**EMethanex Achieves Financial Close for Egypt Methanol Project**

Methanex Corporation's affiliate, EMethanex, has achieved financial close for its project to construct a 1.26 million tonne per year methanol facility at Damietta on the Mediterranean Sea in Egypt. Methanex has a 60% interest in the joint venture, with 33% held by Egyptian Government partners (Echem 12%, EGAS 12% and GASCO 9%) and 7% held by Arab Petroleum Investments Corporation (APICORP). Commercial production from the project is expected in early 2010, and Methanex will offtake 100% of the methanol. The forward funding requirement for the Engineering, Procurement and Construction (EPC) and Owners' costs is approximately US\$810 million; US\$530 million of limited recourse project financing has been secured.

Bruce Aitken, President and CEO of Methanex, commented, "We are delighted to proceed with this value creating project, which closely aligns with our strategy of maintaining and enhancing our leadership in the production, marketing and delivery of methanol. With its strategic location on the Mediterranean Sea, we believe this plant will be very competitively positioned to supply our global customer base.

Mr Aitken continued, "We believe this new production hub in Egypt will integrate seamlessly into our global supply chain and enhance the security of supply to the growing methanol needs of our customers. Similar to our facilities in Chile and Trinidad, the Damietta site also has the potential to add additional methanol trains in the future that would benefit from economies of scale and synergies from this first plant. We believe there are also some interesting opportunities for growth of methanol derivatives to supply the Egyptian market and we have recently signed an MOU to investigate the development of a dimethyl ether (DME) facility in Egypt.

Michael Macdonald, Methanex's Senior Vice President, Corporate Development, who is leading the project for the Company, added, "This project is also a major milestone in the Petrochemical Master Plan developed by the Egyptian Ministry of Petroleum to add value and leverage economic growth off its growing natural gas resource. We are very pleased to be partners with the Egyptian Government through Ministry of Petroleum companies and with APICORP, and all participants bring an important contribution to this project. Gas will be supplied by EGAS, gas distribution by GASCO, local marketing in Egypt will be undertaken by Echem and a portion of the project debt will be provided by Saudi Arabia-based APICORP.

Mr. Macdonald added, "The project will be executed by Techint out of their Milan and Cairo offices and will include considerable local content provided by Egyptian Ministry of Petroleum companies; ENPPI (engineering) and Petrojet (construction). The project has been financed by the European Investment Bank and a syndicate of International and Egyptian Banks.

Techint E&C, which employs about 16,000 people, is the Engineering & Construction Division of the Techint Group. For 60 years Techint E&C has realized about 3,500 projects worldwide. The Techint Group in the financial year ended on June 30, 2006 had total revenues of US\$16 billion.

Methanex is a Vancouver based, publicly traded company engaged in the worldwide production, distribution and marketing of methanol. Methanex shares are listed for trade on the Toronto Stock Exchange in Canada under the trading symbol "MX", on the NASDAQ Global Market in the United States under the trading symbol "MEOH", and on the foreign securities market of the Santiago Stock Exchange in Chile under the trading symbol "Methanex". Methanex can be visited online at [www.methanex.com](http://www.methanex.com).
