PROSPECTUS SUPPLEMENT
(to prospectus dated December 22,
2010)

Filed Pursuant to Rule 424(b)(3)
Registration Nos. 333-167844

333-167844-01

Lloyds TSB Bank plc
Medium-Term Notes, Series A
fully and unconditionally guaranteed by Lloyds Banking Group plc

We, Lloyds TSB Bank plc, may offer from time to time our senior unsecured Medium-Term Notes, Series A, which may be issued in one or more sub-series from time to time and which we hereinafter refer to as the “notes.” The notes will be fully and unconditionally guaranteed by Lloyds Banking Group plc. The specific terms of any notes that we offer will be determined before each sale and will be described in a separate pricing supplement, product supplement and/or underlying supplement (each, a “supplement”). Terms may include:

- Interest Rate: the notes may bear interest at fixed or floating rates, or may not bear any interest;
 - Interest Rate Basis: the floating rate formula may be based on:
 - the CD rate;
 - the CMS rate;
 - the CMT rate;
 - the commercial paper rate;
 - the federal funds rate;
 - LIBOR;
 - EURIBOR;
 - the prime rate;
 - the treasury rate; or
 - such other interest rate basis or bases or interest rate formula as is described in the applicable supplement.
- Indexed notes: principal, premium (if any), interest payments, or other amounts payable (if any) linked, either directly or indirectly, to the price or performance of one or more market measures, including securities, currencies, commodities, interest rates, stock or commodity indices, inflation indices, or any combination of the above;
 - Maturity: the notes will mature three months or more from the date of issue;

Edgar Filing: Lloyds Banking Group plc - Form 424B3

- Redemption or Repayment Option: the notes may be subject to redemption or repayment at our option or the holder's option;
- Form: the notes will be held in global form by The Depository Trust Company, unless the applicable supplement provides otherwise;
- Interest Payment Dates: interest on the notes, if any, will be paid on the dates specified in the applicable supplement;
 - Payment Currency: U.S. dollars or any other currency that we specify in the applicable supplement.

We may sell notes to the selling agents as principal for resale at varying or fixed offering prices or through the selling agents as agents using their reasonable best efforts on our behalf. We may also sell the notes directly to investors.

Unless otherwise specified in the applicable supplement, we do not intend to list the notes on any securities exchange.

Investing in the notes involves risks. See "Risk Factors" beginning on page S-2 of this prospectus supplement and as incorporated by reference herein.

Our notes are unsecured and are not bank deposits. Our notes are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency, and involve investment risks.

Neither the Securities and Exchange Commission nor any other regulatory body has approved or disapproved of these notes or passed upon the adequacy or accuracy of this prospectus supplement or the accompanying prospectus. Any representation to the contrary is a criminal offense.

You should rely only on the information incorporated by reference or provided in this prospectus supplement, the accompanying prospectus and any related supplement. We have not authorized anyone to provide you with different information. We are not offering the securities in any jurisdiction where the offer is not permitted. You should not assume that the information in this prospectus supplement, the accompanying prospectus or any related supplement is accurate as of any date other than the date on the front of this document.

ABOUT THIS PROSPECTUS SUPPLEMENT

In this prospectus supplement, we use the following terms:

- “we,” “us,” “our” and “Lloyds Bank” mean Lloyds TSB Bank plc;
- “LBG” means Lloyds Banking Group plc;
- “SEC” refers to the Securities and Exchange Commission;
- “pounds,” “sterling,” “pence,” “£” and “p” refer to the currency of the United Kingdom;
- “dollars” and “\$” refer to the currency of the United States; and
- “euro” and “€” refer to the currency of the member states of the European Union (“EU”) that have adopted the single currency in accordance with the treaty establishing the European Community, as amended.

We have registered the notes and related guarantees on a registration statement on Form F-3 with the SEC under registration no. 333-167844, as amended by post-effective amendment no. 1 (registration no. 333-167844-01). We refer to the notes and related guarantees offered under this prospectus supplement as our Medium-Term Notes.

This prospectus supplement describes additional terms of the notes, and supplements the description of our debt securities contained in the accompanying prospectus. If the information in this prospectus supplement is inconsistent with the accompanying prospectus, this prospectus supplement will supersede the information in the accompanying prospectus.

From time to time, we intend to use this prospectus supplement, the accompanying prospectus, and a related pricing supplement, product supplement and/or underlying supplement to offer the notes. We may also refer to any pricing supplement as a “term sheet.” You should read each of these documents before investing in the notes. You should also read the information contained in the documents identified in “Where You Can Find More Information” in the accompanying prospectus.

