PRICING SUPPLEMENT NO. 2172AB

Filed Pursuant to Rule 424(b)(2)

Registration Statement No. 333-184193

Dated September 25, 2014

\$6,760,600 Deutsche Bank AG Return Optimization Securities

Linked to the iShares® MSCI Mexico Capped ETF due March 31, 2016

Investment Description

Return Optimization Securities (the “Securities”) are unsubordinated and unsecured obligations of Deutsche Bank AG, London Branch (the “Issuer”) with returns linked to the performance of the iShares® MSCI Mexico Capped ETF (the “Underlying”). If the Final Price is greater than the Initial Price, for each \$10.00 Face Amount of Securities, the Issuer will repay the Face Amount at maturity and pay a return on the Face Amount equal to 2.00 (the “Multiplier”) times the Underlying Return, up to the Maximum Gain of 18.35%. If the Final Price is equal to the Initial Price, the Issuer will repay the Face Amount per \$10.00 Face Amount of Securities at maturity. However, if the Final Price is less than the Initial Price, you will be fully exposed to the negative Underlying Return and, for each \$10.00 Face Amount of Securities, the Issuer will pay you less than the Face Amount at maturity, resulting in a loss on the Face Amount that is proportionate to the percentage decline in the price of the Underlying. Investing in the Securities involves significant risks. You may lose some or all of your initial investment. You will not receive dividends or other distributions paid on the Underlying or any component securities held by the Underlying. Any payment on the Securities is subject to the creditworthiness of the Issuer. If the Issuer were to default on its payment obligations, you might not receive any amounts owed to you under the Securities and you could lose your entire investment.

Features

q **Enhanced Growth Potential:** At maturity, the Securities enhance any positive Underlying Return up to the Maximum Gain. In this circumstance, for each \$10.00 Face Amount of Securities, the Issuer will repay the Face Amount and pay a return on the Face Amount equal to the Multiplier times the Underlying Return, up to the Maximum Gain of 18.35%. If the Final Price is less than the Initial Price, investors will be fully exposed to any decline in the price of the Underlying at maturity.

q **Full Downside Market Exposure:** If the Final Price is equal to the Initial Price, the Issuer will repay the Face Amount per \$10.00 Face Amount of Securities at maturity. However, if the Final Price is less than the Initial Price, you will be fully exposed to the negative Index Return and, for each \$10.00 Face Amount of Securities, the Issuer will pay you less than the Face Amount at maturity, resulting in a loss on the Face Amount that is proportionate to the percentage decline in the price of the Underlying. You may lose some or all of your initial investment. Any payment on the Securities is subject to the creditworthiness of the Issuer. If the Issuer were to default on its payment obligations, you may not receive any amounts owed to you under the Securities and you could lose your entire investment.

Key Dates

| | |
|-------------------------------------|--------------------|
| Trade Date | September 25, 2014 |
| Settlement Date | September 30, 2014 |
| Final Valuation Date ¹ | March 24, 2016 |
| Maturity Date ¹ | March 31, 2016 |
| 1 See page 4 for additional details | |

NOTICE TO INVESTORS: THE SECURITIES ARE SIGNIFICANTLY RISKIER THAN CONVENTIONAL DEBT SECURITIES. THE ISSUER IS NOT NECESSARILY OBLIGATED TO REPAY YOUR INITIAL INVESTMENT IN THE SECURITIES AT MATURITY, AND THE SECURITIES HAVE DOWNSIDE MARKET RISK SIMILAR TO THE UNDERLYING. THIS MARKET RISK IS IN ADDITION TO THE CREDIT RISK INHERENT IN PURCHASING AN OBLIGATION OF DEUTSCHE BANK AG. YOU SHOULD NOT PURCHASE THE SECURITIES IF YOU DO NOT UNDERSTAND OR ARE NOT COMFORTABLE WITH THE SIGNIFICANT RISKS INVOLVED IN INVESTING IN THE SECURITIES. THE SECURITIES WILL NOT BE LISTED ON ANY SECURITIES EXCHANGE.

YOU SHOULD CAREFULLY CONSIDER THE RISKS DESCRIBED UNDER “KEY RISKS” BEGINNING ON PAGE 5 OF THIS PRICING SUPPLEMENT AND UNDER “RISK FACTORS” BEGINNING ON PAGE 7 OF THE ACCOMPANYING PRODUCT SUPPLEMENT BEFORE PURCHASING ANY SECURITIES. EVENTS RELATING TO ANY OF THOSE RISKS, OR OTHER RISKS AND UNCERTAINTIES, COULD ADVERSELY AFFECT THE MARKET VALUE OF, AND THE RETURN ON, YOUR SECURITIES. YOU MAY LOSE SOME OR ALL OF YOUR INITIAL INVESTMENT IN THE SECURITIES.

Security Offering

We are offering Return Optimization Securities linked to the performance of the iShares® MSCI Mexico Capped ETF. The return on the Securities is subject to and limited by the Maximum Gain. The Securities are our unsubordinated and unsecured obligations and are offered for a minimum investment of 100 Securities at the price to public described below.

| Underlying | Initial Price | Maximum Gain | Multiplier | CUSIP / ISIN |
|---|---------------|--------------|------------|--------------------------|
| iShares® MSCI Mexico Capped ETF (Ticker: EWW) | \$68.65 | 18.35% | 2.00 | 25190A104 / US25190A1043 |

See “Additional Terms Specific to the Securities” in this pricing supplement. The Securities will have the terms specified in underlying supplement No. 1 dated October 1, 2012, product supplement AB dated September 28, 2012, the prospectus supplement dated September 28, 2012 relating to our Series A global notes of which these Securities are a part and the prospectus dated September 28, 2012, as modified and supplemented by this pricing supplement. The Issuer’s estimated value of the Securities on the Trade Date is \$9.683 per \$10.00 Face Amount of Securities, which is less than the Issue Price. Please see “Issuer’s Estimated Value of the Securities” on the following page of this pricing supplement for additional information.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of the Securities or passed upon the accuracy or the adequacy of this pricing supplement, the accompanying underlying supplement No. 1, product supplement AB, the prospectus supplement and the prospectus. Any representation to the contrary is a criminal offense. The Securities are not bank deposits and are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency.

| Notes | \$6,760,600.00 | \$870.77 |

UBS Financial Services Inc.

Deutsche Bank Securities

Issuer's Estimated Value of the Securities

The Issuer's estimated value of the Securities is equal to the sum of our valuations of the following two components of the Securities: (i) a bond and (ii) an embedded derivative(s). The value of the bond component of the Securities is calculated based on the present value of the stream of cash payments associated with a conventional bond with a principal amount equal to the Face Amount of Securities, discounted at an internal funding rate, which is determined primarily based on our market-based yield curve, adjusted to account for our funding needs and objectives for the period matching the term of the Securities. The internal funding rate is typically lower than the rate we would pay when we issue conventional debt securities on equivalent terms. This difference in funding rate, as well as the agent's commissions, if any, and the estimated cost of hedging our obligations under the Securities, reduces the economic terms of the Securities to you and is expected to adversely affect the price at which you may be able to sell the Securities in any secondary market. The value of the embedded derivative(s) is calculated based on our internal pricing models using relevant parameter inputs such as expected interest and dividend rates and mid-market levels of price and volatility of the assets underlying the Securities or any futures, options or swaps related to such underlying assets. Our internal pricing models are proprietary and rely in part on certain assumptions about future events, which may prove to be incorrect.

