ITEM 1. Business

Overview

Moore Medical Corp. is a multi-channel, Internet-enabled marketer and distributor of medical/surgical products and pharmaceuticals. We provide these products to nearly 100,000 health care professionals in non-hospital settings nationwide, including: physicians, podiatrists, surgeons, obstetricians, gynecologists, pediatricians, emergency medical technicians, medical departments at industrial sites, municipalities, university and school health services, correctional facilities and other specialty practice communities. We market and serve our customers through the Internet, direct mail, industry specialized telephone support representatives, and key opportunity sales representatives. Moore Medical's direct marketing and distribution business has more than fifty years of operating experience.

Moore Medical's Mission & Key Initiatives

Moore Medical's mission is to provide health care professionals with the supplies, tools and resources they need to improve the wellness of their patients and to save lives. We seek to achieve this goal by maintaining a reliable customer support infrastructure, implementing vigorous supply chain initiatives, and remaining dedicated to continuous improvement throughout the organization. Following are three key initiatives that are fundamental to all of our business activities and that enable us to develop solutions that will meet our customers' needs in a cost-efficient, innovative manner:

1. Maintain a strong customer focus. The customer is the focal point of our supply chain strategies, and we strive to solve complex customer problems with innovative and easy-to-use solutions. For example, our Customer Advisory Council and ongoing surveys enable customers to share their views and suggestions on how to improve their customer experience.
2. Provide a multi-channel direct marketing experience. We adopted a strategy in 1999 and updated it in 2000 to transform our business from an off-line-only model relying on catalogs, telesales, and key opportunity and field representatives, to a multi-channel enabled model. Our strategy is three-fold: a) to increase our revenues and improve our operating results by attracting new customers and migrating existing customers to our web site; b) to continue offering quality catalogs and collateral, print and pictorial materials to customers who prefer to make product selections and order offline; and c) to build our customer base in specialized professional practice communities, including through the use of an affiliate network of online professional associations.
3. Strive for continuous improvement across the organization. In order to meet our quality improvement objectives, we contracted with Werner Consulting, LLC, Madison, Connecticut, a top-rated management consulting firm, to work with us to identify potential improvement opportunities and create an action plan for process improvement.

Health Care Products Distribution Industry/Competition

Industry: Current statistics from Hoover Online, an informational business -----

network, report the \$1 trillion health care industry is the largest segment of the U.S. economy, representing 14% of Gross Domestic Product (GDP). About \$35 billion is spent annually on medical/surgical supplies. There are three primary types of purchasers of medical supplies: hospitals, large Integrated Delivery Networks (IDNs) and Independent Physician Associations (IPAs). Moore distributes its products to IPAs, individual physicians' offices and clinics, and emerging medical providers.

Edgar Filing: MOORE MEDICAL CORP - Form 10-K

The total physician market for these products is approximately \$5 billion, per current HIDA (Health Industry Distributors Association) statistics. The physician supply market is quite fragmented: the four leading distributors control only 40% of the market. Most manufacturers will not sell directly to health care practitioners in non-hospital settings. Likewise, most health care practitioners/practices prefer to purchase from a few distributors rather than from hundreds of manufacturers. Customers find it efficient and convenient to rely on these distributors for product availability, competitive prices, prompt delivery and other services.

3

Over the last year and a half, Moore Medical has focused on applying Internet technology to our growth plans for distribution and fulfillment as well as marketing. While many businesses in and out of our industry chose to abandon their core infrastructure to concentrate solely on e-commerce, our assessment of the marketplace indicated that we should maintain a multi-channel focus. This logical evolution from "brick and mortar" to "brick and click" has enabled us to remain true to those customers not yet ready for e-commerce, or who simply prefer other means of communication such as by phone, fax or in person.

Competition: The trend of health care product distributor consolidations

continues in an effort to realize economies of scale. Our competitors are large national distributors, regional distributors and local distributors. Some primarily use direct mail and telemarketing, some rely on the Internet, and others make sales and deliveries to their customers with a dedicated sales force and a fleet of distributor-operated delivery vehicles.

Generally, we compete with other distributors on breadth of product line, brand recognition, delivery speed, price, order completion rates, and other value-added customer service factors. As more health care practices consolidate, we expect that a growing number of large customers will require their distributor to reliably service many delivery locations in different regions across the country. By providing a multi-channel distribution network, we expect that we will be able to meet the needs of our present and prospective customers.

Marketing & Distribution

Marketing: Moore Medical conducts business-to-business marketing of its medical,

surgical and pharmaceutical products to existing and prospective customers nationwide. The Company employs various marketing vehicles and channels to reach its target market, including: direct mail catalogs, flyers and letters; e-marketing initiatives (including e-mail campaigns and web site promotions); a toll-free customer support center which takes inbound calls for ordering and requesting catalogs and provides product information; and outbound specialty practice sales representatives. The Company considers direct marketing to be one of its core competencies.

An in-house creative department designs and produces marketing collateral, product packaging, web graphics, special offer coupons and trade show booth graphics. Marketing materials are mailed throughout the year, utilizing a schedule based on historic results and market segment buying patterns. In the third quarter of 2000, an Internet-focused catalog (designed to teach customers how to order through mooremedical.com) was produced and mailed to prospective customers. And in the fourth quarter of 2000, we created a new design template and color palette for our catalog and other marketing materials to provide a more professional and consistent look to support our corporate brand.

