Cohu, Inc.
Notes to Unaudited Condensed Consolidated Financial Statements
September 26, 2009

1. Summary of Significant Accounting Policies

Our interim results are not necessarily indicative of the results that should be expected for the full year. For a better understanding of Cohu, Inc. and our financial statements, we recommend reading these interim condensed consolidated financial statements in conjunction with our audited financial statements for the year ended December 27, 2008, which are included in our 2008 Annual Report on Form 10-K, filed with the U. S. Securities and Exchange Commission (SEC). In the following notes to our interim condensed consolidated financial statements, Cohu, Inc. is referred to as Cohu , we , our and us .

Certain prior year balances related to our discontinued metal detection equipment segment have been reclassified for consistency with the current year presentation. These reclassifications had no effect on reported results of operations.

Risks and Uncertainties

We are subject to a number of risks and uncertainties that may significantly impact our future operating results. These risks and uncertainties are discussed under Item 1A. Risk Factors included in this Form 10-Q. As our interim description of risks and uncertainties only includes any material changes to our annual description, we also recommend reading the description of the risk factors associated with our business previously disclosed in Item 1A. of our 2008 Annual Report on Form 10-K. Understanding these risks and uncertainties is integral to the review of our interim condensed consolidated financial statements.

Goodwill, Other Intangible Assets and Long-lived Assets

Goodwill and other intangible assets with indefinite useful lives are not amortized, but are reviewed annually for impairment. Our annual testing date is October 1 and we did not recognize any goodwill impairment as a result of performing this annual test in 2008. Other events and changes in circumstances may also require goodwill to be tested for impairment between annual measurement dates. While a decline in stock price and market capitalization is not specifically cited as a goodwill impairment indicator, a company s stock price and market capitalization should be considered in determining whether it is more likely than not that the fair value of a reporting unit is less than its book value. The financial and credit market volatility directly impacts our fair value measurement through our stock price that we use to determine our market capitalization. During times of volatility, significant judgment must be applied to determine whether stock price changes are a short-term swing or a longer-term trend. As of September 26, 2009, we do not believe there have been any events or circumstances that would require us to perform an interim goodwill impairment review, however, a sustained decline in Cohu s market capitalization below book value could lead us to determine, in a future period, that an interim goodwill impairment review is required and may result in an impairment charge which could have a significant negative impact on our results of operations.

Separable long-lived assets that have finite lives are amortized over their useful lives and are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets might not be recoverable. Conditions that would necessitate an impairment assessment include a significant decline in the observable market value of an asset, a significant change in the extent or manner in which an asset is used, or any other significant adverse change that would indicate that the carrying amount of an asset or group of assets may not be recoverable.

Table of Contents

Cohu, Inc.
Notes to Unaudited Condensed Consolidated Financial Statements
September 26, 2009

Share-Based Compensation

Share-based compensation expense related to stock options is recorded based on the fair value of the award on its grant date which we estimate using the Black-Scholes valuation model. Share-based compensation expense related to restricted stock unit awards is calculated based on the market price of our common stock on the grant date, reduced by the present value of dividends expected to be paid on our common stock prior to vesting of the restricted stock unit.

Reported share-based compensation is classified, in the condensed consolidated interim financial statements, as follows (*in thousands*):

	Three Months Ended		Nine Months Ended	
	September 26, 2009	September 27, 2008	September 26, 2009	September 27, 2008
Cost of sales	\$ 94	\$ 88	\$ 241	\$ 266
Research and development	351	331	825	951
Selling, general and administrative	479	675	1,408	1,971
Total share-based compensation	924	1,094	2,474	3,188
Income tax benefit		(286)		(828)
Total share-based compensation, net of tax	\$ 924	\$ 808	\$ 2,474	\$ 2,360

Earnings (Loss) Per Share

Basic earnings (loss) per common share is computed by dividing net income (loss) by the weighted-average number of common shares outstanding during the reporting period. Diluted earnings (loss) per share includes the dilutive effect of common shares potentially issuable upon the exercise of stock options, vesting of outstanding restricted stock units and issuance of stock under our employee stock purchase plan using the treasury stock method. In loss periods, potentially dilutive securities are excluded from the per share computations due to their anti-dilutive effect. For purposes of computing diluted income per share, stock options with exercise prices that exceed the average fair market value of our common stock for the period are excluded. For the three and nine months ended September 27, 2008, options to purchase approximately 1,276,000 and 1,339,000 shares of common stock, respectively, were excluded from the computation. The following table reconciles the denominators used in computing basic and diluted income per share (*in thousands*):

	Three Months Ended		Nine Months Ended	
	September 26, 2009	September 27, 2008	September 26, 2009	September 27, 2008
Weighted average common shares	23,429	23,233	23,384	23,142
Effect of dilutive stock options		244		238
	23,429	23,477	23,384	23,380

Revenue Recognition

Our revenue recognition policy is disclosed in Note 1 of the Notes to Consolidated Financial Statements included in our Annual Report on Form 10-K for the year ended December 27, 2008. As more fully described in that policy, revenue from products that have not previously satisfied customer acceptance requirements is recognized upon customer acceptance. The gross profit on sales that are not recognized is generally recorded as deferred profit and reflected as a current liability in our consolidated balance sheet.

At September 26, 2009, we had deferred revenue totaling approximately \$12.9 million and deferred profit of \$5.1 million. At December 27, 2008, we had deferred revenue totaling approximately \$6.7 million and deferred profit of \$4.4 million.

Retiree Medical Benefits

We provide post-retirement health benefits to certain executives and directors under a noncontributory plan. The net periodic benefit cost incurred during the first nine months of fiscal 2009 and 2008 was not significant.

Table of Contents

Cohu, Inc.
Notes to Unaudited Condensed Consolidated Financial Statements
September 26, 2009

Recently Adopted Accounting Pronouncements

In June 2009, the Financial Accounting Standards Board (FASB) issued new accounting guidance entitled, *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles – a replacement of FASB Statement No. 162* , which identifies the sources of accounting principles and the framework for selecting the principles used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles (GAAP). This new guidance is effective for financial statements issued for interim and annual periods ending after September 15, 2009. The adoption of this guidance has changed how we reference various elements of GAAP when preparing our financial statement disclosures, but did not have an impact on our financial position, results of operations or cash flows.

In May 2009, the FASB issued new accounting guidance on subsequent events. The objective of this guidance is to establish general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. This new accounting guidance was effective for interim and annual periods ending after June 15, 2009. The impact of adopting this new guidance had no effect on the accompanying condensed consolidated financial statements. See *Basis of Presentation* above for the related disclosures.

In December 2007, the FASB issued new accounting guidance on business combinations which establishes principles and requirements for the reporting entity in a business combination, including recognition and measurement in the financial statements of the identifiable assets acquired, the liabilities assumed, and any non-controlling interest in the acquiree. This guidance also establishes disclosure requirements to enable financial statement users to evaluate the nature and financial effects of the business combination. These changes are effective on a prospective basis for all business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008, and interim periods within those fiscal years. This guidance was effective for our fiscal year beginning in 2009 and we expect that it will have an impact on our consolidated financial statements, but the nature and magnitude of the specific effects will depend upon the nature, terms and size of the acquisitions we consummate subsequent to our adoption of the new guidance.

In February 2008, the FASB issued new accounting guidance on fair value measurements and disclosures for nonfinancial assets and nonfinancial liabilities disclosed at fair value in the financial statements on a recurring basis. We applied the provisions of this new guidance to our financial statement disclosures beginning in the first quarter of 2009. See Note 9, *Cash and Cash Equivalents and Short-Term Investments*, for additional information.