The Issuer's estimated value of the Securities on the Trade Date (as disclosed on the cover of this pricing supplement) is less than the Issue Price of the Securities. The difference between the Issue Price and the Issuer's estimated value of the Securities on the Trade Date is due to the inclusion in the Issue Price of the agent's commissions, if any, and the cost of hedging our obligations under the Securities through one or more of our affiliates. Such hedging cost includes our or our affiliates' expected cost of providing such hedge, as well as the profit we or our affiliates expect to realize in consideration for assuming the risks inherent in providing such hedge.

The Issuer's estimated value of the Securities on the Trade Date does not represent the price at which we or any of our affiliates would be willing to purchase your Securities in the secondary market at any time. Assuming no changes in market conditions or our creditworthiness and other relevant factors, the price, if any, at which we or our affiliates would be willing to purchase the Securities from you in secondary market transactions, if at all, would generally be lower than both the Issue Price and the Issuer's estimated value of the Securities on the Trade Date. Our purchase price, if any, in secondary market transactions will be based on the estimated value of the Securities determined by reference to (i) the then-prevailing internal funding rate (adjusted by a spread) or another appropriate measure of our cost of funds and (ii) our pricing models at that time, less a bid spread determined after taking into account the size of the repurchase, the nature of the assets underlying the Securities and then-prevailing market conditions. The price we report to financial reporting services and to distributors of our Securities for use on customer account statements would generally be determined on the same basis. However, during the period of approximately six months beginning from the Trade Date, we or our affiliates may, in our sole discretion, increase the purchase price determined as described above by an amount equal to the declining differential between the Issue Price and the Issuer's estimated value of the Securities on the Trade Date, prorated over such period on a straight-line basis, for transactions that are individually and in the aggregate of the expected size for ordinary secondary market repurchases.

Additional Terms Specific to the Securities

You should read this pricing supplement, together with underlying supplement No. 1 dated October 1, 2012, product supplement AB dated September 28, 2012, the prospectus supplement dated September 28, 2012 relating to our Series A global notes of which these Securities are a part and the prospectus dated September 28, 2012. You may access these documents on the website of the Securities and Exchange Commission (the “SEC”) at www.sec.gov as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC website):

Deutsche Bank AG has filed a registration statement (including a prospectus) with the Securities and Exchange Commission for the offering to which this pricing supplement relates. Before you invest in the Securities offered hereby, you should read these documents and any other documents relating to this offering that Deutsche Bank AG has filed with the SEC for more complete information about Deutsche Bank AG and this offering. You may obtain these documents without cost by visiting EDGAR on the SEC website at www.sec.gov. Our Central Index Key, or CIK, on the SEC website is 0001159508. Alternatively, Deutsche Bank AG, any agent or any dealer participating in this offering will arrange to send you the prospectus, prospectus supplement, product supplement, underlying supplement and this pricing supplement if you so request by calling toll-free 1-800-311-4409.

The trustee has appointed Deutsche Bank Trust Company Americas as its authenticating agent with respect to our Series A global notes.

If the terms described in this pricing supplement are inconsistent with those described in the accompanying underlying supplement, product supplement, prospectus supplement or prospectus, the terms described in this pricing supplement shall control.

References to “Deutsche Bank AG,” “we,” “our” and “us” refer to Deutsche Bank AG, including, as the context requires, acting through one of its branches. In this pricing supplement, “Securities” refers to the Return Optimization Securities that are offered hereby, unless the context otherwise requires.

This pricing supplement, together with the documents listed above, contains the terms of the Securities and supersedes all other prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, brochures or other educational materials of ours. You should carefully consider, among other things, the matters set forth in “Key Risks” in this pricing supplement and “Risk Factors” in the accompanying product supplement, as the Securities involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisers before deciding to invest in the Securities.

Investor Suitability

The suitability considerations identified below are not exhaustive. Whether or not the Securities are a suitable investment for you will depend on your individual circumstances, and you should reach an investment decision only after you and your investment, legal, tax, accounting and other advisors have carefully considered the suitability of an investment in the Securities in light of your particular circumstances. You should also review “Key Risks” on page 5 of this pricing supplement and “Risk Factors” on page 7 of the accompanying product supplement.

The Securities may be suitable for you if, among other considerations:

- “ You fully understand the risks inherent in an investment in the Securities, including the risk of loss of your entire investment.
- “ You can tolerate a loss of some or all of your initial investment and are willing to make an investment that has similar downside market risk as an investment in the shares of the Underlying or in the component securities held by the Underlying.
- “ You believe that the price of the Underlying will increase over the term of the Securities and are willing to give up any increase in excess of the Maximum Gain.
- “ You understand and accept that your potential return is limited by the Maximum Gain and you would be willing to invest in the Securities based on the Maximum Gain indicated on the cover hereof.
- “ You can tolerate fluctuations in the price of the Securities prior to maturity that may be similar to or exceed the downside fluctuations in the price of the Underlying.
- “ You do not seek current income from this investment and are willing to forgo any dividends or any other distributions paid on the Underlying or any component securities held by the Underlying.
- “ You seek an investment with exposure to companies in Mexico.
- “ You are willing and able to hold the Securities to the Maturity Date, as set forth on the cover of this pricing supplement, and accept that there may be little or no secondary market for the Securities.
- “ You are willing to assume the credit risk of Deutsche Bank AG for all payments under the Securities, and understand that if Deutsche Bank AG defaults on its obligations you might not receive any amounts due to you, including any repayment of the Face Amount.

The Securities may not be suitable for you if, among other considerations:

- “ You do not fully understand the risks inherent in an investment in the Securities, including the risk of loss of your entire investment.
- “ You require an investment designed to guarantee a full return of the Face Amount at maturity.
- “ You cannot tolerate the loss of any of your investment, or you are not willing to make an investment that has similar downside market risk as an investment in the shares of the Underlying or in the component securities held by the Underlying.
- “ You believe that the price of the Underlying will decrease during the term of the Securities, or you believe that the price of the Underlying will increase over the term of the Securities by more than the Maximum Gain.
- “ You seek an investment that participates in the full increase in the price of the Underlying or that has unlimited return potential.
- “ You would be unwilling to invest in the Securities based on the Maximum Gain indicated on the cover hereof.
- “ You cannot tolerate fluctuations in the price of the Securities prior to maturity that may be similar to or exceed the downside fluctuations in the price of the Underlying.
- “ You seek current income from this investment or prefer to receive any dividends and any other distributions paid on the Underlying or any component securities held by the Underlying.
- “ You do not seek an investment with exposure to companies in Mexico.
- “ You are unwilling or unable to hold the Securities to the Maturity Date, as set forth on the cover of this pricing supplement, or you seek an investment for which there will be an active secondary market.
- “ You are not willing to assume the credit risk of Deutsche Bank AG for all payments under the Securities, including any repayment of the Face Amount.