Edgar Filing: MOORE MEDICAL CORP - Form 10-K

Distribution: The Company distributes its products throughout the United States

and U.S. territories from its four distribution centers in Connecticut, Florida, Illinois and California. The distribution network has been designed with the objectives of delivering a completely satisfying purchasing experience to the customer, providing broader second-day delivery coverage, and minimizing inventory and transportation costs. We provide consistent, time-sensitive and high-quality order fulfillment services through sophisticated product allocation strategies, maintaining high standards of accuracy and fulfillment.

Customer orders enter the enterprise resource planning (ERP) system via our web site, our market-specific sales representatives, or our customer support center. Order fulfillment is completed the same business day when the order is received by 4:00 p.m. United Parcel Services (UPS) is our preferred carrier and we enjoy national account status. UPS delivers over 90% of our package volume, with over 99% of orders filled to completion the same business day. With our national coverage, nearly 90% of our customers receive delivery within two business days.

Moore Medical's customer community based e-business site went live on May 30, 2000. Our continuing commitment to e-commerce is fundamental to our strategy, and our goal is to rapidly grow the size and revenue of the Company through continued web enablement of customers and employees (e.g. through increased use of the Company's intranet), while maintaining our multi-channel commitment. E-commerce

4

is, in fact, steadily growing in acceptance among our customer base; in 2000, 4% (7% in fourth quarter) of Moore Medical's commerce was conducted over the Internet, and this percentage is projected to rise to 10% of 2001's revenue.

We are benchmarking our service and fulfillment performance against a system of Perfect Order Metrics, which is the percentage of orders shipped complete, on-time, from customer's assigned primary shipping warehouse and received by the customer error free. We have also implemented a process mapping method to identify every one of the individual steps involved in taking and fulfilling an order, with a goal toward streamlining and/or eliminating steps to make the process flow more efficiently.

Product Line/Suppliers

Moore Medical's product line consists of over 10,000 of the most popular medical/surgical supplies and pharmaceutical products, encompassing a broad and diversified selection. Over 7,500 stock keeping units (SKUs) are carried in stock. We are one of the few distributors of medical/surgical products to non-hospital health care practitioners who also offer pharmaceuticals. Although many of our products are consumables and disposables, we also sell medical/surgical equipment such as the new portable AED's (Automated External Defibrillators) and other diagnostic tools. In 2000, we also began distributing basic office supplies and stationery products.

We purchase our products primarily from manufacturers and to a lesser extent from other distributors and do not manufacture or assemble any products except for the assembly of medical and first aid kits. We maintain insurance coverage against potential losses due to product liability claims and we believe such coverage is adequate. In 2000, our largest product suppliers were 3M, Allied Healthcare Products, Inc., Aventis Pasteur, Banta Healthcare Products, Inc., Graham-Field Surgical Co., Johnson & Johnson Healthcare System, Laerdal Medical Corp., Microflex, SmithKline Beecham and Welch Allyn. We have several competing sources for many medical/surgical supplies and pharmaceuticals. Sales of products from our largest supplier in 2000 accounted for less than 5% of total

Edgar Filing: MOORE MEDICAL CORP - Form 10-K

sales. The pharmaceutical market continues to introduce alternative products affecting the product acquisition costs and obtainable margins.

Our purchasing team also has ready access to several hundred additional industry manufacturers and suppliers, enabling us to meet customers' special requirements. We do not have any significant long-term purchase commitments with our suppliers, nor do we have any exclusive product rights, although we have preferred supplier status in a number of vertical markets and online health care communities for particular product offerings.

Customers

Typically, our customers order an average of five to six times a year, though some specialties order more frequently and order size may vary significantly from one specialty to another. Our customers are always the focal point of our supply chain strategies, and we strive to provide value-added services to the health care specialties we serve. For example, approximately 8,000 of the 12,000 active podiatrists in the United States are our customers. In order to better serve this specialty practice community, in June 2000, we acquired 51% of the outstanding shares of capital stock of Podiatry Online, a Florida-based Internet magazine serving 4,200 podiatrists for over four years. In addition, to meet the needs of our emergency medical services customers, in July 2000, we acquired 100% of the assets of MERGInet Medical Resources, the premier Internet magazine and the largest Internet resource for emergency medical services (EMS) and emergency medical professionals. We chose these sites based on their ability to

5

provide content and services to the communities they serve and for their reputation of dedication to their professional communities.

Moore Medical has also formed a number of Internet alliances in order to extend our marketing resources, demonstrate our multi-channel direct marketing strategy, help new customers find us more easily and encourage existing customers to choose us more frequently. Types of Internet alliances include strategic partnerships, advertising sponsorships, preferred affiliates (collaborative joint marketing) and Internet affiliates. These alliances are designed to enable us to grow our revenue by linking sales from the affiliate's web site to mooremedical.com, encouraging direct sales through mooremedical.com, and establishing pre-conditioned sales through our customer support center.

In order to keep abreast of the needs of the customer communities we serve, we have established a Customer Advisory Council through which customers can share their views on Moore Medical's support, service, products, terms, pricing and delivery, and make suggestions on ways to improve their customer experience. The Council was also instrumental in assisting us in the development of our web site. We have recently expanded the Customer Advisory Council to include ongoing participation by the customer community. To this end, we distribute regularly scheduled questionnaires and surveys to gain feedback on potential web site redesign, meaningful promotions and other enhancements.

Sales Force

Our sales efforts are designed to establish and strengthen our customers' allegiance to us through frequent direct marketing contact, supported by our inbound customer support representatives and outbound specialty-specific representatives. In 2000, our sales force consisted of market-specific outbound sales representatives, key opportunity sales representatives, national account representatives and inbound customer support representatives. We intend to strengthen our national accounts program in 2001 in order to attract and retain

Edgar Filing: MOORE MEDICAL CORP - Form 10-K

large national customers. For example, we have recently hired a Vice President of Strategic Sales, with a strong track record in multi-million dollar contract wins, who plans to raise the bar for our performance.

