SECTION 7 Regulation FD

Item 7.01 Regulation FD

AAM's fourth quarter of 2009 interim financial results

AAM was profitable in the months of October 2009 and November 2009.

AAM's Outlook

AAM expects to file a U.S. tax refund during the fourth quarter of 2009 related to the HR 3548 Bill titled

Worker, Homeownership, and Business Assistance Act of 2009. Among its provisions, the bill enables AAM to carryback its 2008 net operating loss 5 years (from 2 previously) to 2003. The refund related to this special 5-year carryback election is expected to range from \$40 million to \$50 million.

AAM expects sales to double from \$1.5 billion in 2009 to approximately \$3.0 billion by 2013. This sales projection is based on the anticipated launch schedule for AAM's \$1.0 billion new and incremental business backlog and the assumption that the U.S. Seasonally Adjusted Annual Rate of sales (SAAR) increases from approximately 10 million vehicle units in 2009 to a range of 13 million to 14 million vehicle units in 2013.

AAM expects sales to range from \$1.8 billion to \$2.0 billion in 2010.

AAM expects cash payments for restructuring costs to range from \$40 million to \$50 million in 2010.

Substantially all of these expected payments for restructuring costs relate to AAM's obligations under the Buydown Program for United Auto Workers (UAW) represented associates at AAM's Detroit, Michigan; Three Rivers, Michigan; and Cheektowaga, New York manufacturing facilities and related hourly attrition programs.

AAM expects to generate earnings (loss) before interest expense, income taxes and depreciation and amortization (EBITDA) as a percentage of sales in the range of 12% to 15% beginning in 2010. AAM believes that EBITDA is a meaningful measure of performance as it is commonly utilized by management and investors to analyze operating performance and entity valuation. AAM management, the investment community and the banking institutions routinely use EBITDA, together with other measures, to measure AAM's operating performance relative to other Tier 1 automotive suppliers. EBITDA should not be construed as income from operations, net income or cash flow from operating activities as determined under generally accepted accounting principles (GAAP). Other companies may calculate EBITDA differently.

AAM's cash and liquidity:

As of November 30, 2009, AAM had approximately \$406 million of liquidity, consisting of available cash, short-term investments and committed borrowing capacity on AAM's U.S credit facilities, including the GM Second Lien Term Credit Facility. This compares to a committed liquidity position of approximately \$373 million at September 30, 2009.

AAM's capital spending:

AAM expects to reduce capital spending to a run rate of 4%-6% of sales beginning in 2010.