Final Terms

| | |
|-----------------------------------|---|
| Issuer | Deutsche Bank AG, London Branch |
| Issue Price | 100% of the Face Amount of Securities |
| Face Amount | \$10.00 |
| Term | 18 months |
| Trade Date | September 25, 2014 |
| Settlement Date | September 30, 2014 |
| Final Valuation Date ¹ | March 24, 2016 |
| Maturity Date ^{1, 2} | March 31, 2016 |
| Underlying | iShares® MSCI Mexico Capped ETF (Ticker: EWW) |
| Multiplier | 2.00 |
| Maximum Gain | 18.35% |

Payment at Maturity (per \$10.00 Face Amount of Securities) If the Underlying Return is positive, Deutsche Bank AG will pay you at maturity a cash payment of \$10.00 per \$10.00 Face Amount of Securities plus a return on the Face Amount equal to the Underlying Return multiplied by 2.00, subject to the Maximum Gain, calculated as follows:

$$\$10.00 + (\$10.00 \times \text{the lesser of (i) Underlying Return} \times \text{Multiplier and (ii) Maximum Gain})$$

If the Underlying Return is zero, Deutsche Bank AG will pay you at maturity a cash payment of \$10.00 per \$10.00 Face Amount of Securities.

If the Underlying Return is negative, Deutsche Bank AG will pay you at maturity a cash payment that is less than the Face Amount of \$10.00 per \$10.00 Face Amount of Securities, resulting in a loss on the Face Amount that is proportionate to the percentage decline in the price of the Underlying, calculated as follows:

$$\$10.00 + (\$10.00 \times \text{Underlying Return})$$

In this circumstance, you will lose some or all of the Face Amount in an amount proportionate to the percentage decline in the price of the Underlying.

| | |
|-------------------------|--|
| Underlying Return | Final Price – Initial Price Initial Price |
| Closing Price | On any trading day, the last reported sale price of one share of the Underlying on the relevant exchange multiplied by the then-current Share Adjustment Factor, as determined by the calculation agent. |
| Initial Price | \$68.65, equal to the Closing Price of the Underlying on the Trade Date |
| Final Price | The Closing Price of the Underlying on the Final Valuation Date |
| Share Adjustment Factor | Initially 1.0, subject to adjustments for certain actions affecting the Underlying. See “Description of Securities — Anti-Dilution Adjustments for Funds” in the accompanying product supplement. |

INVESTING IN THE SECURITIES INVOLVES SIGNIFICANT RISKS. YOU MAY LOSE SOME OR ALL OF YOUR INITIAL INVESTMENT. ANY PAYMENT ON THE SECURITIES IS SUBJECT TO THE CREDITWORTHINESS OF THE ISSUER. IF DEUTSCHE BANK AG WERE TO DEFAULT ON ITS PAYMENT OBLIGATIONS, YOU MIGHT NOT RECEIVE ANY AMOUNTS OWED TO YOU UNDER THE SECURITIES AND YOU COULD LOSE YOUR ENTIRE INVESTMENT.

Investment Timeline

Trade Date: The Initial Price is determined. The Maximum Gain is set.

Maturity Date: The Final Price is determined and the Underlying Return is calculated on the Final Valuation Date.

If the Underlying Return is positive, Deutsche Bank AG will pay you at maturity a cash payment of \$10.00 per \$10.00 Face Amount of Securities plus a return on the Face Amount equal to the Underlying Return multiplied by 2.00, subject to the Maximum Gain, calculated as follows:

$$\$10.00 + (\$10.00 \times \text{the lesser of (i) Underlying Return} \times \text{Multiplier and (ii) Maximum Gain})$$

If the Underlying Return is zero, Deutsche Bank AG will pay you at maturity a cash payment of \$10.00 per \$10.00 Face Amount of Securities.

If the Underlying Return is negative, Deutsche Bank AG will pay you at maturity a cash payment that is less than the Face Amount of \$10.00 per \$10.00 Face Amount of Securities, resulting in a loss on the Face Amount that is proportionate to the percentage decline in the price of the Underlying, calculated as follows:

$$\$10.00 + (\$10.00 \times \text{Underlying Return})$$

 In this circumstance, you will lose some or all of the Face Amount in an amount proportionate to the percentage decline in the price of the Underlying.

1 Subject to postponement as described under “Description of Securities — Adjustments to Valuation Dates and Payment Dates” in the accompanying product supplement.

2 Notwithstanding what is provided under “Description of Securities — Adjustments to Valuation Dates and Payment Dates” in the accompanying product supplement, in the event the Final Valuation Date is postponed, the Maturity Date will be the fourth business day after the Final Valuation Date as postponed.

Key Risks

An investment in the Securities involves significant risks. Investing in the Securities is not equivalent to investing directly in the Underlying or in any of the component securities held by the Underlying. Some of the risks that apply to an investment in the Securities are summarized below, but we urge you to read the more detailed explanation of risks relating to the Securities generally in the “Risk Factors” section of the accompanying product supplement. We also urge you to consult your investment, legal, tax, accounting and other advisers before you invest in the Securities.

- ◆ **Your Investment in the Securities May Result in a Loss of Your Initial Investment** — The Securities differ from ordinary debt securities in that Deutsche Bank AG will not necessarily pay you your initial investment in the Securities at maturity. The return on the Securities at maturity is linked to the performance of the Underlying and will depend on whether, and the extent to which, the Underlying Return is positive, zero or negative. If the Final Price is less than the Initial Price, you will be fully exposed to any negative Underlying Return and, for each \$10.00 Face Amount of Securities, Deutsche Bank AG will pay you less than the Face Amount at maturity, resulting in a loss on the Face Amount that is proportionate to the percentage decline in the price of the Underlying. In this circumstance, you will lose some or all of your initial investment at maturity.
- ◆ **Capped Appreciation Potential** — If the Underlying Return is positive, you will be entitled to receive at maturity only the Face Amount plus an amount equal to the lesser of (i) the Underlying Return times the Multiplier and (ii) the Maximum Gain. Your return on the Securities is subject to, and limited by, the Maximum Gain, regardless of any further increase in the price of the Underlying, which may be significant. As a result, the return on an investment in the Securities may be less than the return on a direct investment in the Underlying.
- ◆ **The Multiplier Only Applies if You Hold the Securities to Maturity** — You should be willing to hold your Securities to maturity. If you are able to sell your Securities prior to maturity in the secondary market, the return you realize may not reflect the full economic effect of the Multiplier or the Securities themselves and may be less than the Multiplier times the Underlying’s return even if such return is positive and does not exceed the Maximum Gain. You can receive the full benefit of the Multiplier and receive the Maximum Gain on the Securities from the Issuer only if you hold the Securities to maturity.
- ◆ **No Coupon Payments** — Deutsche Bank AG will not pay any coupon payments with respect to the Securities.
- ◆ **Risks Relating to the Credit of the Issuer** — The Securities are unsubordinated and unsecured obligations of the Issuer, Deutsche Bank AG, and are not, either directly or indirectly, an obligation of any third party. Any payment(s) to be made on the Securities, including any repayment of the Face Amount, depends on the ability of Deutsche Bank AG to satisfy its obligations as they come due. An actual or anticipated downgrade in Deutsche Bank AG's credit rating or increase in the credit spreads charged by the market for taking our credit risk will likely have an adverse effect on the value of the Securities. As a result, the actual and perceived creditworthiness of Deutsche Bank AG will affect the value of the Securities, and in the event Deutsche Bank AG were to default on its obligations, you might not receive any amount(s) owed to you under the terms of the Securities and you could lose your entire investment.
- ◆ **The Issuer’s Estimated Value of the Securities on the Trade Date Will Be Less than the Issue Price of the Securities** — The Issuer’s estimated value of the Securities on the Trade Date (as disclosed on the cover of this pricing supplement) is less than the Issue Price of the Securities. The difference between the Issue Price and the Issuer’s estimated value of the Securities on the Trade Date is due to the inclusion in the Issue Price of the agent’s commissions, if any, and the cost of hedging our obligations under the Securities through one or more of our affiliates. Such hedging cost includes our or our affiliates' expected cost of providing such hedge, as well as the profit we or our affiliates expect to realize in consideration for assuming the risks inherent in providing such hedge. The Issuer’s estimated value of the Securities is determined by reference to an internal funding rate and our pricing models. The internal funding rate is typically lower than the rate we would pay when we issue conventional debt