With the launch of our online catalog and fully integrated web site, all sales staff have been trained on the functionality of the web site in order to encourage customers who prefer to move into online ordering. We also have a team of dedicated Net Agents who facilitate live, online chats with customers to assist with a variety of sales-focused issues.

By concentrating on our multi-channel capabilities, Moore Medical ensures that no matter how our customers prefer to conduct business with us, our sales personnel can meet their health care supply requirements.

Regulation

The health care delivery industry in the United States continues to be under intensive scrutiny as a result of a wide variety of political, economic and regulatory influences. Because of uncertainty regarding the ultimate features of any future reform initiatives, the Company cannot predict the impact such proposals, should they be adopted, will have on its business.

Moore Medical's business is subject to regulation under various local, state, and federal laws governing the sale, marketing, packaging and distribution of prescription drugs, including controlled substances, regulated chemicals and medical devices, as well as licensing requirements.

Each of our distribution centers is registered with the Drug Enforcement Agency and as a wholesale distributor of prescription drugs and devices in each state that requires registration and/or licensure. In addition, we are registered with the Food and Drug Administration as a Drug Establishment and as a Device Establishment.

We are mandated by the Prescription Drug Marketing Act of 1987 and the Controlled Substance Act to validate our customers for purchases of regulated products. We require documentary evidence of our customers' regulatory authority to purchase regulated products and we are in material compliance with

6

applicable federal and state statutes which protect against the diversion of those products. We maintain extremely tight standards and ensure that every transaction constitutes a legal sale prior to shipping.

In our capacity as a distributor of prescription pharmaceuticals, the Company is also subject to Medicare, Medicaid and state health care fraud, abuse and anti-kickback laws and regulations.

In order to remain current with the regulatory environment, Moore Medical employs an in-house pharmacist who serves as Manager of Regulatory Affairs as well as President of the Connecticut Pharmacists' Association. This individual is responsible for monitoring all pharmaceutical sales for compliance with state and federal regulations as well as with Company policy. He works closely with the U.S. Drug Enforcement Agency to help spot potential abuses, and serves as a source of information for our customers regarding regulations and recalls.

Information Systems

Moore Medical continues to invest in the technology, processes and infrastructure that will make it more competitive as a multi-channel direct marketer and distributor of medical supplies. Following a year of

Edgar Filing: MOORE MEDICAL CORP - Form 10-K

implementation experience with an ERP system, the Company is beginning to more fully realize the benefits of these investments, including the elimination of manual process jobs and the consolidation of some functions.

For 2000, the primary focus of the Company was to continue to invest in technologies and e-commerce initiatives. With that, the Company invested approximately \$1.5 million in capital expenditures related to the information systems group transitioning Moore Medical's web site from a transaction storefront site to a fully integrated e-business site. On May 30, 2000, this was accomplished utilizing a mechanism to electronically send order information, new customer information, and changes in customer information from the site to the JD Edwards ERP computer system. An "Advance Ship Notice" e-mail system has also been put in place, which e-mails shipping confirmation to customers once product has left the distribution center. In conjunction with the web site transition, Moore Medical's Information Systems department designed and implemented a web-enabled intranet site. The intranet is utilized to consolidate and facilitate communications across all areas of the business and to encourage all employees to become proficient in the use of technology.

Employees

We continue to hire individuals with the specific skills that complement our corporate growth strategy, and leverage current and future technological advances.

As of December 30, 2000, the Company had 305 full-time employees and 15 part-time employees in four locations, none of whom had collective bargaining agreements. Overall, the Company considers its employee relations to be good.

7

ITEM 2. Properties

The Company owns no real property and it leases all its operating facilities. Its distribution centers are located in New Britain, Connecticut (92,000 square feet), Jacksonville, Florida (60,000 square feet), Lemont, Illinois (58,000 square feet), and Visalia, California (51,000 square feet). The Company believes that its properties are generally in good condition.

The Company's main offices are located in an industrial park in New Britain, Connecticut, where it occupies three buildings (41,000 square feet) adjacent to its main distribution center in a campus-like setting. In these offices, the business functions of order processing, telesales, marketing, purchasing, information services, finance, and administration are performed. Office space is adequate for the Company's present needs.

ITEM 3. Legal Proceedings

As of the date of this document there are no material legal proceedings which are material to the financial position, results of operations or cashflow of the Company.

ITEM 4. Submission of Matters to a Vote of Security Holders

No matter was submitted to a vote of shareholders during the fiscal fourth quarter of 2000.

Executive Officers of the Registrant

The following table shows our current executive officers and their areas of responsibility:

Edgar Filing: MOORE MEDICAL CORP - Form 10-K

Name ----	Age ---	Position -----
Linda M. Autore	50	President and Chief Executive Officer
Chad A. Roffers	30	Senior Executive Vice President Sales, Marketing and business
James R. Simpson	50	Executive Vice President and Chief Financial Officer
Jerry Flasz	40	Executive Vice President and Chief Technology Officer

Kenneth S. Kollmeyer served as Executive Vice President of Operations until March 2, 2001.

PART II

ITEM 5. Market for Registrant's Common Equity and Related Stockholder Matters

The Company's common stock is listed on the American Stock Exchange (trading symbol "MMD"). The following sets forth, for each quarter since the beginning of 1999 the high and low sale prices of the common stock on the American Stock Exchange Composite Tape.

