of \$2,099,000, and the industrial markets of \$3,064,000.

The gross margin for fiscal 2002 was 19.4%, compared to 21.8% for fiscal 2001. Margins were decreased primarily due to an inventory write down of \$999,000 due to the identification of obsolete inventory caused by the continued economic slowdown.

Operating loss totaled \$4,024,000 for fiscal 2002 compared to operating income of \$3,429,000 for the same period in fiscal 2001. The decrease in operating income is primarily due to (1) decreased sales in fiscal year 2002 decreased operating income \$9,736,000 (2) the inventory write down decreased the operating income by \$999,000 (3) increased bad debt expense decreased operating income by \$818,000 (4) the decreased sales decreased the commission expense of the Company and increased the operating income by \$1,120,000 (5) the Company has been decreasing expenses and increasing efficiencies during fiscal 2002, which decreased the operating loss by \$2,993,000.

The Company's order backlog at June 2, 2002 totaled \$8,365,000 compared to \$10,792,000 at June 3, 2001. While the backlog has dropped from the previous year, customers are reducing lead times for shipments; as a result the backlog is lower with a minimum expected impact on the revenue level. This requires the Company to place greater reliability on its ability to forecast customer needs and requirements for on-time shipment of products.

Nonoperating expense is \$234,000 for fiscal 2002 compared to nonoperating income was \$172,000 for the same period in fiscal 2001. The decrease in income is primarily from (1) the gain on the sale of securities in fiscal 2001 of \$56,000, and (2) currency exchange rate gains by the Korean subsidiary of \$400,000 less in fiscal 2002 as compared to fiscal 2001. The Company incurred interest expenses of \$495,000 in fiscal 2002 and \$537,000 in fiscal 2001. The decrease is due to the decrease in bank debt in Korea.

Edgar Filing: AULT INC - Form 10-K

The effective tax rate was 16.3% for fiscal year 2002, 37.6% for fiscal year 2001, and 36.3% for fiscal year 2000. The effective income tax rate has changed in fiscal 2002 compared to fiscal 2001 due to the subsidiaries loss overseas creating a deferred asset with a full valuation offset due to the determination that currently the realization of the deferred tax asset is not more likely than not.

FISCAL YEAR ENDED JUNE 3, 2001

\$000	Fiscal 2001	Fiscal 2000	Increase Amount	/ (Decrease) Percent
Net Sales	\$85,692	\$67,913	\$17,779	26%
Operating Income	3,429	3,235	194	6%

17

Net sales were \$85,692,000 for fiscal 2001, up 26% from \$67,913,000 for fiscal 2000. The growth was primarily due to significantly higher power supply shipments to major OEMs of high-speed ADSL modems of \$9,817,000. The Company is also benefiting from growing business volumes with OEMs serving the medical equipment market of \$3,714,000 and OEMs of PDAs of \$4,651,000. The Company experienced lower sales in the fourth quarter of fiscal 2001 related to the economic slowdown.

The gross margin for fiscal 2001 was 21.8%, compared to 23.9% for fiscal 2000. The significant growth of Asian sales had an impact on gross margins. As an aggressive new undertaking, the Asian sales effort entails the normal array of pricing initiatives of \$1,269,000. Margins were also affected by a growth in sales of lower-margin linear power supplies to ASDL customers of \$490,000.

Operating income totaled \$3,429,000 for fiscal 2001 and \$3,235,000 for the same period in fiscal 2000 or 4.0% and 4.8% of net sales, respectively. Operating expense increased principally due to (1) fiscal 2000 expenses were reduced by a gain on the sale of the Korean facility by \$1,500,000, (2) increased costs of Asian Group to manage the increased sales in the region of \$500,000, (3) increased commissions paid to sales representatives on the increased sales of \$560,000, (4) an increase in bad debt expense of \$500,000 related to a customer-filing chapter 11, and (5) decrease in engineering expenses from the consolidation of the Maryland design center at the end of fiscal 2000 of \$510,000. As a percent of sales, operating expenses decreased to 17.8% in fiscal 2001 from 19.1% in fiscal 2000. The decrease is due to the increase in sales while maintaining the operating expenses at the same level as fiscal 2000.

The Company's order backlog at June 3, 2001 totaled \$10,792,000 compared to \$17,877,000 at May 28, 2000.

Nonoperating income was \$171,000 for fiscal 2001 and nonoperating expense was \$311,000 for the same period in fiscal 2000. The increase in income was primarily from (1) the sale of securities available for sale in fiscal 2001 of \$56,000 and (2) currency exchange rate gains by the Korean subsidiary of

Edgar Filing: AULT INC - Form 10-K

\$500,000 in fiscal 2001. The Company incurred interest expenses of \$537,000 in fiscal 2001 and \$406,000 in fiscal 2000. The increase is due to the mortgage on the new facility in Minneapolis for the whole year in 2001 added \$65,000 and the increase in bank debt in Korea added \$60,000 of interest expense.