securities on equivalent terms. This difference in funding rate, as well as the agent's commissions, if any, and the estimated cost of hedging our obligations under the Securities, reduces the economic terms of the Securities to you and is expected to adversely affect the price at which you may be able to sell the Securities in any secondary market. In addition, our internal pricing models are proprietary and rely in part on certain assumptions about future events, which may prove to be incorrect. If at any time a third party dealer were to quote a price to purchase your Securities or otherwise value your Securities, that price or value may differ materially from the estimated value of the Securities determined by reference to our internal funding rate and pricing models. This difference is due to, among other things, any difference in funding rates, pricing models or assumptions used by any dealer who may purchase the Securities in the secondary market.

- ◆ Investing in the Securities Is Not the Same as Investing in the Underlying or the Component Securities Held by the Underlying — The return on your Securities may not reflect the return you would realize if you invested directly in the Underlying, the component securities held by the Underlying or a security linked directly to the uncapped performance of the Underlying or the component securities held by the Underlying. For instance, your return on the Securities is limited to the Maximum Gain regardless of any increase in the price of the Underlying, which may be significant.
- ◆ If the Price of the Underlying Changes, the Value of Your Securities May Not Change in the Same Manner — Your Securities may trade quite differently from the shares of the Underlying. Changes in the market price of the shares of the Underlying may not result in a comparable change in the value of your Securities.
- ◆ No Dividend Payments or Voting Rights — As a holder of the Securities, you will not have voting rights or rights to receive cash dividends or other distributions or other rights that holders of the component securities held by the Underlying or holders of shares of the Underlying would have.
- ◆ There Are Risks Associated With Investments in Securities Linked to the Values of Equity Securities Issued by Non-U.S. Companies — The Underlying holds component securities that are issued by companies incorporated outside of the U.S. Because the component securities also trade outside the U.S., the Securities are subject to the risks associated with non-U.S. securities markets. Generally, non-U.S. securities markets may be more volatile than U.S. securities markets, and market developments may affect non-U.S. securities markets differently than U.S. securities markets, which may adversely affect the price of the Underlying and the value of your Securities. Furthermore, there are risks associated with investments in securities linked to the values of equity securities issued by non-U.S.

companies. There is generally less publicly available information about non-U.S. companies than about those U.S. companies that are subject to the reporting requirements of the SEC, and non-U.S. companies are subject to accounting, auditing and financial reporting standards and requirements that differ from those applicable to U.S. reporting companies. In addition, the prices of equity securities issued by non-U.S. companies may be adversely affected by political, economic, financial and social factors that may be unique to the particular countries in which the non-U.S. companies are incorporated. These factors include the possibility of recent or future changes in a non-U.S. government's economic and fiscal policies (including any direct or indirect intervention to stabilize the economy and/or securities market of the country of such non-U.S. government), the presence, and extent, of cross shareholdings in non-U.S. companies, the possible imposition of, or changes in, currency exchange laws or other non-U.S. laws or restrictions applicable to non-U.S. companies or investments in non-U.S. securities and the possibility of fluctuations in the rate of exchange between currencies. Moreover, certain aspects of a particular non-U.S. economy may differ favorably or unfavorably from the U.S. economy in important respects, such as growth of gross national product, rate of inflation, capital reinvestment, resources and self-sufficiency. Specifically, component securities held by the Underlying include stocks issued by companies located in Mexico, some of which are and have been experiencing economic stress.

◆ The Securities are Subject to Currency Exchange Rate Risk — Because the Underlying holds component securities denominated in foreign currencies that are converted into U.S. dollars for purposes of calculating the price of the Underlying, holders of the Securities will be exposed to currency exchange rate risk with respect to each of the currencies represented in the Underlying. Of particular importance to currency exchange rate risk are:

- ◆ existing and expected rates of inflation;
- ◆ existing and expected interest rate levels;
- ◆ political, civil or military unrest;
- ◆ the balance of payments between countries; and

◆ the extent of governmental surpluses or deficits in the countries represented in the Underlying and the United States of America.

All of these factors are in turn sensitive to the monetary, fiscal and trade policies pursued by the governments of the countries represented in the Underlying, the United States and other countries important to international trade and finance. An investor's net exposure to currency exchange rate risk will depend on the extent to which the currencies represented in the Underlying strengthen or weaken against the U.S. dollar and the relative weight of each currency represented in the overall Underlying. If, taking into account such weighting, the U.S. dollar strengthens against the component currencies as a whole, the price of the Underlying will be adversely affected and the value of the Securities may be reduced. Additionally, the volatility and/or the correlation (including the direction and the extent of such correlation) of the exchange rates between the U.S. dollar and the currencies represented in the Underlying could affect the value of the Securities.

◆ The Securities are Subject to Emerging Markets Risk —The value of the Securities is subject to the political and economic risks of emerging market countries by linking to the performance of the Underlying. The component securities held by the Underlying include stocks of companies that are located in emerging market countries and whose securities trade on the exchanges of emerging market countries. In recent years, some emerging markets have undergone significant political, economic and social upheaval. Such far-reaching changes have resulted in constitutional and social tensions and, in some cases, instability and reaction against market reforms has occurred. With respect to any emerging market nation, there is the possibility of nationalization, expropriation or confiscation,

political changes, government regulation and social instability. Future political changes may adversely affect the economic conditions of an emerging market nation. Political or economic instability could adversely affect the value of the Securities and the amount payable to you on the Securities.