Quarters:	2000		1999
	High ----	Low ---	High ----
First.....	\$ 13.063	\$ 9.313	\$ 13.875
Second.....	11.625	6.000	12.625
Third.....	8.375	5.125	14.875
Fourth.....	7.625	3.875	10.688

The high and low sale prices of the common stock on March 2, 2001 were \$7.830 and \$7.500, respectively. The estimated number of holders (including estimated beneficial holders) of the Company's common stock as of March 2, 2001 was approximately 1,100.

The Company has paid no cash dividends and has no plans to do so in the foreseeable future. Its loan agreement contains restrictions on dividend payments.

9

ITEM 7. Management's Discussion and Analysis of Results of Operations and Financial Condition

Results of Operations

2000 Compared with 1999

Revenue for fiscal 2000 was \$123.6 million, compared to \$118.5 million in fiscal 1999, representing growth of 4%, which was primarily volume driven. The Company distributes their products through such communities as health care professionals in non-hospital settings, emergency medical technicians, medical departments at industrial sites, municipalities, educational and correctional facilities and other specialty practice communities as well as other resale distributors. The Company's growth reflected strength in key communities, including a 28.5% increase in the reseller community, as well as an 8.2% increase in our public community, and a 5.5% increase in our EMS community. Results for fiscal 2000 were significantly affected by a one-time charge of \$2.5 million, reflected in selling, general and administrative expenses or (\$.79) per share, related to a matter the Company settled with the U.S. Government in the fourth quarter. Earnings per share decreased to (\$1.49) from \$0.63 a year ago. 2000 earnings per share would have been (\$0.70) without giving effect to the one-time charge from

Edgar Filing: MOORE MEDICAL CORP - Form 10-K

\$0.63 a year ago.

Gross profit margins were almost 30% for the year, which was marginally lower than in the prior year. This was primarily due to the increased volume in the reseller community, which typically reflects lower margins.

Selling, general and administrative expenses increased to 34.8% of revenue as compared to 29.1% in the prior year. These expenses included incremental costs such as higher depreciation and amortization due to investments in technology, increased advertising and promotional costs associated with media initiatives, and outside consulting costs associated with the transformation to a "bricks and clicks" enterprise. The Company believes the existing cost structure is adequate to support future growth.

Interest income was \$0.2 million in 2000, an increase of over 100% from the prior year. The increase was due to the Company maintaining favorable cash investments for eleven months of the year.

The effective income tax provision rate of 24% was lower than the federal statutory tax rate due primarily to a net income tax benefit from the settlement of the government contract.

1999 Compared with 1998

Net sales for the year declined 2% to \$118.5 million from \$120.8 million in the prior year. Net income for the year decreased to \$1.9 million compared with \$2.8 million. Earnings per share decreased to \$.63 from \$.96 a year ago. The 1999 decrease in sales and net income is attributable to installation and implementation of the ERP system, which is designed to enable Moore Medical to utilize advanced technologies to provide greater responsiveness to our customers' needs. We lost no sales days as a result of the implementation. However, the transition did adversely impact our day-to-day sales operations, as customers experienced some delays in reaching customer support representatives. The transition, whose impact on revenues and income cannot be quantified, was completed in 1999. The 1999 results follow five year record earnings in 1998, which benefited from non-recurring inventory disposition sales in our discontinued wholesale drug distribution business which was disposed of in 1997.

The gross profit margin rate was above 31% for both years. However, the gross profit dollars decreased slightly due to lower volumes, as well as greater competitive pricing on certain pharmaceutical products.

Selling, general and administrative expenses increased 3% compared to 1998. During 1999, we made investments in our staff to broaden the breadth of its abilities, our technology and technological applications to more effectively and efficiently serve our customers, and in our marketing resource so that we could more effectively compete in our changing industry. The increase in selling, general and administrative expense was primarily due to increased freight as well as increases in depreciation, consulting and legal expenses associated with the Company's investment in technology.

10

We ended the year with no debt, while investing over \$5.3 million on technology capital. Further, at year-end 1999, we invested approximately \$0.7 million in cash and equivalents.

Our effective income tax provision rate of 23.6% was lower than the federal statutory tax rate due primarily to a net income tax benefit of \$0.3 million recorded from the favorable settlement of a prior year's tax matter.

Edgar Filing: MOORE MEDICAL CORP - Form 10-K

Liquidity and Capital Resources

At December 30, 2000, the Company's cash and cash equivalents totaled \$5.2 million, a \$4.5 million increase from January 1, 2000. The Company's operations provided \$1.4 million during the fiscal year 2000 compared to \$2.5 million and \$9.6 million in 1999 and 1998, respectively. In 2000, primary components of cash from operations were net income adjustments made from non-cash expenses such as depreciation and the changes in working capital. The source of working capital resulted from a reduction of inventory levels of \$4.7 million due to improved inventory turns, and an increase in accounts payable, partially offset by an \$0.8 million increase in trade receivables that is consistent with the Company's revenue growth. Additionally, a reclassification of \$2.0 million from current liabilities to long term notes payable related to the settlement of a legal matter in 2000. In 1999, operating activities generated cash sources of \$5.8 million of which \$3.9 million was from net non-cash elements in earnings, partially offset by a use of \$2.9 million in working capital. In 1998, the net cash from operating activities was primarily attributed to a \$5.8 million decrease in accounts receivable as a result of the withdrawal from the wholesale business.

