ALTAIR INTERNATIONAL INC.
12,060,842 Common Shares

This prospectus relates to the offering and sale of 12,060,842 common shares of Altair International Inc., without par value. All of the offered shares are to be sold by persons who are existing security holders and identified in the section of this prospectus entitled "Selling Shareholders." Of the shares offered hereby, 1,300,000 are currently owned by the selling shareholders and 1,383,672 are issuable upon the exercise of outstanding warrants to purchase common shares of Altair. The remaining 9,377,170 offered shares are being registered pursuant to a contractual obligation with one of the selling shareholders and represent an estimated number of common shares that Altair could have been required to issue to such selling shareholder pursuant to a 10% Asset-Backed Exchangeable Term Note. Such Exchangeable Term Note was terminated on December 28, 2001 after 824,799 common shares were issued upon the exercise of exchange rights that accrued thereunder. No additional common shares will be issued under the 10% Asset-Backed Exchangeable Term Note. In addition, pursuant to Rule 416 of the Securities Act of 1933, as amended, this prospectus and the registration statement of which it is a part cover a presently indeterminate number of common shares issuable upon the occurrence of a stock split, stock dividend, or other similar transaction.

We will not receive any of the proceeds from the sale of the shares offered hereunder. In the United States, our common shares are listed for trading under the symbol ALTI on the Nasdaq National Market. On December 31, 2001, the closing sale price of a common share, as reported by the Nasdaq National Market, was \$1.40 per share. Unless otherwise expressly indicated, all monetary amounts set forth in this prospectus are expressed in United States Dollars.

Our principal office is located at 1725 Sheridan Avenue, Suite 140, Cody, Wyoming 82414 U.S.A., and our telephone number is (307) 587-8245.

RISK FACTORS

Before you invest in the offered securities described in this prospectus, you should be aware that such investment involves the assumption of various risks. You should consider carefully the risk factors described below together with all of the other information included in this prospectus before you decide to purchase the offered securities.

We have not generated, and may never generate, significant operating revenues.

To date, we have not generated any significant revenues from operations. We have not completed development of the jig or the titanium processing technology and have not completed exploration of the Tennessee mineral property. We can provide no assurance that we will ever generate significant revenues from the jig or the Tennessee mineral property or that we will generate significant revenues from the titanium processing technology.

Edgar Filing: ALTAIR INTERNATIONAL INC - Form 424B3

We may continue to experience significant losses from operations.

We have experienced a loss from operations in every fiscal year since our inception. Our losses from operations in 1999 were \$3,729,534, our losses from operations in 2000 were \$6,647,367 and our losses from operations during the first three-quarters of 2001 were \$4,967,433. We will continue to experience a net operating loss until, and if, the titanium processing technology, the jig and/or the Tennessee mineral property begin generating significant revenues. Even if any or all such products or projects begin generating significant revenues, the revenues may not exceed our costs of production and operating expenses. We may not ever realize a profit from operations.

We may not be able to raise sufficient capital to meet future obligations.

As of September 30, 2001, we had \$17,728 in unrestricted cash and \$2,504,715 in restricted cash that is securing a letter of credit and is scheduled to be released as the outstanding principal balance is reduced. In the absence of significant revenue, this amount of capital will likely prove insufficient to complete the testing and additional development work necessary to place the titanium processing technology into continuous operation. In addition, we will likely need additional capital for testing and development of the jig or exploration of the Tennessee mineral property. If we determine to construct and operate a mine on the Tennessee mineral property, we will need to obtain a significant amount of additional capital to complete construction of the mine and commence operations.

We may not be able to obtain the amount of additional capital needed or may be forced to pay an extremely high price for capital. Factors affecting the availability and price of capital may include the following:

- o market factors affecting the availability and cost of capital generally;
- o our financial results;
- o the amount of our capital needs;
- o the market's perception of mining, technology and/or minerals stocks;

2

- o the economics of projects being pursued;
- o industry perception of our ability to recover minerals with the jig or titanium processing technology or from the Tennessee mineral property; and
- o the price, volatility and trading volume of our common shares.

If we are unable to obtain sufficient capital or are forced to pay a high price for capital, we may be unable to meet future obligations or adequately exploit existing or future opportunities, and may be forced to discontinue operations.

Our competitors may be able to raise money and exploit opportunities more rapidly, easily and thoroughly than we can.

We have limited financial and other resources and, because of our earlier stage of development, have limited access to capital. We compete or may compete against entities that are much larger than we are, have more extensive resources than we do and have an established reputation and operating history. Because of their size, resources, reputation, history and other factors, certain

Edgar Filing: ALTAIR INTERNATIONAL INC - Form 424B3

of our competitors may have better access to capital and other significant resources than we do and, as a result, may be able to exploit acquisition and development opportunities more rapidly, easily or thoroughly than we can.

The sale of common shares received upon exercise of exchange rights under notes

or upon the exercise of warrants may place downward pressure on the market price

of our common shares and encourage short selling.

The exchange of exchange rights under existing and recently terminated notes and the exercise of warrants and subsequent sale of the common shares issuable upon such exchange may place downward pressure on the market price of our common shares. Speculative traders may anticipate the exercise of exchange rights or warrants and, in anticipation of a decline in the market price of our common shares, engage in short sales of our common shares. Such short sales could further negatively affect the market price of our common shares.

We have pledged substantial assets to secure the Secured Term Note.