- ◆ **Fluctuation of NAV** — The market prices of the shares of the Underlying may fluctuate in accordance with changes in its net asset value (the “NAV”) and supply and demand on the applicable stock exchanges. The NAV of the Underlying may fluctuate with changes in the market value of the Underlying’s securities holdings. Therefore, the market price of the Underlying may differ from its NAV per share and the Underlying may trade at, above or below its NAV per share.
- ◆ **The Anti-Dilution Protection Is Limited** — The calculation agent will make adjustments to the Share Adjustment Factor, which will initially be set at 1.0, for certain events affecting the shares of the Underlying. The calculation agent is not required, however, to make such adjustments in response to all events that could affect the shares of the Underlying. If an event occurs that does not require the calculation agent to make an adjustment, the value of the Securities may be materially and adversely affected. In addition, you should be aware that the calculation agent may, at its sole discretion, make adjustments to the Share Adjustment Factor or any other terms of the Securities that are in addition to, or that differ from, those described in the accompanying product supplement to reflect changes occurring in relation to the Underlying in circumstances where the calculation agent determines that it is appropriate to reflect those changes to ensure an equitable result. Any alterations to the specified anti-dilution adjustments described in the accompanying product supplement may be materially adverse to investors in the Securities. You should read “Description of Securities — Anti-Dilution Adjustments for Funds” in the accompanying product supplement in order to understand the adjustments that may be made to the Securities.
- ◆ **Adjustments to the Underlying or to its Tracked Index Could Adversely Affect the Value of the Securities** — Blackrock Fund Advisors (“BFA”) is the investment advisor to the Underlying, which seeks investment results that correspond generally to the level and yield performance, before fees and expenses, of the MSCI Mexico IMI 25/50 Index (the “Tracked Index”). The stocks included in the Tracked Index are selected by MSCI Inc. (“MSCI”). The Tracked Index is calculated and published by MSCI. MSCI can add, delete or substitute the stocks underlying the Tracked Index, which could change the value of the Tracked Index. Pursuant to its investment strategy or otherwise, BFA may add, delete or substitute the securities held by the Underlying. Any of these actions could cause or contribute to large movements in the prices of the component securities held by the Underlying, which could cause the Final Price to be less than the Initial Price, in which case you will lose some or all of your initial investment.
- ◆ **The Underlying and its Tracked Index Are Different** — The performance of the Underlying may not exactly replicate the performance of the Tracked Index because the Underlying will reflect transaction costs and fees that are not included in the calculation

of the Tracked Index. It is also possible that the Underlying may not fully replicate or may in certain circumstances diverge significantly from the performance of the Tracked Index due to the temporary unavailability of certain securities in the secondary market, the performance of any derivative instruments contained in the Underlying or due to other circumstances. BFA may invest up to 20% of the Underlying's assets in futures contracts, options on futures contracts, other types of options, and swaps related to the Tracked Index as well as cash and cash equivalents, including shares of money market funds advised by BFA or its affiliates. Finally, because the shares of the Underlying are traded on the NYSE Arca and are subject to market supply and investor demand, the market value of one share of the Underlying may differ from the net asset value per share of the Underlying. For all of the foregoing reasons, the performance of the Underlying may not correlate with the performance of the Tracked Index.

- ◆ **There Is No Affiliation Between the Underlying and Us, and We Have Not Participated in the Preparation of, or Independently Verified, Any Disclosure by the Underlying —** We are not affiliated with the Underlying or the issuers of the component securities held by the Underlying or underlying the Tracked Index (such stocks, “Underlying Stocks” and the issuers of Underlying Stocks, “Underlying Stock Issuers”). However, we and our affiliates may currently or from time to time in the future engage in business with many of the Underlying Stock Issuers. Nevertheless, neither we nor our affiliates have participated in the preparation of, or independently verified, any information about the Underlying Stocks or any of the Underlying Stock Issuers. You, as an investor in the Securities, should make your own investigation into the Underlying Stocks and the Underlying Stock Issuers. Neither the Underlying nor any of the Underlying Stock Issuers is involved in this offering of Securities in any way and none of them has any obligation of any sort with respect to your Securities. Neither the Underlying nor any of the Underlying Stock Issuers has any obligation to take your interests into consideration for any reason, including when taking any corporate actions that might affect the value of your Securities.
- ◆ **Past Performance of the Underlying, its Tracked Index or the Component Securities Held by the Underlying Is No Guide to Future Performance —** The actual performance of the Underlying, the Tracked Index or the component securities held by the Underlying over the term of the Securities may bear little relation to the historical prices of the Underlying or the component securities held by the Underlying or the level of the Tracked Index, and may bear little relation to the hypothetical return examples set forth elsewhere in this pricing supplement. We cannot predict the future performance of the Underlying, the Tracked Index or the component securities held by the Underlying or whether the performance of the Underlying will result in the return of any of your investment.
- ◆ **Assuming No Changes in Market Conditions and Other Relevant Factors, the Price You May Receive for Your Securities in Secondary Market Transactions Would Generally Be Lower than Both the Issue Price and the Issuer's Estimated Value of the Securities on the Trade Date —** While the payment(s) on the Securities described in this pricing supplement is based on the full Face Amount of your Securities, the Issuer's estimated value of the Securities on the Trade Date (as disclosed on the cover of this pricing supplement) is less than the Issue Price of the Securities. The Issuer's estimated value of the Securities on the Trade Date does not represent the price at which we or any of our affiliates would be willing to purchase your Securities in the secondary market at any time. Assuming no changes in market conditions or our creditworthiness and other relevant factors, the price, if any, at which we or our affiliates would be willing to purchase the Securities from you in secondary market transactions, if at all, would generally be lower than both the Issue Price and the Issuer's estimated value of the Securities on the Trade Date. Our purchase price, if any, in secondary market transactions would be based on the estimated value of the Securities determined by reference to (i) the then-prevailing internal funding rate (adjusted by a spread) or another appropriate measure of our cost of funds and (ii) our pricing models at that time, less a bid spread determined after taking into account the size of the repurchase, the nature of the assets underlying the Securities and then-prevailing market conditions. The price we report to financial reporting services and to distributors of our Securities for use on customer account statements would generally be determined on the same basis. However, during the period of approximately six months beginning from the Trade Date, we or our affiliates may, in our sole discretion, increase the purchase price determined as described above by an amount equal to the declining differential between the Issue

Price and the Issuer's estimated value of the Securities on the Trade Date, prorated over such period on a straight-line basis, for transactions that are individually and in the aggregate of the expected size for ordinary secondary market repurchases.

In addition to the factors discussed above, the value of the Securities and our purchase price in secondary market transactions after the Trade Date, if any, will vary based on many economic market factors, including our creditworthiness, and cannot be predicted with accuracy. These changes may adversely affect the value of your Securities, including the price you may receive in any secondary market transactions. Any sale prior to the Maturity Date could result in a substantial loss to you. The Securities are not designed to be short-term trading instruments. Accordingly, you should be able and willing to hold your Securities to maturity.

- ◆ There May Be Little or No Secondary Market for the Securities — The Securities will not be listed on any securities exchange. There may be little or no secondary market for the Securities. We or our affiliates intend to act as market makers for the Securities but are not required to do so and may cease such market making activities at any time. Even if there is a secondary market, it may not provide enough liquidity to allow you to sell the Securities when you wish to do so or at a price advantageous to you. Because we do not expect other dealers to make a secondary market for the Securities, the price at which you may be able to sell your Securities is likely to depend on the price, if any, at which we or our affiliates are willing to buy the Securities. If, at any time, we or our affiliates do not act as market makers, it is likely that there would be little or no secondary market in the Securities. If you have to sell your Securities prior to maturity, you may not be able to do so or you may have to sell them at a substantial loss, even in cases where the price of the Underlying has increased since the Trade Date.
- ◆ Many Economic and Market Factors Will Affect the Value of the Securities — While we expect that, generally, the price of the Underlying will affect the value of the Securities more than any other single factor, the value of the Securities prior to maturity will also be affected by a number of other factors that may either offset or magnify each other, including:
 - ◆ the expected volatility of the Underlying;
 - ◆ the composition of the Underlying;
 - ◆ the market prices and dividend rates of the component securities held by the Underlying;
 - ◆ the exchange rates between the U.S. dollar and the non-U.S. currencies that the component securities held by the Underlying are traded in;

- ◆ the occurrence of certain events affecting the Underlying that may or may not require an anti-dilution adjustment;
 - ◆ the time remaining to the maturity of the Securities;
 - ◆ interest rates and yields in the market generally;
- ◆ geopolitical conditions and a variety of economic, financial, political, regulatory or judicial events that affect the Underlying or the markets generally;
 - ◆ supply and demand for the Securities; and
- ◆ our creditworthiness, including actual or anticipated downgrades in our credit ratings.