Investing activities used \$3.5 million during the year 2000 compared to \$5.3 million and \$4.8 million in 1999 and 1998, respectively. The primary use of cash for investing was strategic acquisitions in key communities. The Company used \$1.25 million to acquire a controlling interest in Podiatry Online and \$0.4 million to acquire MERGINet Medical Resources. The Company also purchased \$1.6 million in equipment and software as a result of the company's ongoing investment in multi-channel marketing and e-commerce initiatives. The \$5.3 million in 1999 was used for capital expenditures, primarily in technology such as the remaining investment of the ERP system as well as e-commerce initiatives. In 1998, approximately \$4.5 million of the \$4.8 million in capital expenditure related to the initial implementation to the new ERP system.

Financing activities provided \$6.7 million during 2000, compared to zero in 1999 and \$1.4 million used in 1998. In 2000, \$5.2 million was primarily attributed to an increase in long term notes payable relating to a settlement of a legal matter and the minimum purchase cost for the remaining minority interest in Podiatry Online. The Company also received \$1.0 million in proceeds from the sale of treasury stock. The Company was able to satisfy its cash requirements in 1999 without using its line of credit, but used \$1.5 million from a line of credit in 1998.

As the business grows, the Company believes that the funding needs for our operating working capital and investments will continue to be met through cashflow from operations and financing under our line of credit. On January 26, 2001, the Company entered into a three-year bank financing agreement which will provide up to \$15 million in a revolving credit line. The credit line provides the Company with the latitude it needs to implement strategic initiatives as they arise. Our business continues not to be materially impacted by seasonal factors. The Company believes it has adequate capital resources at its disposal to fund currently anticipated capital expenditures, business growth and expansion, and current and projected debt service requirements.

Forward-Looking Information

From time to time, the Company or its representatives may have made or may make forward-looking statements, orally or in writing. Forward-looking statements may be included in, but, not limited to, press releases, oral statements made by or with the approval of an authorized executive officer, or in this report or other filings made by the Company with the Securities and Exchange Commission. The words or phrases "trend," "expects," "grow," "will," "could," "likely result," "transform," "planned," "continued," "anticipated," "estimated," "believes," "continuing," "considers," "may be," "assessed," "contingency,"

Edgar Filing: MOORE MEDICAL CORP - Form 10-K

"projected," "scheduled," "could have," "intended," or similar expressions are intended to identify "forward-

11

looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. The Company wishes to ensure that such statements are accompanied by meaningful cautionary statements, so as to maximize to the fullest extent possible the protections of the safe harbor established in the said Act. Accordingly, such statements are qualified in their entirety by reference to and are accompanied by the following important factors that could cause actual results to differ materially from such forward-looking statements:

- . we could be adversely affected if our strategy to transform ourselves to a multi-channel e-commerce enabled business does not generate adequate revenues and income;
- . we have had limited experience as an online marketer and there may be developments which affect us which we may not foresee;
- . period-to-period comparisons of our financial results are not necessarily meaningful;
- . our common stock has been volatile;
- . our web sites have had disruption, and if we do not continue with our present hosting service we may become subject to host-transfer costs and disruptions;
- . we are subject to online security breach risks;
- . we may not be able to keep up with rapidly changing technological and Internet developments;
- . we may have difficulties in attracting and retaining qualified personnel;
- . we are subject to online credit card fraud risks;
- . our internal systems are located in a single facility;
- . intellectual property claims against us can be costly;
- . we may become subject to additional governmental regulation of the Internet;
- . contracting-out functions have risks;
- . we may be subject to new sales tax collection obligations;
- . we have intense competition in health care products distribution, for example, from distributor consolidations, new online entrants or pricing pressures from larger distributors able to benefit from economies of scale or other operating efficiencies;
- . we have pressures on revenues resulting, for example, from customer consolidations or changes in customer buying patterns;
- . changes in the availability or saleability of products could affect us;
- . our operations are subject to governmental regulation, for example, reductions in healthcare funding affecting its customers' services or revenues;

Edgar Filing: MOORE MEDICAL CORP - Form 10-K

- . we may face disruptions in or cost increases for services or systems on which the Company is dependent, such as by truckers in deliveries from its suppliers, by UPS or other common carriers in deliveries to its customers, by its catalog printers or in telecommunications services, or relating to its computer systems; and
- . our change of control provisions may also discourage third party offers to acquire us.

12

ITEM 7A. Quantitative and Qualitative Disclosures About Market Risk

We have no material market risk exposure associated with activities in derivative financial statements, other financial instruments, or derivative commodity instruments. The Company does not expect changes in interest rates to have a material effect on income or cash flows in fiscal 2001, although there can be no assurances that interest rates will not significantly change.

ITEM 8. Financial Statements and Supplementary Data

The financial statements and supplementary data have been filed as part of this Annual Report as indicated in the index to Financial Statements and Financial Statement Schedule appearing on page 14.

Report of Independent Accountants

Edgar Filing: MOORE MEDICAL CORP - Form 10-K

To the Board of Directors and Shareholders of Moore Medical Corp.

In our opinion, the financial statements listed in the accompanying index present fairly, in all material respects, the financial position of Moore Medical Corp. and its subsidiary at December 30, 2000 and January 1, 2000, and the results of their operations and their cash flows for each of the three years in the period ended December 30, 2000, in conformity with accounting principles generally accepted in the United States. In addition, in our opinion, the financial statement schedule listed in the accompanying index presents fairly, in all material respects, the information set forth therein when read in conjunction with the related financial statements. These financial statements and financial statement schedule are the responsibility of the Company's management; our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States, which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for the opinion expressed above.