Recently Issued Accounting Standards

In June 2009, the FASB issued new accounting guidance on consolidation of variable interest entities, which include: (1) the elimination of the exemption for qualifying special purpose entities, (2) a new approach for determining who should consolidate a variable-interest entity, and (3) changes to when it is necessary to reassess who should consolidate a variable-interest entity. This new guidance is effective as of the beginning of interim and annual reporting periods that begin after November 15, 2009, which for us would be December 27, 2009, the first day of our 2010 fiscal year and adoption of this new guidance is not expected to have a material impact on our consolidated financial position or results of operations.

2. Strategic Technology Transactions, Goodwill and Other Intangible Assets**Rasco**

On December 9, 2008, our wholly owned semiconductor equipment subsidiary, Delta Design, Inc., and certain subsidiaries of Delta acquired all of the outstanding share capital of Rasco GmbH, Rosenheim Automation Systems Corporation, and certain assets of Rasco Automation Asia (collectively *Rasco*). The results of Rasco's operations have been included in our consolidated financial statements since that date. Rasco, headquartered near

Munich, Germany, designs, manufactures and sells gravity-feed and strip semiconductor test handlers used in final test operations by semiconductor manufacturers and test subcontractors.

Table of Contents

Cohu, Inc.
Notes to Unaudited Condensed Consolidated Financial Statements
September 26, 2009

The purchase price of this acquisition was approximately \$81.6 million, and was funded primarily by cash reserves (\$80.0 million), other acquisition costs (\$1.6 million) and certain liabilities assumed (\$18.6 million, which includes approximately \$8.2 million of deferred tax liabilities and \$3.7 million of contractual obligations to purchase inventory). The acquisition was considered a business and the total cost of the acquisition was allocated to the assets acquired and liabilities assumed based on their estimated respective fair values. The Rasco acquisition resulted in the recognition of goodwill of approximately \$41.3 million. The acquisition was nontaxable and certain of the assets acquired, including goodwill and intangibles, will generally not be deductible for tax purposes. The goodwill has been assigned to our semiconductor equipment segment.

During the first quarter of fiscal 2009 we finalized the purchase price allocation with no adjustments to previously disclosed amounts. The allocation of purchase price to the acquired assets and assumed liabilities was as follows (*in thousands*):

Current assets	\$ 14,173
Fixed assets	8,375
Other assets	636
Intangible assets	33,360
In-process research and development (IPR&D)	2,400
Goodwill	41,336
Total assets acquired	100,280
Liabilities assumed	(18,643)
Net assets acquired	\$ 81,637

Amounts allocated to intangible assets are being amortized on a straight-line basis over their useful lives of eight years. Fluctuations in the exchange rate of the Euro, the functional currency of Rasco, impact the U.S. dollar value of the goodwill and intangible assets in our consolidated financial statements and, as a result, the future gross carrying value and amortization of the acquired intangible assets will differ from the amounts presented. Intangible assets, subject to amortization are as follows:

<i>(in thousands)</i>	September 26, 2009		December 27, 2008	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Unigen technology	\$ 7,020	\$ 5,003	\$ 7,020	\$ 3,935
AVS technology	2,411	1,492	2,309	996
Rasco Technology	35,949	3,651	34,433	269
	\$ 45,380	\$ 10,146	\$ 43,762	\$ 5,200

Amortization expense related to intangible assets was approximately \$1.6 million in the third quarter of fiscal 2009 and \$4.6 million in the first nine months of fiscal 2009. Amortization expense related to intangible assets was approximately \$0.5 million in the third quarter of fiscal 2008 and \$1.8 million in the first nine months of fiscal 2008. The amounts included in the table above for the periods ended September 26, 2009 and December 27, 2008 exclude approximately \$2.5 million and \$2.4 million, respectively, related to the Rasco trade

name which has an indefinite life and is not being amortized. Changes in the carrying values of AVS and Rasco intangible assets are a result of the impact of fluctuations in currency exchange rates.

3. Employee Stock Benefit Plans

Employee Stock Purchase Plan

The Cohu, Inc. 1997 Employee Stock Purchase Plan (the Plan) provides for the issuance of a maximum of 1,400,000 shares of our common stock. Under the Plan, eligible employees may purchase shares of common stock through payroll deductions. The price paid for the common stock is equal to 85% of the fair market value of our common stock on specified dates. At September 26, 2009, there were 444,730 shares available for issuance under the Plan.

Table of Contents

Cohu, Inc.
Notes to Unaudited Condensed Consolidated Financial Statements
September 26, 2009

Stock Options

Under our equity incentive plans, stock options may be granted to employees, consultants and directors to purchase a fixed number of shares of our common stock at prices not less than 100% of the fair market value at the date of grant. Options generally vest and become exercisable after one year or in four annual increments beginning one year after the grant date and expire five to ten years from the grant date. At September 26, 2009, 1,841,657 shares were available for future equity grants under the 2005 Equity Plan. We have historically issued new shares of our common stock upon share option exercise.

At September 26, 2009 we had 3,213,126 stock options outstanding. These options had a weighted-average exercise price of \$12.88 per share, an aggregate intrinsic value of approximately \$8.1 million and the weighted average remaining contractual term was approximately 6.6 years.

At September 26, 2009 we had 1,714,317 stock options outstanding that were exercisable. These options had a weighted-average exercise price of \$16.41 per share, an aggregate intrinsic value of \$0.2 million and the weighted average remaining contractual term was approximately 4.3 years.

Restricted Stock Units

We issue restricted stock units to certain employees and directors. Restricted stock units vest over either a one-year or a four-year period from the date of grant. Prior to vesting, restricted stock units do not have dividend equivalent rights, do not have voting rights and the shares underlying the restricted stock units are not considered issued and outstanding. Shares of our common stock will be issued on the date the restricted stock units vest. At September 26, 2009 we had 195,527 restricted stock units outstanding with an aggregate intrinsic value of approximately \$2.7 million and the weighted average remaining vesting period was approximately 1.8 years.

4. Comprehensive Income (Loss)

Comprehensive income (loss) represents all non-owner changes in stockholders' equity and consists of, on an after-tax basis where applicable, the following (*in thousands*):

	Three Months Ended		Nine Months Ended	
	September 26, 2009	September 27, 2008	September 26, 2009	September 27, 2008
Net income (loss)	\$ (71)	\$ 37	\$ (28,938)	\$ 2,163
Foreign currency translation adjustment	3,765	(713)	3,050	(31)
Change in unrealized gain/loss on investments	8	(959)	417	(938)
Comprehensive income (loss)	\$ 3,702	\$ (1,635)	\$ (25,471)	\$ 1,194

Our accumulated other comprehensive income balance totaled approximately \$10.6 million and \$7.1 million at September 26, 2009 and December 27, 2008, respectively, and was attributed to, net of income taxes where applicable, unrealized losses and gains on investments and foreign currency adjustments resulting from the translation of certain accounts into U.S. dollars where the functional currency is the Euro.

5. Income Taxes

Companies are required to assess whether a valuation allowance should be recorded against their deferred tax assets (DTAs) based on the consideration of all available evidence, using a more likely than not realization standard. The four sources of taxable income that must be considered in determining whether DTAs will be realized are, (1) future reversals of existing taxable temporary differences (i.e. offset of gross deferred tax assets against gross deferred tax liabilities); (2) taxable income in prior carryback years, if carryback is permitted under

the tax law; (3) tax planning strategies and (4) future taxable income exclusive of reversing temporary differences and carryforwards.

