DIANA SHIPPING INC. REPORTS FINANCIAL RESULTS  
FOR THE FOURTH QUARTER AND YEAR ENDED DECEMBER 31, 2013

ATHENS, GREECE, February 18, 2014 – Diana Shipping Inc. (NYSE: DSX), (the "Company"), a global shipping company specializing in the ownership of dry bulk vessels, today reported a net loss of \$9.6 million for the fourth quarter of 2013, compared to net income of \$5.0 million reported for the fourth quarter of 2012.

Time charter revenues were \$39.5 million for the fourth quarter of 2013, compared to \$49.4 million for the same period of 2012. This was mainly due to reduced time charter rates, as well as the accelerated amortization of the prepaid charter revenue for the m/v Houston, due to the earlier redelivery of the vessel by the charterers, resulting in the unamortized balance of \$3.0 million being recorded against time charter revenues in the fourth quarter of 2013. The decrease in time charter revenues was partly offset by revenues derived from the increase in ownership days resulting from the enlargement of our fleet.

Net loss for 2013 amounted to \$21.2 million, compared to net income of \$54.6 million for 2012. Time charter revenues were \$164.0 million for 2013, compared to \$220.8 million for 2012.

(1) Time charter equivalent rates, or TCE rates, are defined as our time charter revenues less voyage expenses during a period divided by the number of our available days during the period, which is consistent with industry standards. Voyage expenses include port charges, bunker (fuel) expenses, canal charges and commissions. TCE is a non-GAAP measure. TCE rate is a standard shipping industry performance measure used primarily to compare daily earnings generated by vessels on time charters with daily earnings generated by vessels on voyage charters, because charter hire rates for vessels on voyage charters are generally not expressed in per day amounts while charter hire rates for vessels on time charters are generally expressed in such amounts.

(2) Daily vessel operating expenses, which include crew wages and related costs, the cost of insurance, expenses relating to repairs and maintenance, the costs of spares and consumable stores, tonnage taxes and other miscellaneous expenses, are calculated by dividing vessel operating expenses by ownership days for the relevant period.