For each offering of notes, we will issue a pricing supplement, a product supplement and/or underlying supplement which will contain additional terms of the offering and a specific description of the notes being offered. A supplement also may add, update, or change information in this prospectus supplement or the accompanying prospectus, including provisions describing the calculation of the amounts due under the notes and the method of making payments under the terms of a note. We will state in the applicable supplement the interest rate or interest rate basis or formula, issue price, any relevant market measures, the maturity date, interest payment dates, redemption, or repayment provisions, if any, and other relevant terms and conditions for each note at the time of issuance. A supplement may also include a discussion of any risk factors or other special additional considerations that apply to a particular type of note. Each applicable supplement can be quite detailed and should always be read carefully.

This prospectus supplement and the accompanying prospectus do not constitute an offer to sell or the solicitation of an offer to buy the notes in any jurisdiction in which that offer or solicitation is unlawful. The distribution of this prospectus supplement and the accompanying prospectus and the offering of the notes in some jurisdictions may be restricted by law. If you have received this prospectus supplement and the accompanying prospectus, you should find out about and observe these restrictions. Persons outside the United States who come into possession of this prospectus supplement and the accompanying prospectus must inform themselves about and observe any restrictions relating to the distribution of this prospectus supplement and the accompanying prospectus and the offering of the notes outside of the United States. The information set forth in this prospectus supplement is directed to prospective

purchasers who are United States residents. We disclaim any responsibility to advise prospective purchasers who are residents of countries other than the United States of any matters arising under foreign law that may affect the purchase of or holding of, or receipt of payments on, the notes. These persons should consult their own legal and financial advisors concerning these matters. See “Supplemental Plan of Distribution.”

Any term that is used, but not defined, in this prospectus supplement has the meaning set forth in the accompanying prospectus.

S-1

RISK FACTORS

Your investment in the notes and the guarantees involves significant risks. Your decision to purchase the notes should be made only after carefully considering the risks of an investment in the notes, including those discussed below and in the relevant supplement(s) for the specific notes, with your advisors in light of your particular circumstances. The notes are not an appropriate investment for you if you are not knowledgeable about significant elements of the notes or financial matters in general.

Risks relating to Lloyds Bank and LBG

For a description of the risks associated with Lloyds Bank and LBG and information regarding risks and uncertainties that may materially affect our business and results, see the sections entitled “Operating Financial Review and Prospects” and “Risk Factors” in our annual report on Form 20-F for the year ended 2010, which is incorporated by reference in the accompanying prospectus. You should also review the risk factors that will be set forth in other documents filed after the date of this prospectus supplement.

Risks relating to the notes

An investment in the notes is subject to the credit risk of Lloyds Bank and LBG.

An investment in any of the notes and the guarantee issued under our medium-term note program is subject to the credit risk of Lloyds Bank and LBG. The existence of a trading market for, and the value of, any of the notes and the guarantee may be impacted by market perception of the creditworthiness of Lloyds Bank and LBG. If market perception of the creditworthiness of Lloyds Bank and LBG were to decline for any reason, the value of your notes and the guarantee, and the availability of the trading markets generally, may be adversely affected.

The value of the notes may be less than the principal amount of the notes.

The market for, and value of, the notes may be affected by a number of factors. These factors include:

- the time remaining to maturity of the notes;
- the aggregate amount outstanding of the relevant notes;
- any redemption or exchange features of the notes;
- the level, direction, and volatility of market interest rates generally;
- general economic conditions of the capital markets in the United States;
- geopolitical conditions and other financial, political, regulatory, and judicial events that affect the stock markets generally; and
- any market-making activities with respect to the notes.

Often, the only way to liquidate your investment in the notes prior to maturity will be to sell the notes. At that time, there may be a very illiquid market for the notes or no market at all. For indexed notes that have specific investment objectives or strategies, the applicable market may be more limited, and the price may be more volatile, than for other

notes. The value of indexed notes may be adversely affected by the complexity of the formula and volatility of the applicable reference market measure, including any dividend rates or yields of other securities or financial instruments that relate to the indexed notes. Moreover, the value of indexed notes could be adversely affected by changes in the amount of outstanding equity or other securities linked to those notes.

Holders of indexed notes are subject to significant risks that are not associated with more conventional notes.