Because the Securities will be outstanding until the Maturity Date, their value may decline significantly due to the factors described above even if the price of the Underlying remains unchanged from the Initial Price, and any sale prior to the Maturity Date could result in a substantial loss to you. You must hold the Securities to maturity to receive the stated payout from the Issuer.

- ◆ Potential Deutsche Bank AG Impact on Price — Trading or transactions by Deutsche Bank AG or its affiliates in the component securities held by the Underlying, the Underlying and/or over-the-counter options, futures or other instruments with returns linked to the performance of the Underlying or the component securities held by the Underlying, may adversely affect the market value of the component securities held by the Underlying and/or the share price of the Underlying, and, therefore, the value of the Securities.
- ◆ Trading and Other Transactions by Us or Our Affiliates, or UBS AG or Its Affiliates, in the Equity and Equity Derivative Markets May Impair the Value of the Securities — We or one or more of our affiliates expect to hedge our exposure from the Securities by entering into equity and equity derivative transactions, such as over-the-counter options or exchange-traded instruments. Such trading and hedging activities may affect the Underlying and make it less likely that you will receive a positive return on your investment in the Securities. It is possible that we or our affiliates could receive substantial returns from these hedging activities while the value of the Securities declines. We or our affiliates, or UBS AG or its affiliates, may also engage in trading in instruments linked to the Underlying on a regular basis as part of our general broker-dealer and other businesses, for proprietary accounts, for other accounts under management or to facilitate transactions for customers, including block transactions. We or our affiliates, or UBS AG or its affiliates, may also issue or underwrite other securities or financial or derivative instruments with returns linked or related to the Underlying. By introducing competing products into the marketplace in this manner, we or our affiliates, or UBS AG or its affiliates, could adversely affect the value of the Securities. Any of the foregoing activities described in this paragraph may reflect trading strategies that differ from, or are in direct opposition to, investors' trading and investment strategies related to the Securities.
- ◆ We, Our Affiliates or Our Agents, or UBS AG or its Affiliates, May Publish Research, Express Opinions or Provide Recommendations that Are Inconsistent With Investing in or Holding the Securities. Any Such Research, Opinions or Recommendations Could Adversely Affect the Price of the Underlying and the Value of the Securities — We, our affiliates or our agents, or UBS AG or its affiliates, may publish research from time to time on financial markets and other matters that could adversely affect the value of the Securities, or express opinions or provide recommendations that are inconsistent with purchasing or holding the Securities. Any research, opinions or recommendations expressed by us, our affiliates or our agents, or UBS AG or its affiliates, may not be consistent with each other and may be modified from time to time without notice. You should make your own independent investigation of the merits of investing in the Securities and the Underlying to which the Securities are linked.

- ◆ Potential Conflicts of Interest — Deutsche Bank AG and its affiliates may engage in business with the Underlying Stock Issuers, whose Securities are held by the Underlying, which may present a conflict between the obligations of Deutsche Bank AG and you, as a holder of the Securities. We and our affiliates play a variety of roles in connection with the issuance of the Securities, including acting as calculation agent, hedging our obligations under the Securities and determining the Issuer’s estimated value of the Securities on the Trade Date and the price, if any, at which we or our affiliates would be willing to purchase the Securities from you in secondary market transactions. In performing these roles, our economic interests and those of our affiliates are potentially adverse to your interests as an investor in the Securities. The calculation agent will determine, among other things, all values and levels required to be determined for the purposes of the Securities on any relevant date or time. The calculation agent also has some discretion about certain adjustments to the Share Adjustment Factor and will be responsible for determining whether a market disruption event has occurred. Any determination by the calculation agent could adversely affect the return on the Securities.

- ◆ The U.S. Federal Income Tax Consequences of an Investment in the Securities Are Uncertain — There is no direct legal authority regarding the proper U.S. federal income tax treatment of the Securities, and we do not plan to request a ruling from the Internal Revenue Service (the “IRS”). Consequently, significant aspects of the tax treatment of the Securities are uncertain, and the IRS or a court might not agree with the treatment of the Securities as prepaid financial contracts that are not debt. If the IRS were successful in asserting an alternative treatment for the Securities, the tax consequences of ownership and disposition of the Securities could be materially and adversely affected.

Even if the treatment of the Securities as prepaid financial contracts is respected, purchasing a Security could be treated as entering into a “constructive ownership transaction.” In that case, all or a portion of any long-term capital gain you would otherwise recognize on the maturity or disposition of the Security would be recharacterized as ordinary income to the extent such gain exceeded the “net underlying long-term capital gain,” and a notional interest charge would apply with respect to the deemed tax liability that would have been incurred if such income had accrued at a constant rate over the period you held the Security.

As described below under “What Are the Tax Consequences of an Investment in the Securities?”, in 2007 the U.S. Treasury Department and the IRS released a notice requesting comments on various issues regarding the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. Any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Securities, possibly with retroactive effect. You should review carefully the section of the accompanying product supplement entitled “U.S. Federal Income Tax Consequences,” and consult your tax adviser regarding the U.S. federal tax consequences of an investment in the Securities (including possible alternative treatments, the potential application of the “constructive ownership” regime and the issues presented by the 2007 notice), as well as tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

Scenario Analysis and Examples at Maturity

The following table and hypothetical examples below illustrate the Payment at Maturity per \$10.00 Face Amount of Securities for a hypothetical range of performances for the Underlying from -100.00% to +100.00%, reflect the Multiplier of 2.00 and the Maximum Gain of 18.35% and assume an Initial Price of \$75.00. The actual Initial Price is set forth in the “Final Terms” and on the cover of this pricing supplement. The hypothetical Payment at Maturity examples set forth below are for illustrative purposes only and may not be the actual returns applicable to a purchaser of the Securities. The actual Payment at Maturity will be determined based on the Final Price on the Final Valuation Date. You should consider carefully whether the Securities are suitable to your investment goals. The numbers appearing in the table and in the examples below may have been rounded for ease of analysis and it has been assumed that no event affecting the Underlying has occurred during the term of the Securities that would cause the calculation agent to adjust the Share Adjustment Factor.