In assessing whether a valuation allowance is required, significant weight is to be given to evidence that can be objectively verified. We have evaluated our DTAs each reporting period, including an assessment of our cumulative income or loss over the prior three-year period and future periods, to determine if a valuation allowance was required. A significant negative factor in our assessment at June 27, 2009 was the possibility that Cohu may be in a three-year historical cumulative loss as of the end of the fourth quarter of fiscal 2009, as highly profitable quarters in the second half of 2006 are removed from the rolling three-year calculation. This, combined with uncertain near-term market and economic conditions, reduced our ability to rely on projections of future taxable income in assessing the realization of our DTAs.

Table of Contents

Cohu, Inc.
Notes to Unaudited Condensed Consolidated Financial Statements
September 26, 2009

After a review of the four sources of taxable income described above and after considering the possibility of being in a three-year cumulative loss in the fourth quarter of 2009, we recorded an increase in our valuation allowance, with a corresponding charge to our income tax provision, of approximately \$19.6 million in the second quarter of fiscal 2009. Our DTA valuation allowance at September 26, 2009 was approximately \$24 million on gross deferred tax assets of approximately \$29 million. The remaining \$5 million of gross deferred tax assets for which a valuation allowance was not recorded are realizable through future reversals of existing taxable temporary differences or taxable income in carryback years. As the realization of DTAs is determined by tax jurisdiction, the significant deferred tax liability recorded as part of the 2008 acquisition of Rasco GmbH, a German corporation, was not a source of taxable income in assessing the realization of our DTAs in the U.S.

The income tax provision (benefit) included in the condensed consolidated statements of operations for the three and nine months ended September 26, 2009 and September 27, 2008 is based on the estimated annual effective tax rate for the entire year. These estimated effective tax rates are subject to adjustment in subsequent quarterly periods as our estimates of pretax income or loss for the year are increased or decreased. The effective tax rates differ from the U.S. federal statutory rate primarily due to changes in the valuation allowance and unrecognized tax benefits, state taxes, research and development tax credits, foreign income taxed at lower rates, interest on unrecognized tax benefits and provisions of authoritative guidance related to share-based compensation which do not allow deferred tax benefits to be initially recognized on compensation expense related to incentive stock options and employee stock purchase plans.

There was no material change to our unrecognized tax benefits and interest accrued related to unrecognized tax benefits during the period ended September 26, 2009 except for a decrease of approximately \$0.5 million related to the closure of our 2005 U.S. federal income tax return examination in September, 2009. The Internal Revenue Service is currently conducting a routine review of our 2008 U.S. federal income tax return. We do not expect that the total amount of unrecognized tax benefits will significantly change over the next 12 months.

6. Industry Segments

Our reportable segments are business units that offer different products and are managed separately because each business requires different technology and marketing strategies. Our three segments are: semiconductor equipment, microwave communications and video cameras. As discussed in Note 2, in December 2008, we purchased Rasco, which has been included in our semiconductor equipment segment since that date.

We allocate resources and evaluate the performance of segments based on profit or loss from operations, excluding interest, corporate expenses and unusual gains or losses. Intersegment sales were not significant for any period.

Financial information by industry segment is as follows (*in thousands*):

	Three Months Ended		Nine Months Ended	
	September 26, 2009	September 27, 2008	September 26, 2009	September 27, 2008

Notes to Unaudited Condensed Consolidated Financial Statements
September 26, 2009

	September 26, 2009	December 27, 2008
<i>Total assets by segment:</i>		
Semiconductor equipment	\$ 209,233	\$ 206,199
Microwave communications	21,154	22,793
Video cameras	9,859	10,458
Total assets for reportable segments	240,246	239,450
Corporate, principally cash and investments and deferred taxes	83,392	104,719
Total consolidated assets	\$ 323,638	\$ 344,169

A small number of customers historically have been responsible for a significant portion of our consolidated net sales. Two customers of the semiconductor equipment segment accounted for 24% and 35% of our consolidated net sales for the third quarter and first nine months of fiscal 2009, respectively. Three customers of the semiconductor equipment segment accounted for 48% and 50% of our consolidated net sales for the third quarter and first nine months of fiscal 2008, respectively.

7. Contingencies

We previously disclosed that in May, 2007 our Broadcast Microwave Services subsidiary (BMS) received a subpoena from a grand jury seated in the Southern District of California, requesting the production of certain documents related to BMS' export of microwave communications equipment. BMS completed production of documents responsive to the request in September 2007 and has fully cooperated. We also disclosed that on April 30, 2009, BMS received a letter from the U. S. Department of State requesting that BMS provide certain information related to their review of this matter. Based upon their review of the information provided, the U.S. Department of State informed us during the third quarter of fiscal 2009 that they believe BMS did not obtain the required licenses for the export of certain products and services. The U. S. Department of State has requested that BMS apply for commodity jurisdiction rulings to determine if certain other products are subject to export controls, obtain export licenses as required and engage an independent third party to conduct an export compliance audit. We are working with the U.S. Department of State to resolve these issues, however, as of the date of this report, it is premature to assess whether the ultimate resolution of this matter will have a material adverse effect on our business, financial position or results of operations.

In addition to the above matter, from time-to-time we are involved in various legal proceedings, examinations by various tax authorities and claims that have arisen in the ordinary course of our businesses. Although the outcome of such legal proceedings, claims and examinations cannot be predicted with certainty, we do not believe any such matters exist at this time that will have a material adverse effect on our financial position or results of operations.

8. Guarantees

Our products are generally sold with warranty periods that range from 12 to 36 months following sale or installation. Parts and labor are covered under the terms of the warranty agreement. The warranty provision is based on historical and projected experience by product and configuration.

Changes in accrued warranty were as follows (*in thousands*):

Three Months Ended

Nine Months Ended

Edgar Filing: COHU INC - Form 10-Q

	September 26, 2009	September 27, 2008	September 26, 2009	September 27, 2008
Balance at beginning of period	\$ 3,777	\$ 5,503	\$ 4,924	\$ 6,760
Warranty expense accruals	846	2,116	2,562	6,461
Warranty payments	(925)	(2,501)	(3,788)	(8,103)
Balance at end of period	\$ 3,698	\$ 5,118	\$ 3,698	\$ 5,118

From time-to-time, during the ordinary course of business, we provide standby letters of credit for certain contingent liabilities under contractual arrangements, including customer contracts. As of September 26, 2009, the maximum potential amount of future payments that Cohu could be required to make under these standby letters of credit was approximately \$0.3 million. We have not recorded any liability in connection with these guarantee arrangements beyond that required to appropriately account for the underlying transaction being guaranteed. We do not believe, based on historical experience and information currently available, that it is probable that any amounts will be required to be paid under these arrangements.