We have pledged all of the intellectual property, fixed assets and common stock of Altair Technologies, Inc., our second-tier wholly-owned subsidiary, to secure repayment of a \$2,000,000 Secured Term Note issued on December 28, 2001. Altair Technologies, Inc. owns and operates the titanium processing technology we acquired from BHP Minerals in 1999. The Secured Term Note is also secured by a pledge of the common stock of Mineral Recovery Systems, Inc., which owns and operates our leasehold interests in the Camden, Tennessee area. If we default on the Secured Term Note, severe remedies will be available to the holder of the Secured Term Note, including immediate seizure and disposition of all pledged assets.

3

Operations using the titanium processing technology, the jig or the Tennessee

mineral property may lead to substantial environmental liability.

Virtually any proposed use of the titanium processing technology, the jig or the Tennessee mineral property would be subject to federal, state and local environmental laws. Under such laws, we may be jointly and severally liable with prior property owners for the treatment, cleanup, remediation and/or removal of any hazardous substances discovered at any property we use. In addition, courts or government agencies may impose liability for, among other things, the improper release, discharge, storage, use, disposal or transportation of hazardous substances. We might use hazardous substances and, if we do, we will be subject to substantial risks that environmental remediation will be required.

Certain of our experts and directors reside in Canada and may be able to avoid

civil liability.

We are an Ontario corporation, and a majority of our directors and our Canadian legal counsel are residents of Canada. As a result, investors may be unable to effect service of process upon such persons within the United States and may be unable to enforce court judgments against such persons predicated upon civil liability provisions of the United States securities laws. It is

Edgar Filing: ALTAIR INTERNATIONAL INC - Form 424B3

uncertain whether Canadian courts would (i) enforce judgments of United States courts obtained against us or such directors, officers or experts predicated upon the civil liability provisions of United States securities laws or (ii) impose liability in original actions against Altair or its directors, officers or experts predicated upon United States securities laws.

We are dependent on key personnel.

Our continued success will depend to a significant extent on the services of Dr. William P. Long, our President and Chief Executive Officer, and Mr. C. Patrick Costin, our Vice President and President of Fine Gold and MRS. The loss or unavailability of Dr. Long or Mr. Costin could have a material adverse effect on us. We do not carry key man insurance on the lives of Dr. Long or Mr. Costin.

We may issue substantial amounts of additional shares without stockholder approval.

Our Articles of Incorporation authorize the issuance of an unlimited number of common shares. All such shares may be issued without any action or approval by our stockholders. In addition, we have two stock option plans which have potential for diluting of the ownership interests of our stockholders. The issuance of any additional common shares would further dilute the percentage ownership of Altair held by existing stockholders. Additional common shares could be issued at a lower price per share than the price you are being offered.

The market price of our common shares is extremely volatile.

Our common shares have been listed on the Nasdaq National Market since January 26, 1998. Trading in our common shares has been characterized by a high degree of volatility. Trading in our common shares may continue to be characterized by extreme volatility for numerous reasons, including the following:

4

- o Uncertainty regarding the viability of the titanium processing technology, the jig or the Tennessee mineral property;
- o Continued dominance of trading in our common shares by a small number of firms;
- o Positive or negative announcements by us or our competitors;
- o Industry trends, general economic conditions in the United States or elsewhere, or the general markets for equity securities, minerals, or commodities; and
- o Speculation by short sellers of our common shares or other persons (such as the holders of the Exchangeable Term Note) who stand to profit from a rapid increase or decrease in the price of our common shares.

Future sales of currently restricted securities or common shares subject to

Edgar Filing: ALTAIR INTERNATIONAL INC - Form 424B3

outstanding options may affect the market price of our common shares.

In general, Rule 144 of the Securities Act provides that outstanding restricted common shares of Altair may be sold subject to certain conditions beginning one year after issuance and, unless held by an affiliate of Altair, may be sold without limitation beginning two years after issuance. Future sales of currently restricted securities may have a negative effect on the market price of our common shares.

In addition, shares issued upon exercise of options granted pursuant to our employee stock option plans are presently registered under the Securities Act. Subject to certain restrictions on resale by affiliates, such shares may be sold without restriction. The sale of any substantial number of common shares may have a depressive effect on the market price of our common shares.

We have never declared, and are currently prohibited from declaring, a dividend.

We have never declared or paid dividends on our common shares. We currently intend to retain any future earnings, if any, for use in our business and, therefore, do not anticipate paying dividends on our common shares in the foreseeable future.

We may not be able to sell nanoparticles produced using the titanium processing technology.

In the short run, we plan to use the titanium processing technology to produce titanium dioxide ("TiO₂") nanoparticles. TiO₂ nanoparticles are TiO₂ crystals that are approximately one-tenth the size of conventional pigmentary TiO₂ particles. Because of their small size, photocatalytic and ultraviolet shielding capabilities and other unique characteristics, TiO₂ nanoparticles sell at a much higher price than conventional TiO₂ particles and are used in products such as specialty surface coatings, UV protectant cosmetics and battery components.

TiO₂ nanoparticles and other products we intend to initially produce with the titanium processing technology generally must be customized for a specific application working in cooperation with the end user. We are still testing and customizing our TiO₂ nanoparticle products for various applications

5

and have no long-term agreements with end users to purchase any of TiO₂ nanoparticle products. If we are unable to customize our TiO₂ nanoparticle products to the satisfaction of customers or otherwise unable to obtain any long-term commitments from end-users of our TiO₂ nanoparticle products, we may be unable to recoup our investment in the titanium processing technology and titanium processing equipment.