INFORMATION ABOUT PRODUCTS AND SERVICES: The Company's business operations are comprised of principally one activity--the design, manufacture and sale of equipment for converting electric power to a level used by OEMs principally in computer peripherals, data communications/telecommunications and medical markets to charge batteries and/or power equipment. The Company supports these power requirements by making available to the OEM products that have various technical features. These products are managed as one product segment under the Company's internal organizational structure and the Company does not consider any financial distinctive measures, including net profitability and segmentation of assets to be meaningful to performance assessment.

On July 16, 2002, the Company purchased a portion of the operating assets of the Power General division of Nidec America Corporation. The Power General division developed, manufactured, and sold high efficiency DC/DC converters and custom power supplies at various power levels up to 1200 watts under the Power General brand name. Pursuant to the Purchase Agreement, the Company paid the Seller \$366,000 in cash and issued \$2,074,000 face amount of the Company's newly-created Series B 7% Convertible Preferred Stock, no par value (the "Preferred Stock"). The Preferred Stock issued to the Seller is convertible into 488,000 shares of the Company's Common Stock. The Company has agreed to file a registration statement covering the shares of Common Stock issuable upon conversion of the Preferred Stock with the Securities and Exchange Commission. The Company will maintain Power General's engineering group in Massachusetts and move Power General's manufacturing operations and related functions to Ault's other facilities in North America and Asia.

18

INFORMATION ABOUT REVENUE BY GEOGRAPHY

Distribution of revenue from the U.S., from each foreign country that is the source of significant revenue and from all other foreign countries as a group are as follows:

	FISCAL YEAR ENDED	
	June 2, 2002 (\$000)	June 3, 2001 (\$000)
	-----	-----
U.S.	\$27,693	\$54,170
Canada	1,041	2,690
Ireland	632	4,351
Korea	4,952	7,461
Belgium	215	2,820
China	2,686	5,971
Other Foreign	3,813	8,229
	-----	-----
Total	\$41,032	\$85,692
	=====	=====

The Company considers a country to be the geographic source of revenue if it has

Edgar Filing: AULT INC - Form 10-K

contractual obligations, including obligation to pay for trade receivable invoices.

IMPACT OF FOREIGN OPERATIONS AND CURRENCY CHANGES

Products manufactured by the Korean subsidiary comprised a large portion of total sales. The Company will experience normal valuation changes as the Korean and Chinese currency fluctuates. The effect of translating the Korean and Chinese financial statements resulted in a net asset value increase of \$14,000 during the year, the majority relating to the Korean currency fluctuations.

FORWARD LOOKING STATEMENTS

From time to time, in reports filed with the Securities and Exchange Commission (SEC), in press releases, and in other communications to shareholders or the investing public, the Company may make forward-looking statements concerning possible or anticipated future results of operations or business developments that are typically preceded by the words "believes," "expects," "anticipates," "intends" or similar expressions. For such forward-looking statements, the Company claims the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995. Shareholders and the investing public should understand that such forward-looking statements are subject to risks and uncertainties which could cause results or developments to differ significantly from those indicated in the forward-looking statements. Such risks and uncertainties include, but are not limited to, the overall level of sales by original equipment manufacturers (OEMs) in the telecommunications, data communications, computer peripherals and the medical markets; buying patterns of the Company's existing and prospective customers; the impact of new products introduced by competitors; delays in new product introductions; higher than expected expense related to sales and new marketing initiatives; availability of adequate supplies of raw materials and components; dependence on outside contractors; reliance on third party distribution; integration of the Power General assets; dependence on foreign operations; and other risks affecting the Company's target markets generally.

ACCOUNTING PRONOUNCEMENTS

On June 4, 2001 the Company adopted Statement of Financial Accounting Standard (SFAS) No. 133, ACCOUNTING FOR DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES, as amended by SFAS No. 138, ACCOUNTING FOR CERTAIN DERIVATIVE INSTRUMENTS AND CERTAIN HEDGING ACTIVITIES. SFAS No. 133 establishes accounting and reporting standards for derivative instruments and for hedging activities. It requires that all derivatives, including those embedded in other contracts, be recognized as either assets or liabilities and that those financial instruments be measured at fair value. The accounting for changes in the fair value of derivatives depends on their intended use and designation.

Management has reviewed the requirements of SFAS No. 133 and has determined that the Company has no free-standing or embedded derivatives. All agreements that contain provisions meeting the definition of a derivative also meet the requirements of, and have been designated as, normal purchases or sales. The Company's policy is to not use free-standing derivatives and to not enter into contracts with terms that cannot be designated as normal purchases or sales.

In December 1999, the SEC issued Staff Accounting Bulletin (SAB) No. 101 REVENUE RECOGNITION IN FINANCIAL STATEMENTS. SAB No. 101 summarizes certain of the SEC

Edgar Filing: AULT INC - Form 10-K

staff's views in applying generally accepted accounting principles to selected revenue recognition issues. As a result, the Company changed the method of accounting for certain sales transactions. Historically, the Company recognized revenue upon shipment of products to certain international customers because, even though some products were shipped FOB destination, we used a common carrier and thus gave up substantially all the risks of ownership. Under the new accounting method adopted retroactive to May 29, 2000, the Company now recognizes revenue at the time risk of ownership passes. The cumulative effect of the change on prior years resulted in a charge to income of \$50,000 (net of taxes of \$27,000) for the year ended June 3, 2001. The pro forma amounts presented in the consolidated statements of income were calculated assuming the accounting change was made retroactively to the prior period.