Table of Contents

Cohu, Inc.
Notes to Unaudited Condensed Consolidated Financial Statements
September 26, 2009

9. Cash and Cash Equivalents and Short-Term Investments

As of September 26, 2009 and December 27, 2008 our cash, cash equivalents, and short-term investments primarily consisted of cash, government and government sponsored securities, money market funds, and other investment grade securities. Such amounts are recorded at fair value. The following table summarizes, by major security type, our cash, cash equivalents, and marketable securities (*in thousands*):

	September 26, 2009			Estimated Fair Value
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses ⁽¹⁾	
Cash	\$ 11,165	\$	\$	\$ 11,165
Money market funds	25,859			25,859
Bank certificates of deposit	2,500	1		2,501
Corporate debt securities ⁽²⁾	24,243	174	(2)	24,415
U.S. Treasury securities	3,499	12		3,511
Municipal securities	9,679	18		9,697
Government-sponsored enterprise securities	5,766	21		5,787
Asset-backed securities	4,431	55	(148)	4,338
	\$ 87,142	\$ 281	\$ (150)	\$ 87,273

(1) As of September 26, 2009, the cost and fair value of investments with loss positions was \$3.5 million and \$3.4 million, respectively. We evaluated the nature of these investments, credit worthiness of the issuer and the duration of these impairments to determine if an other-than-temporary decline in fair value had occurred and concluded that these losses were temporary.

(2) Corporate debt securities include

investments in financial, insurance, and corporate institutions. No single issuer represents a significant portion of the total corporate debt securities portfolio.

The authoritative guidance for fair value measurements establishes a valuation hierarchy for disclosure of the inputs to valuation used to measure fair value. This hierarchy prioritizes the inputs into three broad levels as follows. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are quoted prices for similar assets and liabilities in active markets or inputs that are observable for the asset or liability, either directly or indirectly through market corroboration, for substantially the full term of the financial instrument. Level 3 inputs are unobservable inputs based on our own assumptions used to measure assets and liabilities at fair value. A financial asset or liability's classification within the hierarchy is determined based on the lowest level input that is significant to the fair value measurement.

Table of Contents

Cohu, Inc.
Notes to Unaudited Condensed Consolidated Financial Statements
September 26, 2009

The following table provides the assets carried at fair value measured on a recurring basis (*in thousands*):

	Fair value measurements at September 26, 2009 using:			
	Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Total estimated fair value at September 26, 2009
Cash	\$ 11,165	\$	\$	\$ 11,165
Money market funds	25,859			25,859
Bank certificates of deposit		2,501		2,501
Corporate debt securities		24,415		24,415
U.S. Treasury securities	3,511			3,511
Municipal securities		9,697		9,697
Government-sponsored enterprise securities		5,787		5,787
Asset-backed securities		4,338		4,338
	\$ 40,535	\$ 46,738	\$	\$ 87,273

	Fair value measurements at December 27, 2008 using:			
	Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Total estimated fair value at December 27, 2008
Cash	\$ 8,893	\$	\$	\$ 8,893
Money market funds	21,301			21,301
Bank certificates of deposit		3,011		3,011
Corporate debt securities		38,121		38,121
Asset-backed securities		17,059		17,059
	\$ 30,194	\$ 58,191	\$	\$ 88,385

When available, we use quoted market prices to determine the fair value of our investments, and they are included in Level 1. When quoted market prices are unobservable, we use quotes from independent pricing vendors based on recent trading activity and other relevant information. These investments are included in Level 2 and primarily comprise our portfolio of corporate debt securities, bank certificates of deposit, government-sponsored enterprise, municipal securities and asset-backed securities.

**Management's Discussion and Analysis of Financial Condition and Results of Operations
September 26, 2009**

This Form 10-Q contains certain forward-looking statements including expectations of market conditions, challenges and plans, within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, and is subject to the Safe Harbor provisions created by that statute. Such forward-looking statements are based on management's current expectations and beliefs, including estimates and projections about our industries and include, but are not limited to, statements concerning financial position, business strategy, and plans or objectives for future operations. Forward-looking statements are not guarantees of future performance, and are subject to certain risks, uncertainties, and assumptions that are difficult to predict and may cause actual results to differ materially from management's current expectations. Such risks and uncertainties include those set forth in this Quarterly Report on Form 10-Q and our 2008 Annual Report on Form 10-K under the heading Item 1A. Risk Factors. The forward-looking statements in this report speak only as of the time they are made, and do not necessarily reflect management's outlook at any other point in time. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events, or for any other reason, however, readers should carefully review the risk factors set forth in other reports or documents we file from time to time with the SEC after the date of this Quarterly Report.

OVERVIEW

Cohu operates in three business segments. Our primary business is the development, manufacture, sale and servicing of test handling, burn-in related equipment and thermal sub-systems for the global semiconductor industry through our wholly-owned subsidiaries, Delta Design, Inc. and Rasco GmbH. This business is significantly dependent on capital expenditures by semiconductor manufacturers and test subcontractors, which in turn is dependent on the current and anticipated market demand for semiconductors that is subject to cyclical trends. We expect that the semiconductor equipment industry will continue to be cyclical and volatile in part because consumer electronics, the principal end market for integrated circuits, is a highly dynamic industry and demand is difficult to accurately predict. Our other businesses produce mobile microwave communications equipment (Broadcast Microwave Services, Inc.) and video cameras and accessories (Cohu Electronics Division).

Like other suppliers of test and assembly (backend) semiconductor equipment, our primary business has been severely impacted by the global recession and the dramatic decrease in consumer and business confidence that has resulted in lower sales of electronic products and sharply reduced demand for semiconductors and semiconductor equipment. Orders for backend semiconductor equipment were weak throughout fiscal 2008 and declined further in the fourth quarter of fiscal 2008 and the first quarter of fiscal 2009, as the worldwide decline in semiconductor sales created significant idle production capacity at integrated device manufacturers (IDMs) and test subcontractors. During this period, orders for device kits, spares and equipment upgrades, while lower than in 2008, were not as severely impacted as were systems, in part because semiconductor manufacturers frequently adjust production in response to highly dynamic demand from their customers, particularly for consumer electronics applications.

During the second and third quarters of fiscal 2009 we saw improvement in semiconductor equipment orders. According to the global trade organization, Semiconductor Equipment and Materials International (SEMI), orders for backend semiconductor equipment bottomed out in February 2009 and have increased every month thereafter. The recent trend is positive but orders still remain approximately 50% below the last peak levels of 2006.

Operating results in our semiconductor equipment business during the third quarter of fiscal 2009 were better than expected largely as a result of increased orders for systems and device kits, spares, equipment upgrades and repairs that were received and shipped in the third quarter. Orders in our semiconductor equipment business increased 41% compared to the second quarter of fiscal 2009 and were broad based across many products and customers. The sudden and sharp increase in demand was accompanied by short delivery lead times as customers that have resisted adding capacity during the recession are now struggling to keep pace with delivery requirements to their customers. As a result, we are under pressure to accelerate our deliveries and are ramping production in our California factory. Our plan to transfer production of certain handlers to Asia based contract manufacturers will continue, however we are extending the production of certain products in California longer than originally planned in order to meet customer delivery requirements.

Exposure related to inventories is common in the semiconductor equipment industry due to the narrow customer base, the custom nature of the products and inventory and the shortened product life cycles caused by rapid changes in semiconductor manufacturing technology. Our operating results in the last three years have been impacted by charges to cost of sales related to excess, obsolete and lower of cost or market inventory issues. These charges totaled approximately \$20.8 million during the three-year period ended December 27, 2008 (and approximately

Table of Contents

Cohu, Inc.
Management's Discussion and Analysis of Financial Condition and Results of Operations
September 26, 2009

\$4.2 million in the nine-month period ended September 26, 2009) and were primarily the result of decreases or frequent changes in customer forecasts and, to a lesser extent, changes in our sales product mix.