In addition, the uses for such nanoparticles are limited, and the market for such nanoparticles is small, currently estimated at 3,800 tons per annum. In light of the small size of the market, we may not be able to profitably market any proposed nanoparticle products for any of the following reasons:

- o there may be insufficient demand for such products;
- o despite strong initial demand for any such products, the market for such products may contract as a result of a decrease in demand for

Edgar Filing: ALTAIR INTERNATIONAL INC - Form 424B3

goods incorporating such products or other event;

- o the increased supply of such products as a result of our entrance into the market may cause the price to drop, reducing or eliminating profitability; and
- o competing entities may begin producing, or increase their production of nanoparticles, causing the price to drop or displacing potential sales.

Our costs of production may be so high as to prevent us from becoming

profitable.

We have not produced any mineral products using the titanium processing technology and equipment on a commercial basis. Our actual costs of production may exceed those of competitors and, even if our costs of production are lower, competitors may be able to sell TiO2 and other products at a lower price than is economical for Altair.

In addition, even if our initial costs are as anticipated, the titanium processing equipment may break down, prove unreliable or prove inefficient in a commercial setting. If so, related costs, delays and related problems may cause production of TiO2 nanoparticles and related products to be unprofitable.

Our costs of production may exceed estimates.

We have not produced any mineral products using the processing technology and equipment on a commercial basis. Our actual costs of production may exceed those of competitors and, even if our costs of production are lower, competitors may be able to sell TiO2 and other products at a lower price than is economical for Altair.

In addition, even if our initial costs are as anticipated, the titanium processing equipment may break down, prove unreliable or prove inefficient in a commercial setting. If so, related costs, delays and related problems may cause production of TiO2 nanoparticles and related products to be unprofitable.

We have not completed testing and development of the jig and are presently

focusing our resources on other projects.

We have not completed testing of, or developed a production model of, any series of the jig. We do not expect to complete testing and development of the jig during the coming year and have determined to focus most of our limited resources on the titanium processing technology and the Tennessee mineral property. We may never develop a production model of the jig.

Even if we complete development of the jig, the jig may prove unmarketable and

may not perform as anticipated in a commercial operation.

The designed capacity of the Series 12 jig is too small for coal washing, heavy minerals extraction, and most other intended applications of the jig, except use in small placer gold mines or similar operations. Even if the

Edgar Filing: ALTAIR INTERNATIONAL INC - Form 424B3

Series 12 jig is completed and performs to design specifications in subsequent tests or at a commercial facility, we believe that, because of its small capacity, the potential market for the Series 12 jig is limited.

If we complete development of and begin marketing a production model of the Series 30 jig, it may not prove attractive to potential end users, may be rendered obsolete by competing technologies or may not recover end product at a commercially viable rate. Even if technology included in the jig initially proves attractive to potential end users, performance problems and maintenance issues may limit the market for the jig.

The jig faces competition from other jig-like products and from alternative technologies.

Various jig-like products and alternative mineral processing technologies perform many functions similar or identical to those for which the jig is designed. Results from further tests or actual operations may reveal that these alternative products and technologies are better adapted to any or all of the uses for which the jig is intended. Moreover, regardless of test results, consumers may view any or all of such alternative products and technologies as technically superior to, or more cost effective than, the jig.

Certain patents for the jig have expired, and those that have not expired may be difficult to enforce.

All of the initial patents issued on the jig have expired, and we are unable to prevent competitors from copying the technology once protected by such patents. Additional patents related to the process through which water is pulsed through the cylindrical screen on the jig expire beginning in 2010, and patents for an efficiency-enhancing aspect of the cylindrical screen expire during 2018. The cost of enforcing patents is often significant, especially outside of North America. Accordingly, we may be unable to enforce even our patents that have not yet expired.

7

We have not completed examining the feasibility of mining the Tennessee mineral property.

We are currently in the process of conducting feasibility testing of the Tennessee mineral property. Because we are at an early stage of testing, we are unable to provide any assurance that mining of the Tennessee mineral property is feasible or to identify all processes that we would need to complete before we could commence a mining operation on the Tennessee mineral property. To the extent early feasibility testing yields positive results, we expect feasibility testing to involve, among other things, the following:

- o operating a pilot mining facility to determine mineral recovery efficiencies and the quality of end products;
- o additional drilling and sampling in order to more accurately determine the quantity; quality and continuity of minerals on the Tennessee mineral property;
- o examining production costs and the market for products produced at the pilot facility;
- o designing any proposed mining facility;

Edgar Filing: ALTAIR INTERNATIONAL INC - Form 424B3

- o identifying and applying for the permits necessary for any proposed full-scale mining facility; and
- o attempting to secure financing for any proposed full-scale mining facility.

Our test production at the pilot plant, economic analysis and additional exploration activities may indicate any of the following:

- o that the Tennessee mineral property does not contain heavy minerals of a sufficient quantity, quality or continuity to permit any mining;
- o that production costs exceed anticipated revenues;
- o that end products do not meet market requirements or customer expectations;
- o that there is an insufficient market for products minable from the Tennessee mineral property; or
- o that mining the Tennessee mineral property is otherwise not economically or technically feasible.

Even if we conclude that mining is economically and technically feasible on the Tennessee mineral property, we may be unable to obtain the capital, resources and permits necessary to mine the Tennessee mineral property. Market factors, such as a decline in the price of, or demand for, minerals recoverable at the Tennessee mineral property, may adversely affect the development of mining operations on such property. In addition, as we move through the testing process, we may identify additional items that need to be researched and resolved before any proposed mining operation could commence.

We cannot forecast the life of any potential mining operation located on the

Tennessee mineral property.

We have not explored and tested the Tennessee mineral property enough to establish the existence of a commercially minable deposit (i.e. a reserve) on such property. Until such time as a reserve is established (of which there can be no assurance), we cannot provide an estimate as to how long the Tennessee mineral property could sustain any proposed mining operation.