| Final Price | Underlying Return (%) | Payment at Maturity (\$) | Return on Securities (%) |
|-------------|-----------------------|--------------------------|--------------------------|
| \$150.00 | 100.00% | \$11.84 | 18.35% |
| \$131.25 | 75.00% | \$11.84 | 18.35% |
| \$112.50 | 50.00% | \$11.84 | 18.35% |
| \$105.00 | 40.00% | \$11.84 | 18.35% |
| \$97.50 | 30.00% | \$11.84 | 18.35% |
| \$90.00 | 20.00% | \$11.84 | 18.35% |
| \$82.50 | 10.00% | \$11.84 | 18.35% |
| \$81.88 | 9.17% | \$11.84 | 18.35% |
| \$78.75 | 5.00% | \$11.00 | 10.00% |
| \$76.88 | 2.50% | \$10.50 | 5.00% |
| \$75.00 | 0.00% | \$10.00 | 0.00% |
| \$71.25 | -5.00% | \$9.50 | -5.00% |
| \$67.50 | -10.00% | \$9.00 | -10.00% |
| \$60.00 | -20.00% | \$8.00 | -20.00% |
| \$52.50 | -30.00% | \$7.00 | -30.00% |
| \$45.00 | -40.00% | \$6.00 | -40.00% |
| \$37.50 | -50.00% | \$5.00 | -50.00% |
| \$18.75 | -75.00% | \$2.50 | -75.00% |
| \$0.00 | -100.00% | \$0.00 | -100.00% |

Example 1 — The Final Price of \$76.88 is greater than the Initial Price of \$75.00, resulting in an Underlying Return of 2.50%. Because the Underlying Return is 2.50%, Deutsche Bank AG will pay you 2.00 times the Underlying Return for a Payment at Maturity of \$10.50 per \$10.00 Face Amount of Securities, calculated as follows:

$$\$10.00 + (\$10.00 \times (2.50\% \times 2.00)) = \$10.00 + \$0.50 = \$10.50$$

Example 2 — The Final Price of \$82.50 is greater than the Initial Price of \$75.00, resulting in an Underlying Return of 10.00%. Because 2.00 times the Underlying Return of 10.00% is more than the Maximum Gain of 18.35%, Deutsche Bank AG will pay you a Payment at Maturity of \$11.84 per \$10.00 Face Amount of Securities, calculated as follows:

$$\$10.00 + (\$10.00 \times 18.35\%) = \$10.00 + \$1.84 = \$11.84$$

Example 3 — The Final Price of \$37.50 is less than the Initial Price of \$75.00, resulting in an Underlying Return of -50.00%. Because the Underlying Return is negative, Deutsche Bank AG will pay you less than your initial investment, resulting in a loss that is proportionate to the percentage decline in the price of the Underlying, and a

Payment at Maturity of \$5.00 per \$10.00 Face Amount of Securities, calculated as follows:

$$\$10.00 + (\$10.00 \times -50.00\%) = \$5.00$$

If the Final Price is less than the Initial Price on the Final Valuation Date, you will be fully exposed to the negative Underlying Return, resulting in a loss on the Face Amount that is proportionate to the percentage decline in the price of the Underlying. In this circumstance, you will lose some or all of your initial investment at maturity. Any payment on the Securities is subject to the creditworthiness of the Issuer and if the Issuer were to default on its payment obligations, you could lose your entire investment.

The iShares® MSCI Mexico Capped ETF

We have derived all information contained in this pricing supplement regarding the iShares® MSCI Mexico Capped ETF, including, without limitation, its make-up, method of calculation and changes in its components, from publicly available information. We have not participated in the preparation of, or verified, such publicly available information. Such information reflects the policies of, and is subject to change by iShares, Inc. (“iShares”), iShares Trust, BlackRock Institutional Trust Company, N.A. (“BTC”), and BFA. The iShares® MSCI Mexico Capped ETF is an investment portfolio maintained and managed by iShares. BFA is the investment advisor to the iShares® MSCI Mexico Capped ETF. The iShares® MSCI Mexico Capped ETF is an exchange traded fund that trades on the NYSE Arca under the ticker symbol “EWW.”

The iShares® MSCI Mexico Capped ETF seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of publicly traded securities in the MSCI Mexico IMI 25/50 Index. The iShares® MSCI Mexico Capped ETF will at all times invest at least 80% of its assets in the securities of the MSCI Mexico IMI 25/50 Index or depositary receipts representing the securities of the MSCI Mexico IMI 25/50 Index. The iShares® MSCI Mexico Capped ETF may invest the remainder of its assets in other securities, including securities not in the MSCI Mexico IMI 25/50 Index, but which BFA believes will help the iShares® MSCI Mexico Capped ETF track the MSCI Mexico IMI 25/50 Index, and in other investments, including futures contracts, options on futures contracts, other types of options and swaps related to the MSCI Mexico IMI 25/50 Index, as well as cash and cash equivalents, including shares of money market funds advised by BFA or its affiliates. For more information about the iShares Trust and the methodology of iShares Exchange Traded Funds, please see the section entitled “Funds — The iShares Exchange Traded Funds” in the accompanying underlying supplement No. 1 dated October 1, 2012.

The MSCI Mexico IMI 25/50 Index is a free-float adjusted market capitalization-weighted index with a capping methodology applied to issuer weights so that no single issuer of a component exceeds 25% of the index weight and all issuers with weight above 5% do not exceed 50% of the index weight. The MSCI Mexico IMI 25/50 Index includes large-, mid- or small-capitalization companies, and components primarily include consumer staples, materials and telecommunications companies. The components of the MSCI Mexico IMI 25/50 Index, and the degree to which these components represent certain industries, may change over time. The MSCI Mexico IMI 25/50 Index is reported by Bloomberg under the ticker symbol “M1MX5IM.” For information concerning the methodology of the Tracked Index, please refer to “The MSCI Indices — Constructing the MSCI Indices” in the accompanying underlying supplement No. 1 dated October 1, 2012.

Historical Information

The following table sets forth the quarterly high and low closing prices for one share of the iShares® MSCI Mexico Capped ETF, as reported by Bloomberg. The closing price of one share of the iShares® MSCI Mexico Capped ETF on September 25, 2014 was \$68.65.

| Quarter Begin | Quarter End | Quarterly Closing High | Quarterly Closing Low | Quarterly Close |
|---------------|-------------|------------------------|-----------------------|-----------------|
| 7/1/2009 | 9/30/2009 | \$45.71 | \$34.45 | \$43.68 |
| 10/1/2009 | 12/31/2009 | \$50.65 | \$42.25 | \$48.87 |
| 1/1/2010 | 3/31/2010 | \$53.37 | \$45.85 | \$53.37 |
| 4/1/2010 | 6/30/2010 | \$55.49 | \$46.08 | \$47.89 |
| 7/1/2010 | 9/30/2010 | \$53.31 | \$47.56 | \$52.99 |
| 10/1/2010 | 12/31/2010 | \$61.92 | \$53.90 | \$61.92 |
| 1/1/2011 | 3/31/2011 | \$63.04 | \$58.49 | \$62.85 |
| 4/1/2011 | 6/30/2011 | \$64.31 | \$59.22 | \$62.56 |
| 7/1/2011 | 9/30/2011 | \$63.42 | \$47.24 | \$48.96 |