Our non-semiconductor equipment businesses comprised approximately 18% of our consolidated revenues during the last three years (31.8% in the nine-month period ended September 26, 2009). Our microwave communications business designs, manufactures and sells microwave communications equipment, antenna systems and associated equipment. These products are used in the transmission of video, audio and telemetry. Applications for these microwave data-links include unmanned aerial vehicles (UAVs), public safety, security, surveillance and electronic news gathering. Customers for these products are government agencies, public safety organizations, UAV program contractors, television broadcasters and other commercial entities. During fiscal 2009 our microwave communications business has achieved record operating income as a result of higher sales volume and improved gross margins realized through favorable product mix and product redesign programs initiated in fiscal 2008 to reduce the cost of certain systems. Additionally, during the third quarter of fiscal 2009, we closed an outstanding letter of credit that had been issued to the United Arab Emirates (UAE) to ensure our compliance under an equipment supply agreement and recognized \$0.8 million of deferred profit. Demand for our microwave communications equipment, particularly by public safety and government surveillance related customers, remains strong although obtaining additional export licenses may delay shipments to certain foreign customers.

Our video camera business was profitable for the third quarter and for the first nine months of fiscal 2009. This business provides a wide selection of video cameras and related products, specializing in video solutions for security, surveillance and traffic monitoring. Customers for these products are distributed among security, surveillance, traffic control/management, scientific imaging and machine vision.

Our management team uses several performance metrics to manage our businesses. These metrics mainly focus on near-term forecasts due to the short-term nature of our backlog and include (i) orders and backlog for the most recently completed quarter and the forecast for the next quarter; (ii) inventory levels and related excess exposures typically based on the forecast for the next twelve months; (iii) gross margin and other operating expense trends; (iv) cash flow; (v) industry data and trends noted in various publicly available sources; and (vi) competitive factors and information. Due to the short-term nature of our order backlog that historically has represented about three months of business and the inherent volatility of the semiconductor equipment business, our past performance is frequently not indicative of future near term operating results or cash flows.

Application of Critical Accounting Estimates and Policies

Our discussion and analysis of our financial condition and results of operations are based upon our interim condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We base our estimates on historical experience, forecasts and on various other assumptions that are believed to be reasonable under the circumstances, however actual results may differ from those estimates under different assumptions or conditions. The methods, estimates and judgments we use in applying our accounting policies have a significant impact on the results we report in our financial statements. Some of our accounting policies require us to make difficult and subjective judgments, often as a result of the need to make estimates of matters that are inherently uncertain. Our most critical accounting estimates that we believe are the most important to an investor's understanding of our financial results and condition and require complex management judgment include:

revenue recognition, including the deferral of revenue on sales to customers, which impacts our results of operations;

estimation of valuation allowances and accrued liabilities, specifically product warranty, inventory reserves and allowance for bad debts, which impact gross margin or operating expenses;

the recognition and measurement of current and deferred income tax assets and liabilities and the valuation allowance on deferred tax assets, which impact our tax provision;

the assessment of recoverability of long-lived assets including goodwill and other intangible assets, which primarily impacts gross margin or operating expenses if we are required to record impairments of assets or accelerate their depreciation; and

Table of Contents**Cohu, Inc.****Management's Discussion and Analysis of Financial Condition and Results of Operations
September 26, 2009**

the valuation and recognition of share-based compensation, which impacts gross margin, research and development expense, and selling, general and administrative expense.

Below, we discuss these policies further, as well as the estimates and judgments involved. We also have other policies that we consider key accounting policies; however, these policies typically do not require us to make estimates or judgments that are difficult or subjective.

Revenue Recognition: We generally recognize revenue upon shipment and title passage for established products (i.e., those that have previously satisfied customer acceptance requirements) that provide for full payment tied to shipment. Revenue for products that have not previously satisfied customer acceptance requirements or from sales where customer payment dates are not determinable is recognized upon customer acceptance. For arrangements containing multiple elements, the revenue relating to the undelivered elements is deferred at estimated fair value until delivery of the deferred elements.

Accounts Receivable: We maintain an allowance for bad debts for estimated losses resulting from the inability of our customers to make required payments. If the financial condition of our customers deteriorates, resulting in an impairment of their ability to make payments, additional allowances may be required.

Warranty: We provide for the estimated costs of product warranties in the period sales are recognized. Our warranty obligation estimates are affected by historical product shipment levels, product performance and material and labor costs incurred in correcting product performance problems. Should product performance, material usage or labor repair costs differ from our estimates, revisions to the estimated warranty liability would be required.

Inventory: The valuation of inventory requires us to estimate obsolete or excess inventory as well as inventory that is not of saleable quality. The determination of obsolete or excess inventory requires us to estimate the future demand for our products. The demand forecast is a direct input in the development of our short-term manufacturing plans. We record valuation reserves on our inventory for estimated excess and obsolete inventory and lower of cost or market concerns equal to the difference between the cost of inventory and the estimated market value based upon assumptions about future product demand, market conditions and product selling prices. If future product demand, market conditions or product selling prices are less than those projected by management or if continued modifications to products are required to meet specifications or other customer requirements, increases to inventory reserves may be required which would have a negative impact on our gross margin.

Income Taxes: We estimate our liability for income taxes based on the various jurisdictions where we conduct business. This requires us to estimate our (i) current tax exposure; (ii) temporary differences that result from differing treatment of certain items for tax and accounting purposes and (iii) unrecognized tax benefits. Temporary differences result in deferred tax assets and liabilities that are reflected in the consolidated balance sheet. The deferred tax assets are reduced by a valuation allowance if, based upon all available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized. Establishing, reducing or increasing a valuation allowance in an accounting period results in an increase or decrease in tax expense in the statement of operations. We must make significant judgments to determine the provision for income taxes, deferred tax assets and liabilities, unrecognized tax benefits and any valuation allowance to be recorded against deferred tax assets. Our gross deferred tax asset balance as of September 26, 2009 was approximately \$29 million, with a valuation allowance of approximately \$24 million. The deferred tax assets consist primarily of deductible temporary differences and tax credit and net operating loss carryforwards.

Contingencies: We are subject to certain contingencies that arise in the ordinary course of our businesses which require us to assess the likelihood that future events will confirm the existence of a loss or an impairment of an asset. If a loss or asset impairment is probable and the amount of the loss or impairment is reasonably estimable, we accrue a charge to operations in the period such conditions become known.

Goodwill, Intangible and Long-Lived Assets: Goodwill and other intangible assets with indefinite useful lives are not amortized, but are reviewed annually for impairment. Our annual testing date is October 1 and we did not recognize any goodwill impairment as a result of performing this annual test in 2008. Other events and changes in circumstances may also require goodwill to be tested for impairment between annual measurement dates. While a decline in stock

price and market capitalization is not specifically cited as a goodwill impairment indicator, a company's stock price and market capitalization should be considered in determining whether it is more likely than not that the fair value of a reporting unit is less than its book value. The financial and credit market volatility directly impacts our fair value measurement through our stock price that we use to determine our market

Table of Contents

Cohu, Inc.
Management's Discussion and Analysis of Financial Condition and Results of Operations
September 26, 2009

capitalization. During times of volatility, significant judgment must be applied to determine whether stock price changes are a short-term swing or a longer-term trend. As of September 26, 2009, we do not believe there have been any events or circumstances that would require us to perform an interim goodwill impairment review, however, a sustained decline in Cohu's market capitalization below book value could lead us to determine, in a future period, that an interim goodwill impairment review is required and may result in an impairment charge which could have a significant negative impact on our results of operations.

Share-based Compensation: Share-based compensation expense related to stock options is recorded based on the fair value of the award on its grant date which we estimate using the Black-Scholes valuation model.

