Hsinchu, Taiwan, April 30, 2013 –

AUO's net loss for the first quarter of 2013 was NT\$3,320 million (US\$111 million). Net loss attributable to owners of Company was NT\$3,173 million (US\$106 million), or a basic EPS of -NT\$0.36 (-US\$0.12 per ADR).

### 1Q2013 Result Highlights

AUO's unaudited consolidated results for the first quarter of 2013 were highlighted as below:

- Revenue was NT\$94,244 million, down 5.2% quarter-over-quarter
- Net loss was NT\$3,320 million
- Basic EPS was -NT\$0.36
- Gross margin was 4.8%
- Operating margin was -1.4%
- EBITDA (3) margin was 16.3%

In the first quarter of 2013, shipments for AUO's large-sized panel shipments reached around 27.0 million units, down by 13% quarter-over-quarter. Shipments for small and medium-sized panels were around 30.7 million units, down 18.5% quarter-over-quarter.

Looking back to the first quarter, AUO's display segment dispelled the gloom and turned profitable at the operating level despite the traditional slow season. On the back of product mix improvement and yield enhancement, for the display segment, the company reported positive operating margin with EBITDA margin increased to 17.5%. AUO not only had critical breakthroughs on the yield of tablet panels and also had at least doubled its tablet panel shipments sequentially. Also, the Company's UHD 4K TV panels have been well recognized by the leading international brands and mass production has smoothly commenced in the first quarter. On the other hand, for the solar segment, the market and product differentiation that gradually evolved has helped to boost the demand and price of the high-efficiency products. In addition, with the Company's constant efforts to work down the operating expenses, its loss for the solar segment has further improved.

Looking forward to the second quarter, the Company's operation is expected to further grow supported by several positive factors. For the TV panel market, AUO plans to ride the trends of large-screen TV to increase the average

panel size of the Company and to continuously strengthen its competitive edge on the high-resolution products. In addition, for the small and medium-sized panels and touch applications, the Company's customer portfolio is becoming more solid and diversified. With more customers' new models expected to roll out this quarter, the Company's capacity utilization rates has chances to trend up sequentially. Driven together by smartphone, tablet, and touch panels, it is hoped to further contribute to AUO's growth momentum and earnings performance.

(1) All financial information was unaudited and was prepared by the Company in accordance with generally accepted accounting principles on Taiwan IFRS.

(2) Amounts converted by an exchange rate of NTD29.81:USD1 based on Federal Reserve Bank of New York, USA as of March 31, 2013.

(3) EBITDA=Operating Income +D&A, that is, operating income before depreciation and amortization.