We may be unable to obtain necessary environmental permits and may expend

significant resources in order to comply with environmental laws.

In order to begin construction and commercial mining on the Tennessee mineral property, we must obtain additional federal, state and local permits. We will also be required to conform our operations to the requirements of numerous federal, state and local environmental laws. Because we have not yet commenced design of a commercial mining facility on the Tennessee mineral property, we are not in a position to definitively ascertain which federal, state and local mining and environmental laws or regulations would apply to a mine on the Tennessee mineral property. Nevertheless, we anticipate having to comply with and/or obtain permits under the Clean Air Act, Clean Water Act and Resource Conservation and Recovery Act, in addition to numerous state laws and regulations before commencing construction or operation of a mine on the Tennessee mineral property. We can provide no assurance that we will be able to comply with such laws and regulations or obtain any such permits. In addition, obtaining such permits and complying with such environmental laws and regulations may be cost prohibitive.

Edgar Filing: ALTAIR INTERNATIONAL INC - Form 424B3

The market for commodities produced using the jig or at the Tennessee mineral property may significantly decline.

If the jig is successfully developed and manufactured on a commercial basis, we intend to use the jig, or lease the jig for use, to separate and recover valuable, heavy mineral particles. Active international markets exist for gold, titanium, zircon and many other minerals potentially recoverable with the jig. Prices of such minerals fluctuate widely and are beyond our control. A significant decline in the price of minerals capable of being extracted by the jig could have significant negative effect on the value of the jig. Similarly, a significant decline in the price of minerals expected to be produced on the Tennessee mineral property could have a significant negative effect on the viability of a mine or processing facility on such property.

FORWARD-LOOKING STATEMENTS

This prospectus contains various forward-looking statements. Such statements can be identified by the use of the forward-looking words "anticipate," "estimate," "project," "likely," "believe," "intend," "expect," or similar words. These statements discuss future expectations, contain projections regarding future developments, operations, or financial conditions, or state other forward-looking information. When considering such forward-looking statements, you should keep in mind the risk factors noted in the previous section and other cautionary statements throughout this prospectus and our periodic filings with the SEC that are incorporated herein by reference. You should also keep in mind that all forward-looking statements are based on management's existing beliefs about present and future events outside of management's control and on assumptions that may prove to be incorrect. If one or more risks identified in this prospectus or any applicable filings materializes, or any other underlying assumptions prove incorrect, our actual results may vary materially from those anticipated, estimated, projected, or intended.

9

Among the key factors that may have a direct bearing on our operating results are risks and uncertainties described under "Risk Factors," including those attributable to the absence of operating revenues or profits, uncertainties regarding the development and commercialization of the titanium processing technology and the jig, development risks associated with the Tennessee mineral property and uncertainties regarding our ability to obtain capital sufficient to continue our operations and pursue our proposed business strategy.

OUR COMPANY'S COMMON STOCK Price Range of Common Stock

Beginning on January 26, 1998, our common shares began trading on the Nasdaq National Market under the symbol "ALTIF" (changed to "ALTI" on May 23, 2000) The following table sets forth, for the periods indicated, the high and low sales prices for our common shares, as reported on the Nasdaq National Market.

Fiscal Year Ended December 31, 1999	Low	High

4th Quarter	\$1.01	\$1.80

The last sale price of the common shares, as reported on the Nasdaq National Market, on December 31, 2001 was \$1.40.

Outstanding Shares and Number of Shareholders

As of December 31, 2001, the number of common shares outstanding was 22,694,142, held by approximately 500 holders of record. In addition, as of the same date, we had reserved 5,241,700 common shares for issuance upon exercise of options that have been, or may be, granted under our employee stock option plans and 2,787,007 common shares for issuance upon the exercise of outstanding warrants. In addition, we have issued the Secured Term Note, pursuant to which a presently indeterminable number of additional common shares may be issued.

10

Of our outstanding common shares, 1,866,668 were "restricted securities," as defined in Rule 144 as of September December 31, 2001. The resale of 550,000 of such restricted securities has been registered under the registration statement of which this prospectus is part. The "restricted securities" that have not been registered under the registration statement of which this prospectus is a part were issued between August 4, 2000 and December 31, 2001.

Dividends

We have never declared or paid dividends on our common shares. Moreover, we currently intend to retain any future earnings for use in our business and, therefore, do not anticipate paying any dividends on our common shares in the foreseeable future.

Transfer Agent and Registrar

The Transfer Agent and Registrar for our common shares is Equity Transfer Services, Inc., Suite 420, 120 Adelaide Street West, Toronto, Ontario, M5H 4C3.

Canadian Taxation Considerations

Dividends paid on common shares owned by non-residents of Canada are subject to Canadian withholding tax. The rate of withholding tax on dividends under the Income Tax Act (Canada) (the "Act") is 25%. However, Article X of the reciprocal tax treaty between Canada and the United States of America (the "Treaty") generally limits the rate of withholding tax on dividends paid to United States residents to 15%. The Treaty further generally limits the rate of withholding tax to 5% if the beneficial owner of the dividends is a U.S. corporation which owns at least 10% of the voting shares of the company.

If the beneficial owner of the dividend carries on business in Canada through a permanent establishment in Canada, or performs in Canada independent personal services from a fixed base in Canada, and the shares of stock with respect to which the dividends are paid are effectively connected with such permanent establishment or fixed base, the dividends are taxable in Canada as business profits at rates which may exceed the 5% or 15% rates applicable to dividends that are not so connected with a Canadian permanent establishment or fixed base. Under the provisions of the Treaty, Canada is permitted to apply its domestic law rules for differentiating dividends from interest and other disbursements.