Share-based compensation expense related to restricted stock unit awards is calculated based on the market price of our common stock on the grant date, reduced by the present value of dividends expected to be paid on our common stock prior to vesting of the restricted stock unit.

Recently Adopted Accounting Pronouncements: In June 2009, the Financial Accounting Standards Board (FASB) issued new accounting guidance entitled, *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles – a replacement of FASB Statement No. 162* , which identifies the sources of accounting principles and the framework for selecting the principles used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles (GAAP). This new guidance is effective for financial statements issued for interim and annual periods ending after September 15, 2009. The adoption of this guidance has changed how we reference various elements of GAAP when preparing our financial statement disclosures, but did not have an impact on our financial position, results of operations or cash flows.

In May 2009, the FASB issued new accounting guidance on subsequent events. The objective of this guidance is to establish general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. This new accounting guidance was effective for interim and annual periods ending after June 15, 2009. The impact of adopting this new guidance had no effect on the accompanying condensed consolidated financial statements. See *Basis of Presentation* above for the related disclosures.

In December 2007, the FASB issued new accounting guidance on business combinations which establishes principles and requirements for the reporting entity in a business combination, including recognition and measurement in the financial statements of the identifiable assets acquired, the liabilities assumed, and any non-controlling interest in the acquiree. This guidance also establishes disclosure requirements to enable financial statement users to evaluate the nature and financial effects of the business combination. These changes are effective on a prospective basis for all business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008, and interim periods within those fiscal years. This guidance was effective for our fiscal year beginning in 2009 and we expect that it will have an impact on our consolidated financial statements, but the nature and magnitude of the specific effects will depend upon the nature, terms and size of the acquisitions we consummate subsequent to our adoption of the new guidance.

In February 2008, the FASB issued new accounting guidance on fair value measurements and disclosures for nonfinancial assets and nonfinancial liabilities disclosed at fair value in the financial statements on a recurring basis. We applied the provisions of this new guidance to our financial statement disclosures beginning in the first quarter of 2009. See Note 9, *Cash and Cash Equivalents and Short Term Investments*, for additional information.

Recently Issued Accounting Standards: In June 2009, the FASB issued new accounting guidance on consolidation of variable interest entities, which include: (1) the elimination of the exemption for qualifying special purpose entities, (2) a new approach for determining who should consolidate a variable-interest entity, and (3) changes to when it is necessary to reassess who should consolidate a variable-interest entity. This new guidance is effective as of the beginning of interim and annual reporting periods that begin after November 15, 2009, which for us would be December 27, 2009, the first day of our 2010 fiscal year and adoption of this new guidance is not expected to have a

material impact on our consolidated financial position or results of operations.

In December, 2008, we purchased Rasco. The results of Rasco's operations have been included in our consolidated financial statements since that date.

Third Quarter of Fiscal 2009 Compared to Third Quarter of Fiscal 2008***Net Sales***

Our net sales decreased 8.2% to \$44.1 million in 2009, compared to net sales of \$48.0 million in 2008. Sales of semiconductor equipment in the third quarter of fiscal 2009 decreased 16.4% from 2008 and accounted for 72.3% of consolidated net sales in 2009 versus 79.3% in 2008. As noted in the Overview above, worldwide demand for semiconductors has been dramatically reduced by the global recession resulting in significant idle capacity for semiconductor manufacturers and lower demand for semiconductor equipment. During the third quarter of fiscal 2009 we saw better than expected demand for semiconductor test handlers, device kits, spares, equipment upgrades and repairs, as our customers adjusted their production to respond to highly dynamic demand from their customers, many of whom produce consumer electronics.

Sales of microwave communications equipment accounted for 19.4% of consolidated net sales in the third quarter of fiscal 2009 and increased 50.5% when compared to the same period in fiscal 2008. The increase in sales of our microwave communications business during the third quarter of fiscal 2009 was attributable to increased product shipments to unmanned air vehicle program contractors.

Sales of video cameras accounted for 8.3% of consolidated net sales in 2009 and decreased \$0.6 million or 13.7% when compared to the same period of fiscal 2008.

Gross Margin

Gross margin consists of net sales less cost of sales. Cost of sales consists primarily of the cost of materials, assembly and test labor, and overhead from operations. Our gross margin can fluctuate due to a number of factors, including, but not limited to, the mix of products sold, product support costs, inventory reserve adjustments, and utilization of manufacturing capacity. Our gross margin, as a percentage of net sales, increased to 36.8% in 2009 from 36.6% in 2008. During the third quarter of fiscal 2009, our gross margin was favorably impacted by the recognition of \$0.8 million of deferred profit by our microwave communications equipment business related to its contract with the UAE. In 2006 we recorded a charge to cost of sales of approximately \$4.6 million for excess and obsolete inventory as a result of a decline in customer forecasts for a burn-in system, acquired from Unisys Unigen operation (Unigen). In the third quarter of fiscal 2008 we sold certain of this inventory and our gross margin was favorably impacted by approximately \$1.3 million.

Our gross margin has been impacted by charges to cost of sales related to excess, obsolete and lower of cost or market inventory issues. We compute the majority of our excess and obsolete inventory reserve requirements using a one-year inventory usage forecast. During the third quarter of fiscal 2009 and 2008, we recorded net charges to cost of sales of approximately \$0.6 million and \$0.1 million, respectively, for excess and obsolete inventory. While we believe our reserves for excess and obsolete inventory and lower of cost or market concerns are adequate to cover known exposures at September 26, 2009, reductions in customer forecasts or continued modifications to products, as a result of our failure to meet specifications or other customer requirements, may result in additional charges to operations that could negatively impact our gross margin in future periods. Conversely, if our actual inventory usage is greater than our forecasted usage, our gross margin in future periods may be favorably impacted.

Table of Contents

Cohu, Inc.
Management's Discussion and Analysis of Financial Condition and Results of Operations
September 26, 2009

Research and Development Expense (R&D Expense)

R&D expense consists primarily of salaries and related costs of employees engaged in ongoing research, product design and development activities, costs of engineering materials and supplies, and professional consulting expenses. The 2009 expense includes R&D costs associated with Rasco which was acquired on December 9, 2008. R&D expense as a percentage of net sales was 18.8% in 2009, compared to 19.0% in 2008, decreasing from \$9.1 million in 2008 to \$8.3 million in 2009 due primarily to a \$2.3 million decrease from reduced labor and material costs associated with new product development within our semiconductor equipment business, partially offset by \$1.1 million in incremental R&D expense resulting from the acquisition of Rasco.

Selling, General and Administrative Expense (SG&A Expense)

SG&A expense consists primarily of salaries and benefit costs of employees, commission expense for independent sales representatives, product promotion and costs of professional services. The 2009 expense includes SG&A costs associated with Rasco. SG&A expense as a percentage of net sales decreased to 19.8% in 2009, from 20.3% in 2008. SG&A expense decreased to \$8.7 million in 2009 from \$9.7 million in 2008 due primarily to lower business volume and actions taken to reduce costs, partially offset by an increase of \$1.4 million in incremental SG&A expense resulting from the acquisition of Rasco.

Interest and other, net

Interest and other, net was approximately \$0.3 million and \$1.4 million in the third quarter of fiscal 2009 and 2008, respectively. Our interest income was lower in 2009 due to a decrease in our cash and investment balances as a result of the Rasco acquisition which occurred in the fourth quarter of 2008 and lower short-term interest rates.

