Second Quarter Highlights:

- Equity contribution of \$1.1 million by certain major shareholders
- Compliance with the continued listing requirements of Nasdaq
- Total shareholder's equity of \$3.0 million
- Indebtedness of \$NIL

Management Discussion:

Stamatis Tsantanis, the Company's Chairman & Chief Executive Officer, stated:

"Following the conclusion of the financial restructuring process in March 2014, we have focused entirely on completing all the necessary steps in order to finalize the previously announced acquisition of four Capesize vessels by the end of the third quarter of 2014.

"Additionally, we have worked to ensure the Company's continued compliance with the NASDAQ minimum equity listing requirement, which has been achieved. As part of this effort, certain of our major shareholders contributed the amount of \$1.1 million in return for newly issued common shares of Seanergy in June 2014.

"In the six months ended June 30, 2014, Seanergy reported net income of \$82.7 million, which includes a non-cash restructuring gain as announced in our first quarter earnings release a few weeks ago. The Company ended the second quarter of 2014 with approximately \$3 million in shareholders' equity, zero debt and \$2.7 million in cash and cash equivalents.

"We are optimistic that the expected completion of the transaction will allow us to benefit from the positive long term fundamentals of the Capesize market and will underpin our efforts to grow the Company further."

Second Quarter Developments:

Cash Contribution by Major Shareholders

On June 24, 2014, certain of the Company's existing major shareholders agreed to contribute the amount of \$1.134 million in exchange for 1,890,000 common shares, which were issued on June 27, 2014. The purchasers also received customary registration rights in respect of the shares issued in the transaction. The transaction was approved by an independent committee of the Company's Board of Directors, which obtained a fairness opinion from an independent financial firm for this transaction.

Regained Compliance with Nasdaq Continued Listing Requirements

On May 6, 2014, the Company announced that the Nasdaq Hearings Panel confirmed it has regained compliance with the continued listing requirements of the Nasdaq Capital Market and Nasdaq Hearings Panel closed this matter, since the Company regained compliance with the minimum shareholders' equity requirement and all other requirements for continued listing on the Nasdaq Capital Market.

Strategic Agreement for the Contribution of Four Capesize Vessels

On April 29, 2014, the Company announced that certain of the Company's major shareholders will contribute four Capesize vessels. The transaction was approved by an independent committee of the Company's Board of Directors, which obtained a fairness opinion from an independent financial firm for this transaction. The closing of the transaction, which is subject to standard closing conditions and lenders' consents, was initially expected to take place prior to June 30, 2014. The closing date has been extended pursuant to the terms of the relevant share purchase agreement, and is now expected to occur prior to September 30, 2014.

Following the completion of the transaction, the Company will have a modern fleet of four Capesize dry bulk carriers with a combined cargo-carrying capacity of approximately 682,723 dwt and an average fleet age of about 7.5 years. Upon delivery, the vessels are expected to be employed in the spot market or under index-linked charter agreements and consequently the Company is expected to start earning revenue immediately upon completion of the transaction.

Ownership days are the total number of days in a period during which the vessels in a fleet have been owned. (2) Ownership days are an indicator of the size of the Company's fleet over a period and affect both the amount of revenues and the amount of expenses that the Company recorded during a period.

The shipping industry uses available days to (3) measure the number of ownership days in a period during which vessels should be capable of generating revenues.