A capital gain realized on the disposition of our common shares by a person resident in the United States (a "Non-resident") will be subject to tax under the Act if the shares held by the Non-resident are "taxable Canadian property." In general, our common shares will be taxable Canadian property if the particular Non-resident used (or in the case of a Non-resident insurer, used or held) the common shares in carrying on business in Canada or, where at any time during the five-year period immediately preceding the realization of the gain, not less than 25% of the issued and outstanding shares of any class or series of shares of the Company were owned by the particular Non-resident, by persons with whom the particular Non-resident did not deal at arms' length, or by any combination thereof. If the common shares constitute taxable Canadian property, relief nevertheless may be available under the Treaty. Under the Treaty, gains from the alienation of common shares owned by a Non-resident who has never been resident in Canada generally will be exempt from Canadian capital gains tax if the shares do not relate to a permanent establishment or fixed base which the Non-resident has or had in Canada, and if not more than 50% of the value of the shares was derived from real property (which includes rights to explore for or to exploit mineral deposits) situated in Canada.

USE OF PROCEEDS

All proceeds from any sale of offered shares, less commissions and other customary fees and expenses, will be paid directly to the selling shareholders selling the offered shares. We will not receive any proceeds from the sale of any of the offered shares.

DILUTION

Our unaudited net tangible book value at September 30, 2001 was \$3,716,444, or approximately \$.18 per each of the 20,578,909 common shares then

12

outstanding and approximately \$.11 per share had all of the 12,060,842 offered shares been issued and outstanding on that date. Accordingly, new investors who purchase shares may suffer an immediate dilution of the difference between the purchase price per share and approximately \$.11 per share.

As of December 31, 2001, there were outstanding warrants and options to purchase up to 8,028,707 common shares. The existence of such warrants and options may hinder future equity offerings by us, and the exercise of such warrants and options may have an adverse effect on the prevailing market price

Edgar Filing: ALTAIR INTERNATIONAL INC - Form 424B3

of the common shares. Furthermore, the holders of warrants and options may exercise them at a time when we would otherwise be able to obtain additional equity capital on terms more favorable to us.

SELLING SHAREHOLDERS

All of the offered shares are to be sold by persons who are existing security holders of Altair. The selling shareholders acquired their shares, warrants and Exchangeable Term Note in private placements of (i) the Exchangeable Term Note and 350,000 warrants that we completed on December 15, 2000 (ii) 50,000 shares and 50,000 warrants that we completed on August 22, 2000, (iii) 500,000 shares and 500,000 warrants that we completed on August 4, 2000, (iv) 325,339 warrants that we completed on March 31, 2000, (v) 83,333 warrants that we completed on March 3, 2000, (vi) 75,000 warrants that we completed on February 15, 2000, and (vii) 100,000 shares that we completed on December 29, 1997.

Of the common shares offered hereby, 1,300,000 are currently owned by the selling shareholders and 1,383,672 are issuable upon exercise of outstanding warrants. The remaining 9,377,170 offered shares relate to the Exchangeable Term Note, which is exchangeable into our common shares. The Exchangeable Term Note was terminated on December 28, 2001 after 824,799 common shares were issued. No additional common shares will be issued under the 10% Asset-Backed Exchangeable Term Note.

For purposes of this prospectus, we have assumed that the number of shares issuable upon exercise of each of the warrants is the number stated on the face thereof. The number of shares issuable upon exercise of the warrants, and available for resale hereunder, is subject to adjustment and could materially differ from the estimated amount depending on the occurrence of a stock split, stock dividend, or similar transaction resulting in an adjustment in the number of shares subject to the warrants.

Beneficial Ownership of Selling Shareholders

The table that begins on the top of the next page sets forth, as of the date of this prospectus:

13

- o the name of each selling shareholder,
- o certain beneficial ownership information with respect to the selling shareholders,
- o the number of shares that may be sold from time to time by each selling shareholder pursuant to this prospectus, and
- o the amount (and, if one percent or more, the percentage) of common shares to be owned by each selling shareholder if all offered shares are sold.

Beneficial ownership is determined in accordance with SEC rules and generally includes voting or investment power with respect to securities. Common shares that are issuable upon the exercise of outstanding options, warrants or other purchase rights, to the extent exercisable within 60 days of the date of this prospectus, are treated as outstanding for purposes of computing each selling shareholder's percentage ownership of outstanding common shares.

- (1) Assuming the sale by each selling shareholder of all of the shares offered hereunder by such selling shareholder. There can be no assurance that any of the shares offered hereby will be sold.
- (2) The percentages set forth above have been computed assuming the number of common shares outstanding equals the sum of (a) 22,694,142, which is the number of common shares actually outstanding on December 31, 2001, and (b) common shares subject to exercisable warrants and exchange rights with respect to which such percentage is calculated.
- (3) Includes 850,000 common shares issuable by us upon the exercise of warrants held by Doral 18, LLC, 350,000 of which are offered pursuant to this prospectus. Does not include shares issuable upon exercise of the exchange rights that may accrue in the future under the Secured Term held by Doral. If we elect not to redeem the accrued interest on the \$2,000,000 Secured Term Note on each monthly due date, the holder of the Secured Term Note will automatically receive the right to exchange (immediately or at any later date during the term) such amount into common shares at an exchange price equal to 75% of the average

closing price of the Common Shares as reported by Bloomberg for the five preceding trading days. As required by a registration rights agreement with Doral, we have registered 10,027,170 common shares on behalf of Doral with respect to the Exchangeable Term Note. The Exchangeable Term Note was cancelled on December 28, 2001 after a total of 824,799 common shares were issued under exchange rights that accrued under the Exchangeable Term Note.