For the three months ended August 27, 2000, the Company recognized \$234,000 in revenue that was included in the cumulative effect adjustment as of May 29, 2000. The effect of the revenue in the first quarter was to increase income by \$50,000 (after reduction for income taxes of \$27,000).

In June 2001, the Financial Accounting Standards Board approved for issuance Statement of Financial Accounting Standards (SFAS) No. 141, BUSINESS COMBINATIONS and No. 142 GOODWILL AND OTHER INTANGIBLE ASSETS. SFAS No. 141 requires that the purchase method of accounting be used for all business combinations initiated after June 30, 2001 and that the use of the pooling-of-interest method is no longer allowed. SFAS No. 142 requires that upon adoption, amortization of goodwill will cease and instead, the carrying value of goodwill will be evaluated for impairment on an annual basis. In fiscal 2002, 2001 and 2000 the amortization expense was \$100,000 each year. Identifiable intangible assets will continue to be amortized over their useful lives and reviewed for impairment in accordance with SFAS No. 121 ACCOUNTING FOR THE IMPAIRMENT OF LONG-LIVED ASSETS AND FOR LONG-LIVED ASSETS TO BE DISPOSED OF. SFAS No. 142 is effective for the Company's fiscal year beginning June 3, 2002. The Company has determined that the adoption of these standards will not be material.

In August 2001, the FASB issued SFAS No. 144, ACCOUNTING FOR THE IMPAIRMENT OR DISPOSAL OF LONG-LIVED ASSETS. SFAS 144 addresses financial accounting and reporting for the impairment or disposal of long-lived assets and supercedes SFAS 121, ACCOUNTING FOR THE IMPAIRMENT OF LONG-LIVED ASSETS AND ASSETS TO BE DISPOSED OF, and the accounting and reporting provisions of Accounting Principles Board Opinion No. 30, REPORTING THE RESULTS OF OPERATIONS--REPORTING THE EFFECTS OF DISPOSAL OF A SEGMENT OF A BUSINESS AND EXTRAORDINARY, UNUSUAL AND INFREQUENTLY OCCURRING TRANSACTIONS. SFAS 144 requires that long-lived assets to be disposed of be measured at the lower of carrying amount or fair value less cost to sell. The Company adopted SFAS 144 on June 3, 2002. The Company is in the process of evaluating the impact SFAS 144 will have on its consolidated financial statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company experiences foreign currency gains and losses, which are reflected in the financial statements, due to the strengthening and weakening of the U.S. dollar against currencies of the Company's foreign subsidiaries. The Company anticipates that it will continue to have exchange gains or losses in the future. The Company realized an exchange gain of \$100,000 for fiscal 2002, \$500,000 for fiscal 2001, and \$21,000 for fiscal 2000.

As of June 2, 2002, the Company only had fixed rate debt outstanding. Thus, interest rate fluctuations would not impact interest expense or cash flows. If the Company were to undertake additional debt, interest rate changes could impact earnings and cash flows.

CONTRACTUAL OBLIGATIONS

The following table summarizes the Company's contractual obligations and commercial commitments as of June 2, 2002 (in thousands):

	Payments due by Period			
	Total	Less than 1 year	1-3 years	4-5 years
Contractual Obligations:				
Long-term debt	\$3,035	\$282	\$441	
Operating leases	119	77	37	
Total contractual obligations	\$3,154	\$359	\$478

INDEPENDENT AUDITORS' REPORT

Stockholders and Board of Directors
Ault Incorporated and Subsidiaries
Minneapolis, Minnesota

We have audited the accompanying consolidated balance sheets of Ault Incorporated and Subsidiaries (the Company) as of June 2, 2002, and June 3, 2001 and the related consolidated statements of operations, stockholders' equity, and cash flows for each of the three fiscal years in the period ended June 2, 2002. Our audits also included the financial statement schedule listed in the index as Item 14.(2). These consolidated financial statements and the financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on the consolidated financial statements and financial statement schedule based on our audits.

Edgar Filing: AULT INC - Form 10-K

We conducted our audits in accordance with the auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Ault Incorporated and Subsidiaries as of June 2, 2002, and June 3, 2001 and the results of their operations and their cash flows for each of the three fiscal years in the period ended June 2, 2002, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

Deloitte & Touche LLP

AULT INCORPORATED AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED JUNE 2, 2002 AND JUNE 3, 2001

1. NATURE OF BUSINESS AND SIGNIFICANT ACCOUNTING POLICIES

NATURE OF BUSINESS - The Company and its subsidiaries operate in one business segment which includes the design, manufacturing, and marketing of power conversion products, principally to original equipment manufacturers of data communications equipment, microcomputers and related peripherals, telecommunications equipment, and portable medical equipment. Sales are to customers worldwide, and credit is granted based upon the credit policies of the Company.