Income Taxes

Companies are required to assess whether a valuation allowance should be recorded against their deferred tax assets (DTAs) based on the consideration of all available evidence, using a more likely than not realization standard. The four sources of taxable income that must be considered in determining whether DTAs will be realized are, (1) future reversals of existing taxable temporary differences (i.e. offset of gross deferred tax assets against gross deferred tax liabilities); (2) taxable income in prior carryback years, if carryback is permitted under the tax law; (3) tax planning strategies and (4) future taxable income exclusive of reversing temporary differences and carryforwards.

In assessing whether a valuation allowance is required, significant weight is to be given to evidence that can be objectively verified. We have evaluated our DTAs each reporting period, including an assessment of our cumulative income or loss over the prior three-year period and future periods, to determine if a valuation allowance was required. A significant negative factor in our assessment at June 27, 2009 was the possibility that Cohu may be in a three-year historical cumulative loss as of the end of the fourth quarter of fiscal 2009, as highly profitable quarters in the second half of 2006 are removed from the rolling three-year calculation. This, combined with uncertain near-term market and economic conditions, reduced our ability to rely on projections of future taxable income in assessing the realization of our DTAs.

After a review of the four sources of taxable income described above and after considering the possibility of being in a three-year cumulative loss in the fourth quarter of 2009, we recorded an increase in our valuation allowance, with a corresponding charge to our income tax provision, of approximately \$19.6 million in the second quarter of fiscal 2009. Our DTA valuation allowance at September 26, 2009 was approximately \$24 million on gross deferred tax assets of approximately \$29 million. The remaining \$5 million of gross deferred tax assets for which a valuation allowance was not recorded are realizable through future reversals of existing taxable temporary differences or taxable income in carryback years. As the realization of DTAs is determined by tax jurisdiction, the significant deferred tax liability recorded as part of the 2008 acquisition of Rasco GmbH, a German corporation, was not a source of taxable income in assessing the realization of our DTAs in the U.S.

The income tax provision (benefit) included in the condensed consolidated statements of operations for the three months ended September 26, 2009 and September 27, 2008 is based on the estimated annual effective tax rate for the entire year. These estimated effective tax rates are subject to adjustment in subsequent quarterly periods as our

estimates of pretax income or loss for the year are increased or decreased. The effective tax rates differ from the U.S. federal statutory rate primarily due to changes in the valuation allowance and unrecognized tax benefits, state taxes, research and development tax credits, foreign income taxed at lower rates, interest on unrecognized tax

Table of Contents**Cohu, Inc.****Management's Discussion and Analysis of Financial Condition and Results of Operations
September 26, 2009**

benefits and provisions of authoritative guidance related to share-based compensation which do not allow deferred tax benefits to be initially recognized on compensation expense related to incentive stock options and employee stock purchase plans.

There was no material change to our unrecognized tax benefits and interest accrued related to unrecognized tax benefits during the period ended September 26, 2009 except for a decrease of approximately \$0.5 million related to the closure of our 2005 U.S. federal income tax return examination in September, 2009. The Internal Revenue Service is currently conducting a routine review of our 2008 U.S. federal income tax return. We do not expect that the total amount of unrecognized tax benefits will significantly change over the next 12 months.

As a result of the factors set forth above, our net loss was \$71,000 in 2009, compared to net income of \$37,000 in 2008.

First Nine Months of Fiscal 2009 Compared to First Nine Months of Fiscal 2008***Net Sales***

Our net sales decreased 24.8% to \$119.1 million in 2009, compared to net sales of \$158.3 million in 2008. Sales of semiconductor equipment in the first nine months of fiscal 2009 decreased 34.4% from 2008 and accounted for 68.2% of consolidated net sales in 2009 versus 78.2% in 2008. Worldwide demand for semiconductors has been dramatically reduced by the global recession resulting in significant idle capacity for semiconductor manufacturers and lower demand for semiconductor equipment.

Sales of microwave communications equipment accounted for 21.8% of consolidated net sales in 2009 and increased 22.5% when compared to the same period in fiscal 2008. The increase in sales of our microwave communications business during the first nine months of fiscal 2009 was attributable to increased product shipments to unmanned air vehicle program contractors and international customers within the public safety sector.

Sales of video cameras accounted for 10.0% of consolidated net sales in 2009 and decreased \$1.5 million or 10.8% when compared to the same period of fiscal 2008. The primary cause of the decrease in 2009 sales is delayed funding for certain state and local government projects as a result of the economic recession. Additionally, video camera sales in the first nine months of fiscal 2008 benefitted from the recognition of \$0.5 million in deferred revenue upon the receipt of customer acceptance on a contract with a government subcontractor.

Gross Margin

Our gross margin, as a percentage of net sales, decreased to 30.2% in 2009 from 35.9% in 2008. During the first nine months of fiscal 2009 our gross margin was impacted by (i) the substantial decrease in the sales volume of our semiconductor equipment segment due to weak business conditions and (ii) charges to cost of sales of approximately \$4.2 million for excess and obsolete inventory. In 2006 we recorded a charge to cost of sales of approximately \$4.6 million for excess and obsolete inventory as a result of a decline in customer forecasts for a burn-in system, acquired from Unigen. In the first nine months of fiscal 2008 we sold certain of this inventory and our gross margin was favorably impacted by approximately \$4.5 million.

Research and Development Expense (R&D Expense)

R&D expense as a percentage of net sales was 20.2% in 2009, compared to 18.7% in 2008, decreasing in absolute dollars from \$29.6 million in 2008 to \$24.0 million in 2009. Decreased R&D expense in 2009 was primarily due to a \$8.9 million decrease in labor and material costs associated with new product development within our semiconductor equipment business partially offset by \$3.0 million of incremental R&D expense resulting from the acquisition of Rasco.

Selling, General and Administrative Expense (SG&A Expense)

SG&A expense as a percentage of net sales increased to 22.2% in 2009, from 17.5% in 2008. The increase in SG&A expense as a percentage of net sales is a result of lower sales in 2009. SG&A expense in absolute dollars decreased to \$26.4 million in 2009 from \$27.7 million in 2008 due primarily to lower business volume and actions taken to reduce costs, partially offset by an increase of \$4.6 million in incremental SG&A expense resulting from the acquisition of Rasco.

Table of Contents

Cohu, Inc.
Management's Discussion and Analysis of Financial Condition and Results of Operations
September 26, 2009

Interest and other, net

Interest and other, net was approximately \$1.1 million and \$4.3 million in the first nine months of fiscal 2009 and 2008, respectively. Our interest income was lower in 2009 due to a decrease in our cash and investment balances as a result of the Rasco acquisition which occurred in the fourth quarter of 2008 and lower short-term interest rates. During the first nine months of fiscal 2008 our interest income was negatively impacted by a loss of approximately \$0.4 million recorded on our short-term investment portfolio.

Income Taxes

The income tax provision included in the condensed consolidated statements of operations for the nine months ended September 26, 2009 and September 27, 2008 is based on the estimated annual effective tax rate for the entire year. These estimated effective tax rates are subject to adjustment in subsequent quarterly periods as our estimates of pretax income or loss for the year are increased or decreased. The effective tax rates differ from the U.S. federal statutory rate primarily due to changes in the valuation allowance, including the \$19.6 million increase in the valuation allowance recorded in the second quarter of 2009 as described above, and unrecognized tax benefits, state taxes, research and development tax credits, foreign income taxed at lower rates, interest on unrecognized tax benefits and provisions of authoritative guidance related to share-based compensation which do not allow deferred tax benefits to be initially recognized on compensation expense related to incentive stock options and employee stock purchase plans.