- (4) Under the terms of the Secured Term Note and Warrants held by Doral, Doral is prohibited from exercising any accrued exchange rights or warrants if, after such exercise, it would beneficially own more than 4.999% of the outstanding common shares. But for the effect of such provision, Doral would beneficially own 6.4% of the outstanding common shares.
- (5) Includes 1,500,000 common shares issuable by us upon the exercise of warrants held by Mr. Schnur. The 750,000 Common Shares that were offered by Mr. Schnur pursuant to this prospectus have been sold.
- (6) Under the terms of the Warrants held by Mr. Schnur, the holder may not exercise any Warrants if, after such exercise, he/it would beneficially own more than 9.999% of the outstanding common shares. But for the effect of such provision, Mr. Schnur would beneficially own 12.8% of the outstanding common shares.

Private Placement of Shares, Warrants and Notes

Doral 18, LLC

On December 15, 2000, pursuant to a securities purchase agreement, we sold Doral 18, LLC a warrant to purchase 350,000 common shares and a \$7,000,000 10% Asset-Backed Exchangeable Term Note. On December 28, 2001, pursuant to a note termination and issuance agreement, the Exchangeable Term Note was terminated and the exercise price of the warrant was reduced to \$1.50 per share. In connection with the note termination and issuance agreement and the termination of the Exchangeable Term Note, we repaid \$2,500,732 in principal and issued a new \$2,000,000 Secured Term Note, 200,000 warrants to purchase common shares and a conditional warrant that vests at the rate of 25,000 shares for each \$.50 increase in the price of the Company's common shares to or above \$2.00 per share. The \$2,000,000 Secured Term Note does not permit exchange of principal amounts for common shares.

16

The warrant has an exercise price of \$1.50, and is exercisable at any time on or before the earlier of (a) December 15, 2005, and (b) the date 60 days after we provide notice to the holder that the market price of the common shares has been equal to or greater than \$12.00 for five consecutive days. The warrant includes standard anti-dilution provisions pursuant to which the exercise price and number of common shares issuable thereunder are adjusted proportionately in the event of a stock split, stock dividend, recapitalization or similar transaction.

The Exchangeable Term Note was in the principal amount of \$7,000,000 and bore interest at a rate of 10% per annum. Under the Exchangeable Term Note, we were required to make monthly payments on or before the 15th day of each calendar month in the principal amount of \$291,667 plus accrued interest. The Exchangeable Term Note was due and payable in full on December 15, 2003 but was terminated on December 28, 2001. A total of 824,799 common shares were issued

Edgar Filing: ALTAIR INTERNATIONAL INC - Form 424B3

upon the exercise of exchange rights that accrued under the Exchangeable Term Note.

Louis Schnur

Louis Schnur acquired 375,000 common shares and 375,000 warrants in a private placement pursuant to the terms of a stock purchase agreement dated as of August 4, 2000. The 375,000 warrants include warrants to purchase 187,500 common shares at an exercise price of \$5 at any time prior to the earlier of (i) July 9, 2006, and (ii) the date thirty days following the fifth day (whether or not consecutive) the closing price of the common shares equals or exceeds \$7.00 and warrants to purchase 187,500 common shares at an exercise price of \$4 at any time prior to the earlier of (i) July 9, 2006, and (ii) the date thirty days following the fifth day (whether or not consecutive) the closing price of the common shares equals or exceeds \$6.00. Notwithstanding the foregoing, pursuant to a Repricing Amendment to Common Share Purchase Warrants dated as of October 18, 2001, the warrants were amended to reduce the exercise price to \$1 per share for a limited time period. All of the warrants were exercised during such time period.

The warrants include standard anti-dilution provisions pursuant to which the exercise price and number of shares issuable thereunder is adjusted proportionately in the event of a stock split, stock dividend, recapitalization or similar transaction. The warrants also contain a provision which provides that the holder may not exercise the warrant if such exercise would result in the holder, together with any affiliate thereof, beneficially owning in excess of 9.999% of our then issued and outstanding common shares.

The shares that may be offered pursuant to this prospectus include the 375,000 common shares issued to Mr. Schnur and the common shares issuable upon the exercise of the warrants. Pursuant to a registration rights agreement dated as of August 4, 2000 and entered into in conjunction with the Schnur purchase agreement, we are obligated to file a registration statement registering the common shares, and shares issuable upon the exercise of warrants, acquired by Mr. Schnur on August 4, 2000.

17

MBRT Trust

MBRT Trust, an irrevocable trust for the benefit of the children of William P. Long, President of the Company, acquired 125,000 common shares and 125,000 warrants in a private placement pursuant to the terms of a stock purchase agreement dated as of August 4, 2000. The 125,000 warrants include warrants to purchase 62,500 common shares at an exercise price of \$5 at any time prior to the earlier of (i) the fifth anniversary of the date the registration statement of which this prospectus is a part is first effective, and (ii) the date thirty days following the fifth day (whether or not consecutive) the closing price of the common shares equals or exceeds \$7.00 and warrants to purchase 62,500 common shares at an exercise price of \$4 at any time prior to the earlier of (i) the fifth anniversary of the date the registration statement of which this prospectus is a part is first effective, and (ii) the date thirty days following the fifth day (whether or not consecutive) the closing price of the common shares equals or exceeds \$6.00. The warrants include standard anti-dilution provisions pursuant to which the exercise price and number of shares issuable thereunder is adjusted proportionately in the event of a stock split, stock dividend, recapitalization or similar transaction. The shares that may be offered pursuant to this prospectus include the 125,000 shares issued to MBRT Trust and the 125,000 shares issuable upon the exercise of the warrants. In

Edgar Filing: ALTAIR INTERNATIONAL INC - Form 424B3

addition, the shares that may be offered pursuant to this prospectus include 100,000 shares acquired by MBRT Trust in a private placement completed on December 29, 1997 and previously registered on registration statement no. 333-45511.