A summary of the Company's significant accounting policies follows:

PRINCIPLES OF CONSOLIDATION - The consolidated financial statements include the accounts of Ault Incorporated, its wholly owned subsidiaries, Ault Shanghai, Ault Xianghe Co. Ltd, and Ault Korea Corporation. All significant intercompany transactions have been eliminated. The foreign currency translation adjustment represents the translation into United States dollars of the Company's investment in the net assets of its foreign subsidiary in accordance with the provisions of Statement of Financial Accounting Standards (SFAS) No. 52.

CHANGE IN FISCAL YEAR - Effective May 29, 2000 the Company changed its fiscal year-end for its Korean subsidiary from May 31 to April 30 and consolidates the subsidiary for financial reporting purposes on a one-month lag basis. This change was done to facilitate timely and accurate consolidation and in order to meet financial reporting deadlines of the Company. The results of operations for the subsidiary for May 2000 (\$61,000 net loss) was included in the consolidated results of operations for the first quarter of fiscal 2001. Retained earnings was adjusted during the first quarter of fiscal 2001 to eliminate the

Edgar Filing: AULT INC - Form 10-K

subsidiary net loss for May 2000, which was included in operations for the year ended May 28, 2000. The effect of the change in year-end for future periods is expected to be insignificant.

FISCAL YEAR - The Company operates on a 52 to 53-week fiscal year. The fiscal years for the financial statements presented end on June 2, 2002, June 3, 2001, and May 28, 2000. The years ending June 2, 2002 and May 28, 2000 contains 52 weeks while the year ending June 3, 2001 contains 53 weeks.

CASH AND CASH EQUIVALENTS - The Company maintains its cash in bank deposit accounts which, at times, may exceed federally insured limits. The Company has not experienced any losses in such accounts.

The Company considers all highly liquid debt instruments purchased with a maturity of three months or less to be cash equivalents. Cash equivalents consist primarily of short-term commercial paper.

AVAILABLE-FOR-SALE INVESTMENTS - Investments were classified as available-for-sale securities and consisted primarily of preferred stock, including securities that may be sold in response to changes in market interest, needs for liquidity, or changes in the availability or yield of alternative investments. These securities were carried at fair market value prior to their sale in fiscal 2001.

INVENTORIES - Inventories are stated at the lower of cost (first-in, first-out) or market.

INTANGIBLES - Intangibles consist of goodwill, which is being amortized using the straight-line method over its economic useful life, which has been estimated to be 15 years.

DEPRECIATION - Depreciation is based on the estimated useful lives of the individual assets. The methods and estimated useful lives are as follows:

29

AULT INCORPORATED AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED JUNE 2, 2002 AND JUNE 3, 2001

	Method	Years
Building	Straight-line	36
Machinery and equipment	Straight-line	3-10
Office furniture and equipment	Straight-line	5-15
Data processing equipment	Double declining balance and straight-line	3-5
Leasehold Improvement	Straight-line	Lease term

FINANCIAL INSTRUMENTS - The fair value of the long-term debt is

Edgar Filing: AULT INC - Form 10-K

estimated based on the use of discounted cash flow analysis using interest rates for the same or similar debt offered to the Company having the same or similar remaining maturities and collateral requirements. Management estimates the carrying value of the long-term debt approximates fair value. All other financial instruments approximate fair value because of the short-term nature of these instruments.

RETIREMENT AND SEVERANCE BENEFITS - Retirement and severance benefits represents the accrual of compensation expense, net of deposits, for the Korean operations' employees that is payable upon termination of employment.

The Company does not fund the retirement and severance benefits accrued, but rather provides for the estimated accrued liability under the plans as of the balance sheet date. Under the National Pension Scheme of Korea, the Company is required to transfer a certain portion of the retirement allowances of employees to the National Pension Fund. The amount transferred reduces the retirement and severance benefit liability recorded in the consolidated financial statements.

REVENUE RECOGNITION - The Company recognizes revenue for all domestic shipments at the shipping point. The terms for the domestic shipments are FOB shipping point. For international shipments the Company recognizes revenue at the time risk of ownership passes. All of the Company's product held by distributors are stocked for OEM's and are non-cancelable, non-returnable. Payment from distributors are no different than other customers, 0.5% 10 net 30.

FREIGHT BILLING/EXPENSE - Customer billings for freight are included in sales, and the freight costs are included in costs of sales in accordance with Emerging Issues Task Force No. 00-10, ACCOUNTING FOR SHIPPING AND HANDLING FEES AND COSTS (EITF 00-10).

DESIGN ENGINEERING - Design engineering costs are those incurred for research, design, and development of new products and redesign of existing products. These costs are expensed as incurred.

ADVERTISING EXPENSE - The Company expenses advertising costs as incurred. Advertising expenses of approximately \$45,000, \$106,000, and \$171,000 were charged to operations during the periods ended June 2, 2002, June 3, 2001, and May 28, 2000, respectively.