MOORE MEDICAL CORP.

Notes to Financial Statements

Note 1 - Summary of Significant Accounting Policies

General - Moore Medical Corp. is a multi-channel, Internet-enabled marketer and distributor of medical/surgical products and pharmaceuticals. We provide these products to nearly 100,000 health care professionals in non-hospital settings nationwide, including: physicians, podiatrists, surgeons, obstetricians, gynecologists, pediatricians, emergency medical technicians, medical departments at industrial sites, municipalities, university and school health services and correctional facilities and other specialty practice communities. We market and serve our customers through the Internet, direct mail, industry specialized telephone support representatives, and key opportunity sales representatives. Moore Medical's direct marketing and distribution business has more than fifty years of operating experience.

Fiscal Year - The Company's fiscal year ends on the Saturday closest to December 31. The fiscal years ended December 30, 2000, January 1, 2000 and January 2, 1999 were comprised of 52 weeks in 2000, 1999 and 1998.

Inventories - Inventories, consisting of products purchased for resale, are stated at the lower of average cost or market value. Market values are based on estimated sales prices of products.

Equipment and Leasehold Improvements - Equipment is recorded at cost. Depreciation and amortization is provided on the straight-line method over the

Edgar Filing: MOORE MEDICAL CORP - Form 10-K

estimated useful lives (3-7 years) of the assets. Leasehold improvements are depreciated over the useful life of the asset or the term of the lease, whichever is shorter. Additionally, in 1999, the Company adopted AICPA Statement of Position 98-1 "Accounting for the Costs of Computer Software Developed or Obtained for Internal Use," which requires capitalization of certain costs incurred in the development of internal-use software. Expenditures for maintenance and repairs are charged to expense as incurred. Major improvements to equipment are capitalized. The cost of assets sold or retired and the related amounts of accumulated depreciation are removed from the accounts in the year of disposal, and any resulting gain or loss is included in income.

Sales Recognition Policy and Customers - Sales are recorded upon shipment of products to customers. Accounts receivable have been reduced by estimated amounts for allowances related to future charges for uncollected accounts and product returns.

Advertising - The cost of direct response catalog advertising is deferred and amortized over the period of expected revenues. Direct response catalog advertising consists primarily of catalog production expenses and related postage costs. Catalogs are effective for varying time periods but the largest catalogs are generally effective for less than a year. At December 30, 2000 and January 1, 2000, \$639,000 and \$669,000, respectively, of direct response catalog advertising expenses were deferred. Catalog advertising expense totaled \$4,527,000, \$2,485,000 and \$2,881,000 in 2000, 1999 and 1998, respectively.

Income Taxes - The liability method is used to calculate deferred income taxes. Under this method, deferred income tax assets and liabilities are recognized on temporary differences between the financial statement and tax bases of assets and liabilities, using applicable tax rates, and on tax carryforwards.

Basic and Diluted Net Income (Loss) Per Share - Basic earnings per share computations are determined based on the weighted average number of shares outstanding during the period. The effect of the exercise and conversion of all diluted securities, including stock options are included in the diluted earnings per share calculation.

19

Estimates - The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Subsequent actual outcomes could differ from those estimated and assumed.

Reclassification - Certain prior year amounts have been reclassified to conform with the current year presentation.

Note 2 - Income Taxes

The income tax (benefit) provision consists of the following:

Amounts in thousands	2000	1999
Current		
Federal	\$ (94)	\$ (1,554)

Edgar Filing: MOORE MEDICAL CORP - Form 10-K

State	5	(44)
	-----	-----
Total current	(89)	(1,598)
	-----	-----
Deferred	(1,343)	2,170
	-----	-----
Total (benefit) provision	\$ (1,432)	\$ 572
	=====	=====

A reconciliation of the statutory federal income tax rate and the effective income tax rate as a percentage of pretax income is as follows:

	2000	1999
Statutory federal income tax rate	34.0%	34.0%
State income taxes, net of federal tax benefit	2.7	3.8
Valuation allowance	(1.5)	2.8
Other - net	(11.2)	(17.0)
	-----	-----
Effective income tax rate	24.0%	23.6%
	=====	=====

The effective income tax provision rate of 24.0% was lower than the federal statutory tax rate due primarily to a net income tax benefit of 12.5% from the settlement of the government contract. The effective income tax provision of 23.6% in 1999 included an income tax benefit of \$0.3 million or 12% recorded from a favorable settlement of a tax matter relating to 1998.

Deferred income tax assets and liabilities at the end of each year consist of the tax effects of temporary differences related to the following:

Amounts in thousands	2000	1999
Allowance for doubtful accounts	\$ 249	\$ 360
Inventories	734	463
Accrued expenses	1,368	1,216
Other	1,816	209
	-----	-----
Deferred Tax Assets	4,167	2,248
	-----	-----
Accumulated depreciation/amortization	(2,513)	(1,937)
Prepaid pension expense	(350)	(350)
	-----	-----
Deferred Tax Liabilities	(2,863)	(2,287)
	-----	-----
	\$ 1,304	\$ (39)
	=====	=====

Income tax payments totaled \$31,000, \$1,004,000 and \$1,091,000 in 2000, 1999 and 1998, respectively.