As a result of the factors set forth above, our net loss was \$28.9 million in 2009, compared to net income of \$2.2 million in 2008.

LIQUIDITY AND CAPITAL RESOURCES

Our business is dependent on capital expenditures by semiconductor manufacturers and test subcontractors that are, in turn, dependent on the current and anticipated market demand for semiconductors. Worldwide demand for semiconductors has been dramatically reduced by the global recession resulting in significant idle capacity for semiconductor manufacturers and lower demand for semiconductor equipment. In response to lower demand for our semiconductor equipment, we have implemented cost reduction programs aimed at aligning our ongoing operating costs with our currently expected revenues over the near term. These cost management initiatives include headcount reductions, pay cuts, suspension of the company's matching contribution to our 401(k) plan reduced work hours and mandatory time-off. The cyclical and volatile nature of our industry makes estimates of future revenues, results of operations and net cash flows difficult.

Our primary historical source of liquidity and capital resources has been cash flow generated by operations. We use cash to fund growth in our operating assets and to fund new products and product enhancements primarily through research and development.

Liquidity

Working Capital: The following summarizes our cash, cash equivalents, short-term investments and working capital:

<i>(in thousands)</i>	September 26, 2009	December 27, 2008	Decrease	Percentage Change
Cash, cash equivalents and short-term investments	\$ 87,273	\$ 88,385	\$ (1,112)	(1.3)%
Working capital	136,164	155,589	(19,425)	(12.5)%

Cash Flows

Operating Activities: Operating cash flows consist of net income (loss), adjusted for non-cash expenses and changes in operating assets and liabilities. Non-cash items include depreciation and amortization; non-cash share-based compensation expense and deferred income taxes. Our net cash provided by operating activities in the nine months

ended September 26, 2009 totaled \$3.7 million. Cash provided by operating activities was impacted by changes in current assets and liabilities and included increases in accounts receivable and accounts payable of \$2.7 million and \$4.6 million, respectively, and decreases in inventory, customer advances and accrued compensation, warranty and other liabilities of \$1.9 million, \$1.4 million and \$1.5 million, respectively. Accounts receivable increased within our semiconductor equipment business as a result of shipments of next generation handlers made late in the third quarter of fiscal 2009. The increase in accounts payable was a result of the timing of cash payments primarily within

Table of Contents**Cohu, Inc.****Management's Discussion and Analysis of Financial Condition and Results of Operations
September 26, 2009**

our semiconductor equipment business. Inventory decreased primarily due to provisions for excess and obsolete inventory recorded within our semiconductor equipment segment due to weak business conditions which were off-set, in part, by inventory purchases made to support the production of our next generation test handlers. The reduction in customer advances was a result of product shipments made to customers by our microwave communications equipment business during the first nine months of 2009 which had been paid for in previous periods. The decrease in accrued compensation, warranty and other liabilities was primarily a result of decreased warranty accruals recorded by our semiconductor equipment business as a result of lower business volume which resulted in fewer system sales.

Investing Activities: Investing cash flows consist primarily of cash used for capital expenditures in support of our businesses, proceeds from investment maturities, asset disposals and divestitures, and cash used for purchases of investments and business acquisitions. Our net cash provided by investing activities in the first nine months of fiscal 2009 totaled \$8.8 million and was primarily the result of \$45.3 million in net proceeds from sales and maturities of short-term investments, offset by \$34.9 million in cash used for purchases of short-term investments. We invest our excess cash, in an attempt to seek the highest available return while preserving capital, in short-term investments since excess cash is only temporarily available and may be required for a business-related purpose. Other expenditures in the first nine months of fiscal 2009 included purchases of property, plant and equipment of \$1.5 million. The purchases of property, plant and equipment were primarily made to support activities in our semiconductor equipment and microwave communications equipment businesses and consisted primarily of equipment used in engineering, manufacturing and related functions.

Financing Activities: Cash flows from financing activities consist primarily of net proceeds from the issuance of common stock under our stock option and employee stock purchase plans and cash used to pay dividends to our stockholders. We issue stock options and maintain an employee stock purchase plan as components of our overall employee compensation. We paid dividends totaling \$4.2 million, or \$0.18 per common share during the first nine months of 2009. Future quarterly dividends are subject to our cash liquidity, capital availability and periodic determinations by our Board of Directors that cash dividends are in the best interests of our stockholders.

Capital Resources

We have a secured letter of credit facility (the "Secured Facility") under which Bank of America, N.A., has agreed to administer the issuance of letters of credit on behalf of Cohu and our subsidiaries. The Secured Facility requires us to maintain deposits of cash or other approved investments, which serve as collateral, in amounts that approximate our outstanding letters of credit. As of September 26, 2009, we had approximately \$0.3 million of standby letters of credit outstanding.

We expect that we will continue to make capital expenditures to support our business and we anticipate that present working capital will be sufficient to meet our operating requirements for at least the next twelve months.

Contractual Obligations and Off-Balance Sheet Arrangements

Contractual Obligations: Our significant contractual obligations consist of operating leases that have not changed materially from those disclosed in our Annual Report on Form 10-K for the year ended December 27, 2008.

Purchase Commitments: From time to time, we enter into commitments with our vendors to purchase inventory at fixed prices or in guaranteed quantities. We are not able to determine the aggregate amount of such purchase orders that represent contractual obligations, as purchase orders may represent authorizations to purchase rather than binding agreements. Our purchase orders are based on our current manufacturing needs and are fulfilled by our vendors within relatively short time horizons. We typically do not have significant agreements for the purchase of raw materials or other goods specifying minimum quantities or set prices that exceed our expected requirements for the next three months.

Off-Balance Sheet Arrangements: During the ordinary course of business, we provide standby letters of credit instruments to certain parties as required. As of September 26, 2009, the maximum potential amount of future payments that we could be required to make under these standby letters of credit was approximately \$0.3 million. No liability has been recorded in connection with these arrangements beyond those required to appropriately account for

the underlying transaction being guaranteed. We do not believe, based on historical experience and information currently available, that it is probable that any amounts will be required to be paid under these arrangements.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Interest rate risk.

At September 26, 2009 our investment portfolio includes fixed-income securities with a fair value of approximately \$48.2 million. These securities are subject to interest rate risk and will decline in value if interest rates increase. Due to the relatively short duration of our investment portfolio, an immediate ten percent change in interest rates (e.g. 2.00% to 2.20%) would not have a material impact on our financial condition or results of operations.

Foreign currency exchange risk.

We conduct business on a global basis and, as such, we are potentially exposed to adverse as well as beneficial movements in foreign currency exchange rates. Except for our subsidiaries located in Germany, which conduct business in Euros, we generally conduct business, including sales to foreign customers, in U.S. dollars and as a result we have limited foreign currency exchange rate risk. The effect of an immediate ten percent change in foreign exchange rates would not have a material impact on our financial condition or results of operations.

Item 4. Controls and Procedures.

(a) Evaluation of Disclosure Controls and Procedures. Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we evaluated the effectiveness of our disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended. Based on this evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this quarterly report.

It should be noted that any system of controls, however well designed and operated, can provide only reasonable, and not absolute, assurance that the objectives of the system are met. In addition, the design of any control system is based in part upon certain assumptions about the likelihood of future events. Because of these and other inherent limitations of control systems, there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions, regardless of how remote. Our disclosure controls and procedures are designed to provide reasonable assurance of achieving their objectives and our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level.

(b) Changes in Internal Controls. During the last fiscal quarter, there have been no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