SALE OF KOREAN FACILITY - The Company's facility in Korea was expropriated by the government for the construction of a provincial road. In the fourth quarter of the year ended May 28, 2000, the Company received expropriation proceeds and recognized a gain on the disposition of \$1,524,879. The Company moved into a new facility during June 2001.

30

AULT INCORPORATED AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED JUNE 2, 2002 AND JUNE 3, 2001

INCOME TAXES - Deferred taxes are provided on a liability method whereby deferred tax assets are recognized for deductible temporary differences

Edgar Filing: AULT INC - Form 10-K

and operating loss and tax credit carryforwards, and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

LONG-LIVED ASSETS - In accordance with Statement of Financial Accounting Standards No. 121, ACCOUNTING FOR THE IMPAIRMENT OF LONG-LIVED ASSETS AND FOR LONG-LIVED ASSETS TO BE DISPOSED OF, the Company reviews its long-lived assets and intangibles related to those assets periodically to determine potential impairment by comparing the carrying value of the long-lived assets outstanding with estimated future undiscounted cash flows expected to result from the use of the assets, including cash flows from disposition. Should the sum of the expected future undiscounted cash flows be less than the carrying value, the Company would recognize an impairment loss. An impairment loss would be measured by comparing the amount by which the carrying value exceeds the fair value of the long-lived assets and intangibles. To date, management has determined that no impairment of long-lived assets exists.

EARNINGS PER SHARE - Basic earnings per share is computed by dividing net income (loss) by the weighted-average number of common shares outstanding during the period. Diluted earnings per share is computed by dividing net income (loss) by the weighted-average number of common shares outstanding during the period adjusted by common share equivalents related to stock options, warrants, and the employee stock purchase plan. Options to purchase 978,926, 299,527, and 196,812 shares of common stock were outstanding during the fiscal years ended June 2, 2002, June 3, 2001, and May 28, 2000, respectively, but were excluded from the computation of common stock equivalents because they were anti-dilutive.

AULT INCORPORATED AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 YEARS ENDED JUNE 2, 2002 AND JUNE 3, 2001

The following table reflects the calculation of basic and diluted earnings per share:

	JUNE 2, 2002	JUNE 3, 2001
Numerator -		
Income (loss)	\$ (3,563,726)	\$ 2,196,18
Denominator:		
Basic - weighted-average shares outstanding	4,541,322	4,493,12

Edgar Filing: AULT INC - Form 10-K

Effect of dilutive shares:		
Stock options outstanding and employee stock purchase plan	-----	198,17
Diluted - weighted-average shares outstanding	4,541,322	4,691,29
Basic earnings (loss) per share	\$ (0.78)	\$ 0.4
Diluted earnings (loss) per share	\$ (0.78)	\$ 0.4

USE OF ESTIMATES IN THE PREPARATION OF FINANCIAL STATEMENTS - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

COMPREHENSIVE INCOME - The Company's fiscal 2002 comprehensive income consists of net income and foreign currency translation adjustments.

ACCOUNTING PRONOUNCEMENTS - On June 4, 2001 the Company adopted Statement of Financial Accounting Standard (SFAS) No. 133, ACCOUNTING FOR DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES, as amended by SFAS No. 138, ACCOUNTING FOR CERTAIN DERIVATIVE INSTRUMENTS AND CERTAIN HEDGING ACTIVITIES. SFAS No. 133 establishes accounting and reporting standards for derivative instruments and for hedging activities. It requires that all derivatives, including those embedded in other contracts, be recognized as either assets or liabilities and that those financial instruments be measured at fair value. The accounting for changes in the fair value of derivatives depends on their intended use and designation. Management has reviewed the requirements of SFAS No. 133 and has determined that the Company has no free-standing or embedded derivatives. All agreements that contain provisions meeting the definition of a derivative also meet the requirements of, and have been designated as normal purchases or sales. The Company's policy is to not use free-standing derivatives and to not enter into contracts with terms that cannot be designated as normal purchases or sales.

In December 1999, the Securities and Exchange Commission (SEC) issued Staff Accounting Bulletin (SAB) No. 101 REVENUE RECOGNITION IN FINANCIAL STATEMENTS. SAB No. 101 summarizes certain of the SEC staff's views in applying generally accepted accounting principles to selected revenue recognition issues. As a result, the Company changed the method of accounting for certain sales transactions. Historically, the Company recognized revenue upon shipment of products to certain international customers because, even though some products were shipped FOB destination, we used a common carrier and thus gave up substantially all the risks of ownership. Under the new accounting method adopted retroactive to May 29, 2000, the Company now recognizes revenue at the time risk of ownership passes. The cumulative effect of the change on prior years resulted in a minor non-cash charge to income of \$50,000 (net of taxes of \$27,000) for the year ended June 3, 2001. The pro forma amounts presented in the consolidated statements of income were calculated assuming the accounting change was made retroactively to the prior period.