Edgar Filing: MOORE MEDICAL CORP - Form 10-K

20

Note 3 - Equipment and Leasehold Improvements

Equipment, leasehold improvements and accumulated depreciation are summarized as follows:

Amounts in thousands	2000	1999
Equipment	\$ 6,048	\$ 6,030
Computer equipment and software	15,558	13,995
Leasehold improvements	3,214	3,196
	-----	-----
	24,820	23,221
Less accumulated depreciation	(15,148)	(12,580)
	-----	-----
	\$ 9,672	\$ 10,641
	=====	=====

Note 4 - Revolving Credit Financing

On January 26, 2001, the Company entered into a secured bank financing agreement which provides up to \$15 million revolving line of credit through January 26, 2004. Interest on loans is charged at the prime rate or, at the option of the Company, at the LIBOR rate plus a margin ranging from 0% to 2.75% depending on the financial leverage of the Company. In addition, the Company pays a commitment fee on the unused line of credit. The Company previously had an unsecured bank financing agreement which provided up to \$10 million revolving line of credit which ended on March 31, 2000.

Amounts in thousands	2000	1999
Borrowings		
Average	\$ 10	\$ 545
Maximum	\$ 361	\$2,661
Weighted daily average interest rate		
For the year	1.6%	8.1%
At year end	0.0%	0.0%

Cash payments for interest on revolving credit financing totaled \$1,000, \$44,000, and \$55,000 in 2000, 1999 and 1998, respectively.

21

Note 5 - Employee Benefits

All employees meeting eligibility requirements participate in the Company's defined benefit pension plan under which pension benefits are based on the employee's highest consecutive five year average annual compensation. The Company's funding policy is to comply with the minimum funding requirements set

Edgar Filing: MOORE MEDICAL CORP - Form 10-K

by the Employee Retirement Income Security Act of 1974 (ERISA).

Pension disclosure requirements of Financial Accounting Standards No. 132:

Amounts in thousands	2000	1999
Change in Benefit Obligation		
Benefit obligation at beginning of year	\$ 3,722	\$ 3,670
Service cost	342	327
Interest cost	279	275
Actuarial gain	191	262
Benefits paid	(557)	(812)
Benefit obligation at end of year	<u>\$ 3,977</u>	<u>\$ 3,722</u>
Change in plan assets		
Fair value of plan assets at beginning of year	\$ 5,218	\$ 4,840
Actual return on plan assets	15	1,061
Employer contribution	149	129
Benefits paid	(557)	(812)
Fair value of plan assets at end of year	<u>\$ 4,825</u>	<u>\$ 5,218</u>
Funded Status	\$ 847	\$ 1,497
Unrecognized net actuarial gain (loss)	34	(613)
Unrecognized prior service cost	32	37
Unrecognized transition cost	-	12
Prepaid benefit cost	<u>\$ 913</u>	<u>\$ 933</u>
Weighted-Average Assumptions as of Period Ending		
Discount Rate	7.50%	7.50%
Expected return on plan assets	9.00%	9.00%
Rate of compensation increases	5.00%	5.00%
Components of Net Periodic Benefit Cost		
Service cost	\$ 342	\$ 327
Interest cost	279	275
Expected return on plan assets	(470)	(436)
Amortization prior service cost	5	5
Amortization transition cost	12	12
Recognized net actuarial loss	-	(65)
Net periodic benefit cost	<u>\$ 168</u>	<u>\$ 118</u>

Edgar Filing: MOORE MEDICAL CORP - Form 10-K

The present value of the projected benefit obligation was determined using a discount rate of 7.5% in 2000, 1999 and 1998. The present value of the projected benefit obligation is based on actuarial assumptions and on estimates, including an assumed discount rate which may change in the future and significantly affect the amount of this obligation.

The compensation rate increase assumption for all years was 5%. The assumed long-term rate of return on plan assets, which consist primarily of investments in various marketable securities, was 9% for all years presented.

In addition to the pension plan, the Company has a 401(k) defined contribution retirement plan available to employees meeting eligibility requirements. This plan provides for Company contributions of up to 3% of employees' compensation. In 1999 and 1998, the Company provided additional Company contributions to partially match employee contributions. The Company's expense in connection with this plan for the years 2000, 1999 and 1998 amounted to \$288,000, \$622,000 and \$469,000, respectively.

Note 6 - Shareholders' Equity

The Company's Board of Directors, with shareholders' approval, adopted an "Amendment of Certificate of Incorporation to increase authorized Common Stock". Shares of Common Stock were increased to 10 million shares and the authorization of Class A Preferred Stock and Class B Preferred Stock were deleted.

At December 30, 2000, the Company had Class C Preferred Stock, \$1.00 par value, 1,000,000 shares authorized of which 35,000 shares have been designated as a Series I Junior Participating Preferred Stock.

Net income (loss) does not include any comprehensive income; Changes in Shareholders' Equity for the three years ended December 30, 2000 are as follows:

	Common Stock \$.01 par value		Capital in Excess	Retained Earnings	Tr -- Shares
	Shares Issued	Par Value	of Par Value		

1998					

Beginning balance	3,246	\$ 32	\$ 21,644	\$ 3,788	(3
Net income				2,809	
Stock options/stock compensation		1	23		
	-----	-----	-----	-----	-----
Ending balance	3,246	33	21,667	6,597	(3
1999					

Net income				1,852	
Stock options/stock compensation			8		
	-----	-----	-----	-----	-----
Ending balance	3,246	33	21,675	8,449	(3

Edgar Filing: MOORE MEDICAL CORP - Form 10-K

2000

Net (loss)				(4,536)	
Stock options/stock compensation		(1)	25		
	-----	-----	-----	-----	-----
Ending Balance	3,246	\$ 32	\$ 21,700	\$ 3,913	(1)
	=====	=====	=====	=====	=====