If you invest in indexed notes, you will be subject to significant risks not associated with conventional fixed-rate or floating-rate notes. These risks include the possibility that the applicable market measures may be subject to fluctuations, and the possibility that you will receive a lower, or no, amount of principal, premium, or interest, and at different times than expected. In recent years, many securities, currencies, commodities, interest rates, indices, and other market measures have experienced volatility, and this volatility may be expected in the future. However, past experience is not necessarily indicative of what may occur in the future. We have no control over a number of factors, including economic, financial, and political events, that are important in determining the existence, magnitude, and longevity of market volatility and other risks and their impact on the value of, or payments made on, the indexed notes. In considering whether to purchase indexed notes, you should be aware that the calculation of amounts payable on indexed notes may involve reference to a market measure determined by one of our affiliates or prices or values that are published solely by third parties or entities which are not regulated by the laws of the United States. Additional risks that you should consider in connection with an investment in indexed notes will be set forth in the applicable supplement(s).

Usury laws may limit the amount of interest that can be charged and paid on the notes.

New York law will govern the notes offered by this prospectus supplement. New York usury laws limit the amount of interest that can be charged and paid on loans, including the notes. Under current New York law, the maximum permissible rate of interest is 25% per year on a simple interest basis. This limit may not apply to notes in which \$2,500,000 or more has been invested. While we believe that a U.S. federal or state court sitting outside New York may give effect to New York law, many other states also have laws that regulate the amount of interest that may be charged to and paid by a borrower. We do not intend to claim the benefits of any laws concerning usurious rates of interest.

Currency Risks

We may issue notes denominated in or whose principal and interest is payable in a currency other than U.S. dollars. We refer to these notes as “Non-U.S. Dollar-Denominated Securities.” If you intend to invest in any Non-U.S. Dollar-Denominated Securities, you should consult your own financial and legal advisors as to the currency risks related to your investment. The Non-U.S. Dollar-Denominated Securities are not an appropriate investment for you if you are not knowledgeable about the significant terms and conditions of the Non-U.S. Dollar-Denominated Securities or financial matters in general. The information in this prospectus supplement is directed primarily to investors who are U.S. residents. Investors who are not U.S. residents should consult their own financial and legal advisors about currency-related risks arising from their investment.

Non-U.S. Dollar-Denominated Securities have significant risks that are not associated with a similar investment in conventional debt securities that are payable solely in U.S. dollars. These risks include possible significant changes in rates of exchange between the U.S. dollar and the specified currency and the imposition or modification of foreign exchange controls or other conditions by either the United States or non-U.S. governments. These risks generally are influenced by factors over which we have no control, such as economic and political events and the supply of and demand for the relevant currencies in the global markets.

Currency Exchange Rates. Exchange rates between the U.S. dollar and other currencies have been highly volatile. This volatility may continue and could spread to other currencies in the future. Fluctuations in currency exchange rates could adversely affect an investment in the Non-U.S. Dollar-Denominated Securities. Depreciation of the specified currency against the U.S. dollar could result in a decrease in the U.S. dollar-equivalent value of payments on the Non-U.S. Dollar-Denominated Securities. That in turn could cause the market value of the Non-U.S. Dollar-Denominated Securities to fall.

Changes in Foreign Currency Exchange Rates. Except as described below or in a supplement, we will not make any adjustment in or change to the terms of the Non-U.S. Dollar-Denominated Securities for changes in the foreign currency exchange rate for the specified currency, including any devaluation, revaluation, or imposition of exchange or other regulatory controls or taxes, or for other developments affecting the specified currency, the U.S. dollar, or any other currency. Consequently, you will bear the risk that your investment may be adversely affected by these types of events.

Government Policy. Foreign currency exchange rates either can float or be fixed by sovereign governments. Governments or governmental bodies, including the European Central Bank, may intervene in their economies to alter the exchange rate or exchange characteristics of their currencies. For example, a central bank may intervene to devalue or revalue a currency or to replace an existing currency. In addition, a government may impose regulatory controls or taxes to affect the exchange rate of its currency. As a result, the yield or payout of a Non-U.S. Dollar-Denominated Security could be affected significantly and unpredictably by governmental actions. Changes in exchange rates could affect the value of the Non-U.S. Dollar-Denominated Securities as participants in the global currency markets move to buy or sell the specified currency or U.S. dollars in reaction to these developments.

