You will receive a positive return on your investment in the notes only if the underlying index appreciates from the initial index level to the final index level. If the final index level of the underlying index is less than the initial index level, you will lose 1% of the stated principal amount of the notes for every 1% by which the final index level is less than the initial index level, subject to a maximum loss of 5% of your investment.
- The notes do not pay interest.
- Your payment at maturity depends on the closing level of the underlying index on a single day.
- Investing in the notes is not equivalent to investing in the underlying index or the stocks that constitute the underlying index.
- The notes are subject to the credit risk of Citigroup Global Markets Holdings Inc. and Citigroup Inc. If Citigroup Global Markets Holdings Inc. defaults on its obligations under the notes and Citigroup Inc. defaults on its guarantee obligations, you may not receive anything owed to you under the notes.
- Sale of the notes prior to maturity may result in a loss of principal.
- The notes will not be listed on any securities exchange and you may not be able to sell them prior to maturity.
- The estimated value of the notes on the pricing date will be less than the issue price. For more information about the estimated value of the notes, see the accompanying preliminary pricing supplement.
- The value of the notes prior to maturity will fluctuate based on many unpredictable factors.
- The EURO STOXX 50® Index is subject to risks associated with non-U.S. markets.
- The performance of the EURO STOXX 50® Index will not be adjusted for changes in the exchange rate between the euro and the U.S. dollar.
