The percentage shown for each investment category is the total value of that category as a percentage of the net assets applicable to common stock of the Fund.

⁽¹⁾ Equity securities traded on a national or foreign securities exchange or traded over-the-counter and quoted on the NASDAQ System are valued at the last reported sale price or, if there was no sale on the pricing date, then the security is valued at the mean of the bid and ask prices as obtained on that day from one or more dealers regularly making a market in that security. Fixed income securities are valued at the mean of bid and ask prices provided by an independent pricing service when such prices are believed to reflect the fair market value of such securities. Such bid and ask prices are determined taking into account securities prices, yields, maturities, call features, ratings, and institutional size trading in similar securities and developments related to specific securities. Any securities for which it is determined that market prices are unavailable or inappropriate are valued at a fair value using a procedure determined in good faith by the Board of Directors. Short-term investments having a maturity of 60 days or less are valued on an amortized cost basis, which approximates market value.

⁽²⁾ At December 31, 2006, the Fund smost recent fiscal tax year end, based on a tax cost of investments of \$3,576,595,839, the Fund had gross unrealized appreciation of \$610,438,317 and gross unrealized depreciation of \$12,184,772.