If a governmental authority imposes exchange controls or other conditions, such as taxes on the transfer of the specified currency, there may be limited availability of the specified currency for payment on the Non-U.S. Dollar-Denominated Securities at their maturity or on any other payment date. In addition, the ability of a holder to move currency freely out of the country in which payment in the currency is received or to convert the currency at a freely determined market rate could be limited by governmental actions.

Payments in U.S. Dollars. The terms of any Non-U.S. Dollar-Denominated Securities may provide that we may have the right to make a payment in U.S. dollars instead of the specified currency, if at or about the time when the payment on the Non-U.S. Dollar-Denominated Securities comes due, the specified currency is subject to convertibility, transferability, market disruption, or other conditions affecting its availability because of circumstances beyond our control. These circumstances could include the imposition of exchange controls or our inability to obtain the specified currency because of a disruption in the currency markets for the specified currency. The exchange rate used to make payment in U.S. dollars may be based on limited information and would involve significant discretion on the part of our exchange rate agent. As a result, the value of the payment in U.S. dollars may be less than the value of the payment you would have received in the specified currency if the specified currency had been available. The exchange rate agent will generally not have any liability for its determinations.

Court Judgments. Any Non-U.S. Dollar-Denominated Securities typically will be governed by New York law. Under Section 27 of the New York Judiciary Law, a state court in the State of New York rendering a judgment on the Non-U.S. Dollar-Denominated Debt Securities would be required to render the judgment in the specified currency. In turn, the judgment would be converted into U.S. dollars at the exchange rate prevailing on the date of entry of the judgment. Consequently, in a lawsuit for payment on the Non-U.S. Dollar-Denominated Securities, you would bear currency exchange risk until judgment is entered, which could be a long time.

In courts outside of New York, you may not be able to obtain judgment in a specified currency other than U.S. dollars. For example, a judgment for money in an action based on Non-U.S. Dollar-Denominated Securities in many other U.S. federal or state courts ordinarily would be enforced in the United States only in U.S. dollars. The date used to determine the rate of conversion of the specified currency into U.S. dollars will depend on various factors, including which court renders the judgment.

Information About Foreign Currency Exchange Rates. If we issue a Non-U.S. Dollar-Denominated Security, we may include in the applicable supplement information about historical exchange rates for the relevant non-U.S. dollar currency or currencies. Any information about exchange rates that we may provide will be furnished as a matter of information only, and you should not regard the information as indicative of the range of, or trends in, fluctuations in currency exchange rates that may occur in the future.

S-4

DESCRIPTION OF THE NOTES AND THE GUARANTEES

This section describes the general terms and conditions of the notes, which are our senior unsecured obligations, and the guarantees endorsed thereon. This section supplements, and should be read together with, the general description of our debt securities included in “Description of Debt Securities” in the accompanying prospectus. If there is any inconsistency between the information in this prospectus supplement and the accompanying prospectus, you should rely on the information in this prospectus supplement.

We will describe the particular terms of the notes we sell in a separate supplement. The terms and conditions stated in this section will apply to each note unless the note or the applicable supplement indicates otherwise.

General

The following summary of the terms of the notes and the indenture is not complete and is qualified in its entirety by reference to the actual notes and the specific provisions of the indenture (as defined below), as applicable.

We will issue senior unsecured medium-term notes under a senior debt securities indenture dated as of January 21, 2011 among us, LBG, as guarantor, and The Bank of New York Mellon, acting through its London branch, as trustee (the “trustee”), as supplemented by the first supplemental indenture dated as of June 6, 2011 among us, LBG, as guarantor and the trustee. We refer to such senior debt securities indenture, as supplemented by such first supplemental indenture and as may be supplemented or amended from time to time as the “indenture.”

The notes will constitute a single series of debt securities under the indenture, together with any notes that we issue in the future under the indenture that we designate as being part of that series.

The indenture is subject to, and governed by, the Trust Indenture Act of 1939, as amended. We, LBG and the selling agents, in the ordinary course of our respective businesses, have conducted and may conduct business with the trustee or its affiliates. See “Description of Debt Securities” in the accompanying prospectus for more information about the indenture and the functions of the trustee.

The notes are our direct unsecured obligations and are not obligations of our subsidiaries. The notes are being offered on a continuous basis. There is no limit under our registration statement on the total initial public offering price or aggregate principal amount of the notes that may be offered using this prospectus supplement. We may issue other debt securities under the indenture from time to time in one or more series up to the aggregate principal amount of the then-existing grant of authority by our board of directors.