23

The Shareholder Rights Plan which the Company adopted in March 1989 expired on March 16, 1999. In November 1998, the Company adopted a successor Shareholder Rights Plan and declared a dividend distribution, effective March 17, 1999, of one Preferred Stock Purchase Right (the "Rights") for each outstanding share of common stock. The Rights will become exercisable, with certain exceptions, only if a party or group acquires 15% or more of the Company's common stock or announces an offer to acquire 15% or more. When exercisable, with some exceptions, each Right will entitle its holder (other than the party or group acquiring 15% or more or offering to acquire 15% or more of the common stock) to buy one one-hundredth of a share of a Series I Junior Participating Preferred Stock at a purchase price of \$70.00. Upon the occurrence of certain events, Rightsholders (other than such party or group) will be entitled to purchase either preferred stock of the Company or shares of the acquiring company at half of their market value. The Company will generally be entitled to redeem the Rights at \$.01 per Right at any time prior to the earlier of the expiration of the Rights in March, 2009 or ten days following the acquisition of or offer for 15% of the Company's common stock.

Note 7 - Stock Options

In 2000, the Company's Board of Directors, with the shareholders' approval, adopted the "2000 Incentive Compensation Program" for directors, officers, employees, consultants, independent contractors and agents of the Company. Stock options awarded under the "program" shall be a "non-qualified stock option". The new program may not exceed 505,000 shares, a total increase of 350,000 shares over the number of shares available for the grant of new options under the present program, including 155,000 shares issued from prior plan which were available for grant. Effective from the date of said approval, no new options shall be granted under a "prior plan" (1992 incentive stock plan and 1998 non-qualified plans) of Moore Medical.

The 1992 Incentive Stock Option Plan authorized stock option grants for 200,000 shares. Under the plan, options were granted for ten years at prices not less than 100% of the fair market value of the common stock on the date of grant. The options were exercisable as determined by the Stock Option Committee of the Board of Directors at the time of grant and were typically exercisable in four or five cumulative annual installments beginning one year after the date of grant and expiring five to ten years from the date of grant.

The Company's Board of Directors adopted and approved the 1998 Stock Incentive Plan for directors, officers and key employees. The Plan permitted the granting of non-qualified stock options of the Company's stock exercisable in four cumulative annual installments commencing one year from the date of the grant and expiring five years from the grant date.

24

Edgar Filing: MOORE MEDICAL CORP - Form 10-K

Stock option transactions for all three plans summarized as follows:

	1992 Incentive Stock Option Plan		1998 Stock Incentive Plan	
	Number of Options	Weighted Average Exercise Price	Number of Options	Weighted Average Exercise Price
Outstanding at end of 1998	48,400	\$11.65	141,200	\$12.08
Granted	-	-	41,000	11.23
Canceled	(17,750)	11.76	(67,700)	12.49
Exercised	(2,750)	11.95	-	-
Outstanding at end of 1999	27,900	11.55	114,500	11.54
Granted	69,000	10.21	-	-
Canceled	(25,300)	10.80	(12,750)	11.35
Exercised	(2,500)	10.63	(1,250)	10.88
Outstanding at end of 2000	69,100 =====	\$10.53	100,500 =====	\$11.54
Exercisable 2000	20,100	\$11.56	40,750	\$11.59
Exercisable 1999	23,925	\$11.44	18,375	\$11.54

The Company applies APB Opinion No. 25, "Accounting for Stock Issued to Employees". If the Company had elected to recognize compensation cost based on the fair value of the options granted at grant date as prescribed by SFAS No. 123, net income and earnings per share, basic and diluted, would have been reduced to pro forma amounts of (\$4.6) million and (\$1.51) per share, \$1.8 million and \$.61 per share, and \$2.8 million and \$.94 per share for 2000, 1999, and 1998, respectively. The fair value of each option grant is estimated on the date of the grant using the Black-Scholes option pricing model with the following assumptions used for grants during the year ended December 30, 2000: dividend yield of 0%; risk-free rates ranging from 4.7% to 5.4%, expected volatility factors ranging from 34% to 38%; and an expected option term of a five year period.

Note 8 - Commitments and Contingencies

The Company leases its various facilities such as its distribution centers, office facilities and certain equipment. Certain lease commitments provide that the Company pay taxes, insurance, and maintenance expenses relating to the leased assets. Rental expense approximated \$1,240,000, \$1,218,000, and \$1,416,000 in 2000, 1999, and 1998, respectively. As of December 30, 2000, future minimum payments, for all leases are as follows: 2001, \$1,141,000; 2002, \$725,000; 2003, \$322,000; 2004, \$241,000; thereafter, \$361,000.

On February 1, 2001, the Company signed an agreement with the U.S. Government settling a pricing error by its former wholesale division under federal supply contracts entered into in 1991. In 1997, the Company voluntarily disclosed the error to the Government and established a \$3.8 million reserve for 1996. In

Edgar Filing: MOORE MEDICAL CORP - Form 10-K

settlement, the Company agreed to pay the government a total of \$5.2 million, including \$0.5 million on signing, and \$4.7 million over five years. The settlement is an interest bearing note ranging

25

from 5.25% to 7.25%. In the fourth quarter of 2000, it recorded an additional \$2.5 million reserve for the liability and associated legal costs.

As of December 30, 2000, \$4.5 million of the government settlement was recorded in Long term notes payable along with \$0.7 million of the rights to acquire the remaining 49% in Podiatry Online. The remaining portion of the government settlement is in other accrued expenses.

Note 9 - Selected Quarterly Information (Unaudited)

Amounts in thousand, Except per share data	Net Sales	Gross Profit	Net Income (Loss)

1998