Edgar Filing: DEUTSCHE BANK AKTIENGESELLSCHAFT - Form 424B2

| | | | | |
|-----------|------------|---------|---------|---------|
| 10/1/2011 | 12/31/2011 | \$57.52 | \$48.04 | \$53.76 |
| 1/1/2012 | 3/31/2012 | \$62.52 | \$54.30 | \$62.52 |
| 4/1/2012 | 6/30/2012 | \$63.64 | \$53.65 | \$61.45 |
| 7/1/2012 | 9/30/2012 | \$65.74 | \$60.40 | \$65.39 |
| 10/1/2012 | 12/31/2012 | \$71.24 | \$63.43 | \$70.53 |
| 1/1/2013 | 3/31/2013 | \$74.96 | \$70.05 | \$74.59 |
| 4/1/2013 | 6/30/2013 | \$76.71 | \$58.72 | \$65.20 |
| 7/1/2013 | 9/30/2013 | \$70.28 | \$61.16 | \$63.89 |
| 10/1/2013 | 12/31/2013 | \$68.66 | \$62.41 | \$68.00 |
| 1/1/2014 | 3/31/2014 | \$67.08 | \$59.14 | \$63.95 |
| 4/1/2014 | 6/30/2014 | \$68.14 | \$62.92 | \$67.81 |
| 7/1/2014 | 9/25/2014* | \$73.00 | \$68.21 | \$68.65 |

*As of the date of this pricing supplement, available information for the third calendar quarter of 2014 includes data for the period through September 25, 2014. Accordingly, the “Quarterly Closing High,” “Quarterly Closing Low” and “Quarterly Close” data indicated are for this shortened period only and do not reflect complete data for the third calendar quarter of 2014.

The graph below illustrates the performance of the iShares® MSCI Mexico Capped ETF from September 25, 2009 through September 25, 2014. The closing price of the iShares® MSCI Mexico Capped ETF on September 25, 2014 was \$68.65. We obtained the historical closing prices of the iShares® MSCI Mexico Capped ETF from Bloomberg, and we have not participated in the preparation of, or verified, such information.

The historical closing prices of the iShares® MSCI Mexico Capped ETF should not be taken as an indication of future performance and no assurance can be given as to the Final Price or any future closing price of the Underlying. We cannot give you assurance that the performance of the Underlying will result in a positive return on your initial investment and you could lose some or all of your initial investment at maturity.

What Are the Tax Consequences of an Investment in the Securities?

In the opinion of our special tax counsel, Davis Polk & Wardwell LLP, which is based on prevailing market conditions, the Securities should be treated for U.S. federal income tax purposes as prepaid financial contracts that are not debt. Generally, if this treatment is respected, (i) you should not recognize taxable income or loss prior to the taxable disposition of your Securities (including at maturity) and (ii) subject to the potential application of the “constructive ownership” regime discussed below, the gain or loss on your Securities should be capital gain or loss and should be long-term capital gain or loss if you have held the Securities for more than one year. The IRS or a court might not agree with this treatment, however, in which case the timing and character of income or loss on your Securities could be materially and adversely affected.

Even if the treatment of the Securities as prepaid financial contracts is respected, purchasing a Security could be treated as entering into a “constructive ownership transaction” within the meaning of Section 1260 of the Internal Revenue Code (“Section 1260”). In that case, all or a portion of any long-term capital gain you would otherwise recognize upon the taxable disposition of the Security would be recharacterized as ordinary income to the extent such gain exceeded the “net underlying long-term capital gain” as defined in Section 1260. Any long-term capital gain recharacterized as ordinary income would be treated as accruing at a constant rate over the period you held the Security, and you would be subject to a notional interest charge in respect of the deemed tax liability on the income treated as accruing in prior tax years. Due to the lack of direct legal authority, our special tax counsel is unable to opine as to whether or how Section 1260 applies to the Securities.

In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on various issues regarding the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. The notice focuses in particular on whether beneficial owners of these instruments should be required to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; the relevance of factors such as the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by non-U.S. persons should be subject to withholding tax; and whether these instruments are or should be subject to the “constructive ownership” regime discussed above. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Securities, possibly with retroactive effect.

You should review carefully the section of the accompanying product supplement entitled “U.S. Federal Income Tax Consequences.” The preceding discussion, when read in combination with that section, constitutes the full opinion of our special tax counsel regarding the material U.S. federal income tax consequences of owning and disposing of the Securities.

Under current law, the United Kingdom will not impose withholding tax on payments made with respect to the Securities.

For a discussion of certain German tax considerations relating to the Securities, you should refer to the section in the accompanying prospectus supplement entitled “Taxation by Germany of Non-Resident Holders.”

You should consult your tax adviser regarding the U.S. federal tax consequences of an investment in the Securities (including possible alternative treatments, the potential application of the “constructive ownership” regime and the issues presented by the 2007 notice), as well as tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

Supplemental Plan of Distribution (Conflicts of Interest)

UBS Financial Services Inc. and its affiliates, and Deutsche Bank Securities Inc., acting as agents for Deutsche Bank AG, will receive or allow as a concession or reallowance to other dealers discounts and commissions of \$0.20 per \$10.00 Face Amount of Securities. We have agreed that UBS Financial Services Inc. may sell all or part of the Securities that it purchases from us to investors at the price to public indicated on the cover of this pricing supplement, or to its affiliates at the price to public indicated on the cover of this pricing supplement minus a concession not to exceed the discounts and commissions indicated on the cover. DBSI, one of the agents for this offering, is our affiliate. Because DBSI is both our affiliate and a member of the Financial Industry Regulatory Authority, Inc. (“FINRA”), the underwriting arrangement for this offering must comply with the requirements of FINRA Rule 5121 regarding a FINRA member firm’s distribution of the securities of an affiliate and related conflicts of interest. In accordance with FINRA Rule 5121, DBSI may not make sales in this offering of the Securities to any of its discretionary accounts without the prior written approval of the customer. See “Underwriting (Conflicts of Interest)” in the accompanying product supplement.

Validity of the Securities

In the opinion of Davis Polk & Wardwell LLP, as special United States products counsel to the Issuer, when the Securities offered by this pricing supplement have been executed and issued by the Issuer and authenticated by the authenticating agent, acting on behalf of the trustee, pursuant to the senior indenture, and delivered against payment as contemplated herein, such Securities will be valid and binding obligations of the Issuer, enforceable in accordance with their terms, subject to applicable bankruptcy, insolvency and similar laws affecting creditors’ rights generally, concepts of reasonableness and equitable principles of general applicability (including, without limitation, concepts of good faith, fair dealing and the lack of bad faith), provided that such counsel expresses no opinion as to the effect of fraudulent conveyance, fraudulent transfer or similar provision of applicable law on the conclusions expressed above. This opinion is given as of the date hereof and is limited to the laws of the State of New York. Insofar as this opinion involves matters governed by German law, Davis Polk & Wardwell LLP has relied, without independent investigation, on the opinion of Group Legal Services of Deutsche Bank AG, dated as of September 28, 2012, filed as an exhibit to the letter of Davis Polk & Wardwell LLP, and this opinion is subject to the same assumptions, qualifications and limitations with respect to such matters as are contained in such opinion of Group Legal Services of Deutsche Bank AG. In addition, this opinion is subject to customary assumptions about the trustee’s authorization, execution and delivery of the senior indenture and the authentication of the Securities by the authenticating agent and the validity, binding nature and enforceability of the senior indenture with respect to the trustee, all as stated in the letter of Davis Polk & Wardwell LLP dated September 28, 2012, which has been filed as an exhibit to the registration statement referred to above.