AULT INCORPORATED AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 YEARS ENDED JUNE 2, 2002 AND JUNE 3, 2001

For the three months ended August 27, 2000, the Company recognized \$234,000 in revenue that was included in the cumulative effect adjustment as of May 29, 2000. The effect of the revenue in the first quarter was to increase income by \$50,000 (after reduction for income taxes of \$27,000).

In June 2001, the Financial Accounting Standards Board approved for issuance Statement of Financial Accounting Standards (SFAS) No. 141, BUSINESS COMBINATIONS and No. 142 GOODWILL AND OTHER INTANGIBLE Assets. SFAS No. 141 requires that the purchase method of accounting be used for all business combinations initiated after June 30, 2001 and that the use of the pooling-of-interest method is no longer allowed. SFAS No. 142 requires that upon adoption, amortization of goodwill will cease and instead, the carrying value of goodwill will be evaluated for impairment on an annual basis. In fiscal 2002, 2001 and 2000 the amortization expense was \$100,000 each year. Identifiable intangible assets will continue to be amortized over their useful lives and reviewed for impairment in accordance with SFAS No. 121 ACCOUNTING FOR THE IMPAIRMENT OF LONG-LIVED ASSETS AND FOR LONG-LIVED ASSETS TO BE DISPOSED OF. SFAS No. 142 is effective for the Company's fiscal year beginning June 3, 2002. The Company has determined that the adoption of these standards will not be material.

In August 2001, the FASB issued SFAS No. 144, ACCOUNTING FOR THE IMPAIRMENT OR DISPOSAL OF LONG-LIVED ASSETS. SFAS 144 addresses financial accounting and reporting for the impairment or disposal of long-lived assets and supercedes SFAS 121, ACCOUNTING FOR THE IMPAIRMENT OF LONG-LIVED ASSETS AND ASSETS TO BE DISPOSED OF, and the accounting and reporting provisions of Accounting Principles Board Opinion No. 30, REPORTING THE RESULTS OF OPERATIONS--REPORTING THE EFFECTS OF DISPOSAL OF A SEGMENT OF A BUSINESS AND EXTRAORDINARY, UNUSUAL AND INFREQUENTLY OCCURRING TRANSACTIONS. SFAS 144 requires that long-lived assets to be disposed of be measured at the lower of carrying amount or fair value less cost to sell. The Company adopted SFAS 144 on June 3, 2002. The Company is in the process of evaluating the impact SFAS 144 will have on its consolidated financial statements.

2. INVENTORIES

The components of inventory at June 2, 2002 and June 3, 2001 are as follows:

	JUNE 2, 2002	JUNE 3, 2001
Raw materials	\$ 4,608,937	\$ 6,583,676
Work-in-process	788,456	550,118
Finished goods	3,104,112	5,289,086
	-----	-----
	\$ 8,501,505	\$ 12,422,880
	=====	=====

Edgar Filing: AULT INC - Form 10-K

3. FINANCING ARRANGEMENT AND LONG-TERM DEBT

FINANCING ARRANGEMENT - The Company has a financing agreement, which includes a \$4,000,000 revolving line-of-credit agreement through February 28, 2003. Interest on advances is at the bank's reference rate plus 2.8 percent, 7.55 percent and 6.5 percent at June 2, 2002 and June 3, 2001 respectively. All advances are due on demand and are secured by all assets of the Company. There were no advances outstanding on the revolving line of credit at June 2, 2002 or June 3, 2001. Also, the Company's Korean subsidiary maintains an unsecured \$3,864,000 credit facility agreement to cover bank overdrafts, short-term financing, and export financing at a rate of 6.25 percent on June 2, 2002 and June 3, 2001. Advances outstanding relating to the Korean facility were \$2,889,636 and \$4,003,087 at June 2, 2002 and June 3, 2001, respectively.

4. INCOME TAXES

Pretax income (loss) for domestic and foreign operations was as follows:

	JUNE 2, 2002	JUNE 3, 2001
Domestic	\$ (2,654,385)	\$ 3,890,363
Foreign	(1,603,467)	(288,988)
	-----	-----
Total	\$ (4,257,852)	\$ 3,601,375
	=====	=====

34

AULT INCORPORATED AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED JUNE 2, 2002 AND JUNE 3, 2001

The components of the provision (benefit) for income taxes are as follows:

	JUNE 2, 2002	JUNE 3, 2001
Current:		
Domestic	\$ (952,026)	\$ 1,031,1
Foreign	125,000	
State	(18,600)	192,0
Deferred	151,500	132,0
	-----	-----
	\$ (694,126)	\$ 1,355,1
	=====	=====

The income tax provision differs from the amount of income tax determined by applying the U.S. federal income tax rate to pretax income for the fiscal years ended June 2, 2002, June 3, 2001, and May 28, 2000, due to the following:

	JUNE 2, 2002	JUNE 3, 2001
--	-----------------	-----------------

Edgar Filing: AULT INC - Form 10-K

Computed expected tax provision	\$ (1,405,060)	\$ 1,224,000
Increase (decrease) in income taxes resulting from:		
Nondeductible expenses	10,087	11,000
State income taxes, net of federal benefit	(31,360)	85,000
Foreign taxes	125,000	(180,000)
Current year R&D tax credits:		
Domestic	84,000	(10,000)
State		
Change in valuation allowance	502,207	180,000
Other	21,000	45,100
	-----	-----
	\$ (694,126)	\$ 1,355,100
	=====	=====

Net deferred taxes consist of the following components:

	JUNE 2, 2002
Deferred tax assets:	
Allowance for doubtful accounts	\$ 95,000
Future income tax benefit from stock options exercised	
Accrued vacation	53,000
Accrued warranty	42,000
Equipment and leasehold improvements	(264,000)
Tax credit carryforwards and other	(37,000)
Foreign deferred tax asset	682,000
Foreign valuation allowance	(682,000)
State NOL carryforwards	88,000
Unicap adjustment	1,000

	\$ (22,000)
	=====

35

AULT INCORPORATED AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED JUNE 2, 2002 AND JUNE 3, 2001

The components giving rise to the net deferred tax asset described above have been included in the consolidated balance sheet:

	JUNE 2, 2002	JUNE 3, 2001
Current assets	\$ 252,000	\$ 364,000
Noncurrent liabilities	(274,000)	(213,000)

The Company has assessed its past earnings history and trends, budgeted sales, and expiration of dates of carryforwards and has determined that it is more likely than not that its net deferred tax assets will be realized.

Edgar Filing: AULT INC - Form 10-K

5. EMPLOYEE BENEFIT PLANS

401(K) EMPLOYER MATCH PLAN - The Company has a 401(K) plan covering substantially all U.S. employees. The Company is required to match 25% of the employees' first 6% of contributions and may make additional contributions to the plan to the extent authorized by the Board of Directors. The contribution amounts charged to operating expenses in the fiscal years ended June 2, 2002, June 3, 2001, and May 28, 2000 approximated \$72,000, \$67,000, and \$63,000, respectively.

STOCK PURCHASE PLAN - On March 10, 1996, the Company established a stock purchase plan in which up to 100,000 shares of common stock may be purchased by employees. The purchase price is equal to the lesser of 85% of the fair market value of the shares on the date the phase commences or 85% of the fair market value of the shares on the termination date of the phase. Each phase is one year from the commencement date of a phase. There were 13,588, 15,740, and 11,359 shares purchased under this plan during the fiscal year ended June 2, 2002, June 3, 2001, and May 28, 2000, respectively.

6. STOCK OPTION PLAN

The Company's 1986 and 1996 stock option plan has reserved 600,000 and 1,050,000 common shares, respectively, for issuance under qualified and nonqualified stock options for its key employees and directors. Option prices are the market value of the stock at the time the option was granted. Options become exercisable as determined at the date of grant by a committee of the Board of Directors. Options expire ten years after the date of grant unless an earlier expiration date is set at the time of grant.

The Company has adopted the disclosure-only provisions of SFAS No. 123, ACCOUNTING FOR STOCK-BASED COMPENSATION. Accordingly, no compensation cost has been recognized for the stock option plan, as all options were issued with exercised prices at or above fair value. Had compensation cost for the Company's stock option plans been determined based on the fair value at the grant date for awards in 2002, 2001, and 2000 consistent with the provisions of SFAS No. 123, the Company's net income and net income per share would have changed to the pro forma amounts indicated below:

36

AULT INCORPORATED AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 YEARS ENDED JUNE 2, 2002 AND JUNE 3, 2001

	JUNE 2, 2002	JUNE 3, 2001
Net income (loss), as reported	\$ (3,563,726)	\$ 2,196,189
Net income (loss), pro forma	(4,237,331)	1,709,021
Net income (loss), per share, basic, as reported	(0.78)	0.49
Net income (loss), per share, diluted, as reported	(0.78)	0.47
Net income (loss), per share, basic, pro forma	(0.93)	0.38

Edgar Filing: AULT INC - Form 10-K

Net income (loss), per share, diluted, pro forma (0.93) 0.36

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted-average assumptions used for grants in 2002, 2001, and 2000:

	JUNE 2, 2002	JUNE 3, 2001
Expected dividend yields	\$ -	\$ -
Expected stock price volatility	59.38%	76.58%
Risk-free interest rate	4.81%	6.63%
Expected life of options	7.74 years	7.41 ye

Additional information relating to all outstanding options as of June 2, 2002, June 3, 2001, and May 28, 2000 is as follows:

	JUNE 2, 2002		JUNE 3, 2001		
	Shares	Weighted- Average Exercise Price	Shares	Weighted Average Exercise Price	S
Options outstanding at beginning of year	867,676	\$ 5.71	832,964	\$ 5.22

7. STOCKHOLDERS' EQUITY

The Board of Directors is empowered to establish and to designate classes and series of preferred shares and to set the terms of such shares, including terms with respect to redemption, dividends, liquidation, conversion, and voting rights. The Restated Articles of Incorporation provide that the preferred shares are senior to the common shares with respect to dividends and liquidation. No preferred shares have been issued.