Pursuant to a registration rights agreement dated as of August 4, 2000 and entered into in conjunction with the MBRT purchase agreement, we are obligated to file a registration statement registering the common shares, and shares issuable upon the exercise of warrants, acquired by the MBRT Trust on August 4, 2000.

Gibson Family Limited Partnership

Gibson Family Limited Partnership acquired 50,000 shares and 50,000 warrants in a private placement pursuant to the terms of a stock purchase agreement dated as of August 22, 2000. The 50,000 warrants include warrants to purchase 25,000 common shares at an exercise price of \$5 at any time prior to the earlier of (i) the fifth anniversary of the date the registration statement of which this prospectus is a part is first effective, and (ii) the date thirty days following the fifth day (whether or not consecutive) the closing price of the common shares equals or exceeds \$7.00 and warrants to purchase 25,000 common shares at an exercise price of \$4 at any time prior to the earlier of (i) the fifth anniversary of the date the registration statement of which this prospectus is a part is first effective, and (ii) the date thirty days following the fifth day (whether or not consecutive) the closing price of the common shares equals or exceeds \$6.00. The warrants include standard anti-dilution provisions pursuant to which the exercise price and number of shares issuable thereunder is adjusted proportionately in the event of a stock split, stock dividend, recapitalization or similar transaction. The shares that may be offered pursuant to this prospectus include the 50,000 common shares issued to the Gibson Family Limited Partnership and the common shares issuable upon the exercise of the warrants.

Pursuant to a registration rights agreement dated as of August 22, 2000 and entered into in conjunction with the Gibson Family purchase agreement, we are obligated to file a registration statement registering the common shares, and shares issuable upon the exercise of warrants, acquired by the Gibson Family Limited Partnership on August 22, 2000.

18

De Jong and Associates

De Jong & Associates, Inc. acquired 75,000 warrants in a private placement pursuant to the terms of a consulting agreement dated as of February 15, 2000 in consideration of consulting services provided to us by de Jong. The warrants have an exercise price of \$4.00 per share and are exercisable at any time on or before February 15, 2003. The warrants include standard anti-dilution provisions pursuant to which the exercise price and number of shares issuable thereunder is adjusted proportionately in the event of a stock split, stock dividend, recapitalization or similar transaction. The shares that may be offered pursuant to this prospectus include the shares issuable upon the exercise of such warrants. The common shares issuable upon exercise of the warrants were previously registered on registration statement no. 333-36462.

Toyota on Western, Inc.

Toyota on Western, Inc. acquired 83,333 warrants in a private placement

Edgar Filing: ALTAIR INTERNATIONAL INC - Form 424B3

pursuant to the terms of a stock purchase agreement dated as of March 3, 2000. Pursuant to the Toyota purchase agreement, among other things, we granted warrants to purchase 83,333 shares at the exercise price of \$8.00 per share on or before the earlier of (i) March 3, 2004 and (ii) the date thirty days following the fifth day (whether or not consecutive) the closing price of a common share on the Nasdaq National Market equals or exceeds \$10.00. Notwithstanding the foregoing, pursuant to a Repricing Amendment to Common Share Purchase Warrants dated as of October 18, 2001, the warrants were amended to reduce the exercise price to \$1 per share for a limited time period. All of the warrants were exercised during such time period.

The warrants include standard anti-dilution provisions pursuant to which the exercise price and number of shares issuable thereunder is adjusted proportionately in the event of a stock split, stock dividend, recapitalization or similar transaction. The warrants also contain a provision which provides that the holder may not exercise the warrant if such exercise would result in the holder, together with any affiliate thereof, beneficially owning in excess of 9.999% of our then issued and outstanding common shares.

The shares that may be offered pursuant to this prospectus include the common shares issuable upon the exercise of the warrants. The common shares issuable upon exercise of the warrants were previously registered on registration statement no. 333-36462.

Ladenburg Thalmann & Co., Inc.

On March 31, 2000, the Company granted Ladenburg Thalmann & Co., Inc. 75,078 Series N Warrants in return for serving as placement agent in connection with a private placement of common shares as of March 31, 2000. The warrants permit Ladenburg to purchase up to 75,078 shares at an exercise price of \$6.75 (or pursuant to a cashless exercise provision) at any time on or before the earlier of (i) March 31, 2003 and (ii) the date thirty days following the fifth day (whether or not consecutive) the closing price of a common share on the

19

Nasdaq National Market equals or exceeds \$9.00. The cashless exercise provision permits the holder, in lieu of paying the exercise price, to tender the warrant certificate and receive a number of common shares equal in market value (defined to be the previous 10 days average closing bid price) to the difference between the aggregate market value of the common shares issuable upon exercise of the warrant, and the aggregate cash exercise price of the common shares issuable upon exercise of the warrant.

The warrants include standard anti-dilution provisions pursuant to which the exercise price and number of shares issuable thereunder is adjusted proportionately in the event of a stock split, stock dividend, recapitalization or similar transaction. The shares that may be offered pursuant to this prospectus include the common shares issuable upon the exercise of the warrant. The common shares issuable upon exercise of the warrants were previously registered by the Company on registration statement no. 333-36462.