Unless otherwise provided in the applicable supplement, the minimum denomination of the notes will be \$1,000 and any larger amount that is a whole multiple of \$1,000 (or the equivalent in other currencies).

Specific Terms of the Notes. The applicable supplement(s) for each offering of notes will contain additional terms of the offering and a specific description of those notes, including:

- the specific designation of the notes;
- the issue price;
- the aggregate principal amount;

- the original issue date;
- the maturity date, and any terms providing for the extension or postponement of the maturity date;
 - the denominations or minimum denominations, if other than \$1,000;
 - the currency or currencies, if not U.S. dollars, in which payments will be made on the notes;
- whether the note is a fixed-rate note, a floating-rate note, an indexed note, an original discount note or a combination thereof;
- the method of determining and paying interest, including any applicable interest rate basis or bases, any initial interest rate, any interest reset dates, any payment dates, any index maturity, and any maximum or minimum rate of interest;
 - whether interest will be payable in cash or in kind;
 - any spread or spread multiplier applicable to a floating-rate note or an indexed note;

- the method for the calculation and payment of principal, premium (if any), interest, and other amounts payable (if any);
- for exchangeable notes, the securities, or other property for which the notes may be exchanged, the rate of exchange, whether the notes are exchangeable at your option or our option, and other terms of the exchangeable notes;
- if applicable, the circumstances under which the note may be redeemed at our option or repaid at your option prior to the maturity date set forth on the face of the note, including any repayment date, redemption commencement date, redemption price, and redemption period;
- if applicable, the circumstances under which the maturity date set forth on the face of the note may be extended at our option or renewed at your option, including the extension or renewal periods and the final maturity date;
- whether the notes will be listed on any stock exchange; and
- if applicable, any other material terms of the note which are different from those described in this prospectus supplement and the accompanying prospectus.

Types of Notes

Fixed-Rate Notes

General. We may issue notes that bear interest at one or more fixed rates of interest, as specified in the applicable supplement. We refer to these as “fixed-rate notes.” Unless we specify otherwise in the applicable supplement, each fixed-rate note will bear interest from its original issue date or from the most recent date to which interest on the note has been paid or made available for payment. Interest will accrue on the principal of a fixed-rate note at the fixed annual rate stated in the applicable supplement, until the principal is paid or made available for payment or the note is converted or exchanged.

Unless we specify otherwise in the applicable supplement, we will pay interest on any fixed-rate note quarterly, semi-annually, or annually, as applicable, in arrears, on the days set forth in the applicable supplement (each such day being an “interest payment date”) and at maturity. Unless we otherwise specify in the applicable supplement, each interest payment due on an interest payment date or the maturity date will include interest accrued from and including the most recent interest payment date to which interest has been paid, or, if no interest has been paid, from the original issue date, to but excluding the next interest payment date or the maturity date, as the case may be. Unless we specify otherwise in the applicable supplement, interest on fixed-rate notes will be computed and paid on the basis of a 360-day year consisting of twelve 30-day months. We will make payments on fixed-rate notes as described below under the heading “—Payment of Principal, Interest and Other Amounts Due.”

Amortizing Notes. We also may issue amortizing notes, which are fixed-rate notes for which combined principal and interest payments are made in installments over the life of the debt security. Payments on amortizing notes are applied first to interest due and then to the reduction of the unpaid principal amount. The supplement for an amortizing note will include a table setting forth repayment information.

Floating-Rate Notes

General. We may issue notes that will bear interest at a floating rate of interest determined by reference to one or more interest rate bases, or by reference to one or more interest rate formulae, referred to as the “base rate.” We refer to these

notes as “floating-rate notes.” The base rate may be one or more of the following:

- the CD rate;
- the CMS rate;
- the CMT rate;
- the commercial paper rate;
- the federal funds rate;
- LIBOR;
- EURIBOR;
- the prime rate;
- the treasury rate; or

- such other interest rate basis or bases or interest rate formula as may be specified in the applicable supplement.

The interest rate for a floating-rate note will be determined by reference to:

- the specified base rate based on the index maturity;
- plus or minus the spread, if any; and/or
- multiplied by the spread multiplier, if any.

For any floating-rate note, the “index maturity” is the period to maturity of the instrument for which the base rate is calculated and will be specified in the applicable supplement. The “spread” is the number of basis points we specify on the floating-rate note to be added to or subtracted from the base rate. The “spread multiplier” is the percentage we may specify on the floating-rate note by which the base rate is multiplied in order to calculate the applicable interest rate.