The Company has a shareholders' rights plan. Under this plan, a Class A, Junior Participating Preferred Stock with no par value was created. In addition, a dividend of one right was declared for each share of common stock at an exercise price of \$36 per right and a redemption price of \$0.001 per right. Each right is equal to a right to purchase one one-hundredth of a share of the Class A, Junior Participating Preferred Stock. 100,000 shares of preferred stock are reserved for the exercise of the rights. No rights were exercised during the years ended June 2, 2002, June 3, 2001, and May 28, 2000.

The Company has notes receivable from certain officers of the Company arising from the sale of common stock recorded as an offset to stockholders' equity.

8. COMMITMENT AND CONTINGENCIES

OPERATING LEASES - The Company leased its United States plant under an operating lease through August 1999 before moving into its newly constructed facility. In addition, certain equipment and motor vehicles are leased under operating leases with terms of approximately 36 months.

Edgar Filing: AULT INC - Form 10-K

YEARS ENDED JUNE 2, 2002 AND JUNE 3, 2001

Approximate minimum annual rental commitments at June 2, 2002 are as follows:

2003		\$ 77,377
2004		30,572
2005		6,758
2006		5,069

		\$ 119,776

Total rental expense for the fiscal years ended June 2, 2002, June 3, 2001, and May 28, 2000 was approximately \$44,000, \$66,000, and \$304,000, respectively.

9. SEGMENT INFORMATION AND FOREIGN OPERATIONS

The Company has adopted SFAS No. 131, DISCLOSURES ABOUT SEGMENTS OF AN ENTERPRISE AND RELATED INFORMATION. This statement requires disclosure of certain information for each reportable segment, including general information, profit and loss information, segment assets, etc.

The Company conducts its business within one reportable segment: the power conversion product industry. The Korean subsidiary, the Chinese subsidiaries, and certain nonaffiliated companies in China and Thailand do foreign manufacturing. All United States manufacturing is done by Ault Incorporated. A summary of the Company's revenues, net income, and identifiable assets by geographic area is presented below:

	JUNE 2, 2002	JUNE 3, 2001
Revenues:		
Domestic operations	\$ 34,811,779	\$76,323,99
Korean and Chinese operations - customers	6,220,075	9,367,59
Korean and Chinese operations - parent	9,711,255	13,957,75

Eliminations	(11,472,891)	(9,744,5
	-----	-----
Consolidated	\$ 36,696,987	\$ 43,456,6
	=====	=====

AULT INCORPORATED AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 YEARS ENDED JUNE 2, 2002 AND JUNE 3, 2001

Long-lived assets:	JUNE 2, 2002	JUNE 3, 2001	MAY 28, 2000
Domestic operations	\$ 5,904,130	\$ 6,444,191	\$ 6,581,433
Korean and Chinese operations	6,538,116	6,131,581	3,955,492
	-----	-----	-----
Consolidated	\$ 12,442,246	\$ 12,575,772	\$ 10,536,925
	=====	=====	=====

Sales from the subsidiary to the parent company are based upon profit margins, which represent competitive pricing of similar products.

EXPORT SALES - The Company also had foreign export sales amounting to 17.3, 25.9, and 14.8 percent of total sales for the fiscal years ended June 2, 2002, June 3, 2001, and May 28, 2000, respectively.

OTHER FOREIGN PRODUCTION - In addition to the manufacturing done by the Korean subsidiary, the Company has subcontracting agreements for the purchase of finished assemblies from certain manufacturers in China and Thailand. Total purchases under these agreements were approximately \$10,388,000, \$35,710,000, and \$29,944,000 for the fiscal years ended June 2, 2002, June 3, 2001, and May 28, 2000, respectively.

10. MAJOR CUSTOMER

During the fiscal year ended June 2, 2002, the Company had a major customer with 2.8% of total sales and 10.1% of total accounts receivable. During the fiscal year ended June 3, 2001, the Company had a major customer with 5.0% of total sales and 11.1% of total accounts receivable. The Company had no customers with revenues or accounts receivable of more than 10% of the total during the fiscal year ended May 28, 2000.

11. SUBSEQUENT EVENT

On July 16, 2002, the Company purchased a portion of the operating assets of the Power General division of Nidec America Corporation. The Power General division developed, manufactured, and sold high efficiency DC/DC converters and custom power supplies at various power levels up to 1200 watts under the Power General brand name. Pursuant to the Purchase Agreement, the Company paid the Seller \$366,000 in cash and issued \$2,074,000 face amount of the Company's newly-created Series B 7% Convertible Preferred Stock, no par value (the "Preferred Stock"). The Preferred Stock issued to the Seller is convertible into 488,000 shares

Edgar Filing: AULT INC - Form 10-K

of the Company's Common Stock. The Company has agreed to file a registration statement covering the shares of Common Stock issuable upon conversion of the Preferred Stock with the Securities and Exchange Commission. The Company will maintain Power General's engineering group in Massachusetts and move Power General's manufacturing operations and related functions to Ault's other facilities in North America and Asia.
