- Item 7.01 Regulation FD Disclosure

MADISON, N.J., PARIS, France, BURLINGTON, N.C. -- April 21, 2015 - Quest Diagnostics (NYSE: DGX), the world's leading provider of diagnostic information services, and Inserm, the French National Institute of Health and Medical Research institution, today launched BRCA Share™, a novel datashare initiative they co-founded to provide scientists and laboratory organizations around the world with open access to BRCA1 and BRCA2 genetic data. The program's goal is to accelerate research on BRCA gene mutations, particularly variants of uncertain significance, to improve the ability of clinical laboratory diagnostics to predict which individuals are at risk of developing hereditary breast and ovarian cancers.

Laboratory Corporation of America® Holdings (LabCorp®) (NYSE: LH), the world's leading healthcare diagnostics company, is the first participant in the initiative, which is structured as a user group. BRCA Share builds on a BRCA gene-data curation process developed by Inserm with BRCA data, maintained in its Universal Mutation Database, developed over a decade of patient testing by 16 laboratories in France that make up, together with associated University Hospital Centers, the Unicancer Genetic Group (UGG).