Anderson LLC

Anderson LLC acquired 250,261 warrants in a private placement pursuant to the terms of a common stock purchase agreement dated as of March 31, 2000. Pursuant to the Anderson purchase agreement, we granted Anderson warrants to purchase 250,261 shares at an exercise of \$6.75 per share (or pursuant to a

Edgar Filing: ALTAIR INTERNATIONAL INC - Form 424B3

cashless exercise provision) at any time on or before March 31, 2003. The cashless exercise provision permits the holder, in lieu of paying the exercise price, to tender the warrant certificate and receive a number of common shares equal in market value (defined to be the previous 10 days average closing bid price) to the difference between the aggregate market value of the common shares issuable upon exercise of the warrant, and the aggregate cash exercise price of the common shares issuable upon exercise of the warrant.

The warrants include standard anti-dilution provisions pursuant to which the exercise price and number of shares issuable thereunder is adjusted proportionately in the event of a stock split, stock dividend, recapitalization or similar transaction. The shares that may be offered pursuant to this prospectus include the common shares issuable upon the exercise of the warrants. The common shares issuable upon exercise of the warrants were previously registered on registration statement no. 333-36462.

PLAN OF DISTRIBUTION

The Shares. The shares offered by this prospectus may be sold from time to time by the selling shareholders, who consist of the persons named as "selling shareholders" above and those persons' pledgees, donees, transferees or other successors in interest. The selling shareholders may sell the offered shares on the Nasdaq National Market, or otherwise, at market prices or at negotiated prices. They may sell shares by one or a combination of the following:

- o a block trade in which a broker or dealer so engaged will attempt to sell the offered shares as agent, but may position and resell a portion of the block as principal to facilitate the transaction;
- o purchases by a broker or dealer as principal and resale by the broker or dealer for its account pursuant to this prospectus;

20

- o ordinary brokerage transactions and transactions in which a broker solicits purchasers;
- o an exchange distribution in accordance with the rules of such exchange;
- o privately negotiated transactions;
- o if such a sale qualifies, in accordance with Rule 144 promulgated under the Securities Act rather than pursuant to this prospectus; or
- o any other method permitted pursuant to applicable law.

The selling shareholders may also sell shares by means of short sales. Short sales involve the sale by a selling shareholder, usually with a future delivery date, of common shares that the seller does not own. Covered short sales are sales made in an amount not greater than the number of shares subject to the short seller's warrant, exchange right or other right to acquire common shares. A selling shareholder may close out any covered short position by either exercising its warrants or exchange rights to acquire common shares or purchasing shares in the open market. In determining the source of shares to close out the covered short position, a selling shareholder will likely consider, among other things, the price of common shares available for purchase in the open market as compared to the price at which it may purchase common shares pursuant to its warrants or exchange rights.

Naked short sales are any sales in excess of the number of shares subject to the short seller's warrant, exchange right or other right to acquire common shares. A selling shareholder must close out any naked position by

Edgar Filing: ALTAIR INTERNATIONAL INC - Form 424B3

purchasing shares. A naked short position is more likely to be created if a selling shareholder is concerned that there may be downward pressure on the price of the common shares in the open market.

The existence of a significant number of short sales generally causes the price of the common shares to decline, in part because it indicates that a number of market participants are taking a position that will be profitable only if the price of the common shares declines. Purchases to cover short sales may, however, increase the demand for the common shares and have the effect of raising or maintaining the price of the common shares.

In making sales, brokers or dealers engaged by the selling shareholders may arrange for other brokers or dealers to participate. Brokers or dealers will receive commissions or discounts from such selling shareholders in amounts to be negotiated prior to the sale. Such selling shareholders and any broker-dealers that participate in the distribution may be deemed to be "underwriters" within the meaning of Section 2(11) of the Securities Act of 1933, and any proceeds or commissions received by them, and any profits on the resale of shares sold by broker-dealers, may be deemed to be underwriting discounts and commissions. If a selling shareholder notifies us that a material arrangement has been entered into with a broker-dealer for the sale of shares through a block trade, special offering, exchange distribution or secondary distribution or a purchase by a broker or dealer, we will file a prospectus supplement, if required pursuant to the Securities Act of 1933, setting forth:

- o the name of each of the participating broker-dealers,
- o the number of shares involved,
- o the price at which the offered shares were sold,

21

- o the commissions paid or discounts or concessions allowed to the broker-dealers, where applicable;
- o a statement to the effect that the broker-dealers did not conduct any investigation to verify the information set out or incorporated by reference in this prospectus, and
- o any other facts material to the transaction.

General. We are paying the expenses incurred in connection with preparing and filing this prospectus and the registration statement to which it relates, other than selling commissions. In addition, in the event a selling shareholder effects a short sale of common shares, this prospectus may be delivered in connection with such short sale and the shares offered by this prospectus may be used to cover such short sale. To the extent, if any, that a selling shareholder may be considered an "underwriter" within the meaning of the Securities Act, the sale of the shares by it shall be covered by this prospectus.

We have not retained any underwriter, broker or dealer to facilitate the offer or sale of the offered shares offered hereby. We will pay no underwriting commissions or discounts in connection therewith, and we will not receive any proceeds from the sale of the offered shares.

In order to comply with the securities laws of certain states, if applicable, the offered securities will be sold in such jurisdictions only through registered or licensed brokers or dealers. In addition, in certain states the offered shares may not be sold unless they have been registered or qualified for sale in the applicable state or an exemption from the registration or qualification requirement is available.
